1892.

NEW SOUTH WALES.

CIVIL SERVICE ACT, 1884.

(REPORT OF BOARD FOR 1891.)

Presented to Parliament, pursuant to Act 48 Vic. Ao. 24, sec. 62.

REPORT

OF THE

CIVIL SERVICE BOARD OF NEW SOUTH WALES,

For the Year 1891.

To His Excellency the Right Honorable Victor Albert George, Earl of Jersey, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies:

MAY IT PLEASE YOUR EXCELLENCY,—

We have the honor to submit to your Excellency in Council our Reportfor the year 1891, in terms of section 62 of the "Civil Service Act, 1884."

In conformity with the provisions of the Act, that one member shall retire annually, Thomas Littlejohn, Esq., retired on the 31st December, 1890, and the vacancy thus occasioned was filled by the appointment of Joseph H. Storey, Esq.

The Honorable Geoffrey Eagar was elected Chairman at a meeting of the Board held on January 8, but was removed by death on the 12th September, and at the ensuing meeting Alexander Oliver, Esq., M.A., the Parliamentary Draftsman, and now President of the Land Appeal Court, was elected to the position of Chairman, and A. C. Fraser, Esq., Under Secretary for Justice, was appointed to the vacant seat on the Board.

84---A

Forty-four

[1,353 copies—Approximate Cost of Printing (labour and materiai), £33 0s. 4d.]

Forty-four meetings of the Board have been held for the transaction of business during the year.

The returns furnished in terms of sections 25 and 62 show-

Increases in the number of persons employed in the Public Service under the following heads, viz.:—

Reference has been made in previous Reports to the large number of persons appointed as temporary officers under section 31. During 1891, 376 persons were so appointed. The appointments in previous years were—1887, 99; 1888, 257; 1889, 138; 1890, 179; the number for 1891 being largely in excess of any previous year. This may be due in some measure to the number of persons employed on the purely temporary work of census compilation, which is given in the returns of the Statistician In the Lands Department there were 56 appointments; in the Department of Works, 96; and in the Department of Agriculture, 16. These Departments require specially-trained officers for limited periods, such as for erection of bridges, land or road surveys, engineers for reclamations or waterworks, draftsmen, rabbit. inspectors or inspectors of conditional purchases, or agricultural experts. works upon which they are employed may occupy periods ranging from a few months to several years, and their pay is derived not from a voted salary but from General Construction Votes or Loans, or Contingent Votes. When the works are completed the officer's services may be dispensed with, or he may be transferred to other works of a similar character. It is assumed that persons so appointed produce proof of special aptitude or training satisfactory to the Minister appointing them; but the Board have no opportunity of inquiring into these matters, their knowledge being limited to a notification that the Minister has been pleased to make the appointment.

An objectionable aspect of the system of temporary appointments may be seen in connection with the clerical division of the Service. Entry to this division is either by temporary or probationary Service. The probationer must give proof of educational attainments of a certain standard, and must be under 25 years of age, and his salary at first appointment is limited to £50 per annum. The temporary clerk is required to furnish no proof of educational attainments, may be appointed at any age, and his salary may be any amount the Minister may approve.

The

The Board have, in their previous Reports, made suggestions with a view to amendments of the Civil Service Act, and it is deemed desirable that some of these suggestions should be repeated in the present Report.

In reply to a Minute of the late Sir Alexander Stuart, on the subject of amending the Act, in which he asked to be furnished with any views or suggestions from the Board, attention was called to the inequitable operation of the provisions of section 55, which requires that a retiring officer should be charged with 4 per cent. on the total salary received by him prior to the Act coming into operation, and the Board suggested that the deduction of 4 per cent. on back salary should be eliminated from the Act. They also drew attention to a want of harmony between the 16th, 48th, 52nd, and 53rd sections, and suggested that an officer in receipt of salary and allowances should pay 4 per cent. on the total amount of both, instead of, as at present, on salary only.

In the Report for the year 1887 reference was again made to the inequitable operation of section 55. In that Report attention was also invited to the necessity for amendment of section 57, so as to limit, within a prescribed period, the option granted to any person permanently employed on wages to apply to be admitted as a contributor to the Superannuation Account, such option being shown to be used to the great disadvantage of the Account.

In the Report for 1889 a slight verbal alteration of the 27th section was recommended for the purpose of removing any misconception as to the duties of the heads of Departments under this section, and previous recommendations in reference to other sections were again referred to.

An Amending Bill, embodying these and other suggested improvements, was prepared by the Board and submitted to Parliament by the Colonial Secretary, in 1886, but has not since been dealt with.

SUPERANNUATION ACCOUNT.

The balance at credit of the Civil Service Superannuation Account, a statement of which is submitted herewith in accordance with the 62nd section of the Act, was, on the 31st December, 1890, £406,585 19s. 1d. This was augmented during the year by receipts to the amount of £105,018 3s. 5d., making the total £511,604 2s. 6d. The disbursements during the year were £69,692 9s. 8d., leaving a balance to the credit of the Superannuation Account on 31st December, 1891, of £441,911 12s. 10d., and showing an increase of the Credit Balance during the year of £35,325 13s. 9d.

The number of officers who have retired on pensions since the Act came into operation on 1st January, 1885, to 31st December, 1891, is 523, and the amount to which they were entitled £69,541 18s. 9d. per annum. Two pensions have been assigned, but are not yet payable, amounting to £635 11s. Sixty-one pensioners, whose pensions amounted to £7,750 11s. per annum, have died since 1st January,

1885, reducing the amount to £61,791 7s. 9d. During the same period gratuities, amounting to £76,237 4s. 10d., have been granted to 508 recipients. The following statement shows the items in detail:—

To persons whose services have been dispensed with for purposes of retrenchment—

		£	s.	d.	
		34,714	16	7	
2 pensioners (pensions not y	ret				
no-roble)		635	11	0	
223 gratuitants	•••	35,893	9	9	

Retirements under 60 years of age, consequent on ill-health-

For 118 pensioners 12,665 11 5 87 gratuitants 14,334 19 5

Officers who have retired voluntarily, being over 60 years of age-

•			${\mathfrak L}$	s.	d.
197 pensioners	 	 	22,161	10	9
36 gratuitants	 	 •••	5,291	16	0

Officers who have received injury while in the execution of their duty-

		${f \pounds}$	s.	d.
8 gratuitants	 	$2,\!172$	12	1
Gratuities to 154 widows	 • • •	18,544	7	7

There are 17 pensioners under Schedule B, receiving £3,430 per annum.

As shown above, the pensions now payable amount to £61,791 7s. 9d., of which £29,171 6s. 2d. are paid to officers who were entitled to retire on account of their age being over 60, or were certified by medical report to be permanently The residue of the amount, viz., incapacitated for performance of their duty. £32,620 1s. 7d., is accounted for by the retrenchment policy effected under section 46 of the Civil Service Act. In the last Report attention was directed to this very serious disturbing element affecting as it does the very functions of the Civil Service systems of superannuation and gratuities. It is right, however, to state that 110 of the pensioners (representing a total of pensions equal to £18,359 13s. 4d.) had reached the age of 60 years, and being considered unfit for the performance of their duties, were compulsorily retired. It is questionable whether the Legislature intended the section referred to to be used for that purpose. In every way this retrenchment policy has had a detrimental effect on the Superannuation Account, heavy and unexpected claims have fallen upon it in the first few years of its existence. The strain on the Fund has been increased by the retirement of many young men in vigorous health, who would not otherwise be eligible to claim a pension until they should attain the age of 60 years. These officers have made no adequate contributions to the Fund, and the amounts received from the Government would not provide, on an average, for two years of their pensions. of urgent importance that some reasonable adjustment of this matter should be arrived at, as the pensions to officers compulsorily retired now exceed the pensions payable under all the other sections of the Act.

The Board are further of opinion that section 55 of the Act, which requires officers to submit to an abatement of their pensions to cover the 4 per centum contribution on salaries paid before the establishment of the Fund, should be so amended (and necessarily with retrospective operation) from the 1st day of January, 1885, that the payment of back contributions may be charged to the Consolidated Revenue of the Colony.

The

The second triennial period for an actuarial examination of the state and sufficiency of the Superannuation Account, as provided in section 54 of the Act, expired on 31st December, 1890, and the Board, after preparing as far as possible the data available for the purpose, took the necessary steps for the appointment of an actuary to carry out the provisions of the section. Mr. J. B. Trivett having been appointed, his actuarial investigation, which has been received, is now under consideration of the Board, and will be dealt with in a Supplementary Report.

1892.

NEW SOUTH WALES.

CIVIL SERVICE ACT, 1884.

(SUPPLEMENTARY REPORT OF BOARD FOR 1891.)

Presented to Parliament, pursuant to Act 48 Vic. Ao. 24, sec. 62.

SUPPLEMENTARY REPORT

OF THE

CIVIL SERVICE BOARD OF NEW SOUTH WALES,

For the Year 1891.

To His Excellency the Right Honorable Victor Albert George, Earl of Jersey, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,-

We have the honor to submit a Supplementary Report on an actuarial examination of the state and sufficiency of the Civil Service Superannuation Account furnished by Mr. J. B. Trivett, the Actuary appointed, as directed by section 54 of the Civil Service Act, to report on the subject.

The investigation made by Mr. Trivett completed the second triennial period to the 31st December, 1890, and the results contained in Mr. Trivett's report will be found in the Appendix herewith.

Mr. Trivett reports in round numbers, and omitting pensions under Schedule B of the Constitution Act, that on the 31st December, 1890, there were 419 pensioners, drawing from the Fund £56,783 per annum, and the amount at the credit of the Fund was at that time £406,586.

The

The first triennial report furnished by Mr. Richard Teece, of the Australian Mutual Provident Society, showed a credit balance in favour of the Fund, but Mr. Teece declared the Fund to be in an insolvent condition. The second triennial report by Mr. Trivett declares, as the result of his investigation, that the insolvent condition indicated by Mr. Teece is found to be "most distinct and intensified."

The positive opinions given on this very important subject by the actuaries officially appointed as required by the Act, have suggested to us the propriety of carefully considering the causes which have led to the state of affairs described, the intention of the framers of the Bill, as introduced on the 3rd September, 1884, and the possible reconstruction of the present Act.

In a speech, from which the following extracts are taken, the then Premier said:—

"I have called into requisition the services of one of the ablest, if not the ablest, actuary in the Colony. The amount of salaries provided for under the Bill will be over one million annually, and if we deduct 3 per cent. as the contribution of the officers that will represent £30,000 per annum. The actuary has stated his belief that the 3 per cent. deduction from the salaries, and the £10,000 a year proposed by the Government, will form a fund that will bear the strain of all the claims likely to arise under the Bill, but he says he cannot reduce this to a scientific certainty until he has about five years' experience. My idea is that the solvency of the Fund is the chief thing at which we ought to aim."

It was held that the Fund should be guaranteed by the State, and that a fixed annual sum should be paid to the Fund from the Consolidated Revenue. These principles were embodied in clause 55 of the Bill, which proposed a payment annually of the sum of £10,000, and also that, in the event of a certificate from three actuaries being produced showing that the sum named was found insufficient, the amount necessary to maintain the Fund in a state of efficiency should be transferred from the Consolidated Revenue of the Colony.

It is, we think, clear that the calculations made by that eminent actuary the late Mr. Black were made on the expectation that the provisions contained in the proposed clause above quoted were sufficient to safely launch and maintain the Civil Service Fund, and that it would meet all its engagements by the collection of a 3 per cent. charge on the salaries of the officers engaged in the permanent service of the Government.

The Bill was conceived in a liberal spirit, and the Government in transferring a liability for pensions amounting at the time, as estimated by the actuaries, to about £561,516 to the newly-created Board, recognised the propriety of supporting the fund by a permanent subsidy and an all-powerful State guarantee.

Sir Alexander Stuart, speaking in reply on the 3rd September, 1884, said:—
"It amounts to this that the Fund must be actually guaranteed by the State—
in other words, that there shall be paid from the Consolidated Revenue Fund a certain amount annually—not a specified sum once and for all. To attempt to base the Fund on any other principle would be to be over generous to the present and unjust to the future, and this was really the cause of the failure of the old Fund."

In the preparation of this Report we have thought it desirable to find reasons for the apparently contradictory results between the expectations of the actuary, upon whose advice the contribution of 3 per cent. to the fund was proposed, and the results of a 4 per cent. actual contribution paid by the officers to date.

That the Fund is insolvent from an actuarial point of view there can be no doubt, and the condition of insolvency is in our opinion attributable to a departure from the original intentions of the framers of the Bill, and upon which Mr. Black made the requisite calculations preliminary to the introduction of the Civil Service Bill of 1884.

With all respect for the strong and perhaps well established reasons advanced by the actuaries by whom the triennial investigations of the Fund have been conducted, we are of opinion that a return to the principles upon which the Bill was first introduced, and a reconstruction of the Act, will bring the Fund in the course of a few years into a solvent condition.

In the statement of the Superannuation Account embodied in the Board's Report for 1891, one cause of its present unsatisfactory condition is clearly set forth, namely, that to enable certain Public Departments of the State to be administered with greater economy and efficiency, a very large number of officers had been dispensed with by the Government, and their pensions had become a charge upon the Superannuation Account to the extent of £32,620 ls. 7d. per annum. Mr. Trivett directs special attention to the fact that "an extraordinary influx of entered on pensions has taken place within the past four years. Many of these pensioners are in the prime of life, eighty-nine of them, or 21 per cent. of the entire pension list, being under the statutory age of 60 years, and having various terms ranging up to twenty-seven years before they would be legitimately due for retirement. No annuity fund, however well devised theoretically, can be expected to sustain such drastic inroads into its resources as are indicated in the above statement."

In the opinion of your Board, the framers of the Civil Service Act never contemplated that wholesale retirements of a compulsory character would be made a claim against the Superannuation Account, which is thus injuriously affected, in order to relieve the Consolidated Revenue of the salaries saved, estimated to amount to £76,469 per annum.

If the provisions of the Superannuation clauses of the Act are beneficial to members of the Civil Service, they are also largely beneficial to the Government and those Departments of the Public Service who through them have been enabled to dispense with unnecessary officers and to carry out reorganisations which were long needed and are now said to be working satisfactorily both as regards cost and efficiency.

Already the whole endowment of £100,000 has been absorbed, and more than absorbed, to pay these unexpected claims, and it cannot be contended that such pensions are an equitable charge on the Fund, composed, as it now is, entirely of the 4 per cent. deductions from the salaries of Civil Servants.

The provisions contained in the Act by which officers may claim a retiring allowance when their services are dispensed with by the Government, or by which they may retire at any age before 60 by reason of infirmity of body or mind, and

the granting of gratuities to widows and children, were perhaps justified by the proposal to grant to the Fund the sum of £10,000 per annum, and the support guaranteed by the right to draw upon the Consolidated Revenue in case of deficiency.

The clauses referred to remain a part of the Civil Service Act, but the proposed liberal support for the claims arising therefrom was withdrawn from the Bill without a provision for the liabilities incurred.

It may be pointed out that when the Act was passed it was admittedly to some extent an experimental measure, and provision was made for ascertaining the directions in which amendments could be introduced to render its basis more secure after its administrators had had the benefit of a few years' experience.

The clauses dealing with the retirement of officers and retiring allowances are those numbered 43 to 51.

- Section 43. Gives to an officer who has attained the age of 60 years the right to retire voluntarily, and is the only section which refers purely to superannuation. The only debatable point is whether 60 is the proper age at which superannuation should be allowed.
- Section 44. Gives the right to claim a retiring allowance at any age on proof of certain infirmity of body or mind. The proof required is a medical report, which must be sufficiently definite to satisfy the Board that the person desiring to retire is really unfit for further duty. It is often difficult to decide this point. There is a provision in section 47 by which officers retired under section 44 may be called on to return to duty, but it is virtually inoperative because too indefinite. The granting of pensions under this section requires more safe-guarding, and greater power should be vested in the Board to limit or annul pensions granted thereunder.
- Section 45. Provides for the compulsory retirement of an officer incapable of performing his duties by reason of infirmity. It has only been availed of to a limited extent and in extreme cases.
- Section 46. Has been held to confer a right to a retiring allowance on any officer whose services have been dispensed with for purposes of retrenchment or reorganisation, and has been availed of with very injurious effect to the Superannuation Account. Unless the responsibility for retirements of this nature is removed from the Superannuation Account it will be impossible to place the Fund on a solvent basis.
- Section 47. Has already been referred to in dealing with section 44 to which it is merely an addendum.
- Section 48. Prescribes the method of computing retiring allowances and requires amendment so that only those allowances from which the deduction of 4 per cent. has been properly made shall be included in computation of pension.
- Section 49. Provides that a single payment by way of gratuity may be made to certain persons who are not entitled to a pension, not having completed fifteen years service. The remarks made in reference to sections 44 and 46 apply with equal force to this.
- Section 50. Makes provision for persons accidentally injured in the discharge of their duty, but it throws a double responsibility on the Fund where clearly all the responsibility should be on the State. Compensation to an officer injured should be a charge on the Department concerned in his injury.

Section 51. Provides gratuities to widows and children in necessitous circumstances. The inclusion of the words "necessitous circumstances" in this section throws a very invidious duty on the Board. A more equitable arrangement than that provided would be that in the case of the death of every officer a certain proportion of his contributions should be returned to his widow and children.

In view of a possible reconstruction of the Act, we beg to suggest the consideration of the following propositions in addition to those previously adverted to:—

- · 1. That there be a limitation as to the age of persons allowed to enter as contributors to the Superannuation Account (except in special cases).
 - 2. That no retirements on pensions be allowed under 60 years of age, except under very rigid regulations.
 - 3. That a sufficient annual subsidy be granted to assist the Fund.
 - 4. That reorganisations and retrenchment retiring allowances should not be a charge on the Civil Service Superannuation Account.
 - 5. That section 57 shall be so altered that the persons therein referred to must become contributors to the Fund within a limited period or lose their right of option.
 - 6. That, in the case of future entrants, service for pension purposes shall only count from date of contribution to the Superannuation Account.

ALEXANDER OLIVER, Chairman.
JOHN RAE.
J. H. STOREY.
ARCH. C. FRASER.
JAMES POWELL.

Sydney, 15th November, 1892.

Jno. B. Trivett, Esq., to The Secretary of The Civil Service Board.

"Carnarvon," Bruce-street, Stanmore, February 1st, 1892.

In compliance with the terms of my appointment (of the 28th September, ultimo, No. 91-426), by the Civil Service Board, to investigate the state and sufficiency of the Superannuation Account, created under the provisions of the Civil Service Act of 1884, I have the honor to forward herewith my report, together with two appendices containing tabulated statements of accounts in relation thereto.

JNO. B. TRIVETT.

Report, Civil Service Superannuation Fund, as at 31st December, 1890.

To the Chairman and Directors of the Civil Service Board :-

I have the honor to forward herewith my report concerning the state and sufficiency of the

Civil Service Superannuation Fund, as at 31st December, 1890.

Civil Service Superannuation Fund, as at 31st December, 1890.

The condition of affairs, as revealed in the appended balance-sheet, is exceedingly unsatisfactory. At the period of the previous triennial investigation, it was manifest that the fund was insolvent, that the liabilities incurred on account of the entered on pensions had reached the stage when the amount of assets in hand was approximately sufficient for their liquidation, and that the only resources available for payment of pensions of prospective claimants would consist of the amount of their future contributions (that is, of a portion only of their whole payments during service), together with the annual subsidy of £3,500 to be paid under the provisions of the Constitution Act, and two annual payments of £20,000 each to be received from the Government. At the present time, when all payments by the Government have ceased, with the exception of the perpetuity of £3,500, we find that the insolvent state indicated three years ago is most distinct and intensified. three years ago is most distinct and intensified.

Thus in round numbers, and omitting pensions under Schedule B of the Constitution Act, we have

the following comparative statement:-

On—	There were Pensioners—	With Annuities amounting to—	Giving a Total Liability of—	And the Amount at Credit of the Fund was—	Leaving—
		£	£	£	£
31 December, 1887	174	21,021	215,774	235,437	19,663 credit balance.
31 December, 1890	419	56,783	505,584	406,586	98,998 debit balance.
The growth was	245	35,762	289,810	171,149	118,661 debit.

And, regarding the prospective pensions, the balance-sheet indicates a deficit of immense proportions.

A glance at the above-quoted figures will suffice to show the overwhelming manner in which the entered-on-pensions have encroached upon the fund. The liability for payments, made upon this score, has increased at the rate of about £12,000 per annum; and, observing that the pensions in 1890 amounted to £56,783, and that the contributions from the active officers during the same year were £65,380, I should not be surprised to learn that, at the date of writing, the payments to pensioners actually exceed the annual contributions. These facts, irrespective of the consideration of the enormous deficit arising from the domant liabilities ought to convince any person, actuary or otherwise, of the ultimate fate of the fund, should no immediate action be taken to apply some measure of relief.

I shall briefly state the causes leading to the present condition of the fund:-

1. An extraordinary influx of entered-on-pensioners has taken place during the last four years. Many of these pensioners are in the prime of life; eighty-nine of them, or 21 per cent. of the entire pension list, being under the statutory age of sixty years, and having various terms, ranging up to twenty-seven years, to run before they would be legitimately due for retirement. No annuity fund, however well-devised theoretically, can be expected to sustain such drastic inroads into its resources as are indicated in the character. in the above statement.

2. The insufficiency of the contributions, levied on officers current in the service, to provide.

3. The unduly bountiful prospective benefits prescribed under the Act. The contributions, levied under the provisions of the Act, would suffice only in the case of a person entering at a very early age, and receiving no material additions to salary during his career. Increase of age of entry, or in salary, would require much larger deductions than are at present demanded. An exception to this statement

must be made in the case of the female teachers of the Department of Public Instruction, who occupy a unique position; their ranks being decimated at a very high rate in the early ages, with consequent advantage to the fund. With very little assistance the members of this class would be self-supporting.

4. The practice observed when determining the net retiring allowances of not charging interest on the unpaid back contributions for the years prior to 1885 (the year of the inception of the Act) in reckoning the abatement to be deducted from the gross pension, in respect of such contributions.

Remedial Measures to be adopted.

1. In the case of a properly-constituted and well-regulated pension scheme, to ensure that its solvency shall continue beyond doubt, the course of retirements must be based upon rigid rules, and no exception to these rules should be permitted; but when a formidable list of annuities, such as has characterised the four years 1887–1890, is allowed to become a charge prematurely against the fund, the immediate effect is such, at to defy all actuarial considerations, for the transparent reason that the incidence of an unbrown rate of retirement connect be articipated. The Act was instituted presumably incidence of an unknown rate of retirement cannot be anticipated. The Act was instituted, presumably, on the supposition that claims for retiring allowance would be recognised only when occasioned in the ordinary course of nature, *i.e.*, upon officers attaining the designated age 60, or through the failure of health. It is, therefore, consistent to require that any retirement resulting from extraordinary cause, such as wholesale retrenchment, should be dealt with by special measures. Such measures it is not within my previous here to propose

within my province here to propose.

2. I have mentioned the insufficiency of the 4 per cent. contribution as a cause of the debit balance, not for the purpose of proposing an increase in the rate for the future, but rather to bring out in relief the negative results occasioned by the excessive benefits promised in return. In my opinion the present rate should not be raised, but should be regarded as the maximum. A higher rate would press very

severely on small-salaried men.

3. In reviewing the benefits propounded under the Act, it is at once apparent that there exists considerable scope for amendment. Since the receipts from each officer are proportionate to the amount of salary year by year throughout his official life, it is but just that the basis upon which the retiring allowance is computed should have a relation to his total emoluments, and not depend upon the advantages nor the vicissitudes which might befall him during the last three years of his service. For this reason an average salary, deduced from his aggregate salary, should be adopted, from which to derive the amount payable as pension.

4. Interest should be charged on the unpaid back contributions of 4 per cent. on salaries for the years antecedent to 1885. A moment's reflection on the bearing that interest, charged for a term extending over many years, would have on the resultant at maturity, will be convincing as to the importance of giving this item its correct treatment in the fund's assets. The prevailing system of not adding interest on account of these unpaid contributions is so opposed to financial usage as to require no

further argument to ensure its condemnation.

5. An annual vote should be received from the Government. Taking the present circumstances will be received to maintain an equilibrium. of the fund into account, a sum of £60,000 per annum will be necessary to maintain an equilibrium. But, if the recommendations I have enunciated be carried into effect, the conditions will be so greatly improved as to require a very small annual grant. The amount then required I cannot quote with certainty until the results of the proposed treatment shall have been ascertained by means of a subsequent investigation conducted, as I should desire, with the aid of the tables referred to in the concluding paragraph of this report.

I feel assured, however, that the vote, necessary under the amended conditions, will be insignificant in comparison with the benefits to be derived from the operation of a financially-healthy retiring fund. A superannuation fund, if soundly constituted and administered, by securing the retirement of officers at an age when their capabilities are waning, supplies an admirable aid by which the management of the State's concerns can be maintained with a maximum of efficiency. A man is most likely to evince zealous application to his duty when promotion is assured through the gradual retirement of his seniors caused by the workings of a pension scheme, and when prompted by the prospect of obtaining, in due rotation, some provision for his closing years. But when the higher officials retain their positions beyond the period of usefulness, on account of the absence of a retiring allowance, the subscribe record their period of usefulness, on account of the absence of a retiring allowance, the subordinates regard their occupation as temporary, pending the opening up of avenues of advancement elsewhere, and have very little incentive to qualify for higher responsibilities. Hence, it is clearly to the advantage of the Government to co-operate in maintaining the fund on a solid foundation by contributing a yearly subsidy.

6. I shall conclude my observations on this subject by referring to a possible source of loss to the fund. I refer to the peculiar rights secured, under section 57 of the Act, to persons coming under the category of officials mentioned in section 8. The principle introduced in this clause is unsound, since it admits persons to participation in the advantages of the fund, on their commencing to contribute, at whatever period they may think fit. Doubtless they will utilise this right within a short time of their intended retirement, and consequently to the material detriment of the fund

whatever period they may think it. Doubtless they will utilise this right within a short time of their intended retirement, and consequently to the material detriment of the fund.

In conducting this investigation, the effect arising from the lack of information relating to the past history of the service has been severely felt. Thus amongst the assets will be noticed the item "present value of back contributions of 4 per cent. on salaries for periods of service prior to 31 December, 1884." This is an important factor, and the amount should be ascertained with all possible precision. Through the absence of data respecting the careers of officials prior to the inception of the Act, the value of this asset can be only approximately determined. I quote this item merely as an illustration to show the great advantage the possession of a systematised history would confer. Such information would enable us to formulate a local Civil Service experience, from which tables could be derived suitable for our requirements. I would strongly urge that taken immediately to procure comprehensive our requirements. I would strongly urge that steps be taken immediately to procure comprehensive abstracts from the records for this purpose, so that the groundwork of future valuations, or of other action regarding the Act, may be established, and be made available at an early date.

I have the honor to be, Gentlemen,

Sydney, 1st February, 1892.

Your obedient servant, JOHN B. TRIVETT.

Forwarded to the Civil Service Board with my letter of 1st February, 1892.—Jno. B. Trivett, Actuary.

Memo.

Two triennial actuarial investigations have now been made—one at the close of 1887, by Mr. R. Teece, and the last by Mr. J. B. Trivett, which dealt with the three years closing on 31st December, 1890.

Both actuaries admit that the data supplied by the present life history of the Superannuation Account is too meagre to enable them to work out their calculations with exactness, but they nevertheless feel justified in reporting that the fund is not strong enough to bear its liabilities, and that further provision should be made for its future stability.

Mr. Teece, as on 31st December, 1887, estimated the deficiency on his valuation of the fund at £1,325,706 10s. 4d.

Mr. Trivett, on 31st December, 1890, estimated it at £1,592,568 10s. 11d., thus showing that at present, at least, the fund is tending in an unsatisfactory direction.

The causes of the deficiency as given by Mr. Teece are

 Inadequacy of the contribution of 4 per cent. to provide promised benefits.
 Absence of sufficient provision for the accrued liabilities charged upon the fund at the inception of the scheme

3. The unexpected liability in respect of pensions to officers who were neither incapacitated nor had attained the age of 60 years.

4. The method of computing pensions.

5. The incorporation of a system of gratuities to widows and relatives with a superannuation account.

Mr. Trivett lays special stress on the fact that, "An extraordinary influx of entered-on-pensioners has taken place during the last four years. Many of these pensioners are in the prime of life; eightynine of them, or 21 per cent. of the entire pension list, being under the statutory age of 60 years, and having various terms, ranging up to twenty-seven years, to run before they would be legitimately due for retirement. No annuity fund, however well-devised theoretically, can be expected to sustain such drastic inroads into its resources, as are indicated in the above statement."

To meet this undue strain Mr. Trivett makes the following suggestion:—"An annual vote should be received from the Government. Taking the present circumstances of the fund into account, a sum of £60,000 per annum will be necessary to maintain an equilibrium. But if the recommendations I have enunciated (viz retirement of officers only in accordance with rigid rules) be carried into effect the

enunciated (viz., retirement of officers only in accordance with rigid rules) be carried into effect, the

conditions will be so greatly improved as to require a very small annual grant."

The persons to whom reference is made by Mr. Trivett are those whose services have been dispensed with for purposes of reorganisation and retrenchment, and while the Government are saving salaries to the extent of about £130,000 per annum chiefly in the Railways and Lands Departments, the fund is loaded with undue pension claims amounting to about £35,000 per annum. It is this undue charge which has so seriously affected the solvency of the Superannuation Account.

The relation of the Railway Department to the fund is peculiar. The officers, before the present Railway Act came into force, were contributors, and they continue to contribute; but they are being fast thrown on the fund, and are being replaced by new men, who pay no contribution to the fund. There is, therefore, no continuity of contributions, as in other Departments; and the fund receives a double injury, for a number of officers are made pensioners before their time, and their contributions fail too soon, and the men who take their places do not help to keep the fund alive.

Another matter which requires amendment is the 57th section of the Act, which allows persons

under section 8 to apply to become contributors at any time, even up to within a week of leaving the service; and having paid their arrears, they can at once retire if over sixty years of age, or if proved by

medical examination to be unfit for duty.

Annexed are Schedules which show :-

(c) Receipts and expenditure during the two triennial periods 1885 to 1887 and 1888 to 1890.

Valuation balance-sheets for the same periods.

Loss to the Superannuation Account in consequence of officers being dispensed with under 60

Pensions granted under the several sections of the Civil Service Act from 1885 to 1891, inclusive.

Present value of Prospective Pensions to Officers now in the Service	2,346,862	8	0	2,426,864	19	0	Schedule B	87,500	. 0	0	87,500	0
Officers who may retire	5,000	0	0	7,000	.0	0	31st December, 1884 Present value of Government	266,750			252,695	0 ,
							contributions Estimated deficiency	39,230 1,325,706	16 10	0 4	Nil. 1,592,568 1	0 1
\mathfrak{L}^2	2,590,3 53	18	0	2,964,378	2	0	£	2,590,353	18	0	2,964,378	2

If the income of £3,500 per annum from Schedule B be valued at £87,500, why should the income (about £65,000 per annum) derived from 4 per cent. deductions from salaries be valued at a lower rate? Why should the item of Interest (about £14,000 per annum) be omitted from the valuation? The valuation of back contributions of 4 per cent. on salaries prior to 1885 seems low.

R. W. BACHLOR,

5 February, 1892.

Accountant.

SCHEDULE E.

Statement showing the approximate loss to the Superannuation Account in consequence of the services of Officers in the Civil Service having been dispensed with for purposes of retrenchment and reorganisation before they reached the age of sixty years, when, under section 43 of the Civil Service Act, Officers have the option of retirement.

Officer.	Department. -	Age at date when services were dispensed with.	Abatement on past salaries paid by the Government.	Pension per annum.	Salary per annum.	Amount lost to the Account as 4% deduction from salary from date of forced retire- ment to arrival at 60 years of age.	Total Pension pand from date of forced retirement to arrival at 60 years of age.	Total Salary saved by the Go- vernment from date of retire- ment to arrival at 60 years of age.	Total loss to the Account through the discontinuance of the 4% deduction from the salaries of these Officers and payment of their Pensions before reaching the prescribed age for optional retirement.

*Deceased-Calculations made to date of death.

It will thus be seen that, by the Government dispensing with these officers, the Civil Service Superannuation Account will sustain a loss of £173,539 18s. 4d. by the payment of pensions before the prescribed age of 60 years, when officers have the option of retirement, and by the discontinuance of the 4 per centum contribution from their salaries consequent on retirement, and this amount is exclusive of interest which would accrue from year to year. Moreover, this sum does not represent the total loss to the account, as many officers over 60 years of age have been compulsorily retired for purposes of retrenchment who would have preferred to continue in the Service if they had been allowed to exercise the option granted them by section 43.

While the Superannuation Account suffers by this retrenchment, the Government effects a saving during the same period of £416.676 in salaries.

same period of £416,676 in salaries.

This return includes officers compelled to retire under 60 years of age from I885 to 1891 inclusive.

Civil Service Board, Sydney, 2nd May, 1892.

R. W. BACHLOR, Accountant.

Civil Service Board, 3rd May, 1892.

R. W. BACHLOR, Accountant. Extract from letter of the Civil Service Board to the Hon. The Colonial Secretary, 28th April, 1892.

THE "Civil Service Act 1884" has now been in operation for a period of seven years, and the Board have made several representations to the Government in reference to the working of the clauses

relating to its Superannuation provisions.

The first actuarial report was made by Mr. Richard Teece, as at the end of the first triennial period, or to 31st December, 1887, when he drew attention amongst other things to the "absence of sufficient provis on for the accrued liabilities charged upon the fund at the inception of the scheme, the "unexpected liability in respect of pensions to officers who were neither incapacitated nor had attained the age of sixty years"—this unexpected liability having arisen from the fact that in the Department of Lands and in the Railway Department a large number of officers had been dispensed with for the purposes of reorganisation or retrenchment.

Mr. J. B. Trivett, who has just completed the actuarial investigation for the second triennial period, ending 31st December, 1890, directs special attention to the fact that "an extraordinary influx of entered on pensions has taken place during the past four years. Many of these pensioners are in the prime of life, eighty-nine of them, or 21 per cent. of the entire pension list, being under the statutory age of 60 years, and having various terms ranging up to twenty-seven years to run before they would be legitimately due for retirement. No annuity fund, however well devised theoretically, can be expected to sustain such drastic inroads into its resources as are indicated in the above statement."

Mr. Trivett's remarks also have special reference to officers who have been forced upon the Superannuation Fund for purposes of retrenchment. By their retirement the Government are saving salaries to the extent of £76,469 per annum, while the Fund is unduly burdened by pensions amounting

It is this undue charge that has so seriously affected the solvency of the Superannuation Fund. But there is another matter that tells heavily upon the Fund, for the account not only has to pay this large amount in pensions, but it is heavily mulcted in the matter of annual income, as the officers so retired cease to be contributors, and in many cases, unlike those of ordinary retirement, no one succeeds

to their positions, and there is thus a total cessation of contributions.

The relation of the Railway Department to the Fund deserves special attention. The officers in that service before the present Railway Act came into force were contributors to the Fund, and they continue to contribute, but are being fast thrown upon the Fund, and are being replaced by new men from whose salaries the 4 per cent. is not deducted. There is therefore in the service no continuity of contributions as in the other Departments, and the Railway Department is rapidly severing its connection with the Civil Service Fund as a contributory. A number of officers are made pensioners on a system, and in a degree never contemplated by the framers of the Act, and the men who take their places do not feed the Fund.

It is only fair to admit, with reference to the subject of compulsory retirements, that of the officers who were forced to retire a small proportion of those of sixty years of age would have voluntarily retired as their right to retire matured. It is not possible to estimate with any accuracy how many would have so retired or the dates of such retirements. In any case the period of retirement has been accelerated,

and the fund has proportionately suffered.

The Board are of opinion that in the majority of the cases now under consideration the younger men might have been transferred to other positions in the Public Service, and that many, though they had attained the age of sixty years, were still qualified, by long experience in the service and possession

of physical and mental vigor, to superintend the work of younger and less experienced men.

At the present moment the pensions which the Board consider as properly charged against the Fund amount to about £34,000 per annum, while, as before stated, the abnormal pensions are over £35,000, making a total of £70,000 from an income of less than £80,000, thus leaving no sufficient

margin for the claims which must accrue by natural sequence in the course of a few years.

Reference was made by Mr. Teece in his report to the absence of sufficient provision for accrued liabilities, and he estimated the amount which should have been so provided at £461,516, whereas the amount of subsidy paid by the Government to inaugurate the fund was only £100,000, which was paid in five yearly instalments of £20,000 each, which amounts may be considered to have been disbursed as soon

as received, so that they never produced any revenue towards the perpetuation of the fund.

The Board have already suggested that, as by the retirement of officers for purposes of retrenchment, a very large saving has been secured, it is but fair that from such yearly saving an adequate amount should be set aside to meet the pensions so created, and it is believed that if in future the retirement of

snould be set aside to meet the pensions so created, and it is beneved that it in future the retirement of officers is carried out only in accordance with rigid rules, the condition of the Fund will be so greatly improved that, after a short period, only a very small annual grant will be required.

Mr. Teece's valuation, as on the 31st December, 1887, estimated the deficiency of the Fund at £1,325,706 10s. 4d. Mr. Trivett, on 31st December, 1890, estimated it at £1,592,568 10s. 11d., thus showing that at present, at least, and mainly from the rapid increase of pensions, consequent on the course of action of the particular departments alluded to, the Fund unquestionably tends towards insolvency within a measurable period insolvency within a measurable period.

CHARLES PINHEY, Registrar-General.

Memorandum.

The returns of the Deeds Registration Office for the year 1892 having been completed, present the following results:—There were registered a total of 25,428 deeds affecting land, representing 7,709 conveyances, with a value of £3,537,829; 328 assignments of leases, of the value of £235,920; 186 leases, of the value of £27,515; 2,129 miscellaneous deeds, where no consideration was stated. There were 3,981 discharges of mortgages registered, representing £2,718,350; 392 conveyances under mortgage, of the value of £162,307; and 253 transfers of mortgage, representing £1,219,402; whilst 10,450 mortgages over town, suburban, and country lands, and representing a value of £9,328,563, were registered. There were 365 trade marks also registered; 74 new companies were registered under the Limited Companies Act, and 1,744 returns, &c., were furnished by those already in existence; 154 limited companies were wound up or declared to be defunct. The No-Liability Mining Act had 43 new companies added to the list of those already registered. There were also 2,051 preferable liens over 12,094,876 sheep registered, of the value of £1,688,661, in addition to 47 transfers and discharges. 2,326 mortgages, over 5,966,971 sheep, 142,695 cattle, and 16,904 horses, representing £2,814,636, were also registered; whilst there were 317 discharges of mortgage, representing £985,047, and 1,416 liens on growing crops, represented by £130,155.

In addition to the above, numerous miscellaneous documents were registered in connection with the Titles to Land Act of 1858, Bank Act, the Old Public Companies Act, and the several other Acts of Parliament wholly or partially administered in this Office.

The fees of office received by the Registration of Deeds Branch totalled £11,438 2s. 6d., in addition to the sum of £3,857 13s. 6d. credited by the Treasury to the Branch for the Registration of Transfers of Conditional Purchases.

20 January, 1893.

CHARLES PINHEY, Registrar-General.

RETURN of the Number of Applications, with amount of Fees, &c., under the Real Property Act, from 1st January to 31st December, 1892.

LEGISLATIVE ASSEMBLY.

SOUTH WALES.

REGISTRAR-GENERAL'S DEPARTMENT

(INSPECTION OF PLANS IN.)

Ordered by the Legislative Assembly to be printed, 27 October, 1892.

[Laid upon the Table of this House in answer to Question No. 13, of 27 October, 1892.]

Question.

- 13. Mr. Haynes asked The Colonial Secretary,—
 (1.) Is it a fact that the public are prohibited from inspecting and perusing the plans kept in the plan room of the Registrar-General's Department without leave having been first had and obtained from the Chief Draftsman?
 - (2.) Are the law stationers, search clerks, and others in the said Department likewise prohibited from inspecting such plans in connection with their searches without obtaining such permission as aforesaid?
 - (3.) Is it a fact that such permission has been refused to any search clerk when asked for when in the discharge of his duties?
 - (4.) Will he please state by whose authority such prohibition is enforced, and upon what grounds?

 (5.) Is it a fact that the plans referred to are the property of the public and kept there for the use of those persons having business with the Department?
 - (6.) Is it also a fact that the Registrar-General's Department is the only Department of the Public Service that returns a profit to the Consolidated Revenue yearly considerably over the working expenses; and is not such revenue obtainable solely from the fees paid into the Department for searches, &c.?
 - (7.) Is it a fact that some of the memorials relating to the earliest titles to lands in this Colony are in such a state of dilapidation as to be almost undecipherable and torn in many pieces, and that the loss of these memorials may seriously affect some of the most valuable lands in the Colony?
 - (8.) Will he be good enough to cause instructions to be given to have these matters rectified forthwith, and that the public may be permitted to inspect the plans without any special per-

Answer.

- The following answers have been supplied by the Registrar-General:—
- 1. County and parish maps and deposited plans of subdivision of land under the Real Property Act, are open to inspection by the public during office hours without question. Other plans (including plans lodged with application to bring land under the Act), which have been obtained for the private use of the office, and which have on them memorandum and references of a private nature, are not open to
- the inspection of the public.

 2. No, except as to such private plans and plans lodged with application mentioned in answer to
- 3. I am not aware; but permission has been refused with regard to such private plans and application plans, in certain cases, where it has been thought advisable.
 - 4. That of the Registrar-General, for reasons before stated.
 - 5. Answered by No. 1.
 - 6. No.
 - Yes.
 - 8. I do not know what matters require rectification. All due inspection is allowed to the public.

1892-3.

LEGISLATIVE ASSEMBLY.

SOUTH WALES.

POLICE MAGISTRATES.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 23 May, 1893.

RETURN to an Order of the Honorable the Legislative Assembly of New South. Wales, dated 27th April, 1893, That there be laid upon the Table of this House, a Return showing,-

- "(1.) The number of Police Magistrates serving in the Justice Department.
- "(2.) The places where Police Magistrates are stationed, and the date on
- "which each office was created.
- "(3.) The amount of business, exclusive of land agency business, transacted during the years 1890, 1891, and 1892, at each of the different Courts "over which these Magistrates preside."

(Mr. Frank Farnell, for Mr. Fuller.)

(1.)

The number of Police Magistrates serving in the Justice Department.

THERE are six Stipendiary Magistrates stationed in the Metropolitan District, and sixty-nine Police Magistrates in the country districts.

(2.)The Places where Police Magistrates are stationed, and the date on which each office was created.

No. 1.

Telegram from Mr. W. E. Morgan to Minister of Justice.

Dubbo, 17 October, 1890. A very great injustice is being done to Thomas Frawley, Sheriff's officer, Dubbo, by his proposed immediate removal to Coonamble. May I respectfully ask that further action in this case be delayed pending inquiry.

W. E. MORGAN.

604-

No. 2.

The Sheriff to The Under Secretary of Justice.

Sheriff's Department, Sydney, New South Wales, 18 October, 1890. Sir, I have the honor to forward herewith a copy of a letter, dated 12th July last, received from Mr. Thomas Frawley, Sheriff's officer, Dubbo, assenting to his removal to Coonamble, but asking for time. I have, &c.

CHARLES COWPER,

Submitted. See also attached letter from the Postmaster-General re Mr. Frawley's removal. The letter of 12th July referred to by Sheriff as assenting to removal also respectfully protests against same for reasons therein mentioned.—A.C.F., 20/10/90.

Sheriff, in connection with representations from Council,—A.J.G., 4/11/90. The Sheriff.— T.E.M'N. (for U.S.), B.C., 4/11/90.

[Enclosure.]

Sir,

I have the honor to acknowledge the receipt of your memo. of 8th inst., which came to hand during my absence at Peak Hill on duty, whence I have just arrived.

In reply to your request that I will have the goodness to inform you when I will be prepared to start for Coonamble, I beg to say that the state of roads and country is such that travelling is almost impossible and dangerous, and likely to be so for some considerable time, so that I will thank you to extend the time to end of September or beginning of October. I may mention that I have a wife and family of eight, some now under the doctor, and in order to show you my position I hope you will pardon me while I point out that a son is an articled clerk to a local solicitor, one in an office, and a third has been twelve months with a chemist, but all three get little or no wages yet and reside with the family. If you insist on my removal it is impossible for me to pay for their board and lodging, and their chances will therefore be blighted. Of the others, three of them attend high schools. They, too, would be punished. Then the breaking up of home and sacrifice of everything after fifteen and a half years' service as your officer and bailiff of the District Court here. While, in obedience to your command, I shall be prepared to remove, yet I most respectfully protest against it, as I am not conscious of having in any way so conducted my duties as to bring upon me what cannot be considered promotion. I therefore trust that you will consider my wife and family, whom you would be really punishing in carrying out your present intention.

The Sheriff, Sydney.

I have, &c., THOMAS FRAWLEY.

No. 3.

Mr. R. Bertaux to The Hon. D. O'Connor, M.P.

Dear Sir, Sydney, 20 October, 1890. I received to-day a letter from a very old friend of mine, Mr. T. Frawley, District Court bailiff for Dubbo and district. He has received notice from the Sheriff, Mr. Cowper, to leave Dubbo for Coonamble. He tells me that this will be complete ruin to him, as if his property, which is heavily mortgaged, is deprived of his personal supervision, he will be completely ruined. I would, therefore, ask you as a very special favour, to speak to your colleague, the Minister of Justice, who may arrange with the Sheriff, Mr. Cowper, that he may remain in Dubbo. It is a very hard case indeed, as Mr. Frawley has a very large family, which he has managed to get occupied in Dubbo, and they are all young people. I do not know anything of the departmental reasons for the change, but trust you will do your best to get him to stay. Thanking you in anticipation.

I am, &c., I am, &c., R. BERTAUX.

For the consideration of my hon. colleague, the Minister of Justice.—D.O'C., 21/11/90. tted.—A.C.F., 18/2/91. This matter has been fully dealt with, and Mr. O'Connor notified.— Submitted.—A.C.F., 18/2/91. A.J.G., 18/2/91.

No. 4.

The Mayor of Dubbo to The Minister of Justice.

[Presented by G. E. Cass, W. Alison, and W. C. A'Beckett, 31/10/90.]

Sir, Municipal District of Dubbo, Town Hall, 21 October, 1890.

I have the honor, on behalf of my Council and by resolution thereof, to respectfully memorialise you "re the proposed removal from Dubbo to Coonamble of the Sheriff's officer, Mr. Thomas Frawley.

We have heard with regret of the proposed removal, feeling confident that if such is carried it will result in extreme hardship upon an old and tried servant of your Department, and will be fraught with much loss to his large family, and without any gain to the Department of Justice.

We, therefore, respectfully request that you be pleased to reconsider the matter of Mr. Frawley's removal, taking into consideration the following facts, and your memorialists will be glad if you will allow that officer to retain his status and duties at Dubbo :-

- 1. The length of service of Mr. Frawley, with the duties attendant upon his office, often requiring the exercise of tact, energy, and industry, all of which, as a rule, has characterised the discharge of those duties by him.
- 2. The removal appears to us to be virtually a disrating of that officer, compelling him to take a
- much inferior position, both as regards status and profit.

 3. During Mr. Frawley's residence in Dubbo, he has endeavoured by industry to build up a home and provision for the maintenance of his family, and his removal would, doubtless, bring to him and them much loss. This phase of his case would, no doubt, in some measure be untenable did the interests of the Department demand his removal, but your memorialists respectfully submit that the interest of the Department would be best accounted were Mr. Fraydow allowed to that the interests of the Department would be best conserved were Mr. Frawley allowed to remain in Dubbo.

4. The legal practitioners of this town without, we venture to say, any exception, agree to the efficiency of Mr. Frawley in the discharge of his duties, and those gentlemen who are so closely brought into contact with him in his duties as Sheriff's officer agree that it would be no gain to the Department to supersede him.

We, therefore, respectfully request that you be pleased to give the foregoing your consideration, and shall be glad to hear the result of your consideration is favourable to the prayer of your

On behalf of all the members of the Municipal Council, as resolved in Council assembled,-

I remain, &c., NARCISSE MULLER,

Mayor.

Might be referred to the Sheriff, and Messrs. Cass, Alison, and A'Beckett, M's.P., so informed. tted.—A.C.F., 3/11/90. Approved.—A.J.G., 3/11/90. The Sheriff.—T.E.M'N. (for U.S.), Submitted.—A.C.F., 3/11/90. Approved.—A.J.G., 3/11/90. B.C., 4/11/90. Report herewith.—Chas. Cowper, Sheriff, 11/11/90.

No. 5.

The Under Secretary of Justice to G. E. Cass, Esq., M.P., and others.

Sir. Department of Justice, Sydney, 5 November, 1890. I have the honor, by direction of the Minister of Justice, to acknowledge the receipt of a letter from the Mayor of Dubbo, presented by yourself, W. Alison, and W. C. A'Beckett, Esqs., M's.P., at this Department, urging that Mr. Thomas Frawley, Sheriff's officer, should not be removed from that place to Coonamble, and to inform you that the same has been referred to the Sheriff.

I have, &c.

ARCH. C. FRASER,

Under Secretary.

[Similar letters addressed to W. Alison and W. C. A'Beckett, Esqs., M's.P.]

No. 6.

The Sheriff to The Under Secretary of Justice.

Sir, Sheriff's Department, Sydney, 12 November, 1890. Formerly Sheriffs' bailiffs, as they were termed, sent in no reports, and appeared to act as if they were responsible to no one. When I took charge of the Department, finding this to be the case, I established a system under which these officers were instructed to furnish reports showing action taken, and, if none, why, the fees charged, &c.; indeed, a complete return of everything they did. It has been found

impossible to get Mr. Frawley to obey these instructions.

I attach a return, showing when and how he has been in default, and the fines imposed upon him. I fine when a reprimand appears to have no effect, and when the infliction of fines is disregarded I remove

to another district.

The last instance of Mr. Frawley's neglect proves him to be incorrigible. If, when a matter is treated by the Court as one of urgency, the officer is to take his own time, and without sufficient excuse (for he really had none in this case) delay the execution until it suits his private convenience, levy by taking a casual glance at a part of the property, neglect to see the live stock, or make an inventory, except by writing a few words on the back of his warrant in pencil, I can see no hope of maintaining discipline in the Department, nor can I hold myself responsible for the results.

By reference to the statement attached it will be seen that he continually neglected to take any

notice of the receipt of warrants until called upon by the Department to do so; that he served summonses in so careless a manner as to render me liable for the whole amount of the writs; that he neglected to make return of Crown fees periodically, as instructed; that he overcharged, and that his general carelessness, if continued, would render it necessary to employ extra clerical assistance in the head office.

During the late examination of his books it was found that carelessness was exhibited all through; warrants were not endorsed, and many receipts for Crown fees could not be found among his papers.

Apart from all this, I have found it advisable to have an inspecting officer in the Western District, and the rapidly increasing importance of Dubbo, and its central position, has satisfied me that it is the most suitable place for an officer, commanding, as it does, all the western stations. Mr. Frawley is not fitted for such an office, and I must therefore send someone who is competent to discharge the duties which will be required of him. I have, &c., CHARLES COWPER,

Sheriff.

[Enclosures.]

Barton and others v. Chan Shee, 89-87; November, 1887; finally dealt with, 1888.

MR. Frawley sold defendant's goods at Nymagee, and instead of sending the proceeds to the Sheriff to be passed through Officer sold the books of the office, as required in all cases, allowed the plantiffs to collect and retain them, and a period of fully four goods, and months elapsed before the Sheriff received the whole of the proceeds. He also deducted charges not allowed by the scale allowed the plantiffs to fees, and delayed his report for nearly a month after selling.

Mr. Frawley was severely censured for his loose way of doing business, which caused much delay and a large amount retain the proceeds.

of correspondence.

Bourke v. Bourke, folio 367-88; December, 1888.

Mr. Frawley was fined £1 for delay in reporting in this matter. The warrant was sent to him on the 19th November, Fined £1. but no report was received till the 20th December, and then only upon receipt by him of a memo. from the Department. Delay of nearly It appears that he received notice from the plaintiff's attorney (Mr. C. H. Fitzgerald), Dubbo, to withdraw execution and one month. stop sale, as the matter was settled. In reporting he neglected to show that the property had been advertised, and that plaintiff's the Crown was entitled to poundage. Upon inquiry it was ascertained that the advertisement had been inserted both in attorney signed the local press and Government Gazette by plaintiff's attorney instead of the officer, and that the attorney had affixed the the Sheriff's Sheriff's name to the advertisements, ordered the insertion thereof in the press, and in fact taken the conduct of the case name to advertisement. He out of Mr. Frawley's hands.

He also carefully avoided mentioning anything in his report about the advertisements having appeared, and had the fact not been discovered in the head office, the poundage, amounting to £2 15s. 9d., would have been lost to the Crown. The poundage, after a lot of correspondence with plaintiff's attorney, was ultimately paid.

Mr. Frawley was very severely censured for his neglect and improper conduct herein.

Willis and another v. Simons, 268-88; 16th May, 1888.

Delay.

Mr. France reprimanded for neglecting to forward notice of claim, value of goods claimed, and report until called upon by the Department to do so.

Ryan v. Christenson, folio 322-88; 16th October, 1888.

Delayed report-ing for nearly two months.

Mr. Frawley censured for neglecting to furnish report. The warrant was sent to him for execution on the 23rd August, and it was his duty to report within a few days thereafter, but nearly two months elapsed before he did so, and then only after a reminder had been sent. The officer excused himself by saying he had instructions to stay from plaintiff, who is a local attorney, but this was really no answer, on the contrary, was an additional reason for report.

Dalton v. Cummings, writ of summons; same v. same, writ of summons; 28th March, 1889.

Delay of some weeks.

Mr. Frawley called upon to explain delay of some weeks in serving these summonses. No explanation offered. Such delays might render the Sheriff liable for the amount of the writ.

Caro v. Hendry, folio 433-89; 17th April, 1889. Delay.

DELAY of about ten days before reporting. No explanation offered.

Fallon v. Fallon, folio 439-89; 26th April, 1889.

Fined £1 for delay in reporting.

FINED £1 for delay in reporting. Warrant sent to Mr. Frawley on the 5th April. No report received until the 26th April.

Chambers v. Churchill, folio 50-89; 12th October, 1889.

Delay in reporting as to defendant's chattels.

THE officer again reprimanded for failing to report as to defendant's chattel property. It is necessary under rules of Court to proceed first against defendant's personal property, if any.

Millett v. Wilkinson, folio 59-89; 12th November, 1889.

Delay in reporting. AGAIN censured for delaying his report herein for about two weeks.

Silverberg and another v. Parker, folio 95-90; 28th January, 1890.

Delay of fourreporting.

CENSURED again for a similar delay (fourteen days) in this matter. No report received until called for by the Sheriff.

Saywell v. Brown, folio 103-90; 3rd March, 1890.

Delay of about three weeks.

AGAIN reprimanded for delay in reporting (twenty one days) herein. Report furnished after being called for. No

explanation given of delay.

Arnold and another v. Hansin, folio 121-90; 24th March, 1890.

Delay of over two weeks.

No report furnished till called for. Censured for delay of over a fortnight. No explanation given.

Hieronymus v. Madden, folio 188–90; 28th July, 1890.

Fined £1 for delay in reporting.

Fined £1 for delay in reporting after repeated warnings. The warrant was sent to Mr. Frawley on the 15th July, but no report was received until the 30th July, and no explanation of delay.

Doust v. Webb, folio 222-90; 27th September, 1890. A DELAY of fourteen days in reporting, without reasonable excuse. Fined 5s., and again cautioned.

Fined 5s. for delay in reporting.

Reprimanded (Crown fees).

13th July, 1888.

Mr. Frawley reprimanded for neglecting to forward monthly return of Crown fees.

Fined 10s. (monuny returns).

 $$19{\rm th}$ September, 1888. Fined 103. for neglecting to forward monthly return of Crown fees.

Reprimand (monthly returns).

15th June, 1889.

Carelessness in serving writ in summons. Mr. Frawley again reprimanded for neglecting to forward monthly return of Crown fees.

Thurgood v. Thompson, writ of summons; 15th August, 1888. The officer endorsed the original writ with a lead pencil, and the copy summons annexed to the affidavit was not signed. Mr. Frawley was censured for his gross carelessness in this matter. He should have examined the copy summons with the original before swearing the affidavit. These errors may render the Sheriff liable.

Taylor v. Ah Chee, folio 434; 4th April, 1889.

Neglecting to quote folio No.

Mr. Frankey reprimanded for neglecting to quote folio No. when reporting, although repeatedly reminded to do so.

Fallon v. Fallon, 439-89; 20th May, 1889.

Neglecting to quote folio No., fined 5s.

Fined 5s. for neglecting to quote folio No. after repeated reminders.

Feason v. Winser, folio 170-90; 6th June, 1890.

Neglecting to quote folio No.

Mr. Frawley again reprimanded for neglecting to quote office folio No.

Rowan v. Aarons, folio 431–89; 5th April, 1889.

Neglected to state value of goods claimed.

MR. Frawley reprimanded for neglecting to state the value of goods claimed when forwarding the interpleader affidavit in this case.

Neglected to state value of goods claimed.

Caro r. Ziehtke, folio 202-90; 14th August, 1890.

Mr. Frawley reprimanded for neglecting to state the value of goods claimed when forwarding interpleader affidavit.

Carelessness in preparing advertisement, and also in selling.

Dalton and another r. Cummins; 30th April, 1889.

MR. Frawley reprimanded for the incomplete manner in which he advertised the abovenamed defendant's interest in a conditional purchase, omitting particulars he was specially instructed to insert. His report after sale was also incomplete, and had to be supplemented.

Martel

Martel and another v. Stoneman; 23rd May, 1005.

Mr. Frawley again neglected to insert in advertisement particulars as per his instructions. He also sold the real estate Carelessness in preparing advertisement, and also in selling.

Campbell v. Henningway, folio 167-90; 19th June, 1890.

MR. Frawley fined £1 for neglecting to report as to defendant's chattel property before selling his real estate, and for Fined£1 for gross carelessness and neglect after repeated warnings.

Fallon n. Fallon. folio 439-89; 26th April, 1889.

Fallon v. Henningway, 1010-101-00, 12010-010,

Carelessness in

Mr. Frawley again omitted from advertisement particulars he was instructed to insert.

21st October, 1889.

Mr. Frawley reprimanded for his carelessness in not attaching his papers in a proper manner.

Carelessness in papers.

Rankin v. Gordon, 430–89 ; Rankin v. Bowman, 431–89 ; Rankin v. Robinson, 430–89 ; 23rd April, 1890.

Mr. Frawley improperly retained the sum of £2 3s. in each of the above matters. He charged a selling fee of £3 3s. in Deducted fees each, when, by the scale of fees, he was only entitled to £1. In defence, he stated that as the sales were postponed on not allowed by two occasions for want of purchasers he thought he was entitled to £1 for each postponement. Refund ordered and the scale.

Aldous v. O'Halloran, folio 92; 15th February, 1890.

MR. FRAWLEY reprimanded for neglecting to collect poundage in this matter. After a great deal of trouble the amount Neglecting to charge Crown fees.

Hilliard and another v. Belford; 20th May, 1890.

CENSURED for forwarding report in a very dirty state.

Censured for dirty report.

Croker v. M'Kenzie; 2nd August, 1889.

MR. FRAWLEY was fined £2 for neglecting to keep a proper account of fees due to him. He complained of being unable to obtain his fees herein from plantiff's attorney on an application for same being made by the Sheriff's solicitor. Mr. Frawley's receipt for the amount was produced, dated some considerable time before.

Fined £2 for neglecting to keep proper receipt for the amount was produced, dated some considerable time before.

6th November, 1889. Mr. Frawley fined 10s. for the careless manner in which he forwarded his Circuit Court accounts.

Fined 10s, for carelessness in forwarding accounts. Fined 10s, for carelessness in forwarding accounts.

15th February, 1890. MR. FRAWLEY censured for the careless manner in which his annual returns were prepared.

Rowan v. Leahy, folio 355–89; Warren v. same, folio 372–89.

MR. FRAWLEY advertised the defendant's interest in real estate under both of the above warrants, but before the day of Carelessness in sale plaintiff's attorney in the latter case instructed the officer to stay further proceedings, but the officer instead of withdrawing staying in this manner, only withdrew the advertisement in both cases. Plaintiff's attorney (Mr. D. L. Levey), in the advertisement first matter, complained strongly of the injustice done to his client by this improper withdrawal. Officer severely censured.

Rankin v. Robinson, folio 436; 26th April, 1890.

MR. Frawley fined £1 for including many different matters on the same paper, contrary to his instruction.

Fined £1 for carelessness.

Fearon v. Winser, folio 170; 8th July, 1890.

MR. FRAWLEY fined 5s. for not reporting on proper form, notwithstanding previous warnings. In this matter he was Fined 5s. for instructed to insert the advertisement four times, instead of which it appeared seven times. For these seven insertions Mr. Frawley paid, although he had only authorised four. Upon the Sheriff demanding a refund of £1 16s., he (Mr. Frawley) obtained the amount from the newspaper proprietor.

Watts v. Dawson, 231-90; 18th October.

Watts v. Dawson, 231-90; 18th October.

Mr. Fitzhardinge, plaintiff's attorney, Dubbo, complains of Mr. Frawley's delay in executing this warrant of f. fa. Plaintiff's attorney from the Friday to Circuit Court finished to levy on the following day (Saturday), and he supposed he had gone, and wrote his client to meet him there. On Sunday his clerk met Mr. Frawley, and was then told that he was going by the train leaving Dubbo that morning, but Mr. Fitzhardinge saw Mr. Frawley in Dubbo at noon on Monday, and the levy had not then been made, though his client had been waiting at Nyngan for the purpose of pointing out the defendant's property.

Mr. Frawley says he found it impossible to go up earlier on account of other duties; but such was not the fact, and there is no excuse for the delay in this case, which, as Mr. Frawley had been informed by the attorney, was one of particular urgency, and which he had been requested beforehand to execute without any loss of time.

The attorney also complains of the loose manner in which Mr. Frawley proceeded in making a so-called levy on a number of horses without ever seeing them, and merely on the information of a third party. The attorney submits that if such a proceeding is sufficient the levy may as well be made in the Sheriff's office.

Submitted with reference to Minister's minute of 3/11/90.—A.C.F., 13/11/90.

Mr. Frawley's official history is not of such a nature as to commend his wishes to very favourable consideration, but, apart from this, departmental considerations, and the necessity for the appointment of an inspecting officer for the Western District, and the growing importance of Dubbo, require the appointment of another and more experienced officer than Mr. Frawley, with whose contemplated removal I am unable to interfere. Mr. Frawley may, if he desires it, have until the end of the year for the purpose of enabling him to settle his private affairs.—A.J.G., 17/11/90.

No. 7.

The Under Secretary of Justice to G. E. Cass, Esq., M.P., and others.

Department of Justice, Sydney, 19 November, 1890. Sir. Referring to a letter dated the 21st ultimo. presented at this Department by yourself and Messrs. W. C. A'Beckett and W. Alison, M's.P., from the Mayor of Dubbo, respecting the removal of Mr. Thomas Frawley, Sheriff's officer, from that place to Coonamble, I have the honor, by direction of the Minister of Justice, to inform you that Mr. Frawley's official history is not of such a nature as to

commend his wishes to a very favourable consideration; but, apart from this, departmental considerations, and the necessity for the appointment of an inspecting officer for the Western District, and the growing importance of Dubbo; require the services of another and more experienced officer than Mr. Frawley, with whose contemplated removal the Minister is unable to interfere.

I am, at the same time, to inform you that Mr. Gould has approved of Mr. Frawley, if he desires it, being allowed until the end of the year for the purpose of enabling him to settle his private affairs.

The Sheriff has been duly apprised in terms of the Minister's decision.

I have, &c., ARCH. C. FRASER,

Under Secretary.

No. 12.

Mr. C. H. Fitzhardinge to The Minister of Justice,

Dear Sir. Dubbo, 2 September, 1892. I have just heard with great surprise that there is a movement on foot to endeavour to reinstate the late Sheriff's bailiff, Thomas Frawley, here. As it was my misfortune many times to report Mr. Frawley for neglect, will you allow me still to place this, my objection, to his reinstatement on record, and to urge you not to inflict the profession and suitors and others connected with the Dubbo Court with such an injustice as Frawley's return.

Until the present officer's appointment, we did not know what it was to get our work done speedily

and properly, and without fear and favour.

Yours, &c., C. H. FITZHARDINGE.

Submitted .- The Sheriff might be asked for information respecting the matter referred to by Mr. Fitzhardinge.—A.C.F., 7/9/92. Appd.—R.E.O'C., 8/9/92.

Sir,

Department of Justice, Sydney, 7 September, 1892.

I have the honor to acknowledge the receipt of your letter of 2nd instant, stating that you have heard there is a movement on foot to reinstate Mr. Thomas Frawley as Sheriff's officer at Dubbo, and objecting thereto, and to inform you that the same will receive due consideration.

I have, &c.

ARCH. C. FRASER,

Under Secretary.

No. 14.

Mr. C. H. Fitzgerald to The Minister of Justice.

Sir, Dubbo, 7 September, 1892. I have the honor to forward herewith a protest against the proposal to remove Mr. J. T. Steel, to allow of the reinstatement of Mr. T. Frawley as Sheriff's officer at Dubbo, which it is understood is about to engage your attention. The signatures attached thereto comprise almost all the principal business men in Dubbo, with additional names of magistrates and others.

I shall be glad to be advised of any proposed action to be taken in the matter, so far as I might, as one of those signing the protest, presume to ask such information, to enable a demonstration, if necessary, of a more pronounced nature being got up, by way of an assurance to you, sir, that Mr. Steel's removal would be an absolute loss to the inhabitants of Dubbo.

I have, &c., CHAS. H. FITZGERALD.

This letter, also, might be forwarded to the Sheriff for report with paper 92-13,802. A.C.F., 9/9/92. Approved.—R.E.O'C., 22/9/92. Report herewith.—J.M.W., 4/10/92. T.E.M'N. (for U.S.) The Sheriff, B.C., 23/9/92.

$\lceil Enclosure. \rceil$

To the Honorable R. E. O'Connor, Minister for Justice,

To the Honorable R. E. O'Connor, Minister for Justice,—

We, the undersigned residents of Dubbo and district, hearing that the question of the reinstatement of Mr. T. Frawley as Sheriff's officer at Dubbo, and the consequent removal of Mr. J. T. Steel, the present Sheriff's officer, is about to engage your attention, beg respectfully to protest against the proposed change on the following grounds:—

1. That Dubbo is the centre of a very large pastoral and commercial district, extending for over one hundred miles north, west, and south; it is the seat of a Circuit Court, which is the only Circuit Court held west of Bathurst; also of Courts of Quarter Sessions and of District Courts, and it is the head-quarters of the Local Land Board, whose orders have to be enforced through the Sheriff's officer.

2. That it would not conduce to the best interests of the business people generally if Mr. Frawley were reinstated at Dubbo. Owing to the extent of the district and the poor facilities for travelling in many parts of same, it is not to be expected that the work attaching to the service and execution of process of the various Courts could be efficiently performed by a man of such advanced years as Mr. Frawley.

3. That Mr. J. T. Steel, the present Sheriff's officer, who has held the office for over eighteen months, has given general and complete satisfaction, being a young man of active habits, good experience, and being a most efficient officer, capable, too, of coping with the annual increase of work.

4. Mr. Steel, who was appointed to Dubbo on Mr. Frawley's removal to Coonamble, believing he was justified in regarding Dubbo as his future home, purchased land, and is now erecting a residence for himself at a cost of some £600, besides collecting a plant of horses and vehicles for the efficient and expeditious performance of his duties in the country.

5. That during your recent visit to Dubbo, as appears by the published report of proceedings herewith, this question did not form part of the programme of matters brou

[Here follow forty signatures.]

No. 15.

The Under Secretary of Justice to C. H. Fitzgerald, Esq., J.P.

Department of Justice, Sydney, 9 September, 1892. Sir. I have the honor to acknowledge the receipt of your letter of 7th instant, forwarding a protest, signed by residents of Dubbo and district, against the alleged proposal to remove Mr. J. T. Steel to allow of the re-instatement of Mr. T. Frawley as Sheriff's officer at that place, and to inform you that the matter will receive due consideration. I have, &c.

ARCH. C. FRASER,

Under Secretary.

No. 16.

Minute by The Sheriff to The Under Secretary of Justice.

Sheriff's Department, Sydney, 3 October, 1892. I can have no doubt that the removal of Mr. Steel from Dubbo, and the reinstatement of Mr. Frawley, would so upset the discipline of the Department as to leave me little control over my officers in future. I had so often to find fault with Mr. Frawley and some other officers that I could only do one of two things to save myself from actions being brought against me—dismiss or remove them.

I consulted with the Minister (Mr. Gould), and he said he would not interfere. I pointed out that to subject myself to appeals which were likely to be made would be so harassing that I hesitated to get upless my rivers were endersed by him.

Then his assurance that he would not interfere with my

act unless my views were endorsed by him. Upon his assurance that he would not interfere with my action I instructed several officers to remove. I may here state that in the first instance, when I became Sheriff, I pointed out that unless I had this power I could not manage the Department with officers so far away from me. The power of removal was conceded, and has never since been questioned, and upon this understanding officers were appointed to remote districts.

If Mr. Frawley were reinstated it would mean reinstating all the officers removed for similar

With regard to Mr. Steel's having built a house, I have nothing to do. If he neglected his work and gave dissatisfaction, as Mr. Frawley did, I should have to remove him, notwithstanding his private arrangements. The difficulty in removing officers, even when they are found to be unmanageable, is to deal with them without injuring a deserving officer. The removals I refer to were arranged with this view, and in consideration of the length of service of the officers. Mr. Frawley's case is fully set out in my letter of 12th November, 1890.

CHARLES COWPER,

Submitted in reference to the Minister's minute of 22nd ultimo, within. It does not appear from the papers how the idea that Mr. Frawley is to be again stationed at Dubbo has originated.—T.E.M'N. (for U.S.), 7/10/92.

ADMINISTRATION OF JUSTICE.

No. 1.

Extract from the Sydney Morning Herald, Saturday, 6th August, 1892.

Ex parte A. A. Carraway, re B. Lee, S.M., and Edward Fischer.

MR. FOSTER, instructed by Messrs. John Williamson and Son, appeared for Albert Ambrose Carraway, and moved to make absolute a rule nisi for a writ of prohibition directed to Benjamin Lee, S.M., and Edward Fischer, of 15, Victoria Arcade, tailor, to set aside an order or conviction against Carraway on the 26th May last. Mr. Edmunds, instructed by Mr. W. Carter Smith, appeared for respondent Fischer to show cause. It appears that some time before the date mentioned Carraway went to Fischer and gave him an order for a suit of clothes and an overcoat. Fischer undertook the work, giving Carraway six weeks' credit for half the amount, and three months for the balance. After a time Fischer sent Carraway the credit for nail the amount, and three months for the barance. After a line Fischer sent Carraway the suit of clothes, but kept back the overcoat, the time for the first payment having arrived. Carraway then went to Fischer to see about the overcoat, but he was out. The assistant, however, handed him the overcoat, helped him in putting it on, and handed him the bill, which he asked him to pay. Carraway left the shop, and about two days afterwards he went to Brisbane on business, but Fischer, having issued a warrant, he was arrested and brought back to Sydney. He appeared before Mr. Lee, S.M., who found it to be a case of larceny, and ordered the accused to pay the sum of £10, or go to gaol for six months. Fischer's attorney afterwards applied to the magistrate that the overcoat should be delivered up to prosecutor, but Mr. Lee refused to make the order, and said that as accused had been fined he could retain the overcoat. Carraway now appealed, and asked for costs against both respondents.

After hearing argument. The Chief Justice said this appeared to him a case of extreme hardship. One could hardly understand a gentleman, placed in the position of a magistrate, who had the carrying out of a large jurisdiction in the city of Sydney vested in him, making such a blunder. He did not suppose any judge would for a moment have allowed the case to go to a jury; yet a warrant was issued, and this unfortunate man was arrested, and brought down here and convicted when there was not a single incident of larceny in the arrested, and brought down here and convicted when there was not a single incident of larceny in the case. To show how grossly ignorant the magistrate was, he might point out that the accused having been found guilty, the prosecutor's solicitor naturally asked that the coat should be returned to his client; but the magistrate said, "Oh, no, he has been fined, and may keep the coat." It showed that he was utterly ignorant of his duty. Costs were asked against the magistrate, and for a moment he thought he ought to be made to pay the costs; but as he was a public officer, carrying on a public duty, the Court would not grant costs against him, though the case was a very bad one. Fischer must pay the costs, although the magistrate was more to blame than he was. Applicant had been arrested, brought down here and convicted as a thief although there was not the semblance of a case against him.

down here and convicted as a thief, although there was not the semblance of a case against him.

Mr. Justice Windeyer said he was of the same opinion. The magistrate was more to blame than the prosecutor. The prosecutor might have been for the time being carried away by his supposed wrong; but the magistrate, who ought to know the law, appeared to have been ignorant of the first principles of the administration of justice. He had no justification for coming to the conclusion which he did, and his inchility to deal with the case was shown by the fact that he endered the cost which he had found to be inability to deal with the case was shown by the fact that he ordered the coat which he had found to be stolen to be returned to the thief! The magistrate, and not the prosecutor, was responsible for the miscarriage of justice, and under the circumstances he ought to pay the costs.

Mr. Justice Stephen said he concurred. The appellant here went into the shop in broad daylight,

and asked for his coat, and it was given to him by prosecutor's assistant, who helped him on with it, handing him the bill and asking him to settle. If he had been trying the matter he would instantly have withdrawn it from the jury, as there was no case to go to them.

Mr. Foster: I ask for an order that the fine and costs be refunded.

The Chief Justice: Yes, they must be refunded. I think before the magistrate decided against applicant he ought to have heard his attorney, who might have had some argument to bring before him. This is, I think, a too summary way of administering justice.

Rule absolute for a prohibition, with costs against Fischer.

Submitted.—A.C.F., 8/8/92. Will Mr. Lee please furnish me with a full report as to this case. I would also like to know upon what grounds and under what circumstances a warrant was issued for the apprehension of the prisoner in Brisbane, and also whether the prisoner was refused bail by Mr. Lee; and, if so, on what grounds. R. E. O'Connor, 8/8/92.

Collect and bring before me the other cases in which Mr. Lee's action has been under the consideration of this Department.—R.E.O'C., 8/8/92.

Herewith, 8/8/92.

No. 2.

Memo. from the Acting C.P.S. and Chamber Magistrate, Water Police Office, to The Under Secretary of Justice.

Water Police Office, Sydney, 8 August, 1892. Re A. A. Carraway.—In compliance with your telephone message of this morning, papers in this case are forwarded herewith.

C. N. PAYTEN, Acting C.P.S. and Chamber Magistrate.

WARRANT.
Information—(General Purposes.)

New South Wales,)

Sydney, to wit. \(\)
BE it remembered, that on this 27th day of April, in the year of our Lord, 1892, at Sydney, in the Colony of New South Wales, Edward Fischer, 15, Victoria Arcade, of Castlereagh-street, Sydney, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the Peace of our Lady the Queen in and for the Colony of New South Wales, and on oath informs me, that on the 25th day of April, in the year of our Lord, 1892, at the Metropolitan Police District, in the said Colony, a man named Carraway, did steal one overcoat of the value of £5 5s., the property of this deponent, an offence punishable by law in this Colony by penal servitude for five years; contrary to the Act in such case made and provided; whereupon the said Edward Fischer prays that I, the said Justice, will proceed in the premises according to law.

EDWARD FISCHER.

Sworn at Sydney, in the said Colony, on the day first above written, before me,—

GEORGE H. SMITHERS, Justice of the Peace.

Queensland, Brisbane, to wit.

Remand Warrant - (Fugitive Offenders Act, 1881.)

To Thomas Headd of the Queensland Police Force, and the Keeper of the Brisbane Gaol.

BE it remembered that on the 21st day of May, 1892, Albert Ambrose Carraway, late of the Colony of New South Wales, was brought before me, Geo. P. M. Murray, Esquire, Police Magistrate, Brisbane, sitting at the Police Court, Brisbane, and charged that at the Metropolitan Police District in the Colony of New South Wales, he, the said Albert Ambrose Carraway on the 25th day of April, 1892, did steal one overcoat of the value of £5 5s. the property of Edward Fischer, an offence punishable by law in the said Colony of New South Wales, by penal servitude for five years, and I, the undersigned, being satisfied that the original warrant for the apprehension of the said Albert Ambrose Carraway, is duly authenticated as directed by the Fugitive Offenders Act, 1881, and was issued by a person having lawful authority to issue the same, and being satisfied on the oath of Michael Toomey and others, that the said Albert Ambrose Carraway is the person named in the said warrant, do now order that the said Albert Ambrose Carraway be returned to the said Colony of New South Wales, the British possession in which the said warrant was issued, there to be dealt with according to law; these are, therefore, to command you, the said Thomas Headd and all other police officers, in her Majesty's name, forthwith to convey and deliver the body of the said Albert Ambrose Carraway, into the custody of the said keeper of the gaol at Brisbane aforesaid; and you, the said keeper, to receive the said Albert Ambrose Carraway into your custody, and him there safely to keep until he is thence delivered into the custody of the persons to whom the said original warrant is addressed, pursuant to the provisions of the said Fugitive Offenders Act, 1881, for which this shall be your warrant.

Given under my hand at Brisbane, this 21st day of May, A.D. 1892,-

GEO. P. M. MURRAY,

Police Magistrate.

[46 Vic. No. 17 Sec. 70.]

Sir, Queensland, Police Court, Brisbane, 21 May, 1892.

I have the honor to forward enclosed herewith depositions and warrants in the case of Albert Ambrose Carraway, on a charge of larceny, whom I have this day remanded to your Court to be further dealt with.

I have, &c.,

To G. H. Smithers, Esq., J.P., Sydney.

GEO. P. M. MURRAY, Police Magistrate.

Police Court, Brisbane, 13 May, 1892.

Before G. P. M. Murray, Esquire, Police Magistrate.

Albert Ambrose Carraway—Larceny of a coat in the Colony of New South Wales. The defendant in custody appears before the Court.

GEO. P. M. MURRAY, P.M.

Michael Toomey, on oath, saith:—I am a detective stationed in Brisbane; I know defendant, Albert Ambrose Carraway, now before the Court; on this morning, 13th May instant, I saw him at the detective office, Ann-street, Brisbane; he said to me, "One of your men was inquiring about me yesterday, and I came to see what it was about"; I said, "Is it a man named Hanley that was telling you"; he said, "Yes"; I said, "Is your name Albert Ambrose Carraway"; he said, "Yes"; I said, "Did you live or carry on business at 176, Clarence-street, Sydney"; I believe he said he carried on business there; I said, "Do you know Fischer, a tailor carrying on business at 15, Victoria Arcade, Castlereagh-street"; he said, "Yes"; I said, "There is a warrant for your arrest for stealing an overcoat"; I think he said, "How can that be?"; I then said, "Have you got the overcoat?"; he said, "I have"; he afterwards said, "I left my measure with Fischer for the overcoat, and I went to his shop and saw an assistant there. I was given the coat to fit on, and I kept it on and got a bill with it"; I then read to defendant the warrant I now produce; it is endorsed for execution in this Colony; it is under the hand and seal of George H. Smithers, Esquire, a magistrate of the Colony of New South Wales; defendant made no reply when I read the warrant to him; I then accompanied defendant to a house in the Valley, and he handed me the coat I now produce; it answered the description of a coat reported by telegram as stolen from Fischer; I brought defendant to the watch-house and handed him over to the custody of the watch-house-keeper; I brought defendant to the watch-house and handed him over to the custody of the watch-house-keeper; I brought defendant before me at Brisbane, MICHAEL TOOMEY.

Taken and sworn before me at Brisbane, MICHAEL TOOMEY.

GEO. P. M. MURRAY, P.M.

The defendant, Albert Ambrose Carraway, is remanded to 20th May, instant.

GEO. P. M. MURRAY, P.M.

Police Court, Brisbane, 20 May, 1892. Before G. P. M. Murray, Esquire, Police Magistrate.

Albert Ambrose Carraway, on remand; larceny of a coat.

THE defendant, in custody, appears before the Court, and is remanded to 21st May instant. Bail, self in £40, and one surety in £40. GEO. P. M. MURRAY, P.M.

Police Court, Brisbane, 21 May, 1892. Before G. P. M. Murray, Esquire, Police Magistrate.

Albert A. Carraway, on remand; larceny. DEFENDANT, on bail, appears before the Court.

GEO. P. M. MURRAY, P.M.

Robert Elliott, on oath, saith:—I am a senior-constable of the New South Wales Police, doing duty at Sydney; I know the signature of the warrant now shown me; it is that of George H. Smithers, a chamber magistrate in Sydney, and a magistrate of the territory of New South Wales; I know defendant, Albert A. Carraway; I pray that he may be remarded to Sydney, in the Colony of New South Wales when the effects is said to have been source; the least of the sydney in the Colony of New South Wales when here a source; the least of the sydney is said to have been source; the least of the sydney in the Colony of New South Wales when here the sydney is said to have been source; the sydney is said to have source; t South Wales, where the offence is said to have been committed, and where the witnesses to prove the

R. ELLIOTT.

GEO. P. M. MURRAY, P.M.

Defendant, Albert A. Carraway, is remanded to Sydney, in the Colony of New South Wales. GEO. P. M. MURRAY, P.M.

Warrant to apprehend a person charged with an Indictable Offence.

To the Superintendent and a constable in the Police Force for the Colony of New South Wales, and to all other constables in said Force.

WHEREAS a man named Carraway, of the Metropolitan Police District, in the said Colony, hath this day been charged upon oath before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that he, on the 25th day of April now instant, at the Metropolitan Police District, in the said Colony, did steal one overcoat of the value of £5 5s., the property of Edward Fischer, an offence punishable by the said Colony by penal servitude for five years. These are therefore to command you, in Her Majesty's name, forthwith to apprehend the said man named These are therefore to command you, in Her Majesty's name, forthwith to apprehend the Sale Main Ramos Carraway, and to bring him before me or some other of Her Majesty's Justices of the Peace in and for the said Colony, to answer unto the said charge, and to be further dealt with according to law.

Given under my hand and seal, this 27th day of April, in the year of Our Lord 1892, at Sydney, in the Colony aforesaid.

GEORGE H. SMITHERS,

Justice of the Peace.

Queensland.

Queensland, Brisbane, to wit. On the 13th day of May, A.D. 1892, at Brisbane, in the Colony of Queensland, Michael Toomey, of the City of Brisbane, appeared personally before me, the undersigned, one of Her Majesty's Justices of the Peace in and for the City of Brisbane and Colony of Queensland, and on his oath informs me that the signature of George H. Smithers, J.P. to the within warrant subscribed is in the hand-writing of the Justice of the Peace within mentioned. MICHAEL TOOMEY. Sworn before me, at Brisbane, this ?

13th day of May, A.D. 1892,—; P. W. PEARS, J.P.

Queensland, ?

Whereas proof on oath hath this day been made before me the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony of Queensland, that the name of George H. Smithers to the within warrant subscribed is of the handwriting of the Justice of the Peace within mentioned; I do, therefore, hereby authorise Michael Toomey, Detective-Constable, who brought to me this warrant, and all other persons to whom this warrant was originally directed, or by whom it may be lawfully executed and all constables and other Peace officers of the said Colony of Queensland to execute the same within the said last-mentioned Colony, and to bring the said man named Carraway if apprehended within the same Colony of Queensland before me or before some other Justice or Justices of the Peace of the same Colony, to be dealt with according to law.

Given under my hand this 13th day of May, A.D. 1892.

P. W. PEARS, J.P.

Executed by me, this 13th day of May, 1892.—MICHAEL TOOMEY.

Albert Ambrose Carraway (aged 29).
Stealing an overcoat, value £5, the property of Edward Fischer.—23/5/92. B.L., S.M., W.P.C.,

Remanded until Thursday next. Bail refused.

Daniel Power on oath states:—I am a senior-constable of Police; about 9:30 this morning I read the warrant produced to the prisoner; he replied "Very good;" I produce the depositions taken at

Mr. Smith for prosecution. Mr. G. F. Williamson for defence.

To Mr. Williamson: I know prosecutor.

DANIEL POWER.

Taken and sworn at Water Police Office, this 26th day of) May, 1892, before me,—
BENJAMIN LEE, Stipendiary Magistrate.

Edward

Edward Fischer, on oath, states:—I am a tailor, carrying on business at 15, Victoria Arcade, Sydney; the prisoner was introduced to me by his partner; I allowed him credit for a suit and an extra pair of trousers; he came to me about end of March, and ordered another suit, and also an overcoat, to cost £5 5s.; the total cost of goods he ordered and was £16 odd; he told me he would give he half in middle of April; I sent him the second suit, but retained the overcoat, to see if he would keep his promise; the middle of April came; he did not pay; I sent my young man with instructions to ask for some money; that was on a Saturday; on the following Monday I went out for a few minutes, and when I returned the overcoat had gone; on the same day I sent the boy to accused with a message; the accused left for Brisbane on the Tuesday; I saw his name in the passenger list in the newspaper; he had no authority from me to take the coat without payment; I did not authorise anyone to give accused the coat; I value the coat at £5 5s.

To Mr. Williamson: I have my books here; I produce the entry; it was made before the accused got the coat; I did not send my boy with a message that there was something wrong with the overcoat; I sent him to find out accused's private residence; I always keep my bills made out; I instructed the boy not to give anything away; I left accused's bill there.

Taken and sworn, at Water Police Office, Sydney, this ?

E. FISCHER.

26th day of May, 1892, before me,-

Benjamin Lee, Stipendiary Magistrate.

George H. Neal, on oath, states: -I am an assistant to Mr. Fischer; I know accused; I went to George H. Neal, on oath, states:—I am an assistant to Mr. Fischer; I know accused; I went to his place on a Saturday to ask for the full amount due, including the overcoat; I found the place closed up; on the following Monday Mr. Fischer went out for a few minutes; the accused came in; he said, "Is Mr. Fischer in?" I said, "No"; he said, "Is my overcoat done?" I pointed to the window and said, "Is that it?" he said "Yes," and took it; I helped him on with it; he went to look in the glass; I gave him the bill, and asked him to settle it; he said, "That's all right; I am a good customer of Mr. Fischer's"; I said, "You had better wait until Mr. Fischer came"; he walked out; Mr. Fischer came in, and I told him what happened; I afterwards met accused, and asked him for his private address; he gave it to me; I went and found he had left there. I had no instructions to deliver the coat to him. went and found he had left there; I had no instructions to deliver the coat to him.

To Mr. Williamson: I told him Mr. Fischer wanted to see him; he gave me his private address.

Taken and sworn, at Water Police Office, Sydney, this ? GEORGE H. NEAL.

26th day of May, 1892, before me,

Benjamin Lee, Stipendiary Magistrate.

New South Wales, ? Sydney, to wit.

[46 Vic. No. 17, sec. 150.]

Whereas Albert Ambrose Carraway stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this 26th day of May, in the year of our Lord, 1892, for that he, the said Albert Ambrose Carraway, on the 25th day of April, 1892, at Sydney, in the said Colony, did steal one overcoat of the value of £5 5s., the property of Edward Fischer, and the evidence for the prosecution is, in my opinion, sufficient to put the accused on his trial; but it appearing that the case may properly be disposed of summarily, I have reduced the charge into writing and read it to him, and having asked the accused whether he consents to its being disposed of summarily, and having explained to him that he is not obliged to plead before me, but is entitled to have the case disposed of in the ordinary course of law, he consents to its being disposed of summarily, and, being asked whether he is guilty or not, pleads "Not guilty."

BENJAMIN LEE, S.M.

Water Police Office, this 26th day of May, 1892,-

Albert Ambrose Carraway, on oath, states:—I was in partnership with Mr. Deverill; I ordered the coat from Mr. Fischer; I asked Mr Fischer if it was ready; he said, "No; it would be ready at end of week"; he made no application at all for payment; our arrangement was half cash in six weeks and balance in three months; I called on the Saturday in good faith for the coat; asking for Mr. Fischer, I was told he was out; on inquiring if the coat was ready, the assistant said, "Is this the one?" I took the coat; he gave me the bill; I said, "Mr. Fischer and I have an arrangement"; I afterwards met the boy and gave my address, "10, Wigram Road, Glebe."

Taken and sworn at the Water Police Office, Sydney, this 26th day of May, 1892. before me.—

this 26th day of May, 1892. before me,-

Benjamin Lee, Stipendiary Magistrate.

Fined £10, complainant's costs, £1 1s., or six months' gaol. Sydney, 26th May, 1892, Benjamin Lee, S.M. G.R.S., Water Police Office. Paid, 28 May, 1892, Sydney. Entered.—H.M.B., 28/5/92. Notice of appeal; bond, self £40 and two sureties of £20 each. Mr. Lee, S.M., directed overcoat to be handed over to accused.

No. 3.

The Under Secretary of Justice to B. Lee, Esq., S.M.

Department of Justice, Sydney, 8 August, 1892. I am directed by the Minister of Justice to forward the enclosed papers respecting the case Fischer v. Carraway, heard before you at the Water Police Court on the 26th May last, and to ask you to be good enough to furnish him with a full report upon this case.

I am at the same time to state that the Minister would also like to know upon what grounds, and

under what circumstances a warrant was issued for the apprehension of Carraway in Brisbane, and whether he was refused bail by you; and, if so, upon what grounds?

I have, &c.,

ARCH. C. FRASER, Under Secretary.

No. 4.

T. J. Houghton, Esq., M.P., to The Minister of Justice.

Parliament House, Sydney, 6 August, 1892. Sir, I attach hereto a report, which appeared in this morning's *Herald*, of an application to the Supreme Court to make absolute a *rule nisi* for a writ of prohibition directed to Benjamin Lee, S.M., and Edward Fischer, of 15, Victoria Arcade, tailor, to set aside an order or conviction against Albert Ambrose Edward Fischer, of 15, Victoria Arcade, tailor, to set aside an order or conviction against Albert Ambrose Carraway, on the 26th May last, and I beg to direct your special attention to the remarks of their Honors the Chief Justice and Justices Windeyer and Stephen, regarding the gross ignorance of the law and the first principles of the administration of justice, manifested by Mr. Lee in dealing with a charge of larceny preferred against Carraway by Fischer. This is not the first occasion on which Mr. Lee has been severely taken to task by the Judges and the Press for the manner in which he adjudicates in his capacity as a Stipendiary Magistrate; and as it is of the highest importance that justice should be satisfactorily administered by competent persons, I think it high time that the Government called upon Mr. Lee to show cause why he should not be removed from the Bench. It would not be possible for me to Lee to show cause why he should not be removed from the Bench. It would not be possible for me to speak in stronger terms than their Honors the Judges of the Supreme Court regarding Mr. Lee's action in the particular case under notice, so I will content myself by merely directing your attention to the attached report, and in your reply I will be glad to hear that you deem the matter of so much importance that you have determined to lose no time in calling upon Mr. Lee to show cause why he should not be I am, &c., T. J. HOUGHTON. removed from the Bench of the Colony.

[Copy of extract from Sydney Morning Herald enclosed.]

I have already instituted an inquiry into this matter.—R.E.O'C., 8/8/92.

No. 5.

The Under Secretary of Justice to T. J. Houghton, Esq., M.P.

Department of Justice, Sydney, 9 August, 1892. Sir, I have the honor, by direction of the Minister of Justice, to acknowledge the receipt of your letter of the 6th instant, in which you call attention to the decision of the Full Court in the case "exparte Carraway, re B. Lee, S.M., and Edward Fischer," and to inform you that the Minister has already , I have, &c., ARCH. C. FRASER, instituted an inquiry into the matter.

Under Secretary.

No. 6.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Water Police Office, Sydney, 10 August, 1892. I have to acknowledge receipt of your letter of 8th instant, forwarding papers in the case Fischer v. Carraway, and in accordance with the request of the Minister of Justice, beg to report that on the 27th April last, a warrant was issued at this Court at the instance of Edward Fischer for the arrest Sir. on the 27th April last, a warrant was issued at this Court at the instance of Edward Fischer for the wilder of a man named Carraway, who was charged with stealing an overcoat of the value of £5 5s. Carraway was subsequently arrested at Brisbane, and brought to Sydney under that warrant, and the case was dealt with by me. He was first brought before me on 24th May, being a public holiday, and remanded to 26th. I refused bail because it was shown he was brought from Brisbane, and although bail had there been allowed, he did not obtain it; the remand was only for one day. The depositions taken when the been allowed, he did not obtain it; the remand was only for one day. The depositions taken when the case was heard before me on the 26th, although giving the substance of the evidence of the witnesses, do not not call that we will be the case was heard before me on the 26th, although giving the substance of the evidence of the witnesses, do not state all that was said before me by them, more particularly the boy Neal, who several times told Carraway that Fischer had given him positive instructions not to allow the coat to be taken unless the money was paid first

In defiance of this he walked away with it, and was not again seen, but took his departure from the Colony. It is a strong feature against him that he did not call for the coat until just before his departure for Brisbane. Further he gave no account of his change of address, but on the contrary, he

gave to the boy Neal, when he (Neal) met Carraway in the street, the address which he had left.

There is also the fact of his broken promise to pay one half his account in the middle of April.

I submit that if Carraway's actions had been straightforward, nothing would have been easier than for him to comply with the repeated requests of the boy, and remained until Mr. Fischer himself was

present, which was very shortly after the coat had been taken away by Carraway.

These cases of obtaining property by all sorts of tricks are unfortunately becoming of almost every-day occurrence before the Courts, and from all the circumstances surrounding this case, I was of opinion that this was a trick.

On the day of hearing, the charge sheets in my Court were very heavy, and I submit that, having that fact in view, some leniency might fairly be shown to me in this error which has unfortunately arisen, and which has called forth such severe remarks at the hands of their Honors.

I would respectfully invite the attention of the Honorable the Minister to the Sydney Morning Herald of the 5th instant, wherein it will be seen that a Judge made errors in two cases, and the Full Court setting aside a nonsuit granted in each case attributed the error to the hurry of the Judge in nisi prius business.

When a learned Judge is capable of such errors, I do most confidently submit that I am entitled to sympathy on the ground of heavy pressure of work on the day of hearing the case.

I consider that their Honors were unnecessarily harsh under the circumstances, seeing that even the most learned lawyers on and off the Bench are but human and liable to err.

In accordance with the request contained in the last paragraph of your letter, I also enclose a report from Mr. Smithers, D.S.M., then Chamber Magistrate. I,

Wright, Heaton & Co. v. Barrett, and Owens v. Kauri Timber Company.

I, of course, admit that making any order for Carraway to retain the coat was an error, but I should not have been asked at all in the matter. The coat should have been handed over by the police without asking me. At the close of a long morning I inadvertently made the order, seeing that the coat had been in Carraway's possession for some time and worn, was not of much use to Fischer, and the accused being dealt with by a fine, which I was led to believe he would pay. I thought substantial justice would be done by the fact that Fischer, the prosecutor, would be entitled to half the fine, viz., £5.

In conclusion, it may not be out of place to refer you to the heavy work I have been called upon to perform, in many cases doing double duty during the absence, through sickness or otherwise, of my colleagues, in proof of which I would invite your attention to your letter of 13th November, 1890, No. 90-14,834, wherein I was thanked for the attention paid by me to the work of the Courts during the unavoidable absence of my colleagues.

I have, &c, unavoidable absence of my colleagues.

BENJAMIN LEE,

Stipendiary Magistrate.

[Enclosure.]

Sir,

In accordance with the last paragraph of a letter addressed to Mr. B. Lee, S.M., I have the honor to report that, on the 27th April last Edward Fischer applied to me to issue a warrant for the arrest of a man named Carraway for stealing an overcoat, value £5s. 5s. Fischer stated that the coat was made on the distinct understanding that it was to be paid for on delivery, and that one day, during his (Fischer's) absence from the shop, Carraway walked in and asked whether the coat was finished, and was told "yes" by a boy who was left in charge of the shop. Carraway then picked it up, and, in spite of the boy's protest, walked out of the shop.

Fischer further stated that he believed Carraway had left the Colony to defeat the ends of justice. I then issued the warrant.

warrant

The facts as disclosed in the depositions are quite new to me.

I have, &c.,
GEORGE H. SMITHERS, Deputy Stipendiary Magistrate.

The Under Secretary of Justice.

No. 7.

Minute of The Under Secretary of Justice.

Official history of Mr. Benjamin Lee, Stipendiary Magistrate.

Department of Justice, Sydney, 11 August, 1892. Mr. Lee's first appointment to the public service was on the 12th August, 1874, as Police Magistrate at Bathurst, with salary at the rate of £500 per annum. The rate of salary attached to the office was increased to £525 per annum from the 1st January, 1885, and to £550 from 1st January, 1886. Mr. Lee continued to hold this position with salary at the rate of £550 per annum till 1st April, 1890, when he was appointed to his present position as a Stipendiary Magistrate, vice Mr. Marsh, with salary at the rate of £800 per annum.

Prior to his appointment as Stipendiary Magistrate, Mr. Lee acted as Stipendiary Magistrate on several occasions. In 1888, from April, for six weeks during the absence of Mr. Marsh, and in July, 1888, for one month during the absence of Mr. Johnson. In 1889, two months from 1st May, during absence of Mr. Addison; for six months during the absence of Mr. Marsh from the 1st July; and in 1890 for a

period of three months during extended leave of absence to Mr. Marsh from 1st January.

Urgent. Obtain for me the following particulars with regard to each Stipendiary Magistrate who has occupied the Sydney Bench continuously from 1st July, 1889:—1. Number of complaints against decisions. 2. Number of cases in which the Minister has commented unfavourably on the Stipendiary Magistrate's decision, with particulars in the last-mentioned cases.—R.E.O'C., 13/8/92. Herewith, 15/8/92.

MR. G. W. F. Addison, S.M.

Date.	Nature of complaint.	Reply and decision.
9th Feb., 1892.	Trustees of National Park complained of Mr. Addison's dismissing a case brought by a park ranger (Laycock) against one Duncan for assault, whom he caught fishing illegally.	Duncan was not fishing as alleged, and that Laycock acted quite outside his duty as park ranger. The Minister (Mr. O'Connor) declined to take any action.
28th Mar., 1889.	Mr. W. M. Azzoni complained that he had wrongly been ordered to pay certain money for work done which was not due, and inquired Mr. Addison's reasons for his verdict.	
23rd Mar., 1889.	Mr. R. J. Jones complained of Mr. Addison dismissing a charge of false pretences he brought against one Wilson, and of remarks made concerning him by Mr. Addison, from which he asked to be cleared.	ing the evidence of prosecutor, about whose bona-fides he had grave doubts. The Minister said as the case was to be re-
2nd Nov., 1889.	Mrs. Rosina Hindman complained that she had unjustly been fined for assault on one Walker.	Mr. Addison reported that Mrs. Hindman had

29th Nov., 1889.	Mr. W. H. Pass complained that without himself or any of his witnesses being called, an order for maintenance of	foundation. His solicitor consented to an order. Mr. Pass was informed he might apply to
June, 1890.	wife and children was made. Mr. T. H. Tomley (through Mr. J. F. Cullen, M.P.), complained his son, Albert, had, in company with another boy, been unjustly convicted of stealing.	Quarter Sessions to quash or vary the order. Mr. Addison reported the boys had been convicted on two charges on the clearest evidence, and received the lenient sentence of seven days imprisonment. The Minister declined to take any action.
17th Sept., 1890.	A newspaper report stated Mr. Addison had threatened to confer with his colleagues as to ordering whipping if brutal and unprovoked assaults, then numerous, were continued.	A circular was sent to the Stipendiary Magistrates, stating that in view of the disturbed state of society (Maritime strike), whipping would be undesirable. Imprisonment, without the option, would be sufficient.
	Mr. G. O'MALLEY	CLARKE, S.M.
21st Nov., 1889.	William Barnet complained that in a case in which he was concerned Mr. Clarke called him an idiot, and explained he was hald of hearing.	ance of the man justified the remark; deafness could not account for the dense stupidity he exhibited. Writer so informed.
	Captain Fish	
28th June, 1889.	Mrs. Parker complained a miscarriage of justice had taken place through Capt. Fisher dismissing informations, she had brought against Mr. C. Campbell for assault and threatening language.	Captain Fisher reported that he dismissed the cases on their merits. Mrs. Parker was informed the Department could not interfere with the decision of Magistrates.
10th July, 1890.	Mr. Benjamin O'Brien, per Mr. Molesworth, M.P., complained that as a respectable man he had been insulted by Capt. Fisher stating he could not	Captain Fisher reported he could not believe O'Brien's evidence, and said so. Mr. Molesworth furnished with copy of report.
	believe a word of his evidence in a certain case.	
25th July, 1889.	Mr. G. M. Smyth complained that after an information against him under the Sale and Delivery of Coal Act had been withdrawn, Capt. Fisher per- mitted a fresh information to be laid, when a fine was imposed, and that he	Captain Fisher maintained the correctness of his decision, and pointed out if he were wrong in law he could be called upon to state a case. Mr. Smyth informed that if aggrieved he should apply for prohibition to Supreme Court.
5th Dec., 1889.	showed ignorance of the law. Mr. Buchanan, in Legislative Council, asked if further steps were to be taken against one Thomas, clerk in the Bank of New Zealand, sentenced to 6 months imprisonment for misappropriating valuable securities.	
19th Feb., 1892.	Mr. P. J. Shoppee complained that in a small debts case he obtained a verdict for £3, but that upon a rehearing the same magistrate only gave a verdict for 10s.	
	Mr. Whittingdale	
16th June, 1890.	Mr. W. Hunt complained that, after having obtained a verdict against Abel & Co. for wages, in his absence Mr. Johnson ordered a rehearing, saying he would have to summon Abel again.	shortly after Mr. Abel entered the Court, said he never received a summons, and had only just
Nov., 1890.	In a case of Regina v. Scholes, shooting with intent, the Attorney-General minuted that medical evidence should have been taken before committal.	Mr. Johnson said in a case like this it was not necessary that actual bodily harm should have been inflicted. Attorney-General said, in absence of medical evidence, it was uncertain whether any wounding had taken place. Copy of Attorney-General's minutes sent to Mr. Johnson, with a request he would act in
Nov., 1890.	In a case Regina v. Steadman, wife desertion, Attorney-General called attention to the inadmissibility of the wife's evidence, and stating he declined to prosecute.	accordance therewith in future. Copy of minute sent to Mr. Johnson.

Mr. Benjamin Lee, S.M.

Date.	Nature of complaint.	Reply and decision.
17th May, 1888.	Mr. S. Bornstein, pawnbroker, complained that Mr. Lee had made some insulting and uncalled for remarks concerning him, adding that "if there were no pawnbrokers there would be no thieves."	Mr. Lee denied use of words attributed to him, and was supported by deposition clerk and police sergeant in charge of Court. No decision.
Sept., 1888.		Parker in Bathurst district did not lead him to place much reliance on him. The Minister (Mr. Clarke) declined to inter-
12th July, 1889.	Mr. N. Jacobs complained Mr. Lee had refused to hear awages case for £9 5s.	over £10, and therefore he had no jurisdiction.
19th Sept., 1889.	in which he was plaintiff. Mr. Vardy, solicitor, complained of the action of Mr. Lee in dismissing a case he had brought against Mr. C. T. Richards, solicitor, to find sureties to keep the peace.	ground that this was a vulgar dispute between two attorneys.
20th June, 1889.	Queensland Government complained of decision of Mr. Lee in ordering that only £20 should be paid by girls Lynch, arrested for breach "Queensland Immigration Act," under "Fugitive Offenders Act," as Queensland Government actually paid £35 10s. for their passages.	Mr. Lee replied that his decision was correct; that, having regard to all the circumstances, he
10th May, 1890.	Mr. James Gannon, Sydney, complained of Mr. Lee's decision in the suit Phillbin v. Gannon, a case in which rightful possession of a sewing-machine was in dispute.	Mr. Lee furnished a report, in which he held he was guided by the balance of testimony and probabilities of the case. The Minister (Mr. Gould) declined to take any action.
18th June, 1890.	Mr. Alfred Allen, M.P., called attention at request several residents of Waverley, to action Mr. Lee in fining Constable Symington on a charge of using undue violence to a prisoner in his custody.	Mr. Lee held the balance of testimony was against defendant. The Minister (Mr. Gould) declined to inter-
10th Dec., 1889.	Mr. L. Hill, Newtown, complained that Mr. Lee had, unjustifiably, dismissed a case he brought against Mr. W. J. Hill, solicitor, for a breach of the Stamp Act.	Mr. Lee reported there was a conflict of testimony—oath against oath—and he exercised his discretion. The Minister (Mr. Gould) found that the offence had been clearly proved, and that defendant ought to have been convicted. (Mr. Lee was so informed).
June, 1890.	Question asked in Legislative Assembly as to whether Attorney-General would be asked for opinion in case, Atha v. Oslund, as to whether prima facie case had been made out for prosecution for bigamy, Mr. Lee having declined to	Mr. Gould replied:—"Attorney-General was of opinion it was undesirable to institute criminal proceedings, and that when magistrate exercised his discretion, unless in extreme cases, it was not advisable for the Attorney-General to inter-
23rd June, 1890.	commit. The Police authorities, at the instance of Sub-Inspector Bremner, complained that in the case of one Henry Robinson Mr. Lee had unjustifiably reduced a charge of breaking and entering to one of simple larceny.	report." Mr. Lee replied that, under all the circumstances of the case, he acted properly. Robinson was of weak intellect, and it was not clear that he broke into the place. Papers were forwarded for the perusal of the Inspector-General of Police, who justified action
Sept., 1890.	tion to committal for trial of one Ross for shooting with intent, as not	to decide. Mr. Gould (then Minister) decided com-

Newspaper report of case in which one Kurtz appealed against a conviction for obtaining money by false pretence; conviction quashed—no one appearing for respondent, against whom (Mrs. Leach) costs given.	mittal was not justifiable. Mr. Lee contended this was a Police case, and that Crown should have been represented in usual way.

Date.	Nature of complaint.	${f R}_{ heta}$ ply and decision.
21th Nov., 1890.	Mr. F. C. Farmer complained of Mr. Lee having dismissed a case (insulting language) he had brought against one Springfield.	Mr. Lee reported this case was the outcome of former proceedings, and he acted rightly in dismissing it. The Minister (Mr. Gould) declined to interfere.
3rd Dec., 1990.	The Police, at the instance of Sub-Inspector Bremner, complained of Mr. Lee having wrongly—on a technical point—dismissed a case against one O'Brien, for keeping a brothel.	Mr. Lee reported the point taken was a valid one. No failure of justice could arise, as a fresh information could be laid. The Crown Solicitor strongly condemned Mr. Lee's action. Copy opinion of Crown Solicitor forwarded Mr. Lee for future guid- ance.
Sept., 1890.	Mr. Lee's decision in case Middleton v. Chapman (detention of goods) reversed by Supreme Court.	Mr. Lee allowed £6 6s., law costs incurred by
May, 1891.		Copy of minute forwarded to Mr. Lee, the Minister (Mr. Gould) adding, "greater care should be observed in dealing with such cases."
June, 1891.	In case Regina v. Healey, Attorney-General declined to prosecute, but pointed out three witnesses for the defence had not been bound over to appear at trial.	Mr. Lee pointed out it was the duty of the Chamber Magistrate to bind over witnesses.
Mar., 1890.	Mr. F. Lemm, Balmain, complained of decision of Mr. Lee in case Dawney v. Lemm.	The Minister (Mr. Gould) declined to interfere.
April, 1892.	l	was not a case in which the discretion of a magistrate was to be interfered with.
June, 1892.	Messrs. Davis and Black, M.'sP., brought under notice the case of the crew of the ship "British Commodore," sen- tenced to eight weeks' imprisonment each, for disobedience of orders.	imposed a sentence of eight instead of four week's imprisonment (the maximum penalty).
Aug., 1892.		

No. 8.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Sir,

I have the honor to apply for six months leave of absence with the understanding that unless the Honorable the Minister sees fit to permit me to resume duty, if my health permits, I retire from the service at the end of that period, and that an amount be placed on the estimates to cover the amount which would be deducted from my pension under the provisions of the "Civil Service Act."

I attach a medical certificate as to the state of my health, showing the absolute necessity for rest.

There are a large number of cases adjudicated upon by me now awaiting the awarding of imprisonment in default of distance and as it will necessarily take some time to prepare the form of adjudication

I attach a medical certificate as to the state of my health, showing the absolute necessity for rest. There are a large number of cases adjudicated upon by me now awaiting the awarding of imprisonment in default of distress, and as it will necessarily take some time to prepare the form of adjudication in each case and the warrants for my signature, I would therefore request, in order that no inconvenience may arise to the Department, that such leave date from the 15th September next.

I have, &c., BENJAMIN LEE,

Stipendiary Magistrate.

$\lceil Enclosure. \rceil$

5, Bligh-street, Sydney, 24 August, 1892.
This is to certify that Mr. Benjamin Lee has been under medical treatment for nervous exhaustion for some time, and I am of opinion that it is absolutely necessary for him to have complete rest for a considerable period in order that he may regain his health.

WM. MORRIS, L.F.P.S.,G.

Submitted.—A.C.F., 26/8/92.

I approve of six months leave from the 15th September next on full pay being granted to Mr. Lee on condition that at the expiration of that period he retire from the public service. It must, however, be distinctly understood that the condition of retirement is absolute. I also approve of the provision asked for being made on the Estimates now being prepared. Inform Mr. Lee.—R.E.O'C., 27/8/92.

No. 9.

Minute by The Minister of Justice.

Subject: -Mr. Lee's action in the case ex parte Carraway, and his application for six months' leave on condition of retiring from the public service at the expiration thereof.

Department of Justice, Sydney, 27 August, 1892. My attention was first called to this case by the judgment of the Supreme Court on appeal from Mr. Lee's decision. In delivering judgment, their Honors individually commented in strong terms upon Mr. Lee's action. I obtained a report from Mr. Lee, and also the proceedings before him. I have also had before me all the papers connected with the complaints—seventeen in all—which have been made against Mr. Lee's decisions since the beginning of his continuous service in Sydney in July, 1889. I have also heard from Mr. Lee himself everything he has to say in defence of his action. After the most careful consideration, I have come to the conclusion that Mr. Lee's mistake in this case was not merely an error of judgment, but that it was an error which proceeded from a want of knowledge, which renders him liable Judgment, but that it was an error which proceeded from a want of knowledge, which renders him liable at any time to fall into an equally serious error. In other words, I am driven to the conclusion that Mr. Lee is not equal to conducting the heavy and important business of the Sydney Stipendiary Bench, and that it is not in the interests of the administration of justice that he should preside there any longer. On the other hand, I am satisfied that Mr. Lee, during the eighteen years of his service on the Bench, has honestly endeavoured to discharge his duties to the best of his ability, has been always zealous, painstaking, and ready to take upon himself the full share of any work that was to be done. In the simple, leisurely business of a country Bench, Mr. Lee may have been fairly efficient, but in the difficult and important business of the Sydney Bench, necessarily transacted at a much higher rate of speed than in the country, Mr. Lee's want of knowledge has rendered efficiency impossible to him, notwithstanding his best endeavours. Under these circumstances, I thought that Mr. Lee was entitled from his long service best endeavours. Under these circumstances, I thought that Mr. Lee was entitled, from his long service, to as much consideration as could consistently with the public interests be shown him. I sent for Mr. Lee, and told him that I would be glad to transfer him to any one of the larger country towns which he would name. He refused this effort society that he mould name. he would name. He refused this offer, saying that he would prefer retirement from the service to transfer from Sydney. I then suggested his retirement, and after some consideration he accepted the suggestion, and agreed to retire from the public service on the terms contained in the following recommendation. In pursuance of this arrangement, Mr. Lee has now applied for six months' leave of absence on full pay on the ground of ill health subject to the conditions of the supplied for six months' leave of absence on full pay

on the ground of ill-health, subject to the conditions of his retiring at the expiration of that leave.

I recommend that leave of absence for six months from the 15th September next, at full pay, be granted to Mr. Lee, on condition that at the expiration of such six months he retire from the public service, and I also recommend, as is usual in cases of retirement, that a sum be placed upon the next Estimates to cover the deduction which would otherwise have to be made from Mr. Lee's pension under the Civil Service Act

the Civil Service Act.

R. E. O'CONNOR.

No. 10.

Minute Paper for the Executive Council.

Subject:—Leave of absence on full pay to Benjamin Lee, Esq., Stipendiary Magistrate, for six months from 15th proximo, on condition that he then retire from the Public Service. No. 92-13,266.

Department of Justice, Sydney, 29 August, 1892. For the reasons disclosed in the accompanying papers, I recommend that Benjamin Lee, Esq., Stipendiary Magistrate, Water Police Court, be granted leave of absence on full pay for six months from the 15th proximo, on condition that, at the expiration of such period of leave, he retire from the Public Service; and I also recommend, as is usual in cases of retirement, that a sum be placed upon the next Estimates to cover the deductions which would otherwise have to be made from Mr. Lee's pension under the Civil Service Act in respect of his liability to the Superannuation Fund.

His Excellency the Governor and the Executive Council.

R. E. O'CONNOR.

The Executive Council advise that leave of absence for the period, and upon the condition herein specified, be granted to Benjamin Lee, Esq., Stipendiary Magistrate.—Alex. C. Budge, Clerk of the Council, 30/8/92.

Min. 92-38. Approved.—Jersey, 30/8/92.

No. 12.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Water Police Office, Sydney, 5 September, 1892. Referring to my letter of the 26th ultimo, applying for leave of absence for six months on a medical certificate, and asking that such leave should date from the 15th instant, on the ground that there were a large number of cases where the distress warrants had been returned endorsed "No sufficient goods on which to levy," now awaiting my adjudication of imprisonment in default of payment of the fines, I have now the honor to inform you that to prevent considerable loss to the revenue, and also to the City Corporation and Metropolitan Transit Commission, it is absolutely necessary that my leave should take effect not earlier than the 1st October next.

I have, &c. BENJAMIN LEE Stipendiary Magistrate.

No. 13.

Minute by The Under Secretary of Justice.

Submitted,—

Special efforts through the Acting Clerk of Petty Sessions and Chamber Magistrate might be made to have all distress warrants in cases in which Mr. Lee has adjudicated, returned by police, transit, or municipal officials as speedily as possible, and in all cases where return of "no goods" has been made, Mr. Lee might be asked to complete the adjudication as coally as practicable. Mr. Lee might be asked to complete the adjudication as early as practicable.

