SENIOR-CONSTABLE SKINNER respectfully reports for the information of his officer, that he has heard both Constables Stanton's and Easterbrook's statements read in reference to the senior constable's report of the 1st instant, and as Constable Stanton has admitted the charge the senior constable has nothing further to state in his case. With regard to Constable Easterbrook's statement there is not a word of truth in it as regards the offence he is charged with. The senior constable had the man and woman under observation for some time lying on the grass, and what turned out to be Constable Easterbrook and the girl Burns before he observed Constable Stanton, as Stanton was lying near the fence. The senior constable and Constable Aiken then got up to Stanton before being observed, Aiken pulling Stanton off the woman Gale. The senior constable still keeping his eye on the other two, who were only about 20 yards away, still lying down. When the senior-constable was remonstrating with Constable Stanton he saw Constable Easterbrook get up and walk away a few yards, leaving the woman laying down. The senior constable then went towards Constable Easterbrook and asked him "Who is this you have been lying with here." The constable made no reply. The senior constable then found the woman Burns lying on her back with her clothes disarranged. The senior constable charged both the constables at the time with behaving in an indecent manner with the two women referred to.

W. SKINNER,

S.C.

N. Larkins, Esq., Inspector.

Petersham, 3 January, 1892.

CONSTABLE JAMES AIKEN respectfully reports for the information of his officer that on the morning of the 1st instant he was doing duty in company with Senior-constable Skinner. About 1.45 a.m., the constable was in Crystal-street, Petersham, and near Westbourne-street, he saw a man and a woman lying on a vacant piece of ground, and about twelve yards off the foot-path of Crystal-street. The constable watched them for some time as they were hugging and pulling one another about. The constable then noticed another man and woman lying close to the fence on the same piece of ground and about 10 yards off the foot-path. The constable went up to them and found the man to be Constable Stanton and the woman a prostitute named Gale, Stanton was on top of her, and in the act of having connection with her. At the time the constable was with Stanton the constable noticed the other man (whom he observed to be Constable Easterbrook) rise up off the ground and walk towards Crystal-street, leaving the woman he was with lying on the ground. The constable went over to Easterbrook and then to the woman (a prostitute named Burns). The woman was lying on her back and her clothes disarranged. Both the women were under the influence of liquor. The constable heard the senior constable remonstrate with both the constables referred to at the time about their conduct.

JAMES AIKEN,

Constable.

N. Larkins, Esq., Inspector.

Petersham, 4 January, 1892.

CONSTABLE N. EASTERBROOK respectfully reports in reference to a further explanation of S.-C. Skinner's report. The constable has not much more to state, as the constable has stated the facts as clear as possible in his explanation. The constable begs to state that the following gentlemen can vouch for the constable's good character, as they have known both him and his family from his boyhood up, namely:— H. Levien, Esq., M.L.A.; A. Bowman, Esq., M.L.A.; W. C. Browne, Esq., J.P., ex-M.L.A. for Patrick's Plains; also A. D. Browne, Esq., J.P., of Harrow Road, Stanmore. In conclusion, the constable begs to have S.-C. Skinner and Constable Aiken and Constable Stanton brought face to face with the constable for the purpose of putting a few questions to them.

The constable begs to attach a letter from W. C. Browne, Esq., ex-M.P. for Patrick's Plains, addressed to E. Fosbery, Esq., in reference to the constable's character.

N. EASTERBROOK,

Constable.

N. Larkins, Esq., Inspector.

Dear Sir,

Campbell Lodge, Pott's Point, 4 January, 1892.

I have known N. Easterbrook from childhood, and had almost daily opportunities of seeing him—he has always borne an irreproachable character among the people of Singleton, and I am happy to bear testimony to his sobriety, moral character and good behaviour.

W. C. BROWNE,

Ex-M.P., Patrick's Plains.

E. Fosbery, Esq.

Petersham,

Petersham, 4 January, 1892.

CONSTABLE H. STANTON respectfully reports in reference to S.-C. Skinner's report *re* Constable Easterbrook, that the constable never saw Constable Easterbrook lying on the grass with any woman, and the constable does not believe it to be the case, as after we spoke to the girls at Westbourne-street, and ordered them home, Constable Easterbrook then asked the constable to come and leave the girls. Constable Easterbrook then left by himself, and walked away towards Douglas-street. Constable Easterbrook, when about 50 yards away, called out to the constable to come. The band was playing down the street, and there may be a crowd there. When next the constable saw Constable Easterbrook he was coming back along the street towards S.-C. Skinner and Constable Aiken. Later on, when the constables met S.-C. Skinner, Constable Easterbrook said, "There is nothing against me?" and the senior constable said, "There is nothing against you, Easterbrook."

N. Larkins, Esq., Inspector.

H. STANTON,
Constable.

Forwarded to the Inspector-General of Police. I have no doubt of the truth of the reports of S.-C. Skinner and Constable Aiken. Both Stanton and Easterbrook are married men, and it is not likely that they gave these unfortunate women any money. I doubt whether they should be retained in the service. Mr. Larkins informs me that S.-C. Skinner states that when he saw the constables and the women at a distance he did not know that they were members of the force, and therefore kept them under observation. This is the first case of the kind that has ever come to my knowledge.—G. READ, Superintendent, 5/1/92. The Inspector-General of Police.

Memo.

Police Department, Inspector-General's Office, Sydney, 5 January, 1892.

I HAVE no alternative but to direct Constable Stanton's dismissal.

Before finally deciding in Easterbrook's case I think the senior constable should be questioned as regards the statement attributed to him when he met Stanton and Easterbrook later on that he had nothing against the latter. Was the senior constable then alone? Perhaps all the four should be paraded before Mr. Read, who will then be in a better position to report, though there is but little room for doubt as to the disgraceful conduct of both men.

Supt. Read.

E.F.

Memo.

Superintendent's Office, Sydney, 6 January, 1892.

I HAVE seen all the members of the force who have reported on this matter together at my office.

S.-C. Skinner states he was alone when Constable Easterbrook alleges he said there was nothing against the latter. Skinner denied that he made any such remark, but, to an observation of the constable, replied that there was nothing against him beyond lying on the grass with the woman. Stanton, who was present, seems not to remember precisely what the senior constable did say. Skinner states that when he first saw the constables on the grass with the women he was about 15 yards away from them. Constable Aiken thinks the distance was not more than 10 or 12. According to Easterbrook's statement he was standing a few yards from the woman Burns, who was lying on the grass, while Stanton was lying on the other woman. Both the senior-constable and Constable Aiken state that they cannot be mistaken in reporting that he was lying on the grass with the woman, as when he got up and walked away he left the woman lying on her back with her clothing lifted above her knees, which were exposed. I have not the slightest doubt of the truth of the senior constable and Constable Aiken's reports. The senior constable states that he and the constable were looking at the men and women for about a minute before they went towards them. Stanton states that he gave no money to the woman he was with. Both the women were under the influence of liquor, and had been about the streets with a number of larrikins during the early part of the night. The men were told off for their duties by Mr. Larkins.

The Inspector-General of Police.

G. READ,
Superintendent.

Constable Easterbrook is dismissed from the force.—E.F., 6/1/92. Supt. Read. Noted and returned.—G. READ, Supt., 7/1/92. The I.-G.P.

Dear Mr. Fosberry,

Singleton, 4 January, 1894.

You will remember I saw you some months since about ex-Constable Easterbrook, who was dismissed from the force in the early part of 1892.

Easterbrook is now living in Singleton, and has again seen me about his case. He positively denies the correctness of the charges which led to his dismissal, and has asked me to see the papers if possible.

Would you have any objection to my seeing them if I called at your office some day?

E. Fosberry, Esq.

Yours, &c.,
ALBERT J. GOULD.

[Private.]

Dear Mr. Fosberry,

24 January, 1894.

I am returning Easterbrook's papers, which I have seen. Many thanks for the loan. I was under the impression there had been a further report of, I think, Skinner, with certain alterations and underlinings, which had called for comment and had been rewritten, but I can't be quite sure until I see Easterbrook again.

E. Fosberry, Esq.

Yours, &c.,
ALBERT J. GOULD.

Sir,

Singleton, 26 February, 1894.

Adverting to inquiries made by me relative to the removal of ex-Constable Easterbrook from the Police Force for alleged immoral conduct when on duty in January, 1892, I have been at a loss to understand his alleged conduct in view of his character before joining the force. While admitting that upon the reports before you there appeared no reasonable grounds to doubt his guilt, if the statements of Skinner and Aiken could be relied upon, yet, in view of the general character of Easterbrook and the result of inquiries upon Skinner's reports *in re* Jarvis and M'Rae, for alleged gambling; Benmore, for alleged

alleged loitering; and Skinner's recent difficulty in October, 1892; Aiken's earlier one; the frequent removals from the Petersham Police Station; and the statements of Easterbrook and the constable (admittedly guilty) with him, in direct contradiction of Skinner and Aiken, I feel justified in seeking a reconsideration of the whole matter with the view of the reinstatement of Easterbrook. In support of Easterbrook's reputation, and in addition to these, with his papers I now enclose letters from Dr. Clune and Messrs. Gibbens and Marshall, and would direct particular attention to Dr. Clune's remarks within the fold, and would also suggest that inquiry be made of Inspector Barry, who resided near Easterbrook at the time he was at the Petersham Station, Superintendent Larkins, and Sub-Inspector Elliott, under whose supervision he was, as to his general character and conduct, all of which must, I submit, be of much importance. Although my request for the reopening of a case dealt with two years since may be unusual, yet the whole matter is of so serious a nature to Easterbrook's future that I trust it will be acceded to.

To the Inspector-General of Police, Sydney.

I have, &c.,

ALBERT J. GOULD.

I should be glad if Superintendent Read would give this case his careful consideration. Make further inquiries and report.—E.F., 3/3/94. Superintendent Read.

23, Bruce-street, South Annandale, 3 February, 1894.

THIS is to certify that I have known the bearer, N. Easterbrook, for a period of about four years. During this time I have always found him to be honest, sober, and industrious, and have much pleasure in recommending him.

A. J. GIBBENS,

Station-master, Stanmore.

Stanmore Road, Petersham, 2 February, 1894.

I AM pleased to be able to state that I knew N. Easterbrook during the time he was attached to the Police Force in Petersham, and in my opinion he is a steady, painstaking, and trustworthy man.

ARTHUR H. MARSHALL.

Crystal-street, Petersham, 2 February, 1894.

I HAVE known Mr. Nathaniel Easterbrook during his residence in Petersham, and particularly when in the Police Force. I have much pleasure in testifying to his general good conduct whilst holding the office of policeman, as I have many times met him. He is, from my own knowledge, trustworthy, truthful, well-conducted, and of very steady habits. I have a great opinion of his character as being a very zealous and attentive man to whatever business he undertakes. His conduct during his stay here has been most exemplary. I am of an opinion that if he was reinstated in the Police he would prove a very good officer.

THOS. B. CLUNE, L.R.C.R.E., &c.

P.S.—Being aware of the circumstances of his dismissal from the Police, and from what I know of him, I do not think that he would be a person who could be guilty of such an action that he was reported for.

T.B.C.

Memo.

Superintendent's Office, Sydney, 6 March, 1894.

I HAVE paraded Senior-constable Skinner and Constable Aiken at my office, and closely questioned them again *re* ex-Constable Easterbrook's conduct. They both adhere to their first statements, and say they could not possibly have been mistaken in the matter, and I am unable to believe either of them capable of preferring such a serious charge against a member of the force unless it were true. There appears to me to be an utter absence of motive on the part of both of them for such an atrocious act.

There was nothing in the reports of the senior constable relating to Constables Jarvis, McRae, and Benmore that would warrant me in questioning his veracity. Mr. Barry informs me that, as far as he is aware, Easterbrook's general conduct was satisfactory. I am unable to obtain any additional evidence in the matter, and can see no reason for altering my opinion. Senior-constable Skinner informs me that Easterbrook performed his duty in a most efficient manner, and showed exceptional aptitude for police work. The necessity for his dismissal was therefore regretted by all his officers.

The Inspector-General of Police.

G. READ,

Superintendent.

Let this be embodied in a reply to Mr. Gould. Add that I can see no reason for disturbing my decision. Done, 3/8/94.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WILLIAM STAFFORD, EX-MOUNTED POLICE SERGEANT.

(PETITION FROM WILLIAM STAFFORD, EX-MOUNTED POLICE SERGEANT, PRAYING THE HOUSE TO AGAIN CONSIDER HIS CASE.)

Received by the Legislative Assembly, 18 June, 1895.

To the Honorable the Speaker and Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of William Stafford,—

SHOWETH:—

1. That your Petitioner served eighteen years in the New South Wales mounted police force, and that during fifteen years of that service he filled the stations and discharged the duties of sergeants and senior-sergeants, and in addition to those duties he also filled the responsible positions of Mining Registrar and Gold Receiver for six years. That your Petitioner is accredited with having rendered effective and meritorious services, perhaps unsurpassed by any other member of the force, past or present, in New South Wales.

2. That your Petitioner was unceremoniously dismissed, for "attempting to defraud the Government," upon reports, made against him behind his back, which he never saw nor heard of until they were printed by order of Parliament. Consequently Parliament appointed two Select Committees to investigate the alleged charge of fraud, and to report upon your Petitioner's claim upon the Police Superannuation Fund, and the gist of the "findings" of the last Committee thus appointed is as follows:—

1. "That William Stafford was dismissed from the Service without formal inquiry, either before a Bench of Magistrates or his superior officers, and the 'Defaulter's Sheet' shows that such dismissal was for 'attempting to defraud the Government,' whereas the Inspector-General of Police states that he was dismissed for 'misconduct.'"
2. "Your Committee consider that William Stafford was, according to custom, entitled to the amount claimed, and having paid into the Police Superannuation Fund 2 and 3 per cent. of his salary, for a period of eighteen years, your Committee recommend his case to the favourable consideration of the Government."

Upon a casual glance at the "findings of the Select Committee" some people might say that the report of the Select Committee in your Petitioner's case is rather weak; but that is not so, because when the facts disclosed by the findings of the Select Committee are compared with the law bearing upon your Petitioner's case, the Committee's report will be found to be the strongest representation that was ever made to any Government in favour of any man's claim, &c. For instance, the Select Committee found that your Petitioner "was dismissed from the Service, for attempting to defraud the Government, without formal inquiry, either before a Bench of Magistrates or his superior officers." These findings alone virtually declared your Petitioner's dismissal unlawful, null, and void.

1. Because your Petitioner was wrongfully dismissed upon *ex-parte* statements.
2. Because Mr. Fosbery has no legal authority vested in him by the Legislature to adjudge any member of the force guilty of a criminal offence until the accused is found guilty at the least by one or more Justices of the Peace. And much less
3. Because Mr. Fosbery has no legal authority vested in him to dismiss any member of the force even for misconduct, where the punishment for such misconduct is provided for (by the Police Regulation Act, or any other Act) before two Justices of the Peace, until the accused is found guilty by the said Justices. Consequently your Petitioner was dismissed contrary to law, and thus his dismissal is proved unlawful—*vide* "Police Regulation Act," sections 12 to 17 inclusive, also Police Rule 74, &c.

Again, the Select Committee found "that according to custom" your Petitioner "was entitled to the amount claimed"—that is, the amount of the alleged fraud. The Committee could not find anything else in the case because the officers allowed the custom to grow until it superseded the printed "scales of travelling and night allowances," consequently there was absolutely no scale—*vide* claims in evidence under pages 32, 33, and 34, &c. Thus, a glance at the evidence and at the findings of the Select Committee will disclose to your Honorable House that the dismissal is proved a nullity and the alleged charge of fraud quashed.

That the supremacy of the finding of the Select Committee, adopted by Parliament on the 3rd of October, 1893, gave your Petitioner an honorable acquittal, and strongly recommended your Petitioner's case to the Government for consideration, which meant the adjustment of your Petitioner's claim upon the Police Superannuation Fund, &c.

That, as the supremacy of the findings and recommendation of Parliament should carry more weight than the dismissal of the charge by a Bench of Magistrates, your Petitioner cannot conceive upon what grounds the adjustment of his claim upon the Police Superannuation Fund, &c., is held in abeyance, and therefore your Petitioner most humbly prays that your Honorable House will be pleased to take your Petitioner's case again into consideration, and thus cause effect to be given to the preponderance of the evidence on Petitioner's side, and also to the supremacy of the findings and recommendation of Parliament in your Petitioner's case.

And your Petitioner, as in duty bound, will ever pray.

WILLIAM STAFFORD,
Mounted Police Sergeant.

1894-5.

NEW SOUTH WALES.

PRISONS.

(REPORT FOR 1894.)

Presented to Parliament by Command.

The Comptroller-General of Prisons to The Under Secretary of Justice.

Department of Prisons, N.S.W., Comptroller-General's Office,

Sydney, 8 May, 1895.

Sir, I have the honor to forward to the Minister of Justice, through you, my Departmental Report for the year 1894.

I have, &c.,

GEORGE MILLER,
Comptroller-General.

The Comptroller-General of Prisons to The Minister of Justice.

Department of Prisons, N.S.W., Comptroller-General's Office,

Sydney, 7 May, 1895.

Sir,

I have the honor to present to you my Report for the year 1894, accompanied by the usual statistical information regarding the Prisons of this Colony in tabulated form.

From these tables the following information may be gathered:—

The total number of gaols in operation at the end of the year was 60. Of this number 36 were police gaols which are maintained on grounds of convenience and economy as places of detention for prisoners awaiting trial on the spot and for short-sentenced local offenders.

The total number of prisoners distributed throughout the gaols of the Colony on the 31st December last was 2,604 (2,352 males and 252 females), as against 2,445 (2,237 males and 208 females) at the end of 1893, the estimated increase of population of the Colony being from 1,223,370 in 1893 to 1,251,450 in 1894.

The number of distinct persons received into the gaols during the year was 11,604 as compared with 12,002 in 1893.

The total entries and discharges of prisoners during the year amounted to 18,525 and 18,366, respectively, as against 19,080 and 19,257 for 1893. These numbers include habitual offenders who served more than one sentence during the twelve months.

There were 26 deaths during the year (including 5 executions), to 36 in 1893. Of the executions 2 took place at Darlinghurst, 1 at Bathurst, and 2 at Tamworth.

The reconvictions at the Circuit Courts and Courts of Quarter Sessions were as follows:—First-class prisoners, under sentences of 5 years and upwards—18 under second convictions, 3 under third, and 50 under fourth or more convictions, as against 15, 7, and 39 for the former year. Of second-class prisoners, under sentences of less than 5 years, the numbers were—122 under second convictions, 51 under third, and 127 under fourth or more, as against 111, 50, and 101 for 1893. Third-class prisoners, under sentences of imprisonment only, without hard labour—1 under a second conviction, 2 under a third, and 3 under fourth or more convictions, as against 2 under a second conviction in 1893.

The reconvictions of the prisoners comprising drunkards and petty offenders sentenced at the lower Courts, during the year 1894 only, were—992 under second convictions, 312 under third, and 326 under fourth or more, as compared with 1,107, 343, and 338 for 1893.

On reference to Table (B) it will be seen that the net value of all kinds of work done by prisoners in the different gaols, with the exception of those undergoing modified servitude at Trial Bay, was £51,826 15s. 4d., as compared with £51,399 19s. 1d. for the previous year. The computation of the value of the work done in the construction of the breakwater at Trial Bay Prison is a matter for the Harbours and Rivers Department, under the direction of which the work is being carried out; but Table F shows that, since the commencement of the tipping of the stone in the breakwater proper, on 7th November, 1889, the amount of stone put in by the prisoners up to 31st December, 1894, was 153,669 tons.

The

The lock-up at Newcastle was proclaimed a gaol on the 9th May, chiefly for the purpose of providing a convenient means of safely detaining prisoners brought from Maitland Gaol for trial at the Courts of Quarter Sessions held at Newcastle until the termination of the trials at those Sessions.

The police gaol at Grenfell, which was disestablished on the 9th December, 1893, was proclaimed a gaol on the 7th August, 1894, it having been decided by the Government that Courts of Quarter Sessions should again be held at Grenfell.

By proclamation, dated 7th August, 1894, 5½ acres of ground at East Maitland, including the site of the existing gaol, were declared to be set apart for gaol purposes. This course was rendered necessary in consequence of the original proclamation issued in 1848 being very indefinite.

In consequence of the very gross misconduct of a certain incorrigible class of prisoners in the use of blasphemous and frequently vile and filthy language, it was decided, on 21st July, 1894, by the then Minister of Justice, that the use of a gag should be again sanctioned in the gaols, simply as a means of repression, not of punishment, it being considered that by the use of this instrument, which affords a prompt and effectual means of checking such disorderly conduct, more severe penalties would be avoided. The resumption of such a means of repression and deterrence was recommended by the Royal Commission of Inquiry into the management of Berrima Gaol in their report, dated 26th November, 1878, subject to certain rules governing the use of the instrument which it is intended shall be strictly enforced throughout the gaols. The necessary regulation, which is an amendment of Regulation 68, was duly gazetted on the 2nd August, 1894, and a copy is attached as Appendix (G). The instrument which has been adopted is entirely different from the old wooden gag, being so constructed, under careful medical supervision, as to prevent injury to the mouth of any prisoner upon whom it might be found necessary to use it. The vile and filthy language which some prisoners are occasionally addicted to shouting out when confined in cells, to the annoyance and disgust not only of the officers, but also of well-conducted prisoners who have to sleep in the corridors where the cells containing the disorderly ones are situated, renders it most necessary that stern measures should be adopted to check such disgraceful misconduct. The mere knowledge that such an effectual means of repression is in use will have a beneficial effect in the maintenance of proper order and subordination.

I gave, in my report for 1893, a full explanation of the objects of the separate system under which youthful offenders are now dealt with by amended regulations that were brought into force on the 17th April, 1893. Under those regulations, a marked improvement has taken place in the conduct of the youthful prisoners in the gaols, whose disorderly tendencies and generally insolent bearing when at large receive a sharp and effectual check by the stringent conditions of servitude to which they have now to submit. The treatment also acts as an effectual deterrent to many who undergo it. As I have in a former report pointed out, the system in its application to youths under sixteen (the maximum age at which boys can be committed to a Reformatory) is intended more for incidental offenders than for vicious and incorrigible boys whose cases would probably be more effectually dealt with by lengthened detention in a properly organised Reformatory.

In my report for the year 1891, I pointed out the great difficulties with which this Department has to contend in carrying out an effective system of classification and separation of prisoners owing to the inadequacy of the accommodation afforded by, and the defective construction of, most of the lesser country gaols. In the greater number of those gaols, which, unfortunately, the circumstances of the Colony render it necessary to keep in existence, proper classification and separation are impossible.

The accommodation of some of the distant country gaols was for a time severely taxed owing to the increase of prisoners whose committals to gaol arose out of the shearing troubles, notably the gaols at Broken Hill, Forbes, Wilcannia, and Walgett, where the staffs were hardly sufficient to properly guard and supervise the number of prisoners in confinement. To Walgett it was found necessary to despatch from Sydney three experienced warders to assist in the management of the gaol, pending the trial of the prisoners at the Quarter Sessions Court. The necessity for gaols in the outlying districts of the Colony (which has sometimes been questioned) has been strongly proved during the last two or three years. They add considerably to the expenses of the Department, but if law and order are to be properly enforced throughout the country districts, it is absolutely necessary that secure and efficiently staffed places of detention for prisoners awaiting trial on the spot, or under short sentences, should be maintained at the public expense.

Separate yards for the accommodation of prisoners awaiting trial, or under remand, were completed at Tamworth and Wilcannia during the year. At the former place, proper punishment cells, visitors' room, shed and fireplace in women's yard for washing purposes, and other necessary minor additions were also provided. These improvements greatly facilitate the proper working of the gaols.

At Goulburn Gaol, a great improvement was effected during the year by the construction by prison labour of a range of cells in the women's division for the female prisoners. The wing in which the females were formerly confined is now used for the 7th class male prisoners, and answers this purpose admirably. These youthful prisoners can now be easily kept from coming into contact with older criminals. A steam cooking apparatus has been erected at this gaol, which is not only much more convenient, but will, in the long run, also prove more economical than the old system of cooking. A new chimney-stack has also been erected 70 feet in height, which will carry all the smoke clear of the yards and buildings. When the contemplated completion of the workshops has been effected, Goulburn will possess one of the most completely organised prison establishments in the Colony.

Towards the end of the year, the work connected with the installation of the electric light at Darlinghurst Gaol was commenced, by which it is expected that a great saving will be effected in the lighting of the gaol, the quantity of gas used under present conditions being very considerable. To make room for the engine and dynamo, the old schoolroom is being utilised, the school and library having been removed to another part of the gaol, which has been prepared for the purpose. The work is being done by prisoners under skilled supervision.

At Berrima Gaol, also, the installation of the electric light was almost completed at the close of the year. Hitherto, kerosene and candles have been used at this gaol, there being no gas in the town. Three of the special yards have been grilled over the top, for the purpose of security in cases of very refractory

refractory prisoners. Very extensive improvements have also been carried out by prison labour in the system of drainage at this gaol, which was discovered to be in a most defective condition. The drainage now is, perhaps, in a better condition than it has ever been before. A new store, and watch-tower on the wall overlooking the workshops, are much required. The existing storage accommodation is most inadequate.

In separate reports, I have urged the completion of the cellular wings at Tamworth and Young gaols, by the erection of a story on each, to contain single cells. The accommodation at these gaols is wholly insufficient for the number of prisoners usually confined therein, who have, consequently, to be placed in associated cells at night in threes and fours. Wherever the design of the gaol will admit of the construction of the necessary additional single cells, it is my aim to have them provided; but, unfortunately, the necessities of retrenchment render it necessary that these improvements be proceeded with very slowly, the vote on the Government Architect's Estimates for the necessary materials having been considerably reduced during the last few years.

Since most of the gaols were constructed, the population of the Colony has greatly increased, and with it there has also taken place a considerable advance in the number of prisoners for whom proper accommodation is required, thus leading to much overcrowding, which is remedied, as far as practicable, by transfers from one gaol to another, at, of course, considerable expense and inconvenience. This Colony has no protective law against the admission of criminals from other countries and colonies, as is the case in Victoria, where there is in force an Influx of Criminals Prevention Act; consequently, numbers of habitual criminals come to New South Wales from Victoria, while discharged prisoners from this Colony are debarred from entering Victoria, unless they choose to run the risk of being arrested and committed to gaol, if identified, simply for being within that Colony.

In conclusion, it gives me pleasure to be able to say that the staffs of the gaols, as a body, have performed their responsible and oftentimes most trying duties in a very efficient manner. The conduct of the prisoners has been, generally speaking, very fair; but there have been a few very grave cases of offences against the prison regulations and rules. These offences are committed chiefly by habitual criminals of a bad type, who seem to delight in doing all they possibly can to defeat the efforts of the authorities to maintain proper discipline.

I have, &c.,

GEORGE MILLER,
Comptroller-General.

(B.) RETURN showing Value of Labour performed in the Gaols of New South Wales during the year 1894.

(G.)

Department of Justice, Sydney, 2nd August, 1894.

Hrs Excellency the Governor, with the advice of the Executive Council, has been pleased to substitute the following Regulation for No. 68 of the Gaol Regulations, made under the Prisons Regulation Act 4 Victoria No. 29, section 5, viz. :—

GAOLER TO DEAL WITH CERTAIN CASES.

68. The Gaoler is empowered to cause any prisoner guilty of any breach of the Regulations or other disorderly conduct, to be kept in close confinement and upon half rations, for any time not exceeding seven days, or until the arrival of the Visiting Justice, to whom the circumstances of the case shall be reported, and who will, if he sees fit, require the prisoner to be brought before him for discharge or for further punishment. The Gaoler may place a refractory prisoner in irons, but he will not continue the use of irons for longer than forty-eight hours without the permission of the Comptroller-General or of the Visiting Justice; and he may cause a gag to be used, but only for the purpose of compelling a prisoner to cease from shouting or making use of blasphemous, filthy, mutinous, or disorderly language. It will be his duty to report to the Comptroller-General as well as to the Visiting Justice the circumstances of every case wherein he may have found it necessary to resort to any of the measures of repression above specified.

T. M. SLATTERY.

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PRISON DIET.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 3 July, 1895.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 13th June, 1895, That there be laid upon the Table of this House,—

“Copies of all Diet Sheets and Lists at present in use in the Gaols of the Colony which regulate the dieting of the various classes and grades of prisoners, together with a statement from the Prison authorities showing on what dietetic principles the scale of dieting is based, and in what cases the ordinary diet is departed from.”

(Dr. Graham.)

Minute Paper.

Subject:—Scale of dietary in prisons. Order of Legislative Assembly upon Dr. Graham's motion as to, dated 13th June, 1895.

Department of Prisons, Comptroller-General's Office, Sydney.

ATTACHED hereto are the following documents which contain the information sought for by Dr. Graham's motion:—

1. Copy of the scale of dietary now in force in the prisons of this Colony, regulating the ration allowance of the various classes and grades of prisoners.
2. Copy of the report of the Board, dated 28th November, 1888, which was appointed in May, 1888, to inquire into and consider the dietary scale then in operation.
3. Copy of letter of the Under Secretary of Justice, dated 7th December, 1888, approving of the adoption of the Board's report and recommendations, and conveying the thanks of the Government to the members of the Board.
4. Copy of General Order 254 in further explanation of the ration scale.
5. Copies of General Orders 77, 78, 79, 80, 81, and 82, regulating the scales of indulgences allowed to prisoners in excess of the ordinary rations.

It may be explained that the ration scale of Trial Bay Prison is an exceptionally liberal one, inasmuch as the prisoners are under modified conditions of servitude, and the work in the quarries and on the Breakwater is of a kind requiring a liberal diet.

GEORGE MILLER,
Comptroller-General.

The Under Secretary of Justice, B.C., 2/7/95.

No. 1.

SCALE OF DIETARY IN PRISONS.

Schedule A.

Ration No. 1.—For prisoners serving sentences not exceeding six months :—

Bread (females, 8 oz.)	12 oz.	Salt	$\frac{1}{2}$ oz.
Maize meal	8 „	Soap	$\frac{1}{2}$ „
Meat	4 „	Rice (five times a week)	$\frac{1}{4}$ „
*Vegetables (by substitution, chiefly in soup†)	8 „		

* This applies to all rations.

† The Surgeon may order substitution apart from soup use.

Ration No. 2.—For prisoners after service of six months of sentence, and all prisoners in separate treatment :—

Bread (females, 10 oz.)	12 oz.	Salt	$\frac{1}{2}$ oz.
Maize meal	8 „	Soap	$\frac{1}{2}$ „
Meat	8 „	Rice	$\frac{1}{4}$ „
Vegetables (females, 8 oz.)	12 „		

Ration No. 3.—Ordinary Labour.—Alternative ration, on labour scale, as by Schedule B attached. For prisoners serving sentences not exceeding twelve months, exclusive of light labour :—

Bread (females, 12 oz.)	20 oz.	Salt	$\frac{1}{2}$ oz.
Maize meal	8 „	Sugar (ration)	1 „
Meat	8 „	Soap	$\frac{1}{2}$ „
Vegetables (females, 10 oz.)	12 „	Rice or barley	$\frac{1}{4}$ „

Ration No. 4.—Harder Labour.—For prisoners employed on harder labour, as by Schedule B attached, and for prisoners on ordinary labour serving sentences exceeding twelve months :—

Bread (females, 16 oz.)	24 oz.	Salt	$\frac{1}{2}$ oz.
Maize meal	6 „	Sugar (ration)	1 „
Meat (females, 12 oz.)	16 „	Soap	$\frac{1}{2}$ „
Vegetables (females, 12 oz.)	16 „	Rice or barley	$\frac{1}{4}$ „

Ration No. 5.—Solitary confinement :—

Bread	16 oz.
Soap	$\frac{1}{2}$ „

Ration No. 6.—For debtors, prisoners under civil process, awaiting trial, under remand, and detained as witnesses for want of bail :—

Bread	16 oz.	Salt	$\frac{1}{2}$ oz.
Maize meal	8 „	Soap	$\frac{1}{2}$ „
Meat	16 „	Rice	$\frac{1}{4}$ „
Vegetables	12 „	Sugar	1 „

Ration No. 7.—For children of female prisoners above two and under eight years of age :—

Bread	8 oz.	Sugar (ration)	1 oz.
Meat	4 „	Soap	$\frac{1}{2}$ „
Milk	1 pt.		

Ration No. 8.—For children of female prisoners under two years of age :—

Bread	4 oz.	Sugar	1 oz.
Milk	1½ pts.	Soap	$\frac{1}{2}$ „

Ration No. 9.—Authorised to be issued to seventh class prisoners according to regulations :—

Wheat bread	16 oz.	Sugar	1 oz.
Maize meal	8 „	Soap	$\frac{1}{2}$ „
Meat	8 „	Salt	$\frac{1}{2}$ „
Potatoes	8 „		

Daily scale of Rations for prisoners employed at the Public Works Prison, Trial Bay :—

1½ lb. bread of fine wheaten and maiz flour, in the proportion of $\frac{1}{3}$ of the latter; or			
1½ lb. bread of wheaten flour.			
Fresh meat	1½ lb.	Salt	$\frac{1}{2}$ oz.
Vegetables	1 „	Rice	1 „
Maize meal	6 oz.	Sugar	1½ „
Tobacco (weekly)	2 „	Soap	$\frac{1}{2}$ „
Coffee	$\frac{1}{3}$ „	Tea	$\frac{1}{8}$ „

Schedule B.—Labour Scale.

Male Prisoners.

(On completion of tasks or recommendation of overseer.)

Light Labour.—Oakum picking, hair picking, coir balling, and other like light work.

Ordinary Labour.—Boot-making, bookbinding, tailoring, brush-making, painting, sweepers and cleaners, cooks, yardsmen, servants, clerks.

Harder Labour.—Stone-cutting, blacksmithing, carpentering, mat-making, excavating, road-work, iron and tin work.

Female Prisoners.

Light Labour.—Hair picking, oakum picking, and other like light work.

Ordinary Labour.—Needlework, knitting, sweeping and cleaning, servants.

Harder Labour.—Washing.

NOTE.—The officer in charge may, in relation to any particular work not above specified, place any prisoner on the ordinary or harder labour diet, and will report any such case to the Comptroller-General.

No. 2.

REPORT OF BOARD.

Sir,

Sydney, 28 November, 1888.

In accordance with the memorandum of Instructions enclosed in your letter of the 14th May last (88/338) we have the honor to report the results of the inquiry with which we have been intrusted into the question of the Prison Dietary of the Colony.

The points to which we were desired specially to direct our attention were :—

1. The effects of the existing dietaries "upon the health of the prisoners, as well as their relation to discipline, to capacity for work, and to crime."
2. Whether "prisoners sentenced to short periods of imprisonment should be placed on a different diet from that of persons sentenced to longer periods."
3. Whether "in the event of the adoption of the principle of variation of diet with length of sentences, prisoners under long sentences should be placed at once upon the dietary belonging to such sentences, or should pass through these successive dietaries belonging to the shorter sentences."
4. Whether the diet now in force is sufficient, and not more than sufficient to maintain health and strength, and to consider whether any rules can be laid down for establishing adequate checks upon the practice of ordering extra diets or for the guidance of Medical Officers on this point."
5. Whether, and how far, a reduction in diet can be made to secure the punishment for prison offences and under what system."

In pursuit of our inquiries, we have obtained reports from the officers in charge and surgeons of the principal gaols, and answers to communications addressed to the heads of the Penal Departments in the neighbouring colonies, with their dietary scales.

The whole correspondence forms an enclosure to this report. We attach hereto a revised scale which, in our judgment, would meet the penal requirements of the Colony in respect of preservation of health, effects in discipline, and capacity for work.

By the existing scale the Dietary is entirely regulated on the principle of duration of sentence, and quite irrespectively of labour. This was found to be a great improvement on the formerly prevailing system of "No Labour" and "Hard Labour."

After mature consideration we have arrived at the conclusion that, each system having its distinct advantages and fitness, it is desirable to weld them into the new scale in some modification of each, recognising both conditions.

There can be no question but that the conditions of treatment during limited periods can, with objects both deterrent and disciplinary, be made much more stringent, and that amelioration in some mode of necessity must form an element in dealing with sentences of longer duration.

We

We also think that, in a modified form, the allowance should advance with time—so the ration No. 1 gives the normal allowance which is increased with servitude and the alternative labour scale.

From the information gathered we are of opinion that the lowest time ration of the present scale, No. 1, is insufficient for sustaining constitutional strength, and for the performance of labour. And it would not appear that the very low ration (which provided $\frac{1}{2}$ lb. of meat weekly) has had, judging from the continual reconversions of the class of petty offenders, to whom it was allotted, the deterrent effect that was contemplated.

In the proposed scale, rations Nos. 1 and 2 recast the allowance on the lines to which we have referred, governed only by the principle of time and irrespectively of labour.

The labour question is dealt with in Nos. 3 and 4, and the schedule attached which define "Ordinary" and "Harder Labour," and the scale proposed seems to us to be only what is commensurate with the additional constitutional demand on the prisoner.

In comparing the scale of provisions in these Australian Colonies with those in the United Kingdom and foreign countries, it has to be borne in mind that here we are dealing with a community of liberal dietary customs, especially in respect of meat, and that some relevancy should be maintained in prison to the consumption outside. Further, in regard to meat—the most important item—a difficulty in comparison, and also in estimating the ration, arises from the difference existing in computing the allowance, by reason of meat being, under various systems, allotted with or without bone, and cooked or uncooked—thus, 1 lb. of meat as issued in this colony, when cooked and bone deducted, means 8 oz.

In preparing our plan due consideration has been given to the dietaries of the neighbouring colonies, and it will be found that our recommendations are in substantial accord with the system of Victoria, the colony whose conditions approach most nearly to those of New South Wales.

The adoption of the proposed scale will obviate the occasion for extra diet being authorised by the Surgeons, excepting in very exceptional conditions.

We think that the practice of allowing prisoners awaiting trial, and prisoners sentenced to imprisonment only, to provide their own food, as permitted by the present regulations, should be discontinued, and all rations for such persons be supplied by the establishment according to our proposed scale.

If this suggestion be adopted an alteration in the regulations will become necessary.

We have, &c.,

HAROLD MACLEAN,
H. N. MACLAURIN,
F. NORTON MANNING,
MAURICE J. O'CONNOR.

The Honorable the Minister of Justice.

No. 3.

Gentlemen,

Department of Justice, Sydney, 7 December, 1888.

I have the honor, by direction of the Minister of Justice, to acknowledge the receipt of your letter of the 28th ultimo, reporting the results of your enquiries into the question of the Prison Dietary of this Colony, and submitting therewith a revised scale of such dietary.

I am at the same time to inform you that the Minister has approved of the adoption of your report, together with the recommendations contained therein.

The Minister desires me also to convey to you the thanks of the Government for the great service you have rendered them in your painstaking labour in connection with this subject, and for the valuable information and suggestions contained in the report you have been so good as to favour him with.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

Harold Maclean, Esq.; H. N. MacLaurin, Esq., M.D.; F. Norton Manning, Esq., M.D.; Maurice J. O'Connor, Esq., L.R.C.S. Ire., Sydney.

No. 4.

GENERAL ORDER 254.

Rations: Explanation of.

THE following explanation regarding the application of the dietary scale is forwarded for gaolers' guidance:—

No. 1 ration is for "light or non-labour" prisoners serving sentences not exceeding six months, and for first six months of sentence if serving longer periods.

No. 2 ration is for "light or non-labour" prisoners after service of six months of sentence to end of same, and all prisoners in separate treatment not otherwise provided for.

No. 3 ration is for "ordinary labour" prisoners serving sentences not exceeding twelve months, who will be placed on this ration as soon as classified.

No. 4 ration is for "ordinary labour" prisoners serving sentences exceeding twelve months, and for "hard labour" prisoners irrespective of length of sentence. Both classes of prisoners will be placed on this ration as soon as classified.

Nos. 5, 6, 7, 8, 9, and 10 require no explanation.

NOTE.—Prisoners awaiting classification for labour will be regarded as "non-labour" prisoners *pro tem.* and placed on ration No. 1.

No. 5.

GENERAL ORDERS 77, 78, 79, 80, 81, AND 82.

Indulgences.

Labour Indulgences.

(G.O. 77.)

WELL conducted male prisoners, *after a service of twelve months*, are authorised on completion of their allotted task to receive weekly the following:—

Scale No. 1.—4 oz. tea, 1 lb. sugar, 2 oz. tobacco.

Scale No. 2.—4 oz. tea, 1 lb. sugar, 1½ oz. tobacco.

The prisoners eligible for full indulgences of tobacco are those in occupations mentioned in Labour Schedule A. Others, such as sweepers, cleaners, &c., fully employed in the work assigned to them, will be eligible for the lesser scale.

In cases where the work cannot be measured by task, the maximum, or as the circumstances may seem to justify, lesser portions of the indulgence laid down as above, may be allowed upon the recommendations for industry and good conduct of the Overseer or other officer under whom the work is performed.

In cases of prisoners not completing their tasks, but who are specially reported by the Overseer or other officer directing the labour as working hard and doing their best, they may be allowed the indulgence on the lesser scale, or a portion thereof, by the Gaoler. A list of all such cases must be kept.

A careful consideration is looked for from the officers making recommendations for indulgences.

In cases where by delay in supply of material, or other cause, prisoners are thrown out of work and there is no other work available, or are put to other work at which they do not earn the indulgence, the indulgence will be continued on the basis of the allowance they obtained the previous week.

If the Gaoler think it desirable in a particular case, a special treatment man who is behaving well may have indulgence, if earned, or if he has been taken from work at which he was earning it. This will not, however, apply to prisoners placed in separate or special treatment for coercion, in which case they will not be allowed any indulgence during the time of their punishment for coercion.

Smoking in working hours is strictly prohibited. Tobacco will not be allowed to any prisoner, of whatever class, under the age of 21 (twenty-one) years.

(G.O. 78.)

(G.O. 78.)

Indulgences on Holidays.

WELL-CONDUCTED prisoners who are earning indulgences will be permitted to receive from friends at Christmas, Easter, and Queen's Birthday—3 lb cooked meat, poultry, or fish; 2 lb bread; 2 lb vegetables; 2 lb pudding or cake; $\frac{1}{4}$ lb. tea; 1 lb sugar; 4 oz. cheese; 4 oz. butter; 1 oz mustard; 1 oz pepper; 1 oz tobacco; 1 doz fruit; $\frac{1}{2}$ pint milk

Where a prisoner does not receive anything from friends, he may purchase food from money in hand, within the foregoing description, to the value of 5s, but must not transfer money to another prisoner for the purpose of purchasing

In cases of prisoners who do not receive anything from friends, or who have no money, or who do not wish to spend their money in this way, the ordinary indulgences may on the above days be doubled. Prisoners who are within six months of their probable discharge will not be allowed to spend money in the purchase of indulgences, as they will need such money to help them on their liberation

The indulgences being allowed for the respective holidays must not be saved up beyond the day following, and cannot be taken on transfer to another gaol

(G O 79)

Allowance to Prisoners of 4th Class

PRISONERS of the 4th class may be allowed to purchase or receive from their friends weekly, in addition to their ration—3 loaves bread; 2 lb. sugar; $\frac{1}{2}$ lb tea; 2 oz tobacco, pipe, and matches

(G O 80)

Allowance to Prisoners who support Themselves

PRISONERS of the 3rd and 4th classes who support themselves will be allowed to purchase or receive from their friends weekly —7 loaves bread; 7 lb meat; 7 lb. vegetables; $\frac{1}{2}$ lb tea, 1 lb coffee (or portion of each), 3 lb sugar; 1 lb butter; 1 lb cheese; 2 oz tobacco, pipe and matches, &c This includes for prisoners of 4th class the allowances before mentioned

(G O. 81)

Indulgences to Jewish Prisoners

JEWISH prisoners will be allowed the special indulgences at their Passover and New Year instead of Christmas and Easter. At the Passover the indulgence may be provided by their friends. The indulgence on Queen's Birthday will apply to them as to other prisoners

(G O. 82)

Indulgences for certain Occupations Irrespective of Sentence.

THE maximum indulgence will be allowed, irrespective of sentence or servitude, to male prisoners who are employed, as shown hereunder, but the number employed must not exceed those appearing on the following schedule —

Gaols	Head Cook or Sole Cook	Baker	Hospital Cook	Honny Maker	Hospital Attendant	Epileptic Attendant	Lunatic Keeper	Lamp lighters	Hospital Washermen	Close cleaners	Night Attendants, O B S Ward

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(CORRESPONDENCE RESPECTING THE REINTRODUCTION OF THE USE OF THE GAG IN THE
GAOLS OF THE COLONY.)

Ordered by the Legislative Assembly to be printed, 29 May, 1895.

[Laid upon the Table of this House in answer to Question No. 31, of the 27th February, 1895.]

Question.

- (31.) USE OF GAGS IN GAOL:—MR. SLEATH asked THE MINISTER OF JUSTICE,—
- (1.) Is it a fact that gags are being used on prisoners undergoing sentences in the different gaols of the Colony?
 - (2.) If so, will he give immediate instructions to have this practice discontinued?

Answer.

SCHEDULE.

No. 1.

W. Chatfield, Esq., Visiting Justice, to The Minister of Justice.

Sir,

H.M. Gaol, Sydney, 2 March, 1892.

I have the honor to report, for the information of the Hon. the Minister of Justice, that a prisoner named George Reynolds was brought before me at Sydney Gaol on Saturday last, charged with having assaulted an officer of the prison and blackening his eye. As this prisoner's sentence is one of three months' hard labour, and expires on 8th instant, I was unable to deal with the case under the 13th section of 4 Victoria, No. 29, as I would have to remand the prisoner pending the attendance of a second magistrate, and by the time the papers, &c., were put through, and the necessary Ministerial approval to a whipping would be received, the prisoner would most probably be at liberty. I have, therefore, dealt with the case as an ordinary one, in order that the prisoner may not evade punishment altogether, and awarded him forty-eight hours dark cells, and the remainder of his sentence on half rations, but the inadequacy of this punishment is patent from the fact that immediately on Reynolds completing his cellular punishment he again committed himself, and was the principal cause of No. 1 corridor in E wing being thrown into a state of noise and confusion, and several other prisoners being locked up, charged with shouting and creating a disturbance. Reynolds had to be placed in one of the dark cells for coercion, and he was again before me this morning, charged with shouting, &c., and sentenced to another twenty-four hours dark cells.

It is absolutely necessary that some course in future should be adopted whereby similar cases could be treated in a prompt and effectual manner, as at present a prisoner could similarly commit himself, and avoid the punishment which his offence would call for, in consequence of the inadequate time to deal with the matter under the section of the Act.

I have, &c.,

W. CHATFIELD,

Visiting Justice, Sydney Gaol.

[Enclosure.]

Sydney Gaol, 1 March, 1892.

PARTICULARS of conviction and prison history of George Reynolds, a prisoner in Sydney Gaol :—Name of prisoner, George Reynolds ; born at Victoria in 1875 ; convicted at Water Police Court on 9th December, 1891 ; offence, suspected person ; sentence, three months H.L.—S.M. LEE ; previous convictions, nil.

Punishments.—Sydney Gaol—12th December, 1891, disorderly conduct, and resisting warder, 24 hours dark cells. 12th December, 1891, disorderly conduct in church, 24 hours cells. 30th December, talking and laughing at exercise, 24 hours dark cells. 9th January, 1892, communicating in separate, and continuing to do so till removed to dark cells, 24 hours dark cells. 16th January, 1892, communicating in separate, 24 hours dark cells. 27th February, 1892, talking at exercise, 48 hours dark cells. 29th February, 1892, assaulting warder with his fist, and blackening his eye, 48 hours dark cells, and half rations during remainder of sentence. 29th February, disorderly conduct, and shouting in cell, 24 hours dark cells. General conduct in gaol very bad.

P. HERBERT,

Governor, Sydney Gaol.

Submitted.—A.C.F., 7/3/92. Before the submission of this report to the Minister, I should be glad to have the views of the Comptroller-General of Prisons thereon.—A.C.F., B.C., 8/3/92. Report herewith on separate papers.—G.M., 10/3/92. The Under Secretary of Justice, B.C.

No. 2.

Minute by The Comptroller-General of Prisons.

Department of Prisons, Comptroller General's Office, Sydney.

Subject :—Darlinghurst Gaol—Visiting Justice's letter of 2nd March instant, as to course to be adopted in cases of certain refractory prisoners.

THE Visiting Justice can give a punishment of seven days in solitary confinement. If this fail to have the desired effect, a longer period can be fixed by two Justices or corporal punishment resorted to for the next serious offence, in terms of section 13 of Prisons Regulation Act. In such a case as that cited by Captain Chatfield, where the prisoner's sentence is nearly at an end, Mr. O'Connor might, perhaps, see his way to alter the rule requiring that all sentences to corporal punishment should be submitted to the Minister before being carried out. The punishment could then be inflicted with as little delay as possible after the Justices had given their decision.

When prisoners themselves render it necessary, through gross misconduct, severe measures must be taken to repress them, and compel them to obey the prison regulations. The larrikin element is most difficult to control, and I regret to say that it appears to be on the increase. Even at Trial Bay, where prisoners have great privileges, I learn from reports received that there is undoubtedly in existence a "push" or gang of agitators who compel better-disposed prisoners to join them in acts of insubordination. I feel sure also that certain outside interference with prison discipline, and attacks on prison officers, in the shape of grossly untruthful and sensational Sunday newspaper articles, based presumably on statements of dismissed officers and discharged prisoners, do much harm. What is stated in these articles is carried into the gaols by prisoners, and creates a spirit of insubordination and unrest.

I here venture to suggest to the Minister that the use of the gag be reintroduced and resorted to for repression only, in cases where prisoners offend by shouting and yelling, frequently in the most filthy and disgusting language. This misconduct frequently acts like a contagion, and is taken up by other prisoners in adjoining cells, until the whole wing is in a state of riot. From what I have learned of the riot at Bathurst Gaol in November, 1889 (before I joined the Department), I feel sure that, had the gag been resorted to at the beginning of the trouble, the disorder would have been quelled at once. While on this subject, I beg to invite the attention of the Minister to the remarks of the late Comptroller-General, as to the use of the gag, in his report for 1880, attached hereto. Its use was discontinued by Mr. Fitzpatrick, when Colonial Secretary, in 1878, but the Berrima Gaol Commission, of which Sir George Innes was Chairman, after most searching inquiry, recommended the use of such an instrument as a prompt and effective means of repression, on these conditions :—

The gag should, however, be only resorted to strictly as a means of repression, and in no case as a mode of punishment. It should in no case be used, except under the immediate orders of the Governor of the Gaol, and in every case it should be made a most stringent rule that a written record of its use, attested by every person present, should be preserved, and that the case should immediately be reported in writing to the Comptroller-General and to the Visiting Justice.

Mr. Herbert, Governor of Darlinghurst, has recently personally represented to me the growing trouble which is experienced in dealing with the "larrikin" class and he strongly urges the necessity for corporal punishment in the case of certain youths, upon whom dark-cell punishment has no deterrent effect. In such cases as these, the gag would doubtless prove an effective means of repression. The knowledge that its use is authorised would of itself act as a strong deterrent.

GEORGE MILLER,

The Under Secretary of Justice, B.C., 10/3/92.

Comptroller-General.

[Enclosure.]

EXTRACT from Report of the Comptroller-General of Prisons for 1880 :—

THE order and discipline of the Prisons have been satisfactory, and the general conduct of the prisoners has been good ; but there have been outbreaks of individuals and small combinations, seriously interfering with the order and discipline of the establishments, which have been only finally repressed by reluctant recourse to the threat of, or actual resort to, corporal punishment. These outbreaks I attribute to the want of the means of repression of necessity prevailing in a young and widely disseminated prison system, taken in connection with the unruly spirit noticeable in the younger prisoners of both sexes, unfortunately so numerous of late years supplying the places of the more mixed classes formerly coming under the operation of the law. These disorders usually have their commencement in audacious, and frequently most filthy, language, sometimes kept up day and night, audible throughout the smaller prisons, so that the well-disposed prisoners suffer almost as much annoyance as the officers are subjected to embarrassment and feelings of disgust. There is not an officer in charge of a prison who would not unhesitatingly express the conviction that the existence, as formerly, of the authority to use, apart from the actual use of, the gag, which I regard as the most immediate and humane means of repression, would, in nine cases out of ten, have obviated the occurrences which have led to long and severe cell, and sometimes corporal, punishments, and thus have been as merciful to the misguided prisoners themselves as relief to the officers from embarrassment and difficulty.

Submitted.—A.C.F., 18/3/92. Resubmit on my return, when I shall consider the whole question.—R.E.O.C., 15/4/92. Resubmitted.—A.C.F., 1/6/92. May be put by until some case arises involving these questions.—R.E.O.C., 22/12/92.

No. 3.

Messrs. W. Chatfield and N. Stewart, J's.P., to The Under Secretary of Justice.

H.M. Gaol, Darlinghurst, 13 April, 1894.

WE, William Chatfield (Visiting Justice of Darlinghurst Gaol) and Neil Stewart, J's.P., being this day engaged dealing with cases of gross insubordination, riotous conduct, and abusive language on the part of the eleven female prisoners named in the margin, in the presence of the Comptroller-General, and with his concurrence, beg to report to the Honorable the Minister of Justice the urgent necessity which exists for the use of the gag, so as to prevent prisoners of this character from making use of language filthy in its nature, and insulting and offensive to all surrounding.

Alice Marney

weeks ; Mary
Hannan, one
month ; Nellie
Ricks, two
months.

The urgency of some such repressive measure being adopted is all the more necessary seeing that the female wings in Darlinghurst Gaol are closely connected with the Darlinghurst Courts and within hearing of the Sacred Heart Church and schools and the neighbouring private residences. Yesterday the noise made by these female prisoners disturbed the sittings of the Quarter Sessions. We wish it to be distinctly understood that we recommend the use of the gag as a means of repression only—not of punishment. The knowledge that we possess the power to use it would have a very strong deterrent effect.

Former experiences have shown that a period of five minutes is sufficient for the gag to have the desired effect in most cases.

We have, &c.,

W. CHATFIELD, V.M.
NEIL STEWART, V.J.

Forwarded and strongly recommended. The disturbance caused by certain female prisoners who were locked up in cells this morning awaiting trial for gross misconduct yesterday was most disgraceful. They chanted songs, cheered, and yelled, and set the warnings of the magistrates at defiance by loud laughter and other acts of insubordination. It is very necessary that a means of repression be authorised for such cases of exceptionally bad conduct. The gag seems to be the only effectual means. I beg leave to invite attention to a previous report of mine, dated 10th March, 1892, on the subject of the use of the gag—an extract from which is attached hereto.—G.M., 13/4/94.

Extract suggesting reintroduction of use of the "gag" enclosed. The Under Secretary of Justice, B.C. Submitted, with reference to the late Minister's minute of 22nd December, 1892.—A.C.F., 16/4/94. Seen.—T.M.S., 19/4/94.

No. 4.

The Governor of Berrima Gaol to The Comptroller-General of Prisons.

Sir,

H.M. Gaol, Berrima, 4 July, 1894.

I do myself the honor to forward depositions in the case of the prisoner named in the margin, who was locked up on the evening of the 27th ult., for wilfully destroying Government property, disorderly conduct, and obscene language in his cell. He was brought before the Visiting Justice on the 2nd inst. on three charges, and, pleading guilty, received seven days cells on each—accumulative; the first fourteen days light cells, and last seven days, dark cells. Particulars, &c., herewith.

Thos. Edwards
alias Page, ten
years' penal
servitude.

I have, &c.,

T. KEIRNAN,
Governor.

[Enclosures.]

(A.)

LETTER from T. Keirnan, Governor, to F. R. Wilshire, Esq., P.M., Visiting Justice, Berrima Gaol.

Sir,

H.M. Gaol, Berrima, 28 June, 1894.

I do myself the honor to inform you that the prisoner named in the margin, on yesterday evening, after muster, and after being locked up, became very riotous, breaking up his cell furniture, shouting and yelling at the top of his voice, and using the most filthy and disgusting language without any provocation whatever. I had him removed to the dark cell where he still continued shouting and using the most filthy language.

Thos. Edwards'
alias Page, ten
years' penal
servitude.

The Visiting Justice will be good enough to approve of the course adopted in placing the prisoner in the dark cell, until such time as he became quiet, and who will be brought before you as soon as convenient.

I have, &c.,

T. KEIRNAN,
Governor.

Prisoner was removed from the dark cell this morning, and placed in his own cell.—T.K., Governor, 29/6/94. Prisoner again removed to dark cell at 4'30 p.m., as he commenced shouting and tearing his blankets, so that he should be again removed to the dark cell, it being warmer than his own.—T.K., Governor. Action taken in these cases approved.—F. R. WILSHIRE, V.J.

(B.)

Locking up a prisoner—Report of Warder, stating offence and circumstances connected therewith.

H.M. Gaol, Berrima, 27 June, 1894.

WARDER Dineen reports prisoner named on margin for wilfully destroying Government property, to wit, his night tub; also with disorderly conduct by shouting and hammering with his tub on the cell door; also with using obscene language towards the Governor, to wit, "Where is that b —— old bastard. Where is that b —— old w——e. Where is that b —— old pig."

Thomas
Edwards, ten
years' penal
servitude.

The Governor, H.M. Gaol, Berrima.

THOS. B. DINEEN,
Warder.

Locking up a prisoner—Report of Warder, stating offence and circumstances connected therewith.

H.M. Gaol, Berrima, 29 June, 1894.

WARDER Edward Cahill reports prisoner named in the margin, for wilfully destroying one blanket, the property of the New South Wales Government, valued 5s. The prisoner is charged with shouting in his cell and creating disturbance.

Thomas
Edwards, ten
years' penal
servitude.

The Governor, H.M. Gaol, Berrima.

EDWARD CAHILL,
Warder.

DEPOSITIONS

DEPOSITIONS in the case of prisoner Thomas Edwards, *alias* Page, ten years' penal servitude, charged with—1. Destroying Government property. 2. Disorderly conduct in his cell. 3. Obscene language.

Plea.—Guilty to all charges.

Senior Warder Smyth, on oath, states: On Wednesday night last there was a disturbance in the wing. Prisoner was battering his cell door with the lid of his tub, he was shouting and using filthy language at the top of his voice. I, accompanied by other officers, went into his cell. We asked him to be quiet. He refused, and said he wanted to go to the dark cell. He was removed to the dark cell, and continued to batter on the door there with his hands. He stated that if we put any cell furniture in, he would break it up.

Taken and sworn before me, at Berrima, this }
day, Monday, 2nd July, 1894,— }

THOMAS SMYTH.

F. R. WILSHIRE, V.J.

PARTICULARS of conviction and prison history of Thomas Edwards, a prisoner in Berrima Gaol:—Name of prisoner, Thomas Edwards, *alias* Page; born at England, in 1859; convicted at Bathurst Quarter Sessions on 5th August, 1891; offence, inflict grievous bodily harm with intent; sentenced to ten years' penal servitude.—Judge DOCKER. Recommendation or remarks—Convicted with George Stirling. Previous convictions: Central Police Office, 14th January, 1889, assault; six months' hard labour. *Water Police Office, 12th September, 1889, stealing; three months' hard labour. *Sydney General Session, 23rd September, 1889, larceny and receiving (five charges); five years' penal servitude.

*Serving these sentences when convicted of the above.

Governor.

No. 5.

The Governor, Berrima Gaol, to The Comptroller-General of Prisons.

Sir,

H. M. Gaol, Berrima, 4 July, 1894.

Thomas Edwards, *alias* Page, 10 years' penal servitude

I do myself the honor to state that the prisoner named in the margin, who at the present time is undergoing a cell punishment of fourteen days' light cells, and seven days' dark cells, awarded him on the 2nd instant by the Visiting Justice, commenced, at muster time yesterday evening, shouting out

out at the top of his voice, and using filthy and disgusting language, and continued incessantly until 10:30 p.m. I would not place prisoner at his own desire in the dark cells, as his punishment of light cells was to take precedence, and he threatened to play up until I should accede to his request, and that then he would laugh at us. Since he could not get his own way, he acted as mentioned above, and his shouting was heard all over the town, and in fact, half a mile away from the gaol. It is a great pity that the gag, which is the only thing that would have an immediate and deterrent effect, cannot be used in such cases. I may state that this prisoner has been in very bad odour through his own fault for some time past with his fellow prisoners on the works; so much so, that on the 27th ultimo he asked me to place him in a special yard, as he was afraid of being assaulted. I told him that I would see the Visiting Justice (who at that time was away), and ascertain what he had to say on the matter, but as I did not comply with prisoner's wishes there and then, he determined to play up and the result is the punishment he is now undergoing. When the present punishment has been served, the prisoner will be brought up before the Visiting Justice for his subsequent outrageous conduct, which has already been reported to the Visiting Justice.

I have, &c.,

T. KEIRNAN,
Governor.

Does the Visiting Surgeon consider prisoner Edwards sane and responsible for his actions?—G.M., 5/7/94. The Governor, Berrima. Report from Visiting Surgeon herewith.—T. KEIRNAN, Governor. The Comptroller-General of Prisons, Sydney.—I have frequently seen and conversed with Thomas Edwards, and never discovered any symptoms of insanity. I am opinion that he is responsible for his actions.—GEORGE P. LAMBERT, Visiting Surgeon, 6/7/94. The Comptroller-General of Prisons.

Forwarded with reference to my memorandum of the 13th April last, on papers 2,894 of 94.

THIS case of gross misconduct is another instance of the necessity and desirableness of reintroducing the use of the gag as a means of repression. The present regulations do not expressly prohibit the use of that instrument, the continuance of which was recommended by the "Berrima Gaol Inquiry Commission" (to which I have previously referred), subject to certain rules which could be easily enforced. The power to use the "gag" would, I feel sure, act as a strong deterrent, and thus frequently obviate the necessity for other and more severe means of repression. I would strongly urge this matter upon the Minister's consideration.—G.M., 14/7/94. The Under Secretary of Justice, B.C.

Submitted.—See also 94-6,297 herewith.—A.C.F., 17/7/94. Reserve for Minister. In my opinion the gag should be permitted in such cases as this.—C.G.H., 18/7/94. I concur with the opinion of my hon. colleague the Attorney-General.—T.M.S., 21/7/94.

Will the Comptroller-General of Prisons be good enough to submit necessary draft regulations for the information of the Minister, with a view to Executive authority being obtained for same, together with a pattern of the gag it is proposed should be used. The Comptroller-General of Prisons.—A.C.F., B.C., 23/7/94. See regulation No. 68, of 18th April, 1878, Department of Prisons.

Forwarded for Mr. Keirnan's information. Papers should be returned to me after being shown to the Visiting Justice, Mr. Wilshire. At present this matter should be treated as confidential.—GEORGE MILLER, Comptroller-General of Prisons. Comptroller-General of Prisons Office, Sydney, 24th July, 1894.

I have looked through these papers and concur fully in representations as to restoration of the use of the gag, and strongly recommend that steps be taken with the view of at once reintroducing its use as well in this prison as elsewhere.—F.R.W., V.J., Berrima, 26/7/94.

I am glad that steps are being taken to reintroduce the gag as a preventive or means of repression in cases where disgusting and filthy language is indulged in by prisoners. Having already had experience of the efficacy of the gag in deterring prisoners from such language, I am confident its reintroduction will be most beneficial. When it was in use I invariably noticed that the worst prisoners gave in after it had been applied only for a very short time. Personally, I should be extremely glad if the suggestion is carried out, because, when prisoners use such filthy language as prisoner Edwards lately indulged in, it is almost impossible to prevent my family from hearing it. I should certainly remove them from the quarters inside the gaol were there a suitable house near at hand.—T. KEIRNAN, Governor. H.M. Gaol, Berrima, 27th July, 1894.

Seen.—G.M., 28 7/94.

Herewith is submitted a draft amendment of regulation which will meet the case. I also forward a draft of General Order prescribing more fully the conditions under which the gag is to be used. This embodies all the suggestions of the Berrima Gaol Inquiry Commission. I am not yet in a position to furnish a pattern of the new gag, but Mr. Herbert, of Darlinghurst, is having one made for my approval, which I will forward to the Minister when it is ready. It is intended that it shall be of a milder pattern than the one formerly in use.—G.M., 30/7/94. The Under Secretary of Justice.

[Enclosures.]

(A.)

Regulation 68—From the *Government Gazette* of the 24th April, 1878.

Colonial Secretary's Office, Sydney, 18 April, 1878.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to substitute the following regulation for No. 68 of the Gaol Regulations made under the Prisons Regulation Act, 4 Vict. No. 29, section 5, viz. :—

GAOLER TO DEAL WITH CERTAIN CASES.

68. The Gaoler is empowered to cause any prisoner guilty of any breach of the regulations or other disorderly conduct to be kept in close confinement and upon half rations for any time not exceeding seven days, or until the arrival of the Visiting Justice, to whom the circumstances of the case shall be reported, and who will, if he see fit, require the prisoner to be brought before him for discharge or further punishment. The Gaoler may place a refractory prisoner in irons; but he will not continue the use of irons for longer than forty-eight hours without the permission of the Comptroller-General of Prisons or of the Visiting Justice, and he will report in writing to the Comptroller-General of Prisons, as well as to the Visiting Justice, the circumstances of every case wherein he may have found it necessary to resort to any such measure of coercion as above specified.

MICHAEL FITZPATRICK.

PROPOSED AMENDMENT.

68. The Gaoler is empowered to cause any prisoner guilty of any breach of the regulation or other disorderly conduct to be kept in close confinement and upon half rations for any time not exceeding seven days, or until the arrival of the Visiting Justice, to whom the circumstances of the case shall be reported, and who will, if he see fit, require the prisoner to

to be brought before him for discharge, or for further punishment. The Gaoler may place a refractory prisoner in irons, but he will not continue the use of irons for longer than forty-eight hours without the permission of the Comptroller-General or of the Visiting Justice; and he may cause a gag to be used, but only for the purpose of compelling a prisoner to cease from shouting, or making use of blasphemous, filthy, mutinous, or disorderly language. It will be his duty to report to the Comptroller-General as well as to the Visiting Justice the circumstances of every case wherein he may have found it necessary to resort to any of the measures of repression above specified.

T. M. SLATTERY.

GENERAL ORDER UNDER REGULATION 3, AS TO USE OF GAG.—G.O. 314.

The use of the Gag.

It must be distinctly understood that the use of the gag, under regulation 68, is to be resorted to only in cases in which prisoners persist in shouting loudly, or in using language of a blasphemous, filthy, mutinous, or disorderly character.

It is to be used as a means of repression only, and in no case as a mode of punishment.

The instrument must be withdrawn from the mouth on a sign being made by the prisoner that he, or she, will not persist further in the misconduct which necessitated its use.

It is in no case to be used except under the immediate orders of the officer in charge of the gaol, or, in his absence, of the officer next in command; and, in every case, a written record of its use, attested by all officers present, must be kept, and the case reported immediately to the Comptroller-General and the Visiting Justice.

GEORGE MILLER,
Comptroller-General.

No. 6.

Minute Paper for the Executive Council.

Subject:—Recommending for approval amended regulation proposed to be substituted for regulation No. 68 of the Gaol Regulations.

Department of Justice, Sydney, 30 July, 1894.

In accordance with the suggestion of the Comptroller-General of Prisons, contained in his communications of the 14th instant and 13th April last, I recommend for approval the amended regulation submitted by him proposed to be substituted for regulation 68 of the Gaol Regulations, published on the 18th April, 1878, under the Prisons Regulation Act, 4 Vic. No. 29, by which it is intended to permit the use of the gag for the purpose of compelling a prisoner to cease from shouting or making use of blasphemous, filthy, mutinous, or disorderly language, the form of such gag to be approved by the Minister of Justice.

T. M. SLATTERY.

The Executive Council approve of the amended regulation herewith submitted.—ALEX. C. BUDGE, Clerk of the Council. Min. 94-34. 30/7/94. Approved.—R. W. DUFF, 30/7/94. Confirmed, 31/7/94.

No. 7.

Extract from *Government Gazette*.

Department of Justice, Sydney, 2 August, 1894.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to substitute the following Regulation for No. 68 of the Gaol Regulations, made under the Prisons Regulation Act, 4 Victoria No. 29, section 5, viz.:—

GAOLER TO DEAL WITH CERTAIN CASES.

68. The Gaoler is empowered to cause any prisoner guilty of any breach of the Regulations or other disorderly conduct to be kept in close confinement and upon half rations for any time not exceeding seven days, or until the arrival of the Visiting Justice, to whom the circumstances of the case shall be reported, and who will, if he see fit, require the prisoner to be brought before him for discharge or for further punishment. The Gaoler may place a refractory prisoner in irons, but he will not continue the use of irons for longer than forty-eight hours without the permission of the Comptroller-General or of the Visiting Justice; and he may cause a gag to be used, but only for the purpose of compelling a prisoner to cease from shouting or making use of blasphemous, filthy, mutinous, or disorderly language. It will be his duty to report to the Comptroller-General as well as to the Visiting Justice the circumstances of every case wherein he may have found it necessary to resort to any of the measures of repression above specified.

T. M. SLATTERY.

No. 8.

Minute Paper.

Department of Prisons, Comptroller-General's Office, Sydney.

Subject:—Correspondence as to use of the "Gag" in Prisons.

FORWARDED for the perusal of the Medical Adviser to the Government, with whom I propose to confer at an early date, respecting the pattern of a new gag for submission to the Minister of Justice.

GEORGE MILLER,

The Medical Adviser, B.C.

C.-G.P., 24/8/94.

To be returned to Comptroller-General, as requested at our interview to-day.—A.S., 6/9/94.

I have recently personally conferred with the Medical Adviser as to the kind of instrument which is required by this Department, and would suggest that these papers be now referred to him, with a request that he will cause a suitable gag to be made for approval by the Minister.—G.M., 8/9/94. The Under Secretary of Justice, B.C.

Submitted.—A.C.F., 10/9/94. Approved.—A.J.G., 12/9/94. The Secretary to the Government Medical Adviser.—T.E.M.N. (for U.S.), B.C., 12/9/94.

I have perused these papers relating to the gag for dealing with noisy prisoners, and I have conferred with the Comptroller-General of Prisons and with the Governor of Darlinghurst Gaol. These gentlemen submitted to me the following apparatus, viz.:—

1. A gutta-percha work to which there is not much objection from my point of view, but I do not think it would be efficient.
- 2.

2. A mouth-stopper to which I took grave exception because, on anatomical grounds, it could not be employed.
3. The gag at present in use.—Against the use of this instrument I made the following objections :—
 1. The strap being so far from the teeth, too much leverage results, so that the force applied to the teeth is unduly increased.
 2. The circular section of the tube permits the teeth to rest upon it at points only, so that the force is applied over too limited an area of the teeth.
 3. The blunt end of the tube is most unfavourable for its easy introduction.

Taking all these points into consideration, I am not surprised that teeth are lost in the struggle during the introduction of the gag. I am of opinion that a gag might be constructed in which these defects are remedied.—A.S., 24/10/94.

The Under Secretary of Justice.—E.S., B.C., 25/10/94. Submitted.—A.C.F., 26/10/94.

Gag, as suggested, may be submitted.—A.J.G., 29/10/94. The Comptroller-General of Prisons, T.E.M'N. (for U.S.), B.C., 30/10/94.

The patterns of gags referred to as Nos. 1 and 2 in Medical Adviser's report were not approved of by me. They were simply submitted to me as proposed modifications of the gag formerly in use, and I left them with the Medical Adviser. I considered No. 2 wholly unsuitable. I handed the gag formerly in use (No. 3) to the Medical Adviser, in order that the medical authorities might suggest some more suitable and less severe form of instrument. The one now suggested appears to meet the requirements of the case. Though of metal, it is far superior in every way than the old gag. I should like to confer with the Minister on the subject. The gag formerly in use, and the proposed new one, are transmitted herewith, in a separate packet.—G.M., 11/12/94. The Under Secretary of Justice, B.C.

Submitted.—A.C.F., 12/12/94. May be referred to Medical Adviser to Government for favour of report as to suitability, and if free from danger of injury to prisoners in its use.—A.J.G., 10/1/95. The Secretary to the Medical Adviser to the Government.—T.E.M'N. (for U.S.), 11/1/95.

The proposed gag appears to me to be a great advance on any previously in use both as to ease of application and humanity. I would merely suggest that the chisel-edge be somewhat sharper, and that the mouth-shield be made larger—the former to permit the gag being introduced with less danger of pushing out the front teeth, and the latter to lessen the chance of the prisoner opening his mouth very wide and taking it in his teeth altogether.—A.S., 14/1/95.

Submitted.—A.C.F., 16/1/95. The form of gag, with the proposed alterations by Medical Adviser, may be adopted.—A.J.G., 17/1/95. The Comptroller-General of Prisons.—T.E.M'N. (for U.S.), B.C., 18/1/95.

No. 9.

The Comptroller-General of Prisons to The Under Secretary of Justice.

Sir, Department of Prisons, N.S.W., Comptroller-General's Office, Sydney, 8 February, 1895.

In accordance with the verbal request of the Minister of Justice, I have the honor to forward herewith a *précis* of the correspondence as to the desirableness of reintroducing the gag into the prisons of the Colony.

I have, &c.,

GEORGE MILLER,
Comptroller-General.

[Enclosure.]

PRECIS of correspondence as to necessity for the reintroduction of the "gag" in prisons.

In November, 1878, the Berrima Gaol Commission, of which Sir George Innes was Chairman, after most searching inquiry, recommended the use of the gag as a prompt and effective means of repression, subject to the conditions mentioned in the subjoined extract from their report :—

- "The general tenor of the evidence upon which reliance can be placed seems to establish that some such instrument of repression is absolutely necessary to the maintenance of order and discipline in the gaols. It is, and it is known to be, a remedy prompt, unpleasant, and effective, and the mere circumstance that the prisoners understand that it can be resorted to will operate *in terrorem* most beneficially. Practically, the necessity for its use will be, as it has been, of rare occurrence. If any other means equally efficacious and less painful could be devised we should be glad to recommend it. Remission to the dark cells, as they are situated at present, will not prevent or remedy the evil. If the prisoner offending by shouting out the most filthy and disgusting language, could be remitted to some place of confinement whence his language would not be heard, there would be no necessity for the use of the gag, but at present Berrima Gaol has no such place of confinement.
- "The gag should, however, be only resorted to strictly as a means of repression, and in no case as a mode of punishment. It should, in no case, be used except under the immediate orders of the governor of the gaol, and, in every case, it should be made a most stringent rule that a written record of its use, attested by every person present, should be preserved, and that the case should immediately be reported, in writing, to the Comptroller-General and to the Visiting Justice.
- "We have considered whether the gaoler should have power to direct the use of the gag upon his own authority, or whether it should be incumbent upon him to obtain the authority of the Visiting Justice, but for the obvious reason that its use to be efficacious as a means of repression must be immediate, we think it is necessary to vest in the gaoler the power, as it was prior to the regulation of 18th April, 1878, of using it or of directing its use upon his own authority.
- "We have had before us two or three specimens of the instrument called the gag, which has been in use since 1865 or 1866. It was submitted for approval to the visiting surgeon at Darlinghurst, Dr. West, and to Dr. Williamson, of Berrima, and approved by them. It is made of hardwood; there is no metal whatever about it, except the iron tacks which fasten a leathern strap to its back, and the buckle. In passing, it may not be out of place to call attention to the curious piece of exaggeration which is disclosed by the manufacture and production before the Legislative Assembly, of a gag with a metal tube. (See Mr. Taylor's evidence, 10828, &c.) The gag has a base about 3 inches long, $\frac{3}{4}$ -inch thick, and about $1\frac{1}{2}$ -inch broad. From this base projects a thick conical turned tube, about $1\frac{1}{8}$ inch at the base, tapering to a diameter of $\frac{3}{4}$ -inch, the length being fully 2 inches. This tube is for insertion into the mouth. A strap is tacked to the back of the base of the gag and buckles at the back of the head of the prisoner upon whom it is used. The edges of the case from which the tube projects are sharp, and coming into immediate contact with the mouth, they are not unlikely to cut it, with even a very moderate amount of force in the application of the gag. We think, notwithstanding the approval of the visiting surgeon above referred to, that, regarded as it should be, simply as an instrument of repression, this gag is so shaped as to be liable to inflict in its use unnecessary suffering. We, therefore, recommend some modification in its construction, both in the length of the tube and the sharpness of the edges of the base."

In

In his Annual Report to the Minister of Justice for the year 1880, the Comptroller-General of Prisons (the late Mr. Harold Maclean) stated as follows:—

“The order and discipline of the prisons have been satisfactory, and the general conduct of the prisoners has been good; but there have been outbreaks of individuals, and small combinations, seriously interfering with the order and discipline of the establishments, which have only been finally repressed by reluctant recourse to the threat of, or actual recourse to, corporal punishment. These outbreaks I attribute to the want of the means of repression of necessity prevailing in a young and widely disseminated prison system, taken in connection with the unruly spirit noticeable in the younger prisoners of both sexes, unfortunately so numerous of late years, supplying the places of the more mixed classes formerly coming under the operation of the law. These disorders usually have their commencement in audacious, and, frequently, most filthy language, sometimes kept up day and night, audible throughout the smaller prisons, so that the well-disposed prisoners suffer almost as much annoyance as the officers are subjected to embarrassment and feelings of disgust. There is not an officer in charge of a prison who would not unhesitatingly express the conviction that the existence as formerly of the authority to use, apart from the actual use of the gag, which I regard as the most immediate and humane means of repression, would, in nine cases out of ten, have obviated the occurrences which have led to long and severe cell, and sometimes corporal, punishments, and thus have been as merciful to the misguided prisoners themselves, as relief to the officers from embarrassment and difficulty.”

A riot lasting for several days took place at Bathurst Gaol in November, 1889. It arose from the riotous conduct of a refractory prisoner with whom other prisoners combined to produce general disorder in the gaol by shouting and using obscene and disgusting language. Had the gag been resorted to at the outset, the trouble would never have emerged into a riot, but would have been quelled at once.

On 2nd March, 1892, the Visiting Justice to Darlinghurst Gaol reported the case of a prisoner who grossly misconducted himself within the last week of his sentence. Captain Chatfield had no alternative, in view of the sentence having almost expired, than to treat the case as an ordinary one, and awarded a punishment of forty-eight hours dark cells, and the remainder of the sentence on half rations. The inadequacy of this punishment was apparent from the fact that immediately on the completion of the cellular portion of it, the prisoner again committed himself, and was the principal cause of No. 1 corridor in E wing being thrown into a state of noise and confusion, and several other prisoners being locked up, charged with shouting and creating a disturbance. Captain Chatfield pointed out the absolute necessity of some course, such as flogging, being adopted in future, whereby similar cases could be treated in a prompt and effectual manner. In reporting on this matter, the Comptroller-General of Prisons suggested to the Minister of Justice that the gag should be reintroduced, and resorted to for repression only in cases where prisoners offended by shouting and yelling, frequently in the most filthy and disgusting language. He pointed out that misconduct of this character frequently acted like a contagion, and was taken up by other prisoners in adjoining cells, until the whole wing was in a state of riot.

The Minister of Justice (Mr. O'Connor) directed that the papers be put by until some other cases arose involving these questions.

On 13th April, 1894, Captain Chatfield and Mr. Neil Stewart (Visiting Justice to Parramatta Gaol), after dealing with the cases of eleven female prisoners who had been guilty of most gross insubordination, riotous conduct, and abusive and filthy language, brought under notice the urgent necessity which existed for the use of the gag, at the same time pointing out that the knowledge that it could be used would have a very strong deterrent effect. In forwarding this communication to the Minister of Justice, the Comptroller-General of Prisons strongly recommended that the gag be reintroduced. He stated that the disturbance caused by the female prisoners who were locked up awaiting trial was most disgraceful. They chanted songs, cheered, yelled, and set the warnings of the magistrates at defiance by loud laughter and other acts of insubordination.

On 4th July, 1894, the Governor of Berrima Gaol reported the case of a prisoner who, while undergoing cell punishment, commenced to shout at the top of his voice and to use filthy and disgusting language incessantly for 5½ hours. The shouting was heard all over the town, half a mile away from the gaol. The Comptroller-General of Prisons, in forwarding this report to the Minister of Justice, again strongly urged upon the Minister's consideration the necessity and desirableness of reintroducing the use of the gag as a means of repression, and represented that the power to use it would act as a strong deterrent, and thus frequently obviate the necessity for other and more severe means of repression. On 18th July, 1894, Mr. C. G. Heydon (acting for the Minister of Justice), expressed the opinion that the use of the gag should be permitted in such cases as the foregoing, and Mr. Slattery concurred with this opinion on the 21st idem.

The Comptroller-General of Prisons was asked, on 23rd July, 1894, to submit draft regulations governing the use of the gag, and this request he complied with on 30th idem. The regulation was approved of by His Excellency, with the advice of the Executive Council, and was gazetted on 2nd August, 1894 (copy attached).

A copy of a “general order” from the Comptroller-General referring to the regulation is also attached. The adoption of a modified form of gag has been recommended by the Medical Adviser to the Government and has been approved of by the Minister of Justice.—7/2/95.

[Sub-enclosure.]

GENERAL ORDER UNDER REGULATION 3, AS TO USE OF GAG.

The use of the Gag.

It must be distinctly understood that the use of the gag, under regulation 68, is to be resorted to only in cases in which prisoners persist in shouting loudly, or in using language of a blasphemous, filthy, mutinous, or disorderly character.

It is to be used as a means of repression only, and in no case as a mode of punishment.

The instrument must be withdrawn from the mouth on a sign being made by the prisoner that he, or she, will not persist further in the misconduct which necessitated its use.

It is in no case to be used except under the immediate orders of the officer in charge of the goal, or, in his absence, of the officer next in command; and in every case a written record of its use, attested by all officers present, must be kept, and the case reported immediately to the Comptroller-General and the Visiting Justice.

GEORGE MILLER,
Comptroller-General.

Submitted.—A.C.F., 9/2/95.

Read. Place with the accompanying *précis* report and evidence of Berrima Gaol Commission, annual report of 1880, the report referred to herein, and the report of the Medical Adviser to the Government, approving present gag.—A.J.G., 16/2/95.

Papers herewith. Submitted.—A.C.F., 20/2/95. Make a copy of these papers to lay on Table of House.—A.J.G., 27/2/95.

1894-5.

1894.

REPORT OF THE MINISTER OF PUBLIC INSTRUCTION.

To His Excellency the Honorable SIR FREDERICK MATTHEW DARLEY,
Knight, Lieutenant-Governor of the Colony of New South Wales
and its Dependencies.

May it please your Excellency,—

I have the honor to submit to your Excellency the Report
of the Department of Public Instruction for the year 1894.

SCHOOLS.

In 1894 there were 2,508 schools, containing 2,725 departments, as compared with 2,520 schools and 2,744 departments open in 1893. During the year, 74 schools were established, comprising 12 Public, 22 Provisional, 28 Half-time, 4 House-to-house Schools, and 8 Evening Schools. In addition to these, 13 schools were reopened, 20 Provisional and 5 Half-time Schools were raised to the rank of Public Schools, and 8 Half-time and 4 House-to-house Schools to the rank of Provisional Schools; while 38 Public and 36 Provisional Schools were reduced to Half-time or House-to-house Schools. 104 of the schools in operation during the whole or some portion of 1893 do not appear on the list of schools open in 1894, and of those actually in operation in that year 71 were closed before the last quarter. The number of schools open at the close of 1894 was 2,437, containing 2,654 departments.

The following table shows the classification of the schools open in 1894:—

1. <i>High Schools</i> :—							
Unclassed	Schools.	Departments.	
					5	5	
2. <i>Public Schools and Half-time Schools</i> :—							
In Class	I.	38	114	
"	II.	36	107	
"	III.	23	54	
"	IV.	64	102	
"	V.	116	117	
"	VI.	209	209	
"	VII.	206	206	
"	VIII.	311	311	
"	IX.	762	762	
"	X.	209	209	
Unclassed	142	142	
3. <i>Provisional Schools</i> :—							
Class	I.	}	302	302	
"	II.						
"	III.						
4. <i>House-to-house Schools</i> :—							
Unclassed	71	71	
5. <i>Evening Public Schools</i> :—							
Unclassed	14	14	
	Total	2,508	2,725	

Two hundred and six applications for the establishment of new schools were received, namely, 23 for Public Schools, 130 for Provisional Schools, 31 for Half-time Schools, 12 for House-to-house Schools, and 10 for Evening Schools. Of these, 106 were granted, 81 were declined, and 19 remained under consideration at the close of the year. The total number of children to be accommodated in the new schools granted is 2,863.

The number of applications received and the action taken with regard to them are shown in the following table:—

Applications for the establishment of Schools.

Schools.	Number received.	Number granted.	Number declined.	Number still under consideration.
Public Schools	23	9	8	6
Provisional Schools	130	61	54	15
Half-time Schools	31	22	8	1
House-to-house Schools... ..	12	6	6	...
Evening Public Schools... ..	10	8	2	...
Total... ..	206	106	78	22

Full details respecting these applications will be found in Appendices I, II, III, IV, V.

The number of schools in operation in 1881, the first full year during which the Department was under Ministerial control, as compared with the number open in 1894, is given in the following table:—

Schools.	Number of Schools or Departments in operation.		Increase, 1881-1894.
	1881.	1894.	
High Schools	5	5
Superior Schools	58	241	183
Primary Public Schools	1,042	1,643	601
Provisional Schools	246	302	56
Half-time Schools	93	449	356
House-to-house Schools	71	71
Evening Schools	57	14	43*
Total	1,496	2,725	1,229
Seats provided	98,721	231,370	132,649

* Decrease.

From the foregoing table it will be seen that, Evening Schools excepted, all kinds of schools increased considerably in numbers during the period under notice. Primary Public Schools increased by 601 in the thirteen years, Superior Schools by 183, Provisional and Half-time Schools by 56 and 356 respectively, while of House-to-house Schools, first started in 1883, there are now 71. During the thirteen years referred to the Evening Schools have decreased from 57 to 14.

In

In addition to the schools established and maintained under the Public Instruction Act, the following State supported or aided schools are still in operation, namely, the Sydney Grammar School, the two Industrial Schools, and the School for the Deaf and Dumb and the Blind.

School Premises and Sites.—The number of school sites acquired during the year was 68. Of these, 52 were Government grants, 10 were resumed under the Public Works Act, 51 Vic. No. 37, and 6 were purchased. The cost of the purchased sites amounted to £1,384 4s. 10d., and the sum of £52 8s. 7d. was paid on account of those resumed. The balance to be paid for the latter, when the claims have been settled, is £40. Full particulars as to the sites will be found in Appendix XXI.