It may be assumed that the distress warrants referred to by Mr. Lee in his letter are not so

numerous that the final action therein required to be taken by him could not be taken before the date already fixed from which his leave of absence is to commence, namely on the 15th instant.

It will be further desirable that Mr. Lee should be requested not to initiate any business which might cause any difficulty or complication in carrying out the arrangement made by the Department in his case.

Approved .-- Is it necessary that Mr. Lee should sit in these cases? Could they be taken up by another S.M.?—R.E.O'C., 7/9/92. It is necessary that Mr. Lee should sit in these cases.—A.C.F., 12/9/92.

No. 14. The Under Secretary of Justice to B. Lee, Esq., S.M.

Department of Justice, Sydney, 7 September, 1892. Sir. In reply to your letter, of the 5th instant, in which you ask that the leave of absence granted to you should not commence until the 1st proximo, I am directed to inform you that the Minister of Justice does not consider it advisable to alter the decision arrived at by the Governor and the Executive Council. He is of opinion that you should not initiate any business which your absence on leave might cause difficulty in completing.

I am to add that the Acting Clerk of Petty Sessions, Water Police Court, has been directed to have all distress warrants in cases in which you have adjudicated returned by the police, transit, or municipal officials as speedily as possible; and in all cases where return of "no goods" has been made to ask you to

complete the adjudication as soon as possible.

I have, &c., ARCH. C. FRASER, Under Secretary.

Memo. to The Acting C.P.S. and Chamber Magistrate, Central Police Office.

Department of Justice, Sydney, 15 September, 1892. $[\mathbf{Urgent.}]$ THE Minister of Justice desires to be furnished with a return showing the cases in which levy and distress, and, in default imprisonment, has been ordered by the magistrates at the Central Police Office when the statute does not empower the presiding magistrate to make a complete adjudication at the one hearing of a case (vide decision of Supreme Court in re Bennett-copy given in circular letter herewith). T.E.M.N. (for U.S.)

[Similar memo. addressed to Acting C.P.S. and Chamber Magistrate, Water Police Office.]

Since the decision in ex parte Bennett on 31st March last, complete adjudication has not been given by any of the magistrates at the Central Police Court when the statute under which the cases were heard did not empower them to do so. I therefore forward a nil return herewith.—F. S. ISAACS., C.P.S. and Chamber Magistrate, Central Police Office, B.C., 15/9/92. The Under Secretary, Department of Justice.

RETURN showing cases in which levy and distress, and in default imprisonment, has been awarded by the magistrates at the Central Police Office when the statute does not empower them to make a complete adjudication at the one hearing of a case.

15th September, 1892.

F. S. ISAACS, C.P.S. and Chamber Magistrate, Central Police Office.

(Circular 92-8,197.)

Department of Justice, Sydney, 1 June, 1892. Gentlemen. I am directed by the Minister of Justice to forward for your information the enclosed copy of reports of the decisions of the Supreme Court in cases ex parte Cook, ex parte William Gannon and in reapplication of Richard Bennett; and to request that soft decisions, which define the powers of Magistrates application of Richard Bennett; and to request the decisions, which define the powers of Magistrates are the control of th in regard to the ordering of imprisonment in default of levy and distress, may be carefully followed by you when adjudicating in summary cases in which the penalty imposed may be directed to be recovered by distress and sale of the offenders' goods.

The Bench of Magistrates.

ARCH. C. FRASER, Under Secretary.

[Enclosures.]

N.S. W. L.R., Vol. XII, 1891.—4th March, 1891.

Ex Parte Cook.

Bread Act (6 Wm. IV. No. 1) s. 11—Light Weight Bread—Form of Information—Special Constable—19 Vic. No. 24, s. 12—Search Warrant—Form of Conviction—11 and 12 Vic., c. 43, s. 22—32 Vic. No. 6, s. 1—Amendment—Costs.

Information under the "Bread Act" laid by J. W. Evans, Inspector of Weights and Measures, &c., and a Special Constable duly authorised, against Cook, for that on the 13th January, 1891, he then, being a baker of bread in a bakehouse belonging to him, did have in his possession certain bread, to wit, 30 batch two-pound loaves, and the said bread was found deficient in due weight, &c. (following the words of s. 11). The information was objected to on the grounds that it did not state that the bread was for sale, and that it negatived any offence by describing the loaves as "two-pound loaves," which was their proper weight. Cook was convicted and fined £18 (being 5s. per ounce shortage) and costs, levy and distress, or two months' gaol.

Held that the information was good; that it need not state that the bread was for sale, and that the words "batch two-pound loaves" merely described the class of bread afterwards alleged to be under weight.

Held,

Held, also, that the conviction was bad, since under the "Bread Act," s. 11, the 11 and 12 Vic., c. 43, s. 22 and the 32 Vic. No. 6, s. 1, there can be no adjudication of imprisonment until it is found that there is no sufficient distress. The conviction was amended by striking out the words awarding imprisonment, but the applicant having objected to the conviction on several other grounds, not merely formal, and failed in them, was not allowed his costs.

SIR GEO. INNES, J: * * * As to the sixth ground we are of opinion that the objection to the form of conviction is a good one, and that the Justices had no power to include in their conviction an adjudication of imprisonment. So far back as 1857 it was pointed out in ex parte Cockburn (4), that there was no power to direct imprisonment by the conviction and before the issue of the distress warrant. There is certainly no such power given, either by the statute under which this prosecution was framed, nor by the 22nd section of 11 and 12 Vic. c. 43. It was pointed out in Cockburn's case that there were certain defects in s. 22; and these it was sought to remedy in the 32 Vic. No. 6, s. 1. However, looking closely at the wording of these two sections, it appears to us to be amply clear that not till the return of the warrant of distress discloses that there is no sufficient distress to be found, can there be any adjudication of imprisonment. Our opinion on this point is strengthened by the cases of ex parte Schneider (1), and ex parte Waters (2).

The conviction, then, is bad in form; but it is clearly amendable, and we direct it to be amended, as in ex parte Waters, by striking out the words awarding imprisonment.

Foster, J., concurred.

Rule discharged without costs.

"Weekly Notes," Vol. VIII.-28th October, 1891.

Ex Parte William Gannon.

Justices; Licensing Act (45 Vic. No. 14) s. 48 and 91; 11 and 12 Vic., c. 43, ss. 19, 20, 21, and 22. Under s. 48 of the Licensing Act of 1882, Gannon was adjudged to pay "£50 to be recovered by levy and distress"; he did not pay the fine and a distress was issued and returned nulla bona. A warrant for commitment to gool for three months was then issued under s. 91, without his being called upon to show cause why he should not be committed to prison. Held, on an application for a prohibition, that he was rightly committed to prison without being called upon to show cause.

and a distress was sissed and returned nulls bona. A warrant for commitment to goot for three monts was then sessed under 20. 19. All this being called upon to sknow cause why he should not be committed to prison. Held, on an application for a probibition, that he was rightly committed to prison without being called upon to sknow cause.

STREIN, J.: The applicant was convicted under the 48th section of the Licensing Act of 1882, and adjudged to pay "250 to be covered by levy and distress." By the 91st section of the same Act such penalty in recoverable by "distress and sale of the goods and thated of the person ordered to pay the same, and in default of sufficient distress in person not paid, and a distress warrant was issued by the onyciting magistrate, and returned under bona. A warrant for not paid, and a distress warrant was issued by the seal magistrate, under which the applicant is not migrated. He has obtained a rule, calling on the magistrate and the prosecutor to show cause why he should not be discharged from custody, on the ground that, upon default of sufficient distress, he should have been called upon to show cause why he should not be committed to prison." This was the point argued before me, and which I have to decide. In order to show a principally referred to the control of the prison of the p "To put the matter in the most favourable view for the defendant, the warrant of commitment is so far conditional that it can issue only in the event of an insufficient distress; but the statute in effect renders the return of the officer evidence of that insufficiency, for it directs the Justice to issue the warrant on the return. The words of the clause are, in our opinion, mandatory, and the Act of the Justice, ministerial. The general principle that no one is to be condemned unheard must wherever applicable be strictly adhered to. But to import it into matters like the present, to which it is inapplicable, would merely entail an unnecessary expenditure of costs, and be an unwise interference with the administration of justice, as a summons to show cause would be a very distinct intimation of the next step that was to follow. We see no fact which could have been urged in excuse by the defendant. No summons to show cause was necessary; there was no cause to show." I am aware that in ex parte Ah Sun thereare an obiter dicta of the Chief Justice which seem opposed to my judgment in this matter; and am therefore glad that, as the term has now commenced, there will be no difficulty in obtaining a review of my decision, which, as the applicant is in prison, the Court will doubtless be pleased to expedite. Several cases were referred to in argument, but none of them seem to me to affect this decision. They decide only that imprisonment cannot be prospectively awarded in the conviction for the offence, that it can only be so after the return of the distress warrant. Such decisions may have in some degree depended on the view that part of the penalty may

may have been paid or levied, and that therefore the defendant must have an opportunity of showing cause. This point, however, I have dealt with. I must dismiss the application with costs. The defendant has no merits. The only cause to show which he suggests is that he has goods somewhere equal in value to the amount of the penalty. If so he might have realised them himself or taken the trouble to point them out to the officer charged with the distress. Application dismissed with costs.

Sydney Morning Herald, 31st March, 1892. In re The Application of Richard Bennett.

Wednesday, March 30. In Banco.—Before the Chief Justice, Mr. Justice Windeyer, and Mr. Justice Stephen).

System Morning Herald, 31st March, 1892.

No. 19.

The Acting C.P.S. and Chamber Magistrate, Water Police Office, to The Under Secretary of Justice.

Water Police Office, Sydney, 15 September, 1892. In compliance with the request contained in your memorandum of even date, I have the honor to furnish herewith a return for the period 1st April, 1892, to 14th September instant, showing the cases in which levy and distress, and, in default, imprisonment has been ordered by the Magistrates at the Water Police Office, where the Statute does not empower the presiding magistrate to make a complete adjudication at the one hearing of the case (vide decision of Supreme Court in re the application of Richard Bennett).

I have, &c.,

C. N. PAYTEN,

Acting C.P.S. and Chamber Magistrate.

RETURN

Return showing the cases in which levy and distress, and in default imprisonment has been ordered by the Magistrates at the Water Police Office, where the Statute does not empower the presiding magistrate to make a complete adjudication at the one hearing of the case. (*Vide* decision of Supreme Court in *re* the application of Richard Bennett), for the period 1st April, 1892, to 14th September, 1892.

No. 23.

Captain Fisher, S.M., to The Under Secretary of Justice.

Central Police Office, 21 September, 1892. Sir, Referring to your letter of 17th September, 1892, No. 92-14,488, regarding my having proceeded to imprisonment in default of L. and D., under the Marine Board Regulations, the Navigation Act not providing for imprisonment,-

My proceeding as I did was a matter of pure inadvertence. I suppose at the time, in the press of business, I forgot that the Act did not provide for imprisonment. No harm was done in these cases, as the fines were paid before the distress warrant went out. I might also add that your circular of 1st June had not then been received, though, of course, I was aware of the decision of the Supreme Court, and always, except in an isolated case such as this, acted up to it.

I have, &c.,

A. MONEY FISHER, S.M.
Submitted with reference to Minister's minute of 17th instant.—A.C.F., 23/9/92. Seen. Planes in reference to Avery's case with the peners in Mr. Lee's area. P. R. O'C. 23/9/92. Seen. Place the papers in reference to Avery's case with the papers in Mr. Lee's case.—R.E.O'C., 26/9 92.

No. 24.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Water Police Office, Sydney, 21 September, 1892. Sir, Adverting to your letter of 17th September instant, forwarding a return of cases dealt with by me, and asking me to furnish a statement of my reasons for making a complete adjudication at the one hearing in the several cases, notwithstanding the decision of the Supreme Court in ex parte Bennett, I have the honor to inform you that, although my action in awarding imprisonment at the time of conviction is not in accordance with the decision referred to, practically it had the same effect as if I had not awarded imprisonment until after return had been made to the distress warrant, as in each case I issued the distress warrant, and when it was returned endorsed "No sufficient goods on which to levy," I thereupon issued my commitment warrant to convey the defendant to gaol, so that it will be seen that the defendant could not be committed without my knowledge.

Even if I had not taken the precaution of signing each commitment warrant, there was no danger of the defendant's suffering the punishment of imprisonment as well as a fine, supposing that in any case there were only sufficient goods to satisfy part of the penalty, as it has been held that the law never intended that a man should suffer both punishments for one conviction (see Paley on Summary Con-

victions, 5 ed., p. 318).

In conclusion, I would bring under your notice the fact that, although the case of ex parte Bennett was decided on the 30th March last, the decision was not placed officially before me until the 1st June. I have, &c.

BENJAMIN LEE,

Stipendiary Magistrate.

The Crown Solicitor, for opinion as to whether Mr. Lee's action, as explained by him, was illegal or not.—R.E.O'C., 22/9/92. T.E.M'N. (for U.S.), B.C.

No. 25.

The Crown Solicitor to The Under Secretary of Justice.

Crown Solicitor's Office, Sydney, 14 October, 1892.

I have the honor to return herewith the letter of Mr. Lee, S.M., of the 21st September ultimo, with the return referred to, showing the cases in which levy and distress, and in default imprisonment, had been ordered by him where the statute did not empower the presiding Magistrate to make complete adjudication at one hearing of the case, for the period 1st April, 1892, to 14th September, 1892, which papers were submitted to me for advice as to whether Mr. Lee's action, as explained by him, was illegal or not.

Mr. Lee explains that, although his action in awarding imprisonment at the time of conviction was not in accordance with the decision of the Full Court in the case of in re Richard Bennett, practically it had the same effect as if he had not awarded imprisonment until after return had been made of the distress warrant, as in each case he had issued the distress warrant, and when it was returned endorsed "No sufficient goods on which to levy," he thereupon issued his commitment warrant to

convey the defendant to gaol.

I think it may be taken that under the law as now laid down by the Full Court in the case mentioned, ex parte Bennett, reported 13 N.S.W.L.R., page 15, there are two classes of cases, namely:—

1. Where the special Act creating the offence is complete in itself, not requiring the aid of any other Act to provide means to enforce its prescribed penalties.

2. Where the special Act is not complete in itself, but it is necessary to seek the aid of section 22 of 11 and 12 Vic., cap. 43, as amended by 32 Vic. No. 6, section 1.

In the first class of cases it is the duty of the Justice adjudicating, "once and for all, to make

complete adjudication"—first, the penalty; next, the mode of enforcing the penalty by distress, failing which imprisonment; the form of conviction in such cases being that given in the schedule to the Act 1 (l).

In the second class of cases, where recourse must be had to section 22 of the Act, the form 1 (l) must not be used, but the order of commitment is to be made only after the return of the distress

Under that section, when the warrant of distress is returned with the endorsement that no sufficient goods are to be found, the Justice to whom such return is made, or any other Justice of the Peace, may issue his warrant to commit the defendant to gaol for any term not exceeding three calendar

The

The question, therefore, whether Mr. Lee's action in making a complete adjudication at once in the cases mentioned in his return will depend upon the question whether these particular cases came within Class 1 or Class 2, as above defined.

I notice that most of the cases were for offences against by-laws (Municipal, Transit, Marine Board, &c.), and probably under the provisions of these by-laws the penalties prescribed by the by-laws are recoverable in the manner provided by the 11 and 12 Vic. No. 43. If such be the case, it would seem that this case would fall within Class 2 referred to above, and therefore the award of the term of imprisonment in default of sufficient distributions should not have been included in the original order, but

should have been made on the return of the warrant, as provided in section 22.

But under the circumstances mentioned by Mr. Lee, I do not think that any objection can now be taken on the ground of illegality, on account of the conviction going further than it ought to have

done.

No doubt substantial justice has been done in each of these cases, and probably the fine has been paid or the imprisonment undergone. If objection had been taken at the proper time to the form of the conviction in any one of the cases, the order would have been amended by striking out the words awarding imprisonment. This was done by the Full Court in the case of ex parte Cook, 12, N.S.W. L.R. 12, when a similar informal order had been made, and the Court held that it was "clearly amendable" in the manner indicated.

That being so, on the amendment being made it would have been open to the Justice to whom the return of nulla bona was made, or for any other Justice, to issue his warrant to commit the defendant.

And this is what was done by the Magistrate in these cases.

From the wording of the various Acts of Parliament it is very difficult indeed to come to an altogether satisfactory conclusion on the matter; and, indeed, it is difficult to reconcile some of the decisions of the Full Court on these points, e.g., ex parte Bennett and ex parte Waters (7, Weekly Notes,

I understand that a Bill is to be introduced enabling the Justice to make a complete adjudication in all cases. It is certainly very desirable that such an Act should be passed as speedily as possible. my opinion it would be very advisable to make this Act retrospective, so as to confirm orders of this kind made out under the authority of a special Act complete in itself. Of course there is an objection generally to retrospective legislation; but, as in these cases substantial justice has been meted out, and the defect is one of form, and "clearly amendable," I do not think that any objection could be reasonably raised to such legislation on that ground.

I have, &c., ERNEST A. SMITH, Crown Solicitor.

No. 26.

Minute by The Under Secretary of Justice.

Department of Justice, Sydney, 18 October, 1892.

Submitted. Does the Minister think that provision should be made in the Bill to amend the law relating to imprisonment in default of sufficient distress for validating all past convictions in which a complete adjudication was erroneously made? The Crown Solicitor personally informed me that he thought it advisable that this should be done.

The Attorney-General,—Will the Parliamentary Draftsman please give effect to this recommendation by an amendment, and also amend the Bill so as to permit of a defendant being released at any time on payment of amount of fine.—R.E.O'C., 19/10/92. The Parliamentary Draftsman.—E.B., 20/10/92. Forwarded.—W.W.S., 20/10/92.

No. 27.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Sir, Water Police Office, Sydney, 20 December, 1892. I understand that Mr. Addison, S.M., is about to leave work for two months, on leave. beg to inform the Minister of Justice that my health being quite restored after my three months' rest, to prevent any incovenience to the public, and with a view of economy and retrenchment, I am quite prepared to forego the further period of my leave, and resume duty, not being desirous of drawing pay without performing work for it.

BENJAMIN LEE, S.M.

Submitted.—A.C.F., 21/12/92. I cannot reopen this matter. At the expiration of his six months' leave Mr. Lee will, in accordance with the minute of the 30th August last, retire from the Public Service.—R.E.O'C., 22/12/92.

No. 28.

The Under Secretary of Justice to B. Lee, Esq., S.M.

Sir, Department of Justice, Sydney, 28 December, 1892. Referring to your letter of the 20th instant, in which you state that you are prepared to forego the remainder of the leave of absence which has been granted to you, and to resume duty, I am directed to inform you that the Minister of Justice has written a minute thereon, of which the following is a copy, viz.:—"I cannot reopen this matter. At the expiration of his six months' leave Mr. Lee will, in according to the control of the second of the control of t ance with the minute of the Executive Council of the 30th August last, retire from the Public Service."

I have, &c.,

ARCH. C. FRASER, Under Secretary.

No. 29.

No. 29.

B. Lee, Esq., S.M., to The Minister of Justice.

Sir,

"Coringa," Collins-street, Annandale, 31 December, 1892.

I beg respectfully to ask your attention to the following remarks on a return respecting myself from your department to the Legislative Assembly, ordered by that House to be printed on

Par. No. 1 gives the number of cases heard before me since my appointment as Deputy S.M. as eighteen thousand seven hundred and three (18,703).

No. 2.—The number of prohibitions arising from these cases applied for as twelve, of which ten were granted. A list of the cases follows; concerning these I beg to supply the following particulars:—In the first place the number ten must be reduced to seven, as four re Cahill, a solicitor, really constituted a single case. It was an action brought by the Inspector of Vehicles for the M.T.C. for the recovery of four items of amounts charged for removal of goods. Verdict was given for the plaintiff. Prohibition was granted on the ground that, although the agreement was made, and the service commenced within, the delivery was completed beyond the boundary covered by the Act, and therefore the action should have been by civil proceedings, and not under the by-law. This argument was not raised before me, the action being undefended. The prohibition was arranged by mutual consent of the attorneys for each side, without costs. The first case mentioned in the list is that of Clara Thomas, sentenced at the Water Police Court to six months for obtaining money under false pretences, having been several times convicted at other Courts for similar offences. On this occasion there was clear evidence proving that she obtained a cheque by false pretence and cashed it. The ground on which Judge Foster granted prohibition (without costs) in such a clear case cannot be surmised. She was soon after again convicted of a similar

No. 2.—D. W. Campbell, judgment in Small Debts Court for £9 5s 6., for bread supplied weekly; debt admitted; prohibition granted on the ground that a further supply of bread having been given for a week after the account was rendered, making a total indebtedness of a few shillings over £10. The case was brought under the provision re splitting accounts, although no further bill had been given nor charge made.

No. 3.—Middleton v. Chapman; detention of property. I respectfully ask the Minister's special attention to this case, as it is one of considerable importance involving a nice point of law on which the Full Court decided that my judgment was correct, and consequently that of the Judge granting the prohibition was wrong. Chapman had been a lodger with two sisters Middleton, and after the left they refused to give up his property. I decided in favour of Chapman and after the processory formed are refused to give up his property. I decided in favour of Chapman, and after the necessary formal proceedings, assessed the value, and ordered it to be paid. Prohibition was granted by Judge Foster, but according to the decision of the Full Court in the similar more recent case of Mary Kennedy v. Toomey, erroneously granted, and on this account the Minister of Justice recouped my solicitor's charges £6 6s. incurred in the matter. Although the Full Court arrived at this decision a few days after uttering their very harsh judgment against me, their Honors had not a word of approval for the soundness of

independent shown by me in this difficult and critical case.

No. 4.—Stephen Whelan. This was a licensing case, and the prohibition was granted against the Licensing Bench of which I was a junior member, and the reason for granting was that the Police Inspector informing was in the presence of a multitude of cases accidentally omitted to be sworn, an omission for which I was in the presence of a multitude of cases accidentally omitted to be sworn, an omission

informing was in the presence of a multitude of cases accidentally omitted to be sworn, an omission for which I was in no way responsible as I was not the presiding magistrate.

No. 5.—Way Lee; Police v. certain Chinamen found gambling; proceedings taken under section 429 of the Criminal Law Amendment Act, 1883; defendants convicted; prohibition granted on the ground that this Act does not supersede the requirements of the old Gambling Act for a warrant before entry. This C.L.A. Act professes to supersede several old Acts, but from its imperfect drafting is inefficient for that purpose, and places the S.M's. between the horns of a dilemma. If they decide in accordance with it the losing party applies for a prohibition, and similarly if they decide under the old Act.

I respectfully submit that in all these cases substantial justice governed and accompanied my awards, that the prohibitions were gained on debatable technical points, without my having opportunity to defend

that the prohibitions were gained on debatable technical points, without my having opportunity to defend my decisions; that in one of them at least I was right, as proved by the Full Court in giving judgment

in a later case of similar character.

Lastly comes the case of Carraway's, a trivial one in itself, but the most important in its result, as it was the language used by their Honors respecting it which caused you, sir, to take the extreme step of calling on me for my resignation—language which, I submit, was wholly unwarranted by the facts of the case, and would never have been used by their Honors had the actual facts been before them. These are as follows:

Carraway had purchased a suit of clothes, to be paid for on certain terms, with which terms he failed to comply. A considerable time after this transaction he ordered an overcoat, which was to cost £5 5s. This coat was made, but not delivered, the tailor requiring certain money to be paid on the first transaction before completing the second, and for this payment sent his boy to the address given him by the purchaser, who, however, did not reside there, and could not be found. Calling at the shop when the master was out (suspected of having watched such an opportunity), Carraway tried on the coat, and the boy, who was alone in attendance, presented the bill, telling him he had positive instructions not to allow the coat to be taken out without first receiving the money. Notwithstanding the boy's repeated objection and request that he would wait a few minutes for the master, Carraway walked away with the coat saying he was a good customer and had arranged with his master, who, however, on oath denied the existence of any such arrangement with regard to the coat. The accused on the same day left for Queensland (paying for his passage with a dishonored cheque), evidence as to which I excluded as irrelevant, whence he was brought back on a warrant issued by Mr. Smithers, and not by me, as the Chief Justice appeared to think in his remarks animadverting on its issue From these facts I could only come to the conclusion that this was one of the very common cases defined by the Act as "Larceny by Trick." You will see, sir, that this, the true version, differs materially from that presented to their Honors, as reported in the S. M. Herald of 6th August, 1892. That there were two transactions—not one, as represented. That the great coat, the subject of the action, was not covered by the original bargain. That Carraway forcibly took it away in spite of the remonstrances of the shop boy. With regard to my remark as to the custody of the coat,

a trivial error, which their Honors nevertheless commented strongly upon, I wish to point out that this was a matter about which I ought not to have to be asked; it was ultra vires, but on the spur of the moment, and under the fatigue of a long day's business, I inadvertently gave an answer which, though superogatory, was equitable, and not unjust to either party. On the one hand Carraway had worn the coat for some time, rendering it useless to the plaintiff, who on the other hand would receive £5—half the amount of the fine, and would thus be recouped his loss. As their Honors used their condemnatory language in ignorance of the actual facts of the case, and as you, sir, based your decision against me upon that language, I respectfully ask, as a matter of justice and right, your revision of that decision, and that I be not required to complete my resignation.

As to the third clause of the return, I beg to point out that it by no means gives the whole of my time employed in the service. Owing to the absence of my colleagues, many hours were occupied in passing from one suburban Court to another, i.e., from the North Shore to Balmain, especially as the means of getting about were dislocated by the great strike then on. Further, I would respectfully submit that the note appended thereto by the compiler would, if true, be improper, as exhibiting animus against me, but it is still more improper, as being entirely untrue and misleading to Parliament. The absent officer had not two colleagues besides myself, but only one, and he was also away from duty sick, so that the whole of the duties devolved on me, as is shown by the letter addressed to me, 13th November, 1890, by the Minister, thanking me for "the attention paid by you to the work of the Courts during the unavoidable absence of your colleagues." As to clause 4, a warrant in an additional case was issued, but at Walcha, against Carraway and his partner for fraudulently appropriating £1,410. The case was tried at the Central Police Court, and settled after adjournment by the money being paid by friends and the prosecution abandoned—in common parlance "squared." This circumstance might, in justice to me, have been stated, as tending to show Carraway was not the innecent, injured individual to be inferred from their Honors' judgment.

I have, &c., BENJAMIN LEE, S.M.

Submitted.—A.C.F., 4/1/93. Mr. Lee's reference to the note on the Return involves a somewhat serious charge against the bona-fides of compilation. How does the matter stand? Explain fully.—R.E.O'C., 13/2/93.

No. 30.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Sir,

Referring to my letter of 31st December last, I should be glad to be furnished with a reply thereto, at your convenience.

Water Police Office, Sydney, 23 January, 1893.

Referring to my letter of 31st December last, I should be glad to be furnished with a reply thereto, at your convenience.

I have, &c.,

BENJAMIN LEE.

Submitted.—A.C.F., 23/1/93.

My decision was not based upon the Judges' statement of facts nor upon their observations, although their comments in Carraway's case were the immediate occasion of my inquiry in Mr. Lee's competency. I did not base my decision upon his action in that case alone, but upon his general inefficiency in the discharge of his duties as Stipendiary Magistrate in Sydney as disclosed by the information before me. I regret that after full consideration of this letter I am unable to reopen the matter.—R.E.O'C., 1/2/93.

No. 31.

The Under Secretary of Justice to B. Lee, Esq., S.M.

Sir,

Referring to your letter of the 31st December last, with respect to a Return of the Legislative Assembly concerning yourself, and asking that the decision in regard to your retirement from the Public Service may be reconsidered, I am directed to inform you that the Minister of Justice has written a minute thereon of which the following is a copy:—

minute thereon, of which the following is a copy:—

"My decision was not based upon the Judges' statement of facts, nor upon their observations, although their comments in Carraway's case were the immediate occasion of my inquiry into Mr. Lee's competency. I did not base my decision upon his action in that case alone, but upon his general inefficiency in the discharge of his duties as Stipendiary Magistrate in Sydney, as disclosed by the information before me. I regret that after full consideration of this letter I am unable to reopen the matter."

I have, &c.,

ARCH. C. FRASER, Under Secretary.

No. 32.

B. Lee, Esq., S.M., to The Under Secretary of Justice.

Sir,

Water Police Office, Sydney, 6 February, 1893.

I have to acknowledge receipt of your letter of 2nd instant, in reply to my communication of 30th December last, setting forth facts and reasons why I should not be compelled to retire from the service as S.M. at the expiration of my leave of absence.

I regret that it should have required one month to furnish an answer, such as the one given, which is only capable of one construction being placed upon it by me, viz., an absolute insult. A further wrong has been done to me by this delay, inasmuch that it was my desire to obtain justice from the Department, in the first instance, before appealing to the highest tribunal of the country to vindicate my honor which has been so ruthlessly and unjustly assailed.

The

The minute of the Minister's is as follows:-

"I did not base my decision upon his action in that case, Carraway's, alone, but upon his general inefficiency in the discharge of his duties as Stipendiary Magistrate in Sydney, as disclosed by the information before me.

This may be the present Minister of Justice's idea of fair play and justice, but I venture to assert that such conclusion cannot, and will not, be maintained by any tribunal, and to such, in defence of my

honor and the gross injustice that has been done to me, of course to Parliament I must appeal.

It may have been convenient to ignore the return to Parliament of the number of cases dealt with by me in Sydney in three years, nearly 19,000, with so few sustained prohibitions against them, but it is nevertheless a complete answer to the reason now assigned by the Minister against me for my enforced retirement ring "Granger". retirement, viz.—"general inefficiency."

This is not true, and the legal profession who have appeared before me during these three years—

often in most difficult cases—will affirm this to a man.

The Minister states, from the information before him, he arrived at the conclusion of my general inefficiency, and yet, with this before him (of which I shall say a few words hereafter), he allows me to continue on duty in Sydney, thus, from his view, continuing the wrong to the public, but was also willing to make that wrong to fall upon some other community by offering to allow me to return to Bathurst, Goulburn, or Maitland as P.M., three of the most important towns in the Colony, but feeling that I had done no wrong sufficient to justify my removal, was refused by me, although strongly pressed by the

Who furnished this information, or what the nature of it was—being dealt with ex parte—I am ignorant of course, and have been denied the opportunity of defending myself. But what I do so strongly complain of is that after my Report had been furnished to the Minister of Justice in the case of Carraway, that the ordinary course was departed from in not continuing correspondence, and thus practically

prevented me from being made aware of what I had to answer.

I have had no opportunity of defending myself on the alleged information acted upon so harshly, and I venture to say in an unprecedented manner. After eighteen years of hard work as Police Magistrate and S.M. to have my character assailed in this un-British manner, there is only one word that I know of to correctly designate it by-that is, scandalous.

There has been no consideration or mercy shown to me in the matter, and certainly I do not expect

justice from the Department now.

And I place this reply on record as showing what may happen in New South Wales to a fearless and impartial Magistrate.

I have, &c., BENJAMIN LEE, S.M.

Submitted.—A.C.F., 7/2/93.

Mr. Lee seems to forget that he is still an officer of this Department. In this letter he not only comments in the most offensive terms upon my decision but threatens me with an appeal to Parliament. Insolent and insubordinate language of this kind cannot be tolerated in the communications of an officer to the head of his department. Mr. Lee must withdraw this letter at once. If he does not do so I shall, at the next Executive, recommend his removal from the Public Service.—R. E. O'CONNOR, 10/2/93.

No. 33.

The Under Secretary of Justice to B. Lee, Esq., S.M.

Department of Justice, Sydney, 11 February, 1893. Referring to your letter of the 6th instant, further respecting your case and the decision of the Minister of Justice that you should retire from the Public Service at the expiration of your present leave of absence, I am directed to inform you that Mr. O'Connor has written a minute upon the subject, of which the following is a copy

"Mr. Lee seems to forget that he is still an officer of this Department. In this letter he not only comments in the most offensive terms upon my decision but threatens me with an appeal to Parliament. Insolent and insubordinate language of this kind cannot be tolerated in the communications of an officer to the head of his department. Mr. Lee must withdraw this letter at once. If he does not do so I shall, at the next Executive, recommend his removal from the Public I have, &c., ARCH. C. FRASER, Service.2

Under Secretary.

No. 34.

Minute by The Under Secretary of Justice.

Department of Justice, Sydney, 14 February, 1893. [Submitted] In reply to the Minister's minute of the 13th instant on Mr. Lee's letter of 31st December last, I beg to say that no one who had anything to do with the compilation of the Return to Parliament referred to had any animus whatsoever towards Mr. Lee, and I cannot see in what respect the note to paragraph 3 of the Return was in the slightest degree improper, untrue, or misleading. The assumption contained in that paragraph, viz., that Mr. Lee necessarily had double work cast upon him when he acted in the absence of one of his colleagues, not being a correct one, it was necessary, so that Parliament should not be misled, to call attention to it, and this was done in accordance with the usual practice in such cases. Mr. Payten, the Acting Clerk of Petty Sessions and Chamber Magistrate, Water Police Office, has at my request carefully gone through the Return, and as will be seen from his memo. of 10th instant herewith, finds that only on one day, viz., 28th October, 1890, did Mr. Lee act without the assistance of any of his colleagues, and that the time occupied by him on that occasion in sitting in the Charge and Summons Courts, Water Police Office, and in the Police Court, North Sydney, amounted to 4 hours and 50 minutes. On all the other dates referred to in the Return only one of Mr. Lee's colleagues was absent

from duty, and although Mr. Lee may have had extra work to perform he did not, as stated in the note, necessarily perform double duty. The Return furnishes material from which it may be seen that the duration of Mr. Lee's sittings on such occasions amounted to a daily average of 2 hours and 42 minutes.

There appears to be no ground for the insinuation made against the officer who compiled the Return.—R.E.O'C., 14/2/93.

[Enclosure.]

On 28th, 29th, and 30th April, 2nd May, 10th September, 10th and 11th November, 1890, and 13th May, 3rd, 4th, 5th, 6th, 7th, and 24th August, and 20th November, 1891, Mr. Lee disposed of the whole of the business at the Water Police Court, his colleague taking the suburban Courts.

On 27th October, 1890, Mr. Lee disposed of the business in the Summons Court at Water Police Office, and at Balmain and North Sydney Courts, and sat for 25 minutes in Charge Court at Water Police Office, his colleague taking the business in the Charge Court at Water Police Office.

On 28th October, 1890, Mr. Lee disposed of the whole of the business at the Water Police and North Sydney Courts.

Courts.

On 1st May, 1890, Mr. Lee disposed of the business in the charge and Summons Courts at Water Police Court, his colleague taking the Licensing and suburban Courts.

On 20th, 22nd, 24th, 29th, 30th, and 31st October, and 13th and 26th November, 1890, Mr. Lee disposed of the business in one of the Courts at Water Police Court, and in one of the suburban Courts, his colleagues taking the other Court and the remaining suburban Courts. Mr. Lee also sat with his colleague in the Licensing Court on 30th October and 13th November, 1890.

On 25th August, 1891, Mr. Lee disposed of the business in the Summons Court, and also part of the Charge Court business at the Water Police Court, his colleague taking the suburban Courts and part of the Charge Court business.

C. N. PAYTEN,

Acting C. P.S. and Chamber Magistrate.

No. 1.

J. Whitton, Esq., to The Secretary for Public Works.

Sydney, 29 May, 1889. I deeply regret that in consequence of the unsatisfactory state of my health, I am constrained Sir.

to apply for leave of absence for a year.

Although I have been absent from my office for nearly two months, I have discharged the duties of the Department at my own house; but after a consultation of physicians, Drs. Sydney Jones, Seale, Morris, Ward, and Pockley, I am ordered absolute rest and freedom from all mental work, or worry in any shape, for at least several months; and as they have warned me of the consequences which are likely to ensue unless I give up work entirely, I am reluctantly necessitated to apply for leave.

In December next I shall have been thirty-three years in the service, and during the whole of that

time I have not been relieved from the duties of my office for twelve months.

In 1867, I was granted leave for eight months on half-pay to visit England, and in 1882, I made a short trip to New Zealand for the benefit of my health.

I have, &c., JOHN WHITTON.

Submitted.—J.B., 29/5/89.

No. 2.

Minute by The Secretary for Public Works.

Leave of absence to Mr. John Whitton, Engineer-in-Chief for Railways.

Sydney, 29 May, 1889. Acting on the urgent advice of his medical attendant, Mr. John Whitton, Engineer-in-Chief for Railways,

desires to obtain leave of absence for twelve months in order to recruit his health.

It is submitted that, in view of the long and eminent services of this gentleman, his application be treated as an exceptional one, and that the leave be granted on full pay. It is further submitted that Mr. Henry Deane, Inspecting Engineer, be appointed Acting Engineer-in-Chief for Railways during the absence of Mr. Whitton. Mr. Whitton is desirous of leaving by the "Oroya" on the 1st June.

BRUCE SMITH.

No. 3.

Minute for The Governor and Executive Council.

Subject:—Leave of absence to John Whitton, Esquire, Engineer-in-Chief for Railways, and appointment of Henry Deane, Esquire, as Acting Engineer-in-Chief for Railways.

I HAVE the honor to request the approval of His Excellency the Governor and the Executive Council to granting, in consequence of ill-health, of leave of absence, on full pay, for a period of twelve months from the 1st proximo, to John Whitton, Esquire, C.E., Engineer-in-Chief for Railways, and to the appointment of Henry Deane, Esquire, Inspecting Engineer, as Acting Engineer-in-Chief for Railways during the absence of Mr. Whitton.

BRUCE SMITH.

The Executive Council advise that the leave of absence to Mr. Whitton herein recommended be approved. The Council advises that Henry Deane, Esquire, be appointed Acting Engineer-in-Chief for Railways during Mr. Whitton's absence.—Alex. C. Budge, Clerk of the Council.

Approved.—Carrington, 4/6/89. Confirmed, 11/6/89. Published in Gazette, then to Mr. Deane, to see, and write to Mr. Whitton.—J.B., 12/6/89. Gazette No. 311, page 4164, dated 14th June, 1889, John Whitton, Esq., Treasury, C.S. Beard, 13/6/89. Mr. Deane.—D.C.McL. (for U.S.) Seen.—H.D., 19/6/89. Appoint Mr. Deane, Engineer-in-Chief for Railways—salary, £1,200 per annum, from 1st instant.—R S 3/7/91 annum, from 1st instant.—B.S., 3/7/91.

No. 4.

The Under Secretary for Public Works to J. Whitton, Esq.

Sir,

Department of Public Works, 15 June, 1889.

With reference to your letter of the 29th ultime, applying for leave of absence for twelve months on full pay, in consequence of your continued ill-health, I have the honor, by direction of the Secretary for Public Works, to inform you that his Excellency the Governor, with the advice of the Executive Council, has been pleased to accede to your request, such leave to date from the 1st instant.

In conveying this intimation, I have to express the regret of Mr. Secretary Bruce Smith, that the

condition of your health renders the leave necessary.

Such appointment to date from 1st instant.

I have, &c.,

J. BARLING,

Under Secretary.

No. 5.

The Under Secretary for Public Works to The Under Secretary for Finance and Trade.

13 June, 1889. I have the honor, by direction of the Secretary for Public Works, to inform you that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint Henry. Deane, Esquire, M.A., M.Inst. C.E., Inspecting Engineer, as Acting Engineer-in-Chief for Railways, during the absence on sick leave of John Visiton, Esquire, M.Inst. C.E., Engineer-in-Chief.

I have, &c., J. BARLING.

No. 6.

The Under Secretary for Public Works to The Secretary to the Civil Service Board.

Sir,

I have the honor, by direction of the Secretary for Public Works, Sydney, 13 June, 1889.

Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the granting, in consequence of ill-health, of leave of absence for a period of twelve months from the 1st instant to John Whitton, Esq., M.Inst.C.E., Engineer-in-Chief for Railways, and of the appointment of Henry Deane, Esq., M.A., M.Inst.C.E., Inspecting Engineer, as Acting Engineer-in-Chief, during the absence of Mr. Whitton.

I have, &c..

J. BARLING,

Under Secretary.

No. 7.

Minute by The Minister for Public Works.

Leave of absence to Mr. John Whitton.

Mr. John Whitton, Engineer-in-Chief for Railways, has applied for an extension of the leave of absence granted to him, as his medical advisers state that further rest is imperative.

The leave already granted, viz. twelve months on full

granted to him, as his medical advisers state that further rest is imperative.

The leave already granted, viz., twelve months on full pay, will expire on 30th May next. In submitting the matter for the consideration of the Cabinet, I must, at the outset, state that I am very averse to the granting of these long periods of absence at the public expense, as I feel sure that such concessions, as a rule, are a great injustice to the general body of the taxpayers, who have to provide the means for carrying on the duties of an office during the absence of the occupant for a period beyond the original leave, which of itself is a very liberal concession to the servants of the Government.

I regard, however, the case of Mr. Whitton as in every way an exceptional one, and deserving of exceptional treatment, and as such should not be allowed in any way hereafter to be taken as a precedent.

This gentleman has held a unique position in the service of the Colony, to him having practically been confided the construction of our great system of railways, and a responsibility in this respect has been thrown upon him, dissimilar and in excess of that which has fallen upon any other public servant.

To the high ability shown in the carrying out of these works it is perhaps scarcely necessary for me to refer, and I am confident that under the circumstances the Cabinet will agree with me that the case is one worthy of special consideration, in order to mark the appreciation of the Government of the services of Mr. Whitton at a time when his health has broken down from hard and prolonged work.

As far as I am aware there is no precedent to guide me in my recommendation, but I am prepared

As far as I am aware there is no precedent to guide me in my recommendation, but I am prepared to recommend that further leave be granted to the end of the year, on half-pay; and in the event of Mr. Whitton's return to duty at the end of that time I shall not be indisposed to review the question.

B.S.

Cabinet approved. Inform Mr. Whitton by cable.—B.S., 5/2/90. Done, 6/2/90. Prepare Executive minute, 8/2/90.

No. 8.

Minute for The Governor and Executive Council.

Subject: - Leave of absence to Mr. John Whitton, Engineer-in-Chief for Railways.

Sydney, 25 February, 1890. For the reasons set forth in the accompanying minute, I have the honor to recommend for the approval of His Excellency the Governor and the Executive Council that Mr. John Whitton, Engineer-in-Chief for Railway Construction, be granted further leave of absence, on half-pay, from the 30th May next to the end of the year.

The Executive Council advise that the further leave of absence herein recommended be approved. ALEX. C. BUDGE, Clerk of the Council. Approved.—Carrington, 25/2/90.

No. 9.

J. Whitton, Esq., to The Secretary for Public Works.

Sir.

2, Queen Square Place, Westminster, London, 5 February, 1890.

In consequence of the continued unsatisfactory state of my health, I regret that I feel it to be my duty to retire (on the expiration of the twelve months' leave of absence so kindly granted to me from the 1st June, 1889) from the position I have so long held as Engineer-in-Chief for Railways in New South Wales.

I may state that I was appointed to the office I now hold by the President of the Board of Trade, Lord Stanley, of Alderley, in March, 1856, and in October following I left England, arriving in Sydney in December of the same year. I had, therefore, in December last, held my present position for a period of thirty-three years.

On my arrival in the Colony 22 miles of railway only had been opened for public traffic (Sydney

On my arrival in the Colony 22 miles of railway only had been opened for public traffic (Sydney to Liverpool), and on the 30th June last 2,171 miles had been opened to the public.

The whole of this length has been constructed under my supervision, with the exception of the following:—Sydney to Liverpool, Blacktown to Richmond, and Honeysuckle Point to East Maitland.

In addition to the above work, I had charge for many years of the Permanent-way, Locomotive, and Rolling Stock Branches of the existing lines, besides having acted during that period as general adviser in nearly all matters connected with the Traffic Branch, and for none of these extra and responsible duties did I receive any remuneration.

During my long service I have only been granted extended leave of absence on two occasions prior to my present leave, viz., once, in 1867, for a period of nine months, on half-pay, and on the second occasion for six weeks, to enable me to visit New Zealand for the benefit of my health.

Considering the importance of the works carried out under my direction, and the fact that no

accident has ever occurred upon the railways from either defective design or imperfect construction, I have the honor respectfully to suggest that a special retiring allowance may be granted to me, as provided under clause No. 60 of the Civil Service Act

I have, &c., JOHN WHITTON.

Cabinet.—B.S., 31/3/90. .

No. 10.

J. Whitton, Esq., to The Secretary for Public Works.

Dear Mr. Smith,

2, Queen Square Place, Westminster, London, 21 February, 1890.

A few days after I had written the official resignation of my office as Engineer-in-Chief for railways, I received a copy from the Agent-General of a telegram from Sydney, stating that my leave of absence had been extended to the end of this year. I desire to express my warmest thanks for this unexpected act of kindness, but as I have little hope that at the termination of that time, I shall be able to resume the duties of my office, I do not think I should be justified, so far as the Colony is concerned,

I therefore think it desirable that my resignation should be accepted, but I would esteem it a great favour if an extension of my twelve months' leave could be granted on full pay until the amount of my retiring allowance has been finally determined upon.

Believe me, &c., JOHN WHITTON.

No. 11.

Minute by The Secretary for Public Works.

Resignation of Mr. Whitton.

Sydney, 3 May, 1890. Mr. Whitton has been thirty-three years in the service of the Government, and is entitled, therefore, under the provisions of the Civil Service Act, to a pension of $\frac{3}{6}$ on a salary of £1,200 per annum, the under the provisions of the Civil Service Act, to a pension of \$\frac{3}{6}\frac{5}{6}\$ on a salary of £1,200 per annum, the limit allowed by the Act, subject to the abatement on account of the 4 per cent. deduction for the period of service prior to the introduction of the Act. This will amount to about £1,296. In the case of Mr. Moriarty, Mr. John Rae, and others, this was specially provided for by placing an amount on the Estimates, and in the case of Mr. Moriarty a further concession was made by providing in like mannera sum equal to the capital amount of the difference between the pension allowed by the Civil Service Act, viz., on a salary of £1,200, and the pension calculated on his full salary of £1,500 per annum.

Mr. Whitton has asked that he may receive special consideration under the terms of the 60th section of the Civil Service Act, which reads as follows:—"Nothing herein contained shall be taken to prevent the Governor from recommending to Parliament any addition to any retiring allowance or gratuity in consideration of any special services rendered by any officer.

The

J.B. The

The Cabinet has decided, in consideration of the long and distinguished services of Mr. Whitton, to recommend to Parliament that he receive, by way of special pension, an amount equal to his full salary, viz., £1,800 per annum. Accept Mr. Whitton's resignation from 31st May, and let the necessary steps be taken for the computation of his pension. The amount necessary to meet the 4 per cent. deduction for years prior to the passing of the Civil Service Act will be provided for by a special amount on the Estimates, and the balance required to make the full pension as above will be obtained by an annual vote

of Parliament. In the meantime, ask the Treasurer to cable to the Agent-General to continue paying Mr. Whitton full salary, pending these arrangements being perfected.—B.S., 17/7/90.

Write at once to Treasury.—J.B., 17/7/90. Treasury, 17/7/90. Will the Principal Under Secretary kindly have the necessary computation made.—J.B., 25/8/90. The Chairman of the Civil Service Board.—C.W. (P.U.S.), B.C., 29/8/90. The Civil Service Board are of opinion that Mr. Whitton is entitled to a retiring allowance under the provisions of the Civil Service Act of 1884.—Tho. Little-john, Chairman, B.C., 5/9/90. The Principal Under Secretary. Will the Auditor-General be so kind as to furnish me with a statement of services and a certificate in this case.—C.W., 10/9/90. Certifi-cate of service and statement of salaries received herewith.—E.A.R., 24/9/90. The Principal Under Secretary.

No. 12.

The Under Secretary for Public Works to The Under Secretary for Finance and Trade.

Sydney, 17 July, 1890. I am directed to inform you that the Cabinet has decided to accept the resignation of Mr.

John Whitton, Engineer-in-Chief for Railways, to date from the 31st May last, and to recommend to Parliament that a pension be granted to him equal to his salary, viz., £1,800.

I am therefore to ask that you will be good enough to instruct the Agent-General in London, by cablegram, to continue paying Mr. Whitton this allowance, pending the perfecting of the arrangements

to be made to give effect to the decision of the Cabinet.

I have, &c., J. BARLING,

Under Secretary.

The Under Secretary for Public Works to J. Whitton, Esq.

Department of Public Works, Sydney, 18 August, 1890. I am directed to acknowledge the receipt of your letter of the 5th of February, in which you tender your resignation to the office of Engineer-in-Chief for Railway Construction under this Department, and, in relation thereto, to enclose for your information copies of documents which show the official action taken in the matter.

Mr. Secretary Bruce Smith desires me to take this opportunity of placing on record, as the Cabinet has already done, his high sense of the loss which the Department and the Colony sustain by your resignation, you having held the position of Engineer-in-Chief for nearly thirty-four years, during which time it can be safely said the whole of the railway system of the Colony has been built up under your able direction.

I am to say, in conclusion, that you will be followed in your retirement with the best wishes of the Government and people of this Colony, whose interests you have so sedulously guarded during the long period of your official career, and Mr. Bruce Smith earnestly hopes that you will long be spared to I have, &c., J. BARLING, enjoy your well earned honors.

Under Secretary.

No. 15.

Minute for The Governor and Executive Council.

Subject: - Pension under the provisions of the Civil Service Act, 1884.

Colonial Secretary's Office, Sydney, 2 October, 1890. Application having been made for Mr. John Whitton, Engineer-in-Chief for Railways, to retire, under the provisions of the "Civil Service Act, 1884," I recommend that Mr. Whitton be allowed to retire on a pension to which he is entitled by length of service, viz., £675 per annum.

HENRY PARKES

The Executive Council advise that the pension herein recommended be approved.—Alex. C. Budge, Clerk of the Council. Approved.—Carrington, 7/10/90.

Mr. John Whitton.

I HEREBY certify that the records of this Department show the services of Mr. John Whitton to have been from 31st September, 1856, to 31st May, 1890, and that at the latter date he was in receipt of a salary at the rate of £1,800 per annum as Engineer-in-Chief for Railways.

Given at the Audit Office, Sydney, this 24th day of September, 1890.

E. A. RENNIE, Auditor-General.

Case of Mr. John Whitton, Engineer-in-Chief for Railways.—With a view to a pension under the provisions of the Civil Service Act, 1884.

Date of retirement, 31st May, 1890; length of service, thirty-three years nine months; amount of salary, &c., received up to 31st December, 1884:—Salary, £34,020 3s. 10d.; computed at the maximum of £1,200 per annum:—Fees, nil; rent, nil; 4 per cent. on total salary to 31st December, 1884, £1,360 16s. 2d.; age at retirement, ; average amount of salary for last three years, £1,800; emoluments, nil; computation of superannuation allowance, £675 per annum; the liability to the Superannuation Account, viz., £1,360 16s. 2d. will be discharged by the Government.

J. E. ORMISTON,

Accountant.

Shall the necessary minute for the E.C. be prepared?—J.O., 29/9/90. Minute for E.C.—C.W., 29/9/90.

Information required in the case of Mr. John Whitton, Engineer-in-Chief for Railways, with a view to retirement under the provisions of the Civil Service Act, 1884:—

Date of retirement, 31st May, 1880; length of service, thirty-three years nine months; amount of income received up to 31st December, 1884:—Salary, £44,687 7s. 7d.; fees, ; rent, ; age at retirement, ; present salary, £1,800; average amount of salary for last three years, £1,800; emoluments other than forage equipment, or travelling allowance, ; has applicant paid 4 per cent. deduction on salary and allowances? Yes. If so, from what date? 1st January, 1885.

In which way will the liability to the Civil Service Superannuation Fund, in case of a pension, be discharged, in accordance with section 55 of the Act?—1. By an annual deduction, based upon actual calculations; 2. In one sum? or to be discharged by Government. 3. By instalments extending over three years?

No. 17A.

Memorandum.

Mr. John Whitton's Pension.

21 April, 1891.

THESE papers disclose the circumstance that Mr. John Whitton, late Engineer-in-Chief for Railways, has been paid pension in London for the period from 1st June to 31st December, 1890, in excess of documentary executive authority, although not, perhaps, in excess of Government's intention.

I give below a rough precis of the case:

May, 1889.—Mr. Whitton was granted twelve months' leave, on full pay, from 1st June, 1889.

November, 1889.—Applied for six months' extension.

February, 1890.—Executive minute, authorising seven months' extension, on half-pay; but, before

this minute could be acted upon, Mr. Whitton's resignation came to hand.

July, 1890.—Executive minute, retiring Mr. Whitton from 1st June, 1890, and recommending a pension equal to full salary, £1,800 a year.

Upon this, a cable was sent to the Agent-General, 25th July, 1890, authorising him to continue paying Mr. Whitton at the rate of £1,800 a year until further advice. This was done until 31st December. From 1st January, 1891, Mr. Whitton has been drawing £675 per annum only.

The proposal of a pension of £1,800 a year was submitted to Parliament, but met with violent opposition, and was ultimately defeated. Pension was then computed to 31st May, 1890, and fixed at

£675 per annum.

It is pointed out that the cable of July, 1890, instructing the Agent-General to continue paying Mr. Whitton at the rate of £1,800 a year until further advice, proceeded upon the assumption that Parliament would vote the special pension. Parliament having, however, refused to give more than £675 per annum, and the computation having been made upon a service up to 31st May, 1890, only, the payment of pension at the rate of £1,800 a year from 1st June to 31st December, 1890, would appear to be irregular, or, if for argument's sake, we fall back upon the half-pay Executive minute of February, 1890, which was, however, as a matter of fact, superseded by the retirement minute of July, 1890, there is still an excess payment to Mr. Whitton for seven months at the rate of £900 per annum.

The Under Secretary.

The Minister for Public Works,—Would the Minister for Public Works kindly instruct me in this matter.—W.McM., 22/4/91. The Under Secretary for Public Works.—F.K., B.C., 22/4/91. Submitted; the Minister approved of full pay being continued to Mr. Whitton in anticipation of Parliamentary sanction; when that was refused the reduced amount of his pension only was paid.— J.B., 24/4/91.

No. 18.

The Under Secretary for Finance and Trade to The Under Secretary for Public Works.

The Treasury, New South Wales, Sydney, 21 July, 1891. I have the honor, by direction of the Colonial Treasurer, to inquire whether any steps have Sir, been taken in connection with the excess payment made in England to Mr. John Whitton, late Engineerin-Chief for Railways.

A minute on the subject was forwarded to you in April last.

I have, &c., F. KIRKPATRICK,

Acting Under Secretary for Finance and Trade.

No. 19.

The Under Secretary for Finance and Trade to The Under Secretary for Public Works.

Sir,

I am directed to request the favour of an early reply in connection with the case of the overpayment made to Mr. John Whitton, late Engineer-in-Chief for Railways.

I have, &c., J. KIRKPATRICK,

Under Secretary for Finance and Trade.

No. 20.

The Under Secretary for Finance and Trade to J. Whitton, Esq.

Sir,

The Treasury, Sydney, 29 August, 1891.

I am desired by the Colonial Treasurer to lay before you certain particulars respecting the pension which has been assigned you, in connection with your retirement from the Public Service.

For seven months, after the date of your resignation, the Government paid you pension at the rate of your then salary, but, as you are already aware, Parliament refused to confirm the action of the Ministry, hence your pension was computed, in terms of the Civil Service Act, at £675 per annum. Owing to these circumstances, there has been an overpayment to you of £656 5s., thus:—

Amount of overpayment... £656 5 0
I am now requested by Mr. Bruce Smith to inquire what arrangements you are prepared to make with regard to this overpayment—that is, whether you will remit the amount to Sydney, or allow your pension to accumulate until the overpayment has been liquidated.

I have, &c., F. KIRKPATRICK, Under Secretary.

No. 21.

Statement

Showing the payments made to Mr. John Whitton since his retirement from the position of Engineer-in-Chief for Railways, laid upon the Table of the Legislative Assembly, in compliance with a promise made by Sir Henry Parkes in reply to Question No. 4, of 12th August, 1891, asked by Mr. Edden.

Mr. Whitton retired on 31st May, 1890, and was paid to 31st December, 1890, at the rate of £1,800 per annum (the salary he was receiving at the time of his retirement), being seven months, at £150 per month 1,050 0 0 But, as Parliament refused to vote a pension equivalent to the amount of Mr. Whitton's salary, he has since 1st January last

amount of Mr. Whitton's salary, he has since 1st January last been paid at the rate of his computed pension, £675 per annum (say) eight months, at £56 5s. per month

<u>56 5 0</u> <u>450</u>

0

£393 15

Total amount of the payments to Mr. Whitton, since he retired from the Public Service 1,500 0 ° C. The Treasury, New South Wales, Sydney, 17th September, 1891.

Let a calculation be made as to the amount overpaid to Mr. Whitton, and meantime that gentleman should be written to to ascertain whether he will remit the overpayment or have the pension deferred till overpayment is liquidated.—B.S., 18/8/91.

No. 22.

J. Whitton, Esq., to The Under Secretary for Finance and Trade.

Sir,

I have the honor to acknowledge the receipt of your letter of the 29th August last, informing me that the Hon. the Colonial Treasurer desires to lay before me certain particulars respecting the pension which has been assigned to me in connection with my retirement from the Public Service, and claiming from me the sum of £656 5s. as an overpayment.

I cannot admit that this was an overpayment, as it was a payment made to me by the Government on their responsibility, in the belief that Parliament would vote the amount. The fact of Parliament having refused to vote this sum does not, I respectfully submit, warrant the deduction of it from my pension under the Civil Service Act, upon which pension I rely for the support of myself and family; and I am unable to consent to any such reduction, my pension being guaranteed to me by law, and payable in due course, free from any deductions whatever.

I am sure, on reconsideration, the Honorable the Colonial Treasurer will see the justice of not pressing the claim now made, the amount of which, I am certain, would be readily voted by Parliament if submitted to them, as, although the amount asked for by the Government as a pension to me in recognition of my long service was not voted, I feel confident it would not be wished that I should be called upon to return the amount which was paid to me in good faith and received by me in a similar spirit.

I may add that I held my office and transacted all the duties of the Department for ten years beyond the time that I could have retired under the Civil Service Act, at great disadvantage pecuniarily, as it has subsequently transpired, to myself. Parliament will, I trust, yet see and acknowledge the great injustice done to me by the late vote in the Assembly on my pension, and will take an early opportunity of voting for me a sum of money commensurate with the services I rendered to the Colony for the long period of thirty-three years, during which I held the responsible position of Engineer-in-Chief for Railways. I have, &c

JÓHN WHITTON.

I strongly urge that the Minister for Works will place this sum upon the Estimates. It appears to me that Mr. Whitton has not been generously nor fairly treated after his long, faithful, and tried service

to the country.—John See, 4/12/91. This sum may be submitted on the Additional Estimates, pending decision of Parliament. Mr. Whitton need not refund.—W.J.L., 10/12/91. Inform.—J.B., 10/12/91. John Whitton, Esq., 10/12/91. The Chief Accountant to note for Estimates.—D.C.M.L. (for U.S.), B.C., 16/12/91. W.H.Q., 18/12/91.

No. 23.

The Under Secretary for Public Works to J. Whitton, Esq.

Sir. With reference to your letter of the 23rd of October last, addressed to the Under Secretary for Finance and Trade, upon the subject of your pension upon retirement from the Public Service of this Colony, I am directed by the Secretary for Public Works to inform you that it has been decided to submit a sum on the next Estimate to cover the amount paid to you during the year 1890 in excess of the allowance under the Civil Service Act, and that, pending the decision of Parliament, no further steps need be taken by you to refund the amount asked for in Treasury letter of 29th August last.

I have, &c., J. BARLING,

Under Secretary.

No. 24.

R. P. Abbott, Esq., to The Principal Under Secretary.

Sir, 24, Castlereagh-street, Sydney, 18 December, 1891. I do myself the honor to bring under your notice a letter written from the Treasury to Mr. Whitton, late Engineer-in-Chief for Railways, requiring him to refund the sum of £656 5s., being the difference between the pension granted to Mr. Whitton by the Government, £1,800 per annum, and that voted by Parliament, £675 per annum, as received by Mr. Whitton, between the date of the granting of the larger sum by the Government and the date of the vote of Parliament.

I may state that the fixing of a larger amount of pension was the act of the Government; that Mr. Whitton, on tendering his resignation, was offered six months' additional leave of absence by the Minister for Works on full pay, which Mr. Whitton declined, preferring to resign, and the amount now claimed is for that half year for which he might have drawn his full salary had he accepted the further

Under the circumstances, it is hoped that the position will be treated as though Mr. Whitton had accepted the leave offered, which he only declined from a desire of having the amount of his pension settled as soon as possible. I have, &c.

R. P. ABBOTT.

Inform Mr. Abbott that I will submit to the Cabinet at an early date a Submitted, 21/12/91. proposal to give Mr. Whitton £1,200 per annum retiring allowance. Draw up a history of the case for Cabinet.—G.R.D., 22/12/91. R. P. Abbott, Esq., 16/2/92.

Colonial Secretary's Office, Sydney, 16 February, 1892. Referring to your letter of the 18th of December last, relative to the reduction by Parliament of the pension which the Government proposed to grant to Mr. Whitton, late Engineer-in-Chief for Railways, I am directed to inform you that the Colonial Secretary will submit to the Cabinet a proposal to give Mr. Whitton a retiring allowance of £1,200 per annum.

I have, &c., CRITCHETT WALKER,

R. P. Abbott, Esq., 29, Castlereagh-street, Sydney.

Memoranda re Mr. Whitton, late Engineer-in-Chief for Railways.

Appointed; September, 1856; retired, 31st May, 1890; age at retirement, 70½ years; salary at retirement, £1,800 per annum; rate of pension granted under the "Civil Service Act," £675 per annum; amount granted to Mr. E. O. Moriarty, late Engineer-in-Chief for Harbours and Rivers, being the amount equal to the capital value of the difference between a pension at the rate of £791 13s. per annum, and £923 12s, the rate of parsion calculated on the full amount of his seleny at the time of his retire. and £923 12s., the rate of pension calculated on the full amount of his salary at the time of his retirement, £1,222

Mr. Whitton retired from the Service on 31st May, 1890, at the age of 70 years; length of

service, $33\frac{1}{2}$ years.

Pension calculated on the maximum amount under the Civil Service Act (£1,200), £675 per

Pending a settlement of the amount of pension to be allowed, Mr. Whitton was paid at the rate of £1,800 per annum (full salary) from 31st May to 31st December, 1890.

Seven months at £150 ... £1,050 0 0 But, as Parliament refused to vote such an amount, he was only entitled to pension at the rate of £675 per annum for that 393 15 Amount overpaid · £656 5

Mr.

Mr. Whitton was called upon to refund this amount, but the Minister for Works allowed the

matter to stand over pending another appeal to Parliament.

matter to stand over pending another appeal to Parliament.

About 2,150 miles of railway were constructed under Mr. Whitton's supervision, at a cost of about twenty-four million sterling, and, in addition, he had charge of the Locomotive and Permanent-way Branches without extra salary, for several years.

Mr. Moriarty retired in January, 1889, at the age of 64 years; length of service, 39½ years.

Pension calculated on salary of £1,500 per annum—£923 10s., of which £791 13s. is paid from the Superannuation Fund, and the balance from a capitalized amount of £1,222, which was voted in October 1889 and raid to him in a lump sum October, 1889, and paid to him in a lump sum.

Amount expended under Mr. Moriarty's supervision, about seven million sterling.

Mr. Goodchap retired in October, 1888; age, about 52 years; length of service nearly thirty-five years; pension under the Railway Act, £937 10s. per annum.

Pensions equal to the full amount of salaries were granted to political officers who retired when Responsible Government came into force, and Mr. Halloran, on retiring from the position of Principal Under Secretary, in January, 1878, at the age of 67 years, was allowed pension equal to full salary.

In 1861, Mr. Whitton was requested to mark out a line from Campbelltown to Goulburn, adapted

for carrying a locomotive of 13 tons weight, including water, gradients not to be steeper than 1 in 20, nor curves sharper than 200 yards radius except in positions where it may appear more economical to

surmount slopes by horse traction, or stationary engines, or zigzags.

The steepest gradient on either the southern or western line is 1 in 30, and engines weighing upwards of 40 tons are used upon them with tenders of 30 tons = 70 tons engine and tender in steam. The difficult task of constructing a railway over the Blue Mountains to Bathurst was one of Mr. Whitton's early achievements, and it should be remembered that this was considered at the time an impracticable task, and the inhabitants of Bathurst offered a reward of £1,000 to any person who could discover a route for a railway to their city. To the north and also to the south difficulties were encountered

in surmounting the coast range of the Colony, but none equal in difficulty to the western railway.

To Mr. Whitton we are chiefly indebted that the gauge of the railways beyond Goulburn,
Bathurst, and Murrurundi was not reduced to 3 feet 6 inches. He fought most vigorously, and in spite
of great opposition, was successful in inducing the Government of the day to continue the 4 feet 8½ inches

gauge throughout the railways of the Colony.

To Mr. Whitton it is also due that the communication with the interior was not made by horse tramways instead of railways—when the question of crossing the Blue Mountains was mooted, the proposal to carry the traffic by tramway was strongly advocated by some parties. Mr. Whitton, however, advocated the construction of railways, which he estimated would cost £10,000 per mile, and events have shown how utterly inadequate the cheaper system would have been.

Minute.

Pension to Mr. Whitton, late Engineer-in-Chief for Railways.

Sydney, 31 December, 1891.

PREPARE cablegram to the Agent-General to-day as follows:—"Refund from Whitton's pension deferred pending reference to Parliament. Inform.

Cablegram sent, 31/12/91. Approved.—W.J.L., 31/12/91.

No. 26.

J. Whitton, Esq., to The Under Secretary for Public Works.

Sir,

The Avenue, Kew Gardens, London, 28 January, 1892.

I have the honor to acknowledge your letter of the 12th December, 1891, in reply to mine of the 23rd October last, on the subject of my pension upon my retirement as Engineer-in-Chief for Railways in New South Wales, in which you inform me that you are directed by the Honorable the Secretary for Public Works, that "it has been decided to submit a sum on the next Estimates to cover the amount paid to you during the year 1890, in excess of the allowance under the Civil Service Act, and pending the decision of Parliament, no further steps need be taken by you to refund the amount asked for in Treasury decision of Parliament, no further steps need be taken by you to refund the amount asked for in Treasury letter of the 29th of August last."

letter of the 29th of August last."

In reply, I have to ask that you will oblige me by conveying to the Honorable the Minister for Public Works my warmest thanks for his kind consideration in this matter.

I have, &c.,

JOHN WHITTON.

Seen.-W.J.L., 7/3/92. Submitted.—J.B., 7/3/92.

No. 27.

Extract from the Votes and Proceedings of the Legislative Assembly, No. 91, dated 24th February, 1892.

MR. WHITTON, LATE ENGINEER-IN-CHIEF FOR RAILWAYS: — MR. EDDEN asked THE COLONIAL TREASURER,—What steps does he intend to take to recover from Mr. Whitton, late Engineer-in-Chief, the amount overpaid on account of pension? Mr. See answered,—I would suggest the Honorable Member put this question to the Minister for Public

Works under whose Department Mr. Whitton was employed.

No. 28.

R. P. Abbott, Esq., to The Principal Under Secretary.

In connection with the pension of Mr. John Whitton, late Engineer-in-Chief for Railways, I do myself the honor, as representing that gentleman, to request that you will be good enough to place on the Additional Estimates the sum of £1,200 for his retiring allowance as promised in your communication to me of the 16th February, 1892. I have, &c., R. P. ABBOTT.

Submitted. May be put on Estimates for consideration.—C.W., 4/3/92. ary for Public Works.—C.W., B.C., 4/3/92. Submitted.—J.B., 5/3/92. Secretary for Public Works.—C.W., B.C., 4/3/92. 5/3/92. Put on Estimates.—J.B., 7/3/92. £1 G.R.D. The Under Approved. -W.J.L., 5/3/92. Put on Estimates.—J.B., 7/3/92. £1,356/5, June, 1890, to 31st December, 1892, £525 per annum difference between £675 and £1,200, submitted on draft Additional Estimates.—W.H.Q., 8/3/92.

No. 29.

Minute by The Chief Accountant to The Under Secretary for Public Works. Special grant to Mr. Whitton, late Engineer-in-Chief for Railways.

The sum of £1,375 was voted as a special grant to Mr. Whitton, vide item No. 316 of the Appropriation Act of 1892, but the Minister promised to pay him £1,500, and said the difference would be submitted to Parliament on the Supplementary Estimates. Will you please obtain authority to charge the extra £125 to the Treasurer's Advance in order that an early settlement may be arrived at.

W. H. QUODLING.

Submitted for authority, but the amount over paid, viz., £656 5s. to be deducted.—J.B., 9/5/92. I find, on inquiry, that the amount overpaid to Mr. Whitton, according to the Treasury Books, was £656 5s., but he received only £628 5s. the difference £28, having been deducted on account of the Superannuation Fund. As Mr. Whitton's pension was computed to 31st May, 1890, and he appears to have contributed to the Superannuation Fund to 31st December, is he not entitled to have his pension computed to the latter date? If so, he would be entitled to £11 13s. 4d. per annum extra, i.e., £686 13s. 4d., instead of £675.—W. H. Quodling, 10/5/92. The Under Secretary.

No. 30.

R. P. Abbott, Esq., to The Secretary for Public Works.

Sir, 24, Castlereagh-street, Sdyney, 5 July, 1892. Referring to my personal interview with you in reference to the claim made upon Mr. John Whitton late Engineer-in-Chief for Railways by the Government to return a payment made to him of £656 5s., I desire to point out to you that the payment was made voluntarily by the Government to Mr. Whitton, as a reward for his services, and that he contributed to the Superannuation Fund to the end of the year 1890. The computation of the pension should have dated from that period, and the sum paid by the Government and now reclaimed must be taken as a payment by the Government on its own authority to the end of 1890.

I would also point out to you under no circumstances could the Government deduct from the pension of Mr. Whitton, which is secured by an Act of Parliament, any sum for overpayment.

As the matter seems to involve a question of law, I would ask you to lay the papers before the Law Officers for their opinion, and in doing so to bring under their notice the memoranda given by me to you with reference to it. I have, &c. R. P. ABBOTT.

Will the Crown Solicitor kindly advise on the point raised. It is being pressed.—J.B., 2/12/92.

No. 31.

Messrs. Abbott and Dodds to The Under Secretary for Public Works.

Sir,

Castlereagh-street, Sydney, 7 December, 1892.

By the Appropriation Act of 55 Vic. No. 36, a sum of £1,357 was voted as a special grant to John Whitton, Esq., M.Inst.C.E., late Engineer-in-Chief for Railways. This sum has not yet been paid to Mr. Whitton, and we are instructed now to apply for the same in full, as our client cannot recognise the right of the Government to withhold the same, or ony portion of it, for the purpose of forcing Mr. Whitton to repay a sum granted to him by the Executive, as Mr. Whitton denies the right of the Government to take up any such position. We must, unless the sum granted by the above Act is at once paid to us for him, take legal proceedings to enforce payment. Sir,

We have, &c., ABBOTT AND DODDS.

Referred to the Crown Solicitor with reference to previous papers.—J.B., 10/12/92.

No. 32.

The Crown Solicitor to The Under Secretary for Public Works.

Sir, Crown Solicitor's Office, Sydney, 15 December, 1892. I have the honor to return herewith the papers relating to the claim made upon Mr. John Whitton, late Engineer-in-Chief for Railways, to return the payment made to him of £656 5s., which were sent to me for advice on the points raised.

These

These points are not specifically stated, but as I understand the matter, the facts, so far as are material, are as follows:

In May, 1889, Mr. Whitton was granted twelve months' leave from the 1st June, 1889, on full

pay, viz., £1,800 per annum.

In July, 1890, Mr. Whitton's resignation was received, and upon that an Executive minute was passed and approved (on the 5th August, 1890) to the following effect:—

The Executive Council approve of the acceptance of Mr. John Whitton's resignation as Engineerin-Chief for Railway Construction, as from the 31st May last upon the terms herein recommended," the terms herein recommended by the then Minister for Works being that Parliament be recommended to make such provision as will render the pension equal to the salary that he has received, viz., £1,800 per

Upon this a cable was sent to the Agent-General on the 25th July, 1890, authorising him to con-

tinue paying Mr. Whitton at the rate of £1,800 a year until further advice.

Payment at this rate was accordingly made to Mr. Whitton until 31st December, 1890. The proposal of a pension of £1,800 a year was submitted to Parliament, but met with opposition, and was ultimately defeated. The pension to which Mr. Whitton was entitled under the Civil Service Act was then computed to the 31st May, 1890, and fixed at £675 per annum.

s. d. The amount paid to Mr. Wnitton from the 1st June, 1890, to the 31st December, 1890, 1,050 0 0 being at the rate of £1,800 per annum, was ... The amount which would have been payable to him for the same period if he received only the pension under the Civil Service Act, viz., £675 a year, would have $393 \ 15$ amounted to There has, therefore, been overpaid to Mr. Whitton beyond what he was entitled to, under the Act, the sum of

By the Appropriation Act of 1892, 55 Victoria No. 36, the following sum was voted:—"Special grant to John Whitton, Esq., M. Inst. C.E., late Engineer-in-Chief for Railways, £1,357."

It has been contended by the Government that they are entitled to deduct the above-mentioned sum of £656 5s. overpaid to Mr. Whitton in the manner indicated either from the sum of £1,357 so voted to him by the Act of this year or from his pension of £675 to which he is entitled under the Civil Service Act.

On the other hand it is contended by Mr. Whitton that the deduction cannot be made from either

one or other of these sums.

The question upon which I am asked to advise is which of these contentions is legally the right

The question in a great measure depends upon the fact whether or not the money so overpaid to Mr. Whitton during the latter part of 1890, can be recovered back from him by action at law.

suppose it will be admitted that if the money is not legally recoverable it cannot and should not be deducted from any moneys legally due to Mr. Whitton by the Government.

I am clearly of opinion that no action would lie against Mr. Whitton to recover the amount of this overpayment. The same was paid voluntarily to him on the recommendation of the Minister of the Department in which he had served, and in pursuance of the Executive minute. I cannot find any evidence that so far as Mr. Whitton was concerned, this payment was made to him either expressly or impliedly on the condition that if Parliament should not vote the amount he should be liable to refund the excess. It is not stated that Mr. Whitton ever gave an express undertaking to that effect, nor are any facts alleged from which such an undertaking could be implied.

The instructions to the Agent-General were apparently to pay at the full rate of £1,800 a year

"until further advice."

It cannot, therefore, be contended that the money was paid under any mistake or misapprehension of any kind. It was paid voluntarily as a reward (which, in the opinion of the Government, was then considered to be a fair reward) for past services and without any condition attached that in certain events it should be refunded.

Under these circumstances I do not see how any action would lie against Mr. Whitton to recover

the money back.

In this view of the matter I must advise that the contention put forward by Mr. Whitton's advisers is the right one, namely, that this deduction cannot legally be made from sums payable by the Government to Mr. Whitton under the Acts of Parliament referred to.

I have, &c., ERNEST A. SMITH,

Crown Solicitor.

If the money has not been paid to Mr. Whitton, I consider, after the promise I made to the Assembly, the deduction should be made.—W.J L., 16/1/93. Mr. Whitton has not been paid. Inform Mr. Abbott.—J.B., 17/1/93. R. P. Abbott, Esq., 18/1/93.

No. 33.

The Under Secretary for Public Works to R. P. Abbott, Esq.

Sir,

Department of Public Works, Sydney, 18 January, 1893.

With reference to the question as to the overpayment of the sum of £656 5s. made to Mr.

John Whitton upon his retirement from the position of Engineer-in-Chief for Railways, I am directed by the Secretary for Public Works to inform you that, in view of the promise made to Parliament, there is no option but to deduct this amount from the special grant of £1,357 voted to Mr. Whitton.

I have, &c., J. BARLING, Under Secretary.

1892 - 3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

(RETURN RESPECTING NUMBER OF MAGISTRATES AND CLERKS OF PETTY SESSIONS IN THE COLONY.)

Ordered by the Legislative Assembly to be printed, 6 April, 1893.

[Laid upon the Table of the House in answer to Question No. 12, of 9 February, 1893.]

Question.

- 12. STIPENDIARY MAGISTRATES AND CLERKS OF PETTY SESSIONS:-DR. ROSS asked THE MINISTER OF
 - (1.) The number of Stipendiary Magistrates in the Colony, and the amount annually expended in the shape of salaries and travelling expenses?

 (2.) The approximate number of unpaid magistrates?

 (3.) The number of Clerks of Petty Sessions?

 - (4.) In view of carrying out the principle of retrenchment, will he see that steps are taken to reduce the number of Stipendiary or Police Magistrates, and their travelling expenses, and thus compel the unpaid magistrates to do the work or else resign their position?

Answer.

- (1.) There are six Stipendiary Magistrates with jurisdiction over the Metropolitan Police District, and sixty-nine Police Magistrates in country districts. Eleven of the latter also hold the position of Clerks of Petty Sessions with affiliated offices, and eleven are paid wholly by the Mines Department as Mining Wardens. The total salaries of all these officers amounted to £33,006 5s. 8d. in 1892, and their travelling
- (2.) There are about 4,580 unpaid magistrates in the Colony.
 (3.) There are 115 Clerks of Petty Sessions, exclusive of the eleven Police Magistrates who also fill that office.
- (4.) The amount expended in this Department of the Service has hitherto been deemed to be absolutely necessary for the reasonably efficient administration of justice, and to meet the increasing requirements of the Colony. The whole question of further retrenchment in the Department than that already effected is now receiving careful consideration.

1892.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CIVIL SERVICE.

(RETURN OF APPOINTMENTS MADE IN DEPARTMENT OF MINES AND AGRICULTURE FROM 23RD OCTOBER, 1891, TO 5TH OCTOBER, 1892.)

Ordered by the Legislative Assembly to be printed, 8 December, 1892.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 5th October, 1892, That there be laid upon the Table of this House,—

"A Return of all appointments whether permanent or temporary, on the clerical "or professional staff, or as daily, weekly, or monthly labourers, or in any other "capacity, in the Departments under the control of the Secretary for Mines, since "his entry upon office, and also of the salaries attached to each."

(Mr. Danahey.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CIVIL SERVICE.

(RETURN RESPECTING PENSIONS AND LEAVE OF ABSENCE.)

Ordered by the Legislative Assembly to be printed, 25 October, 1892.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 25th November, 1891, That there be laid upon the Table of this House, a Return showing,—

- "(1.) The name of each person who at the present time is receiving a
- " pension from the Government of the Colony, and the amount received
- " in each case for the past year.
- "(2.) The total amount of pension-money paid to ex-members of the "Civil Service during the last five years.
- "(3.) The names of all persons who have received leave of absence from
- "the Public Service during the last five years on full or half pay, with the
- " amount received in each case.
- "(4.) The total amount paid away to persons on leave of absence from the
- " Public Service during the last five years."

(Mr. G. D. Clark.).

(1.)

THE name of each person who at the present time is receiving a pension from the Government of the Colony, and the amount received in each case for the past year.

Parkes Ministry—Increase to staff, 181; increase to salaries, £14,310 { Exclusive of Salaries of extra Tide-waiters, Dibbs Ministry— do 114; do £4,704 { Customs Department, and Apprentices, &c., Government Printing Office.

This Return does not include promotions or appointments consequent on vacancies.

A. P. PEARSON, The Treasury, 22nd February, 1893. Pro Examiner of Accounts [3d.]724 -

^{*} The number of extra Tide-waiters is included in the appointment column, but the aggregate amount paid to them is not shown, as they are only paid when employed (10s. 6d. per day), the average amounts paid being from £8 to £10 per month. The cost of collecting the new duties is about 1½ per cent.

† The number of Machinists, Apprentices, Folders, and others appointed is included in the appointment column, but the aggregate amount paid to them is not shown. They are appointed on the recommendation of the Government Printer, with wages ranging from 1s. 6d. to 12s. per day.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FOREIGNERS EMPLOYED IN THE DEPARTMENT OF PUBLIC WORKS.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 7 June, 1893.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 2nd March, 1893, That there be laid upon the Table of this House a Return showing,—

- "(1.) The number of foreigners employed in the Public Works Depart-"ment.
- "(2.) The occupation of each.
- "(3.) The salary and length of service of each.
- "(4.) The number that are naturalised British subjects."

(Mr. Hoyle.)

Foreigners employed in the Department of Public Works.

Branch.	Number in Service.	Number Naturalised.	Remarks.
1. Head Office	1	1	
2. Harbours and Rivers	66	26	In addition to those naturalised whose papers are in order, five cannot produce papers, seven cannot give date of registration, one papers of naturalisation not finally dealt with.
3. Architect	Nil.	Nil.	
4. Railway Construction	9	5	In addition, one states he is naturalised (in 1866), but has lost papers.
5. Roads and Bridges	47	24	
6. Sewerage	7	4	
7. Water Conservation	. 2 ·	1	
8. Land Valuation	Nil.	Nil.	•
	132	61	

In addition to the information to be supplied in accordance with the Order, the dates of naturalisation have been given where obtainable, in fulfilment of a promise made on the 12th April, 1893, in reply to a Question by Mr. Darnley, M.P.

1892.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RICHARD TARRANT, TELEGRAPH MESSENGER AT ADAMSTOWN.

(COPIES OF PAPERS, &c., RELATING TO THE DISMISSAL OF.)

.Ordered by the Legislative Assembly to be printed, 13 September, 1892.

SCHEDULE. The Postmaster, Adamstown, to the Secretary to the Post Office. 1 August, 1892 Minute of the Superintendent of Telegraphs. 10 August, 1892 R. Henderson to the Secretary to the Post Office. 13 August, 1892 Mrs. Jane Cowan to the Secretary to the Post Office. 15 August, 1892 Report of Postmaster, Adamstown. 19 August, 1892 The Superintendent of Telegraphs to Master Richard Tarrant. 30 August, 1892 PAGE.

No. 1.

The Postmaster at Adamstown to The Secretary, General Post Office.

Adamstown, Post Office, 1 August, 1892. I beg to report that on Friday the 29th and Saturday the 30th July, the telegraph messenger did not arrive at the office until seven minutes past 9 o'clock, and it was five minutes past 9 this morning. On Friday, when he came, I asked him did he know what time it was, he said, "No, I don't," I said to him "I don't think you care," and he said "No" in a very insolent manner. I would have reported him on several occasions, on different matters, but I took into consideration that his mother was a widow, and I thought that talking to him would make him better but it has hed the expectite effect. There had I thought that talking to him would make him better, but it has had the opposite effect. I have had frequently to speak to the police to remove the number of larrikins which he gets congregated around him, and the language used by them is sometimes unfit for any person to hear, let alone children. I have very often spoken to him on this matter, and on one occasion when I threatened to report him he on again remonstrating with him about it he said in a very insulting manner, "I don't bring them here, and I am not going to send them away." But I say he does bring them, and also induces them to stop, because, should there be a message come when the "push" are with him he will say to them, "Wait a minute, I am only going to so and so's, and won't be many minutes before I am back." I have really put up with this state of things till I cannot stand it any longer without reporting him. The matter came to a climax yesterday, Sunday, when the messenger's uncle called at the office to see me (but I was away out for a walk), and wanted to know from Mrs. Lee why he had not got two pairs of trousers, instead of one pair, and why he had not got his rise, as he was entitled to it more than some that had got it. This is very pleasant on a Sunday morning! There are many more things which I could complain about, but as they are gone and past there is no need to trouble you with them; but from this out (as I know I should have done in the past), I shall make you acquainted with any misconduct on his part.

WILLIAM LEE,

Postmaster, Adamstown.

The Superintendent of Telegraphs, S.H.L. (per R.L.R.), 3/8/92. Messenger Tarrant, for any explanation he may have to offer.—E.C.C., 4/8/92. The following is the report furnished by Tarrant:—
"Richard Tarrant, I ain't going to reply." Suspend this young gentleman and recommend his dismissal.—E.C.C., 8/8/92. Station-master, Adamstown, directed to suspend Tarrant. Prepare Minute.—P.B.W., 9/8/92. Minute prepared.—J.M., 10/8/92.

No. 2.

Minute of The Superintendent of Telegraphs.

I forward herewith a report from the Station-master at Adamstown as to the conduct of Messenger Richard Tarrant, of that station. This lad, it appears, is continually late in his attendance at the office, and his conduct is altogether very unsatisfactory. I therefore recommend for the approval of the Postmaster-General that he be dismissed from the Service.

He is at present under suspension by my directions, and refuses to reply to my request for any explanation he may have to offer.

E. C. CRACKNELL, 10/8/92.

The Secretary, General Post Office.

-S.H.L., 11/8/92. Approved.—J.K., 12/8/92. Submitted.-Noted.—J.W.R. (pro Accountant), 3/9/92. S.H.L., 12/8/92.

Superintendent of Telegraphs.-

No. 3.

Mr. R. Henderson to The Secretary, General Post Office.

"Stanleyville," Albany Road, Stanmore, 13 August, 1892. Re Richard Tarrant, telegraph messenger, of Adamstown, now under suspension.

Sir,

I beg respectfully to ask that Richard Tarrant's dismissal be not confirmed until some further explanation be received.

I wish to point out that his mother is a widow, having six children to support, and I know she does not understand that her son has been either negligent in his duties or impudent to the postmaster at

Further, as regards the lad himself, he did not understand that the Postmaster-General had called on him for report when he wrote such an unwarrantable reply. I am sure he is prepared to apologise fully, and that if he be given another chance, either in Adamstown or any adjacent office, he will do his best to make amends for past conduct.

Trusting that, in view of the lad's youth (14 years) and the peculiar circumstances in which his mother is placed, the Postmaster-General may be able to accede to my request,

I have, &c., R. HENDERSON.

P.S.—I should explain that his mother wrote me to ascertain why he had been suspended, and I have written the fact to her. Her letter will reach your office not later than Tuesday.—R.H.

No. 4.

Mrs. Jane Cowan to The Secretary, General Post Office.

Dear sir, Adamstown, 15 August, 1892. On the 9th instant my son, Richard Tarrant, telegraph messenger at Adamstown, was told by Mr. W. Lee, postmaster, that he was to go home till further notice. I have been waiting expecting to hear of him being suspended, but up to date I have received none. Will you kindly inform me the cause of his being suspended, and if there has been a charge made against him, will you oblige by forwarding me a copy of the same. Trusting you will oblige,

I remain, &c.,

JANE COWAN.

Mr. Henderson called, and asked if the boy could be given another chance, and explained that he (Tarrant) is not quite fourteen years of age; that he did not tell his mother that he had been asked to explain; that his mother is a very poor widow, and the loss of the 10s. a week will be a great loss, indeed. Mr. Henderson admitted that the boy deserves dismissal for writing as he has done, but asks that his extreme youth or boyish foolishness be taken into consideration.—R.L.R., 16/8/92. Superintendent of Telegraphs.—S.H.L., 16/8/92. Postmaster, Adamstown, for his remarks in the first intendent of Telegraphs.—S.H.L., 16/8,92. instance.—E.C.C., 18/8/92.

No. 5.

Report of The Postmaster at Adamstown.

Sir,

Messenger Tarrant appears to be getting younger. He was fourteen when he was recommended, and is now made out to be scarcely fourteen, after serving over eighteen months as messenger. When the report came back with Superintendent's minute on it, I gave it to him and told him who it was from, and told him to read it very carefully. After he had read it, I offered him paper and pencil and told him to again read it, and anything that was not true in it to note it down, and then he could write it on the report with pen and ink. All that I could get out of him was, "I am not going to reply." Thinking that he might be afraid to write in my presence, I allowed him to take the report home, and instructed him to let his mother see it. When he came back to the office I asked him had he shown the report to his mother, and he said, "Yes; but she did not say anything, and I am not going to reply." He then said, "I can work; I worked before I came here, and I can work again. What notice have I to get, a week or a month?" I said to him, "No one has mentioned notice except yourself." He replied, "By that report I will have to get notice, and want to know how much." I repeatedly asked him, "Have you shown the report to your mother?" and he said that he had; and I believe that he did, because Mrs. Cowan passes within about fifty yards of this office two or three times a day, and if she did not know before, she must have known there was something the matter when he went home from here the morning that he was suspended, and even then she allowed the matter to go six days before writing to you for information. I would respectfully draw your attention to what appears to be a contradiction, viz., Mr. Henderson says in his letter of the 13th that he had informed Mrs. Cowan of the facts of the case, why her boy had been suspended. She says in her letter of the 15th that she has been waiting to hear of him being suspended, and again she wants to know why he is suspended. I may say that I read the memo. to him that was sent to me to suspend him.

WILLIAM LEE,

Postmaster, Adamstown, 19/8/92.

Superintendent of Telegraphs for remarks.—S.H.L., 23/8/92. I do not think this lad should be re-employed; he is a disgrace to the Department.—E.C.C., 25/8/92. Submitted.—S.H.L., 27/8/92. Approved.—J.K., 27/8/92. Superintendent of Telegraphs.—S.H.L. (per R.L.R.), 29/8/92. Inform. Accountant to note.—E.C.C., 30/8/92. Noted and informed.—J.M., 30/8/92.

No. 6.

The Superintendent of Telegraphs to Master Richard Tarrant.

MASTER TARRANT is informed that, in consequence of his very unsatisfactory conduct, the Postmaster-General has approved of his being dismissed from the Service.

E. C. CRACKNELL,

Superintendent, 30th August, 1892.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WATER CONSERVATION DEPARTMENT.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 16 May, 1893.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 2nd May, 1893, That there be laid upon the Table of this House, a Return showing,—

"(1.) The travelling expenses paid during the past twelve months to "Officials of the Public Watering Places (presided over by Mr. J. W.

"Boultbee), with the names of the several recipients.

"(2.) The total amount of expense incurred in travelling, hiring, and "salaries during the time the Department mentioned drove Mr. Waddell, "M.P., about the Bourke Electorate."

(Mr. Willis.)

No. 1.

Return showing the travelling expenses paid during the past twelve months to Inspectors of Public Watering Places.

Official.	Amount.*	Miles travelled by own conveyance.	Miles travelled by rail.
J. W. Boultbee John Low O. C. Macdougal ¹ . P. J. Makinson R. Le P. Trench J. J. Coughlan T. W. Barnes ¹ W. Donaldson H. Brown (Emergency Officer)	£ s. d. 28 13 0 95 15 3 300 0 0 264 4 0 150 5 9 178 12 0 232 10 0 229 0 0 41 12 0	6,223 4,216 3,207 5,946 5.836 5,656	254 1,706 3,428 688

Messrs. Boultbee and Low are allowed 15s. per diem with conveyance. Messrs. Barnes and Macdougal are allowed 25s. per diem by reason of the arid nature of their districts.

No. 2.

This Department has been under no expense in driving Mr. Waddell, M.P., about the Bourke Electorate.

The following is a return of the salaries and expenses incurred in conveying the Superintendent of Public Watering Places, Mr. C. H. Kerry, Photographer, as per agreement, through the district:—

CIVIL SERVICE.

(RETIREMENT OF MR. W. M. M. ARNOLD FROM.)

Ordered by the Legislative Assembly to be printed, 31 January, 1893.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 18th January, 1893, That there be laid upon the Table of this House,

- "(1.) Copies of all papers, correspondence, documents, Fininutes, "vouchers, &c., in connection with the retirement of Mr. W. M. M.
- "Arnold, late Clerk of Records in the Legislative Assembly Department.
- "(2.) A statement showing the amount of salary paid to Mr. Arnold as " such clerk.
- "(3.) The aggregate amount contributed by him to the Superannuation " Fund.
- "(4.) The amount of pension now annually paid to Mr. Arnold."

(Mr. Willis.)

The Speaker of the Legislative Assembly to The Colonial Secretary.

Legislative Assembly Chambers, Sydney, 14 April, 1890. I have the honor to enclose a letter from Mr. W. M. Montagu Arnold, Clerk of Records in Sir,

Thave the honor to enclose a letter from Mr. W. M. Montagu Arnold, Clerk of Records in this Department, with a minute by the Clerk of the Legislative Assembly thereon.

Mr. Arnold, in that letter, makes application to be allowed to retire from the Service under the provisions of the Civil Service Act of 1884, and states that his health has given way under the strain of the heavy night work, that his sight has become impaired, and that his memory has become seriously affected, which statements are sustained by Dr. Dagnall Clark's certificate.

By Mr. Arnold's retirement the Assembly will lose the services of a valuable officer, but under the circumstances I feel bound to recommend his application to your favourable consideration.

circumstances I feel bound to recommend his application to your favourable consideration.

I have, &c.,
JAMES HENRY YOUNG,

Speaker.

[Enclosures.]

Sir, Legislative Assembly Office, Sydney, 9 April, 1890.

I have the honor most respectfully to apply for leave to retire from the Public Service under the provisions of

I have the honor most respectfully to apply for leave to retire from the Public Service under the provisions of the Civil Service Act of 1884.

It may be within your recollection that in February, 1888, acting under the advice and certificate of Dr. Dagnall Clark, I applied for and subsequently obtained twelve months leave of absence on half-pay. Although very much benefited by the lengthy rest then obtained from official duties, I have now with extreme regret, and at great personal sacrifice, to make the application above indicated. During the late Session, which was by no means unusually severe, my physical and mental sufferings were at times almost intolerable. My eyes are now always most painfully affected by nightwork. I suffer from chronic headaches, and my memory has become so much impaired that I am in a constant state of mental distress lest I should overlook some vital detail connected with the responsible office I have the honor to fill.

[870 copies—Approximate Cost of Printing (labour and material), £5 5ş. 0d.]

I have been more than twenty-three years continuously in the Public Service, and for nearly twenty-one of those years I have laboured to perform the arduous duties which devolve upon officers of this Department, and to fit myself for the higher offices in connection therewith. It is therefore with extreme reluctance, and only after anxious consultation with my medical adviser, that I have decided to relinquish my claim to the higher and more substantial promotions of this Department. Although I might be able to struggle on for a time in my present state, I feel that it would be altogether unfair to the Clerk of the House to cast upon him the responsibility of any mistake which might result from the confessedly weak state of one of his officers. I enclose herewith Dr. Dagnall Clark's certificate. "I humbly hope you may be pleased to favourably recommend my application for the approval of the Civil Service Board, and I should prefer that the time of my retirement may be fixed at whatever period may be most convenient to the business of this Department.

I have, &c.,

W. M. MONT. ARNOLD,

Clerk of Records.

Clerk of Records.

The Honourable the Speaker, Legislative Assembly.

As requested by Mr. M. Arnold I submit his letter. While sympathising with him in his failing health, and regretting that it is the cause of his proposed retirement, I feel, as he does, that it would be an injustice to others in the Department to transfer the responsibility properly belonging to the position of Clerk of Records to others while he retains the position, nor can I undertake to relieve him of or curtail "the severe nightwork," as recommended by Dr. Dagnall Clark. If Mr. Arnold's health is so impaired as to render him incapable of sustained effort with little "natural rest," he cannot, I submit, efficiently perform his duties, which are of a most trying, varied, and responsible character.

Mr. Arnold's long and efficient service will, I trust, be taken into favourable consideration when estimating the amount of the pension to be given.

Clerk of Legislative Assembly.

The Honorable the Speaker, &c.

[Sub-enclosure.]

MR. W. M. M. Arnold has consulted me at intervals during the past four years, suffering from chronic headaches, impairment of memory, and other symptoms of nervous exhaustion, which I have no hesitation in attributing to severe brainwork, protracted long into the small hours of the night during the sessions of Parliament. At one time his health was in imminent danger of breaking down. I look on any continuance of this severe night work as fraught with grave danger to his health, and recommend strongly that it should be so far curtailed as to allow of the natural rest so necessary to one whose duties are so responsible.

C. DAGNALL CLARK, M.B., &c.

Referred to the Civil Service Board. The Chairman, B.C., 16 April, 1892.—C.W., P.U.S. From the returns furnished to the Civil Service Board, Mr. Arnold appears to be under 40 years of age, and possibly leave of absence would afford him an opportunity to regain his health. The Board request that the report of the Medical Adviser may be obtained under section 44 of the Civil Service Act, 1884.—Thomas Littlejohn, Chairman. The Principal Under Secretary, B.C., 17/4/90.

The Medical Adviser, B.C., 24 April, 1890.—E.W.M.K. (pro P.U.S.) The Deputy Medical Adviser, 24/4/90.—F.N.M. Thursday, May 1st, 3 p.m.—J.A.T. The Secretary, 28/4/90.

The Deputy Medical Adviser to The Medical Adviser.

30 April, 1890.

I HAVE this day examined Mr. W. M. M. Arnold, Clerk of Records. I find that this officer is suffering from amnesia and general derangement of health; he is unfit for duty. I am of opinion that this disability is likely to prove permanent.

J. ASHBURTON THOMPSON, M.D. Deputy Medical Adviser.

The Principal Under Secretary, B.C., 30/4/90.—E.S., for the Medical Adviser. man of the Civil Service Board, B.C., 1 May, 1890.—C.W., P.U.S. The Chair-

The Secretary to the Civil Service Board to The Clerk of the Legislative Assembly.

Civil Service Board, Sydney, 23 May, 1890. Sir,

In reference to the case of Mr. W. M. M. Arnold, whose proposed retirement is at present under the Board's consideration, the Government Medical Adviser has given a certificate to the effect that Mr. Arnold is suffering from "amnesia," i.e., loss of memory. As the medical officer has had no opportunity of verifying this opinion, which he adopted from Mr. Arnold's statement to him, the Board has directed that the effect is the medical officer has had no opportunity of verifying this opinion, which he adopted from Mr. Arnold's statement to him, the Board have directed that the officer in charge of the Department should be requested to state whether during the past year any serious inconvenience had arisen owing to neglect of duty on the part of Mr. Arnold which could fairly be attributable to the above cause, and which could be of sufficient importance to justify Mr. Arnold's retirement.

I should be much obliged if you would kindly furnish me with the necessary information.

I have, &c., E. G. W. PALMER,

The Clerk of the Legislative Assembly to The Secretary of the Civil Service Board.

Sydney, 27 May, 1890. Sir, I have the honor to acknowledge the receipt of your letter, dated 23rd instant, on the subject of Mr. W. M. M. Arnold's application for leave to retire from the Public Service, and in reply to state, for the information of the Civil Service Board, that I have for a considerable time noticed Mr. Arnold's failing memory and weakening sight, which have on several occasions since his return from England caused inconvenience to the Department and anxiety to me as its head, several serious mistakes having been made by him which I can only attribute to that cause.

I may add that in my opinion his health would suddenly and speedily break down if he were called upon, through the absence of one of his seniors, to work in the Chamber.

I have, &c. F. V

Clerk of the Legislative Assembly.

The Chairman of the Civil Service Board to The Principal Under Secretary.

Proposed retirement of Mr. W. M. M. Arnold, Clerk of Records, Legislative Assembly.

Sydney, 17 June, 1890.

Mr. Arnold applies to retire from the Public Service under the provisions of section 44 of the Civil Service Act. 1884 the cause assigned being averaged by the course of section 44 of the Civil Service Act, 1884, the cause assigned being amnesia, or loss of memory, and general derangement of health.

The records of the Department show that Mr. Arnold was born on the 14th May, 1851, and he is therefore under 40 years of age. As the cause assigned for his retirement is obscure, and the symptoms do not appear to be clearly defined, the Civil Service Board consider it a case in which they would be greatly assisted by the report of a Medical Board.

THOS. LITTLEJOHN,

Chairman.

medical Adviser, B.C., 19 June, 1890.—C.W., P.U.S.

The special section of the Act (44) under which Mr. Arnold applies for retirement does not mention the appointment of a Board, but after enacting that the Governor may permit the officer to retire if he produce medical evidence satisfactory to the Board that he is incapable of discharging the duties of his office and that the infirmity is likely to be permanent, provided that the Board may require the officer to be examined by the Government Medical Adviser. This appears to be a final step, and to go beyond it would, I think, create a most objectionable and inconvenient precedent.—F.N.M., B.C., 23/6/90. The Principal Under Secretary. On The Principal Under Secretary.

Refer to Board.—C.W., B.C., 24/6/90. The Chairman of the Civil Service Board.

The Chairman of the Civil Service Board to The Principal Under Secretary.

Sydney, 3 July, 1890. In the matter of the proposed retirement of Mr. W. M. M. Arnold, Clerk of Records, Legislative Assembly.

THE Civil Service Board desire to be informed whether, in the opinion of the Government Medical Adviser, Mr. Arnold is at present unfit for any employment in the Public Service, or whether he is capable of performing clerical or other duties during ordinary office hours.

THOS. LITTLEJOHN, Chairman.

The Medical Adviser, B.C., 4 July, 1890.—C.W., P.U.S.
I have again examined Mr. Arnold, and I am of opinion that he is able to perform clerical or other duties during ordinary office hours, provided that they do not require any large responsibility or special effort of memory.—J. Ashburton Thompson. The Medical Adviser, 10/7/90.

I have seen Mr. Arnold, and consent.—F. Norton Manning, B.C., 10/9/90. The Principal Under ary. The Chairman of the Civil Service Board, B.C., 12 July, 1890.—C.W., P.U.S.

The Chairman of the Civil Service Board to The Principal Under Secretary. The proposed retirement of Mr. W. M. M. Arnold.

Sydney, 7 August, 1890. THE Civil Service Board are unable, upon the evidence before them, to recommend the retirement of Mr. Arnold under section 44 of the Civil Service Act, 1884, and they request that a Medical Board may be appointed to examine Mr. Arnold and to report as to his ability or otherwise to perform the duties of his position. THOS. LÎTTLEJOHN.

The Medical Adviser, B.C., 8/8/90.—C.W., P.U.S. I beg to invite attention to my memo. of the 23rd of June last; but if the Colonial Secretary so desires, a Board, under the 45th section of the Civil Service Act, might be appointed —F.N.M., B.C., 12/8/90. The Principal Under Secretary. A Board of medical men, consisting of Drs. Thompson, MacLaurin, and Scott-Skirving, may, perhaps, be appointed by the Governor in Council to examine Mr. Arnold.—C.W., 15/8/90. Approved.—H.P., 15/8/90.

The Speaker of the Legislative Assembly to The Colonial Secretary.

Sir,

Legislative Assembly Chambers, Sydney, 14 August, 1890.

On the 14th April last, now four months ago, I had the honor to address you, enclosing a letter from Mr. W. M. Montagu Arnold, who had applied to be allowed to retire from the Public Service under the provisions of the Civil Service Act of 1884.

From that date, in consequence of Mr. Arnold's defective memory and consequent unreliability, the duties properly belonging to him as Clerk of Records have been performed by the Clerk of Select Committees, whose work, being less harassing, was given to Mr. Arnold, a temporary expedient to operate during the time occupied in the settlement of the matter by the Government.

As, however, such an exchange of duties without alteration in salaries should not continue I

As, however, such an exchange of duties without alteration in salaries should not continue, I request that you will have the goodness to cause this matter to be dealt with as soon as possible.

I have, &c. JAMES HÉNRY YOUNG, Speaker.

Minute Paper for The Executive Council.

MacLaurin, M.D., M.L.C., &c.; and R. Scott-Skirving, Esq., M.B., C.M.

HENRY PARKES.

Minute

Minute of The Executive Council.

The Executive Council advise that the appointment herein recommended be approved.—A. C. BUDGE, Clerk of the Council. Approved.—Carrington, 19/8/90. Min. 90/35, 19/8/90. Confirmed. Referred to the Medical Adviser, B.C. 27 August, 1890.—C.W., P.U.S. **2**0/8/90. Board summoned for 3 p.m., 28 August, 1890.—E.S.

The Principal Under Secretary to The Speaker of the Legislative Assembly.

Colonial Secretary's Office, Sydney, 18 August, 1890. In reply to your letter of the 14th instant, respecting the retirement of Mr. W. M. M. Arnold from his position as Clerk of Records in your Department, under the provisions of the "Civil Service Act, 1884," I have the honor to inform you that a Medical Board has been appointed to examine and report upon his mental condition, and that the matter will be attended to without unnecessary delay. I have, &c.

CRITCHETT WALKER, Principal Under Secretary.

Report of Medical Board.

Report of a Medical Board appointed under the 45th section of the Civil Service Act, 1884, to examine and report upon the case of Mr. W. M. M. Arnold, Clerk of Records, Legislative Assembly.

Sydney, 28 August, 1890. WE have this day examined Mr. W. M. M. Arnold. We find that he is suffering from incipient nervous exhaustion, and that in consequence of such infirmity he is incapable of efficiently performing the duties of his office in the Legislative Assembly, and we are of opinion that his infirmity is likely to be permanent.

J. ASHBURTON THOMPSON,

H. N. MACLAURIN,

R. SCOTT-SKIRVING

The Principal Under Secretary, B.C., 28 August, 1890.—Edmund Sager, Secretary. The Chairman of the Civil Service Board, B.C., 29 August, 1890.—C.W., P.U.S.

The Civil Service Board are of opinion that the report of the Medical Board shows sufficient cause

for the retirement of Mr. Arnold under the provisions of section 44 of the Civil Service Act, 1884 .-THOS. LITTLEJOHN, Chairman.

The Principal Under Secretary, B.C., 5/9/90. Will the Auditor-General be kind enough to furnish me with a certificate of service, statement of salaries, &c., in this case?—C.W., P.U.S., B.C., Certificate of service and statement of salaries received, herewith enclosed.—E.A.R., B.C., The Principal Under Secretary. 19/9/90.

Certificate of Service, Mr. W. M. M. Arnold.

I HEREBY certify that the records of this Department show the services of Mr. W. M. M. Arnold to have been continuous from 22nd October, 1869, to 30th June, 1890, and that at the latter date he was in receipt of salary at the rate of £490 per annum as Clerk of Records, Legislative Assembly.

Given at the Audit Office, Sydney, this 20th day of September, 1890.

E. A. RENNIE, Auditor-General.

WILL the Clerk of the Assembly be so kind as to cause me to be furnished with the enclosed particulars to enable me to compute the pension to be assigned to Mr. Arnold?—C.W., P.U.S., B.C., 25th September,

Particulars furnished accordingly.—F.W.W., B.C., 14th October, 1890. The Principal Under Secretary.

Information required in the case of Mr. W. M. M. Arnold, Clerk of Records, Legislative Assembly, with a view to retirement under the provisions of the "Civil Service Act, 1884."

Date of retirement.—1st November, 1890.

Length of service.—Twenty-three years and nine months; 1st February, 1867, to 22nd October, 1869, and 22nd October, 1869, to 31st October, 1890. (See letter from Public Works Department herewith.)

Amount of salary received up to 31st December, 1884.—£4,907 5s. 7d.

Age at retirement.—Thirty-nine years, five months, and seventeen days.

Present salary.—£490.

Average amount of salary for last three years.—£487 4s. 5d.

Has applicant paid 4 per cent. deduction on salary and allowances?—Yes.

If so, from what date?—1st January, 1885.

In which way will the liability to the Civil Service Superannuation Fund (in case of a pension) be discharged, in accordance with section 55 of the Act?—In one sum by special vote on Estimates.

F. W. WEBB.

The Under Secretary for Public Works to Mr. W. M. M. Arnold.

Sir, In reply to your personal inquiries, I am directed to inform you that the amount of salary paid to you whilst engaged in this Department, from 1st February, 1867, to the 22nd October, 1869, was I have, &c., J. BARLING, £499 10s.

Under Secretary.

The Speaker of the Legislative Assembly to The Colonial Secretary.

Sir,

Legislative Assembly Chamber, Sydney, 14 October, 1890.

With reference to the retirement of Mr. W. M. Montagu Arnold, Clerk of Records of this

Department, I have the honor to request that under the circumstances of his enforced withdrawal from the Civil Service through failing health, you will have the goodness to cause to be placed on the Estimates a sum sufficient to meet the abatement which should, in terms of the Civil Service Act, be deducted from his pension. I have, &c.,

JAMES HENRY YOUNG,

Speaker.

The amount due to the Superannuation Account in the case of Mr. W. M. M. Arnold is £196 5s. 10d., and it is submitted that authority be given for payment by the Government as recommended by Mr. Speaker.—J.O., 23/10/90.

Submitted for approval.—C.W., 23/10/90. Approved.—H.P.

Case of Mr. W. M. M. Arnold, Clerk of Records, Legislative Assembly, with a view to a pension under the provisions of the "Civil Service Act, 1854."

Date of retirement—1st November, 1890.

Length of service—23 years 9 months.

Amount of salary received up to 31st December, 1884—£4,907 5s. 7d. Four per cent. on total salary to 31st December, 1884—£196 5s. 10d.

Age at retirement—39 years.

Average amount of salary for last three years—£487 4s. 5d.

Computation of superamulation allowance—£192 17s. 2d. per annum.

Note.—The liability to the Superannuation Account, viz., £196 5s. 10d. will be discharged by the Government.—S.F., for Accountant.

Shall the necessary minute be prepared for the Executive Council?—17/10/90. Yes.— C.W., 17/10/90.

Minute Paper for the Executive Council.

Colonial Secretary's Office, Sydney, 18 October, 1890.

Pension under the provisions of the "Civil Service Act, 1884."

APPLICATION having been made for Mr. W. M. M. Arnold, Clerk of Records, Legislative Assembly, to retire under the provisions of the "Civil Service Act, 1884," I recommend that Mr. Arnold be allowed to retire on a pension to which he is entitled by length of service, viz., £192 17s. per annum. HENRY PARKES.

Minute of the Executive Council.

THE Executive Council advise that the pension herein recommended be approved, in terms of the "Civil Service Act of 1884."—A. C. Budge, Clerk of the Council.

Approved.—Carrington, 21/10/90. Min. 90-45, 21/10/90. Confirmed, 29/10/90.

1892 - 3.

NEW SOUTH WALES.

VACCINATION.

(REPORT FOR 1892.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Chief Secretary.

Sir, Sydney, 30th March, 1893. I have the honour to forward, for the information of the Chief Secretary, the Annual Returns of Vaccinations performed during the year 1892 by the Government Vaccinators in New South Wales.

The returns for 1892 show that 4,036 vaccinations were performed during the year, of which 4,001 were successful. Of the total number, 1,326 were performed in Sydney and its suburbs, and 2,675 in country districts. It will be seen that vaccination was performed in only 24 country districts; in 81. districts in which there are Government Vaccinators no vaccinations have been reported, and it is presumed that none have been performed.

Of the successful cases, the patients in 373 were under 1 year, in 1,161 between 1 and 5 years, in 1,664 between 5 and 10 years, and in 803 upwards of 10 years of age. The unsuccessful cases were 35 or 86 per cent. of the total number.

The number of births registered in the Colony during 1892 was 40,646, and the vaccinations give a percentage of 9.84 on this number. In addition to vaccinations performed by Government Vaccinators a number are performed by private practitioners, but of these no returns are submitted. There is reason,

a number are performed by private practitioners, but of these no returns are submitted. There is reason, however, to believe that these cases would not add very materially to the percentage above given.

The Department continues to supply pure calf lymph to legally qualified practitioners of medicine on application at the office; and, while this entails a considerable expenditure of public money, yet the money is considered to be well spent, and, after careful consideration, it is not proposed to curtail the supply of lymph, which might be required in considerable quantities at any moment. In illustration of this I might point to the large number of vaccinations performed during the past year, the largest for the past eight years, occasioned by the alarm arising from the importation of small-pox by the "Oroya" and "Karlsruhe." Doubtless, if no further importation takes place, the apathy of the public on the subject will reappear, so that the small percentage of persons protected by vaccination against small-pox will not have been materially raised by the large number of vaccinations performed during the year under review. have been materially raised by the large number of vaccinations performed during the year under review. That it is a matter largely of apathy is evidenced by the fact that whenever interest in the subject is stimulated then the vaccinations immediately increase. The report of the Royal Commission on the subject of vaccination in the United Kingdon has not yet been published, and it has been deemed advisable to await its publication before recommending that the Bill prepared by the Board of Health for making vaccination compulsory should be proceeded with. The matter is a very serious one for this Colony, two-thirds of the population of which remain unvaccinated; and, in view of the increasing speed and number of the steamships visiting our ports, the chance of the importation of small-pox becomes greater and greater. If small-pox did obtain a footing here its effects would be more calamitous than would even a disastrous

In conclusion, I might draw attention to the fact that New South Wales is the only province of the Australasian group in which an enactment for compulsory vaccination does not exist, and that the Colony is therefore a danger to the other Colonies, of which they might reasonably complain. At all events, our position, when we wish them to take stringent measures, such as we have done (say) with regard to leprosy, is much weaker when we ourselves have not done our duty in directions in which I have, &c.,
T. P. ANDERSON STUART, M.D., they have done theirs.

Medical Adviser to the Government.

RETURN (No. 1) showing the number of Births during the past thirty-two years, and the number of Vaccinations performed by Government Vaccinators during the same period.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

EPIDEMIC OF INFLUENZA.

(REPORT ON, IN NEW SOUTH WALES DURING 1891.)

Ordered by the Legislative Assembly to be printed, 11 October, 1892.

REPORT.

The Chief Medical Inspector to The President of the Board of Health.

May 21, 1892.

Sir.

The pandemic which began in 1889 reached New South Wales in 1890. In that form influenza was new to all but the oldest practitioners of medicine, and as an epidemic it was new to a large majority both of the present and of the last generations—that is to say, if localised outbreaks be in truth manifestations of the same disease. For this reason, practically all that was known of it lay in writings published by the leaders of the profession before the middle of the present There it was uniformly represented as spreading on the wings of the The assertion was that large districts and even whole countries of great extent, were suddenly invaded by noxious breezes which on their way across the sea infected ships they overtook just as they infected cities on the farther shore. That it could probably be communicated from person to person as well was, indeed, admitted; but this was regarded (among the few who thought it had been observed) as unimportant to pandemic extensions, which were still supposed to be due entirely to an altered atmosphere whence each susceptible person took the infection for himself. Nothing therefore could be done to prevent influenza; and, in short, under that view its visitations corresponded superficially with the daimonistic concept of plague. The reappearance of the disease furnished a practical motive for examining those older writings; and it was then perceived that in the main they were thoroughly opposed to much that had been well established during the last forty years concerning disease, and especially concerning infectious disease. It appeared that the evidence adduced in them was imperfect and insufficient: consequently the conclusion based upon it failed any longer to convince; and thence efforts were made all over the civilised world to observe the facts again, and to record them with a completeness never possible before.