Buildings.—At the close of 1894, existing school premises afforded room for 231,370 pupils. Of the school-places counted in 1893, about 4,420 were lost in 1894 by the closing of schools and by the giving up of old buildings. The net increase was 2,370. Taking the building-work done in the last two years, it may be observed that, in 1894, 17 new schools and residences were erected under the Architect's supervision, as compared with 58 built in 1893; while the additions numbered 8, as compared with 21; the premises repaired, 231, as compared with 335; and the places provided, 3,112, as compared with 7,852 for the same period. The number of small school-buildings and residences erected under the Inspectors' supervision was 52, as compared with 58 put up in 1893; the number of places provided was 1,949, as compared with 1,939; and the buildings repaired numbered 748 in 1894, as against 592 in the previous year.

At the close of 1894 the following additional works were in progress:—12 new buildings, 10 additions, and 12 buildings for small country schools, the whole to provide for about 2,650 children. Four new weather-sheds were in course of construction, as well as 14 teachers' residences. Repairs and improvements were being carried out in 222 existing buildings.

Full particulars respecting the building-work completed in the year, and that in progress at its close, are given in the following tables:—

Works completed.

	Number.	Places provided.	Total cost, not including cost of sites.	Average cost per building.	Cost per place.
<i>Works under Department's Architect:—</i>

1892	157,679
1893	112,856
1894	73,791

School Attendance.—The returns for the year show a gross aggregate enrolment at Public Schools of 234,392 pupils, as compared with 238,951 in 1893. Deducting 12 per cent. on account of multiple enrolments, the number of individual pupils under instruction was 206,265. This number equals 88·5 per cent. of the total population of the Colony between the ages of 6 and 14 and 68·2 per cent. of those between 4 and 14 years of age. The decrease in enrolment is attributable to a variety of causes, among which are the presence of epidemics in the early part of the year and of continuous wet weather in the September quarter. There is no doubt, too, that the depression throughout the Colony led many parents to keep their children from school either through inability to pay the fees or on account of the assistance they might render at home by their labour. At the commencement of the year, moreover, a circular was issued by my predecessor fixing the minimum age at which children could be admitted to school at 6 years, thus excluding large numbers who would otherwise have been enrolled. Indeed, the exclusion of children between 5 and 6 years old was found to work so prejudicially, especially in the country where the very existence of small struggling schools was jeopardised, that, after obtaining the advice of my officers, I deemed it wise, in October last, to withdraw the circular in question, and to reduce the minimum age of admission to five years.

Notwithstanding the falling off in the enrolment the average daily attendance was larger by nearly 2,000 than in the previous year, and the percentage of daily attendance to enrolment higher than in any year in the history of the Department. Tables dealing with the average attendance appear later on in this Report.

The

The gross aggregate enrolment and the aggregate enrolment of distinct pupils for the last five years are given in the following table:—

Years.	Gross Aggregate Enrolment.	Corrected Aggregate Enrolment of Distinct Pupils.	Increase.	
			Gross Enrolment.	Corrected Enrolment.
1890	221,864	195,241	4,575	4,026
1891	233,719	205,673	11,855	10,432
1892	239,364	210,641	5,645	4,968
1893	238,951	210,277	413*	364*
1894	234,392	206,265	4,559*	4,012*

* Decrease.

In addition to the 206,265 pupils enrolled in schools under the Public Instruction Act, there were 1,218 in attendance at other State-aided Schools, namely:—

The Sydney Grammar School	466
The Industrial Schools	666
The School for the Deaf and Dumb and the Blind	86
Total	1,218

Estimating the mean population of the Colony for 1894 at 1,237,410, the population between 6 and 14 years of age was 232,915. Of this number, 182,076, or 78·1 per cent., attended State Schools, and 50,839, or 21·9 per cent., received instruction in Private Schools or at home, or else remained altogether untaught. From the latest returns of Private Schools' attendance it appears that the total enrolment was 46,410. As of this enrolment 34,190 pupils were between the ages of 6 and 14, it will be seen that of the total statutory school population of 232,915, about 216,266, or 92·8 per cent., were enrolled at State and Private Schools, while 16,649, or 7·2 per cent., were taught at home, had left school after satisfying the standards of the Act, or remained untaught. In addition to pupils of the statutory school age, 15,299 under 6 years of age, and 21,683 over 14 years, were also enrolled for school attendance—25,407 at State Schools, and 12,220 at Private Schools. Thus, of 327,676 children in the Colony between the ages of 4 and 15 years, 207,483 attended State Schools, and 46,410 attended Private Schools; while the remainder, 73,783, received instruction at home, had completed their education, or were untaught.

The average quarterly enrolment was 181,678, and the average attendance 130,089. The regularity of attendance, as tested by comparing the average attendance with the enrolment, was considerably higher than in 1893, and shows a very marked improvement.

In the first half of the year 125,216 pupils, and in the second half 137,009 pupils, attended the ordinary day-schools 70 days or more. The percentage attending the compulsory number of days was, in the first half-year, nearly 3 per cent., and in the second, 9·7 per cent. higher than in the previous year.

The

The percentages of the enrolment attending 70 days or more in each half-year, since 1889, are as follow :—

Year.	70 days or more in first half-year.	70 days or more in second half-year.
1890	58·4	72·3
1891	57·9	68·7
1892	67·7	71·5
1893	66·2	66·1
1894	69·1	75·8

The enrolment and average attendance are shown in the following tables :—

(a) *Quarterly Enrolment and Average Attendance for 1893 and 1894.*

Quarters.	Number enrolled.		Average Attendance.			
			Number.		Percentages.	
	1893.	1894.	1893.	1894.	1893.	1894.
March quarter ..	189,479	181,859	132,799·5	123,605·0	70·0	67·9
June quarter ...	189,587	182,145	134,320·4	134,301·6	70·8	73·7
September quarter ...	186,658	181,847	124,748·9	128,237·5	66·8	70·5
December quarter ...	179,587	180,864	121,422·1	134,213·6	67·6	74·2
Year's average...	186,327	181,678	128,322·7	130,089·4	68·8	71·6

(b) *Enrolment and Average Attendance for the last five years.*

Years.	Year's Enrolment.	Quarterly Enrolment.	Average Attendance.		
			Number.	Percentage of Year's Enrolment.	Percentage of Quarterly Enrolment.
1889	191,215	164,701	114,569	59·92	69·56
1890	195,241	170,357	116,665	59·75	68·48
1891	205,673	178,278	122,528	59·52	68·72
1892	210,641	186,207	132,580	62·94	71·20
1893	210,277	186,327	128,322	61·02	68·86
1894	206,265	181,678	130,089	63·06	71·60

The main facts relative to school attendance may be summed up thus :—216,266, or 92·8 per cent. of the statutory population, were enrolled for school attendance; 182,076, or 78·1 per cent., at State Schools; and 34,190, or 14·6 per cent., at Private Schools. Of the school population between 4 and 15 years—253,893, or 77·4 per cent., were at school; 207,483, or 63·3 per cent., at State Schools; and 46,410, or 14·2 per cent., at Private Schools. 206,265 children attended schools under the Public Instruction Act; 182,076 being of the statutory school age, and 24,533 either above or below it. The mean quarterly enrolment was 181,678, or 88 per cent. of the year's enrolment; and the average attendance was 130,089, or 71·6 of the quarterly enrolment. Of the average enrolment, 69·1 per cent. attended school 70 days or more in the first half-year, and 75·8 per cent.

cent. in the last half-year. The percentage of the population enrolled quarterly and the corresponding percentage in average attendance in 1894 were respectively 14·6 and 10·5, as compared with 15·3 and 10·6 in 1893.

Compulsory clauses of the Act.—During the half-year ended 30th June it was found necessary to take action concerning 4,485 cases in which children failed to attend school for 70 days, as required by law. The parents or guardians of 3,556 were cautioned, and prosecutions were authorised in 729 cases.

For the half-year ended 31st December cautions were sent in 3,120 cases, and in 628 cases legal action was taken.

The default for the half-year ended 30th June amounted to 2·35 per cent. of the average enrolment, and for the December half-year to 2·06.

While it is clear that the Act can be effectively worked in regard to partial attendances at State Schools, fully satisfactory results cannot be obtained in cases of absolute non-attendance. Attention has been pointedly called in previous Reports to the alterations necessary in the compulsory clauses of the Act to enable the Department to remedy this defect.

As stated in last year's Report, the services of School Attendance Officers have been dispensed with, and their functions in the matter of inquiry and prosecution are now performed throughout the Colony by the police. This has proved a more economical arrangement, and has so far worked satisfactorily.

The class of children which the Department has hitherto been altogether unable to reach, through the defects in the Act before alluded to, come more readily under the notice of the police, and are more amenable to their authority than to that of ordinary attendance officers.

It may be mentioned that much of the work done by the police is not represented by any action taken by this Department, for it would appear that, outside the warnings issued from this office, a considerable amount of default is prevented by the activity of the police. There can be no doubt that the increase in the percentage of average attendance to enrolment is largely due to the interest taken by the police authorities in this branch of their work.

SCHOOL FEES.

Owing to the depression considerable difficulty was experienced during the year in obtaining regular payment of school fees. It was found necessary to cancel a large number of debts, and free education was granted during the year to 14,375 pupils in the March quarter, 16,635 in the June quarter, 17,307 in the September quarter, and 18,605 in the December quarter. Legal action for the recovery of arrears was taken in 322 cases.

The

The amount of fees collected in schools, exclusive of High Schools during 1894, was £67,107 5s. 2d., against £68,616 13s. 7d. in 1893. The total amount of fees collected and paid into the Consolidated Revenue was £70,693 8s. 7d., as compared with £73,267 11s. 3d. in the previous year.

INSPECTION.

At the beginning of the year Mr. Inspector Flashman was transferred from the Muswellbrook to the Newcastle District. At a later date Mr. J. M'Cormack retired from the Inspectoral Staff and was appointed to a position on the Teaching Staff of a Metropolitan school. With a view to the curtailment of expenditure the vacancy caused by Mr. Flashman's removal was not filled. A redistribution of schools in the neighbouring districts was made, and the schools to the number of about eighty, formerly in the Muswellbrook District, were apportioned among them.

With this exception there was no change in the Inspecting Staff, and each Inspector had the same district as in the previous year.

Out of a total of 2,719 schools, exclusive of High Schools, no fewer than 2,695 underwent the prescribed examination. The uninspected schools numbering twenty-four were, with few exceptions, either not in existence or closed at the time of the Inspectors' visits to their neighbourhood.

The subjoined table will show how the schools were apportioned to the Inspectors and the amount of inspection done in each district :—

District.	No. of Inspectors.	No. of Schools.	No. of Schools inspected.	No. of Schools inspected twice.	Total No. of inspections.	No. of Schools not inspected.	No. of Pupils examined.
Armidale	4	320	320	29	349	...	11,073
Bathurst	3	253	249	28	277	4	9,362

Drill	136,232	110,449	81
Natural Science	6,177	4,954	80

Character of Pupils' Attainments and Progress in Learning.—142,405 pupils were present at inspection. All were examined in reading, 99 per cent. in writing, 80 per cent. in dictation, 98 per cent. in arithmetic, 41 per cent. in grammar, 41 per cent. in geography, 40 per cent. in history, 96 in Scripture and moral lessons, 94 per cent. in object lessons, 96 per cent. in drawing, 90 per cent. in music, $1\frac{1}{2}$ per cent. in French, 6 per cent. in Euclid, 2·4 per cent. in algebra,

4·8 per cent. in mensuration, 1·7 per cent. in Latin, ·04 per cent. in trigonometry, 82 per cent. (of girls) in needlework, 95 per cent. in drill, and 4·3 per cent. in natural science.

Of the 142,405 pupils examined in reading, 6·6 per cent. were in the alphabet, 22 per cent. were in monosyllables, 31·2 per cent. were in easy narrative, and 40·2 per cent. in ordinary prose. Of 141,978 pupils examined in writing, 38·4 per cent. wrote on slates, and 61·6 per cent. in copy-books or on paper. Of 140,232 pupils examined in arithmetic, 58·6 per cent. were tested in simple rules, 24·9 per cent. in compound rules, and 16·5 per cent. in the higher rules. Of 59,004 examined in grammar, 48·7 per cent. were learning the elementary part, and 51·3 per cent. the advanced part of the subject. In geography, of 58,733 examined, 45·7 per cent. were presented in the elementary portions of the subject, and 54·3 per cent. in the advanced part.

A comparison of some of the foregoing percentages, with the results in corresponding subjects during the previous year, is shown in the subjoined table:—

		1893.	1894.	Increase per cent.	Decrease per cent.
Total number of pupils examined		140,713	142,405	
Percentages of pupils examined in	Reading, who were tested in ordinary prose	39·9	40·2	·3	
	Writing, who wrote on paper	60·0	61·6	1·6	
	Arithmetic, who were tested in the higher rules ...	15·4	16·5	1·1	
	Grammar, who were tested in the advanced portions	53·4	51·3	2·1
	Geography, who were tested in the advanced portions	55·4	54·3	1·1
	History	39·0	40·0	1·0	
	Scripture and Moral Lessons	96·0	96·0	
	Drill	94·0	95·0	1·0	
	Drawing	95·0	96·0	1·0	
	Object Lessons	95·0	94·0	1·0

It will be seen that while reading is taught to all pupils, over 90 per cent. of the children are instructed in writing, arithmetic, Scripture and moral lessons, object lessons, drawing, music, and drill; 80 per cent. learn dictation; 41 per cent. grammar and geography; and 40 history; 82 per cent. of the girls receive instruction in needlework. Other subjects in which the teaching is confined to the fourth and fifth classes range up to 6 per cent.

In respect to the proficiency of the pupils examined, the results show that the proportion of passes, as compared with the work of 1893, was 1 per cent. higher in reading, grammar, and needlework; 2 per cent. in dictation, mensuration, and latin; 3 per cent. in drill. In writing, geography, scripture, object lessons, drawing, music, Euclid, and algebra, the percentage of passes was the same in both years.

The following table summarises the progress in efficiency made in the different classes of schools during the past five years:—

Class of Schools.	Percentage up to or above the Standard.				
	1890.	1891.	1892.	1893.	1894.
Public	88	92	95	95	96
Provisional... ..	56	71	77	84	88
Half-time	69	81	81	84	87
House-to-house	70	81	76	78	80
Evening Schools	100	92	92	100	100
All Schools... ..	81	88	90	92	93

While the percentage of schools satisfying the standard has been 100 per cent. in the case of Evening Schools for both 1893 and 1894, there has been an increase of efficiency over the former year in every other class of school. Public Schools have improved 1 per cent., Provisional, Half-time, and House-to-house 4, 3, and 2 per cent. respectively. These figures indicate very satisfactory work on the part of the teachers.

Vocal Music.—129,374 pupils presented themselves for examination, an increase over the previous year of more than 2,000. Of these, 77 per cent. were found up to or above the standard, a large proportion showing a highly-creditable knowledge of the subject. The Superintendent reports:—"It may safely be stated that the teaching of singing and music in most of our Metropolitan schools is of a very satisfactory character. It is not merely superficial, that is, confined to the singing of a few songs, more or less well done, but the children understand what they are doing, and sing from note instead of by ear. In several of the schools reading at sight is exceptionally good, and in no case has a good mark been given to a class which could not sing at sight, in time and tune, reasonably difficult passages or intervals, frequently in two and three parts."

Discipline.—With few exceptions the schools appear to great advantage as regards punctuality, regularity, cleanliness, order, and government. The Inspectors direct special attention to these features of school management, and are required to report specifically upon each of them. School operations generally are stated to be conducted with order and decorum, the pupils to be subdued and respectful in behaviour, and the teachers to exercise a beneficial personal influence both in and out of school.

Drill.—In this subject, which is so intimately associated with discipline, 136,232 pupils were examined, with results 3 per cent. better than in 1893, 81 per cent. satisfying the standard. Every school in the Metropolitan District was visited and examined in drill. Special instruction was also given weekly by members of the Cadet Staff to the pupils attending the Sydney Boys' and Girls' High Schools.

The students of the Fort-street and Hurlstone Training Colleges received instruction twice a week in school drill, and were examined at the close of the year as to their acquaintance, both practical and theoretical, with the subject. The Metropolitan male and female pupil-teachers were afforded weekly instruction in connection with the Fort-street Saturday classes.

The Superintendent of Drill reports:—"The teachers, recognising the value of drill as an important aid in school management, in addition to its value in the physical development of the pupils, evince great interest in the subject, and only require to be placed in possession of the necessary information as to details to secure their hearty co-operation."

High

High Schools.—The total enrolment at these schools for the year was 611, and the average daily attendance 435, as against 815 and 635 respectively for 1893. The attendance at each school is shown below:—

School.	Total enrolment.	Average quarterly enrolment.	Average daily attendance.
Sydney (Boys)...	237	179	164·8
„ (Girls) ...	217	165	152·3
Maitland (Boys) ...	73	55	49·8
„ (Girls) ...	46	45	42·4
Bathurst (Girls) ...	38	31	26·5
Totals ...	611	475	435·8
Totals for 1893 ...	815	635	568·4

It will be seen that the enrolment has decreased by 24 per cent., and the average attendance by 23. The falling off in the attendance is common to all the schools; and, although chiefly due to the bad times, there can be no doubt that the action taken in 1893 in raising the quarterly fee from two to three guineas contributed also to some extent to the shrinkage.

Each school was thoroughly examined during the year, and was found to be in a satisfactory condition. 435 pupils, or 91 per cent. of the average quarterly enrolment, were present at examination, the percentages of results ranging from 66 to 100 per cent. The average for all subjects was 77 per cent. The measure of success gained by the High Schools at the University Examinations will be seen from the following table:—

School.	No. of Passes Junior Examination.	No. of Passes Senior Examination.	No. of Passes Matriculation Examination.
Sydney (Boys) ...	34	2	23
„ (Girls) ...	27	4	12
Maitland (Boys) ...	12	...	11
„ (Girls) ...	4	1	2
Bathurst (Girls) ...	4
Totals ...	81	7	48

Of those who matriculated, 26 qualified at the junior and 2 at the senior examination. Silver medals were awarded to High School pupils at the senior examination for proficiency in European history, and at the junior for arithmetic, algebra, geometry, and freehand and geometrical drawing.

The total expenditure on High Schools was £8,076 19s. 0d., and the amount received from fees £3,586 3s. 5d. The actual cost to the State was, therefore, £4,490 15s. 7d., or at the rate of £7 7s. 0d. per head of the total enrolment, as against £4 7s. 10d. in 1893.

State Scholarships and Bursaries.—At the examinations held under the Scholarship and Bursary scheme, 90 candidates were successful. Of these, 25 males and 31 females obtained scholarships for

for High Schools and Superior Schools, 25 males and 9 females bursaries for High and Superior Schools, and 5 males and 3 females University Bursaries.

Of the 56 successful competitors for High School Scholarships, 15 boys and 16 girls have since attended the Sydney High Schools, 9 boys and 10 girls the Maitland High Schools, 5 girls have attended the Bathurst High School, 1 boy Superior School. Of the 34 successful competitors for State School Bursaries, 9 boys and 9 girls have attended the Sydney High Schools, 10 boys and 1 girl the Maitland High Schools, 3 boys Superior Schools, and 2 boys the Sydney Grammar School.

Ten University Bursaries are available annually. Eight were obtained by High School pupils, 5 boys and 3 girls, the other two not being awarded.

The total number of candidates examined for admission to the High Schools was 678, of these 654, or 94·8 per cent., were successful.

Superior Schools.—Only one school—Inverell—was added to the list of Superior Schools during the year, thus making the total 96, comprising 241 departments. The number of pupils enrolled at these schools for the December quarter of the year was 64,969, the average attendance being 48,715.

Superior Schools were fairly successful at the University Examinations, having passed 191 candidates, viz., 1 senior and 190 juniors. Other Public Schools not classed as Superior obtained 6 senior and 60 junior passes. These give a total of 257, 27·7 per cent. of the aggregate number. If the High Schools be added, the passes from schools under the Department represent 37·2 of the whole.

EVENING PUBLIC SCHOOLS.

Ten applications for the establishment of Evening Schools were received; 8 were granted, and 2 refused. The total number of schools in operation was 14, but 2 collapsed before the end of the year. On 31st December there were only 12 schools in existence, having an enrolment of 326, with an average attendance of 174. Although these numbers are so small, they are a considerable advance upon the figures for 1892. The number of schools has increased from 6 to 12, and the enrolment and average attendance are higher by 116 and 72 respectively. A probable reason for the small measure of success attending these schools is that the class of persons for whose improvement they are designed find it more advantageous to attend instead one or more of the classes established in connection with the Technical College, which bear directly upon the trades or occupations in which they may be employed.

HOUSE-TO-HOUSE SCHOOLS.

Of 12 applications received for these schools, 6 were granted, 6 refused. There were 71 schools in operation during the year, of which 80 per cent. were reported to be up to or above the standard.

TECHNICAL

TECHNICAL EDUCATION IN PUBLIC SCHOOLS.

Drawing.—136,628 pupils were examined in this subject, of whom 104,238, or 76 per cent., satisfied the standard. All the schools in the Metropolitan District were visited, 35,546 pupils being present at examination, namely, 11,388 boys, 10,329 girls, and 13,829 infants. Of these, 35,546 were found to be up to or above the standard, showing 3·5 per cent. better results than in the previous year. The Superintendent of Drawing reports:—“The increased number of infants working on the Kindergarten system makes it possible to bring a larger percentage up to a satisfactory standard, and accounts for the great improvement. Greater attention to class-teaching, and the improvement in practical geometry have effected, I think, the advance noticeable in the passes among the boys. My relations with the teachers have been harmonious, and the growing interest manifested by them in the subject is shown by the frequent requests made for visits of instruction.”

The instruction given by the teachers at the High Schools is reported to be painstaking and conscientious, and “to maintain the work at a higher level than might reasonably be expected from non-professional teachers of the subject.”

Details of the progress made by the students in training, and the pupil-teachers, will be found in the Superintendent's Report, Appendix XIII.

Manual Training.—The workshops in existence, numbering 7, were the same as in 1893. During the year arrangements were made for the instruction of pupils at the Cleveland-street Superior School at the Technical College. The total enrolment of the classes, including training students, was 420.

Cookery.—Classes were reopened at Grafton and Glen Innes, and a new class was established at West Maitland. Otherwise the schools in operation were the same as in 1893. The total enrolment was 1,485, the average attendance 1,097, and the total number of attendances 36,437. The number of schools sending pupils was 43, in addition to which instruction in cookery was given at Hurlstone Training College, Sydney and Bathurst Girls' High Schools, and at the Industrial School for Girls.

The Directress reports that the school examinations yielded very encouraging results, that the centres were found to be fully equipped and in a complete state of efficiency, that the instruction has been thorough, and the work of the teachers marked by zeal and diligence. Her report appears as Appendix XVI.

Needlework.—The Directress of needlework testifies to the continued diligence and attention to duty of the teachers of sewing. As regards the larger schools she reports that, “the successful results in the upper classes are most marked; while in the lower sections, owing to the even system of instruction, and the attention and painstaking

taking efforts of the work-mistresses and the individual teachers of each class, the work is steadily progressive, the general attainments for both upper and lower classes varying from very fair to excellent." Dressmaking and cutting out received increased attention during the year. [Appendix XV.]

50,339 female pupils were examined, of whom 44,344, or 88 per cent. passed the standard.

PUBLIC SCHOOL SAVINGS BANKS.

Seven new banks were opened during the year, the total number now in operation being 631. The amount deposited was £9,638 19s. 11d., and the sum withdrawn £9,830 14s. 7d., showing, as compared with 1893, a decrease in deposits of £273 9s. 10d., and in withdrawals of £1,312 12s. 4d.

The total amount to the credit of the school banks on 31st December was £6,049 0s. 11d., a decrease upon the previous year of £191 14s. 8d. The amount withdrawn for deposit to the credit of children's own accounts in the Government Savings' Bank was £2,381 1s. 7d., making a total of moneys so withdrawn since 1887 of £25,229 14s. 2d.

TEACHERS.

Other than probationary pupil-teachers, no persons from outside the service received employment as teachers during 1894. All vacancies were filled by the appointment of trained and classified teachers, or, in the case of small schools, of pupil-teachers who had completed their full course but had failed to secure admission to the Training School. The number of teachers of all classes whose connection with the Department ceased during the year was 177. Full information is given in the following table as to the enrolment and classification of the teaching staff.

	I A.		I B.		II A.		II B.		III A.		III B.		III C.		Unclassified.		Totals.		Grand Total.

Work-mistresses	71	71
High School Teachers																14	16	30
Total Teachers of all ranks																	2,294	2,159	4,453

The total number of teachers is less by 74 than the number employed in 1893; but leaving out High School teachers, work-mistresses, and pupil-teachers, an increase of 4 is shown. Of primary school teachers, 58·8 per cent. were males and 41·2 per cent. females; 81·7 were classified teachers and students in the Training Colleges, and 18·3 per cent. were unclassified. It must not be understood, however, that the latter class have received no training: They are, for the most part, young and active persons, male and female, who have served their term of pupil-teachership of not less than four years, but, as before stated, have in the final competitive examination been unsuccessful in obtaining a place among the limited number admitted to the Training Colleges. Of classified teachers 8·3 per cent. were in Class I, 35·6 in Class II, and 56·1 in Class III. These percentages are practically the same as for 1892 and 1893.

Pupil-teachers.—The number of pupil-teachers employed was 1,076, consisting of 351 males and 725 females. They were classed:—First class, 439; second, 314; third, 214; fourth class, 71; probationers, 38.

During the year 57 applicants for appointment to the office of pupil-teacher were examined, of whom 34 were accepted. Of those awaiting employment 62 were appointed to schools.

Fort-street Training School.—The enrolment of students for the year was 54, 29 being first-year and 25 second-year students. Thirty held full scholarships, 21 half scholarships, and 3 who failed to obtain a scholarship attended at their own expense. In addition to these, 4 students who had graduated in the previous December remained at the Training School in order to attend the Honours Examination in March, 1894.

All students, matriculated and unmatriculated, attended the Sydney University, and went through the course of study for first, second, or third year as prescribed by the Senate. They attended the Training School every afternoon for instruction in professional subjects and in the principles and practice of teaching and class management. The following tables give particulars of the examinations to which the students were subjected and of the results:—

Nature of Examination.	Number of Students.	
	Seniors.	Juniors.
University, 1st year... ..	11	27
„ 2nd year	14
„ 3rd year	1
Special Training School Examinations	25	27*

* One absent through illness.

The number who passed was as follows :—

Nature of Examination.	Seniors.	Juniors.
University, 1st year... ..	7	14
„ 2nd year	10
„ 3rd year	1
Special Training School Examinations	25	27

Instruction in manual training was also given during the session. The following table shows the results of the examination in this subject of the first and second year students in December last :—

	Nature of Pass.			Total.
	Honours.	1st Grade.	2nd Grade.	
First year students	2	2	23	27
Second year students	2	1	10	12
Totals	4	3	33	39

Saturday Classes.—The Saturday and Wednesday classes for pupil-teachers were regularly carried on during 1894, but were permanently closed at the end of the year, inasmuch as the expense of continuing them is not now warranted. When established, these classes were designed for the advancement of pupil-teachers, in Sydney and the country centres, in French, Latin, music, and drawing, subjects of which, at that time, few principal teachers had the necessary knowledge. As the majority of teachers, however, are now fully qualified to give instruction to pupil-teachers in these subjects, there is no longer any sufficient reason for the continuance of these special classes. By their abolition, moreover, a considerable saving of expenditure will be made through the withdrawal of the allowances paid to the teachers in connection with them; and all pupil-teachers will be placed upon an equal footing as regards preparation for their annual examinations.

Hurlstone Training School for Female Students.—The enrolment for 1894 was 50, 25 seniors and 25 juniors. Thirty held full scholarships, and 20 half-scholarships. Thirteen students were successful at the Matriculation Examination, and attended the first year course of lectures at the University. Three who failed to matriculate also attended the day lectures as non-matriculants. Ten seniors, who

did not go to the University, and 24 juniors studied at the Training School with a view to examination for classification at the end of the year.

The arrangements for the practical training of the students in school-work remained the same as described in last year's Report. Their health is reported by the Lady Principal to have been very good, and their conduct highly exemplary.

In the following tables particulars are given as to the nature of the examinations undergone by the students, the number who attended, and the results.

Nature of Examination.	Number of Students.	
	Senior.	Junior.

University—First year	11	1
Special Training School Examination	10	24
	21	25

Teachers' Examinations.—The total number of examinees of all classes during the year was 2,508. The percentage of passes of teachers was 59·0, and of pupil-teachers, 86·2. The total number of pupil-teachers reported on was 1,061, as against 1,055 in 1893. Of the first class pupil-teachers examined in December for admission to the Training Schools, the male examinee who succeeded in obtaining the highest number of marks was Mr. William Robertson, of the Parramatta North Superior Public School, while Miss Annie Blair, of the Jesmond Public School, headed the list of female pupil-teachers. These pupil-teachers will be presented with the Jones Memorial Medals, which are awarded annually to the candidates, male and female, who show the greatest proficiency at the examination for admission to the Training Schools.

The

The following table furnishes the results of the several examinations in detail:—

Teachers' Mutual Assurance Association.—Four members of this Association died in 1894, and in each case the claim, amounting to between £70 and £80, was promptly met. Since the formation of the Association in 1869, the average annual death-rate has been only 1·2 per cent. Taking the years 1883 to 1894 inclusive, the amount paid annually by each member, by way of premium, has averaged about 24s., or 1½ per cent. on the sum payable at death.

The entrance fee for members joining between the ages of 30 and 40 years is now £1 1s. for each year over the age of 30; while applications for membership from persons over 40 years of age are dealt with on their merits. Ordinary members continue to pay a call of 5s. on the death of any of their number, but teachers joining the Association under 25 years of age only pay 3s., and between the ages of 25 and 30, 4s. per call.

LOCAL SUPERVISION.

Three sub-districts were formed during 1894, and a Public School Board appointed in each case. In addition to the appointment of these Boards, 58 members were added to the Board already in existence. The total number of Boards in operation at the end of the year was 286, on 53 of which ladies, numbering 112, held seats. The resignations of 53 members were accepted.

SCIENTIFIC AND TECHNICAL EDUCATION.

Early in the year Mr. F. Bridges, Superintendent of Technical Instruction, was appointed to the office of Chief Inspector in connection with Primary Education. Mr. J. H. Maiden was promoted to the office of Superintendent, but it was arranged that Mr. Bridges should continue to exercise supervision, and to afford Mr. Maiden the benefit of his counsel and experience.

The total number of classes in operation during 1894 was 191, distributed as shown hereunder :—

	Under salaried Teachers,	Teachers paid fees only.	Total.
Sydney Technical College	59	17	76
Suburban classes	9	7	16
Classes in country towns	76	11	87
Classes from Public Schools	8	4	12
	152	39	191

The enrolment of students was as follows :—

Sydney Technical College	2,956
Suburban classes	508
Classes in country towns	2,500
Classes from Public Schools	579
	6,543

Deducting from the total enrolment all cases where students entered for more than one class, the number of individual students was 4,928, the weekly attendance being 3,182·7.

The number of students examined, including Public School pupils tested in manual training, was 2,457, of whom 1,644, nearly 70 per cent., satisfied the Examiners. The Examiners report that the standard of work generally was well maintained, and was, in many cases, superior to that of former years.

The Technological Museum, Sydney, and its branches in the country, continued to attract the public interest. In the case of the Newcastle, Goulburn, and West Maitland branches, the attendance was some thousands in advance of that for 1893. The appended table gives the attendance at the several museums :—

Technological Museum, Sydney	89,695
Branch Museum, Newcastle	52,911
„ „ Bathurst	23,770
„ „ Goulburn	16,437
„ „ West Maitland	14,611
Total	197,424

The

The teaching staff consisted of 89 persons, viz.:—10 lecturers in charge of departments, 5 resident masters in charge of branch schools, 37 salaried teachers, 15 assistant teachers, and 22 teachers in charge of classes to whom no salary is paid. Lectures continue to be given in country centres upon geology and mineralogy, horticulture, apiculture, and agriculture. Keen interest is shown in these subjects by the large audiences which attend the lectures.

The total expenditure on technical education during 1894, including £4,888 19s. 6d. spent on the Technological Museum, amounted to £24,492 17s. 3d. Of this sum £21,214 10s. 3d. was a Parliamentary grant, and £3,278 7s. represents the fees paid by students.

PUBLIC SCHOOL CADET FORCE.

Interesting details as to the progress of the Cadet Force will be found in the report of the Officer Commanding. [Appendix XIX.]

For the last quarter of 1894 the total enrolment of the force was 3,819. The Officer Commanding reports that this number could readily have been increased, but that in view of the need for strict economy in the expenditure—the Cadet Vote being the smallest for several years—it was deemed advisable not to attempt too much. “Special efforts were, however, made to extend and improve the school drill by making it as nearly as possible meet cadet requirements, and, in consequence, many hundreds of boys were actually drilled as cadets who were not counted as such. The members of the Cadet Staff gave instruction in company drill and drill with arms to the upper classes of the schools visited by them for cadet purposes, drill rifles having been issued to these schools to enable them to fully meet the drill standards.” This plan has now been extended to all Metropolitan and several Suburban Schools.

The amount voted for Cadet purposes for 1894 was £5,511, against £5,869 in 1893. In 1892 the vote was £11,818. The total expenditure amounted to £4,755 8s. 10d.

FINANCE.

The sum available in 1894 for expenditure under the Public Instruction Act was £662,300 7s. 11d., made up as follows:—

	£	s.	d.
Balance from 1893	11,095	7	11
Amount received from Treasury on account of Vote for 1893	12,835	0	0
Amount received from Treasury on account of Vote for 1894	635,000	0	0
Amount received from Loan Vote—(Land)	2,000	0	0
Amount of Minister's salary	1,370	0	0
	<u>£662,300</u>	<u>7</u>	<u>11</u>

The total outlay was £661,054 15s. 5d., namely, £73,791 13s. 1d. on school premises, and £587,263 2s. 4d. on maintenance of schools, administration, &c. The balance at the close of the year was £1,245 12s. 6d.

General

General Statement of Expenditure for 1894.

I. On School Premises :—

	£ s. d.
For sites, new buildings, additions, repairs, &c.	73,791 13 1

II. On Maintenance of Schools, &c. :—

1. Teachers' salaries and allowances in Primary Schools	£ s. d.
Other maintenance expenses in such schools ...	505,794 4 10
2. High School salaries and maintenance expenses	8,076 19 0
State Scholarships and Bursaries	2,240 18 3
3. Administration, including Training Schools and enforcement of school attendance	48,818 6 0
	587,263 2 4
	£661,054 15 5

The amount of school fees collected and paid into the Consolidated Revenue was £70,693 8s. 7d., namely, £67,107 5s. 2d. from Primary Schools, and £3,586 3s. 5d. from High Schools. Deducting this sum from the total expenditure, there will remain £590,361 6s. 10d. as the net school expenditure derived from State funds, showing a decrease for the year of £51,590 11s. 6d. as against the like outlay for 1893, and £100,509 5s. 7d. as compared with 1892.

The total expenditures under the following heads in 1891, 1892, 1893, and 1894, were :—

	1891. Expenditure.			Per- centage of total expen- diture.			1892. Expenditure.			Per- centage of total expen- diture.			1893. Expenditure.			Per- centage of total expen- diture.			1894. Expenditure.			Per- centage of total expen- diture.			Decrease in expenditure as compared with 1893.

* Increase.

It will be noticed that, with one exception, every item shows a curtailment of expenditure as compared with similar outlay for 1893, ranging from £190 for the Examiner's Branch to £39,000 for school premises. Comparison with 1891 and 1892 makes the economy practised by the Department still more apparent. The amount set down for General Management would appear to indicate that the outlay for 1894 was greater than in the previous year, but this is not so. Owing to the amalgamation of the clerical staff of the Chief Inspector's

Branch

Branch with that of the Head Office, the salaries of the officers which formerly were included under the Chief Inspector's expenditure are now charged against the General Management. Instead of increasing expenditure, the alterations made in the office arrangements have effected a material saving. Another reason for the increase in the item is the fact that, for the first time, the Minister's salary is included in the general statement of expenditure.

Of the total year's expenditure of £661,054 15s. 5d., nearly 11·2 per cent. was spent on school premises, 80·1 per cent. on the maintenance of Primary Schools, 7·4 per cent. on administration and inspection (including the training of teachers and the enforcement of school attendance), and 1·3 per cent. on High Schools.

The subjoined table exhibits the number of schools, the number of pupils, and the State expenditure for each of the last five years:—

Year.	Number of Schools.	Number of Pupils.	The State Expenditure.				
			On School Premises.	On Maintenance of Schools, including Administration, &c.	Total.	Less School Fees.	Net State Expenditure.
			£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.

Before concluding this Report it is with deep regret that I have to record the loss sustained by the Department through the death in April last of Mr. Edwin Johnson, who had for a period of ten years occupied the responsible office of Under Secretary. In the discharge of his official duties Mr. Johnson displayed, among other high qualities, conspicuous administrative ability; he thoroughly identified himself with the progress and welfare of the Department, and earned the esteem and good-will of all with whom he was brought into contact.

Mr. J. C. Maynard, Chief Inspector of Schools, was selected to fill the position of Under Secretary rendered vacant by Mr. Johnson's death; while Mr. F. Bridges was transferred from the Superintendency of Technical Education to the Chief Inspectorship.

Information is furnished in the following summaries respecting educational establishments connected with this Department, but not carried on under the provisions of the Public Instruction Act:—

THE SYDNEY UNIVERSITY.

The number of students attending lectures in 1894 was 592, being an increase of 6 on the attendance for the previous year. Of these, 110 were women students.

Of 211 who presented themselves at the ordinary Matriculation Examination, 125 were successful. In addition to these, 9 passed the entrance examination for Medicine and Science, 26 the Articled Clerks' Examinations, 31 the Senior Public, and 120 the Junior Public Examination. Thus the total number qualified for matriculation during the year was 285. For the Senior Examinations, 137 candidates presented themselves, and 103 passed. For the Junior Examination, 1,494 candidates presented themselves, and 824 passed. The number of Professors and Lecturers on the University Staff during 1893 was as follows:—14 professors and 34 lecturers. Of these, 7 professors and 6 lecturers were paid out of the Challis Fund.

The year's expenditure was £33,539 9s. 10d., of which sum £14,800, or about 44 per cent., was granted by the Government. The year's total income was £33,490 8s. 4d.

THE SYDNEY GRAMMAR SCHOOL.

The total enrolment of pupils for 1894 was 466, of whom 165 were under and 301 over the statutory age of 14 years. Compared with 1893 the enrolment has decreased by 9, and the pupils over 14 years by 11, while those under that age have increased by 2. 150 new pupils were admitted, being 20 more than the number for 1893. Of these, 85 were under and 65 above the statutory age. The mean quarterly enrolment was 379, and the average attendance $362\frac{1}{2}$, showing a decrease from last year of 18 and 10 respectively. In connection with the University Examinations the following results were obtained by pupils of the Grammar School:—Junior Public Examination, 29 passed; Senior Public Examination, 5 passed; Matriculation, 32 passed. At the Matriculation Examination, pupils of the Grammar School gained the Cooper Scholarship for Classics, first-class honors in Latin, Greek, French, German, and Mathematics, and second-class honors in French and Greek. At the Senior Examination the University Prize, John West Medal, and Graham Prize Medal, as well as Medals for Ancient History, Arithmetic, Geometry, and French; at the Junior Examination, Medals for English and Geometry. The income of the School for the year amounted to £8,611 16s. 2d., comprised of:—

State grants	£2,299	19	2
School fees	6,206	11	0
Other sources	105	6	0
				<hr/>		
				£8,611	16	2

The year's expenditure reached the sum of £8,445 1s. 5d. The cost per pupil in average attendance was £24 18s. 11d., of which £24 14s. 2d. represented the cost for tuition, and 4s. 9d. for buildings, &c. The cost per pupil in 1893 was £24 6s. 4d. The expense to the State was £6 6s. 10 $\frac{3}{4}$ d. per head of the average attendance as against £6 3s. 8d. for 1893.

FREE PUBLIC LIBRARY.

The total number of volumes in the Library at the end of 1894 was 104,140. 131,531 persons visited the reading rooms as against 151,004 in the previous year; 121,332 persons visited the newspaper room, opened for the first time in February last; while 77,568 visits were made to the Lending Branch. The total number of visits therefore paid to the institution during the year was 330,431, as against 216,089 in 1893. Twenty-eight persons were employed on the staff. The year's expenditure is shown hereunder:—

On buildings, repairs, &c. (under Government Architect)	£94	10	2
On books	2,486	18	8
On salaries	4,683	5	6
On maintenance	1,212	18	2
				<hr/>		
				£8,477	12	6

THE AUSTRALIAN MUSEUM.

The number of visitors to the Museum was—On week-days, 86,246; on Sundays, 34,324; total, 120,570. As compared with 1893, this shows an increase of 8,243 visitors. Twenty-three persons were employed in the institution. The Trustees report that the year's expenditure was as given below:—

On salaries and allowances...	...	£3,649	3	5
On specimens (purchase, collection, and carriage)	91	3	0
On books	149	0	8
On catalogues	294	16	6
On cases and bottles	636	11	0
Miscellaneous	677	12	0
		<hr/>		
		£5,498	6	7

NATIONAL ART GALLERY.

During the year 273,757 visits to the Gallery were registered, being a daily average of upwards of 750. The attendance on Sundays averaged, 2,011, on week-days, 547. Since 1880, three and a quarter millions of visits have been recorded. Five persons were permanently employed, with three extra assistants on Sundays and holidays.

The following is a statement of the year's expenditure:—

For works of art purchased	£2,688	18	0
For maintenance (frames, freight, repairs, insurances, &c.)	396	12	11
For salaries	1,231	2	8
		<hr/>		
		£4,316	13	7

NEW SOUTH WALES INSTITUTION FOR THE DEAF AND DUMB
AND THE BLIND.

The number of inmates during the year was 86 as compared with 79 for 1893. Of these 70 were under and 16 were over 14 years of age. The new admissions were 15, all of whom were under 14 years. Eight inmates were discharged—3 under 14 years, and 5 over that age. The income was:—

From State grants	£450	0	0
From other sources	5,247	16	9
		<hr/>		
		£5,697	16	9

showing an increase of £1,112 13s. 4d. on the previous years' receipts.

The expenditure for the year was as follows:—

For maintenance	£1,655	15	3
For salaries and wages	2,136	18	5
		<hr/>		
		£3,792	13	8

INDUSTRIAL

INDUSTRIAL SCHOOL FOR GIRLS, PARRAMATTA.

The number of girls enrolled during 1893 was 165, of whom 79 were under and 86 above the age of 14 years. There were 55 new admissions—31 under and 24 over 14 years old. Forty-eight inmates were discharged during the year.

The number remaining in the institution at the end of the year was 117. Compared with 1893 the enrolment showed an increase of 31, the new admissions of 9, and the discharges of 17. The expenditure for the year was:—

For maintenance	£1,714	1	1
For salaries	1,082	16	0
				<hr/>		
				£2,796	17	1

Calculated on the enrolment, the expenditure was equal to £16 19s. per head.

In the laundry, 171,132 articles of clothing were washed, and either mangled or ironed; of this number 47,614 pieces were done up for the officers and students at Hurlstone Training School, at an estimated value of £449, and 123,518 pieces for the Industrial School itself, at a saving of £883 1s. 4d. In the sewing-room the work done is valued at £99 1s. 6d., and consisted of plain sewing, darning, cutting-out, and dressmaking. The cookery classes have accomplished good work during the year.

The Superintendent states that the health of the inmates was, as a whole, very good, that very few have given any trouble, and in cases when it did occur the girls were new to the Institution. "There were only a few apprentices sent out this year; the reports upon them by their masters are very good indeed in each case. Of the 21 girls finally discharged on attaining the age of 18 years, 9 are known to be leading respectable lives, 7 are known to be leading bad lives; in three cases it is doubtful how they live, and in two cases it is unknown what has become of them. * * * With one exception, all these girls are well able to earn a good living; some of them are excellent laundresses and cooks."

NAUTICAL SCHOOL-SHIP "SOBRAON."

In this institution, 501 boys were enrolled, 260 of these being under and 241 over 14 years of age; 198 were new admissions, of whom 117 were below and 81 above the age stated. The number discharged was 152, made up in the following manner:—

For apprenticeship	76
On attaining 18 years of age	3
Transferred to Boarding-out Officer	47
Sent to hospitals	1
Released by order of the Governor-in-Council					25
					<hr/>
					152

Three

Three hundred and forty-nine boys remained on the "Sobraon" at the end of the year. The figures for 1894, as compared with those of 1893, show an increase of 53 in the total enrolment, while there is an increase of 28 and 7 respectively in the number of new admissions and of boys discharged.

The total expenditure was £9,160 5s. 8d., made up as follows:—

For maintenance	£6,334	5	8
For salaries	2,826	0	0
	<hr/>		
	£9,160	5	8
Deducting parents' contributions to the Treasury	245	14	0
	<hr/>		
Net cost to the State . . .	£8,914	11	8

Calculated on the net expenditure, the cost to the State per head of the enrolment was £17 15s. 10d.

Captain Neitenstein reports that the conduct of the boys was good, that no deaths took place, and there was little sickness. Satisfactory reports were received concerning over 90 per cent. of the lads apprenticed, now numbering more than 400. Three hundred and eighty-six former inmates who had finished their apprenticeship either visited the ship or wrote to the Commander during the year.

J. GARRARD,

Minister of Public Instruction.

Department of Public Instruction,
Sydney, 30th March, 1895.

APPENDIX XII.

THE CHIEF INSPECTOR'S REPORT WITH ITS ANNEXES.

For the first time in the history of the Department, the schools in operation were fewer than in the preceding year.

Of the 2,515 schools in operation in 1893, 104 were closed during or at the end of that year, leaving 2,411 in existence at the beginning of 1894. New schools to the number of 92 were established in 1894, making a total for the year of 2,503, a decrease of 12 upon the roll for 1893.

This decrease arises from two causes: first, the Colony is now so well supplied with schools that applications for the establishment of new ones have been steadily diminishing for some years; and second, a number of schools had to be closed, as the minimum attendance of pupils could no longer be maintained. The depressed condition of the Colony, and the consequent dearth of employment in many of the country districts, together with the failure of several mining industries, drove families into Sydney and the larger towns, and thus left schools with very few pupils, and, in some instances, with none. In some of the older settled districts, the South Coast for example, the school population is gradually disappearing. The young people have grown up, and are forced to seek homes and employment elsewhere; only the old people are left.

Wherever practicable, the failing schools have been reduced to half-time: though this action does not lessen the number of schools, it causes only one teacher to be employed, where previously there had been work for two. No school has been finally closed until it has been found impossible to devise any justifiable means for keeping it open.

The decrease in the number of schools has not led to any diminution in the number of pupils in ordinary attendance. As will be seen from another part of this report, the Inspectors examined 142,405 pupils, about 1,700 more than in 1893, and the greatest number yet examined in any year. This, too, was in spite of the fact that all children under six years of age were excluded from the schools during the period the inspections were held.

The roll of schools for the last four years stood thus:—

Year.	Public.	Provisional.	Half-time.	House-to-house.	Evening.	Total.
1891	1,697	349	300	92	14	2,452
1892	1,708	348	341	85	15	2,497
1893	1,700	347	369	90	9	2,515
1894	1,667	302	449	71	14	2,503

Arranged in classes according to the average attendance at the end of the year, they are:—

	Class I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Small Unclassified.	Total.
1891	35	35	20	47	118	197	200	309	668	290	533	2,452
1892	38	34	21	54	117	195	222	315	665	283	553	2,497
1893	38	37	24	53	116	205	208	322	724	227	561	2,515
1894	38	36	23	64	116	209	206	311	762	209	529	2,503

The most noteworthy feature in this return is the great increase in the number of Half-time Schools.

Accommodation.

At the close of 1893 there was accommodation for 229,004 pupils. During 1894, 2,366 additional places were provided, raising the total accommodation to 231,370 places. As a whole, the seats provided are more than sufficient for the number of pupils enrolled, though there are always a few schools that are temporarily overcrowded.

The following table shows the accommodation in each district:—

District.	Number of places at end of 1894, reckoned at 8 square feet for each child.	Number of places at end of 1894, reckoned at 100 cubic feet of air space for each child.
Armidale	18,605	17,062
Bathurst	16,133	16,076
Bowral	14,767	13,362
Goulburn	18,224	15,855
Grafton	17,955	17,850
Maitland	24,482	26,190
Metropolitan	49,477	62,781
Submetropolitan	26,421	26,087
Wagga Wagga	23,169	22,528
Wellington	13,426	13,579
Total	222,659	231,370

The school buildings generally are in very fair condition, and are properly lighted and ventilated. The Minister's order early in 1893 that £30,000 of the vote for school buildings was not to be expended threw a heavier charge upon the 1894 vote.

All the schools are adequately supplied with necessary furniture and apparatus. The grant for books, slates, ink, pens, &c., is made yearly, and is, if teachers are fairly careful, quite sufficient. If, from special circumstances, as an influx of new pupils, the stock runs short, a supplementary grant is made. On no account is the efficiency of a school permitted to suffer from want of needful working materials, even though such want may arise from the carelessness of the teacher. It is part of the duty of each Inspector to see that the schools under his supervision are adequately equipped and that the teachers take proper care of the school buildings, furniture, and apparatus. Complaints have sometimes been made as to the scarcity of maps and diagrams in the smaller schools. It must be admitted that the small schools are not liberally supplied, nor can they be, without largely increasing the expenditure. The smaller schools are not only very numerous, but in proportion to the number of pupils are the most expensive to maintain. A grant of only £1 worth of maps and diagrams to each small school would mean an expenditure of £2,000, an expenditure that could not be incurred without a corresponding increase of the vote for supply of school materials.

Applications for weather sheds are frequent. My experience teaches that these structures are not worth the money spent upon them. A wide verandah would afford more suitable shelter to the pupils, and at the same time serve as a protection to the school building. Teachers should allow the pupils to stay in the school-room during inclement weather. If this were done the demands for weather sheds would be fewer. Many teachers have devoted considerable attention to the cultivation of shade trees, and have thereby not only provided protection for the pupils from the hot sun, but have also much improved the appearance of the school grounds. A bare playground is a very displeasing sight.

It is much to be regretted that the playgrounds of our schools, especially in the Metropolitan and Newcastle districts, are too small to allow full scope for out-door games. Some years ago action was taken to enlarge school playgrounds, but the high price of land put the two districts named quite out of consideration. The playgrounds are made as serviceable as possible. In many cases tennis courts have been formed for the use of the girls. The teachers are to be commended for their action in this matter, as girls have very few games or exercises suitable for the open air.

The

The Inspectors are now required to attend to the building of small country schools and the carrying out of ordinary repairs and improvements. The intimate knowledge of the various localities possessed by these officers has been of great advantage, and has enabled the Department to get work done expeditiously and cheaply.

The work done under the supervision of the Inspectors consisted of:—

	£	s.	d.		
50 new schools	} total cost...	3,462	9 9		
14 additions to schools					
2 new residences				556	15 0
15 weathersheds				415	4 6
748 buildings repaired				6,724	5 0

Information respecting the larger and more costly works will be found in the Architect's report.

Attendance.

The gross enrolment of pupils in 1894 was 234,392. Deducting 12 per cent. for multiple enrolments, the number of individual pupils on the books of the schools was 206,265. The following table gives the enrolment and average attendance for each quarter of 1893 and 1894, together with the rates of increase or decrease:—

Quarter.	Enrolment in 1893.	Enrolment in 1894.	Increase or decrease for 1894.	Average daily attendance for 1893.	Average daily attendance for 1894.	Increase or decrease in average attendance for 1894.	Percentage of increase or decrease of enrolment.	Percentage of increase or decrease of average attendance.
March	189,479	181,159	Decrease, 7,620	132,799·5	123,605·0	Decrease, 9,194·5	Decrease, 4·0	Decrease, 6·9
June	189,587	182,145	Decrease, 7,442	134,320·4	134,301·6	Decrease, 18·8	Decrease, 3·9	Decrease, 0·1
September	186,658	181,847	Decrease, 4,811	124,748·9	128,237·5	3,488·6	Decrease, 2·5	2·7
December	179,587	180,864	1,277	121,422·1	134,213·6	12,791·5	·71	10·5
Average	186,327	181,678	128,322·7	130,089·4

The percentage for each quarter was:—

Quarter.	Enrolment.	Average attendance.	
		Number.	Percentage.
March	181,859	123,605·0	67·9
June	182,145	134,301·6	73·7
September	181,847	128,237·5	70·9
December	180,864	134,213·6	74·2
Year's average	181,678	130,089·4	71·6

Compared with 1893 there is a decrease in the gross enrolment of 4,559; on the average quarterly enrolment, of 4,649, and an increase on the average daily attendance of 1,766·7. The attendance is still lower than in 1892. The exclusion of children under six years of age fully accounts for the falling off in numbers. Now that the age limit has been lowered to five years a large increase, both in enrolment and attendance, may be confidently looked for in 1895.

The returns for the December quarter, during which fine weather prevailed, shows how largely the attendance of pupils at school is affected by the weather. Though the enrolment was about 1,000 below, the average was 6,000 above the returns of the previous quarter, and nearly 13,000 above the attendance for the corresponding quarter of 1893.

Compulsory Clauses of the Act.

From the returns furnished by the teachers it appeared that, during the half-year ended 30th June, 32,553 pupils failed to attend school for the 70 days required by law. The explanations concerning 28,268 were accepted, the parents of 3,556 were cautioned, and legal action was taken in 729 cases.

For the half-year ended 31st December, the defaulters numbered 24,081. Satisfactory explanations were furnished regarding 20,333, cautions were sent in 3,120 cases, and the parents or guardians of 628 were prosecuted.

It must, I think, be admitted that the Compulsory Clauses have had very little, if any, effect upon the class they were intended to benefit. In Sydney, the wharfs, public parks, &c., may be seen crowded with children at all hours of the day. In the afternoon, the streets swarm with boys selling newspapers. In both town and country, parents keep their children at home to work. In some places, notably in dairying districts, the children are almost slaves to their parents.

Cases of insufficient attendance at school can always be supervised by teachers, but the defects in the Act, that have been repeatedly pointed out, prevent the Department from adequately coping with cases of absolute non-attendance. It is hoped that, now the Department has the co-operation of the police, some means will be found by which the law will be brought to bear upon those parents who take no steps to secure an elementary education for their children.

Cases of Free Education.

The wide-spread distress has been manifested by the number of applications for Free Education and for cancellation of debts on account of school fees.

Free education was granted to 14,375 pupils in the March quarter, to 16,635 in the June quarter, to 17,307 in the September quarter, and to 18,605 in the December quarter.

Debts to the amount of about £2,000 were cancelled, as it was manifest that the parents were really too poor to pay.

In view of these facts it is not surprising to learn that the receipts from Public School Fees fell from £73,267 11s. 3d. in 1893 to £70,693 8s. 7d. in 1894.

Inspection.

The Inspectorial Staff consists of 9 District Inspectors and 25 Inspectors, besides the Chief Inspector and the Deputy Chief Inspector; this is one less than for several years. A vacancy in the Muswellbrook section, that occurred early in the year, was not filled up, and a fresh distribution of the schools in the northern part of the Colony was accordingly made.

There were open during the year 2,719 departments. Of these 2,695 were thoroughly examined, the remaining 24, all very small schools, collapsed before the Inspectors could visit them. The number of pupils examined was 142,405: this is the greatest attendance at inspection yet recorded under the Department.

The

The Inspectoral Staff is fully equal to the examination of every school once a year, and to special examinations when necessary, but cannot possibly arrange for the second inspection of many schools. Indeed, the reduction of the vote for travelling expenses has rendered it necessary to restrict second inspections to those schools that can be reached without cost. In 1893, 402 schools were inspected twice; in 1894, only 271.

The following are the details of inspection :—

Year.	No. of schools.	No. of schools inspected.	No. of schools inspected twice.	Total number of inspections.	No. of schools not inspected.	No. of pupils examined.	No. of Inspectors.
1892	2,728	2,712	1,174	3,886	16	142,109	35
1893	2,738	2,715	402	3,117	23	140,713	35
1894	2,719	2,695	271	2,966	24	142,405	31

The particulars for each district stand thus :—

District.	No. of Inspectors.	No. of schools.	No. of schools inspected.	No. of schools inspected twice.	Total number of inspections.	No. of schools not inspected.	No. of pupils examined.
Armidale	4	320	320	29	349	0	11,073
Bathurst.....	3	253	249	28	277	4	9,362
Bowral.....	3	228	220	10	230	8	7,141
Goulburn	4	376	372	23	395	4	10,102
Grafton	3	305	303	9	312	2	10,634
Maitland	3	235	235	10	245	0	16,481
Metropolitan	4	192	192	142	334	0	39,469
Sub-metropolitan	3	248	245	3	248	3	18,828
Wagga Wagga	4	320	318	11	329	2	11,516
Wellington	3	242	241	6	247	1	7,799
Total	34	2,719	2,695	271	2,966	24	142,405

The inspected and uninspected schools were :—

	Public.	Provisional.	Half-time.	House-to-house.	Evening.	Total.
Inspected	1,890	293	433	66	13	2,695
Uninspected	5	6	11	1	1	24
Totals.....	1,895	299	444	67	14	2,719

Of the 2,695 schools examined, 2,526 reached the standard or exceeded it. This is 93½ per cent. of the whole, and is an advance upon the results of 1893.

The following tables show the proficiency of all schools inspected :—

	Below Standard.	Up to Standard.	Above Standard.	Total.
Public—				
1. In operation a full year at time of inspection	63	72	1,736	1,871
2. Not do do do	3	3	13	19

Natural Science	6,177	4,954	80

The most satisfactory feature disclosed by the table of proficiency is the increased number of pupils examined in the advanced sections of Reading, Writing, and Arithmetic.

The examination for certificates of exemption of all pupils who had completed the required attendance in the Third or higher classes, caused special attention to the subjects of test reading, writing, dictation, and arithmetic.

In some schools the number of failures surprised as well as disappointed the teachers. Most of the failures were in arithmetic, partly, as the Inspectors point out, because the teachers had either not given a sufficient variety of examples in the ordinary work, or the revision of back work had been neglected. Irregular pupils are much in evidence at these examinations and add considerably to the number of failures. At several examinations which I conducted, I noticed that individual test made the pupils so nervous that they could not do themselves justice.

Some teachers were astonished to find fifth class pupils among those who failed. A little inquiry elicited the fact that these pupils had been promoted from the third class before they had completed the prescribed course of instruction, then rushed through the fourth into the fifth class before they were fit to leave the third. This practice cannot be condemned too strongly, and teachers who repeat it must be severely dealt with.

Reviewing the most important subjects of instruction I have to remark :—

Reading.

The reading generally is marked by clear, distinct enunciation and correct pronunciation without a trace of provincialism, but is deficient in fluency and expression. It would be well, however, if teachers watched the ordinary speech of children with the same care that they do their reading. Children are prone to imitate in their ordinary conversation the language that they hear at home or in the street. Hence pupils who read correctly may be observed dropping *h's* and final *g's* mispronouncing the *ou* sound in their talk with one another.

Writing.

This has been steadily improving for several years. The copy-books now in use are so good and so cheap, that if teachers exercise anything like proper supervision good results must follow. Every pupil teacher is required to fill up a series of copy books to be shown to the inspector; this has had a marked effect in improving the writing throughout the schools.

Dictation.

The tests applied are severe, yet 77 per cent of those examined passed.

Arithmetic.

Though the percentage of passes (71) is not as high as in most subjects, the results give no cause for complaint. The old and exploded method of teaching arithmetic by rule, now obtains in but very few schools, and there is a very general attention to explaining the principles of the science; but still books are too frequently resorted to for examples to work. If teachers

teachers were to carefully prepare for each day's work properly graduated sums, their pupils would not be so frequently puzzled when a question out of the beaten track is given by the inspector. Some teachers, too, waste time over uselessly long sums in division, vulgar fractions, and practice, and do not give sufficient attention to points of practical value, as long addition and decimals. I have been surprised, too, to find that the tables of weights and measures are not as well known as they should be. Mental arithmetic has not received the attention its importance deserves, and has been well taught in but few schools. This subject is not only of great value in practical business, but is an excellent means of mental training. Now that really good text books can be procured at a nominal cost there can be no excuse for the neglect of this very important part of school education. The text books are of course merely to outline the course of instruction, not to be slavishly followed.

Drawing.

It is satisfactory to note the steady improvement in the teaching of this subject. Its value as a means of training hand and eye, and its importance in nearly every trade and profession, should place it on a level with writing as a school subject. I hope that in the near future geometrical and mechanical drawing will be taught in most of our schools.

Discipline.

The Inspectors report favourably upon the disciplinary condition of the schools. The children are generally very clean and tidy, though in some districts a tendency is growing up to send children barefooted to school. Probably the parents cannot help this, but in a crowded play-ground the unprotected feet of children are very frequently injured. Bearing in mind that it is the duty of the teacher not merely to impart a certain amount of knowledge to his pupils, but also to train them in good habits, it will be readily conceded that the *order* of a school is of paramount importance. The habits of order and submission to authority, or the reverse, which are formed at school will become stronger as the children grow up, and give a tone to their whole character. To ensure order and maintain obedience two means are adopted—the infliction of corporal punishment and moral influence. In most schools the two are used in conjunction, corporal punishment being administered in extreme cases only, as required by the regulations. Teachers who rely upon corporal punishment alone cannot be regarded as good disciplinarians, and seldom succeed in gaining order of a high class. Good feeling generally subsists between teacher and pupils, and complaints of unjust or excessive punishment are comparatively rare.

Complaints are sometimes made as to the misconduct of children on their way to and from school. They are charged with annoying passengers in trams and trains by their rudeness and disorderly behaviour, with ill-using their younger and weaker companions, with ringing bells, pulling flowers, and similar acts showing a want of consideration for the comfort or property of others. These complaints are so general that there must be some foundation for them. Though legally the authority of the teacher does not extend beyond the school premises, and no teacher should inflict punishment for offences committed out of school, it is clearly his duty to do what he can to put an end to the misconduct complained of, and his moral influence should be sufficiently powerful and far-reaching to have the desired effect.

Drill plays an important part in school discipline. Where it is properly taught the pupils obey promptly, and the various school movements are executed quickly and quietly. In the larger schools the whole of the "setting up" drill and the physical exercises are taught, while in all schools, even the smallest, the pupils fall-in in an orderly manner and march into school.

The officer in charge of the Cadet Force as Superintendent of Drill reported upon the attainments in drill of the pupils of the metropolitan schools. Towards the end of the year arrangements were made for the military officers of the Cadet Force to visit schools at appointed times and give model lessons in drill. These lessons have done much good, and will be extended to the country districts as far as practicable.

University Examinations.

As the public examinations of the Sydney University are generally regarded as a test of the efficiency of schools, the Public Schools, especially the large ones, should recognise the fact by sending pupils to the Junior examination. The high fee charged is certainly a great obstacle, but one that can be got over with a little trouble. Many parents are both able and willing to pay the fee if the teachers do their share in the matter. The Public Schools, not including the High Schools, passed 7 Seniors and 250 Juniors at the examinations of 1894. This, though below what should have been done, is creditable to the teachers concerned. The schools deserving honorable mention are:—

Araluen	4 passes, including 3 seniors.
Crown Street.....	9 "
Erskineville	9 "
Fort Street	54 " including 3 medallists.
Grafton	17 " " 5 matriculants.
Newcastle	12 "
Parramatta South.....	9 "
Rylstone	4 " including 1 senior.
Stanmore	6 "

Most of the large Public Schools are conspicuous by their absence from the University list. As the ordinary instruction should qualify pupils of the Fifth classes to pass the Junior examination, the teachers of First and Second class schools should have no difficulty in securing a place on the list of schools that send up successful competitors.

Physical Training.

The importance of physical training cannot be questioned. No one wishes to see our boys and girls grow up weak and weedy. It is well known that free muscular exercise is conducive to brain development, but unfortunately the limited area of the grounds attached to our large schools prevents such games as cricket, rounders, and football. Though the physical drill may do something towards the development of a sound body, it falls very far short of what is needed.

The Public Schools' Athletic Association has done much to supply the want. The competition between the boys of the various schools in cricket, football, rifle shooting, &c., has led many boys to take regular exercise instead of lounging about. The formation of Swimming Clubs in schools is a matter for special commendation. Swimming, apart from its value in saving life, is a clean and healthy exercise, and cannot fail to be of immense advantage to the boys and girls who practise it.

Cookery.

Cookery instruction was given at twelve centres during the year. West Maitland was substituted for Grafton.

It was definitely settled that the course of instruction should comprise fourteen lessons, and that three such courses should be given during the year. Arrangements have also been made that the teachers of cookery shall move about, so that all the important towns in the Colony may be visited in turn. 1,485 pupils attended the cookery lessons; of these, 382 were examined for certificates, and 341 passed.

High Schools.

The number of High Schools was the same as in 1893. The attendance is shown in the following table:—

School.	Total enrolment.	Average quarterly enrolment.	Average daily attendance.	Fees received.
Sydney (Boys)	237	179	164·8	£ s. d. 1,601 14 0
" (Girls)	217	165	152 3	1,373 8 0
Maitland (Boys)	73	55	49·8	242 11 0
" (Girls)	46	45	42·4	220 10 0
Bathurst "	38	31	26·5	148 0 5
Total	611	475	435·8	3,586 3 5
The figures for 1893 were	815	635	568·4	4,659 10 7

The fees have remained at the advanced rate—£3 8s. per quarter. The higher fee has most likely led to the diminished attendance indicated in the return given above.

The number of candidates at the entrance examinations was 678, as against 798 in 1893.

The Scholarships awarded during 1894 were 56, and the Bursaries 34.

For the December quarter there were in attendance:—

	Scholars.	Bursars.
Sydney High School (Boys)	35	20
" " (Girls)	43	14
Maitland " (Boys)	15	17
" " (Girls)	23	6
Bathurst " (Girls)	17	2
Total	133	59

All the High Schools were examined by the Department's Inspectors. The reports, on the whole, were satisfactory and show that the schools are in a healthy condition and are doing good work.

The following table gives the number of pupils examined in each subject, and the percentage of passes:—

Subject.	Number examined.	Percentage of passes.	Subject.	Number examined.	Percentage of passes.
Arithmetic	435	72	German	38	82
Mensuration	296	66	Greek	6	83
Algebra	411	72	Dictation	148	72
Geometry	351	72	Drawing	384	77
Trigonometry	88	63	Needlework	67	97
History	419	74	Physics	43	75
Geography	364	73	Physiology	31	74
English	427	75	Conic sections	3	100
Latin	387	69	Geology	37	92
French	405	66	Botany	15	87

Each school was represented at the various University examinations. The following table shows the number of passes:—

	Junior.	Senior.	Matriculation.
Sydney (Boys)	34	2	23*
" (Girls)	27	4	12†
East Maitland (Boys)	12	...	11‡
West Maitland (Girls)	4	1	2
Bathurst (Girls)	4
Totals	81	7	48

* Of these 16 matriculated at the Junior and 2 at the Senior Examination.

† Of these 2 matriculated at the Junior Examination.

‡ Of these 8 matriculated at the Junior Examination.

The total expenditure on High Schools for the year was £8,076 19s. Towards this, the sum of £3,586 8s. 5d. was received in fees. The net cost was, therefore, £4,490 15s. 7d., or at the rate of £9 9s. 1d. per head of the average enrolment.

Staff of Teachers.

The number of teachers employed in the Department's service at the end of the year was 4,453, a decrease of 74 on the number for 1893.

The Teachers are well reported of by the Inspectors. With very few exceptions they are industrious, anxious for the welfare of their pupils, and zealous in performing their duties. Taken as a whole they are intelligent and studious, of correct habits and honorable feelings, and exert a wholesome influence on the localities where they are placed. It would be very difficult to find a body so numerous whose members give so little trouble to those placed over them.

The untrained teacher is fast disappearing from the Service. Nearly all those counted in the following table as unclassified have had four or five years training as Pupil-teachers in large schools under our most able and experienced teachers.

The policy of the Department for some years past of placing ex-students in charge of small public schools, and ex-Pupil teachers in charge of Provisional, has been of great benefit to the schools and to the Colony.

Parents in remote or sparsely peopled localities can now get as good a primary education for their children as is within the reach of town residents.

TOTAL number of Teachers employed in the Department's Service on 31st December, 1894.

Training Schools.

During the year there were in attendance at the two Training Schools :—

Fort-street (male students).....	25 seniors	29 juniors.
Hurlstone (female students)	25 „	25 „

One of the Fort-street students had to withdraw early in the year in consequence of severe illness, and another did not attend the final examinations in December.

All the male students attended at the University during the forenoon. Their afternoons were occupied at the Training School, where they received instruction in school management, drawing, music, drill, and manual training, and were employed in teaching under the supervision of the Principal and the Master of the Practising School.

The female students were divided into three classes. The University class, consisting of 15 seniors and 1 junior, attended at the day lectures of the University, returning to Hurlstone in the afternoon; 10 home seniors following a course of study in close correspondence with the University course; and 24 juniors or first-year students. Details of the instruction given to these two classes will be found in the Principal's report.

The conduct and demeanour, attention to instruction, and diligence in study of all the students are reported upon in very favourable terms by the officers in charge.

It has been found necessary to modify the arrangements for the attendance of students at the University. As the students could not reach the Training Schools before 2.30 p.m., the remainder of the afternoon did not afford sufficient time for practical training and instruction in professional subjects. The double work, too, pressed heavily upon the students, especially those who were not fully prepared for the University subjects. As the time for private study was in the circumstances necessarily limited, it is not surprising that the results have been somewhat disappointing.

It has, therefore, been determined that in future the students shall spend the whole of the first year of training at the respective Training Schools, and that attendance at the day lectures of the University shall be arranged for after the examinations at the end of such year.

Technical Education.

On my appointment to the office of Chief Inspector it was decided that I should continue to exercise general supervision over the Technical Education Branch. Mr. J. H. Maiden, Curator of the Technological Museum, was appointed Superintendent of Technical Education, still retaining the duties of his former office. The work of the Technical Branch has been carried on vigorously and efficiently, and the results of the year's operations are very satisfactory.

The following is a general summary of the results :—

Classes in operation	191		
Enrolment of students.....	6,543		
Students examined.....	2,457		
„ that passed examination.....	1,644		
No. of visitors to Technological Museum.....	89,695		
No. of visitors to Branch Museums.....	107,729		
		£	s. d.
Expenditure on Technical College and branch schools.....		16,325	10 9
„ Technological Museum and branches.....		4,888	19 6
Total.....		21,214	10 3

Full particulars of the work of the Branch are given in the Superintendent's report.

Appended are the reports from :—

- (a) The District Inspectors and Inspectors.
- (b) The Principals of Training Schools.
- (c) The Superintendents of Drawing and Music, the Directress of Needlework, and the Directress of Cookery.
- (d) The Superintendent of Technical Education.

F. BRIDGES,
Chief Inspector.

16 February, 1895.

ANNEX A.

INSPECTORS ALLPASS AND DAWSON'S REPORT.

THE schools under our supervision for 1894, including Departments, were ninety-seven (97), ninety (90) being Public Schools, and seven (7) Evening Public Schools.

The classification of these schools is as follows ;—

Class I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Evening Public.
12	7	4	9	6	1	7

The school buildings afford seats for 26,114 pupils, and they are in good condition, with the exception of the wooden structures at Albion-street, and these, at the commencement of 1895, will be replaced by spacious permanent buildings. New class-rooms have been erected at West Marrickville, Manly, and Neutral Bay, and improvements and repairs have been effected at Alexandria, Australia-street, Blackfriars, Bondi, Camdensville, Darlinghurst, Erskineville, Forest Lodge, Fort-street, Glenmore-road, Leichhardt, Leichhardt West, Mossman, Manly, Naremburn, Neutral Bay, Redfern West, Surry Hills South, Sussex-street, Waterloo, Waverley, and Woollahra.

TABLE of Enrolment, Average Attendance, &c.

	Enrolment.	Average Attendance.	Percentage of Attendance.	Free Pupils.
March Quarter.....	25,551	17,823	70.0	2,242
June Quarter.....	25,665	18,996	73.0	2,544
September Quarter	25,770	18,312	71.0	2,653
December Quarter	25,330	18,779	74.0	2,893

The maximum number of free pupils in 1893 was 2,037; this year there is an increase of 856. In 1892 the free pupils numbered 1,350. The increase of 1,443 in two years is a marked indication of the impecunious condition of the working classes.

All the schools under our supervision received a regular inspection for examination, and eighty-three (83) had a second or ordinary inspection.

The working of the several schools was in most respects found to be highly satisfactory, but the introduction of an examination scheme for the issue of certificates of exemption show that in dictation and arithmetic the Upper Third and Fourth classes are in an unsatisfactory state.

Of

Of 2,665 examined for exemption certificates, the passes were 1,163, and the failures 1,502.
The general efficiency of our schools is:—

	Below Standard.	Pass. 50 per cent.	Above Standard.
Public Schools	0	0	90
Evening Schools	0	1	6

The following table shows the number of pupils examined in each subject and the percentage of passes:—

Subject.	Number Examination.	Percentage of Passes.	Subject.	Number Examination.	Percentage of Passes.
Reading	19,216	80	Music	17,922	79
Writing	19,202	78	French	547	60
Dictation	15,356	75	Euclid	1,666	65
Arithmetic	19,047	63	Algebra	586	54
Grammar	8,430	68	Mensuration	1,591	52
Geography	8,430	73	Latin	591	66
History { English	7,939	68	Trigonometry.....	16	12
{ Australian	1,953	70	Needlework	5,552	93
Scripture and Moral Lessons	18,948	69	Drill.....	18,524	91
Object Lessons	17,328	70	Natural Science	1,701	74
Drawing	17,421	70			

We are in a position to state that the order and discipline maintained in the several schools are highly satisfactory, that the zeal and industry of the teachers are unimpeachable, and that the pupil-teachers are a most promising body.

J. W. ALLPASS } Inspectors.
J. DAWSON }

Sydney, 31st December, 1894.

ANNEX B.

INSPECTOR THOMPSON'S REPORT.

THE schools under my supervision during the year consisted of 20 Public and 3 Evening Public Schools.

One Evening Public School—Plunkett-street—was established during the last quarter of the year. With this single exception the schools in this section of the metropolitan district remained the same as during last year.

Accommodation, &c.

The material condition of the school buildings in this section of the district is, as a whole, very good, and the accommodation provided may be regarded as generally sufficient for ordinary requirements. No great additions to existing buildings have, therefore, been found necessary.

A new stone building for the accommodation of the girls attending the Superior Public School at Ashfield has been erected in lieu of the old wooden building which has hitherto served as a school-room. At Watson's Bay it was found requisite to enlarge the existing building so as to provide accommodation adequate to the increased attendance. Provision has thereby been made for some 50 additional children.

Attendance.

The gross enrolment for the year was 16,722. In March Quarter, the enrolment was 12,323; the average attendance 8,501; in June Quarter enrolment 12,304, average attendance 9,043; September Quarter enrolment 12,213, average attendance 8,684; December Quarter enrolment 12,040, average attendance 8,943.

The highest percentage of attendance—74%—was in the December Quarter: the lowest—70%—during the March Quarter.

As a whole the percentages of attendance have been higher than those of last year, no epidemic having occurred to materially affect the regularity of attendance as was the case during the latter half of 1893.

Inspection.

All schools and departments received regular inspection, and 15 departments were visited for ordinary inspection. Under regular inspection no department was below the required standard of 50 per cent. of maximum marks obtainable: 3 departments were up to that standard, and the remainder were above it. Thus the proficiency of the new pupils in all departments were at the time of inspection of a decidedly satisfactory character. In the essential subjects of Reading, Writing, Dictation, and Arithmetic, the percentage of proficiency is somewhat above that recorded last year.

The organisation of the schools is on the whole good: the government well sustained, judicious and effective. The efficiency of the schools averages Very Fair.

The usual statistical information has been already forwarded.

W. F. THOMPSON,
Inspector.

Sydney, January, 1895.

ANNEX C.

INSPECTOR WILLIS'S REPORT.

DURING the year just closed 20 Public Schools, 2 Evening Schools, and the school on board the "Sobraon" (Training Ship) have been under my supervision. These are classified as under:—

Classes.	I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Evening.	Sobraon.	Total.
Schools	8	3	1	3	2	0	0	0	2	1	2	1	23
Departments	24	9	3	5	2	0	0	0	2	1	2	1	49

With the exception of the Evening School at Marrickville, established last September, the schools in this section of the district have been in operation throughout the year.

The

The school buildings are in good condition. Of the 20 of them, 17 have during the year been repaired.

At Stanmore a large building for the use of the Infants' Department has just been completed; it affords accommodation for 358 pupils.

Information respecting the pupils in attendance, and the floor-space provided for them in the existing buildings, is given in the following statement:—

Pupils enrolled during the year	14,452
Average attendance of pupils	9,183·7
Ordinary attendance.....	10,500
Aggregate number of seats provided	11,871

For organisation, the average mark obtained by the teachers of these schools was very fair to good. Several teachers gained the highest possible award for this important branch of school-work; but others had to be called to account for such organic defects as hurried promotion of pupils, weak control of the teaching staff, and unskilful preparation of lesson guides.

In all but one or two of the schools the discipline has been very favourably reported upon. Special efforts are made by all the teachers to ensure the punctual and regular attendance of their pupils, and to prevent truancy. These efforts are, in the main, successful; where they are not so, the fault lies generally with the parents' mismanagement at home. Only 279 boys are enrolled as cadets; steps should be taken to revive the interest of the parents in the maintenance of Cadet Corps in our schools.

The whole of my schools were thoroughly inspected, and 44 of the departments were visited a second time for ordinary inspection. Of the 49 departments inspected, one only was found to be below standard requirements, and the other 48 were above standard. The pupils examined numbered 10,768. In advanced arithmetic, English grammar, Australian history, algebra, and mensuration, the passes in no case reached as high as 60 per cent., but in most of the other branches the results of examination were satisfactory.

For the certificate required of pupils under the compulsory clauses of the Education Act, 1,289 were examined; but only 488, or about 38 per cent., were successful. These examinees were tested in four subjects—reading, writing, arithmetic, and dictation. The majority of those who did not pass failed in arithmetic only.

The Swimming Clubs established in the schools near the harbour are in high favour with both boys and girls, and the classes formed in the Girls' Departments for instruction in cooking are doing sound work.

Very few of the teachers cultivate flowers in the playgrounds of their schools, but all give attention to the growth of shrubs and trees. Pines, the native species of the fig-tree, and the pepper-tree are thriving well in most of the grounds; and at Marrickville Public, where the playground is large, Mr. Bax, the principal teacher, is successfully rearing many favourite flowers.

The teachers are attentive to duty, and most of them are acting up to the responsibilities of their important calling.

Viewed as a whole the schools have been well managed, and will no doubt continue to be so during the year now entered upon.

M. WILLIS,
Inspector.

7th January, 1895.

ANNEX D.

DISTRICT-INSPECTOR W. DWYER'S REPORT.

THE number of departments in operation during the past year was 248—217 Public, 10 Provisional, and 21 Half-time.

Of these, 245 were fully examined, and their efficiency as thus tested proved, for the most part, very satisfactory, the proportion satisfying or exceeding the requirements of the standard having reached the high estimate of 95 per cent. Three (3) were not examined because they had been closed through insufficient attendance before the time fixed for their inspection.

The number of places available for the current year is 26,421, reckoning 8 square feet of floor-space for each child; or 26,187 places, estimated by the standard of cubic measurement—100 cubic feet for each; and the total enrolment for last quarter was 22,302. The amount of sitting accommodation is therefore adequate, and, as a whole, evenly distributed. In the tabulated returns already furnished, the subjects taught and the number of pupils examined in them are stated in full. For precise information on these points, therefore, it will perhaps be sufficient to refer to such tables. But, taking a general retrospect of their contents, it may be said that the number of subjects prescribed for the instruction of the pupils is 18 (exclusive of needle-work and drill); that the greatest number of children examined (18,828) was in reading; that in the other subjects the numbers examined and the general results were satisfactory; that the highest percentage of answers (81) was obtained for reading, and the lowest (54) for English history. Excepting three or four subjects the results recorded are for the most part above those of previous years, and the examination for Exemption Certificates was found to exercise a beneficial influence on teachers and pupils, inasmuch as it demanded a definite and practical test of the knowledge acquired, applied under reasonable, but, at the same time, fairly trying, conditions. The subjects prescribed for this examination were confined to reading, writing, dictation, and arithmetic.

The entire teaching staff of the district comprises 493 persons, of whom 332 are teachers and assistants, 152 are pupil-teachers, and 9 are work-mistresses.

Of the teachers and assistants, 88 per cent. are classified, and all but 5 of the pupil-teachers—these 5 being recent appointments on probation. It may be confidently asserted that nearly all teachers, of whatever class or rank herein comprehended, are attentive to their respective duties, manifest an intelligent and, generally, a beneficial interest in their work, and, by their skill and energy, mainly contribute to maintain the character of the schools for which they are responsible at a respectable standard of efficiency.

The reports of the inspectors sharing with me the work of the district are forwarded herewith.

WM. DWYER,
District Inspector.

Sydney, 11th January, 1895.

ANNEX E.

INSPECTOR PITT'S REPORT.

At the end of 1893 there were in this section of the Sub-Metropolitan District 72 schools—60 Public Schools, 4 Provisional Schools, 6 Half-time Schools, and 2 House-to-house Schools. At the beginning of this year 26 schools, comprising 31 departments, were transferred to my section from the Arncliffe Section and the Maitland District, and 16 schools, comprising 18 departments, were transferred to the Arncliffe Section.

There are now in existence 96 schools under my supervision. Two schools were temporarily closed—Rockview Provisional owing to teacher's serious accident, and Murray's Run Half-time School owing to paucity of attendance—but will be re-opened after vacation.

Twelve applications for the establishment of schools have been received. The appended statement show the localities from which these applications emanated, and the Department's decision in each:—

School.	Department's decision.
(a) Upper Webb's Creek	Provisional, declined.
(b) Middle McDonald	" "
(c) Lower Mangrove Creek (Popran)	" "
(d) Lower McDonald	Half-time, granted.
(e) Tennyson (Sally's Flats)	Provisional, granted.
(f) McGrath's Hill	Public, under consideration.
(g) Rouse Hill Road	" "
(h) Blood Tree Creek (near Gosford)	Half-time, declined.
(i) Yongara Half-time (near Galston)	Half-time, granted.
(j) Berowra Half-time (near Hornsby)	" "
(k) Galston Heights (near Galston)	Public, granted.
(l) East Carlingford	Public, under consideration.

Accommodation.

Accommodation.

The total number of seats provided for the pupils in this section at the end of 1893 was 5,583, but owing to the enlargement of several schools, and the erection of new schools, the accommodation has been materially increased, and now affords ample sitting room for 7,207 pupils.

Attendance.

The table hereunder sets forth the total enrolment, the average attendance, a percentage of attendance, the school fees collected, and the number of free pupils, for each quarter during the year 1894:—

Quarter.	Enrolment.	Average Attendance.	Percentage.	School Fees collected.	Free Pupils.
March	6,018	4,052·2	67·3	£ s. d. 481 14 4½	646
June	6,292	4,817·5	76·5	664 17 3	880
September	6,263	4,460·8	71·2	399 11 9½	839
December.....	6,171	4,671·9	75·7	581 5 0	943

Inspection.

All the schools in operation under my supervision during the year were fully inspected. Owing to the inefficient state of one school, a re-inspection took place. The Girls' Industrial School at Parramatta was duly inspected, with results of a highly pleasing character.

The Teaching Staff.

The teachers, assistants, and pupil-teachers, as a body, are persons of good moral character, and have, with few exceptions, discharged their duties in a creditable manner during the year. When it became necessary to point out defects in their work I have been treated courteously, and my suggestions, directions, and censure have been taken in a spirit that speaks well for the future.

Summary.

- I. The schools are well distributed, and meet all legitimate educational requirements.
- II. The order and discipline continue a pleasing feature in the majority of the schools.
- III. All schools have been inspected, and visited incidentally as opportunity occurred.
- IV. The general efficiency of the schools is satisfactory, and the prospects for the incoming year are hopeful and promising.
- V. All statistics have been duly forwarded.

Parramatta, 8th January, 1895.

CHAS. JNO. PITT,
Inspector.

ANNEX F.

INSPECTOR SKILLMAN'S REPORT.

At the end of 1893 there were in this section of the Sub-Metropolitan District 54 Public Schools in 70 departments, 3 Provisional Schools, and 2 Half-time Schools.

At the beginning of this year 16 Public Schools in 18 departments were transferred to this district from the Parramatta Section, while the Parramatta South Public School (3 departments) and the Kemp's Creek Provisional School, formerly in my charge, were placed respectively under the supervision of Mr. Inspector Pitt and Mr. District-Inspector Johnson.

I have, therefore, now under my care 69 Public Schools in 85 departments, 2 Provisional, and 2 Half-time Schools. Total, 89 schools.

The school at Bossley Park has been temporarily closed during the second half of 1894, owing to the average daily attendance of pupils falling below 12.

A new school will be opened early in 1895 at Badgery's Creek, where a building is in course of erection.

During the year the Architect has built a commodious schoolroom at St. John's Park, to replace an old wooden structure.

A class-room has been provided at Dapto, and the school building at Hurstville West lengthened.

A teacher's residence has been erected at St. John's Park, and a weather-shed at Keiraville.

The addition of a number of schools to the district has caused the net increase of seats to be as many as 1,352.

At present in the schools in this district there is sitting accommodation for 12,502 pupils.

The number of children enrolled for the year (deducting multiple enrolments) was 11,291.

The accommodation, therefore, is sufficient.

In all, 89 schools have been in operation during 1894, 88 being in existence for the whole year, and 1 (Bossley Park) for only a portion thereof.

The average attendance for the four quarters was:—

Quarter.	Boys.	Girls.	Total.	Enrolment.	Percentage.
March	3,880·1	3,398·4	7,278·5	10,755	67·6
June	4,387·7	3,881·9	8,269·6	10,880	76·0
September	4,140·3	3,563·0	7,703·3	10,778	71·4
December	4,341·7	3,755·9	8,097·6	10,737	75·4

All the schools in the district were regularly inspected, and three received an ordinary inspection.

Of the 89 schools, 66 were above standard, 14 satisfied it, and 9 failed to reach it. This result is an improvement on that gained last year, when 12 schools out of 76 were below standard.

I find that the special examinations for certificates of the pupils of the higher classes in the schools is having a beneficial effect, by causing teachers to pay more attention to the solid grounding of elementary work.

Taken as a whole, the labours and the conduct of the teachers under my supervision during 1894 have been very satisfactory, and there are prospects of steady improvement in the ensuing year.

Arncliffe, 31st December, 1894.

H. SKILLMAN,
Inspector.

ANNEX G.