2. One such effort was made here. The disease became prevalent in March, 1890; arrangements for investigating it collectively were made in the middle of April; and towards the end of the same year I had the honour of reporting upon the result, in a paper which was presented to the Board on 10th December, and to Parliament on 17th December. The local conditions were especially favourable to the inquiry. The province invaded was a portion of a continent connected with the rest of the world only by sea, and thereon by numerous and frequent lines of steam-vessels. It was of great area; it contained a population that was sufficiently numerous, and yet not so large as to be in itself a source of embarrassment (1,132,000); that population was distributed between one large city (400,000), several lesser cities, and many towns and villages; these were connected by easily-mastered routes traversed by railways, steam-vessels, and coaches—rather too well connected, as it

turned out, for all details of the purpose in view; and in nearly all of them were skilful medical men, able and willing to observe. And, accordingly, a sure conclusion was reached. Here, first of all, it was shown upon evidence sufficient to convince that the spread of influenza was by slow degrees, both over the metropolitan district regarded as a place by itself, over the larger towns considered as places by themselves, and over the country as a whole; and that it was in every respect accordant with what was known to be the habit of the communicable diseases.

- 3. Nevertheless that conclusion, expressed in the sixth paragraph of the paper referred to, was restated in the interrogative form in a seventh paragraph.* The occasion of doing this was a caution which was reasonable at the time of writing, but which, from evidence then accumulating in the periodical literature of several other parts of the world, very soon afterwards appeared superfluous. The inference which had been drawn was good in the locality which furnished the facts it rested on, and the latter were as much more cogent than series of similar facts gathered elsewhere, and published at a later date, as they were more complete for the whole area examined, and less involved in not easily-apprehended details: but the character of the disease was pandemicity; and although that character implied that it was essentially the same all over the world, it did not quite follow that its mode of spread, under other and different conditions, would remain When those later series were published, exactly what had been seen here. however, it was at once apparent that the first question could be answered unhesitatingly in the affirmative, and the third in the negative, not for New South Wales alone but in general. But as to the second, there is good reason to think (and by the end of the present account it will be seen clearly) that it was ill-founded. The same suggestion has been again and again made by others after considering an insufficient body of facts; and here, also, it sprung from defective data, and a little-excusable hastiness.
- 4. Those were the conditions under which the enquiry of 1890 was conducted, and that influenza spreads by human intercourse was its important result. That it was essentially a preliminary investigation was in the nature of the case; and in consequence its conclusion (that human intercourse is the means of spread) was too little accurate to serve as a practical basis for schemes of prevention. The further questions, "How is that communication effected—by what means and in what channels?"—thereupon immediately suggest themselves; and the answer to them accordingly forms the central point of the present investigation. It can be reached only by a maze of interwoven circumstances. The schedule of questions designed to elicit these latter, and the replies made to them, will be found classified, analysed, and commented upon in the several appendices hereto. In this place conclusions alone will be mentioned, and only such reference to details will be made as from time to time may seem indispensable.
- 5. The course of the epidemic of 1890 must be recapitulated, because it will be shown that the outburst in 1891 was, in all probability, a recrudescence of it. As to its beginning, the discovered occurrences were as follows:-Two cases, which from the description of them furnished by a careful contributor appear to have been cases of influenza, occurred in a quite remote village called Hillston in July and August, 1889, in two separate households; but this illness did not spread, and the epidemic began there only some months afterwards. Then one case was reported from Albury, a large town on the Victorian border, and the main southern line of railway, during the week ending 10th December; and next to that one case in Sydney on 25th December, 1889. From that date no more cases were reported until the week ending 4th March, when each of three practitioners in the metropolitan district met with his first case of the number which belonged to the period of general prevalence. At different dates during nine succeeding weeks 108 other metropolitan contributors met with their first cases in their several practices; and a doubtful report of a first case or fresh invasion was made during the week ending 24th June, after a vacant interval of seven weeks more. Thus the progress of the disease within a small area carrying a large population was such during the period of great prevalence that individual

^{*} The questions were—"Is not human intercourse necessary to transport the contagion of this disease? Is not some stage intermediate between man and man necessary to its spread in epidemic form? Is the condition, which for convenience has been called aërial, of more consequence in production of epidemics of influenza than it is in production of other diseases which at times do, and at other times do not, assume the epidemic form?

individual practitioners met with first cases of influenza (or found their districts newly invaded) successively during a term so long as ten weeks. The same kind of deliberate spread was reported from several of the larger cities in different parts of the country from which multiple reports were received; different practitioners in the same places first saw the disease on successive dates. The same deliberate spread again was manifested over the country in general: seventy-one contributors met with their first. cases on successive dates which extended over twenty-two weeks. The table from which these facts are summarised is reproduced here (vide p. 4), in order that it may be compared with the similar table compiled from the present inquiry (vide p. 5.) Next, it now appears (Appendix I, Table A, Q. 1) that the dates on which thirty-two metropolitan contributors met with their last case of the 1890 epidemic are fixed by them between April and December—one naming 30th April, another 29th December; but thirteen of them name a date during May, and the others, in nearly equal numbers, one during June, August, September, November, and December. The corresponding dates furnished by thirty-three country contributors yield a corresponding statement (Table B, Q 1.) Some of these sixty-five contributors, it is likely, may have mentioned what they found was the end of the period of general prevalence among their patients, and others the day on which they saw what was literally their last case; but that invalidates the obvious inference that the disease lingered long after it had ceased to be general no more than does the small proportion who answered this question at all. Those who continued to meet with cases until late in 1890 may or may not comprise all who met with late cases, but the fact that late cases were met with remains.

6. But evidently this account of the various ending-dates of the first outburst runs on into the inter-epidemic period. This was examined separately (Appendix I, Tables A and B, Q 3; and the result shows that rare cases were seen between the first and second outbursts, which were distinct from the late cases just Upon the whole it seems as likely from the evidence as it is a priori that these rare cases were more numerous during six or seven months after the first and during three months before the second outburst than they were during the five months, January to June, 1891; and only two contributors spoke in general terms of having seen rare cases equally spread over the whole interval, including, therefore, those five months. (Appendix I, Q 3, further analysis). Thus it is possible that there was an entire cessation of cases between the extremely gradual ending of the first outburst, and the gradual recrudescence which culminated in the second outburst; but in this case the incompleteness of the reports in point of number becomes of consequence. Before concluding that there really was any such interval, it must be observed that the decrease and the recrudescence by their very slowness suggest a continuous smouldering of the disease, which thoroughly complete reports from the whole country would probably have demonstrated. At all events, it will not now be expected that the second outburst should have begun in the same way as the first. As preceding the outburst in Sydney, 1890, only a solitary case was reported; but in 1891 two contributors fix the beginning of the second outbreak during the week ending 5th July (Table A, Q 2*). It scarcely seems likely that the next six weeks should not have furnished other beginning-dates from other practices in suburban districts, had the information been fuller. . However, the next reports name the week ending 23rd August, and thenceforward week by week for ten weeks metropolitan contributors continued successively to report the beginnings of an epidemic prevalence of influenza among their own patients (that is, in their own suburbs) down to the week ending 26th October, and in weekly numbers which, taken as a series, strongly resemble that experienced in And similarly the series of beginnings reported from the country in 1891 does not quite correspond with that reported in 1890. Then, when the disease was newly introduced, the capital was first attacked and the country towns suffered afterwards—the number of places freshly invaded continuing small for five weeks and increasing thereafter. But in 1891 some places in the country began to suffer before the capital, though (as far as reported) in small numbers; but on the other hand the capital had for two or three weeks suffered seriously before the country

^{*} The first date of all mentioned is June 7th. But this, almost certainly, must refer to a single case; it belongs to the inter-epidemic period.

began to suffer seriously—before the reports began to show several newly-invaded districts each week. In other words, the country districts began to be invaded during those dates between July and the middle of August which in the imperfect reports from the metropolitan district stand blank, but during which some cases certainly existed there (Appendix I, Q. 3, farther analysis). The new conflagration may in some country districts have relighted from embers still smouldering there unobserved; but the more extensive outbreak again followed that of the capital in a way to suggest connection between the two, such as would be expected in the case of an infectious disease by one acquainted with local conditions of trade, &c. Lastly, as before, the outburst of 1891 had for the most part finished as regards farther extensions by the beginning of November; but the disease lingered at all events far into January, 1892, and even during the following April there was in Sydney a slight recrudescence (cases having been met with by several practitioners during that month in widely-separated parts of the city) which may or may not be the precursors of a third outbreak, and which may or may not have been limited to the capital. The behaviour of the disease, then, was that of other diseases which are communicable from person to person, and which are liable to epidemic extensions, both in 1890 and in 1891.

7. Those data do not, however, comprise all of the same class that can be The course of the epidemic may be deduced from the preceding tables, regarding a single place; that is to say, the metropolitian district. There, plainly enough, it progressed through moderate beginnings to an acme of general prevalence, from which it more rapidly declined. But a special question was asked in order to elicit the experience of individual practitioners both in the several neighbouring districts of that one place, Sydney, and in many distinct districts over the country. (Appendix I, Q. 14.) It was found that in nearly all those distinct districts, whether adjoining as in the metropolis or widely separated as in the rest of the province, the disease became prevalent by steady increase, and after reaching an acme fell more rapidly than it had grown; to which must be added (as being to the same effect in relation to infectiousness) the experience of a rather considerable proportion of observers (about one-ninth) who found the course of the epidemic fluctuating. This is an extremely important record, for it places any person who chooses still to rely upon the hypothesis of aërial dissemination in the following dilemma, thus far not perceived by him. Either the infection must be equally diffused through the atmosphere, or unequally. In both cases it might be reasonably suggested that even if the cause of illness were at a certain moment distributed over a district or country, yet its effects would be felt gradually: for, it might be said, the natural defences of the body are effectual in most cases against the first assaults, but inadequate to a prolonged siege; whence capitulations must occur in gradually-increasing numbers, which would culminate (just as they have been shown to do above) somewhere about the same date in accordance with the general similarity of human constitutions to each other. But in the case of equal distribution at all events the weakest in every part of the country should begin to suffer at the same time; this has been alleged, but, as has been known for eighteen months past, it does not happen. The alternative remains; namely, to suppose that the cause of disease is unequally distributed through the air. In that case it must float in masses, so that if they were visible they would resemble detached cirrhi against a blue sky, or clouds of ephemerides on a summer evening. There is nothing a priori improbable about that notion. But it has already been shown* that influenza attacks separate

^{*} On the map attached to the 1890 report; or refer to table B, Appendix I, and observe (excepting Broken Hill) that Gunning is on a branch of the Southern main line, Casino near the coast in the extreme north, Cootamundra on the Southern main line, Bourke 500 miles to the west on the main Western line, Inverell off the main Northern line, &c., &c.

separate towns on the same area successively during many weeks, but quite irregularly in point of geographical distribution. The clouds of infection, then, must sail through the air, but they must not sweep over the earth. They must rather resemble bombs; and, since no town has been struck twice during the same invasion, it is clear that they must be precisely aimed at particular places. But that is absurd. Then, on the one hand, the aërial theory accounts for all the facts of the case under neither modification; and, on the other hand, the observed behaviour of influenza is precisely what would be expected of a disease that was communicable from person to person, and, in fact, does correspond with the behaviour of other diseases that are known to be so communicated whenever they invade a susceptible population large enough to furnish an epidemic. The conclusion therefore is that influenza is a

communicable disease too, and that it spreads from the sick. 8. It remains, not to test, but to illustrate this induction by examples, if that But it must not be expected that many thoroughly serviceable cases will be found among the attached contributions (Q.12c., p. 33) on a point which is beset by fallacies as soon as the broad survey is relinquished to examine details. Still there are some which are satisfactory. Thus Dr. Lambert, of Berrima, mentions that a widow lady who had been attacked was visited by her three married sons; they contracted the disease, communicated it to their families, and the three households became centres of infection to the districts in which they were respectively situated, and which until then had escaped invasion. Dr. Blackwood, of Cooma, says that the first case in his district occurred in a household 20 miles from the town: one member visited friends who were suffering in Goulburn, and returned home; on the third day she and a baby were down with the disease, and two days later the whole household; neighbours who visited them developed it in two or three days, and it spread thence over a radius of 14 miles. Dr. Wilson, of Narrabri, says that a lady returned to her home ill, after a long journey, that her son, who had stayed at home in Narrabri, fell ill next, two other children next to him, and so on within that household; then a neighbour who had visited there was attacked two days after her visit, and the rest of this second household became ill at intervals of a day or so until all were laid up but one; and these, Dr. Wilson notes, were the first households invaded in the district—an important statement, because the town is the terminus of the north-western railway line, and because there are other practitioners resident there. Again, Dr. Parry, of Emmaville, says, that a storekeeper who had been to Sydney returned ill; in a few days his wife and children were attacked, and from that household the disease spread rapidly through So also, Dr. Neill, of Bear Hill, a very small mining township numbering 261 inhabitants, and situated in a basin among granitic hills 1,400 feet above the sea, says that the first case which occurred there was in the wife of an hotelkeeper who returned from Sydney: she had made a part of the long journey by train, and a woman and child who had influenza very badly were in the same compartment with her; she fell ill after reaching home, and the rest of her household followed; then cases occurred in the adjoining house, and then in the next to that; and so the disease spread to the whole of the isolated village, in which ninety-six cases occurred, distributed among nearly the whole number of households. But all the contributions under Q. 12 (b), 12 (c), and 13, should be read in connection with this point; whence it will be seen that the wide induction already mentioned is illustrated at least as clearly and as frequently as can be expected, considering the rarity with which circumstances allow this kind of observation to be satisfactorily made.

9. The questions now to be examined are those more strictly appertaining to this farther investigation of influenza. They are: What is the mode of communication in detail? Is the infection transmitted from person to person, and in that way alone, as with small-pox; or is it transmitted by the sick to a medium external to the body, and thence taken in by the healthy, as with cholera? Is it capable of transmission in active form upon the air after leaving the body, and if so to what distance? By what channel, and in what form, does it leave the body? In seeking the answers many matters have to be examined, which apparently do not bear directly upon the central point.

10. Comparative Virulence.—Influenza in 1890 consisted in an illness which was recognised and described unmistakably as the same that had been already noticed in other parts of the world by 178 of the 270 contributors to the collective investiga-

tion

tion of that year; but it was described less clearly by forty-one others, while still forty others expressed the opinion that the prevalent disease they had seen did not distinctly differ from ordinary seasonal catarrh. The contributions to the present investigation do not in any case (save one, in which an opinion that there had not been any influenza at all is curtly expressed) hint at any such doubt; all contributors in 1891 are unanimous in regarding the disease as thoroughly Secondly, in not a few instances, contributors who in 1890 said distinguished. that influenza had not visited their towns or districts, now, after their experience in 1891, indirectly modify their statement by observing with reference to questions the answers to which necessitate comparison between the two epidemics, that they cannot make comparison because the disease assumed so mild a form in 1890 that no special note was taken of it. Thirdly, it appears (Appendix I, Q. 5, p. 18) that larger numbers of persons were attacked in 1891, according to the experience of forty-four out of a total of fifty-four who mention this point; and then, fourthly (Appendix I, Q. 7, p. 19), that sixty-one contributors out of 108 were of opinion that the illness was more severe than in 1890. From all this, it seems certain that the second visitation (or rather recrudescence) of influenza was in all respects more serious than the first.

11. Incidence.—The proportion of the population that was attacked cannot be ascertained. About 32,500 cases were attended (Appendix I, Q. 5, p. 18) by 148 contributors—the average number attended by each was therefore about 219; and, as 148 is more than one-fourth of the total number of practitioners the total number of persons medically attended may have been not more than 120,000 or 130,000. Of course, this calculation is altogether untrustworthy—a larger number may have been medically attended, or a smaller number; but since the epidemic visited every populous place, it seems highly probable that not less than 100,000 (at the least) sought advice. Approximately that would be one-eleventh of the total population, and a very considerable proportion to be incapacitated for a longer or shorter time during about three months. But many contributors expressed an opinion that those whom they attended were but a part, sometimes it is said but a small part, of the total number who were attacked in their districts. So that, notwithstanding that these calculations have little value as regards absolute number, yet they may fairly be taken to indicate a very general infection of the people, and (which is the point here in view) a still more general susceptibility to the infection, at least in the more virulent form which it took in 1891. They also indicate, however, a matter of great importance to any scheme of prevention. The proportion of the total population medically attended has been guessed at one-eleventh; but no doubt a larger proportion was attacked. In other countries the latter proportion has been usually set at from one-fourth to one-third at least (and, for instance, in the case of Bear Hill quoted above, the proportion actually was about one-third). Now the difference between the proportion medically attended and that attacked must chiefly consist of persons who were decidedly ill, but not so as to be obliged to seek advice; and if that difference be approximately expressed by the difference between one-eleventh and one-fourth, then the difficulties attendant upon any scheme of notification that might be propounded would be seen to be serious, or even altogether fatal to it. They point also to this, which it may be as well to mention here. Influenza is very often indeed a serious illness—for instance, in about one-third of the total cases, since (it is thought) such a proportion had to seek medical assistance: necessarily it is from these latter that descriptions of the disease are compiled; and therefore those descriptions draw, necessarily also, a blacker picture of influenza than full knowledge of all the circumstances would warrant. The disease does, in a proportion of all cases, cause serious and even fatal disorders both of body and mind, and it has those effects in a large proportion of neglected cases; but upon the whole it seems that the chances that any individual of ordinary prudence who catches influenza will suffer serious damage therefrom must be but small.

12. Incubation Period.—This general susceptibility to the disease is not sufficient alone to explain the rapidity with which it spreads; for, in comparison with other infectious diseases, it has spread rapidly here, and elsewhere on other occasions it has spread even faster still. This feature is due mainly to the short incubation period, which is now generally taken to average two days. The fifty-two contributors who deal with this point (Q. 13, p. 35) support a similar conclusion. Many good and interesting cases will be found among their notes; but this matter is extremely difficult to observe—that is to say, suitable opportunities rarely present themselves. Class IV,

into which four out of nineteen selected cases have been thrown, contains three in which the moment was noted at which the infection was believed to have been received; and the intervals between it and the beginning of illness were forty-eight, forty-two, and thirty-one hours respectively. All three of the subjects had been exposed to risk from other sources of infection, with which two of them certainly, and the third probably, did come into contact, besides that fixed upon as the probable source for them; but the cases have a certain interest, since the symptoms supervened after an interval which on other grounds is thought to be common.

13. Influence of Age, Sex, Occupation, Environment, and Natural Resist--Of a disease which is so extremely contagious that it spreads over whole countries and attacks the inhabitants in the large proportion just referred to, it may well be asked how it happens that any at all escape, as many certainly did. sex, occupation, and environment, are all of them matters which influence liability to contract the infectious fevers; some of the latter also confer protection against second attacks by themselves. In the case of all of them, the resistance of the body is usually sufficient to destroy the cause when it is introduced to the healthy system; but to this last statement there is an exception, dependent from the dose introduced, and sometimes from the manner in which it is introduced. As to Sex, there is no evidence (Q. 10, p. 21) that it has any controlling power at all. As to Age, forty-six contributors out of 107, thought that children were less likely to be attacked, and eleven of them thought they suffered less severely when they were attacked; the other sixty-one, while answering the question more or less fully in other respects, do not mention this point. Besides these there were thirty-four who replied merely that they had noticed nothing regarding the influence of age. experience of the Public Schools shows that children can suffer, but it is not capable of revealing the proportion; for in many cases, when parents are laid up the children are kept at home. The opinion of the forty-six represents their clinical experience—that is, it was formed among that part of the population that was There are several reasons why attacked, and that was obliged to seek advice. children should have formed but a small proportion of those medically attended. Upon the whole, it remains quite doubtful, from this evidence, whether age has any controlling influence on liability to attack or not; and the generally accepted opinion in former times was that it had none. Occupation and Environment (see Q. 11a and 11b pp. 22-3) have not been shown here more than elsewhere to influence liability. Their effect seems at most to be but indirect. It has been generally observed that aggregation of persons in small and ill-ventilated spaces favours spread of the disease, and occupations which have that effect will, therefore, seem to predispose to it. Environment has a direct effect on spread of the infectious fevers only when the latter depend on the presence of filth (cholera, typhoid fever) or on a filthy air produced by overcrowding unventilated spaces (typhus). In other cases it acts by depressing the powers of natural resistance; and there is no evidence that it acts otherwise in the case of influenza. Bad ventilation, and the proximity enforced by over-crowded rooms or workshops, would, of course, tend to bring the infection cast off by one person into contact with the rest; and this is an indirect effect of environment. On the other hand, although cleanliness and good ventilation may probably tend to make spread more difficult, yet they are no sure protection; and to prove this it is enough to refer once more to the experience of that isolated mining village, Bear Hill, where the dwellings are mostly slab-huts, where the population is small and sparse in comparison with the occupied area, where natural drainage is good, food sufficient, and water abundant, and where dangerous accumulations of filth do not exist. Both ventilation of dwellings and perflation of the township are thorough; yet there the disease spread until nearly every household, and one-third of the total inhabitants, had been attacked in the course of about two Then Natural Resistance must have saved some, and perhaps many; and yet from several sets of answers (Q. 11d to 13, pp. 24-37) it appears that exposure to the sick at close quarters was a most important factor in determining Accounts of communication of the disease under the condition which most clearly is favourable to the transfer of infection from person to person are so very numerous, that it seems as though that condition sometimes imposes a strain upon the natural power of resistance which the latter is as little able to support in the case of influenza, as it is in vaccinia or small-pox when the virus of those diseases.

diseases is inoculated. But whether that strain be due in the present instance to enormity of dose, or to a special mode of introduction of the virus, cannot be as yet discussed.

14. Fomites.—On the highly important point of possible spread of influenza by infected articles, this investigation contributes scarcely anything. Under 12c, D, 40 and 66, something will be found, and Appendix V supplies something further. It is to be regretted that opportunity should not have served for collection of many instances of a mode of communication which is strongly probable at the least, and which, in all likelihood, would be an important factor at the present day of pandemic extensions.

15. Protection by former attack.—How many derived protection from having undergone a former attack is not a question to be asked until it has been agreed whether any at all were so protected (Appendix I, Q. 11d 1, and 11d 2, pp. 24-8.) Several details are established by the answers touching this matter, but the main question is not settled. Thus it is made quite certain—(a) That persons who have been attacked, and about the third day are apparently convalescent, but still in bed, may suffer a second attack beginning about the third day, and in every respect like the first, unless as often happens it should be more severe; (b) that persons who have passed through an ordinary attack, and who, being free from all "complications" are convalescent, or even have actually resumed their usual occupations, may after from fourteen to twenty-one days suffer a second time exactly as they did at first; (c) that persons who have entirely recovered from a first attack may suffer a second, two or even four months afterwards; (d) that even three attacks may be suffered within a few months; and, as may now be expected (e) that those who have suffered during one epidemic are very commonly indeed attacked during a second, when that occurs after an interval of about a year. So the absence of protection is proved in a rather considerable proportion of cases by occurrence of a second attack soon after the first; and as second attacks after a longer interval, or, say, after a year, are infinitely more common than they are after a short interval, it may fairly be suspected that the protection sometimes conferred, if any, is but transitory. On the other hand, there is evidence enough that second attacks do not necessarily occur even under circumstances which apparently are unusually favourable to infection. fail to be observed, however, that the weight of such instances is but trivial, and that it is not at all clear that they are probably more numerous than similar instances which show that persons who have never suffered may escape, though similarly In fact, there is here a suggestion that circumstances apparently favourable to infection are not always so in reality—that is, apart from protection and natural resistance: besides, if a special kind of communication between the sick and the well were indispensable, then it would be likely that caution acquired through suffering might cause some persons unconsciously so to regulate their intercourse with the sick as often to prevent that special kind of communication from taking place. But however that may be, it will probably be concluded that if influenza protect at all against itself it does so uncertainly for the one part, and temporarily for

16. Liability to attack, then, seems not to have been modified, either by sex, or age, or occupation, or environment, or (importantly) by former attack; and these conclusions are in accord upon the whole with those which have been drawn elsewhere both of old and more recently concerning the same factors. stage now reached may therefore be stated as follows: Influenza is a disease that can be communicated from person to person; susceptibility to it is very general; the reason seems to be that the conditions which contribute to protection from other infectious diseases have but little influence over it, and accordingly it actually does attack a large proportion of invaded populations; yet in the present example a majority escaped, small though it may have been—probably more than half, at all The infection is easily communicated because nearly half suffer: why, then, do more than half escape? If the modern notion which has been frankly avowed by a few, and which is clearly borne in mind by many others be sound, namely, that although influenza can be communicated by the sick to the healthy direct, yet that the infection is widely air-borne from the sick as well,—how can more than half of a population escape infection since they are practically without defences of the kinds which can save them from typhoid or from small-pox? Instead of continuing to regard large populations, let it be inquired next what the course of

events is in households when the disease enters them by a single member. (Q. 12a. p. 28.)

17. It has already been seen (par. 8 ante) that in isolated places the beginning of the epidemic has so often been by the entry of a case of influenza from which continuous spread throughout the community has been watched, as to justify a surmise that whenever circumstances permit it will be found that this constitutes the main means of spread between towns, &c. If that be so, then the same should be the main means of spread between households within towns; and accordingly among the ninety-seven answers to a question designed to elicit the fact, many are found in which the beginning of household outbreaks is ascribed to the arrival of a person who has contracted the disease outside. Either the member first attacked has been one whose occupation caused him to be exposed to the unseen dangers of crowded places, or rooms, or railway carriages, or else who has visited a sick friend. And if the main means of communicating the disease from household to household be importation by the infected, then within households the disease should pass from member to member until all or nearly all have suffered (unless strict isolation be practised). Accordingly, again, this also is noticed by many contributors: they say that when the disease has once entered a family it usually runs through it, with exception sometimes of one or two members; and those whose experience lies clearly in that direction are in preponderating proportion to the rest. But there is a considerable number who assert the contrary. They say that the disease in their experience did not generally run through the household; that this was exceptional, and that the difference was not due to isolation of There are several careful contributors who, speaking from such household experiences, even declare that they remain unsatisfied that the disease is communicable at all; and in some cases the reason seems to be that they saw many members attacked simultaneously. The general statement warranted by these answers seems to be that household propinquity conduces to extension of the disease as a rule; but apparently there are very numerous exceptions. That, it is true, is no more than is seen in scarlet fever; but then many members of every family are protected either by age, or by a previous attack. Similar defences against influenza are practically wanting. Its observed behaviour, as an infectious disease, therefore, appears capricious, and certainly is incompatible with the modern theory of aërial spread, even if it be applied only to such short distances as are comprised within the four walls of an average dwelling. It is what happens in epidemics of cholera when a common water supply is specifically contaminated. A special mode of communication must be assumed necessary to the spread of influenza in order to co-ordinate all its phenomena; propinquity alone, although it may be necessary, is insufficient by itself.

18. There is no reason to suppose that any of the excreta are concerned. In every demonstrated case—that is in every positive instance—personal communication with the sick is seen to be necessary, and communication at close quarters (except fomites, which constitute a mode of direct communication); so, the medium of communication must be the secretions. Of these saliva, and the faucial and bronchial mucus are the only ones with which occasional, and probably frequent, contact is certain. Now, it has lately been shown that the bacillus of influenza exists in the cells of the purulent bronchial secretion, and often in an almost pure cultivation. It has also been shown that the disease can be inoculated with it (apes, rabbits); and thence it is clear that this purulent secretion, when it exists, constitutes a means of communicating the infection. But this circumstance, that influenza can be spread by purulent bronchial secretion in the fresh state, does not explain all the points concerning spread here gathered together; for purulent expectoration, when it is met with, is a late occurrence. There is no evidence at all to suggest that influenza is only communicated by persons who furnish that secretion, and by them only after they have reached the stage of illness at which it is usually seen.

19. The bacillus has a manifest predilection for mucous membranes; and since it reaches that of the bronchi late, or after the first stage of the disease has passed, and sometimes, to judge from symptoms, even never reaches it at all, it is apparent that it must first flourish on more superficial tracts. Doubtless this point will soon be directly examined bacterioscopically: in the meantime, since mucous membranes form the nidus for the bacillus, it appears extremely probable upon merely anatomical considerations that the primary infection is by the oral or faucial mucous membranes as a rule; or if sometimes it be by the nasal tract, infection of

the fauces, &c., cannot be long delayed. In consequence, the secretions of the mouth, &c., must be specifically infectious before symptoms of disease have developed, and, indeed, from the earliest moment of infection: and then mere exposure to a sick person would not be enough to infect, for micro-organisms do not leave liquids for the atmosphere even under brisk evaporation, but require splashing to detach them. This happens during coughing, but also while speaking; larger and smaller particles of saliva are then projected into the atmosphere, of which some are weighty enough to fall direct upon the nearest object, while others are minute enough to float upon the air to some moderate distance. In this way the confined air of a sleeping-room, work-room, or railway carriage, might sometimes, and to that limited extent, become an efficient carrier of the contagium; and the evidence in general weighs against there being any more diffuse or subtle infection of the air However, if the contagium can survive desiccation, then the air would doubtless become an efficient medium of communication to a greater, but still to a limited, extent by particles of dried expectoration whether merely salivary from the mouth, or mucous from the nose, fauces, and bronchi. The probability is, that all secretions liable to issue from the mouth, even in the slightest cases of influenza, should be the object of special care; and under this view it would appear to be a misfortune were attention exclusively fixed upon that purulent bronchial secretion of which alone anything definite has thus far been actually demonstrated. For this reason, it is well to repeat that while the contagion spreads from all classes of cases, and as it seems at all stages after the moment of infection, there is abundant clinical evidence that the deeper portions of the lung very frequently escape all serious implication; and therefore, although it is plain that the bacillus finds a suitable nidus in mucous membranes, there is nothing at all to show that the

respiratory mucous membrane is more suitable to it than others.

20. If the bacillus have no real predilection for the respiratory mucous membrane, but merely fixes upon that which it can as a rule most easily reach, then, as has been noticed above, its usual seat must be the digestive tract, and at first in its upper parts. Now, in brief summary, what are the characteristics of simple influenza? Susceptibility to it is very general; sex and age stand in no definite relation to attack, and it confers very little (if any) protection against itself; it is very easily communicated; its incubation period is very The onset is often quite sudden, and when a few hours of malaise precede the more severe symptoms, still suddenness marks the beginning of incapacitating Those severe symptoms are acute headache, myalgic pains, and fever which almost immediately attains its acme; there is prostration of strength, cardiac depression, and sometimes despondency. The attack ends in about fortyeight hours; but the signs of constitutional disturbance which remain are sometimes as marked as they are after other fevers when they have lasted very many days. Convalescence is slow, and commonly attended by neuralgia. Sequelæ are common. They may occur several weeks after recovery has apparently become established; and they consist chiefly in derangements of the nervous system, mental debility, melancholia which ends occasionally in suicide, and late paralyses analogous with those which occur after diphtheria. A disease capable of producing profound and lasting derangements of the nervous system must be liable to serious aggravation by superadded complaints which are consequential when they occur, but not necessary. earlier, and occasionally very acute head symptoms may indeed be due to capillary blocking by the bacillus (which has been shown to circulate in the blood) as in early stages of typhoid fever; possibly some of the earlier pulmonary congestions may own the same cause; and the laryngeal or tracheal cough which is often a prominent early symptom also may be due either to irritation of the appropriate nerves, or possibly to a local irritation of the mucous membrane. But the more serious inflammations of the lung, and its membranes it seems likely [Appendix A, Q. 9, p. 20] may be due to two distinct causes, neither of which could effectually operate but for the preceding derangements which originated during the stage first described above: Namely, first, proliferation of the bacillus itself within the bronchi and bronchioles; but, secondly, and it may be found more commonly, secondary infections essentially different from influenza, and of the same kinds as are seen, for example, in typhoid fever in its later stages. In short, influenza seems on the whole to have analogies with diphtheria, and to depend as a constitutional disease primarily from absorption of bacterial products lying on the more superficial mucous Is it not most likely that such absorption occurs earliest and chiefly from the digestive tract?

21. The object of such inquiries as the present is to ascertain the character of diseases, in order to deduce methods of prevention. Incidentally, they often yield hints useful to the clinician. In this concluding paragraph, therefore, I describe what the teaching of this investigation has been for me; and I point out that here I use the personal form of expression, because others, likely enough, may read other lessons from it. As to prevention, I refer to the circular issued by the Board on 10th February [Appendix IV] in order to observe that there is nothing of importance to be But I believe reason for laying more stress upon some points has now been shown than was apparent at the date of publication. The characteristics of the disease which have been suggested above may be summarised, as regards communicability, as follows:—Influenza spreads from the sick to the healthy; it passes from the sick to the healthy direct; it spreads by such direct communication only; and the secretions of the mouth and lungs furnish, for all practical purposes, the means of communication. Against a disease which spreads only by direct communication of its infection from the sick to the healthy, isolation of the sick on the public scale is often useful; and at first sight it seems that it could be practically employed in the present instance, since it is abundantly clear that epidemics of influenza really begin by few and scattered cases, to deal with which municipal and central authorities could easily fit themselves—easily, that is to say, as long as mere But these are very far from comprising the mechanical organisations are in view. whole business. Notification of the cases as they arise is an essential preliminary; and I believe that no one who has had practical experience of the difficulty there sometimes is in getting early notification of several diseases which are manifested by conspicuous signs and symptoms, and whose epidemic march is slow, will pretend that the same method could possibly be effectual against a disease which in a considerable proportion of cases never becomes easily and certainly identifiable, which is often so slight in its effects as to escape serious notice even by the patient himself, and which spreads with remarkable rapidity. Under these circumstances, notification and isolation as a public defence must be abandoned. The resource is to make the essentially contagious character of influenza as widely known as possible, in order to encourage the practice of such domestic isolation as ordinary dwelling-houses may permit; and in order that persons who understand that they are as much under a moral obligation not to spread disease as they are to avoid injuring their neighbours in any other way, may abstain from resort to public places (vehicles, meetings) as soon as they feel ill during a time when influenza is prevalent, from paying visits, from receiving visitors, from sending their children to school, and so forth. Upon the need for such measures, and that more frequent insistance publicly upon the simply contagious character of this disease would procure observance of them in an important and increasing number of households, I believe all will agree. But, in my opinion, great stress should be laid upon the infectious character possessed by the secretions of the mouth and lungs, so that people in general may be brought to understand the high importance of avoiding contact with them. And in order that they may be avoided, several things that seem necessary may be mentioned here. Thus, as a precaution (of important use apart from influenza, and already a matter of good manners for that very reason), care should be taken not to speak at close quarters, to cover the mouth while coughing, and not to spit upon floors and pavements, where the expectorated matter dries, is broken up into dust, wafted upon the air, and then may be respired by others, whom, if it proceed from an infected person, So also those who are known (or, indeed, suspected) to be suffering from influenza should avoid going close to, and especially speaking close to, the healthy, and should not enter public vehicles or places of public meeting; they should furnish themselves with a vessel to spit into containing a disinfectant, such as is recommended in the Board's circular Rules for Disinfection, 1889, for use by consumptives; and their handkerchiefs (which should be frequently changed, so as never to have time to dry) and their linen should be steeped in a disinfectant before being sent out of the sick-room, or to be laundered. So also the interchange of demonstrative signs of affection which is usual between members of the same family should be pretermitted—a precaution already commonly taken by prudent people against colds and against herpes of the lip, and especially to be commended in the case of so serious a disease as influenza very often is. And, as to domestic isolation which so often is difficult or even impossible, a useful measure of it would be comparatively easy to attain if attention were centred on complete separation from the common household stock

stock of all utensils used by the sick, all surplus food that has been served to him, and of all linen, than if it were vaguely directed to some ill-understood general proceeding. These appear to me to be the points of most practical importance: I think that they should be made widely known to all public bodies, institutions, and offices, and by all municipal corporations to the people; and I should expect better results from such an educational influence in the present case, than from any law alone. Yet, in a matter of detail, it does seem that a legal enactment might prove of service. It might be made penal upon employers to allow any servant to continue at his work if the occupation were such as to bring him into direct or indirect communication public (the latter, because there is evidence to show that the contagion of this as well as of several other diseases can be carried by goods, &c.); for any person to expose himself in a public place, or vehicle; to admit any person to premises without warning him; or to send any person from premises to a public place—while suffering from, or while there remained on such premises any case of, dangerous infectious disease (under which influenza should be specifically mentioned by name), or until such premises had been disinfected to the satisfaction of some persons publicly appointed. This, it will be noticed, is a very different matter from making influenza compulsorily notifiable. Prosecutions would but rarely be undertaken, and only in very clear cases; and the enactment would serve its chief purpose, perhaps, by effectually drawing attention to the educational effort already recommended to be made in another way. Lastly, since in the course of this study it has gradually appeared to me as a highly plausible hypothesis that the most important operations of the influenza bacillus in the body are carried on in the digestive canal, I wish to point out its practical bearing upon treatment. I do not mean that the most important effects of the disease are there felt; that is often not the case, even when an attack has taken the gastro-enteric form; but it is unnecessary to say more upon this head than has been written in preceding paragraphs. The indications thus thrown into prominence are two, namely: evacuation first, and then disinfection of the prime viæ; of which the former was recognised as a mode of treatment, and successfully acted upon, a hundred and fifty years ago. But a condition attaches indispensably and obviously to this method; above all things treatment must speedily follow upon attack.

I have, &c.,

J. ASHBURTON THOMPSON.

APPENDIX I.

THE Board having decided that inquiry should be made into the occurrence of influenza during 1891, in continuation of the Report already made upon the epidemic of 1890, and ordered by the Legislative Assembly to be printed December 10, 1890, I drew up the following schedule of questions and accompanying

"A FRESH epidemic of influenza having occurred during the present year, I have the honor to inform you that it is proposed to resume the collective investigation of 1890, with co-operation of the medical profession in N.S.W., and to furnish a copy of

resume the collective investigation of 1890, with co-operation of the medical profession in N.S. W., and to furnish a copy of the result to each contributor as before.

On the present occasion it is assumed that the distinction between epidemic (or seasonal) catarrh and influenza (an epidemic fever) is beyond risk of confusion.

It is necessary to frame questions, otherwise the information contributed cannot be abstracted or tabulated. But it is not necessary that every contributor should answer every question: those only should be answered touching which he has recorded facts, or has already been led to form an opinion. On the other hand, it is hoped that any important observations may be communicated, even if they seem not to be referred to in the questions.

Outbreaks of influenza in isolated places and households can furnish information valuable to elucidate communicability and incubation.

But it will be remembered that the weight of any such observation depends entirely upon the accuracy with

and incubation. But it will be remembered that the weight of any such observation depends entirely upon the accuracy with which the facts have been recorded, and upon the care taken to exclude fallacies—of which the sources are generally over-

booked by the laity until they have been reminded of them by close questioning.

Contributors who practise in sheep-country are earnestly requested to continue their remarks upon shearing-shed fever, both by itself and in comparison with influenza?

INFLUENZA EPIDEMIC, NEW SOUTH WALES, 1891.

(The questions to be answered with reference to your own practice.)

- At what date do you fix the termination of the epidemic of 1890?
 At what date do you fix the commencement of the epidemic of 1891?
 To what extent was the interval between the two epidemics marked by the occurrence of sporadic or rare cases?
- At what date do you fix the close of the 1891 epidemic?

CLINICAL.

5. Was the degree of incidence of the disease upon your clientèle different in the two epidemics?
6. Can you mention (a) the number, or (b) an approximate estimate of the number of cases attended by you in 1891?
7. In what respects (if any) did the clinical course of the disease in 1891 differ from the clinical course in 1890?
8. Have you administered emetics at the onset of the disease, and if so with what effect upon its course?
9. As to the symptoms that are commonly called "complications" and "sequele"—Are you of opinion that these are accidental in reality? Do you consider that influenza may be a remittent disease; a period of apparently-beginning recovery being normally followed by a recrudescence with fresh symptoms, apart from some new, not specific, excitant (such as is implied by neglect to nurse, &c.)?

ETIOLOGICAL.

10. Have you observed anything as to the influence of sex or age upon liability to attack?
11. Have you observed anything as to the following matters regarded as disposing to or protecting from attack:—

(a) Occupation (indoor, outdoor, trade, &c.)

(b) Environment (housing-ventilation, cleanliness; personal habits-food, &c.; locality-dry or wet soil, presence of filth, &c.)
Disease (1, acute specific; 2, chronic).

- (d) Former attack (enumerate cases in which attack in 1890 was followed by attack in 1891, and cases in which the same person was attacked more than once during the same epidemic, stating clearly whether both attacks were witnessed by yourself. Mention any good case in which a person who had already suffered and recovered escaped second attack, although specially exposed to infection. Note the interval between repeated attacks in the person who had already suffered and recovered. the same person).
- 12. What is your experience of communicability as illustrated by-

(a) Large households (in town or elsewhere; mention relation of subsequent cases to the first in point of time and number; result of any attempt made to isolate the first case with a view of protecting the rest of the household; or of isolating any member of an infected household with a view of protecting him from attack).
(b) Isolated households (mode of introduction, subsequent spread therein, and time-relation of such outbreak to progress of the epidemic in the district. If in any such case the mode of introduction could not be discovered, mention whether very careful inquiry was made as to tramps, chance visitors, receipt of parcels, letters, &c., and the value to which a negative result is entitled in the opinion of the contributor).
(c) Villages, &c. (as to commencement of epidemic therein, history of first case, subsequent progress, &c.)
(d) Influence of public meetings (church, school, &c).

13. Incubation.—Relate any good cases illustrating the length of the incubation period on the hypothesis of communicability, bearing in mind that the secondary cases may in some instances have been exposed to a source of contagion other than that to which attention was directed, and specifically stating that this source of fallacy either was excluded, or could not be certainly excluded.

14. In your neighbourhood was the course of the epidemic after it had begun steady (as to progressively increasing prevalence

14. In your neighbourhood was the course of the epidemic after to had begin steady (as or progressively increasing protection to an acme followed by a steady decline) or fluctuating?
15. Did the epidemic progress appear to you to be accelerated or retarded by any meteorological condition, such as wind from any particular quarter, wet, drought, heat, cold, &c.?
16. During the epidemic period was the usual course followed by cases of surgical injury with breach of surface, and of surgical operation, or was it varied from in any way?

ADDENDA.

(a) Any special observation—
(b) As to shearing-shed fever—

These circulars were sent out in December and January to 561 medical practitioners, being the total number known to reside in New South Wales. The number returned was 148 (a few more arrived too late to be included herein); no application beyond the first was made.

At the same time the medical officers of some public institutions received copies of the following

letter, and of a form which it is unnecessary to reproduce here, in addition to the schedule of questions above-mentioned. The replies to this special communication form the subject of Appendix II.

"Having decided to continue the collective investigation touching influenza, which was begun during 1890 and reported upon towards the close of that year, I now have the honor to request your attention to the enclosed papers.

One paper is a copy of that which has been forwarded to all medical practitioners; it is intended to serve you as a memorandum. The other is an example (which can be extended as required) of the form in which it is desired you should make a numerical return.

The communicability of influenza being now established, perhaps the mode in which communication takes place is the point to which attention may be most profitably turned; and that may be mediate or direct, or both; and if mediate, it may be by way of air, soil, or ingesta, separately, or in several combinations, &c., &c.

From

From institutions, or departments of institutions, to which the number of admissions day by day is very small, something may be learned as to the influence of surrounding circumstances (local, meterological, &c.) in favouring or retarding spread. You will doubtless be able to furnish valuable clinical notes also; but the general form of your report is left entirely at your discretion, with exception of the numerical return already mentioned."

The method adopted in dealing with the answers to the general circular was as follows: As the replies came in they were numbered consecutively, but in two series; one comprised the replies from the metropolitan district, the other those from the country districts. All the answers to each question were then gathered together, the number mentioned being prefixed to each answer. Each set of answers was classified; in many cases they were then analysed; and finally a comment or criticism was written upon each. By this arrangement the comments may be read first; if then it be desired to see what sort of evidence they rest upon the analyses and lists can be consulted, in which either the contributors' own words or sometimes an abstract of their words will be found. In the report proper little is mentioned besides conclusions, it being assumed that acquaintance has been already made with the subject of report.

QUESTIONS 1, 2, 3, and 4.

- 1. At what date do you fix the termination of the epidemic of 1890?
- At what date do you fix the commencement of the epidemic of 1891?
 To what extent was the interval between the two epidemics marked by the occurrence of sporadic or rare cases?
- 4. At what date do you fix the close of the 1891 epidemic?

Note.—The questions to be answered with reference to your own practice.

Before judging of the general effect of the evidence given above, it should be observed that for the present purpose the metropolitan district must be taken to represent one locality. In reality it covers an area of irregular shape which measures 256 square miles; but a circle having a radius of four could be so drawn as to include all that part of it which is thickly populated, and from which the information given in Table A was supplied. Such a circle would have a superfices of about 50 square miles, and would carry 365,000 of the total population; and within it would be included the city proper, which has an area of 4.29 square miles, and a night population of 109,000. This latter, of course, is the centre for business; and to and from that centre the effective male population within the circle ebbs and flows daily, while a considerable proportion of the female population probably visit it (say) in the course of each current week. Then with regard to the country towns and districts, and the distribution of population over them, the general statement that the province measures 310,000 square miles, and is inhabited by something like 1,100,000 people is quite inadequate to the present purpose. Of course there are remote townships central to immense pastoral districts and not readily accessible, and of course there is a very sparse population scattered over thousands of square miles around them. But the greater part of the total population reside upon an area which is small compared with the total area of the province, and by railways, coach-lines, rivers, and the sea, are able to travel so easily that even that smaller area is for effective purposes still further reduced. Travel, and over very long distances, is exceedingly common; especially there is a constant circulation of commercial travellers as well as of exceedings of hypinary and the real square of hypinary and the various country towns and districts. The details given in Table I show that 55 out of a total of about 200 practitioners in the metropolitan area, met with their first cases of influenza in 1891 on various dates, of which the earliest and the latest are separated by so long an interval as 147 days; or, if it he taken that the three earliest entries do not refer to the period of general prevalance—as they containly various dates, of which the earliest and the latest are separated by so long an interval as 147 days; or, if it be taken that the three earliest entries do not refer to the period of general prevalence—as they certainly do not—then by so long an interval as 68 days. And it appears further that the number of first cases reported upon those 68 days were few and scattered at first, increased in frequency thereafter, and again became few and scattered as the latest date was approached. Then from the answers to Question 4 it is plain that there was no sudden cessation of the disease; it disappeared irregularly as it had come, though more quickly. The endings assigned to the epidemic of 1890, in answer to Question 1, tell the same tale of gradual disappearance. In Table B similar observations taken in country towns and districts are recorded. They show that the spread of the disease over the country as a whole was not same tale of gradual disappearance. In Table B similar observations taken in country towns and districts are recorded. They show that the spread of the disease over the country as a whole was not only gradual, but extremely irregular; it spread to fresh and fresh places during a period of 145 days, or if, as before, the earliest entry be excepted, then over a period of 125 days. The number of newly-invaded places was few in August, more in September, and few in October; and if the earliest and latest invaded places was few in August, more in September, and few in October; and it the earliest and latest dates do not refer in reality to the beginning and end of the period of prevalence in the places to which they apply, but to laggard cases and rare forerunners, that only emphasises the general import of the Table. There is another point that demands notice. These returns are furnished for the metropolitan district by about one-fourth of the total number of practitioners, and for the country districts by about one-fourth also; the return is therefore imperfect, and the question arises, what difference its completion would make to its import as it stands. It might add a good deal of interesting information, and very likely some of importance. But it could not alter the fact already stated, that the spread of the disease was so far gradual that contributors practising in the same place met, both with their first the disease was so far gradual that contributors practising in the same place met both with their first and their last cases at widely different dates, and that contributors who lived in different parts of the country, had just the same experience; it could not alter the recorded fact that the epidemic spread and ended gradually.

But one inference from these data is possible: It is that influenza spreads by communication of its cause from the sick to the healthy.

QUESTION 3; FARTHER ANALYSIS.

3. To what extent was the interval between the two epidemics marked by occurrence of sporadic or rare . cases? (For data see Tables A and B.)

METROPOLITAN.

- METROPOLITAN.

 18 contributors replied that they had met with no cases during the interval.

 19 others replied in doubtful words as "none, seasonal catarrh common"; "may have had a sporadic case or two"; "do not recollect any"; "did not notice any genuine cases," &c., &c.

 6 replied that they had seen cases, but without fixing the dates about which they occurred, as follows: "Two cases both slight"; "but very slightly in my experience"; "I think I saw only two real cases between"; "attended some, but very few, undoubted cases"; "cases very rare"; "I met with only a few cas. s."

 3 contributors noticed cases during the first part of the interval:—

 27. Yes; very scattered up to the middle of January, then no more until October (when the second epidemic began).

 17. A very few, especially during the first part of the interval.

 23. Very slightly at the beginning of the year (1891).

6 contributors noticed cases during the latter part of the interval:

10. None until June, July, and August, when a few occurred.

44. A doubtful case in June, another in July.

20. Several cases, beginning on July 10.

53. Saw one well-marked case on July 31, no others.

26. Cases began to show from August.

11. None until August, then a few.

1 contributor observed rare cases throughout the interval:

6. Saw about one case every month.

COUNTRY.

Country.

24 contributors replied that they had met with no case during the interval.

15 others replied in doubtful words, as "sporadic cases were neither more nor less frequent than usual"; "practically none"; "saw none"; "I have noticed very few if any"; "no distinct cases"; "nothing unusual," &c., &c.

9 replied that they had seen cases, but without fixing the dates about which they occurred, as follows: "A few cases kept coming in from the surrounding country"; "not to any large extent"; "very rarely had a case between"; "never without cases of influenzoid character"; "an occasional case"; "cases were very rare between the epidemics"; "during the interval I think four or five cases came under my notice"; "to no marked extent; nine cases during the last four-teen days of September (the beginning of the epidemic in this place is fixed at October 1)"; "very slightly."

3 contributors noticed cases during the first part of the interval:—

75. Constantly saw cases until the end of 1890, then no more until October (when epidemic began).

77. Stray cases continued to occur until the end of January, 1891, after that none (until September 5, when epidemic).

4 contributors noticed cases during the latter part of the interval:—

2. About five, beginning in July, 1890 (but then epidemic began).

50. 3 cases observed between August 24 and September 7.

52. In September and October a few doubtful cases occurred, some typical.

64. A case occurred in town on September 9; then another occurred on September 17, and a third on October 25, both these last cases being traced to infection received at Gulgong and Gunnedah, respectively (the epidemic began on October 25).

October 25).

1 contributor observed rare cases throughout the interval:—82. Not more than 20, pretty evenly distributed.

The answers to this question were 109. Forty-eight contributors replied that they had seen no cases during the interval. Fifteen others spoke more or less clearly of having seen cases infrequently, but without mentioning any particular date. The remaining replies can be divided into three classes of positive answer. Six saw cases during the fore-part of the interval, or (say) down to the end of 1890. Ten, a rather larger number, only began to meet with cases towards the end of the interval; that is to say, from June, but generally from a slightly later date, 1891; in two country towns (2 and 64) some of such cases seem not to have belonged to the interval, but to have been fore-runners of the second period of prevalence which continued with the latest of them. Then two observers, one metropolitan and one country speak of having seen a few cases equally scattered over the whole interval. one country, speak of having seen a few cases equally scattered over the whole interval.

Upon the whole it is apparent that the behaviour of influenza here has been that of other diseases which spread by direct communication from the sick to the healthy. The more susceptible having suffered in 1890 mainly within a period of three months, the infection continued to smoulder for long The more susceptible having after the great outburst; probably it smouldered continuously until favouring circumstances introduced it once more among a large susceptible population, when a fresh outburst occurred—and if the Answers 6 and 82 be accepted at their face-value, this actually did happen; but if not, at all events the second outburst was preceded by a gradually increasing number of scattered cases, whether continuous from the outburst of 1890 or freshly imported, until by travel, &c., the contagium was re-introduced in a sufficient number of populous places to cause a re-infection of the whole country.

QUESTION 5.

5. Was the degree of incidence of the disease upon your clientèle different in the two epidemics?

Forty-four replied that it was greater, nine that it was the same, one that it was smaller; country and metropolitan districts being taken together. There were many more answers than these; but the question was often misunderstood, "degree of incidence" being mistaken for "severity of illness."

QUESTION 6.

6. Can you mention (a) the number, or (b) an approximate estimate of the number of cases attended by you in 1891?

The total number of cases which the 148 replies represent was about 32,500. Rather more than a third were attended by contributors who lived in the metropolitan district. This information has value, and is occasionally referred to below.

It would be an important thing, from several points of view, to discover the number of persons actually attacked during an epidemic. This, however, is not possible at present; whether any practicable organisation could be devised for the purpose is a question which involves points elsewhere discussed. But the general opinion seems to be that any estimate based upon such data as the above must fall very far short of the truth; the persons who sought medical advice are believed to have been but a proportion of those who suffered. On the other hand, however, it follows therefrom that any clinical picture of influenza which it may be possible to compose with the present material, must, strictly speaking, represent the worst class of cases—those, namely, that necessitated medical advice by their severity.

Question 7.

7. In what respects (if any) did the clinical course of the disease in 1891 differ from the clinical course in 1890?

The following differentiating points were mentioned in the frequency shown below:—

•	Sydney.	Country.	Total
The symptoms in general were more severe	32	29	61
Greater prostration afterwards	5	9	14
Complications were more serious or more frequent	9	8	17
Duration of illness was longer	4	6	10
Depression was greater	2 .	. 2	4
Convalescence was more protracted Relapses were more common	5	7	$1\bar{2}$
Relapses were more common	2	4	10
The lungs suffered oftener	$2\overline{4}$	18	42
The lungs suffered oftener A high temperature was more suddenly attained	1	,	ī
There was higher lever as a rule,	ī	6	7
The onset was more sudden	ī	3	` 4
Irritation of larynx, pharynx, or trachea, commoner	$\tilde{3}$	ĭ	$\tilde{4}$
Gastro-intestinal symptoms were commoner and severer	10	4	14
Nervous system more frequently and severely attacked	4		4
Heart-failure commoner	$ar{2}$		$\hat{f 2}$
Absence of corvza more marked	4	2	$\bar{6}$
The disease was better defined		$ar{f 2}$	$\overset{\circ}{2}$
The attack was less sudden	•••	$\overline{2}$	$\overline{2}$
Rigors were less common		ī	ī
The fever ran lower		ĩ	ī
The febrile period lasted longer		$\hat{f 2}$	$ar{f 2}$
There was usually delirium		3	3
The cervical vertebræ were tender in every case		ĭ	ĭ
Pains in eyes and photophobia were less common		2	$\hat{2}$
Coryza was present more often		ĩ	ī
The disease was more contagious	•••	i	î
There was no material difference	4	$\hat{2}$	6
The onset was less sudden	$\hat{2}$	~	2
	_	•••	_

There were 108 answers to this question—fifty-one from the Metropolitan District and fifty-seven from Country Districts. Sixty-one contributors thought the symptoms in general were more severe; fortytwo of them thought that pulmonary complications were commoner; seventeen thought that "complications" were more serious and more frequent—but the word seems generally used to indicate pulmonary affections; and so forth, as shown in the analysis above.

It has already been seen that the disease was more prevalent in 1891 (vide Q. 5 supra); it now appears that it was more virulent as well.

QUESTION 8.

8. Have you administered emetics at the onset of the disease, and, if so, with what effect upon its course?

There were 137 answers. 126 replied that they had not, but eight of them qualified their answers as follows:

- 20. No; but a strong purge diminishes the severity of the attack.—Dr. Norrie, Sydney. 52. No; many had spontaneous bilious vomiting at the beginning, and the effect was probably beneficial.—Dr. Muskett, Sydney.

- Sydney.
 11. No; but free purging was useful.—Dr. Alcorn, E. Maitland.
 22. No; vomiting was a prominent and early symptom in most cases.—Dr. Mallam, Armidale.
 30. No; few cases were seen sufficiently early.—Dr. Wilson, Bowral.
 40. No; the invasion was often accompanied by vomiting in children.—Dr. Orr, Maclean.
 66. No; unless kermes-mineral may be classed as an emetic, which I found answered admirably in the early stages of pulmonary complications.—Dr. Finlay, Young.
 77. No; when the intestinal tract seems principally affected, two or three six-grain doses of calomel were given to adults on the first day, and invariably seemed to cut the attack short.—Dr. Colpe, Nymagee.

Eleven replied that they had given emetics, as follows:

- Eleven replied that they had given emetics, as follows:—

 13. Once; it caused severe depression —Dr. Johnson, Burwood.

 48. Only on two occasions. The exhaustion following was too severe to justify risking it again.—Dr. Jarvie Hood, Sydney.

 62. Three times with good effect. I used them because I observed that cases which had spontaneous vomiting were favourably modified.—Dr. Newmarch, N. Sydney.

 43. Yes; five times, and with good results; recovery was hastened. (a) F. aet. 50; ill two days, very foul tongue, nausea, temperature 103.2, anti-pyrine useless; gave a scruple of sulphate of zinc, and another scruple 10 hours later; was much relieved, and when seen on the morning of the 4th day the temperature was 99, and tongue cleaning. (b) The course of the disease was apparently cut short by the same treatment in a child of 9 years; convalescence was much longer in four other cases in the same household who were otherwise treated. (c), (d), and (e): I gave emetics in three other cases after this with extremely foul tongue, without any other medicine; I found the temperature fall very rapidly, almost at once, the headache relieved and the tongue cleaned. Lung symptoms were present in all five cases, but were not severe in any of them. None got the emetic before the second day, and all the cases occurred late in the epidemic.—Dr. Cummings, Annandale.

 2. In own case only, and I was nearly well the next morning. Was generally not called in early enough.—Dr. Hart, Gunning.

- 2. In own case only, and I was nearly well the next morning. Was generally not canculin early enough.—Br. Hale, Gunning.

 15. In a few cases only, and without good results.—Dr. Lemars, Berry.

 42. In some instances; results most satisfactory.—Dr. Wren, Waggs.

 51. Yes, in young subjects. It did good temporarily, but I am not aware that any case was shortened in consequence.—Dr. Grigson, Muswellbrook.

 59. Yes; and I noticed that all cases commencing with spontaneous vomiting recovered quickly.—Dr. Bell, Murrumburrah.

 67. Once; the vomiting aggravated the head-symptoms, and had no effect on the disease.—Dr. Malcolm, Helensburgh.

 76. In two cases I did; in one with very marked benefit, in the other with benefit, but not quite so rapid. The first had a strong constitution; the second was weak and dissipated.—Dr. Breton, Wentworth.

The reasons for making this inquiry are mentioned elsewhere. (See also Additional Observations, D. p. 41.)

QUESTION 9.

9. As to the symptoms that are commonly called "complications" and "sequelæ"—are you of opinion that these are accidental in reality? Do you consider that influenza may be a remittent disease, a period of apparently-beginning recovery, being NONMALLY followed by a recrudescence with fresh symptoms, apart from some new, not specific, excitant (such as is implied in neglect to nurse, &c.)?

There were 117 answers, of which the following is a classified abstract:-

METROPOLITAN.

```
Not remittent; but implication of lungs not always due to neglect.
 Not remittent
 Not remittent.
 Not remittent.
 Not remittent; but relapses were frequent.

Not remittent; secondary rises of temperature only attended complications.

Not remittent; but there was often recrudescence of the disease apart from any (non specific) excitant.
Not remittent; out onere was often recrudescence of the disease apart from any (non specific) excitant.

Not remittent; complications a part of illness, but might be precipitated or determined by indiscretions.

Not remittent; and the complications were accidental.

Not remittent; and the complications were accidental.

Not remittent; and the complications were accidental.
 Not remittent; and the complications were accidental.
Not remittent; and the complications were accidental.

Not remittent; and the complications were accidental.

Not remittent; and the complications were continuous with the attack.

Not remittent; complications were due to indiscretion (two cases only).

Not remittent; and congestion of extreme base of lungs always present.

Not remittent; and the sequelæ were not accidental.
Not remittent; and with due care the progress of the disease was regular from onset to recovery.

Not remittent; a secondary rise of temperature occurred only attendant on complications, and the complications were
             specific.
 Not remittent; complications were a continuation of the disease.
 Not remittent; complications were a part of the disease.
 Not remittent.
 Not remittent; the worst cases were in people who had not sought or who did not follow advice.
Not remittent.
Yes; type distinctly remittent.
Yes; remittent in many cases, but sequelæ often due to indiscretion.
Yes; and lung-trouble followed in all cases, but could be aggravated by indiscretion.
Yes; may be a remittent disease.
Yes; strongly of opinion that the disease is remittent in type.
Yes; I consider it may be remittent.
Yes; is really a remittent disease. In nearly all cases of adults that were carefully watched a recrudescence of all the symptoms took place, although there had been no indiscretion, &c., at all.
Yes; may be remittent; complications are as much a part of the disease as cardiac inflammations are of scarlet fever.
Yes; but the complications are due to indiscretions.
Yes; appears to be remittent in some cases.
Yes; many cases were undoubtedly so.
Recrudescences were sometimes not due to indiscretions.
Complications are a part of the disease, but more likely if indiscreet.
Complications could not be averted by care.
 Not remittent
 Complications could not be averted by care.
Complications did not occur with care; and there were few relapses.
 Complications and sequelse may arise in spite of all care, but are brought about by want of care. Sequelse were observed in the best-nursed cases. Sequelse were observed in the best-nursed cases.
 Sequelæ were continuous with the disease.
Sequelæ were usually due to indiscretion.
Sequelæ were accidental.
 Sequelæ were accidental.
                                                                                                                                                                        COUNTRY.
 Not remittent.
Not remittent.
  Not remittent.
  Not remittent.
  Not remittent; complications due to indiscretion.
 Not remittent; complications due to indiscretion.

Not remittent; complications present from the beginning.

Not remittent; complications due to indiscretion.

Not remittent; complications a part of the disease.

Not remittent; complications entirely due to indiscretion.
 Not remittent; complications entirely due to indiscretion.

Not remittent; complications sometimes, not always, due to indiscretion.

Not remittent; complications principally due to indiscretion.

Not remittent; complications due to indiscretion.

Not remittent; and sequelæ not a part of the disease.

Not remittent; and the sequelæ not a part of the disease.

Not remittent; and sequelæ not a part of the disease.

Not remittent; and the complications are a part of the disease.

Not remittent; and complications are due to indiscretion
  Not remittent; and complications are due to indiscretion.
Not remittent; complications are a part of the disease.
   Not remittent; complications accompany or immediately follow almost invariably.
 Not remittent.

Not remittent; complications a part of disease, but may be aggravated by indiscretion.

Not remittent; sequelæ are due to indiscretion.

Not remittent; complications and sequelæ are not a necessary part of disease any more than in scarlatina or rubeola.

Not remittent; complications are due to predisposition or to indiscretion.

Not remittent; recrudescences exceptional, complications a part of disease.

Not remittent; sequelæ accidental or extension of original disease.

Not remittent; complications due to indiscretion.

Not remittent; complications accidental.

Yes; probably, and lung symptoms were a part of the disease.

Yes; almost always remittent.

Yes; several cases seemed to be so.

Yes; many carefully watched and nursed cases seemed to remit.
   Not remittent.
                                                                                                                                                                                                                                                                                                                                                             Yes;
```

Yes; it may be, and complications are invariable. Yes; perhaps. Complications were a part of the disease. The sequelæ were headache and night-sweats. Yes; primary fever, recovery, then secondary fever with lung complication. Yes; some cases have never been without remission more or less. Yes; is remittent, and complications are a part of the disease.

Yes: remission occurs without indisease. Yes; remission occurs without indiscretion. Yes; certainly in a number of cases.
Yes; certainly in a number of cases.
Yes; in about 22 cases (out of 200) there was an unaccountable remission; but pneumonia was due to indiscretion.
Yes, it may be; have seen many cases, after apparent recovery, suffer all the symptoms over again, although every care taken.
Yes; in at all events three cases, am sure that a rise of temperature to 103.2 occurred with capillary bronchitis ten days after, although every care had been taken. Yes. Yes; I have no doubt remissions take place in spite of all care.
Yes, it may be remittent; the sequelæ are not accidental.
Yes; a proportion are normally remittent, and of them some are aggravated by indiscretion.
Recrudescences occurred about the fourth or fifth day. Recrudescences occurred about the fourth or fifth day.

Recrudescences occurred in many cases after apparent beginning of recovery.

Recrudescences occurred unexpectedly in carefully nursed cases.

Recrudescences—doubtful whether they are avoidable with care.

Complications are due to indiscretion.

Complications are really accidental.

Complications are due to indiscretion. Complications are a part of the disease; sequelæ are accidental. Complications are a part of the course of the disease; Complications are a part of the course of the disease.

Complications (lung) a part of disease; cared-for cases recovered steadily.

Complications (pneumonia) due to indiscretion; but sequelæ (weakness, slow convalescence, cough) a part of disease.

Complications are a part of the disease.

Complications are a ccidental, never occurring with due care. Sequelæ are due to indiscretion. Sequelæ were a part of the disease. Relapses were common, apart from indiscretion.
Relapses were not at all uncommon, apart from complications; after beginning of recovery all symptoms recurred.
Relapses occur; the same chain of symptoms showing over again. Intermittent-inclined to regard it as, in its characteristics.

This question elicited replies which cover (as far as they go) the whole ground, and they are given ract to avoid a great deal of useless repetition. They appear to warrant the following statement, in abstract to avoid a great deal of useless repetition. They appear to warrant the following statement, although they recount no cases in detail, and above all, include no temperature observations:—Influenza is not a remittent fever. Nevertheless, attacks, which have run a regular course which has ended in apparently-beginning recovery about the third day, sometimes then recur even while the patient is still in bed and carefully nursing himself, and on the fourth and fifth days, &c., repeat that regular course, the only difference being that the second course is sometimes more severe than the first. There is nothing to indicate special liability to such recrudescences in cases in which the primary attack was markedly slight; and by some contributors it was noted that the instances observed by them were free from complications (but compare Additional Observations, A 54, p. 40). Such early recrudescences stand apart from second attacks during the same epidemic after a long interval; but their relation to attacks which recur from fourteen to twenty-one days after the first requires investigation (see Answers to Q. 11 (d) 1). Besides recrudescences, complications are very apt to occur; the term practically means lung-symptoms of one or other kind. Essentially they are unavoidable, or in other words, are a part or a result of the process of the disease; but apparently they may be determined by indiscretion (such as neglect to nurse, exposure to chill, or to fatigue) and of course can be seriously aggravated by it. They cannot be certainly avoided by taking care, but they do not always arise.

A good many contributors expressed an opinion that influenza is a remittent disease, but adduced no evidence in support of it: and there was in no answer any hint of more than a single remission followed by

evidence in support of it; and there was in no answer any hint of more than a single remission followed by such a second attack as is described above and as appears to be of the nature of a recrudescence.

QUESTION 10.

10. Have you observed anything as to the influence of sex or age upon the liability to attack?

There were 141 answers. Seventy contributors answered that sex and age had no influence. The remainder replied as follows:-

METROPOLITAN.

46 cases: 26 males 5-60, majority 18-30; 20 females; few children. Children less liable.

Sex, no; believe I have seen cases in children of 1 year, besides the aged.

Adults more susceptible than children. Adults more susceptible than children.
They have no influence, but the aged are especially liable to attack.
Sex has none; the young up to puberty less often attacked.
Sex has none; not so prevalent among the very young.
Sex, none; majority of my patients were between 20 and 40.
Had cases in babies and aged, but majority, young men between 20 and 35.
I think men most liable, women less, and children much less.
They have none, unless babies are less liable; my youngest case, 4 years.
Very few infants affected. Very few infants affected.

Males more than females, and the old more than the young. Males were mostly affected, children rarely.

Cases most common in young adults, and afterwards at ages 20-30 and 50-65.

Adults more liable, and suffer more severely.

Very young and very old less liable, and suffered less when attacked.

Males were more severely attacked. Attacked adults indiscriminately as to age; very few children. Childhood less liable. Young children and babies showed an immunity. Had very few cases in infants or young children. Males and children were more liable to attack.

Males appeared more liable, and suffered more severely.

COUNTRY.

Extremes of life not so liable.

Children seldom attacked, and suffered slightly.

Unitdren seldom attacked, and suffered slightly.

Sex had none; children under 12 seemed less liable.

Infants and young children generally escaped, or suffered slightly.

Men more liable than women; young children had a slight immunity.

Illness invariably slight in young children, fever less; the old more prone.

Few attacks under age of puberty; sex, no influence.

Children less liable than adults; sex, no influence.

Adults chiefly attacked, and between 25 and 50; children less liable.

No marked influence.

No marked influence.

Sex, no influence; infants and young children, if attacked, suffered less. Had no influence; first cases in households usually adult.

Had no influence; first cases in households usually adult.

Sex, no influence; few cases in very young or very old.

Adults more frequently and severely than children, and, of adults, males.

Mostly adult males; children usually free (population has males in excess).

Sex, none; adults more liable than the young.

Children suffered in mild form, and recovered sooner.

Sex, none; the aged almost always escaped; children by far the most frequently attacked, but illness slight; adults less often, but more severely.

Children least often attacked; adult males most; then old people; then adult females.

Children very little liable to attack.

Children least often attacked; adult males most; then old people; then adult females.

Children very little liable to attack.

Elderly people more liable; children less so than others; adult men between 20-35 oftener escape than women of same ages. Attacks under 12 were rare.

Persons past middle life, but not old, were less liable to attack.

Male adults suffered chiefly (mining district, excess of males).

Males attacked more than females, and children very seldom.

Sex, had none; children not so often attacked.

The old more liable to attack.

Had none: young children less liable to attack.

Had none; young children less liable to attack. Mostly adults.

Females, young children, and old people seemed most liable.
Sex, no influence; only saw one child under 5.
All ages affected, except infancy.
The aged more liable than the young, and women less than men.
Children less liable than adults.

Children less habit than addits.

Have no influence; the old most severely attacked, the young least.

Amongst adults, females more liable than males; children from 2-15 especially prone to attack.

Have very little influence.

Males suffered most, and 80 per cent. were adults; very few children attacked.

Young children have influenza very lightly.

Adults more generally attacked than children, and the latter recover sooner when attacked, suffer less severely, and seldom have complications.

have complications.

Sex had no influence; but children escaped.

Infants and children were little liable to attack.

Children were more liable to attack than adults.

Sex, had none; very young children are not so liable to attack, and have a very mild form of the disease. Have no influence; but children had mild attacks. Very young children seemed little liable to attack.

The disease was rare in children, and infants seemed exempt.

However accurately these answers may represent the results of direct observation they are subject to an important criticism; they represent experience, not of the whole population, nor even of the whole affected population, but of that section of the latter only which sought medical advice; and the proportion of those who were attacked that never came under observation is thought to have been large. The total number of cases which furnish this experience appears from Question 6 to be less than 32,500. The number of contributors was 141. Of these thirty-four answered "no," without comment (that is, that they had not observed anything). Thirty-six answered "no" in effect, but at length. Very few thought that sex had any influence at all. As to age, forty-six thought that infants and children were

less frequently attacked than adults; eleven of the forty-six added that when the young were attacked they suffered less severely. There were five contributors (one Sydney, four country) who thought infants and children especially susceptible.

The statement that children suffered but slightly when they were attacked weighs against the opinion that they were little liable, when it is remembered that there are in any case good reasons why they should have borne but a small proportion to the whole number medically treated. Sex and age appear to stand in no direct relation to liability.

Question 11 (a).

11. Have you observed anything as to the following matters regarded as disposing to or protecting from attack—(a) Occupation (indoor, outdoor, trade, &c.)?

There were fifty answers.

- Indoor seemed to favour (suburban).
 Among policemen those doing night duty seemed more liable.
 Indoor and sedentary occupations predisposed (suburban).

13. Have no influence.18. Have no influence (urban).

20. No; except that those employed outdoor suffered more severely (urban).

22. In large households domestics were most often attacked, and were the only inmates affected in several instances (suburban).

27. Indoor occupations, especially where a good number were congregated together (urban.)

33. Those at indoor pursuits suffered most (urban).

35. All indoor and confined businesses and trades (urban).

37. Indoor and sedentary most affected (suburban).

38. I did not see that it made any difference (urban).

41. Engine-drivers, tram-conductors, and people much exposed suffered most severely (? extent of observation).

46. Does not seem to make any difference (urban).

59. Seemed to me to make little difference (urban).

60. Made very little difference (urban).

COUNTRY.

- 1. Large number of cases in men working out of doors.
- 2. Most of my patients out-door workers (farmers, &c.)
 6. Out-door trades more affected.

12. Out-door workers most attacked, but population chiefly occupied out.

13. No; out and indoor workers were among my patients.
15. Outdoor life contributed.

 No; treated members of all trades.
 Those occupied indoors were first attacked (mining town).
 Coalminers have not been as freely affected as the agricultural population. This is not because they live, as a rule, higher up the mountain range, for I have had many cases among solitary residents in the bush above the mines. 27. Miners most frequently (silver).
28. Outdoor (a town of 3,256 inhabitants, central to pastoral district).

29. Occupation seemed to have no influence one way or other (a town of 3,235 inhabitants central to populous farming and

mining district).
30. Nothing very marked (a small summer resort with good farming district, same as No. 1).
31. Very little difference (good farming district and town).
35. I do not find any influence from these conditions (pastoral district, high elevation, small village).
37. Indoor predisposes (small town, central to scattered pastoral district).
40. I have not observed that any occupation disposes to or protects from.
43. Those whose occupation tended to aggregation most liable; employment of a solitary character less exposed to attack.
49. In my experience difference of occupation had no influence (town of 11,680, and populous farming district).
52. Made no difference (mining settlement).
53. Indoor occupation disposed to disease; men in shops, and shearers seemed especially liable to it (small town, central to pastoral district).

53. Indoor occupation disposed to disease; men in shops, and shearers seemed especially liable to it (small town, central to pastoral district).
57. Outdoor more liable, indoor less so (Broken Hill, population 25,000, silver mines, no surrounding district).
58. Makes no difference (coal-mining; very large population).
63. Occupation no influence (population 900, grazing chiefly).
64. People engaged out of doors seemed to have best chance of escape (pastoral and agricultural).
65. Indoor predisposed; very few cases among 250 coal miners, though their wives and families suffered (populous coalmining district at sea level, large town).
66. No: but all connected with hotels were among the last to be attacked (town, 2500, district about 15000, arrivated).

66. No; but all connected with hotels were among the last to be attacked (town 2,692, district about 15,000, agricultural, wood, some gold).

wood, some gold).

67. At beginning of epidemic outdoor workers, especially agricultural labourers, were the greatest sufferers (sea coast and mountain range, coal-mining and agriculture; large population).

69. Make no difference (a large district, pastoral, and alluvial gold).

72. Observed no difference (large district, pastoral, farming, wine).

75. Am inclined to think occupation has no influence (large town and district, sea coast and mountains, pastoral, dairying, agricultural and coal-mining).

agricultural, and coal-mining).
Occupation has no influence (large town and district; agricultural and pastoral).

82. Indoor most prone (agricultural and alluvial gold). 84. Make no difference (same as 49 supra).

Very many contributors answered "no" without comment. Of them it can only be said that had occupation had a very marked influence they would probably have noticed and mentioned it. Fifty others answered more fully, and their statements have been given above, with such additional information as seemed necessary. Sixteen of them lived in the metropolitan district and thirty-four in the country. Six of the former and sixteen of the latter state that occupation had no influence, or, but very little. Between the opinions expressed by the remaining contributors, considered as two groups (of ten and eighteen), there is this difference:—The metropolitan group, upon the whole, furnishes evidence that indoor occupations predisposed to attack: the country group, that outdoor occupations predisposed. Three or four observers among the whole number (twenty-eight) specify as predisposing such occupations as lead to aggregation of people in confined spaces.

The justified inference is that occupation stands in no direct relation to liability to attack, and that

the latter is governed by some other circumstance.

Question 11 (b).

11. Have you observed anything as to the following matters regarded as disposing to or protecting from attack—(b) Environment (housing—ventilation, cleanliness; personal habits—food, &c.; locality—dry or wet soil, presence of filth, &c.)?

METROPOLITAN.

- 2. The cleanest and best ventilated houses had victims, but in them it was generally confined to one member. In badly ventilated houses it attacked all the family. Eight of my patients travelled to Sydney daily by train.
- ventilated houses it attacked all the family. Eight of my patients travelled to Sydney daily by train.

 10. Cases worst in badly ventilated houses.

 13. May modify character of epidemic when once it has appeared, but apparently have nothing to do with appearance or disappearance of the disease in a given locality.

 27. Ventilation with cleanliness seemed to have a certain protecting influence.

 21. Want of ventilation and cleanliness are predisposing causes.

 33. The well-housed and the badly-housed suffered equally.

 34. A damp house, almost level with the water, had all its inmates seriously ill, due chiefly to position.

 38. In dry localities the disease did not last so long.

 41. People who have well-ventilated, not draughty, houses suffer less than those in close rooms.

 43. Most cases on higher grounds and more populous parts.

 44. It seemed to have no preference for badly-housed people.

 55. Noticeably attacked the healthy.

 56. The rich seemed to be more affected than the poor.

 57. Secure of the disease in a given locality in the poor.

 58. Want of cleanliness disposed to it, and the ill-fed.

- COUNTRY.

 5. None of these matters are predisposing.
 6. Most frequently seen among cottagers where sanitary matters unattended to.
 11. Generally less virulent among the better classes, in inverse ratio to sanitation.
 13. Nothing definite; most houses here are slab huts, so plenty of air.
 15. Worst and greatest number of cases in damp, low, and ill-ventilated houses.
 17. Persons with insanitary surroundings had special complications.
 22. Found that in well-ventilated houses it did not spread to other inmates as it did in crowded and ill-ventilated ones.
 27. All live in wooden huts as a rule, and are generally reasonably cleanly in habits. The soil does not retain wet long being on the mountains, and at time of epidemic the weather was not wet. (Population of district about cases attended, 280).

28. Open-air dwellings such as tents; no apparent connection with filth, but with moisture and freshly turned soil.
31. Bad food and presence of filth may have aggravated the symptoms.
33. Crowded dormitories (asylums for infirm and destitute) seemed to dispose the inmates to attack.
37. Bad ventilation, dry soil, and filth.
43. Environment did not so much tend to induce attack as to retard recovery.
52. In this locality all dwelllings were alike, mostly bark humpies; free circulation of air, no overcrowding, all very cleanly, no accumulations of filth. Locality, a basin surrounded by mountains and watered by three running creeks; soil dry, granitic. Mining township.
53. It seemed to gain more hold in badly ventilated, unclean houses, especially wooden houses thickly covered with creepers.

57. In warm stone-built houses found the disease less frequent and less serious.
65. Nothing particular noticed for or against.
66. Good ventilation and cleanliness seemed to modify the symptoms, and confirmed tipplers seemed to be pretty well exempt.

69. Little or none.

69. Little or none.
72. Black soil (which cracks) seems to favour, dry sandy soil otherwise.
73. Equally prevalent in houses well drained and those badly; also men living in tents.
75. I think locality has nothing to do with attacks, except in making complications more likely.
80. Has attacked all alike irrespective of environment.
82. Uncleanliness and filth predispose.
83. The better class seem most affected.
85. Have not observed any influence.

Although the answers to this question are not proportionately numerous, it appears that these contributors, at all events, thought upon the whole that the disease spread uninfluenced in any marked degree by local conditions. There are several expressions of opinion that bad ventilation conduces to spread; but the Answers 27 and 52 (country) show that it can spread quite well where neither foul air nor filth are to be found—the latter being the village referred to below [12 (c) 52], in which nearly every family suffered. Thus it appears that influenza conforms in its conditions of spread to other communicable diseases; in all cases the essentials are the cause, and a defective resistance of the subject. Except when dissemination of the cause depends on the presence of filth (typhoid, cholera, &c.), or upon foul air in confined and overpopulated spaces (typhus), environment acts but a secondary part by reducing resistance. There is nothing in these answers to suggest that it bears any other or more important share in promoting an epidemic of influenza than it bears in promoting epidemics of small-pox; that is to say, it exercises only an indirect influence.

Question 11 (c).

Have you observed anything as to the following matters regarded as disposing to or protecting from attack . (c.) Disease; (1) acute, specific; (2) chronic?

METROPOLITAN.

 Predisposition to pulmonary troubles in one or two cases prolonged the cough.—Dr. MacLeod, Hurstville.
 Lying-in women and persons with chronic lung-trouble very readily take it.—Dr. Clay, Rockdale.
 Chronic lung-troubles are predisposing.—Dr. Faithful, Sydney.
 People with old lung-trouble are in great danger, and lying-in women are in the greatest jeopardy.—Dr. Bucknell, Kogarah.

43. Phthisical patients seemed specially prone to it.—Dr. Jarvie Hood, Sydney.

58. Any one with chronic lung complaints.—Dr. T. B. Clune, Petersham.

69. Chronic chest affections very dangerous as regards effects and prognosis.—Dr. Quaife, Wcollahra.

COUNTRY.

Country.

35. The subjects of chronic disease and those notably feeble have always escaped.—Dr. Boodle, Walcha.

46. Noted a few cases of chronic chest affections seemed more liable.—Dr. MacDonald, Murwillumbah.

53. A child, &t. 6 years, with tubercular consolidation of right apex contracted the disease with the rest of the family, but made a quick and excellent recovery.—Dr. Wilson, Warren.

66. Cases of skin disease already under treatment with Fowler's Solution invariably escaped, as did every case of syphilis under treatment with liquor hydrargyri perchloridi.—Dr. Finlsy, Young.

67. I cannot positively say that I have seen any case of acute specific disease suffer at the same time from influenza; chronic cases, such as have a debilitating effect, mostly suffered.—Dr. Malcolm, Helensburg.

83. (1.) No data. (2.) In phthisical cases, even in the early stages, an attack of influenza left the patient in a much worse state, and they speedily succumbed to the original disease, but in an aggravated form.—Dr. Phillips, Parramatta.

85. Noticed that persons sick from other causes did not get the disease.—Dr. Tresidder, Dubbo.

This question was not often answered, and very generally it was misunderstood. All the replies. furnished are given above. They do not call for any comment as a whole; but 11 and 41 should be compared in as far as they refer to parturient women, with 41, 48, 51, 55, 57; 11, 45, 53, Question 16, p. 39; and with Additional Observations, A. 35 and 79, and F. 9, 15, and 67. Sixty-six has interest, but is interest, but is interest. in a most important detail; namely, the number of persons there were under the treatment mentioned.

Question 11 (d) 1, and 11 (d) 2.

11. Have you observed anything as to the following matters regarded as disposing to or protecting from attack: -(d) 1. Former attack (enumerate cases in which attack in 1890 was followed by attack in 1891, and cases in which the same person was attacked more than once during the same epidemic, stating clearly whether both attacks were witnessed by yourself. Note the interval between repeated attacks in the same person). 2. Mention any good case in which a person who had already suffered escaped second attack, although especially exposed to infection.

Question 11 (d) 1.

METROPOLITAN.

A. Fifty-two contributors reported that persons who were attacked in 1890 were again attacked in 1891, namely:-

Two patients had suffered in 1890.—Dr. MacLeod, Hurstville.
 T. G. O. was attended by Dr. Taylor, at Trial Bay, 1890, initial temperature 104; was seen by myself at Young, in 1891, suffering from well-marked influenza.—Dr. Paton, Sydney.
 6.

- 6. I observed myself a second attack in one patient with an interval of about a year.—Dr. D'Englesqueville, Hunter's

- Hill.
 9. I attended several persons in 1891 whom I had attended in 1890; I saw no case of second attack in the same epidemic.—Dr. Harold Browne, Summerhill.
 10. Only three cases of 1890 followed by attack in 1891; I saw no second attack in 1891.—Dr. Blaxland, Burwood.
 11. I carefully looked for cases in 1891 where the patient had been under my care in 1890, and only found about three mild ones; I have not seen any case I should class as a second attack in the same epidemic; I consider all such cases are relapses, of which I treated many.—Dr. Clay, Rockdale.
 15. Several cases occurred to persons whom I had attended in 1890.—Dr. Cohen, Sydney.
 16 (a). My wife had attacks both in 1890 and 1891.—Dr. Carruthers, Balmain.
 22. Seven of my patients (out of forty) stated that they had suffered in 1890.—Dr. Jamieson, Ashfield.
 23. The attack in 1891 was of distinctly milder type in those who had suffered in 1890.—Dr. Mander Jones, Homebush.

bush.
26. I can recall twelve who suffered in both epidemics.—Dr. Barkas, Paddington.
27. I know of six cases in which the same individuals were attacked twice in the same epidemic (of 1890), and they all had it again, with one exception, in 1891. Six patients had influenza in October, 1890, again in January, 1891, and again in October, 1891, with one exception, and she escaped the second epidemic.—Dr. Faithful, Sydney.
31. Personally I had a mild attack in June, 1890 (catarrhal and bronchial symptoms), and a mild attack in 1891, when catarrhal symptoms were absent.—Dr. Wright, Sydney.
34. A young lady who suffered severely in 1890 returned to her home in the interior; in 1891 she again came to Sydney, suffered again and died. (b) In a school, all those with the above exception who suffered in 1890 were not again attacked in 1891; although all the remainder, with the above exception who had not the disease in 1890, did.—Dr. Milford, Sydney.
43. In a large number of cases, witnessed by myself, a second attack followed that of 1890.—Dr. Cummings, Annandale.

48. Eight or nine who suffered in 1890 were attacked in 1891, under my care.—Dr. Jarvie Hood, Sydney.
49. I have attended many persons who were attacked in both epidemics under my observation.—Dr. Watkins, Manly.
51. I had only one or two cases of attack in both epidemics and none of second attack during the same.—Dr. Crago,

I am cognisant of three cases of attack during each epidemic.—Dr. Muskett, Sydney.

Many patients who suffered before were again attacked this time; I saw no patient attacked twice in the same

5.94. Many patients who suffered before were again attacked this time; I saw no patient attacked twice in the same epidemic.—Dr. Couttie, Petershań.
55. I attended a fair number of persons who had attacks during both epidemics.—Dr. Scott Skirving, Sydney.
56. I attended eight, I think, who had been attacked in both epidemics; I saw no case of two attacks in the same epidemic.—Dr. Fairfax Ross, Sydney.
57. In two instances I saw the same persons attacked in both epidemics.—Dr. Marshall, Sydney.
59. Saw very few cases which suffered in both epidemics.—Dr. Martin, Sydney.

COUNTRY.

6. Have seen several who had been attacked in 1890; in all such cases the symptoms were much modified in 1891.— Dr. Asher, Lithgow.

10. The number of those attacked for the first time and for the second time was about equal.—Dr. Cribb, Raymond Terrace.

The number of those attacked for the first time and for the second time was about equal.—Dr. Cribb, Raymond Terrace.

14. I had a mild attack in each epidemic, lasting three days; temperature, 101-2.—Dr. Heesham, Richmond.

17. A considerable number were attacked both years.—Dr. Nickson, Newcastle.

19. Mrs. —— had a severe attack complicated with pneumonia, both in 1890 and 1891.—Dr. Fitzpatrick, Crookwell.

20. I have had at least forty cases who had the disease twice (out of 700).—Dr. Beeston, Newcastle.

21. My opinion is that an attack of the catarrhal epidemic of 1890 afforded no immunity against the epidemic of 1891; G.T. suffered December 16, 1890, and November 5, 1891. No well-marked case of a second attack of the epidemic of 1891 came under my notice.—Dr. Bassett, Bathurst.

23. A very large number who suffered in 1830 were attacked again in 1891: I do not think the former epidemic afforded any protection against the second.—Dr. Hester, Stockton, Newcastle.

25. Having suffered in the former epidemic seems to afford no protection against the second. I myself was attacked in both.—Dr. Bartley, Broken Hill.

29. I had not a dozen cases who had suffered in the previous epidemic, although it did occur again in about so many. I had no case of second attack during the same epidemic.—Dr. Van Someren, Orange.

30. I have attended cases in 1891 which also suffered in 1890.—Dr. Wilson, Bowral.

31. Many cases of attack in 1890 and in 1891 have come under my observation, but the second attack was not so severe as the first.—Dr. Ross, M.L.A., Molong.

35. A number of people who suffered in 1890 were attacked again in 1891, especially children. I had it myself in both epidemics, and severely in 1891.—Dr. Boodle, Walcha.

36. I attended R.B., in November, 1890, and again in November, 1891.—Dr. Evershed, Bega.

41. About twelve suffered in 1890 and again in 1891, but the 1890 attack appeared to afford immunity generally.—Dr. C. Emilius Thompson, Broken Hill.

47. Many cases were attacked in 1891 who had suffered in

About twelve suffered in 1890 and again in 1891, but the 1890 attack appeared to afford immunity generally.—107. C. Emilius Thompson, Broken Hill.

Many cases were attacked in 1891 who had suffered in 1890.—Dr. Blackwell, W. Maitland.

Four cases of the 1890 epidemic were attacked in 1891.—Dr. Blackwood, Cooma.

Several cases occurred who suffered slightly in 1890 and more severely in 1891. They found it difficult to believe it was the same disease.—Dr. Grigson, Muswellbrook.

Can only cite myself; was attacked in Southern Queensland, August, 1890; ill fourteen days and very prostrate; and again in Northern New South Wales, November, 1891, as severely as before, but recovery more rapid (five days.—Dr. Channing Neill. Bear Hill.

and again in Northern New South Wales, November, 1891, as severely as delore, but recovery more rapid (live days.—Dr. Channing Neill, Bear Hill.

Found attack in 1890 no protection in 1891.—Dr. Belgrave, Broken Hill.

Many of my patients suffered in both epidemics. (2,000 cases).—Dr. Nash, Wallsend.

G.T. and C.A.G. were both attacked in 1890, and suffered from double pneumonia. In 1891, the first had a very mild attack, and the second escaped altogether; both attended by myself.—Dr. Finlay, Young.

I attended three patients for distinct attacks in 1890, and these three again had distinct attacks in 1891.—Dr. Thene Vass

Thane, Yass.

About 150 persons who suffered in the first epidemic had a second attack, which was as severe, e.g., of a family of eight persons seven suffered on the first occasion and seven on the second; the one who escaped at first suffered on the second occasion. Possibly about ten had a well-marked third attack—not a relapse—separated by at least two months.—Dr. Terry, Kiama.

Had not more than a dozen nationts who were attacked in 1891 who had suffered in 1890.—Dr. Kirkland, Bathurst.

- Had not more than a dozen patients who were attacked in 1891 who had suffered in 1890.—Dr. Kirkland, Bathurst. Several times; I personally attended a man who caught three distinct attacks.—Dr. Belson, Tumberumba. I had some half-dozen cases who suffered in both epidemics, but none that suffered twice during the same.—Dr. Distinct Description Phillips, Parramatta.
- B. Eight contributors were told that persons whom they attended in 1891 had suffered in 1890, namely:-

METROPOLITAN.

5. I know of none who suffered in both epidemics, although I have met with several who said they suffered before. —

Dr. Thomas Dixson, Sydney.

Several of my patients informed me they were attacked last time.—Dr. Bucknell, Kogarah.

I attended none in 1891 whom I had attended in 1890, but I heard of some I attended in 1890 who suffered again in 1891, but did not consider themselves ill enough to ask advice.—Dr. Chisholm, Sydney. COUNTRY.

COUNTRY.

- Most of my patients declared they had suffered in 1890. —Dr. Hart, Gunning.
 Three persons came under my care in 1891 who said they had suffered in 1890, but did not seek advice. I know of no authentic case of second attack in the same person, except, of course, relapses during seeming recovery from a first attack.—Dr. Lewers, Berry.

 46. One patient said he had been attacked in 1890; no case of second attack during same epidemic.—Dr. MacDonald, Marwillumbah.

- 53. I attended two patients who said they had suffered in 1890.—Dr. Wilson, Warren.
 64. Am sure persons have suffered in both epidemics, and twice in the same, but I have not attended them.—Dr. Failes, Coonabarabran.
- C. Twenty-two contributors reported that the same persons had suffered twice during the same epidemic, namely :-

METROPOLITAN. `

16. (a) Mr. E., October 16, influenza, temperature 103; convalescent in four days, and resumed work; on November 21 all symptoms returned; the attack ran a longer course than at first, and there was bronchial complication. (b) Mr. M. was attacked October 14; severe course with bronchitis; was convalescent by end of month, and resumed work; on November 25 symptoms recurred of influenza; temperature 103; he recovered immediately under salycilate of soda.—Dr. Carruthers, Balmain.

19. I believe I saw one case where an old lady had the disease twice in 1891, namely, in September and November.—Sheldon North Sydney.

 I believe I saw one case where an old lady had the disease twice in 1891, namely, in September and November.—Dr. Sheldon, North Sydney.
 In some cases attended by myself the same person was attacked during the same epidemic twice. As a rule, the second attack was less severe than the first where there was no complication. The interval between the attacks varied between a few days and several weeks.—Dr. Norrie, Sydney.
 Six patients suffered twice (in the same epidemic?)—Dr. Barkas, Paddington.
 I know of six cases in which the same individuals were attacked twice in the same epidemic (of 1890), and they all had it again, with one exception, in 1891. Six patients had influenza in October, 1890; again in January, 1891; and again in October, 1891; with one exception, and she escaped the second epidemic.—Dr. Faithful, Sydney Sydney.

49. I have attended many persons who were attacked twice in the same epidemic under my observation.—Dr.

Watkins, Manly.

55. I attended at least two who had two attacks during the same epidemic, and in one the interval was seventeen

days.—Dr. Scott-Skirving, Sydney.

I saw two distinct attacks in the same epidemic in one person; both well-marked; the first began 30th October, the second 30th November, and the interval was seventeen days.—Dr. Houison, Sydney.

COUNTRY.

17. In 1890 I had two well-marked attacks, and in 1891 escaped. Many were attacked twice during the epidemic of 1891.—Dr. Nickson, Newcastle.

23. I saw two cases where I believe there was a second attack in the same epidemic.—Dr. Hester, Stockton,

Newcastle.

Newcasule.

27. One patient had an attack in which catarrhal symptoms and depression predominated, on 15th October, 1891, and another on 2nd December, 1891, in which headache and myalgic symptoms predominated.—Dr. Parry, Emmaville.

35. During 1890 I saw a great many people who had two distinct attacks. In 1891 I could not find a single case of its recurring after recovery, or even a well-marked relapse.—Dr. Boodle, Walcha.

41. Several cases of two distinct attacks, during 1891 epidemic—not fewer than twelve.—Dr. C. Emilius Thompson, Broken Hill

Two well-marked cases of recovery apparently complete again either contracted a fresh attack, or relapsed after intervals of four and three weeks; they were exposed to contagion in their own households.—Dr. Morgan, Wagga

Wagga.

I saw only one case of second attack during same epidemic. She was hardly convalescent from the first when she went through the same symptoms exactly again; the interval between the beginning of the two attacks was nineteen days.—Dr. C. E. Rowling, Gresford.

I attended one patient for two attacks in 1891; the interval was five and a half weeks.—Dr. Blackwood, Cooma.

Cooma.
Several patients had two distinct attacks both in 1890 and 1891; two or three of my patients had a distinct third attack in 1891; an interval of several days up to eight or nine intervening between the attacks (about 2,000 cases).—Dr. Nash, Wallsend.
S.M., αt. 6; convulsions 5th November, followed by febrile attack lasting three days, culminating in pneumonia on the fourth day; recovery complete by 15th November; diagnosis, influenza. His attack was followed almost immediately by an outbreak of influenza among other members of the household. On 1st December, being still in the house, S.M. had an attack precisely exactly similar to the first; commencing again with convulsions, and lasting three days, but without pulmonary complications this time. Both witnessed by myself.—Dr. Wilson, Narrabri.
W.K., Mrs. K., and child were all attacked twice during 1891, eight weeks intervening; witnessed by self.—

Narrabri.

66. W.K., Mrs. K., and child were all attacked twice during 1891, eight weeks intervening; witnessed by self.—Dr. Finlay, Young.

71. No cases occurred here during 1890. I attended six patients (male) who were attacked in October, 1891, and who had second attack in two months afterwards; they all lived in different localities. Several other patients suffered a more regular attack; and a normal temperature for three days, and then a second attack (in two more severe than the first) lasting three or four days. In these cases there was no complication at all, but they all got about too soon after the first illness. In the second attacks after the longer interval the symptoms of the first attack recurred in full.—Dr. Young, Maclean.

73. My wife had it twice in 1890, four months interval.—Dr. Rooke, Germanton.

85. Saw one case of a man who had a severe attack, recovered completely, and three weeks afterwards, although in perfect health, was again severely prostrated.—Dr. Tressider, Dubbo.

- D. Two contributors reported that persons had suffered three attacks during the same epidemic, namely:--

58. Many of my patients suffered in both epidemics; several patients had two distinct attacks both in 1890 and 1891; two or three of my patients had a distinct third attack in 1891, an interval of several days up to eight or nine intervening between the attacks (about 2,000 cases).
75. About 150 persons who suffered in the first epidemic had a second attack, which was as severe: e.g., of a family of eight persons seven suffered on the first occasion and seven on the second; the one who escaped at first suffered on the second occasion. Possibly about ten had a well-marked third attack—not a relapse—separated by at least two months. (Country.)

E. Twenty contributors stated, more or less positively, that they attended no person in 1891 whom they had attended in 1890, namely:-

METROPOLITAN.

- 1. In none of my patients was there any authenticated case of a previous attack. In several families many members were attacked in 1890, and these escaped in 1891, though those who escaped in 1890 had it severely in 1891.—Dr. Kyngdon, Strathfield.
- 8. I saw no second attacks.—Dr. Kesteven, North Sydney.

17. I remember no undoubted case in which the same individual was attacked in both epidemics, nor after complete recovery in the same epidemic.—Dr. Fieldstadt, Sydney.
19. I had no case where I observed patients attacked during both epidemics.—Dr. Sheldon, North Sydney.
30. I have not met with a well authenticated case of any person baving had an attack in 1890 and another in 1891.—Dr. McAlliston Standard.

Dr. M'Allister, Stanmore.
I saw no second attacks.—Dr. Service, Newtown.

33. In my practice no one has been attacked twice.—Dr. Rorke, North Sydney.
36. Do not remember any case affected in both epidemics.—Dr. Pockley, North Sydney.
38. I had no case that had influenza a second time.—Dr. Mathison, Waverley.
50. Have attended nobody for two attacks.—Dr. Warren, Sydney.

- 1. No case attacked in both epidemics, nor twice in 1891.—Dr. Fisher, Bowral.

 3. I am not aware that any of my patients of 1890 were attacked in 1891.—Dr. Gibson, Windsor.

 4. I cannot recall any case of attack in both epidemics.—Dr. W. P. Bassett, Bathurst.

 5. Persons attended by me in 1890 were not attacked in 1891.—Dr. Bond, Penrith.

 9. Do not know of any person suffering who was attacked in 1890.—Dr. Lambert, Berrima.

 11. Had no serious case recurring in individuals who had suffered before.—Dr. Alcorn, East Maitland.

 21. My opinion is that an attack of the catarrhal epidemic of 1890 afforded me immunity against the epidemic of 1891 (G. T., suffered December 16, 1890, and November 5, 1891). No well-marked case of a second attack of the epidemic of 1891 came under my notice.—Dr. Basset, Bathurst.

 24. I have had no repetition of the disease in the one patient.—Dr. Lee, Wollongong

 46. One patient said he had been attacked in 1890; no case of second attack during same epidemic.—Dr. M'Donald, Murwillumbah.

- Murwillumbah.
- Unable to say whether any suffered in the two epidemics, and cannot say that anyone had two attacks in the same. I have seen recrudescenses, but they were rare (between 1,000 and 1,500 cases).—Dr. Stapleton, Lambton.
- F. Thirteen contributors said that they saw no person attacked twice during the same epidemic.

METROPOLITAN.

- 9. I saw no case of second attack in the same epidemic.—Dr. Harrold Browne, Summer Hill.
 10. I saw no second attack in 1891.—Dr. Blaxland, Burwood.
 11. I have not seen any case I should class as a second attack in the same epidemic. I consider all such cases are relapses, of which I treated many.—Dr. Clay, Rockdale.
 51. I had no cases of second attack during the same epidemic.—Dr. Crago, Sydney.
 54. I saw no patient attacked twice in the same epidemic.—Dr. Couttie, Petersham.
 56. I saw no case of two attacks in the same epidemic.—Dr. Fairfax Ross, Sydney.

1. No case attacked twice in 1891.—Dr. Fisher, Bowral.

13. I know of no authentic case of second attack in the same person, except, of course, relapses during seeming recovery from a first attack.—Dr. Lewers, Berry.

21. No well-marked case of a second attack of the epidemic of 1891 came under my notice.—Dr. Basset, Bathurst.

22. Have had no case of second attack in one epidemic.—Dr. Mallam, Armidale.

23. I had no case of second attack during the same epidemic.—Dr. Van Someren, Orange.

37. I have not seen the same person attacked twice in the same epidemic.—Dr. Williams, Urana.

55. I saw no case of second attack in same epidemic.—Dr. Ventry Smith, Murrumburrah.

Question 11 (d) 2.

In the following answers "Self, 1890," and "Self, 1891," mean that the contributor himself suffered once only in the year mentioned, and not again either in that year or the next, although specially exposed to infection.

Thirteen contributors mentioned that they themselves suffered in 1890, and escaped further attack both in that year and in 1891:

Eleven contributors mentioned that they suffered in 1891 and escaped further attack in that year.

Thirteen contributors furnished instances of persons who suffered in 1890, and who escaped in 1891, although specially exposed to infection.

Eight contributors gave examples of persons who suffered in 1891, and who escaped further attack in that year, although specially exposed to infection.

METROPOLITAN.

The following replies are given in detail:-

In several families many members were attacked in 1890, and these escaped in 1891, though those who escaped in 1890 had it severely in 1891.—Dr. Kyngdon, Strathfield.
 Mother and children attacked in 1890, eldest daughter escaped; eldest daughter attacked in 1891, mother and children escaped.—Dr. Blaxland, Burwood.
 One who suffered in 1890 slept with another while suffering in 1891, and escaped. He was also exposed to infection in course of practice.—Dr. M. Murrary Sedney.

course of practice.—Dr. M'Murray; Sydney.

15. Self, 1890 (exposed in practice and household in 1891).—Dr. Cohen, Sydney.

19. Saw several cases where patient attacked in 1890, escaped in 1891, although specially exposed.—Dr. Sheldon, North

27. A father of family suffered in 1890, the family in 1891; although in contact with them lie did not suffer again.—Dr. Faithful, Sydney.

Mrs. R. suffered badly; after being well twenty-one days nursed her husband through a very severe attack, and her two children who sickened later, and she had no second attack.—Dr. Matthais, Sydney.

62. Self, 1891 (exposed in household and practice.)—Dr. Newmarche, North Sydney.

2. Cannot remember one case of escape from attack in second epidemic after recovery from attack in the first .- Dr. Hart, Gunning.

4. Five or six of the medical men in this town, and several of the nurses at the hospital, had one attack only.—Dr. W. P.

Five or six of the medical men in this town, and several of the nurses at the nospital, has one allowed Bassett, Bathurst.
 In 1890 a man suffered an acute attack; his family, although in constant attendance upon him, escaped. In 1891 his wife and one son were attacked. (This but one case out of many similar.)—Dr. Bond, Penrith.
 Some individuals affected in 1890 escaped in 1891, though markedly exposed.—Dr. Asher, Lithgow.
 As far as I could see, those who suffered in 1890 escaped in 1891; but my cases are too few to furnish important evidence.—Dr. Henry, Warialda.
 One who suffered a mild attack in 1891 was afterwards indefatigable in nursing others, but escaped second attack.—Dr. Lewers Berry.

17. Self, two well-marked attacks in 1890, escaped 1891.—Dr. Nickson, Newcastle.

29. Many examples of escape from second attack, though specially exposed to infection after suffering a first time.

mother and children suffered, four weeks afterwards were exposed to re-infection from husband and father, but escaped.—

Dr. Van Someren, Orange.*

45. I have notes of three persons who suffered, recovered, and escaped second attack, although specially exposed.—Dr. C. E.

Rowling, Gresford.

47. In several cases I observed that persons who had suffered escaped second attack, though specially exposed.—Dr. Blackwell, West Maitland.

West Maiatland.

54. Self, 1891; my wife and several others escaped second attack, though much exposed.—Dr. Todd, Maclean.

57. Self, both 1890 and 1891.—Dr. Belgrave, Broken Hill.

58. A large number of my patients were directly exposed to re-infection, but did not again suffer.—Dr. Nash, Wallsend.

61. Miss M. suffered in 1890; in 1891 she was the only member of a household of nine that escaped, though in constant attendance on sick.—Dr. Wilson, Narrabri.

73. My wife was twice attacked in 1890, interval four months. In 1891 all the rest of the household (8) suffered, but she escaped, although in constant attendance upon them.—Dr. Rooke, Germanton.

74. Self, 1890; and know of two or three similar cases I can vouch for.—Dr. Thane, Yass.

75. Of a family of eight, seven suffered in 1890; the one who escaped suffered in 1891, when six of the others had their

75. Of a family of eight, seven suffered in 1890; the one who escaped suffered in 1891, when six of the others had their second attack.—Dr. Terry, Kiama.

It is quite clear from these answers that people can suffer in each of two consecutive epidemics, separated from each other by an interval of about a year; it is also clear that people can suffer two distinct attacks in the course of the same epidemic, after an interval of several weeks; it even appears to be possible to suffer three times within a few months. It seems, also, that persons who have suffered once during the first epidemic are not sure to suffer during the next, even if they are very much in contact with cases of the disease (medical men in practice and the special cases); they are very much in contact with cases of the disease (medical men in practice and the special cases); nor are those persons who have suffered sure to be attacked again during the same epidemic; although after recovery they may be specially exposed to the infection. It is abundantly plain that the reaction of the body to influenza is very different from its reaction to smallpox, scarlatina, measles or even to typhoid fever. It is certainly far from receiving protection with exception of a few cases only, and far from receiving protection with a moderate proportion of exceptions. The disease seems rather to resemble diphtheria in this as in another respect. The instances of escape, under circumstances believed to be of special danger of re-infection, do not furnish any cogent reason for ascribing protective power to influenza. In the first place, they are merely negative statements that such and such persons did not contract the disease; secondly, they might easily be paralleled by a similar statement having reference to persons who have not had any attack at all previous to their special exposure. This criticism leaves the question, whether an attack of influenza confer any protection at all, broadly open. It seems that there are two distinct classes of second attacks, of which one is a relapse, or perhaps a recrudescence (due to a distinct re-infection or attacks, of which one is a relapse, or perhaps a recrudescence (due to a distinct re-infection or not, as the case may turn out), while the other is indubitably a second attack, due therefore to a second infection. The first kind has already been alluded to (vide Q 9, p. 21). In the other, the patient having suffered from a first attack, and having perfectly recovered from it, is struck down a second time after two months (in one case four months), and then suffers in all respects as in a primary attack. Between these two distinct kinds stand those cases in which a regular and uncomplicated convalescence is interrupted, after from 14 to 21 days, by a second attack in every respect like the first. These occurrences being now here sufficiently established as mere matters of fact, it would be both important and rences being now here sunciently established as mere matters of fact, it would be both important and interesting to examine the individual instances in detail with a view to discover whether the earlier relapses are really preceded by a period of perfect freedom from the disease, and are probably due to a re-infection from outside sources, or whether there may be reason to suppose that they are due to an auto-reinfection; and secondly, to establish the perfect recovery of the second class, and the circumstances under which they became re-infected. But the present notes do not enable this to be done. It should be observed that as attacks during two consecutive epidemics are here shown to be far from uncommon, it is quite possible, that they occur your frequently, for either from the second attack being slighter than it is quite possible, that they occur very frequently; for either from the second attack being slighter than the first, or, which is more probable, from the disease being on its second appearance no longer a novelty and therefore not so much feared, many who suffered twice may have treated their own cases on the second occasion

The sole inference warranted by these data is that influenza often fails to protect from a second attack when further exposure to infection happens after an interval of about a year, and sometimes fails to protect when this happens after an interval so short as two months. It remains doubtful whether the disease confer any protection at all, and perhaps the frequency with which recrudescences occur immediately after a first attack has apparently come to a close may be accepted as presumptive evidence in the negative.

Question 12(a).

12. What is your experience of communicability as illustrated by (a) large households (in town or elsewhere; mention relation of subsequent cases to the first in point of time and number; result of an attempt made to isolate the first case, with a view of protecting the rest of the household; or of isolating any member of an infected household, with a view of protecting him from attack)?

METROPOLITAN.

In large households where several were attacked we must take into account the fact that all were exposed to the same surroundings, and the immunity of some members was continued throughout the epidemic. Many families had the disease severely, while others exposed to similar sources of infection entirely escaped.—Dr. Kyngdon, Strathfield.
 In the majority of households it was limited to one or two of the family; in two or three instances all the members suffered, and in those cases bronchial symptoms were much more marked than where only one or two were attacked. Amongst the earliest victims here were two letter-carriers and two ticket collectors at the Railway Station.—Dr. Macleod, Hunstrille

Hurstville.

6. I think isolation of no use whatever, from the following experience:—At River View College, in an excellent position about 300 feet above the level of the river which surrounds it on three sides, there were about forty cases out of among a population of about 150; at St. Joseph's College, which is almost in the centre of Hunter's Hill, there were only about fifteen cases out of a population of 300, and still I was attending cases at the time in nearly every house round the college.—Dr. Cotton d'Englesqueville, Hunter's Hill.

7. The succession of cases in a family was as follows:—October 18, 1; October 20, 2; October 23, 1; October 24, 1; October 25, 1; October 26, 1; and no isolation was attempted. In another household one case occurred on November 5, and was isolated; no farther cases occurred.—Dr. Baldwin, Neutral Bay.

8.

8. I generally saw it go right through households, but saw a good many cases of odd members escaping infection, though surrounded by it.—Dr. Kesteven, North Sydney.
9. Distinctly communicable. Several outbreaks traced to disease having been introduced in a large family by the father, who was the first case in these instances, and often followed next by the mother, then by the persons most nearly in contact with them. In many houses four or five, and in one nine, down at once. No good results from attempts at isolation.—

was the first case in these instances, and often followed next by the mother, then by the persons most nearly in contact with them. In many houses four or five, and in one nine, down at once. No good results from attempts at isolation.—Dr. Harold Browne, Summer Hill.

Great irregularity as to time and number of subsequent cases. Result of ordinary isolation (?) not protective. Isolation of not-affected member by having no direct communication with patient's room, not protective.—Dr. E. G. Blaxland,

Burwood.
11. In large households, as a rule, only one or two escaped. The subsequent cases were generally attacked from two to five days from time of immediate association with case. Never able to isolate first case (except once, with success). In several instances successfully isolated one member from an infected household.—Dr. Clay, Rockdale.
12. The epidemic was undoubtedly communicated by married people from one to the other; and isolation as far as circumstances allowed did not prevent spread to other members of the family.—Dr. Eichler, City.
15. Subsequent cases occurred in rapid succession where no attempt was made at isolation. In my own household isolation was apparently successful, as three cases occurred at different intervals and were traceable to special cause as visiting the sick.—Dr. Cohen, City.
16. Very uncertain. In some places all were down together; in others they followed at irregular intervals.—Dr. Carruthers, Balmain.

19. I saw many households where all escaped in both epidemics. But in 1891 if one person in a household was attacked other members almost invariably followed.
20. I have had the members of large households, both in city and suburbs, attacked one after the other in a very short time—so short that I could not fix the incubation period. I believe isolation, if it could be effectively done, would lessen the number of attacks.—Dr. Norrie, City.

22. Single cases in a household frequently seen without any attempt at isolation being made. In two households the disease

number of attacks.—Dr. Norne, City.

22. Single cases in a household frequently seen without any attempt at isolation being made. In two households the disease rapidly ran through them in the course of a few days.—Dr. Jamieson, Ashfield.

24. Had it badly myself; no one else in the house has had it; never made any attempt to isolate. Could never get any evidence satisfactory to myself that influenza was communicable from one person to another in face of the fact that it was so intensely epidemic.—Dr. Shewen, City.

26. That it is not contagious. In most of my cases of large households all that became infected were laid up within 24 hours of each other.—Dr. Barkas, Paddington.

27. Usually by contagion. In one case in the country where I had a patient isolated away from all other members of the family, and attended by one person, no other member became infected, nor the attendant. In this case no disinfectants were used, but good ventilation and cleanliness were maintained strictly.—Dr. Faithfull, City.

29. The disease seemed to follow no rule at all. In some cases a whole household attacked at once, within 24 hours; in others, only one or two; in others, first one member and then all the rest after a few days.—Dr. Simpson, Burwood.

30. In houses the disease appeared to attack immates indiscriminately. It was not always those most exposed to risk of contagion from an existing case that developed the disease, often the reverse.—Dr. MacAllister, Stammore.

31. In some households the influenza was very severe, nearly every member being attacked simultaneously, or with only a slight interval; whilst adjoining houses in the same street were free from the disease.—Dr. H. G. A. Wright, City.

32. The disease is distinctly communicable from person to person, but apparently travels in other ways and to a much greater extent. Did not try isolation which, in my opinion, is both impracticable and as irrational, as it would be in a case of cholera or enteric fever.—Dr. Service, Newtown.

greater extent. Did not try isolation which, in my opinion, is both impracticable and as irrational, as it would be in a case of cholera or enteric fever.—Dr. Service, Newtown.

33. I am in great doubt as to the communicability of this disease. In some houses containing eight or ten individuals I had one case, although no isolation was practicable; whereas in other households containing a like number of souls every member, more or less, suffered.—Dr. Rorke, North Sydney.

34. Most of these cases (large households) were attacked about the same time.—Dr. Milford, City.

35. I do not think isolation to be of the least value, for in both small houses among the poor and in large houses of the rich I have attended single cases, the other inmates not having had the disease either last year or this.—Dr. Mathias, City.

37. Many instances occurred of large households in which the father was first attacked, all, or nearly all, members following. Usually there was an interval of 36-48 hours between each, but in some cases four, five, or six members were down together. Attempts made to isolate single members by removal failed.—Dr. Collingwood, Summer Hill.

38. As to communicability, I am not able to remark, because I attended some families where only one person suffered out of twelve, no isolation having been attempted. I often inquired of patients where they thought they got it, and the answer was always in the negative.—Dr. Matheson, Waverley.

41. In some households the whole were prostrated; in others only one escaped; in others only one suffered. Though in many cases I have seen whole families affected, still I am of opinion that isolating those suffering does not affect the spread of the disease. I noticed that there would be isolated cases in different parts of the town (say) four or five the first day. In these families perhaps there would be no fresh cases, but next day I would have several fresh cases in other parts of the town, and where the patients could not have been in presence of my former cases.—Dr. Buckn

43. Cases more frequent in large households. Isolation tried in a few cases, but with no success, owing to difficulty of complete isolation. I saw about fifteen cases in first stage on board the "Massilia" (coming to Sydney), evidently contracted in Melbourne, and my first case on shore, dated September 17 (or two days afterwards).—Dr. Cummings,

Annandale.

47. I think I cannot do better than give an outline of my own experience in my own house. I myself was attacked September 19th; my wife, who had not been out of the house for months, was attacked, September 22nd; my daughter, 24th; one son, 27th; a servant, 29th; and the nurse, who came in on September 22nd, and who had not previously come in contact with the disease, October 2nd. From the beginning the sick were isolated as much as possible, with the result that two of my sons escaped, of whom one was attacked six weeks afterwards. I do not believe that any of these persons could have come in contact with the disease except through me, and none escaped who came into direct contact with it. In another household a child, who had the disease pretty severely, was chiefly attended to by an old lady of 83, with whom she slept during her illness; the old lady escaped.—Dr. Macky, Glebe.

48. In nearly every household I attended, when one member was attacked the remainder were nearly all attacked subsequently, some simultaneously. Isolation seemed useless, but I could not speak strongly on this point.—Dr. Jarvie Hood, City.

48. In nearly every nousenoid 1 attended, when one memoer was attacked the remainder were hearly an attacked subsequently, some simultaneously. Isolation seemed useless, but I could not speak strongly on this point.—Dr. Jarvie Hood, City.
50. It varied. In some places it went right through the house, one person being attacked after another. In some instances only one case occurred in a household.—Dr. E. Warren, City.
51. In most cases of large families cases followed each other at intervals of one or two days, but generally one or more members escaped. In one house the total cases were twenty. No attempt at isolation was carried out.—Dr. Crago,

City.

52. In private houses, where the members of a family came into absolute contact, I have seen it sweep through the house. In boarding-houses, where there is not the same commingling, isolation has apparently arrested its progress. Once it began in a household where the members were in very close contact. I noticed that when it spread it did so very quickly.—Dr. Muskett, City.

57. My experience is that the disease is extremely communicable. In several households of nine and ten I have known not one escape, the cases following each other at intervals. Example: Friday, son; Saturday, daughter; Monday, daughter; Tuesday, father and mother; Wednesday, daughter. Have not attempted isolation.—Dr. Marshall, City.

58. In large households in town it usually ran through the house.—Dr. T. B. Clune, Petersham.

59. In large households I generally saw the first case followed by others in the course of two days; after that fresh cases occurring in rapid succession. Isolation appeared to have no effect.—Dr. T. M. Martin, City.

60. In most cases where it spread through a household the cases followed in quick succession, so that many were down at once. In many cases isolation undoubtedly protected several members of same family; but mostly the doctor was called in after the family was "down." In many households the father got the infection very late, and may therefore have taken it away from home, as he continued to go out. As a rule, complete isolation was not possible, such as one would insist on in scarlatina.

61. F.P., aet. 17, taken ill September 30th; a well-marked attack; quite well, October 13th; October 30th, same patient again attacked and two sisters; November 1st, mother and brother ill. Every effort to isolate in the first instance apparently with success. (b) The mother of a large family was taken ill October 29th, and completely isolated; October 31st, father and seven children all down, remainder of family following at short intervals.—Dr. Houison, City.

62. My experience goes to confirm my opinion that the disease is communicable, but that intimate contact is necessary, e.g., living in same house, or occupying same rooms during the day. (a) Mrs. W. came to visit the Ks., convalescent (?) from an attack suffered in Melbourne, together with her sister. Two days after arrival the sister fell ill, three days after Mr. K., five days after Mrs. K. and a visitor in the house, six days after a son and a servant. (b) I was attacked October 15th; my son, who sleeps in a cot beside me, fell ill on the 19th, his brother on October 20th, and sister on October 21st. The two latter sleep in nursery with nurse, and she was also attacked 21st.—Dr. Newmarch, North Sydner.

- 1. In a family of twelve in the country only two escaped, one case following another within a day or two.—Dr. Fisher,

- Noticed among large households where patient was isolated that no one else in family suffered. Amongst several large households, only the first I was called to, suffered at all.—Dr. Hart, Gunning.
 My common experience was first to find one attacked, then next day to find two or more down in the house. Observed result of attempt to isolate only in my own case, and then with good result.—Dr. Gibson, Windsor.
 Large households were in several cases prostrated within two or three days of the first case; but in other numerous instances exposure to contagion went on for weeks before the attack took place. The degree of isolation I was able to secure in some cases did not seem to protect, but the completeness of the isolation was not such as to warrant a strong opinion.—Dr. W. Prichard Bassett, Bathurst.
 Isolation was impossible. Cases seen by me on October 7th (the first) mother and two children living in back street.
- opinion.—Dr. W. Prichard Bassett, Bathurst.
 Isolation was impossible. Cases seen by me on October 7th (the first), mother and two children, living in back street. Next noteworthy cases, father, mother, and four children, living in a splendidly healthy situation, 3 miles out of town. No communication possible between the two families. From October 16th cannot state a first case from any place; whole families were attacked at the same time.—Dr. Bond, Penrith.

 A family, living 8 miles away, had a son who went to school, and who one day came home ill; the mother and seven children were soon attacked, father and one daughter exempt. A trained nurse, who came from Sydney, fell ill immediately after arriving.—Dr. Lambert, Berrima.

 When one member of a family, large or small, was laid up, the whole family usually followed suit, but not always.—Dr. Cribb, Raymond Terrace.

 Nearly always ran through the household when isolation was imposfeed or impossible—Dr. S. A. Alcorn Feet Maitland.

- Dr. Cribb, Raymond Terrace.

 11. Nearly always ran through the household when isolation was imperfect or impossible.—Dr. S. A. Alcorn, East Maitland.

 12. Isolation too imperfect; people would not look at the disease seriously, and laughed at isolation.—Dr. Henry, Warialda.

 13. Efficient isolation was seldom carried out here, though strict instructions were given. In some few cases where greater care was taken, I succeeded in preventing spread by isolation and daily fumigation of the house with sulphur. I had the first attack in 1891; four days later my housekeeper took it, and two days after that her two daughters. As I was compelled to visit many patients, I cannot say how far I may have helped to spread it, but within a few days of my being affected it was general throughout the district.—Dr. Lewers, Berry.

 14. In one house out of town, a son was attacked October 11th, mother 15th, two daughters 16th, father, son, and two others shortly after: no isolation.—Dr. Heesham, Richmond.

- In one house out of town, a son was attacked October 11th, mother 15th, two daughters 16th, father, son, and two others shortly after; no isolation.—Dr. Heesham, Richmond.
 From three-fourths to the whole of large households were attacked; isolation had no effect.—Dr. Griffith, Blayney.
 Many large households have had the complaint as from one another; at the same time solitary cases (as in my own house) have occurred in large families.—Dr. Brown, Parramatta.
 Impossible to isolate persons in country districts. In one case it was tried here, but the isolated person (a son) was attacked with the malady.—Dr. Fitzpatrick, Crookwell.
 In households attempts at isolation have appeared to me useless. In one household the sequence of cases was one case on each of the days 1(th, 11th, 13th, 14th, 16th. But my experience has been otherwise when the infected person was removed from the house. In a large establishment, numbering about thirty adults and twenty-five young people, from six years upwards, two well-marked cases occurred among the servants, and they were removed to the hospital, the one on the third, the other on the second day of attack, with the result that no fresh case occurred (1891).—Dr. W. W. Bassett, Bathurst.

- on the third, the other on the second day of attack, with the result that no fresh case occurred (1891).—Dr. W. W. Barsett, Bathurst.

 22. My own household consists of nine persons, and I and my brother-in-law were alone attacked. One nurse attended us both, and the rest of the family was cut off from communication with us.—Dr. Mallan, Armidale.

 23. When once it got into a house it generally attacked the majority of inmates at intervals of a few days. I have had as many as ten in one house, and six in another, down together.—Dr. Hester, Stockton, Newcastle.

 24. When once introduced into a household, cases usually followed in apid succession.—Dr. Lee, Wollongong.

 26. Have known whole households to be attacked simultaneously, in one case as many as nine. Have tried isolation, but found it ineffectual.—Dr. Killop, Goulburn.

 28. I knew of no cases in the town, but had heard of some at a shearing shed thirty miles away; and I could find no means of introduction to my house. But my first case in town was my wife, who was isolated from all but myself; two days after my brother, living with me, was attacked; next day I was attacked myself. Then I had no more cases for a fortnight.—Dr. Samuelson, Bourke.

 29. Have seen a whole household succumb one after another, except the mother and daughter who attended on the rest as they fell ill. In my own house, while my wife, a guest, and her child were attacked, another guest and a servant escaped, though the former succumbed after he left us, and went to the country about three weeks after. The servant never was affected.—Dr. van Someren, Orange.

 30. I have attended four in one household suffering at one time, and all have been attacked within two days of the first symptoms being noticed. Some have been isolated, but probably too late, as they suffered.—Dr. Wilson, Bowral.

 31. Isolation had little or no effect on the disease. In isolated households one member of a family has been attacked, and all the others have escaped without a single symptom.—Dr. Ross, M.L.A., Molong

- the others have escaped without a single symptom.—Dr. Ross, M.L.A., Molong.

 On being introduced to a household it nearly always spreads to all; or a few only, usually the older members escape.—
- Dr. Boodle, Walcha.

- Dr. Boodle, Walcha.
 36. In several large households the whole of the members were attacked in rapid succession, so that in less than a week from the first invasion ten, twelve, or more in the same house would be down together.—Dr. Evershed, Bega.
 37. Did not isolate; found it very communicable in small houses.—Dr. Williams, Uralla.
 38. When once introduced into a house all the members would, in a majority of cases, be affected, and, further, they would generally be attacked about the same time, so that all would be laid up at once.—Dr. Mills, Picton.
 40. In a hotel, family of nine and two maid-servants, all except the youngest child, aged four, were attacked one after another, the disease running through the family in fourteen days. The second case occurred two days after the first, the third two days after the second, and after that no definite number of days, but in rapid sequence. Others in the house wave attacked. No isolation Dre Ore & Todd Madean.
- another, the disease running through the family in fourteen days. The second case occurred two days after the first, the third two days after the second, and after that no definite number of days, but in rapid sequence. Others in the house were attacked. No isolation.—Drs. Orr & Todd, Maclean.

 39. I have no stringent proof that the disease is communicable; my general belief is that it is not.—Dr. Nagel, Bingara.

 41. My general impression was that communicability in large households was great.—Dr. C. Emilius Thompson, Broken Hill.

 43. One case of isolation of patient in a household of nine succeeded perfectly; no other case occurred; system of thorough disinfection employed. Isolation very difficult in limited accommodation of houses in this town and locality. The above case occurred in my own household. A servant was exposed to direct infection outside, was sent to her parents, recovered, and returned in a fortnight, Although I was constantly in contact with the disease I neither took it nor communicated it to my family by clothes, &c. Premises and room were constantly disinfected—chloride of lime, carbolic spray, &c.—Dr. Morgan, Wagga Wagga.

 45. In some households every member took the disease; in others only one or two were affected. No attempt at isolation was made, for in most cases the disease spread so rapidly that it was impossible.—Dr. Rowling, Gresford.

 46. My experience shows communicability is not marked, as evidenced by small number in large households being affected, and those affected were frequently simultaneously attacked. Isolation never practically done.—Dr. Macdonald, Murwillumbah.
- Murwillumbah.

 In my experience the disease is communicable. I have had several cases in the one house.—Dr. Waugh, Parramatta.
 In a large majority of cases the disease did not spread through households; in some few it did. Isolation impossible.
 I have no doubt about its communicability.—Dr. Neill, Bear Hill.
 As a rule nearly every member of a household contracted the disease within a week of the first case: some within two days of the first. No attempts made at isolation.—Dr. Wilson, Warren.
 In the same household the cases as a rule occurred almost at the same time, or else overlapped in point of time. If a break occurred the other members as a rule escaped. In my household of eight the two infected members—myself and wife—were partially isolated, and the rest escaped.—Dr. Todd, Maclean.
 All attacked in a house as a rule within two or three days after first appearance of the disease in that house, so that five or six would be ill together, the last being down before the first was fever-free. No attempts made at isolation.—Dr. Stapleton, Lambton. Stapleton, Lambton.

Have seen nine cases in one house all down within a week of the first attack. No attempts at isolation.—Dr. Nash;

Wallsend.

60. As a rule in my practice it ran through the family.—Dr. O'Dwyer, Gundagai.
61. I find the disease distinctly communicable.—Dr. Wilson, Narrabri.
62. Have seen one member of a household, when not isolated, did not communicate disease to others, but generally several

62. Have seen one member of a household, when not isolated, did not communicate disease to others, but generally several cases in same house. Have seen no attempt at isolation.—Dr. Morice, Tenterfield.
63. In most of the households I attended all those attacked were laid down within four days of each other, and often all within two days. Isolating several children of a family, after others were attacked, never prevented it, so far as I saw; although, on the other hand, I had several instances of one or two escaping in a family of six or eight persons.—Dr.

although, on the other hand, I had several instances of one or two escaping in a family of six or eight persons.—Dr. Eddie, Bombala.

64. In large households the disease is almost invariably communicated to others sleeping in the same room. Isolation, after one is attacked, does not prevent the others from having it. Members of household fall sick quickly one after another—one or two every day.—Dr. Failes, Coonabarabran.

65. A lad returned from the junior cadet encampment near Sydney. He was strictly isolated from the rest of the family. Influenza had been prevalent in this district for several weeks, but none of the family had contracted it before the boy's return. Six days after his return his mother fell ill, the next day a child, and by the tenth day all the family of six were affected. When some of them were convalescing the father was attacked.—Dr. Fielder, Wollongong.

66. Only in exceptional cases that some member of a family escaped. Isolation, when attempted in the early cases, seemed to have no effect in preventing the spread of the disease throughout the household.—Dr. Finlay, Young.

67. When the epidemic appeared in large households as a rule it very quickly went over the whole family, one or two days being the interval between subsequent cases. Up to lately patients thought so little of the disease that it was impossible to get them to take any precaution against infection. In a few cases where I attempted it I failed completely.—Dr. Malcolm, Helensburgh.

68. Although an isolated case would now and then occur in a household without infecting other members, in other houses whole families would be affected within twenty-four hours.—Dr. Read, Singleton.

69. All, or nearly all, members of families attacked, usually attacked within two days of each other.—Dr. E. R. Smith, Cowra.

74. In my experience, when it enters a house it gradually spreads through all in it, occasionally missing one or two members.

74. In my experience, when it enters a noise it grauually spreads allough and a property of the disease is beyond all question communicable.—Dr. Terry, Kiama.
75. In my belief the disease is beyond all question communicable.—Dr. Terry, Kiama.
76. In some cases every member of a household was affected; in others, one or two; and in a few it was confined to the original patient.—Dr. Breton, Wentworth.
80. Did not isolate any. As a rule, when one was attacked, most, or all, in the house suffered in succession within from two to four weeks.—Dr. Connors, Lismore.
81. In your few cases was it possible to isolate. The usual thing found was that the disease had made some progress before I

81. In very few cases was it possible to isolate. The usual thing found was that the disease had made some progress before I was called in.—Dr. Kirkland, Bathurst.
83. I have seen it run through a whole household. I have successfully isolated a single member of a large family.—Dr. Belson, Tumberumba.

83. Most of my cases in a household occurred within three or four days. I made no attempts at isolation.—Dr. Phillips, Parramatta.

84. Consider it extremely contegious.—Dr. Maguire, Molong.
85. If one in a household became infected all became infected generally. Very difficult to isolate up here.—Dr. Tresidder,

Ninety-nine contributors replied to this question, often in general terms, sometimes by an unsupported expression of opinion; and when recorded facts have prima facie appeared inconsistent with any hypothesis of spread hitherto suggested, it does not seem from these answers that any attempt was any hypothesis of spread nitnerto suggested, it does not seem from these answers that any attempt was made to explain them. A steady perusal of these replies, from beginning to end, leaves one feeling prominent, and one only—namely, of confusion. If from some answers it appear that whole families suffered as soon as one member of them was attacked, it is plain enough from others that often nothing of the kind happened. If it be occasionally said that isolation of the member first attacked sufficed to avoid illness for the rest of the household, from others it appears that isolation was useless; besides which it is often enough said that one member of large households alone suffered, although isolation was not even attempted. But the return is not to be disregarded for any of these reasons. It does not reveal anything positive as to the manner of spread; but then by itself it could not. Upon reflection, however, it is seen to warrant two statements: First, this behaviour of influenza in households is incompatible with the old notion of a noxious state of the atmosphere in general, and inconsistent even with the modern modification thereof, which (very weakly) regards the infection as widely air-borne after emanating from the sick; secondly, that the incidence of the disease upon infected households is just what would be seen if one with a dagger went by, stabbing here and stabbing there as undesigned propinquity chanced to make possible, and giving incommunicable wounds.

Question 12 (b).

What is your experience of communicability as illustrated by (b) isolated households (mode of introduction, subsequent spread therein, and time-relation of such outbreak to progress of the epidemic in the district. If in any such case the mode of introduction could not be discovered, mention whether very careful inquiry was made as to tramps, chance visitors, receipt of parcels, letters, &c., and the value to which a negative result is entitled in the opinion of the contributor).

A. The channel of introduction was not discovered. Seven answers.

METROPOLITAN.

26. In two cases the houses were isolated in extensive grounds. Six were affected in one, seven in the other, and in each case they were all affected at the same time. I made no special inquiry as to parcels, letters, tramps, &c Dr. Barkas, City.

I often enquired of patients whether they thought they had been in any place where they might have got the and the answer was always in the negative.—Dr. Mathieson, Waverley.

COUNTRY.

Country.

4. I have had many cases in the country from localities in which the next house was a mile distant, and I could not trace any communication for at any rate some time (say a week) before the attack.—Dr. Prichard Bassett, Bathurst.

6. Cases seen by me on October 7th:—The first, a mother and two children living in a back street; next noteworthy cases—father, mother, and four children living in a splendidly healthy situation 3 miles out of Penrith; no communication possible between the two families; from the last date, 16th October, cannot state a first case from any place; whole families were attacked at the same time.—Dr. Bond, Penrith.

7. Inhabitants in the country 2 miles away from any others were affected; could ascertain no mode of direct contagion of introduction by direct contagion.—Dr. Asher, Lithgow.

16. Most of the cases in my district have occurred without any sign of introduction from without.—Dr. Brown, Parramatta. (Pop. 11,680.)

24. Many cases occurred among the solitary residents of the bush that could not, I think, have been communicated.—Dr. Lee, Wollongong.

B. Introduction was avoided by isolating households. One answer.

- 52. Every family was attacked on this field, except two (the population is 261); the two [dwellings are isolated, the children were kept away from school, whilst disinfectants were freely used under my direction.—Dr. Neill, Bear Hill.
 - C. Infection was introduced, but did not spread. One answer.

COUNTRY.

- 35. A lady came from Armidale where there was believed to be no influenza at the time; shortly after, on 17th September, she developed the disease. No results followed in the large country household where she was stopping. The family took it a month later; (2) a young labouring man developed it in the bush 30 miles away, and came to town on 1st October; he is believed to have received no letters, and I can trace or suggest no source of infection; his friends, where he stayed in town, did not take it at all.—Dr. Boodle, Walcha. (This contributor fixes the date of epidemic prevalence in that district at October 5.)
 - D. Infection was introduced by an infected person or thing. Eighteen answers.

- 27. In all the cases I know of the disease was introduced by a friend or member of the family visiting an infected district
- 27. In all the cases I know of the disease was introduced by a friend or member of the family visiting an infected district and getting the disease from which the other members were affected.—Dr. Faithfull, City.
 34. In the school I have before referred to (see Q. 12 (a) 34), some visitors attended a religious service on Sunday, 11th October; these had the epidemic complaint, and two were so ill as to require treatment (one had a temperature of 104). On Sunday, October 18th, the epidemic had spread through the school as before stated.—Dr. Milford, City.
 36. My first four cases occurred in a family; the father and mother, having been to see relatives at Ashfield, were seized two days subsequently, and two out of three children two days after that—the third child, for no apparent reason, escaping.—Dr. Pockley, North Sydney.

- 12. A shearer, named A.W., came to me from Reedy Creek Station (21 miles away) suffering from influenza, on November 21st; against advice he went to his parents' house about 8 miles out in a locality where houses are about 1 or 2 miles apart; on November 23 his parents were attacked, and in rapid succession every household on the river—that is, in that section of the country.—Dr. Henry, Warialda. (The beginning of the epidemic is fixed by this contributor at October, but it became prevalent only about the third week in November).

 13. In the farm houses, the person first affected in each household was usually the father, who went out to the weekly market, or the son who drove the milk-cart in to the factory. In a few cases it commenced with a school-child.—Dr. Lewers, Berry.
- Dr. Lewers, Berry
- 15. In most cases the disease was contracted by a member of the family outside, and not from visitors, &c.—Dr. Griffiths,
- In most cases the disease was contracted by a member of the family outside, and not from visitors, &c.—Dr. Griffiths, Blayney.
 Three brothers, with their respective families, living within a radius of 3 miles, but isolated from their neighbours, and holding no communication with them other than the following, were attacked in succession. One brother paid a visit to some friends who were suffering some 20 miles away, returned home, and next day was laid up with the disease. All three families were then attacked in succession.—Dr. Griffiths, Gunnedah.
 The husband of my guest (suffering) came to see her, and then went to his home in the country; a week or ten days afterwards he was taken ill, and his children were attacked after him. Then his wife went out to him, but escaped a second infection.—Dr. Van Someren, Orange.
 A female servant in a house to which some children went, who had been removed for isolation, but who began to suffer two days after removal. No other influenza cases were anywhere near at the time (the servant removed the slops, but other communication with the patients is not excluded by the contributor).—Dr. Evershed, Bega.
 Found it brought there (to isolated households) by an affected person.—Dr. Williams, Uralla.
 Believed to have been started by receiving back an illustrated paper from an affected house. The boy first attacked fell asleep with the paper over his face, and became ill twenty-four hours afterwards. This case occurred during the recrudescence, and no other source of infection could be traced, unless it be possibly attributable to a visit to Grafton eight days before.—Dr. Orr, Maclean. (The epidemic ceased on November 30, and the recrudescence occurred on December 28,)
 First two cases in the country, 7 miles from Greta, both in women; ten days after the brother took it; all of them after a few hours' visit to Maitland. Five weeks afterwards it suddenly appeared in Greta, a number of cases at o

- Young.

 70. One household in particular had been healthy until a member returned home from a shearing-shed which had been infected; the whole family of six members were within a week laid up.—Dr. Wrigley, Glen Innes.

 74. Lady came from Sydney to Binalong; had contracted it there from servant. Forty-eight hours after her arrival her daughter caught it, and three days later a gentleman living in the house had it. No other cases near the house at all at this time.—Dr. Thane, Yass.

 75. A good case occurred in 1890. Two families, living some 20 miles from me, were attacked when no other person within 15 miles was suffering. The father in the household first attacked had gone to camp with cavalry force, and returned with it; the other family visited them and all suffered.—Dr. Terry, Kiama.

E. Miscellaneous and doubtful—Eight.

METROPOLITAN.

20. In isolated households the disease came as in town households, spread in the same way, and in my opinion its spread was to a large degree irrespective of tramps, chance visitors, letters, &c., &c.—Dr. Norrie, City.

COUNTRY.

Country.

2. Difficult to answer, as so seldom called in, except for sequelæ. The epidemic was not at all severe here, and there was no fatal case; did not make inquiries as to letters, tramps, &c. —Dr. Hart, Gunning.

30. I have had cases under my care in farms several miles apart, where the inmates covld give no information how the disease was contracted. At Joadja Creek, an isolated mining township, the first case during 1891 was supposed to have been brought from Sydney.—Dr. Wilson, Bowral.

31. It is impossible to say what the cause of the epidemic arises from, but the probability is that it is imported by tramps, perhaps visitors, &c., or, perhaps, by some obscure meteorological change.—Dr. Ross, M.L.A., Molong.

46. A few cases have been in isolated houses, but members had been in touch with the village where original cases occurred, and had also received goods and parcels from stores, and letters by post.—Dr. Macdonald, Murwillumbah.

72. Country residents usually flock to houses where anyone is sick; isolated households cannot, therefore, be found.—Dr. Lane, Inverell.

73. There is no possibility to trace the introduction of the disease to isolated households, &c., in this district. Chance visitors and tramps are continually moving about, and the disease seemed to spread very irregularly.—Dr. Colpe, Nymagee.

Nymagee.

A great many houses far away in the bush were affected, but, of course, they received visitors, letters, tramps, &c. - Dr. Tresidder, Dubbo.

It is not necessary to say much about those answers which merely record failure to discover the mode of introduction; but it may be well to mention that 6 and 16 A, represent one practitioner out of four in a town of moderate size, and one practitioner out of many in a large town of 11,680 inhabitants. The instance 52, B, gets its importance from the care with which the contributor describes the incidence of the disease on the rest of the inhabitants. Here he says nearly every family was attacked; elsewhere that he saw ninety-six patients, while the population of the township alone is 261; and therefore, as the surrounding district is very small, one-third of the inhabitants suffered. Answer 35, C, proceeds from a very careful contributor who, like the last-mentioned, is the only practitioner in his district. It illustrates the variable communication (not communicability or character) of the infection of influenza; for in another place, he unmistakably traces the introduction of the disease in its epidemic form to his town and district to two other events which occurred at a later date, and which thoroughly resemble the two now under notice in every respect except that they were, and that these were not, starting points of an epidemic (vide 12 (c.) 35.) In the fourth division, D, some valuable and many interesting examples are mentioned more or less fully. 27, 15, and 37 are clear and positive statements of experience, to which importance may be properly attached; 34, 36...36, and 74 seem specially good cases, though the first is a little defective in point of detail, and the second lacks a date by which its relation to the epidemic in that district might have been ascertained. 40 and 66 bear upon communication of infection by letter, &c.; 66 is an unsupported expression of opinion, but 40 is more fully detailed, and, although not free from a doubt recognised by the contributor himself, is worth attention and remembrance.

There are other good cases, evidently carefully observed, but not quite so carefully recorded.

The total number of the answers to this question is not large, but the weight of the evidence, not merely in number of witnesses but in character of the testimony they furnish, is very markedly in favour of the occurrence of influenza in isolated households only as the result of importing the infection thereto. Nor are hints wanting that the introduction of a sick person is not essential, but that possibly

the contagion may be carried by some indifferent article.

Question 12(c).

12. What is your experience of communicability, as illustrated by (c) villages, &c.—as to commencement of epidemic therein, history of first case, subsequent progress, &c.?

METROPOLITAN.

- 2. Among the earliest victims here were two letter-carriers and two ticket-collectors at the railway station .-- Dr. M'Leod, Hurstville.
- 43. I saw about 15 cases on board the P. & O. s.s. "Massilia," coming round from Melbourne on September 15; in early stages, and evidently contracted in Melbourne.—Dr. Cummings, Annandale. (Length of voyage, about 36 hours.)

COUNTRY.

- The influence of the first case on Gunning was not noticeable; comparatively few persons suffered (in the township); most cases occurred outside.—Dr. Hart, Gunning.
 Epidemic commenced in outlying districts and finished up in the township. First cases were patients who had visited Goulburn (29 miles), and came home sick; from which places it spread rapidly.—Dr. Drought, Crookwell.
 A widow lady was attacked. She was visited by her three sons. They all, with their families, suffered and became centres of disease in their districts, which until then had escaped.—Dr. Lambert, Berrima.
 Epidemic spread here from Tamworth through towns en route, we getting it about a week after Bingara (26 miles). Brought by travellers in my opinion, and followed course of travel both in locality and relative time.—Dr. Henry, Warialda. Warialda.
- 15. In villages; ran a course of about a fortnight and disappeared. Continued longest in the town.—Dr. Griffiths, Blayney.

 19. The first case occurring in this district, so far as my knowledge goes, was contracted in Goulburn.—Dr. Fitzpatrick, Crookwell.
- 27. A storekeeper went to Sydney, and there contracted influenza. He returned home, and in a few days his wife and children were attacked. It then spread rapidly through the township and through the mines, that mine being the first to suffer that dealt with that particular store exclusively, the store cart going backwards and forwards twice a week.—Dr. Parry, Emmaville.

 30. At Joadga Creek, an isolated mining-township, the first case during 1891 was supposed to have been brought from Sydnoy. Dr. Wilson Payrel.

Sydney.—Dr. Wilson, Bowral.

31. All villages seem to suffer alike, nearly simultaneous.—Dr. Ross, M.L.A., Molong.

35. On October 7th, at a house in town, there was a small dance at which a lady from Sydney was present who was just developing influenza. Three ladies took it who were present, one suddenly on the 10th, the others gradually, about the 11th. Another lady who was present at the dance, but who nursed the case of the 10th, began to show it gradually about the 14th. The father of one of these took it on the 17th. There were no other cases in the town at the time. (2) A woman went to Quipolly, on the railway line, where it was prevalent at the time, on October 5th. She and one child developed it on the 13th, and returned immediately, and her husband developed it on the 21st. These had no communication with the people mentioned above. From these two centres the epidemic spread rapidly.— Dr. Boodle, Walcha.
37. Found it brought here by affected persons to the town.—Dr. Williams, Uralla.
40. Believed to have been brought by a servant girl from Sydney who was the first attacked, but not until nine days after her arrival.—Dr. Orr, Maclean.
46. First cases observed in two hotels in the village, tending to show that inmates of frequented houses were more liable.—Dr. Macdonald, Murwillumbah.
48. My first case in the district was in a household 20 miles from town. Two days previously the mother had visited

Dr. Macdonald, Murwillumbah.

48. My first case in the district was in a household 20 miles from town. Two days previously the mother had visited friends at Goulburn who were suffering from the disease; on the third day she and a baby were down with it, two days later the whole household of thirteen persons was down with it. Neighbours visiting developed it in two or three days, and it spread thence over a radius of 14 miles. —Dr. Blackwood, Cooma.

51. Disease appeared first at a hamlet 8 miles from Muswellbrook; afterwards a gentleman returned from Sydney, some of his family were attacked, and shortly afterwards forty or fifty families suffered. —Dr. Grigson, Muswellbrook.

52. First case was as follows: —Mrs. H., wife of hotel-keeper, arrived here November 14th, after journeying from Sydney to Glen Innes in the same compartment with a woman and child who were suffering from influenza very severely. There was no possibility of isolating, then came cases; Mr. H., the housekeeper and child, and everybody except one inmate of the hotel. Adjoining house, eight cases; next to that five cases, and so on. Every family on the field was attacked except two.—Dr. Neill, Bear Hill. (The population is 261.)

53. See Q. 12 (0) 53.

53. See Q. 12 (b) 53.
55. The town was first attacked, and towards the end the surrounding district.—Dr. Ventry Smith, Murrumburrah.
58. My first case came from Moss Vale; my second case was one of a crop, the infection being brought from a neighbouring railway township. This crop had no connection with the first case, and ushered in the epidemic.—Dr. Nash,

60. The disease was certainly brought by passengers from Sydney to different parts of this district.—Dr. O'Dwyer,

60. The disease was certainly brought by passengers from Sygney to univerent parts of the Gundagai.
61. Mrs. D. contracted the disease in Melbourne, and returned to Narrabri. Her son, aged 6, who had remained at home, developed the disease three days after; one day later two girls, aged 5 and 13, fell ill simultaneously. Two days later Miss H., sister to Mrs. D. who slept with the latter children, contracted the disease. Mr. D. was the last victim, he being a sufferer from chronic bronchitis, &c. Two inmates of the household alone escaped, one being thrown but slightly in contact with the patients. In this household Mrs. M. seemingly contracted influenza, developing it two days after a visit there, paid while Mrs. D. was sick. Then Mr. M. followed, and at intervals of a day or so four children and two servants. Mrs. M.'s sister alone escaped in this house, and she gave a history of having had the disease during the previous epidemic. These were first households affected in the district.—Dr. Wilson, Narrabri.
62. First case here occurred in an hotel in both epidemics.—Dr. Morice, Tenterfield.

Dr. Wilson, Narrabri.

62. First case here occurred in an hotel in both epidemics.—Dr. Morice, Tenterfield.

63. The epidemic broke out suddenly and in places wide apart on one day, immediately succeeding a strong southerly gale, which lasted two days, dozens of families going down within two days.—Dr. Eddie, Bombala.

67. The first case I had at Otford was undoubtedly infected while on a holiday at Kiama. The first symptoms appeared after his arrival home. Two brothers were attacked, one on the third the other on the fourth day after. In Helensburgh the first case broke out two days after a visit to Sydney, her husband three days after. Progress very quick through the village.—Dr. Malcolm, Helensburgh.

69. Usually the appearance would be simultaneous in many houses.—Dr. E. R. Smith, Cowra.

76. The first case in Wentworth appeared to have been contracted in Broken Hill, and been brought here. Thence it gradually spread amongst friends and acquaintances.—Dr. Breton, Wentworth.

78. The first family attacked in this town was one in which the father went away driving, and stayed a night at an hotel thirty miles away, where influenza was present. He came back ill, and two days afterwards the children (six in number) and the wife took it severely, one after another.—Dr. M'Knight, Urana.

80. I have no observation of sufficient value to record here; but I have observed generally that in a remote valley, for instance, with twenty families and a school, all the families would be attacked within a limited time. In this district, although the disease was in all parts at the same time, yet one could trace it along certain lines.—Dr. Connors, Lismore.

82. In one case brought by a sundowner, when it spread through nearly all the village.—Dr. Belson Tumberumba

82. In one case brought by a sundowner, when it spread through nearly all the village.—Dr. Belson, Tumberumba.

In commenting upon these answers it will be well to mention first of all that the cases recorded are in no sense either selected or exceptional. They are few: first, because a small proportion of total practitioners replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all; secondly, because such information as is replied to the circular at all c furnished only by practitioners in country districts, where alone the necessary opportunity of observation can be sometimes got; thirdly, because that opportunity did not exist in the more populous districts even In the first place attention may be directed to the observations 55 and 8. An important fact is recorded under 55—that the town suffered first, and the surrounding district afterwards. That is what would be expected of an epidemic and contagious disease; but how, then, does it happen that Crookwell, the town mentioned under 8, became infected after the surrounding district had begun to suffer, and from it? The explanation is that Crookwell is a small place 35 miles from Goulburn, which is a large town, a rich and populous district intervening between the two, and that Goulburn was first attacked, and severely; so that the invasion of Crookwell may either be regarded as an incident of the spread of the disease from Goulburn through the district surrounding it, or the case may be explained thus: the preponderating importance of Goulburn over Crookwell as a business centre would most likely attract persons from the neighbourhood of Crookwell (and cause them to be infected there) before. or rather than, the residents in Crookwell, whose main centre for business was that town itself, Then the cases 9, 35, 48, 52, and 61 are worth special attention, as being instances in which the spread of the disease through uninfected towns and districts from imported centres was carefully followed; and 12 (Warialda) is a similar observation, which, however, has reference to the gradual progress of the disease along a coach road, and speaks of the successive invasions of the townships upon it. Warialda is 125 miles from Tamworth, a large town on the main northern railway line. Communication between the two is by coach only, and the townships on the road are five—Athunga, Manilla, Barraba, Cobbadah, and Bingera; but the account omits dates and particulars, which would give it weight. There are other good cases in the series, the whole of which should be perused and weighed.

The inference from these data is that whenever the circumstances can be completely ascertained under which isolated townships become invaded, it will be seen that the contagion was introduced at one or more points; and whenever the channel of introduction is discovered, it will be found to have consisted in a person already suffering (with exceptious in which it will be found, if any discovery be possible, that

the channel was an infected article).

Question 12 (d).

12. What is your experience of communicability as illustrated by (d) influence of public meetings (church, school, &c.)?

METROPOLITAN.

8. Prolific. I consider schools should be sooner closed on an outbreak than they are.—Dr. Kesteven, North Sydney.

9. Many in this district distinctly traced their infection to the crowded revival meetings going on here during the epidemic.—Dr. Harold Browne, Summer Hill.

20. I am of opinion that public meetings contribute to a more rapid and extensive spread of the disease.—Dr. Norrie, City.

29. Disease seemed so general that it was difficult to observe any influence of this kind.—Dr. Simpson, Burwood.

35. Great source of infection.—Dr. Mathias, City.

37. Strong; I observed a very large number of cases occurring in persons who were attending over-crowded meetings during church mission.—Dr. Collingwood, Summer Hill.

60. Public assemblies had a marked effect.—Dr. Quaife, Woollahra.

- 2. Influence not noticeable; comparatively few suffered in Gunning itself.—Dr. Hart, Gunning.
 23. Decided exacerbation of the disease among those attending two large river-picnics.—Dr. Hester, Stockton, Newcastle.
 24. Influenced by them very little.—Dr. Lee, Wollongong.
 27. There were no public meetings of any importance, but, I have no doubt, many contracted the disease at one of the three churches.—Dr. Parry, Emmaville.
 28. Had no cases among children attending school, or whose brothers, &c., were attending.—Dr. Samuelson, Bourke.
 30. I believe a person attending a public meeting, and suffering from the disease, would spread it.—Dr. Wilson, Bowral.

Bowral.

31. Public meetings, schools, concerts, &c., does not make much difference.—Dr. Ross, M.L.A., Molong.

37. Tend to spread the disease.—Dr. Williams, Uralla.

48. Schools not liable to spread the disease; as, in my experience, children show no proclivity towards it. Have no reason to think meetings, such as church, &c., are factors in spreading the epidemic.—Dr. Macdonald, Murwillumbah.

49. Believe that schools tend to spread the disease.—Dr. Morice, Tenterfield.

40. The public school and Illawarra College were both kept open, and, I believe, to a great extent, increased the spread of the disease. The same applies to all the public schools round Wollongong.—Dr. Fielder, Wollongong.

40. Epidemic very prevalent among school-children; unable to estimate influence of public meetings, &c.—Dr. Finlay, Young.

41. Young.

42. The public school was not closed until late in the epidemic, which, I have no doubt, greatly influenced the spread of the disease.—Dr. Malcolm, Helensburgh.

43. Very little.—Dr. E. R. Smith, Cowra.

44. On General Booth's visit to Armidale large numbers of the Salvation Army travelled there, many returning with influenza. I believe this spread the disease to districts lying away from the railway line.—Dr. Lane, Inverell.

45. Wery often communicated at the public school.—Dr. Belson, Tumberumba.

There are only twenty-three answers to this question-seven metropolitan, and sixteen from country districts, where opportunities are more favourable for making this kind of observation. Nine and 37 among the former are noticeable, and 29 furnishes a criticism upon the rest of that class. the second set of answers 23 and 72 are the most definite; it seems likely that both would have been well worth a detailed record. The question being whether public meetings actually do influence the spread of this disease, the only pertinent answer to it would be a record of observed fact. But, in another part of his excellent account, Dr. Chas. E. Rowling, of Gresford, gives a very good case indeed, for which see Additional Observations, F. 45, p. 41.

QUESTION 13,

13. Relate any good cases illustrating the length of the incubation-period on the hypothesis of communicability, bearing in mind that secondary cases may, in some instances, have been exposed to a source of contagion other than that to which attention was directed, and specifically stating whether this source of fallacy either was excluded, or could not be certainly excluded.

Most of the answers are given below, but nineteen are dealt with separately:—

METROPOLITAN.

9. A man who took influenza avoided his sick wife as much as possible, but she developed the disease three days after his first day of illness; her nurse two days after her; a servant three days after the nurse. Taken altogether I should fix incubation at from 24 to 50 hours.—Dr. Harold Browne, Summer Hill.

10. Difficult to note; but in some cases would appear to be only a few hours.—Dr. E. G. Blaxland, Burwood.

12. The length of the incubation period was from three to six days.—Dr. Eichler, City.

14. Twelve hours to three days.—Dr. McMurray, City.

16. A man living on Goat Island (an island in the harbour used for military purposes, where one or two families are employed and live) was quite well on November 1st, when he went to visit a friend in the city who was recovering from influenza, but still confined to his room. He fell ill the next day, and the disease afterwards attacked his wife and child.—Dr. Carruthers, Balmain. Carruthers, Balmain.

20. I can fix no definite time of the incubation of the disease; some cases appeared and developed very suddenly, like an eruptive fever, others showed a few days of incubation, not more than three to five in my experience.—Dr. Norrie,

City.

27. Incubation period about two days. The husband, in a family of six, came to me on October 19th, suffering from influenza. I had him isolated in the far end of the house, and his family were to be kept from him; however, his wife would attend to him. She was laid up on the 21st, the children on the 22nd, and the little girl with the empyema, who was at the other end of the house, was infected on the 24th, probably from the mother who went in to see her on the 22nd. A young man who was in the house, but who would not go into any of the rooms of those infected, escaped infection during the time these were laid up, say five days; I then lost sight of him as he left the house, but I have heard from a member of the family that he did not get the influenza.—Dr. Faithful, City.

29. If the disease be communicable in the ordinary sense (like scarlatina) which I very much doubt, I should say the incubation is not over three days.—Dr. Simpson, Burwood.

34. If the above (see Q. 12 (b) Metropolitan, 34) caused the spread of the disease through the school, the period of incubation would be one week.—Dr. Milford, City.

39. Personal experience: pains in limbs, rise of temperature, and vomiting, October 24th; wife, headache and feeling of malaise, October 27th; rise of temperature, October 29th.—Dr. Pilkington, Leichhardt.

41. Probably the incubation is about two days.—Dr. Bucknell, Kogarah.

48. One family I sent to an isolated cottage by the sea, immediately on appearance of the disease in the house. Out of six, three developed it within eight days, and no other source of infection was possible.—Dr. Jarvie Hood, City.

51. I am inclined to think the period of incubation short—not more than two or three days.—Dr. Crago, City.

58. About six to seven days.—Dr. T. B. Clune, Petersham.

COUNTRY.

Country.
5. Cannot regard the disease as communicable, and cannot fix a period of probable incubation. Many persons were struck down suddenly and without warning.—Dr. Bond, Penrith.
6. Saw many cases where the period of incubation would be inferred to be about 40 hours.—Dr. Asher, Lithgow.
8. Incubation, 12 hours in my own case. I visited patient at 11 a.m., felt ill at 11:30 a.m.; passed off; and observed first symptoms at 11 p.m. that night. This patient was suffering from septic metritis, her sister came to see her, and developed scarlet fever 48 hours after arrival in the house, the husband influenza a week after, and myself about the third week.—Dr. Drought, Crookwell.
10. As a rule there was no history of communicability, and when there was the incubation period (if there was any) was quite uncertain.—Dr. Cribb, Raymond Terrace.
19. From a week to fourteen days. In some cases it appeared two days after exposure to contagious influence.—Dr. Fitzpatrick, Crookwell.
23. Roughly, I should say two or three days was the average period. Sources of fallacy certainly not evolved.

23. Roughly, I should say two or three days was the average period. Sources of fallacy certainly not excluded.—Dr. Hester, Stockton.

- 28. Could see no incubation period.—Dr. Samuelson, Bourke.
 30. I believe the period of incubation may be from two days to about a week; in my own case about a week.—Dr. Wilson,

Bowral.

31. The period of incubation appears to come on suddenly, and frequently without much warning, generally with pain in the head or loins, chills, &c. I do not think it is communicable.—Dr. Ross, M.L.A., Molong.

37. I think the incubatory stage very short (say), one to three days.—Dr. Williams, Uralla.

41. My impression is that the incubation is not more than three days to a week.—Dr. C. Emilius Thompson, Broken Hill.

43. J.C. returned ill with influenza, contracted at a shearing shed 20 miles distant; family of 9 contracted influenza from fourth to eighth day after his arrival. Incubation apparently shorter in younger children.—Dr. Morgan, Wagga Wagga

fourth to eighth day after his arrival. Incubation apparently shorter in younger children.—Dr. Morgan, Wagga Wagga.

45. The manner in which the epidemic broke out is peculiarly interesting. Two brothers, about 22 years of age, returned home to Lostock, about 12 miles from here. They had been staying in Maitland for a few days, and in a house where there were several cases of influenza. They arrived in Lostock on October 16, on which day there was a school-feast, followed by a concert and dance; they attended the concert, but were too ill to remain for the dance. I saw them the next day, when they were undoubtedly in the first stage of an attack of influenza. Within three days nearly every person who attended the festivities was more or less ill, some very severely, some only mildly. A young girl left Lostock the next day to stay with friends near Maitland, about 40 miles away. The following day she was unwell, and had a rather severe attack of the disease, and nearly every person in the house where she was staying was infected. I traced five other cases where the disease was carried from this Lostock centre and formed fresh foci of infection.—Dr. Chas. E. Rowling, Gressford.

52. I am of opinion that a period of incubation of from twelve to thirty-six hours may be accepted, although cases have occurred in which such seemed absent.—Dr. Neill, Bear Hill.

54. I believe the interval between infection and invasion was in some cases as short as forty-eight hours, and in none longer than three days or five days.—Dr. Todd, Maclean.

55. I cannot give any marked case, but from my experience it was between two and three days.—Dr. Ventry Smith, Murrumburrah.

58. The second cases in my practice occurred in two families, some of the members of which were exposed to the infection and invasion was a four miles away, where the disease was present.—

- The second cases in my practice occurred in two families, some of the members of which were exposed to the infection for the first time the day before I saw them at a friend's house a few miles away, where the disease was present.—Dr. Nash, Wallsend. (The first was an imported case not connected with these. The localities referred to are
- thickly populated.)

 66. My own case. I was certainly feeling in the best health five minutes previous to the time I was suddenly attacked.

 While visiting the members of a household suffering from influenza, a thunder shower came on, and I accepted a macintosh belonging to one of the patients. Five minutes after leaving the house I began to feel ill with the disease. Of course I had been attending many cases for two weeks before, but felt perfectly well until the time named.—Dr.

Of course I had been attending many cases for two weeks before, but felt perfectly well until the time named.—Dr. Finlay, Young.

67. I had many opportunities of noting the period of incubation in solitary houses where it was impossible for the secondary cases to have been exposed to any other source of infection (I do not believe contagion is necessary), and the average length of incubation was three days, from 1 to 5, mostly about the third day.—Dr. Malcolm, Helensburgh.

69. A gentleman arrived from England, via Sydney, at 12:30 a.m., October 18, quite well. Influenza was in the house. At 6 p.m. on the 19th he had the disease in a pronounced form.—Dr. E. R. Smith, Cowra.

85. A patient was travelling to a friend in the bush, and was taken ill with influenza on the way. He stayed in his friend's house, and four days afterwards all began to show symptoms. But they could have been exposed to contagion from other sources, because letters, visitors, &c., used to arrive at any time.—Dr. Tresidder, Dubbo.

The nineteen cases that follow seem to be of special though unequal value; they are divided into four classes:-

I. Cases in which there was a definite exposure.

Mrs. B., at 75, and in good health, went into Goulburn, where the epidemic was raging, and the next day had to send for me, suffering from the initial symptoms. I noticed that those who had been to see persons suffering from influenza were laid up themselves in twenty-four hours.—Dr. Hart, Gunning. (The apparent intention of the contributor is to say that his patient went to, and returned from Goulburn on the same day; but was Gunning at that date an uninfected place? No date is assigned to the occurrence.)
 My patient drove a lady home, 10 miles; she was seized with the disease in Armidale, and was sent home to be nursed. From her he evidently contracted the disease, as he was not previously near any person suffering, nor was he in any house where it existed, nor had he been in the town. Two days afterwards he was ill himself. I am certain in this case that there was no other source of infection.—Dr. Mallam, Armidale. (A little more detail would have rendered this case convincing, in view of the contributor's general carefulness.)
 Mrs. D. introduced influenza into Narrabri, October 9. On the 12th, a boy, aged 6 years, who had remained at home during the absence of his mother, contracted the disease, and four other members of the household scon followed. Mrs. M., who lived a quarter of a mile away, visited Mrs. D. on the 12th, and began to be ill on the night of the 14th; her husband followed on the 17th. No other source of contagion was possible, as these were the first cases in the district.—Dr. Wilsen, Narrabri. (Very likely it was carefully ascertained that Mrs. M. had not been in Mrs. D's. house before the 12th, but it is not stated.)
 One marked case may be recorded, as I can vouch for the facts stated. A man from here went 30 miles away, and slept

78. One marked case may be recorded, as I can vouch for the facts stated. A man from here went 30 miles away, and slept at an hotel where a man had influenza badly. He came back home feeling influenza coming on the second night after. Exactly two days after two of his children had it in severe form, and the rest followed. There were no other cases in this town at the time.—Dr. Macknight, Urana. (But perhaps the infection of the children is the point of this case, so that it should properly be included in the next class.)

II. Cases in which infected persons arrived at uninfected places.

37. Thirty-six to forty-eight hours. Case: husband, onset, September 15; wife, September 17; and on this day a child was removed to an uninfected household. This child fell ill there September 19, and was returned home on the 20th. The first case in the household to which it had been removed occurred during the night, September 21-2, and it was followed by two other cases.—Dr. Collingwood, Summer Hill. (However, the inmates of the second household were friendly with the first, and it is not clearly stated that the child formed the only medium of communication between the two. The epidemic period in this suburb is fixed by this contributor to have lain between September 15 and December 7.)

12. A. W. came to me on November 21, suffering from influenza, from a locality 21 miles away, and went to his father's house in a locality 8 miles away, where households were from 1 to 2 miles apart. His parents were attacked November 23.—Dr. Henry, Warialda. (The epidemic period is fixed by the same contributor between October 20 and December 8; the details are defective.)

27. Mr. G. returned home suffering on October 13; his son was attacked on the 15th, his wife and other children on the 17th.
—Dr. Parry, Emmaville. (These were the first cases in the town, from which the epidemic there started. Vide 12 (c), Country 27, supra.)
40. The best case of which I know is that of a woman who never goes out. Her son was attacked, and she contracted the disease three clear days after. Fallacies excluded.—Dr. Orr, Maclean. (No date is assigned to this case, so that its relation to the epidemic in Maclean does not appear.)
51. Mr. F. arrived from Sydney, suffering, on Saturday. Mrs. F. was taken the following Wednesday. No epidemic influenza here before this.—Dr. Gregson, Muswellbrook.
74. Forty-eight hours after arrival of a lady suffering her daughter fell ill; a gentleman living in the house fell ill three days later. No other case near the house at this time; any other cause carefully excluded at the time.—Dr. Thane, Yass. (In a matter which does not admit of assumptions, it is a pity that the contributor should not have clearly stated what he most probably means to be understood: that the daughter had remained in the house referred to during her mother's absence.)

III. Cases in which healthy persons entered infected places.

35. Two ladies, living miles in the country, started for Sydney during the early part of the epidemic, before the disease had spread into the country. On arrival they both went to an infected house, and on the fourth day were both showing symptoms of infection.—Dr. Mathias, City. (Dates and locality, or a statement that that part of the country from which the ladies came was not at that time infected, are wanting.)
36. My first four cases occurred in a family; the father and mother having been to see relatives at Ashfield (a suburb) were seized two days subsequently, and two out of three children two days after that; the third child, for no apparent reason, oscaping. These were my first cases, but, of course, it was impossible to exclude other possible sources of infection.—Dr. Pocklev. North Sydney.

seized two days subsequently, and two out of three children two days after that; the third child, for he apparent leason, escaping. These were my first cases, but, of course, it was impossible to exclude other possible sources of infection.—Dr. Pockley, North Sydney.

57. Mrs. S. had been on a visit to Rookwood (a suburb) for a week; the house she went to was isolated and no case of influenza near. She returned on Saturday about 5 p.m., and found her son had developed influenza during her absence. On Sunday, during evening church, and about 7 30 p.m., she felt ill and developed influenza.—Dr. Marshall, City.

11. D. was laid up on November 25; his wife and two children fell ill on November 28. On this date Mrs. H. came to nurse them, and was laid up December 1; on this date Mrs. M. came to nurse Mrs. H., and was attacked December 4. The husbands of Mrs. H. and Mrs. M. were exposed to infection elsewhere, but the patients themselves could have been exposed only to the one source of contagion. Several other examples almost as clear could be brought forward.—Dr. Clay, Rockdale. (The close of the epidemic in this suburb is fixed by Dr. Clay at November 30; however, the information does not disclose the residence of Mrs. H. or Mrs. M.)

24. A married daughter drove 10 miles to nurse her parents, who were both suffering; a little less than 48 hours after she entered the house she failed. Her own district was at that time uninfected.—Dr. L. Lee, Wollongong.

71. Three persons who had had no previous communication with any source of infection went to a house where the disease was, and all three took it; two were laid up on the third day after arriving, and the third on the fifth day. In other cases occurring amongst families the duration was from 24 to 48 hours.—Dr. Young, Maclean.

IV. Cases in which it was believed that the time was known at which the infection was received.

In my own case I had no attack un'il late in the epidemic. In examining the throat of a case suffering from severe coughing I was once or twice caught full in the face; this was in the evening. Thirty-six hours after I felt feverish, the climax of the fever being about 42 hours after presumed infection.—Dr. Thomas Dixson, City.
 On Thursday morning, October 8, I noticeably inhaled the pungent breath from a severe case of influenza. On October 10, before 6 p.m., I definitely had the disease.— Dr. Philip Muskett, City.
 I saw the first case on September 2, and on September 4 I contracted the disease myself. On examining a patient's chest I got a whiff of his breath, and it struck me at the time I would contract the disease. I believe in my case it was two days, but I may have contracted it at any date.—Dr. M'Killop, Goulburn. (This statement is obscure.)
 A local bank-manager interviewed a storekeeper who was laid up with the complaint. He said he sat very close to the patient's bedside, and that the latter breathed right up into his face. Two days afterwards he fell ill. I could trace no other source of contagion in this case.—Dr. Wilson, Warren.

Without criticising at length the examples given in the list and the four classes above, it may be observed that on the whole there is evidence that the incubation-period of influenza may be as short as one day. Most of the cases available for judging of this, however, are such as can only show that it could not have been longer than a certain time; because proof that the infection was received at the earliest moment possible under the circumstances, namely, the moment of contact, is received at the earliest moment possible under the circumstances, namely, the moment of contact, is necessarily wanting. Careful watch, however, kept in thinly populated districts, will after a time, furnish a sufficient number of cases in which an uninfected person who was exposed to infection for a known period of short duration, thereafter returned to the uninfected place from whence he issued; and such cases will establish the length of the incubation-period in the cases observed. From a sufficiently large number of such examples it would be possible to judge of the variations due to personal differences, &c., and thence, at last, to frame a statement safe for general use. But the above fifty-three replies warrant an opinion that the incubation-period of influenza is short in most cases, and about 2 days or less, even after due weight has been allowed to all their avoidable and unavoidable imperfections.

QUESTION 14.

In gour neighbourhood was the course of the epidemic after it had begun steady (as by progressively increasing prevalence to an acme, followed by a steady decline) or fluctuating?

METROPOLITAN.

Thirty-eight contributors replied "steady" or its equivalent.

Thirty-eight contributors replied "steady" or its equivalent.

Eleven contributors replied as follows:—

22. Steady; decrease rapid.

24. Came suddenly, continued steadily, disappeared suddenly.

26. Steady; termination rapid.

Steady; rapid increase, sudden decline.

32. A steady, sudden rise; gradual, uneven fall.

Steady rise; longer decline, interrupted by a slight recrudescence.

37. After beginning there was a lull, then a great influx of cases; decline steady.

39. Steady but rapid in increase and decline.

41. Steady, but rapid.

41. Steady but rapid.
56. Everyone seemed to fall ill about the same time, and it disappeared suddenly.
62. Steady progress, but rapid decline.
Three contributors replied that it was "fluctuating."

COUNTRY

Forty-five contributors replied "steady," or its equivalent.

Twenty-four contributors replied as follows:—

5. Steady progress, rapid decline.

8. Steady progress, rapid decline.

13. Progressed steadily to acme, and began to decline steadily; a heavy fall of rain suddenly stopped it; then it recurred in modified virulence with the dry weather.

14. Steady at first, then suddon increase and sudden decline.

16. Oncome steady: decline fluctuating.

Steady at first, then suddon increase and sudden decline.
Oncome steady; decline fluctuating.
Came suddenly, spread rapidly, left suddenly.
Steady; after first few cases increased rapidly; declined gradually.
Steady; gradual progress, rapid decline.
Steady; gradual progress, rapid decline.
When it first broke out here (at the middle or end of September) it went on rapidly increasing for several weeks and, in January, it still lingers. It seems to come and go suddenly.
Steady; spread rapidly, declined slowly.
Progressed rapidly to an acme, then suddenly stopped.
Steady, but quick invasion; slower decline.
Steady; decline interrupted by recrudescence.
Steady; decline more rapid.
Steady; decline more rapid.
Steady; decline sudden.
Onset sudden, continuance steady, decline sudden.

Onset sudden, continuance steady, decline sudden.
Steady increase, and then sudden increase, until nearly everyone seemed attacked.
Steady to acme; sudden decline.
Onset and decline sudden. 69. Onset and decline sudden.
79. In the immediate neighbourhood of the town progress was steady. In the country round one township or part of a district would be attacked, and the epidemic would run a steady course through it, then another part would be attacked, so in one place the cases were all recovering, and in another they were all just getting bad.
80. Steady on the whole: decline probably more gradual than onset.
Nine contributors replied, "fluctuating"; two others modified their answers as follows:—
74. Fluctuating first half, steady second half.
78. Fluctuating (and epidemic not so severe as reported elsewhere).

Of 132 contributors in the metropolis and the country no less than eighty-three observed that the epidemic, after beginning, progressed steadily to an acme of greatest prevalence; then fresh attacks became fewer, so that it declined gradually. To the large proportion of observers who found the progress thus steady must be added a majority of the thirty-five others, whose answers are given at length; they also found the progress steady on the whole, that is, after allowance made for the limitations of individual practices. One answer is self-contradictory and unintelligible. A more puzzling kind of exception is found in the answers 24, 56, 22, 57, and 69; these contributors thought the epidemic both came and disappeared "suddenly." The first two practice in Sydney or its immediate suburbs, where thirty-eight other contributors, plus nine of the eleven whose answers are given at length above (or forty-seven out of a total of fifty-two) say that the progress was steady; it is to be regretted, therefore, that these two contributors should not have specified the circumstances under which they used the word "sudden." The latter three practised in country towns. They are in a similar minority among the members of their The latter three practised in country towns. own division. A similar criticism may be applied to their answers, but their omission to explain the use of "sudden" is rather more important. As to the fourteen (three metropolitan, eleven country) who found

its course fluctuating, it is, of course, unnecessary to remark upon them in particular.

If it be desired to explain this gradual onset, steady (though occasionally rapid) increase, and rapid (or sometimes sudden) decline of influenza pourtrayed by 112 observers in distinct and often widely-separated towns or districts, upon the hypothesis of incommunicability and infection from a common, aërial source, one of the two following circumstances must be assumed:—Either unequal distribution of the cause of influenza through the air, and that not as an accident but as a characteristic manifested over and over again in every newly-invaded district, must be postulated; or else it must be supposed that under equal exposure to the cause the natural defences of the body are in most cases adequate against the first assaults, but ineffectual against a prolonged siege, capitulation occurring earlier or later in individual cases, but for the most part after the same or a similar number of days (acme), in accordance with the general resemblance of human constitutions one to another. Of these the first is The second, which is now for the first time clearly seen to be an indispensable complement of the air-borne theory, has a certain plausibility. Here it is enough, however, to point out that the reported facts admit of a less roundabout, and indeed of a quite simple and straightforward explanation. They are such as are observed in the cases of diseases which are known to spread by communication between persons, and in that way alone, whenever the presence of a sufficient number of susceptible persons suffices to furnish an epidemic.

Question 15.

15. Did the epidemic progress appear to you to be accelerated or retarded by any meteorological condition, such as wind from any particular quarter, wet, drought, heat, cold, &c.?

METROPOLITAN.

Appeared to be accelerated in progress by moist atmosphere.
 Cold, wet weather appeared to accelerate the disease.
 The cases were certainly more numerous in wet weather.
 Appeared to be checked by rain early in December.
 Warm, damp, and muggy weather distinctly favourable to progress of disease. Dry, warm weather appeared to have retarding influence.

retarding influence.

15. Acceleration caused by wet and cold.

18. Worse in cold weather.

20. Cold, wet, and westerly or south-westerly winds accelerated and aggravated progress of epidemic and course of disease; heat perceptibly and quickly retards.

21. It seemed to disappear rather suddenly after a southerly wind.

22. It seemed to disappear rather suddenly after a southerly wind.

23. The sudden hot and dry weather in November seemed to me to stop it.

26. Not to any very great extent; if anything, a heavily-laden, moist atmosphere seemed to increase the epidemic.

31. The epidemic appeared to be retarded by warm weather and high winds.

- 32. The approach of warmer and more settled weather seemed unfavourable to the disease.
 33. Yes; fine, clear days, after a rain-storm, reduced my visiting list by two-thirds.
 34. The westerly wind was always injurious to it, especially when accompanied by cold weather.
 35. Accelerated by wet and cold; retarded by heat and hot westerly winds.
 36. I only observed that the disease disappeared soon after some hot westerly winds; but it had begun to decline previously.
 37. Damp heat seemed to favour spread and progress of epidemic.
 38. Progressed especially during east wind and cold, wet weather, and it began to decrease when the warm, dry weather set in.
 41. Wet and cold seemed to increase both the severity of the cases and the number of the attacks; heat ameliorated all
- the conditions
- 43. Cases improved in dry weather, and appeared accelerated in wet.46. Cold weather had a decidedly bad effect; warm weather the reverse.
- 58. Yes; such as winds, westerly and wet. 59. Did not observe any.
- 60. Cold and wet.

COUNTRY.

- 2. Accelerated by wet, but as I was only called in for sequelae, that was only natural.
- 6. Changes most marked, but had no influence.
- Changes most marked, but had no influence.
 Cold weather affected severity rather than number.
 Dry, warm, calm weather seemed most suitable to its dissemination; easterly wind carried it westward; westerly winds retarded its progress; wet greatly retarded it; it travelled westwards and southwards through the district.
 Wet and cold increased, but a few warm days did not perceptibly lessen the epidemic.
 Cold and wet appeared to be unfavourable; it declined on the oncoming of warm weather.
 It seemed to decline after a heavy southerly gale.
 A week's rain appeared to be the cause of its leaving; of course there was high wind with the rain.
 I believe the wet and cold made it worse.

- 22. A week's rain appeared to be the cause of its leaving; or course there was night wind with the rain.
 26. I believe the wet and cold made it worse.
 28. Increased by wet, but uninfluenced by heat or cold.
 29. During the whole period of the epidemic, the weather was dry, fine, and warm. A thunderstorm occurred ten days before its cessation, and rain just as it was clearing off.
 30. Progressed rapidly during cold and wet, and collapsed in a few days when the weather became dry and warm; wind during the epidemic was west and south-west.
 31. I am inclined to think that meteorological changes have something to do with the spread of the epidemic, but how I am unable to state definitely.

- unable to state definitely.

 35. I do not think its spread or decline was much influenced by the weather; but it spread during dry, cold, windy, and dusty weather, by which I have it recorded the patients were much irritated October 12-20.
- Heat and thunderstorms seemed to check it.

 Certainly seemed to be retarded by a few wet days; but this may only have been a coincidence, as the epidemic was already subsiding.

 44. During all the time the weather was variable, squally, and wet.

 51. Not marked.

- 51. Not marked.
 52. Not the least either way; we had all sorts of weather.
 53. A violent thunderstorm, accompanied by rain, appeared to retard it.
 57. South-west wind and moist atmosphere were favouring conditions.
 60. Relapses appeared more frequently to occur in windy and dirty weather; heat and cold did not affect it.
 61. Was markedly retarded by two or three days of cold wet weather, the weather previously having been hot and dry.
 63. Yes; it appeared suddenly after a two days gale from the south, but it was not influenced thereafter by weather.
 65. I believe westerly winds and variable weather (sudden changes from heat to cold) accelerated the epidemic in this district.
 67. But little
- 67. But little.
- 79. I think so; warm days, then very cool windy nights with rain at intervals.
 72. Retarded by change to rain: and now the excessive heat seems to have stopped it; but am more inclined to think it has been the steady decline of the disease.
 73. East and north-east winds were prevalent.
 76. The rapid changes from heat to cold appeared to promote its spread and permanency; and improvement was more rapid and marked on continuance of warm dry weather.
- and marked on continuance of warm dry weather.

 77. Believe that more cases occurred after a few wet and windy days, and that the disease disappeared with settled fine and
- dry weather.

 80. I did not expect and did not get so many fresh cases for a day or two after a heavy fall of rain.

- 82. Cold, damp, rainy weather.
 83. There was very little change in the weather during the outbreak, but towards the end it became much cooler, but I cannot say whether it influenced the disease.

There were 113 answers to this question. Fifty-six respondents answered "no." The remaining fifty-seven replies are given above. It is not necessary to remark at length upon the series. A good many of the contributors seem to think that prevalence of the disease and wet or moist and cold weather coincided, but evidence is adduced in no instance.

Question 16.

16. During the epidemic period was the usual course followed by cases of surgical injury with breach of surface, or was it varied from in any way?

METROPOLITAN.

- 41. Attended a lady who fell ill of influenza two days before delivery; she died the day after of double pneumonia.

- 48. As usual; and post-partum course as usual.

 51. As usual. Two women had influenza during nuerperium without prolonging or varying the latter.

 53. A few surgical cases developed temperatures (102-4) without anything in the condition of the wound to account for it.

 55. As usual. One parturient had the disease and nothing unusual occurred.

 57. As usual. Several women delivered where diseased in house, and unaffected.

- 11. Two cases of necessity did well under careful asepsis. Two confinements also not affected even where the disease was

- 11. Two cases of necessity did well under careful asepsis. Two comments also not ancested even where the disease may present.

 22. My cases showed that there was always a more violent attack under these conditions.

 30. Antiseptic precautions are always taken by me.

 31. This question is too vague and ambiguous to be answered.

 43. A severe scalp wound inflicted in second week of disease healed remarkably quickly; however, the patient died of double pneumonia in the fourth week.

 45. As usual. Two deliveries where disease in the same house unaffected.

 52. I found no difference in surgical cases with breach of surface; but fractures seemed longer in consolidating (? debility).

 53. As usual; and it did not appear to affect puerperal cases.

There were sixty-nine answers to this question, of which the object was to test the old statement that during epidemics of influenza the air itself has deleterious qualities, or even that it is loaded with that during epidemics of influenza the air itself has deleterious qualities, or even that it is loaded with low forms of organic life. Fifty-five respondents answered, without comment, that the course followed was as usual at other times. Two judiciously observed that under the strict precautions of modern surgery against sepsis it could not well be otherwise, and these have been given above, with other qualified answers. Rarely the question was mistaken, and supposed to apply to persons who actually suffered from the disease while subjects of injury with breach of surface. Six contributors remarked either that to suffer the disease or to have it present in the same house was not prejudicial to parturient women; an observation which should be compared with others. (Q. 11 (c) p. 24, and F, p. 41). One case of death from double pneumonia the day after parturition, on the third day of an attack of influenza, is recorded under 41 metropolitan: under 53, of the same series, is recorded an exception to the usual wellrecorded under 41, metropolitan; under 53, of the same series, is recorded an exception to the usual well-doing of surgical cases, and another under 52, country. Upon the whole, it is clear that the air has no quality during epidemics of influenza capable of altering the usual course of healing wounds; otherwise it could scarcely have failed to appear occasionally, notwithstanding the general practice of antiseptic

ADDITIONAL OBSERVATIONS MADE BY CONTRIBUTORS IN TOWN AND COUNTRY.

A.—Notes as to the symptoms of the disease, its sequelæ, &c., &c.

34. The duration of the attack was in some cases some ten or twelve hours. In others it lasted (with complications several weeks. The usual duration was about a week.—Dr. Milford, Sydney.

35. In many cases examination of the urine showed—high sp. gr., sugar in many cases, albumen during the course of the disease, and continuing until long after patient was apparently well, and gradually disappearing or still to be found at intervals. During pregnancy women suffer very severely from the disease. Bleeding at the nose was common; especially so, and difficult to control, in anamic girls.—Dr. Mathias, Sydney.

41. Most of the cases simulated cerebo-spinal meningitis at first, and then rheumatic fever, without swelling of the limbs; and though they perspired freely there was not the rheumatic odour. Three of my cases were followed by pericarditis which eventually cleared up.—Dr. Bucknell, Kogarah.

1. Symptoms in large majority neuro-muscular or respiratory, fatal cases due to pneumonia. not croupous-spreading—

Symptoms in large majority neuro-muscular or respiratory, fatal cases due to pneumonia, not croupous-spreading—broncho-pneumonia.—Dr. Fisher, Bowral.
 In cases where I had opportunity I isolated as far as possible, and it seemed to answer. Epidemic mild here; most frequent sequelæ, bronchitis, broncho-pneumonia, and pleurisy. No cases where eyes or ears affected.—Dr. Hart,

In cases where I had opportunity I isolated as far as possible, and it seemed to answer. Explorance mad need, most frequent sequelæ, bronchitis, broncho-pneumonia, and pleurisy. No cases where eyes or ears affected.—Dr. Hart, Gunning.
 Congestion of lungs, especially right, almost invariably present, and all fatal cases due to it. Presence of any other disease did not alter or prevent influenza.—Dr. Asher, Lithgow.
 I have known cases of cerebral affection follow influenza, even insanity; but I am not prepared to say that they were really the effect of the epidemic.—Dr. Brown, Parramatta.
 Pleurodynia and shooting pains in the thighs of a very severe nature in quite a large number of cases began about two days after fever had gone.—Dr. Hester, Stockton.
 I would just add here that my own conclusions on this epidemic point to its being, if influenzal, a distinct departure from type. Bronchitis or pneumonia seemed to be leading features in every case. Instead of each epidemic being slighter than the last it is severer. There is practically a total absence of suffusion of the mucous membrane of nose, or conjunctivae, or frontal sinuses; while the headache was quite as much vertical or occipital as frontal. Pleurisy and hepatic derangements were frequent sequelæ and night-sweats were almost invariable consequences; while headache also followed very often and would yield to nothing. As regards communicability, I am confident that it is not contageous though superficially there seems much to warrant a contrary conclusion.—Dr. Van Someren, Orange.
 I have come to regard as the normal features of the disease (1) sudden invasion; (2) rise of temperature; (3) proversion of taste; (4) pains in head, trunk, and limbs of variable severity; (5) prostration, more or less severe; (6) anorexia; (7) duration of increased temperature three to six days; (8) perhaps also dry skin with diminished proportion of water in the urine for at least a part of the illne

Read, Singleton.
71. One case of melancholia followed by suicide came on after a severe attack of influenza.—Dr. Young, Maclean.
79. I have noticed that in cases of pregnancy, especially in the early months, the disease was often accompanied or followed by abortion or premature labour.—Dr. English, Yass.
83. I found that the complications were either pulmonary or gastric and enteric, and in no case did a patient develop both; if his lungs were affected he had no stomach and bowel trouble, and vice versa. Some of the gastro-enteric cases closely resembled typhoid or rheumatic fever.—Dr. Phillips, Parramatta.
85. All sorts of sequelæ followed, especially hair falling out in quantities and neuralgias of all kinds.—Dr. Tresidder, Dubbo.

B.—Notes upon the disease as seen in children.

B.—Notes upon the disease as seen in children.
2. The two or three children who were attacked did not make any complaint of pain; and their high temperature readily came down after a hot bath, and in three days they were running about.—Dr. MacLeod, Hurstville.
29. I had two cases in children which were ushered in by epileptiform convulsions. In both cases the children had gone to bed perfectly well, were seized with convulsions during the night, on recovering from which very high temperatures were noted (104-5), and then the disease followed the usual course, ending in one case in uncomplicated recovery, and in the other with broncho-pneumonia and recovery.—Dr. Simpson, Burwood.
36. A child who was kept at the breast during its mother's illness was not attacked, and three older children also escaped.—Dr. F. Antill Pockley, North Sydney.
51. In my experience the disease was much shorter in its course in children than in adults. In many cases no symptoms, except a slight coryza, remaining after two days of high fever, and in some cases the febrile symptoms scarcely lasted two days.—Dr. Crago, Sydney.
27. A very large number of children suffered from aural troubles; intense pain, generally effusion of bloody lymph into the tympanic cavity, sometimes followed by purulent discharge.—Dr. Parry, Emmaville.
53. The younger the patient the shorter seems the duration of attack, though while it lasted it seemed more acute than in older people. Young children as a rule were apparently convalescent in 24 hours after the appearance of the first symptoms, and did not appear to be liable to the remissions that older patients were.—Dr. Wilson, Warren.

C.—Special note as to relapses.

40. I saw two cases in which the following occurred:—Man attacked and getting well, but slept with newly infected case; whereupon he was attacked again with high temperature and the ordinary symptoms, but in such case the high temperature only lasted for one day.—Dr. Orr, Maclean. D.—

D.—Notes upon purgatives in treatment (but see also Q. 8, p. 19, ante).

39. My experience confirms the reasoning of those who maintain that a strong aperient (calomel) at the outset and antipyretics exercise a decided favourable influence over the disease. That, on the contrary, under an "expectant" method cases often are aggravated. With regard to children, whom I consider less, and little at all, liable to attack (e.g. under 10), I am strongly inclined to think that calomel and antipyretics (antifebrine) have an abortive effect.—Dr. G. Nagel,

73. Very difficult in a bush practice to give details, as patients live at long distances, and only come once or twice. All cases I noticed who took a large dose of caster-oil when first attacked did not suffer so much as those who did not. The intestinal catarrh was very severe in a few who also had melœna.—Dr. Rooke, Germanton.

E.—Note upon the mode of action of the cause of illness.

The disease is produced, I believe, by a micro-organism which is uninfluenced by any medication. I have examined the blood and discharges from the economy of those suffering at various stages and found nothing to account for the disturbances.—Dr. McMurray, Sydney.
 My clinical experience leads me to a strong opinion that the influenza virus attacks primarily and chiefly the nervous tissues, more especially the cranial nerves, with little action on the sympathetic.—Dr. Lewers, Berry.

F.—General notes upon the disease.

F.—General notes upon the disease.

7. The disease appeared to be of the nature of a sub-tropical malarial fever, with a tendency to affect the patient's weak spot, whether chest, throat, or digestive organs. One patient presented a rash almost like dengue; however, there was no intermission with return of rash. This patient was an old sailor who had served some years on the West African station.—Dr. Pierce Balwin, North Sydney.

9. I have observed several cases in which quiescent disease has been relit by an attack of influenza, e.g., phthisis. A case of pelvic cellulitis in a woman, steadily undergoing absorption, with no temperature or tenderness, patient going about the house—violent inflammation set in and suppuration ensued, the abcess breaking into the bowel. In women, after parturition I have noticed a distinct tendency to flooding if they contracted the disease shortly before or immediately after delivery. In these cases, too, the lochia became scanty and offensive.—Dr. Harold Brown, Summer Hill.

15. During menstruation general nervous prostration greater, and succeeding debility caused retarded recovery. Those sufferers who had endometritis in any stage had invariably metrorrhagia during convalescence, unless some pulmonary trouble supervened.—Dr. Cohen, Sydney.

sufferers who had endometritis in any stage had invariably metrorrhagia during convalescence, unless some pulmonary trouble supervened.—Dr. Cohen, Sydney.

Gresford is situated on the Paterson River about 25 miles north of Maitland, and is only a small village, so that the bulk of my practice is among the farmers and graziers, &c., on the two rivers; extending (roughly) from about 12 miles from Dungog on the east to about 20 miles from Singleton on the west; nearly to Paterson on the south, and to the head of the two rivers on the north. The epidemic of 1890 was a very mild one both as regards the number affected and the gravity of the disease; but that of 1891 was very different in both respects. The manner in which the latter broke out is peculiarly interesting. Two young men, brothers, about 22 years of age, returned home to Lostock, about 12 miles from here. They had been staying in Maitland for a few days, and in a house where there were several cases of influenza. They arrived in Lostock on 16th October, on which day there was a school feast followed by a concert and dance. They attended the concert, but were too ill to remain for the dance. I saw them the next day when they were undoubtedly in the first stage of an attack of influenza. Within three days nearly every person who attended the festivities was more or less ill, some very severely so, some only mildly. A young girl left Lostock the next day to stay with some friends near Maitland, about 40 miles away. The following day she was unwell and had rather a severe attack of the disease. Nearly every person in the house where she was staying was infected. I traced five other cases where the disease was carried from this Lostock centre and formed fresh foci of infection. From 17th October till 29th December, when I saw the last case, I saw, or was consulted in about 313 cases. Of these only one died, an old man who seemed to be struck down within 48 hours of his feeling ill, by the sheer severity of the attack. of the attack.

In nearly all the cases seen by me, the earlier symptoms were the same; intense lassitude, high temperature, pain in back and limbs. But as the disease progressed the symptoms varied very much. In what I might call uncomplicated cases the temperature fell in a few days, the pains left and the patients slowly recovered their strength. In nearly all these cases, however, the appetite failed so much and there was such intense weakness that a tonic was necessary. Of these cases I had 182, 106 males and 76 females; of cases complicated with bronchitis I had 79, 46 being males and 33 females. Pneumonia appeared in 23 cases, 14 males and 9 females. I have put down the fatal case under this head, as when I saw him (then in articulo mortis), there was dulness over the whole of the lower lobe of the right lung with harsh and rapid breathing. Pleurisy appeared in 3 cases, all males; one of the cases going on to empyema. Diarrhœa, more or less severe, was present in 18 cases, 13 males and 5 females. Three of these (all males) took on the form of enteritis, and went through a long and tedious convalesence; leading one almost to suspect enteric fever. The thermometer however negatived such a diagnosis. There were 5 cases of severe vomiting, 4 males and 1 female; and 2 of these, both males and heavy drinkers, undoubtedly suffered from gastritis. In 2 cases, both males, there was jaundice, and in one case, a female, there was such violent and persistent delirium, lasting for 13 days, that I felt certain there was some brain affection; probably meningitis.

I only saw 9 cases, under 10 years of age, and these were all uncomplicated, 6 being females and 3 males. I have reason, however, to believe that both in these cases and in those of adults, there were quite as many did without medical advice as there were who consulted me.

The epidemic gradually subsided, and I saw no cases after the middle of December, 1891.

12-F

The epidemic gradually subsided, and I saw no cases after the middle of December, 1891.

Under 10 years of age already included in "uncomplicated cases"	3 6 9 (Dr. Chas. E. Rowling, Gresford.)

(Dr. Chas. E. Rowling, Gresford.)

67. Several families who had a terror of the disease and took every possible precaution from the first entirely escaped. One singular fact, none of the teachers in the public school suffered (at a late stage the school was closed, and Dr. Malcolm thinks the delay had much to do with spreading the disease in the district. In both countries (Dr. Malcolm witnessed the 1890 epidemic in Scotland) the disease was very severe on puerperal cases. Never saw any benefit from either of the preparations of mercury, nor from any other of the boasted specifics.—Dr. Malcolm, Helensbürgh.

72. This last epidemic of 1891 was very severe on Reedy Creek Station, 25 miles west from here. It is on black soil, and chest complaints are usually very common there, more so than in other parts of the district. During shearing, in November, thirty people (shearers and others) were in bed at one time with it, and all recovered as far as I know. Also among the Chinese, at Tingha, many deaths occurred among the miners in the last (1891) epidemic, most of them aged and infirm; so much so, that one of the Josses was removed last month from the Joss House to town, and carried back again, with the desire to drive away the influenza epidemic.—Dr. Lane, Inverell.

84. Having observed that the epidemic broke out afresh in each shearing shed as it started, was first of opinion it may have been due to shearing sheep suffering from catarrh; but now am of opinion it was simply due to contagion, induced no deubt in many cases by large numbers of men being housed in badly ventilated sheds.—Dr. Maguire, Molong.

12—K

- G.-Notes in which the epidemics of 1890 and 1891 are compared in general; or in which the incidence of the disease on a population is compared with the incidence reported from other places.
- 10. Draws attention to comparative immunity of Raymond Terrace. Nearly all cases some miles out in the district. around. The form of disease was also very mild here in both epidemics.—Dr. Cribb, Raymond Terrace.
 17. Contrast between the two epidemics showed that 1891 was much more severe; the disease seemed to spread with much greater rapidity, complications of the intestinal tract were more common, many cases having dysentery, and recovery more protracted; many patients looking after a week's illness as though they had had a six weeks' attack of enteric.—Dr. Nickson, Newcastle.
 32. The epidemic was very slight in the district.

Dr. Nickson, Newcastle.

32. The epidemic was very slight in the district.—Dr. Crommelin, Casino.

34. I have had no cases of influenza proper here during the epidemic of 1890-1.—(Dr. O'Flannagan, Merriwa).

35. The epidemic has attained a more fully developed, different, and distinct form since 1890.—Dr. Boodle, Walcha.

36. Influenza is no new disease in these colonies, for as I informed you in previous report, it first appeared in May, 1881, it was then "complicated" with pneumonia, and several deaths occured; it lasted on and off for five or six years, and then abated (but did not entirely disappear), till it made a fresh start in 1890. It appears to me that these colonies were the first to have it, as no mention of anything of the kind appeared in the medical papers till about two years or eighteen months ago, when I read accounts in the Lancet of a similar disease occurring in different localities in Great Britian. When I first saw the disease I called it remittent fever, and I have noticed that it appears to be more prevalent after floods, when the mud and decayed vegetation are drying up. During the period in which it has prevailed I have attended the same persons with it more than once, and some children I have known have it every year.—Dr. Evershed, Bega.

prevailed I have attended the same persons with it more than once, and some children I have known have it every year.—Dr. Evershed, Bega.

43. The epidemic of 1890 was comparatively mild, and for the most part the average duration of the disease was under four days. The epidemic of 1891 was much more severe, and followed by pneumonia, bronchitis, meningitis (in children). parotitis, diptheritic sore throat, remittent (malarial) fever, and herpetic cruptions, together with many phases of neurosis. Of the 102 cases noted in the answer to Q. 6, four died, two of meningitis, followed by coma and collapse, one from double pneumonia, ten days after convalescence, and one, an aged woman of intemperate habits, died in the eleventh week after contracting severe influenza, from exhaustion. The average duration of cases was not more than a week.—Dr. Morgan, Wagga Wagga.

62. The epidemic of 1890 came in the middle of winter, that of 1891 in the hot weather. While those who suffered in 1890 felt weak for a long time after recovery, in the epidemic of 1891 there was nothing of this. The patients were soon well and did not complain of any after effects.—Dr. Morice, Tenterfield.

APPENDIX II.

DATA furnished by the Medical Officers of several Public Institutions. The Reports upon the epidemic of 1890 are reprinted for comparison, and precede those for 1891.

1. SYDNEY HOSPITAL (GENERAL).

1890.

Average daily numbers.—Of resident medical staff, 4; of nursing staff, 46; of general staff, 18; of in-patients, 236. Out-patients: At the hospital, approximate average daily attendance, ; branch at Redfern, a mile and a half away, 47.

Out-patients: At the hospital, approximate average daily attendance, position.—In the city.

Cases of Influenza.—First case seen was among hospital out-patients, March 5; and none among Redfern out-patients until April 5. On April 11 a porter at the hospital was attacked. The first iv-patient was admitted on April 25, and fifteen others on later dates. On May 2, 8, and 15 three of the resident medical staff fell ill; on May 21 another porter; and on June 14 and 15 two nurses. The total number of cases observed (staff, in-patients, and out-patients) was 239.

Infection and Contaction.—The Resident Medical Superintendent says: "With regard to infection or contagion, the facts point, in my opinion, to there being none." The disease did not appear among patients already in the wards, although the sixteen cases admitted were distributed according to the routine, and without attempt at separation.

WALTER HULL M.D.

WALTER HULL, M.D.,

Date of report, 28 June, 1890.

Resident Medical Superintendent.

Average daily numbers .- Staff, 63; patients, 186.

Dr. Hull also made the following general remarks: "The severity of the attack was greater in most of the cases during the last epidemic, convalescence was more protracted, and a larger number suffered from relapses and sequelæ. No attempt at isolation was made. Patients in the medical wards suffering from other diseases escaped. In the surgical wards cases broke out at intervals, but no distinct source of infection could be proved; there were many likely sources. No unusual course was followed by cases of injury with breach of surface or of surgical operation beyond that which might be supposed to be due to the debilitating nature of the influenza attack.

SYDNEY HOSPITAL, MOORCLIFFE BRANCH (OPHTHALMIC).

Average daily numbers.—Staff, 10; patients, 50. Number of patients admitted suffering, day by day.—None.

Dr. Hull also made the following general remark:—It rapidly spread among the inmates of the Moorcliffe (Ophthalmic) Branch of the Sydney Hospital. The source of infection was not discovered.

21 March, 1892.

WALTER HULL, M.D., Medical Superintendent.

2. PRINCE ALFRED HOSPITAL (GENERAL). .

1890.

Average daily numbers.—Of resident medical staff, 5; of nursing staff, 57; of general staff, 46; of in-patients, 188. Out-patients (at the hospital) approximate average daily attendance, 90.

Position.—Just outside the city.

Cases of Influenza.—The first case occurred April 3; 9 cases were admitted ill, and 8 cases rose in the hospital; 40

Cases of Influenza.—The first case occurred April 3; 9 cases were admitted ill, and 8 cases rose in the hospital; 40 of the staff suffered; and about 80 were attended as out-patients.

Infection and Contagion—The Resident Medical Superintendent says:—"The present illness seems not to be capable of transmission from person." The nine cases admitted ill were sent to the medical wards according to routine, and no case arose in those wards. The eight cases that arose in hospital occurred in the surgical wards. Cases cropped up among medical and surgical nurses indiscriminately, and as long as the outbreak lasted there were two or three of them suffering at the same time.

J. F. M'ALLISTER, M.B., CH.B., Resident Medical Superintendent.

Date of report, 4 June, 1890.

1891.

Total number admitted

The number of cases that arose among in-patients day by day cannot be accurately traced as to daily origin, but they

were very few, approximately 10.

were very few, approximately 10.

Counting indoor and outdoor patients and members of the staff, about 300 cases were treated at the hospital.

Dr. Purser also made the following remarks:—As to the post-epidemic period of 1890 two cases, recognised as influenza, were admitted in October, and about twelve cases were seen at the out-patient department after June, 1890; and in 1801, while the first case was seen on 4th October, the last was during the first week of January, 1892. . . . More cases had gastro-enteric symptoms in 1891. . . . In two cases in 1890 two patients were seen with two distinct attacks, similar in every respect, with an interval of four or five weeks between; but during the interval they had not recovered their former strength. Many nurses who had suffered were on duty again within a fortnight, and attended on other (? influenza) patients, but did not get a second attack. . . . In no case could it be distinguished that the disease was contracted from another person. A feeling of malaise with headache was noticed in the majority of cases, and then an acute onset with sudden rise of temperature, in many cases accompanied with collicky pains. The prodromal period never extended be only twenty-four hours. . . . All cases that arose in hospital were put under treatment at once, and only in two were there any sequelæ—namely, bronchitis and broncho-pneumonia; and these were patients who were careless during convalescence; I am of opinion that complications and sequelæ are accidental. am of opinion that complications and sequelæ are accidental.

February 15, 1892.

CECIL PURSER, M.B., M.C. (Sydney),
Resident Medical Superintendent.

3. St. Vincent's Hospital (General).

. 1890.

Note.—The number of cases that arose among the inmates day by day is uncertain, especially as mild cases did not call for special notice and treatment, the symptoms of the original maladies demanding most attention. The disease was far more prevalent among the staff than among patients suffering from other ailments.

13 January, 1892.

W. PEIRCE, M.D., Medical Superintendent.

6. Infants' Home, Ashfield (Suburb of Sydney).

1891.

Number of persons admitted suffering, day by day .- None.

Number of cases that arose among the innates day by day.—November. Number-eight cases in adults (innates); no cases in infants

DAVID COLLINGWOOD, M.D.,

14 January, 1892.

Infants' Home.

7. RANDWICK ASYLUM FOR DESTITUTE CALL.

Staff-Officers, 3; servants, 9; apprentices, 25; inmates, 197.

There were no cases of influenza among the inmates (staff or children) during the recent epidemic. This may have been due to no friend of the children being admitted to see them after the epidemic had begun in Sydney.

THOMAS DIXON, M.D.,

Visiting Medical Officer.

8. SYDNEY BENEVOLENT ASYLUM AND LYING-IN HOSPITAL (IN THE CITY).

1891.

Average daily numbers.—Staff, 4 females (all the inmates except those who are sick help to do the work); pupil nurses, 6; inmates—women, 101; children, 136.

Number of persons admitted suffering, day by day.—Nobody suffering with "Influenza" was admitted to the Institution.

Number of cases that arose among the inmates day by day. During the week ending 10th November.

During the week ending 17th November. During the week ending 3rd November.

Numbers9

Notes.—There is no daily record available. All the cases recovered most satisfactorily; all cases were immediately isolated; 14 cases occurred in north wing of main building; 3 cases occurred in south wing of main building; 2 cases occurred in a separate building.

20 January, 1892.

Dr. Doyle also furnished the following interesting notes:—
The cases of influenza admitted to the wards were on the whole of a severe type. The patients were mostly belonging to the manual working class, and were, with few exceptions, of the male sex.

Very few presented themselves at the onset of the disease. It was only when the symptoms became so severe that they were unable to work that they gave up and came to the hospital. On this account those patients were weaker, and their convelopment prelonged. their convalescence prolonged.

Of the five patients who died two were admitted in articulo mortis. These two persons had struggled on against the disease for some weeks without having received proper treatment, and I have no doubt their lives would have been saved had they applied for admission to the hospital when first attacked.

As will be seen by the short notes of forty-six cases herewith attached, the predominant symptoms were myalgia, headache, and catarrh of the respiratory and digestive tracts. In only a few cases was there croupous pneumonia, which differed from ordinary croupous pneumonia in that it came on with alarming suddenness, and, after lasting a few days, disappeared with remarkable rapidity.

It is worthy of note that in no case was there primary disease of the serous membranes. The pleurisy noted in a few cases was secondary to superficial pneumonic consolidation of the adjacent lung tissue. The profuse sweating and the boring pains in the ears were distressing symptoms in some cases. In almost all the patients the body temperature was raised, and it was remarked that the disease was severe in proportion as the temperature was high. In two cases which died, death was due to heart failure consequent on hyperpyrexia.

died, death was due to heart failure consequent on hyperpyrexia.

Case 37 was remarkable because the patient, an old man, had never lived in a malarial country, had never been ill before, and during the remissions of the temperature and the cessation of the rigors he "felt perfectly well, although

very weak.'

very weak."

Case 43 was a strong athletic man, who was attacked three weeks before admission. He had been seen by two doctors, and treated for influenza and typhoid fever. There were no symptoms of typhoid when admitted, but well-marked broncho pneumonia. His temperature, high on admission, continued to rise, and he died during a rigor. The temperature rose after death for twenty minutes, and then began to decline.

As regards infection—all the nursing and hospital staffs were attacked, but soon recovered; and although exposed to infection there was no instance of a second attack. None of the patients in the surgical wards took the disease, and only two in the medical wards. There was no isolation; the only precaution taken was the disinfecting of the sputa. Friends and relations were admitted at all times to see the patients, even while the epidemic was at its height.

The treatment adopted was plenty nourishment, rest in bed, and drugs.

The cases in which myalgia and headache were severe were treated with salicin or salicylate of soda with admirable results. For the pulmonary cases nauseating and depressing drugs were found to be positively harmful, and stimulating expectorants were then tried with the happiest results. Salicylate of quinine proved to be admirable in treating headache, being preferable to antipyrin. Alcohol was used in only a few cases, and then very sparingly.

The convalesence of some cases was, prolonged, owing to the extreme debility induced by the disease. Since the epidemic ceased there have been a few sporadic or rather late cases of influenza treated, and a number of cases of debility following on the disease.

following on the disease.

As regards isolation in a future epidemic it would not be possible to carry out—under our present arrangements—any satisfactory method, and beyond disinfecting the secretions and the patient himself, we would not make any attempt at quarantining.

This report is written in spare moments and is necessarily incomplete. I shall be glad, however, to make any additions that the Chief Medical Inspector may deem necessary.

or may deem necessary.

HENRY MARTIN DOYLE, M.R.C.S., Eng., L.R.C.P., Lon., &c.,

Medical Superintendent.

Dr. Brown added the following note:—In this asylum, which is crowded, the epidemic, as would be expected, attacked a number of inmates at nearly the same time, and the complaint subsided much more rapidly than in outside practice.

22nd February, 1892.

H. BLAXLAND, Medical Superintendent. Dr.

^{*} Brothers.

Dr. Blaxland also said:—The last case of the first epidemic occurred on 3rd September, 1890, and no sporadic cases were afterwards observed. The epidemic of 1891 began on 25th October, and not until weeks after it was prevalent in the neighbourhood; it was at its height here when it was dying out in the neighbourhood. In 1890 abdominal symptoms were more marked, and recovery was more rapid than in 1891, when catarrhal symptoms were more prominent and when convalescence was tardy. An attendant who was working in the grounds was the first to be attacked, and a larger proportion of outdoor workers suffered. In 1890 no particular trouble was taken to isolate the patients, and the disease was limited to the members of the staff. In 1891 most of the cases were sent to one ward as far as possible, and in this particular ward the disease spread rapidly; and isolation not being complete, cases still kept coming from other wards. The progress of the epidemic seemed to be accelerated during the westerly winds and to decline when the normal north-east wind set in. Those who suffered in 1890 escaped in 1891; and the dispenser and one nurse, who were attacked in 1890, and were continually exposed to infection during 1891, escaped a second attack. exposed to infection during 1891, escaped a second attack.

Number attacked. Average daily number. Staff=112 Patients=1,045.....

E. GODSON, M.R.C.S.

Medical Superintendent.

Date of report, 31 May, 1890.

Average daily number.—Staff, 105; inmates, 1,058.

Number attacked.—The total was about 170, but I cannot give the numbers attacked, day by day.

Dr. Godson added the following remarks:—The first case occurred about October, the last about the middle of December. The discase was introduced from the town by the attendents, I have no doubt; patients whether occupied indoors or out were attacked the same, and the disease was more severe, and fatal only, in cases where chronic disease co-existed. The first case was isolated from those in the airing-court where it occurred, but notwithstanding several more cases appeared about a week afterwards in the same court: and so it went on—three or four fresh cases each day, until about thirty were attacked. Each case as it occurred was sent into a special ward, and so the epidemic in this ward was stamped out; and the other wards were treated similarly, and with the same result. The progress of the epidemic was more severe during builteneds weather, particularly during prevalence of westerly winds. other wards were treated similarly, and with the same result. Spisterous weather, particularly during prevalence of westerly winds.

1891.

Average daily number.—Staff, 28; inmates, 254. Number of cases that arose among the inmates day by day. —One patient only was attacked late in October.

- Number of cases that arose among the immales day by day.—One patient only was attacked late in October.

 On further inquiry Dr. Ross furnished the following additional information:—

 1. Was the escape apparently accidental? It was accidental in that no precautions were taken to prevent the disease gaining access to the institution. But on two sides of the Asylum there are no houses, the ocean occupying one of them, a large reserve the other.

 2. Was visiting interdicted? Not in any way. The number of visitors is, however, very small. The tradespeople (contractors for supplies, &c.) came and went freely, and would probably come in speaking contact twice a day with a dozen patients—the same dozen each time.

 3. Was the leave of the staff stopped? No.

 4. When the single case occurred, was it isolated? No. I had but partly recovered from a sharp attack of the disease, and did not fully recognise the patient's condition till it was well advanced, and then deemed it too late to take action.

- 5. Was the source of the infection traced? No. I was first attacked, then the chief attendant (who has a family of five, all of whom escaped), and later the patient, who, being a hunchback and more or less a cripple, was more than most of the patients out of the way of near contact. Later, the clerk and one attendant with their families, an aggregate of thirteen, suffered severely, but these will be recorded by Drs. Ferguson and Beeston (as residing in the city?).
- an aggregate of emitteen, suncted several, the city?.

 6. As there was a good deal of influenza in Newcastle, why were the inmates not attacked in number? It is impossible to say, except, perhaps, the comparative isolation (see No. 1), the absence of all mental anxiety, the diet—from which meat is largely excluded—and the exceptionally good health of the inmates generally.

G. H. TAYLOR, L.R.C.P.E., L.R.C.S.E., Resident Surgeon.

1891.

In reply to the printed circular there has been no case of influenza at the Bay Prison since 5th September, 1890. It may be worthy to note with this that during last year influenza prevailed in Sydney Gaol, and at intervals a considerable number of men were transferred from that Prison to the Bay.

Resident Surgeon.

The facts as to transfers were ascertained from the Comptroller-General of Prisons, and were as follows:—Number of prisoners transferred on the dates mentioned:—October 13, 3; October 26, 9; November 16, 6. And the list of names having been referred to the Visiting Surgeon, Sydney Gaol, with a request that he would mention the dates and duration of any attacks of influenza that occurred to those prisoners, he replied as follows:—"Only one of the prisoners named herein suffered from influenza. He had a very mild attack, and was ill for only a few days. He was treated as an outdoor patient." 2 April, 1892.

APPENDIX IV.

Text of the Circular issued by the Board of Health upon Influenza.

THE Board of Health, having in view the probable recurrence of Influenza in New South Wales, directs that the following information and suggestions be made public.

Beyond all reasonable doubt influenza is a communicable disease, which spreads mainly from the sick, and the steps taken to restrain it should resemble to a great extent those which are known to be useful in checking the spread of measles and other infectious diseases.

Persons who have not thoroughly recovered from an attack of influenza, or who live in a house where the disease is present, although they are themselves in good health, should not attend church, school, or any other places of public assembly, or use public conveyances.

The healthy who wish to avoid influenza should have as little communication as possible with houses in which influenza is known to be, and with all who are known to be suffering, or who have not fully recovered from an attack.

Excessive fatigue, intemperance in any form, and unwholesome surroundings, by depressing the strength, render the constitution more susceptible of infection.

Persons who are attacked should go to bed on the appearance of the disease, and where medical aid is not available, remain there until recovery takes place. It must be very clearly understood that it is of no use "to try to fight off" thic disease.

The sick should be isolated, and the sick-room freely ventilated without draughts; and all other apartments should be kept well aired and lighted

All unnecessary textile fabrics, such as carpets and curtains, should, when practicable, be removed from the sick-

Attendants upon the sick should not hold closer communication with the healthy members of the household than is unavoidable.

Personal contact with the sick should be avoided as far as possible.

All discharges from the patient should be disinfected before being disposed of. All expectoration should be received into a vessel containing a disinfectant. Handkerchiefs and linen used by the patient should be frequently changed, and should be put into a vessel containing a disinfectant before being sent to the laundry, where they would be handled by and

ight infect healthy persons.

The premises generally should be kept scrupulously clean, and the drains thoroughly disinfected.

When the patients are well the sick-room should be disinfected by means of burning sulphur therein, or setting free chlorine gas from chlorinated lime, by the addition of hydrochloric acid thereto.

Attention is called to the General Rules for Disinfection and the use of disinfectants, as given in a circular issued by the Board of Health in 1889.

Issued by order of the Board, EDMUND SAGER, Secretary.

APPENDIX V.

REPORT on the Influenza Epidemic of 1891, in the Hospital for the Insane, Gladesville.

Report on the Influenza Epidemic of 1891, in the Hospital for the Insane, Gladesville.

The Hospital consists of a main building, containing 290 men and 245 women; a Hill Branch, about a quarter of a mile distant, which contains 170 men, and the Priory, with 39 men, also quarter of a mile away, but in a different direction. It must be explained that cases occurring in the staff were dealt with thus: Married attendants were sent to their own homes outside of the Hospital, and treated there; single attendants and nurses were treated in their own rooms in the Hospital. No one, at first, at any rate, was sent to bed as suffering from influenza until the temperature was found to be elevated, so that members of the staff might for a day or more be moving about among the patients while in the earlier stages of the disease.

The first case was that of a married attendant on 6th October. Then on 23rd October, two attendants at the Hill; on 24th October, two attendants and one laundress in the main building. Then the disease attacked the patients at the Hill Branch on 25th October. The main building was next attacked, and in the female wards. The nurses first suffered; then among the patients two isolated cases occurred on 26th and 28th October respectively; then the general outbreak on 1st November. The male side of the main building escaped, as far as patients were concerned, only one case occurring on 23rd November. The attendants employed here were not so much affected as were those at the Hill Branch, and those attacked were mostly married men. The Priory is in charge of a married attendant, who lives in the same building, but so separated from the patients as to be almost equivalent to being in a distant dwelling. The influenza ran through his household; a few only of the patients were attacked.

The cases occurring day by day are shown in the accompanying return. HOSPITAL FOR THE INSANE, GLADESVILLE,

Remarks.

Remarks.

The Hill Branch, where the first serious outbreak occurred, is exposed to the full force of the westerly winds, which were strong and cold about the time of invasion. The main building and priory are fairly sheltered from this wind.

The three divisions are distinct, but the patients meet at amusements and at Church Service on Sunday, and in the case of the men, mix together there to some extent. One working party of men is composed of patients from the Hill Branch and main building; all others are separate, and male patients and attendants do not meet the women in the laundry or elsewhere. The attendants and nurses do not mix when on duty, but each evening they are free to go where they please, and doubtless meet not only one another, but people living in the village, where influenza was very prevalent at the time.

The patients at the Hill Branch first attacked were those at work all day in the grounds, but cases soon occurred in those who did not leave the wards. No measures to disinfect the clothing were taken, and it was washed in the laundry as usual. It was sent there daily during the week of the epidemic, and it was when it began to be washed that the female side of the house was attacked, and among the first were the patients who work in the laundry, the others escaping for a day or two longer. It was not till 8th or 9th November that disinfection of the wards was practised, so that during the height of the epidemic in the hospital no measures at all were taken to prevent the infection of the male side, and yet it escaped.

height of the epidemic in the hospital no measures at all were taken to prevent the infection of the male side, and yet it escaped.

In the case of the priory, however, each case (if in a patient) was at once removed to the Hill Branch, and the priory was carefully disinfected at the same time as the rest of the Institution. The attendant-in-charge's children remained in his quarters while ill, and all his family were attacked, while of the thirty-nine patients only six were (sic). These patients mix freely together, both at meals and at work. Some of them go in and out of the attendant's kitchen all day, and the attendant himself continued to do his work all through his own illness.

The points specially deserving of note seem to be :—(First.) The probable carrying of the disease to the female wards by the infected clothing from the Hill. (Second.) The value of isolation, as instanced by the priory.

The attendants and nurses may have been the means of originally introducing the disease into the hospital. Some of them were ill before any of the patients were attacked, and by their mingling with people outside they had many opportunities of being infected and bearing infection back to the hospital, and no less than six nurses were ill before what might be called the general outbreak in the female wards occurred. But it seemed evident to those watching the cases at the time that the more probable cause of the infection here was the washing of the clothing from the sick at the Hill. This clothing accumulated in the laundry for a few days, and it was when this accumulation was taken in hand that the patients who were occupied in washing it were infected. From them it rapidly spread to the others they came in contact with in the wards. It is not possible to accept this as a proof of the spread of influenza through miected clothing, because of the possibility of the disease having been communicated by the nurses, who were ill from the 23rd October on, but it affords a strong probability of this.

As to the second po

16th May, 1892.

ERIC SINCLAIR, M.D.,
Medical Superintendent.

Note on Report of an epidemic of Influenza at the Hospital for the Insane, Gladesville

THE point of this case is not more than a remarkable coincidence. It is as follows: The attendants may be regarded as one body, and as one body with the townspeople, with whom some of them could and did mix every day during their evening leave; the earliest cases occurred among them, and doubtless they introduced the disease to the establishment. Secondly, the main building, as regards the patients, is separate from the rest of the establishment, and the male side of it is, of course, effectually separated from the female side. Thirdly, the laundry is a building at a distance, and is served, under suitable attendants, entirely by female patients from the female side of the main building. Now, on the male side of the main building attendants first fell ill. Immediately afterwards attendants on the female side were attacked, and after them patients on the female side; namely, one on 24th October, two on 25th October, on the 26th a patient and an attendant, on the 27th an attendant, on the 28th a patient and an attendant; and, as Dr. Sinclair remarks, these single attendants were not relieved from duty as long as their temperature had not risen, and then were sent to bed in their respective rooms attached to the their temperature had not risen, and then were sent to bed in their respective rooms attached to the wards under their charge. The disease was therefore in the building, and the patients were not very strictly isolated; but, since three clear days then elapsed without any fresh case arising, it seems possible (considering the short incubation period of influenza) that it was a sufficient isolation. After that interval a fresh attendant was attacked on Sunday, 1st November. That requires no special explanation. On the same date a new inmate was attacked; and this case was followed by two others on the 2nd, and thereafter day by day as shown in the table. Notwithstanding the three days' interval referred to, there would be nothing to remark upon here were it not that the inmates attacked on and from 1st November down to November — were laundry women, and laundry women only. And the case as to the laundry down to November — were laundry women, and laundry women only. And the case as to the laundry is this: The Hill Branch had furnished fifty-nine cases of influenza between 25th October and Saturday, 31st October; and day by day the day clothes of these persons were sent as usual to the laundry, where they accumulated until Monday, 2nd November. On this latter day the bed clothes of the fifty-nine patients were also sent down in ordinary course; and on that day the whole accumulation began to be sorted and

washed. The number of patients who work in the laundry is about 68; and 13 of them were attacked on 1st November and following days, down to the 5th November, when the general body of female patients began to suffer. Thus there seems some reason for supposing that the female laundry women were infected as to the three of 1st and 2nd November by handling day clothing, and as to the rest by handling night and day clothing from the Hill Branch and as the day clothing cannot have been so uniformly infectious nor so thoroughly infected as the night-clothes, because the inmates were put to bed as soon as they seemed ill, so the laundry women did not begin to suffer in number until the latter began to be turned over-more thoroughly in handling for the washers than in merely storing them. The case is not a very good one, and yet worth notice; for it is to be remembered that the question here is not whether influenza is infectious. That never can be answered from individual experiences such as this, and has already been answered in the affirmative on quite other evidence; but the question is whether the contagion of this infectious disease can be carried by fomites. The presumption is that it can until the contrary is shown; hence the foregoing coincidence is noticeable.

APPENDIX VI.

Remarks upon Shearing-shed Fever (sometimes called Fog-fever).

1. Dr. George A. Boodle, Walcha, writes :-

Our epidemics of catarrh of an influenza form are not confined to the shearing season, but may appear at any time; but in my experience of eleven years, chiefly in this district, it always appears more or less at that time, obtains its greatest development in shearing sheds, and appears to spread from them to the surrounding population, as though contagious, though I have no direct evidence to prove that is so. As we have an altogether unusual number of sheds within a few miles of the town, it is more likely to be marked here than in other places.

It is most marked in dry sunny springs, when there is great sun-heat and cold wind, when men get overheated in the sheds or in working in the sunshine, work producing abundant perspiration and the probability of subsequent chill. It was particularly prevalent in the shearing seasons of 1886 and 1887, and much less than usual in 1888 and 1889. Shearing begins here about 1st November and ends early in December, a time when, in this climate, there is apt to be a great daily temperature range (40° or more, sometimes 80° to 30°, and I have taken daily observations for many years), and a great difference between sun and shade temperature.

The complaint usually begins with dryness and soreness of the naso-pharynx, speedily followed by great prostration—the strong men so frequently attacked being forced to lie up—chills, pains in the limbs, frontal headache, fever, and general malaise. The face looks pinched, pale, and dusky, or sometimes flushed, eyes dull, and appearance of severe illness. At first sight cases often suggest typhoid fever. The duration is about three or four days, and convalescence fairly rapid; but relapses, often repeated, are common. It does not often lead to lung complications, but pneumonia and pleurisy are often prevalent at the same time. As in the late influenza, many of the cases simply follow the course of ordinary catarrh.

The great influenza epidemic differs from this only in matters of degree :-

A far larger number of people were attacked.
 A greater number of cases (something less than half) had no respiratory catarrh, and gastro-intestinal affections were more common.

(3.) A greater proportion of children were attacked.
(4.) The fever, I am inclined to think, was as a rule higher.

To sum up,—I should have no reason to suppose that the shearers' affection was a distinct form of catarrh, following as it usually does certain climatic conditions, and predisposing conditions of employment, and being, as it often is, much mixed up with other results of the same causes. But it is worthy of notice for the following reasons:—

- It has acquired popular recognition as a distinct disease, known as the "dog disease," or "shearers' cold."
 Its remarkable likeness to the late influenza epidemic.
 Its appearance of contagiousness and spreading from the sheds.
 Many cases equal in severity the worst cases in the late epidemic.
- (4.) Many cases equal in severity the worst cases in the late epidemic.
 Dr. Colpe, of Nymagee, draws the following distinctions between influenza and shearing-shed fever:—Influenza (as observed during present epidemic); mostly sudden onset, but in about 10 per cent. of cases previous eight or ten days of ill-health. Violent pains over eyes and in eyeballs, pains in back and limbs; temperature 100 to 102; cough in many cases. It differs from the epidemic catarrh often seen in this Colony. It closely resembles the catarrh common here among shearers at shearing time only; but the elevation of temperature is higher; the pains are not limited to the back and lower ribs, but are almost invariably also in forehead—often in lower limbs. Complicating symptoms are, timintus, spasm in arms and legs, tenesmus vesicæ, vomiting not infrequent. He also writes:—"To give information about the so called 'shearing-shed catarrh' as correctly as possible, I decided to watch the disease more closely this year than I had done before, but to my regret all sheds have cut out now, without any fresh cases occurring. The disease, as it comes under the notice of the general practitioner, isually offers little clinical interest, the patients being rarely seen personally by their medical attendant; the sheds are mostly far away from town, the men are apparently not dangerously ill, and therefore the station manager usually only sends a letter roughly describing the symptoms under which a number of the hands took ill; the medicine is then sent out to them—mostly expectorants and powders of acetamilid and Dover's powder in equal doses. Some of the men ride into town, but when seen by the doctor they usually are already greatly under influence of drink, and are no good subjects for observation. A number of cases, however, become complicated later on with true croupous pneumonia, of which I saw seven instances last year, and eight the previous year, in a district and amongst a population where pneumonia otherwise is ext
- 3. Dr. Lyttleton, of Adelong, gives the following account:—"I regret to say that I have but few notes re fog fever, shearers' catarrh, or in Temora, euphoniously called Temora rot. I have been here eight years, but saw no fog fever till 1885 to 1889. There has been none this year, which is curious considering the influenza epidemic and the specially rough, cold, and wet season. Fog fever here has generally, temperature 103-105, pains all over especially in head, always more or less bronchitis, with patches of mild pneumonia, sometimes capillary bronchitis. The pneumonia is usually of a mild type, but in 1886 there were three deaths from severe pneumonia. The influenza here was not very severe except a few cases amongst children; symptoms much the same as fog fever, but pain in head and limbs more severe, attack of shorter duration, but in almost every case leaving severe pain in thorax, or in my own case pain for six weeks in right iliac fossa. This after pain has in many cases been very severe and far more annoying than the actual attack. Whether the pain was in thorax or abdomen, in no case could I find any cause, and it usually wore off after a longer or shorter period, not exceeding two months. In influenza here there was great lassitude for a considerable time after the attack was over. I cannot believe either complaint to be contagious, as in many cases only one member of a large family was attacked. In my own household I was the only one. I do not see that there is any practical difference either in symptoms or treatment between fog fever and influenza."

- 7. This is a grazing and agricultural district. I attend every shed except one, within many miles, and not one has escaped.—(Dr. Brown, Cootamundra.)
 12. In three shearing-sheds influenza incapacitated almost every man about two to five days after appearance of the first case; no mortality. I was not at the sheds, but cases came in and gave information—(Dr. Henry, Warialda.)
 31. The so-called shearing-shed fever has nothing whatever to do with the influenza epidemic, and I scout the idea of its connection with this disease in any shape or form. The influenza broke out here long before shearing began in the district.—(Dr. Ross, M.L.A., Molong.)
 35. I have nothing to add on this subject. As in all seasons when the weather is moist and cool, the complaint was not severe in November 1800. In this November it was so mived with influenza of the epidemic form that it did not
- district.—(Dr. Ross, M.L.A., Molong.)

 35. I have nothing to add on this subject. As in all seasons when the weather is moist and cool, the complaint was not severe in November, 1890. In this November it was so mixed with influenza of the epidemic form that it did not attract much attention. From conversation with old sheep owners I hear that the affection has been distinctly recognised among them as long as they can remember as "shearers' disease," and by other popular names. The shearers used to attribute it to shearing wet sheep; but they never shear wet sheep now and the disease remains as before. During these two last years there has been quite enough of the affection to show its continuance. The shearers suffered more severely than the rest of the population from influenza, and their cases were usually severe, but after the epidemic had begun in town many shearers came from the low country, suffering with or recovering from influenza, and infected the sheds, which would explain it. The late epidemic of influenza differed very muterially from the shearers' complaint in all well marked or severe cases. The influenza of 1890, on the contrary, was not distinguishable by any marked symptoms, differing chiefly in the number of cases attacked. That is to say, the influenza of 1890, was pretty much like a severe and wide-spread epidemic of shearers' disease. That of 1891 was quite a new development, differing essentially from both.—(Dr. Boodle, Walcha.)

 48. During six years' practice here I have never seen any shearing-shed fever.—(Dr. Blackwood, Cooma.)

 51. Shearing-shed fever varies, and in some years is pretty bad, some years none at all. It is frequently complicated with pneumonia, but I have not noticed any such marked prostration as with influenza. The same remark applies to depression during convalescence—it is not so marked.—(Dr. Grigson, Muswellbrook.)

 64. Except for the great prevalence of influenza, which is apparently very communicable, I fail entirely to frame any satisfactory reasons in support o

(1.) All the symptoms of the former are found in influenza (with others usually superadded);
(2.) I first became familiar with influenza in an epidemic form in Tumut in 1886, and that resembled in its essentials the present epidemic on the one hand and shearing-shed fever on the other;
(3.) During the late shearing, the severity of the complaint varied in different sheds, in some resembling in every way the complaint as seen elsewhere in the severer form, in others hardly differing from the ordinary shearing-shed fever, but in every shed running a slightly altered course, and rather more severe.—(Dr. Failes, Conselerabran)

Coonabarabran.)