DISTRICT INSPECTOR BRADLEY'S REPORT.

For the year 1894 there have been in operation in the Armidale district 320 schools, classified as follows:—

Public	205
Provisional	59
Half-time	44
House-to-house	12
Total.....	320

This

This number shows an increase of 6 schools over the record for 1893, and is the result of the transference to this district of the schools at the head of the Hunter Valley, in the vicinity of Murrurundi. But for the inclusion of these, the school roll would have fallen slightly below that for 1893, as the number of small schools that lapsed through insufficient attendance exceeded the number established or re opened. This result was anticipated in my last report; and so completely is this vast district now supplied with the means of education, that, under ordinary circumstances, very little increase in the direction of school establishment may be expected.

The limited funds at the disposal of the Department necessitated rigid economy in expenditure on school buildings, and only in the most urgent cases was outlay made. Under the several Inspectors nearly £2,000 has been laid out. Eight new school-rooms, 1 teacher's residence, and 3 weather-sheds have been erected, and 65 school-rooms and 21 residences have been repaired or otherwise improved. Similar works under the supervision of the same officers, to cost on completion some £330, were in progress at the end of the year. Under the Architect, besides minor repairs, some more or less extensive improvements have been effected at Armidale, Guyra, Glen Innes, Nundle, Saumarez, and Tilbuster. Throughout the whole district, however, much remains to be done, and longer delay will in the end prove false economy.

In nearly all schools the supply of furniture and apparatus is adequate in quantity and suitable in design, and but few instances occur of carelessness in its preservation. In other points of equipment the stock has been kept down to mere necessities, and, in consequence, most of the school interiors present a bare and uninviting appearance.

The aggregate increase in the sitting accommodation has been 468 places at 8 square feet per child, and 463 at 100 cubic feet—making totals of 18,605 and 17,062 places respectively. As the gross enrolment for the district is but little over 14,000, it is evident that, as a whole, the accommodation provided is ample for existing and prospective needs. At Armidale, and in two of the larger centres in the Qurundi section of the district, some additional room is needed, but the wants of these localities will probably be met early in the coming year.

As previously indicated, the Armidale district has been extended to include the schools south of the Liverpool Range in the immediate neighbourhood of Murrurundi, and the schools thus taken over from the Matland district have been placed under the supervision of Mr. Inspector Parkinson. Beyond this, no change in the inspectoral arrangements has occurred, but some slight modification in the distribution of schools will be made in the new year. The whole of the schools (320) in operation during 1894 have been fully inspected, and, in addition, 29 secondary inspections have been made. The number of the latter would have been greater but for restrictions as to travelling, with the view of saving expense. Altogether 11,073 pupils were present at the regular inspections—496 more than in the previous year. Out of the 320 schools examined, 291, or nearly 91 per cent, satisfied or exceeded the standard for general efficiency; and such result is both satisfactory in itself, and shows progress as compared with that of last year.

The following table shows the proficiency of the pupils in the various subjects of instruction, and also the relation of the results to those of 1893:—

Subjects.	Estimated Proficiency.			
	Total Number Examined.	Number Passed	Percentage up to or above Standard	Relation to Results of 1893.
Reading—				
Alphabet	435	292	67	+ 1
Monosyllables	2,283	1,883	82	— 2

Natural Science	305	300	98	— 2

During the year 634 exemption certificates have been issued by the Inspectors to such pupils of the upper classes as have reached the "Standard of Education" required by the Public Instruction Act. This number represents only about 55 per cent. of those specially examined for the certificates, and the result must be regarded as by no means satisfactory. Reading, writing, dictation, and arithmetic are the subjects to which the test for a pass is restricted. Failures in reading and writing are of very rare occurrence; dictation proves fatal to a few; but arithmetic claims more victims than all the rest put together. This, in some measure, is attributable to the inherent difficulty which the mastery of the subject presents to children; but the main cause of failure lies in the absence of its intelligent treatment on the part of teachers, who, in most cases, adhere slavishly to text-books and "rules," and seldom or never think of arithmetic as a thing that is directly and necessarily applicable to matters of every-day life. It is not the *difficulty* of the questions set by the Inspector at these examinations, but their *diversity* that proves the trouble; and teachers are awaking to the fact that to be successful they must follow on similar lines, apply constant tests to make sure of good foundation work, and show more of naturalness and colour in framing examples for their pupils' practice.

The teaching staff of the district comprises 294 principal teachers and mistresses of departments, 39 assistant teachers, 2 work-mistresses, and 66 pupil-teachers—401 in all. Ninety (90) teachers and 10 assistants are unclassified, but many of these are young men and women who have served as pupil-teachers, mostly for the full term, and who, in point of attainments, in practical training and teaching ability, are at least equal to the bulk of the classified teachers in the lower grades, and produce quite as good work. But few cases of discreditable conduct or of negligence in the discharge of duty have occurred during the year; and, of the general body, it is pleasing to have to speak, as formerly, in terms of commendation.

J. D. BRADLEY,
District Inspector.

ANNEX H.

INSPECTOR BLUMER'S REPORT.

At the close of last year 74 schools were in operation in the Tamworth Section of the Armidale District. Since then four new schools have been opened at Mundowey, Upper Moor Creek (Provisional), Bobby Whitlow Creek, and Laura (Half Time), and two schools, Boolooroo Provisional and Rocky Gully House-to-House, did not re-open. At present, therefore, 76 schools are under my direct supervision.

Applications for establishment of new schools were received and dealt with as follows:—

Place.	Kind of school applied for.	Result.
Cainsborough (Manilla)	Provisional	Half-time offered.
Clerkness (Bundarra)	"	Refused.
Derra Derra (Bingara)	"	Half-time offered.
Five-mile Creek (Walcha)	"	Refused.
Ingalba (Walcha)	" (to re-open)	Half-time offered.
Myalla (Warialda)	"	"
Orundumbi (Walcha)	Public (to re-open)	} House-to-House offered
Tia Mines (Walcha)	Provisional	} with Tia Mines.
Toryburn (Armidale)	"	Refused.

New buildings were erected by the Inspector at Branga and Upper Moor Creek, and repairs and improvements were effected by Architect or Inspector as occasion arose.

The educational requirements of the district have been fully met by existing or promised schools, and it is not likely that many applications for new ones will be received during the coming year.

In one or two places the building is rather small for the attendance, but in these instances steps have been taken to provide additional accommodation. In nearly all cases, as well as in the aggregate, the accommodation is more than equal to actual needs.

Seventy-six schools were in operation during the whole or some portion of the year. All were fully inspected; twelve received a second or ordinary inspection, and numerous incidental visits were made.

Ninety-one per cent. were "Up to Standard," as compared with 90 per cent. for last year, and the results in the several subjects of instruction are at least as satisfactory as at any former time.

Two hundred and thirty-eight pupils who had completed the prescribed time in Third Class were examined with a view to award of Certificates of Exemption, but only 79 were successful. The majority failed in arithmetic. Such failures were mainly due to want of frequent exercises in rules supposed to have been already mastered, to the substitution by teachers of advanced and complex problems in lieu of those arising in every day commercial transactions, and to inaccuracies resulting from insufficient practice in Mental Arithmetic. Most teachers recognise these causes of failure, and there is little doubt that better results will be forthcoming in the immediate future.

The schools that excelled in regard to general efficiency are, in order of merit, Tamworth Infants', Manilla, Walcha, Dungowan Lower, Moree, Tamworth Boys'.

As a body the teachers are industrious, energetic, and worthy of the esteem and sympathy of the general public. In two instances, however, misconduct and flagrant neglect of duty met with prompt punitive action.

In conclusion: Schools are well distributed throughout the district; the buildings are generally in fair order, and afford adequate and suitable accommodation; the school work is efficiently conducted, and there is good reason to anticipate improvement during the ensuing year.

Tamworth, 21st December, 1894.

L. BLUMER,
Inspector.

ANNEX I.

INSPECTOR BEAVIS' REPORT.

ALL the schools (94) which were in operation under my supervision at the close of 1893, resumed work after the Christmas vacation, and two new schools, Ross Hill Infants' and Brushey Creek Provisional, were opened; later in the year new Provisional schools were established at Tarban and Briery. These 98 schools, taking the latest classification, comprise—67 Public, 25 Provisional, 4 Half-time, 2 House-to-House.

Only one school (Airlie Brake Provisional) was discontinued, so that 97 remained in operation when the school-year closed.

The status of a few schools has been altered. The Inverell Public School is now ranked as Superior; two schools, Staggy Creek and Furracabad, formerly Provisional, have been converted to Public. The Round Mount Public School was closed in June on account of small attendance; it was, however, reopened in September as a Provisional school. The public schools at Kookarabooka and Bear Hill were so poorly attended early in the year that during the June quarter they were worked together as Half-time schools; subsequently both schools revived, and they are again Full-time, the former having resumed its original rank, the latter being classed as Provisional.

It is probable that two of the existing schools will not re-open next year, but 95 will remain effective. Sanction has been obtained for the establishment of a Provisional school at Weean, near Inverell; also, the Airlie Brake school may be re-opened. With these exceptions I do not know of any locality where a school is likely to be immediately required. The wants of the district may therefore be regarded as fairly met.

Speaking generally, the material condition of the schools, though not unsatisfactory, has suffered from the enforced curtailment of expenditure; building work has been confined almost exclusively to urgent repairs and improvements. Indeed, necessary work has been postponed, and during the coming year several of the better buildings must be renovated if they are to be preserved. At many of the smaller schools verandah additions or small weathersheds will be required.

The

The seating accommodation is fully equal to requirements; the establishment of new schools has added over 100 places. Under ordinary circumstances the average attendance in the schools is 75 per cent. of the enrolment. For the first half of this year sickness was rife throughout the district; measles, blight, influenza, and common colds kept the children from school. During the second half the conditions were favourable to regularity, and 20 per cent. more pupils completed the statutory minimum (70 days).

The fixing of the minimum age of school attendance at 6 years had comparatively little effect on the schools of this Section. It is to be noted, however, that since the minimum was reduced, 54 additional children under 6 years of age have been admitted.

Inspection has been confined almost entirely to the regular examination of each school; only 10 ordinary inspections were made; a few schools were visited casually. Ninety-nine regular inspections were made, one school having been twice examined. Of the 98 schools in operation, 87 (*i.e.*, 89 per cent.) reached or surpassed the recognised standard, 80 being above the standard. The Emmaville Public School deserves special mention for its high state of efficiency.

3,341 pupils (31 more than in 1893) were examined; the results bear favourable comparison with those of last year.

361 pupils were specially examined in relation to the legal standard for exemption from school attendance; 191 (53 per cent.) received certificates, 59 of whom have in consequence left school. 177 pupils, however, who obtained certificates either this year or last were still enrolled when the schools closed. These examinations evidently excite keen interest among the pupils, a certificate being regarded as a desirable prize.

118 teachers of all grades are employed in the schools. With rare exceptions they continue to deserve the good opinion of the public.

Summary.

Four new schools have been established and one has been closed; 95 remain effective. The attendance of pupils has slightly increased, and the efficiency of the schools has been well maintained.

W. BEAVIS,
Inspector.

Glen Innes, 31st December, 1894.

ANNEX J.

INSPECTOR PARKINSON'S REPORT.

At the close of 1893, the number of schools in this section of the Armidale District was 78. All these schools reopened in January. In February the Public Schools at Murrurundi, Blandford, Harben Vale, Wingen, and Parkville, the Provisional School at Timor, and the House-to-house School at Waverley, were transferred from the Maitland District. During the year, the House-to-house Schools at Harparary and Therribri, and at Kingsmill Peak and Woodlands have become Half-time Schools. A similar school has been opened at Ningedo, to work with Tipperreenah, a declining Full-time School, and the school at Keepit has been reopened in conjunction with Bona Vista under similar conditions. A Provisional School has been reopened at Gunnenbene. Half-time Schools at Weeta Waa and Pian Creek have taken the places of the Provisional and House-to-house Schools formerly in existence there. The number of schools on my list for the year has therefore been 90. Applications for schools at Mountain Well, Dunglear, Glen Dhu, and Brigalow Creek, and a proposal to convert the present House-to-house School at Pine Ridge into a Provisional School, have been declined. New schools have been granted at Goolhi, Kercargo, and Inglewood, and the two first named are likely to commence work early next year. A Half-time School at Turrawan has also been recommended; this school will be worked with Baan Baa, where the average for a Full-time School cannot be maintained. The Provisional Schools at Digby and Bullawa Creek and the House-to-house School at Pinewood have been closed. I expect to commence next year with 90 schools. I do not know at present of any place in this vast district where a new school should be established, but as the provisions of the Education Act are so liberal, the number of small schools is likely to increase as the country gradually becomes more settled.

Reckoning 8 square feet of floor space and 100 cubic feet of air space for each child, the schools in this district, at the close of 1893, afforded seats for 4,668 pupils, and spaces for 4,094 pupils. By the increase of schools these numbers have been raised to 5,162 and 4,552 respectively. As the highest quarterly enrolment has only reached 3,972, and the average attendance is below 3,000, it will be seen that the aggregate accommodation is far greater than requirements. At two towns, where the attendance is gradually increasing, class-rooms are now being erected, and at one important centre new buildings will soon be required. But on the whole the accommodation is ample, suitable and properly distributed. Much has been done, too, to improve the buildings. I have supervised the erection of five new schools, one residence, and three weathersheds, besides repairs to 24 schools and seven residences. Improvements at several other schools have been sanctioned, and I am glad to be able to say that throughout the district the buildings are now in a better state than at any former period.

Regular inspections were made of all schools in operation during the year. Seven schools were found to be below standard, 2 up to standard, and 81 above. So that 92 per cent. of all schools either satisfied or exceeded standard requirements. As the percentage last year was 91, the efficiency of the schools has been well maintained. The state of the schools may be shown more in detail thus: 7 schools did not reach 50 per cent.; 48 reached between 50 and 60 per cent.; 30 between 60 and 70 per cent.; and 5 upwards of 70 per cent.

The total number of pupils examined was 3,155, an increase of 655 on the number examined last year. In writing, object-lessons, Latin, needlework, drill, and natural science the percentages of passes ranged from 90 to 100; in reading, Australian history, Scripture lessons, drawing, Euclid, and algebra, they were between 80 and 90; and in dictation, arithmetic, grammar, geography, English history, music, French, and measurement they were from 70 to 80. These numbers show little variation from those of last year, and must be regarded as very satisfactory. Exemption certificates have been issued to 213 pupils, who have been educated up to the compulsory standard. It is premature to say at present what the ultimate effect of issuing these certificates will be; but at present they cause a laudable emulation amongst the senior pupils, and give to the annual inspection more of a personal than a general character. There are now employed in this district 113 teachers. Of these 79 are in charge of schools, 12 are assistants, and 22 are pupil-teachers. Of the 91 teachers and assistants, 17 rank in class 2, 48 in class 3, and 26 are unclassified; 13 of these last enumerated have, however, been pupil-teachers. The majority of the teachers continue to behave in an exemplary manner, and to show their desire to improve by obtaining higher classifications. Seventeen gained promotion this year. Under the present excellent system of filling vacancies from the list of pupil-teachers, the number of untrained teachers, and consequently of inefficient schools, is constantly decreasing. Even the smallest schools, where only the minimum salary can be earned, are gradually falling to the management of teachers who have had three or four years' useful experience in larger schools under classified teachers.

To summarise: During the year, 90 schools have been in operation. All were inspected, and 92 per cent. were up to or above standard.

Five new schools were erected and 24 others repaired. Ample accommodation exists for all the children in attendance. The teachers have conducted themselves in an exemplary manner, and many of them have gained promotion.

H. PARKINSON,
Inspector.

Quirindi, 27th December, 1894.

ANNEX K.

DISTRICT INSPECTOR M'CREEDIE'S REPORT.

At the close of 1893, there were 247 schools and departments in the Bathurst district. A small school in the western section of the district did not reopen, so that the year 1894 commenced with 246 schools in operation. One of these, Norton Public, in the central section, was afterwards closed through small attendance, and the Infants department of Mitchell Public was discontinued for the same reason. Ten schools in the other sections of the district also lapsed. Six new schools were opened, and 1 House-to-house School was converted into 2 Half-time Schools. These changes during the year left 242 schools on my general list at its close, but this number is likely to be increased early in 1895, by the opening of several new schools, and the reopening of some others temporarily closed.

Thirteen applications for new schools, all in the western part of the district, were reported upon, and only 4 were declined. Two applications for schools at Bell and Wattle Vale were under consideration at the end of 1893, and both were granted in January last.

Under

Under the supervision of the inspectoral staff, 2 new school buildings and 1 weathershed were erected; and repairs and improvements were effected to 66 schools and 9 residences at a cost of about £581. Repairs to 18 other schools and to 2 residences are in progress, and will cost an additional sum of £194. A kitchen was added to the residences at Brown's Creek and the Forest, and the accommodation at Hartley Vale Public was increased by the erection of a class-room.

Improvements consisting of general repairs and painting have been sanctioned to the following Public Schools in the central section:—Bathurst, Beneree, Blayney, Dunkeld, Kelso, Lucknow (including additions to school and residence), Milltown, Moorilda, Orange, Perth, and Shadforth. Action will also be taken at an early date to repair and paint the small wooden school buildings in the district.

The schools, generally speaking, are suitably organised and judiciously governed. In some more taste is desirable in the arrangement of the books, &c., in the presses, and of the maps and diagrams on the walls. The discipline is free from harshness and undue severity, and the pupils as a whole are clean, becoming in appearance, orderly, and respectful.

The Cookery Classes at Bathurst were discontinued about the middle of the year, and the teacher removed to Sydney. These classes were well attended by pupils of the Girls' High School, and of Bathurst, Milltown, and Kelso Public Schools.

The total number of teachers under the department and employed in the district, is 325. With one or two exceptions all worked well during the year, and gave little or no cause for fault finding or complaint.

The number of schools and departments in operation was 253. There were 277 inspections, viz., 251 regular (including 2 second inspections), and 26 ordinary. Four schools, 3 in the western, and 1 in the eastern section of the district, were not inspected, having been closed early in the year before they could be visited by an Inspector. The Girls' High School in Bathurst was inspected by Dr. R. N. Morris and myself about the beginning of June, and was found in as satisfactory a condition in point of efficiency as in past years.

In 1893, 96 per cent., or 243 schools, satisfied or exceeded the standard in efficiency. Last year the percentage was 97 for exactly the same number of schools, and the increase, 1 per cent., is similar to that of the previous year on the results for 1892.

At the regular inspections 9,362 pupils were present, being 197 less than in 1893, and 311 less than in 1892. The decrease is in part due to sickness, inclement weather, and bad roads during the winter months, but is also attributable in some measure to the withdrawal of pupils from school on their obtaining the certificate of being educated up to the standard required by the Public Instruction Act of 1880, the removal of families to other parts of the Colony, and the exclusion of children under 6 years of age from being enrolled as pupils for about three-fourths of the year.

Statistics showing the proficiency of the pupils examined have been forwarded. Compared with those for the previous year, the percentage of passes in reading, dictation, history, algebra, needlework, and natural science is higher; in writing it is equal; and in all other subjects it is slightly lower.

There is a considerable falling off in the numerical strength of the Cadet Corps of the district. In March, 1893, the total number of Cadets was 318; now it is only 223, and interest in the movement appears to be dying out. At the last annual competition in Sydney for the Challenge Shield, the Orange team of Cadets again, for the fifth time, defeated all competitors.

The accommodation in existing schools shows a slight increase for the year. In 1893 the number of seats was 16,072 (allowing 8 square feet of floor space per pupil) and 15,952 (allowing 100 cubic feet of space per pupil). Now, the numbers are 16,133 and 16,076 respectively. Additional room is required in one or two schools, and action has been or will be taken to provide it.

All statistical returns for the year have already been forwarded.

J. MCCREDIE,
District Inspector.

ANNEX L.

INSPECTOR KEVIN'S REPORT.

THE year 1893 ended and this year commenced with 99 schools and departments in operation, viz. :—

Public	59
Provisional	7
Half-time	26
House	7
	—
	99

The total number of schools in operation for the year 1894 was 101, and the total number in operation at the close of the year was 98, as under :—

Public	56
Provisional	7
Half-time	28
House	7
	—
	98

The Public School at Crown Ridge was closed early in January in consequence of the small attendance, and a Provisional School was opened at Wattle Vale, near Burruga, and a Half-time School at Bell, in conjunction with Mount Wilson, formerly Provisional.

The following changes took place during the year :—Anarel Public was converted into a Half-time in conjunction with Cheetam's Flat Provisional; Mountain Home Half-time was converted into a Public, absorbing the Crown Ridge attendance; Duckmaloi Public was joined with Hazelgrove as Half-time; Ben Bullen Public was closed for a period in consequence of small attendance, but is now open as a Provisional; Aliwal and Taylor's Pit Half-time were closed for several months in consequence of small attendance, but a promise has been given to reopen them on the House-to-house basis.

Buildings.

A new Provisional School was erected at Wattle Vale, near Burruga, at a cost of £45, and under my own supervision while a new class-room was added to the Public School at Hatley Vale by the Architect.

No additions were made.

Thirty-four (34) schools, and one (1) residence were repaired, while fencing, out-offices, &c., received as much attention as the funds would admit. Many of the schools and residences are at present very much in need of attention, but I am glad to say the matter is now being vigorously attended to. Small schools in particular have fared badly in the past. On the whole, however, the general condition of the buildings may be regarded as fair.

Organisation.

Under this head I have to report matters as generally satisfactory. The accommodation is more than adequate, but with the new regulation of admitting children of 5 years of age, the attendance is likely to increase rapidly, particularly in the smaller schools. The buildings are well lighted and generally properly ventilated. The supply of materials is sufficient in very fair condition, and, as a rule, well cared for by the teachers. The lesson guides I found in every instance complete, but many of them (I mean particularly the Programmes of Lessons) were very indefinite, and therefore almost practically useless. The records were fairly neat, and mostly accurate and reliable.

The time-tables are generally drawn with intelligence. The following table shows the enrolment, &c., for the year :—

Total yearly enrolment.			Average Attendance.			School Fees Received.
Boys.	Girls.	Totals.	Boys.	Girls.	Totals.	
2,794	2,537	5,331	1,600·1	1,435·6	3,035·7	£ s. d. 1,489 4 6

Discipline.

The discipline continues to give satisfaction. The pupils behave themselves in a becoming manner, and are generally obedient and respectful. This, at least, in school. In their playtime I have noticed that they are somewhat noisy and rough, and the teachers in several cases might, with advantage, give more attention to this matter. Of course, there are many schools in the district to which this does not apply; but, after all, the tone of the teacher is that of the scholar. On the average, drill is only tolerably taught.

Inspection.

All the schools under my supervision, for the year, received a regular inspection, except Crown Ridge, which was closed immediately after the schools opened, and before the actual work of inspection began; I received a second regular inspection, and 13 went through an ordinary inspection, while a large number of incidental visits were paid when practicable. I must here express my regret that the ordinary inspections have practically ceased; for the good they did in the past is undeniable. The results of inspection have been, on the whole, satisfactory except in two cases.

Instruction.

Under this head I have to report steady and satisfactory progress; average work has been accomplished, but in several cases I cannot speak too highly of the excellent results achieved. All the prescribed subjects have been taught, except music in a few instances. The skill varies from tolerable to very good.

In my report for last year I made brief reference to the establishment of libraries in connection with the schools under my charge. I then stated that 40 libraries were in operation, with an aggregate of 4,000 volumes. I am happy to say that the movement has since spread all over the district, till now, out of 100 schools, 90 have their libraries, with an aggregate of over 7,000 volumes. The movement is in every respect popular with parents, children, and teachers. The last-named, indeed, recognise a library as a distinct help in their labours.

It is right to state that the funds necessary to purchase the books were all raised locally—by concert, picnic, &c.—and in the most cheerful manner imaginable. A few dozens were added as gifts from parents and sympathisers. The teachers in this section of the district are steady and industrious, and, with very few exceptions, command the respect and esteem of the community.

The pupil-teachers have been favourably reported upon, and have been attentive to their duties. Of those examined last Christmas all passed with the exception of one, who was reported to be in delicate health then, but is now well and strong.

Summary.

To sum up:—

- (a). The means of education are sufficient and well distributed.
- (b). The organization and discipline are generally satisfactory.
- (c). The course of instruction is complete, and carried out earnestly and skilfully.

I, therefore, consider the outlook for 1895 is as hopeful as it has been for any previous year. The usual statistics have already been forwarded.

J. KEVIN,
Inspector.

Inspector's Office, Lithgow, 29th December, 1894.

ANNEX M.

INSPECTOR THOMAS' REPORT.

THE year 1893 closed with 80 schools on my list. One of them, Gorman's Hill West House-to-house, did not re-open so that I commenced the new year with 79 schools in operation, viz. :—

Public Schools	45
Provisional Schools.....	9
Half-time Schools	18
House-to-house Schools	7

During the year the following schools were closed :—Porcupine Gap Public; Paling Yard Creek and Wardry Provisional; Canangles and Grove Half-time; and Flagstone Creek House-to-house. On the other hand, new Public Schools were established and opened at Wyalong, Wyalong West, and Fifield, and a new Provisional School at Lockwood. The conversion of Kadina House-to-house into two Half-time Schools added another school to my list. Several other changes were made in the classification of schools, viz. :—

Warroo Provisional became Warroo Public; Bogan Gate House-to-house and Trundle Public became Half-time Schools under one teacher.

Thus, the number of schools in operation at the close of 1894 is 78, viz. :—

Public Schools.....	47
Provisional Schools.....	7
Half-time Schools	20
House-to-house Schools	4

Three new schools will open immediately after the vacation, so that I shall commence the coming year with 81 schools on my list.

During the year the following applications for the establishment of new schools were dealt with :—

Fifield	For Provisional School	Granted.
Cardungle	For House-to-house School	Declined.
Oakendale	For Provisional School	Deferred.
Milby	"	Declined.
Wyalong	For Public School	Granted.
Wyalong West	"	"
Lockwood	For Provisional School	"
Mount Allen	"	Granted under certain conditions.
Tom's Lagoon	"	" " "
Roundrang	"	Declined.
Cave Creek	For Re-opening as Half-time School ...	"
Sparling Swamp	For Provisional School	Granted.
Muginoble.....	"	"

Of

Of these, Fifield, Wyalong, Wyalong West, and Lockwood have been for some months in operation; Sparling Swamp and Mugincoble will open after the vacation; recommendations have been made, by which Cave Creek will, in all probability, re-open very shortly; and the residents at Tom's Lagoon are taking steps to satisfy the conditions imposed upon them.

Applications for new schools may be expected from various points within the Wyalong Gold-field, but it is doubtful whether they will be dealt with from Wagga Wagga or from Forbes, as they lie on the border line of the two districts.

Of 84 schools that were in operation during some portion of the year, all but 3 received a regular inspection, the uninspected schools (Paling Yard Creek Provisional, Canangles Half-time, and Grove Half-time) closing unexpectedly before I could arrange to visit them.

Six ordinary inspections were made; one school received a second full inspection; and as many incidental visits were paid as circumstances permitted. In addition, I inspected 7 schools for Mr. Inspector Friend, and made one joint inspection with him.

Of the 81 schools in my own district that received full inspection, 73 were above standard, 2 up to, and 6 below. The percentage of schools satisfying the standard was 92, exactly the same result as was achieved in 1892 and 1893.

The organisation of the schools, so far as the teachers can be held responsible, may, on the whole, be regarded as very satisfactory. Inaccurate records, faulty lesson guides, and defective classification are faults rarely met with, though greater pains might, in many instances, be taken to keep the records neat and clean as well as accurate. I have frequently to complain of the rough handling the reading books get, especially in turning over the leaves.

The discipline maintained is reasonably effective, the pupils being generally neat in person, respectful and becoming in demeanour, and attentive under instruction. Military drill is taught in very few schools, interest in the Cadet movement being practically extinct.

Two thousand six hundred and five pupils were examined within the confines of my own district, as against 2,493 in 1893.

Two hundred and eighty-one pupils were examined for certificates of exemption under Sec. 35 of the Public Instruction Act, and 160 were successful.

The preponderance of classified over unclassified teachers continues to increase. Out of 75 adult teachers in my district only 16 are unclassified, and 2 of these have obtained certificates that are to date from 1st January, 1895, while 5 others are ex-pupil teachers. The percentage of classified teachers for 1894 is 78, as against 74 per cent. in 1893.

Fifteen pupil-teachers of all grades are employed in the larger schools. With one exception they all passed their annual examination, thereby gaining promotion to a higher grade.

The material condition of the buildings and premises has received careful attention during the year, and necessary repairs have been effected wherever urgently required. Under my supervision, minor repairs have been effected to 15 school buildings and 4 residences at a total cost of £125 15s. 9d.; while more extensive repairs and improvements have been carried out by the Architect at several of the larger schools. During the coming year I hope to effect material repairs and improvements at several of my schools.

New school buildings were erected at Wyalong and Wyalong West under the Architect's supervision, and, under mine, a new school was built at Fifield, and a new weather-shed at Canowindra. The Architect has in hand extensive improvements and additions at Parkes, a new school building at Deep Lead to replace the old one, and general repairs at Goobang; while I am supervising the erection of school buildings at Sparling Swamp and Mugincoble. The enlarging of the schoolrooms at Wyalong and Wyalong West will, in all probability, be necessary.

On the basis of 8 square feet of floor-space to each pupil, there is accommodation provided for 4,877 pupils, after making due allowance for schools closed, &c. If the basis of 100 cubic feet of air-space is taken, there is room for 4,693. These figures give an increase of 24 and 94 respectively upon those for last year. As the highest quarterly enrolment was 3,700, it will be seen that liberal provision has been made.

Summary.

Number of schools in operation during 1894	84
Number of schools fully inspected	81
Percentage of schools satisfying standard	92 per cent.
Number of pupils examined	2,605
Enrolment during December quarter	3,700
Average attendance during December quarter	2,640
Accommodation provided for.....	4,877
Number of teachers employed	90
Total fees paid in 1894	£1,264 9s. 9d.
Amount of fees in arrear	£49 7s. 3d.
Number of free pupils December quarter	261

The full statistics, upon which the foregoing report is based, have been furnished separately.

In conclusion, I have to express my gratification at the progress made during the year, and I have every reason to think that the coming year will bring forth results equally satisfactory.

Forbes, 29th December, 1894.

W. GEO. THOMAS,
Inspector.

ANNEX N.

DISTRICT INSPECTOR JOHNSON'S REPORT.

THERE were 222 schools in this district at the beginning of 1894. Three new schools were opened during the year, and 3 others were transferred to this from the Sub-Metropolitan District. Fifteen of these 228 schools have since been closed on account of the attendance having fallen below the required minimum. Eighty-one of the 213 still in operation are in the Nowra Section of the district, 58 in the Crookwell Section, and 74 in Bowral Section. It is probable that 4 or 5 small schools will be established during 1895, and when these have been brought into operation the district will be well supplied with the means of education. Existing schools are centrally situated in their various localities, and, except in one or two thinly populated places, no children are beyond a reasonable distance of a school.

Six new schoolrooms were erected during the year, 3 by the Architect and 3 under the supervision of the Inspectors. Many school buildings were repaired and otherwise improved, and several others are now undergoing needful repairs. When these have been completed, the school buildings of the district will be in good condition, and they provide accommodation for 14,767 pupils. This is in excess of that actually required, though in no case is the number of seats greatly above requirements, nor are any schools overcrowded.

Eight small schools were closed early in the year, and before an opportunity for inspecting them offered. These were, in consequence, not inspected during the year. The remaining 220 were fully inspected once, and Mr. Inspector M'Clelland inspected 11 of those in the Nowra Section a second time. 188 schools were found to be above the standard, 6 reached it, and 26 failed to reach it. Of these last, 6 are House-to-house Schools, 7 Half-time, 4 Provisional, and 9 small Public Schools.

The

The following table gives the number of pupils examined in each subject, and the percentages of passes in each :—

	No. Examined.	Percentages of Passes.
Reading	7,141	91·2
Writing	7,141	91·7
Dictation	5,826	72·5
Arithmetic	7,108	73·4
Grammar	2,766	72·1
Geography	2,766	76·3
History	2,766	68·3
Scripture	6,888	78·2
Object Lesson	6,769	79·5
Drawing	7,115	71·5
Music	6,522	65·6
French	21	100
Euclid	282	83·6
Algebra	80	90·0
Mensuration	93	67·7
Latin	69	85·5
Needlework	2,821	90·5
Drill	6,927	67·1
Science	287	96·5

The results are higher in dictation, arithmetic, history, geometry, algebra, and Latin than those for 1893, but in writing, geography, Scripture, object lesson, drawing, music, mensuration, and science they are somewhat lower.

In some of the small schools the teaching is more or less mechanical, and wanting in thoroughness, but in the more important ones the mental culture of their pupils is made a first consideration by the teachers. Irregularity in attendance on the part of some pupils retard their progress, and as a rule those who do badly at examination are those who attend irregularly.

The discipline is most satisfactory in nearly all the schools of the district. Copying, prompting, and idleness, at one time so prevalent, are now almost unknown, while prompt obedience, attention to work, and cheerfulness are marked features. The cane is seldom used, and complaints of severe or undeserved punishment are rarely made by parents.

The teachers of this district are a highly respectable body, and they discharge their duties conscientiously and intelligently.

The material condition of the schools is good, the work being done therein is satisfactory, and equally as favourable results may be looked for in 1895.

W. H. JOHNSON,
District Inspector.

ANNEX O.

INSPECTOR McLELLAND'S REPORT.

At the end of 1893 there were 84 schools in operation in the Nowra section, and during the present year a Provisional School at Bawley Point and an Evening School at Barrengarry were opened. The latter, however, only existed a few months; and the schools at Kiola, Bombo, Brooman, and Clydesdale were also closed. Thus at the end of the year there remain 81 schools in operation, classified as follows:—Public, 73; Provisional, 4; Half-time, 4; total, 81. The country population of this district appears to be declining, slightly but steadily. In many parts the farms are becoming larger, and the young people as they grow up are forced to seek homes for themselves elsewhere; hence it happens that there are actually fewer schools than formerly, and the attendance in many of these is falling away. So far as my knowledge extends, the supply of schools fully meets existing requirements; and the buildings are, with few exceptions, in good repair. Only one new schoolroom has been erected during the year—viz., that at Boolong, where the old premises were worn out. Besides this work done under the Inspector's supervision, miscellaneous repairs and improvements have been effected at 42 schools and 5 residences, at a cost of £337 5s. 2d. Additions are being made to the schoolroom at Robertson, under the direction of the Architect. New residences are in course of erection at Yarrawah, Jerrara, and Robertson—the first-named under the supervision of the Inspector, the others under the Architect.

The accommodation is still in excess of the aggregate enrolment, but in one or two instances the rooms are somewhat overcrowded. These cases are either being dealt with now or will receive attention early in the new year. Floor space is available for 7,003 and air space for 6,229 pupils.

Of the 86 schools open during some portion of the year, 83 received a regular and 10 an ordinary inspection. The schools not inspected were Kiola Public, Bombo Public, and Barrengarry Evening. Kiola was closed in January before the end of the vacation, Bombo in March during my absence in Milton, and Barrengarry Evening School in July before any convenient arrangement could be made for its inspection. One school received a second regular inspection.

Of the 83 schools fully inspected, 74 were above, 4 up to, and 5 below standard requirements. These results are very similar to those of last year. The same uniformity is not observable when the passes in the different subjects for the two years are compared. In reading, writing, and arithmetic the percentages are the same; in dictation they are considerably higher for this year; and in grammar, geography, Scripture, object lessons, drawing, and drill, they are lower. In these last-named subjects the results are not altogether satisfactory, nor is the higher arithmetic as good as it ought to be. In arithmetic, grammar, geography, and history the evil effects of mechanical teaching are bound to show out most prominently, and this tendency to mechanical treatment of their subject is a fault too common with a certain class of teachers. During ordinary inspections it is not unusual to notice lessons degenerate into a series of disjointed questions as to bald isolated facts, apparently devoid of any design in the mind of the teacher to make his pupils think. Useful results cannot be expected from this sort of teaching, nevertheless it is very hard to get some teachers to mend their ways in these matters. Altogether about 50 schools exceeded "fair" for general efficiency, and all of these may be considered to be in a satisfactory condition.

The results of the examinations for exemption certificates are disappointing, and it is to be hoped that a higher percentage of passes will be recorded next year.

The organisation and discipline continue to be creditable features in nearly all of the schools. The teachers are, with few exceptions, industrious in the discharge of their duties, and earn the esteem of the people among whom they are placed. In conclusion, I may say that there is good reason to expect that the standard of work for the coming year will be at least equal to that of its predecessors.

H. D. McLELLAND,
Inspector.

Nowra, 25th November, 1894.

ANNEX P.

ANNEX P.

INSPECTOR SMITH'S REPORT.

I.—Schools in Operation.

At the beginning of the year there were in this section 29 Public, 10 Provisional, 14 Half-time, and 7 House Schools—total, 60 schools. During the year the following changes and alterations in the condition of schools were made:—Flowerburn Public was worked as a Half-time in conjunction with Big Meadow Provisional, and Irishtown Public as Half-time with Monk's Crossing Provisional. The two latter schools, however, are now closed. Hadley was re-opened, and is now worked as Half-time, in conjunction with Leighwood Public. Pomeroy Public was closed early in July, but re-opened in October. Bigga Provisional was reduced to a Half-time and worked with Menindie, and the Green Gully Teaching Station closed for want of a sufficient number of scholars. Red Hill Provisional was also closed early in the year for the same reason. The school buildings at Ferncliffe and Gracemount were removed to more central localities, namely, Byalla and Bannaby Post-office respectively.

The following changes have been sanctioned by the Minister, and will be carried out at the commencement of 1895:—Claremont Half-time will be closed, and Middle Arm Half-time ranked as a Full-time school. Julong Teaching Station will be closed, and Markdale worked with a new station at Mulgowrie Creek. The Junction Station is to become a Provisional School, and to be transferred to the Crookwell Section of the Bowral District. Applications for the re-opening of Gurrundah, Irishtown, Red Hill, and Winduella are under consideration, and will probably be favourably entertained, as the age for admission of children has been reduced from six to five years. In 1895 the number of schools in operation will, therefore, be:—26 Public, 7 Provisional, 22 Half-time, and 8 House-to-House—total, 63 schools.

II.—Material Condition and Accommodation.

The Infant School-room at Crookwell was thoroughly cleaned and painted, at a cost to the Department of £85. Repairs and improvements of a very necessary and substantial character were carried out under my own supervision at Laggan, at a cost of £17 10s. With the above exceptions, the material condition of the schools has been unaltered since 1893, and speaking generally, it may still be described as very fair. The supply of furniture is suitable, sufficient, and in fair order, and all perishable articles adequate for necessary requirements. The school buildings in use at the end of 1894 contained accommodation for 2,112 pupils, allowing 8 square feet for each child, while the greatest enrolment for any quarter of the year did not exceed 2,000. The average attendance for the September quarter (99'1) was the smallest of the four quarters, because of the unusual number of wet days, the bad roads, and the flooded state of the creeks, gullies, and rivers.

III.—Inspection and Proficiency of Pupils.

The number of schools open during the whole or portion of the year 1894 was 62, and of these 60 received a regular inspection. The two schools not inspected were Red Hill Provisional and Phil's Creek House, both schools being closed at the time of my visit; the former on account of the poor attendance of scholars, and the latter on account of the serious illness of the teacher. In addition to these 60 inspections, Myanga Creek Station received a regular inspection as well as Merryvale Station, with which it is worked as one school, because the children were unable to attend both schools. The following table shows the estimated proficiency of the schools with regard to Standard, inclusive of organisation and discipline:—

	Below Standard.	Up to Standard.	Above Standard.	Totals.
(a) Schools in operation a whole year	17	1	39	57
(b) Schools in operation part of a year.....	3	0	0	3
Totals.....	20	1	39	60

IV.—The Teaching Staff.

At the close of the year the teaching staff of this section of the Bowral District comprised 50 principal teachers, 2 assistant teachers, and 1 pupil-teacher, or, as below, in accordance with their classification:—

	1 A.	1 B.	2 A.	2 B.	3 A.	3 B.	3 C.	Unclassed.	Total.
Teachers	0	0	1	0	12	11	8	28	60
Assistants	0	0	0	0	2	0	0	0	2

	1st Class.	2nd Class.	3rd Class.	4th Class.	Total.
Pupil-teacher	0	0	1	0	1

One teacher was dismissed from the Service, after a long and patient enquiry into the charges which had been brought against him. With this one exception, the work of the year 1894 was faithfully performed, and had the weather been more favorable for the attendance of scholars, the results of the inspections would have been equally as good as those in 1893. There is every prospect of satisfactory progress being made in the year to come.

JOHN LESLIE SMITH,
Inspector.

ANNEX Q.

DISTRICT INSPECTOR COOPER'S REPORT.

There were 371 schools in this district at the end of 1893. During the year just ended, 31 schools were closed on account of diminished attendance of pupils, and the Infant's Department at Cooma was merged in the Primary School, and thus lost its independent existence. 19 schools were brought into operation, so that there are now 358 schools on the general list of the district. These are distributed as shown hereunder:—

Section of District.	Schools or Department.		No. of places, allowing for each pupil.		Highest quarterly enrolment.
	1893.	1894.	8 square feet.	100 cubic feet.	
Goulburn	90	88	4,754	4,351	3,817
Braidwood	102	97	4,491	3,678	2,767
Bega	100	95	5,122	4,403	3,592
Yass	79	78	3,853	3,447	2,717
Totals.....	371	358	18,250	15,879	12,893

It will thus be seen that ample accommodation is provided for the children enrolled. The schools are, with few exceptions, well placed, and there is, I believe, no place within this extensive district where even 10 or 12 children can be collected within a reasonable radius in which the means of education have not already been supplied, or will be, when arrangements now in progress are matured. Twenty-six new schools were built during the year, affording space for 496 pupils. Some of these were erected by the residents without any Government aid, while the remainder entailed on the Department an expenditure of £457 1s. 11d.

The following table contains a summary of the attendance of pupils and the payment of school fees:—

Quarter.	Section.	Enrolled.	Average.	Per cent.	Fees paid.			Fees due.			Free pupils.
					£	s.	d.	£	s.	d.	
March	Goulburn	3,766	2,571	68	291	11	6	50	9	0	432
	Braidwood	2,596	1,641	63	172	17	3	41	2	7	204
	Bega	3,447	2,221	64	240	4	4	58	13	3	226
	Yass	2,632	1,725	65	204	14	9	38	16	3	266
	Totals	1894... 12,411	8,158	65	909	7	10	189	1	1	1,128
	Totals	1893... 13,323	9,266	69	1,024	17	11	186	8	6	956
June	Goulburn	3,817	2,810	73	374	4	6	41	10	9	462
	Braidwood	2,604	1,903	73	251	10	9	34	5	9	189

	Yass	2,681	1,853	69	264	18	7	36	9	9	305
	Totals	1894... 12,654	9,134	72	1,254	12	8	163	10	3	1,221
	Totals	1893... 13,430	9,411	70	1,335	9	2	162	6	3	1,019
September	Goulburn	3,747	2,637	70	325	7	11	38	1	1	496
	Braidwood	2,767	1,946	70	227	3	6	38	9	3	235
	Bega	3,551	2,468	69	324	18	0	56	1	0	268
	Yass	2,682	1,762	65	238	2	2	35	12	6	285
	Totals	1894... 12,747	8,803	69	1,115	11	7	168	3	10	1,284
	Totals	1893... 13,013	9,207	70	1,196	15	9	190	1	0	1,036
December	Goulburn	3,725	2,747	73	319	6	5	30	1	1	493
	Braidwood	2,730	2,025	74	243	12	6	36	4	0	258
	Bega	3,592	2,625	73	322	18	7	42	18	4	287
	Yass	2,717	1,904	70	244	0	1	41	15	10	323
	Totals	1894... 12,764	9,301	72	1,129	17	7	150	19	3	1,361
	Totals	1893... 12,582	8,009	64	1,053	14	2	157	14	8	1,074

Although the attendance for the first three quarters shows a falling off as compared with that for the corresponding period of 1893, the enrolment and average attendance increased perceptibly each successive quarter; and, for the last three months, exhibit a decided improvement when contrasted with the figures for the December quarter of the preceding year. The attendance is also characterised by greater regularity than formerly, and may be deemed very fairly satisfactory. Considering the straitened circumstances of many of the people, there is little cause for complaint in respect to the payment of the fees. Included among the pupils are 181 "State children," in regard to whom it is noteworthy that only 19 are in the schools situated in the rural parts of the district, while 162 are in schools in or near Goulburn, the four Goulburn schools having as many as 133 pupils of that class.

Inspection.

The schools or departments which were in operation during the whole year, or part of it, numbered 376. With the exception of two small schools in the Bega section, and two in the Yass section, which were not in operation when the Inspectors visited their neighbourhoods, all these schools were subjected to regular inspection. Two of the schools under my immediate supervision were, for special reasons, regularly inspected a second time. The inspection work is represented hereunder:—

	1894.			1893.		
	Regular.	Ordinary.	Totals.	Regular.	Ordinary.	Totals.
Goulburn section.....	93	+ 12	= 105	90	+ 40	= 130
Braidwood ,,	103	+ 2	= 105	106	+ 32	= 138
Bega ,,	99	+ 8	= 107	102	+ 3	= 105
Yass ,,	79	+ 1	= 80	81	+ 2	= 83
Totals	374	+ 23	= 397	379	+ 77	= 456

It is proper, I think, that it should be explained that the very small number of ordinary, or second inspections, reported for the year, is attributable to the Departmental instruction to Inspectors to confine themselves, for the most part, to one inspection of each school.

The

The general condition of the schools inspected, as evidenced by their organisation, discipline, and attainments of the pupils, is exhibited in the subjoined table :—

Section of District.	Class of School.	Above Standard.	Up to Standard.	Below Standard.	Totals.	Percentage up to or above Standard.	
						1894.	1893.
Goulburn	Public.....	47	3	0	50	100	98
	Provisional	11	1	0	12	100	100
	Half-time	24	2	2	28	93	96
	House-to-house	1	0	0	1	100
	Totals	83	6	2	91	98	97
Braidwood	Public.....	32	0	1	33	97	86
	Provisional.....	15	0	2	17	88	95
	Half-time	44	0	9	53	83	68
	Totals	91	0	12	103	88	79
Bega	Public.....	59	4	4	67	94	92
	Provisional.....	7	1	0	8	100	100
	Half-time	17	4	3	24	87	89
	Totals	83	9	7	99	93	92
Yass.....	Public.....	48	0	1	49	97	89
	Provisional.....	15	1	0	16	100	86
	Half-time	12	1	0	13	100	75
	House-to-house	1	0	0	1	100
	Totals	76	2	1	79	98	87
	Grand Totals	833	17	22	372	94	84

While it is to be regretted that any schools were found to be lower than the standard "tolerable," or 50 per cent. of the maximum mark, it is noticeable that those reported as being above the standard represent 89 per cent. of all the schools examined, an increase of 11 per cent. over the previous year's results. This evidence of advance in the general efficiency of the schools may be deemed encouraging.

In the essential subjects—Reading, Writing, Spelling, and Arithmetic—the high results reported for 1893 have been well sustained, and the general proficiency indicated by this table affords the teachers cause for congratulation on the results of their labours throughout the year.

The examination for Exemption Certificates, begun in 1893, was continued during the past twelve months. All pupils who had not already received such Certificates, but had completed 440 days' attendance in the Third Class, or were enrolled in Fourth or Fifth Classes, were examined in the prescribed subjects, with the following results:—

	Examined.	Passed.	Percentage of Passes.
Goulburn section	388	253	65
Braidwood „	230	131	56
Bega „	338	233	68
Yass „	271	124	45
Totals	1,227	741	60

Of the pupils who, in the previous year, had gained Certificates, 254 remained in the schools, and were present at the Regular Inspections. Of that number, 131 were in the schools examined by me, 14 in the Braidwood, 89 in the Bega, and 20 in the Yass section.

Superior Schools.

Good work continues to be done in the Superior Public Schools of the district. The Fifth Classes in the seven departments of this rank under my direct supervision were required, as in former years, to undergo a written examination on the more advanced subjects, the questions being set somewhat on the lines of the University Junior Examination papers. Although this mode of examination entails extra work in the revision of papers, the labour is, I think, profitably expended. The method is calculated to afford a fairly accurate test of the knowledge of each individual pupil. The children themselves are pleased to be allowed to do their work in this manner, and I find among them a healthy spirit of emulation. The teachers, too, appreciate its value as a criterion of the thoroughness of their instruction, and those of them who think, with Bacon, that writing maketh an *exact* man, accustom their pupils to periodical written examinations on the subjects of the prescribed lessons, and find their reward at the yearly examinations. The attainments of the pupils in nearly all the Superior Schools were found to be satisfactory, while those of the girls of the Goulburn Public School reached a degree of excellence which reflected credit alike on the pupils and the teacher.

Science Lessons.

The arrangements made in 1893 for the teaching of Science, in a practical manner, to the pupils of the Goulburn Superior Schools were carried out also during 1894. The children in the Fifth Classes in five of the departments, numbering about 100, received instruction on Chemistry from Mr. A. J. Sach, F.C.S., the resident master of the local Technical School. The lessons were revised by the regular teachers of the schools, and at the close of the year the pupils were examined on a paper covering the usual first year's course for Technical School students. The results were very satisfactory, and evidence the pupils' appreciation of the great benefits derivable from these special lessons, as well as the skill and painstaking care of Mr. Sach, whose labours have, for the most part, been ably supplemented by the regular teachers in the performance of their part of the work. The pupils of the Goulburn Boys' and Girls' Schools especially distinguished themselves at this examination.

Organisation.

The organisation of the schools for which the teachers are responsible leaves, in general, but little room for complaint. The buildings are, in most cases, well cared for, and kept clean and tidy. The instructional guides are usually found to be drawn with very fair skill and judgment, although in some instances it would appear that the importance of constructing well-arranged programmes of lessons, and strictly observing them, is not fully realised.

Discipline.

With very few exceptions, the schools afford pleasing evidence of sound sense on the part of the teachers in securing and maintaining good discipline, and the moral tone of the schools is, as a rule, very satisfactory.

Teachers.

There were 371 teachers of all ranks employed in the district at the close of the year. These were distributed as indicated by the following table:—

Section.	Teachers.		Mistresses.	Assistants.		Classified.	Unclassified.	Pupil-teachers.		Totals.
	Males.	Females.		Males.	Females.			Males.	Females.	
Goulburn	43	26	6	3	6	66	18	5	12	101
Braidwood	50	22	0	1	5	50	28	1	6	85
Bega	75	9	1	0	5	73	17	4	7	101
Yass	41	31	0	0	3	52	23	2	7	84
Totals	209	88	7	4	19	241	86	12	32	371

As a body, the teachers have given full satisfaction in the discharge of their very important and onerous duties, and, with few exceptions, they enjoy the respect and good-will of the people among whom they labour.

Summary.

The work done during the year has been of a high character, and shows progressive improvement. The educational wants of the district have been fully met, and the prospects for 1895 are very hopeful.

Separate reports from the Inspectors stationed at Braidwood, Bega, and Yass are forwarded herewith.

D. J. COOPER,

District Inspector.

Goulburn, 3rd January, 1895.

ANNEX R.

INSPECTOR NOLAN'S REPORT.

The number of schools in operation in the Braidwood section at the end of 1893 comprised:—

Public	37
Provisional	19
Half-time	46
Total	102

Of the above, 6 were not reopened at the beginning of 1894. During the year 6 schools were permanently closed on account of small attendance. Cooma Infants' Department was amalgamated with the Primary Department, and 8 schools were established in localities previously without the means of education.

This year closes with:—

Public	33
Provisional	16
Half-time	48
Total	97

Two buildings have already been provided for schools to be opened after the Christmas vacation. During the ensuing year a few small schools may be required to meet the extension of population; on the other hand, some of the existing schools will probably lapse on account of diminished attendance.

During the year now closing 10 new buildings (3 to replace old buildings, and 7 in localities where no schools existed before) were erected, 1 was enlarged, and 12 were repaired under inspectoral supervision, at a total cost of £400 7s. 2d. Under the Architect's control 2 new residences are being provided, and 1 is being repaired, the estimated cost of such works being £978. The older and more unsuitable buildings are being gradually replaced by more appropriate structures. There are still, however, several small buildings of a makeshift character, but in most cases they are equal to the changing requirements of their respective localities. Where necessary, active steps are being taken for the improvement of small schools in regard both to comfort and accommodation.

The enrolment and the average attendance for the several quarters of the year were:—

Quarter.	Enrolment.	Average.
March	2,596	1,641.3
June	2,604	1,903.7
September.....	2,767	1,946.5
December	2,730	2,025.1

As 4,491 seats are already available, it will be seen that in respect of adequacy of accommodation existing schools more than meet the requirements of the district.

All the schools (103) in operation during the whole or portion of the year received regular inspection; 12 were found below and 91 above standard requirements; in the previous year, of 106 schools inspected, 22 were below, 3 up to, and 81 above standard—in other words, in 1893, 80 per cent. satisfied and 20 per cent. failed to meet the standard; the corresponding numbers for 1894 are 88 per cent. and 12 per cent.; a comparison discloses a substantial improvement for the present year. Of 230 pupils examined, 145 obtained certificates of being sufficiently educated.

The schools are reasonably well equipped, and the Department's property is carefully guarded. An improvement is noticeable in the general organization, more especially in regard to the classification of the pupils and to the construction of the various lesson-guides. The disciplinary condition is sound, and, speaking generally, the moral tone is pleasing. More attention needs to be paid to the ornamentation of the school premises. In view of the difficulties under which many of the teachers labour, the results achieved during the year may be regarded as satisfactory.

The teachers and assistants employed are thus classified:—

Class 1 B	1
„ 2 A	5
„ 2 B	3
„ 3 A	21
„ 3 B	12
„ 3 C	8
Unclassified	28
Total	78

Pupil-teachers:—

Class 1	4
„ 2	2
„ 3	0
„ 4	1
Total	7

During the year the several members of the staff have evinced commendable attention to their duties; their labours have been attended with reasonable success. The ensuing year gives promise of still better results.

Braidwood, 31 December, 1894.

W. NOLAN,
Inspector.

ANNEX S.

INSPECTOR SHEEHY'S REPORT.

At the close of 1893 there were 79 schools on my list. One of these—Mountjoy Provisional—was not reopened after the Christmas vacation, and three others—Blakney Creek Public, Boambolo Provisional, and Muntoon Half-time—were discontinued in the course of the year, owing to diminished attendance. In April, a new school—Jenkins Provisional—was established at Billabong Creek, county of Clarendon, and towards the end of August, Elizabethfields Half-time was reopened, to be worked in conjunction with Edgerton, three and a half miles distant.

In the classification of schools the following changes were made.—Cunningham Creek Provisional was converted into a Public School, Cooba Creek, Nangus, Gimunderra, Gungahleen (transferred from the Central Section), and Jear Public, together with Griffith's Flat Provisional, were reduced to Half-time rank. At the end of the year there were 78 schools in operation, clas-ified as follows.—

Public	49
Provisional	16
Half-time	12
House-to-House	1

Seven applications for new schools were received and inquired into, viz.—

Place	School applied for	Result
Kangara Creek	Provisional School	Declined.
Mulligan's Flat	"	Half-time granted, conditionally.
Allendale	"	Declined.
Garangula	Public School	Declined at present.
Boggy Creek	Half-time	Under consideration.
Uriarra	Provisional	"
Warroo Road	"	"

For the re-opening of schools that had been closed on account of small attendance five applications were made, and were dealt with as follows —Kenny's Creek Provisional, declined; Mountjoy Provisional, granted conditionally; Elizabethfields Half-time, granted; Blakney Creek Public, granted (to be re-opened in January, 1895); and Boambolo Provisional, reported upon and under consideration.

Inspection.

During the whole or a part of the year 81 schools were open. All, except two (which had been closed before the time for visiting them), were fully inspected. One school received a second regular inspection; and one an ordinary inspection. Their general efficiency (including organization, discipline, and instruction) in relation to the standard (50 per cent. of possible marks) is shown hereunder —

Schools.	Below Standard		Up to Standard		Above Standard.		Total.	
	1893	1894	1893	1894	1893	1894.	1893	1894
Public	6	1	1	0	47	48	54	49
Provisional	3	0	2	1	17	15	22	16
Half-time	1	0	0	1	3	12	4	13
House-to-house	0	0	1	0	0	1	1	1
Total	10	1	4	2	67	76	81	79

Last year the percentage of passes above the standard was 82.7; this year it is 96.2. In 46 schools there is increased efficiency, in 23 retrogression, and in the rest no variation.

Organization.

The organization generally is of a satisfactory character. The lesson guides are, as a rule, judiciously constructed, and the records neatly kept. The cleanliness of the schoolrooms is well attended to, and proper care is taken of the premises and school materials. In the compilation of returns, and especially of those furnished at the end of the year, some teachers are not very careful. Their errors, which are often matters for surprise, always cause inconvenience, and do not tend to promote a favourable opinion of their usefulness.

Discipline.

The government is, on the whole, mild and reasonably effective. In most schools good order is maintained. The pupils are attentive and obedient, and as a rule well behaved.

Proficiency.

In reading, dictation, Scripture, object lessons, and Euclid, the percentages are lower than those for last year, but are higher in all the other subjects. Satisfactory improvement has been made in grammar, geography, and history. In the last subject there is an advance of 15 per cent. in the number of passes.

During the year 271 pupils were presented for exemption certificates and 124 passed the necessary examination. Many of the failures were due to incorrectness in arithmetic, a subject in which there is insufficient revision in the case of pupils working the higher rules. The examination for certificates serves a useful purpose in exposing this defect.

Three schools, Gundagai, Murrumburrah, and Yass Public, were represented at the Junior Public Examination.

Teachers.

The teaching staff at the end of the year consisted of 72 teachers, 3 assistants, and 9 pupil-teachers. Their classification is as follows —

	II A		II B		III A		III B		III C		Unclassified		Total.	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
Teachers	8	0	1	0	14	1	10	11	3	1	5	18	41	31
Assistants	1	..	1	1	0	3
Totals	8	0	1	1	14	2	10	11	3	2	5	18	41	34

Pupil teachers

Class I		Class II		Class III		Class IV.		Total	
Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
1	2	0	3	1	1	0	1	2	7

With a few exceptions the teachers have done good work during the year. As a body their conduct and attention to duty deserve commendation. The record of the pupil-teachers for usefulness and efficiency is very satisfactory.

Accommodation.

Accommodation.

At the end of 1893 there were 3,421 places provided for scholars. In consequence of the closing of four schools, and the giving up of an old building, 95 of these were lost. There were gained, however, 121 places by the erection of new schoolrooms at Tonal and Jenkins, the re-opening of Elizabethfields Half-time, the transfer of a school to my list, and the enlarging of a building. Hence the sitting accommodation at the close of the year consisted of 3,447 places. This is sufficient, except in one locality, where the building is very small, and a new one is required.

The schoolrooms erected during the year are given in the subjoined table :—

School.	Cost.	Places provided.	Supervised by.	Remarks.
Tonal Provisional.....	£ s. d. 70 2 6	23	Inspector ...	Erected to replace old building.
Jenkins Provisional	Nil.	19	Residents ...	This is an old building which was removed from Billabong by the residents.

The following works have been carried out under the supervision of the Inspector :—Repairs and improvements to 24 schools, £116 6s. 4d.; to four teachers' residences, £69 16s. 6d.; and enlarging one schoolroom, £21; total cost, £207 2s. 10d.

There are 5 school buildings undergoing repairs which will cost £36 5s., and an additional room to a teacher's residence at a cost of £49 10s. is in course of erection. Small repairs and improvements to 18 schools have also been sanctioned.

Under the architect improvements at Yass and Gundagai Public Schools have been effected, which cost £69 15s., and additions and repairs to the teacher's residence at Dalton are to be carried out at a cost of £249 4s.

Summary.

Of the schools inspected 96 per cent. were above the standard. In 46 there was increased efficiency, and in most subjects the percentages are higher than they were last year. The educational requirements of the section are fully satisfied, and the prospects for the ensuing year are good.

Yass, 21 December, 1894.

P. F. SHEEHY,
Inspector.

ANNEX T.

INSPECTOR DURIE'S REPORT.

At the close of 1893 there were 100 schools in existence in this section of the Goulburn District, viz., 65 Public Schools, 9 Provisional, and 26 Half-time. During the year 1894, 10 schools were closed. These were Louis' Corner Provisional, and the Half-time schools at Kybean, Kydra, Millpoint, Brown's Camp, Cambalong, Lord's Hill, Bobundarah, Timbery Range, and Thoco. The attendance at all these schools had fallen below that required by the regulations. Five new schools were opened during the year, viz., Burragate Public, Ooranook Provisional and Half-time Schools at Corrowong, Snodgrass and Boco. The Provisional School at Nethercote was raised to the rank of Public during the year. These changes leave 95 schools existing at the close of 1894, made up thus :—67 Public Schools, 8 Provisional, and 20 Half-time.

During 1894, new school buildings at Burragate and Bournda North were erected. Bermagui Public School was enlarged, and improvements at 21 schoolrooms and 8 teachers' residences were completed. A weathershed at Greig's Flat Public was built, and a new class-room under the supervision of the architect was erected at Delegate Public. These changes make the sittings available for pupils in this district at the close of the year to be 5,096.

Attendance.

During this year there were 101 schools in operation, having a total enrolment of 4,501 pupils, and a daily average attendance of 2,486.8.

The attendance for each quarter of 1893 and 1894 is thus shown :—

Quarter.	Enrolment.		Attendance.		Percentage.	
	1893.	1894.	1893.	1894.	1893.	1894.
March	3,664	3,447	2,496.5	2,121.4	68.1	61.5
June	3,762	3,552	2,599.1	2,568.1	69.0	72.3
September	3,701	3,551	2,630.3	2,468.8	71.0	69.5
December	3,473	3,592	2,106.3	2,625.4	60.6	73.0

The attendance during the first quarter of the year was much affected by the heavy rain which fell frequently during that period. At the close of the year the attendance shows a considerable improvement upon that of 1893, and the percentage of average attendance is the highest for the two years.

Inspection.

The following inspections were made during the year :—99 regular, and 8 ordinary. Two schools were not inspected during the year, viz., Jettiba and Boco Half-time. I visited the locality purposely to inspect them, but on account of the absence of the teacher owing to an accident, the schools were closed.

At the regular inspections 338 children were examined for Exemption Certificates, and of these 233 passed the examination satisfactorily and obtained certificates.

The following table shows the condition of the various schools inspected, as compared with 1893 :—

Schools.	Below Standard.		Up to Standard.		Above Standard.	
	1893.	1894.	1893.	1894.	1893.	1894.
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
Public	8	6	28	6	66	88
Provisional	0	0	50	12	50	88
Half-time	10	12	18	16	72	72
All	7	7	27	9	66	84

It will be seen that a substantial improvement in the efficiency of the schools has taken place in 1894. While the percentage of schools below standard is the same as in 1893, there are 84 per cent. above standard as compared with 66 per cent. in that year. It is also gratifying to be able to report that the schools throughout this district still maintain their good character for organization and discipline.

Teachers.

Teachers.

At the close of the year there were employed in the schools of this district 101 teachers of all grades, viz., 79 male and 22 female teachers. They were classified as follows:—

Teachers and assistants—	
Class 1 B	1
" 2 A	9
" 2 B	2
" 3 A	44
" 3 B	13
" 3 C	4
Unclassified	17
Total.....	90
Pupil-teachers—	
Class 1	3
" 2	2
" 3	4
" 4	2
Total.....	11
Grand Total	101

The teachers are all steady and trustworthy, and are, with very few exceptions, held in high esteem by the parents. Almost all are thoroughly devoted to their work.

Summary.

1. The efficiency of the schools is, on the whole, higher than for 1893.
2. The means of education are ample and well distributed.
3. The outlook for 1895 is encouraging.

P. DURIE,
Inspector.

Bega, 28th December, 1894.

ANNEX U.

DISTRICT INSPECTOR LOBBAN'S REPORT.

THERE were 289 schools in operation in the Grafton District at the end of 1893. This number increased during 1894 to 296. At the close of the year there were in operation in the Grafton Section 102 schools, Lismore Section 89 schools, and Port Macquarie Section 105 schools. Although several new schools were established during the year, so many other schools were closed through diminished attendance that the net increase was only 7.

New school buildings were erected at Copmanhurst, West Ulmarra, Chambigne, and Dingle in the Grafton Section; at Burringbar, Fernleigh, Gay's Hill, Yorklea, and Nandabah in the Lismore Section; and at Euroka, Korribakh, Collumbatti, Gannon's Creek, Utungun, and Wallingat in the Port Macquarie Section.

Owing to the closing of certain schools and the giving up of several rented buildings, the increased accommodation supplied by new premises and additions to old ones provided only 304 additional places. There is, however, room in the existing buildings for 17,955 pupils. In most of the school-houses the accommodation is adequate; a few may require enlargement during this year. Excellent vested premises were erected under the Architect's supervision at Euroka and West Ulmarra. The expenditure on new buildings, repairs, and improvements under Inspectoral supervision amounted to £2,264 18s. 10d., viz., Grafton Section, £1,196 19s. 5d.; Lismore Section, £524 17s. 11d.; and Port Macquarie Section, £543 1s. 6d. Most of the school buildings are substantial and in very fair repair. Several residences were enlarged, and considerable improvements were made to school premises wherever such a course was found necessary.

All the schools in the district, except two which were closed early in the year, were regularly inspected; and 9 ordinary inspections were made by Mr. Wright in his section. Mr. Board assisted me in the inspection of the Superior Public School at Grafton, and he inspected, in addition to the schools in his own section, the Public School at Mororo, in the Grafton Section. Several of the principal schools on the Clarence River were visited by the Chief Inspector, and the new Public School at Ulmarra West was formally opened by him.

There were 10,634 pupils present at the regular inspections, viz., 3,707 in the Grafton Section, 3,676 in the Lismore Section, and 2,675 in the Port Macquarie Section. In most cases the results were encouraging. The Superior Public School at Grafton ranks first in extent of curriculum as well as high attainments.

Of the 303 schools inspected, 281 were up to or above the standard, viz., 97 in the Grafton Section, 86 in the Lismore Section, and 98 in the Port Macquarie Section. Of the 22 schools below standard, 6 were in the Grafton Section, 6 in the Lismore Section, and 10 in the Port Macquarie Section. Most of the schools below standard are very small, and some of them had only been a short time in operation when they were inspected. The percentages of passes in the various subjects is shown in the subjoined table for the past two years:—

Subjects.	1893.		1894.	
	Number Examined.	Percentage.	Number Examined.	Percentage of Passes.
Reading	10,651	87	10,634	90
Writing	10,678	87	10,634	88
Dictation	8,469	82	8,913	80
Arithmetic	10,518	76	10,508	72
Grammar	4,094	77	4,072	76
Geography	4,097	81	4,069	77
English History	4,097	74	4,061	75
Australian History	1,062	81	1,314	81
Scripture	10,334	77	10,261	80
Object Lesson	10,576	78	10,470	81
Drawing	10,593	78	10,429	82
Vocal Music	10,280	75	9,903	79
French	65	92	61	93
Euclid	494	81	483	81
Algebra	91	82	102	82
Mensuration	483	65	537	65
Latin	91	85	81	80
Trigonometry	3	100
Needlework	3,887	85	3,921	88
Drill	10,655	78	16,611	80
Science	425	87	144	92

From these figures it can be seen that arithmetic and mensuration are the subjects least satisfactory. In many branches, however, creditable proficiency has been attained.

The organisation in most schools is good, although more attention needs to be given to the arrangement of the timetables so as to secure a judicious distribution of oral instruction. A closer observance of the standards would prevent teachers from selecting for object lessons, such worn-out subjects as the "camel," "elephant," &c. Although the records are, as a rule, neatly and correctly kept, errors frequently occur in the returns furnished, causing delay and inconvenience which ordinary care would prevent. With rare exceptions, the schools are under healthy discipline, and the instruction is usually imparted with zeal and ability.

In 1893, 14 pupils passed the University Examinations. In 1894, 1 senior and 23 juniors passed. The following schools were successfully represented:—Chatsworth Island Public, 1 junior; Grafton Superior Public, 17 juniors (including 5 matriculants); Kempsey East Public, 1 junior; Kempsey West Superior Public, 1 senior; Lismore Superior Public, 2 juniors; Maclean Superior Public, 2 juniors. No pupils passed from the Superior Public Schools at Port Macquarie and Taree.

As a rule, there are few children within reach of school who are not enrolled. About 75 per cent. attend regularly. The number of defaulters during the year was comparatively small, and very few prosecutions were instituted.

Owing to losses by floods in some cases, and want of employment in others, a large number of parents had to obtain free education for their children, and a considerable amount of school fees in arrear had to be cancelled.

The school banks have made fair headway notwithstanding the general depression.

The Public School Boards continue to perform their duties with considerable zeal, and in many cases the local supervision is very effective.

There are 299 teachers and assistants on the Staff, and 66 pupil-teachers. With very few exceptions the teachers are sober, industrious, and competent. Most of the pupil-teachers do good work. A few are, however, not sufficiently studious, and consequently fail at the Annual Examination. This may, in some degree, be due to the want of systematic and efficient instruction on the part of their teachers.

The existing schools fairly meet educational requirements at present, and provision will be made for the establishment of schools in new centres of settlement as they are needed.

The outlook for the future is encouraging.

Sydney, 9th January, 1895.

A. LOBBAN,
District Inspector.

ANNEX V.

INSPECTOR WRIGHT'S REPORT.

OF the 109 schools in operation at the end of last year (*vide* Report for 1893), 8 on the Nambucca River—*viz.*, Argent's Hill, Bowraville, Macksville, Missabotti, Nambucca Heads, Nambucca Lower, Simpson's Ridge, and Valla—were transferred at the beginning of 1894 to the Grafton Section, so that this year commenced with 101 schools in operation. During the year, 7 new schools were opened, *viz.*, Collombatti, Gannon's Creek, Utungun, Wallingat (Provisional), and Bobin Flat, Glenora, and Nullenbullah (Half-time), and 3 have been closed, owing to diminished attendance, *viz.*, Forster Provisional (Aborigines), and Livingstone and Lonely Point (Half-times), so that there are now 105 schools at work, and these are classified as follows:—

Public Schools	73
Provisional Schools	14
Half-time Schools	18
Total	105

The establishment of schools at Lorne, on the Camden Haven River, and on Taylor's Arm of the Nambucca River, has been sanctioned by the Minister, and the schools at these places will be brought into operation early in 1895.

Accommodation.

Deducting 345 places provided in the schools transferred from this section from the 6,630 places available at the end of last year, there was accommodation at the beginning of 1894 for 6,285, allowing 100 cubic feet of air-space for each pupil. During the year, 169 places were lost by the closing of schools, &c., and 360 places were gained by the erection of new buildings, &c., the net gain for the year being 182 places. Accommodation is now provided for 6,476 children; and as the gross enrolment for the year was but 5,302, ample provision has been made to meet the requirements.

Condition of School Property.

The teachers have, as in past years, proved careful tenants, and the property of the Department has not been neglected while under their charge. Ordinary wear of the buildings has, of course, taken place; and as most of the schools are constructed of wood, and have not undergone a general overhaul for some time, painting, &c., is in many cases necessary. Otherwise the buildings are, generally speaking, in fair repair. A number of teachers continue to interest themselves in tree-planting and gardening, in some instances with marked success, but less attention seems to have been devoted to these subjects this year than formerly.

Works done under Inspector.

A sum of £543 1s. 6d. was this year expended under the supervision of the Inspector—£252 in the erection of 5 new buildings, £50 in enlarging 1 schoolroom, £197 8s. 9d. in repairing 23 schools, and £43 12s. 9d. in repairing 9 residences. For works now in progress, a further sum of £161 2s. will be required—£144 5s. for the erection of 3 new buildings, and £16 17s. for repairs to 2 schools.

Inspection.

All the schools (108) open during the year received a regular inspection, and 9 ordinary inspections were held. Ninety-seven of the schools were above, 1 up to, and 10 below standard requirements—that is, 90·7 per cent. of the schools in the district are in a satisfactory condition. Compared with 1893, there is a falling off of 1·6 per cent., a result almost wholly attributable to the epidemic of measles and influenza which visited this district during the year, and interfered materially with the regular attendance of the pupils and the work of the schools. The most efficient schools were:—

1. Smithtown Public.
2. Wingham "
3. { Kempsey West Superior Public.
 { Taree " "
4. { Gladstone Public. " "
 { Pelican Island Public.

Only 2 pupils were successful at the University Public Examinations, *viz.*, 1 senior from West Kempsey Superior Public, and 1 junior from East Kempsey Public.

Attainments.

In a number of subjects, notably reading, writing, and dictation, the results are below those obtained last year, but this falling off is due principally to the irregularity of the pupils through the epidemics previously referred to.

Teaching

Teaching Staff.

There are altogether 120 teachers employed in the schools of this section—viz., 96 principal teachers, 7 assistants, and 17 pupil-teachers. Their classifications are shown hereunder:—

Position.	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Un-classified.	Total.
Teachers	0	1	17	7	27	11	5	28	96
Assistants	0	0	0	0	5	0	0	2	7
	1st Class.		2nd Class.		3rd Class.		4th Class.		
Pupil-teachers	4		1		6		6		17
Total Teachers of all ranks									120

As a body, the teachers are capable and painstaking. They are studious in their habits and diligent in the discharge of their duties, and both as teachers and citizens they have given very little cause for complaint.

Summary.

The schools established and authorised provide adequately for the legitimate educational requirements of the district, and very satisfactory work has been done this year. The prospects for 1895 are very favourable.

STEWART WRIGHT,

Inspector.

Port Macquarie, 28th December, 1894.

ANNEX W.

INSPECTOR BOARD'S REPORT.

At the end of 1893, 89 schools were in operation in this section. During 1894 a Public School at Burringbar, two Provisional Schools at Yorklea and Fernleigh, and a Half-time School Nandabah have been brought into operation, while Provisional Schools at White Swamp and Byangum, which had been closed for some time, have been reopened. On the other hand, the Public School at Woodlawn, Provisional Schools at Petty Gully, Wooram, and Granuile, and Half-time Schools at Bungabee and Drighlington have been closed owing to diminished attendance. The year 1894 closes with 89 schools in operation, with an aggregate enrolment of 4,549 pupils, and sitting accommodation for 5,344.

Increase of settlement in the district and movements of population, caused by the construction of the Lismore-Tweed railway, have led to numerous applications for the establishment of small schools and for the reopening of schools which had been closed. These applications have resulted as follows:—

Fernleigh, Provisional	Granted.
South Ballina, Provisional	Declined.
Crystal Creek, Provisional	Granted.
Tunstall, Provisional.....	Declined.
Tyagarah, Provisional	Granted.
Nandabah, Provisional	Half-time granted.
Ellangowan, Half-time	Declined.
South Gundurimba, Half-time	Declined.
Kyogle and Brighlington, Half-time	Granted conditionally.
Stony Creek, Provisional	Declined.
Fairy Hill, Provisional.....	Granted.
Wiangarie, Provisional	Declined.
Goolmangar, Provisional (reopening).....	Declined.
Byangum, Provisional (reopening).....	Granted.
Teven, Provisional (reopening)	Granted.

An application for a school at Norton's Gap and a renewed application from South Ballina are still under consideration. The schools at Fernleigh, Byangum, and Nandabah have already been opened, and early in the new year schools will be brought into operation at Crystal Creek, Tyagarah, Kyogle, Drighlington, Fairy Hill, and Teven. A Half-time School at Rowland's Creek, to be worked with Byangum, will be opened after the Christmas vacation.

With very few exceptions the school buildings are in good condition and are adequately supplied with teaching apparatus. New school buildings are in course of erection, under the supervision of the Architect, at Rous Mill and Tuckombil. During the year, under the Inspector's supervision, four small schools have been erected at a cost of £64 10s., necessary additions and repairs have cost £412 3s. 5d., and two weathersheds £48 4s. 6d. A teacher's residence at Cudgen is approaching completion.

In the course of the year 92 schools received a regular inspection; 2 schools, closed before an opportunity of visiting them occurred, were not inspected. The results of inspection with regard to the various subjects of instruction have been furnished to the District Inspector.

In most subjects the proficiency has been well sustained, but the decrease of passes in dictation and arithmetic, though slight, is not a satisfactory feature in these results.

The organisation and discipline of the schools are of a pleasing character; in many instances the attention being given to the cultivation of school gardens is exercising a wholesome influence, and the establishment of school libraries is, in the case of some schools, taking the place of the distribution of books as prizes.

The teaching staffs in this section comprise 86 principal teachers, 2 mistresses, 8 assistants, and 20 pupil-teachers, in all 116 teachers. Instances of neglect of duty have been rare, while many teachers bring to their work commendable earnestness and enthusiasm.

In all its aspects the educational work of the past year affords good ground for expecting further progress.

P. BOARD,

Inspector.

Lismore, 31st December, 1894.

ANNEX X.

DISTRICT-INSPECTOR T. DWYER'S REPORT.

At the beginning of 1894 there were 290 primary schools and departments in operation in this district. During the first quarter of the year the Department determined to reduce the number of schools in Maitland district, and to work it with three Inspectors instead of four. The following alterations were then made—7 schools in and around Murrurundi were transferred to Armidale district; 15 in the valley of the Upper Goulburn to Wellington; and 33 round Wollombi Mount Vincent, and Lake Macquarie, to the Sub-Metropolitan district; 15 schools in the Maitland section were added to Newcastle; and 56 schools of the late Muswellbrook division were placed under my immediate supervision.

The number of schools in operation in each section of the district during same portion of the year is as follows:—

Section of District.	Public.	Provisional.	Half-time.	House-to-house	Evening Public	Total.
Maitland	70	7	10	1	0	88
Newcastle	64	1	0	0	0	65
Dungog	60	9	10	3	0	82
Total	194	17	20	4	0	235

Applications for a Provisional School at Oakvale, and for Half-time Schools at Glenrock and Fairview, were declined. Arrangements have been completed for working Oakvale as a Half-time School in conjunction with Doyle's Creek. During the year the sum of £478 3s. 5d. has been expended in repairing 49 schools and residences by the District Inspector in the Maitland section, and an expenditure of £127 10s. 9d. has been authorised for improving 8 schools and 3 residences in the same section.

For improvements effected in Newcastle and Dungog sections, see Inspectors' reports on these sections.

Existing schools are, on the whole, centrally situated, and afford more than sufficient space for the highest average attendance during the year. The total amount of floor space for the 3 sections of the district is 24,482, and of cubical spaces 26,190.

The organisation and discipline maintained in the schools of this district are satisfactory and improved.

The work of inspection for the year is shown in the following table:—

Section of District.	Regular Inspections.	Second Regular Inspections.	Ordinary Inspections.	Total.	Number of Pupils examined.
Maitland	88	0	4	92	4,602
Newcastle	65	0	2	67	9,200
Dungog	82	2	4	88	2,679
Total	235	2	10	247	16,481

The conditions of the inspected schools in relation to the standard is as follows:—

Class of School.	Above.	Up to.	Below.	Total.
Public	181	4	9	194
Provisional	16	...	1	17
Half-time	17	2	1	20
House-to-house	2	...	2	4
Total	216	6	13	235

It appears from the above table that 98 per cent. of the schools in the Maitland District satisfied or exceeded the standard. For 1893 the percentage was 92.

The names of the Superior Public Schools in this district, and the number of pupils from each, that succeeded in passing the Junior University Examination for 1894, are given hereunder:—

School.	Class of School.	Boys.	Girls.	Total.
Dungog	5	1	2	3
Hamilton	1	2	...	2
Maitland East	3
Maitland West	1	3	...	3
Minmi	2
Newcastle	1	8	4	12
Plattsburg	2
Raymond Terrace	5
Singleton	2
Wallsend	1	3	...	3
Wickham	1
Total	17	6	23

Two successful juniors were sent up from the West Wallsend Public School. This makes a total of 25 juniors from 6 schools. Last year 1 senior, and 38 juniors passed from 11 schools.

The proficiency of the pupils examined in each subject of instruction, and the percentage of those who satisfied or exceeded the standard are shown in the following table :—

Subjects.	Number examined.	Percentage.	Subjects.	Number examined.	Percentage.
Reading—			Grammar—		
Alphabet	1,653	84	Elementary	3,723	79
Monosyllables	2,819	84	Advanced	3,538	74
Easy narrative	5,346	85	Total	7,171	78
Ordinary prose	6,663	86			
Total	16,481	85	Geography—		
Writing—			Elementary	3,268	80
On slates	6,098	87	Advanced	3,903	77
In books and on paper.....	10,383	85	Total	7,171	78
Total	16,481	86	History—		
Dictation	13,441	85	English	7,090	77
Arithmetic—			Australian	1,011	78
Simple rules	10,083	73	Scripture and moral lessons	15,785	82
Compound rules	3,450	68	Object lessons	16,159	82
Higher rules	2,905	65	Drawing	16,382	78
Total	16,438	70	Music	15,454	82
			French	274	71
			Euclid	1,304	73
			Algebra	248	75
			Mensuration	367	77
			Latin	232	75
			Trigonometry	17	88
			Needlework	5,905	86
			Drill	15,741	80
			Natural science	282	85

Compared with last year, mensuration is better by 10 per cent. Writing on slates, and elementary grammar have advanced 6 per cent. Monosyllables are better by 5 per cent. Easy narrative and elementary geography, by 4 per cent. Scripture has advanced 2 per cent., and dictation 1 per cent.

Writing on paper, compound rules of arithmetic, objects, drawing, needlework, and drill are the same as for 1893.

Algebra has fallen 11 per cent., Latin 7 per cent., Natural science, 6 per cent., French 5. Advanced geography, and Australian history are not so good by 4 per cent. Euclid shows a falling off of 3 per cent. Advanced grammar, and the simple rules of arithmetic are down by 2 per cent., the higher rules of arithmetic, music, and English history are below last year's marks by 1 per cent.

The number of teachers, assistants, work-mistresses, and pupil-teachers employed in this district amounts to 463. With few exceptions, they are good workers, studious to a reasonable extent and of satisfactory character.

The classification of the teachers, assistants, and pupil-teachers employed in this district is indicated in the subjoined table :—

	I A.		I B.		II A.		II B.		III A.		III B.		III C.		Un-classified.		Total.		Grand Total.		
	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.			
Principal teachers	7	0	9	0	23	1	17	1	46	7	15	8	9	9	16	18	142	44	186		
Mistresses of Departments	0	2	0	5	0	30	0	0	0	0	0	0	0	0	0	0	0	0	37	37	
Assistants	0	0	6	0	12	22	7	9	0	24	0	7	0	2	0	18	25	82	107		
Total	7	2	15	5	35	53	24	10	46	31	15	15	9	11	16	36	167	163	330		
	I.		II.		III.		IV.		Pro-bationers.												
Pupil-teachers	19	27	15	23	9	20	2	4	3	0							48	74	122		
Workmistresses	11	11
Total teachers of all ranks																			215	248	463

Summary.

One new school was opened during the year. The sum of £1,304 12s. 8d. has been expended in effecting improvements to schools and residences under the Inspector's supervision, and a further sum of £301 11s. 3d. is being spent in improving other school premises. Accommodation exists for 24,482 pupils. Every school in the district had a regular inspection. The condition of the Primary Schools in the Maitland District is satisfactory and improved.

East Maitland, 3rd January, 1895.

T. DWYER,
District Inspector.

ANNEX Y.

INSPECTOR FLASHMAN'S REPORT.

At the commencement of this year 15 departments, with an enrolment of about 2,700 pupils, were added to this section, and the schools at Toronto, Teralba, Swansea, and Catherine Hill Bay, were withdrawn. No additional school has been opened during the year. One application for an evening school was declined.

During the whole year 65 departments have been under my supervision. The quarterly enrolment has been as follows:—

March	11,850 pupils
June	11,624 "
September	11,613 "
December	11,586 "

The direction of the Minister, which was in force for nine months of the year, to exclude from the schools all applicants for admission under 6 years of age, had the effect of considerably reducing the attendance at some schools.

The Ash Island School was enlarged by the addition of a class-room. The residence at Minmi has had two rooms added to it, and a very commodious weathershed is being erected at the Superior Public School, Newcastle.

The school accommodation provided in this district is for 14,492 pupils, which is quite sufficient for present requirements. The schools are well placed, and within easy distance of most of the school population.

On the whole the property of the department in this section is now in a good state of repair. Many of the schoolrooms teachers' residences, and play grounds have, during the past twelve months, undergone extensive repairs, either under the Architect's supervision or my own.

In most cases the teachers are not only vigilant in their supervision of the school property, but they show an active interest in improving the general appearance of the school surroundings. There are other teachers, however, who appear to take but a perfunctory interest in the property entrusted to their care.

Many of the play grounds present at certain seasons of the year quite an attractive appearance. Their neat and well-stocked gardens are not only a delight to the pupils, but a source of pleasure to the neighbours. Among the best kept gardens are those at Young Wallsend, Jesmond, Adamstown, Charlestown, and Wickham.

A few months ago a complete set of gymnastic appliances was erected in the play ground of the Newcastle Superior Public School. This has proved a source of much attraction to the pupils, and has provided them with a means of healthy exercise. It is much to be regretted that more play grounds are not provided in a similar manner.

All the schools under my supervision were inspected once during the year. I was unable to visit many of the schools a second time. In most cases, I found the organisation of the schools in a very satisfactory condition; the school-rooms present an attractive appearance, and a general attention to detail on the part of many teachers is evident to the most casual observer. In several cases I have had to complain that children have been unwisely promoted; the test of attainments giving place to that of size or age. This is a matter for which the principal teacher is solely responsible. It seems to me very unfair, especially to pupil-teachers, to expect them to produce satisfactory results when many of their pupils have been promoted for other considerations than those of attainments. The time-tables, as a rule, are well drawn; they are compiled with a due regard to the relative importance and difficulty in teaching the various subjects. In a few cases, the chief merit of the time-table consists in the elaborate and artistic manner in which it has been drawn and mounted.

Frequently the programmes of lessons are not drawn out in sufficient detail, and too much is left to the discretion of junior teachers. On more than one occasion have I had to complain that unsuitable selections of poetry were given to the pupils to commit to memory, and that there appeared no fixed plan in teaching such subjects as mental arithmetic, elementary geography, and grammar.

A careful inspection of the programme of lessons in a well-conducted school reveals in no uncertain manner the methods adopted by the teacher in dealing with the various school subjects. Few teachers appear to realise that it is through the programmes that the principal teacher is enabled to exercise a beneficial and controlling influence upon each member of his staff; if they are carefully drawn the whole school has the benefit of his guidance, experience and skill. But if, on the other hand, they are carelessly drawn, perhaps by an inexperienced pupil-teacher, and simply signed by the principal, it would have been just as well had they not been drawn.

The discipline maintained in the schools continues to be of a most satisfactory character. Very few cases of unwise corporal punishment have come under my notice. The government of the schools is mild, sympathetic, and judicious, and the general tone of many is of a most pleasing character. The best teachers have very little trouble in inducing their pupils to study, or in maintaining a high standard of efficiency, while the pupils are as jealous of the reputation of their schools as the teachers are anxious to obtain good reports.

No school in this section was found to be below the standard in attainments. A few, however, did not reach the requirements expected of them, in view of the classification of the teachers in charge.

Arithmetic is a weak subject in many schools; this fact has been prominently brought under the notice of the teachers in the tests for "Exemption Certificates." Many scores of pupils satisfied the requirements in all other subjects, but failed in arithmetic. The consequence was that only 525 certificates were issued during the year. If the arithmetic had been more satisfactory at least three times that number would have been issued.

In consequence of the financial depression in this section but few teachers were able to induce their pupils to compete at the University Public Examinations. The following schools sent successful candidates:—

Newcastle Superior	8 boys, 4 girls.
Hamilton Superior	2 boys.
Wickham Superior	1 boy.
West Wallsend Public	2 boys.
Wallsend Superior	3 boys.

During the year the Cookery Class, established at Newcastle, gave instruction to 120 girls, all over twelve years of age and drawn from the surrounding Public Schools. This class is so popular that I have frequently very great difficulty in selecting pupils from the large number anxious to attend. The teachers employed in this section are as under:—

	Class I.		Class II.		Class III.			Unclassified.	Total.
	A.	B.	A.	B.	A.	B.	C.		
Principal teachers...	6	6	9	4	7	2	34
Mistresses	1	3	26	30
Assistants	5	26	13	15	3	2	13	77
	7	14	61	17	22	3	2	15	141

All the the teachers and assistant teachers in this district are persons of high character. Some of the most valued servants of the Department are employed in this section. They are teachers of superior attainments and wide experience, and not only do they faithfully discharge their official duties but they exercise a beneficial influence in the neighbourhood in which they are placed.

There are 35 male and 48 female pupil-teachers employed in this section. These young persons are respectable and, in most cases, very intelligent; many of them exhibit considerable natural teaching power, and are likely to develop into useful members of the profession of their choice. The importance of the work they are doing can hardly be over estimated. As a body I have found them willing to take advice and most anxious to carry out suggestions to the best of their ability.

At their annual examination all but two were successful and were promoted. For the first half of the year weekly classes were conducted for all pupil-teachers in French, Latin, drawing, and singing. In June it was decided to at once discontinue the singing and drawing classes, so that during the latter part of the year French and Latin alone have been taught. These classes will not be continued during next year.

The work of the year has been satisfactory, and the prospects for 1895 are favourable.

Newcastle, 27th December, 1894.

C. O. FLASHMAN,
Inspector.
ANNEX Z.

ANNEX Z.

INSPECTOR WATERHOUSE'S REPORT.

In the Dungog Section of the Maitland District 83 schools were in operation during the whole or some portion of the year.

Sugarloaf Creek House Station was closed early in the year in consequence of the small attendance, and Binglebrah House Station, with which it had been worked, was then ranked as a Provisional School. It was also found necessary to close Burraduc Public School on account of the great falling off in the attendance.

The schools in operation at the close of the year were classified thus :—

Public	60
Provisional	9
Half-time	10
House-to-house	3
Total	82

Of these, 1, viz., New Glanmorgan, situated in a locality where no school previously existed, was opened last November. At Tea Gardens, a new school building was erected to replace an unsuitable rented building; the schoolroom at Woerden was lengthened. Twenty-one schools and 7 residences were repaired and improved, under the Inspector's supervision, at a cost of £231 12s. 9d; 5 other buildings are now being repaired and improved, at a cost of £125.

The means of education, both as regards amount and distribution, are adequate. The buildings afford accommodation for 4,786 pupils, reckoning 8 square feet for each, or, for 4,446, if an allowance of 100 cubic feet of air-space for each be made, whilst the highest average attendance during any quarter of the year was only 2,451 pupils.

All the schools were fully inspected, 2 of the least satisfactory undergoing a second regular inspection; 4 ordinary inspections were also held. I am indebted to Mr. Inspector McLelland for relieving me of 6 regular inspections. Of the 83 schools inspected, 70 were above standard, 3 up to standard, and 10 below standard; that is, 88 per cent. satisfied or exceeded standard requirements; last year the percentage was 87.

The results of the inspections, on the whole, compare favourably with those obtained last year.

Three of the pupils of the Dungog Superior Public School passed the University Junior Examination.

Arboriculture and horticulture have been affected by the slight rainfall that has taken place since last March. At the time of my visit the most attractive and best kept flower gardens were those at Merannie, Raymond Terrace, and Stroud; at the latter place the children, under the teacher's supervision, have erected a substantial bush-house, which is well stocked with ferns and epiphytal orchids. The senior pupils at Clarence Town, Euwylong, and Raymond Terrace are being initiated into the mysteries of bee-keeping.

There are 90 teachers of all ranks employed in this section of the Maitland District, the large majority of whom are capable, energetic, and conscientious in the discharge of their duties.

The general organisation and discipline of the schools are satisfactory, and in many cases highly creditable; the general results indicate that useful work has been done during the year, and there is every reason to anticipate that the work of 1895 will be sound and progressive.

Dungog, 28th December, 1894.

J. WATERHOUSE,
Inspector.

ANNEX ZI.

DISTRICT INSPECTOR LAWFORD'S REPORT.

THE boundaries of the district are the same as they were last year, and the four different sections are in charge of the same officers.

The number of schools has slightly decreased; in 1893 there were 328 schools in operation, in 1894, 320, viz. :—

Public	227
Provisional	40
Half-time	43
House-to-house	9
Evening	1
Total	320

Eleven of these are new schools.

All were fully inspected excepting 2 small Provisional Schools in the Young Section, which were closed for want of attendance in the first quarter of the year, while the Inspector was absent on sick leave.

In point of efficiency their condition is slightly better, 291 schools out of 318 examined being up to standard requirements, or 91 per cent. as against 90 per cent. in 1893.

In the Wagga Section, consisting of 73 schools, the following work was done under the Inspector's supervision :—

	£	s.	d.
Repairs, &c., to 22 schools.....	265	16	11½
" 6 residences	180	7	6
New brick school at Frampton (late Cungegong), to replace the old wooden one ...	148	5	0
New school at Big Mimosa	65	0	0
Addition to Pleasant Hills (late Munyabla)	49	17	6
Total	£709	6	11½

Under the Architect a new residence has been built at Coolamon, and substantial improvements effected at Jerilderie.

I am happy to be able to report that during the past ten years a very great improvement has taken place in the construction of teachers' residences. The old style at bush schools of a cottage with only four rooms, each about 10 feet square, generally built in one block with the school, is quite out of date. The houses now built are larger, always detached, and are provided with conveniences such as a bathroom, which ten years ago would have been considered as wholly unnecessary luxuries.

Three schools collapsed for want of attendance during the year, viz., the Half-time Schools at Eurandelong, Lalla Rookh, and Summerhill; and the Half-time School at Mimosa East will not be re-opened in 1895.

Applications for new schools at Pinkerton, near Cootamundra; Langwell, near Bethungra; East Lynne, near Berry Jerry, and Jackson's Waterholes, near Narrandera, were declined; but it is probable that a school will be established at Jackson's Waterholes, under modified conditions, during 1895, and that the school at Millenbong will be reopened at a new site.

A new school was opened at Big Mimosa, and another will open in January at Wantabadgery.

As regards accommodation, there is plenty of room for allcomers. The year's work has been a good one, and there is no reason to anticipate any less successful results for the future.

Wagga, 7th January, 1895.

L. E. LAWFORD,
District Inspector.

ANNEX Z2.

INSPECTOR FRIEND'S REPORT.

THERE were at the beginning of this year 95 schools in existence under my supervision; 3 new schools (Stockinbinga Public, Reefton Public, and Wedallion Provisional) have since been established; and a like number (Calabash, Grogan, and Memagong Provisionals) closed in consequence of insufficient attendance. The number in actual operation now is, therefore the same as at the commencement of the year. It has been decided to establish a Provisional School at Hillmont, and the advisableness of opening one at Binni Creek, and of re-opening Memagong Provisional, is under consideration.

Of the 98 schools in operation during any part of the year, 96 received a regular inspection; the other 2 (Calabash and Grogan) ceased to exist during the first quarter, before they could be subjected to the usual test. Seven underwent an ordinary inspection. Of the 96 regularly inspected, 89 were found above, 2 up to, and 5 below standard—a somewhat better result than that obtained last year. I wish here to place on record my indebtedness to Messrs. Lawford, Thomas, and Sheehy for the ready and valuable assistance rendered by them in the inspection of 22 of my schools, in consequence of my lengthy illness, the result of a serious buggy accident in December, 1893.

The "estimated proficiency of pupils" discloses a steady improvement in the majority of the subjects taught; the advance is the most noticeable in algebra.

Some of the more common faults in teaching, and the results attendant thereon, may properly be mentioned here:—

(a.) The mechanical part of reading is, as a rule, well executed; but the treatment of the subject matter and text is too often unprofitable. Some teachers still fall into the error of covering more ground than that set down in the standards, with the result that the work is not done as intelligently and thoroughly as might be desired, and their pupils fail to acquire that intimacy with words, and that useful general knowledge, which properly conducted reading lessons would be the means of insuring.

(b.) The results in spelling, dictation, parsing, and analysis, meet the standards very fairly; but many of the pupils, when required to express themselves in original composition, make blunders in spelling and in the construction of sentences, though they could point out the errors if asked to do so. As a matter of fact, the pupils are not always trained to be accurate in placing their ideas upon paper, and their efforts are too often reviewed with insufficient care. I have endeavoured to correct faulty methods of dealing with the subject, and instructed the teachers concerned to give due prominence to this important branch of the school course.

(c.) In many instances pupils have passed well in higher arithmetic, but failed to satisfy in the more elementary rules—a circumstance which evidences the omission of frequent and systematic revision of former work. In some cases, too, the questions chosen are not of a sufficiently practical character.

The undermentioned schools were represented in the recent University Examinations:—Grenfell, 1 junior; Tipperary Gully, 2 juniors; Young, 4 juniors (one of these secured a matriculation pass).

The classification of pupils is better arranged than formerly, and the tendency on the part of inexperienced and the less efficient teachers of small schools to subdivide their classes into a useless and unworkable number of sections has been almost entirely removed. The discipline is, with very few exceptions, most satisfactory.

The school buildings are well distributed throughout the district, afford more than the necessary accommodation, and the majority of them are in a satisfactory condition. Needful works (chiefly painting and minor repairs) which had to be postponed in consequence of insufficient funds, will be undertaken during 1895.

The works carried out during the year, under the Inspector's supervision, are mentioned hereunder:—

	£	s.	d.
Erection of 1 school building	Cost	135	10 0
Repairs to 34 school buildings	"	366	10 3
Repairs to 6 school residences	"	38	14 0

Improvements, repairs, &c., have been effected at the following schools by the Architect:—Cowra, Yarra, Nubba, Young, and Monteagle Public; and under the same supervision, the erection of residences for the teachers at Barmedman and Stockinbingal.

The following list shows the numerical strength of the teaching staff of the district:—

Principal Teachers, Mistresses, and Assistants—

Class 1 B	3
" 2 A	9
" 2 B	6
" 3 A	34
" 3 B	10
" 3 C	4
Unclassified	29
Work-mistress	1

Pupil-teachers—

Class 1	3
" 2	6
" 3	8
" 4	0

Total..... 113

Speaking generally, the teachers are exemplary in conduct, zealous, and competent. The pupil-teachers, as a whole, show good aptitude for their work, and promise well. The schools, in most cases, have made an advance in point of efficiency during the year, and the educational prospects of the district are decidedly favourable.

Young, 24th December, 1894.

CHAS. J. W. FRIEND,
Inspector.

ANNEX Z3.

INSPECTOR PEARSON'S REPORT.

At the commencement of 1894 there were 83 schools in operation, classified as—Public, 53; Provisional, 15; Half-time, 14; House-to-house, 1. Total, 83.

During the year Brocklesby West Public, Lalaly Public, Savernake Provisional, Leniston Provisional, and Burrumbuttock East Half-time were closed.

Lalaly and Leniston were re-opened as Half-time, Oakey Farm and Tarramia Half-time were established, and Ulandra Half-time re-opened and worked in connection with Walbundrie.

Berrigan Provisional and Jingellie Provisional were raised to the rank of Public.

At the close of 1894 the schools, therefore, were:—Public, 53; Provisional, 11; Half-time, 18; House-to-house, 1. Total, 83.

The educational requirements of the district are well met, but it is probable a few small schools will be established during first half of 1895.

The total number of schools and departments open during 1894, or any portion thereof, was 86. All of these received a regular inspection.

Of these 86 schools, 7 were below standard, 8 up to, and 71 exceeded standard limits.

Dictation, music, and science show a slight retrogression; whereas all the other subjects of examination show an advance, in many instances very marked.

A general improvement in organisation and discipline is visible. With the exception of a few isolated cases, the teachers show commendable care, perseverance, and taste in connection with their premises.

The

The staff of teachers employed in this section at end of the year, consisted of :—Principal teachers, 72; mistresses, 2; assistants, 5; pupil teachers, 10; work-mistress, 1—total, 90.

School accommodation, allowing 8 square feet per child :—

Accommodation existing at beginning of 1894	5,305
Additional accommodation provided	74
Accommodation lost by closing, &c....	101
Accommodation existing at end of 1894.....	5,278

The December enrolment was 3,027, hence it will be seen the accommodation is considerably more than sufficient.

No new school buildings have been erected either by the Inspector or Architect, nor were there any in progress at the end of the year.

Twenty-one school buildings and 4 residences have been repaired and improved by the Inspector, at a total cost of £212 Os. 9d.

With but few exceptions the teachers are earnest and zealous, and are held in esteem.

The efficiency of the schools has slightly increased, and the prospects for 1895 are good.

T. PEARSON,
Inspector.

Albury, 1st January, 1895.

ANNEX Z4.

INSPECTOR MCKENZIE'S REPORT.

At the close of last year there were 62 schools in operation in this district, two of which, Purnamoota and Tongul, were not re-opened after the Christmas vacation.

Sixty schools, therefore, resumed work in 1894, making, with 4 new schools, a total of 64 schools in operation during the current year, viz., Public, 49; Provisional, 7; House-to-house, 7; Evening School, 1.

The above mentioned include House-to-house Schools opened during the year at Brobenah, Wanganella, and Nunnagoyt, and an Evening School at Deniliquin.

Umberumberka Public and Booroorban Provisional having been closed, and the boys' and girls' departments at Alma amalgamated, there are now, in all, 61 schools in operation.

An unusual number of applications for the establishment of schools was received. Those from Hermitage, Moralla, Coobool, Moorna, Lynwood, and Colinroobie, were declined; a Provisional School was sanctioned at White Cliffs; and itinerant teachers have been promised, conditionally, at Jondaryan, Hill Plain and Brassi, Connorgie and Cavan, Tareena and Cal Lal. It is, however, doubtful whether the conditions will be complied with.

The Public Schools at Milparinka and Mount Browne, and the House-to-house Stations at Wanganella and Booroorban are to be converted into Half-time Schools, and Brobenah is to become a Public School.

In all probability work will be resumed in 1895 with 62 schools in operation, viz., Public, 46; Provisional, 7; Half-time, 4; House-to-house, 4; Evening School, 1.

The decrease in the population of the Barrier District through the closing of mines, and dismissal of hands consequent on the fall in silver, has made itself felt in the diminished attendance of the smaller schools in outlying localities. The central schools in Broken Hill, however, still maintain their average through the influx of population from surrounding neighbourhoods; but, during the incoming year, a decreased attendance in the larger schools, and the closing of several of the smaller ones may reasonably be expected.

Through the large areas held by the settlers in this sparsely peopled district, there are, of necessity, a few isolated families; but, speaking generally, the schools are well distributed, within easy reach of the vast majority of the residents, and satisfactorily meet the requirements of the people.

The gross enrolment for the year was 6,747 pupils, and the average attendance 3,572, whilst existing buildings provide seats for 6,418. The accommodation, therefore, is ample for present requirements.

Repairs to 31 schools and 10 residences, at a cost of £431 5s. 7d., have been carried out, or are now nearing completion; and the expenditure of a further sum of £71 Os. 6d. has been authorised. A residence is in course of erection at Carrathool at a cost of £340; and water was laid on at the Broken Hill Schools at a cost of £53.

All schools were fully inspected, and, almost without exception, their general efficiency was found to be satisfactory. Of 63 schools examined, 61, or 96 per cent., were up to or above the standard, and only two schools were below, a result which compares favourably with that of previous years.

Banks have been established in most of the leading schools, and arboriculture receives a fair amount of attention. Cadet corps, however, exist in only two schools, and only one school appears in the list of passes at the University examinations.

There are 118 Teachers of all ranks employed in this section, including 53 principal Teachers, 7 Mistresses, 31 Assistants, 24 Pupil Teachers, and 3 Sewing Mistresses. Of the teachers, as a body, it may be said, that they are respectable, industrious, and loyal.

The school buildings, with few exceptions, are in very good repair, and all are well supplied with books, furniture, and other requisites.

The present educational requirements of the district have been fully provided for; the schools are in a satisfactory condition, and the prospects for the new year are hopeful.

A. D. MCKENZIE,
Inspector.

Marrickville, 29th December, 1894.

ANNEX Z5.

DISTRICT-INSPECTOR LONG'S REPORT.

THE divisions of my district for inspectorial supervision have remained unchanged, and consist of the Mudgee, or Eastern Section, the Dubbo, or Western Section, and the Wellington or Central Section.

At the end of the former year there were 225 schools in the district. At the beginning of this year fifteen were transferred to the Mudgee Section, from the Maitland District, fourteen from the Mudgee to the Central, and two from the Central, to the Dubbo Section. Two schools were opened, and nine closed. There were in operation during the year 242 schools in all, but at its close this number was reduced to 238, and of these, 77 are in the Wellington Section, 97 in the Mudgee, and 64 in the Dubbo Section.

The aggregate capacity of the buildings in which these schools are conducted, is sufficient for 13,426 pupils, at 8 ft. of floor space each, while the enrolment for the year, allowing for multiple enrolments, was 11,085 and the average attendance 7,057.5. The accommodation provided is therefore ample in the aggregate, and in no individual case is it insufficient for the average attendance. All the schools, with three exceptions, are in fairly good repair, but in a number of cases, painting and improvements, not perhaps of an actually necessary nature, are desirable, and action for effecting these has already been initiated.

During the year, under inspectors' supervision, three school-rooms and two weather-sheds have been built, and fifty-five schoolrooms, and twelve residences repaired, at an outlay of £811 3s. 6d., and similar work, to the amount of £236 8s., was in progress, but incomplete, at the end of the year.

Excepting one half-time school, closed early in the year, all the schools were regularly inspected, 105 by Mr. Inspector Rooney, 67 by Mr. Inspector Baillie, and 69 by myself.

From the Return of Inspection it appears, that of 241 schools inspected, 228, or more than 94 per cent., satisfied, or exceeded standard in regard to general efficiency, which indicates, that the schools are, with very few exceptions, under diligent, competent, and successful management.

The

The discipline, and the organization in details under the teacher's control, we rarely found to be otherwise than creditable. As a rule the appearance of pupils shows careful attention to neatness, while their behaviour and deportment in school are all that could be desired. It is to be regretted that the effect of the influences which provide these desirable results, should, in so many cases, fail to operate beyond the school boundaries. In nearly every school there is observed evidence of careful effort to arrange all details of organisation in accordance with prescribed rules, and to render the general appearance as cheerful and pleasing as possible. Much attention continues to be devoted to planting trees and forming flower beds, and in this way the appearance of the school grounds has been much improved in many places.

In the following table are shown the number of pupils examined in the several subjects of instruction, and the percentage of passes in each :—

Subjects.	Number of Pupils Examined.	Percentage of Passes.	Subjects.	Number of Pupils Examined.	Percentage of Passes.
Reading	7,799	84.1	Music	5,827	69.6
Writing	7,727	81.9	French	37	89.1
Dictation	6,396	78.4	Euclid	308	74.6
Arithmetic	7,607	75.6	Algebra	65	87.7
Grammar	2,808	77.3	Mensuration	312	69.8
Geography	2,808	80.2	Latin	80	90.1
History	2,775	73.7	Needlework	2,642	81.4
Scripture	7,341	73.3	Drill	6,997	75.6
Object Lessons	7,313	75.5	Natural Science	138	92.0
Drawing	7,330	76.9			

The above percentages, being in no case below 69 per cent., are satisfactory in every subject, and may fairly be regarded as evidence that the teaching generally is of creditable efficiency. They show an improvement on the results of the former year.

The number of teachers employed in the district at the end of the year was 274. Their classifications and position are shown in the following table :—

	I A.		I B.		II A.		II B.		III A.		III B.		III C.		Unclassified.		Totals.		Grand Total.
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	
Principal Teachers	1	...	1	...	23	...	10	2	54	11	18	14	8	11	28	22	143	60	203
Mistresses of Departments	1	...	5	6	6
Assistants	2	2	...	2	2	6	1	3	...	1	2	6	7	20	27
Totals	1	...	1	1	25	7	10	4	56	17	19	17	8	12	30	28	150	86	236
	Class I.		Class II.		Class III.		Class IV.		Probationers.										
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.									
Pupil Teachers	5	6	3	8	6	2	1	4	...	1							15	21	36
Work-mistresses	2	2
Total Teachers of all ranks																	165	109	274

The teachers are, with few exceptions, of correct general deportment, and are zealous and successful in the performance of the important duties entrusted to them by the Department. Occasionally, an unbecoming deportment in details of manner, or perhaps costume is observed, and a tendency even in public to practices of, at best, but doubtful propriety, which cannot but lower a teacher in social esteem and diminish his personal influence and usefulness. Instances of such defective recognition of the becoming, and failure to intelligently appreciate the responsibilities voluntarily undertaken in assuming the office of teacher, are, fortunately, but few; it is regretted that there should be any. As a rule the staff of the district are of exemplary general demeanour, and are popular and highly esteemed. Only four complaints against teachers have occurred during the year for investigation, being less, I believe, than any former year.

The Pupil Teachers, 36 in number, have displayed satisfactory aptitude, diligence, and usefulness, and have, without exception, gained favourable reports.

Summary.

The schools of the district, with those in process of establishment, are sufficient for its present educational requirements. The efficiency, and material condition of the existing schools are, with the exception of very few, satisfactory. The teachers, as a body, have shown creditable diligence and efficiency. The general results indicate that the year's work has been attended by a satisfactory degree of success in regard to the objects proposed to be achieved.

I forward with this the reports of the officers associated with me in the supervision of the district.

GEORGE ED. LONG,
District Inspector.

Waverley, 7th January, 1895.

ANNEX Z6.

INSPECTOR ROONEY'S REPORT.

The number of schools in the Mudjee section, at the beginning of the year 1894, was 97.

The following schools were closed in the early part of the year on account of diminished attendance:—Bara Creek Public, Brogan's Creek Half-time, and World's End House-to-house which was only in operation for one day during the year. The Half-time School at Campbell's Creek was withdrawn from the Department, in July, by the owner of the buildings.

The following schools were, in February, transferred to the central section of the district:—Ben Buckley Half-time, Bimbijong Half-time, Birriwa Provisional, Coolah Bridge Provisional, Cainbill Creek Provisional, Coolah Public, Dapper Public, Leadville Public, Lambing Hill Public, Narrangerie Provisional, Tallawang Public, and Tarrabran House-to-house School.

Fifteen schools were transferred from the Maitland District to the Mudjee section of the Wellington District, viz., Borambil, Cassilis, Merriwa, Ulan, and Wallar, Public; Bow Ridge, Cattle Creek, Cooba Bulga, Collaroy, Lower Munmurra, Redwell, Turill, and Wagoribil, Half-time; Munmurra Provisional, and the House School at Oxley's Peak.

In December, a leased school-room at Kellick was handed over to the Department, and will be opened as a Half-time School in place of Bow Ridge, which closed at the end of the year.

At the close of 1894 there were in operation in this section 54 Public, 7 Provisional, 30 Half-time, and 6 House-to-house schools. A new school, to take the place of an unsuitable building, is in course of erection at Wagoribil.

It has been decided to establish a Provisional School at Breakfast Creek. Twelve schools and three residences have received substantial repairs under my supervision. A weather-shed has been erected at Warrangunyah.

The schools and residences at Millsville, Turill, and Lawson's Creek are now undergoing alterations and repairs. Repairs are in progress, under the supervision of the Architect, at Hill End, Mudjee, and Tambaroora.

With the exception of one Public and two Half-time, all school buildings are in a fair state of repair and suitable for educational purposes. Omitting Menah Public, Collingwood and Munmurra Provisional, all the Public and Provisional Schools—and in addition, seventeen of the Half-time—are vested in the Department. Thirteen Public Schools are not provided with residences.

The

The schools in this section of the district give accommodation sufficient for 3,845 pupils, or 387 more than were enrolled for any quarter.

In most instances the ornamental trees in school play-grounds are well cared for by the teachers.

Enrolment and Attendance.

The total enrolment for the year was 4,143. Of this number 422 were returned as pupils of more than one school. The enrolment and average for each quarter of the year are shown hereunder :—

	Enrolment.	Average.
First quarter	3,453	2446·4
Second „	3,435	2604·3
Third „	3,421	2439·4
Fourth „	3,406	2566·3

The compulsory clauses of the Public Instruction Act have been duly administered.

The amount of school fees received for the year was £1,253 13s 6½d., and the fees in arrear amounted to £26 15s 1½d. There were at the end of the year 291 free pupils, almost entirely in the mining districts.

Inspection.

There were 99 schools in operation during the year or part of it. Excepting the Half-time School at Brogan's Creek, which was closed for want of attendance early in the year, all received regular inspection. I also inspected 7 schools in the Central section.

Two thousand seven hundred and eighty-six pupils were examined in this section of the district.

The attainments of the pupils showed considerable improvement this year in all subjects but Scripture, Euclid, and Mensuration. Music and Drill are still imperfectly taught.

Efficiency of Schools.

Four Half-time Schools were below the standard; 4 Public, 1 Provisional, 5 Half-time, and 1 House-to-House School reached it, while 51 Public, 6 Provisional, 21 Half-time, and 5 House-to-House Schools exceeded it. Thus 96 per cent. of the schools either satisfied or exceeded the requirements of standard.

There are in this section of the district 1 teacher of the first-class, 19 of the second, 52 of the third, and 15 unclassified. Five of the teachers unclassified are ex-pupil teachers. There are 12 pupil teachers, 4 of whom are in Class I., 3 in Class II., 4 in Class III., and 1 in Class IV. As a body the teachers are zealous and intelligent. Only one complaint was made against a teacher during the year.

Summary.

(a) This section of the district is well provided with the means of education. (b) The material condition of the schools, with few exceptions, is satisfactory. (c) The organisation and the general discipline of the schools are satisfactory. The results indicate that steady and useful work has been done during the past year.

Mudgee, 24th December, 1894.

JOHN P. ROONEY,
Inspector.

ANNEX Z 7.

INSPECTOR BAILLIE'S REPORT.

THE number of schools in operation during the whole, or some portion of the year 1894, in the Dubbo section of the Wellington District, was :—

Public	41
Provisional	7
Half-time	8
House-to-House	10

Total..... 66 schools

Rocky Glen Public, Moonbar Creek Provisional, Bone Bone and Yarragreen House-to-House, were closed through insufficient attendance. A new school (Half-time) was opened at Tilpa, and worked with Kallara, formerly a Provisional but converted into a Half-time owing to reduced attendance. Belar Creek was converted from a House School into a Provisional, and Kerbin Station closed. Biamble Station, worked in conjunction with Bundulla, was closed through small attendance, and a station was opened at Merrygoen in lieu thereof. Gumbalie Half-time, temporarily closed, was re-opened. Tooraweenah Provisional was converted into a Public. A new school has been completed at Carinda, and will be opened immediately after the Christmas vacation; and a new school will be established at Raby, near Warren, shortly after the beginning of the year. Eschol and Eulomogo Public Schools were transferred from Mr. District Inspector Long's section to this section at the beginning of 1894.

The number of schools in operation at the close of the year was :—

Public	40
Provisional	7
Half-time	8
House-to-House	9

Total..... 64 schools in full working

School Buildings.

The buildings are in fairly good condition. Repairs of a greater or lesser extent have been effected at fifteen schools, viz. :—Angledool, Barradine, Barrington, Binnaway, Belar Creek, Bourke, Coonamble, Goodooga, Gulargambone, Louth, Narramine, Tooraweenah, Wanaaring, Warkton, and Warren—the first 14 under Inspectoral supervision, at a cost of £182 17s. 1d., and the latter (Warren) under the supervision of the Architect, at a cost of £94.

Three residences, viz. :—Brocklehurst, Gilgandra, and Narramine, underwent repairs at a cost of £95 18s. 6d.

The works in progress, but not completed, are :—New verandah at Eringonia Public School, and repairs to the Public School at Byerock; the cost of the former, £20 5s., and of the latter, £15 17s. 6d. Repairs, painting, &c., are in course of progress under the Architect's supervision, at the Superior Public School, Dubbo; cost, £115.

A new Provisional School has been erected at Carinda, at a cost of £60. This school will supply a long felt want, as the nearest school to that township is Walgett, 45 miles distant.

The space at the end of the year 1893 provided for 5,306 pupils; at the close of 1894 the accommodation showed a decrease of 23 places.

Enrolment and Average Attendance.

The year just ended, as compared with last, shows a slight decrease in the enrolment, but an increase in the attendance :—

	1893.		1894.	
	Enrolment.	Av. attendance.	Enrolment.	Av. attendance.
First Quarter	3,634	2484·3	3,553	2392·2
Second „	3,629	2431·8	3,531	2472·5
Third „	3,627	2505·7	3,457	2419·7
Fourth „	3,534	2232·5	3,431	2469·4

Inspection, Instruction, and Discipline.

All the schools in operation received a regular inspection, 6 an ordinary inspection, and several received incidental inspections as opportunities offered. Of the 66 schools inspected 60 were above standard, 5 up to and 1 below.

Of the 2,704 pupils examined, 279, or just over 10 per cent., were presented for exemption certificates. Of these 168, a percentage of 60, passed. The majority of those who were unsuccessful failed in one subject only, viz., arithmetic or dictation.

The discipline has improved considerably, notwithstanding the fact that corporal punishment is rarely inflicted in the smaller schools. The children are docile, well-behaved, and respectful.

Great care and attention are bestowed upon the grounds of the Public School at Girilambone; and to enhance the beauty of the whole surroundings a neat and well-kept flower garden has been tastefully laid out.

Of flower gardens in connection with teachers' residences, many are fairly well attended to; the one at Bourke deserves special mention.

A good substantial weathershed has been erected at the Bulbodney School by the teacher and boys attending the school; passion fruit vines have been planted around, and in course of time will form a cool shade.

A neat wire fence was placed around the Tooraweenah School by the teacher and one of the residents who takes a deep interest in Public School work.

Teaching Staff.

Taken as a whole the teachers, assistants, and pupil teachers in this section of the District are enthusiastic, zealous, and industrious; of good moral character and of good repute.

Their classifications are as follows:—

Teachers—		
1 A		0
1 B		2
2 A		10
2 B		7
3 A		12
3 B		13
3 C		6
Unclassified		22
	Total	72
Pupil Teachers—		
Class 1		4
„ 2		5
„ 3		3
„ 4		2
	Total	14

There is a workmistress at the Superior School, Dubbo. Total of all grades, 87.
The number of unclassified teachers is becoming less each year.

Summary.

The accommodation is sufficient and well distributed.

The progress made during the year is very satisfactory.

The teachers, with one or two exceptions, are industrious and respectable.

The outlook for 1895 is healthy.

J. W. E. BAILLIE,
Inspector.

Dubbo, 31st December, 1894.

ANNEX Z 8.

REPORT OF THE PRINCIPAL OF THE TRAINING SCHOOL, FORT STREET.

THE enrolment of students for the year 1894 was 54. Very early in the session one student was granted exemption from attendance for a period of twelve months, owing to serious illness. The remaining 53 completed their course of training. Of this number 28 were in the first year, and 25 in the second year.

COURSE OF STUDY.

All students, matriculated and non-matriculated, attended the Sydney University, and went through the course of study for first, second or third year, as prescribed by the Senate. They attended the Training School every afternoon for practical teaching and instruction in the following professional subjects:—

School Management.—Theory and History of Education; Public Instruction Act and Regulations; Practical School Management; The Kindergarten Principle.

Drawing.—Practical, Plane, and Solid Geometry; Perspective: Blackboard Practice.

Music.—Sutton's Theory of Music; Four Part Songs; Stainer's Harmony; Voice Training.

Drill.—Squad, Company, and Battalion Drill; Manual and Firing Exercise; Physical Drill, with and without Rifle; Single-stick Practice.

PRACTICAL TRAINING.

A systematic course of Lectures, on the Principles and Practice of Teaching and Class Management, was delivered during the Session. Specimen, Test, and Criticism Lessons were regularly given, and the students had frequent practice in actual Teaching during the year.

STAFF.

The Staff for the year consisted of the Principal, who is also Head Master of the Model School; Mr. Finney, Teacher of the Practising School; Mr. Woodhouse, Drawing Master; Mr. Alpen, Music Master; Mr. Powrie, Teacher of Manual Training; Q.M.S. Smith, Teacher of Drill.

MANUAL TRAINING.

The students were divided into four groups for Manual Training, and the members of each group attended the workshop in succession, for one hour in each week. This has always been a very popular branch of the Training School, and good results have been obtained from year to year. The subjoined table shows the results for this year.

	Nature of Pass.			Total.
	Honours.	First Grade.	Second Grade.	
First year Students.....	2	2	23	27
Second year Students.....	1	1	10	12

EXAMINATIONS.

The Annual Examinations were held in December. The Examination in the professional subjects—viz., reading, writing, art of teaching, drawing, music, and drill—was held in the week commencing December 3rd. The University Examination commenced on December 6th. The following tables give full particulars concerning these Examinations :—

Nature of Examination.	Number of Students.	
	Seniors.	Juniors.
University—First year	11	27
„ Second year	14	—
„ Third year	—	1
Examination in Professional Subjects	25	27*

* One absent through illness.

The number who passed was :—

Nature of Examination.	Number of Students.	
	Seniors.	Juniors.
University, 1st year	7	14
„ 2nd „	10
„ 3rd „	1
Examination in professional subjects	25	27

The gentlemanly demeanour of the students of this session, and their earnest desire to succeed as teachers, have been very pleasing features in the year's work.

Scholarships.

The list of scholarships at the end of the year was :—

Scholarships	Senior.	Junior.
Half scholarships	15	14
Without scholarships	10.	11
	...	3

Drill.

Early in the year the Training College Battalion was disbanded. The drill was not affected by the change. Systematic practical instruction in squad and company movements was regularly given by Q.M.S. Smith to both students and pupil-teachers, and special attention was paid to physical drill. Many of the students and pupil-teachers joined the Rifle Club affiliated to the Public Schools Amateur Athletic Association, and took regular practice at the Randwick Rifle Range. The examination in drill was held in December, with the result that 25 seniors and 27 juniors passed.

PUPIL-TEACHERS' CLASSES.

The following table gives the enrolment and attendance in the pupil-teachers' classes :—

Classes.	Enrolment.			Ordinary Attendance.
	Males.	Females.	Total.	
I	36	65	101	94
II	37	92	129	120
III	15	37	52	48
IV	19	1	20	17
Totals.....	107	195	302	279

The course of study for the year was music and drawing in third and fourth classes, Latin and French in first and second classes, drill (calisthenics for females) in all classes. The male pupil-teachers were divided into two groups, which were drilled on alternate Saturday mornings. The female pupil-teachers were arranged in four classes, and each class in succession received instruction in drill once in the month. The teachers engaged in the Saturday Classes were :—Mr. Maclardy, M.A., Latin and French, class I, males; Mr. Smith, M.A., Latin, class I, females, class II, males; Dr. Thibault, French, class I, females; Mr. Taylor, M.A., LL.B., Latin (first section) and French, class II, females; Mr. Flannery, Latin (second section), class II, females; Mr. Stephenson, M.A., Latin, class II, males; Mr. Woodhouse, Mrs. O'Byrne, and Miss Douglas, drawing, classes III and IV; Mr. Cotterill, vocal music, classes III and IV; Captain Mulholland, calisthenics, females, all classes; Q.M.S. Smith, drill, all classes, males.

TIME-TABLE for Saturday Classes.

Classes	9·15 to 10·15 a.m.	10·15 to 11·15 a.m.	Recess.	11·15 a.m. to 12.
I	Latin.	French.	In case of classes due for drill, lesson closed at 11 a.m.	Drill, according to arrangement.
II	„	„		
III	Music.	Drawing.		
IV	„	„		

The male pupil-teachers of the city and adjacent suburbs received instruction in Latin and French on Wednesday afternoon in each week, from 4·30 to 5·30, in the Castlereagh-street Public School.

The work done in the Saturday and Wednesday Classes has been fairly satisfactory, and the conduct generally has been good. At the end of the year the Minister decided to discontinue these classes.

29th January, 1895.

J. W. TURNER,
Principal.

ANNEX Z9.

REPORT OF PRINCIPAL OF HURLSTONE TRAINING SCHOOL.

I. THE STUDENTS.

THE enrolment of students for 1894 was 50, 25 seniors or second year students, and 25 juniors or first year students. Of the 25 seniors 12 succeeded in matriculating. One junior presented herself for Matriculation Examination, and was successful in passing. Three of those seniors who failed decided to avail themselves of the permission to attend day lectures at the University, which was allowed to non-matriculants for the first time by the Department of Public Instruction. There have thus been 16 students receiving the University lectures :—

12 Seniors who matriculated.

1 Junior

3 Seniors who failed to matriculate.

The remaining 10 senior students have studied at the Training School for the second-class classification.

The health of the students has been very good, and their conduct highly exemplary.

The results of the Annual Examination held in December, 1893, are shown in the following tables :—

Nature of Examination.	Number of Students.	
	Seniors.	Juniors.
University, first year	18
Special Training School Examination	5
” ”	30
	23	30

The number who passed was :—

Nature of Examination.	Number of Students.	
	Seniors.	Juniors.
University, first year; and Department's Certificate of II A	9
Special Training School Examination, and Department's Certificate of II A	5
Special Training School Examination, and Department's Certificate of III A	30
	14	30

The 9 students who failed at the First Year University Examinations were granted Deferred Examinations in March, 1894. Four were successful in passing, and were awarded the II A Certificate; of the 5 who failed at the Deferred Examination 1 was awarded the II B Certificate, 3 obtained III A, and 1 was awarded II A, as she failed in only one subject—Algebra.

In view of the reduction next year of the training session to 12 months, the present juniors—those who have been in the Training School this year only—are allowed to compete at the current examination for any classification up to, and inclusive of, II A.

It will be seen that there are practically three classes during nine months of the year—(1) Those attending the University; (2) those who have failed to matriculate; (3) the juniors.

II. THE COURSE OF STUDY.

1. For students attending the University :—

(a) First year's course as described by the Senate.

(b) At the Training School :—School Management, Music, and—unless the required certificates be already taken—Drawing.

2. For Senior Students not attending the University :—

English :—Bacon's Essays, I to XXI inclusive; Meiklejohn's Book of English, Longmans' School Composition.

Latin :—Virgil's *Æneid*, V; Arnold's Composition.

French :—“Le Médecin malgré lui,” and “Polyeucte.”

Mathematics :—Arithmetic; Algebra, to Progressions; Geometry, Euclid I to IV.

Drawing, Vocal Music and Theory, School Management, and Elementary Physics and Chemistry.

3. For the Junior Students :—

English :—Bacon's Essays, I to XXI inclusive; Meiklejohn's Book of English, Longmans' School Composition.

French :—Macmillan's Third Year; “La Fille du Chanoine,” and “La Mère de la Marquise,” by Edmond About.

Latin :—“Cicero pro Milone,” Arnold's Composition, Smith's Latin Grammar.

Mathematics :—Arithmetic; Algebra, to L.C.M. inclusive; Euclid, Book I, with deductions.

School Management :—Gladman's School Work, Compilation of School Records, History of Educational Reforms.

Music :—Sutton's Theory, Stainer's Harmony, Staff Notation and Tonic Sol-fa.

Natural Science :—Physiology, Elementary Chemistry and Physics.

Domestic Economy :—Needlework, Cookery.

Drawing :—Model, Geometrical, Perspective.

Drill :—Calisthenics, School Drill.

III. PRACTICAL TRAINING.

The practical training has consisted of :—

(a) Weekly attendance of two students at a time in the practising class.

(b) Weekly criticism lessons, in which the students' style of teaching is criticised by fellow-students; the Mistress of the Practising School, Miss S. H. Nicholls; and the Principal of the Training School.

(c) Model lessons in drill and calisthenics given to fellow-students or to children, under the direction of Captain Mulholland.

(d) Weekly half-hour lessons in music given to the children by the students, under the direction of Herr Alpen.

IV. PHYSICAL TRAINING.

The students receive instructions in calisthenics twice a week, the subjects taught being military drill, gallery-lesson exercises, Swedish calisthenic exercises; the use of dumb-bells, poles, and Indian clubs. In this subject, the students have made most gratifying progress.

Other physical exercise consists of a daily walk, lawn tennis, or lawn croquet.

V.

V. NATURAL SCIENCE TEACHING.

The teaching of Physiology is made by Dr. Roth, the Instructor, of a practical nature; and in addition to the lessons on Anatomy and Physiology, the students have received very useful instruction in a series of lessons on "First aid to the injured."

Lessons in Elementary Chemistry and Physics are given weekly by Mr. Taylor, M.A., and are very useful as being the groundwork of many of the object-lessons which the students will be required to give when teaching.

VI. THE JUNE EXAMINATIONS.

The special June examination in Drawing was first held in 1889, by request of the students, who thought by working off the Geometrical Drawing at an early period to have more time for other subjects towards the end of the year. The success of the experiment, better at first than was anticipated, has not been quite so good this year. Out of 30 candidates—24 juniors and 6 seniors—eleven (11) passed, 8 juniors and 3 seniors. Some years ago, several pupil-teachers gained the Geometrical Drawing Certificate—sometimes from the Department of Public Instruction, and sometimes from the Technical College—before entering the Training School. If this course were adopted generally, the teacher would be able to devote all her attention in the Training School to Perspective, and to a thorough practice of Blackboard Object-Drawing. The teacher, Miss Douglas, is most efficient and thorough in her work.

The special examination in Needlework was also held in June; 24 juniors were examined, and all passed. This examination differs from the Drawing above-mentioned, inasmuch as it is set only on the half-year's work, whereas the Drawing is properly the full year's work.

VII. THE PREMISES.

The premises and grounds are in good order.

10th December, 1894.

MARY M. EVERITT,
Principal.

APPENDIX XIII.

REPORT ON DRAWING.

EVERY school and every individual child in the Metropolitan District has been examined orally and practically during the year with the results embodied in the appended tables.

The teaching of Practical Geometry is more efficient, that of Object Drawing is seldom so, owing to the causes mentioned in my last report. Fortunately the former is by far the most important from the point of view of technical usefulness, the only difficulty experienced being that of providing a class with suitable instruments.

Appliances.

Many schools are now provided with a good selection of casts for advanced Freehand Drawing, and the improved copies are gradually making their way into the schools. Models and suitable objects are, however, generally speaking, very much wanted.

High School for Girls.

The painstaking and conscientious teaching of Miss Bowmaker, and Miss Ellis, has maintained the work at a higher level than might reasonably be expected from non-professional teachers of the subject. The tests applied were much more exacting than are used in the Public Schools, notwithstanding which over 76 per cent passed, and the average mark was nearly "Good."

Saturday Classes

Owing to the greatly reduced number of Third Class Pupil-teachers, and practical extinction of the Fourth Class, the classes have been of a much more manageable size, and it has been possible to give the individual attention demanded by the subject. The results of the late examinations are not yet known, but I do not anticipate much improvement in consequence of the very perfunctory way in which the majority pursue their studies. It is to be hoped that the dependence on their own efforts now forced upon them will prove an incentive to greater exertion.

Training Schools.

The work of the past year has been only fairly satisfactory, and I am inclined to expect better results under a system which will concentrate the attention of the students more fully on professional aims and subjects. Under the new arrangement it will be possible to make a more advantageous disposition of the work of the year than it has been during the past year, so far at least as the junior students were concerned. In view of the shortened term of training, it will undoubtedly be to the advantage of the students to make an effort to take their Practical Geometry before entering, and if this cannot be done, it would be a great help to them to have mastered the Plane Geometry, so as to be free to devote their time to Solid Geometry, and Perspective which are more difficult to acquire by private study.

Examinations of Pupil Teachers.

The results in these Examinations are too curiously conflicting to allow of any sweeping conclusions being drawn. Still, as a whole, they show that the country candidates surpass those of the metropolis by 6 per cent., and in view of the fact that the former have enjoyed fewer advantages, it appears that they more than compensate for this by greater application and desire to excel.

In the Examinations for Training, candidates do not consider that "increased proficiency" is expected. They rely, apparently, on their knowledge of one or two years back, and seem to think any further study superfluous. The result is that the work shows lessened rather than increased skill.

Results of Inspection.

Appended are the results of my inspections, showing the number of children examined in each department, with the number of passes, and the percentage as compared with last year:—

Schools.	Departments.	Classes.	Boys.	Girls.	Infants.	Totals.	
82	180	1,067	11,388	10,329	13,829	35,546	
			Up to Standard.	Below Standard.	Total.	Passes, 1894.	Passes, 1893.
Boys			7,754	3,634	11,388	68.1	65.3
Girls ..			6,655	3,674	10,329	64.4	64.0
Infants			10,094	3,735	13,829	72.9	68.0
			24,503	11,043	35,546	69.2	65.7

The increased number of infants working on the Kindergarten system makes it possible to bring a larger percentage up to a satisfactory standard, and accounts for the great improvement. Greater attention to class teaching and the improvement in Practical Geometry, already noted, has effected, I think, the advance noticeable in the passes among the boys.

The growing interest manifested by the Teachers in the subject of Drawing is shown by the frequent requests made for visits of instruction, requests which I have fewer opportunities of complying with than I could wish.

Sydney, 16th January, 1895.

FREDERIC W. WOODHOUSE,
Superintendent of Drawing.

APPENDIX XIV.

REPORT ON SINGING.

I HAVE visited and examined all the Public schools in the metropolitan district, and also a few schools outside this area, in Singing and Theory of Music. I have also paid teaching visits as often as time permitted, to such schools where my assistance seemed required.

As I have followed the standard more closely this year, especially in the upper classes, the marks, in some instances, are not so good as in former years, though actually the work done quite equals it. It may be safely stated that the teaching of Singing and Music in most of our metropolitan schools is of a very satisfactory character. It is not merely superficial, *i.e.*, confined to the singing of a few songs, more or less well done, but the children understand what they are doing, and sing from, or by notes, instead of by ear. In several of the schools reading at sight is exceptionally good, and in no case has a good mark been given to a class which could not sing at sight, in time, and tune, reasonably difficult passages or intervals (frequently in 2 or 3 parts). The general mark ranges from fair to very fair.

The best classes examined by me were found in Manly, Pyrmont, and Paddington (Girls' Department). In the Boys' Department I mention Fort-street, Woollahra, and Paddington.

HUGO ALPEN,
Superintendent of Music.

APPENDIX XV.

REPORT ON NEEDLEWORK.

I have examined and reported upon 78 (seventy-eight) schools in and about the metropolitan district. This number includes Hurlstone Training College, the High School, Castlereagh-street, and the Randwick Asylum. In all 11,960 (eleven thousand nine hundred and sixty) pupils were present at examination. The above numbers do not include the examinations of needlework I have held for Public School Exhibitions, or for prizes and awards at public competitions, both of which have this year been very numerous.

The needlework executed in the metropolitan schools during the past year under the supervision of work-mistresses, mistresses in charge, and pupil-teachers, continues to be useful, varied, and most satisfactory.

In First-class Superior Schools, with numbers exceeding 400 (four hundred), the successful results in the upper classes are most marked; while in the lower sections, owing to the even system of instruction and the unswerving attention and painstaking efforts of the work-mistresses and the individual teachers of each class, the work is steadily progressive; the general attainments in needlework for both upper and lower classes are therefore from very fair to excellent, thus conclusively proving the thoroughness and efficiency of the methods of instruction employed.

Mixed Schools.

Mistresses, teachers, wives, and infant school mistresses, in charge of needlework in mixed schools continue to do good faithful work. Many of these schools are above the standard required, and judging by results much private time must be devoted to the subject. The dressmaking lessons given in these mixed schools are looked upon by parents as a boon. The mothers of pupils frequently send in favourable comments upon this branch of instruction, it being considered a sound preliminary for business, and a good foundation for home industry.

The introduction of coloured cotton in lower classes is a decided success. Young children are amused in their first attempts at sewing lesson. Their desire to improve, and to proceed from one stage of stitch to another is evident, and the pleasure they experience in this lesson is productive of the highest results, and proves a happy change and relief from mental study.

Pupil Teachers.

In my incidental visits to schools, it was noticeable that the pupil-teachers were attentive to the instruction of work-mistresses, anxious to excel, and evince the same proficiency in the art of needlework and design as formerly. In many schools pupil-teachers receive their needlework lesson from the work-mistress at the usual sewing-lesson. This is a decided advantage, as much varied and useful experience is gained in cutting and setting, also in management and control of sewing classes, which experience proves of good service to them at the termination of their pupil-teachership.

Dressmaking.

As stated in my last annual report this subject receives special attention from work-mistresses, and is carried out and made general in all metropolitan schools. In some large schools where no work-rooms are available, it is found almost impracticable to give lessons in this subject, as the fitting-on attracts attention and disturbs the quiet and order so essential to sewing-lesson.

I may add that the work-mistresses in all First-class schools have acquired the practical knowledge necessary to enable them to teach this branch of needlework.

Method and Discipline.

Method and discipline in sewing-classes are generally well-maintained, and time economised in giving out and receiving needlework, the head-mistresses in most schools assisting in this arrangement. Independence and self-reliance are inculcated among the pupils of the upper classes by teaching them to cut-out and set their own work. It is most praiseworthy to note, that though great depression exists among the working-classes, pupils are very rarely found unprovided with sewing material according to their attainments and class.

I am glad to be able to testify to the continued diligence and application to duty on the part of work-mistresses during the past year, and also to the encouragement and appreciation shown by head-mistresses in most metropolitan schools.

Balmain, 15th January, 1895.

ANNIE DADLEY,
Directress of Needlework.

APPENDIX XVI.

REPORT ON COOKERY.

INSTRUCTION in this subject has steadily progressed during the year, and although on the face of them the figures appear slightly less than those of last year, the difference is caused rather by a change of plan which took place in the middle of the year than by any real diminution.

Enrolment and Attendance.

The total enrolment for the year was 1,485, made up as follows:—

High and Public School—Girls	1,271
Students in training	22
Students from Country Technical Schools.....	92
Industrial School girls	100
	1,485

The average weekly attendance was 1,097.

Total number of attendances, 36,437.

At different times during the year work has been carried on at 12 Centres, served by 1 Training College, 2 High Schools, 43 Public Schools, and 1 Industrial School.

These Centres were situated at Bathurst, Glen Innes, Grafton, West Maitland and Newcastle, in the country; and at Fort-street, Fitzroy-street (Surry Hills), Balmain, Blackfriars, West Redfern, Parramatta, and Hurlstone, in the city and suburbs.

Examinations and Inspections.

The city and suburban schools were examined three times during the year, Newcastle twice, and West Maitland once. The other country schools were not examined. Incidental inspections of the city and suburban schools were also made at short intervals, when the work was always found to be proceeding in a satisfactory manner.

The school examinations yielded what must be regarded as very encouraging results, which may be collectively classed as "good," since 770 marks were obtained out of a possible 1,030. The Centres were found to be fully equipped, and in a complete state of efficiency. The instruction has been thorough, and according to the code; and the teachers have worked with zeal and diligence.

Certificate Examinations.

Two examinations for Primary Certificates have been held, with excellent results. The number presented was fewer, but in some measure this was influenced by the change of plan mentioned above. Next year the number of examiners will probably be augmented by the change. No teacher, however, is to be judged by the number of pupils she sends up for Certificate examinations. It is impossible (except by accident) to gain a Certificate if the whole course of 12 lessons has not been attended, and this is a matter which rests very much more with the parents and school-mistresses than with Cookery teachers. Excellent work may be done by the teacher, and shown in the school examination by pupils who only attend 9 or 10 lessons, but they would fail if sent up for a Certificate.

Result of Examinations for Certificate.

Examined, 382. Passed—Honors, 79; 1st Grade, 139; 2nd Grade, 123—341. Failed to pass, 41.

Provision Account.

Cost of Provisions.....	£598 8 4
Credit by receipts.....	525 0 6
	£73 7 8

Staff.

Two teachers resigned their positions during the year, and the staff was thereby reduced to seven. My own health failed during the later months of the year, and I cannot speak too highly of the manner in which the work was carried on during my absence.

A. FAWCETT STORY,
Directress of Cookery.

Fort-street, February, 1895.

APPENDIX XVII.

ARCHITECT'S REPORT.

DURING the year ended 31st December, 1894, the undermentioned Public School Buildings, &c., have been completed and handed to the Department:—

No.	Nature of work.	Accommodation.	Cost.
15	New school buildings	2,597	£ s. d. 11,214 17 2
2	New residences	894 15 0
8	Additions providing accommodation	515	1,782 11 9
6	Weathersheds.....	233 10 0
231	Additions, repairs, and improvements not providing accommodation...	8,310 0 1

The school accommodation has thus been increased by 3,112 seats, at a cost of £12,997 8s. 11d., or an average cost of £4 3s. 10d. per seat. Comparison with last year's work shows that the seating was increased at an average cost of £6 10s. 9d., while in the previous year the cost per seat averaged £7 14s., and it will thus be seen that the work is being done at a very low rate, which is no doubt in a great measure due to the depression in the building trades.

Works were also completed at the Technical College, Ultimo, amounting in value to £584 10s.

On the 31st December the following works were in progress:—

No.	Nature of work.	Accommodation.	Cost.
12	New school buildings.....	2,004	£ s. d. 9,257 0 9
12	New residences	5,381 1 5
2	Weathersheds.....	99 18 0
6	Additions providing accommodation	226	1,036 9 3
94	Additions, repairs, and improvements not providing accommodation...	9,510 8 1

In addition to the above works a contract is in progress for the erection of Technical Buildings at Newcastle, at a cost of £5,130.

The total outlay for works certified for by me during the year is £39,999 5s., in 1,300 certificates.

The

The number of papers received and dealt with during the year is about 7,200 ; and the number of letters and reports &c., written and despatched is 3,400. The contracts entered into, and for which contract documents had to be prepared, numbered 355 ; and many small works were carried out under Ministerial authority, for which contracts were not entered into.

There were prepared during the year 643 plans and 559 specifications.

The cost of the office for salaries amounted to £4,491 16s. 8d., and £944 10s. 11d. for travelling expenses ; making a total of £5,436 7s. 7d.

Taking the proportions of works at the rates they would be charged for under the rules of the Institute of Architects, 5%, 7½%, and 10%, according to the size of the works, with clerks of works, salaries, and travelling expenses added, the plans and supervision of the works would cost £5,660.

At the close of the year the staff consisted of 4 draftsmen, 3 junior draftsmen, 3 clerks, and 6 clerks of works.

The services of one clerk of works were dispensed with during the year in giving effect to a policy of retrenchment.

The buildings under my care have been kept in as good repair as the limited funds at my disposal will allow.

The staff have continued to perform their duties in a satisfactory manner.

WM. E. KEMP,
Architect for Public Schools.

APPENDIX XVIII.

BOARD OF EXAMINERS' REPORT.

I HAVE the honor to forward the Report of the Board of Examiners for 1894.

The number of reports on individual examinations sent in during the year was 2,508, while the number in 1893 was 2,979. The total for this year is made up as follows :—

1. Applicant Pupil-teachers	57
2. Pupil-teachers	1,061
3. Training Students	173
4. Teachers	551
5. High School Candidates.....	666
1. Applicant Pupil-teachers—Number for 1894, 57 ; as against 436 for 1893 :—	
Passed.....	34
Failed	23
Examined in Drawing only	4
Percentage of passes in 1894, 59·6.	
" " 1893, 61·4.	
2. Pupil-teachers—Number examined, 1,061 ; as against 1,055 in 1893 :—	
Promoted from Class IV to Class III	162
" III " II	342
" " II " I	241
" " I " Training	146
Examined in Drawing only.....	25
Retired from Examination	3
Failed	142
Percentage of passes in 1894, 86·2.	
" " 1893, 88·6.	
3. Candidates for Training :—	
Number of Males—	
Passed.....	44
Failed	29
Number of Females—	
Passed.....	102
Failed	35
4. Students in Training—Number examined, 173 :—	
Females—	
Juniors (not at University)—	
Recommended for III A, or Second Year's Training	30
Seniors (not at University)—	
Recommended for II A	5
Seniors (at University)—	
Recommended for II A	12
" II B	1
" III A	5
Males—	
Juniors (not at University),—	
Recommended for III A, or Second Year's Training	12
Juniors (at University)—	
Recommended for III A, or Second Year's Training	15
Seniors (at University)—	
Recommended for II A	18
" II B	2
" III A	3
Students examined in Drawing only.....	68
Disqualified at University Examination	2
5. Teachers—Number examined 551, as against 543 in 1893 :—	
Recommended for I A	1
" I B	21
" II A	13
" II B	24
" III A	114
" III B	76
" III C	39
Examined in Drawing only, or in Music and Drawing	54
Retired from Examination	9
Failed	200
Percentage of passes in 1894, 59·01.	
" " 1893, 41·8.	

6. High School Candidates —Number examined 666, as against 798 in 1893 :—	
Passed.....	640
Failed	26
Scholarships were awarded as under :—	
Boys—	
Sydney	15
Maitland.....	10
Girls—	
Sydney	15
Maitland.....	10
Bathurst.....	6
The following Bursaries were allotted ;—	
Boys—	
Sydney (Half)	10
" (Full)	2
Maitland (Full).....	10
Girls—	
Sydney (Half)	4
" (Full)	5
Maitland (Full).....	2

The decrease in the number of reports is mainly due to the reduced demand for applicant pupil-teachers, only 57 having been examined in the course of the year. The High School Candidates, moreover, reached a total less by 132 than that of the year previous. The percentage of passes among teachers rose considerably as compared with the results of 1893. This probably arises from the fact that an ever-increasing number of candidates for promotion are from the ranks of those who have received instruction as trainees or, at least, as pupil-teachers.

There is nothing further connected with the Branch which calls for comment. Several improvements in minor details have been made during the year, but not of such magnitude as to warrant any special notice here. The policy and precedents already established have been steadily pursued, the work has gone on smoothly, and the results of the examinations have been promptly reported.

R. N. MORRIS,
Examiner.

APPENDIX XIX.

REPORT ON PUBLIC SCHOOLS CADET CORPS.

THE affiliation of the Senior Cadets with the Military Department from the 1st January, 1894, and the stoppage of the supply of uniforms to the Training College Rifle Battalion, and the Newcastle Pupil-teacher Corps, owing to retrenchment, affected the strength of the Cadet Force, and restricted its enrolment to School Corps, in which there was at the close of 1894 a membership of 3,819 of all ranks. This number, which is 360 short of the enrolment for the previous year, could readily have been increased had encouragement been given to the establishment of new corps, or special efforts made to increase the strength of existing ones.

In view of the need for strict economy in the expenditure of the Cadet vote, which was the smallest for several years, it was thought advisable not to attempt too much. Special efforts, were, however, made to extend and improve the school drill by making it as nearly as possible meet Cadet requirements, and in consequence many hundreds of boys were actually drilled as Cadets, but were not counted as such.

The members of the Cadet Staff gave instruction in Company drill and drill with arms to the upper classes of the schools visited by them for Cadet purposes, drill rifles (dummies) having been issued to these schools to enable them to fully meet the drill standards.

This plan was afterwards at the request of the Chief Inspector extended to all Metropolitan and several Sub-Metropolitan schools. The Chief Inspector approved of Quarterly Programmes, showing visits of the staff to these schools, the instructors being required to give model lessons in the presence of the teachers concerned. The plan is an excellent one, and is already showing good results, affording as it does means of introducing into the schools the latest drill methods. While many of the teachers are up to date in this respect, still there are a number who are old-fashioned and who require instruction. I am thoroughly convinced of the value of the arrangement, as it will assist in securing uniformity in the drill taught, a most important consideration.

Drill Inspection.

All Metropolitan schools were fully inspected in drill by either Captain Mulholland or myself. The results were in most cases satisfactory, in some instances exceedingly so. The teachers generally give attention to drill on account of its value to their pupils, and its direct aid to discipline, as well as from a desire to obtain a good mark for it at inspection.

In Boys' schools the teachers are provided with a text-book (Infantry Drill, 1893), but the lady teachers are not so fortunate, and have to depend almost entirely for the knowledge of the subject on what they can recollect of former teaching, or on what they can pick up in various ways. Hence there is considerable variety in the drill used in the Girls' and Infants' schools.

Sydney High Schools.

Arrangements were continued for giving weekly instruction in drill to the pupils attending these schools.

Fort-street and Hurlstone Students.

These students were fully instructed in the drill of the standards, and were afforded opportunities to teach the subject weekly as part of their practical training. They were examined at the close of the year in both theory and practice.

Metropolitan Pupil-teachers.

These, both male and female, received instruction at the Fort-street Saturday Classes, and in many cases produced admirable drill results in the schools in which they were engaged. The closing of these classes will throw these young people on their own resources as regards the further acquisition of drill knowledge.

Cadet Parades and Target Practice.

The need for careful expenditure of the Cadet Vote, which has also to meet the requirements of school drill and inspection, prevented large cadet gatherings and displays as in former years, and thus to some extent deprives the Cadet movement of one of its chief attractions. This operates chiefly in the country districts, where battalion parades are in many cases impracticable.

Monthly battalion parades of Metropolitan and Sub-Metropolitan Corps were held regularly throughout the year, and all these Corps visited at the schools. Target practice was invariably conducted on Saturday, in order to interfere as little as possible with school-work. It is proposed for the coming year to hold Quarterly Prize Meetings at Randwick, as an incentive to good shooting.

Country Corps were supplied with ammunition in all cases where it could be shown that it could be safely and profitably expended.

Cadet

Cadet Challenge Shield and Condy Champion Shield.

The Annual Rifle Meeting at which these Shields were competed for, was held at Randwick on December the 14th and 15th. The Challenge Shield was won by the Orange Superior Public School Corps, and the Condy Champion Shield by Corporal Jack, of Eskbank Superior Public School. Thirty-one schools took part in the competition, fifteen of them from country districts. The shooting was good, and the meeting a success.

Public Schools Challenge Shield.

This Shield, given by the Department for competition in drill, was won this year by Fort-street Model Public School, at the Sixth Annual Meeting of the Public Schools' Athletic Association, held at the Sydney Cricket Ground on the 21st and 22nd September. At this gathering upwards of 2,000 school pupils took part in various drill competitions and displays. The meeting was a most successful one, and apart from the races and other attractive events, afforded by means of the various drill and calisthenic competitions and displays, evidence of the attention given to physical training in our schools.

JOHN DETTMAN, Major,
Commanding the Public Schools' Cadet Force and Superintendent of Drill.

APPENDIX XX.

REPORT ON TECHNICAL EDUCATION, WITH ANNEXES.

THE work of the Technical Education Branch during the year 1894, as measured by the number of students, has been about equal to that of last year, so far as the fully recognised classes at the Sydney Technical College and the suburban branch schools are concerned; but in the country districts there has been a slight falling off in many of the classes. The classes that have not maintained their numbers are those carried on by teachers on fees only. As these teachers receive no salary from the State, they are compelled in most cases to charge a higher fee; and as during the past year there has not been any perceptible revival in trade, perhaps rather the reverse, many persons have been unable to afford these increased fees. This has been more particularly so in the country schools.

The enrolments for the year are shown in the following table; the numbers for 1893 are given for comparison:—

	1893.	1894.
Sydney Technical College	3,016	2,956
Suburban classes.....	552	508
Classes in country towns	2,881	2,500
Classes connected with Public Schools	647	579
	<u>7,096</u>	<u>6,543</u>

Deducting from the total enrolment all cases where students have entered for more than one class, the number of individuals entered on our books for the year was 4,923. The weekly attendance of individual students was 3,182.7.

Teaching Staff.

The Teaching Staff consists of 89 persons, distributed as follows:—

- 10 Lecturers in charge of Departments.
- 5 Resident Masters in charge of branch schools.
- 37 Teachers.
- 15 Assistant teachers.
- 22 Teachers in charge of classes without salary.

I entered upon my work as Superintendent on the 7th May last. Since then I have visited all the classes in Sydney and a number of the branch schools, and have to report that, almost without exception, the classes are conducted by teachers fully competent to discharge the duties entrusted to them. Many of them are enthusiasts, earnestly endeavouring to instil into the minds of their pupils the principles which underlie the business, trade, or profession in which they are engaged.

The following changes took place in the Teaching Staff during the year:—The lamented death of Mr. W. Wright Campbell deprived the Department of Architecture of its Lecturer; the vacancy thus caused was filled by the appointment of Mr. Cyril Blacket. Mr. G. H. Hargraves having resigned his position of Art Teacher at Wagga Wagga, Mr. E. S. Henderson, assistant in the Sydney Art Classes, was appointed in his stead. Mr. D. Brackley, Art Teacher at Raymond Terrace, was placed in charge of the Art Classes at Newcastle, formerly taught by Mr. R. A. Smith, resigned. Mr. A. Collingridge was appointed Teacher of Freehand and Perspective Drawing at Bathurst towards the end of the year. Mr. A. J. Dixon, A.I.C., was appointed temporarily to the position of Teacher of Chemistry at Granville, in the place of Mr. W. Barnes, resigned.

During the year two young women, who have passed through the Art Course in Sydney, have been appointed assistant teachers in the Art Department, and they give promise of being successful teachers.

Subjects taught.

The subjects taught during 1893 were also taught in 1894, with the addition of Mine Surveying, in which a class has been formed at Newcastle, and in Sydney a class in Metalliferous Mining has been re-started, after a lapse of some years.

The teaching of the subjects for which no salaries are paid was continued (with the exception of Tailor's Cutting) for the First and Second Terms on the same conditions as heretofore, viz. :—that the Teachers held themselves responsible for the cleaning of the rooms used, and paid for lighting; the Minister however, subsequently decided to remit the charges for lighting and cleaning for the Third Term and to allow the students to present themselves for examination in December.

Examinations.

The examination results of the Technical Classes for the year 1894 must on the whole be considered satisfactory. The total number examined was 2,457—an increase of 300 on the numbers for 1893—and the number who passed was 1,644, being 69 more than for the previous year. The percentage of passes is slightly lower than in 1893, but the average is largely brought down by the results of the examinations of the classes for which no salaries are paid. As is stated above the Teachers of these classes did not know until late in the year that there would be an examination, and consequently had not time to prepare students for these tests.

The percentage of marks required for a pass is still 50 per cent.; for the First Grade, 75 per cent. and for the Honors Grade, 85 per cent. The passes for 1894 are divided as follows:—Honors Grade, 257. First Grade, 404, Second Grade, 983. The Examiners generally report that the standard of work has been well maintained, and in many cases is superior to that of former years.

The connection between this Branch and the Public Schools.

In the following matters the work of the Technical Education Branch is more or less intimately connected with the Public Schools of the Colony:—

- (a) Manual Training.
- (b) Art and Science Teaching in connection with the Boys' High School in Sydney.
- (c) Art and Science Teaching in connection with the Country Public Schools.
- (d) Cookery at several centres.
- (e) Lecture lessons in Horticulture by a Special travelling Lecturer.
- (f) The loan of lantern slides, models and apparatus from the Technical College and Technological Museum.
- (g) The furnishing of sets of plaster drawing models.

(a) Manual Training.

The work of this department has been carried out during the year at Fort-street, Sussex-street, Crown-street, Blackfriars (all in the Metropolitan District), also at East Maitland High School, West Maitland (three) and Goulburn Public Schools, and at the Sydney Technical College for pupils of the High School. Since the beginning of the year boys from Cleveland-street Public School have attended the Technical College for Manual Training, one division on Tuesday and another on Thursday afternoon. The classes remain popular, and applications for admission still outnumber the vacancies which occur, parents thus realising the benefits derived from the instruction given. The

The results of the examination were on the whole satisfactory, and it is hoped that with improved course of instruction, together with the actual models illustrating the progressive exercises, still better results will be attained.

(b.)—*Art and Science Teaching in connection with the Boys' High School in Sydney.*

Arrangements having been made whereby pupils of the Boys' High School could have the option of receiving instruction in the day or evening classes of the Technical College as free students, no less than 201 boys attended for the subjects of manual training, physics, freehand, perspective, geometrical and model drawing, and modelling.

(c.)—*Art and Science Teaching in connection with Country Public Schools.*

Lessons in freehand drawing, model drawing, geometrical drawing, and perspective are given by the Art Master at Maitland to pupils of the West Maitland Girls' High School and East Maitland Boys' High School. At Goulburn pupils from the local Public Schools attend at the Technical School, in the morning and afternoon of each Monday, for lessons in chemistry, given by the resident master. At Bathurst the resident master at the Technical School gives lessons in physiography to pupils of the local Public Schools.

(d.)—*Cookery at several centres.*

Cookery classes meet in several of the local Technical Schools, available for Public School scholars in the daytime and technical pupils at night.

(e.)—*Lecture Lessons in Horticulture by a special Travelling Lecturer.*

Mr. Albert Gale, lecturer in bee culture and horticulture, has visited a number of Public Schools in various parts of the Colony during the year, and has given lecture lessons on horticulture to the pupils.

(f.)—*The loan of lantern slides, models, &c., from the Technical College and Technological Museum.*

During the year 162 sets of lantern slides were lent to Public School Teachers. These slides are lent conditionally on the applicants paying carriage each way, and holding themselves responsible for the safe return of the slides. Much has also been done, through the agency of the Technological Museum, in the loan of models and apparatus to Public School Teachers and students in training for illustrating lessons.

(g.)—*The furnishing of sets of plaster drawing models.*

Sets of plaster casts for freehand and model drawing have, as in former years, been supplied to Public Schools, as directed by the Chief Inspector. The set supplied is usually that known as the school set, as chosen by the Superintendent of Drawing in the Public Schools, who also acts as Examiner of Drawing for the Technical Schools. The sets are cast by the Technical College modeller and caster. Eighteen sets were supplied during the year, and 33 groups of models for pupil-teachers drawing examinations.

Lectures in Country Districts.

The travelling lecturer in geology, the Rev. J. Milne Curran, has delivered 40 lectures on subjects interesting to miners during the year. As in former years there are always more applications for his services than he can attend to.

Mr. Albert Gale has delivered no less than 118 lectures on bee-keeping during 1894. There was an average attendance of over 80 persons at each lecture. There appears to be no diminution in the interest taken in his lectures.

Mr. Angus Mackay has delivered 9 lectures on subjects connected with agriculture, in addition to his work of conducting classes in agriculture in Sydney and at Hornsby.

Library.

The number of visitors to our library at the Technical College has increased, and, at the request of a number of students, the hours during which it is opened have been extended. The hours now are from 11 a.m. to 4.30 p.m. and 6 to 9 p.m. There have been many additions of recent technical literature to the stock of books; the text-books prescribed in the calendar for the various classes will be found on the shelves.

Technological Museums.

These institutions remain under my direct charge; a short report of the work done will be found in Annex A.

Expenditure.

The amount expended on technical education during the year was £21,214 10s. 3d. Of this sum £16,325 10s. 9d. was spent on the Technical College and branch schools, and £4,888 19s. 6d. on the Technological Museums. The cost to the State is at the rate of £3 6s. 10d. for each student enrolled, calculated on the average enrolment each term. This is a slight increase on the cost for 1893. The fees paid by students during the year were £3,278 7s.

Summary of Statistics for 1894.

Number of classes.....	191
" " enrolment of students....	6,543
" " individual students	4,928
Average weekly attendance of individual students	3,182
Number of students examined	2,457
" " " passed	1,644
Amount of fees received from pupils	£3,278 7s.
Number of visitors to Technological Museum	89,695
" " " branch Museums in country towns	107,729

The depression in trade has of course been felt, particularly by those engaged in industrial pursuits, but in spite of this I submit that the work of the Technical Education Branch, for 1894, is distinctly satisfactory. I am sanguine that we shall show even better results during the coming year.

J. H. MAIDEN,
Superintendent.

ANNEX A.

REPORT OF CURATOR OF TECHNOLOGICAL MUSEUM.

THE year has been mainly occupied in the overhauling and re-arrangement of the collections, and the examination and labelling of a large quantity of material which had accumulated prior to the occupation of the present Museum building. Until such time as it is possible to publish sectional catalogues of the Museum, I can but speak of its contents in general terms. Special attention has continued to be given to the acquisition of Australasian raw products; and although I believe the collection, in this direction, to be incomparable, no efforts are spared to make it complete.

Economic Geology, Mineralogy, &c.

During the past year many individual specimens and small sets have been added to the collections, principally by donation. The duplicate collection has also been enlarged by the same means.

A very nice collection of precious opal from the Queensland mines was lent by Mr. Mitchinson, and is now on view, together with a set of photographs, illustrating the principal features of the opal-bearing country, the mode of mining, and the methods used in the recovery of this valuable gem.

Specimens of almandine garnets, with the conglomerate in which they are found in the sandstone at Pyrmont, Sydney, have been placed in the collection. A description of these gems, together with their analysis, was the subject of a paper by Mr. Smith, published in the Proceedings of the Royal Society of New South Wales.

A fine collection of Australian gems was obtained, consisting of rubies, diamonds, sapphires, spinels, &c., pearls from Western Australia, and specimens of crystallised gold. Specimens of the opaque magenta-coloured variety of sapphire from Victoria, named Barklyite, are also included.

A collection of rocks from the neighbourhood of Albury has been received, determined, and named, and placed in the rock collection. These were forwarded by Dr. Andrews, of that town.

Specimens of marble from the neighbourhood of Bathurst, illustrating the fine material obtainable in this locality, have been added.

Many individual specimens received during the year, illustrating different subjects relating to the arts and sciences, might be mentioned, these making a welcome addition to the very valuable collection on this floor (B. floor).

The specimens illustrating phenomenal geology have also increased, and a small collection of Australian fossils has been displayed. These collections materially aid the students in geology and mineralogy who attend the various schools and colleges of the Colony.

Economic Botany.

Since the last report the intervening twelve months have been occupied chiefly in re-arranging and re-labelling the specimens, new and old, after the first hurried classification prior to the final opening of the Museum, by his Excellency the late Governor, Sir Robert Duff.

The architectural construction of the building has materially assisted in the work, and the extensive wall space has enabled me to display specimens of diagrams, &c., which have been packed away for years for the lack of space.

The timber collection, which is now acknowledged to be unsurpassed by any other in Australia, has received a great deal of attention, and is so arranged that every specimen can be seen and handled, and most specimens sent for identification can be determined in a few minutes.

The exhibition of native flowers still maintains its interest with the public. Large numbers of plants have been received at the Museum for determination of their botanical origin, deleterious properties or economic value.

Original work has also been carried on during the year. Four new species of plants have been discovered and described, while many new varieties, species new for New South Wales, and also important economic botanical work have been published in the proceedings of Scientific Societies of New South Wales.

Amongst the most valuable collections received, the following deserve special mention:—

1. *Timbers from the Department of Agriculture, British Columbia.* The collection consists of fine slabs of the remarkable timbers of that part of the world.
2. *Collection of Fibres, British Guiana.* This is particularly interesting as the latest London market values are given with each specimen.
3. A large collection of fruits, seeds, and fibres from Sydney Botanic Gardens.
4. Special note might also be made of Dr. T. L. Bancroft's series of specimen photographs to illustrate the preparation of food by the aborigines of Queensland.

Animal Products.

During the past year the collection of animal products and economic zoology has been enriched by a large number of valuable donations and several extensive exchanges from foreign countries.

Among the most important of the former, are some tanned skins from Messrs. J. Forsyth and Sons, Sydney, comprising two fine fur seals-skins, shark and blue groper skins, while Messrs. J. Ludowici and Son presented a very fine tanned dugong hide, over three-quarters of an inch in thickness, and as hard as a board; this firm also renewed an exhibit of belting, illustrating the various methods of joining.

The feather court has been greatly improved by a large collection of ostrich feathers, showing the different sorts used in the trade, together with some eggs, obtained by exchange from the Department of Agriculture of Cape Town, Cape of Good Hope.

The economic entomology collection has been worked up. A number of mounted collections of Australian Insects illustrating the different divisions of the insect world, have been arranged and sent to the country museums, while others have been prepared for exhibition in the new wall cases.

It is found impossible to give stock book numbers to the many insects that are forwarded by our country correspondents, so when practicable they are entered as collections.

Of Australian insect galls this Museum now contains a very large and fine collection, together with a large series of termites (white ants) and the material eaten by them, and a representative named collection of Australian and foreign scale insects.

The new arrangement of wall cases is well adapted for the display of all entomological specimens, of which a large number will be shortly set out.

Wool.

Throughout the whole year there has been an increase of work in all branches in connection with this division of the Museum. 730 samples and fleeces of wool have been received from the Australasian Colonies and other countries. The collection now contains specimens of all kinds and breeds of sheep, varying from the finest champion merino rams and ewes down to the inferior yolk-stained wools.

It is satisfactory to note that our wool-growers are increasingly anxious to obtain information from this branch in connection with matters pertaining to wool, and the same may be said of the Sydney wool brokers.

There has been an increase in the number of wool collections sent abroad.

The wools sent to Chicago received first awards in their respective classes, and were returned in good order.

The models of the stud rams "Instructor" and "Border Chief" have been of great assistance to the students as well as of interest to the visitors.

In addition to the well-defined groups of exhibits above referred to, a number of exhibits have been received for the Sanitary, Educational, and other Courts.

Awards were obtained at the Chicago International Exposition, 1893, for the following collections:—

1. Collection of barks.
2. Substances used as food by the aborigines.
3. Fibres.
4. Collection of gums, resins, and kinos.
5. Collection of tan barks.
6. Animal products (other than wool).
7. Collection of wool.

The reports of the judges were in all cases of a highly commendatory character.

The boys of the Training Ship "Sobraon," to the number of 100, and the children belonging to the Deaf and Dumb Asylum, to the number of 150, attended the Museum in charge of their teachers. The young people certainly appeared to enjoy themselves, and I hope they obtained useful knowledge.

Some of the schools of the Metropolitan District sent a large contingent of pupils. I feel sure that others would attend if it were generally known that they are welcome at any time, and that there is no limit to the number who may attend at a visit.

The students of the Training Colleges at Fort-street and Hurlstone have been supplied with large numbers of specimens for the purpose of illustrating object lessons given by them. Specimens for object lessons are also sent to Public School Teachers, where there are no expenses for freight.

I again have pleasure in reporting that many of our Public School Teachers send specimens to the Museum for identification.

Of these I am particularly indebted to Messrs. Wilson, Adamson (Uralla), and Harper (Menangle). These three gentlemen have sent hundreds of specimens during the year, and have maintained a continuous correspondence with the Museum on the subject of these specimens, and of the products of their districts. The country schoolmaster should be, in addition to his school duties, a source of enlightenment in regard to the resources and products of his district, and an experience of some years shows that many in the Department fulfil that condition.

The attendance of visitors at the various Museums, for 1894, has been as follows:—

Sydney	89,695
Newcastle	52,911
Bathurst	23,770
Goulburn	16,437
West Maitland.....	14,611

The Branch Museums are not open on Sundays.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

SYDNEY GRAMMAR SCHOOL.

(REPORT FOR 1893.)

Presented to Parliament pursuant to Sydney Grammar School Act of 1854, secs. 10 and 16.

The Chairman of Board of Trustees to The Minister of Public Instruction.

Sir,

Sydney Grammar School, 5 May, 1894.

I have the honor to submit the following Report of the proceedings of the Trustees and the progress of the School during the past year, in order that the same may be laid before His Excellency the Governor and the Executive Council, in accordance with the provisions of "The Sydney Grammar School Act."

The office of Chairman has been held by the Honorable Sir William Windeyer during the year, Mr. A. J. Cape having acted as Vice-Chairman; while the seat left vacant through the retirement of Dr. Garran, on his acceptance of an office under the Government, has been filled by the appointment of Mr. R. J. Black.

It will be noticed from the accompanying returns that there has been a slight falling off in the number of boys attending the School. This may be accounted for, in part, by the financial troubles of the past year, and in part by the increase of half a guinea a quarter in the School fees which was made during the last half-year, this action being taken in deference to the wishes of the Government in view of the need for economy in the public expenditure.

The fees are now £4 14s. 6d. and £3 13s. 6d. per quarter in the Upper and Lower Schools respectively, against £4 and £3 in 1892, the advance from pounds to guineas having been adopted with the approval of the parents of the boys, in order to provide funds for the maintenance of the School sports, which were formerly kept up by voluntary contributions. It will be seen from the accounts that the Trustees have thus been able to keep the expenditure of the School within the income.

The Reports of the Examiners, attached hereto, show that the high standard reached in the School work in former years has been maintained, further proof being afforded by the successes in the University Examinations of the year of boys trained at the School.

The Trustees are pleased to be able to speak in the highest terms of the work done by the Teaching Staff during the year. The Head Master has been granted twelve months' leave of absence, his health failing him after continuous work in the service of the School extending over twenty-six years. Mr. G. E. Blanch acts as Head Master during Mr. Weigall's absence.

The R. A. A. Morehead Exhibition has been awarded to Mr. E. M. Mitchell.

A statement of the Income and Expenditure of the School for the past year is forwarded herewith.

I have, &c.,

WILLIAM C. WINDEYER,
Chairman Sydney Grammar School Trustees.

RETURN of the Salaries and Allowances of the Masters of the Sydney Grammar School for the year 1893.

SYDNEY GRAMMAR SCHOOL.—DECEMBER, 1893.

Report of Examinations Presented to the Trustees.

UPPER SCHOOL I.—CLASSICAL SIDE.

A.—CLASSICS.—The Latin teaching in the upper school is, with the exception of one form, sound and accurate. The better boys appear to grasp something of the spirit of the literature, whilst almost all have an intelligent knowledge of the rules, and can apply their knowledge with more or less success. The results in Greek are far less satisfactory. The number of boys capable of doing the higher work is very small: the 2nd division is uneven and deficient in accuracy, but the thorough grounding that is being given in the two lowest divisions suggests some promise of eventual improvement.

B.—MODERN LANGUAGES.—In French the three upper divisions show considerable facility in dealing with unprepared translation, and a large proportion of the boys translate with taste and spirit; in all these divisions the knowledge of the syntax is good, but there is some weakness in vocabulary. Of the three lower divisions, the knowledge of grammar in division IV is more sound, and the teaching apparently has been more systematic than in divisions V and VI: in these two latter divisions the range of instruction appears to have been unnecessarily limited to the matter of the text-book. In German, the better boys in the 1st division show excellent style in their translation, and grasp of the language in their composition: in the 2nd division the unprepared translation varied from excellent to fair—the syntax was good—but the lower boys showed weakness, both in accidence and vocabularies: in the 3rd division the knowledge of grammar was specially good: in the 4th division the work was too uneven. A general view of the examination shows that the divisions are well classified and graded, that the teaching is upon a sound basis, and that there is a continuous improvement in the standard of knowledge.

C.—IN MATHEMATICS the seven divisions of the upper school have been examined in arithmetic, algebra, and geometry, and the three upper divisions in trigonometry also. A paper in higher mathematics was set to division I.

The results of these examinations show that the school has fully maintained the standard of last year.

In algebra the range is somewhat wider than last year, the general style has improved, and the power to solve problems has increased.

In geometry the most marked feature has been the evidence which the papers gave of the greater attention which had been paid during the year to stimulating the originality of boys by means of deductions.

In arithmetic a somewhat greater uniformity of method is needed, and a more careful graduation of the work.

The average level of the upper divisions in trigonometry and higher mathematics has been distinctly raised, and the standard of the school, which is already beyond that of the public examinations, should be considerably higher next year.

D.—Some branch of natural science is now taught in every form in the upper school. The range of instruction has been diversified by the introduction of geology and physics, whilst practical work in chemistry has been encouraged. The results of the examination were in all cases fair or good, and in forms V, lower IV, and com. I, they were excellent.

II.—COMMERCIAL SIDE.

An improvement in the average standard of intelligence is perceptible in the literary subjects, while in the more mechanical work the short-hand has distinctly improved; the hand-writing—to which special attention has been paid—is better, especially in the lower divisions; the book-keeping is really good in 1st division, several boys being qualified to write a good business letter; in one of the divisions the spelling is bad. The general conduct in the highest division has been really excellent, and there have been several instances of marked individual improvement in the lower divisions.

LOWER SCHOOL.

In the lower school there are fewer brilliant pupils than usual, but the examinations distinctly show that there are very few boys who have not made distinct progress during the year. A great strain has been thrown on the teaching power during the last half-year by the large number of absences, but in most cases the difficulty has been successfully overcome. There has been a gradual improvement in handwriting and neatness, and the efforts made to encourage self-help in the boys have been successful. The number of serious punishments has also been less than in previous years.

The Latin work in all the forms but one is sound, though the composition in the upper forms is not sufficiently accurate.

In English work the upper forms show improvement in analysis and parsing, but do not readily enter into the spirit of their poetry; the lower forms did very well indeed. An attempt to impart a more extensive and more accurate knowledge of Australian geography has been more than justified by the result. In history, the use of a text-book has been discontinued, and oral lessons on the most striking events substituted; this change has proved very beneficial in form III-A, several of the papers showing a very clear grasp of the subject. French has been the least satisfactory subject, only one form doing really well. The arithmetic work has been good, in spite of the fact that more of the time allotted for mathematics has been given to euclid and algebra. Four divisions were examined in euclid and five in algebra as against three divisions last year, the result in each case showing marked improvement.

1894-5.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(REPORT FOR 1894.)

Presented to Parliament pursuant to Act 14 Vic. No. 31, sec. 22.

REPORT of the Senate of the University of Sydney for the year ending 31st December, 1894.

1. The Senate of the University of Sydney, in pursuance of the provisions of section 22 of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1894, for the information of His Excellency the Governor and the Executive Council.

Matriculation.