Appears annually, but each epidemic seems to possess peculiar characteristics. That is to say, each season is marked by some varying prominent symptom. For instance, some few years ago the epidemic was ushered in with severe pains in the wrist, at others it would be in the side or loins. In my experience there appears to be an annual epidemic in all large sheds, though I have only had a few cases to treat, there being no large sheds in this district. Consequently, I have only seen the cases when approaching convalescence in men returning to their homes hereabout as soon as able to travel. The largest shed about here only employs about fifteen shearers. I may add that I have not known the disease communicated by those invalided home to any members of their households.—(Dr. E. R. Smith,

not known the disease communicated by those invalided home to any members of their households.—(Dr. E. K. Smith, Cowra.)

72. Have lived several years in the Warialda district, and had charge of the local hospital. Shearing-shed fever was very prevalent in some years, and partook of the same character as influenza. It is called "dog disease" by the shearers. I recently visited Warialda, and spoke to some of the Station managers, who have been there for many years. Drawing their attention to an epidemic in 1885 of shearing-shed fever (or influenza) the lay opinion expressed was that the disease was the same as the later epidemic. My recollection causes me to be of opinion that the disease spread to people who never visited the sheds, and there were many complications of pneumonia, &c. Three in one family died of pneumonia, one of whom was a woman, and was not therefore in the shearing shed. Mr. Holmes, of Yallaroi, says that in that year (1885) all the shearers there were very bad, and his own children, who never went near the shed, had also the same complaint apparently. An old man also died from what he considered the same disease, and had never visited the shed. In the year mentioned (1885), during the hot dry weather, this complaint was very prevalent, and also all chest complications; but when the rain came, and the weather got colder, there was a general improvement in the public health. I can speak with some confidence, as that period was the most remunerative for practice that had ever been in the Warialda district, and I was literally run off my legs with travelling, &c. At the present date it is difficult to get exact information on this subject, as there is a possibility that both diseases (if they are not alike) may run side by side.—(Dr. Lane, Inverell.)

exact information on this subject, as there is a possibility that both diseases (if they are not alike) may run side by side.—(Dr. Lane, Inverell.)

73. In influenza: Greater prostration, nervous symptoms more prominent, greater emaciation, also delirium at night; temperature higher, 104° to 105°; headache more frontal; suddenness of onset; men shearing and feeling well in two hours had to go to bed; pains in back more severe, also great pain down front of legs; whether this was caused by position cannot say.

* * * In shearing-shed fever: the attack is not sudden; my experience is that the men have felt unwell a few days before the attack; scarcely any muscular rheumatism; cough slight; temperature not so high, and prostration not so great; no lowness of spirits, and generally are about their work in a week from attack; the climate here is much cooler than the Plains; and men coming from sheds in warm districts notice the difference.—(Dr. Rooke, Germanton).

84. My experience is that shearing-shed fever is an "epidemic catarrh" occurring during shearing-time induced by chill.

The shearcrs perspire freely whilst working, and no doubt get chilled during the different spells allowed for meals and smoke, or perhaps through handling sheep affected with catarrh. It is here commonly called "dog disease," probably from the amount of discharge from the eyes and nose. It differs from the late "epidemic influenza" in not being characterised by any seriously-marked febrile symptoms or complications, nor is there any prolonged prostration of strength during convalescence, which is generally rapid and complete. It attacks usually everyone about the station, whether in communication with the shed or not. It lasts only a few days, and readily yields to diaphoretics and a day or two's rest in bed. The above experience relates to a period of about four years ago, during a very wet season.—

(Dr. S. Maguire, Molong.)

Numbers 7, 12, and 31 of the preceding notes refer to the epidemic of influenza in 1891. The others are farther notes regarding shearing-shed fever in years before 1890. There seems to be some difference of opinion whether it be the same disease as influenza; it is now possible, however, to settle this interesting question by bacterioscopic investigations, for which an opportunity will probably soon offer.

> J. ASHBURTON THOMPSON, M.D., D.P.H. Chief Medical Inspector.

May, 1892.

1892-3.

LEGISLATIVE ASSEMBLY, NEW SOUTH WALES.

LEPROSY IN NEW SOUTH WALES.

(REPORT FOR 1892 ON ADMINISTRATION OF THE LEPROSY ACT; AND CERTAIN INFORMATION RESPECTING THE PREVALENCE OF THE DISEASE IN THE AUSTRALIAN COLONIES.)

Ordered by the Legislative Assembly to be printed, 23 March, 1893.

The Secretary to the Board of Health to The Under Secretary for Finance and Trade.

Board of Health Office, 127, Macquarie-street, Sydney, 16 March, 1893.

I have the honor, by direction of the Board of Health, to forward you herewith a report on Leprosy in New South Wales, and to suggest that, as the matter is of serious public importance, it should be laid before the Houses of Parliament. I have, &c.,

EDMUND SAGER,

Secretary.

 $\lceil Enclosure. \rceil$

LEPROSY IN NEW SOUTH WALES.

On the 1st January 1892 there remained under detention at the leper lazaret twenty-one persons (vide Appendix A); during the year twenty-one persons were notified to the Board, in accordance with the provisions of the 3rd section of the Leprosy Act, as suspected to be suffering from this disease. On investigation nine were found to be ill of some other disease and twelve who proved to have leprosy were accordingly placed in the lazaret; of these two were natives of New South Wales of European descent; one a native of England, who had been in the colonies since 1862; one a native of Fiji of European parentage; and eight Chinese.

The number remaining on the 31st December, 1892, was thirty; two natives of New South Wales of British descent and two Chinese having died during the year.

From the summary table it will be seen that the total number of patients admitted since 1883 is forty-three, three of whom were females and natives of New South Wales. Their nationality was as follows:—Natives of New South Wales eleven, of whom three have died; twenty-seven Chinese, of whom nine have died; one half-caste from the West Indies, who was discharged in 1885; one Javanese; one native of England; one native of Fiji; and one of Tanna (Solomon Islands). Of the total admissions during the past ten years twenty-two (or more than half) have been admitted during the years 1891 and 1892, or since the reporting of cases of leprosy was made compulsory. The Board does not regard this large increase as any indication of the spread of the disease, as many of the cases recently admitted must have been suffering from the disease for some years past; but it was only when the reporting of these cases was made compulsory by law that their friends and medical attendants notified the Board

cases was made compulsory by law that their friends and medical attendants notified the Board.

In Appendix C will be found particulars of all cases of leprosy in the other Australian Colonies, which information was furnished by the various health authorities in June last, in response to a request from this Board, from which it will be seen that including New South Wales seventy-three cases have been officially recorded in Australia during the past ten years; and that of this number fifty-four (or nearly three-fourths) have been Chinese. In view of this fact, and that two Chinese lepers were removed towards the end of the year from a Chinese camp near Bombala, which was found on inspection to be in a very insanitary condition, the Board directed that a special examination of all Chinese camps and quarters within the Colony should be made. The reports of such inspections are not yet all to hand, but so far no further cases of disease resembling leprosy have been found.

While the lepers are not allowed beyond the prescribed boundaries every reasonable facility is afforded to friends and members of the medical profession to visit them

afforded to friends and members of the medical profession to visit them.

The ordinary medical attendants of the lepers are, of course, the officers of the Coast Hospital, but other medical men are permitted to visit them for the purpose of seeing such as have been their patients, or for the study of the disease. At the recent meeting of the Intercolonial Medical Congress in Sydney many medical gentlemen availed themselves of the opportunity of seeing an affection which probably none of them had seen often, and certainly many had never seen at all. And the University students of the final year, in company with their teacher, similarly visited the Lazaret where Dr. Scot Skirving gave a special clinical lecture on that disease. The ordinary medical attendants of the lepers are, of course, the officers of the Coast Hospital, but

*550—A

The provisions of the Act permit patients to be isolated elsewhere than within the Lazaret, provided that the Board is satisfied that the circumstances of the patients permit this to be done efficiently. Obviously this would be a very difficult thing to do, and very expensive and fortunate it is that as yet no application has been made for this mode of segregation.

The detailed history of all the cases so far as the same could be ascertained will be found in

Appendix D.

Appendix F gives a short account of the curative, or, rather, remedial measures which have been resorted to—all unfortunately without avail. As in the case of tuberculosis a specific treatment for leprosy is still unknown, though we have, perhaps, some reason to believe that as our knowledge of the life-history of the lepra bacillus becomes more complete we shall one day arrive at means to kill the parasite without at the same time killing its host. This is assuming what is now generally admitted that the bacillus is the cause of the disease—the real contagion—and it is assuming no more than is so generally assumed for the, in many respects, similar tubercle bacillus.

As stated in previous reports, the patients who have been previously located in buildings attached to the Coast Hospital were, on the 1st of April, 1891, transferred to specially erected buildings, which had been duly proclaim as a Lazaret, in accordance with the Act. These buildings have been considerably added to during the year.

From the following tables it will be seen that the cost of the maintenance of the Lazaret since its occupation until the 31st December, 1892, was £2,338 7s. 3d., or an average cost per inmate, per annum, of £66 16s. 2d.; and that the cost of construction and equipment of the buildings, &c., has been £8,108 5s. 9d. For this sum accommodation has been provided for forty-eight patients—forty males along the latest females. As thirty-two patients are now under attention (two cases having been admitted since the 1st of January), there is now available accommodation for seventeen further cases. It is hoped that it will not be necessary to make any further extension, and that the action of Parliament in directing the notification and segregation of lepers will be the means of eradicating the disease from the Colony, for in view of the steady decline of Chinese immigration, of the greater attention which is now being paid to the sanitary inspection of Chinese camps and quarters, and of the strict segregation of all known cases, the Board has reason to hope that New South Wales may yet be saved from having leprosy as a disease permanently abiding in the colony, and the Board trusts that by the health authorities of other colonies rigidly enforcing similar sanitary regulations, Australia may ultimately be freed from the disease.

There is a considerable amount of leprosy amongst the coloured and native races of New Zealand

and Fiji; and, as no measures are taken in these colonies for the detection and segregation of lepers, they may become a serious menace to the well-being of Australia, and already two of the cases in the New South Wales Lazaret were residents of Fiji, and there can be no doubt, from the history of these cases, that they contracted length in Fiji.

that they contracted leprosy in Fiji.

Table showing the Working Expenses of the Leper Lazaret (male and female), at Little Bay, from the 1st of April, 1891, to the 31st December, 1892.

	£	s.	d.
Salaries	858	17	0
Provisions, &c. Fuel	771	19	3
Fuel	182	15	9
Drugs, disinfectants, &c.	66	16	10
Drugs, disinfectants, &c. Tobacco and opium	100	0	4
* Furniture, draping, bedding, &c.	0	0	0
* ironmongery, crockeryware, &c	0	0	0
Billiard table and fittings	41	14	0
Books, papers, games, &c.	75	17	10
Tools and materials for improvements by inmates and staff	157	11	3
Stationery	3	16	5
Stationery Sundries	78	18	7
Total working expenses for one and three-quarter years	†£2,338	7	3

^{*}The purchase of these articles for the period under review having been for the original fitting up of the male and female Lazarets; the cost has been charged against the equipment of the establishment.

† Being equal to an average cost per inmate, per annum, of £66 16s. 2d.

STATEMENT of the Total Expenditure of the Leper Lazaret (male and female) at Little Bay from its establishment to the 31st of December, 1892, showing from what sources the amounts have been

* These are all natives of New South Wales of European parentage. † Date of report. This patient was removed to Little Bay on 12 Jan., 1892.

† Of European parentage.

Note. - The only additional cases of leprosy in New South Wales which have been reported to the Board of Health are P.S., cet. 38, died in the Richmond River District in March, 1887, and G.R., cet. 28, whose death, certified by his medical attendants, was reported by the City Coroner on the 18th July, 1889. Both of these persons were of European parentage, and appear in Appendix C., under Cases III and VII.

APPENDIX C.

LEPROSY IN THE OTHER AUSTRALIAN COLONIES.

The following information respecting Leprosy in the other Colonies was courteously supplied by the various Boards of Health in June, 1892:—

VICTORIA.

The Board of Public Health has power to segregate persons suffering from leprosy in huts at the Quarantine Station, Point Nepean.

From the following returns it will be seen that there have been 8 cases of leprosy in Victoria since 1884—7 Chinese and 1 European.

Return showing number of persons found to be suffering from Leprosy and removed to Middle Quarantine Station, Victoria; also Deaths since 1884.

QUEENSLAND.

THE Central Board of Health has power under the provisions of the Health Act of 1884 to isolate persons suffering from Leprosy. A special Bill providing for the treatment, detention, and isolation of Lepers was before the local Parliament in June, 1892.

From the following returns it will be seen that there have been 17 cases in Queensland since 1889 —15 Chinese and 2 Europeans.

Return showing number of Chinese found to be suffering from Leprosy, and removed to Dayman Island; also deaths and discharges for each year since 1889:—

Return showing number of Europeans found to be suffering from Leprosy and removed to the Leper Station formed on Stradbrooke Island, in Moreton Bay:—

1892.

There are two Chinamen and one European now under orders from the Board for transmission to the Leper Stations at Dayman Island and Stradbrooke Island respectively

The following paper was contributed by Dr. Bancroft, of Brisbane, to the transactions of the Intercolonial Medical Congress, Sydney, 1892. It contains some new historical information regarding the appearance of leprosy in Queensland, and is reproduced here from the columns of the Australasian Medical Gazette:—

It is a matter for satisfaction that so few cases of leprosy have happened in Queensland to persons of European extraction, but there is good reason to conclude that without measures are carried out to remove Asiatic and Polynesian lepers to a considerable distance from the residences of the colonists, that the disease will spread amongst ourselves. My arrival in the colony dates from 1866, when I was appointed a visiting surgeon to the Brisbane Hospital, and shortly afterwards, 1868, I took charge as Resident Surgeon of the newly built institution.

At that time no medical man of the place was aware that he had seen a case of leprosy. The article in Erasmus Wilson's book on skin diseases was in our hands, but in no work accessible to the ordinary travelling practitioner was there a plate or drawing of leprosy in any of its forms. Danielssen and Boeck's book was out of print, and it was many years later that 1 had the opportunity of perusing that work in the library of the College of Surgeons in London. The illustrations there are valuable, and it is much to be regretted that no medical author in England had reproduced the plates in the class books of the day. Had such been the case the English medical student would have been able to diagnose ordinary well-marked cases of leprosy with readiness. As an illustration of the defect referred to, see article in report of Polynesian diseases, by an M.B. of London, in Intercolonial Medical Congress of 1889, p. 63, with photograph of a Polynesian with necrosis of fingers and toes. Leprosy does not appear to have been suspected.

I found on taking charge of the hospital a patient, a German, who had been a ship's cook, and had resided for a considerable period in the Sandwich Islands. He was usefully employed about the premises, and had well-marked tubercles of the face, eyebrows, and ears; his voice was hoarse, and the hands and feet too were anæsthetic in parts, as he discovered by at times burning himself, and the nails of the fingers and toes were defective. His appearance was remarkable, and I often interrogated him as to syphilis, which he denied having suffered from. A course of mercury did him harm, and it was only after reading Wilson's description repeatedly that I concluded the patient was a leper. With great difficulty did I obtain the concurrence in this opinion of some of my colleagues. He died during my tenure of office from albuminuria and dropsy. On post-mortem examination I remember to have noticed white deposits in his liver.

A number of Polynesians with ulcers of the feet and carious bones I treated, and in the hospital case books I entered them as "Islanders' toe-disease." After a time it dawned on me that these were also cases of leprosy.

A large elastic tumour, mostly of the groin, was found in a number of patients; cases of chyluria were discovered, and filaria were found associated with both these. My attention was turned from the few cases of leprosy that appeared, and I became of opinion that both the leprosy and filaria were associated diseases, brought here by the Chinese and distributed by mosquitoes carrying the diseased blood to water tanks and elsewhere.

Numerous

Numerous cases of filaria disease were found in the families of cottagers who had wells, open water butts, and tanks. In one instance there were four children suffering from filaria in one family. This led to more careful exclusion of mosquitoes from water tanks by metal gauze covers, and to the disuse of wells. Happily now the large water-work pipes are well distributed; few young children are found with manifestations of filaria diseases.

My original paper on this subject is published in the Pathological Society's Transactions, 1878, vol. 29, p. 407. At the meeting at which this was read I remember to have crossed swords somewhat with the President, Sir Erasmus Wilson, who called me to task for affirming that the term Elephantiasis should be used for the big-leg disease only, and that Elephantiasis Græcorum as applied to leprosy should be abandoned. This has practically now come to pass.

My attention was drawn to a case of phalangeal necrosis by Dr. Jno. Thomson, then house-surgeon, who considered the patient suffering from leprosy. The case is recorded in the *Lancet* of February 18th, 1879. This patient had also embryonic filaria in his blood. He managed a boiling-down establishment in close proximity to Chinese vegetable gardens.

On reading over the old case books of the Brisbane Hospital I became convinced that there were cases of leprosy, and possibly filaria diseases, among the records.

I subjoin the history of one patient (1855) which seems most characteristic of leprosy. Neither the late Dr. Barton, who recorded it, nor his colleagues appear to have had any suspicion that the case was leprosy.

HOSPITAL RECORDS, Fol. 258.—Necrosis, &c.

Our Tsar, &t. 56, April 10th, 1855.—History—Can speak very little English, and the history is imperfect. He has had some disease of the first toe of the left foot; it has been removed and there is now an opening in the ball of the great toe of the same foot, from which there is a slight feetid discharge, and a probe detects loose bone. The last phalanx of the second finger of the right also is dead, and separating, and the soft parts have sloughed away. He is weak and seems broken down in health.

April 20.—The diseased phalanx removed at the joint.

June 7.—General health much improved; the diseased great toe removed by Dr. Cannan with three-fourths of its metatarsal bone—no vessels required to be tied at the time, and the wound was brought a little together by two sutures. 7 p.m.—Some hæmorrhage occurred which was restrained with bandage and compress.

August 8.—Discharged well. The foot has been slow in healing; the hospital has provided him with a padded boot, which acts as the ball of the toe did to support the foot.

CHRONIC RHEUMATISM.

Fol. 417—Admitted February 29, 1856.—History.—This old Chinaman was in Hospital in April and August last. (For history vide fol. 258.) He is now admitted with pains chiefly in the hands, the fingers being contracted.

March 6.—Left hospital without leave, having first assaulted the wardsman; relieved.

NECROSIS AND GANGRENE.

Fol. 517—Admitted December 18, 1856.—History.—This old Chinaman has been in hospital twice before. (Vide 417, 258.) He is now in a miserable state. The left foot is dark coloured, hot, but without feeling. There is a very feetid discharge from the spot where the great toe was removed. The left hand is swollen, hot, dark coloured, and painful. He has a dry tongue; pulse over 100, with little volume. The left foot is wrapped in cotton at once.

March 25.—A finger of the left hand removed at his request, as the necrosed bone "too much stinkey."

April 20.—A straight palmar splint applied to left forearm and hand to prevent flection of the fingers.

April 28.—Discontinue splint; the parts will not bear the pressure.

Left hospital without leave on November 17, 1857; incurable.

Fol. 102.—Oun Tsar, at. 59, February 3, 1859.—History.—This old man whose hands and feet are quite crippled by repeated attacks of necrosis and senile gangrene, has been a long time in hospital on several occasions. He left the last time a little more than a year ago, and is supposed to be living on the charity of his countrymen at Limestone ever since. He brings down the usual admission fee, given him by his friends. He is now unable to walk. There is a sore swelling about the dislocated left wrist.

May 28.—Feet cold and insensible, vesicated and discharging a quantity of serum; the remains of right hand also inclined to vesicate.

The nights of 22nd and 23rd were extremely cold; feet wrapped in cotton, flannel outside, and hot water and brandy ad lib given him.

May 30.—About the same; will not drink the brandy; weather warmer.

June 29.—Died.

The first case was observed in New South Wales by Dr. Cox in 1872, so I see it is recorded.*

Believing that leprosy might be commonly associated with filarial disease, I examined the blood of a large number of lepers in the Tang Toc Sing Hospital at Singapore. I examined the blood in the day-time, and with negative results.

Manson has since shown that filaria rest in the day-time; but I have seldom much difficulty in extracting them by puncturing the lowest point of the lobe of the ear, and pressing out the blood. Most likely this proceeding dislodges the worms from their resting places.

There

There is not much evidence of the association of filaria and leprosy; but in Japan it is on record that in one village, where water lies abundantly under the houses, leprosy, which is very common, often terminates the lives of the victims with associated elephantiasis. Why were both these diseases—elephant-leg and leprosy—by the old physicians called by the same name, if not associated diseases?

I should not omit to mention in this place that the filaria disease of the dog is most likely to have been imported from China. Fortunately this terrible heart-stuffing worm has never been found in the human subject. I have put on record somewhere that the fly Stomoxys can take up plenty of embryos of this worm; and fleas and lice I have found with the same in the blood they have sucked up. I presume your dogs then eat the insects, and so become affected.

For Dr. Thin's book on leprosy the medical profession should be grateful. It is a monument of industry, and will go a long way to prove the contagious nature of leprosy. In any future edition I would suggest that instead of two photos of lepers he should produce twenty, as nothing is more likely to educate the eye of the student better than well-executed photographs.

Dr. Arning in his visit to the Sandwich Islands, it appears, has not been able to find the bacteria of leprosy in the blood of mosquitoes that have sucked lepers, but this may yet be proved to be the case.

I was not successful in my first searches for filaria in the blood removed from the stomachs of mosquitoes. Manson was the first to discover them, and I found them subsequently (see "Cobbold's Entozoa," p. 198); afterwards every observer verified the fact.

My friend, the late Dr. Wm. Hobbs, often spoke to me about mosquitoes distributing his vaccinations far and wide in the houses of his patients. This was before mosquito net was much used.

In the Sandwich Islands the mosquito is believed to distribute leprosy. There, no doubt, are several agents, and such blood-sucking insects as bugs, fleas, and others may work to the same end. In the penetrating organ of the tick one sees the fluid with air spaces moving up and down under a power of about 50 diameters. Is it not more likely that the leprous bacteria are at times dislodged from the cells in the skin and distributed in this manner? If parasities one hundredth of an inch long—the embryonic human filaria—can be carried by mosquitoes far and wide, small impediment exists to the distribution of the minute bacteria of leprosy.

Lewis says (see "Cobbold," p. 197): "It was observed that nearly all the mosquitoes captured in one of the servant's homes contained hæmatozoa."

With regard to the destination of hæmatozoa, I have nothing to add to the observations of Manson, whose researches tend to show that water may contain the parasite, and that potable water should be filtered or boiled, and that thirsty children should have suitable provision made for them.

But bacteria may be implanted direct, as Dr. Hobb's vaccination was spread. We know that mosquitoes and other insects give out poisonous saliva, which, in the case of mosquitoes, gives severe pain. Death to dogs comes of the bite of the Queensland tick, and a temporary blindness of some weeks duration I have seen in the human subject. This poisonous saliva is inserted, and why not with it bacteria acquired from any leper bitten previously?

The food theory of distribution of leprosy does not appear to help us. Everybody here almost without exception has partaken of Chinese-grown vegetables. They are mostly cooked, but radishes, lettuce, and parsley are consumed raw. I always peel my radishes, and never eat uncooked leaves. If leprosy were distributed by food, it is strange the disease does not spread more extensively.

Consider the enormous export of articles of food from China and India to Great Britain with no single instance of leprosy developing therefrom. Living together and intimate association seems necessary in the generality of instances, as the interesting case in Dublin related by Dr. H. Benson goes to prove; but in Queensland and New South Wales there are several cases where no close relationship with the Chinese can be discovered. Chinese have nothing to do with our cows, and in their own country do not keep them. Our Chinese are gardeners and shopkeepers occasionally cooks to Europeans. The colonists never sleep in their shops, or work with them in their gardens. Some few have European women as wives, but I have not seen any suffering from leprosy.

The Chinese grow peanuts (Arachis hypogea), and sell them to children. They are eaten uncooked, but the shelling is done by the purchaser.

There are several cases of leprosy in persons of European descent that have happened in Queensland besides the two recorded previously. One was a German who worked on a sugar plantation. He had tubercular leprosy of the face. There was no evidence of his association with Chinese. He is now dead. A second was a grave-digger, resident of an inland town. He had carious bones in the feet from which he suffered terribly and died. Three cases now are from a northern town. A Chinese leper or lepers were camped in the outskirts of this town, but no contact is acknowledged. The first case of the wandering aboriginal suffering from leprosy has just been discovered. He has probably contracted it from a Kanaka camping with him.

These three cases from the northern town are vexatious to understand, as well as Dr. Ashburton Thompson's cases in New South Wales (report, 1891), where no special communication happened between them and Chinamen, except the purchase of vegetables. We know that Chinamen and other Asiatics, and Polynesians, live here apparently well for years, then develop leprosy, both tubercular and anæsthetic. That they have brought the disease with them in a latent state cannot be doubted.

To be successful in preventing the spread of leprosy in Australia it will be incumbent on the various Governments to discover these cases at the earliest possible period. All such people, Asiatic or Polynesian, it will, therefore, be necessary to examine by medical men familiar with the general aspect of leprosy, and to call in the aid of bacteriology to determine, if possible, whether suspected spots, indurations and skin affection may contain the leprosy microbe. Before being admitted into the country, an examination should be made and an annual inspection afterwards.

This may seem onerous and expensive, but if by such means we can be saved the infliction of permanent leper hospitals it may be a direct saving of public funds.

SOUTH AUSTRALIA.

Under the provisions of the Public Health Acts Amendment Act of 1884 the Central Board of Health of South Australia has power to isolate persons suffering from leprosy. This Board reports that there has never been a case of leprosy in South Australia proper; but that there are three or four cases (all Chinese) in the Northern Territory who are isolated on separate quarantine grounds.

NEW ZEALAND.

THE Colonial Secretary reports that there are no special Acts in force in regard to leprosy, and that the only information available on the subject is that contained in the following Parliamentary Report by Dr. Alfred Ginders on "Leprosy among the Maoris at Taupo and Rotorua," dated 4th July, 1890, from which it appears that six cases among the natives came under his notice.

I have the honor to report that, in accordance with your instructions, I proceeded to Tokaanu on the 24th ultimo, where I arrived on the 26th, and on the following day commenced an examination of the cases of Maori leprosy there, Mr. L. M. Grace acting as interpreter. I had previously, on the 1st ultimo, visited an isolated case at a spot called Kiamoe, 12 miles from Rotorua, on which occasion J. H. Taylor, Esq., J.P., was kind enough to drive me out and act as interpreter.

It will be convenient to give the history of each case in the order in which they came under my notice.

Case 1.—Ereatera, a male Native, aged sixty, belonging to the Ngatirangiwewehei Tribe, of Awhaho, on Lake Rotorua, isolated by his tribe at Kaimoe, on the edge of the Oropi forest, got his first symptoms of ngereagere in 1879. Pale spots and patches appeared on his thighs and back, which are still visible, but have never at any time been anæsthetic. Two phalanges of the right index finger are gone; the stump is well healed. The other three fingers are permanently flexed on the palm. The thumb is normal. The first joint of the left index finger is also gone, and the other fingers flexed, as on the right hand. Both hands are anæsthetic, sensation beginning at the wrist, but some degree of numbness existing as far as the elbows. The disease has quite lately attacked the right foot, gangrene having commenced in the great toe, with considerable swelling of the whole foot. He complains of much pricking pain, which he compares to that of a burn. The foot is anæsthetic, and numbness exists as far as the knee. The same thing obtains on the left side, but the foot and toes are to all appearance normal. There is no contraction of either flexors or extensors. The right eye is totally blind from cataract. His general health is fairly good. His wife has always lived with him, and is in good health; they have no children. He has no collateral relative who ever suffered from the disease. He states that he has known cases, commencing as his did, with the discoloured skin-patches, to be completely cured without loss of substance. He never resided in the Taupo district, or associated in any way with persons suffering from ngerengere. He is free from all superstition with regard to the origin of his disease, and states frankly that he has no idea how he got it. He has fed much on rotten maize (kaanga-piro), rotten potatoes (kotero), and putrid shark (ika-panuwhera). This appears to be a case of the purely anæsthetic form of the disease.

Case 2.—Hiri, a male Native, aged thirty-eight, of the Ngatikurama Hapu of the Ngatitu-wharetoa Tribe, residing at Tokaanu, has been suffering from ngerengere since August 1881. In this case the pale skin patches are absent. The first symptoms were swelling of the hands and feet, with pricking pains. At present two joints of the right index finger are gone, one of the middle finger, the whole of the third finger, and one of the little finger; the thumb is ulcerating. On the left hand the little finger and thumb are flexed, and two joints of each of the other fingers gone. Anæsthesia is complete to the wrists, with numbness up to the elbows. On the right foot all the toes are ulcerating. On the left, the great toe is gone entirely to the head of the metatarsal bone. The toes on both feet are permanently extended from contraction of the extensors. Anæsthesia exists as in the hands and arms. The right eye is quite blind, the cornea opaque, with several vascular tubercular nodules projecting from it. Both ears are thickened and tuberculous; the nose also, the right ala about to separate from ulceration. The lower part of the forehead and the right cheek show numerous tubercles. The disease having attacked the larnyx, his voice is low and hoarse, speaking being evidently painful to him. He suffers considerable pain at times in the face and head. This man is a miserable spectacle. He cannot live long. On being asked to what cause he attributed his disease, he stated that the tohungas told him he had received wero-ngerengere from a man with whom he had quarrelled about a canoe. It is singular and suggestive that the word "makutu" is not used in reference to ngerengere and its communication for purposes of malice or revenge. Wero-ngerengere is supposed to be an art which has to be acquired before it can be practised. I shall refer to it again. In this case we have the tubercular and anæsthetic forms of the disease combined.

Case 3.—Te Iho, a Native boy, twelve years of age, brother to the last case, and living in the same whare with him, got his first symptoms of ngerengere three years ago. Pale serpentine patches are well marked all over the back, which are at present decidedly hyperæsthetic. His left hand and arm are quite powerless, and the muscles wasted; the fingers are drawn forcibly backwards from contraction of the extensors; there is loss of sensation as far as the elbow. The left great toe is swollen, flexed, and anæsthetic. The limbs on the right side are normal. At present there is no gangrene or ulceration. His general health is fairly good.

Case 4.—Maata, a Native woman, aged thirty-five, got her first symptoms of the disease in 1880, and died of it on the 8th October, 1888. She was sister to the two last cases, and lived in the same whare. She had no discoloured skin-patches, but began with a swelling outside the right thigh. This is said to have been cured by a tohunga in the Waikato, but in two months after her return home her face became red and swollen, the redness and swelling extending to the neck and shoulders. Shortly, numerous tubercular swellings appeared on the body, which ulcerated. This was followed by the usual gangrene of 550—B

the toes and fingers, several joints falling off. This case is described by those who saw it as even more severe and revolting than that of her brother Hiri, described under No. 2.

Case 5.—Amiria, a female Native, aged twenty-one, living at Maaroa, a settlement between Taupo and Atiamuri. She is the daughter of Hori Tehina, a Ngatituwharetoa, who died of ngerengere in 1874. He married a half-caste woman after the disease had manifested itself, by whom he had two daughters. The younger, a deformed idiot, died some time ago. The half-caste married again, and has several healthy children by her second husband. She herself is in perfect health, and appears much attached to her leprous daughter. The disease first manifested itself in this girl when she was three years old, by the appearance of pale patches on her thighs. These patches are usually the initial symptom, and are regarded by the Maoris as absolutely pathognomonic. The digits of both hands have all lost one or more phalanges, and it is singular that on all, even where only one joint remains, a nail has been developed at the extremity. She has lost every toe on both feet down to the heads of the metatarsal bones. The stumps on both hands and feet are soundly healed. No other part of the body is affected. Hands, arms, feet, and legs are anæsthetic, completely so up to the knees and elbows, and thence graduating upwards to slight numbness. She is able to walk a little, appears well nourished, and her general health is good. Her mother gives a singular reason for her favourable condition: in her own words, "She is such a good girl—says her prayers, and goes to church regularly, and does not run after the men."

Case 6.—This case is interesting from the fact that the patient was a brother of Hiri, Maata, and Te Iho (cases 23, and 4), and lived in the same whare with them. His name was Te Rangi, and about the month of June, 1888, he was brought by a European to the Maori hospital at Rotorna suffer-

about the month of June, 1888, he was brought by a European to the Maori hospital at Rotorua, suffering from a wound of the palm of a very severe character. He was twenty-four years old, a fine tall fellow, noted as an athlete and wrestler. His health was apparently perfect. He was under my care for a fortnight. The wound did remarkably well, but the healing was not quite complete when he returned home. In some six or eight weeks after his return he was taken ill. His face became swollen and covered with black blotches, which ulcerated; abscesses formed in both groins and auxillæ; there was discharge from the ears; he had difficulty in swallowing, with pain in the larynx, and husky voice. Both he and his friends believed he was suffering from ngerengere, and he was with difficulty restrained from committing suicide. He died on the 27th October, 1888, after an illness of less than three months. This case can only be regarded as one of acute blood poisoning, but, taken in conjunction with his sister's

This case can only be regarded as one of acute blood poisoning, but, taken in conjunction with his sister's case, whose symptoms at first were those of erysipelatous inflammation, it is highly suggestive.

Statement of Rakeiwairua, aged sixty-five, the father of cases 2, 3, 4, and 6: "I never had any symptoms of ngerengere. My wife Huiwa, the mother of these children, when she was young, had a white patch on her right side; it was not anæsthetic. The tohungas told me it was caused by her gathering fern on a spot where a ngerengere had once lived. This was cured by a tohunga, and she never had any other symptom of the disease. Ngerengere was much more prevalent in the Taupo district when I was a boy than it is now. It was first brought into the district three generations ago by a man whose name was Te Oro. He belonged to the Ngatipaki Hapu of the Ngatituwharetoa Tribe, and lived at Oruanui. His grandson is still living. His genealogy is thus: Te Oro begat Tamati Pahiroa, who begat Hame Pahiroa, now about forty years of age. Te Oro wished to be avenged on certain members of his tribe who had offended him, and hearing of the terrible ravages of this disease among the Ngatimaru, at Hauraki, he went there and learnt the art of communicating the disease (wero-ngerengere). On his return the disease broke out, and we have never been free from it since. I do not think ngerengere is contagious. With regard to my son Te Rangi, I believe his disease was the same as that his brothers are suffering from, but regard to my son Te Rangi, I believe his disease was the same as that his brothers are suffering from, but I never knew or heard of a case so rapidly fatal. Our food here is chiefly pork, potatoes, sow-thistles, and watercress. In times of scarcity we eat the fish of the lake, kokapu and inanga. The former are all more or less diseased. Their flesh and entrails are infested by a red thread-worm. They have also a kind of fungoid disease of the skin. Numbers of the kokaku are sometimes thrown up dead on the beach, and we eat them if we have nothing better; but this does not often happen."

The chief Paurini Karamu, of Tokaanu, is decidedly of opinion that ngerengere was far more pre-

valent in former times than it is now.

Wi Mahi, aged eighty, a chief of the Ngatirangiwewehi, living at Awahou, on Lake Rotorua, says "There is no ngerengere now as compared to what it was when I was a boy. I have known it carry off whole hapus. I attribute our immunity to the fact that all the old men who knew how to communicate the disease have died out. My father was one of the worst of them. He destroyed numbers by giving His plan was to make his enemy a present of a mat or some other article of clothing them ngerengere. that had been worn by a ngerngeere, and the disease was sure to follow."

Conclusions.

1. That the disease known to the Taupo and East Coast tribes as ngerengere, to the Ngapuhi and northern tribes as puhipuhi, and to the Wanganui and western tribes as tuwhenua, is one and the same

- disease, and that true leprosy.

 2. That no one who has seen leprosy could possibly mistake the symptoms presented by the man Hiri (case 2) and the boy Te lho (case 3).

 3. That the general consensus of opinion amongst the Natives that the disease first appeared on this island at Hauseli case time during the letter helf of the assenteenth contains may be recorded. this island at Hauraki some time during the latter half of the seventeenth century may be regarded
- 4. That the probability is that it was introduced by the marooning of a leper from a ship (probably a whaler) at or near Hauraki.
- 5. That the story of its introduction to the Taupo district by Te Oro is too recent to be relegated to the category of Maori myths, and may therefore be accepted as substantially correct.

 6. That the term "wero-ngerengere" is not an alternative name for the disease, as some suggest,
- but the name applied to the act of cummunicating the disease by puncture or inoculation, as the etymology indicates.
- 7. That the immunity from the disease enjoyed by women who have lived for years with leprous men, and vice versa, makes it difficult to believe that it is infectious or contagious in the ordinary sense.
- 8. That if the proliferation of a specific microbe in the blood and tissues is essential to the disease, a very special environment would appear to be necessary to secure an effective invasion.

9. That if filthy habits and insanitary surroundings, leading to impaired vitality, are to be regarded as predisposing causes, such are not far to seek amongst the Taupo Natives, who are notorious for their neglect of personal cleanliness.

10. That in all probability the worst cases have arisen from direct infection of the blood by

11. That it is worthy of note that the Natives believe that the leper's urine and fæces contain the germs of the disease, and they are consequently very careful as to their disposal.

12. That complete segregation of those effected would probably stamp out the disease in a few

vears.

WESTERN AUSTRALIA.

THE Central Board of Health reports that there has been no case of Leprosy since that of the Chinaman Ah Lee reported in 1890, and that this man is no longer in the Colony. (This patient was on the 29 November, 1889, located in a hut outside the Quarantine Ground at Woodman's Point near Freemantle.)

TASMANIA.

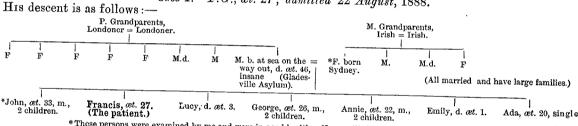

THE Central Board of Health reports that so far as is known the Colony is entirely free from the disease, and therefore there has been no legislation on the subject.

APPENDIX D.

CLINICAL Notes of the cases of Patients of European descent who have been admitted at the Lazaret since its establishment, and of the cases of coloured patients who survived into the year 1892. By J. Ashburton Thompson, M.D., D.P.H., Chief Medical Inspector.

PATIENTS OF EUROPEAN DESCENT.

Case I .- F.G., &t. 27; admitted 22 August, 1888.

*These persons were examined by me and were in good health. No constitutional disease reported in this family.

History.—He was weakly during infancy, but has had no important illnesses. He lived with his parents at Penrith, Goulburn, and Bathurst until he was 11 years old; the family then came to Sydney, and he has lived there ever since. On leaving school he spent one year in the service of a cordial-maker; he then helped his mother, who kept a restaurant, his duty being to buy vegetables in the markets (frequently from Chinese), and he did this for another year or more. At about 17 he became a carter, drawing building materials; and after a time he began to learn plastering. After some months of this work, during which his chief business was to beat up bullock's hair and mortar with a trowel, and being between 19 and 20, he found the trowel had broken the skin over the outer side of the right fore-finger. between 19 and 20, he found the trowel had broken the skin over the outer side of the right fore-finger; and with this sore his present illness seems to have begun. The finger swelled; it never recovered its natural size or appearance. According to his brother's account, anæsthesia of the hands and feet was among the earliest symptoms, it being observed that he sometimes burnt or injured himself without being among the earliest symptoms, it being observed that he sometimes purnt or injured nimsell without being aware of it. Three or four years later he had an attack which is described as erysipelas and rheumatic fever, and from that general swelling and distortion of his hands and feet date. Two years later still he began to get a disease of the eyes, which has produced opacities of the cornea and adhesions of the iris, and has rendered his sight very imperfect. Lastly, a few months ago, he tried to cut his throat, but his mother and brother saw no reason at the time to suppose him insane. State on admission.—He now seems to have a fair amount of strength. His hands and feet are much distorted and some of his fingers have lost the have a fair amount of strength. His hands and feet are much distorted, and some of his fingers have lost the terminal phalanges by absorption; the skin of the face and ears is thickened and roughened; and in all those situations there is very imperfect sensation—so that on being pricked with a needle he only felt that he was being touched. The patient's family have always been in comfortable circumstances. He says he was never much in the habit of eating fish; was not very fond of it; ate it occasionally, like other

March 23, 1891.—The mask is reddened—slightly, uniformly, without brown tinge, and looks rather as though it had been rouged and well powdered afterwards; the reddening ceases at the hair, except on the temples, where it stops a little short of the hair; it extends all round the neck. face is loose and inclined to fold; it shows everywhere rather fine wrinkles, which are nearly longitudinal; they do cross each other, but at very acute angles. There is general thickening and distortion The skin of the of the features; the nose is broadened and flattened, and the alæ appear to have lost substance, although they have never ulcerated. There are numerous tuberosities in several situations, but most upon the they have never ulcerated. There are numerous tuberosities in several situations, but most upon the cheeks; they are scarcely visible, but are very easily felt. The ears are not much deformed; there is no prominence of the superciliary ridge. The scalp is unaffected, and covered with thick silky hair; eyebrows gone; eyelashes gone; he has no beard or whisker. The whole trunk shows a brownish red or dirty red mottling, which is not very strongly marked. The hands are both considerably swollen, bluished, and the fingers sausage-like in shape. Right hand: the first phalanges can be extended and flexed; the second row is permanently fixed; the third row is not distinguishable, but some firmly attached small the second row is permanently fixed; the third row is not distinguishable, but some firmly attached small

fragments

fragments of nail remain; the thumb is similarly deformed, but not quite so much. Left hand, the changes are the same, but not quite so great, and more of the nails remains, though they have not the normal shape. The legs show brown maculæ and brown mottling; on the right shin, from the insertion of the patellar tendon downwards, is a row of cicatrices of old ulcerations. The feet are not so swollen nor so deformed as the hands. Special senses.—The sight is now quite gone; hearing good; smell (the left side of nose is permanently closed, the right only as a rule, but when the latter is free) is almost absent; voice, hoarse and without quality; but there is no dyspnæa. Sensation.—There is general analgesia, but sensibility to an ordinary touch is present. I have detected no area absolutely anæsthetic. I found no spot on which he could distinguish between the prick of a pin which drew blood and a touch with the head. General health said to be perfectly good; seems strong and well nourished. He has no attacks of ill-health, and no pains.

December 4, 1891.—His condition is not much altered. He complains of a great deal of thick and offensive discharge from the posterior nares; and there are several rather sharp-edged ulcers which have a yellowish coating on the soft palate, and especially around the base of the uvula. His usual breathing is decidedly more noisy; and he has had several attacks of laryngeal spasm which have lasted from two to five or six days at a time.

September 25, 1892.—On this day F.G. died, his illness having lasted about eleven years. Death occurred from gradually progressing exhaustion. The following notes were made by Wardsman F. Hunter:—February—Ectropion of lower lid of left eye. A bright red rash has appeared during the last fortnight on trunk, both back and front, beginning at the neck, but not invading the iliac regions, 'except in a few small spots; on firm pressure a brownish stain is visible, and the red colour returns very slowly. March—Depression, and suicidal tendency. The left cornea perforated and contents of eyeball discharged. July—Ulcers on legs have become much larger, very offensive, and discharge freely. August—Towards the end of this month the ulcers on the right leg looked much healthier, and began to heal a little; left, as before, the tibia being exposed for about 5 inches. September—Died on the 25th, without asphyxia.

Case II.—H.B., æt. 17; admitted 17 December, 1889.

His descent is as follows:-

P. Grandparents, Irish.

* Father born at Penrith, New South Wales.
Always lived in New South Wales.

M. Grandparents, English. | * Mother born at sea, before arrival in Australia. Lived always in New South Wales.

H.B., the patient (and nine other children in good health), born and lived always on the Meroo River.

* These persons were examined by me and were in good health.

History.—The boy's father, formerly a publican, is now a selector and labourer, living on the Meroo (Mudgee), and has always been in fairly comfortable circumstances. This is an old gold-field, and there have always been Chinese there within his recollection; but communication of this family with them has always been strictly limited to purchases of tea and sugar, and occasionally such articles as boots from a store kept by some of them. Those who keep the store are said to have been there very long and to be well. All other conditions seem to have been those usual in the bush. Fish was very rarely to be got, and canned fish was very seldom tasted by this patient. Until 13 years of age he was well, strong, intelligent, and active. The fingers of the left hand then began to contract, and the muscles of the forearm wasted somewhat, so that a doctor supposed he had injured the limb, and that it was wasting from disuse. Next, blebs appeared on the fingers, and loss of sensation to a small extent was observed. At about 15 years of age discoloured spots of reddish-brown colour appeared on the trunk, and afterwards on the extremities; under some treatment these disappeared or nearly disappeared a few months later, but they reappeared of a pure brown colour without the reddening. The right hand and foot in the meantime had become contracted and swollen, and lastly, about the age of 16, his face began to get discoloured, to swell, and to be disfigured.

State on admission.—The face (being the mask alone) is disfigured by an irregular swelling or infiltration, which is rather hard; a few distinct tuberosities are to be seen; in colour it is uniformly reddened, but more deeply in places, so that it looks patchy; the nose is broadened and thickened, the eyelids thickened, the superciliary ridges prominent; the ears have the lobe slightly thickened, and not hardened, but the tragus is both thickened and hardened, and proportionately more deformed. Eyesight unaffected. Hands.—The fingers on both sides are contracted moderately and thickened; there is swelling, or thickening at, and immediately above, both wrists. Feet.—Right foot is generally swollen and deformed, but the toes are scarcely contracted; it is discoloured (reddish or purplish); a blister appeared on the sole about a year ago, which broke, healed, appeared again and healed, and at last left an ulcer, which is now present. Left foot discolouration only. Trunk and Limbs.—These show very numerous patches of discolouration of irregular shape, which are of a quite clear brown, of the same shade as the back of a sunburnt hand; there is no reddening of these patches. They are paræsthetic, but the patient (as usual) denied this until he was shown that he could not distinguish between a touch with the head of a pin and a prick with the point.

March 21, 1891.—The whole mask is now enormously distorted by prominent, large, and more or less distinct tuberosities; it is very red, of a rather bright tint; the redness ceases where the hair begins; both sides of the hypertrophied and flattened nose are generally stopped up, but sometimes are free; the ears show many lepromata, especially about the lobes; the hair of the scalp seems normal, although dry and not very thick; the eyebrows are almost gone; the eyelashes broken and short, or wanting; hair present and normal in armpits and on pubes (the maculæ mentioned below do not infringe upon the hairy surface, although they approach it very closely). The hands are much swollen (firm ædema) and of a bluish red; the fingers are sausage-like; they cannot be completely flexed; the nails are present; there are a few neoplasms on the ulnar side of both forearms, and on both elbows; the back of the neck is thickened, red, and infiltrated. All other parts of the body are covered with maculæ: these, over the trunk,

trunk, arms, and upper part of thighs, are of a dirty red colour, rather faint and mottled; on the lower part of the thighs and on the legs they are bistre-colour, leave no unaffected skin between them, or scarcely any, and are not uniform in tint, but mottled; there are among these latter patches many islands of matt white (achromatic) skin of different sizes, up to an inch in diameter. The feet are swollen, bluish-red and slightly distorted. Special senses.—Hearing, taste, sight, and smell (when the nose is not stopped) seem normal. Sensation.—The achromatic patches on the legs are less sensitive than the bistre patches; in general, sensation to a touch is said to be normal; at no part examined can a prick with a needle be distinguished from a touch with the eye-end; there is therefore pretty complete analgesia everywhere, but not complete anæsthesia anywhere. There is no hyperæsthesia, nor any shooting-pains. General Health.—Uniformly good; strength good. Development.—As this patient was undoubtedly attacked before the usual date of puberty it is necessary to note that the genital organs are well developed, and that pubic hair is present in usual quantity; his voice, however, although not affected by laryngeal disease as yet, is not virile, nor yet merely a boy's voice. Perhaps it may be described as "virile, but entirely without timbre." The tongue, mouth, and fauces show nothing.

December 4, 1891.—The tuberous distortion of the mask is still very great, but much diminished; the tuberosities are not so red, and there is variety of the shades of red in general. The fingers and hands seem, on the contrary, to be more swollen and bluer; but there is no deformity except what is due to the swelling (firm edema). About two months ago a large blister appeared, which separated the cuticle over nearly the whole of the inner side of the right foot, and which was followed by ulceration; there was no pain; the ulcer is now healing very slowly. He says his general health has been quite uniformly undisturbed and good since the last note

December, 1892.—During the year this patient's condition has not materially altered. In January his height was 5 ft. $6\frac{1}{2}$ in., and his weight 125 lb. In May his weight had increased to 134 lb., but in December had declined to 126 lb. Diminution of deformity of features continued during the earlier part of the year; but his voice became very husky at times, and he then had pain in speaking. His general health and feelings remained unaffected according to his own account, and, upon the whole, debility and deficiency of fat could alone be observed. His temperature, on a majority of days on which observations were made, was slightly subnormal.

There is still considerable distortion of the face, but it has much diminished during the year, except the nose. The left hand (which was originally attacked) has the second and third row of phalanges flexed at right angles and the two rows are beginning to suffer slight discolorations; the interessei are very much wasted, and the palm flattened; all the nails have fallen; the ulnar nerve on this side has atrophied, and although strong pressure produces slight discomfort it is felt locally only, and is not referred to the fingers. The right hand has some very slight distortion of the fingers, and wasted interessei, but is useful and gives a tolerable firm grasp; the ulnar nerve is larger than on the other side, and more tender, but sensation is not referred to the fingers. Both peroneals are enlarged, hardened, and flattened, and both are sensitive though below the normal, and the sensation is referred to the middle of the leg. Both ankles are enlarged, apparently by emaciation; the first metatarsals also seem to be enlarged, but in their case the amount of hard infiltration over them renders this doubtful. There are many ulcers on the feet and toes, both large and small, and although some have a healing appearance they are all a twelvemonth old. The voice is now markedly altered in the usual way; the state of the larnyx varies, and when werse is so towards night; on the hard palate are some small neoplasms. Appetite always good; sleeps well; is always occupied in one way or other.

Case III.—H.R., et. 28 (and P. S., deceased); admitted 11 August, 1890.

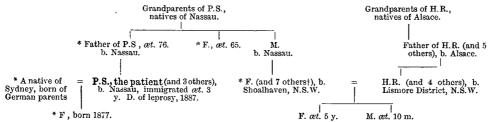

THE case of this patient should be read with that of P.S., deceased, which accordingly is placed first. The details are given after an extensive inquiry on the spot, made among the near relatives of both men.

The case of P. S., deceased—L.S. immigrated from the Duchy of Nassau in 1855, bringing with him three children, of whom P. was the youngest, and aged about 3 years. The family travelled to Shoalhaven, and lived there till 1871. They next removed to the Richmond River District, and ever since have lived there in the neighbourhood of Jiggi Creek. P. was then about 19. He became a timber-getter; and he continued to live in the same neighbourhood and to work in the surrounding district until prevented by increase of the illness which caused his death. His absences from the district were by way of holiday only; they lasted only a few weeks; and he did not travel out of New South Wales. About the age of 23 (1875) he was rafting timber, when he scratched his leg under the water in which he was wading at the time. This injury ulcerated, and healed, and broke out again several times. He showed it to a druggist, who suspected disease of the subjacent tibia; but no bone exfoliated. This ulcer having once more healed, he married at the age of 24 (1876). A few weeks afterwards it opened, and I suspect that he was never again well from that time; but all that seems certain is that about five or six years after marriage (that is, about 1881-2) he became too ill to work any longer. I found it impossible to get any reasonable account of the progress of his illness during those first five or six years which followed the injury mentioned above; but the sequence of symptoms is given by his younger brother, who lived with him during the last five years of his life (1882-7), as follows:—First, the injury and ulceration mentioned above; next (the interval of time not being guessed at), a red patch on the same leg; then a breaking out of the skin over the knees and elbows; shortly afterwards, ulceration of the finger-tips and fingers, which lost their nails, and of the toes; the hands and feet became numb; the fingers became outstretched and stiffened; the ears were not affected, although there was a small ulcer at one time behind the

with bluish, glossy skin; all the nails disappeared, the colour about the roots darkish brown, some of them discharging a very offensive matter, others apparently dried up, the fingers being all outstretched without possibility of closing the hands. The toes present a similar appearance, with the exception of one, which is covered with dried-up nail. Below the right knee is an open sore, with a very offensive discharge.

* * He informs me * * * that about 1882-3 he went to Sydney and entered a hospital, whence he was transferred after a few days to one of the asylums for the infirm and destitute poor; but after a week his relations were communicated with by the authorities, ordering him to be removed, the reason assigned being that he was a leper." I discovered nothing which distinguished this man's course of life from that usual among other persons of similar position and occupation; but, on the other hand, a good deal which showed that as to association, diet, labour, exposure to weather, and the like, it was the same as that common to all who live and work in the bush. The country, both around Shoalhaven and around Lismore, is well watered, and broken by hills and ranges between which fertile valleys lic. Shoalhaven is on the sea on the east coast in S. lat. 34° 50′, the latter in S. lat. 28° 42′. Malaria is not, and I believe never has been met with in either neighbourhood; and the difference of latitude, which carries with it a considerable difference of mean annual temperature, seems to be the main distinction between the two.

Communication between the present patient, H.R., and P.S., deceased.—I found it loosely asserted by relatives and friends that H.R. was a cousin of P.S. The following table shows what the connection was, and that there is consanguinity only between P.S. and the children of H.R.:—

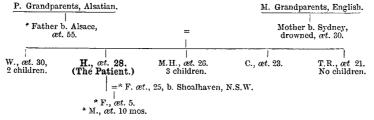

* These members of the S. family were examined by me and were in good health.

† Some of these seven were examined by me and were in good health.

It is difficult to form any useful estimate of the degree in which these two men were associated. After a rather prolonged inquiry among the relatives and friends of both, I conclude that it was small, and, speaking generally, insignificant. The R. family preceded the S. family in settling on the Richmond River; but from arrival of the latter the several branches of both lived near each other and were associated as neighbours and as fellow-workmen. H.R.'s own statement that he "was not in P.S.'s house six times during the six years they lived near each other," which were the latter years of P.S.'s life, is borne out upon the whole by testimony of several independent witnesses. But he was present after P.S.'s death, and assisted J.D. and J.S. to place him in his coffin, even if (as he alleges) he had nothing to do with preparing the body for burial. As for wearing apparel which P.S. may have left behind him, I feel tolerably certain that H.R. had none of it, and that it was safely disposed of by burning or burial. It may be added here that I saw and examined P.S.'s father, mother, brother, aunt, wife, and child (at. 13), as well as other persons less closely associated with him during life, and that none showed any signs of disease.

History of the present patient, H.R.—The following history of H.R. before his admission to hospital is from information furnished by his father, wife, and other relatives or connections who were in the liabit of seeing him frequently:—

* These persons were examined by me and were in good health.

He has lived all his life in the Richmond River District, and for the last six years on Jiggi Creek. He is a timber-getter, and was therefore often from home for rather long periods, but never out of the district. About September, 1888, a peg in the sole of a new boot injured the plantar surface of the left foot about the root of the great toe; this date is fixed by the same foot having been trodden on at the same time by one of a team of bullocks which he had recently purchased from his father. An ulcer followed this injury; and although it healed up it broke out again from time to time (and is still present). He was not observed to have anything else the matter with him, either constitutionally or locally, until about August, 1889, a change of colour or reddening about his forehead and eyelids being then noticed (but his father and his wife think that swelling of the hands was the first symptom, and that the reddening, accompanied by swelling around the eyes, followed very soon). He was well able to continue at work, and about the beginning of 1890 he engaged in clearing some swampy land several miles away. He continued at this occupation for three or four months. During these months the symptoms described below began to make appearance, and, as he then saw that he was suffering from a progressive disease of some kind or other, he came to Sydney.

State on admission:—Æt. 28; height, 5 feet 9 inches; weight, 10 stone; well-nourished and strong in appearance. Has been married eight years, and has two children; his wife never had any miscarriages. He denies all feelings of illness. There is a soft, puffy swelling of the upper eyelids and over the cheek bones; the skin is hyperæmic in the same situations; the swelling is quite soft, and without any feeling of thickening or hardening; perhaps there is slight anæsthesia, but

this remains uncertain. The eyebrows are not prominent; I doubt whether there is any swelling of the skin under them. On causing the light to fall obliquely on the cheeks three circular spots slightly elevated are visible on the right cheek, the highest of which is an inch or so below the malar swelling mentioned above. One spot is three-eighths of an inch in diameter; the other two are smaller; they are not indurated; their surfaces do not look smooth, but incline to nodulation. The ears are unaffected. The upper part of the body presents only one patch of discolouration; this is about 4 inches in diameter, and covers the tip of the right shoulder; it is reddish, and perhaps brownish; it is not uniformly coloured; it is distinctly anæsthetic; the difference between a touch with the head and a prick with the point of a pin upon it could not be perceived, although that the skin was touched seemed to be felt. The hands (of which the backs are covered with warts of moderate size, and flat at the top) are uniformly swellen and reddened; this swelling is accompanied by hyperæmia of the skin, and is easily seen; there is a little fine desquamation of the cuticle here and there; there is no distortion, but as much stiffness as may be supposed due to the mechanical impediment of the swelling; sensation is said to be perfect, but on his attempting to pick up a small object it appeared to me that there was—(firstly) some loss of co-ordinating power which was not confined to the fingers, but extended to the right arm, and (secondly) that sensation in the fingers was impaired. As for the lower part of the body—on both knee-caps are sears. On the right knee-cap the scar is large, and seems due to a laceration, received, as he says, by falling over a box. On the other there may be a scar; he says it was burnt, and he sets both these injuries at about a year ago. But the appearance of these scars is not exactly or not alone that which would be left by such injuries. On the left leg are three circular brownish spots, which are

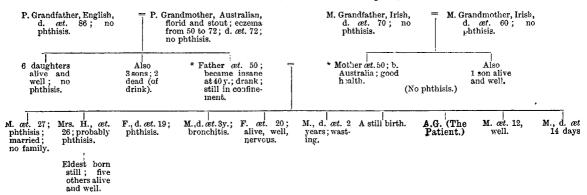

March 25, 1891.—Scalp free. The mask shows a rather deep brownish-red discolouration, which fades off at the edges a little short of the hair, and which is not abruptly raised above the general surface; but there is a general edema, which in consistency is between the harder and softer sorts; the chin is exempt from these changes, which are more marked on the right side of the face. Just above the cicatrix of an old incised wound on the right side of the chin is a growth which may be a leproma. There is considerable swelling of the superciliary ridge, and within the orbits; the nose is broadened and flattened, and the upper lip is slightly swollen; on the swollen parts are a few, rather indistinct, hard tuberosities, but over the right malar bone is one larger than the rest associated with several quite small ones around it; the back of the neck is reddened and thickened, but there are no tuberosities there. The tongue is normal; the soft palate and fauces are dusky-red and glazed. The upper part of the body in general is indistinctly mottled, without any describable maculæ; over the right shoulder is an irregular, ill-defined, patch of dirty red-colour; it is slightly mottled; it does not reach the scapula behind, nor extend down the arm; at the tip of the clavicle is a reddened, roughened, and raised patch, about the size of a florin which may be a commencing tubercle. The fingers and hands show a moderate ædema, which is not of the soft variety, but yet is not as firm as the hard; this swelling is uniform over hands and fingers, but stops at the wrists; joints and bones are unaffected, and can be flexed with no more difficulty than seems due to their swollen condition. The feet are a little swollen, but not at all distorted. There is one rather small brown macula on the left buttock, just behind and above the trochanter. Hair.—Normal on scalp; fallen from outer end of eyebrows; from eyelids, but most from the lower ones; has not fallen from beard or moustache, although the reddening extends under the latter,

December 4, 1891.—His face is still much swollen, but less than before; the small subcutaneous nodes are present and stationary; the fingers are swollen and blue, not more (and perhaps rather less) than before; but this cedema is now distinctly hard. Two small lepromata on the ulnar surface of the right forearm have ulcerated. The spot on the clavicle is no longer raised, but sunken, and the skin over it white and atrophied. His nose has bled occasionally, but less than once a month; says that his general health has remained quite good.

December, 1892.—His weight increased from 136 lb. in January to 145 lb. in May; at the end of November it was 139 lb. His general health has remained good, and he is always at work in the garden, &c. Wardsman Hunter noted in March that a fresh eruption of tuberosities was appearing in the lobes of the ears and on the forehead, and on backs of hands; but that those on the forehead were the same as had appeared before, disappeared, and now reappeared. Nevertheless, his general health remained good, unaltered by the fresh eruption. May—The nodes on the forehead are more plainly marked. November—Ears, face, and hands are now thickly dotted with small lepromata; the trunk is becoming of a brown colour; the toes flattened or compressed, ulcerated, dry, and the nails falling.

A distinguishing feature of this case is now the presence on face, ears, neck, arms, and hands, of small distinct and prominent tuberosities; with these the ears, distorted in general by hard cedema, are covered; they are there of the size of a hemp seed and smaller; on the face and neck they are larger—from about the size of a pea to a hazel nut—and are not so prominent, but still as distinct and well-defined; on arms and hands they are a little larger, and much more prominent. The nose is not free, but is never stopped; it bleeds occasionally. His voice is hoarser, and there is now sometimes a difficulty in swallowing. On the trunk the maculæ are as before; there is but one small area which may be achromatic, but there is no atrophy of the skin there. He has no glandular enlargements. He says he sweats freely—not only all over the maculous trunk, but over the infiltrated skin of the face, forearms, hands, legs, and feet. Says his health is good, appetite always good, and sleeps well; he is always occupied.

Case IV.-A.G. at. 14; admitted 20 August, 1890.

* These persons were examined by me, and were in good health.

History.—Was born in Sydney in 1876, and always lived in one or other suburb, except a short visit to Melbourne. His father was a man of some little property; he drank to excess; ten years ago (when the patient was 4 years old) he became insane, and is still in confinement; the circumstances of the family were as a rule fairly good, but have been poorer during the last few years. They habitually bought vegetables from Chinese traders (in common with nearly every other family in Sydney), but none of them has had any other communication with Asiatics than this customary dealing. The patient attended school from the usual age. He has always slept with his mother, because he was afraid in the dark; and she (chiefly) has dressed his sores. He was fond of fishing, and of fish.

History of illness furnished by his mother.—At 10 years of age (1886) went with his family to Melbourne, where he stayed seven months; while there he had a cough, attended with a good deal of expectoration, and he wasted; on returning to Sydney he thoroughly recovered. At about 12 years (1888) he had some water-blisters on the fingers of the left hand, which broke and left small ulcers; he lost two nails; the attack lasted two months, and then the ulcers quite healed; soon (or immediately) after this contraction of the fore and middle fingers was noticed, and a little later some wasting of the fore-arm; he attended at a general hospital for a few weeks; after this only some cracks occasionally appeared about the fingers; so far no other parts of the body were affected. At about 13 years (1889) he one day drew attention to his left heel, because he "thought there was something the matter with it"; it was seen that there was a considerable collection of matter under the hard skin, and when it was let out it smelt very offensive. The fingers of the left hand contracted more and more; next a macula was observed on the left buttock, then on the right buttock, and later still on the left arm and fore-arm; about three months ago an ulcer appeared on the left palm; it was poulticed and it healed up; a few days later he swept the floor; the next morning he pointed out some blisters on the palm of the left hand where the broom handle had rested; poultices were again applied; the blisters spread until nearly the whole of the skin of the palm, fingers, and thumb was detached; it was removed; there was no attempt at healing, and that was the beginning of ulcers mentioned below; he attended at the general hospital for a time, but as he did not improve he applied to the Government Medical Officer for Sydney for admission to the Coast Hospital, and was by expectoration, and he wasted; on returning to Sydney he thoroughly recovered. At about 12 years (1888) applied to the Government Medical Officer for Sydney for admission to the Coast Hospital, and was by him forwarded for survey as probably having leprosy. During the progress of the illnesses described there was alteration of the general health whenever the blisters or cracks appeared; there was then irritability, loss of appetite, and constipation; feverishness was not noticed. *Prodromal symptoms* were either absent or unobserved (unless the cough, &c., indicated a prodromal phase). State on admission.—He is an intelligent boy, small for his age, and without any indication of approaching puberty; he is still afraid in the dark; temperament lymphatic, with reddish hair (resembling his paternal grandmother in this respect, and in features); the upper cyclids are slightly full or swollen; he has had ophthalmia; the swelling is apparently not edematous; there is a circular, red, and desquamating patch, about the size of a shilling, over the right orbit, which is not anæsthetic; perhaps the lobes of the ears are a little thickened, but these organs are ill-shaped and ill-placed, and may be normal; the left shoulder-tip and arm on its outer side show a continuous discoloured patch, not raised; it runs on to the left fore-arm, nearly the whole of which it covers; its colour is brownish and reddish, not uniform, mottled; the margins are rather strongly marked and serpentine; the left hand has all the fingers contracted, stiffened, and wasted; the index finger has lost its nail; the fingers cannot be extended; the thumb is wasted and contracted; from all these fingers, the thumb, the palm, and a part of the dorsum, the cuticle is gone, and there is a shallow ulceration which varies in depth in different parts; there is no pain at all, and he says that it would not On the nates are two tolerably symmetrical maculæ, of a rather hurt him however it might be handled. deeper shade than that on the arm, and having strongly marked (or well defined) serpentine edges; the left leg has numerous smaller maculæ, rather resembling in colour that on the shoulder than those on the nates; all other parts of the body are unaffected. Sensation.—The maculæ on left shoulder and arm are distinctly paræsthetic, and so is the apparently healthy skin of this limb; the maculæ on the nates and legs are paræsthetic, but less markedly than the first-named part; sensation to touch remains, but he cannot at any of the parts named distinguish between a prick and a touch with a pin. Special senses.— Unaffected.

March 25, 1891.—Has grown 3 or 4 inches, is well nourished, strong, cheerful, and apparently in good health; the patch over the right cye has gone; his face shows nothing except the slight swelling (probably not leprotic) of the upper eyelids; the ears are as before; the macula over the left shoulder has so nearly disappeared as to pass unnoticed except on careful examination; but halfway down the upper arm, although much faded, it is still distinct, appearing as a rather red, not brown, roughened or slightly desquamating patch, which extends down the posterior and outer surface of the fore-arm as far as the hand; there is no longer any ulceration of the hand (but it has been recently abraded by a fishing-rod); the fingers, flexed on the palm, can be extended with assistance only about half-way; but by voluntary effort the first phalanges alone can be extended and nearly to right-angles with the dorsum, the remaining two

rows

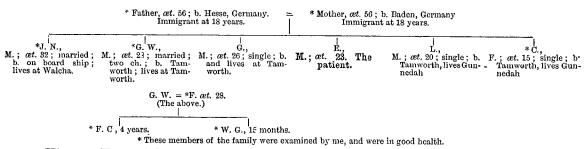

rows lying quiescent and paralysed; the macula on the left buttock is now quite gone; that on the right remains and extends intermittently down the back of the thigh and (by some separate small maculæ) a little towards the front; the right foot shows a little general swelling, and there is over the right Achilles tendon a small abscess, ascribed to an ill-fitting boot. General health.—Good; has pins and needles in his feet rather often, but not while walking about, and thinks he sometimes has them in his hands too; some public hair is appearing; his voice is unaltered.

December 4, 1891.—The macula on the left shoulder has gone; but the lower half of the upper arm is still discoloured, though now brownish only. Left buttock, free as last noted—sensation seems normal over site of the former macula; the macula on right buttock is markedly fading—its serpentine edge is still perfectly distinct at upper and inner sides, but now much nearer brown in colour than red; a faint brownish discolouration within the margin extends towards the thigh, but as it approaches the forepart merges in a general slight bluish colour which is also shown by the left thigh in front. His general health has remained perfectly good.

December, 1892.—Has remained in good health throughout the year; his observed temperatures were almost always subnormal (vide infra). In January his height was 5 ft. $2\frac{1}{2}$ in., and his weight 106 lb. His height is now 5 ft. $4\frac{7}{8}$ in.; his weight, which has pretty steadily increased, 126 lb.

There is no change to record in this case; unless the state of the skin of the lower part of the left arm is more nearly normal than before. The remaining part of the macula on the right buttock has not faded any farther; its colour is rather purple than brown at the margin. The left ulnar is broad at and above the notch, but is so soft as to be most easily localised by the patient's sensations; it is extremely sensitive, and sensation refused to the fingers. In the higher part of its course it is of usual shape, consistency, and degree of enlargement. The right nerve is quite distinct, but perhaps not enlarged; pressure causes only the usual discomfort; and the right arm and hand are quite healthy, and very muscular.

Case V.—E.U., at. 23; admitted 5 February, 1891.

History.—Unmarried. His parents first lived at Singleton; they removed to a place 12 miles from Gunnedah, the became a labourer or bush-hand, and his chief occupations were fencing, shearing, and droving; he was always employed at different stations in the Gunnedah district, but once travelled sheep to Queensland, whence he returned to Gunnedah by way of Brisbane and Sydney; for four and a half years past has been employed on Wondooba run, and he left for Gunnedah only after his illness had become pronounced. Careful inquiry failed to elicit any circumstances which would distinguish his course of life from that common to others who live in the bush; he says he never had special communication with Chinese or other Asiatics; he was not fond of fish, had rarely opportunity of eating fresh fish, and has but seldom eaten canned or salted fish. History of illness.—(From his own account, corrected by that furnished by his adult relatives at Gunnedah). In 1884 he had a whitlow, and lost the ungual phalanx of right index-finger; the nail is present and normal, and the joint has without doubt been injured as alleged. He has had no other illnesses. In August, 1889 (the date being fixed by his having taken a stallion into Gunnedah to the Show then held there), he had a small crop of blisters on the back of both hands, which "came of themselves," were not painful, lasted about a week, dried up without breaking, were unattended with ulceration and have left no scars. At the same time the backs of the hands were puffy and the puffiness remained after the blisters had healed; at the same time (or at the latest a few weeks afterwards according to his relatives), there was a slight puffiness and redness about his eyes. He himself thought that all these swellings, after their first appearance, went away; but his relatives seemed certain that they remained, and stationary, until about the end of October, 1890. There was then some increase of the redness about the eyes and face, and of the swelling, and that caused him to consult a

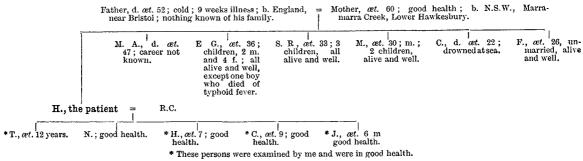

are no traces of the vesicles of two years ago. The trunk and limbs (except the feet) show very numerous pale-brown maculæ; these are thicker on the thighs than on the arms and trunk, and thicker still on the legs; in point of size they are generally speaking larger where they are fewer; on the body are many which are three or four centimetres across, while on the legs there are perhaps none broader than one centimetre or one and a half; two only, being large maculæ near the left shoulder, have acquired a white centre within which the skin is matt, and quite different from the normal white skin between the maculæ; the brown shade of colour is that of a sun-burned arm, but not quite so deep, and more transparent. The feet and ankles showed on January 16 a swelling not distinguishable from ordinary ædema; it was, however, not quite symmetrical, there being a distinctly larger swelling over the outer malleolus of the left leg. This swelling was quite different, both in distribution and in consistency, from that of the hands; and three weeks later it had nearly disappeared. During the three weeks of detention in the general hospital his temperature, observed twice daily, remained normal (with irregular fluctuations not exceeding half a degree), and his urine was then normal in quantity, acid, without albumen, and its specific gravity 1020. Sensation.—He thinks that it remains natural; on examination it is found to be greatly dulled everywhere, and nearly gone at points on the face; but merely dulled elsewhere, not much, and so that it is not possible to distinguish greater sensibility of normal skin on the trunk between the maculæ, than on the maculæ themselves. Except the forehead, it should be noted that on January 16 the greater swelling of the left ankle seemed to have become more markedly paræsthetic than any other part examined.

December 4, 1891.—His face is considerably distorted and his proper aspect thus disguised; his ears are considerably distorted by a swelling which has levelled up the sulci, &c., but they are not much enlarged; a few brown maculæ on the left side of forehead extend under the hair (which remains healthy) for about half an inch. The hands show a considerable degree of firm ædema and are slightly bluish. The rest of his body is thickly covered with very bright discrete brown spots, about half an inch in diameter, and more or less circular, of which none show any variation of shade towards the centre. The feet are slightly and uniformly swollen; there are no sores. Says his general health has remained unaffected.

December, 1892.—Height, 5 ft. 9 in.; during the year his weight has rose from 150 lb. in January to 156 lb. in March, fell to 140 lb. in May, and rose again to 152 lb. in October, at which it remained. His general health has been good.

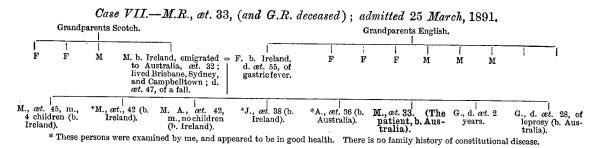

The changes in this case are greater infiltration of tissues of face; greater number of more distinct tuberosities at the back of the neck; considerably greater deformity of the nose (of which the left side is generally stopped, the right open and bleeding frequently), and a greater degree of infiltration of the subcutaneous tissues of fore-arms and hands, legs and feet. The ulnars are enlarged and insensitive. The feet and hands are cyanotic, and the skin hard, dry, and scaling. The bright brown and discrete maculæ formerly seen on the trunk are now duller, more diffused, and have for the most part run into each other; there are no achromatic areas. The ears are infiltrated and enlarged in a peculiar way—the sulci have almost entirely disappeared, and the organ is converted into a bluish flat, and formless slab of tissue about \$\frac{3}{3}\$-inch thick, and of the peculiar consistency given by leprotic infiltration. On the palate, thickly clustered about the median line and reaching back to the soft palate, are numerous very small neoplasms, yellowish in colour. He says that his face, fore-arms, hands, legs, and feet do not sweat; the trunk sweats normally about down to the groins (or the whole of it).

Case VI.-H.S., at. 41; admitted 23 January, 1891.

History.—Was born (1850) in the Lower Hawkesbury district, on Marramarra Creek, and lived there for a few years; the family then removed to Windsor, not many miles away, and on the Hawke sbury, and he resided there for a few years; they returned to Marramarra Creek, and after an interval went again to Windsor. After this, H. left Windsor at the age of 18 to go to sea (1868); he spent three years in coasting-vessels, but never went out of New South Wales; his residence during these years was in Sydney. He returned to the Lower Hawkesbury (1871), where he engaged in boat-building, oyster-fishing, and running a ferry-boat. About 1877 he married and went to Sydney; he again went to sea in coasting vessels; then returned to the Hawkesbury; and finally went once more to Sydney about 1886, and resided there until he died. Much fresh fish and oysters were eaten from time to time. Has had no serious illnesses. History of Illness.—In 1877 had successive crops of boils; they lasted about a week each, and healed in a usual way; they were believed to be common boils; they appeared on the back of the neck, on the upper part of the trunk, and elsewhere, not selecting any particular region. About this time, but after the eruption of boils had ceased, he was engaged for some days in getting out cargo from a vessel partly submerged in Darling Harbour, Sydney; he was much in the water for several days. A month after this his wrists began to swell, and his nose became, and continued to be, obstructed; later, swellings appeared in different features—eyes, ears, nose, &c. But it was eighteen months before his physiognomy began to alter; and after so altering he never recovered his natural appearance. During that time he had repeated attacks of feverishness, and severe sharp pains in the legs; he was laid up by them for a month at a time, and after each attack had an interval of apparent

apparent good health. His sight remained unaffected until six or seven years later; then the right eye was invaded, and later still the left was attacked. State on admission.—He is very weak, and very much emaciated. For a few months past he has suffered repeatedly from diarrhea: he has also pains corresponding to the "lightning-pain" of ataxy in his legs and fore-arms. The cars are much distorted, but not hypertrophied; the soft parts of the nose are destroyed, but the bones are not sunken; in consequence of this and the general wasting, the upper jaw appears prominent, and its bony outlines are easily followed; the skin is drawn tight over the whole skull; it is white and smooth, and at a short distance looks as though it might shine in a favourable light; but on close inspection it is seen to be traversed in all directions by exceedingly fine white lines, which seem to be due to linear atrophy. The body is emaciated in an extreme degree; the skin is wrinkled and roughened; it shows many large, ill-defined patches of a pale reddish-brown colour; elsewhere it is of something like clay-colour. The fingers and toes are very much distorted and useless; the joints are displaced in several different directions; they show large, irregular, superficial ulcerations; I did not examine them closely enough to say whether any bones had been absorbed, or were wasting, but apparently neither had happened. As to sensation—he was under the impression that it remained normal; but after an imperfect examination I ascertained that it was uniformly dulled, but was not altogether lost anywhere. However, the ulcerations mentioned above were said to be painless. The right eye was almost useless, the left was affected to a less extent; upon the whole he could see tolerably well. His memory was quite clear, and he talked well, and without apparent fatigue. He died February 4, 1891.

The case of G.R., deceased.—The following account is taken from information furnished by his sister and his brother separately, and from the case-books of the physician whom he consulted on dates mentioned Was born at Campbelltown, near Sydney, in 1861. He lived there until about 1868, when ed to Sydney. About 1870 he went to Adelaide, S.A.; in 1880 he returned to Sydney, and here in 1889. He was always weakly. At about 6 or 7 years of age he suffered from a chronic he removed to Sydney. he died there in 1889. submaxillary or cervical swelling; this lasted two years, more or less, and receded without suppurating; at 10 or 11 years he began to suffer repeated attacks of nose-bleed, and had brown patches on his body, which remained; at about 18 his face swelled; this swelling disappeared, but not long afterwards returned and remained; at about the same age his voice altered as from disease, but intermittently, and from about 24 he could speak only in whispers; he lost his eyebrows, the hair of the scalp used to fall out, and became thin. He was 5 ft. 11 in. in height, and "manly"; his voice altered in the usual way at about 15, and was a man's voice subsequently; but he never got either beard or moustache. The physician referred to diagnosed this case in 1881, and furnished the following notes, with which the above account agrees nearly:—"December 16, 1881, G.R., et. 19.—Said he had been ill twelve months, with breakings out on nearly:—December 10, 1881, G.R., &t. 19.—Said he had been in twelve months, with breakings out on face, wrists, and legs, which were better and worse from time to time. Tubercles on various parts of skin; reddish-brown colour; parts of the face scaly; some anæsthesia; features enlarged, ears and nose notably so; no syphilis. Leprosy." "February 2, 1882.—Said the remedies had cured sores. Seemed slightly better, but there was not much change. A tuberculous condition of mouth and larynx; hoarse." "December 22, 1882.—During this interval the throat had become seriously diseased; he spits large quantities of yellow matter, and occasionally blood." "26 April, 1883.—Voice still very hoarse; does not samplein of some throat, thick seeks on hands, wrists, and face not on trunk; tubercles of mouth and complain of sore throat; thick scabs on hands, wrists, and face, not on trunk; tubercles of mouth and throat not changed." He did not after this date come under the same observation. The beginning of He did not after this date come under the same observation. The beginning of this case cannot (according to the several accounts) have been later than the tenth or eleventh year of age; but, apparently, development was not markedly interfered with, and it would seem that the usual puberal changes took place.

History of the present patient, M.R., at. 33.—She was the chief and almost the only attendant upon her brother G.R. during his illness. About eight years ago she had a sore heel, attributed to a tight boot, which lasted about three weeks and healed perfectly. There was no other sign for about a year; then discoloured spots were seen on the legs, and afterwards red spots on the face, which never quite went away; later brownish or reddish-brown spots and patches appeared over the body; she lost her eyebrows four years ago; two years ago her voice was affected, but it recovered; about a year afterwards it was again altered, and has remained whispering and stridulous ever since. A written note by the physician already referred to runs as follows:—"March 22, 1887.—Disease began about three years ago; whole body tuberculous; anæsthesia." State on admission.—Prodromal symptoms, and illness during the eruptive stage, are both denied. The face is deformed by moderate general swelling, and not large tuberosities; the brows are not very prominent, but the eyebrows are wanting; many tuberosities have ulcerated and gone, and have left behind them more or less circular, shallow cicatrices, over which the skin is white, and in some cases a little drawn or puckered; the soft parts of the nose are nearly gone, but the bones seem intact; the ulcerated edges of the nostrils are indrawn, and this retraction has also involved the upper lip at its junction with the nose, whence the skin is tightly drawn over the upper maxillary bones so as to give a characteristic expression to the face; the tongue is large, red, fissured both longitudinally and transversely, and has two or three mucuous plaques like those of syphilis, towards the tip on the left side. The ears are much deformed by tuberosities of moderate size. The general tint of the face is dull red, inclining to yellow and there is some desquamation. The hands are enlarged by hard ædema; the fingers can be brought only to right angles with the palm, and not bent upon themselves;

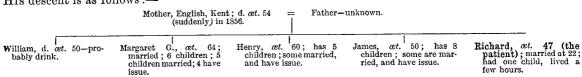

deformed; there is excessive and fixed extension of one or two fingers, and lateral displacement on one or two ungual phalanges; the skin is roughened, desquamating, reddened and (on palmar surfaces) bluish, fissured everywhere, discharging so as to slightly resemble eczema, at some points slightly ulcerated and offensive. The fore-arms and elbows show numerous tuberosities, chiefly on the extensor surfaces. The feet were said to resemble the hands, but to be not quite so much damaged; she walked without apparent difficulty. On the upper part of the chest are some large patches of a rather deep reddish-brown tint, which were said to extend over all the body; among them are small islets of matt-white; symmetrically placed on the lower half of each breast is a small and superficial ulceration in a state resembling a healing burn; these are said to be the only ulcerations, except as above noted. Special Senses.—Sight weak (uses spectacles), but there is no appearance of invasion of the eyes; hearing good, taste and smell said to be good. Voice, whispering and stridulous. Sensation.—the hands are sometimes painful and irritable; undid upper buttons of dress with right hand without great difficulty, and replaced them; sensibility to a touch remains, but there is analgesia, and on the upper part of the chest it was not possible to distinguish by pricking with a pin between the maculæ and apparently healthy skin. General Health.—Fairly good; only rises at 1 o'clock; once a week takes a short excursion by steamer or train; every three or four weeks she becomes low spirited, and has lassitude, diarrhea, and bleeding from the nose; menstruates regularly and normally, and at the times just mentioned; appetite very good, but prefers fruit, vegetables, and milk. Both this patient and her brother are said not to have much cared about fish; may be said to have eaten it, but rather less than ordinary.

December 30, 1891.—There is very little change in this patient. Both hands and feet are extensively but superficially ulcerated, and very offensive; and there is greater distortion of some fingers. The face is also ulcerated in a few spots which are covered with a dry scab. On both upper arms, and nearly symmetrically placed are numerous discrete patches of ulceration now covered with indolent granulations slightly raised above the general surface; at these points there were tuberosities. Her general health remains what it was; not bad as a rule, with occasional attacks of nausea, malaise, and chilliness. Maculæ on the body are now of a deep bistre colour with islands of matt-white at some parts. The ulcers are said to be painful, especially on the hands; however she remains indifferent when they are dressed.

June 20, 1892.—On this date M.R. died from exhaustion, the duration of her illness having been eight or nine years. She had suffered much from diarrhæa, and although she had laryngeal stenosis, her death was from exhaustion.

Case VIII.—R.W., et. 47; admitted 23 December, 1891.

Hrs descent is as follows:—

Note.—As far as the patient knows all these people have good health.

History.—Was born at Windsor, New South Wales; removed to Maitland during childhood, and lived there until he was 22, when he married; he was then occupied in carrying. Afterwards he wandered about the country in the north-west, engaging in shearing, fencing, mail-coach driving, bush carpentering, &c.; but he lived in, or had his head-quarters at, Walgett for 9 years (1875–84), and Moree for 7 years (1884–91); and was living at Moree until he went to Narrabri for advice, and was thence sent down to Sydney as being leprotic. For the last eight months only he has got his living in part by catching fish. He believes his wife is in good health. Clinical History.—Had nothing at all the matter with him until seven years ago. Was then about to begin shearing when he stabbed the base of the left thumb with the shears; a jet of blood followed; the wound was plastered with Friar's balsam and bound up; the next day he began shearing. About three weeks afterwards he first noticed that his left hand was numb; and in the course of the next few months he found that he was liable to injure that hand without noticing it; thus he burnt the thumb deeply with a soldering iron without pain, and burnt the little finger deeply with a cigar and discovered it otherwise than by pain (to these two injuries he ascribes the loss of terminal joints now wanting). He noticed no other signs until about the first tarso-phalangeal joint; this injury ulcerated (and is still scarcely healed two and a half years afterwards; perferating ulcer). After this his left foot swelled and has since remained swollen. In the meantime his left hand and forearm so far lost ordinary sensation that one night when a log rolled out of the fire against his arm he was roused only when the upper arm began to burn, the fore-arm and elbow being by then deeply burnt. Then two years ago there were floods, during which he was much exposed to wet; he caught cold, and has been hoarse ever since. He says that there was no swelling or distortion of the face until nine months a

Both hands have the palms covered with horny cuticle, which is fissured, and both are swollen by firm edema, chiefly as to the fingers, and not excessively; colour bluish of moderate intensity; the right hand is not deformed, except by firm edema of the fingers; the left is much more swollen than the right; the swelling more decidedly involves the carpal portion and over the wrist-joint, and all the fingers have lost their terminal phalanges. On both elbows are large soft swellings something like enlarged bursæ. both knees are soft swellings and scars of old superficial ulcerations; the feet are uniformly swellen; at base of left great toe is the imperfectly healed scar of a perforating ulcer; in the left groin are some enlarged glands. Sensation.—There is paræsthesia everywhere; anæsthesia is most nearly complete over the feet and left hand, but there are other patches about the body where it is not very far from perfect; no hyperæsthetic patch was detected. Special senses.—Sight and taste are normal; is slightly deaf; smell—the nostrils are permanently closed. The voice is very husky, and he sometimes has slight attacks of stridulous breathing; on the soft palate are large red patches, and in the centre a whitish patch. General.— Has never had any nose-bleed, nor any drowsiness; and, as to lassitude, has worked and has maintained himself steadily; but during two years past has had attacks of feverishness, and since his hand began to be numb he says he has perspired as usual only about as far as the waist, below which he perspires at all events very little, if at all; appetite and sleep are good.

December, 1892.—At beginning of the year his weight was 134 lb., his height being 5 ft. 9 in.; it is now 141 lb., having pretty steadily increased since May. The notes for the year disclose nothing important: he has been feeble always, disinclined for occupation and dozing most of the time; has had frequent attacks of nose bleed, but appetite good.

frequent attacks of nose-bleed, but appetite good. State unaltered, unless slightly weaker. There are many ulcerations about hands and feet, which heal very slowly, and either break out again or are replaced by new ones. Appetite always "as good as though he were doing a hard day's work"; is unconscious of pain, discomfort (except sometimes in swallowing), or disturbance of general well-feeling.

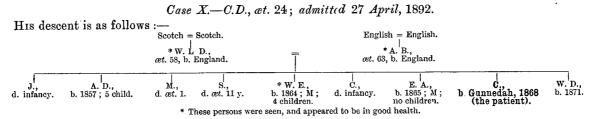

Case IX.-I.L., &t. 53; admitted 19 December, 1891. HER descent is as follows: Paternal. Grandparents, Irish (North). Father, born Ireland; d. æt. 50 in N.S.W., of erysipelas (7 days illness). Maternal. Grandparents, Irish (North). Mother, horn Ireland; d. æt. 45 in N.S.W., cause unknown; short illness. F. æt. 58; married; 8 children, all well. I. L., æt. 53 (the patient). M., æt. 56; married; 8 children, all well. single. *M., &t. 31; married; M., d. (accident). *F., 6 3 children. *These persons were examined by me, and were in good health. M., d. (accident). * F., æt. 27; unmarried. * F., æt. 21; unmarried. *F., æt. 36; married; 2 children, all good health. * M., æt. 33 single.

She was born at Annandale, a suburb of Sydney; she lived with her History.—Æt. 53. parents in several neighbourhoods in or close to Sydney; married at about 18; moved to Kent-street, in the city of Sydney, about 1855, and lived there until 1873, when she removed to Clarence-street, close by, and lived there until 1888, when she removed to Waverley, another suburb of Sydney, which is her present residence. Has always suffered from flatulent dyspepsia of varying severity, and still is her present residence. suffers from it. At about suffers from it. At about 22 and at 30 years of age she had attacks of erysipelas (of which her father is said to have died), from both of which she perfectly recovered; and at about 33 lead-poisoning (water); she has had no other acute or serious illnesses. She has had six children, of whom the first was born still at six months. Her husband was killed when she was 32 years old (or in 1870). After his death she had to work very hard to support her children, but she was never in any sort of want; and she got her living by dealing in haberdashery in a small way. She has habitually dealt with Chinese for vegetables, like everybody else, and never had closer communication with Chinese or other Asiatics. does not remember having heard of or seen any other person suffering from leprosy, or at all as she is suffering. As to fish, she did not like it but eat it sometimes.

Clinical History.—She continued in her usual health, which was deranged habitually by flatulent dyspepsia, until 1889; menstruation then began to be irregular, and she suffered more from headaches than had been usual. From that date to the following there seems to have been no other disturbance than usually attends upon cessation of menstruation. In April, 1890, she went to Brisbane to visit relatives; she stayed about three months; towards the end of her visit she noticed a circular red patch on the flexor surface of the right fore-arm; it looked to her and her friends like ringworm, for which they took it. She returned to Sydney in June, 1890; she was depressed by leaving her relatives. After she had been some time at home she says that she became "melancholy," and distinguishes this from the depression mentioned; then her dyspepsia and flatulence increased very much; she began to suffer extremely from occipital headaches, and sometimes she was "light-headed." The spot continued. No further eruption was noted until September, 1891, when two subcutaneous tuberosities were discovered over the left lower maxilla, and a rather diffuse and red swelling over the right frontal eminence; soon afterwards little tuberosities appeared on the arms and fore-arms, which remained. It was earlier than this, perhaps about July or August, that her feet swelled greatly; there was no numbers of them; her medical attendant thought she had dropsy; he examined her urine and found nothing. From about September, 1891, the eruption of tuberosities and erythematous patches increased steadily, until she became nearly covered with them. About the beginning of October, 1891, her medical attendant and another examined her in consultation; she was exposed to the cold for about two hours; and from that date she began to have These she describes as felt in the legs below the knee, and in the fore-arms below the elbowjoint; there was a severe burning apparently in the skin, and also sharp, or neuralgic pains; both were constantly present, and prevented walking, but were worse at night. From the same date the eruption increased greatly, the neoplasms becoming more prominent and the redness more marked. Four or five weeks ago she had an attack of feverishness, which was supposed at first to betoken the onset of influenza, then epidemic; but it was afterwards thought not to be influenza. She has had no drowsiness nor lassitude; her nose never bled in her life; she perspired as usual. State on admission.—Says that when she went to Brisbane she weighed 15 stone; she is now spare. She also says that her complexion has always been very high; her hair is iron-grey. The mask is very red, but not uniformly; there is slight general swelling, such as does not much alter her appearance; her nose is more swollen; she has diffuse swellings over the forehead, which are in consistency from elastic towards doughy; there are many discrete tuberosities which are almost entirely subtucaneous, according distinguished by tones, not to be soon except by oblique light. easily distinguished by touch, not to be seen except by oblique light. The ears are generally enlarged (as to superficies); they are slightly, or moderately, swollen and thickened; the natural folds are distinct, but blurred; there are two or three separate, rather diffuse, swellings in each, which have not the hardness nor the sharp limits shown by lepromata elsewhere on the body. Special senses.—Sight, hearing, taste, and voice are normal. The body is nearly covered with small discrete tuberosities, and with erythematous patches of red and reddish-yellow discolouration; on the whole the tuberosities are thickest on the outer aspects The erythematous patches have no distinct margin—they seem slightly thickened towards central parts where the colour is deepest, and the latter fades away and then increases again to brightness and thickening at some neighbouring point without any interval of white skin. On the right fore-arm the original spot is visible just below the bend of the elbow and on the flexor aspect; it is nearly circular; it is dirty red and roughened in the centre which is about half an inch in diameter, and is surrounded by a dirty-brown band about three-quarters of an inch wide, over which the skin is atrophied and wrinkled. a dirty-brown band about three-quarters of an inch wide, over which the skill is atrophical and whithled.

Both hands are greatly swollen as far as the wrists by an edema which is not firm nor yet quite soft; they are of a rather bright red, and there is no blue tinge; the swelling and numbness prevent use. The feet are in the same state; there is no distortion of the extremities. Sensation.—This is everywhere disturbed in the usual way. The original spot seems almost anæsthetic, though not perfectly; other red maculæ are generally analgesic, and sensation is dulled; some maculæ on the legs, not distinguishable by appearance from other neighbouring maculæ, are highly hyperæsthetic (that is to say, the tests being carried out with pins and needles in the usual way, a firm touch with the head of a pin on these spots gave great pain, while close by the difference between a firm touch with the head and a prick with the point that drew blood could not be distinguished). She complains of disagreeable numbness of hands and feet, and of pins and needles in the legs occurring independently of pressure. From the elbows and knees downwards she still has the severe burning pain in the skin and the acute intermittent neuralgic pains which began ten or eleven weeks ago; they prevent sleep and locomotion. No part of the skin was found that had normal sensation, even in places nearest to natural in appearance. General.—She has lately menstruated again after an interval of three or four months. She dresses late in the morning and lies down most of the day; her general strength is fair; her appetite about as usual.

December, 1892.—This patient's appearance has remarkably changed. The face remains as described above, except that the softer and more diffuse swellings have entirely disappeared, and there, as well as on the whole surface of body and limbs, there is no longer a single neoplasm. The fore-arms and hands, and legs and feet, have the skin withered and wrinkled, and present very closely the appearance usual in aged people; the colour of the skin is a good deal darker, however, and the fore-arms especially are mottled with brown and another more or less natural tint; among these mottlings the original spot can no longer be identified. On the trunk, where the subcutaneous fat is normally present, the mottlings are reddish; they are pretty uniformly distributed. Some parts of the trunk are cyanotic, about the shoulders and nape of the neck, for instance. She still has rather severe pains in hands and fect, the feet being worst, but they are not nearly as severe as a year ago. Probably the four nerve trunks are normal in size and in sensitiveness; on pressure the sensation is referred upwards as well as downwards. Her complexion being bright (dyspepsia), she now has, to a moderate extent, that delicate bloom or appearance of having used powder, which I have elsewhere noted in cases of Lepra tuberosa of old standing, when the tuberosities have receded beneath the surface or have disappeared. This case seems to me to come nearest to pure Lepra tuberosa of all which have been under detention; even this, however, is impaired by the neuralgic pains above referred to, although the nerve trunks afford no evidence of altered form.

Was born at Gunnedah, New South Wales, in 1868; always lived there, and has been away only for a visit to a town on the same line of railway, to various places in the bush within a radius of 20 miles or so, and once to Sydney as mentioned below. He was apprenticed to his father, who is a carpenter and undertaker, and has worked at his trade down to the date of admission. He had a quite, casual or street acquaintance with E.U. (Case V.) History of illness (from parents, a brother, and hospital record).—At the end of 1886 or beginning of 1887 he and his brother were loading stone, when he crushed the little finger of his left hand; the nail came off. About this time, and while his finger was still sore, he helped in the course of business to coffin a Chinese who was said to have died of blood-poisoning. The wound healed in a usual way, but soon afterwards he discovered the finger was numb, although he retained muscular control over it, so that a pin could be stuck deeply into it without causing the least pain. After this he had some superficial ulceration about the fingers and toes; then a chronic swelling of the feet, by which he was obliged to wear slippers, and which lasted several or many weeks. Early in 1888 he noticed some small brown blotches on his legs, which in the course of the next few months spread over the trunk. At the end of 1888 he had an cruption of water-blisters on his hands. At the beginning of 1889 he went to Sydney, and was admitted to Prince Alfred Hospital, January 26th; he stayed there until March 3rd. From the hospital record it appears that on admission he said "he began to get much weaker about two months."

months ago, and at the same time his hands swelled and became stiff, and his face and eyelids swelled"; and the following is a copy of the clinical account of his state and progress during his stay:—

"On admission—much-wasting, eyelids swelled, both upper and lower, thickening of skin of fore-head, thickening of skin of hands and subcutaneous swelling, so that the hands are closed with difficulty; legs below knee swelled and pit on pressure. Skin of forehead discoloured by copper-coloured spots, some of which are raised above the surface; these spots run up amongst the hair of the scalp. The thickened skin of the face is discoloured as though it had been burnt by fire, but is of a semi-copper colour. Over the body, and especially on the legs, are brown smooth discolourations of the skin, varying in size from the palm of the hand to a pin's head; these discolourations are not raised, are of an uniform colour, with a sharp margin as regards colour. He has no painful spots or tenderness anywhere except that his hands are somewhat painful in consequence of the swelling. Since admission he has been taking Hyd. bichl. and Pot. I., and there appears to be a steady improvement, the brown discolourations are decidedly paler in colour; the swelling of the hands, feet, and eyelids is less than it was, and the patient's general condition is improved. He says, 'he feels a lot better.' The brown patches before-mentioned are now slightly brawny on the surface."

During this space of thirty-eight days his temperature was taken twice daily, and from 103 degrees F. on admission it fell to normal in five days, and thereafter varied between normal and 97 degrees F.; but on the 23rd day of stay it fell to near 96 degrees F. On discharge he returned to Gunnedah, and continued his occupation down to the date of his isolation. State on admission.—Scalp free from eruption, but has schorrhea, by which the hair is kept moist and sticky; the face is entirely devoid of hair. The mask is moderately swollen by dermic infiltration, the nose swollen, rather smooth, and distorted in shape, the lips and eyelids still more swollen, and the latter shiny at the tarsal margins; complexion reddish and opaque; the skin atrophied and roughened. Ears slightly enlarged by the same kind of infiltration, the sulci accentuated, colour bluish. Voice slightly but permanently (during several months) husky. Neck presents almost or quite the usual appearance of this part in one who has been much exposed to the sun; perhaps there is slight dermic infiltration. The left cubital nerve can be felt with ease, but is not larger than it sometimes is in healthy persons; pressure produces slight tingling in the ulnar side of hand; on the right side the nerve cannot be detected. Hands slightly swollen in general, and bluish-red; the anterior surface harsh and dry as in psoriasis, and the linear markings accentuated; the fingers swollen and stiff; but still tapering towards the points, which carry yellow altered nails without polish; there is no mutilation, ulceration, or other deformity than is due to swelling, nor any difference between the two hands. Feet, the same general description applies to them; the toes are unusually long. Round the nails of both fingers and toes are signs of healed ulcerations which had never gone deep. The whole of the rest of the body is covered with large, coalescent, old maculæ, with diffuse and scarcely distinguishable edges of very faint orange and red shades of colour; atrophy and

Case XI .-- S.P. at. 49; admitted 8 June, 1892.

His descent is as follows:—

Paternal grandparents, — Maternal grandparents, English.

Father d. et. 95, — Mother d. et. 79, a Londoner.

M F F F F M M (M., the patient) = F born N.S.W.

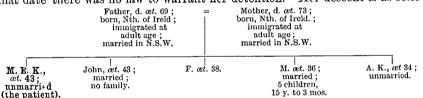

All other members of this family were said to be in good health.

History.—Was born 1843, at London; is a commercial traveller. In 1862 he sailed to New Zealand, and in 1863 he crossed to Australia. He travelled in New South Wales, Victoria, and South Australia, and returned to New South Wales. In 1866 he went to Queensland, and travelled over that country, chiefly in the north and west; his head-quarters were at Rockhampton during part of this time. In 1850 Sydney once more became his head-quarters, and thence he travelled again over New South Wales. Clinical history.—Has never seen any other person suffering from leprosy, or as he is now suffering himself. Has usually had very good health; abstemious and regular in his habits; was always considered unusually smart "on the road." Has suffered all his life from dyspepsia, but more severely from about the age of 30, since when he has been obliged to be very careful in his diet. He has three times had jaundice, the attacks having lasted about six weeks; the last occurred in 1889, and he recovered his health after it as he had done on previous occasions. In June, 1890, he noticed that he had a slightly raised, red, scurfy, round spot at the outer canthus of each eyelid, symmetrically placed; a doctor who was consulted called them patches of eczema; there were no constitutional symptoms whatever at this time; little was thought of them; they were subjected to treatment, nevertheless they persisted. Fifteen months later, or about September, 1891 the superciliary ridges and intra-orbital tissues swelled and became slightly red; spots now also began to appear on the trunk. About January, 1892, his hands swelled, and he became aware of some numbness in them, although still able to use them thoroughly well. About March he walked about in a pair of tight hoots and severely abraded the toes of the left feet, but without becoming a ways. a pair of tight boots, and severely abraded the toes of the left foot, but without becoming aware of it until he took his boots off during the evening; these injuries healed in a usual way after a few weeks. About June he held his right hand near a fire while talking to a friend, and suddenly felt a sharp pain in one which he found blistered by the heat; a shallow cicatrix nearly 2 inches in diameter marks the spot. During the months since September, 1891, and only since then, he has had certain symptoms of constitutional illness; he has got more easily tired by walking than usual with him, and has become aware of a loss of energy or, as he calls it, of vitality, which he thinks distinguishable from the exhaustion mentioned; he has had severe pains in his hands which were in part like a throbbing tooth-ache, but sometimes like aching produced by severe swelling;

swelling; and he had the same pains in his feet though only occasionally; the left foot was always worse than the right. The pains were much worse at night than in the day, and prevented sleep; they have now been much lessened for two or three months past. He is certain that he has not suffered from attacks of feverishness. State on admission.—Height, 5ft.7in.; weight 157lb; well nourished, intelligent, and educated. Face and neck show a pretty uniform deep copper-brown discolouration, but the forehead centrally and slightly above the superciliary ridges laterally gives at first sight an impression of blackish colour—but perhaps the yellowish and dirty appearance of an old wax model from which all red has faded is more nearly the appearance shown at these points; the subcutaneous tissues are swelled, and all furrows accentuated; the superciliary ridges are prominent; the bridge of the nose especially is swollen; the ears are generally enlarged as to superficies, thick, swollen, and bluish; the discolourations extend well above the hair-line on the scalp, perhaps about 2 or 2½ inches, but there is apparently no swelling of the scalp. Hair of scalp and moustache, normal; of eyebrows, thinned. Cubital nerves, not more than usually prominent, but very sensitive; the sensation caused by pressure upon them is referred to the fingers. Hands, swelled and bluish; the backs much puffed; fingers swollen and stiffish, but tapering and not sausage-shaped, the ædema being of the softer variety. Feet, less swelled than the hands; the skin rough and slightly desquamating, at some points tense and shiny; they are discoloured of an obscure brown, which is not uniformly distributed, but yet does not present distinct maculæ. The trunk and arms are covered with extremely numerous small maculæ, mostly of a bright brown colour, which are also present on the thighs and legs, but are there much less numerous; they are slightly thickened, and for the most part quite small and distinct, from one-fourth to one-half of an inch in diameter;

Case XII.-M.E.K., &t. 43; admitted 21 September, 1892.

This patient was first seen by me three or four years ago. She was then not far from the commencement of the cruptive stage of tuberous leprosy; she had an abundant eruption of erythematous patches on face and hands, and there was slight oedema of the orbits. She was informed of the nature of her illness, but at that date there was no law to warrant her detention. Her descent is as follows:—

History.—Very little information could be got either from the patient or from those of her relatives who were questioned; they were all afraid of damaging their own interests and those of the rest of the family. The following points are probably correct:—Was born in 1849 in the Hunter River district; has always lived there, and has never been out of New South Wales; is unmarried; is said to have got her living by house-keeping or in service, but belongs to a well-to-do family of farmers, &c; special intercourse with Asiatics and other coloured people denied by her, and by her relatives; no recollection of having seen any person suffering as she is suffering. History of illness.—This also is very defective. The first signs are ascribed to a time about eight years ago (1834); and the stage of disease she now is in is not discordant with that statement; when I saw her four years ago I considered that she was in the first eruptive stage, that it could not have lasted many weeks; but the period of invasion may have well been prolonged during three or four years previously. State on admission.—The skin of the face is infiltrated and hardened over large areas which leave channels between them of apparently healthy or slightly atrophied tegument; the lips are characteristically swollen and retracted so as to slightly expose the teeth, but not paralysed; the septum of the nose has gone, and the alae are deformed—the right ala especially, which, although spread, has lost parts of its substance by old ulceration; the tip of the nose white, roundish, and shiny, is like a button sunk between the crumpled ard broadened nostrils; the eye-trows have fallen, and the superciliary ridges are prominent; the ears are deformed, the auricles being crumpled by loss of tissue caused by old ulceration or absorption at their edges; the lobes are but slightly swelled, and enclose no distinct tuberosities; they are not (as a whole) enlarged as to superficial measurement. Hair of scalp, thin. These changes are almost confined to the mask; t

Case XIII.-W.W., &t. 13; admitted 25 October, 1892.

His descent is as follows: G.-M. = Irish. (Belfast.) G.-F. G.-M Irish = Irish. (Dublin.) | (Dublin.) F. d. æt. Immigrated at adult age to Australia. *M. æt. Immigrated at 17 to Australia. F. b. 1867 drowned. *F. æt. 24; M., one child. M. and F., died infancy. M. born Fiji, 1879 (the patient).

The patient's mother has been thrice married, and has had two families; by her first husband she had a son, now aged 33, married, 3 children, all well, lived in Fiji for years, but now resides in Australia. Her second family, to which the patient belongs, is shown above.

*These persons were seen by me and were in apparent good health.

† See the second note which follows this account.

History.—His father was a carpenter who went to Fiji in 1870, and held a plantation at Mata ni Quara, on the Ba River; he died in 1882 of an inflammation of the lungs,* having always suffered from a "weak chest." W. was born at that place in 1879. In 1883 he was taken to Sydney, where he lived until 1886; he was then taken back to Fiji, and he resided at Mata ni Quara again until November, 1890. He then returned to Sydney, but almost immediately left for Mackay, Q., where he stayed until July 5, 1892, when he came back to Sydney again. As to certain circumstances of W.'s life in Fiji, the Principal Medical Officer of H. M. Government of Fiji (the Hon. Bolton G. Corney) has been good enough to furnish the following: In 1883 this child travelled from Fiji in the same ship as Dr. Corney, and was not then noticed to be otherwise than healthy. While on an official tour of inspection in 1890, Dr. Corney saw a Tokalau man named Sau who had been 7 or 8 years in Fiji, was suffering from lepra tuberosa, and lived about a mile from W.'s house (and W., questioned at the lazaret. inspection in 1890, Dr. Corney saw a Tokalau man named Sau who had been 7 or 8 years in Fiji, was suffering from lepra tuberosa, and lived about a mile from W.'s house (and W., questioned at the lazaret, knew Sau and remembered him very well); then, he added, about one per cent. of all Fijians have leprosy (besides which both the Indian coolies and the Kanakas there suffer to some extent); but there has never been a case in a European except one doubtful one.† And as to W.'s residence at Mackay, Q. (where there are several sugar plantations), the Government Medical Officer for that town and district has obligingly furnished the following: A Cingalese leper was removed, during the year 1887, from the plantation at which W. lived from the end of 1890 to the middle of 1892; then on October 31, 1892, Ah-Low-Ah, an Api man, was transferred to the lazaret at Thursday Island, his illness from lepra tuberosa having been recognised Sentember 1, 1892, at which data his general health remained unaffected at heriday having been recognised September 1, 1892, at which date his general health remained unaffected; besides which it may be noted that there were on this plantation a number of Kanakas (Polynesians and Melanesians), sixteen Cingalese, a Javanese, and a Madrassee, all of them men among whom leprosy occurs as I have seen in Fiji, New Caledonia, and New South Wales. Thus W. has often been exposed to risk of contact with leprosy, and (in the case of Sau) is known to have actually been in contact with it; but under the circumstances, no surmise can be extentioned as to the date of effective contact. it; but, under the circumstances, no surmise can be entertained as to the date of effective contact.

History of Illness (given by his mother).—M. æt. 13, height 4 ft. 11 in., weight 77 lb.; dark hair,

grey eyes, freckled, intelligent; appearance generally healthy, so that the signs described below seem to indicate a local affection. At 6 years of age he had coko (frambæsia) in Fiji; the illness lasted only from six to twelve months; it has left the usual cicatrices; it was followed by some slight anterior curvature of the leg bones, as is commonly the case with young children, which has disappeared; he was taken to the District Medical Officer, who recommended change to Australia. He has had no other illnesses, except as mentioned below. Two or three weeks after arriving at Mackay, Q. (end of 1890), he told his adult sister (from whom I have this information) that he had a numbed patch of skin on the front of the right thigh; it was ascertained that pinching it did not hurt, and afterwards he amused his schoolfellows by letting them stick pins into it. The appearance of the skin was unaltered. While returning from Queensland by steamer at beginning of July last (about June 24 to July 5), the weather was very cold, and he complained much of cold hands and feet. About five weeks from the date of his arrival in Sydney, or about two months ago (say August 12), he began to complain of pains in both hands; both arms ached painfully from the shoulder downwards, the left especially, and the interossei of the left hand were seen to be wasted; that hand became so far useless that he could no longer spread butter on his bread with it; but there was no symptom of general illness at this time. Some days afterwards his mother on going to wake him in the morning observed a large reddish spot on the buttocks; the colour was very faint. She took him to a doctor who prescribed medicine for him, which he took for three weeks; his appetite improved; the spot faded a little and sometimes could be scarcely seen. A few days later he had an attack of diameters spot faded a little, and sometimes could be scarcely seen. A few days later he had an attack of diarrhoea, which was severe; he was feverish; he had a foul tongue; the attack lasted two days, and he got very weak; which was severe; he was reverish; he had a foul tongue; the attack lasted two days, and he got very weak; afterwards he continued weak, thirsty, and had a poor appetite for some days; during a fortnight afterwards he stayed away from school, and had nothing at all the matter with him except the very faint spot on the buttocks, and paresis of both hands—but this also improved. He returned to school; one day he showed that the nail had fallen from the left ring-finger, and, as he said, without causing any pain; in a day or two the nail fell from the right ring-finger during the night. He was then taken to Prince Alfred Hospital where he was admitted on October 7; his case was reported as doubtful on October 22 by the Resident Medical Superintendent, who is the official held responsible in such circumstances under the Leprosy Act. State on admission.—Left hand: All the interossei are wasted, but those between the thumb and forefinger, and between the second and third metacarnal hones more than the rest. the ring-finger has lost its pail and has between the second and third metacarpal bones more than the rest; the ring-finger has lost its nail and has over the first phalangeal joint a circular swelling in the centre of which is a slight superficial ulcer, the swollen ring around it being thickened and hardened, and not tender; beginning about the head of the ulnar bone is a macula which by a rather diffused or irregular margin curves across the palm until it passes a point above the base of the second finger, whence it returns to end at the inner side of the base of the ring-finger (probably it includes the ring and little fingers, but its other boundaries are not distinguishable); the second, ring, and little fingers are flexed slightly and paretic, they cannot be fully extended by voluntary effort, but are not restrained by any fascial or other contraction, the selection of all the fingers is altered to effort, but are not restrained by any fascial or other contraction; the colour of all the fingers is altered to reddish.

^{*} From the Register it appears that he had no medical attendance, and that the ascribed cause of death was rheumatic fever. Inquiry discovered no history of probable lung disease.

† The patient thus referred to a native of New Zealand, of European parentage), fell under cognisance of the Board some weeks after this letter was received, I examined her, and I considered that her case exemplified, 1. Mixta—namely, 1 trophoneurotica upon which the tuberous eruption had supervened. Duration of illness, about twelve years.—J. A. T.

reddish, but especially that of the three last named, which have a slightly withered appearance; these three are also distinctly paræsthetic and analgesic, and regions of altered sensibility extend more or less (being different at different adjacent points) along the ulnar side of the hand and inner half of the palm (for instance, he thought a prick which drew blood was a touch with the head of a pin, and he located the place pricked an inch and a-half from the true spot, which was about the middle of the anterior surface place pricked an inch and a-nait from the true spot, which was about the middle of the anterior surface over the first phalanx of the little finger); there is a small macula on the flexor and outer surface of the forearm. Right hand: This hand shows similar changes, but they are less marked; perhaps there is no wasting of the muscles, the fingers are less paretic; as a rule they are similarly flexed though to a less degree; this ring-finger has also lost its nail, and also has a swelling and a superficial ulcer over the first relationship is a macula on the rale but it is simpler and result control about degree; this ring-linger has also lost its hall, and also has a swelling and a superficial ulcer over the first phalangeal joint; here, too, there is a macula on the palm, but it is circular and nearly central, about 2 inches in diameter, and has a well-defined edge; there are similar disturbances of sensation. Both ulnar nerves can be easily traced high up; they are both enlarged, but the left is the bigger; neither is tender, and both seem to yield normal sensations on pressure; the arms show nothing. Face: This shows nothing; it appears that the orbicular muscles (eyes, mouth) are normal. Trunk: There are here one or two small macule, about an inch or an inch and a-half in diameter; the buttocks, and the beak to about the level of the fourth lumber vertebre shows a large macule, which is reachly symmetrical. back to about the level of the fourth lumbar vertebra show a large macula, which is roughly symmetrical; back to about the level of the fourth lumbar vertebra show a large macula, which is roughly symmetrical; on the right side, however, it ascends higher, and extends downwards by way of the great trochanter to the front of the thigh which it covers as far as the knee. Lower extremities: There are one or two small maculæ on the legs; the feet show nothing. The peroneal nerves are enlarged and very easily traced; but, like the ulnars, they are not abnormally sensitive, and seem to yield normal sensation on pressure. There are many paræsthetic, and some analgesic, areas on both feet. Maculæ: These are all of them very faintly marked, and it is necessary to undress the patient and view the whole surface, so as to get the greatest advantage from contrast, before many of them can be perceived. They are all of them only faintly rose-coloured; the colour is not quite evenly distributed over them; on the larger ones (buttocks and thighs) this unequal distribution is more apparent, though these also the larger ones (buttocks and thighs) this unequal distribution is more apparent, though these also are but faintly rose-coloured; on the other hand these alone have well-marked undulatory borders (though still only of a slight rose-colour) of a characteristic form. On firm pressure the rosy tint everywhere disappears, and is replaced by a brownish or yellowish tint which is extremely faint and only just deep enough to be recognised with certainty. Over both thighs there is in addition a slightly blue cast. Sweat-glands: Pilocarpine produced a moderate general perspiration. On drawing the finger across the skin of the back so as to traverse a small macula in its course the latter was judged to be dry by the the skin of the back so as to traverse a small macula in its course the latter was judged to be dry by the finger sliding easily over it, while it passed over the adjacent skin with a difficulty which was due to moistness; the same thing was observed on comparing healthy skin near by with any part of the large macula on the buttocks in a similar way; the legs to about the ankles sweated freely, but the feet as a whole remained dry. Special senses: Unaffected, except sensation. General health: Said to be good, and apparently is so.