2. At the ordinary Matriculation Examination in March, 211 candidates presented themselves and 125 passed. In addition 120 passed the Junior Public Examination in September in the subjects prescribed for the Matriculation Examination. Out of 22 who attended the March Entrance Examination for Medicine and Science 9 passed, while 31 passed the September Senior Public Examination in the required subjects. Of these, 20 passed in four mathematical subjects, and thus qualified themselves for direct admission to the Engineering Department. The total number who qualified themselves for admission to the University was thus 285. The number actually admitted to Matriculation was 118.

Annual University Examinations.

3. The numbers of students who attended and passed the annual examinations in December, 1893, and March, 1894, are as follows:—

			Faculty of Arts.	
			Candidates.	Passed.
First year examination	142	95
Second year examination	72	61
Third year examination	91	75

In addition to the above who passed in the whole of their respective examinations, 64 evening students and occasional day students passed in individual subjects.

			Faculty of Law.	
			Candidates.	Passed.
Intermediate examination	18	15
Final examination...	11	10

			Faculty of Medicine.	
First year examination	31	24
Second year examination	24	18
Third year examination	19	16
Fourth year examination	13	10
Fifth year examination	12	11

			Faculty of Science.	
First year examination	1	0
Second year examination	3	1
Third year examination	3	3

			Department of Engineering.	
First year examination	6	6
Second year examination	10	8
Third year examination	6	4

Attendance at Lectures.

4. The following are the numbers of matriculated students attending lectures in the various faculties during the year:—Faculty of Arts, 332, including 105 evening students; Faculty of Law, 37; Faculty of Medicine, 119; Faculty of Science, 4; Department of Engineering, 30; total, 522. In addition to the above the day lectures were attended by 39, and the evening lectures by 25, non-matriculated students. Six graduates also attended post-graduate courses. The total number attending the University classes was thus, 592. The numbers of women included in these are:—Faculty of Arts, 102; Faculty of Medicine, 6; Faculty of Science, 2.

Degrees.

5. The following Degrees were conferred after examination :—

Master of Arts (M.A.), Frank A. A. Russell, B.A. ; Henry Giles Shaw, B.A.

Bachelor of Arts (B.A.) :—

Ernest Clayton Andrews, John Barron, Thomas Rainsford Bavin, Emily Maud Beardsmore, Torrington Blatchford, Charles Blumer, John Le Gay Brereton, Sophia Brown, William Vernon Brown, James Kevin Byrne, Enoch William Cadman, Annie Lucille Cahill, William Jowers Cakebread, Archibald Peter Cameron, Francis Louis Verhulst Coffey, John Connolly, Frank Fawcett Copland, David Cowan, Ebenezer Dash, Arthur Bernard Davies, Herbert Hutchinson Dixon, David Sutherland Edwards, Edward Samuel Edwards, Ethel Ellis, Mary Ellis, Joseph Finney, Howard George Thomas Fleming, Arthur Henry Garnsey, Alfred John Griffiths, Georgina Jane Harriott, William George Harvey, David John Hayes, John William Hobbs, Kate Emily Hogg, William Frederick Holmes, Dannina Hood, John Henry Hopman, James O'Donoghue Augustine Hughes, James Jacobs, William Edwin James, Stephen Jason Johnston, Evan John Jones, Henry Herman Kater, Joseph Cuthbert Kershaw, Alexander James Kilgour, Arthur Knight, Rosa Lichtscheindl, James Loyden, William Taylor M'Coy, Rebecca Mary M'Glynn, Donald Æneas Dunlop MacMaster, Frank MacMullen, Ethel Margaret Maynard, Cecil Newton Mell, H. Hamilton Mitchell Merewether, James Albert Miles, Walter Albert Moore, Kelsey Illidge Newman, Kathleen Moira O'Brien, Patrick Daniel O'Brien, Allan Franklyn Pain, George Henry Payne, Anthony Walton Pattinson, Helen Alice Raves, Patrick William Riley, Leonard Robjohns, John Frazer Sydney Russell, Florence Mary Seldon, Norman Smith, John Stonham, Charles James Street, James Sullivan, William Frank Swyny, Jennie Bertha Uther, James Ernest Walker, Samuel Herbert Waiker, John Alfred Williams, William Henry Williams, Frederick William Wood.

Bachelor of Law (LL.B.) :—George Ernest Flannery, Ernest W. T. Gerber, Aubrey Halloran, Hercules Meares, James Prosper Pickburn, William Tighe, Alec. Thomson, Andrew R. J. Watt.

Bachelor of Medicine (M.B.) :—Rudolph Hermann Böhrsmann, Robert Gordon Craig, James Froude Flashman, Charles Lancelot Handcock, Joseph Edmund Oram Henry, Robert Menzies Kinross, Donald Luker, John Laing Martin M'Creddie, Roger Robert Steel Mackinnon, George Lathrop Murray, Michael Veech.

Master of Surgery (Ch. M.) :—Rudolph Hermann Böhrsmann, Robert Gordon Craig, James Froude Flashman, Charles Lancelot Handcock, Joseph Edmund Oram Henry, Robert Menzies Kinross, Donald Luker, John Laing Martin M'Creddie, Roger Robert Steel Mackinnon, George Lathrop Murray, Michael Veech.

Bachelor of Science (B. Sc.) :—Agnes Elizabeth Lloyd Bennett, Joseph Henry Draper Brearley, Walter Cecil M'Clelland, Erskine Hugh Robison, Stratford Sheldon, John Alexander Watt

Master of Engineering (M.E.) :—Henry Harvey Dare.

Bachelor of Engineering (B.E.) :—Civil Engineering—Herbert Percy Seale, Norman Frederic White. Mining Engineering—Ernest Willoughby Nardin, Arthur Raymond Weigall.

6. In accordance with the provisions of the "*Ad Eundem Degrees Act*," 44 Vic. No. 22 :—Arthur P. Canaway, B.A., Christ Church, Oxford, was admitted *ad eundum gradum* to the degree of Bachelor of Arts.

7. The total number of degrees conferred during the year was thus 123, divided as follows :—M.A., 2 ; B.A., 80 ; LL.B., 8 ; M.B., 11 ; Ch. M., 11 ; B. Sc., 6 ; M.E., 1 ; B.E., 4.

8. The following is the number of degrees conferred in the various departments of the University from its foundation up to the end of the year 1894 :—M.A., 244 ; B.A., 721 ; LL.D., 23 ; LL.B., 42 ; M.D., 33 ; M.B., 82 ; Ch. M., 58 ; B. Sc., 21 ; M.E., 2 ; B.E., 23. Total, 1,249.

9. The honors obtained at the Degree Examinations during the year were as follows :—

Faculty of Arts—Honors at the B.A. Examination.

Latin—Class I :—D. S. Edwards. Class II :—C. N. Mell and A. H. Garnsey, *æq.* Class III :—A. J. Kilgour, J. Stonham, D. A. D. MacMaster, and J. Barron, *æq.*, H. H. Dixon.

Greek—Class I :—A. H. Garnsey. Class II :—D. S. Edwards.

Mathematics—Class I :—A. B. Davies (medal). Class II :—E. C. Andrews.

French—Class I :—J. Stonham. Class II :—Ethel Maynard. Class III :—Jennie B. Uther.

German—Class II :—C. N. Mell.

English—Class I :—J. Le G. Brereton, J. K. Byrne.

Logic and Mental Philosophy—Class I :—D. Cowan (medal), T. R. Bavin. Class II :—J. F. Russell. Class III :—J. Barron.

History—Class I :—J. Finney, Georgina J. Harriott. Class II :—J. E. Walker, S. H. Walker, Class III :—E. S. Edwards.

Geology and Palæontology—Class II :—Kate E. Hogg.

Chemistry—Class II :—T. Blatchford.

Biology—Class II :—W. F. Holmes.

Honors at the M.A. Examination.

School of English Literature and Political Philosophy—Class II :—F. A. A. Russell.

School of Logic and Mental Philosophy—H. G. Shaw.

Faculty of Law—Honors at Graduation as LL.B.

Class I :—G. E. Flannery (medal). Class II :—J. P. Pickburn, E. W. T. Gerber, A. R. J. Watt.

Faculty

Faculty of Medicine—Honors at Graduation as M.B. and Ch. M.

Class I:—R. G. Craig (medal).

Faculty of Science—Honors at Graduation as B. Sc.

Geology and Palæontology—Class I:—J. A. Watt (medal). Class II:—Agnes E. L. Bennett.
 Mineralogy—Class I:—J. A. Watt.
 Physics—Class I:—J. H. D. Brearley.
 Biology—Class II:—Agnes E. L. Bennett.

Department of Engineering—Honors at Graduation as B.E.

Civil Engineering—Class I:—H. P. Seale (medal), N. F. White.

Honors at Graduation as M.E.

Civil Engineering—Class I:—H. H. Dare (medal).

10. The following Scholarships were awarded:—

(a) At the Matriculation Examination.

Aitken Scholarship for general proficiency—H. S. Dettmann.
 Cooper Scholarship, No. II, for Classics—H. E. Whitfeld.
 Barker Scholarship, No. II, for Mathematics—S. D. Chalmers.
 Lithgow Scholarship for Modern Languages—Trixie G. Whitehead.
 Horner Exhibition for Mathematics—S. D. Chalmers.

(b) At the First Year Examination in Arts.

Cooper Scholarship, No. III, for Classics—G. W. Waddell and E. M. Mitchell, *æq.*
 George Allen Scholarship for Mathematics—D. G. Stewart.

(c) At the Second Year Examination in Arts.

Barker Scholarship, No. I, for Mathematics—W. F. J. Burfitt.

(d) At the B.A. Examination.

Frazer Scholarship for History—J. Finney, Georgina J. Harriott, *proxime accessit*.

(e) At the Intermediate Examination in Law.

G. Wigram Allen Scholarship for general proficiency—D. Levy.

(f) At the First Year Examination in Medicine.

Renwick Scholarship for general proficiency—E. C. Hall and N. W. Kater, *æq.*

(g) At the Third Year Examination in the Faculty of Medicine.

John Harris Scholarship for Anatomy and Physiology—G. H. B. Deck.

(h) At the First Year Examination in Science and Engineering.

Levey Scholarship for Chemistry and Physics—T. P. Strickland.

(i) At the Second Year Examination in Science and Engineering.

Caird Scholarship for Chemistry and Physics—E. S. Simpson.

(j) James King, of Irrawang, Travelling Scholarship for Graduates—G. C. Henderson, B.A.

11. The awards made for Prize Compositions were:—

Wentworth Medal for English Essays—subject: “The influence of Modern Science upon Literature.” Prize for Graduates—J. H. Smairl, B.A.; Prize for Undergraduates—D. A. D. MacMaster.

12. The following students were placed in the first class in honors at the annual examinations, other than the final examinations for degrees:—

Faculty of Arts.

First Year Examination—Latin—G. W. Waddell, E. M. Mitchell. Greek—G. W. Waddell, E. M. Mitchell. Mathematics—D. G. Stewart, E. M. Mitchell, K. ff. Swanwick. French—Florence J. Murray. German—A. E. Finckh.
 Second Year Examination—Mathematics—W. F. J. Burfitt. French—Constance Harker. English—Constance Harker. Logic and Mental Philosophy—Eleanor M. Whitfeld. History—J. Dennis, Constance Harker, Eleanor M. Whitfeld, F. G. Lane. Geology—W. F. J. Burfitt.

Faculty of Medicine.

First Year Examination—Physics—J. Macpherson, B.A., J. M. Roe.
 Second Year Examination—Organic Chemistry—G. P. Dixon, J. J. O’Keefe.

Faculty of Science.

Second Year Examination—Special course of Biology for Medical Students—J. Macpherson, B.A.

Department

Department of Engineering.

First Year Examination—Physics—T. P. Strickland. Mathematics—T. P. Strickland. Chemistry—T. P. Strickland. Applied Mechanics—T. P. Strickland.
 Second Year Examination—Physics—J. P. Wood, C. F. Jackson, W. J. Doak. Chemistry (Mining Engineering)—E. S. Simpson. Geology—E. S. Simpson, J. T. Dixon, J. P. Wood.

13. Annual Prizes were awarded as follows:—

University Prize for Physiography—Florence Murray. First Year Class Examination Prize for Chemistry amongst Evening Students—J. Dennis and H. de B. Barry, *æq.* Professor MacCallum's Prizes for English Essays—First Year, Florence Murray; Second Year, Eleanor M. Whitfield; Third Year, J. Le G. Brereton. Mr. A. W. Joses' Prizes for English Essays—First Year, G. W. Waddell; Second Year, Gertrude Roseby; Third Year, Jennie B. Uther. Norbert Quirk Prize for Mathematics (Second Year)—W. F. J. Burfitt. Professor Anderson's Prize for Logic and Mental Philosophy (Second Year)—Eleanor M. Whitfield; Third Year, D. Cowan. Professor Haswell's Prize for Zoology (First Year)—N. W. Kater. Collie Prize for Botany (First Year)—E. C. Hall. Smith Prize for Physics—T. P. Strickland. Slade Prize for Chemistry—Class Examination—T. P. Strickland. Slade Prize for Practical Chemistry—J. M. S. Woore. Slade Prize for Practical Physics—C. F. Jackson and R. F. Arnott, *æq.* Professor David's Prize for Geology—E. S. Simpson.

14. The following Bursaries were awarded, each consisting of a payment to the student of £50 per annum, or in the case of a half-bursary of £25 per annum, for three years, together with exemption from the payment of lecture fees:—

Maurice Alexander Bursary (one half).
 Ernest Manson Frazer Bursary.
 Hunter Baillie Bursary.
 J. B. Watt Exhibition.
 Walker Bursary No. 2 (one-half).
 Walker Bursary No. 3 (one-half).

In addition to 19 State bursars and 23 holders of University bursaries, 18 students who had shown their inability to defray the expenses of University education were permitted to attend lectures without the payment of fees. One hundred and twenty-nine students of the State training schools for male and female teachers were also permitted to attend on a reduced scale of fees as arranged with the Minister of Public Instruction and provided by Parliament.

15. The Senior and Junior Public Examinations were held in the month of September in Sydney and at the following local centres:—Albury, Araluen, Armidale, Bathurst, Bega, Berry, Bourke, Bowral, Brisbane, Broken Hill, Bundaberg, Bundanoon, Bungendore, Camden, Casino, Carcoar, Charters Towers, Chatsworth Island, Cooma, Deniliquin, Dubbo, Dungog, Emmaville, Forbes, Glen Innes, Goulburn, Grafton, Grenfell, Gundagai, Hay, Herberton, Hill End, Hillgrove, Hillston, Hunter's Hill, Inverell, Ipswich, Junee, West Kempsey, Kurrajong Heights, Lismore, Lithgow, Maclean, West Maitland, Maryborough, Mittagong, Moruya, Mount Victoria, Mudgee, Murrumburrah, Newcastle, Nowra, Orange, Parramatta, Picton, Port Macquarie, Plattsburg, Queanbeyan, Rockhampton, Rylstone, Singleton, Scone, Tamworth, Taree, Tenterfield, Tingha, Toowoomba, Townsville, Wagga Wagga, Warwick, Windsor, Wingham, Wollongong, Yass, Young.

For the Senior Examination 137 candidates presented themselves, and 103 passed. For the Junior Examination 1,494 candidates presented themselves, and 824 passed.

16. The prizes for General Proficiency in these Examinations were awarded as follows:—

Seniors.

John West Medal and Grahame Prize Medal, for General Proficiency—
 Frederick Guy Griffiths, Sydney Grammar School; *prox. acc.* Richard Alexander Kerr, Brisbane Grammar School.
 University Prize of £20, for General Proficiency amongst male candidates—
 Frederick Guy Griffiths, Sydney Grammar School; *prox. acc.* Richard Alexander Kerr, Brisbane Grammar School.
 John Fairfax Prize of £20, for General Proficiency amongst female candidates—
 Elizabeth Ada Lance, Presbyterian Ladies College; Hannah England, Brisbane Girls Grammar School, *æq.*

Juniors.

University Prize of £10, for General Proficiency amongst male candidates—
 Reginald Norman Robson, Newington College.
 Fairfax Prize of £10, for General Proficiency amongst female candidates—
 Ethel Jane Lane-Latham (Miss Wallis), Ascham, Darling Point.

A complete analysis of the Examinations will be found in the "Manual of Public Examinations," which accompanies this report.

17. Four Examinations of candidates for the Civil Service were held during the year. At these 164 candidates presented themselves, and 78 were successful.

18. Three Law Examinations, similar and equal to that prescribed for Matriculation, for candidates for articles of clerkship with Attorneys, were held. At these 50 candidates presented themselves, and 26 were successful.

19. During the year the Senate held 11 regular meetings and 3 special meetings, in addition to the Annual Commemoration, and 2 meetings of the Conjoint Board—consisting of the Senate of the University and the Board of Directors of the Prince Alfred Hospital.

The

The attendances of the various Fellows at the meetings of the Senate were as follows :—

Manning, the Hon. Sir William, K.C.M.G., Chancellor	6
Backhouse, His Honor Judge, M.A., Vice-Chancellor	17
Barton, the Hon. Edmund, M.A.	3
Butler, Professor, B.A.	16
Cobbett, Professor, M.A., D.C.L.	13
† Gurney, Professor, M.A.	3
Jones, P. Sydney, M.D.	17
* Knox, Edward W.	6
Liversidge, Professor, M.A., F.R.S.	14
MacLaurin, the Hon. H. N., M.A., M.D., LL.D., M.L.C.	10
Manning, the Hon. C. J., M.A.	4
† O'Connor, the Hon. R. E., M.A., M.L.C.	0
† Oliver, Alexander, M.A.	3
Renwick, the Hon. Sir Arthur, B.A., M.D., M.L.C.	12
Rogers, F. E., M.A., LL.B., Q.C.	5
Russell, H. C., B.A., F.R.S., C.M.G.	14
¶ Scott, Professor, M.A.	13
Stephen, C. B., M.A.,	12
Stuart, Professor T. P. Anderson, M.D.	14
Teece, Richard, F.I.A.	14
Windeyer, the Hon. Sir William, M.A., LL.D.	8

* Elected July 7, 1894.

† Absent on leave.

‡ Elected October, 1894.

¶ Vacated office October, 1894.

Twenty-seven meetings of Sub-committees of the Senate for Finance, By-laws, Retrenchment, &c., were held during the year, the attendance of Members being as follows :—The Chancellor, 4; the Vice-Chancellor, 24; Professor Cobbett, 4; Professor Gurney, 1; Dr. P. Sydney Jones, 11; Professor Liversidge, 6; the Hon. Dr. MacLaurin, 1; the Hon. Mr. Justice Manning, 1; the Hon. Sir Arthur Renwick, 1; Mr. H. C. Russell, 5; Professor Scott, 2; Mr. C. B. Stephen, 6; Professor Stuart, 6; and Mr. R. Teece, 8.

20. The annual election to the office of Vice-Chancellor, held in the month of April, resulted in the re-appointment of His Honor Judge Backhouse, M.A.

21. The Senate desires to express its sense of the loss sustained by the absence from Senate meetings during the latter part of the year of the Chancellor, Sir W. M. Manning, who was unable to attend with regularity in consequence of severe illness. A resolution was passed unanimously by the Senate expressing sympathy with him in his illness, and requesting him to transmit his views upon matters under consideration, and the Senate has in this way benefited by his advice on several occasions.

22. The Senate has to report, with deep regret, the death of the Hon. Peter Faucett, B.A., who had been a member of the Senate since 1859, and was the senior Fellow at the time of his death. Mr. Faucett was always a regular attendant at the meetings of the Senate, where his opinions carried very great weight. The Senate, by resolution, placed on record its appreciation of his long and useful services to the University, extending over a period of thirty-five years.

23. A convocation for the election of a Fellow in the room of the late Hon. Peter Faucett, B.A., was held on Saturday, the 7th of July, and resulted in the election, without opposition, of Mr. Edward William Knox.

24. Leave of absence from the meetings of the Senate was granted as follows :—

To the Hon. Richard E. O'Connor for a period of twelve months, in consequence of his absence from the Colony for that period.

To Mr. Alexander Oliver, President of the Land Court, for four months, in consequence of illness and absence from Sydney on official duties.

25. The biennial elections of Deans of the Faculties took place in November, and resulted in the following elections :—

Faculty of Arts—Professor Gurney, M.A.

Faculty of Law—Professor Cobbett, D.C.L.

Faculty of Medicine—Professor Stuart, M.D.

Faculty of Science—Professor Liversidge, M.A.

26. In the month of February, Mr. Grafton Elliott Smith, M.B., Ch.M., was appointed to the office of Demonstrator in Anatomy to the end of the year 1894.

27. In the month of April, Mr. E. F. Pittman, A.R.S.M., was re-elected to the office of Lecturer in Mining for a period of one year.

28. During the year the following gentlemen resigned the offices held by them, viz., Dr. W. P. Cullen, Lecturer in Real Property and Equity, Mr. A. B. Piddington, B.A., Evening Lecturer in English Literature, and Mr. Savannah J. Speak, A.R.S.M., Lecturer in Metallurgy and Demonstrator in Chemistry and Assaying.

29. The Senate has determined that no appointment shall be made at present to fill the vacancy caused by Dr. Cullen's resignation, the Professor of Law having generously undertaken to carry out the duties of the Lectureship during the year 1895 in addition to his ordinary duties.

A new arrangement has also been made in regard to the vacancy caused by Mr. Speak's resignation, under which the present Demonstrator in Geology, Mr. W. F. Smeeth, M.A., B.E., will carry out the duties of Lecturer in Metallurgy, the demonstrations in Assaying being conducted in the Chemical Department with the assistance of a Junior Demonstrator for general work.

Mr.

Mr. Ernest R. Holme, B.A., a distinguished graduate of this University in the Department of Modern Literature, has been appointed in the place of Mr. Piddington.

30. In response to a petition from the Fifth Year Medical Students, Dr. H. J. Foreman was appointed by the Senate to deliver a course of Clinical Lectures on Diseases of Women. This duty was kindly undertaken by Dr. Foreman, without fee.

31. In the month of October Mr. J. C. Dibbs was reappointed Auditor of the University until the 31st of January, 1896.

32. In the month of December the Senate granted an application from Professor Warren, Professor of Engineering, for leave of absence from his duties during Michaelmas Term of 1895. Professor Warren proposes to visit the principal engineering schools in America and Europe, many of which have been established since the foundation of the Sydney School, with a view to inspect the arrangement of the most modern laboratories, and observe new methods of instruction; and it is believed that considerable advantage will accrue to the Engineering Department here from the result of his observations. In order that the work of his department may be carried out without interruption, a rearrangement of the lectures has been made for the year, under which the Professor's lectures will be delivered in Lent and Trinity Terms, and the students will be occupied in the Michaelmas Term in the more practical work of the course and in attending lectures upon Surveying, Architecture, and other scientific branches. The arrangement made with Professor Warren causes no additional expense to the University.

33. At the request of the Department of Public Instruction of Queensland, the University undertook the conduct of the annual examinations for Exhibitions to Universities, granted by the Government of that Colony, and also an examination of teachers of the highest class in the Queensland State Schools.

34. In consequence of some difficulties which had arisen in regard to the interpretation of that portion of the memorandum attached to the will of the late Sir William Macleay, by which he bequeathed the sum of £11,400 to the University for the establishment of a Lectureship in Bacteriology, the Senate made application to the Court of Equity for an interpretation of the clauses in the will and memorandum which appeared to be ambiguous.

The will and memorandum provided that all candidates for a Degree in Medicine or Science should be required to attend a six-months' course in Bacteriology before proceeding to their respective degrees, and the application to the Court of Equity invited an interpretation of the terms "Degree in Science," and "a six-months' course." The judgment of the Court was to the effect that the application of the regulation in regard to the attendance of Science Students in Bacteriology should be limited to candidates for degrees in Biological Science, and that the length of the course should be "Such an amount of lectures or teaching throughout two terms as shall from time to time be prescribed by the Senate, having regard to the great importance which the testator attached to the study."

As the terms of the will require that the interest of the principal fund shall be devoted exclusively to the salary of the lecturer, the Senate has addressed a circular letter to various Universities asking for information as to details and cost of equipment, before taking active steps for the appointment of a lecturer, in order that effect may be given to the will without entering into unnecessary expenditure from the general funds of the University.

35. The Senate received invitations to appoint a delegate or delegates to the Tenth International Congress of Orientalists at Geneva, and to the Eighth International Congress of Hygiene and Demography at Buda Pesth, and to an Indian Medical Congress to be held at Calcutta, but was unable to respond to the invitations.

In answer to a similar invitation from the University of Lyons, the Senate appointed the Hon. R. E. O'Connor, M.A., to attend the celebrations at that place in the month of October, but that gentleman was unable to be present.

36. Awards of Merit were made to the University of Sydney for Exhibits of Photographs and Natural History and other specimens, at the Columbian Exposition of 1893.

37. The turrets of the principal tower of the University building having been found to be in an unsafe condition, in consequence of the splitting of the stones in various places, arrangements have been made for their repair under the supervision of the Government Architect.

38. In the month of September a resolution was passed by the Senate, on the recommendation of the Faculty of Medicine, providing that certificates from the Universities enumerated in Chapter XIX, Section 1 of the By-laws, of having passed the examination in the scientific subjects of the First Year of Medicine, be accepted in so far as they be deemed equivalent to those of this University.

39. On the recommendation of the Board for Conducting the Public Examinations, it was decided in the month of December that the fee to be charged in future for admission to the Junior Examination should be £1 in lieu of £1 5s., a corresponding reduction having been made in the scale of payments to examiners.

40. School of Mines.—The building provided by the Government at the University for the School of Mines, including the Geological Department, was fairly complete at the end of the year, and will be ready for use at the beginning of next Lent Term.

41. The report of the University Extension Board, presented to the Senate in the month of December, shows that thirteen courses of lectures were delivered at twelve centres in New South Wales, with an average attendance of 54 and a total certificate-issue after examination of 49. In Queensland seven courses were delivered with an average attendance of 32, and certificate-issue of 23.

In cases where such lectures have been delivered by University Professors, no payment has been accepted by them.

The thanks of the Senate are due to the Trustees and the Librarian of the Free Public Library, for arrangements which have been made for the transmission of a supply of books, on the appropriate subjects, to local centres.

At

At a conference of persons interested in University Extension, held in London under the auspices of the London Society for the Extension of University Teaching, the University was represented by the Hon. Sir Saul Samuel, Agent-General for New South Wales, the Hon. R. E. O'Connor, and the Right Reverend Dr. Webber, Bishop of Brisbane.

42. The regulations under which students attending evening lectures have been allowed to proceed to graduation having been found to be not altogether satisfactory, a new code of by-laws (appended to this report) has been drawn up, and will be brought into force at the beginning of the next academic year. The principal alteration consists in requiring such students to have passed a preliminary or matriculation examination in the subjects of the lectures which they propose to attend, and to matriculate as ordinary students of the University. In future, also, instead of being allowed to divide the work at their own option, these students must proceed with the curriculum in accordance with the regular scheme laid down by the by-laws, which, however, will permit of graduation in periods of three, four, or five years, at the student's selection as heretofore.

43. The Senate has to acknowledge, with thanks, the assistance given to it by the Government, through the Inspector-General of Police, in maintaining order upon the University grounds.

44. The withdrawal by the Government of the sum of £2,000 from the additional endowment for 1894 was met, partly by dismissals and partly by re-arranging certain of the minor lectureships, so that the lectures should be delivered in alternate years, and by retrenchments of other kinds. With the greatest economy in administration, the Senate was enabled to carry on the work of the University without incurring debt. The intimation, however, of a further reduction at the rate of £1,000 per annum for the year 1895, with a prospective falling off of fees and revenue from other sources, has made it necessary to adopt measures affecting the University in a more serious way. The alternatives presented to the Senate were the abolition of some school or schools, the increase of fees of students, and the reduction of emoluments of officers. Inasmuch as the Professors have been appointed under agreement at a fixed salary, it is impossible for the Senate to reduce their emoluments without their consent; but a proposal made by the Senate that all officers of the University receiving emoluments in excess of £300 per annum should forego 5 per cent. of such excess for the year 1895 was agreed to by all the officers concerned. At the same time it was decided that a fee of £1 per term, to be applied to general purposes, should be imposed upon all students attending University lectures. The Senate imposed these charges upon teachers and students with reluctance, but was impelled by the necessities of the case. The Senate would be reluctant to diminish the usefulness of the University by abolishing any of its integral parts without the gravest necessity.

45. The amendments and additions to the University by-laws made during the year will be found in an Appendix to this report.

48. The following benefactions were received during the year:—

- (a) A donation of books and antiquities from Sir Charles Nicholson, to be added to the Nicholson Museum.
- (b) Her Majesty's Commissioners for the Exhibition of 1851 have again placed at the disposal of the Senate the nomination to a Science Research Scholarship of £150 per annum for two years; the scholarship to be awarded in the beginning of 1895 to a student of three years' standing in the Faculty of Science, to enable him to prosecute his studies and researches, with a view of developing the industries and manufactures of his country.

46. The annual statements of receipts and expenditure, and of the position of the various trust funds of the University at the 31st of December, duly certified by the Auditor, Mr. J. C. Dibbs, are appended to this report.

H. E. BARFF,
Registrar.

APPENDIX I.

RECEIPTS and EXPENDITURE of the University of Sydney for year ending 31st December, 1894.

GENERAL ACCOUNT.

DR.				CR.	
RECEIPTS.		EXPENDITURE.			
	£ s. d.	£ s. d.		£ s. d.	£ s. d.
Received from the Government of New South Wales:—					
The Statutory Annual Endowment ...	5,000 0 0		Paid Salaries ..	17,791 13 4

APPENDIX II.

New and Amended By-laws adopted by the Senate at meetings held during the year 1894.

To stand in lieu of section 14, chapter II.

The Senate hereby makes and declares the following selections of branches of learning, the Professors in which shall be *ex-officio* Members of the Senate—that is to say, Mathematics, Law, Physiology, and Chemistry; such selections to take effect from the date of the Governor's assent hereto, and to endure for the term of two years from that date, unless sooner revoked by the authority of the Senate, and with the approval of the Governor

To stand in lieu of section 3, chapter IX.

3 For these purposes the Professorial Board shall make such rules as it may think fit, provided that these rules be not repugnant to any existing By-law; and shall have power to impose any penalties in accordance with Academic usage on any student for breach of such rules, or misconduct of any kind. All Public Teachers in the University shall be authorised to inflict a fine for breach of discipline, not exceeding two pounds; provided that every Public Teacher who inflicts any such fine shall immediately report the circumstance in writing to the Professorial Board.

New By-laws to be included in Chapter X (after a re-arrangement of Chapter).

1 Candidates for any of the degrees granted by the University shall be required to matriculate before entering upon the prescribed course.

2. Candidates before being admitted to matriculation shall have passed one of the examinations required by the by-laws for admission to the prescribed courses in the different Faculties, or shall have been admitted *ad eundem statum*,

To

To stand in lieu of section 2, chapter XII.

2. No undergraduate, not exempted under section 6, chapter XI, from attendance at the lectures, shall be admitted to these examinations, who, without sufficient cause, shall have absented himself more than three times during any one term from any prescribed course of lectures. At every yearly examination, students must pass the prescribed examinations in the subjects of lectures before they can proceed with their course.

To stand in lieu of section 6, chapter XI.

6. Candidates for the degree of Bachelor of Arts shall be required at the commencement of their course to pass the matriculation examination for the Faculty of Arts.

To stand in lieu of section 18, chapter XV.

18. The fee for the degree of B.A. shall be three pounds. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar. If a candidate fail to pass the examination the fee shall not be returned to him. For any re-examination for the same degree he shall pay a fee of two pounds.

To stand in lieu of section 7, chapter XVI.

7. There shall be two examinations for the degree of Bachelor of Laws, called respectively the Intermediate and the Final LL.B. Examinations. The Intermediate and Final LL.B. Examinations shall be held at the same time as the Annual Examinations in other Faculties. Students who have not acquitted themselves satisfactorily in such class examinations or exercises (including attendance at Court) as may be prescribed by the Faculty of Law may be refused admission to these examinations.

To stand in lieu of sub-section 3 of section 8 of chapter XVII.

III. In the Third Year :—

During Lent Term—Practical Physiology (Physiological Practical Chemistry).
During Lent and Trinity Terms—Materia Medica and Therapeutics (75 lectures). Regional Anatomy.
During Michaelmas Term—Physiology (Senior Course).

To stand in lieu of sub-section 5 of section 8 of chapter XVII.

V. In the Fifth Year :—

During Lent and Trinity Terms—Medicine. Midwifery (50 lectures). Gynæcology (25 lectures).
During Michaelmas Term—Applied Logic. Psychological Medicine, including Clinical instruction, and at least twelve systematic lectures. Ophthalmic Medicine and Surgery, including Clinical instruction, and at least twelve systematic lectures.

To stand in lieu of section 11 of chapter XVIII.

11. The fee for the Degree of B. Sc. shall be £3. No candidate shall be admitted to the Examination, unless he have previously paid this fee to the Registrar. If a candidate fail to pass the examination the fee shall not be returned to him. For any re-examination for the same Degree, he shall pay a fee of £2.

To stand in lieu of section 1 of chapter XXV.

UNIVERSITY EXTENSION.

1. There shall be a Board consisting of not more than eighteen members, of whom four at least shall be members of the Senate, and four at least shall be members of the Teaching Staff, and not less than two shall be persons not being members of the Senate or of the Teaching Staff. The Board shall be appointed annually by the Senate at its monthly meeting in December, and shall be held to be duly constituted upon the appointment of twelve persons to be members thereof; and the Senate may fill vacancies and appoint additional members from time to time, if it shall think fit, during the year, but so that the total number of members of the Board shall not exceed eighteen at any time.

Membership of the Board shall continue from the time of appointment until the next annual appointment of the Board, when all memberships shall lapse, but all retiring members shall be eligible for re-election.

To stand in lieu of section 4 of chapter XII.

Every undergraduate exempted from attendance upon lectures under section 6, chapter XI, shall, before being admitted to any yearly examination, pay to the Registrar a fee of £2

To be inserted as sections 18 and 19 after section 17 of chapter XV, the sections at present numbered 18, 19, &c., being numbered 20, 21, &c. :—

18. The work of students attending lectures may be tested by means of class examinations, class exercises, or essays, and the results of such tests shall be reported to the Senate.

19. In determining the results of the annual examinations, the Examiners may take into favourable account the results of the tests described in section 18.

To stand in lieu of section 5, chapter XVII.

Written class examinations shall be held during each course of instruction at least once a term. Students shall not absent themselves from these examinations except upon a medical certificate, and at the end of each course a report of the result, signed by the responsible teacher, shall be presented to the Senate by the Dean. Students who fail to pass the class examinations may, at the discretion of the Board of Examiners, be refused admission to the annual examinations.

To stand in lieu of section 8, chapter XVII.

Candidates shall be required to pass an examination, conducted by means of set papers and *visú voce* interrogations, in one of the two following groups, viz. :—

(1.) Medicine, Surgery, Midwifery, and Gynæcology.

The examination in each case shall include examination of, and report on, the cases of patients in a hospital, and examination and demonstration of specimens or preparations, normal or morbid.

(2.) The other subjects included in the Medical Curriculum of the University.

They shall further be required to present, and, if called upon, to defend a thesis on some subject included in the Medical Curriculum of the University. Five printed copies of the thesis, on paper $5\frac{1}{2}$ inches wide and $8\frac{3}{4}$ of an inch deep, must be transmitted to the Registrar at least two months before the date fixed for the examination.

To stand in lieu of section 5, chapter XVIII.

Candidates for the degree of Bachelor of Science shall produce evidence of having graduated in arts, or of having attended the lectures of the first year of the arts course and passed the first year examination in arts; or of having passed the senior public examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German—and three of the following subjects, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics; or of having passed an examination equivalent to the senior public examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German—and in three of the four sections, Arithmetic, Algebra, Geometry, Trigonometry; and shall, during the first year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz. :—

1. Biology.
2. Chemistry.
3. Mathematics.
4. Physics.
5. Physiography.

Provided that students shall only be required to attend the lectures upon, and pass the annual examinations in, such portions of the mathematical course for the first year as they have not already passed at the above-mentioned examinations.

To stand in lieu of section 18 of chapter XVIII.

Candidates for the degree of Bachelor of Engineering must produce evidence of having graduated in arts or in science, or of having attended the lectures of the first year of the arts course, and passed the first year examination in arts; or of having passed the senior public examination in the following subjects, viz. :—Latin, one of the three languages—Greek, French, or German—and four of the following subjects, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics; or of having passed an examination equivalent to the senior public examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German—and in the four sections, Arithmetic, Algebra, Geometry, Trigonometry; and shall, during the First Year, attend the courses of instructions upon, and pass the examination in, the following subjects, viz. :—

1. Chemistry—Inorganic (with two terms laboratory practice).
2. Descriptive Geometry and Drawing.
3. Mathematics.
4. Applied Mathematics (with laboratory practice).
5. Physics (with one term laboratory practice).
6. Physical Geography and Geology.

Provided that students shall only be required to attend the lectures upon, and pass the annual examinations in, such portions of the mathematical course of the first year as they have not already passed at the above-mentioned examinations. Provided also that students of the Technical Branch of the Department of Public Instruction, whose certificates of attendance and examination in that branch are accepted by the Senate as an equivalent to a portion of the curriculum prescribed for candidate for the degree of Bachelor of Mining Engineering, shall be considered to have passed the Entrance Examination, if they satisfy the Examiners in the following subjects, viz., in two of the four languages—Latin, Greek, French, German—and four of the following subjects, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics.

To stand in lieu of section 22 of chapter XVIII.

Candidates for the degree of Bachelor of Engineering in Mining and Metallurgy shall, during the second year, attend the courses of instruction upon, and pass the examination in, the following subjects, viz. :—

1. Applied Mechanics (with laboratory practice).
2. Chemistry (including quantitative analysis).
3. Civil Engineering.
4. Geology.
5. Mechanical Drawing.
6. Surveying.

To stand in lieu of chapter XXIV.

1. Courses of Evening Lectures, embracing all the subjects necessary for the degree of Bachelor of Arts, shall be given at such times and in such order as the Senate may from time to time direct.
2. Any person desirous of attending a course of Evening Lectures may be allowed to do so upon payment of such fees as the Senate may from time to time direct.
3. Students who desire to qualify themselves for graduation by attendance upon Evening Lectures shall be required to pursue the course of study and pass the examinations prescribed in chapter XV of the By-laws, for candidates for the degree of Bachelor of Arts.
 - (a) Provided that any Evening Student, if he so desires, may distribute the lectures and examinations of the First Year, as prescribed in sections 12 and 13 of chapter XV, over two years, taking not less than two of the following subjects in each year, viz., (1) Latin, (2), one of the following languages—Greek, French, or German, (3) Mathematics, (4) English; and subject to his having previously passed the Matriculation Examination in any subject taken up (except English).
 - Provided also that Evening Students may be permitted by the Faculty to take the lectures and examinations upon any of the three scientific subjects of the First Year at a later period of their course.
 - (b) Provided also that any Evening Student, if he so desires, may distribute the lectures and examinations of the Second Year, as prescribed in sections 14 and 15 of chapter XV, over two years, taking not less than two of the subjects so prescribed in each year.
4. In all cases not provided for in the preceding By-laws of this chapter, Evening Students shall be subject to the same By-laws, Rules, and Regulations as other students.

Section 3, chapter XXVI (new By-law).

Any salaried officer of the University becoming a candidate for election to the Legislative Assembly shall thereby vacate his office.

1894.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(RETURN RESPECTING EXAMINATION FEES.)

Ordered by the Legislative Assembly to be printed, 8 November, 1894.

[Laid upon the Table of the House in answer to Question No. 2, of 8 November, 1894.]

Question.

2. MR. STEVENSON asked THE MINISTER OF PUBLIC INSTRUCTION,—Referring to the Answers given to Mr. Stevenson's Questions, respecting University examination fees, will he state,—

- (1.) To whom are the fees paid, and the amount paid to each person?
(2.) What services are rendered by each of the recipients for the emolument received?

Answer.

(2.)

The payments to examiners are made upon a fixed scale for setting and examining papers. The number of papers to be set was 48, and the number examined 13,555. The examinations were held at seventy-five local centres in New South Wales and Queensland.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31, sec. 21.

UNIVERSITY OF SYDNEY.

AMENDED BY-LAWS ADOPTED BY THE SENATE AT A MEETING HELD ON THE 4TH DECEMBER, 1893.

To stand in lieu of Section 3 of Chapter LX (Calendar, p. 105).

3. For these purposes the Professorial Board shall make such rules as it may think fit, provided that these rules be not repugnant to any existing By-law; and shall have power to impose any penalties in accordance with Academic usage on any student for breach of such rules, or misconduct of any kind. All Public Teachers in the University shall be authorised to inflict a fine for breach of discipline, not exceeding two pounds, provided that every Public Teacher who inflicts any such fine shall immediately report the circumstances in writing to the Professorial Board.

To stand in lieu of Section 7 of Chapter XVI (Calendar, p. 115).

7. There shall be two examinations for the Degree of Bachelor of Laws, called respectively the Intermediate and the Final LL.B. Examinations. The Intermediate and Final LL.B. Examinations shall be held at the same time as the Annual Examinations in other Faculties. Students who have not acquitted themselves satisfactorily in such Class Examinations or exercises (including attendance at Court) as may be prescribed by the Faculty of Law may be refused admission to these examinations.

H. E. BARFF,
Registrar.

ALF. P. BACKHOUSE,
Vice-Chancellor.

Laid before the Executive Council on the 10th day of July, 1894.—ALEX. C. BUDGE, Clerk of the Council.

R. W. DUFF,
Governor.

UNIVERSITY OF SYDNEY.

NEW AND AMENDED BY-LAWS ADOPTED BY THE SENATE AT A MEETING HELD ON THE 5TH OF MARCH, 1894.

To stand in lieu of Section 18 of Chapter XV (112).

18. The fee for the degree of B.A. shall be three pounds. No candidate shall be admitted to the Examination unless he have previously paid this fee to the Registrar. If a candidate fail to pass the examination the fee shall not be returned to him. For any re-examination for the same Degree he shall pay a fee of two pounds.

To stand in lieu of sub-section 3 of Section 8 of Chapter XVII (p. 118).

3. In the Third Year:—
 During Lent Term—
 Practical Physiology (Physiological Practical Chemistry).
 During Lent and Trinity Terms—
 Materia Medica and Therapeutics (75 lectures).
 Regional Anatomy.
 During Michaelmas Term—
 Physiology (Senior Course).

To stand in lieu of sub-section v of Section 8 of Chapter XVII (p. 119).

v. In the Fifth Year:—

During Lent and Trinity Terms—

Medicine.

Midwifery (50 lectures).

Gynæcology (25 lectures).

During Michaelmas Term—

Applied Logic.

Psychological Medicine, including Clinical instruction, and at least twelve systematic lectures.

Ophthalmic Medicine and Surgery, including Clinical instruction, and at least twelve systematic lectures.

To stand in lieu of Section 11 of Chapter XVIII (p. 124).

11. The fee for the Degree of B. Sc. shall be three pounds. No candidate shall be admitted to the Examination unless he have previously paid this fee to the Registrar. If a candidate fail to pass the examination the fee shall not be returned to him. For any re-examination for the same Degree he shall pay a fee of two pounds.

To stand in lieu of Section 1 of Chapter XXV (p. 134).

UNIVERSITY EXTENSION.

1. There shall be a Board consisting of not more than eighteen members, of whom four at least shall be members of the Senate, and four at least shall be members of the Teaching Staff, and not less than two shall be persons not being members of the Senate or of the Teaching Staff. The Board shall be appointed annually by the Senate at its monthly meeting in December, and shall be held to be duly constituted upon the appointment of twelve persons to be members thereof; and the Senate may fill vacancies and appoint additional members from time to time, if it shall think fit, during the year, but so that the total number of members of the Board shall not exceed eighteen at any time.

Membership of the Board shall continue from the time of appointment until the next annual appointment of the Board, when all memberships shall lapse, but all retiring members shall be eligible for re-election.

(L.S.)

ALF. P. BACKHOUSE,

Vice-Chancellor.

H. E. BARFF,
Registrar.

Laid before the Executive Council on the 18th day of April, 1894.—ALEX. C. BUDGE, Clerk of the Council.
R. W. DUFF.

UNIVERSITY OF SYDNEY.

NEW AND AMENDED BY-LAWS ADOPTED BY THE SENATE AT A MEETING HELD ON MONDAY, THE 2ND JULY, 1894.

I. That section 4 of Chapter XII of the By-laws be repealed, and the following be substituted:—
Every undergraduate exempted from attendance upon lectures under section 6, Chapter XI, shall, before being admitted to any yearly examination, pay to the Registrar a fee of two pounds.

II. That the following be inserted as sections 18 and 19 after section 17 of Chapter XV, the sections at present numbered 18, 19, &c., being numbered 20, 21, &c.:—

18. The work of students attending lectures may be tested by means of class examinations, class exercises or essays, and the results of such tests shall be reported to the Senate.

19. In determining the results of the annual examinations, the Examiners may take into favourable account the results of the tests described in section 18.

III. That section 5 of Chapter XVIII be repealed, and the following be substituted:—

Candidates for the Degree of Bachelor of Science shall produce evidence of having graduated in Arts, or of having attended the lectures of the First year of the Arts course and passed the First Year Examination in Arts; or of having passed the Senior Public Examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German, and three of the following subjects, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics; or of having passed an examination equivalent to the Senior Public Examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German, and in three of the four sections, Arithmetic, Algebra, Geometry, Trigonometry; and shall, during the first year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz.:—

1. Biology,
2. Chemistry,
3. Mathematics,
4. Physics,
5. Physiography.

Provided that students shall only be required to attend the lectures upon, and pass the Annual Examinations in, such portions of the Mathematical Course for the First Year as they have not already passed at the above-mentioned examinations.

IV.

IV. That section 18 of Chapter XVIII be repealed, and the following section substituted :—

Candidates for the Degree of Bachelor of Engineering must produce evidence of having graduated in Arts or in Science; or of having attended the lectures of the First Year of the Arts Course and passed the First Year Examination in Arts; or of having passed the Senior Public Examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German, and four of the following subjects, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics; or of having passed an examination equivalent to the Senior Public Examination in the following subjects, viz., Latin, one of the three languages—Greek, French, or German, and in the four sections Arithmetic, Algebra, Geometry, Trigonometry; and shall, during the First Year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz. :—

1. Chemistry—Inorganic (with two terms laboratory practice),
2. Descriptive Geometry and Drawing,
3. Mathematics,
4. Applied Mechanics (with laboratory practice),
5. Physics (with one terms laboratory practice),
6. Physical Geography and Geology.

Provided that students shall only be required to attend the lectures upon, and pass the annual examinations in, such portions of the Mathematical Course of the First Year as they have not already passed at the above-mentioned examinations. Provided also that students of the Technical Branch of the Department of Public Instruction, whose certificates of attendance and examination in that branch are accepted by the Senate as an equivalent to a portion of the curriculum prescribed for candidates for the Degree of Bachelor of Mining Engineering, shall be considered to have passed the Entrance Examination, if they satisfy the Examiners in the following subjects, viz., in two of the four languages—Latin, Greek, French, German; and four of the following subjects, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics.

V. That section 22 of Chapter XVIII be repealed, and the following section be substituted :—

Candidates for the Degree of Bachelor of Engineering in Mining and Metallurgy shall, during the Second Year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz. :—

1. Applied Mechanics (with laboratory practice),
2. Chemistry (including quantitative analysis),
3. Civil Engineering,
4. Geology,
5. Mechanical Drawing,
6. Surveying.

VI. That the existing By-laws on the subject of Evening Lectures, Chapter XXIV, be repealed, and the following By-laws substituted :—

1. Courses of Evening Lectures, embracing all the subjects necessary for the Degree of Bachelor of Arts, shall be given at such times and in such order as the Senate may from time to time direct.
2. Any person desirous of attending a course of Evening Lectures may be allowed to do so upon payment of such fees as the Senate may from time to time direct.
3. Students who desire to qualify themselves for graduation by attendance upon Evening Lectures shall be required to pursue the course of study and pass the examinations prescribed in Chapter XV of the By-laws, for candidates for the Degree of Bachelor of Arts.
 - (a) Provided that any Evening Student, if he so desires, may distribute the lectures and examinations of the First Year, as prescribed in sections 12 and 13 of Chapter XV, over two years, taking not less than two of the following subjects in each year, viz., (1) Latin, (2) One of the following languages—Greek, French, or German, (3) Mathematics, (4) English; and subject to his having previously passed the Matriculation Examination in any subject taken up (except English).
 - Provided also that Evening Students may be permitted by the Faculty to take the lectures and examinations upon any of the three scientific subjects of the First Year at a later period of their course.
 - (b) Provided also that any Evening Student, if he so desires, may distribute the lectures and examinations of the Second Year, as prescribed in sections 14 and 15 of Chapter XV, over two years, taking not less than two of the subjects so prescribed in each year.
4. In all cases not provided for in the preceding By-laws of this Chapter, Evening Students shall be subject to the same By-laws, Rules, and Regulations as other students.

H. E. BARFF,
Registrar.

ALF. P. BACKHOUSE,
Vice-Chancellor.

Laid before the Executive Council on the 30th day of July, 1894.—A. C. BUDGE, Clerk of the Council.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(NEW AND AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31, sec. 21.

New and Amended By-laws adopted by the Senate at a meeting held on
Monday, the 3rd September, 1894.

1. That the By-laws at present denominated Chapter X, Terms, be called Chapter XI; that the present Chapter XI be called Chapter XII, and that section 9 be omitted from it; that the present Chapter XII, Yearly Examinations, be called Chapter XIII; that the By-law constituting Chapter XIII, Admission *Ad Eundem Statum*, be transferred to Chapter X.

2. That Chapter X of the By-laws be denominated Matriculation, and consist of the following Section:—

- (1.) Candidates for any of the Degrees granted by the University shall be required to matriculate before entering upon the prescribed course.
- (2.) Candidates before being admitted to matriculation, shall have passed one of the examinations required by the by-laws for admission to the prescribed courses in the different Faculties, or shall have been admitted *ad eundem statum*.
- (3.) (Transferred from Chapter XIII.) Undergraduates of other Universities may, at the discretion of the Professorial Board, be admitted *ad eundem statum* in this University without examination. Provided always that they shall give sufficient evidence of their alleged status and of good conduct.
- (4.) (Transferred from Chapter XI, Section 9.) Any person desirous of attending University lectures may do so without matriculation, upon payment of such fees as the Senate may from time to time direct.

3. That section 6 of Chapter XV be rescinded, and that the following be substituted:—Candidates for the Degree of Bachelor of Arts shall be required at the commencement of their course to pass the Matriculation Examination for the Faculty of Arts.

4. That section 2 of the present Chapter XII (now Chapter XIII) be rescinded, and that the following be substituted:—No undergraduate not exempted under section 6, Chapter XII, from attendance upon lectures, shall be admitted to these examinations, who without sufficient cause shall have absented himself more than three times during any one Term from any prescribed course of lectures. At every yearly examination students must pass the prescribed examinations in the subjects of lectures before they can proceed with their course.

5. That section 18 of Chapter XVII be rescinded, and that the following be substituted:—Candidates shall be required to pass an examination conducted by means of set papers and *viva voce* interrogations in one division of one of the two following groups, viz.,—

- (1.) Medicine, Surgery, Midwifery, and Gynæcology. The examination in each case shall include examination of, and report on, the cases of patients in a hospital, and examination and demonstration of specimens or preparations, normal or morbid.
- (2.) The other subjects included in the Medical Curriculum of the University.

They shall further be required to present and, if called upon, to defend a Thesis on some subject included in the Medical Curriculum of the University. Five printed copies of the Thesis, on paper five and a half inches wide and eight and three quarters of an inch deep, must be transmitted to the Registrar at least two months before the date fixed for the examination.

6. That Section 5 of Chapter XVII be rescinded, and that the following be substituted:—Written Class Examinations shall be held during each course of instruction at least once a Term. Students shall not absent themselves from these examinations, except upon a Medical Certificate, and at the end of each course a report of the result, signed by the responsible teacher, shall be presented to the Senate by the Dean. Students who fail to pass the Class Examinations may, at the discretion of the Board of Examiners, be refused admission to the Annual Examinations.

7.

7. To be added as section 3 of Chapter XXVI :—Any salaried officer of the University becoming a candidate for election to the Legislative Assembly, shall thereby vacate his office.

8. That section 14 of Chapter II be rescinded, and that the following be substituted :—The Senate hereby makes and declares the following selections of branches of learning, the Professors in which shall be *ex-officio* members of the Senate—that is to say, Mathematics, Law, Physiology, and Chemistry, such selections to take effect from the date of the Governor's assent hereto, and to endure for the term of two years from that date, unless sooner revoked by the authority of the Senate and with the approval of the Governor.

(L.S.) ALF. P. BACKHOUSE,
Vice-Chancellor.

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ST. JOHN'S COLLEGE, UNIVERSITY OF SYDNEY.
(AMENDED BY-LAWS.)

Ordered by the Legislative Assembly to be printed, 2 July, 1895.

ST. JOHN'S COLLEGE.

Within the University of Sydney.

IN pursuance of the power vested in us by the Act passed in the 21st year of the reign of Her present Majesty, entitled, "An Act to incorporate St. John's College as a College within the University of Sydney," we, the Rector and Fellows of St. John's College, for the purpose of carrying into effect the provisions and objects of the said Act, do hereby repeal the second of the amended and additional By-laws of the said College adopted on the 1st day of September, 1880, relating to election to vacancies in the Council, and do establish the amended By-laws contained in the schedule hereto signed at the end thereof by the present Rector of the said College.

In witness whereof we have hereunto affixed our corporate seal, this 7th day of May, 1895.

By order of the Council,

(L.S.) JAMES J. O'BRIEN,
Rector.

SCHEDULE.

St. John's College, University of Sydney—Amended By-laws—Election to vacancies in the Council.

1. No person shall be eligible for election to the Office of Fellow unless his name, with his written consent to nomination, shall have been notified in writing to the Rector as a candidate for such office by some legally qualified voter at least ten clear days before the date of such Convocation.

2. The Rector shall cause the names of duly-nominated candidates to be advertised once in one or more of the Sydney newspapers, and to be posted in the College for at least eight clear days before the day of Convocation.

JAMES J. O'BRIEN,
Rector.

Laid before the Executive Council on the 11th day of June, 1895.—ALEX. C. BUDGE, Clerk of the Council.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

NAUTICAL SCHOOL-SHIP "SOBRAON."

(REPORT FOR THE YEAR ENDING 30 APRIL, 1894.)

Presented to Parliament by Command.

The Superintendent, N.S.S. "Sobraon," to The Under Secretary of Public Instruction.

Sir,

Nautical School-ship "Sobraon," Sydney, 27 July, 1894.

In accordance with the 14th clause of the Regulations, I have the honor to submit my Annual Report upon the Institution for the year ended the 30th April last.

2. The ship worked quietly and smoothly during the twelve months. The boys behaved well, and there were no abscondings nor attempts to abscond. Cheerfulness, contentment, and good order marked their conduct throughout, and they performed their various duties in a hearty, willing way. Offenders were principally new-comers, and lads who came to us as having proved incorrigible in other institutions.

3. Our numbers greatly increased during the period—rising from 262 at the beginning of the year, to 312 at its close, the enrolment being 451. These are the highest figures for any one year since inauguration in May, 1867.

4. Health has again been satisfactory. For the most part, the boys come direct to us from some of the dirtiest parts of the city, where they have been in constant association with some of the most abandoned of vagrants and thieves. Many arrive on board suffering from itch and other skin diseases, vermin sores, want of proper food, and neglect. Yet the health on board generally has been good, and the principal sickness consisted of an attack of measles, which affected 13 per cent. of the inmates, several of whom, however, came on the ship with that complaint. No deaths occurred. In twenty-seven years there have only been 11 deaths in the institution, or in hospital, out of 3,009 committed to us.

5. The antecedents of the boys sent to the ship during the year will be gathered from Tables B and C. Thirty-nine had been failures under various charitable organizations; while 100, out of 189, had been on more than one occasion before a Police Court. Eight boys had been four or more times before the magistrates. At the present time we have boys on board who have turned out failures from the various reformatories and kindred establishments in this and other colonies; and it may safely be asserted that lads are not sent here, as a general rule, until all other means of reforming them have proved ineffectual.

6. Much industrial labour has been performed. The work of keeping a large ship 315 feet long and having five decks in good order, together with the care of shore buildings, grounds, &c., affords plenty of occupation. Laundry work, cooking, mending clothes, carpentry, sailmaking, and general work give plenty to do; and the value of the work performed, as shown in Table J, is certainly not over-estimated at £2,184. Drill has been systematically and largely engaged in. To it, is largely owing the general good order and health of the establishment. At a recent inspection the marks awarded equalled "Excellent."

7. Good work has been done in school, and better results will be attained in the future. A new chief schoolmaster has been appointed, and another assistant added, making three teachers. This will enable a more complete classification to be made, and allow of more attention being given to the backward boys. As usual, many lads on admission were found unable to read or write; amongst them being boys of advanced age.

8. The class system for conduct continues to work effectually, and reduction of class, with its attendant deprivation of privileges, forms our principal corrective agency. Boys in the lowest class have no play, plenty of work, plain fare and special supervision of a very close nature. Those in the upper classes have many privileges which are greatly esteemed—pleasant shore excursions, boating trips, admission to the library, recreation and entertainment halls; the membership of the athletic, swimming, and cricket clubs; monthly pay, additions to diet, good-conduct badges, &c., all form valuable incentives to well doing, and lead to formation of habits of self-respect.

9. Swimming is systematically taught, and no boy left the ship unable to swim, excepting some little fellows committed to us for protection, and who, being too young for the ship, were transferred shortly after arrival to the Boarding-out Department.

10. Although every boy committed is under the control of the Institution until he is 18, he does not necessarily remain on the ship for the whole of that time. After being on board a certain time it is allowable to apprentice him to some useful occupation should his conduct warrant me in thinking that a

satisfactory

satisfactory stage of reform has been accomplished. He then would be apprenticed, be taught an occupation enabling him to get his living in the future, and would earn a sum ranging from £42 downwards payable at the end of his service. During this term he would always be under the supervision of the Superintendent, liable to be brought back at any moment if his conduct was not satisfactory. At the same time this strict supervision would ensure his being well and justly treated. Many hundreds of boys have been dealt with in this way with satisfactory results. At the present time 400 apprentices are under the ship's guardianship. These, under the old reformatory system, would have been shut up in an institution, and turned out at the expiration of their time untrained and unfitted to run alone, while the cost of their maintenance would have been a heavy burden to the country. Under the plan pursued here for so many years these lads are earning their own livelihood at useful occupations, costing the State only a small sum annually for inspection and supervision. This enables the "Sobraon" to deal with a large number of such boys at one time—712 are now under control—and so saves the cost and necessity for establishing a number of institutions. The 400 apprentices have quite recently all been inspected. Some of them have been over three years away, and are nearing the completion of their term of service. The results of the inspection show that 93 per cent. are well behaved. Some of those receiving bad reports have been brought back to the ship for a further period of disciplinary treatment, while others have been admonished. During the year I personally visited a number of the apprentices at their masters' residences, and was much pleased at witnessing the kindly relations existing between boys and masters. The chief officer, Lieutenant Mason, also visited about 70 apprentices, and several gentlemen, on my behalf, have also inspected certain of these lads. The country police have, however, performed the greater part of this very necessary duty, in some instances visiting the same lad over and over again during the year, and it is upon their reports that I base my statement of results. Mr. Inspector-General Fosbery and the force under his command deserve the best thanks of the community for the sympathetic, tactful way in which they have inspected these lads, and kept up a friendly supervision over their welfare.

11. Nearly every apprentice has written to me at least once, some of them several times. These letters are most interesting reading, and are, of course, at once replied to. In addition to this somewhat heavy correspondence, letters have been interchanged with numbers of men formerly inmates of the ship, who, having passed through the apprenticeship stage, are now entirely free from control. It is indeed gratifying to find that so many of our "old" boys, who are under no obligation to do so, visit the ship or write to us. The friendliest feelings appear to actuate them, and it is a common thing for them to tell me that they consider it was a good thing their being sent to the ship. Since May, 1892, a period of two years, visits and letters from "old" boys (not apprentices) have amounted to no less than 908. Amongst the more recent of these was one who visited last week with his wife and child, who left in 1882; another who, apprenticed in June, 1879, is still with the same employer; one, still in the employ to which he was apprenticed in 1877; another, who left in 1876, still in same employ; one, who went from here in 1881, now manager of his old master's station, and another who left twenty-five years ago in December, 1868, who for years has held a most responsible and lucrative situation. These are by no means singular cases, but are given as specimens of very many similar instances.

12. On Sundays, when convenient, the boys landed and marched to their respective churches. At other times Divine Service took place aboard. The religious instruction of the inmates, apart from that taught under the direction of the ship's officers, has been controlled by the Rev. W. Charlton (C.E.), assisted by Mrs. Ford, Miss Fitzhardinge, Miss Hughes, and Miss Maguire for the Protestant boys, the Roman Catholics being instructed by the Rev. J. Fitzpatrick, the Rev. M. Glasheen, and the Rev. E. J. Corcoran. Too much praise cannot be given to these ladies and gentlemen for their kindness and assistance.

13. Amongst the improvements made during the year are additions to the play-grounds and gymnastic appliances, extension of the grounds, the formation of a drum and fife band (in addition to the existing brass band), and the establishment of a picture gallery, in which is already a collection of some eighty well-framed valuable photographs. The aviaries and garden are well stocked, and the birds, dogs, guinea pigs and other pets continue to be objects of much interest and solicitude to the boys.

14. I again have much pleasure in inviting attention to the praiseworthy manner in which my officers have performed their duties. They have all done well, and worked in an earnest, interested way.

I have, &c.,

FREDK. W. NEITENSTEIN,
Commander and Superintendent.

APPENDICES.

1895-6.

NEW SOUTH WALES.

SYDNEY FREE PUBLIC LIBRARY.

(REPORT FROM TRUSTEES FOR 1894.)

Presented to Parliament by Command.

The Trustees of the Free Public Library to The Minister for Public Instruction.

Sir,

Sydney, 13 March, 1895.

The Trustees have the honor to submit their Twenty-fourth Annual Report, for the year 1894.

1. There have been twelve meetings of the Board during the year, the average attendance of Trustees being six.

2. The general collection of books has been increased by 7,567 volumes, and there have been struck off from the Reference Library stock 2,118 duplicates and unbound volumes, and 1,870 pamphlets, which were of no value; also 163 volumes, worn out or lost, have been struck off the Lending Branch stock, and 598 embossed books for the blind were transferred to the three Institutions for the Blind, as hereinafter mentioned, leaving the total number of volumes now in the Library at 104,140, details of the classification of which are given in Appendix A.

3. In order to relieve the pressure in the two Reading Rooms of the Reference Library, and to make more room for the increasing number of special students, the Trustees fitted up the galleries of the building now used as a Lending Branch, and transferred to them all the newspapers and some of the more popular periodicals. The Newspaper Room was opened on February 15th, and the attendance during the first fortnight was 2,718, and for the whole ten and a half months 121,332. The result has been, as anticipated, a reduction in the attendance in the Reference Library which shows a total of 131,531, being a decrease of 19,473, though the attendance in all branches has increased. The visits of borrowers to the Lending Branch have increased from 65,085 to 77,568. The total number of visits to the Library was 330,431, being an increase of 114,342 over that of the previous year. The Reference Library was open for 357 days, the Lending Branch for 343 days, and the Newspaper Room for 313 days, including Sundays.

4. The applications from Country Libraries and Schools of Arts for boxes of books on loan having steadily increased, it was found necessary to provide six more boxes, making a total of 72, containing 5,818 books. During the year 155 boxes containing 12,380 volumes were thus lent to 81 Country Libraries. Full details are given in Appendix E.

5. In Appendix C will be found details of the classes of books borrowed from the Lending Branch, showing for each class—(a) The number of volumes available, (b) the number issued, (c) the daily average of volumes issued. The number of borrowers was 5,986, against 5,310 for the previous year, and the number of volumes borrowed, 89,217, against 75,869 for 1893.

6. Some figures are given in Appendix D to show to what extent and in what directions the public avail themselves of the contents of the Library on Sundays.

7.

7. Appendix G contains a list of donations, comprising 3,095 volumes and pamphlets of the value of £400, as well as 52 British and Australasian newspapers and periodicals presented to the Newspaper Room. Under the Copyright Act 181 volumes and pamphlets, of the value of £35, have been received, and also 263 newspapers and periodicals published in New South Wales.

8. Good progress has been made in the preparation of catalogues for the use of the public. The General Subject and Author Catalogue (1869-1887) has been completed, the whole of the setting having been done by the Library staff, and it is now being printed by the Government Printer. Classes E and F, with complete indexes, have been completed and issued. Supplementary catalogues for the years 1888, 1893, and 1894, have been prepared and printed. A catalogue of all the newspapers and current periodical literature received in the Newspaper Room has also been issued. The current books are catalogued and indexed as soon as possible after receipt, and printed slips, alphabetically arranged, are at once made available for readers and students. Supplementary catalogues for the years 1889-92 will be issued this year.

9. The question of lighting the Library having engaged the attention of the Board, an estimate of the cost of electric lighting was obtained. It was found that the annual cost for maintenance (£390) would be considerably less than the cost of gas in past years, but the Trustees had no funds out of which the cost of installation (£390) could be defrayed. In view of the immense advantages of the electric light with regard to the health and comfort of readers and attendants, and the preservation of the books, maps, and engravings, the Trustees will be glad when the condition of the Public Funds will permit of this improvement being effected. Meanwhile the lighting arrangements have been very much improved, and a saving of over £150 a year effected in our gas bill.

The Staff.

10. During the year Mr. Orlando Stevens retired after fifteen years' useful service, under the provisions of the Civil Service Act. His position of Assistant Librarian in the Lending Branch has not been filled up, but his duties have been distributed among the other members of the staff, and a saving has been thus effected. Mr. D. R. Hawley retired on December 31st from active work in the Library, after twenty-five years' service, and, after enjoying six months' leave of absence, he will retire from the Civil Service with a pension. He was Librarian of the old Australian Subscription Library, and was transferred with it on the formation of this Library in 1869. He has done much useful work for this Library, and retires with the good wishes and esteem of the Trustees and the whole of the staff.

Classes for Library Attendants and Juniors.

11. During the year the Principal Librarian formed two classes for the senior and junior attendants respectively. A course of study, with suitable text-books, was prescribed, and the Principal Librarian, in his own time, gives instruction to these classes in general subjects for University Examinations, as well as in English literature and library economy. It is confidently hoped that the result will be to raise the educational standard of the junior officers of the Library, and to make them more efficient public servants.

Books for the Blind.

12. As it was found that, in consequence of the formation of libraries in the three Blind Institutions in and about Sydney, applications to borrow the embossed books in the Lending Branch ceased, the Trustees divided the 598 volumes held by them between the Boomerang-street Asylum, the Newtown Institution, and the Strathfield Home.

Loan of Books to Country Students.

13. At the request of the University Extension Board, the Trustees determined to lend parcels of suitable books to students attending the lectures in country towns, and further extended the privilege to any group of students who might desire to study some subject requiring books which could not be easily procured.

Change

Change of Agents.

14. The Board has found it advisable to transfer the agency of the Library from London to Sydney; and, after calling for tenders from the Sydney booksellers, have appointed Messrs. Angus and Robertson as agents for the Library.

Lending Branch.

15. The Board would respectfully point out the unsuitability of the old iron building for the purposes of a Lending Branch. It is in very bad repair, discreditable in outward appearance, and uncomfortable for visitors and attendants, being very hot in summer and very cold in winter, with no means of warming the building.

Expenditure for 1894.

16. Salaries—Reference Library	£3,059	3	4
,, Lending Branch	1,624	2	2
Books and periodicals	2,499	16	10
Insurance	69	18	9
Police protection	130	0	0
Incidentals—including binding, cleaning, freight, marine insurance, bookshelves, repairs, freight of books to country libraries, and printing catalogues	1,012	19	5

JAMES NORTON,
President.

(SECOND SESSION.)

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF TRUSTEES FOR THE YEAR 1893.)

Presented to Parliament pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,—

The Trustees of the Australian Museum have the honor to submit to Your Excellency their Fortieth Annual Report.

1. The Museum has been opened to the public, daily, except on Mondays when it was closed for cleaning. In former years the hours of admission of visitors were from 10 a.m. to 5 p.m. in winter and 6 p.m. in summer, but the attendance by the public after 5 p.m. was so small that it was decided to close at 5 p.m. all the year round. On ordinary week-days the number of visitors was 81,551, being an average of 311 per day, and the largest attendance was on Monday, 2nd October (public holiday) when 1,862 persons entered the building. On Sundays, when the hours of opening were from 2 to 5 p.m. there were 30,776 visitors, an average of 581, while the largest number on any one Sunday was 856 on 2nd July. The total number of persons who visited the Institution during the year shows a decrease of 18,374 on the previous year. On Monday afternoons the Museum although closed to the public has been accessible to students and schools for teaching purposes, but a limited number only have availed themselves of the privilege.

2. On account of the diminution of the income of the Museum the acquisition of specimens has been curtailed. The most important purchases were a Collection of Aboriginal Implements from Northern Australia, the Rev. Archdeacon King's Collection comprising typical specimens of Coleoptera and other valuable specimens. By exchange some fossils and casts were received from the Museo de la Plata, and a collection illustrative of the Ethnology of the Sandwich Islands from the Bernice Pauahi Bishop Museum, Honolulu. The most valuable presentations were two Bactrian Camels presented by Abdul Wade.

3. The work of fitting up the New Geological Hall and Galleries has been steadily carried on. The cases erected in position are now awaiting the necessary shelving for the reception of specimens. The cost of the additions and alterations to the building during the year was £12,000 and of the cases £3,000, but the sum of £400 is still required for the completion of the work.

4. At the commencement of the year there were thirty-three officers and workmen on the staff, but owing to the necessity for retrenchment twelve of these were discharged, and the salaries of most of the others were reduced by amounts varying from £5 to £50. The amount voted for the ordinary service of the Museum in 1892 was £7,150, while in 1893 it was reduced to £3,862. It will be difficult to carry on the Institution efficiently out of the reduced vote.

5. On account of serious illness an extended leave of absence was granted to the Curator, Dr. E. P. Ramsay, and the Trustees, having through the courtesy of the Hon. the Minister for Mines, been able to avail themselves of the services of Mr. R. Etheridge, Junr., that gentleman was appointed Acting-Curator, and efficiently discharged the duties of his office during Dr. Ramsay's absence.

6—A

6.

2,945 copies—Approximate Cost of Printing (labour and material), £41 17s. 0d.

6. The following publications have been issued :—

Catalogue of Marine Shells, by J. Brazier, Part 3, Gasteropoda (Murex).

Australian Lepidoptera and their Transformations, by the late A. W. Scott; edited and revised by Mr. A. S. Olliff and Mrs. Forde, Vol. II, part 4.

Records of the Australian Museum, Vol. II, Nos. 4 and 5.

Catalogue of Pamphlets in the Library.

7. Professor T. P. Anderson Stuart having resigned his Trusteeship in the beginning of the year, Jas. R. Hill, Esq., was elected in his place, and Professor J. T. Wilson was elected in place of the late Robert Hunt, Esq.

8. Full information with respect to the Museum will be found in the Appendices attached to this Report, viz. :—

I.—Curator's Report.

II.—Statement of Receipts and Expenditure.

III.—Attendance of Visitors.

IV.—Attendance of the Trustees.

V.—Donations of Specimens to the Museum.

VI.—Exchanges.

VII.—Additions to the Library.

VIII.—Publications of the Australian Museum.

The Common Seal of the Museum was hereunto affixed by order of the Board, this 5th day of June, 1894.

(Signed) JAMES C. COX, M.D.,
Chairman.

(Signed) S. SINCLAIR,
Secretary.

(L.S.)

APPENDIX I.

CURATOR'S REPORT FOR 1893.

To the Trustees of the Australian Museum,—
Gentlemen,

The erection of the additions to the old wing, now known as the Geological Hall, and Galleries having been completed, as mentioned in last year's Report, the work of erecting cases has been pushed forward, and has occupied the greater part of the year. The cases are now completed, but have not yet been fitted with the necessary shelving and furniture for the reception of specimens, the vote having been exhausted. The Government has been asked for further funds, and when these are available a short time will suffice to complete the internal fittings, when the work of arranging the specimens for exhibition will be commenced.

The Government retrenchment scheme has caused the Museum to suffer severely; there have been no funds to purchase specimens nor to publish the results of investigation. On account of the very large portion of the staff, whose services were necessarily dispensed with, the time of those remaining in the employment of the Trustees has been devoted to the care of the collections, rather than to purely scientific work. In the parts of the Museum open to the public, there are not hands enough now to keep the outside of the cases free from dust, although the specimens in them are duly cared for, and are in good order; the windows have not been properly cleaned for months, and the grounds are being over-run with weeds.

The members of the staff have attended to their duties faithfully. We have lost the services of Mr. John Brazier, Assistant in Conchology, and of Mr. G. H. Barrow, Artist. It has been necessary also to dispense with the Cadets, whose engagement was reported in my last Annual Report. The staff has, however, been strengthened by the arrival of Mr. Edgar R. Waite, appointed Assistant in Zoology at the end of 1892.

The following is a list of the Museum staff at the beginning and the end of the year:—

No. at beginning of year.	No. at end of year 1893.	Name and Office.
1	1	E. P. Ramsay, Curator.
2	2	S. Sinclair, Secretary.
3	3	R. Etheridge, Assistant in Palaeontology.
4	J. Brazier " Conchology.
5	4	T. Whitelegge " Marine Invertebrata (exclusive of Mollusca).
6	5	F. A. A. Skuse " Entomology.
7	6	A. J. North " Ornithology, &c.
8	7	T. Cooksey " Mineralogy.
9	8	E. R. Waite " Vertebrate Zoology (exclusive of Ornithology).
10	9	C. Hedley " Conchology.
11	G. H. Barrow, Artist and Draftsman.
12	10	Henry Barnes, Articulator, Modeller, and Photographer.
13	11	J. A. Thorpe, Taxidermist.
14	12	Robert Barnes, Carpenter.
15	13	B. Lucas, Assistant Carpenter.
16	14	Henry Barnes, Junr., Assistant Articulator, &c.
17	15	W. H. Hill, Clerk.
18	C. H. Wickham, Junior Clerk.
19	16	M. O'Grady, Attendant.
20	17	R. Hillsdon "
21	J. Williams "
22	W. Cornick "
23	F. Kippax "
24	18	R. Grant "
25	C. Harris "
26	19	Mrs. Dashwood "
27	20	Mrs. Lovell "
28	J. Hanbidge, Messenger.
29	E. Rohde, Cadet.
30	T. B. Air "
31	J. Sharkey "
32	B. Lucas, Labourer.
33	21	S. Long, Night Watchman.

During the greater part of the year I was absent on account of ill-health, and I thank the Trustees for the leave of absence and kind consideration extended to me. Mr. R. Etheridge, Junr., was appointed Acting-Curator, and he has most efficiently performed the duties appertaining to the office during what must have been a very trying time. On my return to duty I found the Museum and its contents in good order.

I submit herewith details of the work done in the Departments, based on the reports of the various Officers to me.

I have, &c.,

ED. P. RAMSAY,
Curator.

MAMMALS (*Mr. Edgar R. Waite*).

As previously mentioned, the foreign mammals are not exhibited in consequence of the structural alterations, but an attempt has been made to reinstate some of the animals, and the monkeys have been temporarily placed in a series of unoccupied cases in the Bird room. During

During the year the mammals obtained have been as follows :—

By purchase...	5
By exchange	19
By presentation	35
Total	59

The Trustees of the Zoological Society of New South Wales have been liberal donors, and a small collection of Queensland mammals have been received from Mr. D. Le Souef.

REPTILES AND BATRACHIANS (*Mr. Edgar R. Waite*).

The specimens registered for the year have been acquired as follows :—

By purchase...	7
By " (alive)	4
By collection	11
By presentation	151
Total	173

The largest individual donor was Mr. C. J. McMaster, who presented a large number of reptiles obtained in the neighbourhood of Moree.

Under the heading "Notes on Australian Typhlopidae," Mr. Waite has published in the Museum "Records" the first results of his examination of this group.

FISHES (*Mr. Edgar R. Waite*).

The fishes registered during the year were obtained as follows :—

By purchase...	53
By collection	10
From old collection..	4
By exchange	2
By presentation	43
Total	112

The purchases were chiefly from Lord Howe Island, and among them were several species not previously obtained there. Nearly all the examples collected were obtained by Mr. Whitelegge at Jervis Bay.

SKELETONS (*Mr. Edgar R. Waite*).

With the exception of the exchanges, nearly all the preparations were made by the Museum Articulator.

By purchase...	21
From old collection...	2
By exchange	20
By presentation	19
Total	62

The chief exchanges have been with the Museo de La Plata, and the Tasmanian Museum.

BIRDS (*Mr. A. J. North*).

The specimens of Birds, Nests, and Eggs determined and registered have been as follows :—

By purchase...	68
By collection	83
By exchange	111
By presentation	400
From old collection	952
Total	1,614

Of the above only 680 were acquired during 1893; the small number being due to the discontinuance of collecting expeditions, and the stoppage of purchases during the latter part of the year, in consequence of which the duplicate collection required for the purpose of exchange with other museums is practically exhausted as regards the number of species it contains. The remainder of the specimens determined and registered are from the Old Collection, principally the Australian and Foreign Oological Collections.

The principal acquisitions consist of:—A collection of South American birds, all of which are new to the Museum, received in exchange from the Director of the Museo de la Plata, Buenos Ayres; a number of New Zealand birds, received partly by purchase and partly by exchange, among which are—*Eudypetes pachyrhynchus*, *E. antipodum*, *E. filholi*, and *Nestor notabilis*, previously unrepresented in the collection; several specimens of *Phœnicopterus roseus*, presented by the Trustees of the Zoological Society of New South Wales; and a specimen of *Crex crex* presented by Mr. H. Newcombe, which was shot at Randwick, and previously unrecorded from Australia. To the Oological Collection, the chief addition was the type specimen of the egg of Queen Victoria's Rifle bird, *Ptilorhis victoria*, received in exchange.

During the year the Group Collection, which shows the life history of our Australian birds at a glance, as far as it is possible to do so, has been augmented by eighteen groups, with nests and eggs or young; and a number of specimens from the old collection have been restored, named, and placed in the new wall cases at the south end of the gallery. The Foreign Collection of birds' eggs has been added to, rearranged in separate boxes, and named; and both the Australian and Foreign Collections have been registered. A number of tickets in the Ornithological Gallery have been renewed. Mr. North has contributed to the "Records" the following papers:—

1. On a specimen of *Crex crex*, shot at Randwick, New South Wales.
2. Description of a New Species of Parrakeet, of the genus *Platycercus*, from North-west Australia.

MOLLUSCA—(Mr. C. Hedley).

At the commencement of the year Mr. Brazier was engaged in writing part of the "Catalogue of the Marine Shells of Australia and Tasmania." The usual routine work of conserving the collections and of receiving the additions to it also engaged his attention. When half the year had elapsed his services were lost to the Institution, through retrenchment of the income, and the charge of the whole of the mollusca was then temporarily deputed to Mr. Hedley. This officer completed arranging a collection of *Pelecypoda*, referred to last year, which was then laid out in the Upper Hall. He was afterwards instructed to select all the Australian Bivalves from the various collections, and to name and mount a representative series for display in the new gallery. This work approached completion at the close of the year.

Numerous inquiries on conchological subjects have been answered, and specimens named, for the public.

Part III of the "Catalogue of the Marine Shells of Australia and Tasmania" was completed by Mr. Brazier before his retirement from the Service. Mr. Hedley's official papers during 1893 were:—

1. *Pholas obturamentum*, an undescribed Bivalve from Sydney Harbour. Published, with a plate, in the "Records."
2. Description of *Cæcum amputatum*, an undescribed Mollusc from Sydney Harbour. To be published, with a figure, in the "Proceedings of the Linnean Society of New South Wales."
3. Report on Mollusca collected in Queensland by D. Le Souef. To be published, with a figure, in the "Proceedings of the Field Naturalist's Club of Victoria."

The increase of the collection has been unusually large. Messrs. Suter and Murdoch have liberally contributed rarities from New Zealand. Mr. Le Souef presented the type of a new Australian *Papuina*; while some rare South Australian Bivalves were obtained by exchange from Dr. Verco.

The Scientific Staff have frequently contributed the conchological results of holiday excursions. The additions registered were acquired as under:—

By presentation (145 species)	744
By exchange (57 species)	284
By purchase (160 species)	1,516
Total	2,544

INSECTS (Mr. F. A. A. Skuse).

The additions to the Insect Collection for the year exceed 4,000 specimens. These have been individually named and registered, and were acquired as follows:—

By purchase... ..	3,004
By exchange	295
By presentation	681
By collection	156
Total	4,136

Among the purchases must be mentioned the large collection of Coleoptera accumulated by the Rev. R. L. King, containing 3,000 specimens, and approximately representing 422 species. A large number are the actual types, and form a very valuable acquisition. Included in the collection is also a set of 141 mounted slides for the microscope, being for the most part preparations of type specimens. A scarce beetle, belonging to the genus *Sagra*, from North Queensland, has also been purchased; and a collection of European Locustidæ and Blattidæ, and another of Foreign Hymenoptera, were received in exchange. A collection of Assam Lepidoptera, consisting of 160 specimens (representing 63 species), was also received in exchange from Mr. S. E. Peal.

A very great amount of time and care has necessarily been bestowed upon the preservation of the Insect Collections, in keeping them free from depredation and in good order. The selection and mounting of specimens for future exhibition is still being proceeded with.

There has been published in the "Records," by Mr. Skuse,—Description of *Stephanocircus dasyuri*, with Notes of some other Insect Parasites known in Australia.

MARINE INVERTEBRATA—EXCLUSIVE OF MOLLUSCA (Mr. T. Whitelegge).

The numbers of specimens received and registered are represented as follows:—

Ascidians	2	collected.
Polyzoa	106	purchased.
Vermes	9	presented.
"	2	collected.
Crustacea	41	presented.
"	1	purchased.
"	700	collected.
Echinodermata	41	presented.
"	16	collected.
"	21	exchanged.
"	1	purchased.
Coelenterata	9	presented.
"	2	purchased.
"	60	collected.
Total	1,011	

Among the more notable additions may be mentioned a collection of mounted slides of Polyzoa (Australian), obtained by purchase, and a large number of specimens collected by Mr. Whitelegge at Jervis Bay. During

During the year a large collection of sponges, presented by Mr. Bracebridge Wilson, in the year 1885, has been identified, registered, and placed on exhibition. A series of microscopical slides has been prepared from the sponges, with the view of aiding in the determination of species in the future.

A considerable portion of Mr. Whitelegge's time has been devoted to the care of the collections preserved in spirits, and in preparing specimens for exhibition in the new gallery.

ETHNOLOGICAL, NUMISMATICAL, AND HISTORICAL COLLECTIONS (*Mr. A. J. North*).

During the year the following specimens have been received and registered:—

By purchase	417
By exchange	2
By presentation	79
From old collection	3
Total	501

The principal addition to the Ethnological Collection consists of a number of Australian Aboriginal weapons and interesting articles used by the natives in their tribal operations and rites, from Central Australia and Queensland, purchased, but which, from the overcrowded state of the cases in the Ethnological Gallery, referred to in last year's Report, have to be stored; specimens from New Guinea, presented by the Rev. W. G. Lawes and Dr. J. C. Cox; a fishing-line, from King's Sound, N.W. Australia, made from human hair, presented by Mr. E. C. Hedges; a dao used by the Nagas of Upper Assam, presented by Mr. S. E. Peal; and portions of flint spear-heads from Lake Huron, North America, presented by Miss Nisbet.

Only two Numismatical and four Historical specimens have been received. The former consist of a bronze medal, struck in commemoration of the visit of His Imperial Majesty the German Emperor, William the Second, to the City of London, on the 10th of July, 1891, presented by the Corporation of the City of London; and tracings of New South Wales paper and silver currency from 1812 to 1814, presented by C. P. Hyman, Esq. The principal Historical specimen received was a photograph of relics from the Dutch vessel "Zeewyk," wrecked on Houtman's Abrolhos, Western Australia, in 1727, presented by Sir John Forrest, Premier of Western Australia.

PALEONTOLOGY (*Mr. R. Etheridge, Junr.*)

The specimens registered during 1893 were acquired as follows:—

By purchase... ..	75
By collection (old)	4
By exchange	97
By presentation (partly old)	281
From old collection... ..	761
Total	1,218

The collections still remain inaccessible to the public in consequence of the non-completion of the cases for their reception. The return of Palæontological work would have been much greater had it not been for other and more important duties undertaken by Mr. Etheridge, and referred to elsewhere in this Report.

The most important presentations consist of a collection of Upper Silurian fossils from Lilydale, Victoria, and Eocene fossils from Table Cape, Tasmania, by Mr. J. Hinder, and Silurian fossils from Tasmania, by Mr. A. Montgomery, Government Geologist of Tasmania.

The chief exchange consisted of Triassic, plant-remains from Bacchus Marsh, Victoria, Upper Silurian fossils from Kilmore, Victoria, and Devonian fish from Mansfield, Victoria, with Mr. G. Sweet.

Those portions of the Old Collection registered consisted chiefly of Siluro-Devonian fossils from the Cave Limestones of New South Wales, whilst the most important purchases comprised plaster reproductions of typical forms from Brucciani & Co., London.

MINERALOGY (*Dr. T. Cooksey*).

The specimens registered during 1893 were obtained as follows:—

By purchase... ..	44
By presentation	94
By exchange... ..	3
By collection	6
From old collection... ..	2,484
Total	2,631

The purchases consist of a second instalment of minerals from the Tasmanian Museum, among which were received two good specimens of Anglesite, and Topaz in matrix, and two very fine specimens of Cerussite and Crocoisite from the Tasmanian mines.

The labels of the minerals in the exhibition cases have been entirely renewed, and the contents of four cases on the ground-floor replaced by others. One of these cases has been utilised for the purpose of showing, as far as space would allow, the physical properties of minerals.

Twenty-five specimens have been sent away in exchange.

LIBRARY (*Mr. S. Sinclair, Librarian*).

Owing to the shortness of the Staff, the Librarian has not been able to spare much time from his Secretarial duties towards the completion of the Library Catalogue. A first instalment has, however, been printed in the form of a list of the Pamphlets in the Museum.

The additions to the Library during 1893 are 71 volumes purchased, and 220 volumes received by presentation or exchange, besides a large number of unbound pamphlets and parts of periodical publications.

APPENDIX IV.

ATTENDANCE OF THE TRUSTEES DURING 1893.

Crown Trustee.

APPENDIX V.

DONATIONS OF SPECIMENS TO THE MUSEUM.