W.W.—I knew the W. family when living at Ba, and remember the boy W.W. perfectly. He was a wild and spoilt little fellow, and spent most of his time half naked playing about by the river, and often in it, with native boys for his companions. There were certainly one or more cases of leprosy in the neighbourhood; and the natives thereabouts are a particularly dirty lot, both in their persons, habits, homes, and villages. I ascertained from the boy's brother while on a recent visit to Ba (Nov., 1892) that W.W. had coko when he was about 6 years old, and that it lasted with him between six and twelve months. I do not remember having noticed him with coko on him. I attended him once, but what it was for I do not exactly remember. I believe it was for some slight indisposition. The family lived in a homely fashion, and I think chiefly on a vegetable diet. They would be likely to get a fair quantity of fish, but I have reason to believe had very little butchers' meat.

1 should say that, if leprosy is acquired by contagion, the habits of the boy were decidedly such as would render Francis J. Pound, The Chief Medical Officer, Suva.

Late District Medical Officer for the Ba District.

Ba, 4 December, 1892.

I have seen G.W. (see pedigree above). His tibiæ are both fairly straight. I think myself that both bones are thickened, the left, the one from which I cut and scraped a good deal of necrosed bone is very distinctly enlarged, and I suppose the enlargement is of the sort known as "strumous." There were two places that I cut into and explored; one of them must, I fancy, have been the node which you saw. They did very well in spite of the rather yawning pits that I left, and are now completely healed, though they will doubtless break down again some day. He had some "rheumaticky" pains in the knee of the same leg two nights ago, which is a little suspicious. I do not know of lany other strumous signs in him.

G. W. A. LYNCH,
District Medical Officer, Ba. in him.

The Chief Medical Officer, Suva.

Temperatures observed, as shown below, in the case of certain patients of European descent.

THE intention entertained at the beginning of the year was to record the daily temperatures of all patients of European descent, and to observe the relation borne by variations to the occurrence of morbid changes in them, such as fresh eruptions of tuberosities, appearance of new maculæ, recession of lepromata, &c., &c. This, however, could not be carried out; but the records which were made during terms of days at several periods of the year in a few cases are printed below. The temperatures were always taken in the axilla, and by the Wardsman-in-Charge; he gave five minutes exposure, recorded the readings, and replaced The only point brought out under these circumstances is a general prevalence of subnormal temperatures, in connection with which the cyanotic state of parts of the surface (which may usually be detected on sufficiently careful inspection), both in skin and nerve cases, may be recalled.

PATIENTS OF COLOURED RACE.

Case XIV.—Ah Mung, et. 34; admitted 28 October, 1883.

History.—Chinese; a tin-miner; arrived in Australia at Sydney in 1878; mined at Tingha for three years; then became a butcher at Tenterfield (in the same district), where he continued two years; he then came down to Sydney, and was admitted to the lazaret. The first sign of illness is said to have been an affection of a toe on his left foot while he was at work at Tenterfield; the toe dropped off. The mutilations to be described ensued gradually. About three years ago he was so pallid and feeble it seemed impossible that he should long survive. December, 1892.—Is thin and pale, but very active, lively, and good-tempered; his general health said to be quite good. He shows no maculæ, and he says that he never had any. Cannot completely close right eye; orbicular of mouth not entirely under control; both ulnars enlarged, the left most and moderately tender; both peroneals enlarged, more than the ulnars, and more tender. Left hand.—Has lost all the phalanges, except first of thumb (perhaps part of the second remains, but displaced and partly absorbed), and the meta-carpal bones (except thumb) seem shortened. Right hand.—The little finger is entirely gone, and only the first phalanx remains of the others, except the thumb, which still has a part of the second phalanx; the carpus has the bones separated by effusion (?) between the articular surfaces, and is much enlarged and deformed in consequence. On this side no voluntary movement can be effected below the elbow; but the right stump can be weakly flexed and extended. Left foot.—The toes have nearly disappeared; the foot is dislocated at the ankle, and strongly everted; the joint resembles the wrist described above, except that although the swelling is as great, it does not communicate quite so strong an impression of liquid effusion. Right foot.—Shortened, and the toes defective, but less so than on the left side; the ankle-joint thickened. General health.—Now always good. He walks with some difficulty; but it is due merely to the mutilations. He is about all day,

Case XV.—Ah Ping, at. 31; admitted 28 October, 1883.

History.—Chinese; a tin-miner; arrived in Australia, at Sydney, about 1880; worked at Emmaville, then at Wilson's Downfall in the same district; thence reached Sydney again and was admitted to the lazaret. The first sign of illness was a macula which covered the right ear and cheek; this occurred in China; it went away; it returned after he had come to Australia; some time afterwards the fingers of the left hand began to contract. December, 1892.—Hair normal; maculæ are still visible, though very faint, on both cheeks, and that on the right is very slightly depressed. Cannot close his eyelids, nor at all move the lower lip which is everted; the eyes are quite healthy. There is a dark brown and roughened macula on left shoulder tip. On the trunk are many large patches of pale, but scarcely white, skin which are surrounded and well defined by delicate, narrow, rosy, and slightly mottled borders. Right hand.—The phalanges have either entirely disappeared or nearly, except the first row, where they are shortened, flexed, and permanently fixed by shortened fascial bands. The left arm was amputated about three years ago, because the mutilation of the hand had become extreme and was attended by deep ulcerations from which a profuse and offensive discharge flowed constantly; the wound healed well, and is now normal. The right foot is not much deformed; it is slightly brown, the skin rough and peeling, and the toes a little shortened and bulbous towards the extremities. The left foot is dislocated at the ankle-joint, everted, and drawn up until it lies parallel with the bones of the leg; he stands (though seldom, and with difficulty) on the end of the tibia; the toes and foot in general are even less deformed than on the right side. General health.—Good. Special senses.—Unaffected, except sensation.

Case XVI.—Chek Bo, æt. 41; admitted 29 January, 1886.

History.—Chinese; is a gardener; arrived at Sydney 1885, and has lived in the suburbs ever since. Can tell nothing as to beginning of illness. December, 1892.—Hair normal; left cubital nerve moderately enlarged, perhaps not tender; the right about normal in both respects. Both hands show wasted interossei, and both palms have the skin thickened, dry, and slightly cracked; fingers of left hand are contracted en griffe, are fixed by shortened fascial bands, and some have slightly lost bone by absorption; the right hand is not deformed. On the trunk, arms, &c., are several large and well-marked maculæ, discrete, oval, of a very light cream-colour, and bordered by a narrow red band which consists of papules and a darkish-red crythema; an appearance not observed in any other patient. The feet are very slightly swollen, and the toes slightly altered from the normal; they are not deformed; two carry small, indolent, and shallow ulcers. The external popliteal nerves are apparently normal. The orbicular muscles of the face seem unaffected.

Case XVII.—Charlie Taskill, &t. 27; admitted 14 August, 1886.

History.—A native of Java; was a sailor; gives an imperfect account, but seems to have arrived in Victoria about twelve or fourteen years ago; afterwards he lived at Parramatta for several years; while there was engaged in gardening; at some date before 1886, but not long before, his right arm became weak and painful when he laboured with it; then changes began to appear in his right hand, and he was isolated. December, 1892.—Hair normal; orbiculars normal; no maculæ; both ulnars are enlarged and easily traceable high up; both have in their course, and about 4 inches above the elbow, three or four nodular swellings; they are discrete; two on each side are as large as a marble, the others quite small; the swellings are very tender, but the rest of these nerves is not tender. Right hand.—All the fingers are much distorted and shortened, the first and fifth having only the first phalanges remaining. Left hand.—Nothing of the fingers remains, except the first row of phalanges; the thumb is stiff and displaced. The interosei are not much wasted, but the palms are flattened. He presents no other symptoms. His general health seems good, appetite and sleep are good, and he is very industrious.

Case XVIII.—Yek Sing, &t. (about) 30; admitted 20 April, 1888.

History.—Chinese; a carpenter; arrived in Australia, at Sydney, in 1881; lived one year at Vegetable Creek (Emmaville), two years at Newcastle, the rest of the time in Sydney. The first sign of illness was a macula on the left foot, and that appeared six years ago (1886). December, 1892.—Hair normal, except outer half of left eyebrow; a macula extends under the whole eyebrow, but only the outer half is thinned;

ears normal; control of orbiculars of face imperfect, but at present he can just completely close the eyelids; there are maculæ on the face, of which latter the features are naturally thick and heavy, but are now also swollen and expressionless. The maculæ on the face and others over the trunk, thighs, arms, &c., have all the same character; they consist of undulatory margins half an inch wide, dark red in colour, and roughened, which run in bold lines, and enclose large areas of skin of normal appearance; on the trunk these maculæ are unusually large, not numerous, and quite distinct from each other. The right ulnar nerve is enlarged, hard, and round, easily traceable high up, not very tender, and pressure upon it communicates upwards as well as downwards. The fingers are rather distorted than mutilated, but the phalanges are slightly shortened by absorption, permanently flexed en griffe, the interossei wasted, the palm flattened, and power of voluntary motion but slight. The left ulnar is very greatly enlarged, and especially so from a short distance above the elbow, more sensitive than the right, and on pressure communicates upwards and downwards; the left hand is much less deformed than the right, the interossei less wasted, the power of voluntary motion defective, but present in useful degree. Both peroneal nerves are enlarged; the right is not more than normally sensitive, the left is extremely sensitive. The left foot is permanently extended, discoloured brown at many points, the toes almost gone, and the power of voluntary motion almost wanting. On the right foot there are only a few maculæ; there is no deformity; voluntary motion small, but the limb useful. General health reported good.

Case XIX.—Ah Hu, æt. 29; admitted 30 September, 1888.

History.—Chinese; a tin-miner; arrived at Brisbane in 1885; stayed there three months, then to Tingha, New South Wales, a tin-field; came to Sydney from Inverell hospital, central to his district. The first sign of illness appeared on the left temple, some time after he had settled at Tingha. December, 1892.—Hair entirely gone from face, thin and patchy on scalp, where, however, no leprotic condition is visible. Both ears are swollen, elongated, and bluish; the right only affords distinct neoplasms in the lobe. The face is enormously distorted by large tubercles and by neoplastic infiltrations which leave deep sulci between them; the colour is ashen-grey, rather more inclined to black than usual; tuberosities enlarging the end of the nose and the upper lip have lately ulcerated; and the septum of the nose has partly disappeared. The forearms and hands swelled by hard edema, and stained a deep copper-brown; along the extensor surface as far as the wrists and tending to the outer margins of the arms are numerous large tuberosities, which are now in process of reduction. The cubital nerves are slightly enlarged and slightly more than normally tender; but there are no deformities of the hands. On the trunk are numerous copper-brown maculæ now not well defined at the edges; on the back the skin is roughened and desquamating and dry, but not atrophied. The feet resemble the hands; the legs show no tuberosities. Sensation is almost wanting from a short distance below the knees; elsewhere also it is altered in usual ways. The voice is husky.

Case XX.—Lum Pak, &t. 21; admitted 22 December, 1888.

History.—Chinese; a labourer; arrived in Australia, at Sydney, in 1887, and has always lived at Sydney. The first sign of illness occurred just at or immediately after arriving, and was a rather large macula on the left thigh; about twelve months afterwards tubercles began to appear on forehead and forearms. December, 1892.—Hair on scalp normal; gone from face.—The latter greatly distorted by large tuberosities and infiltrated patches, of a dark copper-brown colour; ears enlarged, elongated, and distorted. The trunk is covered with brown mottlings, not well defined or separated, and not in any instance infiltrated, though many may be quite slightly thickened or swollen. Forearms and hands are chiefly of a dark copper colour, the hands swollen by hard ædema, bluish, cold to the touch though not felt to be cold by the patient, and much numbed; on the posterior surface of hands and wrists are several small tuberosities, discrete and well-rounded, in size from a pea to a hazel-nut; on posterior and external margin of forearms are several much larger and less firm neoplastic deposits, which are of a purplish copper-brown. Feet like the hands, but no tuberosities about them or the legs. Special senses and voice unaffected, except sensation. He has pretty frequent attacks of feverishness, and then feels ill.

Case XXI.—Hoy Kee, et. 31; admitted 23 March, 1889.

History.—Chinese; is a tin-miner; arrived in Sydney 1878, lived at Emmaville one year, and then seven at Tingha, whence in 1889 he went to Sydney and was isolated. While at Tingha he first observed maculæ on right hip and on the left side of abdomen, which are still visible as achromatic areas; but he cannot say that they first appeared then, or whether they were present while he was still in China. Tuberosities appeared first about four years afterwards, and on the face. December, 1892.—Ears slightly enlarged and elongated, no neoplastic deposits; hair gone from face, normal on scalp; features slightly swelled in general and expressionless; nose much sunken, and alæ partly destroyed by ulceration; upper maxilla prominent (showing the general characteristics of lepra tuberosa in a quiescent or retrograde state). Over both olecranon processes the skin is thickened and voluminous or baggy and ulcerated. Ulnars moderately enlarged, and possibly rather tender. Some fingers of both hands are contracted en griffe and fixed by fascial shortenings; the interossei are wasted; the hands are flattened, and the skin of both palms is thickened, dry, harsh, broken—psoriatic. The trunk shows but few and not easily traceable achromatic areas, but in general the skin is atrophied, roughened, and desquamating. The legs and feet are slightly swellen, shiny, deep brown; the toes slightly crumpled; at anterior end of first metatarsal bone of left foot and at the outer or inferior surface, is a deep ulcer which reaches to the bone; it is very slowly healing at present. Special senses.—Apparently unaffected, except sensation.

Case XXII.—Ah Hee, et. 35; admitted February, 1891.

History.—Chinese; a store-keeper; arrived in Australia, at Sydney, in 1875; lived one year at Mudgee, fourteen years in Sydney, more than a year and a half at Mudgee again. The first sign of illness was a round spot the size of a half-penny on the right cheek-bone, and this happened somewhere about 1885 or 1886. December, 1892.—Hair of face and scalp, ears, and orbicular muscles of eyelids and mouth, normal. Both ulnar nerves are moderately tender, and both are enlarged, but the right is twice as big as the left; it can easily be traced almost to its origin. The forearms from a little way below the elbows are covered with small

brown

brown maculæ which give them a mottled appearance. Both hands have the interessei wasted, and the skin hard and dry, the index fingers much shortened (or almost gone on the left side), the other fingers deformed; the right hand is much more mutilated than the left, the first phalanges contracted en griffe, the others in great part gone. The trunk shows only one macula on the back, oval, about $2\frac{1}{2}$ inches in its long diameter, of a very faint cream colour, and limited by a delicate, rosy, narrow, marginal line, which at its external margin is faintly brownish. The legs are mottled like the arms, but to a less extent, the maculæ being rather widely separated. The feet are nearly normal in appearance and colour, but the second phalanx of the left great toe has been partly absorbed. General health.—Good, but has lost all liking for meat.

Case XXIII.—Ah Lee, &t. 35; admitted 26 February, 1891.

History.—Chinese; a gardener; arrived in Australia, at Sydney, in 1884; lived in Sydney two years; the rest of the time, until admission, at Newcastle. The first sign of illness is said to have been seen a year before he was examined for isolation, and to have consisted in slight tuberosities which appeared over the right superciliary ridge, the right malar bone, and the right ear. December, 1892.—Hair of scalp normal; nearly fallen from eyebrows and beard; face much infiltrated, but showing a few tuberosities; ears infiltrated and full of small neoplasms; body and extremities, but especially below elbows, darkened to an unusual extent, and of a dull copper brown; in addition there are on the trunk very many nearly confluent round dark-brown discolourations, with fading edges about 11 inches in diameter, as well as some much larger, beneath which is a thick bed of infiltration, which indicate, in fact, the presence of rather flat, but nearly circular, lepromata; both the colour itself, and the manner in which it is disposed, are characteristic of lepra tuberosa; the hands are enlarged and stiff from firm ædema, but not deformed; the fingers still taper a little; the right ulnar is slightly enlarged, rolls under the finger, is easily traceable high up; the left is bigger; neither is much more than normally sensitive; both, on pressure, communicate above and below; both peroneals are enlarged; the left twice as big as the right; both communicate above and below.

Case XXIV.—Qoy Cheong, &t. 41; admitted 27 April, 1891.

History.--Chinese; a gardener; arrived at Brisbane in 1882, but after ten days proceeded to Sydney, and has since remained in that neighbourhood. At some time during 1889 three small lumps appeared on his forehead; some months later his whole face began to get lumpy, and thus he was admitted after about eighteen months illness. *December*, 1892.—Hair entirely gone from the face, normal on scalp; ears enlarged in general, moderately swollen, elongated, and show some small neoplasms. Face is very much distorted by numerous distinct tuberosities, and by leprous infiltration, so that it is distorted by lumps and by deep sulci; the colour of the surface is for the most part ashen-gray, which here and there gives place to something approaching the normal colour, or to a redder shade. Over the trunk, arms, and thighs, &c., are very numerous brownish tumours which are infiltrated areas or lepromata; they usually average $1\frac{1}{2}$ inches in diameter, and are raised above the surface. The hands are slightly swelled and bluish, the skin rough and desquamating. The legs and feet are both moderately swelled, shiny, and discoloured deep brown, as usual. The extremities are not deformed (except swelling). The eyes were attacked a few weeks ago by a smart inflammation, attended deformed (except swelling). The eyes were attacked a few weeks ago by a smart inflammation, attended by neoplastic deposits on the iris; at present the corneæ are nearly opaque—he can distinguish light from darkness, but not much more. *Voice.*—Unaffected. *Sensation.*—Disturbed as usual.

Case XXV.—Tommy Wood, &t. 29; admitted August, 1891.

History.—Chinese; a cook; arrived in Australia, at Sydney, in 1879; has lived at a great many different places—at Emmaville, New South Wales; Stanthorpe, Queensland; Wilcannia, New South Wales; in the north-west on the Darling; and last at Narrandera in the south-west, whence he was admitted. The first sign of illness consisted in spots which appeared on the forehead about the beginning of 1891. About 1889 he contracted a sore on the fore-skin, and gonorrhea; he says that this was not followed by any secondary eruption or general illness, and he recovered after a few weeks. On admission he was well nourished, and not apparently suffering from any general indisposition. His fingers were very numb, so that he could not pick up a pin from a table, but had to slide it to the edge before he could seize it.

October, 1891.—During the first week of this month an eruption of bullae suddenly appeared, and lasted for a week; it was confined to the legs, the face, and the back of the hands.

November 6, 1891.—Shows maculæ of several different forms. The face exhibits brownish maculæ, which are so much raised above the general surface that were they of a different colour they might be thought to be commencing tubercles. The ears are normal and small. The eyebrows seem to be a little thinned towards their external ends; I am not satisfied that this is due to his disease. There is nothing on the scalp. There are old standing reddish lines on the forearms—on the left side on the extensor, on the right on the flexor surface mainly; they are serpentine, a quarter to half an inch broad, reddish-brown, and enclose islets of bleached skin of a white resembling the normal European white skin, and not matt. All over the upper arms and the trunk, back and front, and on the legs and thighs, are very numerous white maculæ from the size of a pea to 1 or $1\frac{1}{2}$ inches in diameter; the margins are very slightly, but distinctly raised, and slightly reddened; some of the larger ones have a pink diffuse central spot around which the white part appears as a broad margin; and I was informed that this reddening appears after the white patch has formed; there are also a few maculæ which have the two colours in such proportion that they may be described as red spots with a narrow white margin. All of these white maculæ are said to have appeared since his admission (but those on the forearms are almost certainly much more than four months old). On the right loin a few inches from the median line is a large oval patch, 5 inches by $3\frac{1}{2}$ inches, which is singularly coloured in distinct zones; the centre is pinkish and is nearly completely bounded by a reddish-brown band which has the cuticle roughened; outside that is a dirty brown zone (without any red tint) which fades to white; next is a red zone; and outermost is a white zone, which becomes brownish at its margin before it fades off into the natural yellow of the skin.

May 3rd, 1892.—The general description given on November 6 is correct, and still holds good except as follows:—The spots on the face and elsewhere are no longer raised above the surrounding

surface; those on the trunk and limbs have not now the same likeness to normal white-man's skin that they then had, but have assumed a warmer, and even a yellower tone, which, however, does not at all resemble the yellow tint of his natural skin; the brown serpentine margins to the maculæ of the forearms are deeper and may be called blackish-brown, while the white skin enclosed by them is achromatic and matt. Upon the thighs the markings are now rather of serpentine bands partly enclosing altered white skin, than distinct spots. The hair on the fore-part of the vertex is thinning progressively, as from ordinary causes. Tests of sensibility applied to back of right shoulder towards the tip and the upper back part of the arm on the same side, showed conclusively that he could not distinguish between head and point; he guessed right only once out of very many times. On the other hand, he could pick up a pin from the table in about a normal way. Nevertheless both cubital nerves are very distinct, swollen, and hard, about the size of a cedar pencil, and roll very freely under the finger.

December, 1892.—During the past two or three months his face has gradually become swollen to a moderate extent, but there are no sign of tuberosities; such markings of this part as have been described above have become fainter, but there is a slight and general congestive reddening. The orbiculars remain perfectly under control. The maculæ on trunk and extremities although still perfectly well marked have become rather fainter than they were, and have again changed colour. About three months ago the vitiliginous areas, which had a transparent red central colouration, became of a uniform opaque red (flake white tinted with Venetian red) over the greater part of their area, and this faded close to the margin into a rathor more transparent pink before joining, without any intervening brown or dark line, the natural skin around them; much more recently these areas have all become brown, and now neither achromatic areas nor opaque pink ones can be found. The intervening skin on the front of the trunk seems about normal; but on the back there are signs of atrophy, and it is ashen-grey in colour, very singular. The appearance referred to might be very nearly produced by smearing the skin with wood ashes. There is no thickening of the skin, but if there were it seems likely that the imperfectly described appearance met with on the forehead in the tuberous cases XI and XXIV would here be reproduced more or less faithfully. The large macula on the loin still showed the several rings of varied tints described above, as late as September last; but it now presents only a large pink centre, a narrow whitish band round it, and the darker brownish ring fading off to normal outside that. In this case both cubital nerves nerves are enlarged, hard, roll under the finger, and are easily traced to near their origin of the size of a cedar pencil; neither of them is very sensitive; on pressure the right communicates downwards only, the left upwards and downwards. His general health remains unaffected, and he is always occupied.

Case XXVI.—Johnny Lumby, &t. (about) 26; admitted 8 December, 1891.

History.—A native of Tanna, Solomon Islands; arrived at Maryborough, Queensland, in 1882, under three years' labour engagement to sugar-planter; at end of term elected to stay to work as a free boy, and went to a plantation near Southport, Queensland, for one year; to another on the Tweed River, New South Wales, for three years; and finally for two years to another on the Clarence River, New South Wales, whence he was transmitted to Sydney for isolation. At beginning of his engagement on the Tweed, or about 1887, noticed a single tuberosity (no longer present, or represented only by some little infiltration, but described by him as having been exactly like other tuberosities now visible elsewhere) on the outer side of the upper part of the right forearm; and then nothing until during his stay on the Clarence (1889–91) a single tuberosity appeared over the outer part of right eyebrow. On admission in 1891 he had some slight prominence of right superciliary ridge, caused by two or three indistinct tuberosities, some infiltration with very indistinct tuberosities of the right forearm on its extensor surface, and some small mottlings of yellow or pale brown on his dark brown skin, moderate both in number and the area affected by them. Among his tribe he has never seen anyone suffering like himself; but has seen an affection of the lower parts of legs and of feet, which he seems to be aware was leprosy. December, 1892.—Hair of moustache, beard, and scalp, normal; fallen from outer halves of eyebrows; normal on inner halves, although these are full of not very well-developed tuberosities. Ears, normal. Superciliary ridges both prominent, but tuberosities larger and more distinct in outer halves, and most so on right side; on the cheeks are numerous discrete well-defined young neoplasms; the features are not deformed (except superciliary ridges) and there is no intra-orbital swelling. The right forearm, mainly over its extensor surface and along its inner border, is much infiltrated and thickened, and at points of the

Case XXVII.—Ah Su, et. 28; admitted 24 March, 1892.

History.—Chinese; is a cabinet-maker; has been 6 years in Australia, and always in Sydney. One year ago he had gonorrhea (he took no medicine, used an injection, and got well in about six weeks), but not syphilis as far as could be made out. History of illness.—About October, 1891, he got very weak and two small patches like but smaller than what he now shows appeared on the right cheek close to the also of the nose, and on the left cheek farther out and lower down. He took some Chinese drugs, and the patches disappeared in about a fortnight, but he continued very weak; he also had pains in his limbs which from his description seem to have been rheumatic in character. After a time the pains disappeared as long as he remained lying down, but standing brought them back. About January, 1892, he placed himself under the care of a European doctor who has attended him to the present date; his strength has not improved. A fortnight or three weeks ago the original spots on his face reappeared, but were much larger and plainer than at first; and at the same time many other and similar spots came out both on the face and on the trunk and limbs. December, 1892.—On the right side of the neck are four or five achromatic spots close together, of which the largest is about three-eighths of an inch in diameter; there are no other spots of this character. The site of the original spot on the right side of the face is now marked by an erythematous patch about an inch in diameter; it has a rather irregular but well-defined edge, is slightly but not abruptly raised above the adjoining surface, and by oblique light has a lumpy appearance which, however, is not distinguishable by touch. That on the left side is now represented by a large patch of erythema about 2½ inches by 2, of which the edges fade off rather gradually. On the face, arms, hands, feet, and legs there is a large number of similar maculæ all of which

are tumefied and distinctly though slightly raised above the surrounding surface; one of them near the right elbow-joint and on the outer side is several inches in its long diameter. The lobes of the ears are almost or quite normal. Sensation.—He passed his finger-nail over many of the patches in order to show that they were painful; there is, nevertheless, marked dysæsthesia, and analgæsia of all the patches, as tested in the usual way with a pin. Special senses.—Unaffected. General health.—He is rather anæmic, but well nourished, and without obvious appearance of ill-health. But he has general muscular weakness; he cannot walk; he can stand on two feet, and on one with support of one hand but only for an instant, and standing causes general pain over the lower extremities; in order to get off his bed he moved his legs with his hands; his power of squeezing with either hand cannot equal more than a few pounds. His appetite is good; he sleeps well sometimes, at others very badly; for the latter he attempted to give a reason, but it was unintelligible. A few days later it was ascertained (pilocarpine) that the sweat-glands had markedly diminished function over the maculæ.

April 20th.—On the face are numerous slight elevations on the maculæ, which are young tuberosities; the lobe of the right ear which was almost or quite normal before is now slightly deformed by a cluster of small and soft neoplasms. The maculæ on the body and limbs are now of a deep bistre-colour; they are much more clearly raised above the surrounding surface; they are shedding silvery cuticular scales very freely, which leave behind them eliptical ragged edges near the macular margin; they are no longer tender to a touch with the finger-nail, but are slightly tender when pinched up gently between the fingers. A pin being deeply stuck into one mucula behind the right ear he started quite naturally though slowly; he started in the same way when touched firmly with the head at the same part twice; and then, after showing him head and point, and explaining by an interpreter that he might be touched or pricked, he was touched only—when he started as at first, then stopped and hesitated, and in short did not know whether he had been pricked or touched. Muscular power has returned to a large extent; grip of right hand is now fairly strong, of the left much better but below normal; he cannot walk, but he now moves his legs about on the bed without difficulty.

June 29.—He died; he got rapidly weaker during the last few days of his life; there is no record of other changes. His treatment was nil during the first month, and ordinary diet; during the other two months gurgun-oil emulsion, which he took irregularly. At some time after the first month the slight tuberosities, which then were observed to be beginning, disappeared (compare on this point cases IX and XXX). There was no post-mortem.

Note.—In naming the form of leprosy here exemplified I give the first place to lepra tuberosa, because the maculæ had the character of those which accompany that form in its earliest stage, because they were followed by formation of tuberosities, and because the changes which occurred so rapidly in the maculæ of the trunk and extremities did not assimilate them to the maculæ of lepra nervorum, but (I thought) consisted in the early or hurried supervention of pigmentation in maculæ of tuberous lepra. But in the second place I suggest that the case was one of Complete Lepra from the Beginning (H. Leloir) because the important and fatal symptoms were apparently due to central nerve disease; however, this, of course, is to beg the important question whether the nerve centres ever are primarily invaded in lepra—which a detailed dissection of this case might have contributed to answer.

Case XXVIII.—Hock Gee, &t. 47; admitted 19 September, 1892.

History.—Chinese; is married; has four children; arrived in Australia, at Sydney, six years ago, went to Albury directly, and has stayed there ever since; is a gardener. History of illness.—None can be got; he says he was quite well fifteen months ago, but his present state shows that he has been ill much longer. On admission.—His features are expressionless, and he is dull of intellect or possibly deficient; Cannot close his eyelids; conjunctive reddened; orbicular muscle of mouth not apparently affected. Ulnar nerves very greatly enlarged and roughened; they would probably be oval in section, and about five-eighths of an inch in long diameter; he says they are tender, but when his attention is distracted pressure does not seem to cause any discomfort. Hands.—All the interossei on both sides are wasted, and the fingers paretic; there is general evidence of much altered nutrition; many of them are covered with dark-brown maculæ, but the nails are normal. Feet.—Both are thickened, all the toes are shortened by absorption of bone, and but slight voluntary movements are possible; the little toe of the left foot is represented by a small fleshy tumour about the size of a pea, and just above it is a small sinus at the bottom of which bare bone can be felt. Trunk and limbs.—The skin in general seems normal and well-nourished; but there are many very large maculæ, which are marked out by a narrow band of moderately dark red tint, within which is an achromatic area; both band and area are slightly thickened, dysæsthetic, and analgæsic. On a hot day it was easy to ascertain that the sweat-glands under the maculæ acted imperfectly; the surrounding unaffected skin sweated profusely—the areas very little, although they were not quite dry. General Health.—Good.

Case XXIX.—Li Pik Hing, et. 44; admitted 12 October, 1892.

History.—Chinese; has been in Australia twenty-two years, and has lived at many different places, but during three years past he has had a garden at Manly, a suburb of Sydney. History of illness.—He can give scarcely any; guesses he has been ill two years, but beyond doubt has been ill much longer; has not been able to work for about two years; tries to describe some rash which is now not visible. On admission.—His nose towards the tip is slightly broad and rather shiny; it has lost substance at several points which are now marked by moderately depressed and whitish cicatrices; eyebrows very thin, and towards the outer halves nearly wanting; superciliary ridges are rendered slightly prominent by a soft swelling, and show no tuberosities; the lobes of both ears are enlarged by some small clusters of lepromata. Upon the whole his aspect would be little likely to attract attention. Both ulnar nerves are enlarged and tender. Hands and feet present no deformities, but the left foot on the dorsum is discoloured brown, and is a little swollen and shiny. Trunk.—The general surface is desquamating freely, and he has psoriatic patches on palms and soles; the subcutaneous tissues in general have wasted, and the skin is wrinkled, and perhaps atrophied; in colour, the skin of the trunk is indefinitely altered to faint shades of red and orange, but not distinctly maculous; on the fore-arms this alteration is on the extensor surfaces, but is much fainter than elsewhere, and devoid of any distinct red colouration. On the extensor surfaces of fore

arms, chiefly just above the wrists, are some clusters and streaks of small neoplasms, but slightly prominent, reddish, shiny, and very vascular; upon both shins are rows of small circular rather deep ulcers interspersed with circular white scars of similar healed ulcers. Nails perfect and well-formed. Sensation.— Spersed with circular white scars of similar healed ulcers. Nails perfect and well-formed. Sensation.—Over parts of the back and the left forearm taken at random he has some hyperæsthesia; perception of pain is delayed, but afterwards is excessive; he could not tell head from point, and called both "point," the pain caused seeming about equal. Sweat.—This irregular; '014 mg. pilocarpine caused a good perspiration in six minutes; arms, hands, legs, and feet remained dry; large and deep red maculæ appeared running the whole length of the spine, and on each side of it, the spinal furrow remaining unchanged; the skin in the furrow sweated freely, the maculæ remained perfectly dry; a small patch of skin anterior to each malleolus sweated freely. Special senses.—Unaffected. Mental state.—Normal, unless dull; but this is doubtful. General health.—Fair. Complains of being cold during the day, and too hot at night, when he has also some pains in legs and arms. He likes to rub himself with carbolised oil.

Case XXX.—Ah Gom, at. 26; admitted 7 December, 1892.

History.—Chinese; is married; no children; arrived in Australia, at Sydney, five years ago; went immediately to Toongabbie, near Parramatta, and has always stayed there; is a gardener. an ulcer formed about junction of lower and middle thirds of calf of right leg; at the same time he began to suffer from attacks of malaise, accompanied by severe headaches; the ulcer became very deep, but it healed and broke again two or three times during the next three years, but in the meantime two or three other ulcers appeared close to the first; they healed and have been healed now for about a year. than a year ago the ulcers or their scars swelled and became lumpy, and then a little later the site occupied by them began to become surrounded by a macula which is now of a bright bistre-brown, unattended by a marrent structural alteration of the claim artered and a bright bistre-brown, unattended by apparent structural alteration of the skin, extends considerably beyond the scarred and lumpy area, and ends abruptly at its margin without change of shade. About one year ago also small tuberosities began to appear over the face, and some alteration of the skin about the flexures of the elbows (not began to appear over the face, and some alteration of the skin about the nexures of the endows (not intelligibly described by the patient, and not now present) occurred at the same date: On admission.—Height, 5 ft. 5 in.; weight, 123 lb.; general health, apparently good; hair of scalp and eyebrows, normal; intra-orbital ædema (slight); chiefly on forehead, but less thick over the rest of his face and fore part of neck are numerous small tuberosities, which vary in size from a split pea to a little larger, are copper-coloured, scaly, not prominent, dysæsthetic; ears not affected; retains his natural expression. The general surface of trunk and limbs is desquamating; its colour is faintly altered—over the abdomen is a reddish mottling, even the about and heak are numerous faint serpenting ribbons of blackish-brown shade. reddish mottling, over the chest and back are numerous faint serpentine ribbons of blackish-brown shade, within which the more nearly normal skin has less than its normal depth of yellow tint; on the margin of the right trapezoid is a purplish red, slightly swollen, but not indurated oval patch about 1½ inch by

1. The hands are slightly but uniformly swollen; the feet to a less extent. At the back of the right calf is a large swollen and psoriatic patch; many hard nodules can be felt in it; it is in general purplish red, but is surrounded by a brown macula which occupies otherwise unaltered skin. This patch is insensitive. The ulnars and peroneals are but slightly tumefied, yet extremely tender; the general surface also is apparently hyperæsthetic: and notwithstanding some dysæsthesia, as tested by puncture, yet he cannot bear to have the tuberosities on the face handled.

Case XXXI.—Ah Lin, at. 35; admitted 3 November, 1892.

History.—Chinese; has been in Australia twelve or thirteen years; has managed a garden at Bombala eight or nine years. He once (only-but compare Case XXXII) saw a Chinese in Australia who had leprosy; he used some medicine, got well, and went back to China long ago. Fell ill about seven months ago. As far as I can understand he then had large smooth red maculæ on his face only; he took the same kind of medicine mentioned above, and at the end of three months entirely recovered. He remained well for four months, during which he bought an old boar-pig and eat him, to which he attributes his present illness. About a fortnight ago he began to get the appearances he now shows. (I think he has been ill more than seven months. Some of his spots, &c., are of that standing, or longer; others have certainly not made their first appearance during the last fortnight.)

Certainly not made their first appearance during the last fortnight.)

On admission.—Is well nourished. Face.—Outer halves of both eyebrows have fallen; no superciliary prominence; left orbit slightly swollen; right orbit swollen, and an erythematous patch, with ill-defined borders, covers the cheek bone and extends over the right upper eyelid, affecting the lower less; in front of each ear he has symmetrical reddened patches which are rough and desquamating—that on the right is little infiltrated; that on the left is thickly infiltrated, and is a leptoma spread out; the inner margins of both are more or less clearly depressed and rather sharp, the normal skin on the outside and the plaque on the inside both rising above it; the macular redness involves the ears which also are desquamating a little and which have the lobes slightly swelled, but not by neoplastic deposits; under the chin and at points on the neck are other smaller maculæ of irregular shape, and of the thickness and aspect of the maculæ of tuberous lepra. Trunk.—At points over the shoulders are rather indistinct whitish or white mottlings, which are achromatic areas at an early stage; the posterior aspect of arms, but especially of left arm, shows a large number of these areas much more the posterior aspect of arms, but especially of left arm, shows a large number of these areas much more distinctly, the general effect being of one large achromatic area until on careful scrutiny its composition is discovered; the whiteness and general appearance are not at all that of leucoderma, nor of such leprotic leucoderma as some of the patients in the lazaret show or have shown; it is faint but bright, and white as snow expresses the appearance very well, to my mind. There are also very faint mottlings, scarcely traceable in detail, elsewhere on the trunk; when the surface including them is rubbed intervening portions turn normally red, while the seen or suspected mottled portions then remain unaltered, and by contrast with the reddened parts seem to have their normal yellow tint. Tuberosities.—

On the face, and protty uniformly contrasted even it are normal yellow tint. Tuberosities.— On the face, and pretty uniformly scattered over it, are very numerous discrete nodules, of which none is larger than a pea, and many are smaller; the forearms have similar nodules in large number, quite discrete, and only a little more numerous on external and posterior surfaces (except the right arm, where this distribution is well-marked, though the flexor surface is not clear); there is one such nodule on the thigh above the left knee; and there are others, which seem to be the same on the nates-more particularly on the right side. Special senses and voice.—Unaffected, except sensation; the maculæ on the face and neck are so distinctly analgæsic that the pin being stuck in and left standing, he thought himself touched with the head. Nerve trunks (cubital and ext. popliteal).—Normal as to size and sensibility; he cannot by the strongest effort completely close the right eye, the conjunctiva remaining visible through a chink about a tenth of an inch wide (this is the side of the swollen orbit); orbicular of mouth apparently normal. Complained of cold and shivered while undressed, although a warm day.

December 28.—At the end of a month, during which he had good food and many baths of slightly carbolised water, his symptoms were less marked. At present the small tubercles on the face have almost entirely receded, and (except one) can only be felt as a rather diffuse not well circumscribed thickening; a brown discolouration, rather faint, marks the site in most instances. The infiltration of the maculated areas near the ears has also nearly disappeared, and the surface desquamates no longer; nevertheless, the diagnosis of the case would still be easy were he seen in this condition for the first time.

Case XXXII.—Ah Quong, et. 39; admitted 15 November, 1892.

History.—Chinese; when a boy, used to fish, and was often bitten about the hands by snakes (or he may mean eels). At 14 the first signs of leprosy appeared about his hands. At 19 he came to Australia, proceeded to the neighbourhood of Bombala, engaged in digging for a few years, and for the last ten or eleven has kept a store at Craigie, which is about 23 miles from Bombala. With reference to the above history of onset it should be noted that he was anxious to show that his disease was stationary (and not leprosy), presumably on the chance that he might be considered to have recovered, and so might escape confinement. On admission.—Is pallid and debilitated, but not markedly. Down to the knees there are no maculæ at all, but to the inner side of, and a little forward of, the ischial tuberosities are two patches of hardened and abraded skin, and on the inner side of the left thigh close to the gluteal fold is a smaller and similar patch. He ascribes these to riding, and perhaps correctly; they have nothing characteristic about them. The orbicular muscles of the face are normal. The ulnars are enlarged and apparently insensitive; the left is the larger. Hands.—Both are in the same state, namely, the fingers are contracted en griffe, and this is due in part to fascial contractions; they have all lost more or less bone, and by absorption, but the nails remain; the interossei, but especially the first, are much wasted. Legs and Feet.—The peroneals are but slightly enlarged; they are apparently insensitive; the legs show many ill-defined, indescribable, but well-marked alterations of the skin, which is scaly; several scars of moxae; the feet are both deformed like the hands; the toes, which are wasted, either stand erect or fall back upon the dorsum of the foot; the useful part of the foot ends at the metatarsus, and though the displaced toes are there the general appearance is much that of amputation at the metacarpo-phalangeal joints, so much displaced and useless are they. Special senses.—Unaffected, except sensat

Case XXXIII.—Jim Chung, &t. 38; admitted 29 November, 1892.

History.—Chinese; is married; no children; arrived in Australia, at Sydney, six years ago; went to Bodalla on the south coast almost immediately; has stayed there always; was occupied in timber-getting. No history of illness can be got from him; he says he has been ill only three months; but his state on admission shows that he must have begun to suffer several years ago, and possibly either before he left China or soon after arriving here. He is slightly deficient mentally, good-tempered and tractable, but slow and inclining to childishness. On admission.—Height, 5 ft. 3 in.; weight, 136 lb.; well-nourished, and in average good general health; hair of scalp, beard, and moustache, normal; of eyebrows, very thin, and wanting towards outer ends. Cannot close his eye-lids perfectly, but far enough to hide the irids by rolling the ball upwards; the orbicular muscle of mouth is less paralysed, but imperfectly under control. Advanced wasting of all the intereossei of hands, and paralysis of extensors, but no fascial contractions; the feet also are wasted, though less than the hands, and movements of toes are small, and not under control; some part of the phalangeal bones of left great toe has disappeared by absorption, but the nail is perfect and healthy; there are no other deformities of fingers or toes; but nutrition of the former is markedly deranged, and the fingers are flexed in repose. The ulnar nerves are but slightly tumefied, though they are very tender. The conjunctive are slightly reddened, and painful; there is a slight opacity on outer margin of left cornea. On the body and limbs are several very large maculæ; they are placed on arms and forearms, and from about the last dorsal vertebræ downwards, over buttocks, thighs, and legs; feet and hands are free; the maculæ are uniform in appearance, and consist of a serpentine band about 3 centimetres wide, of a rather unusually dark purple red, within which are very extensive areas of nearly achromatic skin; sensitiveness is markedly reduced and response to pun

Case XXXIV.—Georgie Yaw, et. 68; admitted 31 December, 1892.

History.—Native of Amoy; arrived in Australia in 1848; is a cook, and has travelled all over the country; has twice resided at Mudgee, and lately for the second time; was admitted from Waterloo, a suburb of Sydney; is extremely deaf. State.—Is a very big man; pallid; fairly well nourished; he presents no abnormality down to the great trochanters; behind both of these is a brownish discolouration, over which the skin is rough and slightly ulcerated at the centre; tests of sensation having been made elsewhere, he intimated that these spots were as dead as the form he was then sitting on; on examination it turned out that a pin-prick gave him (apparently) sharp pain, but that the impression was not noticed for a second or even longer. Everywhere below the knees sensation was very deficient, being present though delayed, at a few points only. Legs and feet are slightly swelled, shiny, and deep brown in, colour—the feet less than the legs; the cuticle roughened at parts. Right joot.—The small and great toes are about normal, but incline towards each other; between them the other three are crushed together; all are flattened and shortened, but the middle toe is shortest; over and attached to the first metacarpal bone is a tumor the size of a hen's egg of bony hardness; the little toe is deformed by a partial dislocation of the second phalanx which rests upon and lies parallel with the second; the nails occupy a position rather behind the middle of the second phalanges. Left foot.—The three middle toes are shortened and crushed together, but not so much as those on the right foot; in this case the two halves of the metatarsus seem to have become bent downwards, so as to form a deep sulcus on the sole; by trying to straighten this out severe pain was caused; there is a similar but smaller tumor on this side, placed as on the right foot; nails as on the other side, but those of great toes normally placed. Sensation defective or delayed at many points of the trunk. Ulnars and peroneal nerves about normal.

Pilocarpine ('014 mg.) produced a moderate general sweat in about twelve minutes; on the back its distribution was irregular; two large patches of skin, one on left shoulder and the other across the loins, remained dry; the feet and legs and thighs remained dry; the feet sweated freely over some small areas (inner side of first metatarsal bones, a patch on the dorsum, &c.), but most of the surface remained dry. Four or five small achromatic areas about the size of a hazel nut on the right upper thorax appeared, which were invisible before.

Before bringing these notes for the year 1892 to a conclusion, I wish to point out the public importance and scientific interest which would attach to more complete records, both of the earliest known cases of lepra in Australasia, and of its yearly progress in this quarter of the world. Under the former head very little trustworthy or useful information has been published, as far as I can ascertain; yet it seems a matter of great importance to learn whether there is any note of the occurrence of the disease among the aborigines in parts of the country which had not been visited by aliens down to the date of observation. It is true that under the conditions attaching to colonization such observations may not have been made at all, or if made, might, on examination, turn out to be of doubtful import; but it is none the less desirable that any which may exist should be collected and scrutinized by competent critics. Upon this point Professor H. Leloir, of the University of Lille (whose Traité de la Lèpre is incomparably the most scientific and the most complete work which has for many years been published on this subject, as it is also by far the best clinical and pathological manual), has touched, in correspondence with which he has favoured me; and the great importance of the matter in connection with the question of contagion will be evident to all. It is to be hoped that those who are of wide reading in local annals will communicate any item which they may suspect has bearing on this point. And, secondly, it is also much to be desired that old hospital and medical records of all kinds should be searched for indications from which an estimate might be formed of the progress and diffusion of this disease in Australasia.

APPENDIX E.

AS TO EARLIER CASES OF LEPROSY IN NEW SOUTH WALES IN PERSONS OF EUROPEAN DESCENT.

"Notes on Leprosy," by James C. Cox, M.D., Honorary Physician to Sydney Infirmary, were reprinted in Appendix D to the report for 1891; they were taken from the New South Wales Medical Gazette of the years 1872-4-5. Dr. Cox, who at the first-mentioned date had already practised in Sydney fourteen years, began by remarking that he believed "the existence of leprosy has not hister to been recorded as existing in New South Wales amongst the native-born European population." The facts as to birthplace, probable date of attack, age at date of attack, and local distribution of these cases were as follows:

Names of Dr. Cox's cases.	Birthplace.	Age on arrival in N.S.W.	Probable date of attack.	Age at date of attack.	Locality.
J. W	Campbelltown England Windsor- Sydney Germany Holland	17 Birth ,,	1869	34–5 27 24 18 46 52–3	Campbelltown. Sydney. Windsor. Sydney. Petersham (Sydney). ?

APPENDIX F.

NOTES AS TO DRUGS USED AT THE LEPER LAZARET, NEW SOUTH WALES, BY THE MEDICAL SUPERINTENDENT.

THE occasional use of tonics, quina, strychnia, mineral acids, cod liver oil, &c., together with baths and generous diet, have apparently the effect of improving the health of the lepers and enabling them to resist better the progress of the disease; but empiric (specific?) treatment has been found of little avail, and the chaulmugra and gurjun oils, which have been used extensively at the lazaret, have an effect apparently little differing from that which could be more agreeably obtained from cod liver oil. These medicines are almost invariably taken at first—especially by the Chinese—with eagerness, but soon afterwards rejected by the patients as useless.

During recurrent febrile periods, salicytate of soda, salol, pulv. Ipec. Co., &c., have had the

antifebrile beneficial effect which such agents might be expected to produce.

Beauperthuy's oil of anacardium (cashew nut) has been used as a local application in tubercular cases. It acted as a powerful irritant, inducing inflammation, which tended to vesication and effusion, which appeared to be followed in one case by slight constitutional relief. This beneficial action may have been due to the production of an artificial effect analogous to the occasional normal occurrence of pamphigus which accompanies some exacerbations of the disease, and which is often followed by temporary abatement of symptoms. The action, however, may have been merely counter-irritant, and, at all events,

like that of the other drugs, can only be considered palliative.

Corrosive sublimate, as recommended by Beauperthuy and others, has been used in four cases. The effect was easy and rapid salivation; one patient losing several teeth and suffering from caries of the jaw and sloughing ulceration of gums and fauces, and inflammation of submaxillary glands. He also had severe dactylitis and progressive opacity of corneæ (interstitial keratitis?). The mercury apparently at

least assisted leprosy in producing the above results. Local applications of gurjun oil, carbolic oil, iodoform, borax, &c., have been found of advantage in healing ulcers; which, however, generally after an indefinite interval, recur, renewing the usual destructive process, and again healing. In cases supposed to have been associated with syphilis, iodide of potassium has been found useful in order to determine and separate the complication.

Opium is also largely consumed by the Chinese lepers, but only as a stimulant and narcotic medical composit.

medical comfort.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RECENT IMPORTATION OF SMALL-POX BY THE S.S. "OROYA."

Ordered by the Legislative Assembly to be printed, 19 October, 1892.

The President of the Board of Health to The Colonial Treasurer.

Sir,

I do myself the honor to submit herewith a report, by the Chief Medical Inspector, upon the recent importation of small-pox by the Orient Company's s.s. "Oroya," and to inform you that the total expense incurred by this Department in connection with this outbreak of disease amounted to the sum of £910 1s. 10d. (which expenditure was in addition to the ordinary cost of maintaining the Quarantine Station). Of the amount stated, £212 15s. 7d. was recovered from the Orient Company under the provisions of the Quarantine Acts, thus leaving a nett cost to the Government of £697 6s. 3d.

I have, &c.,

F. NORTON MANNING,

President.

The Chief Medical Inspector to The President of the Board of Health.

September 17, 1892.
On June 14 a telegram was received from the Port Health Officer, Adelaide, S.A., (Dr. J. T. Toll):—"Arrived 'Oroya,' thirty-seven days from London; total 262 passengers, all well. One death, infant, bronchitis and convulsions, June 7." After touching at Melbourne the "Oroya" completed her voyage by entering this port at 8 a.m. on Saturday, June 18. Her intermediate dates had been as follows:—

Itinerary of the "Oroya," London to Sydney, May 6 to June 18, 1892.

Plymouth, May 7.
Gibraltar, May 11.
Naples, May 15.
Port Said, May 19.
Suez, May 20.
Colombo, May 30, 9:30 a.m.
Albany, W.A., June 10.
Adelaide, S.A., June 13.
Melbourne, V., June 15.
Sydney, N.S.W., June 18, 8 a.m.

London, May 6.
Plymouth, May 7.
Gibraltar, May 11.
Naples, May 16.
Port Said, May 19.
Suez, May 20.
Colombo, May 30, 4 p.m.
Albany, W.A., June 10.
Adelaide, S.A., June 13.
Melbourne, V., June 16.

She began to discharge immediately; 107 passengers were landed, while 34 others transhipped to the A.U.S.N. Co's. S.S. "Buninyong," and continued their journey to Queensland at mid-day.

Late at night on Saturday, June 18, the following message was received from the Board of Public Health, Victoria:—"Case of small-pox, passenger by the 'Oroya,' a man (G.O.); fifth day. There was probably another case during the

voyage

Thereupon the ship with her crew, which voyage, a girl (B.J.), now in Victoria." numbered 162, was forthwith isolated under guard of the Water Police, and ordered to quarantine waters. The Inspector-General of Police was requested to issue instructions for tracing the passengers who had landed, arrangements were made for keeping them under medical observation, and the names of those then sailing in the "Buninyong" were transmitted to the Central Board of Health, Queensland.

On June 19 a farther telegram was received from Victoria:—"Girl (B.J.) traced, found to have been suffering from small-pox, and still infectious.' ship's surgeon (Dr. Harvey Macpherson) was therefore requested to furnish a report upon this case as it appeared to him during the voyage, and he sent the following

statement from the quarantine station:

"I first saw B.J. May 25; she was suffering from acute eczema, impetiginous form; I learnt she had suffered much during the hot weather from prickly heat, and this had developed into the abovenamed form of eczema. Her temperature was normal, and remained so during the whole of the time; there was no symptom of any kind apart from the eruption. She was treated with salines, arsenic, and zinc ointment; took food well." And in reply to a request for the reasons at length which led him to conclude that this was a case of eczema in impetiginous form, he stated on June 20 that there had been "entire absence of any rise of temperature; no constitutional symptoms, no vomiting, no pains; in fact, no symptoms at all except the equation. This eruption had no resemblance to that of small-pox—it was no symptoms at all except the eruption. This eruption had no resemblance to that of small-pox-it was at first large swellings of hard consistence, more like tumours than anything else when I saw them. At the same time there was distinct eruption of ordinary eczema at parts. These tumours became pustular and burst. There was no umbilication in any of them. In addition, I may mention that I have had the same disease on former occasions following prickly heat when in the tropics." Farther, on June 27, Dr Macpherson repeated these opinions, and suggested that G.O. had been infected at Colombo, and had fallen ill only after landing in Melbourne.

During the next few days nearly all the passengers who had landed from the "Oroya" at Sydney were traced to various parts of New South Wales, examined, vaccinated or revaccinated as far as possible, and thenceforward kept under medical Four more cases of small-pox were detected among the resident population—two in Victoria and two in New South Wales; two others occurred among the crew at quarantine; and one at the quarantine station in Moreton Bay, Q., where the "Buninyong" had been arrested. All the patients were either second-saloon passengers by the "Oroya" or else members of the crew employed on second-class parts of the ship. Their dates of attack (except B.J.) were as shown in the following table (Cf. Appendix):-

	Name.	Second-class.	Sex.	Age.	State as to Vaccination.	Isolated at—	Date of Attack.	Rash appeared.	Date of Infection.	Result.
1 2 3 4 5 6 7 8	G.O M.H.T J.B G.M'C H.P M.T I	Steward Quartermaster Passenger	F M M M F	48 22 38 Adult	? Infancy, good Alleged, no scars Infancy, good ? Unvaccinated Vaccinated	Sydney Melbourne Sydney	12, or 13. June 12 or 13. June 17 ,, 18 ,, 20 ,, 23 ,, 24*.	June 16 ,, 21 ,, 21 , 21 , 21 , 27	29, or 30. May 29 or 30. June 3 ,, 4 ,, 6 ,, 9 ,, 10*.	Died. Recovered.

* Probably.

It is possible to reckon back from the date of attack to the date of infection with confidence, because the incubation period of pustular small-pox is well ascertained, and is known to be varied from in particular cases very rarely. It lasts thirteen clear days; that is, illness begins on the fourteenth day from infection. Seldom, this stage is shortened by two or even three days; and if in any of the alleged instances it really has been langthoned by twonty four hours, not those in no doubt that extension beyond instances it really has been lengthened by twenty four hours, yet there is no doubt that extension beyond thirteen days is even more rare than shortening. Applied to a single case, therefore, the above calculation is valueless; but applied to a group of cases which have occurred under identical circumstances, it carries probability with it in a degree practically not removed from certainty.

Thus it is possible that G.O. and M.H. were infected at Colombo on May 30; small-pox was present in the city at that time, and, as they both landed, they may have met with the infection in the bazaars. It is certain both were not infected later than that date; not so certain, however, that G.O. was not infected earlier, for it appears (Appendix) that his date of attack could not be fixed from his M.H.'s account of her illness seemed clear, and sufficiently corroborated by reference to coincident events of which the dates were certain." conclusion to be drawn concerning the whole number of patients, however, by no means depends especially upon the facts concerning those two of them, nor upon avoidance of a possible error of one or two days. If the seventh case in the above Table

Table be omitted as being imperfect, then it appears at once that the remaining five cannot have been infected at Colombo on May 30, unless they had unprecedentedly long periods of incubation, different in each case, and as follows:—18, 19, 21, 24, and 26 days; nor (as there is no infectivity during incubation) can they have been infected by G.O. or M.H., unless they had incubation periods, similarly varied, of 4, 5, 7, 10, and 12 days at the longest. It is, therefore, certain that on and from June 3 (at all events), there was on board the "Oroya" a source of infection to which all the latter six cases had access. No infectious person joined the ship at Colombo; and therefore that source must have consisted either in some infectious article taken on board there, or else in some passenger who had fallen ill before June 3, and who had been infected before May 21. The former hypothesis is probable in as far as illness was confined to the second saloon, but improbable in view of the number of persons attacked, and their various dates of attack. The latter is probable on all counts; and, in fact, the source is known to have consisted in a sick passenger, namely, B.J., who fell ill not merely before June 3, but even before May 30. It is also more likely that G.O. and M.H., too, owed their illness to her with whom they were much in contact, than to casual encounters with infection in the bazaars of Colombo.

It has been suggested on the part of the owners that as Dr. Macpherson happened to be specially familiar with small-pox, it was not likely that he should have mistaken B.J.'s case after watching it; and, on taminar with small-pox, it was not likely that he should have mistaken B.J.'s case after watching it; and, on the other hand, that the Medical Inspector of the Victorian Board saw her only after convalescence had advanced, and, therefore, had but a poor opportunity of making a sure diagnosis. But this argument is merely ad captandum, although doubtless put forward in good faith. That a difficulty is often felt in discriminating between the rash of small-pox and of other diseases at beginning of the eruptive stage is notorious; but that the effects of small-pox should be mistaken at the third or fourth work of illness is out of the question, provided the retirest (in a case of modified small pox) then shows week of illness is out of the question, provided the patient (in a case of modified small-pox) then shows any rash at all. B.J. did show abundant traces, and the Victorian Medical Inspector's description of them, as reported in a court of law, was:—"Scars on the nose and other portions of the face, arms, legs, and whole of the trunk (back and front). The scars on the back especially presented small pits, and were surrounded in most cases by discolouration. This was almost continuous. There were also circles of fraved skin on hands and wrights are reported to the face of the scars of the back especially presented small pits, and were surrounded in most cases by discolouration. frayed skin on hands and wrists, unopen pustules on the palms of the hands, and a considerable number of these on the soles of the feet. The size of the pustules varied from that of a split pea to a little larger; they contained matter of the colour of amber." This description has application to no disease but small-pox.

Another objection to this diagnosis of B.J.'s case has been raised on behalf of the owners, namely, how it could happen that more of her fellow-passengers were not infected, and that all escaped infection until after Colombo had been touched. This remark has no weight at all. Never do all who are exposed to infection contract the disease; and it may well be merely replied that on the present occasion it appears that all who were exposed and were susceptible did fall ill. However, besides that, nearly all the second select passengers were protected by received in desired the received by the second selection passengers. the second-saloon passengers were protected by vaccination during infancy (no complete account of the state of the whole number, landed at several different ports, is available); and it is notable that while all who suffered were adults save one, that one was a child who had never been vaccinated at all (until three days before she was attacked, and, even then, without any local result).

The "Oroya" was not liable to inspection on reaching Sydney, because she arrived from an Australasian port; unless there were, or unless within fourteen days of her arrival there had been, a case of infectious disease on board (17 Vic., No. 23, There had been such a case on board within fourteen days of her arrival, namely, that of B.J., but the Master was unaware of it. Not only had the Surgeon failed to recognise it, but it had escaped notice at Albany and Adelaide (where inspection on behalf of the Health Officers was entrusted to laymen), and at Melbourne (where, although the Port Health Officer boarded, no medical inspection of passengers and crew was held). Besides that, a case of infectious disease actually was on board at the time of her arrival here, namely, that of M.H., who, at 8 a.m. of June 18, had about twenty spots of small-pox on her face at the forty-eighth hour of eruption. (Appendix, case 2.) But the Master was unaware of this case, too, for the Surgeon had overlooked it, just as he had failed at an earlier date to diagnose the nature of B.J.'s illness. Thus the vessel steamed past the boarding-station, and proceeded forthwith to discharge.

This introduction of small-pox led to the infection of three persons among the resident population of Sydney. The case of M.T. was concealed for four or five days, and three members of three different families took the infection from her. The three households were removed to the quarantine station on July 16, and their dwellings were shut up and disinfected. With these consequences the present case closed. I have, &c.,

J. ASHBURTON THOMPSON.

APPENDIX.

The ship's surgeon, in quarantine, furnished a report on the case of the infant, M.E.M'P., who died on June 7th during the voyage; the following is an abstract of it:—The child was first seen by him on May 21st, when she had two large boils on the back of her head; "later on some more appeared about shoulder"; "there were no more, and child made a good recovery." He was again called to her on June 5th, when he found her "suffering from an acute attack of bronchitis"; on the 6th there was some improvement, but she "was restless, as she was cutting a tooth at this time." On June 7th she was somewhat convulsed; "breathing was laboured"; "there were mucous rales over both lungs; cough very bad"; she died at 5 p.m. "The only rash I ever observed was an ordinary erythematous teething rash. The cause of death was bronchitis."

Cases which occurred in New South Wales.

2. M.H., second saloon; f., et. 48. Vaccinated, infancy only; seven scars measured area 2 square inches, foveation distinct. On or about June 7th had rigors and some fever; recovered. Fell ill again June 13th, at Adelaide; general malaise, and so bad a pain in the back that she did not land as she had intended. On June 16th, which was the day she left Melbourne to continue her voyage after landing there, she found spots on her face when she awoke. These spots continued until June 20th, when she was examined for isolation; she then had "twenty or thirty spots of a pustular eruption on her face," besides others elsewhere.

3. H.E.T., steward, second saloon; et. 22. Vaccination in infancy alleged, scars not identifiable. June 17th, malaise and abdominal pains; consulted the ship's surgeon, but remained on duty. June 19th, laid up. June 21st, first observed a rash on the forehead at waking (but at 7:30 a.m. the ship's surgeon

found the rash had already appeared on the body also).

4. J.B., quartermaster, second saloon deck; et. 38; vaccinated, infancy only; two good scars. Fell ill, June 18th, evening. June 19th, morning, had a macular rash over arms, lower part of chest, and abdomen. June 20th, the rash was thick over body in general, except face, hands, and lower extremities.

June 21st, rash was thick over whole body, except legs (now first appearing on the face). Died June 29th.

7. M.T., second saloon; f., at. 5; unvaccinated. Was vaccinated (but unsuccessfully) June 22nd.

This case was concealed for some days; when it was discovered on July 1st the rash appeared to be four

days old.

Cases which occurred in Victoria.

G.O., attacked 11th, or 12th, or 13th; pock-eruption on 14th or 15th; discovered June 18th.
 G.M.C., fell ill, 20th; discovered, June 24th, when rash plainly marked.
 H.P., attacked, 23rd; rash, 24th, night; discovered June 26th, at Lang-Lang.
 J. W. COLVILLE, Secretary, Board of Public Health, Victoria.

September 16, 1892.

Case which occurred in Queensland.

8. I., second saloon; m., at. (adult). Fell ill (in quarantine), June 25th; rash appeared, June 28th; eruption confluent; hemorrhage from throat, followed by diarrhœa; died July 3rd. Had been vaccinated. C. J. Hill Wray, L.R.C.P.S.E., Health Officer.

A quarantine officer took the disease from this patient.

1892-3.

LEGISLATIVE ASSEMBLY.

SOUTH WALES. $N \to W$

TYPHOID FEVER IN SYDNEY AND SUBURBS.

(FROM 1876 TO 1892.)

AND CERTAIN PARTICULARS RESPECTING OTHER INFECTIOUS DISEASES, VIZ.: MEASLES, SCARLET FEVER, AND DIPHTHERIA.

Ordered by the Legislative Assembly to be printed, 25 April, 1893.

The Secretary to the Board of Health to The Principal Under Secretary.

Board of Health Office, 127, Macquarie-street, Sydney, 23rd March, 1893. Sir.

I have the honor, by direction of the Board of Health, to forward you the enclosed paper on the occurrence of Typhoid Fever and the mortality therefrom in the City of Sydney and Suburbs during the last seventeen years, and certain particulars respecting other infectious diseases, prepared from the records in this office for the information of the Colonial Secretary.

I have, &c., EDMUND SAGER, Secretary.

[Enclosure.]

Typhoid fever in the City of Sydney and its Suburbs from 1876 to 1892, and certain particulars respecting other Infectious Diseases.

The accompanying returns, which have been carefully prepared for the information of the Colonial Secretary, contain certain interesting facts with reference to the prevalence and mortality of typhoid fever in the city of Sydney and suburbs during the last seventeen years, and are a continuation of returns previously furnished, completed to the 31st December last. In addition to the usual tables a return is given respecting measles, scarlet fever, and diphtheria.

In return I a statement is given of the number of deaths from typhoid in each month of the ten years ending 31st December, 1885, together with the ratio calculated per 100,000 of the population, as estimated on the 30th June in each year. From this it will be seen that during the decennial period—1876 to 1885—there was a very large increase in the mortality from this disease, viz., from 46 07 per 100,000 in 1876 to 102.17 in 1885.

Return II gives a similar statement for 1886 to 1892. From this it will be seen that the mortality from typhoid fever has of late undergone considerable diminution, having gradually decreased from 90 90 per 100,000 in 1886, to 19:43 for 1892, which is by far the lowest for any of the sixteen years now under

The operations of the Water and Sewerage Board have scarcely had time to tell fully on the statistics of mortality from typhoid, although we may in time expect a further diminution in the typhoid death-rate from the improvement in the sewerage. On the other hand, the Dairies Supervision Act came into force in 1886, and concurrently with this the mortality began to fall, and it has continued to fall ever since; and since milk is well known to be one of the best breeding places for the lower organisms which probably are the cause of the disease, and since pari passu with the extension of the operations of the Act to those country districts whence the metropolitan milk supply is derived the mortality from typhoid fever has decreased, we may fairly attribute that decrease in part at least to the beneficent operation of the Dairies Supervision Act. the Dairies Supervision Act.

Return III, which contains a return of the number of cases of typhoid fever admitted to the metropolitan hospitals of Sydney, and of the number of deaths that have occurred in these institutions during the seven years from 1886 to 1892. From these figures it will be seen that during 1892 only 229 cases were admitted, which is considerably below the number of any of the previous years. Thirty-two of these cases terminated fatally, making a death-rate of 13.97 per cent. on the admissions, this being lower than the two preceding years.

lower than the two preceding years.

Return IV shows the number of persons suffering from typhoid fever who were admitted to the metropolitan hospitals from the city of Sydney and suburbs during the twelve months ending December 31st, 1892, arranged according to the localities from which they were removed, together with a calculation of the ratio of cases per each 10,000 of the population.

Return V shows the deaths which took place in the hospitals among the cases mentioned in the previous table; in this it has not been deemed necessary to calculate the ratio per 10,000.

From these returns it will be seen that the total cases admitted from the metropolis was 212, or 5:40 per 10,000 of the population, as against 276 cases, or 7:13 per 10,000, for the year 1890.

Return VI gives certain particulars respecting the prevalence of certain other infectious diseases, from which it will be seen that diptheria was not quite so prevalent as in the previous year; that the cases of scarlet fever were more numerous; and that there were only 2 deaths from measles during the year.

The Board regrets that, in the absence of any provision for the compulsory notification and registration of infectious diseases, it is not in a position to furnish more definite or detailed information.

The absence of such an Act from the statute book is to be regretted, for it is only by being immediately informed of the existence of cases of infectious diseases in any place that the Sanitary Authorities

can take effectual steps to prevent the spread of the disease to the surroundings of the patient.

The Board, however, have pleasure in recording the coming into operation of what amounts to one little morsel of such an Act, in the provision which the Board has recently made for the effectual disinfection of public vehicles which have conveyed an infectious case, and the Board may be allowed to point to the fact of 6 vehicles having been so dealt with within the short period of only 3 weeks, as evidence of the need for such a provision, and of the useful work which is now being done at the disinfecting chamber at the Woolloomooloo Quarantine Depôt.

EDMUND SAGER, Sydney, 22nd March, 1893.

Secretary to the Board of Health.

RETURN I.

APPENDIX.

Typhoid Fever-1876 to 1885.

Sydney: Charles Potter, Government Printer.—1893

1892-3.

NEW SOUTH WALES.

COAST HOSPITAL, LITTLE BAY.

(REPORT FOR 1892.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Chief Secretary.

Sir,

I have the honour to submit the Annual Report on the working of the Coast Hospital at Little Bay for the year 1892, with appendices containing the usual returns.

The following general statement shows the number of patients under treatment during the year

with results :-

Although the number of patients admitted during 1892 was less by 104 than during the previous year, the average number resident was increased from 193 to 200, which was caused by the cases being of a nature necessitating a longer stay in hospital, which rose from 40 to 44.6 days. There were 18 deaths more than during the previous year, and the death rate increased from 3.23 to 4.5, which is chiefly due to the more numerous cases of phthisis.

Return No. 1.—The channels through which the patients admitted during the year reached the hospital is shown in the following short return:—

	Hospital Admission Depôt.	Medical Adviser's Office.	Medical Superintendent.	Total.
Number of patients	1,385	226	33	1,644

From the following returns relating to typhoid fever it will be seen that 61 cases were admitted, this number being very considerably lower than any year since the opening of the hospital, the number admitted in 1891, being 88; in 1890, 140; and in 1889, 342. The cause of the reduction was the great falling off in the number of persons attacked with this disease, as shown in the recent report on this subject issued by the Board of Health. The number of deaths from this disease was 10, or a mortality of 16·3 per cent, all the deaths having occurred between the ages of 10 and 30 years; the number of cases treated was, however, too small to furnish valuable statistics. The average stay in hospital was 42 days, nearly corresponding with that of the previous year.

RETURN No. 2.—Showing the number of cases of Typhoid Fever distributed under sex and age, and the death at each age, which were admitted during 1892.

(Average stay in Hospital, 42 days; mortality, per cent., 16.39.)

Return No. 4 deals with infectious diseases; shows the form of disease admitted, and the localities from which the cases were received, the total number being 116 as against 90 in the previous year, the chief increases being scarlet fever from 22 to 39, and chicken-pox from 7 to 16; the number of other cases of infectious diseases admitted were erysipelas, 24; whooping-cough, 29; diphtheria, 6; and measles, 2. Three deaths took place from diphtheria, and 2 from complications of whooping-cough.

This hospital is now doing most useful work in this direction, and there can be no doubt that by the voluntary segregation of the 116 classes of highly infectious cases referred to, the spread of these diseases was much retarded. The present accommodation for this class of cases is not all that could be desired, and the question of providing more suitable buildings will have to be considered before long.

RETURN No. 4.—Showing localities, whence and how many cases of Infectious Fevers, &c., were admitted in 1892.

Return No. 5 shows the age, sex, and other particulars of the general hospital cases admitted during the year. The total number of these was 1,583, being an decrease of 77 on the previous year. The average stay in hospital was 44.6 days, and the mortality 4.04 per cent. A large number of these cases were, after treatment for a considerable period, transferred to the Asylums for the Infirm and Destitute, their cases being such as would not be benefited by further active hospital treatment.

RETURN No. 5.—Showing the general cases distributed under sex and age, and the deaths at each age, during the year 1892.

(Average stay in Hespital in days 44.6; mortality, 4.04 per cent.)

* 13 deaths from phthisis.

The Leper Lazaret having been completed and opened in 1891, all persons suffering from leprosy were transferred to that establishment, which is now treated as a distinct institution, the particulars and statistics respecting them are not, therefore, included in this report, but will be found in the report on leprosy in New South Wales recently presented to Parliament by the Board of Health. Cases of doubtful diagnosis which may ultimately be declared to be leprosy are, however, placed in the isolation rooms attached to the Coast Hospital until a definite diagnosis has been arrived at. One such patient, whose sister has been declared a leper and taken direct to the Lazaret, was the occasion of some unpleasantness during the year. Her case not being clear the patient was placed in isolation until a diagnosis of another disease was made. Some of the nursing staff, however, in the interval declined to attend to her wants, an act of insubordination and inhumanity, which resulted in one head nurse being dismissed and another being allowed to resign. As all cases of leprosy are taken direct to the Lazaret, and only such cases as are extremely doubtful, generally from being in the early stages, and probably therefore not in an infectious condition, are admitted for diagnosis to the Coast Hospital, it is hoped that no such unpleasantness will

Returns Nos. 6 and 7 show the expenditure of the hospital for the year in detail. The working expenses have decreased from £10,837 8s. 4d. to £10,115 13s. 1d., and the cost of maintenance and treatment, exclusive of ambulance service and cost of repairs, has been £41 6s. $9\frac{1}{2}$ d. per head, as against £46 4s. 1d. of the previous year.

The cost of the ambulance service was £1,136 7s. 3d., as against £1,162 19s. 9d. This item may appear large, but it must be remembered that on account of the distance of the hospital from Sydney a very complete service must be maintained, consisting of 4 ambulance drivers, 12 horses, and 6 ambulances, besides other vehicles; this is the only complete ambulance service in the Colony, ready at any moment for use in case of an epidemic of infectious disease, and performing at the present time, in addition to the ordinary service for the Coast Hospital, much useful work in connection with the transfer of patients to the Leper Lazaret, the Metropolitan Hospitals, and the Asylums for the Infirm and Destitute. No cases are removed except under the charge and control of an experienced trained nurse. Some of the journeys are very long, very few being under 20 miles, and occasionally from 30 to 40 miles, necessitating in every case the use of two horses.

RETURN No. 7.—Statement of the Total Expenditure, Coast Hospital, 1892.

Expenditure.				How paid.
To working expenses as per Return No. 6, cost of erecting quarters for storekeeper by Government Architect, cost of laying on water to bathroom by Government Architect, cost of drainage and fencing by Government Architect, cost of tiling kitchen, proceeds of sale of horses, bones, fat, &c., paid to Treasury, value of stores and services transferred to Leper Lazaret	1,075 113 120 63 48 327	13 16 12 5 2 4 5	1 0 6 0 9 9	By amount paid from Hospital Vote by Medical Adviser to Government, amount paid from votes under the Works Department by Government Architect, amount paid from Stores Vote by Superintendent of Stores, amount paid by the Government Printer Total

During the year considerable improvements have been made by the Government Architect. A cottage has been erected as a residence for the storekeeper, and the four cottages for the attendants have been connected with the main sewer. An additional water supply for the lavatories in the Main Division has also been arranged, and is found of much advantage, the previous supply occasionally proving insufficient; and the unsatisfactory cemented floor of the main kitchen, which frequently required repairs, has been replaced by excellent durable tiling.

Considerable additions have been made to the library, and many presents of books and magazines have been received from the friends of the institution.

In Appendices A and B will be found the usual classification of the diseases treated, and particulars relative to the patients who died in hospital.

I have, &c., T. P. ANDERSON STUART, M.D., Medical Adviser to the Government.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

LEPER PATIENTS, LITTLE BAY HOSPITAL.

(REPORT BY DR. MANNING ON.)

Ordered by the Legislative Assembly to be printed, 18 October, 1892.

[Laid upon the Table of this House in accordance with promise made in answer to Question No. 1, of 18 October, 1892.]

The Medical Adviser to the Government to The Principal Under Secretary.

Board of Health Offices, 127, Macquarie-street, Sydney, 17 October, 1892.

THE Board of Health and the Medical Adviser to the Government have had under consideration the care, observation, and treatment of cases of suspected leprosy, and are of opinion that the method now adopted is that most advisable for the patients, and involves no danger to the staff, the other patients in hospital, or the public.

The isolated rooms in which suspected cases are kept were erected for, among other uses, the observation of patients of this class; they are thoroughly disinfected after every suspicious case of disease of whatever description, and there is no danger to subsequent occupants from previous cases.

It has never been shown that leprosy is infectious, and it is only contagious under certain circumstances. No European attendant in a leper hospital has ever been known to contract the disease, and leper patients are treated in the general wards, and by the ordinary nurses, in English hospitals.

The care of, and attention to, the suspected cases, under the direction of the Medical Officers, involves no danger to the nurses, and though difficulties have occurred in one case owing to an unreasonable dread of the disease, the patient has not been neglected.

No scarlet fever patient has ever been treated in the isolated rooms. The ambulances are used for cases of leprosy, as well as other diseases, but are thoroughly disinfected after carrying each case.

The Leprosy Act gives no power to the Government to detain the bodies of deceased lepers contrary to the wishes of their relatives.

F. NORTON MANNING.

LEGISLATIVE ASSEMBLY.

$N \to W$ SOUTH WALES.

LEPER PATIENTS, LITTLE BAY HOSPITAL.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 10 November, 1892.

[Laid upon the Table of this House in answer to Question No. 3, of 10 November, 1892.]

Question.

- 3. Mr. Kelly asked The Colonial Secretary,—
 (1.) Is it a fact that Dr. Manning, Medical Adviser to the Government, has caused the dismissal of one of the head nurses, and the compulsory resignation of another head nurse, at the Little Bay Hospital, for having refused to nurse leper patients?
 - (2.) Is it a fact that he caused the compulsory resignation of the sub-matron for the same reason; if such is the case, will the Government take steps to have them reinstated?
 - (3.) Are the regulations of the hospital such as to leave it optional with nurses whether they shall nurse leprosy, small-pox, cholera, or not?

 (4.) Is it not a fact that Dr. Manning, in order to obtain information upon which to base his
 - recent report to the Government on the treatment of the lepers, ranged the nurses in front of him, and upon their stating that leper patients had been placed in the strong room before removal to the lazaret, told them that such was not a fact?
 - (5.) Is it a fact that the Premier, in answer to a question by Mr. Kelly, stated that no cases, where a true diagnosis of leprosy had been made, had been placed in the strong rooms at Little Bay, and that about a week later Dr. Manning, in his report to the Government, stated that these rooms had been specially erected for cases of the kind referred to?
 - (6.) If, as Dr. Manning states, leprosy is not an infectious disease, and only contagious under certain circumstances, why does the Government compel the retention of leper patients?
 - (7.) What are the restrictions the leper attendants at Little Bay are subjected to, as reported by Dr. Manning, before they are allowed to mix with the other attendants at the hospital and the general public?
 - (8.) Is it a fact that the Government pay the leper attendants more salary than the nurses receive; if so, why are the nurses now being made to consent by Dr. Manning to nurse leprosy
 - (9.) Is it a fact that a Chinese leper who had been placed in one of the rooms at the hospital a few weeks ago, was removed to the lazaret, and that a man was taken to the hospital from Botany suffering from sore eyes, was afterwards placed upon the same bed the Chinaman occupied, the only difference being that clean bed-clothes were provided?

Answer.

- (1.) One head nurse at the Coast Hospital has been dismissed for a breach of discipline, in refusing to attend to a case which was under observation, and was not suffering from leprosy; and the resignation of another head nurse was accepted, owing to her refusal to carry out directions.

 (2.) There is no such officer as sub-matron of the Coast Hospital, and no other nurse has resigned. The nurses whose services have been dispensed with cannot be reinstated.
- - (3.) No.
 - (4.) No. (5.) No.
- (6.) Persons suffering from leprosy are detained under the provisions of an Act of Parliament.
 (7.) The attendants and nurses employed in the leper quarters at Little Bay are obliged to pay special attention to cleanliness and disinfection.
- (8.) The attendants and nurses employed in the leper quarters at Little Bay receive special rates of pay, and the nurses at the Coast Hospital have not been asked to nurse cases diagnosed as leprosy.
- (9.) A patient under observation in the Coast Hospital, who was ultimately diagnosed to be suffering from leprosy, was removed to the leper quarters, and after everything used, including the bedstead, had been washed and disinfected, the room was used for other purposes.

1892-3.

LEGISLATIVE ASSEMBLY.

SOUTH WALES.

PHARMACY BOARD.

(PARTICULARS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 9 May, 1893.

[Laid upon the Table of the House in answer to Question No. 6, of 9 May, 1893.]

Question.

- 6. Mr. Dawson asked The Colonial Secretary,-

 - (1.) Is it a fact that out of the ten members of the Pharmacy Board only two are according to the Pharmacy Act legally entitled to be registered to sell poisons?

 (2.) Is it a fact that the Board refuse to register men with the same qualifications as they themselves hold?
 - (3.) Have fifty-six men been registered as pharmaceutical chemists of Great Britain, and is it a fact that there are not six pharmaceutical chemists in New South Wales?

 (4.) Is it a fact that the Board have down over 200 names registered as members of the
 - Pharmaceutical Society of New South Wales?
 - (5.) Is it a fact that there are nine names down as chemists from other colonies and countries who are not qualified under the Act?

Answer.

- (1.) It is not a fact that of ten members of the Pharmacy Board only two (or any other number) are, according to the Pharmacy Act, legally entitled to sell poison, there being de facto no Pharmacy Act yet passed by Parliament. I may observe that there are ten legally qualified members on the said Board, namely:
 - The President of the Medical Board. The Medical Adviser to Government.
 - Three members having carried on business as chemists and druggists prior to the Sale and Use of Poisons Act, 1876.
 - Two members, Pharmaceutical Society of Great Britain by examination.
 - Three members, by virtue of having passed all examinations, as required by the Sale and Use of Poisons Act, 1876.
- (2.) I am not aware that it is a fact that the Board have refused to register men with the same qualifications as they hold themselves.
- (3.) There are sixty-two registered chemists of Great Britain, all qualified to carry on business in that country. To the latter section of Question 3 I simply say that it is not a fact that there are not six pharmaceutical chemists in New South Wales.
- (4.) It is a fact that the Board have down about 200 names registered as members of the Pharmaceutical Society of New South Wales.
 - (5.) As stated in answer to Question No. 1, there is no Pharmacy Act in this Colony.

1892 - 3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

INFERIOR AND ADULTERATED TEAS.

(MEMORANDUM BY THE COLLECTOR OF CUSTOMS RESPECTING THE ALLEGED IMPORTATION OF.)

Ordered by the Legislative Assembly to be printed, 2 May, 1893.

[Laid upon the Table of the House in answer to Question No. 3, of 2 May, 1893.]

Question.

3. DUTY ON TEA: -- MR. NICOLL asked THE COLONIAL TREASURER,-

(1.) Is it a fact that, in consequence of the duty being taken off tea, large quantities of inferior tea are being sold in Sydney to the detriment of the public of this Colony?

(2.) If so, will he cause the duty upon tea to be reintroduced, and save the public from being imposed upon with adulterated rubbish?

Answer.

Memorandum from The Collector of Customs to The Under Secretary for Finance and Trade.

Custom House, Sydney, 27 April, 1893.

THE questions on the Notice Paper (No. 3) for Tuesday next, seem to imply that large quantities of inferior tea are imported for sale in Sydney, and that such tea is imported in an adulterated condition. They also imply that the introduction of adulterated tea into the Colony is consequent upon the abolition of Customs' duty on the article.

For some time past representations have been made in the columns of Sydney newspapers that teas, unfit for human consumption, are allowed to enter the Colony without question, and that the market has been swamped by the importation of adulterated tea, rejected by the Customs authorities in Melbourne. It has been assumed that the importation is due to the absence of supervision here, and that the absence of such supervision is the result of the abolition of the duty on tea. It has also been strongly advocated by the writer of the papers referred to, that a special expert Tea Inspector be appointed for the protection of consumers.

I beg that you will submit to the Treasurer the following distinct and carefully considered propositions, each of which I am prepared to justify and defend :-

1st. That no teas have been imported into Sydney since the abolition of the duty, which could in any sense be said to have been unfit for human consumption at the time of importation.

2nd. That tea of low quality and price has always been imported irrespective of Customs' duties, and that similar tea will continue to be imported.

3rd. That no supervision intended to detect and prevent adulteration can prove effective unless such supervision be applied direct to retail distribution.

4th. That this Department is competent to examine tea imported, and to accept or reject teas by approved tests whenever a standard of quality is enacted by an Adulteration of Foods or Health Act dealing with the subject.

Writers not in possession of the full facts have hastily concluded that tea examined at Melbourne and pronounced to be unfit for human consumption at that port should be for the same reasons refused here.

The facts being that in Victoria there is a standard of analysis fixing the percentage of moisture,

extractive matter, ash soluble in water, &c., contained in tea allowed to be entered for home consumption, and tea not reaching that standard is rejected as not fit for human consumption.

Teas lately rejected at Melbourne by the Victorian Government Analyst as unfit for human

consumption, and landed at Sydney, have been referred to and examined by the Government Analyst here, and I have Mr. Hamlet's report thereon, from which I quote the following:—

"Herewith I submit the result of my analysis of six samples of tea, and in reply to your inquiry

I may state that the teas contain nothing positively injurious to health.

They are, however, all of very low quality, and were there an operative Adulteration Act for this Colony they would all be condemned, inasmuch as they fall below the recognised standard for genuine teas."

The Principal of the Somerset House Laboratory and Vice President of the Institute of Chemistry, James Bell, Ph.D., &c., in his book on the Chemistry of Foods, published for the Committee of Council on Education, says: "The amount of soluble ash in genuine tea ranges from 2.8 to 4.2 per cent."

The teas examined by Mr. Hamlet, to which I have referred, contained from 3.57 to 4.1 of soluble ash. I have subjected samples of the Melbourne rejected tea to domestic test by infusion without discovering anything pernicious or injurious therein, or in fact more than an absence of the delicate aroma and flavour of higher priced teas, and the presence of more woody matter than is usually found in better class tea.

JAMES POWELL,

Collector of Customs.

JAMES J HINCHY. Accountant. 1892-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BROKEN HILL STRIKE.

(CORRESPONDENCE, &c., RECEIVED BY THE GOVERNMENT ON THE.)

Ordered by the Legislative Assembly to be printed, 18 January, 1893.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 5th October, 1892, That there be laid upon the Table of this House,-

> "A copy of all Correspondence, papers, &c., received by the Government "on the Broken Hill Strike."

> > (Mr. Cann.)

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 2 July, 1892. Every probability a big strike will take place here early next week, probably Monday, owing to friction between Mine-owners' Association and the Amalgamated Miners' Association, in reference to introduction of contract system and withdrawal of agreement made between them last strike. Very strong feeling on part of miners to come out on strike at once. Strongly suggest preparations be made send sufficient police here in case of actual necessity. If strike eventuates, I apprehend some trouble this time. Will wire latest developments early Monday.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 2 July, 1892.

[CONFIDENTIAL] Telegram received from Broken Hill mining managers states that strike on Monday almost certain, and that very hostile threats are being made by the miners. The managers urge that Government protection should be at once secured, and on behalf of mining companies I am instructed to ask the Government to arrange for prompt additional police protection of the properties.

Telegram from Mr. William Knox to The Inspector-General of Police.

Melbourne, 2 July, 1892.

[Confidential.] Telegram received from Broken Hill mining managers states that strike on Monday almost certain, and that very hostile threats are being made by the miners. The managers urge that Government protection should be at once secured, and on behalf of mining companies I am instructed to ask the Government to arrange for prompt additional police protection of the properties.

Telegram

870 copies-Approximate Cost of Printing (labour and material), £19 5s. 6d.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 3 July, 1892.

Mass meeting of miners held this afternoon. They have unanimously decided to call all the men out forthwith and picket the mines to-night. Mining managers apprehend trouble. They purpose appointing some of their trustworthy men as watchmen at mines, and have applied for police protection to guard mine-owners' property, and protect their watchmen. Strong feeling exists against mine directors, as the men consider their late action, re introduction of contract system, is really an attempt to break up the union, and with this feeling trouble may reasonably be expected. I consider extra police will be actually required this time for reasons stated. You can rely on my using the utmost discretion in matters generally during the strike. I have thirteen police here, and can call in seven from district.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 3 July, 1892.

THE Mining Company are much gratified by your assurances, and we reciprocate your hope that the miners will be as law-abiding as formerly. We expect important advices later, and will keep you fully

Telegram from The Police Magistrate, Broken Hill, to The Principal Under Secretary.

Broken Hill, 3 July, 1892.

Fully three thousand miners went on strike after mass meeting this afternoon. Good order prevails up to this moment. Strikers will post pickets round mines at midnight.

Telegram from The Managers of the Principal Mines, Broken Hill, to His Excellency the Governor.

Broken Hill, 3 July, 1892. Six thousand men employed in the principal mines have gone out on strike, and have surrounded the mining properties. They have cut off our personal supplies, and threaten destruction of the property and our lives; and we, the managers of the principal mines, firmly believing that our lives and the property are in imminent danger, respectfully beg to apply to you, as Commander-in-Chief of the Military Forces, to immediately send—Monday, if at all possible—such military force as will protect the property and our lives as we find it immorphise to obtain adaptate police protection. Please people. Ungert and our lives, as we find it impossible to obtain adequate police protection. Please reply. Urgent.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 3 July, 1892.

SINCE acknowledging your previous wire have received messages from Broken Hill announcing that mass meeting to-day decided upon general strike, and all hands are to be called out immediately. The mining managers again urgently request by telegrams that arrangements be made for largely-increased police protection, as speeches at meeting and amongst the men are of an inflammatory character.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 3 July, 1892.

Re strike the General Managers of Proprietary, British, Block 14, Block 10, and Central Mines, have sent me written application for police protection, stating they strongly believe the mine-owners' property and the lives of their officers are in danger. All the miners along the line have come out on strike, and the smelters and others discontinue work 8 a.m. to-morrow morning. I apprehend no danger for few days, but fear there may be later on. Good order prevails at present.

Telegram from Mr. Richard Sleath to The Attorney-General.

Broken Hill, 4 July, 1892.

Men all out this morning. Quiet but determined. We are still willing to submit to arbitration. Report here special constables being sent up. Will cause trouble if they come. See Mines Department stop suspension of leases. Stop constables being sent. We can be depended on to keep good order. Mines slowly but surely collapsing. Must win with a fair go. Kingston, Member, Adelaide, here yesterday; on our side. Offers to go anywhere to help do everything possible. Writing fully. Thanks for services offered. Let us know if anything fresh turns up.

Telegram from The Police Magistrate, Broken Hill, to The Principal Under Secretary.

Broken Hill, 4 July, 1892.

MINES have each a few men camped near the shafts. Numerous pickets all around of strikers to intercept supplies of provisions and cut off all communication between mines and town. This will lead to great trouble.

Telegram from Mr. William Knox to The Attorney-General.

THE Mining Companies have just concluded a long meeting when your telegram was considered, and I am desired to thank you for your offer, which will be availed of when a favourable opportunity offers. The Mining Companies will not accept arbitration, and have had no overtures for consultation. That the men went out on strike is much to be regretted. Many thanks for extracts from conciliation accounts, which we had already considered.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 4 July, 1892. The following telegram just received from General Manager, Proprietary Company:—General strike. Mines, furnaces, and all other works shut down. Property closely picketed by A.M.A. men. Supplies for private residence cut off. The representatives of mining companies have just concluded long sitting. Advices from mines confirm urgent necessity for prompt increase of police protection, and the mining companies urgently request the Government to make arrangements with all haste, as communication with the mines is now forcibly cut off by pickets, and the properties are being endangered. The mining companies favour request of mining managers for services of Government force.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Since telegraphing to you this evening have received advice that it has been arranged furnace hands will continue until to-morrow morning, in view of important telegrams which are coming down for consideration of the Mining Company. Meeting will be held to-morrow, after which I will wire you again.

Telegram from Mr. F. Whysall to The Postmaster-General.

EVERYTHING orderly so far. No trouble anticipated, unless men are brought into the district to fill strikers' places. I will advise from time to time till it is over.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 4 July, 1892. Mine managers have written me to remove the union pickets from off the open leases fronting the mines, the leases being under the control of the mining managers. They say the pickets are trespassers. In my opinion this course would be unwise, as if the pickets obeyed the command it would bring them back to the boundaries of the town amongst the masses, while at present they are a quarter of a mile from town boundary, and we could deal with them better there if rupture really took place. Slight ruptures took place this afternoon by the pickets, preventing persons taking supplies to the mines, but nothing of importance occurred. Good order prevails at present.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 4 July, 1892.

Re strike.—Southcombe, manager for Drew and Co., import merchants, sent lorry this afternoon with provisions for officers at Central Mine. The union pickets obstructed his workmen and they were forced to return this evening 8 p.m. Southcombe, driving lorry, attempted to deliver the provisions. He was pulled off lorry and assaulted, not badly. The provisions value £25 were totally destroyed by the mob, about 300 strong. Police came to his rescue and escorted him home with horses and empty lorry. Labour Defence Committee assured me this afternoon no violence would be practised by the union pickets, and came to protest against police escorting persons through the picket lines, fearing that course might incite their pickets to break the law.

Telegram from Mr. William Knox to The Inspector-General of Police.

Melbourne, 4 July, 1892. Further wires from mining managers indicate there will be violence if protection not increased, private residences of managers surrounded and communication stopped.

Telegram from The Police Magistrate, Broken Hill, to The Principal Under Secretary.

This evening about 8 oclock Mr. Southcombe, manager and partner S. Drew and Co., merchants, was taking goods to Central Mine. A large crowd rushed the lorry, struck Mr. Southcombe, took all the goods, destroying most, pocketing some, in all £30 worth; two mounted police then came up and escorted the empty lorry back to the store. The Mayor informs me he has a telegram from the Secretary of the Mincowners Association, stating they will not alter their determination, and decline a conference. A much stronger force than we possess is needed.

Telegram from Mr. F. Whysall to The Postmaster-General.

Broken Hill, 5 July, 1892.

THE men are determined not to allow supplies to go to mines where mine managers and other officers are quartered. Cab taking supplies this morning turned back, and contents cleared. Mass meeting just about to be held, result of which follows.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 5 July, 1892.

Re strike, union pickets are stopping supplies of provisions, &c., being sent for sustenance of the mine officers. The licensee "Freemasons' Hotel," Mr. Alexander, informs me that Richard Sleath, the secretary to the Miners' Association, told him plainly this morning that they are determined to starve the mine officers out. Mr. Alexander, in taking two cases whiskey back to his hotel, was mobbed; the cases of whiskey were taken out of cab and smashed up. The whiskey was for Colonel Morgan, with whom the miners are on good terms. Very strong feeling exists against Mr. Howell, Proprietory Manager and Mr. Lane Black Fourteen Manager. Manager, and Mr. Lane, Block Fourteen Manager.

Telegram from Mr. F. Whysall to The Postmaster-General.

Broken Hill, 5 July, 1892.

It appears that Mr. Alexander, licensee "Freemasons' Hotel," who was in charge of the cab mentioned in my last memo., asked Mr. Sleath, Secretary A.M.A., for a pass to cross the picket lines, but this was refused. Nothing particular resulted from mid-day meeting. A few of the district police have come refused. Nothing particular resulted from mid-day meeting.

Telegram from The Police Magistrate, Broken Hill, to The Principal Under Secretary.

Broken Hill, 5 July, 1892.

This morning Mr. Alexander, of the Freemasons' Hotel, took a case of spirits in a cab towards one of the mines; he was met by the pickets and asked if he had a pass, meaning passes the A.M.A. issue, permitting persons to pass the pickets; he said "No," and was directed to go and get one. Mr. Alexander returned to town, and says he saw R. Sleath, who distinctly told him he could issue no such pass, as they meant to starve out the mines' officers. Mr. A. thereupon returned to his hotel with the cab; on its arrival there a large crowd seized the cab, and demolished the goods. This information I got from Alexander personally, in presence of another magistrate, and he will make declaration in writing presently, also lay information against one man, describing him. The Bench meet at half-past two; will wire fuller later on.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 5 July, 1892.

FURTHER full meeting of mining companies held to-day, and telegrams read from mining managers, saying that communication with the mines is now entirely cut off, and rioting has commenced. Numbers of the companies' officers are being detained on the mine for protection of the property, and food supplies are prevented from being delivered to men who cannot now get the necessaries of life. Situation becoming very critical, and responsibility must rest with Government for damage to life and property. Application has been made to Amalgamated Miners' Association, but they will not even agree to grant passes to men with food supplies. This iniquitous obstruction is being now used to prevent the passage of letters and telegrams to the companies' managers. By order of the Mining Companies' Execution. of letters and telegrams to the companies' managers. By order of the Mining Companies' Executive.

Telegram from the Mayor, Police Magistrate, and other Justices at Broken Hill, to The Principal Under Secretary.

Broken Hill, 5 July, 1892.

Referring to previous telegrams of Police Magistrate, we are of opinion that at any moment a general riot may take place, as bulk of population are inflamed against mines. It will be hard to obtain any special constables at all, as those eligible fear retaliation hereafter, and the few suitable even if compelled to serve would be of little use. We are of opinion that a strong force of police, or, better still, military, is urgently required to prevent a general riot, involving loss of life and destruction of property. Please

Melbourne, 5 July, 1892.

THE following telegram has just been received from the general manager of the Broken Hill Proprietary Co. "Do not think possible to get any more supplies to our men on mine. It not, will be out in twentyfour hours. The foreman on duty last night block eleven rushed by picketers, and will not return. Orders have been given to stop all supplies to mine and manager's houses. consider property in serious danger." Without more protection

Telegram from Mr. William Knox to The Inspector-General of Police.

THE following telegram has just been received from the General Manager of the Broken Hill Proprietary Co.:—"Do not think possible to get any more supplies to our men on mine; if not, will be out in twenty-four hours. The foreman on duty last night, Block 11, rushed by picketers and will not return. Orders have been given to stop all supplies to mine and managers' houses. Without more protection, consider property in serious danger."

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 5 July, 1892.
RE Strike.—Owing to supplies for sustenance of mine watchmen and officers having been obstructed and destroyed on two previous occasions, I this afternoon with Sergeant Campbell and Senior-constable Nolan, escorted the provisions up on train. After delivering same, a mob of about one thousand made a rush up on to Block 14 mine, and for a time things looked rather serious. The Labour Defence Committee used their influence and got the mob back, and everything passed off all right. Serious rumours are about of rushing the mines.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 6 July, 1892. The Police Magistrate wishes me to inform you that the Court-house is at the disposal of the Sydney police, also all blankets in his possession, and I think it best they should all sleep there at first until we see how matters are likely to go. A stupid report was current last night that I went into a mob of over a thousand flourishing a loaded revolver. This of course was not a fact. I am obeying your instructions, and shall continue to do so to the best of my ability.

Telegram from The Police Magistrate, Broken Hill, to The Acting Colonial Secretary.

Broken Hill, 6th July, 1892. Drove out along line this morning, saw several pickets, informed them complaints had been numerous, that persons had been stopped going on their lawful business, that such conduct was unlawful, and punishable. I deemed it my duty to tell them so; was respectfully received, but some wanted to argue they must stop shift bosses; others that in such a case what was the use of pickets at all, &c. I declined discussion with any. Sub-inspector Saunders was with me. Persons in the streets generally orderly, but Captain Warren, Block 10 Mine, was mobbed this morning, and E. O'Brien, shift boss, left Proprietary Mine to see his wife and family, living in town, was chased by some 300 people; is now in hiding, and intends to leave the district soon.

Telegram from Mr. William Knox to The Inspector-General of Police.

THE mob are obstructing receipt and despatch of telegrams to managers, and are cutting off that communication. Kindly wire Saunders to give special protection to carriers. Have seen Inspector Larkin, and arranged for men getting sleeping accommodation here and South Australia. Urge Government to get fifty mounted troopers extra from South Australia.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

The mining companies just concluded meeting. Desire me acknowledge your telegram yesterday's date, and say they are facilitating the speedy transport of the men to the field. They desire me to say, further, that they fear the force now sent will be found inadequate, and in order to get additional protection on the spot rapidly the mining companies respectfully suggest that arrangements be immediately made with the South Australian Government to send at least an additional force of 50 mounted troopers to-night. We have telegraphed to the South Australian Premier, intimating that we are making this application to you. The following telegrams were read at the meeting:—Matters are going from bad to worse. Caretakers at Proprietary Mine have been forcibly taken away by the crowd, and the entire property is now at their mercy. Ingress and egress to the mines is blocked, and parties are being openly melested in the streets and on the mines. The whole of the properties now practically in hands of the mob, and efforts have been made to stop the receipt and delivery of telegrams. The mining companies again urge the responsibility of the Government in the very serious condition of affairs which has arisen at Broken Hill, and is a most disgraceful outrage, and respectfully apply for services of Permanent Force.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Several cases of obstruction on the part of Union pickets preventing mine officers and others going to the mines have occurred during the day, and one slight case of assault occurred through same, but on the whole good order prevails. Much quieter than yesterday. About five thousand Union pickets enrolled. Their passes being doubly strengthened to-night.

Telegram from the Police Magistrate, Broken Hill, to The Principal Under Secretary.

Broken Hill, 7 July, 1892.

Nothing of importance to report since my last telegram, complaints daily of persons trying to return to mines being stopped by pickets have obtained written declarations from some of the fact, but here exists a strong aversion to doing even this, parties fearing retaliation hereafter.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Deniliquin, 7 July, 1892.

Broken Hill wire last night, several cases of obstruction on part of Union pickets preventing mine officers and others going to mines occurred yesterday, one slight case of assault, but on the whole good order prevailed, much quieter than yesterday.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 7 July, 1892.

Your telegram of yesterday's date has been read by the mining companies at a full meeting to-day, and I am directed to reply that they note with satisfaction the Government accept full responsibility day, and I am directed to reply that they note with satisfaction the Government accept full responsibility for the protection of life and property in the existing emergency at Broken Hill, they desire me to assure you that by their suggestion yesterday they had no intention of interfering with the administrative functions of the Government. They however, again respectfully point out that the companies officers are besieged in their dwellings and are being maltreated, they are unable to obtain the necessaries of life and the whole property is now entirely at the mercy of the pickets placed on the ground by the Miners' Union. The companies respectfully request the removal of the pickets and existing disgraceful outrages without delay.

Telegram from Inspector Larkins to The Inspector-General of Police.

Broken Hill, 8 July, 1892.

Arrived at 1 a.m. All well; no fresh developments re strike since Mr. Saunders' wire yesterday.

Telegram from Inspector Larkins to The Inspector-General of Police.

Broken Hill, 8 July, 1892.

Your telegram to Mr. Saunders to hand this morning. I stationed men in close proximity to the various mines and feel confident that I will be able to cope with any emergency that may arise. The public mind here was greatly relieved on arrival of the Sydney Police. I understand that it is quite true that men going to and from the mines were occasionally interfered with, but never detained as prisoners as described in telegram. Mr. Grainger expected to-morrow morning.

Telegram from Mr. Alfred E. Clarke to The Acting Colonial Secretary.

Melbourne, 8 July, 1892.

WE have the honor to report that the strikers at Broken Hill have surrounded our property. The pickets forcibly prevent egress and ingress of our officers and men. Contracts for erecting boilers and laying pipes to connect with the Stephen's Creek waterworks are in course of construction. The men engaged on these works are refused access to the mine. Under the circumstances, we request the Government to assist us in the exercise of our lawful rights.

Telegram from Sub-Inspector Saunders to The Inspector-General of Police.

Broken Hill, 8 July, 1892.

Re strike, in reply to your telegram re South Mine, Mr. M'Kay the manager now reports that Tuesday last the men employed by Stephen's Creek Company were stopped from landing in water to South Mine; also, that some of his officers were prevented from coming to mine. also, that some of his officers were prevented from coming to mine. This was not reported at the time; no complaints are coming in during the day. I find that although some of the persons assaulted and obstructed at various places know their assailants, they decline to prosecute by summons or to take any action.

Telegram from Mr. H. L. Roberts to The Attorney-General

Broken Hill, 9 July, 1892.

LANE'S reports exaggerated beyond description; public disgusted. Everything is quiet, as if no strike. Men firm to their principles.

Telegram from Inspector Larkins to The Inspector-General of Police.

Broken Hill, 9 July, 1892.

No fresh developments re strike since last telegram. Pickets are surrounding the whole of the mines in large numbers, but there has been no interference with person or property since our arrival. The Sydney and Broken Hill Police are doing day and night duty on the picket-lines, which I think completely did away with what they call the pass system. Mr. Grainger has not arrived. Mr. Johnson came by this morning's express.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 10 July, 1892. I ARRIVED this morning; found place quiet and orderly. Mr. Larkins had made very efficient disposition of Police. Patrols are constantly kept up by Police on line where miners are picketed. No interference now with persons passing to or from mines. In my opinion, Police here now are sufficient for present requirements.

Telegram from Superintendent Grainger to The Inspector-General of Police. Broken Hill, 11 July, 1892. Town orderly, no complaints made to police, no fresh developments since yesterday.

Telegram from Mr. William Knox to The Acting Colonial Secretary.

Melbourne, 11 July, 1892. THE Mining Companies have to-day adopted a statement which will be handed to the newspapers for publication to-morrow, setting out the circumstances that have led to the present situation at Broken Hill and the course they considered necessary for the future satisfactory working of the mines, and I am instructed to telegraph you the decision which is announced therein, which, after detailing the reasons, reads as follows:—The associated mines have, after deliberate and careful consideration, unanimously come to the conclusion that upon resumption of work the management cannot continue to be subject to Union rules, and that freedom of contract must for the future be recognised.

Telegram from Superintendent Grainger to The Inspector-General of Police. Broken Hill, 12 July, 1892. MATTERS here remain same state as yesterday, people orderly, report by mail.

Superintendent Grainger to The Inspector-General of Police.

Police Department, Superintendent's Office, Broken Hill, 12 July, 1892. Sir, I have the honor to report, for your information, that I arrived here on the morning of the 10th instant. I found the town quiet and orderly, and since my arrival I have not received any complaints regarding interference by the men on strike with persons going to and from the mines, and all business, except mining, is carried on as formerly, without any interference. The miners are still picketed round the mines, but they in no way interfere with free ingress to or egress from the mines, and mine officials are neither molested nor interfered with in their movements.

The police sent from Sydney are employed constantly in patrolling the line of pickets to see that

The police sent from Sydney are employed constantly in patrolling the line of pickets to see that all persons are allowed full liberty in carrying on their lawful occupations, and I am pleased to say that since my arrival there has been no complaint, and no need for police interference.

The total strength of the police here now under my command is two officers and severty men, and I am of opinion this force is quite sufficient at present. The majority of the miners are quiet men, but there is here, as in all large communities, a rowdy element that would be likely to commit excesses if not restrained by the presence of a strong police force.

I think matters will remain at their present state until such time as the Directors commence to work the mines. A considerable number of the men are leaving here daily, purposing to remain away until matters in dispute are settled, when they will probably return. I think if the system of freedom of contract is introduced, without the Directors first coming to an agreement with the men, there will be serious trouble; but should the Directors agree to a conference, I think the miners will give way and agree to freedom of contract, provided "free labour" is not introduced.

The men fear that the Directors are striving to break up their Union, and want to introduce "non-Union labour," and this I am sure the miners will oppose strenuously; but they say they are willing to

Union labour," and this I am sure the miners will oppose strenuously; but they say they are willing to leave all matters in dispute to arbitration, as provided for in the agreement made at the time of the last This means practically a settlement of the dispute by a Judge of a Supreme Court, and the men assert they are willing to abide by that decision, whatever it might be.

I have, &c. E. GRAINGER, Superintendent.

Telegram from Superintendent Grainger to The Inspector-General of Police. Broken Hill, 13 July, 1892. No change in affairs here; town quiet.

Police Report.

Broken Hill, 21 July, 1892.

DETECTIVE GOULDER reports, for the information of the Inspector-General of Police, that the conduct of

There is not a more impudent swindler in the Assembly than Mr. Copeland—in fact, he lives on mining swindles; and that is all he is in the House for, to work them; and I have it on pretty good authority he is but an agent in the Cabinet for the different companies up here."

Later on in the speech he said: "Any man in the future who attempts to get through the pickets on to the mines. I will have his name published and we will boycott him; we will go to the butcher the

on to the mines, I will have his name published and we will boycott him; we will go to the butcher, the baker, and the grocer, and tell them what the consequences will be if they supply these men; if they do

we can deal with them after.

This afternoon he read to the meeting the names of a number of men who went on the mines last night, and said "he would have their houses shadowed and their food supplies stopped."

This Mr. Sleath is the President of the Socialist League here, and Mr. Ferguson, the President of the Labour Defence Committee, and several other prominent leaders are members of the same body. Several of these men, notably Mr. Sleath, appear desirous by their actions to prolong the length of this strike, and but for the active presence of Mr. Sleath, the detective earnestly believes the pickets would have been withdrawn and a better feeling established between the Directors and men.

GEO. E. GOULDER,

Detective.

Police Report.

Police Department, Superintendent's Office, Broken Hill, 21 July, 1892.

Matters here at a standstill as regards any prospect of a settlement of the dispute.

The miners are quiet and orderly, but during the last two days they are more active on the line of pickets, and a few complaints have been received from men engaged as watchmen on the mines, that they were prevented from going on to the Mines, but when the complaints were inquired into I found there was very little in them, no one assaulted, or any threats of violence used. The watchmen seem afraid when spoken to by the pickets. I think matters will remain in this quiet state for some time longer until some attempt to work is made, and if work is commenced without coming to an agreement with the "Miners' Union," we will have serious trouble, especially if outside labour is brought here.

I understand it is intended after the end of this month to offer to the men work by contract. It is not proposed to call publicly for touckers but that parties of monard the

not proposed to call publicly for tenders, but that parties of men and the managers come to a mutual understanding as to price to be paid for certain amount of work. I do not think the men will at the present time fall in with this arrangement—they may eventually; but now they think they have been treated badly in being refused a conference, or in having the dispute settled by arbitration, and are therefore determined not to submit to the Director's terms, and if they still persist in refusing to go back to work on the terms offered by the Directors, it will depend on the latter as to the course to be adopted. Of course the Directors may decide to let the mines remain idle until the men are starved into submission; and if so, they may succeed in getting the men to resume work, but this will be only a temporary patching up of the dispute, as in a very short time the men will strike again. If men are brought here to take the places of the men on strike, there will, I fear, be serious trouble indeed, and the few police now here would be totally unable to protect the men at work from molestation by the strikers.

Unless the strikers receive very considerable pecuniary assistance from outside, in my opinion, they cannot hold out very long; still, unless a settlement is come to between the parties, there will be strikes here frequently, as I believe the men here will never be content to work otherwise than as unionists, and they are now on strike, much more on account of what they believe to be an attempt to break up their union than any great dislike they have to the "contract system" in the manner to be introduced here.

E. GRAINGER, Superintendent of Police.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 22 July, 1892.

MATTERS here are in general quiet, but the pickets are more active in trying to prevent persons going on to mines, and a gang of these tried last night to prevent Mr. M'Kay, of Broken Hill South Mine, from returning from town to the mine, and struck Mr. M'Kay with a stone. It was too dark to identify. Police will try to put a stop to such unlawful acts.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 23 July, 1892.

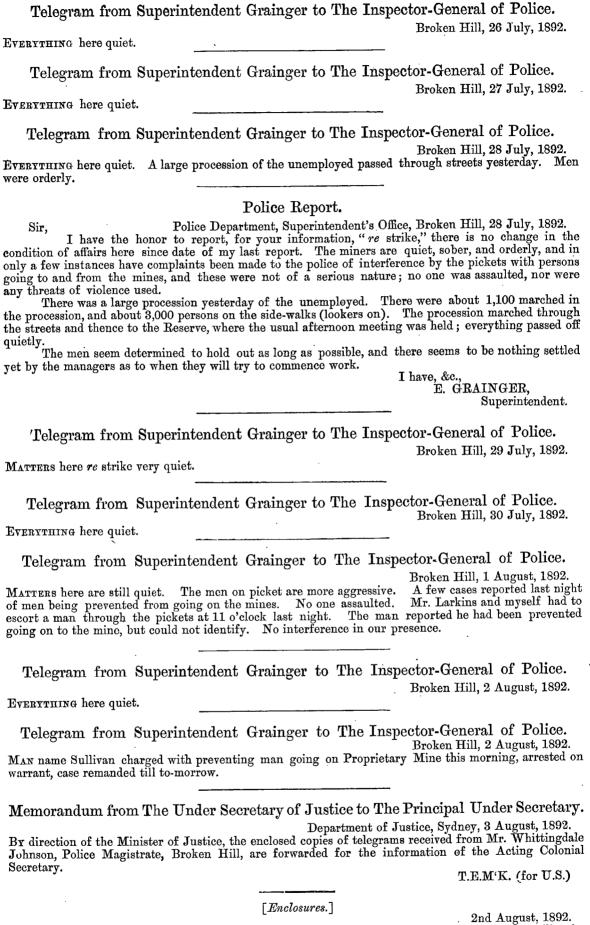

STRIKE matters quiet. No further trouble with pickets. A man, a foreigner, arrested last night for shooting at a woman with intent-nothing to do with labour trouble.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 25 July, 1892.

MATTERS in connection with strike quiet; no disorder reported. About 100 lb. dynamite stolen from Consuls Mine sometime during last ten days; probably taken by men for purpose of blowing up stumps for firewood; a number of men are doing so, as firewood scarce. A quantity of timber stolen from same mine; thief arrested, and timber recovered.

283-B

SITUATION as yet unchanged, but fear that when attempt is made to work mines a collision will take place between Union pickets and those willing to contract. Have hitherto had no personal communication with either mining managers or strike leaders, but as these pickets are placed round the mines by Defence Committee, and intended to prevent the access of labour of any kind not sanctioned by them, it appears to me that should a serious riot occur they are personally responsible, and are liable to be indicted for aiding

aiding and abetting, or for conspiracy to procure the commission of an unlawful act. If I were authorised to convey this to the Committee it might have the effect of causing the pickets to be withdrawn, or at least modify their action. But I am unwilling to utter a warning officially that would not be followed by active measures, for I may be wrong in my law, or the Minister may consider such a step inadvisable. Picketing, although not a statutory offence, is, as carried out here, a standing menace to the preservation of law and order, a gross infringement on the liberty of the subject, and an obstruction to persons using the Queen's highway for either business or pleasure. A large number of the miners are willing to return to work, but are terrorised by the strike leaders, and the disorderly element that exists in this as in all large mining centres. I shall be obliged by a reply as soon as convenient as to the matter of warning the Committee, who, although they professedly preach the maintenance of law, by covered innuendoes convey a totally different impression to the men. It will be some days before it can be ascertained whether the force here is sufficient for the purpose, and not until some overtact is committed by the strikers. I am hopeful, however, that with the knowledge that any violence will be promptly suppressed, the bulk of the miners will accept the situation, and return to their work on the terms offered.

WHITTINGDALE JOHNSON, P.M.

About 500 men around the mines, and squads of men from five to ten are stationed on each side of all the avenues to the mines to watch all persons passing to and fro, and prevent free labour from approaching them. Since arrival of police, no actual violence has been attempted or threats used for fear of consequences. The pickets stand across the road and bar the passage by pushing them back, if individuals obnoxious to them approach and attempt to pass, they are questioned as to their business, and are sometimes asked for a pass from Defence Committee. A man has been arrested for that offence to-day which is certainly an assault in law, especially as the intent is so clearly avowed, it is more with the view of what may happen that I connect the complicity of the leaders, and advise their being warned of the possible consequences.

WHITTINGDALE JOHNSON, P.M.

ONE of the pickets just arrested for stopping a person on his way to the Proprietary Mine—defended by Defence Committee.

WHITTINGDALE JOHNSON, P.M.

Telegram from Superintendent Grainger to The Inspector General of Police.

Broken Hill, 24 August, 1892.

Re Strike: At mass meeting on the reserve yesterday man named Lauri addressed meeting, recommending taking a ballot. He was interrupted and could not get a hearing, and was hustled and assaulted, but not seriously; with this exception matters are quiet.

Memorandum from The Under Secretary of Justice to The Principal Under Secretary.