Donor.	No. of Specimens.	Common Name.	Scientific Name.
MAMMALIA.			
Mr. C. F. Bolton	1	Rat and four young	Mus, sp. ?
Mr. H. Cauntor	1	Skull of Wallaby	Macropus, sp. ?
Mr. W. S. Dun	1	Grey-headed Flying-fox	Pteropus poliocephalus.
Mr. T. Geale	1	Grey Kangaroo	Macropus giganteus.
Do	1	Wallaroo	do robustus.
Mrs. R. Grant	1	Platypus	Ornithorhynchus anatinus.
Mr. H. Hamilton	1	Tiger-cat	Dasyurus maculatus.
Mr. G. W. Inlah	1	Native Bear...	Phascolarctus cinereus.
Mr. W. D. Jones	1	Flying Opossum	Acrobates pygmaeus.
Mr. Jenkins	1	Gould's Bat	Chalinolobus gouldi.
Hon. J. Lackey	2	Native Cats	Dasyurus viverrinus.

Donor.	No. of Specimens.	Common Name.	Scientific Name.
<i>MAMMALIA—continued.</i>			
Rev. W. G. Lawes...	2	Spotted Cuscus	Phalanger maculatus.
Mr. J. Mitchell	1	Common Pouched Mouse	Sminthopsis murinus.
Mr. A. Mack	1	Teat of Kangaroo	Macropus, sp. ?
Mr. J. J. Pye	1	Nest-building Jerboa Rat	Conilurus conditor.
Mr. A. M. N. Rose	1	Water-rat	Hydromys chrysogaster.
Do	1	Long-nosed Bandicoot	Perameles nasuta.
Superintendent, Gladesville Asylum.	1	Fallow Deer... ..	Cervus, sp. ?
Do do	1	Black Rat	Mus rattus.
Mr. W. Stokes	1	Flying Opossum	Acrobates pygmaeus.
Mr. D. Le Souef	1	Long-eared Bat	Nyctophilus timorensis.
Do	1	Little Bat	Vesperugo pumulus.
Do	1	Sharp-nosed Bat	Taphozous australis.
Do	1	Plain Rat	Mus lineolatus.
Do	1	White-footed Pouched Mouse	Sminthopsis leucopus.
Mr. Edgar R. Waite	1	Opossum	Trichosurus vulpecula.
Zool. Soc., N.S.W.	1	Deer	Cervus equinus.
Do	1	Axis Deer	Axis maculata.

APPENDIX VI.

EXCHANGES.

Specimens received.	Specimens forwarded.
	Mr. L. L. Allen. (30.)
	Mammal:—1 species—1 specimen.
	Free Industrial Museum, Albury. (21.)
	Birds:—48 species—61 specimens.
	Mr. G. H. Barrow, Sydney. (29.)
Drawings of Plates for "Records."	Working material.
	Mr. W. T. Bednall, Adelaide. (35.)
Mollusca:—4 species—7 specimens.	Mollusca:—3 species—6 specimens.
	Mr. Czisz, Sydney. (49.)
Minerals:—3 specimens.	Minerals:—1 specimen.
	Mr. F. L. Billingham, Castlemaine. (40.)
Mollusca:—10 species—26 specimens.	Book.
	Mr. O. Le Bon, Sydney. (28, 31.)
Mammals:—2 species—10 specimens.	Birds:—24 species—38 specimens.
Birds:—2 species—27 specimens.	
	Mr. J. Brady, Cape Town. (6.)
Coleoptera, received in 1891.	Insects:—92 species—176 specimens.
	Rev. Bro. Claudius, Marist Brothers School, Parramatta. (36.)
	Minerals:—22 specimens.
	Mr. S. H. Drew, Wanganui, N.Z. (20.)
Ethnological:—1 specimen.	Birds:—8 species—10 specimens.
Do 1 cast.	Mammals:—1 species—1 specimen.
	Ethnological:—11 specimens.

Specimens received.	Specimens forwarded.
	Mr. W. D. Filmer, Sydney. (39.)
Birds' Nests, Eggs, and Young:—3 species—7 specimens.	Books.
Insect and Arachnid Nests:—41 specimens.	
	Hunterian Museum, London. (8.)
	Plants containing Ants:—Several specimens.
	Skeleton:—1 species—1 specimen.
	Imperial Japanese Government. (12.)
	Birds:—80 species—133 specimens.
	Mollusca:—54 species—157 specimens.
	Fishes:—3 species—3 specimens.
	Mr. S. W. Jackson, Grafton. (42.)
Birds Eggs:—1 species—4 specimens.	Birds Eggs:—3 species—9 specimens.
	K. Mus., Dresden. (19.)
	Bird:—1 species—1 specimen.
	Mr. A. M. Lea, Sydney. (13.)
Insects received in 1892.	Insects:—50 species—85 specimens.
	Prof. Ray Lankester, Oxford. (14.)
	Echinodermata:—1 species—3 specimens.
	Museo de La Plata. (10.)
Fossils:—8 species—11 specimens.	Birds:—84 species—123 specimens.
Skeletons:—16 species—16 specimens.	Ossiferous debris.
Cast:—1 species—1 specimen.	
Birds:—12 species—15 specimens.	
	Nat. Mus., Lubeck. (18.)
	Books.
	Dr. Paul Pelseuer, Gand. (43.)
Books.	Mollusca:—1 species—2 specimens.
	Mr. John Ponsonby, London. (17.)
Mollusca:—41 species—239 specimens.	Mollusca:—44 species—236 specimens.
	Mr. S. A. Peal, Assam. (38.)
Lepidoptera:—63 species—160 specimens.	Ethnological:—3 specimens.
	Royal Zoological Museum, Florence. (15.)
	Fishes:—1 species—2 specimens.
	Ethnological:—5 casts of specimens.
	Mr. H. de Saussure, Neuchatel. (25.)
Insects:—34 species—46 specimens.	Insects:—28 species—28 specimens.
Do 40 do 48 do	
	Mr. D. Le Souef, Melbourne. (47.)
Birds Egg:—1 species—1 specimen.	Birds:—3 species—5 specimens.
	Technological Museum, Sydney. (37.)
Bird:—1 species—1 specimen.	Bird:—1 species—1 specimen.
	Tasmanian Museum, Hobart.
Mammals:—4 species—8 specimens.	
Skeletons:—2 species—4 specimens.	
	U. S. National Museum, Washington. (5.)
Fishes:—2 species—2 specimens.	Birds:—4 species—7 specimens.
Echinodermata:—12 species—21 specimens.	Echinodermata:—44 species—126 specimens.
	University of Sydney. (22, 45.)
	Mammals:—2 species—2 specimens.
	Fishes:—1 species—1 specimen.
	Miscellaneous:—7 species—7 specimens.
	Casts of Heads:—19.
	Dr. J. C. Verco, Adelaide. (41.)
Mollusca:—4 species—12 specimens.	Book.
	Mr. Jas. Wylie, Lithgow. (16.)
Birds:—3 species—4 specimens.	Bird:—1 species—1 specimen.
	Mr. R. Whittell. (48.)
Birds, Nests, and Eggs:—5 species—8 specimens.	
	Zoological Society, London. (50.)
	Mammals:—1 species—2 specimens.
	Birds:—2 species—2 specimens.
	Reptiles:—2 species—3 specimens.
	Mr. A. Lehmert, Sydney. (24.)
Birds:—15 species—44 specimens.	Birds:—29 species—29 specimens.
Mammals:—1 species—1 specimen.	
	N.S.W. Commissioners for the World's Columbian Exposition at Chicago, Sydney.
	Casts of Fossils:—2 species—15 specimens

APPENDIX VII.

ADDITIONS TO THE LIBRARY.

Reg. No.	Book.	How acquired.
6201	MANCHESTER Literary and Philosophical Society. Memoirs and Proceedings. (Fourth Series.) Vol. VII. 1 vol. D. 8vo. Manchester, 1893.	Presented.
6202	SCOTTISH Geographical Magazine. Vol. VIII, No. 10 (Oct., 1892). Vol. IX (1893). 1 vol.	do
6203	ROYAL Physical Society of Edinburgh. Proceedings. Vol. XI, 1890-92. 1 vol. D. Edinburgh, 1893.	do
6204	LEEDS Philosophical and Literary Society. Annual Reports for 1889-90, 90-91, 91-92, 92-3. 1 vol. R. 8vo. Leeds, 1890-93.	do
6205	NATURAL History Society of Glasgow. Proceedings and Transactions. Vol. III. Parts 2 and 3 (1889-92). 1 vol. D. 8vo. Glasgow, 1892.	do
6206	OXFORD University Museum. Catalogue of Books added to the Radcliff Library, 1892. 1 vol. D. 4to. Oxford, 1893.	do
6207	NATURAL History Transactions of Northumberland, Durham, and Newcastle-upon-Tyne. Vol. XI. Part I. 1 vol. R. 8vo. Newcastle-upon-Tyne, 1892.	do
6208	MANCHESTER Museum—Owen's College Report, 1889-90. Museum Handbooks: Outline Classification of the Vegetable Kingdom (1892); by F. E. Weiss. Outline Classification of the Animal Kingdom. Second edition. A. M. Marshall (1892). Catalogue of the Types and Figured Specimens in the Geological Department. Herbert Bolton (1893); in 1 vol. D. 8vo. Manchester, 1890-3.	do
6209	LIVERPOOL MARINE BIOLOGICAL COMMITTEE— Fourth Annual Report of the L. M. B. Station on Puffin Island; by W. A. Herdman. Fifth do do do Sixth Annual Report of the L. M. B. C. and their Biological Station at Port Erin; by W. A. Herdman. 1 vol. D 8vo. Liverpool, 1891-93.	do
6211	YORKSHIRE NATURALISTS' UNION TRANSACTIONS— Parts I to XVIII. Vol. I. Wrappers of Parts 1-18. Appendices Meteorology of Bradford; by John M'Landsborough and Alfred S. Preston, for 1885, 1886, 1887, 1888, 1889, 1890. Reprints of Excursion Circulars. Proceedings of 25th to 29th Annual Meetings (1887-1890).	do
6212	----- SER. B. Vertebrata. The Birds of Yorkshire; by Wm. Eagle Clarke; pp. 1-80. 1878-86.	do
6213	----- SER. C. Invertebrata. Annotated List of the Land and Fresh Water Mollusca of Yorkshire; by W. Nelson and J. W. Taylor. 1878, 1883, 1885, 1886, 1891; pp. 1-80.	do
6214	----- SER. D. Articulata. Vol. I. Yorkshire Macro-Lepidoptera in 1877-80; by G. T. Porritt; pp. 1-10, 71-91. Yorkshire Micro-Lepidoptera in 1877; by Wm. Prest; pp. 11-16. Yorkshire Hemiptera-Homoptera in 1877; by S. L. Mosley; pp. 17, 18. Yorkshire Diptera in 1877; by S. L. Mosley; pp. 19-22. Yorkshire Hymenoptera, 1877-78; by Wm. Denison Roebuck; pp. 23-67. Yorkshire Ichneumonidæ and Braconidæ, 1878; by S. D. Bairstow; pp. 68-70. Yorkshire Hymenoptera, 1879-81; by S. D. Bairstow, W. Denison Roebuck, and Thos. Wilson; pp. 92-112. On some Probable Causes of a Tendency to Melanic Variation in Lepidoptera of High Latitudes; by Rt. Hon. Lord Walsingham, 1885; pp. 113-140.	do
6215	----- Ser. D. Articulata. Vol. II. List of Yorkshire Lepidoptera; by George T. Porritt, 1883-84-86.	do
6216	----- Ser. D. Articulata. Vol. III. List of the Coleoptera of Yorkshire; by Rev. W. C. Oley; pp. 1-16, 48-64. 1886-88-91.	do

Reg. No.	Book.	How acquired.

APPENDIX VIII.

PUBLICATIONS OF THE AUSTRALIAN MUSEUM, DECEMBER, 1893.

I.—CATALOGUES.

1. Catalogue of the Specimens of Natural History and Miscellaneous Curiosities in the Australian Museum, by G. Bennett. 1837. 8vo. pp. 71. (Out of print.)
2. Catalogue of Mammalia in the Collection of the Australian Museum, by G. Krefft. 1864. 12mo. pp. 133. (Out of print.)
3. Catalogue of the Minerals and Rocks in the Collection of the Australian Museum, by G. Krefft. 1873. 8vo. pp. xvii-115. (Out of print.)
4. Catalogue of the Australian Birds in the Australian Museum, by E. P. Ramsay. Part I, Accipitres, 1876. 8vo. pp. viii-64, and Supplement, 1890. Part II, Striges, 1890. 8vo. pp. 35. Part III, Psittaci. 1891. 8vo. pp. viii-110.
5. Catalogue of the Australian Stalk and Sessile-eyed Crustacea, by W. A. Haswell. 1882. 8vo. pp. xxiv-324, with 4 plates.
6. Catalogue of the Library of the Australian Museum. 1883. 8vo. pp. 1878. Wrapper, with two supplements. (Out of print.) New edition. Part III, Pamphlets.
7. Catalogue of a Collection of Fossils in the Australian Museum, with Introductory Notes, by F. Ratte. 1883. 8vo. pp. xxviii-160.
8. Catalogue of the Australian Hydroid Zoophytes, by W. M. Bale. 1884. 8vo. pp. 198, with plates.
9. Descriptive Catalogue of the General Collection of Minerals in the Australian Museum, by F. Ratte. 1885. 8vo. pp. 221, with a plate.
10. Catalogue of Echinodermata in the Australian Museum, by E. P. Ramsay. Part I, Echini. 1885. 2nd edition, 1890. 8vo. pp. viii-54, with 5 plates.
11. Descriptive Catalogue of the Medusæ of the Australian Seas. Part I, Scyphomedusæ. Part II, Hydromedusæ, by R. von Lendenfeld. 1887. 8vo. pp. 32 and 49.
12. Descriptive Catalogue of the Nest and Eggs of the Australian Birds, by A. J. North. 1889. 8vo. pp. iv, v-407, with 21 plates.
13. Descriptive Catalogue of the Sponges in the Australian Museum, by R. von Lendenfeld. 1888. 8vo. pp. xiv-260, with 12 plates.
14. Catalogue of the Fishes in the Australian Museum. Part I, Palæichthyan Fishes, by J. Douglas Ogilby. 1888. 8vo. pp. 34.
15. Catalogue of the Marine Shells of Australia and Tasmania, by J. Brazier. Part I, Cephalopoda, 1892. 8vo. pp. 20. Part II, Pteropoda, 1892. 8vo. pp. 22. Part III, Gasteropoda (Murex), 1893. 8vo. pp. 32.
16. Catalogue of Australian Mammals, with Introductory Notes on General Mammology, by J. Douglas Ogilby, 1892. 8vo. pp. xvi-144.

II.—MONOGRAPHS.

1. Australian Lepidoptera and their Transformations, by the late A. W. Scott, with Illustrations by his daughters, Mrs. Morgan and Mrs. Forde. Edited and revised by A. S. Olliff and Mrs. Forde. Vol. II, Parts 1, 2, 3, and 4.

III.—MEMOIRS.

1. History and Description of the Skeleton of a new Sperm Whale in the Australian Museum, by W. S. Wall. 1851. 8vo. pp. 66, with plates. Reprint 1887.
2. Lord Howe Island: its Zoology, Geology, and Physical Characters. 1889. 8vo. pp. viii-132, with 10 plates.

IV.—GUIDES.

1. Guide to the Australian Fossil Remains in the Australian Museum. 1870. 8vo. (Out of print.)
2. Guide to the Contents of the Australian Museum. 1883. 8vo. pp. iv-56. (Out of print.)
3. Guide to the Contents of the Australian Museum. 1890. 8vo. pp. 156.

V.—MISCELLANEOUS PUBLICATIONS.

1. List of old Documents and Relics in the Australian Museum. 1884. Reprinted with additions, 1890. 8vo. pp. 4.
2. Descriptive List of Aboriginal Weapons, Implements, &c., from the Darling and Lachlan Rivers, by K. H. Bennett, F.L.S. 1887. 8vo. pp. 8. (Out of print.)
3. Notes for Collectors. 1887. 8vo. pp. 43.
4. Hints for Collectors of Geological and Mineralogical Specimens, by F. Ratte, pp. 26, with a plate.
5. Hints for the Preservation of Specimens of Natural History, by E. P. Ramsay, 1891. 4th Edition, pp. 32.

VI.—RECORDS.

- Records of the Australian Museum, Vol. I. 8vo. pp. 202. 30 plates.
 II. Nos. 1 to 5, pp. 84. 17 plates.

IN PREPARATION.

- Catalogues of Reptiles, Batrachia, Fishes, &c., by J. Douglas Ogilby.
 Catalogue of Birds. Part V, by E. P. Ramsay.
 Catalogue of Tunicata, by Prof. Herdman, Liverpool, England.
 Australian Lepidoptera and their Transformations. Vol. II, Part 5.
 Records, periodically.

May be obtained from the Attendants at the Museum, or from Messrs. Angus and Robertson, Castlereagh-street, Sydney; Messrs. Turner and Henderson, Hunter-street, Sydney; Messrs. E. A. Petherick and Co., George-street, Sydney; Messrs. Melville, Mullen, and Slade, Melbourne; Messrs. Kegan, Paul, Trench, Trübner and Co., London.

[Exchanges of Serials, Works, Reports, and other Publications are earnestly solicited on behalf of the Museum Library.]

1894-5.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF TRUSTEES FOR THE YEAR 1894.)

Presented to Parliament pursuant to Act 17 Vic. No. 2, sec. 9

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,—

The Trustees of the Australian Museum have the honour to submit to Your Excellency their Forty-first Annual Report.

1. Sir Alfred Roberts, after having occupied a seat on the Board since 1874, resigned his Trusteeship, and the Hon. S. H. Hyam, M.L.C., has been elected to the vacant seat.

2. Except on Mondays, when the Museum is closed for cleaning, the doors have been opened to visitors daily from 10 a.m. to 5 p.m. on week-days, and from 2 to 5 p.m. on Sundays. The number of visitors on week-days was 86,246, or an average of 330 per day, and on Sundays 34,324, an average of 660 per day. The total for the year shows an increase of 8,243 over that of the previous year. The largest attendances on any one day were on Monday, 1st October, 2,772, and on Sunday, 1st July, 933. On Monday afternoons the Museum has continued to be accessible to students and schools for teaching purposes on application being made to the Curator. A return is appended of the numbers of visitors to the Museum during the past fourteen years, from which it will be seen that while week-days maintain a fairly steady rate of increase, the attendance on Sundays is liable to great fluctuations.

3. The continued smallness of the income allowed to the Trustees by Parliament has practically stopped the acquisition of specimens by purchase or collection. The amount expended in the purchase of specimens does not exceed £20. No collecting expeditions have been sent out; all that has been done in this way being confined to flying trips around Sydney. Various specimens have been received by exchange, but none calling for special mention; particulars are given in the Appendices. The most interesting presentations were:—Collections of Australian Aboriginal weapons and of American Antiquities, from the New South Wales Commissioners for the Chicago Exhibition, and a series of "Cook Relics," from the Government of New South Wales, comprising all those purchased or acquired by Sir Saul Samuel for the Colony, except some original documents and correspondence relating thereto, which have unfortunately been lost since their arrival in Sydney.

4. The new Geological Hall and Galleries approach completion. Some delay was occasioned through the want of funds, but the sum of £400 required having been now voted by Parliament, the necessary fittings have been placed in the cases, and the members of the staff are engaged in arranging the various collections. The ground floor is allotted to the Fossils, the first gallery to the Minerals, and the upper gallery, which opens from the main building, to Invertebrate Zoology. The transfer of specimens to the new cases has relieved other parts of the Museum, and prepared the way for a re-arrangement of the entire collections as rapidly as circumstances will permit. A sum of £1,700 will be required for new cases, and alterations or repairs to existing cases, of which the sum of £400 has been voted by Parliament on the Estimates for the first half of 1895.

5. The staff still continues at the reduced strength, and the forced economies of late years are beginning to tell on the efficiency of the Institution. The duplicate collections are almost exhausted in some groups, and no means of replenishing them are available. The few hands allowed being insufficient for the proper maintenance of the Museum, it may be found impossible to open the new hall and galleries to the public until Parliament shall have granted sufficient funds for the engagement of further attendants to clean and watch them.

Dr.

6. Dr. E. P. Ramsay, after twenty years' service as Curator of the Museum, has retired owing to ill health. His services, however, have been retained in another capacity on the Scientific Staff. The Trustees have appointed, as his successor in the office of Curator, Mr. Robert Etheridge, Jun., formerly of the British Museum; and lately Palæontologist to this Museum and to the Department of Mines and Agriculture of New South Wales, who has on several occasions temporarily acted as Curator. Mr. Etheridge's appointment took effect on 1st January, 1895. Mr. S. Sinclair, the Secretary, was granted two months' leave of absence, which he spent in a visit to the New Hebrides, and brought back some interesting collections.

7. The only publication which has been issued since the date of last Report is a Catalogue of the Birds in the Australian Museum, Part IV, *Picariæ*, sub-order *Halcyones*, by Dr. E. P. Ramsay.

8. Full information with respect to the Museum will be found in the Appendices attached to this Report, viz. :—

- I.—Curator's Report.
- II.—Statement of Receipts and Expenditure.
- III.—Attendance of the Trustees.
- IV.—Attendance of Visitors and Summary for fourteen years.
- V.—Return of Specimens acquired during 1894.
- VI.—Donations.
- VII.—Exchanges.
- VIII.—Additions to the Library.
- IX.—Publications of the Australian Museum.

The Common Seal of the Museum was hereunto affixed by order of the Board, this fifth day of March, 1895.

(L.C.) JAMES C. COX,
Chairman.

S. SINCLAIR,
Secretary.

APPENDIX I.

CURATOR'S REPORT FOR 1894.

To the Trustees of the Australian Museum,—

Sydney, 31st December, 1894.

Gentlemen,

I have the honour to report that charge of the Museum was delivered by me, in the temporary capacity of Acting Curator to the then Curator (Dr. E. P. Ramsay), on the 22nd of January, and resumed again by myself, with the permission of the Hon. the Secretary for Mines and Agriculture on July 1st, and continued to the end of the year. I have, therefore, much pleasure in handing you this Report, both on behalf of Dr. Ramsay and myself. It is also gratifying to me to have been of service to Mr. Secretary in relieving him of his duties for a short time during his leave of absence.

The general condition of the Museum and its valuable contents may be looked upon as fairly satisfactory, more especially if the exceptional circumstances under which the work has been carried on, be taken into consideration—that of reduced means and staff. The principal work performed will be referred to in detail under the respective headings within which it falls.

It is with much satisfaction that I have to bear testimony to the strict attention to their duties manifested by every member of the staff, and their extreme willingness to assist on every occasion. This is the more to be commended, when it is borne in mind that more than one officer has been doing the duty of two. To Mr. Secretary I am indebted for his valuable assistance in the general management of the Institution, and to the Senior Assistant in an equal degree as regards the scientific administration.

Two additions to the staff have been made by the reappointment of a former attendant as messenger, as it was found impossible to dispense with such assistance, and the engagement of an assistant night watchman. The want of two more skilled workmen—one certainly to be permanent, an assistant taxidermist—the other temporary, an additional carpenter—is seriously felt. With such additions to our working strength much greater progress could be made in the proper display of the collections.

Great care has been manifested in the welfare of the specimens. In consequence of the reduced number of the staff, the Taxidermist has continued, in addition to his other duties, to supervise the whole of the Skin Collections, and these are now in excellent condition, whilst the Assistant Articulator has in a like manner constantly looked after the welfare of the Osteological and Ethnological collections.

The general cleaning duties, including that of our large expanse of glass, have been carried out by two male and two female attendants to the best of their ability, but the superficial area is far too great for so few hands.

I am anxious to bring under your notice the terribly overcrowded condition of the cases in nearly every branch. It is with the greatest difficulty that I am able to find room for additions, more particularly in the divisions of Mammalia, Osteology, and Ethnology. In each section a large number of specimens has had, of necessity, to be stored. This not only renders the objects unavailable for public inspection, but adds greatly to the labour of preservation. After the completion of the scheme I had the honour to lay before you a few months since for the erection of a few more wall cases, there will be no more space available for further case extension. This opens up the question of additions to the building, one I would strongly recommend for your consideration. The Museum is also very much in want of new and improved workshops, and, considering the varied branches of practical museum work carried out on the premises, the want is an urgent one. The erection of a small crematorium and a proper safe spirit-room are also great desiderata.

Our reduced appropriation has injuriously affected the duplicate collections, insomuch that we are unable to comply with the requirements of those Museums and Collectors with whom we correspond and exchange. It naturally follows that our own collections and the prestige of the Institution must necessarily suffer in proportion. The acquisition of stores for "preparation," over and above those supplied by the Government Store Department, has from the same cause become materially lessened, and in some lines our stocks have become practically depleted.

You have decided that the labels attached to the specimens shall in future be printed, and a trial set has for some time been in the hands of the printer, but at the rate at which the printing is progressing years will elapse before any visible result is attained. I have repeatedly expressed the opinion that it would prove cheaper in the end, and unquestionably more convenient, to have our own printer and press on the premises.

With regard to structural matters, the Government Architect was this year able to take in hand the defective down-pipes for roof drainage. New pipes have been placed outside the walls, thus doing away with the serious trouble arising from this source. A new fence and gate-way have been erected, under the same supervision, between the back premises and the William-street frontage. The ladies' lavatory, &c., has also been renovated, and new cisterns and ventilating pipes added. The roof of the carpenter's shop and a portion of that of the photographer's studio have been coated with Gibson's Roof-cooling Composition by means of your own funds with the view of reducing the excessive temperature experienced therein during the summer months. The new roof of the Geological Hall still requires some further attention, in case of flooding from storm-waters, as reported to you some months ago. A further subdivision of the main basement has been commenced, with the view of providing a store-room for the Mineralogist, and in this service a quantity of old material will be utilised.

Under the heading of Exhibition Cases I have much pleasure in reporting that the fittings of the Geological Hall and two galleries have been completed, and are found to be well adapted to the required purposes.

At the meeting of the Board, held in August last, I submitted a Report dealing with certain proposed alterations and additions to the Museum cases consequent on an extensive re-arrangement of the collections. This work required an appropriation of £1,580. Of this amount, the sum of £400 was passed on the Estimates for the first six months of the year 1895. The details of the proposed expenditure of the latter amount, as sanctioned by you, and the further proposed allocation of the balance, if granted by Parliament, will be referred to again under certain sub-headings.

Notwithstanding the large additional space afforded by the cases of the new gallery set apart for the *Invertebrata*, we are already becoming conscious of the inadequacy of the space in question for its full exhibition.

I have little to report in connection with Collecting. With the exception of a dredging trip by my predecessor in office, in Port Jackson, and a similar expedition, combined with the Department of Fisheries, at Lake Macquarie, no organised collecting has been prosecuted. This is deeply to be regretted. A little occasional gathering of specimens has been done by individual members of the staff, particularly Mr. Whitelegge, in the immediate neighbourhood. The largest collection made was that by the Secretary, Mr. S. Sinclair, in the New Hebrides. This lapse of one of our most important means of acquisition is due to want of funds.

Exchanges have been carried out with other Museums and Collectors whenever practicable, but the cause of our inability to successfully carry out this valuable branch of our work has already been touched upon. The important exchange with the Bernice Pauahi Bishop Museum, at Honolulu, was completed early in 1894.

Only one Publication was issued during the year, viz.:—"Catalogue of Birds, Pt. IV., Picariæ—Sub-order Halcyones," by Dr. E. P. Ramsay, assisted by Mr. A. J. North. It is much to be regretted that circumstances have not permitted the reappearance of our "Records of the Australian Museum." The Scientific Staff have been dependent on local societies for the publication of their papers, with your permission, and thanks are especially due to the Council of the Linnæan Society of New South Wales in this direction.

The storage tubs of the Spirit-room having been found inadequate for the work required of them, a tank, constructed on improved principles, was devised by the carpenters. Twenty-five of these were obtained by contract, each with a capacity of 50 gallons. They are now being gradually taken into use, and are found to answer the purpose in view exceedingly well.

For some years the duplicate Marsupial and Foreign Bird Skin Collections have been kept in large boxes and cabinets at the head of the main staircase. These have all been re-examined, cleaned, classified, and placed in the collection store-shed, outside the main building. The diligence and care exhibited in this work by the Taxidermist are to be much commended.

No Purchases of any magnitude have been made. I regret that we have been unable to secure several important private collections offered for sale—notably the Dobroyde Collection of Australian Birds, and a very important series of Australian Coleoptera and Lepidoptera, offered by Mr. George Barnard, of Coomoboolaroo, Qd.

With the view of rendering assistance to other Museums, specimens have been prepared and mounted for the Technological Museum Branches at different times; and sundry specimens, more of a technological than a zoological nature, have been transferred to the Technological Museum, Sydney.

For the accommodation of some of the larger *Mammalia* you have sanctioned the erection of four wall cases, two on each side the staircase in the main hall. Two of these are already provided for, but the other moiety must wait until funds are available for their erection.

With your approval it has been determined to devote the entire ground-floor to *Mammalia* and *Osteology*. In no group, except perhaps, that of *Ethnology*, is the overcrowded condition of the cases and want of room for expansion shown to such an extent. The general collection of *Placentalia* was originally placed around the sides of what is now the Geological Hall, but it will be within your recollection that when this portion of the building was vacated, now four years or more ago, for structural alterations, this skin collection was placed in store, and there it has remained ever since, with the exception of the *Sciuridæ*, *Viverridæ*, *Mustellidæ*, and *Lemuridæ*. These have lately been placed on the main floor, in separate cases, derived from other sources.

The *Marsupialia* are placed in the main hall, in wall cases of an old pattern, and not in accord with that adopted throughout the Museum of later years. During the current year these will be ebonised outside, painted internally, glass inserted instead of wood panelling on the tops to afford a better light, and step fittings provided for the efficient exhibition of the mounted skins. This will be effected out of the recent appropriation.

It is also intended to alter the position of our large Sperm-whale skeleton by removing it to the central vestibule, thus occupying space about to be vacated by the plaster reproductions of large extinct forms, and in its place affording room for various important *Mammalia* from other parts of the Museum.

I was fortunate enough to secure, by purchase, four examples of the rare *Dendrolagus benettianus*, De Vis, from Mr. G. Hislop, of Wyalla, near Cooktown. With the Taxidermist's assistance I was able to make some interesting notes on Mr. Hislop's living specimens, which Mr. Edgar R. Waite has incorporated in a paper by him, mentioned in his report.

A good deal of important work in this class has been performed by the Taxidermist in the preparation and mounting of skins, particularly in the restoration of the Civets, Lemurs, &c.

Great care has been manifested in the preservation of our fine collection of *Aves*. The large new wall cases at the north and south ends of the upper main hall, are to be supplied with sectional step-fittings in the lower portions. This will allow the Australian and Foreign collections to be expanded, and afford relief to the terribly overcrowded state of the older cases. This work is provided for out of present appropriation and will be put in hand early in the current year.

Numerous nest groups showing birds, nest, and eggs, and often the young, with natural surroundings, have been mounted, particularly those of the Pink-eared Duck (*Malacorhynchus membranaceus*), Butcher-bird (*Cracticus torquatus*), Gill-bird (*Anthochaera carunculata*), Diamond Sparrow (*Stagonopleura guttata*), and two bowers, viz., those of the Satin Bower-Bird (*Ptilonorhynchus holosericeus*), and the Fawn-Breasted Bower-bird (*Chlamydodera cerviniventris*). It has been our aim to render these as life-like, and true to nature as possible. The collection of nests has been renovated, renamed, and arranged, in a more appropriate case.

Mr. A. J. North prepared, for the Department of Mines and Agriculture, a "List of the Insectivorous Birds of N.S.W.," with systematic references, nomenclature—scientific, and vernacular, nomenclature and food, more particularly whether injurious or not to crops.

The chief acquisition in this Sub-department consisted of some birds from the Gilbert Group, presented by Mr. C. R. Swayne, H.B.M.'s Resident.

The *Reptilia* and *Batrachia* have to some extent been temporarily withdrawn from exhibition, consequent on substitution of specimens and re-arrangement. In connection with the Lizards this work has even now to some extent progressed. You have already approved of my suggestion that the whole of these divisions shall be massed in the vestibule of the upper main hall. For the purpose the wall space of this portion

portion of the building will be supplied with large cases as soon as funds are available. The adoption of this course will enable me to group together the whole of these important classes, and to bring under cover a number of objects at present exposed to dust and possible damage.

A new departure with us has already been commenced in the method of displaying our Snakes. In addition to spirit, and in many instances dried specimens, a series of casts, coloured from nature, will be added, taken only from the most typical and largest examples procurable, but also showing variation in colour, and stages of growth. A commencement has already been made with the Australian species.

With the view of forcibly presenting to the public eye that difficult group for exhibition—the *Fish*—it is intended to mount the whole collection by degrees, other than spirit specimens, without the intervention of separate stands, except in the case of very large specimens, by placing the dried skins, suitably prepared, on a clear run of vertical fittings, immediately within the glass front of the containing case. In preparing the specimens, the latter are flattened on the unexposed side, so as to accommodate them to the vertical surface. The commoner food-fishes of our waters have already been treated in this way. The entire Fish Collection will for the future be exhibited in the same vestibule with the Reptilia, &c., and the majority of the specimens has already been transferred there. The Wall-cases on the ground floor, at present chiefly devoted to small sharks, will be removed and re-erected in the same vestibule out of funds recently voted. It is also intended, when further moneys are available, to erect a shallow wall-case on each landing of the Main Staircase.

The cases devoted to *Osteology* like those of the *Mammalia* are too much overcrowded to permit of many of the skeletons being clearly seen, but I hope to make room in the future by more judicious grouping. A good deal of floor space will become available on the removal of the five table cases containing fossil organic remains to the Geological Hall. This will be occupied in part by a good skeleton of a Baleen Whale at present in store, but already articulated.

A working catalogue of the duplicate and store skeletons has been prepared by Mr. Edgar R. Waite and the Articulator, for the use of the latter. The same officers have also gone through the exhibited skeletons and checked them with the register. A series of 270 stands for the better display of our series of human crania has been made by contract, and will shortly be brought into use. The more important skeletons set up by the Articulator and assistant during the past year were two Bactrian Camels, an Armadillo, a Spider Monkey, a fine Rhea, a Cassowary, an Emu, and a *Dendrolagus*.

The general collection of *Insects* (Insecta, Arachnida, and Myriopoda) has been almost entirely transferred from its former resting place in the upper main hall, and is undergoing a complete revision. More than 1,000 specimens have already been arranged in the new cases at the west end of the new upper gallery. The method adopted for the exhibition of the Australian Lepidoptera, Coleoptera, and others, consists of a series of thirty-six large corked trays held in a suitable frame-work in the wall-cases, immediately within the glass devised by Mr. F. A. A. Skuse. Over these trays and a little above the eye-line are placed a series of the plates from Scott's "*Lepidoptera*," mounted and framed. Special attention is being given to the illustration of the life-histories of as many species as possible. The foreign forms will be displayed in balustrade, and intermediate cases, at the same end of the gallery, whilst the Arachnida and Economic specimens will be placed in two additional wall cases.

The duplicates have become much depleted through want of funds for purchasing and means of collecting. The collection generally is very deficient in Queensland species.

The *Mollusca*, formerly displayed in certain old-fashioned and cumbersome cases in the upper main hall, have, so far as the Australasian species are concerned, been entirely transferred to the new upper gallery, and are contained in twenty-five balustrade-cases, and sixteen intermediate small table-cases. The arrangement has rapidly progressed, and will be completed early in the current year. The balustrade-cases in question were formerly in my occupation for the Foreign Palæontology, then placed around the railing of what is now the lower or mineral gallery. They will shortly be repolished through the funds recently appropriated. The Foreign Shells remain in the upper main-hall from want of space to exhibit them in the new gallery, and I much regret that, in this instance, there is no room for the completion, much less expansion, of this valuable series.

The lower groups of *Invertebrata* (Foraminifera, Porifera, Cœlenterata, Tunicata, Echinodermata, and Crustacea) were in former days crowded together at the north end of the upper main hall. The whole have now been transferred by Mr. Thomas Whitelegge to the wall-cases on the north and south sides and east end of the new upper gallery. The specimens are under arrangement, and the Foraminifera, Porifera, and Actinozoa, amounting to 1,340 specimens, were completed during the latter half of the year, and I cannot speak too highly of this excellent piece of work. The majority of the objects are mounted on black stands, of which 2,000 were made by contract for this purpose, and are also legibly labelled. The Echinodermata are in hand, and, with the Crustacea, will shortly be completed. In his report Mr. Whitelegge indicates certain groups but poorly represented in the Museum.

The *Ethnology* has so completely outgrown the small annex and gallery allotted to it that some additional space is imperatively required. I emphasise this by stating that nearly half our Australian Ethnology is unexhibited and in store; and what is on view, both of this and that representing the South Pacific Islands (of which we have a particularly fine collection), is so crowded that not only is it impossible for the public to view the exhibits with ease, but it is almost impossible to keep them free from insect life. One officer's time is almost wholly taken up in the latter duty, and this in itself is a heavy tax on our reduced staff. You will remember that some months ago I submitted to you a proposal to transfer the whole of the Ethnology to another part of the building, but further reflection has convinced me that this will hardly better matters. The importance that the Australian section, as a portion of the history of the Continent, is daily assuming demands that it shall receive more liberal consideration, especially if it is to keep pace with the fine collections of a similar nature in other Colonial Museums. The only solution that I now see is an extension of the building.

I am desirous of instituting a collection of vegetable substances showing the food-stuffs and economic materials of our Aborigines, and a nucleus has already been formed. Presentations in this direction will gladly be welcomed.

A very important presentation in this Sub-department, was the fine set of weapons and implements of the Alligator River Tribes, Northern Territory, and numerous urns and vases from the burial mounds of Arkansas, U.S.A., given by the New South Wales Commission of the World's Columbian Exposition at Chicago. The Secretary (Mr. S. Sinclair) has also presented a series of Ethnological objects obtained by him in the New Hebrides, that have enriched those we already possess from these islands, and he has described

described a number of the specimens in a paper to be published, with the permission of the Trustees, in the Proceedings of the Linnean Society of New South Wales.

The *Numismatical Collection* still remains small, but it is one that I hope to see grow as time goes on. At present, such specimens as you possess are unexhibited. During the past year two very fine bronze medals were presented by the Corporation of London, as detailed in Mr. A. J. North's Report. Mr. C. P. Hyman, who exhibited largely at Chicago, has kindly offered to arrange our collection when space is available.

The *Historical Collection*, although small like the Numismatical, and similarly accommodated, contains many historical relics of importance, and we even possess material to largely increase it did space permit.

A really great addition has been made in the acquisition of what are known as the "Cook Relics," transferred to the Board's custody by the Government of New South Wales. The articles have been placed temporarily in eight table-cases at the south end of the upper main hall. The declared value is £1,100. These relics of the great circumnavigator, Captain James Cook, R.N., F.R.S., were purchased, on a statutory declaration, by the New South Wales Government, partly from the surviving relatives of Mrs. Elizabeth Cook, the circumnavigator's widow, viz., Mr. John Mackrell, of Clapham, London; the Rev. Canon Frederick Bennett, M.A., Vicar of Maddington, County Wilts; and Rear-Admiral H. M. C. Alexander, R.N. Certain other articles were presented by Mr. William Adams, F.R.C.S., Engl., of London, and Mr. E. N. Brown, of Melbourne. The old Wedgwood medallions accompanying the collection were purchased chiefly from a Mr. Rathbone, of London.

The general collection of *Minerals* and *Rocks* was formerly displayed at the south end of the upper main hall, and in sundry cases scattered about the Museum, whilst the Australian specimens were placed in table cases on the floor of the geological hall. The whole series has now been most carefully gone over by Mr. Thomas Cooksey, B.Sc., Ph.D., in a great measure re-registered, and transferred to the new lower or mineral gallery. The specimens, to the number of 5,000, are all arranged on black blocks, provided for the purpose by contract, and fully labelled. The majority of the Minerals are foreign, the strictly Australian being very poorly represented. This should not be, and I would respectfully urge that steps be at once taken to rectify the anomaly. With the exception of the Silicates, the classification adopted has been according to Metallic Elements. The Silicates are arranged after the system of Prof. E. S. Dana.

A very fine exchange of Zeolites from the basalt quarries around Melbourne, was effected with Mr. Sheridan-Knowles, of that city.

Work in connection with *Palæontology* has made very little progress during the past year. The duties I have periodically been called upon to perform within that period—duties, I may add, that have become a pleasure, alloyed, however, with regret at the cause therefor—prevented me giving to my own special subject that attention its importance demands. As, however, these facts are perfectly within your cognisance, I need offer no further explanation, and only hope that my next Report may show a large record of work in this direction.

The number of specimens acquired and registered during the year is:—

By exchange	139
By presentation	310

Four years ago the whole Palæontological Collection, except the remains of the extinct Marsupialia, was withdrawn from public view in consequence of structural alterations to the building. The Foreign and Australian Collections have now been restored to the case drawers, and preparation for their exhibition in the case tops has commenced. A number of the large specimens has been suitably mounted and placed in the wall cases. This will be continued as the year progresses. Nine pedestals have been provided for the large plaster reproductions of type crania, and placed in the geological hall. The latter will be transferred shortly. The five desk table cases occupying the floor at the end of the lower main hall will be transferred to the same room, for the reception of fossil vertebrata. These cases, with two other long similar ones already existing in the geological hall, will be provided with slope fittings during next year out of the recent appropriation.

I submit herewith details of the work done in the various Sub-departments by the officers in charge, with their remarks on the same.

I have, &c.,
R. ETHERIDGE, JUNR.,
Curator.

To the Curator,—
Sir,

APPENDIX I.—(A).

Herewith I have the honour to hand you the Annual Report for 1894 of the collections under my charge.

I am, &c.,
EDGAR R. WAITE.

Mammals.

BEYOND some slight additions, the collection of exhibited Mammals remains unchanged. A little more space will soon be available consequent on the removal of the Invertebrate Collection to the new gallery. It will then be possible to place the mammals together, they, at present, being much scattered.

The collection of Australian Mammals is a good one; it is, however, too crowded to be considered well displayed. The available space is far too small, and unless the exhibit be confined to one, or, at most two, examples of each species, it will not be possible to improve matters.

The collection of Foreign Mammals is very poor in point of species, nor can one foresee much possible extension in this direction. Small cases have been fitted up in which special families are represented, for example: the *Sciuridæ*, *Viverridæ*, *Mustelidæ*, and *Lemuridæ*.

It is intended to shortly reinstate the collection of Bats withdrawn from exhibition some time ago, but fresh specimens will be required before a satisfactory series can be displayed.

The

The Skin Collection has been entirely overhauled and classified, and is now in admirable condition, both as to preservation and means of reference.

During the year the collection has been enriched as follows :—

By purchase...	6
By exchange	6
By presentation	41
By collection	1
									54

Among the donations may be specially mentioned, specimens from the Zoological Society of New South Wales, as heretofore, and several kangaroos from Mr. J. A. Boyd. The principal purchase was four tree kangaroos from the Bloomfield River, Q., being the material used when writing the paper "*Observations on Dendrolagus bennettianus*, De Vis," published in P.L.S., N.S.W., IX, p. 571, pls. XLII and XLIII.

Reptiles and Batrachians.

All the Reptiles and Batrachians have been temporarily withdrawn from exhibition, and before being placed in the gallery newly allotted to them, they will be entirely remounted. In the majority of cases new specimens will be substituted.

The work of remounting the Lizards has been commenced. The Australian species are tolerably represented, but the Foreign collection is extremely meagre, therefore exchanges might advantageously be negotiated with foreign Museums.

Hitherto Snakes have been represented only by spirit specimens. Reptiles thus preserved are unsatisfactory and unrecognisable by the public. In a country like this, where venomous snakes are so common, it is of the highest importance that great facilities should be afforded to all classes for becoming acquainted with the aspect of, at least, the more common and venomous species. A series of coloured casts has, therefore, been commenced, which in time it is hoped to make complete. Living or freshly-killed and undamaged snakes of all kinds are required for the purpose. The public would greatly facilitate the work by bringing specimens.

The Foreign Collection of Batrachians is very poor. As the *Ecaudata* (Frogs and Toads) alone are represented in Australia, the Museum is almost devoid of the *Caudata* (Salamanders and Newts) and *Apoda* (limbless Batrachians). A request for Batrachians should, therefore, accompany that for foreign lizards.

The following have been registered during the year :—

By purchase...	15
By exchange	2
By presentation	122
By old collection	4
									143

In addition to Museum work, small collections from the Macleay and Queensland Museums have been examined, resulting in a second paper on Australian *Typhlopidae*. An article on *Aspidites ramsayi*, Macleay, has also been published.

Fishes.

Although spirit specimens are necessary for scientific purposes, fishes preserved in this manner are scarcely suitable objects for public exhibition. A series of the more common food-fishes of the Colony has been mounted, and it is intended to extend this collection, as the interest evinced by visitors shows that such a series is needed and appreciated.

The total number of Fishes received during the year is shown below :—

By purchase...	21
By presentation	89
By old collection	3
By collection	33
									146

The purchases are mainly small numbers of specimens kindly brought from Lord Howe Island by Mr. T. R. Icely, J.P., who encourages the collection by small payments on our behalf. My colleague, Mr. Whitelegge, has presented a number of fishes, furnishing matter for a short article, "*New or rare fishes from Maroubra, N.S.W.*," published in P.L.S., N.S.W., IX, p. 215, pl. XVII.

Skeletons.

The amount of space available for Osteological preparations is so small that very little can be done to improve the collections at present.

The articulator has prepared the following :—

By purchase...	3
By exchange	4
By presentation	9
By old collection	14
									30

To the Curator,—
Sir,

APPENDIX I.—(B).

I have the honour to herewith hand you the Annual Report for 1894, detailing the work done in the Sub-department Aves. I am, &c.,

A. J. NORTH.

THE specimens of Birds, Nests, and Eggs, determined and registered during the year, have been as follows:—

By purchase	4
By collection	162
By exchange	86
By presentation	324
From old collection	100

676

Owing to the stoppage of purchases and the discontinuance of collecting expeditions, no very important acquisitions have been made to the Ornithological collections during the year. As anticipated in my last year's Report, the depleted state of the duplicate collection rendered it impossible to make any exchanges worthy of note with other Museums, and until funds are available for the purchase and collecting of specimens it cannot be expected that any of our foreign desiderata will be added to the collection. At the present time we are depending entirely upon donations of specimens from the public, supplemented by an occasional day's collecting in the neighbourhood of Sydney.

The principal acquisitions consist of specimens of *Spatula clypeata* and *Urodynamis taitensis*, presented by the Hon. C. R. Swayne, Her Britannic Majesty's Resident at the Gilbert and Ellice Groups, and an adult male of Newton's Bower-bird (*Prionodura newtoniana*) received in exchange.

The collection is in a good state of preservation, and during the year the Taxidermist has prepared and mounted, among others, several large groups of birds, making a valuable addition to that most interesting and instructive portion of the bird gallery, the Group Collection. Donations of nests *in situ*, which are not already represented, together with the parent birds and eggs, would be very acceptable, especially those from the coastal scrubs of the northern rivers. The Nest Collection has been re-arranged and named, a number of species in the Old Collection determined and registered, and tickets in both the Australian and Foreign Collections renewed. Small collections of mounted specimens of birds have been sent to the School of Arts, Kangaroo Valley, and the Technical College, Ultimo, also collections of skins and eggs to the Bernice Pauahi Bishop Museum, Honolulu, and the Athens Museum, Greece. During the year a large number of specimens in the Foreign Skin Collection has been condemned as useless, written off the registers and destroyed; and in many instances in the old Australian Collection historic specimens, but of which there is only a single representative, ought to be unmounted, carefully preserved, and replaced by fresh or more recent examples.

At the request of the Under Secretary for Mines and Agriculture, I prepared a "List of the Insectivorous Birds of New South Wales." This paper gives a reference to where a description and figure of each species may be found, its distribution over the Colony, vernacular and local nomenclature, nidification, and whether beneficial or harmful to the orchardist and agriculturist. During the year also a "Catalogue of the Australian Birds," Part IV, Picariæ, Sub-order Halcyones, by E. P. Ramsay, LL.D., has been published.

To the Curator,—
Sir,

APPENDIX I.—(C).

I have the honour to herewith submit the Annual Report of the Entomological Sub-department for 1894. I have, &c.,

F. A. A. SKUSE.

The number of additions registered during the year amounts to 2,196 specimens representing about 800 species, classified as under:—

By purchase	9
By collection	60
By exchange	1,187
By presentation	940
Total	2,196

The acquisitions for the past year include a large number of interesting and valuable specimens, which might, however, have been enormously augmented had funds permitted the purchase of notable collections, and time been available for personal research by field excursions. Duties appertaining to the arrangement of the Invertebrate Gallery have largely contributed to the preclusion of collecting expeditions, but it is to be hoped that facilities for these will be afforded when opportunity offers. Local species are becoming more rare, if not dying out, yearly, as the land becomes denuded of its primeval flora, and systematic collecting in the near future is of the utmost importance. Not only are very many local insects not represented in the collection, but it is desirable to replenish the store of duplicates for the purpose of exchange. Regarding insect representatives from the other Colonies, particularly Queensland, I regret to have to report that our collection is singularly deficient in them. This is no doubt in part due to the especial attention our collectors have devoted to vertebrate animals during their expeditions. In the meantime, numerous collectors from Europe and America have visited these colonies, the result being that the difficulty of access to type specimens is considerably increased yearly. Our collection of Australian Lepidoptera, for instance, is very poor in Queensland species, and it was with this knowledge that I sought the consent of the Trustees to prepare an exchange list in order that the acquisition of specimens might be facilitated by means of communication with other Museums and Entomologists, who would doubtless be willing to assist in making our collection more perfect. In the absence of systematic collecting, systematic exchange is the only method of making the collection complete, without resorting to the purchase of specimens.

The

The completion of the Entomological exhibition cases in the new invertebrate gallery towards the latter end of the year enabled me to proceed with the display of specimens. More than 1,000 typical examples have been already arranged and labelled. The collection of Australian Insects as far as New South Wales species are concerned will be representative, and the collections of Foreign Coleoptera and Lepidoptera, the finest yet placed upon exhibition in the Museum. Life-histories of as many species as possible will be illustrated by actual examples of their metamorphoses, and some of these are completed. The time necessarily devoted to the mounting and careful preparation of specimens, and the renaming and relabelling of the Old Collection in a great measure impedes the progress of rearrangement. A large number of specimens has to be cleaned and remounted during the course of rearranging, and label-writing occupies considerable time where species have to be uniformly ticketed by thousands. In limiting the exhibition collection to about 6,000 typical species, the space at disposal should include a fairly representative display of insects. Owing to the injurious effect of light upon many specimens, they must be retained in the cabinets, and it will not be advisable to expose unique or type specimens.

None of the collections have suffered from the depredation of insect pests, having been carefully overhauled at frequent intervals, and everything is in good order.

An illustrated paper by me entitled, "On a variety of *Heteronympha merope*, Fab.," has been forwarded for publication to the Entomological Society, London.

To the Curator,—

APPENDIX I.—(D)

Sir,

I have the honour to report to you as follows upon the Conchological work performed during 1894 and upon the present state of the collections under my charge.

I have, &c.,

CHARLES HEDLEY.

Work performed.—During the period under review, though accessions from purchase or collecting have been insignificant, the collections have yet grown considerably by gift and exchange.

To Professor R. Tate we are indebted for a series of rare species, mostly described by himself, from South Australia; recently discovered snails from New Zealand were contributed by Mr. R. Murdoch; Dr. J. C. Cox furnished us with a named set of Australian chitons, the fruits of special study upon a difficult group; Sir W. Macgregor presented the mollusca collected on several exploring expeditions into the interior of New Guinea; Mr. W. W. Froggatt gave a valuable series of land shells, collected by himself in Western Australia, Queensland, and New Guinea.

By exchange we acquired an important suite of named South Australian bivalves from Dr. Verco; a rich collection of Japanese shells from the Imperial Museum, Tokio; and some needed New Zealand shells from Mr. C. Spencer. Details of less important receipts will be enumerated in another place.

During the year a new system of registration has been inaugurated. All incoming and outgoing specimens have been entered, but the registration has not yet been made retrospective. After reducing to order the donations and exchanges referred to, my principal occupation has been classifying and mounting such Australasian species as I could exhume from various cases and cabinets where they were stored. This work was continued from last year and is not yet finished. The closing months of the year were spent in transferring the Australasian Shells from the upper main hall to the new gallery, preparatory to rearranging them there in the balustrade and intermediate cases. The Foreign Shells left in the upper main hall were reclassified.

Students of the Mollusca calling at the Museum have been assisted with names of specimens and other desired information.

Pressure of work has postponed the investigation of many inviting subjects encountered in the routine of daily work. Several species new to science stand upon my shelves awaiting description and illustration. The results of hours snatched from the administration of collections are embodied in the following Conchological papers issued by the Linnean Society of New South Wales.

- (1) Description of *Calliostoma purpureo-cinctum*, a new Australian marine shell. P.L.S. N.S.W. (2), IX, p. 35, with figure in text.
- (2) On some naked Australian Marine Mollusca. Pt. I. *Op. cit.* pp. 126-8. Pl. VII.
- (3) The Land Molluscan Fauna of British New Guinea. 2nd Suppl. *Op. cit.* pp. 384-92. Pls. XXIV-XXVI.
- (4) Notes on Australian Shipworms. *Op. cit.* pp. 501-5 Pl. XXXII.

The specimens registered during 1894, were acquired as follows:—

By purchase	4
By collection	120
By exchange	1,120
By presentation	1,426
	2,670

State of the Collections.—The dry collections are divisible into shells mounted on glass and labelled ready for immediate exhibition, and an unknown quantity still in store. Time has not allowed of cataloguing the former, which will be displayed for the inspection of the public during 1895. With some gaps it will be found to contain a tolerably representative series of the mollusca of Australasia. The Foreign Collection may practically be said to be unmounted, the fragment now on view being faunistically and systematically incomplete. In store is a heterogeneous assortment acquired by purchase or exchange in past years from various collectors. The specimens are mostly unnamed and largely duplicate each other, but will yield to a laborious scrutiny much valuable material. Until this store is examined the Museum will continue to acquire specimens at the risk of afterwards finding them already here in our possession. After such examination numerous duplicates will be available for exchange. It is considered

that years of work must ensue before the officer in charge can state how many and what species the Museum collections contain. When our wants are known many friends of the Institution have promised to assist in satisfying them.

Of the spirit collections I have made but a cursory inspection, and find them to consist, firstly, of an excellent series of Cephalopoda, well-mounted and preserved, and named by Mr. E. A. Smith, of the British Museum; secondly, of a small collection of Gasteropoda, &c., in which common species (procurable in a few minutes' walk from the Museum itself) are unrepresented. We are totally unable to supply the requests of foreign correspondents in this direction.

To the Curator,—

APPENDIX I.—(E).

Sir,

I have the honour to herewith submit my Report for the past year.

I have, &c.,

THOMAS WHITELEGGE.

The numbers of specimens acquired have been as follows:—

Ascidians...	2	Collected.
Vermes	16	Presented.
"	4	Collected.
Crustacea	25	Presented.
"	5	Purchased.
"	48	Collected.
Echinodermata	26	Presented.
"	6	Exchange.
"	13	Collected.
Cœlenterata	59	Presented.
"	5	Purchased.
"	11	Collected.
Fungus	1	Presented.
Total	221				

It is to be noticed that there has been a considerable falling off in the receipt of specimens from outside sources as compared with previous years, which may be accounted for from the fact that purchases and collecting have been temporarily discontinued, owing to lack of funds. Notwithstanding this, a very large number of Marine Invertebrates has been collected during my leisure time, which has not been registered, chiefly on account of the extra duties in preparing specimens for exhibition in the new gallery. The Invertebrata under my charge have now been entirely removed from their former position in the upper main hall.

In this respect, among the specimens determined, labelled, and mounted during the last twelve months, may be enumerated as follows:—

- 100 models of Foraminifera.
- 300 species of dried Sponges; 570 specimens.
- 60 species of dried Gorgonias; 95 specimens.
- 304 species of Corals; 400 specimens.
- 6 species of dried Antipathes.
- 128 models of Sea Anemones and Corals.

and approximately amounting in all to 1,340 specimens.

In addition to the foregoing, chiefly comprising dried specimens, there is also a very extensive collection of spirit specimens still awaiting examination, mounting, and naming when suitable bottles are available.

The Foraminifera will be found to be fairly well represented by models and a series of microscopic preparations. The same cannot be said of the Radiolaria. I would suggest that these could be represented by either models or photographs, the objects in themselves being too minute for exhibition.

The collection of dried Sponges is tolerably complete, and the Corals, though well represented, could be added to considerably were permission granted to acquire specimens commonly offered for sale in Sydney. This remark also applies to the Gorgonias, Hydrocorallines, and in a lesser degree to the Echinodermata.

The collection of Hydromedusæ, or Hydroid Zoophytes, is fairly extensive, and a characteristic series is being placed on exhibition.

The Syphomedusæ or Jelly-fishes in the collection offer a very poor representation of the species occurring in Port Jackson and the vicinity. This can only be remedied by preserving examples in special fluids as soon as collected, and, as they are seasonal in their appearance, it would involve considerable time and attention before anything like an adequate collection could be acquired.

The Ctenophora and Siphonophora can only be well represented by affording the necessary opportunities for collecting them at such times as they become prevalent on the coast. In the meantime, it might be advisable to exhibit photographic reproductions of typical examples of these forms.

In consequence of the limited exhibition space at my disposal, it is impossible to display the whole of the collection under my charge, and many fine specimens are, therefore, unavoidably omitted.

To the Curator,—
Sir,

APPENDIX I.—(F).

I have the honour to hand you the Ethnological Report for the year 1894.

I have, &c.,

A. J. NORTH.

The additions to this collection during 1894 were acquired as follows:—

By purchase	9
By exchange	89
By presentation	451
By collection	99
From old collection	2

650

An unusually large number of specimens has been registered during the year, which is due chiefly to the valuable donation received from the New South Wales Commission of the Chicago Exposition. This collection consists of various articles of pre-historic pottery, principally urns and vases, exhumed from the mounds of Arkansas, and flint arrow-heads from Kentucky, Ohio, Indiana, and Tennessee States, North America, all of which were previously unrepresented; also a number of Australian Aboriginal weapons from Port Essington. Another important acquisition was received by exchange from the Bernice Pauahi Bishop Museum, Honolulu. It consists of many articles illustrative of the Ethnology of the Sandwich Islands, among which may be specially pointed out two feather head ornaments made by the ancient noble women of Hawaii, and now of great value. Ninety-nine specimens were collected by the Secretary, Mr. S. Sinclair, during a visit to the New Hebrides, of which several were previously unrepresented in the collection. Some of these are described in a paper, "Notes on a Visit to the Island of Erromanga," by Mr. Sinclair, published in the "Proceedings of the Linnean Society of New South Wales."

Consequent upon the requests made by the then Acting-Curator, the nucleus of an interesting addition to this collection has been formed during the year. It consists of the various food substances used by the Aborigines of Australia, principally dried roots, seeds, stone-fruits, and nuts.

On account of the overcrowded state of the cases in the ethnological gallery referred to in my reports for the past four years, all the acquisitions made to this collection during the year, with the exception of the pre-historic pottery and flint spear-heads from North America, had to be stored. This is to be regretted, for not only are many interesting additions inaccessible to visitors, but the risk of the specimens being attacked by boring insects is considerably increased, and more especially now with a reduced staff, when only a limited amount of attention can be given to them.

To the Curator,—

APPENDIX I.—(G).

Sir,

I have the honour to hand you a Report on the Numismatical and Historical Collections for the year 1894.

I have, &c.,

A. J. NORTH.

The only additions to the Numismatical collection consist of two bronze medals presented by the Corporation of the City of London—one struck in commemoration of the visit of Their Royal Highnesses the Duke and Duchess of York to the City of London on the occasion of their marriage, 6th July, 1893; the other to commemorate the visit of His Majesty the King of Denmark to the City of London on the 8th July of the same year.

By far the most important and valuable acquisition to the Historical collection was received during the year through the Hon. the Premier and Chief Secretary, from the Government of New South Wales. This consists of 184 articles known as the "Cook Relics," that were obtained at various times by the Agent-General in London on behalf of this Colony. The greater portion of these specimens, a list of which appears in Appendix VI, were purchased from the surviving relatives of the great circumnavigator. In addition to many articles used by Captain Cook on board the "Resolution" and "Discovery," and specimens collected by him during his three voyages, are some beautiful old Wedgwood medallions of Sir Joseph Banks, the celebrated botanist, and Dr. Daniel Solander, the naturalist, who accompanied this world-renowned discoverer on his expeditions. This unique and most interesting addition has been properly displayed in eight table cases at the south end of the upper main hall, want of space, as previously adverted to, rendering it impossible to exhibit it in the ethnological hall. Several minor donations have also been received, the specimens registered during the year being

By presentation	191
------------------------	-----

To the Curator,—

APPENDIX I.—(H).

Sir,

I have the honour of submitting the report of the Mineralogical Sub-Department for the year 1894.

I have, &c.,

THOMAS COOKSEY.

Good progress has been made with the new gallery, and all minerals previously on exhibition in other parts of the building have now been placed in their proper positions. About 5,000 specimens of minerals and rocks are already in the gallery, the greater number of which are foreign. This disparity is gradually being lessened, but we are still in want of typical Australian specimens from the most important mining districts. From Broken Hill, for example, we have a very poor collection of silver ores and

and accompanying minerals. I have sent several letters to the managers of mines in this district, and received some replies promising contributions, but up to the present I have not been favoured with any specimens.

I might here perhaps be allowed to remind anyone into whose hands this Report may fall that any specimens sent to the Museum would be very thankfully received. By this means the collection can be very materially assisted to become, what it should be, as truly representative as possible.

One general collection of Australian and Foreign specimens has been made. The minerals, with the exception of the silicates, have been classified according to the metallic elements contained in them, as it was thought that this classification would be much more useful to the general public as a reference collection. In arranging the silicates, however, I have followed the classification given by E. S. Dana in "A System of Mineralogy," published in 1892.

A series of Italian rocks (about 500) has been placed separately and arranged as far as possible, according to their geological age. The remaining rock specimens have been classified according to their mineralogical constitution.

Several old cases have been placed in the basement, and used as a store for duplicate specimens.

Two thousand one hundred and forty-nine mineral specimens have been registered during the year, which have been obtained as follows:—

By donation	63
By exchange	85
By purchase	13
By collection	3
From old collection	1,985
						2,149

Forty-nine specimens have been sent away, principally to Mr. R. Sheridan-Knowles, of Victoria, Rev. Bro. Claudius of Parramatta, and Mr. F. McKnight of Melbourne.

The best specimens acquired during the year were obtained by exchange from Mr. R. Sheridan-Knowles. They consisted chiefly of a collection of zeolites from Collingwood and Richmond, Victoria, among which were specimens of *Phacolite*, *Phillipsite*, *Analcite*, *Hyalite*, *Calcite*, *Ferrocaltite*, *Siderite*, *Aragonite*, *Magnesite*, &c., the whole forming a most acceptable addition.

A specimen of a hydrous sulphate of alumina, magnesia, and manganese has been sent to me by Mr. Rienits, who obtained it from the vicinity of Mount Victoria. A complete analysis of this specimen has been made by myself, which proves it to be *Pickeringite* (E. S. Dana, "A System of Mineralogy," 1892, p. 953). This is, as far as I am aware, the first reported occurrence of this mineral in New South Wales, and perhaps also in Australia.

APPENDIX I.—(J).

LIST OF THE MUSEUM STAFF AT THE BEGINNING AND END OF THE YEAR 1894.

No. at beginning of year.	No. at end of year.	Name and Office.	Date of appointment to present position.	Date of first appointment in the Museum.
1	1	Edward P. Ramsay, Curator, resigned, but retained in another capacity.	22 Sept., 1874	
2	2	Sutherland Sinclair, Secretary	11 Sept., 1882	
3	3	Robert Etheridge, Assistant in Palæontology, now Curator.	18 April, 1887	
4	4	Thomas Whitelegge, Scientific Assistant	1 July, 1887	27 Aug., 1883
5	5	Frederick A. A. Skuse do do	15 Oct., 1890	
6	6	Alfred J. North do do	1 Aug., 1891	22 Nov., 1886
7	7	Thomas Cooksey do do	9 May, 1892	
8	8	Edgar R. Waite do do	17 April, 1893	
9	9	Charles Hedley do do (temporary appointment).	1 April, 1891	1 April, 1891
10	10	Henry Barnes, Articulator, Modeller, and Photographer.	15 March, 1860	
11	11	J. A. Thorpe, Taxidermist	5 June, 1869	
12	12	Robert Barnes, Carpenter	— 1866	
13	13	Benton Lucas, Assistant Carpenter	10 May, 1887	1 March, 1883
14	14	Henry Barnes, junior, Assistant Articulator, &c.	1 Oct., 1888	— 1878
15	15	William H. Hill, Clerk	1 Jan., 1891	1 Nov., 1884

LIST of "Cook Relics" presented by the Government of New South Wales :—

- | | |
|--|--|
| <p>1 Scoop of Horn.
 1 Note by Captain Cook as to one of his Charts, and Autograph Signature.
 1 Autograph Account of a Ship's day's work.
 1 Medal struck by the Government.
 1 Medal struck by the Royal Society.
 1 Piece of the Rook on which Captain Cook was killed.
 1 Dressing Case.
 1 New Zealand Jade Ear Ornament.
 1 Bible. 4to. Oxford, 1765. From this Bible Captain Cook read the Lessons on Sundays to the ship's Company during his three voyages.
 1 Book. Boswell, James. An account of Corsica, and Memoirs of Pascal Paoli, with autographs of author and Captain Cook. 8vo. London, 1769.
 1 Photograph of Monument set up in Kelakakna Bay, Hawaii.
 1 Engraving by Bartalozzi, from Webber's picture of the Death of Captain Cook.
 1 Arrow stated to be partly made from the small leg bone of Captain Cook.
 1 Statement by Mr. J. H. Green, F.R.S., D.C.L., President of the Royal College of Surgeons, Senior Surgeon to St. Thomas's Hospital, as to arrow with Captain Cook's bone.
 1 Statement by Bishop Staly, late Bishop of Honolulu, and long resident in the Sandwich Islands, as to arrow with Captain Cook's bone.
 1 Sketch of Monument erected at Cambridge. (Inscription on back.)
 1 Engraving of Portrait of Captain Cook.
 1 Engraving of Grant of Arms.
 1 Engraving of Captain Cook, from Portrait by Roberts.
 1 Engraving of Captain Cook, from Portrait by Dance.
 1 Autograph account of the Transit of Venus.
 1 Book of Original Drawings of South Sea Birds, by Admiral Isaac Smith and others in the second voyage of Captain Cook, 1772-1775. Impl. fol.
 1 Book of Original Sketches, Drawings, Maps, etc., collected by Admiral Isaac Smith, who served as an Officer under Captain James Cook, the Circumnavigator, in his first and second Voyages, 1768-1775. Imp. fol.
 3 Volumes of Engravings from drawings taken during Cook's Voyages (one being a duplicate).
 4 Jade Hatchets (unmounted).
 1 New Zealand Meri of Jade.
 2 Shells used as castanets (one broken).
 1 Beautiful feather ornament for hair.
 1 Cabin tea caddy.
 1 Tumbler, engraved "Resolution," Captain Cook, 1772.
 1 Grant of Arms to descendants of Captain Cook, 1785.
 1 Waistcoat of Tahiti cloth, embroidered by Mrs. Cook for Captain Cook to wear at Court had he returned from his third voyage.
 6 Coloured Tabiti cloths.
 1 Matting, worn in wet weather instead of cloth.
 3 White cloths.
 1 Large basket with shells interwoven.
 1 Cloak of matting, worn by Tahiti chief.
 1 Royal Hawaiian feather cloak.
 1 Gorget, used to protect the neck and chest when fighting.
 1 Grappling implement.
 1 Wooden Punch ladle made for Captain Cook by one of his sailors.
 2 Combs for hair.
 1 Wooden comb (carved).
 1 Shark's tooth fitted as a knife.
 1 Pan pipe.
 1 Matting, with woven pattern.
 1 Specimen foundation of feather cloak.
 1 Finely knitted bag.
 2 Shell necklaces.
 1 Necklace, with a perforated gourd.

LIST of Specimens presented by the N. S. W. Commissioners for the World's Columbian Exposition, Chicago, 1893 (continued):—

- 1 Medium-sized bowl, Cross Co., Arkansas.
1 Stone pounder, Arkansas.
2 Grinding stones, Arkansas.
1 Sinker, Arkansas.
3 Stone tomahawks, Arkansas.
1 Large tomahawk, Arkansas.
20 Fragments of pottery, Arkansas; Mounds, Alabama, and Indiana Co.
2 Unfinished flint arrow-heads, Tennessee.
45 Arrow-heads, Indiana Co., Butler Co., Ohio, Alabama, Kentucky, and Tennessee.
1 Unfinished flint, Decatur Co, Tennessee.
45 Arrow-heads (flint), Kentucky, Ohio River, Tennessee, and Indiana.
1 Stone instrument, Indiana.
1 Small earthen bowl, Arkansas.
6 Beads from earth mounds, Arkansas.
1 Stone adze, Australia.
1 Stone implement for cutting wood.
2 Stone tomahawks.
1 Stone for grinding seeds on.
1 Shell adze, Ebor Island, Marshall Group.
1 Small triangular bag (soft twine), North Australia.
1 Basket (mar-ro-ing), Port Essington.
1 Basket (made from spathe of palm), Port Essington.
1 Hat (rush or grass), Port Essington.
1 Square bag, stained Indian red, Port Essington.
1 String bag (close mesh), Port Essington.
1 Small oblong bag (coarse strong string), Port Essington.
1 Basket (small open rushwork), Port Essington.
1 Small basket, 7 in long, close mesh, Port Essington.
1 Basket, small, stained Indian red, Port Essington.
1 Triangular string bag, Port Essington.
1 Water gourd, Port Essington.
1 String ornament, whipped at opposite ends, Port Essington.
1 Fillet feathers, and string of opossum hair, Port Essington.
2 Fillets of opossum hair, stained red, Port Essington.
2 Hanks of human hair (womasa belt), Port Essington.
7 Necklets of grass stalks, Port Essington.
1 Necklet, made from teeth of Kangaroo, Port Essington.
2 Plumes, feathers of the Magpie goose, Port Essington.
1 Fan, feathers of the Emu, Port Essington.
5 String circlets, Port Essington.
2 Plaited straw bangles, Port Essington.

1 Fillet, woven native string, Port Essington.
- 2 Men's waistbelts, Port Essington.
1 Man's waistbelt, red and white lines in various curves, Port Essington.
8 String circlets of native string, Port Essington.
2 Circlets, native string, Port Essington.
1 String bag, Port Essington.
1 Tomahawk, ornate type, "Valeman," Port Essington.
1 Tomahawk, blunt cutting edge, "Valeman," Port Essington.
1 Tomahawk, small, "Valeman," Port Essington.
8 Hand stones, used as pestles, "Wallong," Port Essington.
1 Corroboroe trumpet, Port Essington.
1 Lubra fighting stick, "Kau-nan," Port Essington.
1 Waddy, pointed at both ends, Port Essington.
5 Missile sticks, "Konnung," Port Essington.
1 Boomerang, sculpture representing snake, Port Essington.
1 Boomerang, unsculptured, Port Essington.
1 War boomerang, "Barn-geet," Port Essington.
1 War boomerang, central line lozenge-shaped scars, Port Essington.
2 Rod womerabs, Port Essington.
2 Spatula womerabs, "Billetta," Port Essington.
1 "Nulla-Nulla," smooth and polished, Port Essington.
3 Three-pronged fishing spears, Port Essington.
1 Two-pronged fishing spear, Port Essington.
2 Lacc spears, "Toko-ojalie," Port Essington.
8 Goose spears, reed, Port Essington.
4 Spears, "Malagemmah," Port Essington.
5 Spears, stone-headed, Port Essington.
3 Spears, Corroboroe, Port Essington.
1 Spear, "Yoko," serrations on each side, Port Essington.
5 Spears, "Yoko," barbed on both sides, Port Essington.
23 Spears, barbed on one side only, Port Essington.
13 Spears, barbs stronger and much closer together, Port Essington.
1 Club, New Guinea.
1 Tobacco pipe, New Guinea.
17 Arrows, Solomon Islands.
1 Paddle, circular blade.
1 Paddle, long-bladed, Maria Island.
3 Paddles, long-bladed, Guadalcanar Island.
1 Long-bladed paddle, Florida Island.
4 Long spears, South Sea Islands.
1 Fishing net, South Sea Islands.
2 Fishing spears, South Sea Islands.
3 Arrows, Malayata Island.
1 Spear, serrated head.

13. Descriptive Catalogue of the Sponges in the Australian Museum, by R. von Lendenfeld. 1888. 8vo. pp. xiv-260, with 12 plates.
14. Catalogue of the Fishes in the Australian Museum. Part I, Palæichthyan Fishes, by J. Douglas Ogilby. 1888. 8vo. pp. 34.
15. Catalogue of the Marine Shells of Australia and Tasmania, by J. Brazier. Part I, Cephalopoda, 1892. 8vo. pp. 20. Part II, Pteropoda, 1892. 8vo. pp. 22. Part III, Gasteropoda (Murex), 1893. 8vo. pp. 32.
16. Catalogue of Australian Mammals, with Introductory Notes on General Mammology, by J. Douglas Ogilby, 1892. 8vo. pp. xvi-144.

II.—MONOGRAPHS.

1. Australian Lepidoptera and their Transformations, by the late A. W. Scott, with Illustrations by his daughters, Mrs. Morgan and Mrs. Forde. Edited and revised by A. S. Olliff and Mrs. Forde. Vol. II, Parts 1, 2, 3, and 4.

III.—MEMOIRS.

1. History and Description of the Skeleton of a new Sperm Whale in the Australian Museum, by W. S. Wall. 1851. 8vo. pp. 66, with plates. Reprint 1887.
2. Lord Howe Island: its Zoology, Geology, and Physical Characters. 1889. 8vo. pp. viii-132, with 10 plates.

IV.—GUIDES.

1. Guide to the Australian Fossil Remains in the Australian Museum. 1870. 8vo. (Out of print.)
2. Guide to the Contents of the Australian Museum. 1883. 8vo. pp. iv-56. (Out of print.)
3. Guide to the Contents of the Australian Museum. 1890. 8vo. pp. 156.

V.—MISCELLANEOUS PUBLICATIONS.

1. List of old Documents and Relics in the Australian Museum. 1884. Reprinted with additions, 1890. 8vo. pp. 4.
2. Descriptive List of Aboriginal Weapons, Implements, &c., from the Darling and Lachlan Rivers, by K. H. Bennett, F.L.S. 1887. 8vo. pp. 8. (Out of print.)
3. Notes for Collectors. 1887. 8vo. pp. 43.
4. Hints for Collectors of Geological and Mineralogical Specimens, by F. Ratte, pp. 26, with a plate.
5. Hints for the Preservation of Specimens of Natural History, by E. P. Ramsay. 1891. 4th Edition, pp. 32.

VI.—RECORDS.

- Records of the Australian Museum, Vol. I. 8vo. pp. 202. 30 plates.
Vol. II. Nos. 1 to 5, pp. 84. 17 plates.

IN PREPARATION.

- Catalogue of Reptiles, &c., by J. Douglas Ogilby.
Catalogue of Birds. Part V, by E. P. Ramsay.
Catalogue of Tunicata, by Prof. Herdman, Liverpool, England,
Australian Lepidoptera and their Transformations. Vol. II, Part 5.
Records, periodically.

May be obtained from the Attendants at the Museum, or from Messrs. Angus and Robertson, Castlereagh-street, Sydney; Messrs. Turner and Henderson, Hunter-street, Sydney; Messrs. Melville, Mullen, and Slade, Melbourne; Messrs. Kegan, Paul, Trench, Trübner, and Co., London.

[Exchanges of Serials, Works, Reports, and other Publications are earnestly solicited on behalf of the Museum Library.]

1894-5.

NEW SOUTH WALES.

NATIONAL ART GALLERY OF NEW SOUTH WALES.

(REPORT OF TRUSTEES FOR THE YEAR 1894.)

Presented to Parliament by Command.

REPORT to The Honorable The Minister of Public Instruction for the year ending
31st December, 1894.

National Art Gallery of New South Wales, Sydney, 16 January, 1895.

IN presenting their Annual Report the Trustees have the gratification to state that the interest evinced by the public in the National Collection continues unabated. During the past year 273,757 visitors were recorded, giving a daily average attendance of upwards of 750.

Since 1880 about three and a quarter million persons have passed through the turn-stiles.

The Intercolonial exchange of pictures with Victoria and South Australia has been successfully initiated, the first exchange of works being hung in the respective Galleries on the 1st September, 1894. The pictures contributed by the Southern Galleries attract here large numbers of visitors, and the Trustees are much gratified with the result of this first movement in the direction of a wider distribution of Art Works.

Eighteen additional students have been registered during the year, making a total of 182 recorded in about four years.

The great value of the National Collection, and its high appreciation by the public, justify the Trustees in making an urgent appeal for the early extension of the Australian and the Black and White Courts, in both of which the wall space is altogether inadequate—even for present requirements—and fair justice cannot be done to the valuable works they contain in so-restricted a space.

The purchases during 1894, British, Australian, and Foreign, are given in detail in the annexed list. The presentations include three oil paintings, and a fine collection of works in Black and White.

The Trustees have to deplore the loss of their late colleague and Director, Mr. E. L. Montefiore (one of the founders of the Gallery), by which much regretted event the cause of Art in Australia loses an enthusiastic and devoted advocate.

With the approval of The Honorable The Minister, the Trustees appointed Mr. G. E. Layton as their Secretary, subsequently to the death of the late Director.

E. DU FAUR,
President.

LIST of Works purchased by the Trustees in 1894, at a cost of £2,688 18s.

OIL PAINTINGS.

British—"Shorthanded," by Lionel P. Smythe.

French—"Virginia di Monti, S. Georgio Perugia," by Prof. G. Costa. "Marché aux Chevaux, Syrie," by A. Pasini. "La Villageoise," by Jules Goupil. "La Séance du portrait," by A. Lynch. "L'arrivée à l'auberge," by C. Delort. "Servante d'auberge," by F. H. Kaemmerer. "Route à Terre del Greco," by J. Pokitonow. "Patineuses," by L. Doucet.

Australian—"The Golden Fleece," by Tom Roberts. "By Tranquil Waters," by Sidney Long.

WATER COLOUR AND PASTEL.

British—"The Arab's Home," by F. Goodall, R.A. "Fleet Street," by H. Marshall. "The Poet Gringoire," by E. R. Hughes. "The Thames, Great Marlow," by C. Wilkinson.

French—"Carnations," by Madeliene Lemaire. "Enfants à la Cromme," by E. Levy.

Australian—"Types of Aborigines," by B. E. Minns. "Aborigine Girl," by B. E. Minns. "A place of Wind and Flowers," by Miss A. Norton. "Aline," by Miss E. Cusack.

BLACK AND WHITE.

Australian—"Down on his Luck," photogravure after M'Cubbin. Three etchings, by E. W. Evans.
French—"La Reine Margherita," by P. Renouard.

STATUARY, &C.

Australian—"Defiance" (statuette), by A. G. Reid.
Italian—"The Pharisee" (bronze), by Andreoni.

PRESENTATIONS to the Gallery in 1894.

"A Mountain Torrent" (oil painting), by R. Harwood. Presented by F. H. Dangar, Esq.
 "The Lonely Margin of the Sea" (oil painting), by Miss Jessie E. Scarvell. Presented by H. Bush, Esq.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SYDNEY OBSERVATORY.
(INFORMATION RESPECTING ASTRONOMICAL INSTRUMENTS IN USE AT.)

Ordered by the Legislative Assembly to be printed, 23 April, 1895.

[Laid upon the Table of this House in answer to Question No. 1, of 23rd April, 1895.]

Question.

- (1.) ASTRONOMICAL INSTRUMENTS AT THE OBSERVATORY:—Mr. HOGUE asked THE MINISTER OF PUBLIC INSTRUCTION,—
- (1.) Will he lay upon the Table of this House a list of astronomical instruments in the Sydney Observatory, giving the use to which they are severally put?
- (2.) Are any of the said instruments lent out; and, if so, to whom, and for what purpose?

Answer.

No. 1, the transit instrument—Used for determination of time and exact positions of stars. No. 2, the large equatorial, in south dome—Used for extra meridian work, double stars, comets, &c. No. 3, the star camera—Used for making a chart of the heavens. No. 4, the second equatorial, in north dome—Used for purposes similar to No. 2, *i.e.*, extra meridian work. No. 5, five smaller telescopes—Used occasionally for extra meridian work.

From Parramatta Observatory.—The undermentioned instruments, Nos. 6, 7, 8, and 9, are so inferior and out of date that they are practically useless, and only valuable as relics of the old Observatory:—No. 6, a transit instrument—Not used. No. 7, a transit instrument—Not used. No. 8, a small equatorial—Not used. No. 9, a small altazimuth—Not used.

As a general rule no instruments are lent out, but there are exceptions: (a) A small telescope was lent to the late Surveyor-General, when in office, for official purposes; instrument duly returned. (b) On the recommendation of the late Surveyor-General another small telescope was lent to one of his officers; instrument duly returned. (c) The management of the Lyceum Theatre applied to the Government Astronomer, early in March, 1895, for the loan of some astronomical instruments, as they could not otherwise be obtained in Sydney. He lent them from the unused instruments received from Parramatta: The small equatorial (No. 8 in list) and a small altazimuth (No. 9 in list); the instruments were duly returned.

MUNICIPALITIES.
(BY-LAWS.—HILLSTON FREE PUBLIC LIBRARY.)

Ordered by the Legislative Assembly to be printed, 13 March, 1895.

Department of Public Instruction,
Sydney, 1st March, 1895.

THE following By-laws for the regulation of the Free Public Library at Hillston, which have been made by the Municipal Council of Hillston, and confirmed by His Excellency the Governor in Council, are published in accordance with the Municipalities Act of 1867.

J. GARRARD.

BY-LAWS FOR REGULATING THE FREE PUBLIC LIBRARY OF THE MUNICIPAL DISTRICT OF HILLSTON.

1. The Hillston Municipal Council's Free Public Library shall be open to the public daily between the hours of 10 a.m. and 10 p.m.

2. Every person who shall enter said Library shall be decently attired, and immediately on entering the same write his or her name and address in a book to be kept for such purpose, and to be called the "Visitors' Book"; and if such person is unable to write, then such name and address may be written by any other person or the proper officer of the Council at such person's request; and no person who shall refuse to comply with this regulation shall be permitted to remain in such Library; and it will be the duty of the officer of the Council in charge to enforce this By-law.

3. Every person who shall, being intoxicated, enter or remain in such Library, or who shall use therein any abusive, improper, or unbecoming language, or who shall, by unnecessarily loud talking, noise, or otherwise, disturb or annoy persons using or resorting to said Library, or shall without lawful excuse, but without felonious or larcenous intent, remove any property from said Library, shall forfeit and pay a sum not less than ten shillings nor more than ten pounds sterling; and every such person may be forthwith removed by any officer of the Council in charge of said Library.

4. It shall be lawful for any person, with the consent of the Council, to lend to or deposit at said Library any book or publication, model, or specimen for public use or inspection, subject to such restrictions as to use and inspection as such person may prescribe; and the officer of the Council in charge of the Library shall in such case hold every book, publication, model, or specimen in trust for the person so lending or depositing, and shall enforce such restrictions as such person may have prescribed as aforesaid.

5. A record shall be made of every donation to the said Free Library, which shall be open to the inspection of all persons visiting the Library.

6. Any person who shall wilfully damage any book, publication, catalogue, or record kept at the Library for the general use thereof, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than ten pounds sterling.

At a Special Meeting of the Hillston Municipal Council, held on the 13th December, 1894, the By-laws for regulating the Free Public Library of the Municipal District of Hillston, as originally made and passed, were amended by the omission of By-law 6.

The above By-laws, as amended, were adopted and passed by the Hillston Municipal Council, this thirteenth day of December, in the year one thousand eight hundred and ninety-four.

DAVID GOEMLY, Council Clerk.

(L.S.) M. BOSSI,
Mayor.

EDUCATION.

(COPY OF AWARD RECEIVED FROM THE CHICAGO EXPOSITION ON "PUBLICATIONS AND STUDENTS' WORK" EXHIBITED BY THE SYDNEY TECHNICAL COLLEGE.)

Ordered by the Legislative Assembly to be printed, 27 November, 1894.

[Laid on the Table of this House in answer to Question No. 6, of 27th November, 1894.]

Question.

6. MR. WILKS asked THE MINISTER OF PUBLIC INSTRUCTION,—

(1.) Has his attention been directed to paragraphs in the *Sydney Morning Herald* and *Evening News* of Monday, 19th instant, in reference to a report alleged to have been made by an official Committee of the Chicago Exhibition, upon exhibits forwarded from the Technical College?

(2.) Has any such report been received by the Department of Public Instruction; if so, will he lay it upon the Table of the House, and publish the names of all students mentioned therein as an encouragement to the general body of students at the College?

Answer.

NEW SOUTH WALES.

Department L—Liberal Arts. Exhibitor, Sydney Technical College—Address, Sydney. Group, 149; Class, 851. Exhibit—Publications and Students' Work.

Award.

Syllabi.—The very large number of syllabi, and the comprehensiveness of their contents; advantageous matter presented to the citizens of New South Wales, as to the formation and maintenance of technological museums in all localities.

Mechanical Drawing Classes: Mechanical Drawings.—Large number of well executed mechanical drawings illustrating all phases of motion.

Manual Training Classes: 60 specimens of Class Work.—Sound principle and instruction in the training of the eye and hand, and leads progressively into regular work.

Architectural Classes: 52 large Architectural Drawings.—Originality of designs and skilful execution of every drawing and plan.

Art Class: Students' Work.—Excellence in form, color and expression of 260 specimens of students' work, giving evidence of commendable training and execution.

Carpentry Class: Specimens of Carpentry.—A great illustration of finished work, consisting of a model bow window set in sandstone, hip and dome roofs, braces, circular, oval and triangular louvre shutters, twisted hand-rail, shutters, circle doors, panel doors, spiral staircases, model stairs and circle upon circle door-frames, all excellent in the perfection of the work in design, construction and finish. The joints of all kinds, the mortising, the panelling and polishing are all done in the most workmanlike manner and show the value of long years of instruction in the manual arts. The geometric forms presented by the numerous specimens indicate a development of the head corresponding with that of the hand.

Sanitary Plumbing Class: Specimens of Work.—The workmanship of everything offered is real, and if put into place anywhere would be accepted as good work. The scale of drawings for stacks of waste or soil pipes with all their connections are good; while the lead traps, vents, and wastes, made from these plans are perfect. The bossed lead finial, made from a single piece of lead, is an index to the possibilities of lead working, and deserves special mention. In the high character of the written examinations and sanitary sketches, there is shown not only a great knowledge of general principles, roof work, inside work, and hot water supply, but also a clear knowledge of the sanitary ideas underlying all true plumbing. The diploma of this school is a prerequisite to do plumbers' work in Sydney, and is accepted as a guarantee of knowledge and skill.

Masonry Class: Rampart and Pointed Arches.—Work done by B. Nettleton, John A. Milford, and W. H. Jeffries, in masonry and stone, marble carving and masonry drawings. The joints in the culverts and arches are most excellently done, and show careful training and diligent application.

JOSIAH H. SHINN,
Individual Judge.

Approved.—K. BUENZ, President, Departmental Committee.

Approved.—JOHN BOYD THACKER, Chairman, Executive Committee on Awards.

Date, 23rd July, 1894.

NEW SOUTH WALES.

CITY OF SYDNEY IMPROVEMENT BOARD.

(FIFTEENTH ANNUAL REPORT.)

Presented to Parliament by Command.

The City of Sydney Improvement Board to The Chief Secretary.

Sir,

Public Works Building, Macquarie-street, Sydney, 31 August, 1894.

As members of the City of Sydney Improvement Board we have now the honor to present to you our Annual Report for the Board year ended 31st August, 1894.

Having in our previous Annual Reports fully explained the disadvantages under which we labour, and have laboured during the past, we need only refer thereto, and express regret that during the Board year just ended, as was also the case in the preceding year, no matter has been brought under our notice by the officer appointed under the provisions of the City of Sydney Improvement Act, whose duty it is to set the Board in motion.

In view of this inactivity, and of the almost useless expenditure of public money, incidental to maintaining offices for the use of the Board, we, in February last, drafted (draft appended hereto) and submitted to the then Chief Secretary a short proposed Bill to amend the City of Sydney Improvement Act, which, though not giving the whole of the amendments required, would, pending a more complete Bill becoming law, give us the services of an Inspector of Buildings having co-ordinate powers with the City Building Surveyor, by which the interests of the public would be immediately served, and the expenditure of public funds justified. The Chief Secretary promised that he would introduce the Bill during that Session. This we regret to say was not done.

We, therefore, now urge upon your consideration our present position, and again ask that the City of Sydney Improvement Act be amended, in the direction indicated, without further delay.

We have, &c.,

WM. BAILEY, J.P.,

Chairman.

BENJAMIN BACKHOUSE, H.A., R.I.B.A.,
 GEORGE EVANS,
 FRANK SENIOR, J.P., } Members.

APPENDIX.

A BILL to amend the City of Sydney Improvement Act.

WHEREAS it is expedient to make provision for more effectively carrying out the objects of the City of Sydney improvement Act, more particularly in respect of ruinous or dangerous buildings, or such as are unfit for human habitation on sanitary or other grounds, and for that purpose to provide for the appointment of an Inspector under the City of Sydney Improvement Board: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows:—

1. This Act shall come into force immediately after the same shall have been passed and assented to by His Excellency the Governor, and may be cited as the City of Sydney Improvement Act Amendment Act, 1894, and shall be read and construed, as far as may be consistent with the context or subject matter thereof, with the City of Sydney Improvement Act, forty-second Victoria, number twenty-five.

2. Within one month after this Act shall come into force, and from time to time thereafter as often as occasion shall require, the Governor shall, with the advice of the Executive Council, upon the recommendation of the City of Sydney Improvement Board, appoint some competent person to be Inspector of Buildings under and subject to the control and directions of the said Board.

3. There shall be vested in the Inspector of Buildings so to be appointed all the powers heretofore vested in the City Building Surveyor under and by virtue of the City of Sydney Improvement Act in respect of Buildings that are dangerous, or ruinous, or unfit for human habitation on sanitary or other grounds; and the said Inspector shall, under the direction of the said Board, have co-ordinate authority with the City Building Surveyor to perform all the duties and exercise all the powers and privileges imposed upon and vested in the said City Building Surveyor under any of the provisions of the said Act in respect of ruinous or dangerous buildings or such as may be found unfit for human habitation, and shall also take and receive such fees as are by the said Act provided to be taken and received by the said City Building Surveyor in respect of any such buildings inspected and reported on by him: Provided that no person shall be liable to pay more than one fee in respect of any such inspection or report; but the fees shall in all cases be payable either to the Inspector appointed under the provisions of this Act or to the City Building Surveyor, whichever of the said officers shall first have inspected and reported upon any such buildings to the said Board. And all fees due and payable to the Inspector appointed in pursuance of the provisions of this Act may be demanded and recovered by him in all respects in the same manner as is provided by the City of Sydney Improvement Act in the case of the City Building Surveyor.

4. Clause twenty-nine of the City of Sydney Improvement Act, forty-second Victoria number twenty-five, is hereby amended by striking out the word "and" in the fourth line of the said clause and substituting therefor the word "or" so that the said line shall read "a ruinous state, or dangerous to the public."

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MUNICIPAL RATES ON GOVERNMENT BUILDINGS.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 20 November, 1894.

[Laid upon the Table of this House in answer to Question No. 1, of 25 October, 1894.]

Question.

1. MUNICIPAL RATES ON GOVERNMENT BUILDINGS:—MR. ARCHIBALD CAMPBELL asked THE COLONIAL SECRETARY,—
- (1.) Was an item of £12,000 "to pay municipal rates on Government buildings" included in the Estimates last passed by Parliament?
 - (2.) How many years has money been voted on the Estimates for the said purpose?
 - (3.) What is the total amount that has been so voted?
 - (4.) Where are the Government buildings upon which rates are thus paid?
 - (5.) What are the respective buildings referred to?
 - (6.) Have rates been so paid upon Government buildings within any country municipalities; and, if so, where?
 - (7.) Does the Government consider that all municipalities should be treated alike in regard to the matter here alluded to; and, if so, will they arrange to have such done in future?

Answer.

1. Yes.
2. From 1880 to 1894.
3. £183,090 6s. 11d.

4 and 5. List of premises owned or rented by the Government on which municipal rates are paid, chargeable to the Vote "Municipal Rates on Government Buildings":—

(SECOND SESSION.)

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF INVERELL.—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.

Chief Secretary's Office,
Sydney, 7th August, 1894.

INVERELL MUNICIPALITY.—BY-LAWS.

The following By-laws, made by the Council of the Municipal District of Inverell under the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

MUNICIPAL DISTRICT OF INVERELL.—NEW BY-LAWS.

1. That By-law No. 1 of the Municipal District of Inverell be repealed.

2. That the following By-law be substituted therefor:—

"The Council shall meet for the transaction of business on every alternate Monday at 8 p.m., unless the same fall on a public holiday, in which case the meeting shall be held at such other time as the Mayor may appoint."

Made and passed by the Municipal Council of the Municipal District of Inverell, on the fourth day of June, 1894.

HENRY PLUMLEY, Council Clerk.

(L.S.) WILLIAM WHITTINGHAM,
Mayor.

The seal of the Municipal District of Inverell has been affixed hereto, in the presence of,

HENRY PLUMLEY, Council Clerk.

WILLIAM WHITTINGHAM,
Mayor.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF CARRINGTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.Chief Secretary's Office,
Sydney, 16th July, 1894.**CARRINGTON MUNICIPALITY.—BY-LAWS.**

THE following By-laws, made by the Council of the Municipal District of Carrington under the provisions of the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

GEORGE R. DIBBS.

MUNICIPAL DISTRICT OF CARRINGTON.

REPEAL and substitution of a By-law for the regulation of Public Vehicles within the Municipality.

Part IX, under 31 Vic. No. 12, s. 153, and "Municipalities Act of 1867."

No. 17. The existing By-law 17 of this Part is hereby repealed, and the following substituted in its place: "Every vehicle licensed to carry passengers shall be provided with a lamp on each side of the same outside, and one lamp inside; and the driver of the same shall, whilst in any public place or street within the Municipality, light and keep lighted such lamps between sunset and sunrise."

ADDITIONAL BY-LAW.—PART IV.

Notices, Streets and Public Places, Public Health and Decency, &c.

No. 43. Every waggon, wain, cart, dray, bicycle, tricycle, carriage, or vehicle of any kind shall, whilst in any public place or street within the Municipality between sunset and sunrise, be provided with at least one lamp; and the driver of such waggon, wain, cart, dray, bicycle, tricycle, carriage, or vehicle shall provide, light, and keep lighted such lamp between sunset and sunrise.

Made and passed by the Council of the Municipal District of Carrington, this eighteenth day of May, one thousand eight hundred and ninety-four.

JOHN T. MEEK,
Council Clerk.

(L.S.) GEORGE BUTTS,
Mayor.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF GRAFTON—AMENDED BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.Chief Secretary's Office,
Sydney, 31st July, 1894.**GRAFTON MUNICIPALITY.—AMENDMENT TO SCHEDULE D OF BY-LAWS.**

THE following amendment to Schedule D of Part XV of the By-laws made by the Council of the Borough of Grafton, and notified in a Supplementary Gazette of the 21st January, 1885, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the "Municipalities Act of 1867."

GEORGE R. DIBBS.

AMENDMENT TO THE GRAFTON BOROUGH COUNCIL'S BY-LAWS.

THAT Schedule D of By-law Part XV of this Council, made the 10th day of September, 1884 and approved and confirmed by the Executive Council on the 21st January, 1885, and published in the Government Gazette, No. 32, of date 21st January 1885, be repealed, and the undermentioned new Schedule be substituted in lieu thereof:—

SCHEDULE D.*Rates and Fares to be Charged by Conductors of Passenger Vehicles.*

Any cab, car, or any other passenger-carrying vehicle with two wheels and drawn by one horse, and carrying two persons from the stand or place of hire to any other place within the limits of the Borough of Grafton, not crossing the Clarence River, if engaged by one person, one shilling, if two persons, six pence each.

Any omnibus, coach, car, or other passenger-carrying vehicle with four wheels and drawn by more than one horse, and carrying any number of persons, as specified in its license, from the stand or place of hire to any other place within the limits of the Borough of Grafton, but not crossing the Clarence River, each adult passenger six pence, each child under fourteen years, three pence.

That the fares from 8 p.m. until 10 p.m. be increased 50 per cent., from 10 p.m. to 6 a.m. they be doubled.

Made and passed by the Council of the Borough of Grafton, this 27th day of September, 1893.

(L.S.) FRANK NORRIE,
Mayor.

(SECOND SESSION.)

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF NEWCASTLE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.

Chief Secretary's Office,
Sydney, 23rd August, 1894.

NEWCASTLE MUNICIPALITY—BY-LAWS.

THE following By-laws made by the Council of the Borough of Newcastle, under the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

Destruction of noxious weeds.

Any owner, lessee, or occupier of land within the Municipality of Newcastle who shall permit or suffer to grow or remain on the said lands the Bathurst Burr or Scotch Thistle, or other noxious weeds detrimental to good husbandry, and who shall neglect or refuse to extirpate, remove, or destroy the same within seven days after receiving notice in writing from the Inspector of Nuisances so to do, shall, for every such offence forfeit and pay a penalty of not less than ten shillings nor more than ten pounds, and a further penalty of ten shillings for each and every week the offence is continued: Provided that no such penalty shall exceed twenty pounds.

Loitering or obstructing streets.

The Council of the Borough of Newcastle do, by virtue of the authority vested in them by the "Municipalities Act of 1867," hereby repeal By-law No. 1, published in the Government Gazette of 27th August, 1881, and make and establish the following By-law which shall stand instead of the aforesaid No. 1 By-law so repealed:—

Any person or persons who shall stand or remain upon any footway or carriage way or other public place in the Borough, to the inconvenience of passers by, or who shall obstruct the free passage of any footway, carriage way, or other public place, or who shall in any way interrupt, or cause to be interrupted, the traffic in or upon any footway, carriage way, or other public place, shall immediately discontinue to do so on being requested by any officer or servant of the Council or any police officer.

Any person offending against the provisions of this By-law shall, upon conviction, forfeit and pay for the first offence a sum not exceeding two pounds, for a second or subsequent offence a sum not exceeding ten pounds nor less than two pounds.

REGULATION AND MANAGEMENT OF CORPORATION BATHS,
NEWCOMEN-STREET.

Additional Schedule for the purpose of carrying into effect the By-laws relating to the Corporation Baths, gazetted 16th January, 1888.

Monthly Tickets.

The Schedule of the By-laws for the regulation and management of the Corporation Baths, Newcomen-street, gazetted 16th January, 1888, is hereby amended by the addition of the following words:—

That all *bona fide* members of swimming clubs of not less than twenty members be allowed monthly bathing tickets at the following Schedule of prices:—

	s.	d.
Single monthly ticket, with towel, for youth under fourteen years of age (not transferable)	2	6
Single monthly ticket, with towel, for girls under fourteen years of age (not transferable)	1	0
Single monthly ticket, with towel, for gentlemen (not transferable)	3	6
Single monthly ticket, with towel, for ladies (not transferable)	1	6

Made and passed by the Council of the Borough of Newcastle, this twenty-fifth day of June, in the year of our Lord one thousand eight hundred and ninety-four.

(L.S.) ALFRED ASHER,
Mayor.

EDWARD S. HOLLAND,
Town Clerk.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF NEWCASTLE—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.Chief Secretary's Office,
Sydney, 23rd August, 1894.**NEWCASTLE MUNICIPALITY.—BY-LAW.**

THE following By-law, made by the Council of the Borough of Newcastle, under the "Municipalities Act of 1867," relating to bathing, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

BOROUGH OF NEWCASTLE.—BY-LAW.

THAT By-law 35, made and passed by the Council of the Borough of Newcastle, on the 16th day of December, 1878, gazetted 18th February, 1879, be repealed, and the following By-law, made in substitution thereof, declared to stand for and in the place of the said 35th By-law which is hereby repealed.

Bathing at the Beach.

"It shall be lawful for all persons, whether male or female, to bathe in the sea at all times and at all hours of the day at those parts or portions of the sea beach within the municipality duly set apart and defined as male and female places. Provided such persons desirous of bathing, being male or female, shall be clothed or covered from the neck and shoulders to the knees with a suitable bathing dress or costume to prevent exposure or indecency; such clothing or covering shall be approved of by the Council or other persons employed by the Council as caretaker or caretakers. That portion or part of the beach set apart for females or young children shall not be encroached or trespassed upon by any male or males above the age of seven years, nor shall the part or portion of the beach set apart for males be encroached or trespassed upon by any female or females. Any person infringing the provisions of this By-law shall be liable on conviction to a penalty not exceeding one pound nor less than one shilling."

Made and passed by the Council of the Borough of Newcastle, this eleventh day of December, in the year of our Lord one thousand eight hundred and ninety-three.

EDWARD S. HOLLAND, Town Clerk.

(L.S.) AUGUSTUS F. MOORE,
Mayor.

(BOROUGH OF MUDGEES—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.Chief Secretary's Office,
Sydney, 26th July, 1894.**MUDGEES MUNICIPALITY.—BY-LAW.**

THE following By-law, made by the Council of the Borough of Mudgees under the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the above-cited Act.

GEORGE R. DIBBS.

BY-LAW to prevent persons loitering in the streets.

ALL persons standing or loitering upon any of the footpaths or public thoroughfares in the Municipality to the inconvenience of the passers by, or in any way interrupting the traffic, shall discontinue to do so on being requested by the Inspector of Nuisances, any police officer, or other officer appointed by the Council. Any person offending against the provisions of this By-law shall for such offence upon conviction forfeit and pay a penalty or sum not exceeding one pound nor less than five shillings.

Made and passed by the Council of the Borough of Mudgees on 30th May, 1894.

(L.S.) JOHN M'FARLANE,
Mayor.

THOMAS J. LOVEJOY,
Council Clerk.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF MULGOA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.Chief Secretary's Office,
Sydney, 11th October, 1894.

MULGOA MUNICIPALITY BY-LAWS.

The following By-laws, made by the Council of the Municipal District of Mulgoa, under the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

BY-LAWS OF THE MUNICIPALITY OF MULGOA.

BY-LAWS for regulating the proceedings of the Council of the Municipality of Mulgoa, and the duties of the officers and servants of such Council; for preserving order at the meetings of such Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for suppressing nuisances; for preventing or regulating and licensing exhibitions held or kept for hire or profit; also bowling alleys and other places of amusement; for compelling residents to keep their premises free from offensive or unwholesome matters; for opening new public roads, ways, and parks; for aligning and cleansing roads and streets; for regulating the supply and distribution of water, sewerage, and drainage; for preserving trees and shrubs, &c.; for regulating free libraries; for preventing or regulating the bathing or the washing the person in any public water or other water near a public thoroughfare; for preserving public decency; for providing for the health of the Municipality, and also against the spreading of contagious or infectious diseases; for the restraining of noisome or offensive trades, occupations, or actions; and for generally in all, any and every way maintaining the good rule and government of the said Municipality.

PART I.

Proceedings of the Council and Committees.—Preservation of Order at Council Meetings.—Duties of Officers and Servants, &c.

Meetings of the Council. Ordinary meetings.

1. Unless otherwise ordered the Council shall meet for the despatch of business at the hour of 7.30 p.m. on every first Monday (*i.e.* once in every month), unless such Monday shall happen to be a public holiday, in which case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor.—Adjournment for want of quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of thirty minutes (say 30 minutes) after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for

such meeting. Whenever there shall be an adjournment of any meeting for want of a quorum, the names of the members present shall be recorded in the Minute-book.

Order of Business.

Business of ordinary meeting.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Correspondence to be read, and if necessary dealt with.
3. Petitions (if any) to be presented and dealt with.
4. Statement of accounts, showing moneys received and paid since last meeting, with the balance in the bank to the credit or otherwise of the Municipality.
5. Reports from Committees and minutes from the Mayor to be dealt with.
6. Questions with notice, and also without notice if on matters of which the Council has cognisance; but notice must be given in every case where detailed reference to books is necessary.
7. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
8. Orders of the day to be disposed of as they stand on the business paper.
9. Tenders to be opened and dealt with.

Business at special meetings.

4. At special meetings of the Council the business, after the minutes shall have been read and confirmed, which shall be done in the same manner as at any ordinary meeting, shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting—how prepared

5. The business paper for every meeting of the Council other than a special meeting, shall be made up by the Council Clerk, not less than twenty-four hours (say 24 hours) nor more than three days (say 3 days) before the day appointed for such

meeting. He shall enter on such business paper a copy of the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received or shall have been required or directed so to enter, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 3 of this Part of these By-laws in the order in which such notice, requisition, or direction shall have been received.

Business paper for special meetings.

6. The business paper for a special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to members.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

How business paper is to be disposed of.

8. The business paper for each meeting of the Council shall, at such meeting, be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with; and such business paper so noted shall be a record of the Council.

Notices of motion, &c., to be numbered as received and preserved until matter disposed of, unless withdrawn before business paper made up

9. All notices of motion and all requisitions from Aldermen and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting, shall be duly signed by the sender and numbered by the Council Clerk as they are received; and each such notice, requisition, and direction shall be preserved by such clerk until after the matter to which it relates shall have been disposed of, and the record in the Minute-book of the manner in which such matter has been so disposed of shall have been duly verified, as required by section 3 of this Part of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk, shall be at liberty to withdraw the same at any time before the making up the business paper.

After business paper made up all notices, &c., to be the property of the Council.

10. After the business paper shall have been made up as aforesaid, all the said notices of motions, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and Amendments.

Motions—how to be moved.

11. Except by leave of the Council motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck out and considered to have lapsed.

Absence of proposed mover.

12. No motion of which notice shall have been entered on the business paper, shall, except as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

13. No motion in Council shall be discussed until it has been seconded.

Amendments may be moved.

14. When a motion shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed until it has been seconded.

Motions and amendments to be in writing.

15. No amendment shall be discussed until it has been reduced to writing.

Only one amendment at a time.

16. No second or subsequent amendment shall be discussed until the previous amendment or amendments shall have been disposed of.

Amended question.—Further amendment may be moved thereon.

17. If an amendment be carried the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

18. If any amendment either upon an original question or upon any amended question shall be negatived, a further amendment may be moved to the question to which such first-mentioned amendment was moved and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at one time.

Motions for adjournment.

19. No discussion shall be permitted on any motion for adjournment of the Council, and, if upon the question being put on any such motion, the same be negatived, the subject previously under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Orders of the Day.

Of what Orders of the Day shall consist.

20. The orders of the day shall consist of any matters other than motions on notice, which a Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

21. Section 19 of this "Part" of these By-laws shall be considered applicable to orders of the day. And the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid, by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he as so arranged.

Petitions.

Petitions to be respectfully worded.

22. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions how received.

23. All petitions shall be received only as petitions of the parties signing the same.

How petitions are to be dealt with.

24. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received, or that it be received and referred to one of the Permanent Committees hereinafter mentioned; or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall if otherwise unobjectionable be considered in order.

Correspondence.

Duties of Mayor as to correspondence.

25. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 22 of this "Part" of these By-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Reports from Committees.

26. All reports from Committees shall be legibly written and signed by the Chairman of such Committee, or in his absence by some other member of the Committee duly authorised by such Committee to sign in his behalf.

Mayor's Minutes.

27. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognisance by a minute in writing signed by himself.

How reports and minutes are to be dealt with.

28. No motion shall be permissible on the presentation of a report from a Committee or a minute from the Mayor except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided however that if any Alderman shall have given due notice of motion in reference to any such report or minute, or if any order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may be moved or considered in due course.

Questions and Statements.

Limitations as to questions and statements.

29. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this "Part" of these By-laws.

Notice to be given.

30. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and if necessary, for a reference to other persons or documents.

Answer not compulsory.

31. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

Questions to be put without argument, &c.

32. Every such question must be put categorically without any argument or statement of fact.

Similar provision as to statements.

33. Every such statement must be made without argument.

*Order of Debate.**Mode of addressing the Council, &c.*

34. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put any reply to any question, or shall make any other statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while doing so, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity) and shall address himself to the Mayor, or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner; but in every such case the question so put and the answer thereto shall be subject to objection on the ground of disorder or irrelevancy; and all members of the Council shall, on all occasions, when in such Council, address and speak to each other by their official designation, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted, if in order.

35. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Offensive language.

36. If any Alderman uses, whilst in Council, or in Committee, any offensive or insulting language, the words shall be written down, and he shall be asked to withdraw them. If he refuses to withdraw such language, and apologise, he shall be deemed guilty of misconduct, and be liable to a fine of not less than 20s. nor more than £5.

Limitation as to number of speeches, &c.

37. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion and to any amendment moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observations than may be necessary for the purpose of such explanation: Provided that no Alderman shall speak on any motion or amendment longer than ten minutes without the consent of the Council.

Mover and seconder.

38. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

39. No Alderman shall digress from the subject under discussion or shall make personal reflections on, nor impute improper motives to any other Alderman.

Adjournment of debate.

40. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to a pre-audience on the resumption of the debate.

Mayor to decide as to pre-audience.

41. If two or more Aldermen rise to speak at the same time the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Alderman may require questions to be stated, &c., under certain restrictions.

42. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matters which are readily accessible: Provided, however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion. Also, that if any such request or requisition shall appear to the Mayor or Chairman not to have been made bona fide it shall not be complied with.

Mayor or Chairman to have same rights and privileges re speaking, moving, &c., as any other Alderman.

43. The Mayor or Chairman, for the time being, shall have the same right as any other Alderman to speak once upon every subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing), but shall be still considered as presiding.

*Questions of Order.**Mayor or Chairman to decide points of order.*

44. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned, as in the manner hereinafter provided.

Acts of disorder.

45. Every member of the Council who shall commit a breach of any section of this "Part" of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be deemed out of order.

Mayor, &c., may call member to order.

46. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

Any member may raise questions of order.

47. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, agreement, argument, or observation, moved, used, or made by any other member which such first-named member may consider out of order.

Mode of proceeding thereon.

48. A member called to order shall withdraw while the question of order is being discussed and decided on, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission such member may explain, retract, or apologise for the matter or remark alleged to have been out of order. And if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member, on being called to order, shall ask such permission to explain, retract, or apologise, as aforesaid, the Mayor or Chairman may, of his own authority, grant or refuse such permission, as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of such Mayor or Chairman to take the sense of the Council at once, and without discussion, as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or, if required to do so, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with: Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened. And, provided further, that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order, after the same shall have been discussed.

Decision of points of order.

49. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice, which he shall deem applicable to the case, without discussing or commenting on the same.

Motions out of order to be rejected.—Members to explain, retract, or apologise, &c.

50. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected; and whenever anything said or done in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction, or apology, as the case may require.

Penalties for persisting in disorderly conduct.

51. Any member of the Council who shall have been called to order, and who, after having been twice directed to withdraw as aforesaid, shall refuse to do so, or who shall persist in any line of conduct or argument, or of observations which

shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction, or apology, as aforesaid, when required to do so, or who shall be guilty of any other act of disorder, as defined in section 46 of this "Part" of these By-laws and shall refuse to make such explanation, retraction, or apology as a majority of the Aldermen there present shall consider satisfactory; shall be liable on conviction, to a penalty of not less than ten shillings nor more than five pounds.

Power of Council as to altering Rules on points of order.

52. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice, may, by motion on notice respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar question of order or of practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties, unless and until it be rescinded, but shall have no retrospective operation.

Mode of Voting.

How questions are to be put.

53. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Division.—Penalty for refusing to vote.

54. Any Alderman shall be at liberty to call for a division; in such case the question shall be put first in the affirmative and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Aldermen who shall be present when a division is called for, and shall not vote on such division, not being disabled by law from so voting, shall be liable to a penalty of not less than ten shillings nor more than five pounds.

Protests.

Mode of protesting.—Protest to be recorded, but may, under certain circumstances, be expunged.

55. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council; notice of the intention so to protest must, however, be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the Minute-book, but if, in the opinion of the Council, it be inconsistent with the truth, or disrespectfully worded, it may (by resolution on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin, to the resolution ordering such expunction.

Committees of the whole Council.

Business in Committee.

56. The business Committees of the whole Council shall be conducted in accordance with the rules hereinbefore provided for meetings of the Council as nearly as the same shall apply, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

Disorderly conduct in Committee.—Refusal to vote.

57. Whenever any member of the Council shall, while the Council is in Committee of the Whole, be considered guilty of an offence against good order within the meaning of section 46 of this "Part" of these By-laws, it shall be competent to any Alderman to move that the Council resume its sitting, and that such matters be reported; and if such motion be carried such matter shall be reported accordingly, and an entry of such report shall be made in the Minute-book; and whenever any Alderman shall have failed to vote on any such occasion in Committee of the whole Council, as required by section 55 of this "Part" of these By-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the Minute-book: Provided that in the case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary, but it shall be the duty of the Chairman of such Committee of the Whole, in making his report of the proceedings in such Committee, whenever such report may be made, to include in such report a statement of such failure to vote aforesaid, and of the question as to which such Alderman has so failed to vote.

Decisions in Committee on points of orders may be reported.

58. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council, under the provisions of section 45 of this "Part" of these By-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried such decision shall be so embodied in such report whenever the same shall be made.

How progress may be reported, &c.

59. Any Alderman may at any time during the sitting of a Committee of the whole Council move that the Chairman report progress (or no progress, as the case may be), and that leave be asked to sit again at a later period of the same day, or on some other day, or that no leave be asked to sit again; and if such motion be carried the Council shall resume it sitting and a report shall be made accordingly; but no discussion shall be permitted on any such motion, and if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

Reports proceeding in Committee.—Want of quorum in Committee.

60. All reports of proceedings in Committee of the whole Council shall be made to the Council *viva voce* by the Chairman of such Committee, and a report of such proceedings shall be made in every case except when it shall be found on counting the number of members during the sitting of any Committee, that there is not a quorum present. In the latter case the sitting of the Council shall be resumed without any motion for that purpose and the proceedings in Committee shall be considered to have lapsed: Provided that in making any such report as aforesaid, it shall not be necessary to report any such proceedings in extenso, but only to state the result, general effect, or substance of such proceedings.

How reports are dealt with.

61. All such reports of proceedings in Committee of the whole Council shall be reported in the Minute-book; but except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application as aforesaid for leave to sit again be considered to have been granted by such Council, until a motion shall have been made and passed for such adoption, or for the granting of such leave. And every such motion for the adoption of a report or for granting of leave as aforesaid, and the order of debate on such motion, shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions: Provided, however, that where a report shall have been made under section 58 of this "Part" of these By-laws of disorderly conduct in Committee; or under section 55 of this "Part" of these By-laws, of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof; and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.

How calls may be ordered.

62. A call of the Council may be ordered by any resolution of which due notice has been given for the consideration of any motion or matter of business before such Council.

Such call compulsory in certain cases.

63. There shall, without any special order to that effect, be a call of the Council for the consideration of every motion for the rescission of any resolution or decision of such Council.

Mode of proceeding.

64. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section shall be moved or considered, such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called, and if any members are absent, a record shall be made of such absence; but if leave of absence to any such member shall have been previously granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence without legal excuse.—Further call when question adjourned.

65. Any member of the Council, who having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that by reason of extreme illness or any other sufficient cause he has been unable to send an excuse in writing as aforesaid, or who having answered to his name as aforesaid, shall not be present when a vote is taken on the business or motion as to which such call has been made aforesaid, shall for every such offence be liable to a penalty of not less than 10s. nor more than £5: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration; and the provisions herein as to penalties for absence shall have reference to such further call. And if there shall be more than one adjournment this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

*Standing and Special Committees.**Standing Committees.*

66. Besides any special Committees as may from time to time be found necessary, for, say, improvement, lighting, water, hall, library, general purposes, or for any and every other purpose as required, there shall be three standing Committees, viz.: A By-law Committee, a Committee of Works, and a Finance Committee, each consisting of not less than three members. These Committees shall be reappointed every year at the first meeting of the Council which shall be holden after the election of the Mayor.

Works Committee.

67. The Committee for Works shall have the general direction of all works ordered and sanctioned by the Council and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire into and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

Finance Committee.

68. The Finance Committee shall examine and check all accounts and shall watch generally over the collection and expenditure of the municipal revenue. They shall inquire and report from time to time as to all matters which they may consider to affect or to be likely to affect, the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Special Committees.

69. The special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a special Committee ought to be appointed; and no standing Committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such special Committee. The appointment of every such special Committee shall be made by resolution, after due notice, and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such special Committee. The mover of any such resolution may name therein such member as in his opinion ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot.

Chairman of Committees.

70. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, within seven days after their appointment.

Committee meeting, how called.

71. The Council Clerk shall call a meeting when requested so to do by the Chairman, or any two members of such Committee by giving 24 hours' notice, except in case of emergency, or the Chairman may call a meeting by giving 24 hours' notice.

Record of transactions in Committee.

72. The chairman of each standing Committee shall make or cause to be made, in a book to be kept by him for that purpose, memoranda of all transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

Expenditure.

Except in emergent matters cost of all work to be estimated before undertaken.—Tenders.

73. Whenever it is decided that any work shall be executed or material supplied by contract, tenders for the execution of such work or the supply of such material shall be called for by public notice as hereinafter provided. Each tender must be accompanied by an undertaking from two approved persons who are willing to become sureties for the due performance of the work by the person tendering. The Council shall not be bound to accept any tender, but in all cases the preference shall be given to the lowest tender if the price and sureties be approved of.

74. With the exception of emergent matters hereinafter provided, no work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been first ascertained by the Council, and the expediency of such work reported upon by the Works Committee.

Emergent matters and necessary current expenses.—Expenses authorised to be reported.—Outlay to be in accordance with orders of the Council.

75. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

1. By order of the Committee for Works, or of the Mayor and one member of such Committee, for repairs or emergent work to the extent of seven pounds.
2. By order of the Mayor, for necessary current expenses, to the extent of five pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting; such reports to be signed by the Chairman of the Committee of Works, or the Mayor, as the case may be by whom such outlay shall have been authorised. Also, that such outlay shall be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council, and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be authorised.

All claims to be examined and reported upon by Finance Committee.

76. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificate required with each claim.

77. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorised or inquired into.

Common Seal and Records of the Council.

Common seal and press—how secured, care of same.

78. The common seal and the press to which the same is attached shall be secured by a cover or box which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock or cover of this box, of which keys one shall be kept by the Mayor and the other by the Council Clerk. Such common seal and press shall be in the custody and the care of the Council Clerk.

When and how Common Seal to be used.

79. The common seal shall not be attached to any document without an express order of the Council. In such case when such common seal has been ordered to be attached to any document such document shall also be signed by the Mayor, or, in case of the absence or illness of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account are to be kept and inspected.

80. The Treasurer shall keep such books of account and such records, statements, and memoranda of receipts and expenditure, and in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda from time to time to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same; also, to report to the Council from time to time any changes which such Committee may think advisable in the mode of keeping the accounts.

Impression of seal not to be taken, &c., without leave of Council—penalties.

81. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same, without leave from such Council except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable on conviction, for the first offence to a penalty of not less than five shillings nor more than two pounds; for a second offence to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence to a penalty of not less than five pounds nor more than twenty-five pounds.

Records not to be removed, &c.—penalties.

82. Any person removing any such book or other record of the Council as aforesaid from the Council Chamber, or the place where by direction of the Council such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal, as hereinafter provided, shall for every such offence, be liable to a penalty of not less than ten shillings or more than ten pounds.

Penalty for defacing or destroying record.

83. Any person destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than five pounds nor more than fifty pounds.

*Officers and Servants.**Bonds for good conduct of Officers.*

84. In cases where security is required by clause 151 of the Municipalities Act of 1867, no sureties shall be accepted otherwise than by a vote of the Council; and it shall not be competent for the Council to accept as sureties any of its own members, nor any person holding office in the Council.

Duties of Council Clerk.

85. The Council Clerk, in compliance with the Municipalities Act of 1867, or by the present or any other By-laws made thereunder, shall perform the following duties, viz. :—

1. Attend all Council meetings.
2. Attend all Courts of Revision and Appeal.
3. Summon the members of the Council to all Council meetings.
4. Conduct all correspondence ordered by the Council or under the direction of the Mayor, and give all other officers instructions as directed by the minutes.
5. To see that the accounts are audited and the balance sheet duly submitted twice a year within the time specified by law.
6. To see to the gazetting of all By-laws and necessary advertisements.
7. To see that assessment books and the Municipal lists and rolls are duly prepared, examine proofs of latter, and arrange for distribution of copies, on payment, to electors prior to the elections.
8. Make all necessary arrangements for the elections, preparing all papers, &c., for presiding officers and poll clerks.
9. Prepare all bonds of officers, see that the guarantees are given, and agreement duly signed, &c., and report same to the Council.
10. Advise with the officers from time to time as to their duties, and the mode of carrying them out.
11. See that all levels and names of streets have been duly advertised, as provided by law, and authenticated by the Mayor's signature.
12. To bring under notice of the Mayor any matter or thing requiring his prompt attention.
13. He shall likewise have charge of all the records of the Council, except such books or documents as may be entrusted to any other officer of the Council; and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council.
14. Prepare and lay before the Council a statement of all works passed by the Council and not completed, setting forth in order the dates of votes for the same, together with the amount of such votes and the sum expended, when required so to do.
15. He shall enter into a guarantee society's security, or such other security as the Council may think sufficient, for an amount fixed by the Council from time to time, for not less than £300, for the faithful performance of his duties.

Special powers of the Mayor.

86. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparations of any return or statement, or the giving of any explanation or information by any such officer or servant in connection with his duties as he may think necessary.

How complaints against officers, &c., are to be dealt with.

87. All complaints against officers or servants of the Corporation must be written and addressed to the Mayor, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints as aforesaid shall be laid by the Mayor before the Council at the next meeting thereof, which shall be holden after the Mayor shall have received the same, and shall be duly recorded.

Miscellaneous.**Notices.**

88. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation of the Council, or any Committee thereof, or by the Mayor or any officer of the Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days.

Leave of absence.

89. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

Motion of rescission of previous orders, &c.

90. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage, after due notice, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

Lapsed business.

91. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council, after due notice, and such consideration shall, in such case, be resumed at the point where it was interrupted aforesaid.

Motions not carried.

92. No motion which shall be brought on before the said Council, seconded and not carried, or that shall find no seconder, and hence shall not be seconded and discussed, shall be again brought before the Council for the space of three calendar months.

Suits and prosecutions for penalties, &c.

93. Such suits or informations for the enforcement of penalties, or in respect of breach of the Municipalities Act of 1867, or of any By-law made thereunder, or any statute, the operation of which may have been extended to the Municipality, as may have been directed by the Council, or by the By-law Committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows:—When against a member of the Council or an auditor, or any officer of the Corporation—by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council or the By-law Committee or the Mayor, as the case may be, on directing such suit or information as aforesaid; and no suit shall be brought, or information laid as aforesaid against any member of the Council, or auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of such Council, or of the Mayor, nor against any other person, except upon the order of the Council, or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid, except on an express resolution of the Council, in any case where the bringing of such suit, or the laying of such information will be adverse to any previous direction by such Council, or where, on the trial of hearing of any such suit or information, the same shall have been dismissed on the merits: Provided that in any case the conduct or prosecution of any suit or information may, on the order of the Council, be entrusted to an attorney.

Mode of proceeding in cases not provided for.

94. In all cases not herein provided for resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

Power to suspend temporarily certain portions of these By-laws.

95. Any of the foregoing By-laws, or any portion thereof, which relates to or affects the proceedings at meetings of the Council may be suspended pro tempore without notice in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

PART II.**Collection and enforcement of Rates—Times and modes of collection.****Rates under section 164 to be collected half yearly.**

96. All rates levied or imposed by the Council under the provisions of the Municipalities Act of 1867, and its amendments, may be collected by half-yearly instalments. Each such instalment shall as to every such rate and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making and imposing such rate.

Special rates.

97. All special rates levied or imposed by the Council under the Municipalities Act of 1867, and its amendments, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may by resolution, at the time of making or imposing such rates, or any of them, have appointed.

Office hours.

98. All rates shall be paid at the office of the Council Clerk, and during the hours appointed by the said Council for that purpose.

Defaulters.

99. Every person not paying his or her rates as aforesaid within the time prescribed for payment thereof the same shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor, from time to time with a list of the names of persons so in default.

Mayor to enforce payment.

100. It shall be the duty of the Mayor to take proceedings to enforce payment of all rates in default either by action at law or by issuing warrants of distraint upon goods and chattels of the defaulter.

Enforcement by distress.

Bailiff.

101. A Bailiff shall, when found necessary, be appointed by the Mayor; and the said Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of twenty-five pounds each, for the faithful performance of his duties; and it shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in a manner hereinafter provided.

Warrant of distress.

102. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor, or any Alderman who may for the time being be duly authorised to perform the duties of that office.

Distress and sale.

103. If the sum for which any such distress shall have been made shall not be paid, with costs, as hereinafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Municipality as the Bailiff may think proper to remove them for such purpose; and shall pay over the surplus (if any) that may remain, after deducting the amount of the sum distrained for, and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

Inventory.

104. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made, and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the ratepayer on demand, at any time within one month after making such distress.

Goods may be impounded.

105. The Bailiff on making a distress as aforesaid, may impound or otherwise seize the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for the purpose; and it shall be lawful for any person whomsoever, after the expiration of five days, as hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid in order to view and buy, and in order to carry off and remove the same, on account of the purchaser thereof.

Owner to direct order of sale.

106. The owner of any goods or chattels so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction: Provided that such option shall be exercised only in a reasonable manner, and in no way that can be construed as constructively obstructive.

Proceeds of distress.

107. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

108. There shall be payable to the Bailiff for the use of the Council, for every levy and distress made under this By-law, the costs and charges as per Schedule C, hereunto annexed.

SCHEDULE A.

Warrant of distress.

I, _____ Mayor of the Municipal District of Mulgoa, do hereby authorise you _____ the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of _____ situate at _____ for _____ being the amount of rates due to the said Municipality of Mulgoa, to the day of _____ for the said dwelling-house (or land or premises as the case may be), and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____, 189 _____

Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Municipality of Mulgoa of _____, dated _____, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate at _____, within the said Municipality, to the day of _____

Bailiff.

Dated this _____ day of _____, 18 _____

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy where the sum is not more than twenty pounds	2	0
Above that sum in addition for every pound	0	1
For making and furnishing copy of inventory	2	0
For man in possession, each day or part of a day	5	0
For sale commission, and delivery of goods, per pound on proceeds of the sale	1	0

PART III.

Fire or combustible materials, &c.

Preventing and extinguishing fires.

109. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or explosives of any description, combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for any such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove any and all such fire, gunpowder, combustible, inflammable, or explosive materials. And every such person who shall suffer any such aforesaid materials to remain as aforesaid for forty-eight hours after conviction, or after having received notice to remove same into a proper place of safety, shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

110. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or any other produce, or place as or for the covering of any such stack, any inflammable material so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds, and also shall remove such fence, stack, or covering forthwith. And any person failing to remove such fence, stack, or covering forthwith, after such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wilfully setting fire to chimneys.

111. Every person who wilfully sets, or causes to be set on fire, any chimney, flue, smoke-vent, or stove-pipe, herein called in common a "chimney," shall forfeit and pay a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any Criminal Court of such Act as for an indictable offence.

Negligently suffering chimney to be on fire.

112. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimney is situated shall forfeit and pay a sum not exceeding forty shillings: Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard, that such fire was in nowise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servant.

Setting fire to matter without notice.

113. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air within five yards of any dwelling-house or other building or boundary or dividing fence within the said Municipality, without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be, of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall for every such offence forfeit and pay a sum not exceeding five pounds.

PART IV.

Streets and public places—Public health and decency, &c.

Drafts of intended By-laws.

114. A draft of every intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same; and public notice shall be given as hereinbefore provided that such draft is so lying for inspection.

New roads to be reported on.

115. No new public road, street, way, park, or other place, proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, park, or other place shall have been formed by the proprietor or proprietors to the satisfaction of the Committee of Works, or to that of any duly authorised officer, or until such road, street, way, park, or other place shall have been duly examined and reported upon to the Council by such Committee or duly authorised officer, and a plan furnished by the proprietor or proprietors.

Dedication of new roads, &c.

116. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan and plans as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road or other place as aforesaid to public use or recreation as aforesaid as may be considered necessary by the Council in whole at any general meeting; and such further instrument of dedication shall also be preserved as a record of the Council.

Change of street levels.

117. Whenever it may be deemed necessary to alter the levels of any such public road, street, or way as aforesaid, the Committee for Works shall cause a plan and section showing the proposed alterations to be exhibited at the Council Chambers for fourteen days, for the information and inspection of rate-payers, and shall notify, by advertisement in some paper circulating in the Municipality, that such plan is open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk. And such plan and section so signed and countersigned shall be a record of the Council.

Roads and streets and encroachments thereon, &c.

118. The Committee for Works, or the surveyor of the Municipality, or other officer or person duly authorised by the Council in that behalf, shall be the proper officer for marking out, and shall fix, mark, and lay out the levels of all public roads, streets, lanes, and thoroughfares, and the carriage and foot ways thereof, which now are or shall hereafter be under or subject to the control, construction, care, or management of the Council. In marking out such roads, streets, lanes, and thoroughfares, recourse shall be had when practicable to the plans under which the land with frontage to the road, street, lane, or thoroughfare in question, shall have been sold or let. And it shall be the duty of such Committee for Works, or surveyor, or other officer to place posts at the corners or intersections of such streets, roads, lanes, or thoroughfares whenever the same may be deemed necessary or desirable by the Council, so as to give a width of 42 feet for the carriage-way and 12 feet for the footway on each side, where the road, street, lane, or thoroughfare shall be 66 feet wide, and in proportion, and in the discretion of the Council in any such road, street, lane, or thoroughfare, or other public place of other width than 66 feet wide: Provided that there be no change of level in any such public road, street, lane, or thoroughfare or public place until the same shall have been submitted to and adopted by the Council as hereinafter provided. This By-law shall be read subject to all respects to "The Width of Streets and Lanes Act of 1881 (45 Vic. No. 28)."

Pipes, gutters, &c.

119. It shall not be lawful for any person to allow any water to flow from off the roof of any house, veranda, or any other part of the premises, nor to carry by means of pipes, gutters, or other contrivances any rain water from the roof of his or her premises or house upon any of the footways of any street or public place within the said Municipality, and any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances when required to do so by any officer of the said Council, shall on conviction forfeit and pay any sum not exceeding two pounds nor less than five shillings: Provided that the owner or occupier of any such premises or house may convey any such rain water by means of pipes laid under the surface of any such footways into the gutter adjoining the same, subject to the approval of the Committee for Works or other duly authorised officer.

Hoards and fences to be erected.

120. Every person intending to build or take down any building within the limits of the Municipality, or to cause the same to be so done, or to alter or repair the outward part of any such building, or to cause the same to be so done, where any street or footway will be obstructed or rendered inconvenient by means of such work, shall before beginning the same cause sufficient hoards or fences to be put up in order to separate the building where such works are being carried on from the street with a convenient platform and handrail, if there be room enough to leave a footway outside of such hoard or fence, and shall continue such hoard or fence with such plat-

form and handrail as aforesaid standing in good condition, to the satisfaction of the officer of the Council of the said Municipality appointed to look after such things, during the whole continuance of such works, and during such time as the public safety or convenience requires, and shall in all cases in which it is necessary, in order to prevent accidents, cause the same to be sufficiently lighted from sunset to sunrise; and any such person who shall fail to put up such fence or hoard, or platform with such handrail as aforesaid, or continue the same respectively standing in good condition as aforesaid during the period of such building or taking down, or who shall not, while the said hoard or fence is standing, or any part of same, keep the same sufficiently lighted from sunset to sunrise, or who shall not remove the same when directed by the officer aforesaid, within a reasonable time afterwards, shall for every such offence be liable to a penalty not exceeding forty shillings for every day such default is continued.

No turf, gravel, &c., to be removed from streets without permission.

121. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone or other material in or from any part of the carriage or foot way of any street or other public place within the said Municipality without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Holes to be enclosed.

122. Any person or persons who shall dig or make or cause to be dug or made any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Municipality, for the purpose of making any vault or vaults, foundation for or to any house or any other building, or for any other purpose whatsoever, or shall erect or pull down any building and shall not first enclose the same and keep the same enclosed in a good and efficient manner to the satisfaction of the Committee for Works of the said Municipality, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights on each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

Temporary stoppage of traffic for repairs.

123. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Stops, night-soil, &c., to be conveyed away only at certain hours.

124. Any person or persons who shall drive, or cause to be driven, any cart or other carriage with any night-soil or ammoniacal liquor therein, through or in any street or public place within the said Municipality, between the hours of 5 o'clock in the morning and 10 o'clock at night, or shall fill any cart or other carriage, vehicle, or vessel so as to turn over or cast any night-soil, ammoniacal liquor, slop, mire, or channel dirt, or filth in or upon any such street or public place, or shall deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house than shall be directed by the said Council, or by the Inspector of Nuisances; or shall remove night-soil or other offensive matter otherwise than in properly covered and water-tight carts or other vehicles or vessel; or shall cause or allow any vehicle, &c., as aforesaid used for this purpose to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council or the said Inspector of Nuisances, shall for every such offence forfeit and pay any sum not exceeding five pounds, nor less than one pound.

Vehicles carrying lights.

125. All vehicles, of whatever description, shall carry at least one light, within the hours of 5 p.m. and 12 p.m. from the 1st day of May to the 1st day of September; and 7.30 p.m. to 12 p.m. from the 1st day of September to the 1st day of May: Provided, however, that such light need not be carried during moonlight nights. Under a penalty for the first offence of not more than twenty shillings; and for the second and subsequent offences not more than forty shillings.

Planting trees, &c., in the streets, or other public places, damaging same, &c.

126. The Council is hereby empowered to plant trees, shrubs, or plants in the streets or any other public part of the said Municipality and any person who shall wilfully, or without the authority of the Council, cut, break, bark, root up or otherwise damage or destroy the whole or any part of any sapling,

plant, or underwood growing in or upon any street or place which is or may be under the direct or indirect control or management of the said Council, shall forfeit and pay any sum not exceeding £10 nor less than £1 as well as the cost of the article destroyed or damaged as aforesaid.

Blasting Rock.

No rock, &c., to be blasted without notice to the Council Clerk.

127. Any person who shall be desirous of blasting any rock or other material within one hundred yards of any street or public place, or dwelling-house in the said Municipality, shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rocks within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall on conviction forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds for the first offence besides the cost of all damage accruing or resulting, if any.

Dead animals—mode of removal.

128. If any animal shall die in any part of the said Municipality, and the owner of such animal, or the occupier of the place, if private property where such animal shall have died, shall not cause such animal to be immediately destroyed by fire, or so effectually removed, or disposed of that no nuisance can possibly result therefrom in any part of the said Municipality, he shall for every such offence forfeit and pay any sum not exceeding five pounds.

Complaints respecting dirty premises, &c.

129. Upon the complaint of any householder that the house, premises, closets or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other officer appointed by the said Council, shall make an inspection of the premises complained of, and the officer of the said Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose, and any person who shall personally, or by any person in his employment or under his control, suffer any waste or stagnant water or any muck, filth, soil, or other offensive matter to flow, or remain, or to be in any cellar or place within any dwelling-house or premises within the said Municipality, or shall in like manner suffer the contents of any water closet, privy, or cesspool or pit, to overflow or soak therefrom shall, for every such offence, forfeit and pay a sum not exceeding five pounds.

Premises in state to endanger public health.

Houses to be purified on certificate of two medical practitioners.

130. If, upon the certificate of any two duly qualified medical practitioners, it appear to the Council that any house, or part thereof, or the premises occupied in connection therewith, within the said Municipality, is or are in such a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same, as the case may require; and if the person to whom the notice is so given shall fail to comply therewith, within such time as shall be specified in the said notice, he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default: Provided that no such penalties shall collectively amount to any greater sum than twenty pounds.

Noisome and offensive trades.

No noisome or offensive trades to be carried on to the injury of the inhabitants.

131. No person shall carry on any noisome or offensive trade within the said Municipality so as to injure or to be a nuisance, as hereinafter stated, to the inhabitants thereof.

Definition of noisome and offensive trades.

132. Any manufacture, trade, calling, or operation in the conducting, following, or carrying on of which, or in consequence of, or in connection wherewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, or smoke shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Municipality, shall be considered a noisome and offensive trade within the meaning of these By-laws.

Complaint.—Inquire and report.—Order of Council thereon.—Notice to discontinue, &c.—Penalty.

133. If any noisome or offensive trade, manufacture, calling, or operation is being so followed, conducted, or carried on in such manner that injury to health results therefrom, and such

becomes a public nuisance in any part of the said Municipality, it shall be competent for any fifteen or more ratepayers residing in the vicinity of the alleged nuisance, noisome or offensive trade, manufacture, calling, or operation, by petition presented through an Alderman, to acquaint the said Council thereof, and the Inspector of Nuisances, or any other person or persons appointed by the said Council after the said petition shall have been formally received, shall make an inspection of the premises where such trade, manufacture, calling, or operation is alleged to be so conducted, followed, or carried on, and of the premises or properties of the said fifteen or more petitioners, and shall inquire into the grounds for such petition or complaint, and shall report thereon to the said Council. And if the said Council shall, on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, and that the manufacture, trade, calling, or operation so complained of, and so being conducted, followed, or carried on as aforesaid, is a noisome and offensive trade, manufacture, calling, or operation within the meaning of these By-laws, notice shall be given to the person or persons so conducting, following, or carrying on such to cease and discontinue the same within such reasonable time, not being less than thirty days nor more than sixty days as the said Council may direct, or so to conduct, follow, or carry on the said manufacture, trade, calling, or operation, as that within such reasonable time as aforesaid the same shall wholly and permanently cease to be noisome and offensive within the meaning of these By-laws. And any person or persons so conducting, following, or carrying on such trade, manufacture, calling, or operation as aforesaid, after due notice aforesaid, shall, for the first offence forfeit and pay a sum of not less than forty shillings nor more than five pounds; for a second offence a sum not less than five pounds nor more than twenty-five pounds; and for a third and subsequent offence, a sum not less than ten pounds nor more than fifty pounds.

Mode of proceeding when a noisome and offensive trade, &c., is about to be commenced.

131. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation is being conducted, followed, or carried on, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purpose of these By-laws. And every person who shall be actually engaged in superintending or managing in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or occupation within the meaning and for all the purposes of these By-laws.

Inspector of Nuisances may take legal proceedings.

135. The Inspector of Nuisances, or other person appointed by the Council, may take legal proceedings against any person or persons committing any offence or offences against any of these By-laws, or against any of the powers or obligations which this Council have, exercise, and incur, under sections 128 and 136 of the Municipalities Act 31 Vic. No. 12:

Penalties to be paid over to the Treasurer.

136. All penalties under any of these By-laws shall be paid over to the Treasurer of the said Municipality, to be appropriated as the Council may direct.

Interpretation of "Mayor" and "Municipality," &c.

137. Whenever in any of these By-laws the word "Mayor" is made use of it shall, unless the context shall indicate a contrary intention, be construed also to signify and include any Alderman lawfully acting for the time being in the place and stead of the Mayor; and whenever the words "Municipality" and "Corporation" are made use of in the said By-laws it shall be understood to signify the "Municipality of Mulgoa"; also whenever the word "person" is made use of in these By-laws it shall be understood to mean man, woman, boy, or girl, according to the context; also, whenever any or all of the words "road, street, or public place," shall herein be made use of, they or it shall be understood to mean any place or part of the Municipality of Mulgoa, directly or indirectly under the control of the Council or Municipality of Mulgoa.

Public Exhibitions, &c.

Exhibitions, &c., to be licensed—Penalty, &c.

138. No exhibition, other than exhibitions which are licensed by the Colonial Secretary, under the provision of Act 14 Victoria No. 23, or 36 Victoria No. 8, or exhibitions of a temporary character, hereinafter specially provided for, shall be held or kept for hire or profit within the said Municipality; nor shall any bowling-alley, dancing saloon, or any other place of public amusement, other than a place licensed as aforesaid, or a place for temporary amusement, hereinafter specially provided for, be used as such for hire or profit within the said Municipality, unless and until permission in writing be granted by the Mayor. And every person holding or keeping any such exhibition or

using any place within the said Municipality for public amusement as aforesaid, or causing, or permitting such place to be so used, without such permission of such Mayor, shall forfeit and pay a sum not less than five shillings nor more than forty shillings for every day that such exhibition shall be so held or kept, or such place shall be used for public amusement as aforesaid.

No exhibitions on Sundays, &c.

139. No such exhibition or place of public amusement as aforesaid shall be held or kept open or used for the purposes of such public amusements on Sunday, Christmas Day, or Good Friday; and every person offending against this By-law in this behalf shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

Water Supply.

Polluting water, reservoir, &c.

140. Whosoever shall bathe in any stream, reservoir, conduit, aqueduct, or other water or waterworks belonging to or under the management or control of the Council, or shall wash, cleanse, throw or cause to enter therein any animal, whether alive or dead, or any rubbish, filth, stuff or thing of any kind whatsoever, or shall cause or permit to run or to be brought therein the water of any sink, sewer, drain, engine, or boiler, or other filthy, or unwholesome or improper water, or shall wash any clothes at any public fountain or pump, or in or at any stream, reservoir, conduit, aqueduct or other water or waterworks as aforesaid, or shall do anything whatsoever whereby any water or waterworks belonging to or under the control of the said Council shall be fouled, obstructed, or damaged, shall for the first offence forfeit and pay any sum not exceeding five pounds; for a second offence any sum not less than ten shillings nor more than five pounds; and for the third and every subsequent offence any sum not less than one pound nor more than twenty pounds.

Diverting water from reservoirs.

141. In any case in which the Council shall have the exclusive right of collecting for the supply of any reservoir or waterworks belonging to the said Council, or under their management or control, the storm water having fallen on any gathering ground, whosoever shall by any means whatsoever divert any such water from the course of its natural flow, so that the same shall tend to flow elsewhere than to such reservoir or waterworks or some watercourse leading thereto or shall flow to the same respectively in a foul state, shall forfeit, and pay for the first offence any sum not less than one pound no more than twenty pounds; for a second offence a sum not less than two pounds nor more than forty pounds, and for the third and every subsequent offence any sum not less than five pounds nor more than fifty pounds.

Sewerage and Drainage.

Drains for discharge of surface water from land.

142. Every owner or occupier of land in, adjoining to, or near any street, if such land shall be so situated that surface or storm water from or upon the same shall overflow or shall tend naturally, if not otherwise discharged, to overflow any footway of such street, or any neighbouring property, shall, within seven days next after the service of the notice by the Council for that purpose, construct and lay from such point upon such land being near to the footway as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel at the outer edge of the footway to the said channel, and through, under, and transversely to the footway, and keep in good condition and clear a covered drain or trunk, as and subject to the inspection of the Council or its proper officers; and in default of compliance with any such notice within the period aforesaid, or with the provisions of this section, such owner or occupier shall on conviction forfeit and pay any sum not exceeding five pounds. And if within seven days after such conviction such owner or occupier shall still have failed to comply with such notice, or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds; and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds. And every such owner or occupier who shall have made default as aforesaid for more than seven days after such second or any further conviction, shall be held guilty of a further offence within the meaning of this section.

PART VI.

Public Libraries and Museums.

Hours.

143. Every Public Library or Museum belonging to or under the control or management of the said Council, shall be open to the public on week days and Sundays as the Council may hereinafter determine.

Visitors' book to be signed.

144. Every person who shall enter any such public library or museum shall immediately on entering the same write his or her name and address in a book to be kept for such purpose at each such library and museum, to be called "the Visitors' Book;" and if such person shall be unable to write, then such name and address may be so written by any other person, or shall be so written by the proper officer of the Council at such library or museum, at the request of such person; and no person who shall refuse to comply with this regulation shall be permitted to enter or remain in such museum, and it shall be the duty of the officer of the Council in charge of such library or museum to enforce this By-law.

Misconduct in library or museum.

145. Every person who shall, being intoxicated, enter or remain in any such library or museum, or who shall use therein any abusive, improper or unbecoming language, or who shall by unnecessary noise or otherwise, disturb or annoy the persons using or resorting to such library or museum; or who shall, without lawful excuse, but without felonious or larcenous intent, remove any property from such library or museum, shall forfeit and pay any sum not less than ten shillings nor more than ten pounds; and every such person may be forthwith removed by any officer of the Council in charge of such library or museum.

Applicants for books, &c., to be served in due order.

146. Every person who at any such library shall desire to read or to refer to any book or other publication placed or deposited in such library for public use, shall have the same handed to him in his turn by the officer in charge of such library, or his assistant, and shall have the exclusive use in such library of such book or other publication for such time as by regulation made by the said Council.

Rules as to the use of apparatus, &c.

147. The like rule (*i.e.*, the last preceding) shall, in every respect, apply to the use of any apparatus, model, or specimen, belonging to any such library or museum as aforesaid, except that in such case such apparatus, model, or specimen shall only be removed on the written permission of the Mayor and two Aldermen, or of four Aldermen without the Mayor, and then only for the purpose of preparing any lecture to be given in the said Municipality, and for so long a time as may be necessary for the preparation of such lecture and its delivery in the said Municipality.

Applications for use of books, &c., to be made to officer in charge.

148. Any person who may, at any such library or museum, desire to read or refer to or to use or examine any such book, publication, apparatus, model, or specimen, as aforesaid, shall apply for the same to the officer of the Council in charge of such library or museum, and shall return the same to such officer after having read, referred to, used, or examined the same, in the same goodness, perfection, and quality of condition as it was received from the said officer of the Council; and it shall be the duty of such officer to carry out and enforce this By-law in every respect.

Loan or deposit of books or apparatus, &c., on special conditions.

149. It shall be lawful for any person, with the consent of the Council, to lend or to deposit at any such library or museum, any book or publication or any apparatus, model, or specimen for public use or inspection, subject to such special restrictions as to such use or inspection as such person may prescribe; and the officer of the Council in charge of such library or museum shall in such case hold every such book, publication, apparatus, model, or specimen in trust for the person so lending or depositing the same, and shall carry out and enforce such restriction as such person may have so prescribed as aforesaid.

Use of library, &c., by Society of Mutual Improvement, &c.

150. Any society or class for mutual improvement, or instruction, or for study or experiments, may, with the consent of the Council, hold its meetings, or carry on its studies or experiments, at any such library or museum, provided that the general free access to, and use of, the said library or museum by persons who are not members of such society or class, be not thereby interfered with.

Record of donations.

151. A record shall be made of every donation to each such library or museum, which book shall be open to the inspection of all persons visiting such library or museum.

Copy of By-laws to be kept at library and museum for reference.

152. A copy of these By-laws and copies of all regulations made thereunder as aforesaid shall be kept at every such library and museum, and it shall be the duty of the officer of the Council in charge of same to allow visitors to the same, who may desire to do so, to refer to any such copy.

Penalties for damaging Visitors' Book, &c.

153. Any person who shall wilfully damage any visitors' book, catalogue, copy of By-laws, or other book of record kept at any such library or museum for the general uses thereof, as well as any person or persons who shall violate or break any of the foregoing rules and regulations relating to the public library or museum aforesaid, shall for every such offence (except wherein otherwise specified), forfeit and pay any sum not less than ten shillings nor more than ten pounds, in addition to the cost of the damage of whatever kind made or caused by the said person or persons.

Public Gardens, &c., Grounds, &c.

Injury to things therein.

154. No person shall pluck any of the flowers, or walk on the beds or borders or climb upon or get over the fences, gates, or stiles, or remove any of the tallies, or disturb, damage, or destroy any property or thing in or upon the said gardens or grounds.

Driving carts, &c.

155. No cart or other vehicle shall, without the authority of the proper officer of the Council, be drawn through the gardens or grounds.

Behaviour, &c.

156. No visitor shall interrupt the gardeners or labourers by conversation or otherwise, or shall use any abusive, improper, or unbecoming language to any person, or otherwise annoy any such person, or behave in an indecent, improper, or unbecoming manner in such gardens or grounds.

Penalties.

157. Any person offending against these By-laws in relation to public gardens, grounds, &c. shall, for the first offence forfeit and pay any sum not exceeding five pounds; for a second offence, any sum not less than ten shillings nor more than ten pounds; for a third and every subsequent offence, any sum not less one pound nor more than twenty pounds. And any person may, in committing any such offence, be forthwith removed from the gardens by the proper officers of the Council, or by any of the gardeners or labourers employed in such garden or grounds, without affecting the liability of such persons so offending, to be subsequently prosecuted for such offence.

Grazing on public gardens or grounds, &c.

158. All rights of grazing are reserved by the Council as to places of public recreation, gardens, grounds, &c., under the care, control, and management, or in the possession of the said Council, and all animals trespassing thereupon will render the owners and caretakers thereof liable to the penalties named in the By-law next preceding this, and each separate day, or part of a day, will count for a separate offence for each head of cattle, &c., so trespassing.

Made and passed by the Council of the Municipal District of Mulgoa this eighteenth day of July, one thousand eight hundred and ninety-four.

(L.S.) A. W. STEPHEN,
Mayor.

W. O. HYNES,
Council Clerk.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF KEMPSEY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 153.

Chief Secretary's Office,
Sydney, 19th October, 1894.**KEMPSEY MUNICIPALITY.—BY-LAWS.**

The following By-laws made by the Council of the Borough of Kempsey, under the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

BY-LAWS for regulating the proceedings of the Council of the Municipality of Kempsey and the duties of the officers and servants of such Council; for preserving order at meetings of the said Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for suppressing nuisances; for preventing or regulating and licensing exhibitions held or kept for hire or profit, bowling alleys and other places of amusement; compelling residents to keep their premises free from offensive or unwholesome matters; opening new public roads, ways, and parks; aligning and cleansing roads and streets; regulating the supply and distribution of water, sewerage and drainage; preserving trees and shrubs; regulating free libraries; preventing or regulating the bathing or washing the person in any public water near a public thoroughfare; preserving public decency; providing for the health of the Municipality, and against the spreading of contagious or infectious diseases; restraining noisome and offensive trades; and generally maintaining the good rule and government of the said Borough.

PART I.

Proceedings of the Council and Committees—Preservation of order at Council Meetings—Duties of Officers and Servants, &c.

Meetings of the Council.—Ordinary meetings.

1. The Council shall meet for the despatch of business at such hour on every alternate Friday in each month as may from time to time be determined by such Council unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor.—Adjournment for want of quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any meeting for want of a quorum, the names of the members present shall be recorded in the minute-book.

235—A

Order of Business.—Business of ordinary meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Petitions (if any) to be presented and dealt with.
3. Correspondence to be read, and if necessary dealt with.
4. Reports from Committees and Minutes from the Mayor to be dealt with.
5. Accounts passed for payment.
6. Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers to be made.
7. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
8. Orders of the day to be disposed of as they stand on the business paper.

Provided that it shall be competent to the Council at any time by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business out of its regular order on the business paper, without any formal suspension of this section; also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

4. At special meetings of the Council the business, after the minutes shall have been read and confirmed, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting.—How prepared.

5. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Council Clerk, not less than forty-eight hours nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received, or shall have been required or directed so to enter, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 3 of this "Part" of these By-laws in the order in which such notice, requisition, or direction shall have been received.

Business paper for special meeting.

6. The business paper for a special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to members.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

How business paper is to be disposed of.

8. The business paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with, and such business paper so noted shall be a record of the Council.

Notices of motion, &c., to be numbered as received and preserved until matter disposed of, unless withdrawn before business paper made up.

9. All notices of motion, and all requisitions from Aldermen and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting, shall be numbered by the Council Clerk as they are received; and each such notice, requisition, and direction shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been so disposed of shall have been duly verified as required by section 3 of this "Part" of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk shall be at liberty to withdraw the same at any time before the making up of the business paper.

After business paper made up all notices, &c., to be the property of the Council.

10. After the business paper shall have been made up as aforesaid all the said notices of motion, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

*Motions and Amendments.**Motions.—How to be moved.*

11. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck out and be considered to have lapsed.

Absence of proposed mover.

12. No motion of which notice shall have been entered on the business paper shall, except as hereinafter provided, be proceeded with in the absence of the Aldermen by whom such notice shall have been given, unless by some other Aldermen producing a written authority for that purpose from such first-named Aldermen.

Motion to be seconded.

13. No motion in Council shall be discussed until it has been seconded.

Amendments may be moved.

14. When a motion shall have been made and seconded any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed until it has been seconded.

Motions and amendments to be in writing.

15. No motion or amendment shall be discussed until it has been reduced into writing.

Only one amendment at a time.

16. No second or subsequent amendment shall be discussed until the previous amendment or amendments shall have been disposed of.

Amended question.—Further amendment may be moved thereon.

17. If an amendment be carried, the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

18. If any amendment, either upon an original question or upon any amended question, shall be negatived, a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions for adjournment.

19. If, upon any motion for adjournment of the Council, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Requisitions from Aldermen.—How to be dealt with.

20. Every requisition by an Alderman, that any particular matter of business be brought before the Council, shall be treated as a notice of motion by such Aldermen that such business be taken into consideration by the Council, and he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit in reference thereto, which shall be consistent with the notice of such business and with good order; and if such Alderman be absent, or if, being present and so called upon, he shall make no such motion, then it shall be open to any other Alderman to make such motion; and when any such motion shall have been made it shall be dealt with in the same manner as if notice thereof had been given, subject, however, to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order; and if no motion shall be made in reference to such business the entry relating thereto shall be struck out of the business paper.

Orders of the day.—Of what orders of the day shall consist.

21. The orders of the day shall consist of any matters other than motions on notice, which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

22. Section 19 of this "Part" of these By-laws shall be considered applicable to orders of the day. And the Alderman who has the usual charge of, or who has previously moved in reference to, the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid, by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

Petitions.—Petitions to be respectfully worded.

23. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions.—How received.

24. All petitions shall be received only as the petitions of the parties signing the same.

How petitions are to be dealt with.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition except the same be received, or that it be received and referred to one of the permanent Committees hereinafter mentioned; or that it be received, and that its consideration stand an order of the day or some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

Correspondence.—Duties of Mayor as to correspondence.

26. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 23 of this "Part" of these By-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Letters sent not to be discussed, but every letter may be subject of motion

27. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, though copies may be read to such Council: Provided, however, that any notice of motion, consistent with good order, may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council, which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports from Committees and minutes from the Mayor.—Form of report.

28. All reports from Committees shall be written on foolscap paper, with a margin of at least one fourth of the width of such paper; and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's minute.

29. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognisance, by a minute in writing. Every such minute shall be written upon paper of the same kind, and with the same margin as a report from a Committee, and shall be signed by such Mayor.

How reports, &c., are to be dealt with.—Duties of Chairman, &c., in certain cases.

30. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, it may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without such due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which it is presented, it shall be the duty of the Chairman, or member of such Committee signing such report, or of the Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable the Council Clerk to make the necessary entry on the business paper, and to give due notice.

Questions and statements.—Limitations as to questions and statements.

31. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this "Part" of these By-laws.

Notice to be given.

32. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and if necessary, for a reference to other persons or to documents.

Question to be put without argument, &c.

33. Every such question must be put categorically, without any argument or statement of fact.

Similar provisions as to statements.

34. Every such statement must be made without argument.

No discussion on question, &c.—Rights of objection, and of subsequent motion reserved.

35. No discussion shall be permitted as to any such question, or as to any reply thereto, or as to any such statement, at the time when such question is put or such reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question or reply or any such statement as aforesaid.

Order of debate.—Mode of addressing the Council, &c.

36. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity) and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner; but in every such case the question so put and the answer thereto shall be subject to objection on the ground of disorder or irrelevancy; and all members of the Council shall, on all occasions, when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted, if in order.

37. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Offensive language.

38. If any Alderman uses whilst in Council any offensive or insulting language, the words shall be written down, and he shall be asked to withdraw them. If he refuse to withdraw such language, and apologise, he shall be deemed guilty of misconduct, and be liable to a fine of not less than twenty shillings nor more than five pounds.

Limitations as to number of speeches, &c.

39. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observations than may be necessary for the purpose of such explanation.

Mover and seconder

40. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment, without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

41. No Alderman shall digress from the subject under discussion or shall make personal reflections on, nor impute improper motives to any other Alderman.

Adjournment of debate.

42. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the debate.

Mayor to decide as to pre-audience.

43. If two or more Aldermen rise to speak at the same time the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Aldermen may require questions to be stated, &c., under certain restrictions.

44. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided, however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion. Also, that if such request or requisition shall appear to the Mayor or Chairman not to have been made *bonâ fide*, it shall not be complied with.

Mayor or Chairman not to move or second motion, &c., but may address Council thereon.

45. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question, as provided for by section 3 of this "Part" of these By-laws, except as is further provided for by the section 28 of the same. But such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing), but shall be considered as still presiding.

Questions of Order.

Mayor or Chairman to decide points of order.

46. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided: Provided, however, that any Alderman being dissatisfied with the decision of the Mayor or Chairman on any such question of order or practice may dissent therefrom, whereupon the Council without discussion shall decide by a vote of the majority such question of order.

Acts of disorder.

47. Every member of the Council who shall commit a breach of any section of this "Part" of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be deemed to be out of order.

Mayor, &c., may call Member to order.

48. The Mayor or Chairman may without the interposition of any other member of the Council, call any Alderman to order, whenever in the opinion of such Mayor or Chairman there shall be a necessity for so doing.

Any Member may raise question of order.

49. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which such first-named member may consider out of order.

Decision on points of order.

50. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

Penalties for persisting in disorderly conduct.

51. Any member of the Council who shall have been called to order, and who shall persist in any line of conduct or argument, or of observations which shall be decided to be disorderly, or who shall be guilty of any other act of disorder, as defined in section 47 of this "Part" of these By-laws, and shall refuse to make such explanation, retraction, or apology as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction for the first offence to a penalty of not less than ten shillings, nor more than five pounds, and on a second conviction for the like offence he shall be liable to a penalty of not less than one pound, nor more than ten pounds; and on the third conviction and for every further conviction for the like offence, he shall be liable to a penalty of not less than two pounds nor more than twenty pounds.

Power of Council as to altering Rules on points of order.

52. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice, may, by motion on notice, respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar questions of order or of practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties, unless and until it be rescinded, but shall have no retrospective operation.

Mode of Voting.

How questions are to be put.

53. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Divisions.—Penalty for refusing to vote.

54. Any Alderman shall be at liberty to call for a division; in such case the question shall be put first in the affirmative and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds.

Protests.

Mode of protesting.—Protest to be recorded, but may under certain circumstances be expunged.

55. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council; notice of the intention so to protest must, however, be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute-book, but if in the opinion of the Council it be inconsistent with the truth, or disrespectfully worded, it may (by resolution on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with a pen through the entry of such protest, with reference in the margin to the resolution ordering such expunction.

Committees of the Whole Council.

Business in Committee.

56. The Business Committees of the whole Council shall be conducted in accordance with the rules hereinbefore provided for meetings of the Council as nearly as the same shall apply, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

Disorderly conduct in Committee.—Refusal to vote.

57. Whenever any member of the Council shall, while the Council is in Committee of the Whole, be considered guilty of an offence against good order within the meaning of section 47 of this "Part" of these By-laws, it shall be competent to any Alderman to move that the Council resume its sitting, and that such matter be reported; and if such motion be carried, such matter shall be reported accordingly, and an entry of such report shall be made in the minute-book; and whenever any Alderman shall have failed to vote on any occasion in Committee of the whole Council, as required by section 54 of this "Part" of these By-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the minute-book: Provided that in the case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary, but it shall be the duty of the Chairman of such Committee of the Whole, in making his report of the proceedings in such Committee, whenever such report may be made, to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

Decisions in Committee on points of order may be reported.

58. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council, under the provisions of section 46 of this "Part" of these By-laws, any Alderman may move that such decision

be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried, such decision shall be so embodied in such report, whenever the same shall be made.

How progress may be reported, &c.

59. Any Alderman may at any time during the sitting of a Committee of the whole Council move that the Chairman report progress (or no progress, as the case may be), and that leave be asked to sit again at a later period of the same day, or on some other day, or that no leave be asked to sit again; and if any such motion be carried, the Council shall resume its sitting, and a report shall be made accordingly; but no discussion shall be permitted on any such motion, and if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

Reports of proceedings in Committee.—Want of quorum in Committee.

60. All reports of proceedings in Committee of the whole Council shall be made to the Council *via voce*, by the Chairman of such Committee; and a report of such proceedings shall be made in every case except when it shall be found on counting the number of members during the sitting of any such Committee, that there is not a quorum present. In the latter case the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed: Provided that in making any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

How Reports are to be dealt with.

61. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute-book; but except as hereinafter mentioned, no such report shall be considered as adopted by the Council until a motion shall have been made and passed for such adoption. And every such motion for the adoption of a report, and the order of debate on such motion, shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions: Provided, however, that where a report shall have been made under section 57 of this "part" of these By-laws of disorderly conduct in Committee, or under section 54 of this "part" of these By-laws, of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof; and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.—How call may be ordered.

62. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

Such call compulsory in certain cases.

63. There shall without any special order to that effect, be a call of the Council for the consideration of every motion which may be made under section 56 of this "part" of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

Mode of proceeding.

64. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered, such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

Penalty for absence without legal excuse.—Further call when question adjourned.

65. Any member of the Council, who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who, being absent, shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that by reason of extreme illness or any other sufficient cause he has been unable to send an excuse in writing as aforesaid, or who, having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration; and the provisions herein as to penalties for absence shall have reference to such further call. And if there shall be more than one adjournment this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

Standing and Special Committees.—Standing Committees.

66. Besides any such Special Committees as may from time to time be found necessary, there shall be six Standing Committees, namely, a By-law Committee, a Committee for Works, a Finance Committee, a Library Committee, a Lighting Committee, and a General Purposes Committee, each consisting of not less than three members. These Committees shall be reappointed every year at the first meeting of the Council, which shall be holden after the election of the Mayor.

By-law Committee.

67. The By-law Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Borough. They shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the Borough; and shall take such steps as may be necessary for the prevention or punishment of offences against such By-laws or statutes, and for the preservation of public health, order, and decency.

Committee for Works.

68. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council, to inquire and report upon.

Finance Committee.

69. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect, or be likely to affect, the finances of the Borough, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Library Committee.

70. The Library Committee shall have general control of the Public Library, and shall—once, at least—in each Municipal year submit to the Council a written report upon the same as to its efficacy, usefulness, and the manner in which it is conducted; and may also recommend the purchase of additional books or any other matter or thing they have reason to believe will be of benefit.

Lighting Committee.

71. The Lighting Committee shall, once, at least, in each Municipal year, make an inspection of the Borough, and may recommend the erection of any additional lamps they may consider necessary, or the removal or alteration of any existing lamps or any other matter or thing in connection with the lighting of the Borough they have reason to believe will be of benefit, and shall submit to the Council a written report upon the same.

General Purposes Committee.

72. All matters which the Council may think fit to refer to a Committee, and which do not fall within the province of any other Standing Committee, shall be referred to the General Purposes Committee: Provided, however, that the Council may at any time refer all or any of such matters to a Special Committee appointed for that particular purpose.

Special Committees.

73. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a Special Committee ought to be appointed, and no Standing Committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as, in his opinion, ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot; and in the latter case, or if an amendment to the effect that such Special Committee be appointed by ballot be carried, each member then present shall receive a list of all the members of the Council, from which list he shall strike out all names but those of the persons of whom, in his opinion, such Special Committee ought to be composed, and the Mayor or Chairman shall examine such list and shall declare the result; and, in the event of its becoming necessary, through an equality of votes, to decide as to which of two or more Aldermen shall serve on such Committee, such Mayor or Chairman shall so decide.

Chairman of Committee.

74. Every Committee, of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee within seven days after their appointment.

Committee meeting.—How called

75. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman or any two members of such Committee.

Records of transactions in Committee.

76. The Chairman of each Standing Committee shall make, or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

Expenditure.

Except in emergent matters, cost of all work to be estimated before undertaken.

77. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Borough shall be undertaken until the probable expense thereof, shall have been first ascertained by the Council.

Emergent matters and necessary current expenses.—Expenses authorised to be reported.—Outlay to be in accordance with orders of the Council.

78. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred.

1. By order of the Committee for Works, or of the Mayor and one member of such Committee for repairs, or emergent works, to the extent of ten pounds.
2. By order of the Mayor for necessary current expenses, to the extent of five pounds.
3. By order of the Mayor, and any two Aldermen, or without the Mayor, of any four Aldermen, for any emergent purpose to the extent of ten pounds.

Provided, that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting; such report to be signed by the Chairman of the Committee of Works, or the Mayor, or the Mayor and Aldermen, or the Aldermen without the Mayor, as the case may be, by whom such outlay shall have been authorised. Also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction of functions of the Council, and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall, on any pretence, be thus authorised.

All claims to be examined and reported upon by Finance Committee.

79. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificate required with each claim.

80. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs showing that the demand is a legitimate one, and has been duly authorised or inquired into.

Common Seal and Records of the Council.

Common Seal and Press how secured.—Care of same.

81. The Common Seal and the Press, to which the same is attached, shall be secured by a cover or box, which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys, one shall be kept by the Mayor, and the other by the Council Clerk. Such Common Seal and press shall be in the custody and the care of the Council Clerk.

When and how Common Seal to be used.

82. The Common Seal shall not be attached to any document without an express order of the Council. In every case, when such Common Seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or, in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of Account are to be kept and inspected.

83. The Treasurer shall keep such books of account and such records, statements, and memoranda of receipts and expenditure in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency, which they may have discovered in the keeping of the same; also, to report to the Council from time to time any changes which such Committee may think advisable in the mode of keeping the accounts.

Impression of seal not to be taken, &c., without leave of Council.—Penalties.

84. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same, without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable on conviction for the first offence to a penalty of not less than five shillings, nor more than two pounds; for a second offence to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence to a penalty of not less than five pounds nor more than twenty-five pounds.

Records not to be removed, &c.—Penalties.

85. Any person removing any such book or other record of the Council as aforesaid, from the Council Chamber, or the place where by direction of the Council, such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal as hereinafter provided, shall for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds.

Penalty for defacing or destroying Record.

86. Any person destroying, defacing, or altering any record of the Council, shall for every such offence, be liable to a penalty of not less than five pounds, nor more than fifty pounds.

Officers and Servants.

Notice to Candidates in certain cases.

87. No appointment to any permanent office at the disposal of the Council, to which a salary or allowance of fifty pounds per annum, or a salary or allowance exceeding that amount is attached, shall be made until public notice shall have been given, as hereinafter provided, inviting applications from qualified candidates for the same.

Mode of appointment.

88. Every such appointment shall be made by ballot, or in such other mode as may at the time be determined on, whenever there is more than one candidate for such permanent office.

Exceptional cases.

89. Nothing herein contained shall be held to prevent the employment, as may be from time to time found necessary and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

Bonds for good conduct.

90. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the attorney or the bankers of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Council Clerk.

91. The Council Clerk, in addition to the duties which, by the "Municipalities Act of 1867," or by the present or any other By-laws thereunder, he may be required to perform, shall be the Clerk of all Revision Courts held in the Borough under the provisions of the said "Municipalities Act." He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in the performance of his duties and in carrying out the orders of the Council.

Duties of Treasurer, &c.

92. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 83 of these By-laws, and shall be responsible for the safe keeping of the same. Any other officer of the Council may have any other records thereof committed to his charge by an order of the Council, and in such case shall be responsible for the safe keeping of such records.

Duties of other officers and servants.

93. The duties of all officers and servants of the Corporation shall be defined by such regulations as may from time to time and in accordance with law be made.

Special powers of Mayor.

94. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared or such explanation or information already given, and such return, statement, explanation, or information is on record or hereinbefore provided, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *viva voce* or put into writing, as the Mayor may direct.

How complaints against officers, &c., are to be dealt with.

95. All complaints against officers or servants of the Corporation must be in writing and addressed to the Mayor, and must in every case be signed by the person or persons complaining. And no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints as aforesaid shall be laid by the Mayor before the Council at the next meeting thereof which shall be holden after the Mayor shall have received the same, and shall be duly recorded.

Miscellaneous.

Leave of absence.

96. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

Motions for rescission of previous orders, &c.

97. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage, after due notice as hereinbefore provided, and in due course of law, of any By-law, for the repeal or amendment of any other By-law.

Lapsed business.

98. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present the resumption of such consideration may be ordered by resolution of the Council after due notice; and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

Suits and prosecutions for penalties, &c.

99. Such suits or information for the enforcement of penalties for or in respect of breach of the "Municipalities Act of 1867," or of any By-law made thereunder, or of any statute, the operation of which may have been extended to the Municipality, as may have been directed by the Council or by the By-law Committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows:—When against a member of the Council, or an auditor, or any officer of the Corporation—by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person—by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted, and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council or the By-law Committee, or the Mayor, as the case may be, on directing such suit or information as aforesaid; and no suit shall be brought, or information laid, as aforesaid, against any member of the Council, or auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council except on the order of such Council, or of the Mayor; nor against any other person, except upon the order of the Council, or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid as aforesaid, except on an express resolution of the Council, in any case where the bringing of such suit, or the laying of such information will be adverse to any previous direction of such Council, or where, on the trial or hearing of any such suit or information, the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may, on the order of the Council, be entrusted to an attorney.

Mode of proceeding in Cases not provided for.

100. In all cases not herein provided for, resort shall be had to the Rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

Power to suspend temporarily certain portions of these By-laws.

101. Any of the foregoing By-laws or any portion thereof which relate to or affect the proceedings at meetings of the Council may be suspended *pro tempore* without notice in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

PART II.

Collection and enforcement of Rates.—Times and modes of collection.

Rates under Sec. 164 to be collected half-yearly.

1. All rates levied or imposed by the Council under the provisions of Sec. 164, "Municipalities Act of 1867," and for the purposes mentioned in the said section, shall be collected by half-yearly instalments. Each such instalment shall, as to every such rate and every such instalment thereof be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

Special Rates.

2. All rates levied or imposed by the Council under Sections 165, 166, and 167 of the said "Municipalities Act of 1867," and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner and shall be held to be due and payable on and after such day or days as the Council may, by resolution at the time of making or imposing such rates or any of them have appointed.

Office Hours.

3. All rates shall be paid at the Council Chambers during the hours appointed by the Council for that purpose.

Defaulters.

4. Every person not paying his or her rates as aforesaid upon the day or days so appointed for payment thereof shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

5. It shall be the duty of the Mayor to take proceedings to enforce payment of all rates in default either by action at law or by issuing warrants of distraint upon the goods and chattels of the defaulter.

Enforcement by distress bailiff.

6. A bailiff shall, when found necessary, be appointed by the Mayor.

Bailiff's sureties.

7. The bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of twenty-five pounds each, for the faithful performance of his duty.

Duty of Bailiff.

8. It shall be the duty of the bailiff to make all levies by distress for the recovery of rates, in the manner hereinafter provided.

Warrant of distress.

9. All levies and distresses shall be made under warrant in the form of Schedule A hereto under the hand of the Mayor, or any Alderman who may for the time being be duly authorised to perform the duties of that office.

Distress and sale, &c.

10. If the sum for which any such distress shall have been made shall not be paid, with costs as hereinafter provided, on or before the expiration of five days, the bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises, or at such other place within the said Municipality, as the Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any) that may remain, after deducting the amount of the sum distrained for, and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

Inventory.

11. At the time of making a distress the bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made, and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the bailiff shall give a copy of the inventory to the ratepayer on demand, at any time within one month after making such distress.

Goods may be impounded.

12. The bailiff on making a distress as aforesaid, may impound or otherwise seize the goods or chattels so distrained of what nature or kind soever in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever after the expiration of the five days as hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same an account of the purchaser thereof.

Owner to direct order of sale.

13. The owner of any goods or chattels so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall, in such case, be put up for sale according to such direction.

Proceeds of distress.

14. The bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

15. There shall be payable to the bailiff, for the use of the Council, for every levy and distress made under this By-law the costs and charges in the Schedule herunto annexed, marked C.

SCHEDULE A.

Warrant of Distress.

I
Mayor of the Borough of Kempsey, do hereby authorise you the Bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of situate at for being the amount of rates due to the said Borough to the day of for the said dwelling-house (or land and premises, as the case may be) and to proceed thereon for the recovery of the said rates according to law.
Dated this day of 189 .

Mayor.

SCHEDULE B.

Inventory.

I have this day in virtue of the warrant under the hand of the Mayor of the Borough of Kempsey, dated distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of situate at within the said Borough, for being the amount of rates due to the said Borough to the day of
Dated this day of 189 .