Department of Justice, Sydney, 24 August, 1892.
The enclosed copy of a telegram received to-day from Mr. Whittingdale Johnson, Police Magistrate, Broken Hill, ts forwarded for the information of the Acting Colonial Secretary.

A.C.F.

[Enclosure.]

Broken Hill, 24 August, 1892.

Contracts have been taken on the Proprietary Mine and an attempt will be made to-morrow to commence operations. Defence Committee have ordered pickets to be doubled, and I understand that women will be sent to join them. The whole strength of the police force here will be in readiness to force a passage to the mine, through the picket line, if any forcible obstruction is offered to those prepared to go to work. I will be on the spot to act magisterially, if the necessity should arise for reading the Riot Act.

WHITTINGDALE JOHNSON,

Police Magistrate, S.M.

Mr. W. Weston to The Inspector-General of Police.

Dear Mr. Fosbery,—

Just received the following telegram from Knox:—"Acquaint Inspector-General of Police that

J. Howell, General Manager at Broken Hill, telegraphs as follows:

'Several parties have promised to return to work to-morrow, and hundreds of others are willing to, but are afraid; we will make best attempt we can, but we are certain we shall be opposed by large force of men on strike.'"

Yours truly,

W. WESTON.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 25 August, 1892.

AT 7:30 this morning a crowd of about 1,500 assembled outside Proprietary offices, many of them men, and most of the women armed with sticks and axe handles. Saw a number of men endeavour to go on the mine, when they were brutally assaulted. Saw two men with their faces cut, a third his teeth knocked down his throat; a fourth chased by the mob, who knocked him to the ground, kicked and jumped on him, and left him senseless. Informed Mr. Grainger and Johnson what was taking place, who immediately turned out all Police, and are now by the mine. Sleath and Fergusson are addressing the crowd and abusing the authorities, and there is a lull; men who were going to work are demoralised and ran away; a number succeeded in getting on the mine.

Telegram from Mr. F. Whysall to The Superintendent of Telegraphs.

Broken Hill, 25 August, 1892.

Close on 2,000 men and women assembled in front of Proprietary Office shortly after 7 this morning. Some shift bosses and officers in attempting to go on the lease were hustled and knocked about, principally by the women. Smoke is now issuing from the British stack, but I don't think a hundred men have gone to work yet. Will wire later.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 25 August, 1892.

RE Strike.—About half-past 7 this morning men commenced to go to the Proprietary Mine; had a number of Police there, but they were unable to control the crowd, numbering about 1,500; several men assaulted; turned out all the mounted men, and 50 armed foot constables with fixed bayonets, and marched on the ground; considerable excitement on our arrival; Mr. Johnson accompanied Police; crowd then fairly orderly; caused no obstruction to Police; leaders had great control of crowd; Police kept way open for free passage to mine; excitement abating; about thirty men at work on mine; I consider present force of Police sufficient; Mr. Johnson of same opinion.

Telegram from Mr. F. Whysall to The Superintendent of Telegraphs.

Broken Hill, 25 August, 1892.

Saw Mr. Superintendent Grainger short time ago; he expressed himself highly satisfied with men's behaviour; he and Mr. Whittingdale Johnson are of opinion that present Police force is ample.

Telegram from Mr. William Knox to The Inspector-General of Police.

Melbourne, 25 August, 1892.

At the Proprietary sixty men have returned to work; British, about thirty; and Block 14, twenty; and we are arranging to provision all the men on the mines. Manager expects further men to apply tomorrow. At present everything seems quiet.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 25 August, 1892.

Excitement greatly abated; crowd has left front of mine, but pickets still on; have removed armed police to barracks; matters calmed down very much.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 25 August, 1892.

The men's leaders did not incite to break the law, but exerted themselves to preserve order. Police can arrest offenders when necessary if identifiable, and effort will be made to discover those who committed assaults; but I think men assaulted will not prosecute. Matters are settling down, and so far present police sufficient. Horses cannot be procured here.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 25 August, 1892.

Re strike: Matters here quiet.

Telegram from Superintendent Grainger to The Inspector-General of Police.

MATTERS here quiet; probably some excitement to-morrow, but I do not anticipate any serious trouble.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Re strike.—No fresh developments; matters quiet.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 26 August, 1892.

Broken Hill, 26 August, 1892.

Re strike.—Matters quiet this morning; about usual number of pickets round mines, and crowd of about 200 at a distance looking on. No general move amongst men to resume work; only about 140 men, including shift bosses, at work on Proprietary Mine.

Memorandum from The Under Secretary of Justice to The Principal Under Secretary.

[Urgent.] Department of Justice, Sydney, 26 August, 1892.

Memo.—The enclosed copy of a telegram which has been received from Mr. Whittingdale Johnson, Police Magistrate, Broken Hill, is forwarded for the information of the Acting Colonial Secretary. A. C. FRASER,

Under Secretary (per M.McF.)

[Enclosure.]

Broken Hill, 26 August, 1892.

All quiet this morning; a few more men gone into the mine, but no general move as yet to resume work on the part of the miners. No application made for safe conduct to mines; a miner was assaulted last night at his house, but no identification of his assailants can be obtained. Only a small crowd collected last night at his house, but no identification of installation to the ordinary pickets near the mine this morning.

WHITTINGDALE JOHNSON,

Police Magistrate.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 26 August, 1892.

ABOUT 11 o'clock a crowd of about 200 chased a man from near the mines to the principal street in town, hooting and using insulting language. The man took refuge in a shop, and two of the crowd were arrested for assaulting him by Detectives Goulder and Brown. Case part heard, and remanded till 3 o'clock. With this exception, matters here quiet.

Telegram from Mr. William Knox to The Inspector-General of Police.

Melbourne, 26 August, 1892.

THE only wire which we have from the General Manager to-day is as follows:-No more men came on this morning, consequently no demonstration. Men who came yesterday are working. Severe assault made last night on one of our men. Nothing else has transpired, and position is unchanged.

Telegram from Superintendent Grainger to The Inspector-General of Police.

THE two men arrested this morning were sentenced to 3 months gaol each, with hard labour.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 27 August, 1892.

RE strike.—No appearance of settlement. Men still decline to resume work on terms offered. Everything quiet.

Telegram from Mr. William Knox to The Inspector-General of Police.

MANAGER advises no material change. Will have wires open to-morrow, and will communicate if any change.

Telegram from Mr. Whittingdale Johnson, S.M., Police Magistrate, Broken Hill, to The Under Secretary of Justice.

Broken Hill, 27 August, 1892. Broken Hill, 27 August, 1892.

All quiet this morning; very few people about the mines. No additional men have gone to work. An old man suspected of going to work yesterday morning was chased by a mob of two or three hundred persons, stones and missiles thrown at him, and an endeavour made to drag him out of a shop where he had fled for shelter in a state of abject terror. Two detectives who were fortunately on the spot saved the man from being probably kicked to death, and arrested two of the most prominent offenders, who were sent by me to gaol without the option of a fine. This salutary lesson will, I trust, not be without effect in suppressing such outrages. Re the matter of alleged assault by King, a bank manager, Sleath's statement that a summons has been refused is absolutely untrue. The fact is that the prosecutor has accepted a money compensation and will not come forward. It is expected that other arrests will be made in a day or two for a violent assault on a workman on Thursday morning, before the arrival made in a day or two for a violent assault on a workman on Thursday morning, before the arrival of police on the ground.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 28 August, 1892.

Re strike.—Everything quiet. Mines still have usual number of pickets round them.

Police Report.

Police Department, Superintendent's Office, South-western District, Broken Hill, 28 August, 1892.

· Sir, Respecting the labour dispute at this place, I have the honor to make, for your information, the following report. On the 24th instant a great procession of the men on strike, numbering about 3,000, marched through the principal streets of the town to the Central Reserve, and there held a meeting. The streets were crowded on both sides with spectators, and the greatest enthusiasm prevailed. On the same evening a meeting of the underground workmen was held, when it was decided, with only one dissentient, to decline taking a ballot as to whether the men should resume work; and a resolution was

passed to remain on strike.

There were numerous rumours during the day as to what action the men would take, and great anxiety prevailed amongst the people generally. A number of constables were (as has been the case since the arrival of the Sydney Police) on duty at the mines all night, and on the morning of the 25th, at 6 am, I sent ten foot constables and two mounted constables, under the command of Sergeant Robertson, to take up a position in front of the Proprietary Mine, at which place it was understood any opposition on the part of the strikers would probably take place. I had also arranged with the mine manager for use of the telephone at his office for purpose of Police informing me if any disturbance occurred requiring the assistance of additional police. I had all the remainder of the force under my command in readiness at the Court-house. At between half-past 7 and 8 o'clock a.m. I sent Sub-Inspector Saunders to the mine, and he returned soon after and informed me there was a considerable crowd in Saunders to the mine, and he returned soon after and informed me there was a considerable crowd in front of the mine, which had tried to prevent some men from going on the mine, and had assaulted a few of them, but the police made way for those men, and they were got on the mine without any serious injuries. Just immediately after 8 o'clock I was informed by Detective Goulder that the party of police under Sergeant Robertson were unable to control the crowd, that the crowd had seriously assaulted one man (it seems the telephone did not act). I at once ordered the whole of the police out, and was on the march, when I was informed by Mr. Howell, the mine manager, that assaults were being committed. Mr. Johnson and myself rode in front of Sub-Inspector Saunders and ten mounted constables, followed minutes arrived at the scene of the disturbance, in front of the mine office, where a crowd of between 1,500 and 2,000 were gathered. (Amongst them there were a number of females.) There was considerable excitement on our approach, and we were received with cheers and velling. Several of the men's ninutes arrived at the scene of the disturbance, in 17011 of the mind of the scene of 1,500 and 2,000 were gathered. (Amongst them there were a number of females.) There was considerable and wave received with cheers and yelling. Several of the men's able excitement on our approach, and we were received with cheers and yelling. Several of the men's leaders exerted themselves to control the crowd, and to keep them back. The mounted men were drawn up in front of the mine office, and the foot police formed a lane about six paces wide (the ranks facing

outwards) for persons to pass through to the mine.

After the arrival of the armed police there were no assaults, and in a short time most of the crowd withdrew to some distance, where they were addressed by some of their leaders, and about 11 o'clock they all returned to town and held a meeting on the Reserve. Shortly afterwards all the armed foot police were marched to their quarters, and also a portion of the mounted police.

About 3 o'clock, p.m., there was a procession of about 300 women marched through the town. They were cheered lustily by a great crowd of men, and the streets were thronged. The women marched

to the Reserve and held a meeting. After this the excitement calmed down, and the town was quiet.

On the morning of the 26th I made similar arrangements to those of the previous day, but there were only about 200 persons assembled, and no necessity to call out the armed police; but at about 11 a.m. there was considerable excitement, when a man was chased from the line of pickets by about fifty

men. He went into Argent-street, followed by about 200 persons hooting and yelling and calling him a "blackleg." The man (William Glasson) took refuge in a shop. He was struck in the back with an old boot, a stone was thrown at him, and he was caught by the collar, but suffered no actual injury. He was terrified, and had to be escorted by the police to the police station. Detectives Goulder and Brown witnessed the affray, and two of the ringleaders were arrested by Detective Goulder and the police. The two offenders were subsequently convicted and sentenced to three months' hard labour in Silverton Gaol. Since this took place no assaults have been reported, and matters have resumed their normal state as before the 25th instant.

The usual number of pickets are still around the mines, but persons are not interfered with by them. The Proprietary Mine is where the greatest number of men are employed, and, these exclusive of shift bosses, there are only about thirty-five regular workmen employed. I do not think the men, in any considerable numbers, are likely to resume work at the present time under the conditions offered them. The almost total failure in getting the men to resume work at the mines must, I think, cause any person to believe that either the men consider they have a genuine grievance and are loyal to and completely under the control of their leaders, or a large number of them at least are afraid to resume work now, fearing the treatment they might receive from those still remaining on strike, not only now, but after the termination of the dispute, when they would be at their homes, and to a great degree liable to be assaulted there at night, when they could not identify their assailants. The homes of the miners are so scattered, and cover such a great extent of ground, that it would be impossible for three times the strength of the police here to effectually protect those men; and I am quite satisfied that, unless some means are adopted to terminate the dispute amicably, there will be for a considerable time serious disturbances here, and that it will be necessary to very considerably increase the number of police at this station.

I have, &c.,

E. GRAINGER,

The Inspector-General of Police, Sydney.

Superintendent of Police.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 29 August, 1892.

Re strike. Everything quiet, pickets still around mines, but do not interfere with persons going to or from.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 29 August, 1892.

Re strike. Matters here are still quiet.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 30 August, 1892.

EVERYTHING here quiet; a few more men have returned to work; notice of appeal given in case of the two pickets convicted of assault; men admitted to bail.

Telegram from Mr. Whittingdale Johnson, S.M., Police Magistrate, Broken Hill, to The Under Secretary of Justice.

Broken Hill, 30 August, 1892.

All quiet to-day; a few more men returned to work. Appeal lodged in picket assault case, and men liberated on bail in the usual manner, but their sentence has had the desired effect, and no obstruction is now offered to persons desiring access to mines. Virulent abuse of Minister and myself from Sleath and others at mass meetings of miners. This shows how purely hypocritical their advice to the men is to observe law and order when the authorities are thus abused for enforcing it.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 31 August, 1892.

EVERYTHING here quiet. A few more men returned to work this morning.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 1 September, 1892.

Re strike. Nothing fresh to report. Everything quiet.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 5 September, 1892.

Re strike. Nothing fresh to report. Everything quiet.

Telegram from Mr. William Knox to The Inspector-General of Police.

Broken Hill, 5 September, 1892. WE have recently had number of unsolicited applications for work here, and to-day engaged ten engineers under contract, who leave by steamer "Innamincka" for Adelaide to-morrow, thence by express on Thursday, arriving at Broken Hill on Friday morning. Several large firms of contractors are now inspecting work at Broken Hill, with view to entering into contracts involving employment of five or six hundred men on Proprietary Mine, we expect they will make a start during next week, but I will keep you fully advised.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 6 September, 1892. Re strike. Everything quiet. A few men daily resuming work at Proprietary Mine. Twenty men resumed work yesterday.

Telegram from Mr. William Knox to The Inspector-General of Police.

Melbourne, 7 September, 1892. THE General Manager wires that Sleath and Ferguson are using very seditious language, advising men to drill and arm and attack men now working on the mines. One of the company's men was badly beaten Workmen on strike becoming very aggressive again.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 7 September, 1892. The three men arrested for assault have been committed to Circuit Court. Another man arrested for assaulting a man, who had just come down into town from the mine. Great excitement prevails.

Police Report.

Broken Hill, 7 September, 1892. DETECTIVE GOULDER reports, for the information of the Inspector-General of Police, that at a meeting of strikers yesterday at Broken Hill, Messrs. Sleath, Ferguson, Bennett, and Polkinghorn made use of most inflammatory language, directly inciting their hearers to violently break the law.

The detective thought it of such importance that he reported in detail to Mr. Superintendent

Grainger the facts.

This morning two men, while proceeding to work, were violently assaulted by a number of men. Sub-inspector Saunders and the detectives afterwards arrested three of the offenders, and were committed for trial to the next Circuit Court.

The town is in a highly excited state, and the police-station is now surrounded by a mob of about 3,000, who are hooting and yelling in consequence of the arrest of a picket, who assaulted a mine officer while in the act of leaving work.

The Inspector-General of Police, Sydney.

GEO. E. GOULDER,

Detective.

Police Report.

Broken Hill, 7 September, 1892.

DETECTIVE GOULDER reports for the information of Mr. Superintendent Grainger that yesterday Detective

Brown and he attended a meeting of the strikers on the Central Reserve, Broken Hill.

The meeting was addressed by Messrs. Bennett, Polkinghorn, Ferguson, Sleath, and Herberle respectively; the four first speakers made use of much violent language in consequence of which he obtained a copy of the shorthand notes taken at the time the speeches were made, and after carefully reading them over the detectives are substantially weak for their accurage. reading them over the detectives can substantially veuch for their accuracy.

Copy of notes attached.

E. Grainger, Esq., Superintendent, Broken Hill.

GEO. E. GOULDER,

I send these papers for Mr. Fosbery's information. The excitement here is intense and any moment a serious riot may occur. - E. Grainger, Superintendent, 7/9/92. The Inspector-General of Police, Sydney.

[Enclosure.]

Copy of speeches made by Messrs. Bennett, Polkinghorn, Sleath, and Ferguson, made on the Central Reserve, Broken Hill, on Tuesday the 6th September, 1892.

By J. Bennett: I am satisfied some one will have to get three years or so before this trouble is It seems what the committee are doing is not meeting with the approval of those on strike. over. It seems what the committee are doing is not meeting with the approval of those on strike. There are a lot of men in the mines working who, we think, should not be there, and it seems to us we should devise the means of getting them out. Shouts of, "limb the ______; pull them out." They come out every night, and surely we can devise a means of keeping them out. As long as they stop there they weaken our position; we must employ every means in our power to stop them, and those who know them best are in the best position to keep them out. The directors do not seem the more inclined to meet us than they did ten weeks ago, and the only course is for us to meet them.

*Polkinghorm** Assistant Sagnatanus** It is normalikely that some of the leaders will have to me to read the readers.

Polkinghorn, Assistant Secretary: It is very likely that some of the leaders will have to go to gaol, but I am confident there are plenty of men in the ranks ready to carry the fight on, and there is no dishonor in going to gaol in a just and righteous cause, as in the case of the Queensland strike; some men will have to be sacrificed, but the men would not forget it when the trouble was over.

Ferguson,

Ferguson, Chairman, Defence Committee: Every man who goes in tends to prolong the struggle, and it seems to me absolutely necessary that something must be done, more than we have done in the past; if the men on the mines stopped there it would not be so bad. We want every man to do his duty. You have tried to settle the strike in one way; it was a very good way, and you got on fairly well, but you did not keep it up long enough, and something else must be tried. You know how the strikers acted in America; they believed in law and order, and gave them some of it, and fought them with their own weapons. I want to say something, but I do not know how to say it safely. You can imagine it is said, and that something has been done, and we are all in gaol.

R. Sleath, Secretary: Should another strike take place such as the maritime strike, I am satisfied it would terminate in another way. In that struggle we gained sufficient experience to know law and order is a splendid thing, and undoubtedly in another similar trouble the members of the unions will believe in law and order, and let others take their billets. Geo. Herbert, Secretary, Coal-lumpers Union, Sydney, who is a man after my own heart, suggests the way to settle this difficulty is for every man to throw down his tools and take up something else. (Cheers.) Another gentleman named Butcher is writing to the paper (The Barrier Miner), gives excellent reasons why you should be drilled men. The idea is a good one. You have plenty of food and want exercise, and I believe a bit of drill will do you all good, not that you want the knowledge now, but you may shortly. We have plenty of old soldiers who could drill us all right. You had some excellent advice this afternoon, not from me but from the previous speakers. If you follow it you will be all right.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 8 September, 1892. Sensational rumours about. Great excitement here re expected attack on mines to-night. I have all the pelice fully armed located on the Proprietary Mine. So far no appearance of any attempt. Probably attack will not be made as it is now generally known the police are in force fully armed on the mine. I consider the position here is very critical.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 8 September, 1892. Man arrested yesterday for assaulting a contractor who had come down from the mine, was sentenced this morning to three months, Silverton gaol.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Re strike. A serious assault committed last night on man coming from mines to his home. Men not yet arrested. Considerable uneasiness felt here last night. Police in readiness on mine during night, but everything passed off quietly and place calm this morning.

Telegram from Mr. William Knox to The Inspector-General of Police.

Melbourne, 8 September, 1892. General manager has just telegraphed strikers are very much excited. From private information I learn that leaders are inciting men to commission of acts of violence.

Telegram from Mr. F. Whysall to The Postmaster-General.

Broken Hill, 8 September, 1892.

A large body of police, fully equipped, has just gone on to the mine, and drawn up into line, expecting an attack by the strikers on the men at work. It is freely stated that such has been the intention since yesterday, and to-night being the last before reinforcements of police arrive, it is supposed that something extraordinary will take place. Special arrangements will again be made for an operator all night.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 8 September, 1892. Rumoured an attack will be made this evening by strikers on Proprietary Mine, with view of taking workmen off the mine. Have all police camped on mine with arms and ammunition. Will wire further developments.

Memorandum from The Under Secretary of Justice to The Principal Under Secretary.

[Urgent.] Department of Justice, Sydney, 8 September, 1892.
The enclosed copy of a telegram, which has been received from Mr. Whittingdale Johnson, Police Magistrate, Broken Hill, is forwarded, by direction of the Minister of Justice, for the information of the Honorable the Acting Colonial Secretary.

T.E.M'N. (for U.S.)

[Enclosure.]

Broken Hill, 8 September, 1892.

The police occupied the Proprietary Mine in force last night. I remained with them until early this morning. This prompt and decided action, with the knowledge of reinforcements on the way, no doubt warded off the threatened attack. Prosecution will have to be continued until the strike is declared off. No less than four violent assaults upon workmen and employees have been reported within the last twenty-four hours, and we have now to face a desperate and unscrupulous body of men smarting under defeat. Have committed three men on two charges of combined and aggravated assault to Assizes, and refused bail in the interest of public safety. Another case will be tried summarily this morning.

WHITTINGDALE JOHNSON, S.M.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 9 September, 1892.

Large numbers of men congregated at various points round mines for several hours last night. Reputed attack not attempted. Night passed off quietly. All police still located on the Proprietary Mine.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 9 September, 1892. Great anxiety here. Rumoured attack on mines and police to-day or to-night. Best possible arrangements made to protect workmen on mine. Arrival of reinforcements anxiously awaited. Am informed they cannot reach here before half-past 1 to-night.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 9 September, 1892.

No attempt has yet been made to execute rumoured attack on police and mines. Large mass meeting of miners and others just concluded on reserve. One speaker proposed, another seconded, that they as a body should go on to mine and induce the blacklegs there to come off. Mr. Ferguson ruled motion was out of order there, but said that anything they wanted to move or do amongst themselves they could do. Mr. Hoban, Member of Defence Committee, said resolution could be moved after Sleath and Ferguson had gone. Many of the men were heard to say that to-night would be their last chance. Detective Goulder reports thus: I consider I can protect workmen until arrival of reinforcements.

Memorandum from The Under Secretary of Justice to The Principal Under Secretary.

Department of Justice, Sydney, 9 September, 1892.

The enclosed copy of a telegram, which has been received from Mr. Whittingdale Johnson, Police Magistrate, Broken Hill, is forwarded, by direction of the Minister of Justice, for the information of the Honorable the Acting Colonial Secretary.

T.E.M'N. (for U.S.)

Urgent.

 $\lceil Enclosure. \rceil$

Broken Hill, 9 September, 1892.

Reliable information that attack would be made on Proprietary Mine received 2 p.m. yesterday. All available police force mustered there, and by taking advantage of the conformation of the hill, and throwing up barricades of timber and stone on position commanding, the principal access to the mine was secured and occupied, impregnable to any attempt that is likely to be made. Unionists congregated in large numbers in the immediate vicinity during the night, but no attempt was actually made to rush the mine. These wise precautions undoubtedly prevented a serious catastrophe, for there is no mistake about the intention of the miners now to resort to violence, and serious trouble may be expected on the arrival of free labourers. Great credit is due to Superintendent Grainger, Inspector Larkin, and Sub-Inspector Saunders for the admirable police arrangements. The conduct of the men, too, has been beyond all praise under the trying ordeal of being forty-eight hours under arms, and only able to snatch a hasty meal at intervals, and a few hours' sleep on the bare ground in the open air, which they have done with the utmost cheerfulness and devotion to duty. I remained in the lines throughout to act magisterially at a moment's notice, and shared the discomfort with the men. This vigilance will have to be kept up until reinforcements arrive. The strike leaders, after exciting the miners by inflammatory speeches, have now declared that they will not be responsible for their acts of violence. Although pickets still maintained, I trust these misguided men will accept the inevitable, and prevent their displacement by outside labour; but as yet the majority have shown no disposition to do so, and the minority are intimidated. Anxiously awaiting arrival of reinforcements to relieve present force from their harassing duty.

WHITTINGDALE JOHNSON, P.M.

Telegram from Mr. Whittingdale Johnson, S.M., Police Magistrate, Broken Hill, to The Under Secretary of Justice.

Broken Hill, 10 September, 1892.
Remained at Proprietary Mine until this morning. Reinforcements received with stones and brickbats by an excited crowd of at least two thousand persons. Traffic Manager and three or four police severely cut about. Could not leave position on mine, or it would have been rushed. Free labourers (eighteen) safely escorted to the Proprietary Mine. One rioter arrested and remanded until Monday. Sympathising mob in the street, but no disorder. Large contracts taken on Proprietary Mine, and if miners do not accept terms to-day outside labour will be poured in in strong bodies. Occupation of mine will be continued by police until law and order prevail here.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 10 September, 1892. About 7 p.m. last night I received report mine would be attacked. Police were in readiness. No attack made. About 1:45 this morning train arrived with Sydney contingent and eighteen free labourers. They were met at Broken Hill goods station by mob of between two and three thousand. Mob immediately commenced hooting and yelling tremendously. By pre-arrangement train did not stop at goods station, but ran down to near rear of police station. Mob followed, yelling and hooting, and attacked the train by throwing stones. Several shots were fired into train. Several carriage windows were smashed, and other damage done by bullets and stones. Police landed and protected free labourers with fixed beyonets. Mob at once attacked police and labourers with stones. Several of police injured with fixed bayonets. Mob at once attacked police and labourers with stones. Several of police injured, also Mr. Ely, Traffic Manager, and two free labourers, but none of them very seriously. One arrest made. Police and all free labourers marched to Town Hall, and were accommodated there. Free labourers since taken safely to mines. Mob dispersed with an hour. Mines still picketed. Will send fuller particulars later re injuries received by police and others.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 10 September, 1892. HEREWITH complete list of constables and others injured by attacks on police and free labourers on arrival here 145 a.m. this morning:—Constable Dalton, scalp wound on back of head; Constable Sinclair, piece of glass in eyes; Constable Fairhall, severe scalp wound on right side of head; all of No. 3 Station; two latter sent to hospital; Constable Griffen, No. 1 Station, little finger of right hand injured; Constable Freeman, No. 5 Station, scalp wound on forehead; Constable Bourke, Balmain Station, bruise from blow of rock on left breast; Constable Tait, Mounted Depôt, slight would back of head; Constable Begg, Redfern Station, scalp wound over right eye, and two fingers left hand badly bruised; Constable M'Donald, several bruises from blows of stones on back; William Wapshott, engineer, free labourer, bad scalp wound back of head: Maurice Moss, free labourer, slight injury to right side; Charles Ely, Traffic Manager, upper lip cut through, and one tooth broken. All the injuries were caused by stones thrown at police and free labourers. One shot was fired amongst them when eliciting from train. Positive proof three gun shots fired into train just before it stopped. One bullet alighting from train. Positive proof three gun shots fired into train just before it stopped. One bullet went right through the carriage windows on both sides. Nine carriage windows smashed, also some shutters, and other damage done to woodwork of carriage. This information is supplied from Sub-Inspector Saunders after personal inspection of carriages, and who I sent to Cockburn to accompany police to Broken Hill. Man named Richard Uncle arrested by Detective Brown and Constable Allen for being concerned with others in the riot. Remanded till Monday.

Telegram from Mr. John Smith, Adelaide, to The Inspector-General of Police.

Adelaide, 10 September, 1892.

PLEASE send fifty men, armed and equipped, to Broken Hill to protect miners and family from attack of capitalist's forces.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 10 September, 1892.

FEELING very high. Have been requested to remove police from Town Hall. Cannot procure accommodation elsewhere at present. Will camp the hundred police on mine, temporary, and try to obtain accommodation. Men seem fully determined not to resume work. Fear serious riot any moment. hooted, and even with recent reinforcement situation very critical, and military may be required any moment.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 10 September, 1892.

RE police requested to leave Town Hall, Mr. Johnson has given the Mayor a requisition on behalf of the Government for use of Town Hall for police purposes, and has police to still occupy it.

Telegram from Mr. W. H. Coffey, Crown Prosecutor, Broken Hill, to the Attorney-General.

Broken Hill, 10 September, 1892.

MEN decided not to accept Baxter's offer. Meeting quiet. Have not yet seen reports of police, but hear speeches temperate.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 11 September, 1892.

EXCITEMENT calmed down; place quiet. No change in the aspect of affairs as regards resuming work. Mr. Baxter has taken a large contract, and I am informed has been in treaty with the strike leaders, but matter not yet concluded; but unless the leaders agree to Baxter's terms, he intends leaving by train this evening, and will bring here in about eight days' four or five hundred men. If the men here refuse the work, on arrival of Baxter's men there will be, I think, serious rioting, and reinforcements will be Will report again soon. required.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 11 September, 1892. MATTERS here quiet at present. I understand that the leaders have refused the terms offered by contractor Baxter, on the grounds that the Union is not recognised, and that the strike now is to have the Union recognised.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 11 September, 1892. Large meeting on reserve just concluded. Nothing special stated, but men advised to preserve law and order, and to be firm and not resume work on terms offered. The leaders refused the contractor's terms, as unionism would not be recognised. Will report to-morrow re reinforcements. Another man, named Jones, arrested to-day for assault in conjunction with the three men committed for trial on 7th instant.

Telegram from Mr. Whittingdale Johnson, S.M., Police Magistrate, Broken Hill, to The Minister of Justice.

Broken Hill, 11 September, 1892. Excitement calmed down and men in milder mood. Negotiations with contractor still going on; will be decided to-day; the whole situation depends on result. Will acquaint you with result this evening.

Telegram from Mr. W. H. Coffey, Crown Prosecutor, Broken Hill, to The Attorney-General.

Arrived. Will wire you this evening. Baxter has given men till four o'clock to decide if they will accept contract, if not he leaves to-night to bring up men.

Telegram from Mr. Whittingdale Johnson, S.M., Police Magistrate, Broken Hill, to The Minister of Justice.

Broken Hill, 11 September, 1892.

Miners finally rejected contractor's offer unless Union recognised; are determined to stand out as long as money lasts. Do not anticipate any concerted attempts to rush mines or to destroy property while guarded, but isolated acts of violence to individuals still continue. There will undoubtedly be trouble when free labour comes in, but am not yet in a position to advise what steps will be necessary to preserve law and order under these circumstances, or what additional force will be required.

Police Report.

Subject:—Re strike at Broken Hill, and riot on arrival of reinforcements of police on the morning of the 10th instant.

Broken Hill, 11 September, 1892. DETECTIVE GOULDER reports, for the information of the Inspector-General of Police, that at 1:30 a.m. on Saturday, the 10th instant, the reinforcements of police with their horses, and twenty free labourers, arrived at the Broken Hill railway station.

It had been arranged for the train not to stop at the station, but run through to the back of the

Town Hall where the men were to be housed. .

It being thought the trains would run direct to the mines, the strikers, numbering about 3,000, congregated at the railway station and the junction to the mines, and on discovering the train was going through without stopping, they immediately commenced to throw stones at the carriages, in addition to which the police are positive two revolver shots were fired, one of which came in at one side of the carriage and went out at the other.

In consequence of the train going so slowly—it being feared the train had been tampered with—many of the mob were able to keep in line with the carriages, which they continued to pelt with stones, many of the windows and sashes being broken and destroyed. The men, immediately on the train stopping, were disembarked and marched to the Town Hall, during which the police and free labourers were showered with stones, eight of the police and two of the free labourers being struck and cut about the head and body.

The mob now surrounded the Police Station and Town Hall, but the detectives managed to get the whole of the free labourers quietly on to the mine, by taking them two at a time. The detectives to-day arrested the ringleader of the assault, for which three men already stand committed for trial.

GEO. E. GOULDER, Detective.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 12 September, 1892.

THE night passed off quietly; the pickets are more numerous and active round the mines; two men were assaulted on Saturday night.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 12 September, 1892.

JUST reported that a tent, which was situated some distance from mines, the property of an employee working on Proprietary Mine, was burned last night. The situation here is unchanged.

Telegram from Mr. F. Whysall to The Acting Colonial Secretary.

Broken Hill, 12 September, 1892. The majority of the police force on the Proprietary Mine all night. Town seems quiet.

Telegram from Mr. W. H. Coffey, Crown Prosecutor, Broken Hill, to The Attorney-General.

Man drilling pickets arrested.

Broken Hill, 12 September, 1892.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 12 September, 1892. Re reinforcements. Have consulted with Mr. Johnson. We consider that it would be undesirable to make arrests until after arrival of reinforcements. The force here is sufficient to make arrests and protect gaol, but not sufficient also to protect town and mines. Should extreme measures be resorted to in the present temper of the men, a serious riot might occur.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 12 September, 1892. Considering the excited state of feeling here, matters are quiet, but various statements are made re contemplated attack on mines. There is a belief that the attack is still contemplated. There will, I believe, be serious rioting when positively ascertained that workmen from other places are coming here, and reinforcements should be here before arrival of workmen, but at present the force here is sufficient. Reinforcements should be held in readiness.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 12 September, 1892. MR. Coffey advises there is strong case against leaders for conspiracy and inciting. The excitement increasing, and men seen drilling. The situation is becoming serious. I have again been in consultation with Mr. Johnson. We consider it necessary, to preserve law and order, that reinforcements should be sent at once and before arrests are made or arrival of more men to work on the mines.

Telegram from Superintendent Grainger to The Inspector-General of Police. Broken Hill, 12 September, 1892. A BODY of men found drilling. Leader arrested.

the fire.

Telegram from Superintendent Grainger to The Inspector-General of Police. Broken Hill, 13 September, 1892. THE night passed quietly. Situation still the same.

Telegram from Superintendent Grainger to the Inspector-General of Police.

Broken Hill, 13 September, 1892. No change in situation. Speeches by leaders on reserve this afternoon peaceable. Advised men to refrain from violence. Town quiet. Constable Fairhill much better.

Telegram from Mr. W. H. Coffey, Crown Prosecutor, Broken Hill, to The Attorney-General.

Broken Hill, 13 September, 1892. Your telegram received last night. Nothing further to report to-day. Drilling case remanded seven days; is out on bail—himself fifty, two sureties twenty-five; case trivial, but arrest appears to have had a good effect.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 13 September, 1892. Ir has been ascertained that a canvas hut, lately occupied by the family of an employee on the Proprietary Mine, was set on fire last night. About 3 yards of the canvas burnt, and it is stated the pickets put out

Memorandum from the Under Secretary of Justice to The Principal Under Secretary.

Department of Justice, Sydney, 1 October, 1892.

The enclosed copy of a telegram which has been received from Mr. Whittingdale Johnson, Acting Police Magistrate, Broken Hill, is forwarded, by direction of the Minister of Justice, for the information of of the Honorable the Colonial Secretary.

T. E. M'N.
(For Under Secretary.)

[Enclosure.]

Two hundred and fifty free labourers arrived this morning, and were safely placed on the mine. But for the presence of police in force intimidation would have been attempted. A small party arriving by ordinary train were only saved from attack by a crowd of 300 or 400 Unionists by police. Parties of from ten to twenty are coming in from among miners here, and there must be now upwards of 700 men on Proprietary Mine. 1 fear trouble in future from unemployed, when strike is over.

Telegram from Superintendent Grainger to The Inspector-General of Police.

Broken Hill, 1 October, 1892.

Re Strike .-- Nothing fresh to report.

Telegram from Mr. F. Whysall to The Colonial Secretary.

A SHORT time back the unions decided to close their books against outsiders, but, in consequence of a rumour that the shift-bosses would come off the mines if they were allowed strike pay or coupons, meeting was held to day, and it was decided that if the shift-bosses come out they would grant them the same privileges as those on strike already. Deputation was appointed to wait on shift-bosses and convey resolution, but so far no sign of latter coming out. All quiet now.

Telegram from the Inspector-General of Police to The Colonial Secretary.

Sydney, 1 October, 1892.

THE only difficulty police have heard of is that shift-bosses said to be coming out, but seems no foundation for rumour. Will keep you informed.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(RETURN RESPECTING COST OF BROKEN HILL STRIKE.)

Ordered by the Legislative Assembly to be printed, 16 May, 1893.

[Laid upon the Table of the House in answer to Question No. 2, of 15 November, 1892.]

Question.

- 2. Broken Hill Strike: -Mr. G. D. Clark asked The Minister of Justice, -
 - (1.) How many members of the Police Force, Magistrates, Law Officers, Inspectors, and Detectives were sent to Broken Hill during the miners' strike?
 - (2.) What has been the total cost to date for the transit and maintenance of the Law Officers and Police sent to Broken Hill in consequence of the strike?
 - (3.) What has been the cost to the country of sending the members of the Defence Committee for trial to Deniliquin?

Answer.

(1.) Four officers, two detectives, and 279 sergeants and constables; one Crown Prosecutor and one officer from the Crown Solicitor's Office; and one Stipendiary Magistrate and two Police Magistrates.

(2.) The expenses incurred in connection with the Police Force were as follows: - Special trains (2.) The expenses incurred in connection with the Police Force were as follows:—Special trains and ordinary train fares, £3,104 10s. 7d.; special travelling allowances to Police, £9,243 16s.; forage, remounts, rent of Town Hall, &c., £457 5s. 5d.; total, £12,805 12s. The officer from the Crown Solicitor's Department was paid £68 travelling expenses, exclusive of railway fares. The fee and travelling expenses of the Crown Prosecutor amounted to £272 6s. 2d. Mr. Whittingdale Johnson's, S.M., expenses were as follows:—Fee at £2 per diem, £248; travelling expenses, £150; railway fares, £8 15s., sleeping berth, 12s. 6d. Mr. A. N. Barnett, P.M., Silverton, received £12, at the rate of £2 per diem, and Mr. J. L. King, P.M., Braidwood, received £53 9s. as travelling expenses, besides having railway fares provided at a cost of £8 15s. and sleeping berths £2 7s. 6d., making a total of £483 19s.

3. £1,665 10s. 6d. was paid to witnesses for the Crown and the defence, but portion of this would in any case have been paid had the trial taken place at Broken Hill. The cost of conveying prisoners from Broken Hill to Demiliquin and return fares for acquitted prisoners, including sustenance, amounted to £118 8s. 9d.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

IMPRISONMENT OF LEADERS OF BROKEN HILL STRIKE.

(PETITION FROM CERTAIN RESIDENTS OF THE COLONY, PRAYING FOR RELEASE OF.)

Received by the Legislative Assembly, 14 December, 1892.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned residents of the Colony,-RESPECTFULLY SHOWETH:

1. That at the Circuit Court held in Deniliquin during the month of October last, Richard Sleath, W. J. Ferguson, E. J. Polkinghorne, John Bennetts, Herman Herbele, R. A. Hewitt, and others, were charged with,

(1.) That they did amongst themselves, and with divers other persons unlawfully, maliciously, and seditiously conspire together to raise and create discontent and dissatisfaction amongst the liege subjects of Our Lady the Queen, and to stir up jealousies, hatred, and ill-will between different classes of Her Majesty's subjects, and to cause and procure, and to aid and assist in causing and procuring, divers subjects of our said Lady the Queen, unlawfully and seditiously to meet and assemble together for the purpose of aiding and carrying into effect the objects of such unlawful conspiracy.

(2.) That they did amongst themselves, and with divers other persons, conspire together to incite, move, and persuade great numbers of the liege subjects of Our Lady the Queen to riots, tumults, and breaches of the peace.

(3.) That they did amongst themselves, and with divers other persons, conspire to solicit, incite, and procure Francis Cox, Edward Kough, John Lewis Morris, John Kearn, Michael O'Donnell, William Jones, Richard Uncles, John Churchward, and large numbers of other persons to unlawfully combine, conspire, and agree together by divers unlawful means to deter, prevent, molest, intimidate, and obstruct certain of Her Majesty's liege subjects from carrying on and

following their lawful occupations and callings.

2. That the said Richard Sleath, W. J. Ferguson, E. J. Polkinghorne, John Bennetts, Herman Herbele, and R. A. Hewitt were convicted on the third (or minor) count of the above-quoted indictment, and sentenced to imprisonment for periods varying from three months to two years.

3. That your Petitioners consider such sentences to be extremely harsh and excessive, in view of the fact that the persons named were acquitted of the more serious charges embodied in the indictment, the defence having proved that so far from inciting to lawlessness and riot, they invariably cautioned the men against it, and on many occasions assisted the police to maintain the law.

4. That the offence of which the persons named were found guilty was practically the establishment

4. That the offence of which the persons named were found guilty was practically the establishment of pickets in the neighbourhood of the mines for the purpose of dissuading and deterring persons from taking part in working such mines, pending the settlement of the dispute then going on between the miners and the directors of the various mining companies carrying on operations at Broken Hill.

5. That the system of "picketing" has prevailed and been countenanced by the law authorities in this Colony for very many years, and it has lately been declared to be legal in England by Lord Chief Justice Coleridge. Your Petitioners, therefore, verily believe that the persons named were led into their acts by an erroneous belief that picketing was legal in this Colony.

6. That for similar offences in England much lighter sentences have invariably been imposed, and at different times persons who were convicted of such offences have been merely bound over in their own recognizances to be of good behaviour.

recognizances to be of good behaviour.

7. That the law of England (38-39 Victoria) contains the following provision as so the length of sentences for offences of the kind that the persons named have been convicted of:—" No person convicted of a conspiracy to do, or procure to be done, in restraint of trade, an act punishable only on summary conviction can be sentenced to imprisonment for more than three months; or such longer time (if any) as may have been provided by the Statute for the punishment of the said act when committed by one person."

8. That your Petitioners believe that the maximum penalty for similar offences in Victoria is

imprisonment for three months.

Your Petitioners therefore humbly pray that your Honorable House will take the foregoing premises into your early and favourable consideration, and that you will respectfully direct the attention of His Excellency the Governor to the excessiveness of the sentences imposed upon the persons named, and appeal that His Excellency will be pleased to forthwith grant their release. And your Petitioners also pray that your Honorable House will at an early date so amend the law as to render it impossible in future for persons to be sentenced to such excessive terms of imprisonment for the offence of which the persons named have been convicted.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 30,057 signatures.]

1892-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

IMPRISONMENT OF LEADERS OF BROKEN HILL STRIKE.

(PETITION FROM CERTAIN RESIDENTS OF THE COLONY, PRAYING FOR RELEASE OF.)

Received by the Legislative Assembly, 18 January, 1893.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned residents of the Colony,-RESPECTFULLY SHOWETH:-

1. That at the Circuit Court held in Deniliquin during the month of October last, Richard Sleath, W. J. Ferguson, E. J. Polkinghorne, John Bennetts, Herman Herbele, R. A. Hewitt, and others, were charged with,

(1.) That they did amongst themselves, and with divers other persons, unlawfully, maliciously, and That they did amongst themselves, and with divers other persons, unlawfully, manciously, and seditiously conspire together to raise and create discontent and dissatisfaction amongst the liege subjects of Our Lady the Queen, and to stir up jealousies, hatred, and ill-will between different classes of Her Majesty's subjects, and to cause and procure, and to aid and assist in causing and procuring, divers subjects of our said Lady the Queen, unlawfully and seditiously to meet and assemble together for the purpose of aiding and carrying into effect the objects of such unlawful conspiracy.

(2.) That they did amongst themselves, and with divers other persons, conspire together to incite, move, and persuade great numbers of the liege subjects of Our Lady the Queen to riots, tumults, and breaches of the peace.

(3.) That they did amongst themselves, and with divers other persons, conspire to solicit, incite, and procure Francis Cox, Edward Kough, John Lewis Morris, John Kearn, Michael O'Donnell, William Jones, Richard Uncles, John Churchward, and large numbers of other persons to unlawfully combine, conspire, and agree together by divers unlawful means to deter, prevent, molest, intimidate, and obstruct certain of Her Majesty's liege subjects from carrying on and

following their lawful occupations and callings.

2. That the said Richard Sleath, W. J. Ferguson, E. J. Polkinghorne, John Bennetts, Herman Herbele, and R. A. Hewitt were convicted on the third (or minor) count of the above-quoted indictment, and sentenced to imprisonment for periods varying from three months to two years.

3. That your Petitioners consider such sentences to be extremely harsh and excessive, in view of the fact that the persons named were acquitted of the more serious charges embodied in the indictment, the defence having proved that so far from inciting to lawlessness and riot, they invariably cautioned the

men against it, and on many occasions assisted the police to maintain the law.

4. That the offence of which the persons named were found guilty was practically the establishment of pickets in the neighbourhood of the mines for the purpose of dissuading and deterring persons from taking part in working such mines, pending the settlement of the dispute then going on between the mines and the directors of the various mining companies correspond to proportions at Broken Hill

miners and the directors of the various mining companies carrying on operations at Broken Hill.

5. That the system of "picketing" has prevailed and been countenanced by the law authorities in this Colony for very many years, and it has lately been declared to be legal in England by Lord Chief Justice Coleridge. Your Petitioners, therefore, verily believe that the persons named were led into their acts by an erroneous belief that picketing was legal in this Colony.

6. That for similar offences in England much lighter sentences have invariably been imposed, and at different times persons who were convicted of such offences have been merely bound over in their own

recognizances to be of good behaviour.

7. That the law of England (38-39 Victoria) contains the following provision as to the length of sentences for offences of the kind that the persons named have been convicted of:—"No person convicted of a conspiracy to do, or procure to be done, in restraint of trade, an act punishable only on summary conviction can be sentenced to imprisonment for more than three months; or such longer time (if any) as may have been provided by the Statute for the punishment of the said act when committed by one person."

8. That your Petitioners believe that the maximum penalty for similar offences in Victoria is imprisonment for three months.

Your Petitioners therefore humbly pray that your Honorable House will take the foregoing premises into your early and favourable consideration, and that you will respectfully direct the attention of His Excellency the Governor to the excessiveness of the sentences imposed upon the persons named, and appeal that His Excellency will be pleased to forthwith grant their release. And your Petitioners also pray that your Honorable House will at an early date so amend the law as to render it impossible in future for persons to be sentenced to such excessive terms of imprisonment for the offence of which the persons named have been convicted.

And your Petitioners, as in duty bound, will ever pray.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MR. JOSIAH THOMAS, J.P.

(CORRESPONDENCE IN CONNECTION WITH THE CASE OF.)

Ordered by the Legislative Assembly to be printed, 6 December, 1892.

RETURN to an Order made by the Honorable the Legislative Assembly, dated 1st December, 1892, That there be laid upon the Table of this House,-

"Copies of all papers and correspondence in connection with the case of "Mr. Josiah Thomas, who was requested by the Government to resign his "position as a Justice of the Peace."

Broken Hill, Friday.

(Mr. Murphy.)

From the Sydney Morning Herald, Saturday, 29th October, 1892.

AT BROKEN HILL-THE MEETING ON THE RESERVE.

ABOUT 500 persons put in an appearance at the meeting on the reserve this afternoon. Mr. Findlay was the first speaker. He said that although they had lost two members of Parliament by the departure of Messrs. Cook and Murphy last evening they had gained a Justice of the Peace, Josiah Thomas, one of the newly-appointed batch of Justices, having returned from his tour through Queensland that morning. (Cheers.) There was a little incident that was taking place at South Broken Hill which he would like to refer to, and which was a disgrace. Three hundred police were now quartered in the town, and it was a disgrace that they should permit a man to fire off a revolver every day to the danger of persons living in the neighbourhood, and who had that day discharged his weapon six times. Such a state of things was a disgrace to any civilised community, and he wondered that the police could not put a stop to it. If the a disgrace to any civilised community, and he wondered that the police could not put a stop to it. If the police did not take some action in the matter they would take action themselves. An accident had police did not take some action in the matter they would take action themselves. An accident had occurred at Block 11 that morning, which had resulted in a man being brought to the surface in such a condition that it was impossible to tell whether he was dead or alive. (Loud cheers.) The Inspector of Mines should see to it, and see that the wretched blacklegs had some protection from such accidents. The speaker then introduced to the meeting Mr. Thomas, one of the lately-gazetted Justices of the Peace, but who has not yet been sworn in, and who has, almost since the commencement of the strike, been stumping Queensland for the purpose of raising funds to support the strikers. Mr. Thomas then addressed the meeting. He congratulated his audience on their healthful appearance, and said that it was evident that there was not as much lead in their system as they would have had had they been at work during the past seventeen weeks. The directors were already convinced that they were getting the worst of the struggle, and it was evident that if the men stuck together they must win. He then recapitulated his doings in Queensland, and testified to the loyal manner in which the labour unions of that colony had responded to his appeal for aid for the strikers of the Barrier. He described what was being done in Queensland to secure for the workers a measure of representation in the next Parliament. The workers of New South Wales must make similar arrangements for the next election, and then perhaps the Queensland to secure for the workers a measure of representation in the next Parliament. The workers of New South Wales must make similar arrangements for the next election, and then perhaps the Government would not be able to oppress them with laws which consisted of Gatling guns, Acts of Parliament, and Johnsonian verdicts. They must get into power and put their own men on the Bench, and then they could get verdicts as they wanted, and not as were given now; and then when they got Gatling guns and troopers who trampled the people down in the streets on their side, they would trample down just as ruthlessly and deal out just as remorselessly to the class that now oppressed them as that class was now treating them. He denounced the Government for the arrest of the strike leaders, and criticised

[870 copies - Approximate Cost of Printing (labour and material), £4 11s. 6d.]

criticised the conduct of the Government and the detectives connected with the case in strong language. He said that instead of the strike leaders being in the dock, the detectives, who had conspired to work up the charge against these innocent men, should have been on their trial for conspiracy. He concluded by exhorting his audience to organise themselves for the general election.

Other speakers addressed the meeting, and the receipt of £93 18s. 2d. was announced.

Intense interest was manifested to-night in the result of the trial of Sleath and the other accused men at Deniliquin, and the Judge's summing-up, which is looked on as strongly against certain of the accused, created considerable surprise. The fact that the jury had been locked up for the night, being unable to agree, is generally considered as an indication that two or more of the accused will be found guilty of the charge preferred against them. Several bands were waiting to parade the streets, the acquittal of the accused being anticipated in many quarters, and on hearing that the jury were locked up the bandsmen disconsolately dispersed.

Submitted.—A.C.F., 29/10/92.

The Honorable the Colonial Secretary,—This is one of the gentlemen mentioned in my confidential minute of the 26th instant. I would suggest that Mr. Josiah Thomas be called upon at once to state whether the enclosed is a substantially accurate report of his speech, and also that a police report as to the speech should be obtained. If the report is at all accurate, Mr. Thomas, I venture to suggest, is not fit to be in the commission, and should be removed.—R.E.O.C., 29/10/92.

The Principal Under Secretary.—T.E.M'N. (for U.S.), B.C., 31/10/92.

Messrs. Z. Lane, W. G. Gibson, and G. A. Mills, J's.P., to The Colonial Secretary.

Broken Hill, 31 October, 1892.

We consider it advisable, in the interests of law and order, for your information, and to preserve the reputation of the local Bench, that public expressions such as made by Mr. Josiah Thomas, an embryo Justice of the Peace, should be brought under your notice ere this gentleman is sworn in

In a disordered district like this is at present, when the police officers have the greatest difficulty We are, &c

in preserving peace, such language does great harm.

Z. LANE, J.P. W. G. GÍBSON, J.P. G. A. MILLS, J.P.

[Enclosure.]

[Silver Age, 29 October, 1892.]

Mr. Josiah Thomas, one of the lately-gazetted Justices of the Peace, and who has, almost since the commencement of the strike, been stumping Queensland for the purpose of raising funds to support the strikers, then addressed the meeting. He congratulated his audience on their healthful appearance, and said that it was evident that there was not as much lead in their systems as there would have been had they been at work during the past seventeen weeks. The directors were already convinced that they were getting the worst of the struggle, and it was evident that if the men stuck together they must win. The speaker then recapitulated his doings in Queensland, and testified to the loyal manner in which the labour unions of that colony had responded to his appeal for aid for the strikers of the Barrier. He described what was being done in Queensland to secure for the workers a measure of representation in the next Parliament. The workers of New South Wales must make similar arrangements for the next election, and then perhaps the Government would not be able to oppress them with laws which consisted of Gatling guns, Acts of Parliament, and Johnsonian verdicts. They must, when they got into power, seize the magistracy and put their own men on the Beach, and then they could get verdicts as they wanted them and not as they were given nove. And then, when they got the Gatling guns and the troopers who trampled people down in the streets on their side, they would trample down just as ruthlessly and deal it out just as remorselessly to the class that now oppressed them as that class was now treating them. The speaker denounced the Government for the arrest of the strike leaders, and criticised the conduct of the Government and the detectives connected with the case in strong language. Sir. Colonial Secretary's Office, Sydney, 31 October, 1892. In transmitting to you the accompanying extracts from the Sydney Morning Herald, Daily Telegraph, and Evening News of the 29th instant, I am directed by the Colonial Secretary to request that you will be good enough to say whether you made the statements therein attributed to you; and, if not, in what respects the reports are inaccurate.

I have, &c., CRITCHETT WALKER, Principal Under Secretary.

[Enclosures.]

[Sydney Morning Herald, 29 October, 1892.] AT BROKEN HILL.—THE MEETING ON THE RESERVE.

ABOUT 500 persons put in an appearance at the meeting on the reserve this afternoon. Mr. Findlay was the first speaker He said that although they had lost two Members of Parliament by the departure of Messrs. Cook and Murphy last evening, they had gained a Justice of the Peace, Josiah Thomas, one of the newly-appointed batch of Justices, having returned from his tour through Queensland that morning. (Cheers.) There was a little incident that was taking plaqe at South Broken Hill which he would like to refer to, and which was a disgrace. Three hundred police were now quartered in the town, and it was a disgrace that they should permit a man to fire off a revolver every day to the danger of persons living in the neighbourhood, and who had that day discharged his weapon six times. Such a state of things was a disgrace to any civilised community, and he wondered that the police could not put a stop to it. If the police did not take some action in the matter they would take action themselves. An accident had occurred at Block II that morning, which had resulted in a man being brought to the surface in such a condition that it was impossible to tell whether he was dead or form such accidents. The speaker then introduced to the meeting Mr. Thomas, one of the lately-gazetted Justices of the Peace, but who has not yet been sworn in, and who has, almost since the commencement of the strike, been stumping Queensland for the purpose of raising funds to support the strikers. Mr. Thomas then addressed the meeting. He congratulated his andience on their healthful appearance, and said that it was evident that there was not as much lead in their system as they would have had had they been at work during the past seventeen weeks. The directors were already convinced that they were getting the worst of the struggle, and it was evident that if the men stuck together they must

win. He then recapitulated his doings in Queensland, and testified to the loyal manner in which the labour unions of that colony had responded to his appeal for aid for the strikers of the Barrier. He described what was being done in Queensland to secure for the workers a measure of representation in the next Parliament. The workers of New South Wales must make similar arrangements for the next election, and then perhaps the Government would not be able to oppress them with laws which consisted of Gatling guns, Acts of Parliament, and Johnsonian verdicts. They must get into power and put their own men on the Bench, and then they could get verdicts as they wanted, and not as were given now; and then when they got Gatling guns and troopers who trampled the people down in the streets on their side, they would trample down just as ruthlessly and deal out just as remorselessly to the class that now oppressed them as that class was now treating them. He denounced the Government for the arrest of the strike leaders, and criticised the conduct of the Government and the detectives connected with the case in strong language. He said that instead of the strike leaders being in the dock, the detectives, who had conspired to work up the charge against these innocent men, should have been on their trial for conspiracy. He concluded by exhorting his audience to organise themselves for the general election.

[Daily Telegraph, 29 October, 1892.]

The meeting held on the reserve this afternoon was fairly attended. He described what the Queensland labour unions were doing to secure a measure of representation in Parliament. The workers of New South Wales must do likewise, when the Government would not be able to press them with their Gatling guns, their Acts of Parliament, and Johnsonian verdicts. The workers must, when they get into power, seize the magistracy and put their own men on the Bench; then they would be able to get verdicts as they wished, not such as were now given. Then, when they got Gatling guns, and the troopers who now trampled them down, they could, if occasion required, with these on their side, trample down ruthlessly the class which now oppressed them, the workers of Australia. (Cheers.)

[Evening News, 29 October, 1892.] EXTRAORDINARY SPEECH BY A J.P.

Broken Hill, Saturday.

There was a large attendance at the meeting on the reserve yesterday afternoon. Mr. Josiah Thomas, one of the recently-made J's.P., who has just returned from Queensland, declared that the directors were already convinced that they were getting the worst of the struggle, and he exhorted the men to stick together and win. He described what the Queensland labour unions were doing to secure a measure of representation in Parliament. The workers of New South Wales must do likewise, when the Government would not be able to press them with their Gatling guns, their Acts of Parliament, and Johnsonian verdicts. The workers must, when they get into power, seize the magistracy, and put their men on the Bench; then they would be able to get verdicts as they wished, not such as were now given. Then, when they got Gatling guns, and the troopers who now trampled them down, they could, if occasion required, with these on their side, trample down ruthlessly the class which now oppressed them, the workers of Australia. This fiery deliverance was received with enthusiastic cheers. It was announced that £93 18s. 2d. had been received that day by the Defence Committee. Broken Hill, Saturday. siah Thomas, one of the Committee.

Telegram from Mr. Inspector Larkin to The Inspector-General of Police.

Broken Hill, 1 November, 1892.

UNABLE to procure notes of speech made by Mr. Thomas before two or half-past. Posted paper to you on Sunday night containing speech.

Telegram from Mr. Inspector Larkin to The Inspector-General of Police.

Broken Hill, 1 November, 1892.

I HEREWITH forward the notes which I obtained of Mr. Thomas's speech on Friday last with a verbal addition, which I got from the reporter:—"The men were looking well, and there was not so much lead in their systems as there would have been if they had been working in the lead stopes for the last seventeen weeks. The directors were already convinced that they were paying too much for their whistle, &c. The workers must have more labour men in Parliament, and then the Government would not be able to oppress them as they were doing now with their laws—laws which consisted of Gating guns, Acts of Parliament, and Johnsonian verdicts. They must then seize the magistracy and put their own men on the liament, and Johnsonian verdicts. They must then seize the magistracy and put their own men on the Bench, when they would be able to get verdicts as they wanted them, and not as they were given now; and when they got the Gatling guns, troopers, and the rest on their side, they must deal it out to the other side, just as remorselessly as the other side were treating them now. He referred to the conspirators at Deniliquin, and said that if anyone should be charged with conspiracy it was the detectives. The detectives should be in the dock. They must organise for the next election.

The following is the verbal portion given by the reporter:—"I can imagine bank managers cracking strike-leaders' heads with rulers, but I cannot imagine bank clerks facing Gatling guns for principle; so, perhaps, when we get the Gatling guns, we may be able to throw them away—to break them up. We won't want them."

Submitted to the Colonial Secretary.—Edmund Fosbery, 2/11/92.

Mr. Josiah Thomas, J.P., to The Colonial Secretary.

Broken Hill, 5 November, 1892. Sir, I am in receipt of your favour of 31st October. Allow me to thank you for your kindness in drawing my attention to reports of a speech which I delivered on 28th ultimo. I am sending enclosed copy of what I said. This I have been able, fortunately, to do, because when I speak I have to memorise. From enclosed copy you will be able to see that my speech has been greatly garbled, and much to my

I would point out that recently the Silver Age newspaper, of Broken Hill, has very warmly espoused the cause of the mine-owners, and consequently all reports emanating from that office are not,

to say the least, free from prejudice.

The report in the Sydney Morning Herald is a verbatim copy of the Silver Age, so that it is reasonable to suppose that the same reporter acted for both papers.

A Mr. Mills acted as reporter for the Silver Age on this occasion. Mr. Mills is, I understand, the proof-reader of the Age, merely acting in the place of Mr. Colebatch, who has been away to Deniliquin. I can easily obtain witnesses who, on oath, are prepared to state that during the major portion of the remarks Mr. Mills did not take a single note, and when, on Saturday last, I saw him and pointed out that

I had never even used the words that "if the men stuck together they must win," and "that instead of the strike leaders being in the dock, the detectives who had conspired to work up a charge against those innocent men should have been on their trial for conspiracy." His reply to me was, "Oh, well, you thought so." Comment on this, I think, is needless.

Then, only two reporters were present near the trolly—one from the Silver Age and the other from the Barrier Miner. Consequently, the reports that have appeared in the metropolitan papers have really

come from one or the other.

There is no doubt that the Sydney Morning Herald and Silver Age reports are identical, and I have every reason to suppose that the correspondent of the Daily Telegraph also received his information from the Silver Age.

I am writing to the editor of the Daily Telegraph to ask him if he will be kind enough to inform me if the report which appeared in issue of 29th is a report of what their correspondent actually heard, or if the information was supplied him by a second party.

I have, &c., JOSIAH THOMAS.

[Enclosures.]

[Enclosures.]

It is only as we win at the polls, can we win elsewhere. For years past I have had this opinion, and I was glad when in Queensland to find that in this I was supported by eminent authority, for on the Monday after I landed in Brisbane (15th August, 1892) I read the following quotation in one of the papers (either Observer or Daily Telegraph, Brisbane):—"The party of law will win, as it always has since the world was shaped into a residue for humanity." The paper said nothing of justice and right; simply law will win. This is true, because Providence, by Napoleon's account, is always on the side of the bigger battalions; so law represents the bigger guns. What is law? As I understand law, it is Acts of Parliament, (iatling guns, and Johnsonian verdicts. Richard Cobden once stated that if a man were suddenly dropped from the moon and were to read the land laws of England, he would come to the conclusion that the laws were passed for the benefit of the landlords, and not for the benefit of the people of England. I did not think it was necessary for a man to take such a lengthened journey as that; that conclusion could be arrived at with a much shorter trip. Now, if it is right for wealthy men to pass Acts of Parliament to pass Acts that would be for the benefit of the people.—The masses—send Members to Parliament to pass Acts that would be for the benefit of the people.

Having returned a majority of Labour Members, it will be our duty to seize the Gatling guns. Having seized them, we can smash them up and throw them away, for we shall never need them, as we cannot, in the wildest flight of our imagination, imagine bank clerks facing Gatling guns.

Then I went on to speak of how I felt strongly when I heard of the arrest of the Unionist leaders, and that when I read the account of the action of the detectives, I blushed for my species, as I always understood that eaves-dropping was mean and numanly, and that men whose moral nature would allow them to act such a part might very easily commit perjury,

by the evidence of such men.

I then made reference to statements that had appeared in the Register, and I spoke of the men that were being sent from Melbourne. In concluding my remarks I said: "If the present difficulties and troubles will only tend to strengthen your memories, your present sufferings will not be in vain. The great curse of the working classes is a short memory. In times of difficulty and distress you speak loudly, you talk of what you purpose doing; but immediately times of prosperity come, you forget all the injustice and tyranny you spoke so much about a little before; then when adverse times arise again, you are in exactly the same position. What is needed is this, that when times are prosperous, and you can think calmly, that you should then try to grapple with the social questions. When you are free from passion, think, then you will be able to obtain the power; so with the mounted police at your back, with the resources of civilisation at your command, you will be able to deal out justice as it has been dealt out to you, and you will be able to crush capitalism as mercilessly as it has remorselessly attempted to crush labour. If the present troubles will only cause men to think, the glad day will not be far distant when we shall see—

Every freemen with unpurphased hand

Every freeman with unpurchased hand, Casting the vote that shakes the laurels of the land."

The Editor, Daily Telegraph, Sydney.

Broken Hill, 5 November, 1892. Would you kindly inform me if your correspondent actually heard me use the words or express the sentiments contained in your report of my speech of 28th ultimo, which appeared in your issue of 29th ultimo, or whether he received the information forwarded from a second party?

My reason for so asking is that I have received a communication from the Government re report that has appeared in your issue of 29th instant.

in your issue of 29th instant.

Your correspondent, I have reasons to believe, was not present when I spoke, and I have reason for believing that the information was supplied him by the reporter of the Silver Age. If this is so, the reports that have appeared in the metropolitan press have really emanated from one source.

As the Government have deemed the speech important enough to make inquiries about it, I feel that, in justice to

As the Government have deemed one speech important the graph of the gr

Before taking further action in this case, I would like all papers and reports from police, Police Magistrates, &c., put together, and resubmitted for a special Cabinet on Monday.—G.R.D., 11/11/92.

The Principal Under Secretary to Mr. J. Thomas, J.P.

Colonial Secretary's Office, Sydney, 22 November, 1892. Sir. With reference to the explanation furnished by you on the 5th instant, regarding your utterances in connection with the Broken Hill strike, as reported in the Sydney Morning Herald and the Silver Age newspapers, on the 29th ultimo, I am directed to inform you that in the opinion of the Colonial Secretary your utterances on the occasion in question demonstrate that you are without the proper conception of duty and responsibility which should belong to a member of the magistracy, and, therefore, to request that you will be good enough to resign your appointment on the Commission of the Peace, so that no further step may be made necessary.

I have, &c. CRÍTCHETT WALKER, Principal Under Secretary.

Mr. J. Thomas, J.P., to The Colonial Secretary.

Sir,

A.M.A. Office, Argent-street, Broken Hill, 28 November, 1892.

I am in receipt of your favour, calling upon me to resign from the Commission of Peace. This I do not purpose doing, preferring to give the Government the opportunity of dealing with me in the way they deem advisable.

I am, &c.,

JOSIAH THOMAS

(per G.T.)

Issue a supersedeas at once, and inform Mr. Thomas accordingly.—G.R.D., 1/12/92.

Telegram from the Principal Under Secretary to Mr. J. Thomas.

Sydney, 1 December, 1892. Your letter of the 28th ultimo just received, and as you decline to relinquish your position, I am directed to inform you that a minute for the Executive Council has been signed by the Colonial Secretary for the removal of your name from the Commission of the Peace, and a writ of supersedeas will be issued forthwith.

Minute Paper for the Executive Council.

No. 1.

Minute of The Minister of Justice.

What is the nature of the reports as to the necessity for or advisability of a District Court and Quarter Sessions at Brewarrina.

H.E.C., 28/11/84.

The present state of this matter is shown in the printed returns of correspondence on the subject herewith. No further action has since been taken in the matter. It will be seen that Judge Murray's report is favourable to the holding of a Court at Brewarrina, and as the Court-house accommodation is now being enlarged, and the Judge passes through this place to go to Bourke, there would appear to be fair grounds for establishing a District Court at Brewarrina in first instance. It is understood that there is no gool 176—A

requirements at this place, and therefore the holding of Quarter Sessions might be postponed for the present. It is suggested that a copy of Parliamentary returns be sent to Acting Judge Fitzhardinge for report in reference to the holding of a District Court at Brewarrina during ensuing year.—T.E.M'N., 29/11/84.

Judge Fitzhardinge will vacate his present position very shortly, when Judge Backhouse will be the Judge for the North-Western District, and reference might be made to the latter Judge for inquiry and report as to the holding Courts at Brewarrina during the ensuing year.—W.E.P., 29/11/84.

Approved.—H.E.C., 1/12/84. Judge Fitzhardinge will have some knowledge of the requirements

of this place, and the papers might be referred to him in the first instance, and afterwards to Judge Backhouse.—W.E.P., 3/12/84.

No. 2.

The Under Secretary of Justice to Their Honors Judges Backhouse and Fitzhardinge.

Department of Justice, Sydney, 2 December, 1884: In transmitting to you the enclosed papers, regarding the proposed establishment of District Courts and Quarter Sessions at Brewarrina, I am directed by the Minister of Justice to invite you to have the goodness to favour him at your early convenience with a report upon the subject, and as to the necessity for holding such Courts at that place during the ensuing year.

A similar communication has been addressed to Judge Fitzhardinge.

Î have, &c., W. E. PLUNKETT,

Under Secretary.

[Similar communication addressed to Acting Judge Fitzhardinge.]

No. 3.

His Honor Judge Backhouse to The Under Secretary of Justice.

Sir, I have the honor to acknowledge the receipt of your letter (84-12,170) enclosing papers respecting a proposal to establish Courts of Quarter Sessions and District Courts at Brewarrina, and to report for the information of the Hon. the Minister of Justice as follows:

I have read the copies of the reports on this matter by Judge Docker and Superintendent Lydiard,

and entirely agree with the opinions expressed and the reasons given by those gentlemen.

By the papers it does not apper that any additional facts have been brought forward in favour of the proposal since the date of those reports, and I therefore do not see how I can recommend the establishment. I have, &c. lishment of the proposed Courts.

ALFD. P. BACKHOUSE District Court Judge.

No. 4.

R. Barton, Esq., M.P., to The Minister of Justice.

"Russell Lea," Five Dock, 13 December, 1884. On behalf of the people resident in the town and district of Brewarrina, I have the honor to request that you will take the necessary steps to include that town in the list of places in which District Courts are held.

This is a place of very considerable importance, having a large and thickly-populated district, and

growing rapidly of more importance every day.

It is known that a railway has been promised, to be included in the next railway proposals, which will tend very materially to increase the population.

Taking all things into consideration, I trust you will see your way to granting this request.

I have, &c., RUSSELL BARTON.

Remind the P.M., Brewarrina, and ask him to endeavour to supply the requisite information.— 1, 13/1/85. See 84-12,819 and 85-1,231. Inform in similar terms.—W.E.P., 6/2/85.

No. 5.

His Honor Acting Judge Fitzhardinge to The Under Secretary of Justice.

"Nunda," Birchgrove, Balmain, 15 December, 1884. In reply to your letter of the 2nd December, which only reached me on the 11th, I have to

report that no Judge or Crown Prosecutor has passed through Brewarrina since April, 1881.

The railway to Bourke, which should be ready for traffic early in the coming year, will most probably draw away from Brewarrina the little which now passes through from the country lying towards

I have no special knowledge of the requirements of the district, not having been in Brewarrina I have, &c., since 1881.

GRANTLEY FITZHARDINGE Acting District Court Judge.

Submitted.—W.E.P., 16/12/84. Obtain information, if available, as to the number of cases from Brewarrina that have been tried in other District Courts in that part of the Colony.—H.E.C., 19/12/84.

Ask P.M., Brewarrina, if this information can be supplied, or if he can suggest how it can be obtained (by letter) respecting establishment of District Courts and Quarter Sessions at that place.—
T.E.M. N., 20/12/84.

No. 6.

The Under Secretary of Justice to The Police Magistrate, Brewarrina.

Sir,

Referring to the proposed establishment of District Courts and Quarter Sessions at Brewarrina, I am directed by the Minister of Justice to request that you will have the goodness to furnish him with a statement of the number of cases from Brewarrina that have been tried in other District Courts in that part of the Colony since 1st January, 1881, or, if you cannot supply such information, to suggest how same can be obtained.

W. E. PLUNKETT,

Under Secretary

Under Secretary.

No. 7.

The Under Secretary of Justice to The Police Magistrate, Brewarrina.

Department of Justice, Sydney, 14 January, 1885. Not having received a reply to my letter of the 22nd ultimo, respecting the establishment of a District Court and Court of Quarter Sessions at Brewarrina, I am directed by the Minister of Justice to draw your attention thereto, and request the favour of your early answer.

I have, &c W. E. PLUNKETT, Under Secretary.

No. 8.

The Police Magistrate, Brewarrina, to The Under Secretary of Justice.

Court-house, Brewarrina, 19 January, 1885. In reply to your letters, Nos. 84-11,820 and 84-12,752, I have the honor to forward a statement of the number of cases from Brewarrina that have been tried at Bourke District Court since 1st January, 1881, from information received from the Registrar of the District Court, Bourke, viz.:-January, 1881, from information received from the Registrar of the District Court, Bourke, viz.:—During year 1881, five cases; 1882, five cases; 1883, five cases; 1884, four cases; total, nineteen cases. Being desirous to afford the Minister of Justice additional important information re the proposed establishment of District Courts and Courts of Quarter Sessions at Brewarrina, I delayed replying until the police had completed the collection of the electoral list for this year, in order to ascertain the number of persons in the Brewarrina district who would be eligible to serve as jurymen. From information supplied to me by Sergeant George Steele, in charge of the police of this district, I find that within a radius of 50 miles there are only about fifty persons eligible to serve as jurymen.

I have, &c. ALBERT K. BEVERIDGE. Police Magistrate.

Submitted.—W.E.P., 31/1/85. The result of this inquiry would not justify the establishment of Courts of Quarter Sessions or District Courts at Brewarrina at present.—H.E.C., 4/2/85.

No. 9.

The Under Secretary of Justice to R. Barton, Esq., M.P.

Sir,

Referring to your letter of the 13th December last, requesting that the necessary steps may be taken to include Brewarrina in the list of places in which District Courts are held, I have the honor, by direction of the Minister of Justice, to inform you that the result of the inquiries which have been made upon the subject would not justify the establishment of Courts of Quarter Sessions or District Courts at that place at present.

I have, &c.,

W. E. DI HNKERE Department of Justice, Sydney, 5 February, 1885.

W. É. PLUNKETT, Under Secretary.

No. 10.

The Under Secretary of Justice to The Police Magistrate, Brewarrina.

Department of Justice, Sydney, 6 February, 1885. I have, &c. W. E. PLUNKETT, Under Secretary.

No. 11.

The Honorary Secretary, Brewarrina Progress Association, to W. Sawers and R. Barton, Esqs., M's.P.

Gentlemen, Brewarrina, 17 February, 1886. At a committee meeting of the Brewarrina Progress Association, I was instructed to write to you asking if you would call upon the Minister of Justice, and urge upon him the necessity of having a District Court established here.

There are manifold reasons why a Court should be established here :-

 The district of Brewarrina is a large and important one, with an increasing population.
 The present place for holding Court for this district is at Bourke, which is distant 65 miles, though in many instances suitors are obliged to travel 100 to attend it, and it is not too much to say that the ends of justice are frequently defeated owing to the reluctance of witnesses to leave their homes and employment, for they are put to considerable loss and inconvenience, for which they receive a mere pittance, totally inadequate for the loss of time and means they incur. Thus it is that a suitor will often forego the remedy provided for him by law against the offender rather than take his case to a Court where he will receive no benefit. The scale of expenses allowed for travelling even does not afford a recompense for the most reasonable outlay

3. A large and ample Court-house provides ample accommodation for the profession and public.
4. A District Court summons must be issued from Bourke, which entails a week's delay—a great disadvantage, as it is often of importance that the greatest despatch should be exercised. J am, &c.,

ARCHD. CAMPBELL,

. Hon. Sec., Brewarrina Progress Association.

[Presented by Messrs. Sawers and Barton, Members for Bourke.]

Judge Backhouse, Coonamble.—W. E. Plunkett, B.C., 17/3/86.

No. 12.

His Honor Judge Backhouse to The Under Secretary of Justice.

Court-house, Coonamble, 23 March, 1886. I have the honor to return the enclosed papers, and to report, for the information of the

Honorable the Minister of Justice, as follows:—
From inquiries I have made I find that the number of cases set down from Brewarrina District for trial at the District Courts held at Bourke from the beginning of the year 1883 up to the present time are,-

Defended, 6; undefended, 13; total, 19. (Detailed list enclosed.)

The number of undefended cases would probably have been reduced if more advantage had been taken of the provisions of the District Courts Act Amendment Act of 1884.

During the time specified eight District Courts have been held at Bourke.

- A total of nineteen cases for eight Courts does not appear to me to justify the expenditure which would be incurred in establishing a separate District Court at Brewarrina.

 2. With reference to the statement in the second paragraph of Mr. Campbell's letter, "the ends of justice are frequently defeated," it is a statement too vague to act upon unless it be fortified by more definite information. My experience is that the necessity of travelling some miles extra does not make suiters forces their civil rights, although it may prevent months beinging offenders to justice in the suitors forego their civil rights, although it may prevent people bringing offenders to justice in the Criminal Courts.
- 3. The present allowance to witnesses may be such as to cause very great hardship, but it is not the matter under consideration.

4. I do not see why there should necessarily be a week's delay in issuing a summons, as stated in

the fourth paragraph of Mr. Campbell's letter.

5. Under these circumstances, although I am fully aware that the establishment of a District Court at Brewarrina would confer a great benefit upon the inhabitants of that town and the surrounding district, I am unable at present to recommend it.

I have, &c. ALFD. P. BACKHOUSE, D.C.J.

CASES set down for trial at District Court, Bourke, from Brewarrina District.

There are difficulties in the way and no pressing necessity at the present time for holding District The Courts have been proclaimed for the year 1886.—W.E.P., 3/4/86. Courts at Brewarrina. Approved.—J.P.G., 29/5/86.

No. 13.

The Under Secretary of Justice to W. B. Sawers and R. Barton, Esqs., M's.P.

Gentlemen,

Referring to letter of the 17th February last, presented by you at this Department from the honorary secretary of the Brewarrina Progress Committee, urging the establishment of a District Court at that place, I have the honor, by direction of the Minister of Justice, to inform you that upon reference to the Judge of the North-Western District it has been ascertained that there are many difficulties in the way of holding a District Court at Brewarrina, and there does not appear to be any pressing necessity for such Courts at the present time, of which you will perhaps have the goodness to apprise the committee.

I have, &c.,

W. E. PLUNKETT, Under Secretary.

No. 14.

W. N. Willis, Esq., M.P., to The Minister of Justice.

Dear Sir,

I have the honor to request that you will be good enough to have established a District Court at Brewarrina. For many years this has been asked for; the arguments are numerous, and all in favour of the establishment of a District Court. One look at the map, showing the geographical position, will bear out what I say.

Yours, &c.,

W. N. WILLIS.

Brewarrina is at present in the Bourke District Court District. The Registrar of the District Court at Bourke may be requested to furnish a return showing the number of cases arising from Brewarrina and its neighbourhood within the past four years in which process has been issued in that Court.

—A.C.F., 17/2/92.

No. 15.

The Under Secretary of Justice to W. N. Willis, Esq., M.P.

Sir, . Department of Justice, Sydney, 17 February, 1892.

I have the honor, by direction of the Minister of Justice, to acknowledge the receipt of your letter of the 15th instant, recommending the establishment of a District Court at Brewarrina, and to inform you that the matter will receive due consideration.

I have, &c., . ARCH. C. FRASER, Under Secretary.

No. 16.

The Under Secretary of Justice to The Registrar, District Court, Bourke.

Sir,

I have the honor to request you to be good enough to furnish me with a return showing the number of cases arising from Brewarrina and its neighbourhood, within the past four years, in which process has been issued in the District Court at Bourke.

have, &c.,
ARCH. C. FRASER,
Under Secretary.

No. 17.

The Registrar, District Court, Bourke, to The Under Secretary of Justice.

Sir,

As requested in your letter of the 23rd ultimo, I have the honor to forward herewith a return showing the number of cases arising from Brewarrina and neighbourhood within the past four years in which process has been issued in the Bourke District Court.

In 1888 there were ninety-three cases issued out of this Court, of which one was issued by a Brewarrina resident against another; two by Bourke residents against Brewarrina residents; and one by a resident of another district against a Brewarrina resident.

In 1889 there were 104 cases issued, including eleven against Brewarrina residents, eight of which were issued by Bourke business people against Brewarrina debtors, and the remaining three by Brewarrina residents versus others.

In 1890 there were eighty-nine cases issued, including six against Brewarrina residents, five of which were issued by Bourke residents.

In 1891 there were 127 cases issued, including eleven against Brewarrina residents, seven of which were issued by Bourke residents, four by Brewarrina residents against others, and one by a Brewarrina resident against Bourke resident.

I have, &c.,

GEORGE ATKIN, District Court Registrar.

Submitted. The enclosed return of cases arising from Brewarrina and neighbourhood during the four years 1888-1891 in which process has been issued in the Bourke District Court is submitted for the Minister's consideration in connection with the application of Mr. Willis, M.P., for the establishment of a District Court at Brewarrina. The matter was previously under consideration in 1886, but it did not then appear necessary to establish the Court. The return above mentioned shows that the necessity for the

*This Bill has now become law Copy enclosed, 5/4,92.

the Court now is not very great, and as twenty of the thirty-two cases arising from Brewarrina and neighbourhood within the four years specified were for amounts under £30, it is probable that if the Bill now before Parliament providing for the extension of the jurisdiction to debts of £30 becomes law,* any necessity that now exists for the holding of a District Court at Brewarrina will be to a great extent removed. It therefore appears inadvisable to establish such Court at present. Brewarrina is 60 miles from Bourke.—A.C.F.

There does not seem to be at present sufficient reason to justify establishment of a District Court

at Brewarrina.—R.E.O'C., 15/4/92.

No. 18.

The Under Secretary of Justice to W. N. Willis, Esq., M.P.

Department of Justice, 21 April, 1892. Referring to your letter of the 15th February last, on the subject of the desirableness of establishing a District Court at Brewarrina, I have the honor, by direction of the Minister of Justice, to inform you that he regrets he is unable to comply with your request, as there does not seem to be at present sufficient reason to justify the establishment of a District Court at that place.

I have, &c., Sir,

ÁRCH. C. FRASER, Under Secretary.

Sydney: Charles Potter, Government Printer.-1892.

No. 1.

The Police Magistrate, Kiama, to The Under Secretary of Justice.

Sir,

Police Court, Kiama, 13 October, 1890.

I have the honor to bring under your notice the fact that the railway now being extended from North Kiama to Nowra will pass within 10 feet of the Court-house at Kiama, the centre of the line will be 58 feet from the building, and the boundary fence 10 feet therefrom.

The station will be about 10 chains from the Court-house, and I think it will be found that the proximity of the line, and the whistling of the engine on approaching the station will be such an annoyance as to cause the present Court-house to be unfit for the purpose for which it is used.

The Railway Department will resume 22 perches of land, part of the Court-house yard.

There will remain a frontage to Terralong-street of about 70 feet by about 150 feet deep, which is estimated as being worth about £40 per foot frontage. A suitable site for a Court-house, lock-up, &c., could be had on the reserve for public buildings in Manning-street, and if the present site were sold the proceeds would be sufficient to erect a new Court-house, lock-up, &c. proceeds would be sufficient to erect a new Court-house, lock-up, &c.

I have thought it my duty to make you acquainted with the matter.

I have, &c., F. W. EDWARDS, P.M. Submitted.-

485-A

Government Architect, for favour of report.—A.J.G., 15/10/90. Submitted.—A.C.F., 14/10/90.

I have recently inspected this building, and conferred with the Police Magistrate as to any incon-I have recently inspected this building, and conferred with the Police Magistrate as to any inconvenience that might be occasioned through the railway extension referred to, and find that although the Court-house site will be slightly encroached upon, no disturbance to court business by the anticipated railway traffic need, I think, be apprehended. The building is substantial, and apparently sufficient for the requirements of the district for some time to come, but it requires general renovating, painting, &c. Should it, however, be decided for other reasons to remove the building, the reserve for public buildings in Manning-street, close by, named by the Police Magistrate, would be a suitable site.—W.L.V., 21/11/90.

Submitted.—A.C.F., 24/11/90. In view of the terms of this report the removal of the Courthouse would not appear necessary. An estimate of cost of repairs, &c., may be submitted.—A.J.G., 24/11/90. The Government Architect.—A.C.F., B.C., 25/11/90.

The cost of necessary repairs, painting &c., removing present old verandah, and replacing same

The cost of necessary repairs, painting, &c., removing present old verandah, and replacing same with vestibule, adding also a room for witnesses, much required, as shown in accompanying plan, will be about £250, chargeable to vote, Gaol and Court-houses.—W.L.V., 22/12/90.

Resubmitted.—A.C.F., 31/12/90. Approved.—A.J.G., 7/1/91. The Government Architect.—

No. 2.

The Under Secretary of Justice to The Police Magistrate, Kiama.

Department of Justice, Sydney, 25 November, 1890. Sir, Referring to your letter of the 13th ultimo, in which you state that the railway now being extended will pass within 10 feet of the Court-house at Kiama, and suggest the erection of a new building on another site, I am directed by the Minister of Justice to inform you that, in view of a report obtained upon the subject, he is of opinion that the erection of a new Court-house would not appear to be necessary. I have, &c.

ARCH. C. FRASER, Under Secretary.

No. 3.

G. W. Fuller, Esq., M.P., to The Minister of Justice.

Legislative Assembly, 23 October, 1893. desire respectfully to bring under your notice the condition of the Court-house in the town The building is very old, and the front of it in a dilapidated condition. In consequence of the extension of the line into the town of Kiama, part of the Court-house reserve has had to be resumed, the line running within a few feet of the building. As the station is quite close, this will make the Court-house very noisy and inconvenient. The land left on which the building stands is 70 x 150. This is variously estimated at from £35 to £50 per foot. With the money obtained from this sale a fine building could be erected; and as there is a suitable site in the market square, between the School of Arts and Town Hall sites, I urge upon you the desirability of selling the present site, and having a new Court-house erected suitable for the requirements of the town.

Trusting you will immediately take the matter into your consideration.

I remain, &c. GEORGE W. FULLER.

Submitted.—The previous papers in this matter were sent to the Government Architect on 15th instant for report upon a communication received from the Police Magistrate, Kiama, in regard to the erection of a new building.—A.C.F., 22/10/90.

Mr. Fuller may be so informed.—A.J.G., 23/10/90.

No. 4.

The Under Secretary of Justice to G. W. Fuller, Esq., M.P.

Department of Justice, Sydney, 24 October, 1890. Sir. I have the honor, by direction of the Minister of Justice, to acknowledge the receipt of your letter of 23rd instant, urging the erection of a new Court-house at Kiama, and to inform you that the previous papers in this matter were sent to the Government Architect on the 15th idem for report upon a communication received from the Police Magistrate at that place with regard to the erection of a new I have, &c. building.

ARCH. C. FRASER, Under Secretary.

No. 5.

The Police Magistrate, Kiama, to The Under Secretary of Justice.

Police Office, Kiama, 22 November, 1890. Sir. I have the honor herewith to enclose a notice and form of offer and particulars in connection with the resumption of land for railway purposes which were served on me to-day by Mr. Thompson, Government Valuator.

There are no improvements on the area to be resumed.

The land is valued at from £35 to £50 per foot frontage, which is 44 feet.

Should you deem it advisable to obtain a valuation from one of the valuators acting for owners of I have, &c., F. W. EDWARDS, land, I can do so.

Police Magistrate. [Enclosure.]

[Enclosure.]

GOVERNMENT RAILWAY FROM KIAMA TO NOWRA.

Notice of lands taken for railway purposes by the Minister for Public Works, New South Wales.

To the Department of Justice,—

Whereas by an Act of Council made and passed in the fifty-first year of the reign of Her Majesty Queen Victoria, intituled "The Public Works Act of 1888," His Excellency the Governor of the Colony of New South Wales is empowered to direct that any land required in his opinion for any authorised public work may be acquired under the provisions in the said Act contained. And whereas the Constructing Authority is thereupon empowered to enter into and upon the lands and grounds of any person whomsoever so directed to be acquired as aforesaid, and to take and appropriate for the purposes in the said Act mentioned such parts thereof as may be necessary and proper for the laying out and making and using any such authorised work and all other works, matters, and conveniences connected therewith. And whereas His Excellency the Governor, under and by virtue of the authority aforesaid vested in him by the said Act, has directed that the land described in the schedule hereto is required for the purposes of the authorised work hereinafter mentioned, and that the said land shall accordingly be taken and acquired under the provisions of the said Act. And whereas the Minister for Public Works is the duly constituted Constructing Authority within the meaning of the said Act for the carrying out of the said authorised work. And whereas the said land set out and described in the schedule hereto for the purpose of and in connection with the construction or extension of the railway line from Kiama to Nowra, the construction or extension of the said line being an "authorised work" within the meaning of the said Nowra, the construction or extension of the said line being an "authorised work" within the meaning of the said Act. And whereas, in compliance with the requirements of the said Act in that behalf, a plan of the said line with a book of reference containing a description of the lands, including the lands in the schedule hereto, through which the said railway between the places aforesaid accordi

In witness whereof, the Constructing Authority hath caused its seal to be hereto affixed at Sydney, in the Colony aforesaid, this 19th day of November, A.D. 189

BRUCE SMITH, Constructing Authority.

The seal of the Constructing Authority was duly affixed hereto, in presence of,—
J. W. HOLLIMAN.

The Schedule referred to in the foregoing notice.

All that parcel of land situated in the parish of Kiama, in the county of Camden, containing by admeasurement 22 perches, more or less, and more particularly described in the plan hereunto annexed or endorsed thereon, and therein coloured red, and numbered 48 on the plan or book of reference, duly confirmed by His Excellency the Governor on the 21st day of October, 1890.

Submitted. See memo. herewith.-A.C.F., 25/11/90.

No. 6.

Memo. by the Under Secretary of Justice.

Department of Justice, Sydney, 10 December, 1890.

The papers in this matter might be referred to the Works Department with request that a valuation be obtained from the Government Valuator (Mr. Thompson), who is an officer under that Department, in Nowra. As the matter rests between this Department and the Works, it would not seem to be necessary to incur the expense of obtaining a private valuation, as it may be deemed proper to accept the Government valuation, and so avoid any possible difference in amount which might require settlement by arbitration.

When the valuation has been obtained, the Railway Department might be notified of the acceptance of same, and requested to adjust with this Department, and the money might be credited (if practicable) to Court-house Vote, or paid to credit of Consolidated Revenue on account of Department.

Approved.—A.J.G., 11/12/90.

A.C.F.

No. 7.

The Under Secretary of Justice to The Under Secretary for Public Works.

Department of Justice, Sydney, 12 December, 1890. In transmitting to you the accompanying notice, and other documents in connection with the resumption of land for railway purposes at Kiama, which have been served on the Police Magistrate at that place, by Mr. Thompson, Government Valuator, I am directed by the Minister for Justice to request that you will move the Secretary for Works to have the goodness to obtain from Mr. Thompson a valuation in respect of the portion of the present Court-house site, which it is proposed to resume in connection with the railway from Kiama to Nowra, and furnish same to this Department as early as practicable.

I have, &c., ARCH. C. FRASER,

Land Valuer.—D.C.M[°]L. (for U.S.), B.C., 15/12/90. possible.—J.B.T., 18/12/90. U.S. Works. Re-submit when the submit we have the submit of th This valuation will be made as early as Re-submit when made. - D.C.M'L. (for U.S.), 18/12/90.

No. 8.

Minute by the Minister of Justice.

Kiama Court-house.

Department of Justice, Sydney, 23 April, 1891. Mr. Fuller's letter of 23/10/90 had better be forwarded Government Architect in connection with previous papers, with request for favour of early report. A.J.G.

The Government Architect.—T.E.M'N. (pro U.S.), B.C., 23/4/91.

No. 9.

Minute by the Minister of Justice.

Department of Justice, 27 August, 1891.

Mr. Fuller, M.P., with Mr. Noble, J.P., represent that the erection of a new Court-house at Kiama is a matter of urgency, in view of the present state of the Court-house and the probable early extension of the railway, which will pass within 10 feet of the present building.

Mr. Fuller suggests the erection of a new Court-house, corner Market and Manning Streets, on a site now the property of the Government, saying that if the site in Terralong-street were sold it would probably realise more than sufficient to pay the cost of a new building.

This matter should be fully reported on without deler

This matter should be fully reported on without delay.

A.J.G.

Refer to letter to Works Department of 12/12/90, to which no reply has been received, and embody this minute in further letter, asking early report on the subject.—T.E.M'N. (for U.S.), 27/8/91.

No. 10.

The Under Secretary of Justice to The Under Secretary of Public Works.

Department of Justice, Sydney, 28 August, 1891. Referring to my letter of the 12th December last (copy of which is enclosed), respecting the site of the Court-house at Kiama, I am directed by the Minister of Justice to inform you that representations have been made to this Department that the erection of a new Court-house at the place named is a matter of urgency in view of the present state of the Court-house and the probable early extension of

the railway which will pass within 10 feet of the present building.

It has also been suggested that the new Court-house should be crected on a site at the corner of Market and Manning Streets now the property of the Government, and that if the site in Terralong-street were sold it would probably realise more than sufficient to pay the cost of a new building.

I am to add that Mr. Gould desires that this matter should be fully reported on with the least

possible delay.

I have, &c., ARCH. C. FRASER, Under Secretary.

The Land Valuer, with reference to previous papers.—J.B., B.C., 29/8/91. Mr. Vernon for report.—J.B., 7/9/91.

No. 11.

The Under Secretary of Justice to The Under Secretary for Public Works.

Department of Justice, Sydney, 12 September, 1891. Referring to my letter of the 28th ultimo and previous correspondence on the subject of a site for a new Court-house at Kiama, I have the honor to invite your attention thereto, and to ask that the report desired by the Minister may be forwarded as early as possible, the matter being one of I have, &c., urgency. ARCH. C. FRASER,

Under Secretary.

No. 12.

Memo. from The Government Architect to The Under Secretary for Public Works. Subject:—Proposed New Court-house, Kiama.

Department of Public Works, Government Architect's Branch, 15 September, 1891. In respect to this matter and the papers thereon containing a minute dated 21st November, 1890, in which, after a careful inspection, I reported that with certain repairs and additions, at an estimated cost of £250-£300, the present Court-house would answer all purposes for some time to come, and which recommendation received ministerial sanction, I have the honor to report that should it be decided notwithstanding to erect a new building, the site suggested at the corner of Manning and Market Streets is in all respects

suitable one, and the cost is estimated at £3,000. It is very problematical whether the old building and site in Terralong-street would, if offered for sale, fetch anything like that sum. W. L. VERNON.

The Under Secretary for Justice.—J.B., B.C., 16/9/91. Submitted with reference to Minister's minute, 27/8/91.—A.C.F., 21/9/91. Government Valuator might be asked for report as to value of present building site.—A.J.G., 25/9/91. The Under Secretary for Public Works.—T.E.M'N. (for U.S.), B.C., 28/9/91. Land Valuer.—D.C.M'L. (for U.S.), B.C., 28/9/91.

I think the present site, which is in the best part of Kiama and has a frontage of 165 feet to Terralong-street, is worth about £15 per foot (exclusive of buildings), or altogether £2,475 for the land only.—J.B.T., 6/10/91. U.S. Works.

The Under Secretary for Justice.—J.B., B.C., 6/10/91. Submitted.—A.C.F., 8/10/91. me have plan of present Court-house with prior papers re repairs, &c.—A.J.G., 12/10/91. The Under Secretary for Public Works.—A.C.F., B.C., 13/10/91. The Govt. Architect.—D.C.M'L. (per U.S.), B.C., 14/10/91. Plans of present Court-house herewith, as requested by the Minister for Justice.—W.L.V., B.C., 16/10/91. Under Secretary Public Works. The Under Secretary for Justice.—J.B., B.C., 20/10/91. Submitted.—A.C.F., 22/10/91.

I may be permitted to urge upon my successor an early decision upon Mr. Fuller's application for the erection of a new Court-house at Kiama. The state of the present building and the early completion of the railways are strong factors in my mind to justify a compliance with Mr. Fuller's recommendation.—A.J.G., 23/10/91. Submitted.—T.E.M'N., 27/10/91.

No. 13.

Minute by the Minister of Justice.

If the proposed plan contains police accommodation can be submitted to the Inspector-General after I have seen it.

R. E. O'CONNOR, 31/12/91.

Forwarded to the Under Secretary for Public Works, with a view to the Government Architect being instructed to prepare plans of a new Court-house at Kiama as desired by the Minister of Justice.—T.E.M.N. (pro U.S.), B.C., 8/1/92.

The Government Architect.—D.C.M.L. (pro U.S.), B.C., 11/1/92.

No. 14.

Minute by the Government Architect to The Under Secretary for Public Works. Subject: - New Court-house, Kiama.

Department of Public Works, Government Architect's Branch, Sydney, 25 January, 1892. I FORWARD herewith sketch plan of building estimated to cost £3,000.

W. L. VERNON.

Under Secretary for Justice.—J.B., B.C., 28/1/92. Submitted in reference to Minister's minute of 31st December, 1891, herewith. It will be seen that the plan prepared by the Government Architect does not provide for police accommodation.—A.C.F., 3/2/92.

The Inspector-General of Police for report.—R.E.O'C., B.C., 12/2/92. T.E.M'N. (pro U.S.)

No. 15.

The Inspector-General of Police to The Under Secretary of Justice.

Kiama Court-house.

Police Department, Inspector-General's Office, Sydney, 13 February, 1892.

Considering the small amount of railway traffic and the little business at the Court, the inconvenience will not be considerable.

If the site be sold, of course value has been parted with, besides the present Court building, and it has been apparently not taken into consideration that the watch-house is to be included in the sale—an excellent building—and it would probably cost £1,500 to replace it.

I cannot, therefore recommend that the present building should be replaced.

EDMUND FOSBERY, Inspector-General of Police.

B.C. The Under Secretary, Department of Justice. Submitted in reference to Minister's minute of 12th inst.—A.C.F., 16/2/92. I would like to see Mr. Fuller about the matter.—R.E.O'C., **1**8/2/92.

No. 16.

The Council Clerk, Kiama, to The Under Secretary for Public Works.

Sir, Kiama Municipal Council, Kiama, 20 April, 1892. I have the honor, by instructions from this Council, to call your attention to the bad state of a portion of the public footway on Government property on the southern side of Terralong-street in this Borough, extending from the Court-house to the post office, and to ask that you will be good enough to have the necessary repairs effected in connection with the same.

I have, &c. JOHN HOLBROOK, Council Clerk. The Government Architect.—J.B., B.C., 24/4/92.

The estimated total cost of this work is £47, chargeable equally to votes for Court-houses and post and telegraph offices, which are both fully appropriated. I would, however, point out that recent papers show it is intended to condemn the present court buildings, and sell the site.—W.L.V. The Under

Secretary for Works, 31/5/92.
Will the Under Secretary for Justice kindly say what his Department proposes to do in the matter

of the Court-house.—W.L., 7/6/92.

No. 17.

Minute by The Under Secretary of Justice.

Department of Justice, Sydney, 19 May, 1892.

Memo.—Before submitting these papers to the Minister to be finally dealt with, I shall be obliged if the Inspector-General of Police will state what accommodation will be required for the police, in the event of it being decided that a new Court-house should be erected on the site at the corner of Market and Manning Streets, Kiama. An early answer will oblige.

The Inspector-General of Police.—A.C.F., B.C.

No. 18.

Mr. Police-Superintendent Ryeland to The Inspector-General of Police.

Police Department, Superintendent's Office, Eastern District,

Sydney, 26 May, 1892. Sir, I beg to report that if the Court-house at Kiama be repaired, and the additions made to same, as recommended by the Government Architect, it will, I am of opinion, afford sufficient accommodation for some years. The railway traffic passing near will not be much inconvenience, as very few trains are likely to pass during court hours.

The police quarters, stables, and lock-up (nearly new), with quarters, are on the same line of frontage; therefore, if decided to erect a new Court-house on the site proposed, a new lock-up, with quarters, barracks, stables, &c., will be necessary, at a cost of at least £2.500.

I have, &c., JAS. RYELAND,

Superintendent.

Forwarded for the information of the Minister for Justice. I am of opinion that the erection of a new building is wholly unnecessary. The cost for this Department would certainly be greater than estimated by Mr. Ryeland:—The lock-up (say) £1,700; barracks, £2,000; stabling, £300; total, £4,000.—Edmund Fosbery, I.G.P., B.C., 26/5/92. The Under Secretary, Department of Justice.

No. 19.

The Under Secretary of Justice to The Under Secretary for Public Works.

Department of Justice, Sydney, 18 July, 1892. Referring to your B.C. communication of the 7th ultimo, in which you ask to be informed what is being done in respect of the proposed erection of a new Court-house at Kiama, I am directed to inform you that considering the urgent necessity for restricting expenditure at present, the Minister is not disposed to sanction any outlay which is not absolutely necessary; and looking at the matter from every point of view, he does not see any immediate necessity for the erection of new buildings at that place, as the suggested repairs to the old buildings will, in his opinion, be all that is necessary for some time to come.

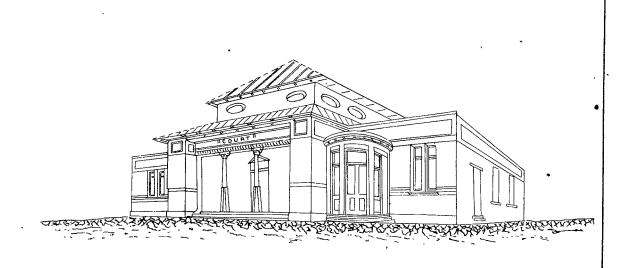

I am, therefore, to ask you to invite the Secretary for Public Works to be good enough to instruct the Government Architect to proceed with the repairs suggested as early as possible, such expenditure to form a charge against the unexpended balance of the vote for repairs, &c., to Court-houses, 1892.

1 have, &c. ARCH. C. FRASER, Under Secretary.

The Government Architect. -- D.C.M'L. (per U.S.), B.C., 20/7/92.

F. S. OSBORN,
Registrar, District Court.

1892.

NEW SOUTH WALES.

RULES OF THE SUPREME COURT.

(IN BANKRUPTCY JURISDICTION.)

Presented to Parliament, pursuant to Act 51 Tictoria, Ao. 19, sec. 119.

In the Supreme Court of New South Wales.

In Bankruptey.

GENERAL Rules made pursuant to section 119 of the Bankruptcy Act, 1887—Wednesday, the 9th day of May, 1892.

Certificate Applications.

1. A bankrupt intending to apply for a certificate of discharge shall procure from the Official Assignee of his estate, and file in the office of the Registrar in Bankruptcy a certificate specifying the number of his creditors who require to be notified of his intention to apply for his discharge.

2. If at the hearing of any application for a certificate of discharge it shall appear to the Judge or Registrar that all costs, charges, and expenses of the Official Assignee, allowed by the Judge or Registrar, have not been paid, the Judge or Registrar may adjourn the hearing of the application until such costs, charges, and expenses have been paid.

Costs.

In respect of the payment of costs ordered by the Judge or Registrar, when the amount of such costs shall have been duly taxed and certified by the proper officer of the Court, and a copy of the certificate of taxation duly served on the party by whom such costs are payable, or his solicitor, and on non-payment thereof within fourteen days of such service, execution shall be issued under a writ of f. fa. upon an affidavit of such service, and non-payment as aforesaid.

Appeals.

Rule 2 of the Bankruptcy Rules of the 19th day of December, 1889, is hereby repealed, and the following substituted in lieu thereof:—

2. In bankruptcy appeals to the full Court the moving party, unless a Judge otherwise order or allow further time, shall, within fourteen days after the filing of the notice of appeal, file with the Registrar in Bankruptcy seven printed copies of the notice of motion summons, the order appealed from, and the judgment of the Judge making such order, approved of by him, and the whole or such portions as the said Registrar shall direct of the other documents, and of the evidence and exhibits used and referred to in the matter appealed from, and shall within the like time also serve four of such printed copies upon each opposing party.

FREDK. M. DARLEY, C.J. WILLM. C. WINDEYER, J. J. GEO. LONG INNES, J. M. H. STEPHEN, J. WM. OWEN, J. C. J. MANNING, J.

1892-3.

NEW SOUTH WALES.

RULES OF THE SUPREME COURT.

(IN BANKRUPTCY JURISDICTION.)

Presented to Parliament, pursuant to Act 51 Vic. Ao. 19, sec. 119.

In the Supreme Court of New South Wales.
In Bankruptcy.

Thursday, the Twelfth day of January, one thousand eight hundred and ninety-three.

In pursuance of the powers and authority of section 119 of the "Bankruptcy Act, 1887," IT IS ORDERED that the following Rules dealing with the Taxation of Costs, and the Scale of Costs to be allowed, shall come into operation on the First day of February next.

FREDK. M. DARLEY, C.J. W. C. WINDEYER, J. J. GEO. LONG INNES, J. M. H. STEPHEN, J. WM. OWEN, J. W. J. FOSTER, J. C. J. MANNING, J.

RULES DEALING WITH TAXATION OF COSTS IN BANKRUPTCY.

- 1. All Court fees and proper disbursements shall be allowed in addition to the remuneration in this scale provided.
- 2. The taxing officer may require vouchers for all or any payments.
- 3. Bills of Costs shall be written lengthwise on one side only. Dates shall be furnished to each item, but they must not be written in the margin, which shall be left clear for taxation.
- 4. No instructions for an Affidavit shall be allowed when the Solicitor or his Clerk makes the Affidavit, nor for any Affidavit of personal service.
- 5. In cases where allowances are to be made per hour, the Solicitor or Accountant must insert in the Bill of Costs against such items, the exact time occupied, and must produce an affidavit by the person so employed that the time entered in the Bill of Costs was so occupied.
- 6. Bills of Costs must be added up before same are presented for taxation.
- 7. In special cases, where Counsel are not instructed to appear in Court, and the Solicitor acts as advocate, a charge by the Solicitor for the preparation of minutes of facts or evidence for his own use may be allowed, and in addition such special fee as the Taxing Officer may

- think fit, having regard to the nature and importance of the case and the questions involved.
- 8. A folio is to comprise seventy-two words, every figure comprised in a column, or authorised to be used, being counted as a word.
- 9. As to all fees or allowances which are discretionary, the same are, unless otherwise provided, to be allowed at the discretion of the Taxing Officer, who, in the exercise of such discretion, is to take in consideration other fees and allowances to the Solicitors and Counsel (if any) in respect of the work to which any such allowances applies, the nature and importance of the matter, the interest of the parties, the estate or persons to bear the costs, the general conduct and costs of the proceedings, and all other circumstances.
- 10. Any person who may be dissatisfied with the allowance or disallowance by the Taxing Officer in any Bill of Costs taxed by him of the whole or any part of any items, may at any time before the certificate or allocatur is signed, carry in before the Taxing Officer an objection in writing to such allowance or disallowance specifying therein by a list, in a short and concise form, the items or parts thereof objected to, and the grounds and reasons for such objection, and may thereupon apply to the Taxing Officer to review the taxation in respect to the same.

- 11. Upon such application the Taxing Officer shall reconsider and review his taxation upon such objection, and he may, if he shall think fit, receive further evidence in respect thereof, and may alter or confirm such previous allowances.
- 12. Any person who may be dissatisfied with the certificate or allocatur of the Taxing Officer as to any item or part of an item which may have been objected to as aforesaid, may, within fourteen days from the date of the certificate or allocatur, apply to the Judge for an order to review the taxation as to

the same item, or part of an item, and the Judge may thereupon make such order as the Judge may think just; but the certificate or allocatur of the Taxing Officer shall be final and conclusive as to all matters which shall not have been objected to in the manner aforesaid.

13. Such application shall be heard and determined by the Judge upon the evidence which shall have been brought_in_hefore the Taxing Officer, and no further evidence shall be received upon the hearing thereof, unless the Judge shall otherwise direct.

1892-3.

NEW SOUTH WALES.

RULES OF THE SUPREME COURT.

(IN BANKRUPTCY JURISDICTION.)

Presented to Parliament, pursuant to Act 51 Vic. Ao. 19, sec. 119.

In the Supreme Court of New South Wales.

IN BANKRUPTCY.

General Rules made pursuant to 119th section of the Bankruptcy Act, 1887.—Monday the first day of May, 1893.

Rules Repealed.

Rules 52, 58, 68, and 135 (1) of the General Rules of the 1st February, 1888, and Rules 1, 2, 5, and 9 of the Rules of the 1st January, 1890, are hereby repealed.

Bankruptcy Notice.

- 1. On every Bankruptcy Notice shall be endorsed an intimation to the debtor that, if he has a counter-claim, set off, or cross-demand, which equals or exceeds the amount of the judgment debt, and which he could not have set up in the action in which the judgment was obtained, and is desirous of having the Bankruptcy Notice set aside on any of those grounds, he must, within the time specified in such endorsement, file an affidavit to that effect with the Registrar. Such time shall be fixed by the Registrar when issuing the Notice.
- 2. Any debtor desirous of setting aside a Bankruptcy Notice on any grounds other than those mentioned in the preceding rule, shall file a Notice of Motion setting forth such grounds within the time so specified in the endorsement.

Creditor's Petition.

3. After the presentation of a creditor's petition, and before signing and sealing the notice thereon, the statements contained in the Petition shall be perused by the Registrar or Chief Clerk.

Date of Hearing.

4. The Registrar or Chief Clerk shall appoint the day and hour at which the Petition will be heard, and notice thereof shall be written on the Petition and sealed copies, and where the Petition has not been served the Registrar or Chief Clerk may from time to time alter the first day so appointed and appoint another day and hour.

Service.

- 5. A Creditor's Petition shall be personally served by delivering to the Debtor a copy of the filed Petition, with a sealed notice thereon, signed by the Registrar or Chief Clerk, of the time and place for hearing of the Petition. Service of the Petition shall in all cases be proved by affidavit with a copy of the Petition attached.
- 6. The Petitioning Creditor on whose Petition a sequestration order is made, shall cause a sealed copy of such order to be served on the Bankrupt.

943-

Certificate of Discharge.

7. In every case of an application by a Bankrupt for a certificate of discharge the report of the Official Assignee, made pursuant to section 37 of the Act, shall be filed not less than seven clear days before the time fixed for hearing of the application, and any affidavit by the Bankrupt in reply to such report shall be filed and a copy thereof served on the Official Assignee two clear days before the day of hearing.

Orders.

8. All orders made in Bankruptcy by the Judge or Registrar may be signed by the Registrar or Chief Clerk as and for the Judge or Registrar.

Bankrupt's Statement of Affairs.

9. As soon as the Official Assignee receives notice that he has been appointed to an estate he shall give the Bankrupt instructions for the preparation of his statement of affairs.

Petition under 111th Section.

10. When a Petition is presented under section 111 of the "Bankruptcy Act," the partners so petitioning shall serve notice of the Petition and a copy of any affidavits to be used in support thereof upon such of the other members of the firm as may be resident in New South Wales, or shall file an affidavit explaining why such service has not been made, and such members may appear on the hearing of such Petition and oppose the making of a sequestration order thereon.

Service of Documents.

11. All notices and other documents, for the service of which personal service is not directed, may, in addition to the mode of service prescribed in section 150 of the "Bankruptcy Act," be left with some adult person at the last-known address of the person to be served therewith.

1892.

NEW SOUTH WALES.

RULES OF THE SUPREME COURT.

(IN DIVORCE JURISDICTION.)

Presented to Parliament, pursuant to Act 36 Dic. Ao. 9, sec. 48.

RULES AND REGULATIONS UNDER THE DIVORCE AND MATRIMONIAL CAUSES ACT.

The 27th day of October, 1892.

It is hereby ordered that all the Rules and Regulations heretofore made and issued concerning the Practice and Procedure of and fixing and regulating the fees payable upon all proceedings in the Divorce and Matrimonial Causes Jurisdiction, shall be revoked after the thirtieth day of November, 1892, except so far as concerns any matters or things done in accordance with them prior to that day.

And it is hereby ordered that the following rules and regulations shall, except as aforesaid, take effect in the said jurisdiction on and after the first day of December, 1892.

Petitions and Affidavits in support.

- 1. Proceedings before the Court for Divorce and Matrimonial Causes shall be retition. commenced by filing a petition (Form No. 1, appendix).
- 2. Every petition shall be accompanied by an affidavit, made by the petitioner, Affidavit in support. verifying, paragraph by paragraph, the facts of which he or she has personal cognisance, and deposing as to belief in the truth of the other facts alleged in the petition.
- 3. In cases where the petitioner is seeking a decree of nullity of marriage or of Collusion or connivance judicial separation, or of dissolution of marriage, the petitioner's affidavit shall further to be denied. state that no collusion or connivance exists between the petitioner and any of the other parties to the cause.
- 4. In cases where the petitioner is seeking a decree of restitution of conjugal Affidavit must show derights, the petitioner's affidavit shall further state sufficient facts to satisfy the Judge cases of restitution in that a written demand for cohabitation and restitution of conjugal rights has been conjugal rights. made by the petitioner upon the other party to the marriage, and that after a reasonable opportunity for compliance therewith, such cohabitation and restitution of conjugal rights have been withheld.
- 5. The petitioner's affidavit and any other affidavits made in support of the Affidavits to be filed with petition.

 Affidavits to be filed with petition.

428—A.

Co-respondents.

Co-respondents.

Adulterers to be made co-respondents.

6. Upon a husband filing a petition for dissolution of marriage on the ground of adultery, he shall make the alleged adulterers co-respondents in the cause, unless on special grounds he shall be excused by the Judge from so doing.

Application to be excused from adding co-respondents to be by motion.

7. Application to be so excused shall be made to the Judge on motion founded on affidavit at or before the time of settling issues, or at any time thereafter by leave of the Judge.

Amendment on discovering adulterer's name.

8. If the names of the alleged adulterers, or any of them, should be unknown to the petitioner at the time of filing his petition, the same must be supplied as soon as known, and application must be made forthwith to the Judge for directions as to such amendment, and such further directions, as he may think fit, as to service of the amended petition.

Citation and Service of Petition.

Petitions for service to be certified and sealed. 9. Every petitioner who files a petition and affidavit in support shall forthwith take to the office of the Registrar as many copies of the petition as there are parties respondent, and shall have the same duly certified as correct in the office of the Registrar, and sealed on each page with the impress seal of the Court, and shall have indorsed on each such copy a citation addressed to the party intended to be served therewith. (Form No. 2).

And have citation indorsed on them.

10. Every copy petition intended for service shall also have indorsed the address of the petitioner, or of his or her solicitor, or of the town agent of such solicitor, and such address must be within three miles of the General Post Office.

Citation to be in force 3 to 6 months.

Address of petitioner to be indorsed.

11. Every citation shall be in force for three calendar months, if intended for service in New South Wales, and for four calendar months if intended for service in any other Australian Colony, Tasmania or New Zealand, and for six calendar months if intended for service elsewhere, which times may be extended by leave of the Judge.

Time to be allowed for appearance.

12. The number of days after service to be allowed in a citation for the appearance of a respondent, shall be fourteen days inclusive of the day of service; but, where a respondent resides above 150 miles from Sydney, the number of such days shall be twenty-one; or where any respondent resides above 300 miles from Sydney, the number of such days shall be twenty-eight.

Time for appearance where respondent is abroad.

13. Provided that where any respondent upon whom service has not been dispensed with, shall, at the time of service of citation reside in one of the other Australian Colonies, in Tasmania or New Zealand, the time limited shall be two calendar months, and if elsewhere four calendar months.

Personal service to be effected.

14. Service of a petition shall be effected by personally delivering a copy thereof certified and sealed, and with a citation indorsed on it to the party cited.

Motion for substituted service, or to dispense with service.

15. In cases where personal service cannot be effected, application may be made by motion founded on affidavit to dispense with personal service altogether, or to substitute some other mode of service or for leave to advertise a notice of citation in form No. 3.

Affidavit of service to be filed.

16. After service has been effected, an affidavit of personal service shall be returned and filed in the Court.

Service advertised, newspapers to be filed. 17. When it is ordered that a notice of citation shall be advertised, the newspapers containing the advertisements are to be filed in Court before the issues are settled.

Before petitioner can proceed affidavit must be filed.

18. Before a petitioner can proceed after having filed a petition, an appearance must have been entered by or on behalf of the respondents, or it must be shown by affidavit filed in Court that they have been duly cited, that the time for appearance has clapsed and that no appearance has been entered.

Entering Appearances.

Appearances to be entered in Court.

19. All appearances to citations are to be entered in Court, in a book provided for that purpose (Form No. 4).

Service may be dispensed with.

20. If no appearance has been entered by any respondent or co-respondent within the time limited, application may be made either before or at the time of settling issues to dispense with further service on such respondent or co-respondent.

Dispensed with on motion.

21. Such application must be to the Judge on motion founded on an affidavit showing good grounds for granting it.

Appearance entered at any time.

22. An appearance may be entered before any proceeding has been taken in default or afterwards by leave of the Judge, upon an order by consent or applied for by motion founded on affidavit.

Address to be given.

23. Every entry of appearance shall be accompanied by an address at which address all subsequent proceedings not required by any Act or by these Rules to be personally served may be left, and the leaving of any such proceeding shall be considered as sufficient service, and the address so given shall be within three miles of the General Post Office.

Questio s of jurisdiction

24. If a party cited wishes to raise any question as to the jurisdiction of the Court he or she must enter an appearance under protest.

25.

- 25. After an appearance has been entered under protest by any party the said appearance under party shall within eight days thereafter serve a notice on the petitioner or his or her protest. solicitor setting forth that he has entered such an appearance and the grounds for disputing the jurisdiction of the Court (Form No. 5).
- 26. The petitioner shall thereupon apply to the Judge, by motion, to direct when Judge to direct how and in what way the question of jurisdiction shall be determined and where questions questions to be tried. of fact are involved to direct whether the same shall be heard upon affidavits or oral
- 27. If the Judge should decide the questions of jurisdiction against the party Appeal from Judge on raising it he may appeal against the same, as provided by section 5 of the principal Act, question of jurisdictions or may appear absolutely and file an answer within such time as the Judge may direct.
- 28. After the entry of an absolute appearance to the citation a party cited cannot cannot object after raise any objection to the jurisdiction of the Court.

Suits in Formâ Pauperis.

- 29. Any person desirous of prosecuting a suit in *formâ pauperis* is to lay a state- Case to be laid before ment of the case before the Registrar and obtain his certificate that he or she has Registrar. reasonable grounds for proceeding.
- 30. No person shall be admitted to prosecute a suit in *formâ pauperis* without Judge's order to be the order of the Judge; and to obtain such order the certificate of the Registrar, and obtained. an affidavit of the party applying as to his or her income or means of living, and where the suit is by a wife against her husband the income or means of living of her husband, and that he or she is not worth £25 after payment of his or her just debts save and except wearing apparel and household furniture, shall be produced at the time such application is made.
- 31. When a husband has been admitted to prosecute a suit against his wife in Wife, respondent, may forma pauperis the wife may apply for an order that she be at liberty to proceed with her defence in forma pauperis on production of an affidavit that besides wearing apparel and household furniture she has no separate property exceeding £25 in value after pavment of her just debts.

32. When a wife has been permitted to prosecute a suit against her husband in Husband, respondent, formå pauperis the husband may apply for leave to proceed with his defence in formå may apply. pauperis on production of an affidavit as to his income or means of living, and showing that besides his wearing apparel and household furniture he is not worth £25 after payment of his just debts.

33. Where a husband admitted to sue as a pauper neglects to proceed in a cause, Where pauper does not application may be made to the Judge by motion to direct such husband to pay costs proceed, application to though he has not been dispaupered, and to stay all further proceedings until such costs be paid.

34. Where a party not entitled to proceed as a pauper has obtained an order application to rescind permitting him or her to do so any other party to the suit may make application to the Judge by motion founded on affidavit to rescind such order and to dispauper such

35. After a person has been admitted to sue or defend in forma pauperis, no fee, No tee or reward to be profit, or reward, shall be taken of him by any Counsel or Solicitor, for the despatch of taken or given. his business, during the time it shall depend in Court and he shall continue a pauper; nor shall any agreement be made for any recompense or reward afterwards: And any person offending herein shall be deemed guilty of a contempt of Court; and the pauper who shall give any such fee or reward, or make any such agreement, shall be thenceforth dispaupered.

Minors and Persons of Unsound Mind.

- 36. A minor may elect any one or more of his next of kin as guardian for the Minor may elect purpose of proceeding on his or her behalf as petitioner, respondent, or intervener in a guardian. cause, and shall file in Court a document showing such election.
- 37. When a minor shall elect some person other than his or her next of kin as Judge may assign guardian for the purpose of a suit, application founded on affidavit must be made to the Judge to appoint such person, and the Judge may assign the said person, or such other person as he may approve, to be guardian to the minor for the purpose of such suit.
- 38. It shall not be necessary for a minor who, as an alleged adulterer, is made a Co-respondent requires co-respondent in a suit, to elect a guardian, or to have a guardian assigned to him for no guardian. the purpose of conducting his defence.
- 39. A committee duly appointed of a person found by inquisition to be of Committee of lunatic unsound mind may file a petition and prosecute a suit on behalf of such person as may act on his behalf. a petitioner, or enter an appearance, intervene, or proceed with the defence on behalf of such person as a respondent; but if no committee should have been appointed, application is to be made to the Judge, who will assign a guardian to the person of unsound mind for the purpose of prosecuting, intervening in, or defending the suit on his or her behalf. Provided that if the opposite party is already before the Court when the application for the assignment of a guardian is made he or she shall be served with notice by summons of such application. notice by summons of such application.

Answer.

Time for answering.

40. Each respondent who has entered an appearance may thereupon, or at any time before the expiration of seven days after the time limited for entering an appearance after service of citation, file in the Court an answer to the petition (Form No. 6).

Further time allowed.

41. Any person requiring further time to answer may make application to the Judge by motion for that purpose, or may obtain an order by consent for such further time

Copy to be served.

42. Each respondent shall, after filing an answer, deliver a certified copy thereof, under the seal of the Court, to the petitioner, or to his or her solicitor, at a time before the expiration of the time limited for entering an appearance, or within seven days thereafter.

To be accompanied by affidavit in certain cases

43. Every answer which contains matter other than a simple denial of the facts stated in the petition shall be accompanied by an affidavit made by the party verifying such other or additional matter, so far as he or she has personal knowledge thereof, and deposing as to his or her belief in the truth of the rest of such other or additional matter, and such affidavit shall be filed with the answer.

Further Pleadings.

Time for replying.

44. Where the answer contains any allegations other than a mere denial of the statements contained in the petition, the petitioner may within fourteen days from the service of the answer file a reply thereto.

Time for rejoining.

45. Where any reply or subsequent pleading contains allegations other than mere denials the other party may within fourteen days file and serve a rejoinder to such allegation.

Pleadings to be served.

46. A copy of every reply and subsequent pleading shall be served on the opposite parties or their solicitors within the time limited for filing such pleading.

General Rules as to Pleadings.

Amendments, how made.

47. Either party desiring to alter or amend any pleading may apply by summons or motion to the Judge for permission to do so, or such amendment may be made upon an order by consent.

Service of amended pleadings.

48. When a petition, answer, or other pleading has been ordered to be altered or amended, the Judge may also order that further service of such amended pleading be dispensed with, or that it be served, and a certain time after service be allowed for answering or replying thereto.

To be served within two days if no order made.

49. If no order be made dispensing with service of any amended pleading or fixing a time for replying or answering thereto, such amended pleading shall be delivered to the opposite parties or their solicitors within two days after the order for amendment is made, and the time for filing and delivering a copy of the next pleading shall be reckoned from the time of service of the amended pleading.

After service of amended pleading subsequent pleading may be amended.

50. Where an answer or pleading has been filed, and subsequent thereto the pleading to which it is an answer or reply has been amended, the party who has filed such answer or pleading shall be at liberty to amend such answer or pleading within four days or such further time as may be allowed after service of the amended pleading.

Pleadings not served may give notice to settle issues.

51. If no answer, reply, or other pleading be served within the time limited the petitioner may serve notice of motion to settle issues, or where service has been dispensed with, may set down such motion for hearing in Court.

Pleading filed out of time by leave.

52. If the time limited for filing or serving any pleading has expired, any party desiring to file or serve such pleading may make application to the Judge by motion, founded on affidavit, for leave to file or serve the same, subject to such further order as the Judge may make as to costs and as to short notice of trial.

Particulars may be applied for.

53. Application may be made at any time after a pleading is filed and before settling issues for further particulars of matters charged in such pleading to the Judge by summons, or at the time of settling issues without notice or summons.

Issues and Trial.

Issues in defended cases settled by Judge.

54. When the pleadings are complete, or the time for filing and serving any further pleading has expired, the petitioner may thereupon serve upon each of the parties upon whom service has not been dispensed with a notice of motion to appear before the Judge to settle what are to be the issues to be tried in the suit, and whether the same are to be heard before a Judge alone, or by a Judge with a jury, and to fix the time and place of trial.

In undefended cases Registrar can settle the issues. 55. In cases where the time for entering an appearance has expired and no appearance has been entered by or on behalf of any party respondent, it shall not be , necessary to apply to the Judge to settle the issues, but the petitioner may apply to the Registrar to settle them, and the Registrar shall thereupon do so and shall set such cases down for hearing by the Judge upon such day or days as the Judge shall from time to time direct him.

If petitioner fails to give notice respondents may do so.

56. If in defended cases the petitioner shall fail to give notice of motion to settle issues within fourteen days from the service of the last pleading, either of the respondents on whose behalf any questions have been raised by the pleadings may serve such notice of motion on the petitioner and other parties.

57.

- 57. After the Judge has directed what are the issues to be tried, the same are to Registrar settles issues. be briefly stated in writing by the petitioner (Form No. 7), and by him taken to the Registrar, who shall, upon perusal of the pleadings and order of the Judge directing what are to be the issues, settle the same.
- 59. After the issues have been settled, the petitioner or party who has caused Copy issues to be served. them to be settled shall serve a copy thereof on each of the other parties.
- 59. The party who has settled the issues shall have them engrossed on parchment, To be engrossed on and have the same signed by the Registrar, and sealed with the impress seal of the parchment. Court; and shall then file the said issues, and set the case down for hearing.
- 60. Service of a copy of the order, fixing the day of trial, shall operate as a notice Service of copy order to of trial for the day therein fixed, provided that no trial shall take place until ten days operate as notice of trial after service of such order, except by the consent of all parties who have appeared in the
- 61. If the petitioner fail to file the issues, or to set down the cause for trial or Respondents may set hearing, or to give due notice thereof for the space of fourteen days after directions cause down for hearing. have been given as to the mode in which the cause should be tried or heard, either of the other parties entitled to be heard at such trial or hearing, may settle the issues before the Registrar, and set the case down for hearing, and give notice of trial to the other parties in the cause entitled thereto.

62. After the issues, as settled by the Registrar, have been served on the other Amendment of issues on parties, either of such parties shall be at liberty to apply to the Judge, by summons, within two days after service of such issues, or on the next day appointed for hearing summonses, to alter or amend the said issues, and the Judge may make such further order as to service of the issues if amended or altered, and as to postponing the hearing or otherwise, and upon such terms as to costs as he may see fit.

63. The place of trial shall in all defended cases be fixed by the Judge at the Place of trial to be fixed settling of the issues, and in undefended cases by the Registrar and the place so fixed and marked in markin of issues. shall be marked in the margin of the issues when settled with the name of the town where it is intended that the cause shall be tried.

- 64. The Registrar shall keep a book in which he shall enter all causes to be heard Registrar to keep a book on Circuit together with the name of the Circuit town at which they are to be heard and of Circuit cases. date of hearing.
- 65. At a convenient time before the holding of any Circuit Court the Registrar Assize to receive the shall deliver the pleadings in all cases for trial before such Court with all other papers in the cause as aforesaid to the Clerk of Assize for such Court who shall bring the same with a minute of proceedings. into Court on the day of trial and afterwards return the same to the Registrar with a minute of the proceedings at the trial.

66. It shall be the duty of the Clerk Associate of the Judge, sitting for the trial of Associate to make out causes in Divorce, to make out and immediately after the conclusion of each case, to live at end of case. hand to the respective Solicitors for the petitioner and respondent, or if either of the parties be not represented by a solicitor to such party (if not appearing in formal pauperis) an account of the Court fees payable by the petitioner and respondent respectively, and the said Solicitors respectively, or, if either party be not represented by a Solicitor such party shell (unless respectively, or, if either party be not represented by a Solicitor, such party shall (unless appearing in forma pauperis) within seven days from the receipt of such account, pay or cause to be paid to the Clerk of Divorce, the amount of the said fees; and if default be made in payment of the said fees within the time specified as aforesaid, the Registrar shall report to the Court the name of the Solicitor, or, if either party be not represented by a Solicitor, the name of such party so making default.

67. The finding and decree of the Judge, and in Circuit cases tried by a Findings to be filed as of Judge, the findings of such Judge, and in cases tried by a jury the finding and verdict of record. the jury, shall be entered upon the issues filed in Court, and returned to the Registrar to be filed by him as of record.

When, on the hearing or trial of a cause, the decision of the Judge or the wife losing receives only verdict of the jury is against the wife, no costs of and incidental to such trial or hearing costs allowed by Judge. shall be allowed, as against the husband, except such as shall be applied for and allowed by the Judge at the time of such hearing or trial.

166. The order for payment of costs of suit in which a respondent, or co-respon-Costs to be paid into dent, has been condemned by a decree *nisi*, shall, if applied for before the decree *nisi* is made absolute, direct the payment thereof into Court; and such costs shall not be paid out of Court to the party entitled to receive them under the decree nisi until the decree absolute has been obtained: Provided that a wife who has obtained an order under the wife's may be taxed at last Rule that her costs be allowed, may proceed at once to obtain payment of such costs after taxation.

167. The Judge in any decree or order may direct that costs, after taxation, be Judge may order how paid into Court, or be paid to some person named in the decree or order, and either forth- costs are to be paid. with or within such time after taxation as the Judge may in such order or decree direct, and in cases where no time is mentioned in a decree or order costs shall be paid within fourteen days after service of the Registrar's certificate of the amount allowed on taxation.

168. In all cases in which the Court, at the hearing of the cause, condemns any Taxation at once after party to the suit in costs; the solicitor of the party to whom such costs are to be paid time for appeal. may forthwith obtain an appointment for the taxation of his bill of costs; Provided that such taxation shall not take place before the time allowed for moving for a new trial or Speedy taxation may be ordered. rehearing shall have expired, or, in case a motion shall have been made, until it is disposed of, unless the Judge shall, for cause shown, direct a more speedy taxation.

169. All bills of costs shall be referred to the taxing officers of the Court for Taxing officers may tax and may be taxed by them without any special order for that purpose. taxation, and may be taxed by them without any special order for that purpose.

170. The party who has obtained an appointment to tax a bill of costs shall Notice of taxation to be give the other party or parties to be heard on the taxation thereof, such notice of the said appointment as the taxing officer shall direct, and shall, at or before the same time, deliver to him or them a copy of the bill to be taxed at the address furnished by such

party or parties.

171. When an appointment has been made by the taxing officer for taxing any Taxation may take place bill of costs, if any of the parties to be heard on the taxation do not attend at the time notice has been given. appointed, the taxing officer may nevertheless proceed to tax the bill after the expiration of a quarter of an hour, upon being satisfied that due notice of the time appointed was served on the other parties.

172. The cost to be taken by solicitors for their own use and for the use of other Costs to be those in single Divorce and Matrimonial Causes Turisdiction, and the fees of Court to "Schedule of Costs." persons in the Divorce and Matrimonial Causes Jurisdiction, and the fees of Court to be paid in the said Jurisdiction, shall be those set forth in the "Schedule of Costs" annexed to these Rules, and no other fees shall be demanded or taken by any officer of the Court upon any pretence whatsoever.

$\mathbf{Writs.}$

173. The practice and procedure with regard to obtaining, issuing, taking bail Practice in capias ad upon, and setting aside writs of capias ad respondendum shall be the same as is provided Common Law. for by the Rules, Regulations, and enactments relating to the said matters in the Supreme Court at Common Law so far as the same are applicable.

174. If any party directed by an order or decree to pay money (whether money Execution to issue for only, or costs only, or money with costs), shall after due service neglect to pay the same costs or money. as thereby directed, the party who has obtained such order or decree shall, at the expiration

expiration of the time limited for the performance thereof, be entitled to have execution thereon for the money so payable as if the said order or decree were a judgment at Common Law, and all such writs of execution shall be enforced in the same manner as in ordinary cases of judgment at Common Law.

Freri facias may issue for costs.

175. Where by an order or decree costs are ordered to be paid after taxation, a copy of the Registrar's certificate shall be served on the solicitor of the party liable, and if the costs be not paid within such time as the judge shall have ordered, or when no time is mentioned, within fourteen days after such service, a writ of fieri facias shall be issued as of course to recover the same.

Affidavit of service and demand first filed.

176. In all cases before a writ can issue, an affidavit of service of the order or decree and of demand of payment from the party or his solicitor, or his agent, and of non-payment must be filed.

Writs of attachment and sequestration.

177. Writs of attachment and sequestration may be issued on a special order, to be obtained on motion upon an affidavit of the circumstances of the case, and it shall not be necessary to serve the person against whom such writ is sought to be issued with notice of the motion unless the Judge shall so direct.

Persons attached to be brought to bar by Sheriff.

178. The Sheriff shall bring to the Bar of the Court, every person arrested upon any writ of attachment on the first day in which the Court shall sit next after such arrest, or as soon afterwards as practicable, and every such person and his property shall be dealt with by imprisonment and sequestration in like manner, as persons and their property are dealt with when brought to the Bar of the Supreme Court in its Equity Jurisdiction. But this Rule is not to prevent the Sheriff from taking bail for the appearance of the person arrested.

On return of non est inventus to an attachment one party, inventus, writ of sequestration may issue. Suing out the same, upon affidavit that due diligence has been used in endeavouring to sequestration the facts of such endeavour, shall be entitled to a write sequestration of the facts of such endeavour, shall be entitled to a write sequestration of the facts of such endeavour. of sequestration in the same manner as a party in the Equity Jurisdiction of the Supreme Court.

Discharge of persons in custody.

180. Any person in custody under a writ of attachment may apply for his or her discharge to the Judge of Divorce, or in his absence to any Judge of the Supreme Court.

General Provision.

Practice as at Common. Law where no other provision.

181. All matters of practice or procedure except where otherwise ordered by these rules shall be the same as at Common Law or as near thereto as circumstances will permit.

> W. C. WINDEYER, Judge, Supreme Court, Divorce and Matrimonial Causes Jurisdiction.

FORMS WHICH ARE TO BE FOLLOWED AS NEARLY AS THE CIRCUM-STANCES OF EACH CASE WILL ALLOW.

No. 1. Petition.

In the Supreme Court of New South Wales. In Divorce.

To the Honorable Sir William Charles Windeyer, Knight, Judge of the Divorce and Matrimonial Causes Court.

In re John Jones of No. 0, King-street, Sydney, in the Colony of New South Wales, labourer, and Ann Jones (formerly Ann Smith), his wife, and

Thomas Robinson,

Co-respondent.

The

day of

189

The Petition of John Jones,

SHOWETH

1. That your petitioner was on the day of 189 . lawfully married to Ann Jones, then Ann Smith, spinster, at Sydney, in New South Wales, according to the rites of the Church of England.

to the rites of the Church of England.
 That your petitioner was born at Melbourne, in the Colony of Victoria, and is at the present time and has for three years and upwards been domiciled in New South Wales. That your petitioner's wife was born at Sydney aforesaid.
 That your petitioner and his said wife have had issue of their said marriage three children, to wit [set out names and ages of those under the age of 21].
 That your petitioner's wife has during three years and upwards been an habitual drunkard, and has habitually during that period neglected her domestic duties.
 That on or about the third day of September, 1850, your petitioner's wife committed adultery with Thomas Robinson (who is herein added as Co-respondent), at No. 0, King-street, Sydney, aforesaid, and between the first day of March, 1851, and the thirtieth day of June, 1852, your petitioner's wife cohabited continuously with the said Thomas Robinson, and lived with him as his wife.

Your petitioner therefore humbly prays,—

1. That your Honor will be pleased to decree that the marriage of your petitioner with his said wife be dissolved.

2. And that your petitioner may have such further and other relief in the premises as to your Honor may seem meet.

Petitioner's signature. Note.—This petition is filed by Messrs. B. & Co., of 281 George-street, Sydney, solicitors for John Jones, of No. 0, King-street aforesaid, the above-named petitioner.

No. 2.

Citation.

VICTORIA by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, &c.

To the within-named respondent Ann Jones.

Whereas John Jones claiming to have been lawfully married to you the within-named respondent has filed his petition in the Divorce and Matrimonial Causes Jurisdiction of our said Court, praying that his said marriage may be dissolved, wherein the said John Jones alleges that you have been guilty of . Now this is to command you that within days after service hereof on you, inclusive of the day of such service, you cause an appearance to be entered for you in our said Court to the within petition. And take notice that in default of your so doing our said Court will proceed to hear the said charge (or charges) proved in due course of law, and to pronounce sentence therein, your absence notwithstanding. And take further notice, that for the purpose aforesaid you are to attend in person, or by your solicitor, at the Divorce Registry, Supreme Court House, King-street, Sydney, and there enter an appearance in a book provided for that purpose, without which you will not be allowed to address the Court, either in person or by counsel or solicitor, at any stage of the proceedings in the case. in the case.

Witness the Honorable Sir William Charles Windeyer, Knight, Judge in the Divorce and Matrimonial Causes Jurisdiction of the Supreme Court of New South Wales at Sydney, the day of , in the year of our Lord, &c., and in the

year of our reign.
(Signed) A.B Registrar.

Appearance.

In the Supreme Court of New South Wales. In Divorce. day of . A.D. 1892. The John Jones, petitioner, The respondent, Ann Jones, appears in person, [or C.D., the solicitor for Ann Jones, the respondent, appears Ann Jones, respondent, for the said respondent.] and T.R., co-respondent. [Here insert address required, within 3 miles of the General Post Office.] day of

Entered this

, 1892.

No. 5.

Notice of an Appearance under Protest having been entered.

[Usual heading and entitle as in a cause.]

To A.B., the above-named petitioner.

TAKE notice that an appearance under protest was entered herein on the 1892, on behalf of the above-named respondent, and that the said respondent disputes the jurisdiction of the Court on the following ground (or grounds), that is to say:—That the petitioner is not at the present time, nor has she at any time, been domiciled in New South Wales.

> The day of , 1892. (Signed) C.D. [or E.F., solicitor for C.D.]

No. 6.

Answer.

[Usual heading and entitle as in a cause.]

, 1892. The day of

The respondent, Ann Jones, by C.D., her solicitor, [or in person] in answer to the petition filed in this cause, saith,—

1. That she denies that she committed adultery with T.R., as set forth in the said petition.

, 1892, and on other days , 1892, the said John Jones, 2. Respondent further saith, that on the day of and the day of , committed adultery with K.L. between that day and the at

[In like manner respondent is to admit, deny, or refute the statements contained in the petition, and to state connivance, condonation, or other matters relied on as a ground for dismissing the petition.]

Wherefore this respondent humbly prays,

That your Honor will be pleased to reject the prayer of the said petition and decree, &c.

No. 7.

Tasnes.

[Usual heading and title.]

Questions for the Jury.

Goulburn Circuit Court.

- 1. Whether A. J., the respondent, committed adultery with T. R. the co-respondent, on, &c. [on or between dates charged.]
- 2. Whether J. J. has been guilty of cruelty towards Λ . J., the respondent.

[Here set forth in the same form all the issues settled between the parties.]

3. What amount of damages should be paid by T. R., the co-respondent, in respect of the adultery (if any) by him committed.

No. 8.

Petition for Reversal of Decree of Judicial Separation.

Sydney: Charles Potter, Government Printer.-1892.

[1s. 6d.]

NEW SOUTH WALES.

RULES OF THE SUPREME COURT.

(IN DIVORCE JURISDICTION.)

Presented to Parliament, pursuant to Act 36 Vic. Ao. 9, Sec. 48.

In the Supreme Court of New South Wales.

DIVORCE AND MATRIMONIAL CAUSES.

The eighth day of May, 1893.

Ir is ordered that the following be a Rule of this Honorable Court in its Divorce and Matrimonial Causes Jurisdiction (to be read with the Rules of 27th October, 1892), viz.:—

"Where any party respondent has been duly cited (whether by personal service of the petition and citation, or, after leave of the Court obtained, by substituted service thereof, or advertisement of a notice of citation), and has not entered an appearance within the time limited, no order of the Court dispensing with further service of proceedings shall be necessary; but the petitioner upon having filed in Court an affidavit of such due citation and of search for appearance and that such respondent has not appeared, may proceed in the absence of such respondent, and shall not be required to serve upon him or her any notice to settle issues nor a copy of such issues when settled nor any notice of trial."

W. C WINDEYER, J.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(RETURN RESPECTING CORONERS' INQUESTS, &c.)

(Ordered by the Legislative Assembly to be printed, 3 November, 1892.)

[Laid upon the Table of the House in answer to Question No. 2, of 27 October, 1892.]

Question.

- 3. Mr. Stevenson asked The Minister of Justice,—
 - (1.) The number of inquests held during the first six months of 1892?
 - (2.) The number of inquests in which post mortem examinations were held, and the names of the medical gentlemen who performed such post mortems in each case?
 - (3.) The cost of such post mortems in each case?

Answer.

 Seven hundred and five, including Magisterial Inquiries.
 One hundred and sixty-seven, which also include Magisterial Inquiries. The names of the (1.) Seven hundred and five, including Magisterial Inquiries.

(2.) One hundred and sixty-seven, which also include Magisterial Inquiries. The names of the medical gentlemen who performed the post mortem examination in each case are as follows:—Alcorn, R. G. LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(RETURN RESPECTING CORONER'S INQUESTS.)

Ordered by the Legislative Assembly to be printed, 15 November, 1892.

[Laid upon the Table of the House in answer to Question No. 3, of 15 November, 1892.]

Question.

- 3. Mr. Stevenson asked The Minister of Justice,—

 (1.) Will he state the number of inquests, when post mortems were ordered by the Coroner or Deputy Coroner, held in Sydney, from the 1st of January to 31st of October, 1892?
 (2.) The names of the medical gentlemen who attended such inquests and held such post mortems during the above posicil?
 - during the above period?
 - (3.) The number of inquests attended and post mortems performed by each medical gentleman during the above period?

Answer.

LEGISLATIVE ASSEMBLY.

SOUTH WALES. $N \to W$

NISTRATION OF

(RETURN RESPECTING FEES PAID TO RELIEVING POLICE MAGISTRATES.)

Ordered by the Legislative Assembly to be printed, 14 March, 1893.

[Laid upon the Table of this House in answer to Question No. 3, of 21 February, 1893.]

Question.

- (3.) Acting Police Magistrate at Narrabri:—Mr. Collins asked The Minister of Justice,—
 (1.) How long has the Acting Police Magistrate been relieving the Police Magistrate at Narrabri?
 (2.) Is it a fact that £1 per day extra is now being paid to five Police Magistrates for relieving, and that this sum has been paid for over twelve months continuously?
 (3.) The names of the Police Magistrates who are receiving relieving fees, and the amount paid to each for the past twelve months?

 - (4.) If these are facts, does he intend continuing these payments of £365 per annum over and above the salaries voted by Parliament?

Answer.

- (1.) Since the 13th January, 1892.
- (2.) No Police Magistrate is paid £1 per day extra for relieving.
 (3.) The Police Magistrates who are now receiving relieving tees are Mr. J. F. Kenyon, Police Magistrate, Narrabri, acting at Kiama, who receives 12s. per diem, and Mr. C. L. C. Badham, Police Magistrate, Broken Hill, acting at Wollongong, who receives 15s. per diem. Mr. Kenyon has received £236 8s., and Mr. Badham £154 10s. Mr. Robertson, who is acting as Police Magistrate at Narrabri, is an emergency officer attached to the Ministerial Office, and is liable to be called away for duty elsewhere, and, since his undertaking duty at Narrabri, has in fact been employed at another place for a short time on special duty. He receives 15s. per diem. on special duty. He receives 15s. per diem.
- (4.) As shown above, the facts are not as stated by the Honorable Member. It is, however, under contemplation to reduce the rate of relieving allowance when a relieving officer is stationed at one place for a lengthened period.

1892 - 3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FEES PAID TO BARRISTERS BY THE GOVERNMENT.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 1 March, 1893.

RETURN to an *Order* of the Legislative Assembly, dated 5th October, 1892, That there be laid upon the Table of this House a Return for the period of three years ending 31st August, 1892, showing,—

- "(1.) The date of every payment by the Government to any Barrister not being a salaried member of the Civil Service.
- "(2.) The name of every such Barrister to whom every such payment was "made.
- "(3.) The purpose for which every such payment was made.

"(4.) The amount of every such payment."

(Mr. Walker.)

RETURN showing the Amount of Fees paid by the Attorney-General to Barristers not in receipt of salary from the 1st September, 1889, to 31st August, 1892.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ADMINISTRATION OF THE COPYRIGHT ACT.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 4 October, 1892

[Laid upon the Table of this House in answer to Question No. 2 of 4th October, 1892.]

Question.

- (2.) COPPRIGHT ACT:—MR. DARNLEY asked THE ATTORNEY-GENERAL,—

 (1.) What were the number of applications for registration and the number of registrations, during each of the years 1887, 1888, 1889, 1890, 1891, and part of 1892, under Part I of the Copyright Act, 1879, classified as Literary, Dramatic, or Musical Works, giving also the number in manuscript and the number in which proof of publication has been furnished, the number of works delivered at Free Public Library and at University, in accordance with clause 5 of said Act, and the number of prosecutions instituted, and the result, under such clause?
 - (2.) What were the number of applications for registration and the number of registrations, during each of the years 1887, 1888, 1889, 1890, 1891, and part of 1892, under Part II of the Copyright Act, 1879, classified as follows:—(a) Paintings, (b) Drawings and Engravings, (c) Works of Sculpture, and (d) Photographs?

 (3.) What were the number of applications for registration and the number of registrations, in each of the various classes, under Part III of the Copyright Act, 1879, during each of the various classes, under Part III of the Copyright Act, 1879, during each of the various classes, under Part III of the Copyright Act, 1879, during each of the various classes.

 - each of the various classes under Part III of the Copyright Act, 1879, during each of the years 1887, 1888, 1889, 1890, 1891, and part of 1892?

 (4.) What were the total amounts of receipts, and the total amounts of expenditure, in each of the years 1887, 1888, 1889, 1890, 1891, and part of 1892, under each of Parts I, II, and III of the
 - Copyright Act, 1879?
 (5.) Who are the officers in the Copyright Department; when was each appointed, and at what salary; who was his predecessor, and his salary; and when were increases given, and to what amounts?
 - (6.) What legal and technical knowledge is required in the administration of the Copyright Depart-
 - ment, and in what manner is it displayed?

 (7.) Is it a fact that the Registrar of Copyright gives legal decisions as to copyright and design matters, and refuses applications for registration, based on his opinion alone, and is such power conferred upon him by the Copyright Act?
 (8.) Could not this Department be combined with and become a sub-branch of a "Patents, Designs, Trade Marks, and Copyright" Department?

Answer.

Number of Applications for Registration, and of Registrations, at the Copyright Office, during the undermentioned periods:-

Part I.

Year.	Lite	erary.	Drar	natic.	Musical.				
icar.	Applications.	Registrations.	Applications.	Registrations.	Applications.	Registrations.			
1887 1888	83 73 43 47 42 61	83 · 65 · 43 · 44 · 38 · 60	3 5 1 , 5 1	3 5 4 1	1 2	1			

Number of Works registered in MS.

Nearly all the dramatic and most of the musical works in respect of which the right of representation or performance was registered were in MS.

Number of Works proof of Publication of which has been furnished.

None. The memorandum of application, which (amongst other particulars) sets out the fact and date of publication, is accepted as proof thereof, it being an indictable misdemeanour under section 46 of the Copyright Act to make a false statement, or cause one to be made, in any document of the kind. But the Registrar requires the work to be exhibited to prove its existence, and to afford him an opportunity of seeing that it is in conformity with the law under section 51 of the Act.

Library Copies.

Section 7 of the Act imposes upon the Librarians of the Free Public Library and the library of the University of Sydney the duty of proceeding for penalties for the non-delivery of all publications, whether registered or not, but the Registrar assists the librarians to the extent of furnishing periodical lists of works registered by him. The Registrar infers that no penalties have been exacted by the librarians, as no fines or penalties have been paid to him under section 54 of the Act.

^(6.) A large acquaintance with copyright and general law, and the Registrar of Copyright is known to possess these qualifications.

Sydney: Charles Potter, Government Printer.—1892.

^(7.) No.
(8.) Yes; but without fresh legislation, which is now receiving the consideration of the Government, this cannot be done.

LEGISLATIVE ASSEMBLY. NEW SOUTH WALES.

OF JUSTICE.

(MINUTE OF THE ATTORNEY-GENERAL IN THE CASE OF REGINA V. PORTER AND OTHERS, CHARGED WITH CONSPIRACY.)

Ordered by the Legislative Assembly to be printed, 23 February, 1893.

[Laid upon the Table of the House in answer to Question No. 4, of 23 February, 1893.]

Question.

(4.) CHARGE OF CONSPIRACY AGAINST MESSES. PORTER, BRAIN, HODGES, AND MORTON:-Mr. Sharp

(for Mr. Crick) asked The Attorney-General,—
(1.) Is it a fact that he has declined to file any indictment against the men Porter, Brain, Hodges, and Morton (late employees in the boot manufactory of Enoch Taylor & Co.), who were committed at the Water Police Office, on the 13th instant, on a charge of conspiracy?

(2.) Has he any objection to say whether he wrote any opinion or minute on the case, setting forth his reasons for declining to presents?

his reasons for declining to prosecute?

(3.) If so, will he object, in view of all the circumstances connected with the case, to lay a copy of the said opinion or minute upon the Table of this House?

Answer.

Memo. of The Attorney-General.

Regina v. Porter and Others, No. 21.

In view of the peculiar nature of this case, I think it well to place on record my reasons for declining to file any indictment.

to file any indictment.

The police-office information follows in its three counts the 1st, 2nd, and 10th counts, respectively, used in R. v. Duffield and Others, 5 Cox C.C., 404. These, again, are, from their wording, manifestly founded on the 3rd section of 6 George IV, c. 129. If that Act is in force in this Colony since the Trades Union Act 45 Vic. No. 12 (which, I may observe, is, in some of its provisions, largely at variance with the recital in the preamble of the Act of George IV), I think that upon the authority of the case referred to, and of other cases founded on the Statute, it cannot be urged that there is in this case no evidence at all of molestation, or threats, or obstruction, to go before a jury on an indictment founded on the Statute. But that evidence is certainly slight and flimsy. Most of the objectionable conduct amounts to a creek; and the one solitary direct threat of personal violence is that of giving Brady a "hiding," sworn to by him at page 66. No act of what in any serious sense could be fairly called violence, or even intimidation, is shown to have taken place. I think, therefore, that even on a prosecution under the Act of George IV the evidence would be extremely trivial, and that no jury would think of convicting on such evidence in these days.

But I further think it would be highly undesirable to proceed under a statute enacted at that

But 1 further think it would be highly undesirable to proceed under a statute enacted at that bygone time when trade combinations were regarded as of a very obnoxious character, an Act which has been repealed in England, and may be said to be opposed to the spirit of modern legislation.

There are two cases, however—R. v. Druitt and Others, 10 Cox, p. 592 (decided in 1867, before the passing of the Act 34 and 35 Vic., c. 31, which is nearly the same as our Trades Union Act), and R. v. Bunn and Others, 12 Cox, p. 316—which are of importance in this connection; for they would go to show that even "picketing" or "black looks," which have a deterrent effect, or anything done with an improper intent, which would be an annoyance, or interference with the minds of others in carrying on their business, would form the basis of a charge of conspiracy at common law. (See R. v. Druitt, pp. 601, 602; and R. v. Bunn, pp. 339, 340.)

But the dicta in these cases are largely dissented from in the recent case of Gibson v. Lawson, a

But the dicta in these cases are largely dissented from in the recent case of Gibson v. Lawson, a decision of five judges (reported 61 L.J., M.C., p. 9; L.R., 2 Q.B., p. 545, N.S., 1891); and the Court even go so far as to intimate it as questionable whether acts which are not now indictable in England under the Act 38 and 39 Vic., c. 86, and the Statutes referred to in it, ever were indictable at common law.

I have no doubt—and the case referred to confirms the view—that where actual violence has been used, or, probably, serious threats of actual violence (both of which circumstances occurred at Broken Hill—and this was the result of combination), an indictment for conspiracy at common law would lie.

On the whole, seeing that there was no actual violence used in this case, and only the one direct threat of violence—that alleged by Brady, which is said to have been used only by Brain, and for which, therefore, the others may not have been responsible—I think there is no satisfactory evidence on which to found a prosecution for conspiracy at common law. Moreover, I think that any prosecution must be found a prosecution for conspiracy at common law. Moreover, I think that any prosecution must be abortive, and would do more harm than good. 20/2/93. EDMUND BARTON, A.-G.

LEGISLATIVE ASSEMBLY.

SOUTH \mathbf{WALES} .

CASE OF JOHN DENIFF.

(PETITION FROM JOHN DENIFF, STATING THE CIRCUMSTANCES UNDER WHICH HE WAS TRIED AND CONVICTED AT DUBBO, ON A CHARGE OF STEALING £78.)

Received by the Legislative Assembly, 1 September, 1892.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned,-

RESPECTFULLY SHOWERH:

- 1. On the 21st day of January, 1892, your Petitioner was charged, at Nyngan, for that he did, on the 6th day of January, 1892, in company, steal the sum of £78, in money, from the person of Christie Cunningham, his property. The said charge, having been part heard, was remanded to the 23rd day of January, 1892, when your Petitioner was committed to take his trial on the said charge at the Court of General and Quarter Sessions, holden at Dubbo, on the 2nd day of February, 1892.
- 2. On the 3rd day of February, 1892, your Petitioner was indicted at the Court of General and Quarter Sessions, held at Dubbo, on the said charge.
- 3. On the 4th day of February, 1892, your Petitioner was found guilty on the indictment in the last preceding paragraph mentioned, but with a strong recommendation to mercy, and he was thereupon sentenced to imprisonment for two years, with hard labour, in Dubbo Gaol. He was removed to Dubbo Gaol, and imprisoned accordingly.
- 4. Your Petitioner was entirely innocent of the charge of which he was so found guilty, or of any criminal offence whatsoever.
- 5. A doubt having arisen as to your Petitioner's guilt, His Excellency the Governor, by a minute bearing date the 25th day of March, 1892, directed Henry J. Byrnes, Esq., one of Her Majesty's Justices of the Peace, to hold an inquiry touching your Petitioner's alleged guilt.
- 6. The said inquiry was held at Nyngan by the said Justice of the Peace on the 13th and 14th days of April, 1892, who duly made his report thereon.
- 7. Your Petitioner is informed and verily believes that the report in the last paragraph mentioned was to the effect following, that is to say:—(1) That the said Christie Cunningham did not have the said moneys to steal; (2) that there was no robbery whatever; (3) that your Petitioner's character was good; (4) that the said Christie Cunningham's character was bad; and (5) that your Petitioner should be released from custody.
- 8. Immediately on the receipt of the said report, that is to say, on the 23rd day of April, 1892, your Petitioner was discharged from gaol and from custody.
- 9. On the 27th day of March, 1892, your Petitioner's wife died, as more fully appears from the following certificate, at present in the possession of the Minister of Justice:

I HEREBY certify that I attended Annie Teresa Deniff during her last illness; that such person's age was stated to be 32 years; that I last saw her on the 27th day of March, 1892; that she died on the 27th day of March, 1892, at Brishane-street, Dubbo; and, to the best of my knowledge and belief, the cause of her death was as hereunder written:—

Causes of death.—Primary—Nervous prostration and shock. Secondary—Acute yellow atrophy of liver.

Witness my hand, this 28th day of March, 1892.

HARRY TRESIDER, M.R.C.S., England, &c.

Winginana-street, Dubbo.

Your Petitioner avers that the "nervous prostration and shock," which was so certified as the primary causes of his said wife's death, was caused solely by his said conviction, and that if he had not been so convicted as aforesaid his said wife, who was a young and healthy woman, would, in all human probability, be still living. The said Annie Teresa Deniff left four little children her surviving.

- 10. Your Petitioner is a storekeeper by trade; but at the time of his said arrest he was licensee of the "Star Hotel," near Nyngan. In consequence of his said arrest, conviction, and imprisonment, he has not only lost the earnings which he would otherwise have made, but he has lost his means of livelihood.
- 11. Your Petitioner was put to great expense in defending himself against the said charge, and in endeavouring to prove his innocence.
- 12. By reason of the premises your Petitioner's good name and credit have been greatly injured, and he respectfully submits that this injury is one which cannot be adequately compensated for by the said demonstration of his innocence.
- 13. By reason of the premises your Petitioner endured great mental and bodily suffering, whereby he has become broken in health, and he is less able to earn a livelihood for himself and his children than he otherwise would have been.

Your Petitioner therefore humbly prays-

- 1. That your Honorable House will take the premises into consideration, and grant your Petitioner such relief as may seem just.
- 2. That, for the purpose aforesaid, all proper orders may be made, directions given, and things done.
- 3. That your Petitioner may have such other and further relief in the premises as the nature of the case may require.

And your Petitioner will ever pray, &c.

JOHN DENIFF.

Sydney: Charles Potter, Government Printer.-1892.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ATTORNEYS' BILLS OF COSTS AND PRACTICE OF CONVEYANCING ACT. AMENDMENT BILL.

(PETITION FROM CERTAIN CERTIFICATED CONVEYANCERS OF THE SUPREME COURT OF NEW SOUTH WALES AGAINST.)

Ordered by the Legislative Assembly to be printed, 9 March, 1893.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Certificated Conveyancers of the Supreme Court of New South Wales,-

RESPECTFULLY SHOWETH:

That your Petitioners are all duly certificated conveyancers of the Supreme Court of New South Wales, under and in pursuance of the provisions of the 14th section of the Act 11 Victoria No. 33, intituled "An Act to regulate the taxation of attorneys' bills of costs and the practice of conveyancing."

That the 14th section of the Act above referred to it as follows:—

And be it enacted that every person, except a barrister or attorney and solicitor of the Supreme be it enacted that every person, except a barrister or attorney and solicitor of the Supreme Court, who shall be desirous of practising as a conveyancer shall, one month at least before making application as hereinafter mentioned, give notice in such manner and form as the Judges of the Supreme Court shall direct, of his intention to apply to the said Court for a certificate to practise as a conveyancer; and any person having given such notice as aforesaid shall be at liberty to apply to the said Court touching his fitness to practise as a conveyancer, and thereupon the Judges, or one of them, shall direct that the applicant shall be examined at the earliest convenient time by the Master-in-Equity of the said Court (or such other one or two officers of the Court) as the Judges may appoint to assist him, touching his, the applicant's, skill and knowledge in conveyancing, as well as to his character for integrity; and the said Master or his assistants shall be at liberty to put such questions to such applicant in respect to the matters aforesaid, and to require such proof of his character as shall be deemed proper; and if the said applicant shall be considered of competent ability and knowledge, and a fit and proper person to practise as a conveyancer, then the said Master shall be, and is hereby empowered to grant a certificate to such applicant, authorising him to draw, fill up, and prepare any conveyance, will, deed, bond, lease, or agreement for a lease, or other contract whatsoever, any conveyance, will, deed, bond, lease, or agreement for a lease, or other contract whatsoever, of, or relating to any estate or property, whether real or personal; and every such certificate shall be enrolled in the office of the Registrar of the Supreme Court, whereupon such applicant shall be deemed a certificated conveyancer, and entitled to practise as such, with power to appeal to the Court in case of refusal of such certificate by the Master as aforesaid. That your Petitioners' attention has been drawn to a Bill now before Parliament, having for its object the repeal of the said fourteenth section of the before-mentioned Act.

That your Petitioners would respectfully invite the attention of your Honorable House to that part of the preamble of the said Bill as follows:—

And whereas the said Act contains no provision whatever for securing the appointment only of persons who, by reason of their previous legal knowledge and practice, would offer to the public a reasonable guarantee of their fitness to act as conveyancers, and in consequence of such omission much harm may result from the appointment of persons who, though competent to pass the required examination, are yet, for want of previous legal knowledge and experience, unfitted to act as conveyancers.

That your Petitioners respectfully urge that the averments quoted from the preamble of the Bill are not founded on facts, and are calculated to mislead, inasmuch as the fourteenth section before set out does effectually provide for securing the appointment of those persons only who by previous legal knowledge and practice are fit to act as conveyancers, as all candidates for admission are required to satisfy the Court as to their fitness to practise as conveyancers before they are even admitted to examination, and before the actual grant of a certificate are required to undergo a rigid examination as their skill and knowledge upon the subjects of Real Property Law and conveyancing, and also to satisfy the examiners as to their character for integrity, before the Board, consisting of the Master-in-Equity of the Supreme Court and such one or two other officers of the Court as the Judges may appoint.

That in traversing the portion of the preamble to the Bill before quoted, your Petitioners would beg to draw attention to the fact that the said fourteenth section now sought to be repealed has been in force since the year one thousand eight hundred and forty-eight, yet it has never come to the knowledge of your Petitioners that any harm has hitherto resulted from the appointment of certificated conveyancers, but on the contrary it is respectfully submitted that a benefit has been conferred upon the public, inasmuch as they have been enabled to obtain the professional services of those who have devoted their study exclusively to Real Property Law and the practice of conveyancing, a branch which it will be admitted alone opens up a sufficiently extensive range without pursuing any of the numerous other distractions of a solicitors business, the fact being that conveyancers make Real Property Law a special and exclusive study, and thereby they obtain a solid foundation of sound knowledge and understanding of their work.

That your Petitioners would respectfully point out that the public have never asked for the repeal of the said fourteenth section, which it is urged is in itself an evidence that it is not expedient, or in the

public interest, that the repeal should take place.

That your Petitioners would further point out that the fourteenth section as it has hitherto stood is a beneficial one, inasmuch as it enables a person who has the ability, but who, from want of means, or not having wealthy parents, is unable to incur the expense of matriculation, pay a heavy premium, and serve under articles for five years to become a solicitor, while under the fourteenth section referred to he has an opportunity of raising himself from the mere drudgery of a solicitor's clerk, perhaps after many weary years of hard toil, by striking out and qualifying himself for the one branch of Real Property Law and conveyancing, passing the required examination, and becoming a certificated conveyancer.

That many persons at the present time are doubtless aiming, and have for long been fitting themselves by hard study for future and doubtless aiming, and it is submitted that the repeal of such

section would be a great injustice to them.

That the Bill referred to proposes to repeal the section without giving anything in return for that which it takes away, and thereby deprives existing conveyancers more especially of the right to place any

of their sons in the same profession in any business they may have established should they desire to do so.

That your Petitioners respectfully, but most emphatically, object to the repeal of the fourteenth section referred to, as, although the Bill does not propose to affect the rights and privileges of those already admitted as conveyancers, they do not deem it at all desirable that they should have to practise under a repealed statute, nor be deprived of the right to place any of their sons in the same profession should they desire to do so.

Your Petitioners therefore humbly pray that your Honorable House will take the circumstances before stated into your favourable consideration, and reject the Bill, thus leaving it open for others to have the same advantages and reap the same benefits as your Petitioners and all those other conveyancers

who have been already admitted.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 15 signatures.]

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

DISORDERLY CONDUCT SUPPRESSION BILL.—POSTAGE ACTS AMENDMENT BILL.

PETITION FROM WILLIAM SAUMAREZ SIITH (PRIMATE); JOHN WALKER, HONORARY SECRETARY; WILLIAM ALLEN, ASSISTANT SECRETARY; AND JOHN KENT, HONORARY TREASURER; IN FAVOUR OF.)

Received by the Legislative Assembly, 10 May, 1893.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned, acting on behalf and by authority of the "Council of the Churches" of New South Wales, which consists of thirty-two delegates officially appointed to represent the Church of England, the Presbyterian, the Wesleyan, the Congregational, the Baptist, and the Primitive Methodist Churches,—

HUMBLY SHOWETH:-

That your Petitioners regard with much favour certain provisions of two Bills now before your Honorable House, namely, the "Disorderly Conduct Suppression Bill," introduced in the Legislative Council by the Honorable the Minister of Justice, and the "Postage Acts Amendment Bill," introduced in the Legislative Assembly by the Honorable the Postmaster-General.

With reference to the former, your Petitioners are firmly persuaded that the passing of such a measure would, in a large degree, check the lawlessness that characterises the conduct of a portion of the youth of this Colony, and would prove an effectual restraint on what is now commonly known as "larrikinism."

That your Petitioners, viewing with alarm the gambling spirit now prevailing in the community, are gratified at seeing the provision contained in the 18th clause of the "Postage Acts Amendment Bill," prohibiting the delivery through the Post Office of letters or packets relating to horse-racing and other sports. Such prohibition, by checking the dissemination of information regarding what are known as "sweeps" and "consultations," would, in the opinion of your Petitioners, lessen in large measure an evil that has now reached great proportions.

Your Petitioners therefore humbly pray that your Honorable House will not allow the present session of Parliament to close until the two Bills herein referred to have become the law of the land.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 4 signatures.]

1832.

NEW SOUTH WALES.

TRADES DISPUTES CONCILIATION AND ARBITRATION ACT, 1892.

(REGULATIONS UNDER.)

Presented to Parliament, pursuant to Act 55 Dic. Ao. 29, sec. 25.

Attorney-General's Office, Sydney, 23 June, 1892.

THE following Regulations have been made by His Excellency the Governor, with the advice of the Executive Council:—

REGULATIONS under the "Trade Disputes Conciliation and Arbitration Act, 1892," prescribing the procedure for the purposes of making out lists of organizations representing the interests of employees and employers respectively, and in order to give effect to the provisions and requirements of the said Act with reference to the appointment of a Council of Conciliation for the whole Colony, and also of a Council of Arbitration pursuant to the said Act.

- 1. It shall be the duty of the Registrar of Friendly Societies as soon as practicable after the gazetting of these Regulations to prepare lists of all organizations registered in his office according to the law regulating the registration of Trade Unions or Friendly Societies, and representing the interests of employees. Such organizations shall be arranged under eight classes, as follows, viz., organizations whose members are employed on, or in connection with—
 - I. Shipping.
 - II. Railway and road construction and general labour.
 - III. Mining and machinery in connection with mines.
 - IV. Traffic on roads, railways, and tramways.
 - V. Building, building materials, construction, and work in wood and iron.
 - VI. Food, drink, clothing, and work in leather.
 - VII. Printing and kindred occupations.
 - VIII. Miscellaneous trades and callings.

All organizations which have a registered office or offices within some one of the five districts hereinafter specified, viz.:—The Metropolitan District, the Northern District, the Southern District, the Western District, and the Broken Hill District, shall be arranged under and for the appropriate class and district.

It shall also be the duty of the said Registrar at the same time to prepare lists of all organizations representing the interests of employers and registered in his office according to the law regulating the registration of Trade Unions or Friendly Societies, and, if practicable, to arrange such organizations in like manner as in the case of organizations representing the interests of employees.

The lists so to be prepared shall give the last known registered office or address of each such organization, and shall be published in the Gazette.

- 2. Within fourteen days after the publication of such lists in the Gazette some person authorized by the Minister (hereinafter termed the "authorized officer") shall transmit by post to the address of each Trade Union and of each Friendly Society (if any) specified in such lists as aforesaid, a voting-paper for the purpose of recommending a member of the Council of Conciliation to represent the employees or employers (as the case may be) in and for the class of trades or callings therein specified, and such voting-paper may be in the form contained in Schedule A or Schedule B to these Regulations, and shall be prepared so as to show on the face of it the particular class of organizations in respect of which, as well as the district within or in respect of which, the vote is to be recorded on such voting-paper. At the same time the authorized officer shall also transmit by post to the address of each Trade Union and of each Friendly Society (if any) specified in such lists as aforesaid, a voting-paper for the purpose of recommending a member of the Council of Arbitration to represent generally the employees or employers (as the case may be), and not in respect of any particular class of trades or callings, and such voting-paper may be in the form of Schedule C to these Regulations.
- 3. Every such voting-paper purporting to be authenticated by the signature of the President or Vice-President of the Trade Union or Friendly Society to which it has been transmitted, or in the absence of such President or Vice-President by any office-bearer of such Union or Society other than the Secretary thereof, and also to be countersigned by the Secretary or Acting Secretary thereof, or in the absence of such Secretary or Acting Secretary by any two members of such Union or Society not being office-bearers, shall be conclusive evidence that the person whose name is entered in such voting-paper has been recommended as a Member of the Council of Conciliation or of Arbitration, as the case may be, pursuant to the said "Trade Disputes Conciliation and Arbitration Act, 1892," and to these regulations.
- 4. Every such voting-paper shall be forwarded by some person on behalf of the Trade Union or Friendly Society to which it has been sent, in its enclosing envelope, to the Registrar of Friendly Societies, Sydney, so as to be received by him on or before the fifteenth day of August, in the year 1892.
- 5. Every voting-paper received by the said Registrar after the time limited for the receipt of voting-papers by the last preceding Regulation shall have no effect or validity.
- 6. The Registrar of Friendly Societies shall forthwith on the receipt of such voting-papers count the recommendations thereby recorded for members of the Council of Conciliation and also for a member of the Council of Arbitration, and as well by or on behalf of the organizations representing the interests of employees as by or on behalf of those representing the interests of employers, and shall forward the same in separate batches to the Minister, together with his report thereon, and the Minister shall, upon being satisfied of the accuracy of such report, publish in the Gazette the results of such recommendations, and declare at the same time in like manner the names of the persons appointed by the Governor on the footing of such recommendations, to be members of the Council of Conciliation and members of the Council of Arbitration respectively.
- 7. The voting-papers shall in all cases be contained within the fold of a stamped envelope, addressed to the Registrar of Friendly Societies, Sydney, and endorsed, "Voting-paper under the Trade Disputes Conciliation and Arbitration Act, 1892."

SCHEDULE A.

VOTING-PAPER of organization representing the interests of Employees pursuant to the provisions of the "Trade Disputes Conciliation and Arbitration Act, 1892."

On behalf of the Trade Union [or Society as the case may be], having a Registered Office at and placed under Class District, in the notice appearing in the Government Gazette of 1892, the person named below is hereby recommended to be appointed a member of the Council of Conciliation to be established in pursuance of the said "Trade Disputes Conciliation and Arbitration Act, 1892."

NEW SOUTH WALES.

TRADE DISPUTES CONCILIATION AND ARBITRATION ACT, 1892. (ADDITIONAL REGULATIONS:)

Presented to Parliament pursuant to sec. 25 of the Trade Disputes Conciliation and Arbitration Act, 1892.

> Attorney General's Department. Sydney, 6th September, 1892.

"TRADE DISPUTES CONCILIATION AND ARBITRATION ACT, 1892."

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Additional Regulations under the "Trade Disputes Conciliation and Arbitration Act, 1892."

EDMUND BARTON.

ADDITIONAL REGULATIONS.

Appointment of President.

1. The members of the Council of Arbitration may, within twenty-one days after their appointment, submit to the Minister the name of some impartial person for the position of President, by handing to the Clerk of Awards a document in the form A, contained in the Schedule. And it shall be the duty of the Clerk of Awards, after making a record of such submission, to forward it with all reasonable dispatch to the Minister.

Vacancies, &c.

2. The procedure for the purpose of making out lists of organisations, and of ascertaining and giving effect to the recommendations of the recommending authorities, prescribed by the Regulations of the 23rd June, 1892, shall be applicable in so far as they may be consistent therewith to the case or cases of any recommendation or recommendations required to be made in the event of disability through illness or other cause, or of a vacancy or vacancies arising through the death, resignation, or disqualification of any member of the Council of Conciliation or Arbitration. And in all such cases the President of the Council of Arbitration shall request the Minister to appoint an "authorised officer" to issue voting papers for the recommendation of a person or persons to fill the place or places left open by the causes hereinbefore referred to, and to fix a date for the lodging of the said papers in the hands of the Registrar of Friendly Societies. by the Regulations of the 23rd June, 1892, shall be applicable in

3. Every member of a Council of Conciliation shall be entitled to the following fees for attendance:—

	£	8.	d.	
Preliminary meetings	1	0	0	
Whole day sittings	1	10	0	
Half-day sittings	1	0	0	
and to such allowances for travelling expenses the Minister may approve.	or	oth	erwise	, as

Office of Clerk of Awards.

The Office of the Clerk of Awards shall be open to the public for the transaction of business between the hours of 10 a.m. and 1 p.m. and 2 and 4 30 p.m. on each of the business days of the week, except Saturday, when the office shall close at noon. The office shall be closed on all public holidays.

Report to President.

Report to President.

5. The Clerk of Awards shall keep a journal in which shall be entered, from day to day, minutes of all proceedings and matters commenced, taken, or done by or before him, and shall report the said proceedings and matters to the President of the Council of Arbitration, either by submitting the said journal to him or furnishing him with a copy thereot; and the President shall notify that such proceedings and matters have been reported to him from time to time, by endorsing the said journal, or copy thereof, "Reported to me, this day of "18".

(Signed)

Managers.

6. Every party agreeing or making application to refer a dispute or claim to a Council of Conciliation or the Council of Arbitration should, where possible, do so in the name of its Managers or persons representing such party, one of whom should be named as Manager in Chief, to whom all correspondence and notices may be addressed; and notice to such Manager in Chief shall be taken to be notice to the party of whom he is a representative. The authority to Managers to act may be in the form F.

Agreement to refer to Conciliation and "Joint Statement."

Agreement to refer to Conciliation and "Joint Statement."

7. The parties to any dispute or claim may agree to refer it to a Council of Conciliation, and may draw up a "Joint Statement" setting out as concisely as may be the facts and circumstances agreed upon by the parties, and the matters in dispute between them; and such agreement and joint statement shall be in duplicate and may be in the form C, and shall be signed by the Managers of each party, one copy to be retained by each party; either party may make application to refer to conciliation by forwarding to the Clerk of Awards its said copy of the agreement and joint statement, to be filed by him in his office.

Application by one party to refer to Concilliation and "Party Statement."

8. If no such agreement as aforesaid become to between 8. If no such agreement as aforesaid be come to between the parties, then either party may make application to refer to conciliation, and forward to the Clerk of Awards two copies of a "Party Statement," containing a statement of the matter in dispute—a narrative of the material facts and circumstances on which such party intends to rely; and such application and "Party Statement" may be in the form D, and shall be signed by the Managers of such party. The Clerk of Awards shall file one of the copies of the said application and shall forward the other copy to the copposite application, and shall forward the other copy to the opposite party, endorsed as follows:—"You are requested within fourteen days after the receipt of this application and party statement to forward your Reply hereto."

The "Reply."

9. Within fourteen days after the receipt of a "Party Statement," a "Reply" thereto may be made by forwarding two copies of the same to the Clerk of Awards. The reply shall agree to the matter in dispute being referred to conciliation, and may state all the facts which the party making it thinks necessary or advisable to set forth, and shall admit, explain, or deny the matters contained in the Party Statement. The reply may be in the form E contained in the Schedule. The Clerk of Awards shall file one copy of the reply, and forward the other copy to the party making the party statement.

The form of Statements and Reply.

The form of Statements and Reply.

10. Every "Joint Statement," and "Party Statement," and "Reply," and any copy thereof, shall be in print, type-writing, or legible hand-writing, and shall set out in simple language, and as concisely as possible consistent with clearness, the matters dealt with and the questions raised, and where convenient to do so shall be divided into paragraphs numbered consecutively, each paragraph containing as nearly as may be a separate matter. separate matter.

Applications.

Applications.

11. At any time after the delivery of a "Joint Statement," "Party Statement," or "Reply," as the case may be, and before a dispute or claim has been entered upon by the Conciliators or Arbitrators, application to amend either statements or reply may be made to the Clerk of Awards, who may thereupon allow such amendments to be made, or disallow the same. Notice of all such amendments shall be forthwith given to the other party. The Clerk of Awards may also, upon given to the other party. The Clerk of Awards may also, upon application to him and cause shown, extend the time for replying.

Meeting of Conciliators.

12. The Clerk of Awards, the parties to a dispute or claim 12. The Clerk of Awards, the parties to a dispute or claim having named their Conciliators, shall, by notice in writing, in the words or to the effect of form G contained in the Schedule, convene a meeting of such Conciliators, at such time and place as the President may direct. On such meeting being held, the Clerk of Awards shall make such communications to the parties as the said Conciliators may direct, and, where necessary, may require a list of witnesses to be forwarded to him, and such list may be in the form H contained in the Schedule. in the Schedule.

Settlement.

- 13. Where any dispute or claim has been settled or adjusted by a Council of Conciliation, an agreement shall be drawn up embodying the terms of such settlement or adjustment, and shall be signed by the Manager or Managers of each party and be witnessed by the Conciliators. Such agreement may be in the form I contained in the Schedule.
- 14. Where a Council of Conciliation has been unable to bring about a settlement or adjustment of any dispute or claim referred to them satisfactory to the parties thereto, they shall forward a written report, signed by the members of the Council, to the Clerk of Awards. Such report may be in the form J contained in the Schedule.

Application by both parties to refer to Arbitration and "Joint Statement."

15. Where a dispute or claim has not been referred to a Council of Conciliation, both parties, if it is desired to refer it to the Council of Arbitration, must make application to do so, and may draw up a joint statement similar to that provided for in the case of an agreement to refer to conciliation (Reg. 7). Such application and statement may be in the form K continual of the School of the continual of the school of tained in the Schedule.

Application by one party to refer to Arbitration.

16. Where a dispute or claim has been referred to a Council of Conciliation, but has not been settled or adjusted by such Council, either party to such dispute or claim may require the Clerk of Awards to refer the dispute or claim to the Council of Arbitration for settlement by award, and such requisition may be in the form L contained in the Schedule.

Award to be made a Rule of Cou t.

17. Where it is desired to make an award enforceable by legal process, the agreement to do so between the parties may be in the form O contained in the Schedule.

Consent to assessors sitting,

18. Where a dispute or claim, having been referred to a Council of Conciliation, has not been settled or adjusted by such Council of Conciliation, has not been settled or adjusted by such Council, and thereupon such dispute or claim has been referred to the Council of Arbitration for award, the parties to the said dispute or claim may consent to two members of the said Council of Conciliation, on behalf of each such party, sitting as assessors upon the reference to the Council of Arbitration, and such consent may be in the form P contained in the Schedule.

19. A majority of any Council of Conciliation or of the Council of Arbit ation may reject evidence which may appear to it to be immaterial or superfluous. 20. Where a Council of Conciliation or the Council of Arbi-

tration thinks fit, evidence on affidavit may be received.

Secretaries and shorthand writers.

21. The managers, or other representatives of either party, before a Council of Conciliation or the Council of Arbitration, may appoint a secretary or shorthand writer, or more than one, to take notes of the evidence given before such Council; and in any matter heard before a Council of Conciliation the said any matter neard before a Council of Conciliation the said managers and the said secretaries and shorthand writers shall, if required by a majority of the Conciliators, make oath that such notes, or the contents thereof, shall not be made public by them. The cost of employing such secretaries or shorthand writers shall be defrayed by the parties respectively employing

Variance from Forms.

22. The forms of proceedings contained in the Schedule may be used in the cases to which they are applicable, with such alterations as the nature of the dispute or claim, the description of the Council to which it is referred, the character of the parties, or the circumstances of the case may render necessary.

Appointment of President.

In the matter of

day

We the undersigned Arbitrators appointed on day of , 189 , in accordance with the provisions of "The Trade Disputes Conciliation and Arbitration Act, 1892," submit the name of , of , as that of an impartial person qualified for the position of President of the Council of Arbitration established under the provisions of the aforesaid Act.

To the Hon, the

# FUGITIVE CRIMINALS.

(DESPATCH RESPECTING MUTUAL EXTRADITION OF.

Presented to Parliament by Command.

Department of Justice,

Sydney, 24th March, 1892.

His Excellency the Governor directs the publication, for general information, of the following Despatch, dated 24th November, 1891, from the Secretary of State for the Colonies.

R. E. O'CONNOR.

[Circular.]

Downing-street,

17th December, 1891.

Sir

With reference to my predecessor's Circular despatch of the 16th of March, 1885, I have the honour to transmit to you, for publication in the Colony under your Government, a copy of an Order of Her Majesty the Queen in Council, dated the 24th of November, 1891, for giving effect to the Protocol between Her Majesty and the President of the Oriental Republic of the Uruguay, concluded at Monte Video on the 20th of March, 1891, the ratifications of which were exchanged at Monte Video on the 17th of July, 1891, for the extension of the period stipulated in Article IX of the Treaty of 26th March, 1884, for the mutual extradition of Fugitive Criminals.

I have, &c.,

KNUTSFORD.

The Officer Administering

the Government of New South Wales.

ORDER

# ORDER IN COUNCIL.

EXTRADITION TREATY BETWEEN GREAT BRITAIN AND THE ORIENTAL REPUBLIC OF THE URUGUAY,

Windsor, 24th November, 1891.

At the Court at Windsor, the 24th day of November, 1891.

Present:

THE QUEEN'S MOST EXCELLENT MAJESTY.

Lord President. Earl of Limerick. Lord Walter Gordon-Lennox. Sir James Fergusson, Bart. Mr. A. J. Balfour. Sir Charles Pearson.

Whereas by the Extradition Acts, 1870 and 1873, it was amongst other things enacted that, where an arrangement has been made with any foreign State with respect to the surrender to such State of any fugitive criminals, Her Majesty may, by Order in Council, direct that the said Acts shall apply in the case of such foreign State; and that Her Majesty may, by the same or any subsequent Order, limit the operation of the Order, and restrict the same to fugitive criminals who are in or suspected of being in the part of Her Majesty's dominions specified in the Order, and render the operation thereof subject to such conditions, exceptions, and qualifications as may be deemed expedient; and that if, by any law made after the passing of the Act of 1870 by the Legislature of any British possession, provision is made for carrying into effect within such possession the surrender of fugitive criminals who are in or suspected of being in such British possession, Her Majesty may, by the Order in Council applying the said Acts in the case of any foreign State, or by any subsequent Order, suspend the operation within any such British possession of the said Acts, or of any part thereof, so far as it relates to such foreign State and so long as such law continues in force there and no longer:

And whereas a Treaty was concluded on the twenty-sixth day of March, one thousand eight hundred and eighty-four, between Her Majesty and the President of the Oriental Republic of the Uruguay for the mutual extradition of fugitive criminals:

And whereas by an Order of Her Majesty the Queen in Council, dated the fifth day of March, one thousand eight hundred and eighty-five, it was directed that the Extradition Acts, 1870 and 1873, should apply in the case of the Oriental Republic of the Uruguay:

And whereas by an Act of the Parliament of Canada passed in 1886, and entitled "An Act respecting the Extradition of Fugitive Criminals," provision is made for carrying into effect within the Dominion the surrender of fugitive criminals:

And whereas by an Order of Her Majesty the Queen in Council, dated the seventeenth day of November, one thousand eight hundred and eighty-eight, it was directed that the operation of the Extradition Acts, 1870 and 1873, should be suspended within the Dominion of Canada so long as the provision of the said Act of the Parliament of Canada of 1886 should continue in force and no longer:

And whereas a Protocol was concluded on the twentieth day of March, one thousand eight hundred and ninety-one, between Her Majesty and the President of the Oriental Republic of the Uruguay, providing for the extension of the period stipulated in Article IX of the above-mentioned Treaty of the twenty-sixth day of March, one thousand eight hundred and eighty-four, which Protocol is in the terms following:

eighty-four, which Protocol is in the terms following:

"Monte Video, the twentieth day of March, one thousand eight hundred and ninety-one, their Excellencies Mr. Ernest Mason Satow, Companion of the Most Distinguished Order of St. Michael and St. George, Her Britannic Majesty's Minister Resident and Consul-General, and Dr. Manuel Herrero y Espinosa, Minister for Foreign Affairs, having met together at the Ministry for Foreign Affairs with the object of providing for the extension of the period stipulated in Article IX of the Treaty for the Extradition of Criminals, in force between their respective countries, for the provisional arrest of persons charged with any of the crimes or offences specified in the said Treaty, and having exchanged their full powers, which were found to be in good and due form, have agreed to the following Declaration, which shall be considered an integral part of the said international compact:

"The period of thirty days fixed by Article IX of the Treaty for the Extradition of Criminals in force between the Oriental Republic of the Uruguay and Great Britain, for the provisional arrest of persons charged with any of the crimes or offences specified in the said Treaty, being thoroughly recognised as insufficient, both Governments agree that the said period shall henceforth be fixed at sixty days.

"In witness whereof the said Plenipotentiaries have caused the present Protocol to be drawn up in duplicate, and have signed both copies, and thereto affixed their seals on the date above expressed.

"(l.s.) Ernest Mason Satow.
"(l.s.) Manuel Herrero y Espinosa."

"En Monte Video, à los veinte dias del mes de Marzo del año de 1891, reunidos en le Ministerio de Relaciones Exteriores, año de 1891, reunidos en le Ministerio de Relaciones Exteriores, suas Excelencias el Señor Don Ernesto Satow, Miembro de la muy Distinguida Orden de San Miguel and San Jorge, Ministro Residente y Cónsul-General de Su Magestad Británica en la República, y el Señor Doctor Don Manuel Herrero y Espinosa, Ministro del Reino, con el objecto de establecer la ampliación del término fijado en el Artículo IX del Tratado de Extradición de Criminales vigente entre ambos países para la detención preventiva de las personas perseguidas por alguno de los crimenes ó delitos especificados en dicho Tratado, despues de cangeados sus plenos poderes, que fueron hallados en buena y debida forma, convinieron en hacer la siguiente Declaración, que se considerer: parte integrante del referido pacto interque se considerer: parte integrante del referido pacto internacional

nacional—
"Siendo notoriamente insuficiente el término de treinta
dias que establece el Artículo IX del Tratado de Extradición
de Criminales vigente entre la Gran Bretaña y la República
Oriental del Uruguay, para la detención preventiva de las
personas perseguidas por alguno de los crímenes ó delitos
especificados en el referido Tratado, ambos Gobiernos convienen en que dicho plazo quede desde luego fijado en sesenta

dias.
"En fé de lo cual, los Señores Plenipotenciarios hicieron labrar el presente Protocolo por duplicado, cuyos ejemplares firmaron y sellaron con sus sellos en la fecha arriba espresada.

"(L.S.) ERNEST MASON SATOW.
"(L.S.) MANUEL HERRERO Y ESPINOSA."

And whereas the ratifications of the said Protocol were exchanged at Monte Video on the seventeenth day of July, on

And whereas the ratifications of the said Protocol were exchanged at Monte Video on the seventeened day of oday, of thousand eight hundred and ninety-one:

Now, therefore, Her Majesty, by and with the advice of Her Privy Council, and in virtue of the authority committed to Her by the said recited Acts, doth order, and it is hereby ordered, that from and after the seventh day of December, one thousand eight hundred and ninety-one, the said Acts shall apply in the case of the said Protocol of the twentieth day of March, one thousand eight hundred and ninety-one, as fully to all intents and purposes as in the case of the said recited Treaty of the twenty-sixth day of March, one thousand eight hundred and eighty-four:

Provided always, and it is hereby further ordered that the operation of the said Extradition Acts, 1870 and 1873, shall be suspended within the Dominion of Canada so far as relates to the Oriental Republic of the Uruguay and to the said Treaty and Protocol, and so long as the provisions of the Canadian Act aforesaid of 1886 continue in force, and no longer.

C. L. PEEL.

[Extract

#### [Extract from the "London Gazette" of Friday, May 13, 1892.] ORDER IN COUNCIL.

Extradition Treaty between Great Britain and Monaco. At the Court at Windsor, the 9th day of May, 1892.

Present:-

THE QUEEN'S MOST EXCELLENT MAJESTY.

Lord President. Lord Steward.

Earl of Yarborough. Sir Walter Barttelot, Bart.

Mr. Forwood.

Whereas by the Extradition Acts, 1870 and 1873, it was amongst other things enacted that, where an arrangement has been made with any foreign State with respect to the surrender to such State of any fugitive criminals, her Majesty may, by Order in Council, direct that the said Acts shall apply in the case of such foreign State; and that Her Majesty may, by the same or any subsequent Order, limit the operation of the order, and restrict the same to fugitive criminals who are in or suspected of being in the part of Her Majesty's dominions specified in the Order, and render the operation thereof subject to such conditions, exceptions, and qualifications as may be deemed expedient; and that if, by any law made after the passing of the Act of 1870 by the Legislature of any British possession, provision is made for carrying into effect within such possession the surrender of fugitive criminals who are in or suspected of being in such British possession, Her Majesty may, by the Order in Council applying the said Acts in the case of any foreign State, or by any subsequent Order, suspend the operation within any such British possession of the said Acts, or of any part thereof, so far as it relates to such foreign State, and so long as such law continues in force there and no longer:

continues in force there and no longer:

And whereas by an Act of the Parliament of Canada passed in 1886, and entitled "An Act respecting the Extradition of Fugitive Criminals," provision is made for carrying into effect within the Dominion the surrender of fugitive criminals:

And whereas by an Order of Her Majesty the Queen in Council, dated the seventeenth day of November, one thousand eight hundred and eighty-eight, it was directed that the operation of the Extradition Acts, 1870 and 1873, should be suspended within the Dominion of Canada so long as the provision of the said Act of the Parliament of Canada of 1886 should continue in force, and no longer:

And whereas a Treaty was concluded on the seventeenth day of December, one thousand eight hundred and ninety-one, between Her Majesty and His Serene Highness the Prince of Monaco, for the mutual extradition of fugitive criminals, which Treaty is in the terms following:—

Treaty is in the terms following:—

"Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, and His Serene Highness the Prince of Monaco, having judged it expedient, with a view to the better administration of justice and to the prevention of crime within their respective territories, that persons charged with or convicted of the crimes hereinafter enumerated, and being fugitives from justice, should, under certain circumstances, be reciprocally delivered up; the said High Contracting Parties have named as their Plenipotentiaries to conclude a Treaty for this purpose, that is to say:

tentiaries to conclude a Treaty for this purpose, that is to say:

"Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, Edwin Henry Egerton, Esquire, Companion of the Most Honourable Order of the Bath, Her Majesty's Minister Plenipotentiary at Paris;

"And His Serene Highness the Prince of Monaco, Louis Fernandde Bonnefoy, Baron du Charmel, Envoy Extraordinary and Minister Plenipotentiary of Monaco in France;

"Who, having communicated to each other their respective Full Powers, found in good and due form, have agreed upon and concluded the following Articles:—

#### ARTICLE I.

"The High Contracting Parties engage to deliver up to cach other those persons who, being accused or convicted of a crime or offence committed in the territory of the one Party, shall be found within the territory of the other Party, under the circumstances and conditions stated in the present Treaty.

#### ARTICLE II.

"The crimes or offences for which the extradition is to be granted are the following:—

"1. Murder, or attempt, or conspiracy to murder.

- "2. Manslaughter.

  "3. Assault occasioning actual bodily harm. Malicious wounding or inflicting grievous bodily harm.

  "4. Counterfeiting or altering money, or uttering counterfeit or altered money.

  "5. Knowingly making any instrument, tool, or engine adapted and intended for counterfeiting coin.
- "6. Forgery, counterfeiting, or altering or uttering what is forged, or counterfeited, or altered.

"7. Embezzlement or larceny.
"8. Malicious injury to property if the offence be indictable.

"9. Obtaining money, goods, or valuable securities by false

pretences.

"10. Receiving money, valuable security or other property knowing the same to have been stolen, embezzled, or unlawfully obtained.

"11. Crimes against bankruptcy law.

- "12. Fraud by a bailee, banker, agent, factor, trustee, or director, or member or public officer of any company.
  - "13. Perjury, or subornation of perjury.

"14. Rape.

- "Sa Majesté la Reine du Royaume-Uni de la Grande-Bretagne et d'Irlande, Impératrice des Indes, et Son Altesse Sérénissime le Prince de Monaco, ayant jugé convenable, en vue d'une meilleure administration de la justice, et pour prévenir les crimes dans leurs territoires respectifs, que les individus accusés ou convaincus des crimes ci-après énumérés, et qui se seraient soustraits par la fuite aux poursuites de la justice fussent, dans certaines circonstances, réciproquement extradés; les dites Hautes Parties Contractantes ont nommé pour leurs Plénipotentiaires, à l'effet de conclure un Traité dans ce but, savoir;

  "Sa Majesté la Reine du Royaume-Uni de la Grande-Bretagne et d'Irlande, Impératrice des Indes, M. Edwin Henry Egerton, Compagnon du Très Honorable Ordre du Bain, Ministre Plénipotentiaire de Sa Majesté à Paris;

  "Et Son Altesse Sérénissime le Prince de Monaco, Louis Fernand de Bonnefoy, Baron du Charmel, Envoyé Extraordinaire et Ministre Plénipotentiaire de Monaco en France.

  "Lesquels, après s'être communiqué leurs Pleins Pouvoirs respectifs, trouvés en bonne et due forme, ont arrêté et conclu les Articles suivants:—

#### ARTICLE I.

"Les Hautes Parties Contractantes s'engagent à se livrer réciproquement les individus qui, poursuivis ou condamnés pour un crime ou un délit commis sur le territoire de l'une des Parties, seraient trouvés sur le territoire de l'autre, dans les circonstances et sous les conditions prévues par le présent

#### ARTICLE II.

"Les crimes et délits pour lesquels l'extradition sera accordée sont les suivants :---

corquee sont les sulvants:—

"1. Assassinat, tentative et complicité d'assassinat, ou complot ayant ce crime pour but.

2. "Homicide sans préméditation ou guet-apens.

3. Voies de fait ayant occasionné des lésions corporelles.

"4. Contrefaçon altération de monnaies, et mise en cir-

"5. Fabrication avec connaissance de cause d'un instru-ment, outil, ou engin destiné à la contrefaçon de la monnaie

ment, outil, oit engin destine à la contrelaçon de la monnate du pays.

"6. Faux, contrefaçon, altération ou mise en circulation de pièces, effets ou écritures publics ou privés falsifiés, contrefaits, ou altérés.

"7. Soustraction frauduleuse ou vol.

"8. Destruction ou dégradation de toute propriété, lorsque le fait incriminé est punissable de peines criminelles ou corrections les

rectionnelles.
"9. Escroquerie d'argent, valeurs, ou d'autres objets, sous

de faux prétextes.

"10. Recel en connaissance de cause de numéraire, valeurs ou autres objets volés, provenant de soustractions, d'escroqueric ou d'abus de confiance.

"11. Banqueroute fraudulcuse et fraudes commises dans les

- faillites.

  "12. Abus de confiance (commis par un dépositaire, administrateur, banquier, fidéi-commissaire, mandataire, commissionnaire, membre ou fondateur d'une Société quelcunque).

  "13. Faux serment ou subornation de témoins.

  "14. Viol.

"15. Carnal knowledge, or any attempt to have carnal knowledge, of a girl under sixteen years of age, so far as such acts are punishable by the law of the State upon which the demand is made.

"16. Indecent assault. Indecent assault without violence upon children of either sex under thirteen years of age.

"17. Administering drugs or using instruments with intent to procure the miscarriage of a woman.
"18. Abduction.
"19. Child stealing.
"20. Abandoning children, exposing or unlawfully detaining them

ing them.
"21. Kidnapping and false imprisonment.
"22. Burglary or housebreaking.

"24. Robbery with violence.
"25. Any malicious act done with intent to endanger the safety of any person in a railway train.

"26. Threats by letter, or otherwise, with intent to extort.

"26. Threats by letter, or otherwise, with intent to extort.
"27. Piracy by law of nations.
"28. Sinking or destroying a vessel at sea, or attempting or conspiring to do so.
"29. Assaults on board a ship on the high seas, with intent to destroy life, or to do grievous bodily harm.
"30. Revolt, or conspiracy to revolt, by two or more persons, on board a ship on the high seas against the authority of the master.

sons, on board a ship on the high seas against the authority of the master.

"31. Dealing in slaves in such a manner as to constitute a criminal offence against the laws of both States.

"Extradition is also to be granted for participation in any of the aforesaid crimes, provided such participation be punishable by the laws of both the Contracting Parties.

"Extradition may also be granted, at the discretion of the State applied to, in respect of any other crime for which, according to the laws of both the Contracting Parties for the time-being in force, the grant can be made. time-being in force, the grant can be made.

#### ARTICLE III.

"Either Government may, in its absolute discretion, refuse to deliver up its own subjects to the other Government.

#### ARTICLE IV.

"The extradition shall not take place if the person claimed on the part of the British Government, or the person claimed on the part of the Government of Monaco has already been tried and discharged or punished, or is still under trial, within the territories of the two High Contracting Parties respectively, for the crime for which his extradition is demanded. "If the person claimed on the part of the British Government, or if the person claimed on the part of the Government of Monaco should be under examination, or is undergoing sentence under a conviction, for any other crime within the territories of the two High Contracting Parties respectively, his extradition shall be deferred until after he has been discharged, whether by acquittal or on expiration of his sentence, charged, whether by acquittal or on expiration of his sentence, or otherwise.

#### ARTICLE V.

"The extradition shall not take place if, subsequently to the commission of the crime, or the institution of the penal prosecution, or the conviction thereon, exemption from prosecution or punishment has been acquired by lapse of time, according to the leave of the critical relief. cording to the laws of the state applied to.

#### ARTICLE VI.

"A fugitive criminal shall not be surrendered if the offence in respect of which his surrender is demanded is one of a political character, or if he prove that the requisition for his surrender has in fact been made with a view to try or punish him for an offence of a political character.

### ARTICLE VII.

"A person surrendered can in no case be kept in prison, or be brought to trial in the State to which the surrender has been made, for any other crime or on account of any other matters than those for which the extradition shall have taken place, until he has been restored or had an opportunity of returning to the State by which he has been surrendered.

"This stipulation does not apply to crimes committed after the extradition.

#### ARTICLE VIII.

"The requisition for extradition shall be made in the following manner:

"Applications on behalf of Her Britannic Majesty's Govern-ment for the surrender of a fugitive criminal in Monaco shall be made by Her Majesty's Consul in the Principality.

"Application on behalf of the Principality of Monaco for the surrender of a fugitive criminal in the United Kingdom shall be made by the Consul-General of Monaco in London.

"15. Commerce charnel avec une jeune fille âgée de moins de 16 ans, ou tentative de ce fait, en tant que les faits sont punissables d'après la loi du pays requis.

"16. Attentat à la pudeur avec violence. Attentat à la pudeur sans violence sur des enfants de l'un ou l'autre sexé, âgés de moins de 13 ans.
"17. Administration de substances ou emploi d'instruments

dans l'intention de provoquer l'avortement.

"18. Enlèvement ou détournement de mineurs.

"19. Vol d'enfants.

"23. Incendie volontaire.

"24. Vol avec violence.
"25. Tout acte commis avec intention de mettre en danger la vie de personnes se trouvant dans un train de chemin de

"26. Menaces, écrites ou autres; faites en vue d'extorsion.
"27. Piraterie considéré comme crime par le droit des gens.
"28. Submersion, échouement, ou destruction d'un navire

"28. Submersion, échouement, ou destruction d'un navire en mer, ou tentative ou complot ayant ce crime put but.
"29. Attaque à bord d'un navire en haute mer dans le but d'homicide ou afin de porter de graves lésions corporelles.
"30. Révolte, ou complot en vue de révolte, commis par deux ou plusieurs personnes à bord d'un navire en haute mer, contre l'autorité du capitaine.
"31. Traite des Esclaves telle qu'elle est punie par les lois des deux pays.

des deux pays.

"L'extradition aura également lieu pour complicité d'un des crimes ci-dessus mentionnés, pourvu que la complicité soit punissable par les lois des deux Parties Contractantes.

"Il dépendra de l'Etat requis d'accorder également l'extradition pour tout autre crime à raison duquel l'extradition peut avoir lieu d'après les lois en vigueur des deux Parties Contractantes.

#### ARTICLE III.

"Chaucun des deux Gouvernements aura liberté pleine et entière de refuser à l'autre l'extradition de ses propres sujets.

#### ARTICLE IV.

"L'extradition ne sera pas accordée si l'individu réclamé par le Gouvernement du Royaume-Uni ou par celui de la Principauté de Monaco a déjá été jugé acquitté ou puni, ou se trouve encore sous jugement, dans les territoires des deux Hautes Parties Contractantes respectivement, pour le crime à raison duquel l'extradition est demandé.
"Si la personne réclamée par le Gouvernement du Royaume-Uni ou par celui de la Principauté de Monaco est en état de

Uni ou par celui de la Principauté de Monaco est en état de prévention ou si, ayant été condamnée, elle subit la peine qui lui a été infligée dans les territoires des deux Hautes Parties Contractantes respectivement, pour un autre crime, son extradition sera différée jusqu'à sa remise en liberté, soit qu'elle ait été acquittée, soit qu'elle ait purgé sa peine ou pour toute autre raison.

#### ARTICLE V.

"L'extradition n'aura pas lieu si depuis la perpétration du crime, les poursuites ou la condamnation, la prescription des poursuites ou de la peine est acquise d'après les lois du pays auquel la demande est adressée.

#### ARTICLE VI.

"Le criminel fugitif ne sera pas extradé si le délit pour lequel l'extradition est demandée est considéré comme un délit politique, ou si l'individu prouve que la demande d'extradition a été faite en réalité dans le but de le poursuivre ou de le punir pour un délit d'un caractère politique.

#### ARTICLE VII.

"L'individu qui aura été livré ne pourra, en aucun cas, dans le pays auquel l'extradition a été accordée, être maintenu en état d'arrestation ou poursuivi pour aucun crime ou faits autres que ceux qui avaient motivé l'extradition, à moins qu'il n'ait été réintégré, ou n'ait eu l'occasion de retourner de luimême dans l'Etat qui l'avait extradé.
"C'ette stipulation n'est pas applicable aux crimes commis après l'extradition.

après l'extradition.

#### ARTICLE VIII.

"L'extradition sera demandée de la manière suivante:-

"La demande de la part du Gouvernement de Sa Majesté Britannique pour l'extradition d'un criminel réfugié dans la Principauté de Monaco, sera faite par le Consul de Sa Majesté accrédité près de Son Altesse Séronissime.

"La demande de la part de la Principauté de Monaco pour l'extradition d'un criminel fugitif dans le Royaume-Uni sera faite par le Consul-Général de Monaco a Londres.

"The requisition for the extradition of an accused person must be accompanied by a warrant of arrest issued by the competent authority of the State requiring the extradition, and by such evidence as, according to the laws of the place where the accused is found, would justify his arrest if the crime had been committed there.

"If the requisition relates to a person already convicted, it must be accompanied by the sentence of condemnation passed against the convicted person by the competent court of the state that makes the requisition for extradition.

"A sentence passed in contumaciam is not to be deemed a conviction, but a person so sentenced may be dealt with as an

conviction, but a person so sentenced may be dealt with as an accused person.

#### ARTICLE IX.

"If the requisition for extradition be in accordance with the foregoing stipulations, the competent authorities of the state applied to shall proceed to the arrest of the fugitive.

"If the fugitive has been arrested in the British dominions, he shall forthwith be brought before a competent Magistrate, who is to examine him and to conduct the preliminary investigation of the case, just as if the apprehension had taken place for a crime committed in the British dominions.

"In the examinations which they have to make in accordance with the foregains timulations the authorities of the

ance with the foregoing stipulations, the authorities of the British dominions shall admit as valid evidence the sworn depositions or the affirmations of witnesses taken in Monaco, or copies thereof, and likewise the warrants and sentences issued therein, and certificates of, or judicial documents stating the fact of, a conviction, provided the same are authenticated as follows:—

"1. A warrant must purport to be signed by a Judge, Magistrate, or officer of the Principality of Monaco.
"2. Depositions or affirmations or the copies thereof must purport to be certified under the hand of a Judge, Magistrate, or officer of the Principality of Monaco, to be the original depositions or affirmations, or to be the true copies thereof, as

depositions or affirmations, or to be the true copies thereof, as the case may require.

"3. A certificate of or judicial document stating the fact of a conviction must purport to be certified by a Judge, Magistrate, or officer of the Principality of Monaco.

"4. In every case such warrant, deposition, affirmation, copy, certificate, or judicial document must be authenticated either by the oath of some witness, or by being sealed with the official seal and legalisation of the Governor-General of the Principality of Monaco; but any other mode of authentication for the time being permitted by the law in that part of the British dominions where the examination is taken, may be substituted for the foregoing.

#### ARTICLE XI.

"If the fugitive has been arrested in the Principality of Monaco, his surrender shall be granted if, upon examination by a competent authority, it appears that the documents furnished by the British Government contain sufficient private

furnished by the British Government contain sufficient fractile facie evidence to justify the extradition.

"The authorities of the Principality shall admit as valid evidence records drawn up by the British authorities of the depositions of witnesses, or copies thereof, and records of conviction or other judicial documents or copies thereof: Provided that the said documents be signed or authenticated by an authority whose competence shall be certified by the seal of a Minister of State of Her Britannic Majesty.

#### ARTICLE XII.

"The extradition shall not take place unless the evidence be found sufficient, according to the laws of the State applied to, either to justify the committal of the prisoner for trial, in case the crime has been committed in the territory of the said State, or to prove that the prisoner is the identical person convicted by the Courts of the State which makes the requisition, and that the crime of which he has been convicted is one in represent of which controlling could at the time of such conrespect of which extradition could, at the time of such conviction, have been granted by the State applied to. In Her Britannic Majesty's dominions the fugitive criminal shall not be surrendered until the expiration of fifteen days from the date of his being committed to prison to await his surrender.

#### ARTICLE XIII.

"If the individual claimed by one of the two High Contracting Parties in pursuance of the present Treaty should be also claimed by one or several other powers, on account of other crimes or offences committed upon their respective territories, his extradition shall be granted to that state whose demand is earliest in date.

#### ARTICLE XIV.

"If sufficient evidence for the extradition be not produced within two months from the date of the apprehension of the fugitive, or within such further time as the State applied to, or the proper Tribunal thereof shall direct, the fugitive shall be set at liberty, "La demande d'extradition d'un prévenu devra être accompagnée d'un mandat d'arrêt décerné par l'autorité compétente de l'état requérant, et des preuves qui, d'après les lois de l'endroit où le prévenu a été trouvé, justifieraient son arrestation si l'acte punissable y avait été commis.

"Si la demande d'extradition concerne une personne déjà condamnée, elle doit être accompagnée de l'arrêt de condamna-tion qui a été rendu contre le coupable par le tribunal

compétent de l'état requérant.
"Un arrêt rendu par contumace ne sera pas considéré comme une condamnation, mais une personne ainsi condamnée

pourra être traitée comme une personne poursuivie.

#### ARTICLE IX.

"Si la demande d'extradition s'accorde avec les stipulations précédentes, les autorités compétentes de l'état requis pro-céderont à l'arrestation du fugitif.

#### ARTICLE X.

ARTICLE X.

"Si le fugitif est arrêté sur le territoire Britannique, il sera aussitôt amené devant un Magistrat compétent, qui devra l'entendre et procéder à l'examen préliminaire de l'affaire de la même manière que si l'arrestation avait eu lieu pour un crime commis sur le territoire Britannique.

"Les autorités de la Grande-Bretagne, quand elles procéderont à l'examen établi par les stipulations précédentes, devront admettre comme preuves entièrement valables les dépositions assermentées ou les affirmations faites à Monaco ou les copies de ces pièces, de même que les mandats d'arrêt et les sentences rendues dans ce pays, ainsi que les certificats de condamnation ou les pièces judiciaires constatant le fait d'une condamnation, pourvu que ces documents soient rendus authentiques de la manière suivante:—

authentiques de la manière suivante :—
"1. Un mandat doit être signé par un Juge, Magistrat, ou

officier de la Principauté de Monaco.

officier de la Principauté de Monaco.

"2. Les dépositions ou affirmations ou les copies de ces pièces, doivent porter la signature d'un Juge, Magistrat, ou officier de la Principauté de Monaco, constatant que ces dépositions ou ces affirmations se trouvent être en expédition originale ou en copie vidimée, selon le cas.

"3. Un certificat de condamnation ou un document judiciaire constatant le fait d'une condamnation doit être certifié par un Juge, Magistrat, ou officier de la Principauté de Monaco.

"4. Ces mandats, dépositions, affirmations, copies, certificats ou documents judiciaires doivent être rendus authentiques dans chaque cas, soit par le serment d'un témoin, soit par l'apposition du sceau officiel et la légalisation du Gouverneur-Général de la Principauté de Monaco; cependant, les pièces sus-énoncées pourront être rendues authentiques de toute autre manière qui serait reconnue par les lois locales en vigueur dans la partie du territoire Britannique où l'examen de l'affaire aura lieu. aura lieu.

ARTICLE XI.

L'extradition d'un fugitif arrêté dans la Principauté de Monaco sera accordée, s'il résulte de l'examen qui en sera fait par une autorité compétente que les documents fournis par le Gouvernement Britannique contiennent des preuves primà

Gouvernement Britannique contiennent des preuves prima facie suffisantes pour justifier l'extradition.

"Les autorités de la Principauté devront admettre comme preuves entièrement valables les procès-verbaux des dépositions de témoins dressés par les autorités Britanniques, ou les copies de ces procès-verbaux; ainsi que les procès-verbaux des condamnations ou autres documents judiciares, ou les copies de ces actes; pourvu que ces documents soient signés ou rendus authoritiques par une autorité dont la compétence sera certifiée authentiques par une autorité dont la compétence sera certifiée par le sceau d'un Ministre d'Etat de Sa Majesté Britannique.

## ARTICLE XII.

"L'extradition n'aura lieu que dans le cas où les preuves fournies auront été trouvées suffisantes d'après les lois de l'Etat requis, soit pour justifier la mise sous jugement du prisonnier, dans les cas où le crime aurait été commis sur le territoire du dit Etat. soit pour constater l'identité du prisonnier ave: l'individu condamné par les Tribunaux de l'Etat requérant, et prouver que le crime dont il a été reconnu coupable aurait pu causer son extradition par l'Etat requis à l'époque de sa condamnation. L'extradition du fugitif n'aura lieu, dans les territoires de Sa Majesté Britannique, qu'à l'expiration d'un terme de quinze jours à dater de son emprisonnement en vue de l'extradition.

### ARTICLE XIII.

"Si l'individu réclamé par l'une des deux Hautes Parties Contractantes, en exécution du présent Traité, est aussi réclamé par une ou plusieurs autres puissances, du chef d'autres crimes ou délits commis sur leurs territoires respectifs, son extradition sera accordée à l'état dont la demande est la plus ancienne en date.

#### ARTICLE XIV.

"Le fugitif sera mis en liberté si les preuves suffisantes à l'appui de la demande en extradition ne sont pas produites dans l'espace de deux mois, à partir du jour de l'arrestation ou de tel antre terme plus éloigné qui aura été indiqué par l'état requis ou le tribunal compétent de cet état.

#### ARTICLE XV.

"All articles seized which were in the possession of the person to be surrendered, at the time of his apprehension, shall, if the competent authority of the State applied to for the extradition has ordered the delivery thereof, be given up when the extradition takes place, and the said delivery shall extend not merely to the stolen articles, but to everything that may serve as a proof of the crime. that may serve as a proof of the crime.

#### ARTICLE XVI.

"All expenses connected with extradition shall be borne by the demanding State.

#### ARTICLE XVII.

"Either of the High Contracting Parties who may wish to have recourse for purposes of extradition to transit through the territory of a third power shall be bound to arrange the condition of transit with such third power.

#### ARTICLE XVIII.

"When in a criminal case of a non-political character either of the High Contracting Parties should think it necessary to of the figh Contracting Parties should think it necessary to take the evidence of witnesses residing in the dominion of the other, or to obtain any other legal evidence, a 'Commission Rogatoire' to that effect shall be sent through the channel indicated in Article VIII, and effect shall be given thereto conformably to the laws in force in the place where the evidence is to be taken.

#### ARTICLE XIX.

"All documents which shall be reciprocally communicated in execution of the present Treaty shall be accompanied by a French or English translation (certified to be correct by the Consul who transmits the document in accordance with Article VIII), when they are not drawn up in the language of the country upon which the demand is made.

"The expense of such translation shall be borne by the demanding State

demanding State.

#### ARTICLE XX.

ARTICLE XX.

"The stipulations of the present Treaty shall be applicable to the Colonies and foreign possessions of Her Britannic Majesty, so far as the laws for the time being in force in such Colonies and foreign possessions respectively will allow.

"The requisition for the surrender of a fugitive criminal who has taken refuge in any of such Colonies or foreign possessions may be made to the Governor or chief authority of such Colony or possession by any person authorised to act in such Colony or possession as a Consular officer of the Principality of Monaco.

"Such requisitions may be disposed of, subject always as

"Such requisitions may be disposed of, subject always, as nearly as may be, and so far as the law of such Colony or foreign possession will allow, to the provisions of this Treaty, by the said Governor or chief authority, who, however, shall be at liberty either to grant the surrender or to refer the matter to his Government.

"Her Britannic Majesty shall, however, be at liberty to make special arrangements in the British Colonies and foreign possessions for the surrender of criminals from Monaco who may take refuge within such Colonies and foreign possessions, on the basis, as nearly as may be, and so far as the law of such Colony or foreign possession will allow, of the provisions of the present Treaty

such Colony or toreign possession will allow, of the present Treaty.

"Requisitions for the surrender of a fugitive criminal emanating from any Colony or foreign possession of Her Britannic Majesty shall be governed by the rules laid down in the preceding Articles of the present Treaty.

"The present Treaty shall come into force ten days after "The present Treaty shall come into force ten days after its publication, in conformity with the forms prescribed by the laws of the High Contracting Parties. It may be terminated by either of the High Contracting Parties at any time on giving to the other six months' notice of its intention to do so. "The Treaty shall be ratified, and the ratifications shall be exchanged at Paris as soon as possible.
"In witness whereof the respective Plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

arms.
"Done at Paris, the 17th day of December, 1891.

#### ARTICLE XV.

"Les objets saisis en la possession de l'individu réclamé au moment de son arrestation seront, si l'autorité compétente de l'état requis en a ordonné la remise, livrés lorsque l'extradition aura lieu; cette remise ne comprendra pas seulement les objets volés, mais encore tout ce qui peut servir de pièce de conviction. conviction.

#### ARTICLE XVI.

"Toutes les dépenses accasionnées par une demande d'extradition seront à la charge de l'état requérant.

#### ARTICLE XVII.

"Celle des Hautes Parties Contractantes qui voudrait recourir, pour l'extradition, au transit sur le territoire d'une tierce puissance, aurait à en régler les conditions avec cette demière

#### ARTICLE XVIII.

"Lorsque dans la poursuite d'une affaire pénale non politique, une des Hautes Parties Contractantes jugera nécessaire l'audition de témoins résidant dans les Etats de l'autre, ou tout autre acte d'instruction, une Commission Rogatoire sera envoyée à cet effet par la voie indiquée à l'Article VIII, et il y sera donné suite, en observant les lois du pays sur le territoire duquel l'acte d'instruction devra avoir lieu.

#### ARTICLE XIX.

"Tous les actes et documents qui seront communiqués réciproquement en exécution du présent Traité, seront accompagnés d'une traduction Française ou Anglaise, certifiée exacte par le Consul qui transmet les documents conformément à l'Article VIII lorsqu'ils ne seront point rédigés dans la langue du pays requis.

"Les frais occasionnés par ces traductions seront à la charge de l'Etat requérant.

#### ARTICLE XX.

ARTICLE XX.

"Les stipulations du présent Traité seront applicables aux Colonies et possessions étrangères de Sa Majesté Britannique, pour autant que faire se pourra d'après les lois en vigueur dans ces Colonies et possessions étrangères respectivement.

"La demande d'extradition d'un criminel qui s'est réfugié dans une de ces Colonies ou possessions étrangères pourra être faite au Gouverneur ou à l'autorité supérieure de cette Colonie ou possession, par toute personne autorisée à fonctionner dans cette Colonie ou possession comme autorité Consulaire de la Principauté de Monaco.

"Le Gouverneur ou l'autorité supérieure mentionné ci-dessus décidera à l'égard de telles demandes, en se conformant, autant que faire se pourra, d'après les lois de ces Colonies ou possessions étrangères, aux stipulations du présent Traité. Il sera toutefois libre d'accorder l'extradition ou de soumettre le cas à son Gouvernement.

sera toutefois libre d'accorder l'extradition ou de soumettre le cas à son Gouvernement.

"Il est réservé toutefois à Sa Majesté Britannique de faire, en se conformant autant que faire se pourra d'après les lois de ces Colonies ou possessions étrangères, aux stipulations du présent Traité, des arrangements spéciaux dans les Colonies ou possessions étrangères pour l'extradition de criminels de Monaco qui auraient trouvé un refuge dans ces Colonies ou possessions átrangères. possessions étrangères.

"Les demandes concernant l'extradition de criminels qui se sont échappés d'une des Colonies ou possessions étrangères de Sa Majesté Britannique seront traités suivant les dispositions des Articles précédents du présent Traité.

#### ARTICLE XXI.

"Le présent Traité sera exécutoire à dater du dixième jour "Le présent Traité sera exécutoire à dater du dixième jour après sa promulgation, dans les formes prescrites par les lois des deux pays. Chacune des Hautes Parties Contractantes pourra en tout temps mettre fin au Traité en donnant à l'autre six mois à l'avance avis de son intention.

"Il sera ratifié, et les ratifications en seront échangées à Paris aussitôt que faire se pourra.

"En foi de quoi les Plénipotentiaires respectifs ont sign le présent Traité et y ont apposé le cachet de leurs armes.

"Fait à Paris, le 17 Décembre 1891.

#### EDWIN H. EGERTON. LE BARON DU CHARMEL." (L.S.) (L.S.)

And whereas the ratifications of the said Treaty were exchanged at Paris on the seventeenth day of March, one thousand

And whereas the ratifications of the said Treaty were exchanged at Faris on the seventeening day of March, one shousand eight hundred and ninety-two:

Now, therefore, Her Majesty, by and with the advice of Her Privy Council, and in virtue of the authority committed to Her by the said recited Acts, doth order, and it is hereby ordered, that from and after the twenty-third day of May, one thousand eight hundred and ninety-two, the said Acts shall apply in the case of Monaco, and of the said Treaty with His Serene Highness the Prince of Monaco:

Provided always, and it is hereby further ordered that the operation of the said Extradition Acts, 1870 and 1873, shall be suspended within the Dominion of Canada so far as relates to Monaco and to the said Treaty, and so long as the provisions of the Canadian Act aforesaid of 1886 continue in force, and no longer.

Herbert M. Suft.

#### 1892.

#### LEGISLATIVE ASSEMBLY.

#### NEW SOUTH WALES.

# ADMINISTRATION OF JUSTICE.

(SPIRITS, WINE, AND BEER-CONVICTIONS UNDER THE LICENSING ACT.)

Ordered by the Legislative Assembly to be printed, 31 August, 1892.

FURTHER RETURN (in part) to an Order of the Legislative Assembly of New South Wales, dated 15th February, 1884, That there be laid upon the Table of this House, for the years 1881, 1882, and 1883, respectively,

"(1.) The quantity, in gallons, of spirits, wines, and beers, respectively,

"imported into this Colony.

"(2.) The quantity, in gallons, of spirits, wines, and beers, respectively,

"manufactured in this Colony.

- "(3.) The quantity, in gallons, of spirits, wines, and beers, respectively, "imported and manufactured, per head of the population of the Colony.
- "(4.) Also, Returns from each Police District of the Colony, including the "Metropolitan District, under the following heads:

"(a) The number of licensed houses in each district.

"(b) The number of Colonial wine, wholesale wine and spirit, and "brewers' licenses, respectively, in each district; also, the number of "licenses to distil spirits.

- "(c) The number of convictions for drunkenness.
  "(d) The number of convictions for drunkenness, with obscene or "indecent language.
- "(e) The number of convictions for drunkenness with riotous "behaviour.
- " (f) The number of convictions for drunkenness, with common assault. " (g) The number of convictions for drunkenness, with assault upon
- "the Police.
- "(h) The number of offences of the above nature committed between "8 a.m. on Saturday and 8 a.m. on Sunday; and the like between

"8 a.m. on Sunday and 8 a.m. on Monday.

"(i) The number of convictions for selling on Sundays.

"(j) The number of convictions for selling during prohibited hours "other than for Sunday-selling.

"(k) The number of convictions for selling adulterated liquors.

"That such Returns in future be laid upon the Table of this House and "printed as soon after the close of the year as possible."

(Mr. Hutchison, Canterbury.)

And to a Resolution of the Legislative Assembly of New South Wales, dated 12th June, 1888, "That this House is of opinion that, in the Annual "Return ordered by this House from the Department of Justice of the "convictions for drunkenness, &c., in the various districts of the Colony, "columns be added, to stand as six and seven respectively, showing the "number of 'all other convictions in which drunkenness formed part of the charge,' and 'the number of penalties included in foregoing offences'; "and further, that the totals of convictions given in the Return be shown "for the whole Colony."

(Mr. Hutchison, for Mr. Henson.)

Sydney: Charles Potter, Governmen Printer.—1892.

· [6d.]

#### 1892-3.

#### LEGISLATIVE ASSEMBLY.

#### NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(SPIRITS, WINE, AND BEER-CONVICTIONS UNDER THE DRUNKARDS AND LICENSING ACTS.)

Ordered by the Legislative Assembly to be printed, 4 May, 1893.

FURTHER RETURN (in part) to an Order of the Legislative Assembly of New South Wales, dated 17th March, 1892, That in place of the Returns ordered by this House on the 15th February, 1884, and the 12th June, 1888, there be annually laid upon the Table of this House, Returns giving the following particulars for each Police Court of the Colony, classed in Electorates:—

- " (a) The number of convictions for drunkenness only.
- " (b) Other convictions in which drunkenness formed part of the charge (drunkenness and disorderly conduct).
- " (c) Women convicted of foregoing offences.
- " (d) Foregoing offences committed between 8 a.m. on Saturday and 8 a.m. on Sunday.
- " (e) Foregoing offences committed between 8 a.m. on Sunday and 8 a.m. on Monday.
- " (f) Convictions for selling on Sunday.
- " (g) Convictions for selling during prohibited hours other than on Sundays.
- "(h) Convictions for selling liquor without a license.
- " (i) Convictions for selling adulterated liquor.
- " (j) Publicans', Colonial Wine, Brewers', Spirit and Distillers' licenses, respectively in each Electorate.
- "The total numbers to be also shown in each case for the whole Colony, such Returns in future to be laid upon the Table of this House and printed, as soon after the close of the year as possible."

(Mr. Alfred Allen, for Mr. Garrard.)

RETURN of Convictions under the Drunkards and Licensing Acts at each Court of Petty Sessions within the Colony, for the year 1892.

Sydney. Charles Potter, Government Printer. -1893.

1892-3.

#### LEGISLATIVE ASSEMBLY.

#### SOUTH WALES.

# ADMINISTRATION OF JUSTICE.

(CORRESPONDENCE RESPECTING THE TRANSFER OF THE LICENSE OF THE "RAILWAY HOTEL," BATHURST, TO MR. PATRICK POWER.)

Ordered by the Legislative Assembly to be printed, 4 May, 1893.

RETURN to an Order made by the Honorable the Legislative Assembly, dated the 6th April, 1893, That there be laid upon the Table of this House,

- "Copies of all evidence, Police reports, and other papers connected with "the transfer of the license of the 'Railway Hotel,' Bathurst, from William
- "Stevens to Patrick Power."

(Mr. G. D. Clark.)

To the Licensing Court of the Licensing District of Bathurst.

I, Joshua Stevens, licensed publican, keeping the house known as the "Railway Hotel," and situated I, Joshua Stevens, licensed publican, keeping the house known as the "Kailway Hotel," and situated in Piper-street in the city of Bathurst, being desirous of relinquishing my business as a licensed publican for the above-described house, beg respectfully to submit to your Worships the name of Mr. Patrick Power of Bathurst as my appointee, to whom I am solicitous your Worships will be pleased to transfer the rights and privileges of my publican's general license for the residue of the term the same has now to run, in accordance with the provisions of an Act intituled the "Licensing Act of 1882."

JOSHUA STEVENS.

Given under my hand at Bathurst, this 11th day of March, 1893.

I, PATRICK POWER, householder, of Bathurst, in the city of Bathurst, hereby respectfully request that your Worships will be pleased, in compliance with the above request of Mr. Joshua Stevens, licensed publican, keeping the house known as the "Railway Hotel," and situated in Bathurst, in the district of Bathurst, to transfer to me the license he holds for such house. I am married and have two children, and I have previously held a publican's license.

PATRICK POWER.

Given under my hand at Bathurst, this 11th day of March, 1893.

Bathurst, 14 March, 1893. Bathurst, 14 March, 1893.

SERGEANT Morris respectfully objects to the license of the "Railway Hotel" being transferred to Mr. P. Power for the following reasons:—Power held the license of the "Morning Star Hotel," Georgestreet, for nearly two and half years (June, 1890, to February, 1893). During that time his house was badly conducted, having had a very bad reputation altogether. On the 20th July, 1891, Power was fined £5 and costs for allowing disorderly persons to remain on his premises during prohibited hours. He was subsequently summoned on three different charges for breaches of the Licensing Act; but, however, these cases were dismissed defendant being cautioned by the Bench. Mrs. Power too, who took a great subsequently summoned on three different charges for breaches of the Licensing Act; but, nowever, these cases were dismissed, defendant being cautioned by the Bench. Mrs. Power, too, who took a great part in the management of the house, was charged on two occasions last year with serious offences, and in one case she was committed for trial. Several cases of persons being robbed at Power's public-house were reported to the police during last year. Although the police did all that was possible to prevent it, Power seemed to be carrying on a systematic trade at prohibited hours, especially on Sundays, as persons were to be seen on the watch until the police made their appearance, when the parties would at once go inside and shut the door. Under these circumstances the sergeant thinks that Power is neither a fit or proper person to hold a publican's license.

JOHN MORRIS,

Sergeant and Licensing Inspector. Licensing

904

Licensing Court, Bathurst, 15 March, 1893.

(Before J. B. Graham, Esq., L.M., and Dr. W. F. Bassett, Esq., J.P.)

In the matter of an application for the transfer of a publican's license for the house known by the sign of the "Railway Hotel," now held by Joshua Stevens.

Sergeant Morris, on oath, states: - I am the Licensing Inspector for the District of Bathurst; my report, read, is correct; I think Power is not a fit and proper person to conduct a house; from information supplied to me, and from my own observations, I think he kept his house badly; Power has been convicted once for allowing disorderly persons on his premises; several cases of persons being robbed at his house were reported to me and other constables, but were not proceeded with, as the persons would not prosecute; the general reputation of Power's house was very bad; he kept persons on the watch on Sunday nights at his house in order to supply liquor after hours; I have seen people about, and when I approached they shut the door right in my face; I have seen this more than once; reports have been forwarded to me about a fight taking place in his yard on Sunday night.

Examined by Mr. Thompson: He kept his house hadly since 1891; since that he has had his license renewed twice; I spoke to him about the way he kept his house; I took no action against Power about the robberies; I know that the case against Mrs. Power fell through; that is one of the cases in my report; she was committed for trial for stealing a muff, and I know she was acquitted: I don't remember that one of the principal witnesses was treated as a hostile witness by the Crown in this case; during the year 1892 cases were reported of robbery; I did not see Power about these charges; the time he was convicted for keeping disorderly persons on his premises he pleaded guilty; two other cases I have reported—one for selling after hours, and one for keeping his house open for the sale of liquor; they were dismissed; Constable Greenaway gave evidence in the case of disorderly conduct in the house; Power had men and women looking out for police after hours; he had a great many people about his house on Sunday; persons of the kind of farmers, shearers, and others, may have come to stay at his place on Sundays; in the case when Welsh was assaulted I think Mrs. Power denied he was assaulted; I know Mr. Barham as a very respectable man, he keeps a shop opposite Power's house; I don't think from where he lives he could observe Power's; Mr. Boyd, Mr. Taylor, and Mr. Brennan are also respectable men; I would believe them if they got into the witness-box and swore that Power's house was well kept; I would believe it. I have reason to state I would like the writers of Power's contiferate to give evidence in the believe it; I have reason to state I would like the writers of Power's certificate to give evidence in the witness-box; some one told me that one of the certificates was given to Power as the writer of the certificate did not like to injure him; I have seen people on the watch for police after hours at his house; I never spoke to them about it; this was always at night-time and I saw men going backwards and forward from one room to another, and the piano was playing in a room.

Sworn at Bathurst, this 15th )

JOHN MORRIS.

March, 1893,

J. B. Graнам, Chairman.

James Garner on oath, states:—I am a senior-constable of police stationed at Bathurst; I know the transferee in this case, he kept the "Morning Star Hotel" in George-street, Bathurst; I know that Power did not keep his house well: I have heard people in his parlours between 1 and 2 o'clock and gambling; I am often on night duty; I remember the latter part of August last year; a man came to me on Sunday night; he complained of being robbed of £6 some odd shillings at Power's house; I asked him how he knew he was robbed; the man's name was M'Gee; he worked at Mr. William Lee's place at Mary's-lane; on the morning of the New Year of this year I passed Power's house in company with a constable named Sommerville; I heard a woman making use of bad language in a room, and also a man's voice in a room facing Piper-street; I stopped for two or three minutes and Power's wife came and opened the side door, and as soon as she saw me and the other constable she banged the door to; I heard a clash of glasses as if they were broken; Power then came and opened the door himself and said to me "You can come inside Mr. Garner, there is nothing here"; I said, "I don't want to go in, what's the good of me going in," I then went away; there was another case of robbery reported to me by a man named King this year; he said he was robbed of 6 or 7 shillings; I have seen people of the hotel standing at the door and as soon as the police came they go inside and shut the door, when I have been in company with Sergeant Morris. gambling; I am often on night duty; I remember the latter part of August last year; a man came to inside and shut the door, when I have been in company with Sergeant Morris.

By Police Magistrate: I have never heard complaints about people being robbed at other houses;

I never spoke to him about the robberies which were reported to me; I am of opinion that the applicant is not fit to hold a publican's license, and from what I gather from people living about the "Morning Star

Hotel," the house is kept better now since Power left it.