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	6
For serving every warrant and making levy where the sum is not more than £20	2	6
Above that sum, in addition for every £1	0	1
For making and furnishing copy of inventory	2	6
For man in possession, each day or part of a day	6	0
For sale, commission, and delivery of goods, per pound on proceeds of the sale	1	0

PART III.

Preventing and Extinguishing Fires.

Fire or Combustible Materials, &c.

1. Every person who shall place, or knowingly permit to be placéd, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall, on conviction for every such offence, forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for forty-eight hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

2. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence, a penalty of not more than five pounds, and also shall remove such fence, stack, or covering within a reasonable time after such conviction. And any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wilfully setting fire to chimneys.

3. Every person who wilfully sets, or causes to be set on fire any chimney-flue, smoke-vent, or stove-pipe, herein called in common a "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney, from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

Negligently suffering chimney to be on fire.

4. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimney is situated, shall forfeit a sum not exceeding forty shillings: Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard, that such fire was in no wise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servant.

PART IV.

*Notices, Streets and Public Places.—Public Health and Decency, &c.**Drafts of intended By-laws.*

1. A draft of every intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same, and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

How notices are to be published.

2. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation of the Council, or any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same twice in some newspaper circulating in the Municipality.

New roads to be reported upon.

3. No new public road, street, way, park, or other place proposed to be dedicated to the public shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been formed by the proprietor or proprietors to the reasonable satisfaction of the Committee of Works or any duly authorised officer, or until the said road, street, way, or park shall have been duly examined and reported upon to the Council by such Committee or duly authorised officer.

Dedication of new roads, &c.

4. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the proprietor or proprietors aforesaid shall execute such instrument dedicating such road, way, park, or other place to public use or recreation as aforesaid as may be considered necessary by the Committee for General Purposes, and such instrument of dedication shall be preserved as a record of the Council.

Change of street levels.

5. Whenever it may be deemed necessary to alter the level of any public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section showing the proposed cuttings to be exhibited at the Council Chamber for fourteen days, for the information and inspection of ratepayers, and shall notify by advertisement in some newspaper circulating in the Municipality that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

Roads and streets and encroachments thereon, &c.

6. The Committee for Works or the Surveyor of the Municipality, or other officer or person duly authorised by the Council in that behalf, shall be the proper officer for marking out, and shall fix, mark, and lay out the levels of all public roads, streets, lanes, and thoroughfares, and the carriage and footways thereof, which now are, or shall hereafter be, under or subject to the control, construction, care, or management of the Council. In marking out such roads, streets, lanes, and thoroughfares, resource shall be had, when practicable, to the plans under which the land with frontage to the road, street, lane, or thoroughfare in question shall have been sold or let. And it shall be the duty of such Committee for Works or Surveyor, or other officer, to place posts at the corners or intersections of such streets, roads, lanes, and thoroughfares whenever the same may be deemed necessary or desirable by the Council, so as to give a width of 42 feet for the carriage-way and 12 feet for the footway on each side, where the road, street, lane, or thoroughfare shall be 66 feet wide, and in proportion, and in the discretion of the Council in any such road, street, lane, or thoroughfare, or other public place of other width than 66 feet: Provided that there shall be no change of level in any such public road, street, lane, thoroughfare, or public place until the same shall have been submitted to, and adopted by, the Council, as hereinafter provided.

Erection of house.

7. No person shall be permitted to erect any house, shop, or other building, in any street, lane, or place within the said Municipality without first serving seven days' notice in writing on the Mayor or Council Clerk, or other duly authorised officer, before commencing the same, stating his intention, setting out a plan, and giving particulars of the proposed building; and every owner of, and every contractor for, such house, shop, or other building, or any part thereof, commencing to build or work thereon, without such notice having been given, shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than five shillings.

Pipes, gutters, &c.

8. It shall not be lawful for any person to carry by means of pipes, gutters, or other contrivances any rain water from the roof of his or her premises or house upon any of the footways of any street or public place within the said Municipality, and

any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances when required to do so by any officer of the said Council shall, on conviction, forfeit and pay any sum not exceeding two pounds, nor less than five shillings: Provided that the owner or occupier of any such premises or house may convey any such rain-water by means of pipes laid under the surface of any such footways into the gutter adjoining the same, subject to the approval of the Committee for Works or other duly authorised officer.

Erection of balcony.

9. No person shall be permitted to erect any awning, verandah, portico, balcony, coping, parapet, overhanging eaves, cornice, windows, string course dressings, or other architectural decoration, forming part of or attached to any external wall erected on or projecting on to the building line of any street or road, nor to rebuild in the whole or in any part, nor make any addition or alteration to any such external wall, without first serving seven days' notice in writing on the Mayor, or Council Clerk, or other duly authorised officer, before commencing to erect any such awning, verandah, portico, balcony, coping, parapet, overhanging eaves, cornice windows, string course dressings, or other architectural decoration, or to rebuild in the whole or in part, or make any addition or alteration to any such external wall, stating his intention, setting out a plan, and giving particulars of the proposed erection, addition, alteration or rebuilding; and every owner of and every contractor for such proposed erection, addition, alteration, or rebuilding, and commencing to work thereon without such notice having been given, shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than five shillings: Provided that no such awning, verandah, portico, or balcony shall be erected in any street less than thirty feet wide.

To apply also to obstructions by digging, &c.

10. The foregoing provisions shall be equally applicable to all obstructions by digging, or excavations, and any person who shall wilfully obstruct or interfere with the Surveyor, or other officer as aforesaid, or any person acting for and under him, or either of them in the exercise of any of the duties or powers by these By-laws, imposed or cast on the said Surveyor, or officer, shall, on conviction, forfeit and pay a penalty of not less than two pounds, nor more than twenty pounds.

Hoards or fences to be erected.

11. Every person intending to build or take down any building within the limits of the Municipality, or to cause the same to be so done, or to alter or repair the outward part of any such building, or to cause the same to be done where any street or footway will be obstructed or rendered inconvenient by means of such work, shall, before beginning the same, cause sufficient hoards or fences to be put up, in order to separate the building where such works are being carried on from the street, with a convenient platform and hand-rail, if there be room enough to leave, as a footway for passengers outside of such hoard or fence, and shall continue such hoard or fence, with such platform and hand-rail as aforesaid, standing in good condition, to the satisfaction of the officer of the Council of the said Borough, during such time as the public safety or convenience requires, and shall in all cases in which it is necessary in order to prevent accidents, cause the same to be sufficiently lighted during the night; and any such person who shall fail to put up such fence, or hoard, or platform with such hand-rail as aforesaid, or to continue the same respectively standing in good condition, as aforesaid, during the period of such building or taking down, or who shall not, while the said hoard or fence is standing, keep the same sufficiently lighted in the night, or who shall not remove the same when directed by the officer of the Council of the said Municipality, within a reasonable time afterwards, shall for every such offence be liable to a penalty not exceeding forty shillings for every day such default is continued.

No turf, gravel, &c., to be removed from streets without permission.

12. Any person who shall form, dig, or open any drain or sewer, or remove, or caused to be removed, any turf, clay, sand, soil, gravel, stone, or other material in or from any part of the carriage or footway of any street or other public place within the said Municipality, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or footway, shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Holes to be enclosed.

13. Any person or persons who shall dig, or make, or cause to be dug or made, any hole, or leave or cause to be left any hole adjoining or near to any street, or public place within the said Municipality, for the purpose of making any vault or vaults, foundation to any house or other building, or for any other purposes whatsoever, or shall erect or pull down any building, and shall not first enclose the same and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Municipality, or shall

keep up or cause to be kept up and continue any such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

Temporary stoppage of traffic for repairs, &c.

14. The Committee for Works or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof to be stopped for the purpose of repairing the same, or for any necessary purpose, and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Obstructing public pathways.

15. If the owner or occupier of any land situate on the side of any street or road in this Municipality shall permit any tree, shrub, or plant, kept for ornament or otherwise, to overhang any footpath or footway on the side of any such street or road, and on demand made by the Council shall not cut, lop, or cause to be lopped, all such trees, shrubs, or plants to the height of ten feet at the least, the said Council by their servants, labourers and workmen, may cut, or cause to be cut or lopped all such overhanging trees, plants, or shrubs, and to remove or burn any such trees, plants, or shrubs so cut or lopped, without being deemed a trespasser or trespassers.

Slop, night-soil, &c., to be conveyed away only at certain hours.

16. Any person or persons who shall drive or cause to be driven any cart or other carriage with any night-soil or ammoniacal liquor therein through any street or public place within the said Municipality between the hours of five in the morning and eleven o'clock at night, or shall fill any cart or other carriage so as to turn over or cast any night-soil, ammoniacal liquor, slop, mire, or channel dirt or filth, in or upon any such street or public place, or shall deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house than shall be directed by the said Council, or by the Inspector of Nuisances; or shall remove night-soil or other offensive matter otherwise than in properly covered and watertight carts, or other vehicles; or shall cause any vehicle used for this purpose to stand on any premises nearer to any road, street, or dwelling-house, than shall be directed by the said Council, or the said Inspector of Nuisances, shall for every such offence forfeit and pay any sum not exceeding five pounds.

Lights on vehicles.

17. Every person whilst driving, leading, or riding upon any cart, carriage, van, buggy, or other vehicle whatsoever drawn by any horse, ass, mule, or other animal through any part of the Municipality, between the hours of sunset and sunrise, shall carry a lighted lamp affixed in a conspicuous place on the off side of such cart, van, waggon, buggy or other vehicle, under a penalty of five shillings for the first offence, and for every subsequent offence not less than ten shillings nor more than two pounds.

Breaking in horses, &c.

18. Any person or persons who shall in any street, road, or public place within the said Municipality, drive any carriage or carriages for the purpose of breaking in, exercising, or trying horses, or shall ride, drive, or lead any horse, mare, or gelding for the purpose of airing, exercising, trying, breaking, or showing or exposing for sale any such horse, mare, or gelding, otherwise than by passing quietly through such streets or public places, shall forfeit and pay any sum not exceeding forty shillings, and any person who shall within the said Municipality furiously or carelessly drive any horse, mare, or gelding, to or from any public watering-place, creek, or river, or pasturage, or elsewhere, shall forfeit and pay any sum not exceeding forty shillings.

Public Property.

Affixing placards on walls, &c.

19. If any person or persons shall paste, or cause to be pasted, or otherwise affix any placard or other paper, or chalk or paint upon any wall, fence, culvert, kerbstone, pathway, handrail, or any other property of the Council, shall forfeit and pay for every such separate offence a sum not exceeding five pounds nor less than five shillings.

Damaging trees.

20. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root-up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place, under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Nuisances.

Dead animals.—Mode of removal.

21. If any animal shall die in any part of the said Municipality, and the owner of such animal shall not cause the same to be immediately destroyed by fire, or so effectually removed and disposed of that no nuisance can possibly result therefrom in any part of the said Municipality, he shall for every such offence forfeit and pay any sum not exceeding five pounds nor less than ten shillings.

Complaints respecting dirty premises, &c.

22. Upon the complaint of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances or any other officer appointed by the said Council shall make an inspection of the premises complained of, and the officer of the said Council shall have the power without any other authority than this By-law to go upon such premises for the aforesaid purpose; and any person who shall personally or by any person in his employment or under his control suffer any waste or stagnant water, or any muck, filth, soil, or other offensive matter in any cellar or place within any dwelling-house or premises within the said Municipality, or shall in like manner suffer the contents of any water-closet, privy, or cesspool to overflow or soak therefrom, shall, for every such offence, forfeit and pay a sum not exceeding five pounds nor less than one pound.

Premises in state to endanger public health.—Houses to be purified on certificate of medical practitioner.

23. If upon the certificate of a duly qualified medical practitioner it appears to the Council that any house or part thereof or the premises occupied in connection therewith within the said Municipality is or are in such a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same, as the case may require; and if the person to whom notice is so given shall fail to comply therewith within such time as shall be specified in the said notice he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default: Provided that no such penalties shall collectively amount to any greater sum than twenty pounds.

PART V.

Noisome and Offensive Trades.

No noisome or offensive trades to be carried on to injury of any inhabitants.

1. No person shall carry on any noisome or offensive trade within the said Municipality so as to injure or be a nuisance as hereinafter stated to the inhabitants thereof.

Definition of "Noisome and Offensive Trades."

2. Any manufacture, trade, calling, or operation in the conducting, following, or carrying on of which, or in consequence of, or in connection wherewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, or smoke shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Municipality, shall be considered a "noisome and offensive trade" within the meaning of these By-laws.

Complaint.—Inquiry and report.—Order of Council thereon. Notice to discontinue, &c., penalty.

3. Upon complaint in writing by any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property as to injure his or her health or the health of any member of his or her family, or to be a nuisance to such householder and to his or her family, the Inspector of Nuisances or any other person or persons appointed by the Council shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint, and shall report thereon to the said Council. And if the said Council shall on the consideration of such report, or after any such further inquiry as may be deemed necessary be of opinion that the said complaint is well founded, and that any manufacture, trade, calling or operation, so complained of and so being conducted, followed, or carried on as aforesaid is a "noisome and offensive trade" within the meaning of these By-laws, notice shall be given to the person or persons conducting, following or carrying on such trade to cease and discontinue the same within such reasonable time not being less than seven days nor more than sixty days as the Council may direct or so to conduct, follow or carry on his, her, or their manufacture, trade, calling, or operation, as that within such reasonable time as aforesaid the same shall wholly and

permanently cease to be noisome and offensive within the meaning of these By-laws, either to the said complainant or to any other resident within the said Municipality. And if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be noisome and offensive as aforesaid within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid shall for the first offence forfeit and pay a sum not less than forty shillings nor more than five pounds; for a second offence, a sum not less than five pounds nor more than twenty-five pounds, and for the third and every subsequent offence a sum of not less than ten pounds nor more than fifty pounds.

Mode of proceeding when "noisome and offensive trade" is about to be commenced.—Penalty.

4. The like proceeding shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation is about to be commenced or entered upon which is likely to prove "noisome and offensive" within the meaning of these By-laws, save and except the notice to be given as aforesaid, shall be given to the person or persons about to commence or enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them not to commence or enter upon the same, or to take such measures as shall effectually and permanently prevent the same from becoming "noisome and offensive" within the meaning of these By-laws to any resident within the Municipality. And any person who shall in any such case commence, enter upon, or continue any such manufacture, trade, calling, or operation, so that the same shall be in any way "noisome and offensive" within the meaning of these By-laws shall for every such offence forfeit and pay a sum of not more than fifty pounds.

Inspector of Nuisances may take legal proceedings.

5. The Inspector of Nuisances or other person appointed by the Council may take legal proceedings against any person or persons committing any offence or offences against any of the By-laws of the said Municipality: Provided always that no such proceedings shall be taken or any information laid against any person except upon the order of the Council or of the Mayor or of the By-laws Committee.

Penalties to be paid over to Treasurer.

6. All penalties under any of these By-laws shall be paid over to the Treasurer of the said Municipality to be appropriated as the Council may direct.

Interpretation of "Mayor" and "Municipality."

7. Whenever in any of these By-laws the word "Mayor" is made use of, it shall, unless the context shall indicate a contrary intention, be construed also to signify and include any Alderman lawfully acting for the time being in the place or stead of the Mayor; and whenever the word "Municipality" is made use of in the said By-laws it shall be understood to signify the "Municipality of Kempsey."

PART VI.

Sewerage and drainage.

No private sewers to be made to communicate with the public sewers without notice.

1. It shall not be lawful for any person without notice to the Council or otherwise than according to such places and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains, sewers, or channels, or into any drain or sewer communicating therewith, and in case any person or persons shall make or branch any private drain or sewer into any of the said public drains or sewers, or into any drain or sewer communicating therewith without such notice, or otherwise than as aforesaid every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds.

Occupiers to repair and cleanse private sewers.

2. All drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council at the costs and charges of the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired and cleansed according to the direction of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

Water from roof, &c.

3. Every owner or occupier of any dwelling house, shop, or other building who shall permit rain-water to fall from any roof, balcony, or other projection, upon any street, road, lane, or footpath, or to flow over the pathway of any such street, road or lane, or shall cause or permit any such roof or rain water to be discharged by any pipe upon any such street, road, lane, or pathway, shall, if such nuisance be not abated within seven days after notice to abate shall have been given by the Council, forfeit and pay for every such offence a sum not exceeding five pounds.

Drains and footpaths.

4. No surface drain shall be made in any footpath, nor any pipes laid under or across the same without the authority of the Council, and no such pipe or drain shall be used for the discharge into any street or roadway of any offensive liquid or matter of any kind whatsoever, and any person who shall so offend shall forfeit and pay any sum not exceeding ten pounds.

Cess-pits and charcoal-filter.

5. That the owners or occupiers of houses who have laid pipes to convey slops, suds, refuse, or dirty water of any kind whatever into any street, water-channel, water-course, water-hole, river, creek, or canal shall construct a cess-pit and charcoal filter of a design hereinafter mentioned to each such house; such cesspit to be made according to a plan and specifications to be seen at the Council Chambers, the said cess-pit and filter to be constructed to the satisfaction of the Works Committee or any duly authorised officer. And any such owner or occupier of any such house who shall refuse or neglect to construct such cess-pit and charcoal-filter within seven days after receiving a written notice signed by the Mayor or Council Clerk or other duly authorised officer, shall forfeit any sum not exceeding five pounds nor less than five shillings.

Refusal to cleanse cess-pits, &c.

6. Should the owner or occupier of any such house refuse or neglect to cleanse such cess-pit and charcoal-filter after twenty-four hours' notice from a duly authorised officer, he shall forfeit any sum not exceeding two pounds nor less than five shillings.

Drains for discharge of surface water from land.

7. Every owner or occupier of land in, adjoining to, or near any street, if such land shall be so situated that surface or storm-water from or upon the same shall overflow or shall tend naturally, if not otherwise discharged, to overflow any footway of such street, shall, within seven days next after the service of notice by the Council for that purpose, construct and lay from such point upon such land, being near to the footway, as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel, at the outer edge of the footway to the said channel, and through, under, and transversely to the footway, and keep in good condition such covered drain or trunk, as and subject to the inspection of the Council or its proper officers; and in default of compliance with any such notice within the period aforesaid, or with the provisions of this section, such owner or occupier shall forfeit any payment not exceeding five pounds. And if, within seven days after such conviction, such owner or occupier shall still have failed to comply with such notice, or be otherwise in default, as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds; and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds. And every such owner or occupier who shall still have made default as aforesaid for more than seven days after such second or any future conviction shall be held guilty of a further offence within the meaning of this section.

PART VII.

Public Libraries, &c.

Hours, &c.

1. The Library shall be known as the Kempsey Free Library; shall be under the control or management of the Council; shall be open to the public daily (Sundays, Good Friday, and Christmas Day and public holidays excepted) for such hours as may from time to time be fixed by the Library Committee.

Visitors' book to be signed.

2. Every person using the Library shall immediately upon entering the same write his or her name and address in a book to be kept for such purpose at such Library, and to be called the "Visitors' Book;" and if such person shall be unable to write, then such name and address may be so written by any other person, or shall be so written by the proper officer of the Council at such Library at the request of such person, and no person who shall refuse to comply with this regulation shall be permitted to enter or remain in such Library, and it shall be the duty of the officer of the Council in charge of such Library to enforce this By-law.

Misconduct, &c., in Library.

3. Every person who shall, being intoxicated, enter or remain in such Library, or who shall use therein any abusive, improper, or unbecoming language, or who shall by unnecessary loud talking, or any unnecessary noise or otherwise disturb or annoy the persons using or resorting to such Library, or who shall without lawful excuse, but without felonious or larcenous intent, remove any property from such Library shall forfeit and pay any sum not less than ten shillings nor more than ten pounds; and every such person may be forthwith removed by any officer of the Council in charge of such Library.

Applicants for books, &c., to be served in due order.

4. Every person who, at any such Library, shall desire to read or to refer to any book or other publication placed or deposited in such Library for public use, shall have the same handed to him in his turn by the officer in charge of such Library or his assistant, and shall have the exclusive use in

such Library of such book or other publication. But no person shall remove any such book or other publication from such Library; and it shall be the duty of the officer of the Council in charge of such Library to carry out and enforce this By-law in every respect.

Applications for use of books, &c., to be made to officer in charge.

5. Any person who may at such Library desire to read or to refer to, or to use or examine any such book or publication as aforesaid, shall apply for the same to the officer of the Council in charge of such Library, and shall return the same to such officer after having read, referred to, used, or examined the same; and it shall be the duty of such officer to carry out and enforce this By-law in every respect.

Loan or deposit of books or apparatus, &c., on special conditions.

6. It shall be lawful for any person, with the consent of the Council, to lend to, or deposit at, such Library any book or publication, or any apparatus, model, or specimen for public use or inspection, subject to such special restrictions as to such use or inspection as such person may prescribe; and the officer of the Council in charge of such Library shall in such case hold every such book, publication, model, or specimen in trust for the person so lending or depositing the same, and shall carry out and enforce such restrictions as such person may have so prescribed as aforesaid.

Record of donations.

7. A record shall be made of every donation to such Library which book shall be opened to the inspection of all persons visiting such Library.

Copy of By-laws to be kept at Library, &c., for reference.

8. A copy of this "Part" of these By-laws shall be kept at such Public Library, and it shall be the duty of the officer of the Council in charge of such Library to allow visitors to the same who may desire so to do to refer to any such copy.

Penalty for damaging visitors' book, &c.

9. Any person who shall wilfully damage any visitors book, catalogue, copy of By-laws, or other book or record kept at such Library for the general uses thereof, shall for every such offence forfeit and pay any sum not less than five shillings nor more than ten pounds.

PART VIII.

For the Regulation of Public Vehicles.

By-laws for the regulation and licensing of public carriers' carts, water-drawers, and public vehicles, omnibuses, cars, hackney carriages, cabs, water-carts, drays, carts or vans, and the drivers and conductors of passenger-carrying vehicles.

All vehicles to be licensed.

1. No vehicle shall ply for hire within the Municipality unless the same be duly licensed in the manner herein described.

Requisition to be made for license.

2. Before any license shall be granted in respect of any such vehicle, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of the Schedule. A hereto, or to the like effect, and duly fill up and sign the same, and deliver it to the Council Clerk.

Condition under which licenses to be granted.

3. No license shall be granted in respect of any vehicle which, in the opinion of three Aldermen who shall be appointed by a resolution of the Council of the said Municipality, is unsafe, or in bad repair, or otherwise unfit for the accommodation and conveyance of passengers therein, nor until the number of such vehicle be painted thereon on a plate or plates affixed thereon outside on the panel of each door of such vehicle, or on such other place or places, and in such manner, as the said three Aldermen may direct.

Licenses, and how to be issued.

4. Licenses for vehicles plying for hire as aforesaid shall be in the form contained in the Schedule hereunto annexed marked with the letter B, or the like effect; and any person plying any vehicle for hire with passengers without such license shall be deemed guilty of a breach of these By-laws.

Licenses to be under Corporate Seal.

5. Every license granted under these By-laws shall be under the Common Seal of the Council, and signed by the Mayor, and countersigned by the Council Clerk, upon production of a certificate signed by the Aldermen, who shall be appointed as aforesaid, and shall be in force from the date of such license until the 31st day of December next ensuing, subject to the conditions in By-law 10; and no such license shall include more than one vehicle: Provided that where the licensed vehicle shall be under repair, if the proprietor shall so desire, he may be permitted to substitute another for a period to be then specified, and endorsed on the license signed by the Mayor as aforesaid.

Age of drivers.

6. No licensed passenger-carrying vehicle as aforesaid shall be driven by any person who shall be under the age of seven years.

Licenses to be made out by the Council Clerk.

7. All licenses shall be made out by the Council Clerk, and numbered consecutively.

Owner of vehicle.

8. The person in whose name a license shall appear to have been obtained shall be *prima facie* deemed to be the owner of the vehicle in respect of which the same shall have been taken out.

Inspector of vehicles.

9. The three Aldermen aforesaid shall, as often as they may deem it necessary, cause an inspection to be made of all or any licensed vehicles, and of the harness, horse or horses; and if any such vehicles, harness, horse or horses shall at any time be found by the said Aldermen to be unfit for use, the Mayor may cancel the license of such vehicle on the written report of the said Aldermen.

Number of license to be painted on vehicle.

10. The number of the license granted to every omnibus or car, in figures not less than four inches in height, and for every hackney carriage or cab, in figures not less than two inches in height, of proportionate breadth, white upon a ground of black, shall be painted outside on the panel of the door or doors of such vehicle, or on such other part or parts thereof as the Aldermen aforesaid shall direct, and such numbers shall be kept legible and undefaced during all the time such vehicle shall ply for hire.

Vehicles to carry lights.

11. All vehicles licensed to carry passengers shall be provided with suitable carriage lamps, to burn candles, one to be fixed on each side of the drivers' box, and a third one inside of all omnibuses and closed coaches, and the same shall be lighted not later than one hour after sundown, and be kept burning while the vehicles are on the stand or running in the streets with or without passengers.

Number of passengers to be carried.

12. When any carriage is submitted for inspection by the owner or other applicant with a view to obtain a license, the Aldermen appointed by the Council for that duty shall then determine upon the number of passengers the vehicle shall be permitted to carry and give a certificate to that effect, such number to be mentioned in the license.

Number of passengers, &c., to be painted on vehicle.

13. The number of passengers the vehicle is licensed to carry shall be painted or printed in legible characters and affixed within and without the vehicle in such places as the inspecting Aldermen shall direct.

Vehicle not to be drawn faster than a walk past place of worship on Sunday.

14. No licensed vehicle shall be drawn by an animal or animals past a place of public worship on Sundays during divine service at a faster pace than a walk, and no bugle, horn, whistle, or other instrument shall be used on that day for the purpose of attracting the attention of passengers.

Vehicle not to carry greater number of passengers than licensed for.

15. No driver or conductor shall admit, to the inside, or allow on the outside of any omnibus at any one time a greater number of passengers than the number it shall be licensed to carry inside or outside, as the case may be; and no omnibus shall be licensed for more passengers than the same will accommodate upon fit seats properly cushioned, allowing for each passenger a space of eighteen inches, measuring in a straight line lengthwise on the front of each seat, nor shall any vehicle be taken off the line of road for which it shall be licensed: Provided that no child under five years of age sitting on the lap shall be deemed to be a passenger within the meaning of these By-laws; no passenger to carry more than one child.

Driver, &c., not to refuse to carry passengers.

16. No driver or conductor of an omnibus shall neglect or refuse to admit and carry any person for whom there is room, and to whom no reasonable objection can be made under these By-laws; nor except in cases of accident or other unavoidable cause shall any driver or conductor stop such vehicle upon any place where foot passengers usually cross the carriage way.

Fare to be paid on taking seats.

17. Any person having taken his seat in or upon an omnibus shall pay the fare when demanded after the commencement of his journey.

Property found in vehicles to be delivered at Council Clerk's office.

18. The driver of any carriage and conductor of every omnibus shall carefully examine his vehicle immediately after setting down his fare, and in every case of property having been left in any vehicle by any person having used or hired the same, such property, if found by another passenger or person, shall be delivered to the driver or conductor, who shall deliver the same, with any other property found by him, within eighteen hours after such finding, to the Council Clerk's office, and there shall deposit it; and no owner shall detain any property delivered to him by any driver or conductor in his employment longer than the time before mentioned, but shall deposit it at the office at the Council Chamber, with the Council Clerk or his assistant.

License fees to be paid to Council Clerk

19. For every license issued under the By-laws in force for the time being in that behalf within the said Municipality, there shall be paid to the Council of the said Municipality, by delivering the same to the Council Clerk, or other person authorised to receive the same, the several sums mentioned or set forth in Schedule C to these By-laws for the general purposes of the said Borough.

Terms to be applied to licensed vehicles.

20. Whenever the word "vehicle" shall be used in these By-laws, the same shall be construed to extend and apply to any omnibus, car, hackney carriage or cab. The word "omnibus" shall extend and apply to any vehicle upon four wheels drawn by two or more horses, having seat accommodation for more than ten passengers and a driver. The word "car" shall extend and apply to any vehicle upon two or four wheels, drawn by one or more horses, having seat accommodation for not more than ten or less than five passengers and a driver. The word "hackney carriage" shall extend and apply to any vehicle upon four wheels, drawn by one or more horses, and having seat accommodation for not more than five passengers and a driver, and in respect of which a hackney carriage license, within the said Municipality, shall have been obtained. The word "cab" shall extend and apply to any vehicle upon two wheels, having seat accommodation for not more than two passengers and a driver, in respect of which a cab license, within the said Municipality, shall have been obtained.

Passengers to be taken up, &c.

21. No driver of any hackney carriage or cab shall refuse to take up any passenger or passengers unless already engaged for hire, nor refuse to convey such passenger or passengers to such place or places within the said Municipality as he, she, or they may reasonably desire, and every person failing to comply with this By-law shall forfeit and pay a penalty or sum not exceeding five pounds for every such offence.

Driver not to leave his horse or horses.

22. No driver of any licensed vehicle shall be or remain at such a distance from his horse or horses, while attached to his vehicle anywhere within the said Municipality as not to have immediate and full control over the same; and every person so doing shall for every such offence forfeit and pay a penalty or sum not exceeding five pounds, nor less than five shillings.

Penalty to be enforced for breach of By-laws.

23. All proprietors and drivers of licensed vehicles shall at all times be amenable to and observe and comply with the By-laws for the time being in force for the care and management of the public roads, public streets, and public thoroughfares, within the said Municipality, and for every breach thereof shall incur the same penalties as other persons.

24. Any person offending against any of these By-laws shall, except when otherwise expressly provided, forfeit and pay a sum not exceeding two pounds nor less than five shillings for every such offence.

SCHEDULE A.

A Requisition for License.

To the Municipal Council of the Borough of Kempsey.

I, _____, residing at _____ do hereby request that a license may be granted for and in respect of the under-mentioned vehicle to ply for hire within the limits of the said Borough.

Dated at _____, this _____ day of _____ A.D. 189 _____.

Description of vehicle.

SCHEDULE B.

Form of License.

This is to certify that the undermentioned passenger-carrying vehicle is licensed to ply for hire as an omnibus, hackney carriage, or cab (as the case may be) from the day of _____ to the 31st day of December, 18 _____, inclusive, within the Borough of Kempsey, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Description of vehicle.

SCHEDULE C.

A TABLE of Rates to be paid in respect of Licensed Vehicles.

	On and after the first day of January.	On and after the first day of April.	On and after the first day of July.	On and after the first day of October.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
For every Omnibus, Car, Hackney Carriage, or Cab.....	2 0 0	1 10 0	1 0 0	0 10 0

PART IX.

Ferries.

1. The Council shall, by resolution, establish such ferries as may be required for the public convenience, and may lease or otherwise work the same, and shall have power to collect thereat the tolls mentioned and set forth in the schedule hereto annexed.

SCHEDULE OF TOLLS.

	s. d.
For every foot passenger	0 1
For every child attending school	Free
For every horse, mare, gelding, ass, or mule, drawing or not drawing.....	0 3
For every dray or cart, with two wheels only	0 3
For every waggon, carriage, or other vehicle, with four wheels	0 6
For every ox or head of neat cattle, drawing or not drawing, not exceeding ten	0 3
For every additional head over ten and not exceeding fifty.....	0 2
Over fifty	0 1
For every sheep, lamb, pig, or goat.....	0 1
Goods per hundredweight or part of hundredweight ..	0 3

The above tolls to be doubled from 11 p.m. to 5 a.m. A single fare to cover double journey during same day, from 5 a.m. to 11 p.m.

2. All leases shall be sold by public auction or by tender, as the Council may determine. Such sales shall be advertised in some paper published in the Borough, and given not less than fourteen days' notice. The upset price of each ferry to be fixed by the resolution of the Council.

3. The purchaser shall, at the time of sale, if by auction, or satisfaction of acceptance by tender, pay to the Council one month's rent, and provide within seven days two sureties who are willing to enter with him into a bond to the amount of £50. Such sureties to be approved by the Council. All expenses connected with the bond and lease to be paid by the lessee.

4. The lessee shall pay, at intervals of one month, one-twelfth of the annual rent in advance, upon such days as may be fixed in the lease, to such person as the Council may appoint to collect the same. In default of payment the lease will become void and forfeited.

5. The lessee must, either himself, or by his servants, ply the punt and boat at all hours, and without unnecessary delay for the convenience and accommodation of the public.

6. The lessee shall, immediately on taking possession, put up in some conspicuous place at or near the ferry, a board with a table printed in distinct and legible letters, containing at the top the name of the ferry and a list of the tolls and dues payable thereat, and the name of the lessee.

7. No tolls or dues shall be demanded or taken in addition to those provided for in the list hereinbefore referred to, and no tolls or dues shall be demanded in respect of any horses or carriages, or in respect of any person attending a funeral, or from any minister of religion in the exercise of his duty, or from any person going to or from a place of worship on Sundays, Good Friday, or Christmas Day, or policemen on duty, or from any member or officer of the Council while upon the business of the Council.

8. Any person who shall be guilty of a breach of these By-laws shall be deemed guilty of an offence, and shall be liable to a fine not exceeding five pounds, to be recovered before any two justices of the peace in court of petty session assembled.

9. Tolls to be doubled from 11 p.m. to 5 a.m. A single fare to cover double journey during same day from 5 a.m. to 11 p.m.

PART X.

Planting Trees.

1. The Council may from time to time determine what streets or recreation grounds shall be planted with trees, and may cause trees or shrubs to be planted in such street or recreation ground in accordance with these By-laws, in the following manner, that is to say:—Where the streets are over one and a half chains wide, at a distance of eighteen feet from the kerbing, and at a distance of not less than thirty feet apart; where the streets are one chain or less wide, at a distance of fifteen feet from the kerbing, and at a distance of not less than thirty feet apart; and upon recreation grounds, in accordance with a plan to be approved of by resolution of the Council.

2. The trees to be planted in the public streets shall consist of such as may be authorised by resolution of the Council, and such other trees in addition as the Council may determine.

Made and passed by the Municipal Council of the Borough of Kempsey this 23rd day of April, in the year of our Lord, one thousand eight hundred and ninety-four.

(L.S.) WM. THOS. DANGAR,
Council Chambers, Kempsey, Mayor.
JAMES W. WILSON,
Council Clerk.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF SMITHFIELD AND FAIRFIELD—ADDITIONAL BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.Chief Secretary's Office,
Sydney, 23rd October, 1894.**SMITHFIELD AND FAIRFIELD MUNICIPALITY.—ADDITIONAL BY-LAW.**

THE following additional By-law, made by the Council of the Municipal District of Smithfield and Fairfield, under the "Municipalities Act of 1867," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

MUNICIPALITY OF SMITHFIELD AND FAIRFIELD.—ADDITIONAL BY-LAW.

No receipt for rates or other money paid to this Council shall be binding unless drawn on a form bearing the title of this Municipal District. Every such form shall be taken from a book with corresponding butts, and no such book shall be used until its issue shall have been authorized by the Council in ordinary meeting, and the signature of the Mayor placed on the cover, such issue to be recorded in the Minute Book and in a ledger account; and all books so issued, used or unused, to be produced at time of audit for the inspection of the Auditors, who shall certify to having inspected all such books issued during the period under audit or bearing on the transactions of such period. Any breach of the foregoing additional By-law shall be punishable by a penalty of not less than £2.

Passed at a meeting of the Municipal Council of Smithfield and Fairfield, on 8th March, 1893.

EDWARD FARR, Council Clerk.

NUISANCES PREVENTION ACT, 1875.

(MUNICIPAL DISTRICT OF PORT MACQUARIE—ADDITIONAL BY-LAW.)

Presented to Parliament, pursuant to Act 39 Vic. No. 14, sec. 18.Chief Secretary's Office,
Sydney, 22nd June, 1894.

PORT MACQUARIE MUNICIPALITY.—ADDITIONAL BY-LAW.

THE following Additional By-law, made by the Council of the Municipal District of Port Macquarie under the "Nuisances Prevention Act, 1875," having been approved by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the above-cited Act.

GEORGE R. DIBBS.

MUNICIPAL DISTRICT OF PORT MACQUARIE.

ADDITIONAL BY-LAW passed by the Council of the Municipal District of Port Macquarie, under the provisions of the Nuisances Prevention Act, 1875, 39 Victoria No. 14, for regulating the construction of cesspits:—

All cesspits to be built within the Municipal District of Port Macquarie as follows:—The walls shall be built of nine (9) inch brickwork, and the floor of cesspit to be of brick on edge; the whole of the brickwork to be laid in cement. Walls and floor rendered in cement, half-inch thick, outer walls to be carried up four (4) courses above the level of the ground. The superstructure to be built according to plans and specifications to be supplied by the Council. The erection of the whole to be under the Nuisance Inspector. Any person building closet or cesspit in any other way without the permission in writing of the Council or the Inspector of Nuisances shall, on conviction before two Justices of the Peace, forfeit and pay any sum not less than forty shillings and not more than five pounds.

Made and passed by the Council of the Municipal District of Port Macquarie, this 16th day of October, 1893,—

GEORGE W. EDWARDS, Council Clerk.

(L.S.) JAMES BUTLER,
Mayor.

MUNICIPALITIES ACT OF 1867, AND NUISANCES PREVENTION ACT, 1875.

(BOROUGH OF STOCKTON—ADDITIONAL BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vic. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Chief Secretary's Office,
Sydney, 25th June, 1894.

STOCKTON MUNICIPALITY.—ADDITIONAL BY-LAWS.

THE following additional By-laws, made by the Council of the Borough of Stockton under the "Municipalities Act of 1867" and the "Nuisances Prevention Act, 1875," having been respectively confirmed and approved by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

GEORGE R. DIBBS.

BOROUGH OF STOCKTON.

ADDITIONAL BY-LAWS, framed under the Municipalities Act of 1867, to operate in conjunction with the existing By-laws confirmed the 15th of April, 1891, save such as may by this enactment be repealed.

PART I.

Mayor or Chairman may address meeting.

Section 44.—Section 44 of this Part of these By-laws, as confirmed on the said 15th April, 1891, is hereby repealed, and shall now read as follows:—

The Mayor or Chairman shall have the same right as any other Alderman to speak once upon each subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing), but shall be considered as still presiding.

Calls of the Council.

Section 62.—Section 62 of this Part of these By-laws, as confirmed on the said 15th April, 1891, is hereby repealed, and shall now read as follows:—

How calls of the Council are to be made, &c.

When a call of the Council has been duly ordered, as hereafter specified, the Council Clerk shall call the names of all the Aldermen of the Council in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent, a record shall be made of such absence: Provided that no call of the Council shall be made at any meeting of the Council unless due notice of such call shall have been entered on the business sheet for that meeting.

PART IV.

Slops, night-soil, &c., to be conveyed away only at certain hours, &c.

Section 27.—This section shall be amended in that part where it defines the hours during which night-soil or ammoniacal liquor may be driven, or caused to be driven, through the streets of the Borough to read, "That such work must not be done during the hours between half-past five in

the morning and half-past ten in the evening." In all other particulars this By-law shall remain as confirmed on the said 15th day of April, 1891.

Riding or driving furiously, carrying lights at night, &c.

Section 29.—All that part of this section 29 of this Part IV of these By-laws, confirmed on the said 15th day of April, 1891, shall remain in force, and there shall be added thereto the following:—All vehicles (other than bicycles or tricycles) travelling within the said Borough of Stockton after nightfall shall be provided with two suitable lights fixed in front of the vehicle, one on each side of the driver; and every bicycle or tricycle travelling within the said Borough after nightfall shall also be provided with one suitable light fixed in a conspicuous part of the machine where it may be easily seen by travellers approaching from an opposite direction. These lights shall be lighted within one hour after sundown, and shall be kept burning until dawn when the vehicles or machines are in use. Every person convicted of a breach of this part of this By-law with reference to carrying lights shall forfeit and pay a sum not exceeding £10 and not less than 5s.

PART X.

The whole of the five sections of Part 10 of these By-laws are hereby repealed.

AMENDMENT to the By-laws of the Borough of Stockton, under the Nuisances Prevention Act of 1875, as confirmed on the 22nd of March, 1893:—

Section 17.—Section 17 of these By-laws is hereby repealed, and shall now read as follows:—

Night-soil shall be removed only during the hours between half-past ten p.m. and half-past five a.m., and any person making a breach of this Regulation shall upon conviction forfeit and pay a sum not exceeding £2 and not less than 10s. for every offence.

Made and passed by the Borough Council of Stockton, with the adixture of the Corporate Seal of the Borough, on the 12th day of June, 1894.

(L.S.) J. W. HESTER,

H. A. GRAHAM, Council Clerk.

Mayor.

(SECOND SESSION.)

NEW SOUTH WALES.

**MUNICIPALITIES ACT OF 1867, AND NUISANCES
PREVENTION ACT, 1875.**
(MUNICIPAL DISTRICT OF DUNGOG—BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vic. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Chief Secretary's Office,
Sydney, 20th October, 1894.

DUNGOG MUNICIPALITY.—BY-LAWS.

The following By-laws made by the Council of the Municipal District of Dungog, under the "Municipalities Act of 1867," and the "Nuisances Prevention Act, 1875," having been respectively confirmed and approved by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Acts.

JAMES N. BRUNKER.

BY-LAWS OF THE MUNICIPAL DISTRICT OF DUNGOG.

SECTION I.

BY-LAWS made and passed by the Municipal Council of Dungog, for regulating the proceedings of the Council and the duties of their officers and servants; for compelling residents to keep their premises clean; and generally for the proper government of the Municipal District, in accordance with the requirements of the "Municipalities Act of 1867."

1. The ordinary sittings of the Council shall be on every alternate Friday in every month, at the hour of 7.30 p.m., unless such day shall be a public holiday; in that case the meeting shall be held on such other day as the Mayor shall appoint.

2. If the Mayor shall be absent at the expiration of fifteen minutes after the time appointed for the holding of any meeting, the Aldermen present shall choose a chairman, provided always that if the Mayor shall afterwards attend, such Alderman shall leave the chair, to be taken by the Mayor.

3. Whenever any meeting shall lapse or be adjourned for want of a quorum, the names of the members present shall be recorded by the Council Clerk.

4. The business of such ordinary meeting shall be transacted in the following manner, viz. :—

- (1.) Reading and onfirming minutes of previous meeting or meetings.
- (2.) Petitions (if any) to be presented and dealt with.
- (3.) Correspondence to be read and dealt with.
- (4.) Reports from Committees and minutes from the Mayor (if any) to be presented, and orders made thereon.
- (5.) Payments.
- (6.) Questions as to any matter under the jurisdiction or within the official cognizance of the Council to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council, or any of the Committee or Officers, to be made.

Business at special meetings.

5. At special meetings of the Council the business, after the minutes shall have been read and confirmed, which shall be done in the same manner as at any ordinary meeting, shall be taken in such order as the Mayor or Alderman at whose instance the special meeting shall be called may have directed; and no other than the special business for which the meeting has been convened shall be entertained.

Powers to suspend By-laws.

6. The Council shall have power to suspend pro tem one or more of the By-laws, provided that no suspension shall be allowed for the purpose of voting money, and that two-thirds of the members present consent.

Postponement of debate on motion.

7. Any debate or order of the day when called on may be postponed to another time, to be duly specified: Provided that no discussion shall be allowed upon such motion for adjournment, and the Alderman upon whose motion any debate shall be adjourned shall be entitled to open the debate on resumption.

Notices of motion, &c., to be numbered as received, and preserved until matter disposed of.

8. All notices of motions, &c. for consideration at general meetings shall be delivered to the Council Clerk, at least four days before such meeting, in writing, and shall be numbered by him as they are received, and entered on the business paper according to their number, and each notice shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of: Provided, however, that the person giving or forwarding any such notice of motion, &c., shall be at liberty to withdraw the same at any time before the making up of the business paper.

Motions to be in writing and seconded.

9. All resolutions proposed, and all amendments shall be submitted in writing, and no motion or amendment shall be discussed unless and until it be seconded.

Motions not to be withdrawn.

10. No motion, of which notice had been given, shall be withdrawn if any Alderman objects, and if any Alderman who has given notice of motion fails or declines to move it, the Mayor or any other Alderman may move the same.

Questions may be put.

11. No questions shall be put to the Mayor when in Council requiring the production of papers, or which cannot be replied to without reference to books or papers, unless twenty-four hours notice in writing shall have been given thereof to the Council Clerk.

Amendments may be moved.

12. When a motion shall have been moved and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed until it be seconded.

Only one amendment at a time.

13. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of; if any amendment be carried the amendment shall become the question before the Council, whereon any further amendment may be moved.

Motions for adjournment.

14. Any motion for adjournment, if seconded, shall be put immediately without discussion. If such motion be negatived, the business then under consideration or next in order on the business paper shall be discussed before any notice for adjournment may be moved.

Any Alderman may divide Council.

15. It shall be competent for any Alderman to divide the Council on any question, both in full Council and in Committee of the whole Council; and no Alderman shall leave his seat or place till the name of the Alderman, and how voting, shall have been taken by the Council Clerk or person officiating for him. All divisions of the Council shall be entered on the minutes of the proceedings. Any Alderman who shall be present when a division is so called for, and shall not vote on such division (not being disabled by law from so voting), shall be liable for every such offence to a penalty of not less than five shillings or more than two pounds.

Motions that would rescind.

16. No motion, the effect of which if carried would be to rescind any resolution passed by the Council during the current municipal year, shall be entertained, unless at a special meeting of the Council called for that purpose; and no such motion, if negatived by the Council at such special meeting, shall be again entertained during the same Municipal year.

No Alderman to speak twice on the same question or amendment, except in Committee.

17. No Alderman shall speak twice on the same question unless in Committee, or in explanation where he shall have been misrepresented or misunderstood, and then only by leave of the Mayor or Chairman: Provided that any Alderman, although having previously spoken, may speak once on every amendment, and the mover of every question shall always have a right of final reply.

Alderman to stand when speaking, &c.

18. Every Alderman shall stand while speaking and shall address the Chair, and all members of the Council shall on all occasions when in such Council address and speak of each other by their official designation, as Mayor, Chairman, or Alderman, as the case may be; and no Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order.

Privilege of Mayor or Chairman.

19. The Mayor or Chairman shall have the same privilege as any other Alderman in making or seconding a motion, and have the right of speaking on any subject or amendment introduced. The Mayor or Chairman shall rise when so speaking, but shall be considered as still presiding.

Offensive personal statements.

20. No Alderman shall make offensive personal reflections upon or impute discreditable motives to any other Alderman. Any Alderman so offending shall, immediately upon being thereto requested by the Mayor or presiding Alderman, withdraw the offensive expressions and retract any such imputation of motive, and make an apology satisfactory to the Council. Any Alderman declining so to apologise and to withdraw the offensive expressions or to retract the imputations of motive, shall be liable on conviction to a fine or penalty of not less than one pound nor more than five pounds for the first offence, and on the second conviction for a like offence he shall be liable to a fine or penalty of not less than two pounds. Any Alderman may move without notice that the offensive words be taken down, and when this has been done, it shall be prima facie evidence of such words having been used.

Committee of the Council.

21. The rules of the Council shall be observed in Committee of the Whole, except the rule as to standing and that limiting the number of times of speaking. It shall be competent for any Alderman to move that any subject matter, motion, or order of the day, be considered in Committee; and should the Council so decide that such business be considered in Committee, the Council, as may thereupon be decided, may go into Committee or otherwise.

Points of Order.

22. Any Alderman may at any time call the attention of the Mayor or Chairman to any Alderman being out of order, and every point of order shall be taken into consideration immediately upon its arising, and the decision of the Mayor or Chairman thereon shall be conclusive.

Speaking.

23. Any Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Petitions.

24. Any Alderman presenting a petition shall satisfy himself that the wording thereof is respectful and in order. All petitions shall be received only as the petitions of the persons signing the same; and no debate shall take place upon the presentation of a petition until notice has been given in the usual manner.

Committees.

25. There shall be three standing Committees—the Finance, Improvement of Works, and By-laws Committees—and each such Committee shall consist of three Aldermen, and may be called together at any time by direction of any one member of such Committee.

Reports from Committees.

26. All reports upon standing Committees to be presented in writing and signed by the Chairman or any two members of such Committee. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction by a minute in writing.

Tenders for Works.

27. Tenders to be called for all work estimated to exceed £10 (ten pounds) in value, and if the tender is considered excessive, the Council may have the work done by day labour.

28. The Mayor, or in his absence any two Aldermen of Works Committee may order any sum not exceeding ten pounds to be expended in repairing any public work under the control of the Council which may be suddenly damaged, and such order shall be reported at the next meeting of Council.

Payment how made.

29. No money shall be paid by the Council until the account for the same shall have been examined by the Finance Committee and approved of by the Council.

Common seal, &c.

30. All charters, deeds, muniments, and records of the Municipal District of Duncraig shall be kept in the office thereof in the custody of the Council Clerk, unless the Council shall otherwise order. All papers, deeds, contracts, and agreements requiring to be sealed with the common seal shall be witnessed by the Mayor and the Council Clerk. For the purpose of authenticating documents, the common seal may be attached thereto, witnessed by the Mayor and Council Clerk, for which a fee of five shillings shall be paid.

Rates to be paid.

31. The rates of the Municipality shall be collected half-yearly, and shall be due and payable on such days as the Council shall determine at the time of making the assessment, or on such other day as the Council may direct. All persons liable to pay rates or assessments shall pay the same to the Council Clerk, or such other officer as may be appointed for that purpose, at the Municipal Council Chambers during office hours, on such days as may from time to time be appointed by the Council.

Duties of the Council Clerk.

32. The Council Clerk, in compliance with the "Municipalities Act of 1867," or by the present or any other By-laws made thereunder, shall perform the following duties, namely:—

- (1.) Attend all Council meetings.
- (2.) Attend all Committee meetings.
- (3.) Attend all Courts of Revisions and Appeal.
- (4.) Notify the members of the Council to attend all Council or Committee meetings.
- (5.) Take notes of all meetings and prepare reports of all Committees.
- (6.) Conduct all correspondence ordered by the Council, under the direction of the Mayor, and give all other officers instructions as directed by the minutes.
- (7.) To see that the accounts are audited and the balance-sheet duly submitted twice a year, within the times specified by law.
- (8.) To see to the gazetting all By-laws and necessary advertisements.
- (9.) To see that the Assessment Books and the Municipal lists and rolls are duly prepared and made out and exhibited at the Council Chambers.

- (10.) Make all necessary arrangements for the elections, preparing all papers, &c., for presiding officers and poll clerks.
- (11.) Prepare all bonds of officers, see that the guarantees are given and arrangements duly signed, &c., and reports sent to the Council.
- (12.) Advise with the officers from time to time as to their duties and the mode of carrying them out.
- (13.) See that all levels and names of streets have been duly advertised as provided for by law, and authenticated by the Mayor's signature.
- (14.) To keep a copy of all correspondence.
- (15.) To bring under the notice of the Mayor any matter or thing requiring his prompt attention.
- (16.) He shall likewise have charge of all the records of the Council, except such books or documents as may be entrusted to any other officer of the Council, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council.
- (17.) He shall enter into a bond for the same amount as his salary for the faithful discharge of his duties.

SECTION II.

Determining the time and modes of Collecting and enforcing payment of rates, either current or in arrear.

Rates—Levying Rates—Collecting of Rates.

1. All rates levied or imposed by the Council under sections 164, 165, 166, 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may, by resolution at the time of making or imposing such rates on any of them, have appointed. All such rates shall be paid at the Council Chambers at the hours appointed by the Council for that purpose.

Rate Collector to furnish list of defaulters.

2. Any person not paying his or her rates at the time appointed shall be deemed a defaulter, and it shall be the duty of the Rate Collector to furnish the Mayor and Council, or any Committee as directed, with lists of all persons so in default. In the event of any premises being wholly or partially destroyed by fire, the Council shall have power to accept any equitable proportion of the assessed rates for the remainder of the Municipal year.

Bailiff.

3. The Bailiff shall be appointed by a resolution of the said Council, and shall be at any time removable by a like resolution.

Bailiff's Sureties.

4. The Bailiff shall find two sureties to the satisfaction of the Mayor to the extent of twenty-five pounds each for the faithful discharge of his duties.

Duty of the Bailiff.

5. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

Warrant of Distress.

6. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorised to perform the duties of that office.

Distress and sale, &c.

7. If the sum for which any such distress shall have been made shall not be paid, with costs as hereafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Municipal District of Dungog, as the Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any), that may remain after deducting the amount of the sum distrained for and costs as hereinafter provided, to the owner of the goods so sold on demand of such surplus by such owner.

Inventories.

8. At the time of making a distress, the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the ratepayer on demand at any time within one month after making such distress.

Goods may be impounded.

9. The Bailiff making a distress as aforesaid may impound or otherwise secure the goods or chattels so distrained of what nature or kind soever in such place or places, or in such part of the land or premises chargeable with rates as will be most fit and convenient for this purpose, and it shall be lawful for any person whomsoever, after the expiration of five days as hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner to direct order of sale.

10. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

11. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

12. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this By-law the costs and charges in the Schedule hereto annexed marked C.

SCHEDULE A.

I, _____, Mayor of the Municipal District of Dungog, do hereby authorise you _____, Bailiff of the said Municipal District of Dungog, to distrain the goods and chattels in the dwelling-house, or in or upon the land and premises of _____, situate at _____, for the sum of £ _____, being the amount of Municipal rates due to the said Municipal District of Dungog to the day of _____, for the said dwelling-house, land, or premises as the case may be, and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____, 18 _____.

Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of a warrant under the hand and seal of the Mayor of the Municipal District of Dungog, dated _____, distrained the following goods and chattels in the dwelling-house or in and upon the land and premises of _____, situate at _____, within the said Municipal District of Dungog, for the sum of £ _____, being the amount of rates due to the said Municipal District of Dungog to the day of _____, 18 _____.

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy.....	2	0
For making and furnishing copy of inventory	2	0
For man in possession each day or part of a day	5	0
For sale, commission, and delivery of goods per pound sterling on proceeds of sale	1	0

SECTION III.

Streets and public places, &c.

New roads to be reported upon, &c.

1. No new public road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by the Committee for Works, and reported upon to the Council by such Committee.

Plans of proposed new roads, &c. to be deposited.

2. Whenever any proprietor or proprietors of land within the said Municipal District of Dungog shall open any road, street, or way, or lay out any park or other place for public use or recreation through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans signed by himself or themselves, showing clearly the position and extent of such road, street, way, park or other place as aforesaid. If the Council determine to take charge of any such road, way or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors shall execute such further instrument dedicating such road, way, reserve, or other place to public use or recreation as aforesaid, as may be considered necessary by the Council, and such further instrument of dedication shall also be preserved as a record of the Council, but the Council shall not be compelled to take charge of or

spend moneys on, or vote money for any new street, road, lane, or thoroughfare that is not forty feet wide including pathways, and unless such street, road, lane or thoroughfare, or other place is first proclaimed and properly formed, and completed to the satisfaction of the Council at the expense of the owner or owners of the land through which such road, street, lane, thoroughfare or other place is carried.

Roads and streets and encroachments thereon.

3. The Surveyor of the Municipal District of Dungog, Clerk of Works, or other officer or person duly authorised by the Council in that behalf, shall be the proper officer for marking out, and shall fix, mark, and lay out levels of all public roads, streets, and thoroughfares, and the carriage and foot ways thereof, which now are or shall hereafter be under or subject to the control, construction, care or management of the Council. In marking out such roads, streets, lanes, and thoroughfares, recourse shall be had, when practicable, to the plans under which the land with frontage to the road, street, lane, or thoroughfare in question shall have been sold or let. And it shall be the duty of such Surveyor, Clerk of Works, or officer to place posts at the corners or intersections of such streets, roads, lanes, and thoroughfares wherever the same may be deemed necessary or desirable by the Council, so as to give a width of 42 feet for the carriage-way and 12 feet for the footway on each side where the road, street, lane, or thoroughfare shall be 66 feet wide, and in proportion and in the discretion of the Council in any such street, road, lane, or thoroughfare, or other public place of other width than 66 feet: provided that there shall be no change of level in any such public road, street, lane, thoroughfare, or public place until the same shall have been submitted to and adopted by the Council as hereafter stated: Provided further that this By-law shall be read subject in all respects to "The Width of Streets and Lanes Act of 1881."

Change of street levels.

4. Whenever it may be deemed necessary to alter the levels of any such public road, street, or way as aforesaid, the Committee for works shall cause a plan and section showing proposed alteration to be exhibited at the Council Chambers for fourteen days, for the information and inspection of ratepayers, and shall notify by advertisement in some newspaper circulating in the Municipal District that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk, and such plan and section so signed and countersigned shall be a record of the Council.

Footways may be levelled.

5. When any foot-way shall have been marked out in manner hereinbefore directed, the surveyor, or other such officer or person may cause the same to be levelled and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination; and for this purpose may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway, or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for any of the said footways.

Temporary stoppage of traffic for repairs, &c.

6. The Mayor may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose, and any person who shall travel on such street, lane, or thoroughfare, or remove or destroy any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Obstructing public footways.

7. If the owner or occupier of any land situated on the side of any street or road in the Municipal District of Dungog shall permit any tree, shrub, or plant, to the height of 8 feet, kept for ornament or otherwise, to overhang any footpath or footway on the side of any such street or road, and, on demand made by the Council, shall not cut, lop, or cause to be lopped, all such trees, shrubs, or plants, the said Council, by their servants, labourers, and workmen, may cut, or cause to be cut and lopped, all such overhanging trees, plants, or shrubs, and remove or burn any such trees, plants, or shrubs so cut or lopped, without being deemed a trespasser or trespassers; and the Council shall charge the owners all expenses of such removal.

Encroachments must be removed on notice.

8. The Surveyor or other such officer or person, may at any time, on the order of the Council, and upon due notice of thirty days, direct the removal or filling in of any house, shop, building, erection, hedge ditch, fence, drain, or other obstruction or encroachment, within the meaning of the 48th section of the Towns Police Act (2 Vict. No. 2), and the 128th and 136th sections of the Municipalities Act of 1867. Notice shall in this case be served either personally or at the usual or last known place of abode of the person to whom such obstruction

or encroachment belongs, or who has erected the same, or caused it to be erected: Provided, however, that the operation of this By-law shall be restricted to obstructions and encroachments made since the date of incorporation of the Municipal District of Dungog.

The Council may remove encroachments.

9. In any case where, after service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing the same shall not remove it within thirty days, it shall be lawful for the Council to direct the removal of the same, under the superintendence of its own proper officer, and at the cost of the person so offending: Provided that the expenses thereby incurred shall in no case exceed the sum of ten pounds, or at the Council's option to proceed against the offender for breach of By-law, penalty not to exceed twenty-five pounds nor to be less than two pounds, and in case of every successive offence, the penalty on conviction not to be less than five pounds.

Or may proceed by action.

10. In every case where the obstruction or encroachment cannot be removed, unless at a greater cost than ten pounds, it shall be open to the Council either to direct such removal and to pay all the cost thereof above ten pounds from the funds of the Council, or to proceed by action for trespass against the person causing such obstruction or encroachment, or to proceed as for a breach of such By-law as aforesaid.

Hoards or fences to be erected.

11. Every person intending to build or take down any building within the limits of the Municipal District of Dungog or to cause the same to be so done, or to alter or repair the outward part of any such building, or to cause the same to be done, where any street or footway will be obstructed or rendered inconvenient by means of such work, shall, before beginning the same, obtain permission of the Council, and cause sufficient hoards or fences to be put up in order to separate the building where such works are being carried on from the street, with a convenient platform and hand-rail, or upon the public street or road within a distance of less than 10 and not more than 15 feet from the building line thereof, if there be room enough to leave a footway for passengers outside of such hoard or fence, and shall continue such hoard or fence with such platform and hand-rail as aforesaid, standing in good condition to the satisfaction of the officer of the Council of the said Municipal District of Dungog during such time as the public safety or convenience requires, and shall in all cases in which it is necessary in order to prevent accidents, cause the same to be sufficiently lighted during the night, and every such person who shall fail to put up such fence or hoard or platform with such hand-rail as aforesaid, or to continue the same respectively standing in good condition as aforesaid during the same period of such building or taking down, or who shall not while the said hoard or fence is standing, keep the same sufficiently lighted in the night, or who shall not remove the same when directed by the officer of the Council of the said Municipal District of Dungog within a reasonable time afterwards, shall for every such offence be liable to a penalty not exceeding two pounds for every day such default is continued.

SECTION IV.

Offences—Nuisances—General good order of the Municipal District of Dungog.

Trees and Enclosures.

1. The Council shall have power to plant trees on the public streets and ways of the said Municipal District of Dungog, and any person who shall wilfully or without the authority of the Council, cut, bark, or root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood growing in or upon any street or place under the management of the Council, or in or upon any public reserve or park, shall forfeit a sum not exceeding ten pounds.

Extirpation of noxious weeds.

2. Any owner or occupier of land within the Municipal District of Dungog who shall permit to grow or remain on the said land or upon the public streets or roads within a distance of 12 feet from the boundary line thereof any of the weeds known as "Bathurst burr," "Scotch thistle," "prickly pear," "sweet briar," "cockspur," or any other noxious weed, or who shall fail to extirpate or destroy the same within thirty days after the receipt of notice in writing by post or otherwise, from the Council or proper officer of the Council to do so, shall for every such offence forfeit and pay a sum not exceeding five pounds.

Throwing rubbish on private property.

3. No kind of rubbish or offensive matter shall be thrown upon any private property within the Municipal District of Dungog without permission first obtained from the Municipal Council of Dungog and the owner or owners of such property. Persons found guilty of a breach of this By-law shall forfeit and pay for every such offence a sum not exceeding two pounds nor less than ten shillings.

No turf, gravel, &c., to be removed from streets without leave.

4. Any person who, from any part of the road, street, thoroughfare, reserves, or other lands, or public places, shall remove or cause to be removed, any turf, clay, sand, soil, gravel, stone, or other materials without leave first had and obtained from the officers or persons having lawful charge of such roads, streets, thoroughfares, reserves, or other lands or public places, or who shall wantonly break up or otherwise damage any part of the said roads, streets, thoroughfares, reserves, or other lands or public places, shall, on conviction, pay for every such offence any sum not exceeding five pounds nor less than five shillings, and for every subsequent offence shall forfeit and pay a sum of not less than one pound.

The driver of any vehicle shall, for the purpose of this By-law, be held and taken to be owner thereof until the contrary be shown.

Name and place of abode on waggons, &c.

5. The owner of every waggon, cart, dray, or vehicle of any kind plying for hire who shall allow the same to be driven through the Municipal District of Dungog, without having his name and place of abode painted on the off side legibly, and the driver or person in charge of any such waggon, cart, or dray as aforesaid, who shall refuse to give his and the owner's name and address shall forfeit and pay for every such offence a sum not exceeding one pound.

Lights on vehicles.

6. Every person whilst driving, leading, or riding upon any cart, carriage, van, waggon, buggy, or other vehicle whatsoever, drawn by any horse, ass, mule, or other animal, through any part of the Municipal District of Dungog, between the hours of sunset and sunrise, shall carry a lighted lamp affixed in a conspicuous place on the off side of such cart, carriage, van, waggon, buggy, or other vehicle, under a penalty of five shillings for the first offence, and for every subsequent offence not less than ten shillings nor more than two pounds.

Riding or driving around corners, &c.

7. Any person who shall ride or drive round the corner of any street, road, or any public place within the Municipal District of Dungog, at a pace faster than a walk, shall, on conviction, forfeit and pay a sum not exceeding two pounds nor less than five shillings for every such offence.

Erection of Houses, &c.

8. No person shall be permitted to erect any house, shop, or any other building in any street, lane, or place within the Municipal District of Dungog, without having first served notice in writing on the Mayor or Council Clerk before commencing the same, stating his intention and describing the proposed situation of the building or erection, and every owner of and every contractor for such house, shop, or building or any part thereof commencing to build or work thereon without such notice having been given shall forfeit and pay for every such offence any sum not exceeding two pounds nor less than five shillings.

Defacing placards on walls, &c.

9. It shall not be lawful for any person (other than the person affixing the same, or the owner of the premises to which such may be affixed), to wantonly deface or destroy any placard not out of date which may have been lawfully affixed to any such fence, wall, or house, and any person guilty of such offence shall forfeit and pay a sum not exceeding ten shillings.

Restriction of certain trades.

10. It shall not be lawful for the business of a soap-boiler, tallow-melter, tanner, currier, pig-keeper, or any occupation, trade, or manufacture of any obnoxious, or unwholesome nature prejudicial to the health of, or otherwise offensive or causing a nuisance to any of the inhabitants thereof, to be commenced or established within the limits of that portion of the Municipal District of Dungog to be defined from time to time by resolution of this Council, without consent of the Council first had and obtained, and whosoever shall offend against this By-law shall forfeit and pay on conviction a penalty not exceeding five pounds nor less than one pound, and a further sum of ten shillings for each and every day during which he continues to offend: Provided that the maximum penalty for each offence shall not exceed fifty pounds.

Discharging explosive matter, &c.

11. Any person who shall discharge any explosive matter within forty yards of any road, street, or public place shall forfeit and pay a sum not exceeding five pounds.

Notices not to be painted on pavements.

12. Any person who shall stamp, stain, paint, write, or post any advertisement or notice upon any footway or kerbstone within the Municipal District of Dungog shall be liable to a penalty not exceeding two pounds.

Offensive or indecent placards.

13. Any person who shall in any street, or public place within the Municipal District of Dungog, post, write, expose to view, or distribute any placard, handbill, or other document whatever, of any offensive or indecent character, shall be liable to a penalty not exceeding ten pounds.

Persons not to stand or loiter in the streets.

14. All persons standing or loitering upon any of the carriage-ways, foot-ways, or other public places in the Municipal District of Dungog, to the inconvenience of passers-by, or in any way interrupting the traffic, who shall not discontinue to do so on being requested by any authorised officer or servant of the Council of the said Municipal District of Dungog, or by any police officer, shall be liable to a penalty not exceeding two pounds.

Holes made for cellars, &c., to be enclosed, &c.

15. If any person shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole in or adjoining any street, lane, road, or public place for the purpose of making any cellar or cellars, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good and sufficient manner, and keep up, or cause to be kept up and continue, any such enclosure, or shall not when thereunto requested by the said Council or authorised officer thereof forthwith, well and sufficiently fence or enclose any such hole, and shall not place a light upon the said enclosure, and keep the same constantly burning from sunset to sunrise, during the continuance of such enclosure, then and in every such case the person so offending shall forfeit and pay for every such offence, and for every such refusal or neglect, any sum not exceeding five pounds, and on conviction for every subsequent offence not less than ten shillings.

Excavations, &c., to be protected by fence or wall.

16. It shall not be lawful for any person to make any quarry, excavations, or opening in the ground on any property adjoining or near to any public road or footpath within the limits of the Municipal District of Dungog, until the owner or occupier of the said property shall have erected a good substantial fence or wall, at the least 4 feet high, around such parts of the said property as adjoin such public road or footpath, and any such person neglecting or refusing to enclose any premises upon which any such quarry or excavation shall be made shall forfeit and pay for every such offence a sum not exceeding five pounds. And all existing quarries, excavations, and precipices, situated within the limits of the Municipal District of Dungog shall be closed and protected in the manner aforesaid, within twenty-four hours after due notice to that effect shall have been given by the said Council, and in the event of the failure or neglect of the owner or occupier of any such last-mentioned property to enclose the same, after notice as aforesaid, such person so offending shall be subject to the penalty before mentioned.

Polluting water, reservoirs, &c.

17. Whoever shall bathe in any reservoir, conduit, aqueduct, or other waterworks belonging to or under the management or control of the Council, or shall wash, cleanse, or throw, or cause to enter therein any animal (whether alive or dead), or any rubbish, filth, or thing of any kind whatsoever, or shall cause or permit, or suffer to run, or to be brought therein the water of any sink, sewer, drain, engine, or boiler, or other filthy, unwholesome, or improper liquid, or shall wash any clothes at any public fountain or pump, or in or at any such stream, reservoir, conduit, aqueduct, or other waterworks as aforesaid, or shall do anything whatsoever whereby any water or waterworks belonging to the said Council, or under their management or control, shall be fouled, obstructed, or damaged, shall for the first offence forfeit and pay any sum not exceeding five pounds; for a second offence, not more than ten pounds; and for a third and every subsequent offence, a sum not more than twenty pounds.

18. It shall be the duty of the Inspector of Nuisances to report without delay the existence of any nuisance arising from live or dead animals, of any kind or species, within the Municipal District of Dungog, and to give notice to the owner or owners thereof, or the owner or occupier of the premises upon which such animals may be, to remove and destroy the same (if very offensive) within a period of six hours; and if not removed or destroyed within that period, to cause the removal and destruction of the said nuisance without delay; and the owner or owners thereof, or the owner or occupiers of the premises in default, and on conviction thereof before any two Justices of the Peace, in each case shall forfeit and pay any sum not exceeding ten pounds in addition to all legal and other expenses incurred in the proceedings and in the removal and destruction of said nuisances.

SECTION V.

Sewerage and Drainage.

No private sewers to be made to communicate with the public sewers without notice.

1. It shall not be lawful for any person, without notice to the Council or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains, sewers, or channels, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer into any of the said public drains or sewers, or into any drain or sewer communicating or

to communicate therewith without such notice or otherwise than as aforesaid, every person so offending shall, for every such offence, forfeit and pay any sum not exceeding ten pounds, and shall, at his own expense, make good all roads, streets, kerbing, &c., which shall have been injured by or through any such work; and all such repairs shall be performed to the satisfaction of such officer as the Council shall appoint to superintend such work, and any person who shall do or perform anything contrary to this clause, or shall neglect to make good all such damage as aforesaid, shall, on conviction thereof, forfeit and pay a sum not exceeding ten pounds.

Proprietors of private sewers, &c., to repair and clean same.

2. All private drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council or officer thereof, at the costs and charges of the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair or cleanse, or cause any such private drain or sewer to be repaired and cleansed, according to the direction of the Council, he shall forfeit and pay any sum not exceeding five pounds.

Water from the roof, &c.

3. Every owner or occupier of any dwelling-house, shop, or other building who shall permit rain-water to fall from any roof, balcony, or other projection upon any street, road, lane, or footway, or to flow over the pathway of any such street, road, or lane, or shall cause or permit any such roof or rain water to be discharged by any pipe upon any such street, road, lane, or footway, shall, if such nuisance be not abated within seven days after notice in writing to abate shall have been given by the Council, forfeit and pay for every such offence a sum not exceeding five pounds.

Drains and footpaths.

4. No surface drain shall be made in any footway, or any pipes laid under or across the same, without the authority of the Council; and no such pipe or drain shall be used for the discharge into any street or roadway of any offensive liquid or matter of any kind whatsoever, and any person who shall so offend shall forfeit and pay a sum not exceeding ten pounds.

Natural watercourses.

5. Any person who may have closed, or shall close or intercept any natural watercourse, by building or otherwise, shall provide another outlet for the surface water with pipes or sewers of a size and in a manner to be approved by the Council. Any person failing to comply with the provisions of this By-law shall forfeit and pay a sum not exceeding fifty pounds nor less than five pounds.

SECTION VI.

Preventing and extinguishing fires.

Fires or combustible materials, &c.

1. Every person who shall place or knowingly permit to be placed in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable article of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds, nor less than one pound, and shall forthwith remove such fire, gunpowder, or combustible, or inflammable article. And every such person who shall suffer any such fire, gunpowder, or other combustible or inflammable article to remain as aforesaid for forty-eight hours after any such conviction shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

2. Every person who shall erect any fence or brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, and place as or for the covering of any such stack any inflammable material, or shall place, keep, or store any hay, straw, or other inflammable material in any building so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds nor less than one pound, and also remove such fence, stack, covering, or inflammable material within forty-eight hours after such conviction. And any person failing to remove such fence, stack, covering, or inflammable material within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wilfully setting fire to chimneys.

3. Every person who wilfully sets or causes to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common a "chimney," shall forfeit a sum not exceeding five pounds.

SECTION VII.

BY-LAWS for the regulating and licensing of public carriers, carters, water-drawers, and public vehicles, omnibuses, cars, hackney carriages, cabs, water-carts, drays, carts, or vans.

1. No vehicle shall ply for hire within the Municipal District of Dungog, until and unless the same be duly licensed in the manner hereafter described.

2. Before any license to public carriers, carters, water-drawers, or for plying a vehicle, shall be granted, the party requiring such license shall deliver to the Council Clerk a requisition in form of schedule hereunto annexed, marked with the letter A, or to the like effect, duly filled up and signed.

3. No license shall be granted in respect of any vehicle which, in the opinion of the Mayor or such officer as may be duly appointed for that purpose, is unsafe or in bad repair, or otherwise unfit for the accommodation and convenience of passengers therein, nor until the number of such vehicle be painted thereon, on a plate or plates affixed thereon outside on the panel of each door of such vehicle, or on such other place or places, and in such manner as the Mayor, or in his absence, two Aldermen may direct.

4. Licenses for public carriers, carters, water drawers, and vehicles plying for hire shall be in the form contained in the Schedule hereunto annexed marked with the letter B or to the like effect.

5. Every license granted under these By-laws shall be under the common seal of the Council of the Municipal District of Dungog, and signed by the Mayor and countersigned by the Council Clerk, and shall be in force from the date of such license until the 31st day of December next ensuing, and no such license shall include more than one vehicle: Provided that where the licensed vehicle shall be under repair, if the proprietor desire, he may be permitted to substitute another for the period to be thereby specified by endorsement on the license signed by the Mayor and countersigned as aforesaid.

6. For every such license there shall be paid to the Municipal fund, annually the several rates set forth in the Schedule hereunto annexed, and marked with the letter C.

7. All licenses shall be made out by the Council Clerk, and numbered consecutively.

8. The person in whose name a license shall appear to have been obtained shall be prima facie deemed to be the owner of the vehicle in respect of which the same shall have been taken out.

9. The Mayor shall, as often as he shall deem it necessary, cause an inspection to be made of all or any licensed vehicles, and of the harness, horse or horses, and if any such vehicle, harness, horse or horses shall at any time be found to be unfit for use the Mayor may cancel the license of such vehicle.

10. The number of the license granted to every omnibus, or car in figures not less than 4 inches in height, and for every hackney carriage and cab in figures not less than 2 inches in height and of proportionate breadth, white upon a ground of black shall be painted outside on the panel of the door or doors of such vehicle, or on such other part or parts thereof as the Mayor may direct and such numbers shall be kept legible and undefaced during all the time such vehicles shall ply for hire at the expense of the licensee.

11. Carters (plying for hire) of water carts, drays, or vans are to be registered at the Council Chambers and receive a license upon payment of the rate set forth in Schedule C, hereunto annexed.

12. The name, place of abode, number of license, and the words "licensed cart, dray, or van," as the case may be, are to be painted in letters one inch long upon the right or off side of such cart, dray, or van at the expense of the licensee.

13. Whenever the word "vehicle" shall be used in these By-laws the same shall be construed to extend and apply to any omnibus, car, hackney carriage, or cab. The word "omnibus" shall extend and apply to any vehicle upon four wheels drawn by two or more horses having seat accommodation for more than ten passengers and a driver. The word "car" shall extend and apply to any vehicle upon two or four wheels drawn by one or more horses having seat accommodation for not more than ten nor less than five passengers and a driver. The word "hackney carriage" shall extend and apply to any vehicle upon four wheels drawn by two or more horses and having seat accommodation for not more than five passengers and a driver, and in respect of which a hackney carriage license shall have been obtained within the said Municipality. The word "cab" shall extend and apply to any vehicle upon two wheels having seat accommodation for not more than two passengers and a driver in respect of which a cab license shall have been obtained within the said Municipality.

14. For every offence against the provisions of these By-laws the offender shall be liable to and pay a penalty of not more than ten pounds nor less than ten shillings.

15. No timber carriage, truck, trolley, or other vehicle used for a like purpose, or dray attached for the conveyance of timber or other material, will be allowed to ply for hire within the Municipal District of Dungog unless the same be licensed.

16. The owners of any such timber carriage as aforesaid shall have their names painted in legible letters, with the word "licensed," on some conspicuous part of such timber carriage respectively. The license fee shall be at the rate of five shillings per wheel per annum, and shall be issued in January, April, July, and October, in each year, and any one who shall omit or fail to comply with the provisions of this By-law shall forfeit a sum not exceeding five pounds nor less than two pounds.

17. All penalties recovered under any of these By-laws shall be paid to the Municipal Council of Dungog, to be appropriated towards the general revenue of the Municipality.

SCHEDULE A.

A requisition for a License.

To the Municipal Council of Dungog.

I, _____, residing at _____ street, within the Municipal District of Dungog, do hereby request that a license may be granted to me to _____, within the limits of the said Municipal District of Dungog.

Dated at Dungog, this _____ day of _____, 18 _____.

SCHEDULE B.

Form of License.

This is to certify that _____, of _____ street, Dungog, is hereby licensed to _____ from the _____ day of _____ to the 31st day of December, 18 _____, inclusive, within the Municipal District of Dungog, subject nevertheless to all and every one of the By-laws and Regulations in force relating thereto.

Given under my hand and the Common Seal of the Municipal District of Dungog, in the Colony of New South Wales, this _____ day of _____, 18 _____.

(i.s.) _____ Mayor.

Council Clerk.

SCHEDULE C.

A Table of Rates to be paid by the proprietors of licensed vehicles.

	On & after the 1st of January	On & after the 1st of April.	On & after the 1st of July.	On & after the 1st of October.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
For every omnibus, hackney carriage, buggy, sociable, or other vehicle having four wheels	2 0 0	1 10 0	1 0 0	0 10 0
For every cab, dray, water-cart, or other vehicle with two wheels	0 10 0	0 7 6	0 5 0	0 2 6

SECTION VIII.

Municipal District of Dungog—By-laws under the Nuisances Prevention Act, 1875.

BY-LAWS of the Municipal District of Dungog, for the suppression of certain nuisances prejudicial to public health, and for improving the sanitary condition of the Municipal District of Dungog, in accordance with the provisions of Nuisances Prevention Act, 1875.

1. Every person about to erect a closet shall, before he commences any such work, give to the Council Clerk seven days' notice in writing of his intention and of the proposed position of such closet, and in default thereof, or in case of his commencing such work without such notice, he shall be liable to a penalty not exceeding ten pounds.

2. No closet shall be erected except in such position as shall be approved of by the Council, or by the Inspector of Nuisances or other officer appointed by the Council.

3. No closet shall be built under any dwelling-house nor at a less distance than 20 feet therefrom (if the area will permit) nor less than 12 feet in any case, nor in such position that the same cannot be emptied without the contents thereof being carried through any dwelling-house.

4. Dry earth closets must be used in all cases. All cesspits that now exist must be emptied, and filled up, and if after forty-two days' notice from the Council or Inspector of Nuisances, such cesspits are not emptied and filled up, the person so offending shall be liable to a penalty not exceeding five pounds nor less than one pound; and for such second offence, not more than ten pounds, nor less than three pounds.

5. Every such closet shall be built with walls 7 feet high, and shall not be less than 3 feet 6 inches wide and 4 feet 6 inches long, and shall be provided with a door capable of being fastened on the inside, and shall have ventilating holes 4½ inches wide.

6. A separate closet shall be provided for every dwelling-house, and a breach of this By-law shall make the owner of any premises upon which there shall be a joint closet liable to a penalty not exceeding five pounds.

7. If any alteration shall be requisite in the opinion of the Inspector of Nuisances or any other officer appointed by the Council in that behalf for preserving public health or decency in the case of any existing closet, the owner or occupier of such premises shall receive forty-two days' notice to remove or alter the same; and if he fail to do so, and the Council shall adjudge such closet to be either injurious to the health or opposed to decency by exposure or otherwise, the same shall be altered by such Inspector of Nuisances or other officer, and the cost of such alterations shall be paid by the owner or occupier of the premises whereon the same shall be.

8. The place of deposit for night-soil shall be _____ and no night-soil shall be deposited in any other locality within the Municipal District of Dungog, except as allowed by the Council.

9. Until otherwise provided by the Council, all night-soil shall be removed from closets by the servants of or contractors with the Council in water-tight covered vehicles, between the hours of 11 o'clock in the evening and 5 o'clock in the morning.

10. Until and unless otherwise provided by the Council, all night-soil shall be disposed of by burying it in the earth.

11. In case the council shall sell or give away any night-soil, the same shall be removed in the manner as above provided, and on being removed from the vehicles in which it is carried, it shall be deodorised by chemicals or in some other manner, or covered with earth so as to prevent any offensive smell arising therefrom.

12. The Council shall cause all cesspits to be emptied by its own servants or contractors under the direction of the Inspector of Nuisances at least once in every six months, if necessary in the opinion of the Inspector. And (unless otherwise satisfactorily provided for) may cause all dry earth closets and other closet pans to be emptied in like manner once at least every week. No cesspit shall at any time be emptied by the owner or occupier of any premises without the sanction in writing of the Council or Inspector of Nuisances, which sanction shall not be given unless the officers of the Council are by accident or unforeseen circumstances at the time unable to empty such cesspit in the prescribed manner. The Council may authorise the owner or occupier of any premises to empty any dry earth closet which may be included in his premises whenever the Council is satisfied that such owner or occupier has made suitable provision for the disposal of night-soil.

13. No person shall be at liberty to use on his premises any night-soil brought from elsewhere.

14. The owner or occupier of any house, building, passage, yard, or premises within the Municipal District of Dungog, shall cause the yard or ground adjoining, or belonging thereto, to be kept in a cleanly condition, and so as not to be a nuisance or injurious to health.

15. Any person allowing night-soil from any closet to fall into the street, shall forfeit and pay a sum not exceeding twenty pounds nor less than two pounds.

16. Any person wilfully allowing filth of any kind or accumulation thereof, or any substance or substances from which noxious affluvia arises to remain on his premises, shall be liable to a penalty not exceeding ten pounds.

17. It shall be the duty of the Inspector of Nuisances to report without delay the existence of any nuisance arising from live or dead animals of any kind or species within the Municipal District of Dungog, and to give notice to the owner or occupier of the premises upon which such animals may be, to remove and destroy the same (if very offensive) within a period of six hours, and if not removed or destroyed within that period, to cause the removal and destruction of the said nuisance without delay; and the owner or owners thereof, or the owner or occupiers of the premises in default, and on conviction thereof before any two Justices of the Peace, in each case shall forfeit and pay any sum not exceeding ten pounds and not less than forty shillings in addition to all legal and other expenses incurred in the proceedings and in the removal and destruction of said nuisances.

18. If at any time the dry earth-closet on any premises shall overflow, the owner or occupier shall within twenty-four hours give notice to the Inspector of Nuisances, otherwise such owners or occupiers shall be liable to a penalty not exceeding ten pounds.

19. The Council may recover and the owner or occupier of the premises shall pay such sums for the emptying of closets as may be decided upon from time to time by resolution of the Council.

20. The Inspector of Nuisances shall be furnished annually with a list copied from the rate-books of the Council, showing the names of owners and occupiers of all household property or business premises within the Municipal District of Dungog, the list to be furnished within three months after the filling up of the said rate-book in each year.

21. The Inspector of Nuisances shall be provided by the Council with a supply of printed forms of notices or other documents (as by the Act prescribed) from time to time when required for service upon the owners or occupiers of premises.

22. The Inspector of Nuisances shall obtain from the contractor or night-man a list showing the names of occupiers or owners of premises where closets have been emptied, and the situation of such premises, and shall submit the said list to the Council quarterly, viz., the end of March, June, September, and December in each year, with a view of carrying out the 10th section of the Nuisances Prevention Act.

23. The Inspector of Nuisances shall report to the Mayor for the time, or to any authorised officer of the Council, where any closet is connected with any drain or sewer, and take such action as may be directed by the said Mayor or officer with a view of carrying out the purposes of the Act.

24. It shall be the duty of the Inspector of Nuisances to report the existence of any gutter, drain or filthy premises that may be brought under his notice, and take such action as may be directed by the Mayor or other authorised officer of the Council in accordance with the provisions of the Nuisances Prevention Act.

25. It shall be the duty of the Inspector of Nuisances to furnish the Council every three months with a list of the persons who have been proceeded against and fined for nuisances within the Municipal District of Dungog together with the dates and amounts of such fines respectively.

26. The owner or occupier of any premises within the Municipality or of any other person who shall erect upon his premises any closet otherwise than in accordance with these By-laws, or who shall refuse to comply with the provisions of any of the preceding By-laws, or who shall commit any breach thereof, shall in cases where no special penalty is provided forfeit and pay a penalty not exceeding five pounds.

27. All words occurring in these By-laws and which also occur in the Nuisances Prevention Act, 1875, shall have the like meanings assigned to them as are provided in the 4th section of the said Act.

28. By these By-laws "night-men" means and includes any and every person employed by the Council to remove or assist in removing night-soil from earth-closets, whether as servants of the Council or as contractors thereunder, or as servants of such contractor. "Night-cart" means any vehicle used by any night-man for the purpose aforesaid. "Depôt" means a depôt for the deposit of night-soil.

Unauthorised persons not to act as night-men.

29. No persons shall act as night-men or drive any night-cart within the limits of the Municipal District of Dungog, unless such person be authorised so to do by the said Council.

Certificate.

30. Such authority shall be evidenced by a certificate under the hand of the Mayor or Council Clerk, which shall contain the name and place of abode of the holder, and shall be duly numbered and registered, such certificate shall be according to the form in the schedule to these By-laws.

Revocation of certificate.

31. Any such certificate may be revoked, cancelled, or suspended at the will of the said Council, and thereupon such authority shall cease.

Change of abode to be notified.

32. Any authorised night-man changing his place of abode, shall within two days after so doing attend the Council Clerk, who shall note the change upon his certificate, and register the same.

Certificate to be carried and produced.

33. Every night-man whilst engaged in removing night-soil or in driving any night-cart, shall carry with him his certificate, and shall produce the same when required by any officer of the Council or member of the Police Force of New South Wales. No night-man shall on any pretence part with or lend his certificate to any other person.

Night-carts to be made water-tight and covered.

34. Every night-cart or vessel used in the business of a night-man shall be kept by the owner thereof water-tight and free from leakage, and shall be provided with a proper covering so as to effectually prevent the dropping, splashing, slopping, or spilling of anything carried therein.

Hours for emptying closets, &c.

35. No person shall empty any privy, cesspool, or remove any night-soil within the Municipal District of Dungog, or shall use, or drive, or permit, or suffer to be used or driven any night-cart or other vehicle for that purpose except between the hours of eleven o'clock at night and five o'clock in the morning, or shall put, place, leave, spill, or cast out any night-soil in or upon any of the streets or public places of the Municipal District, or shall not carefully sweep up and cleanse every place in which any offensive matter is slopped or spilled; Provided that before commencing such works it shall be the duty of the night-man to report his intention so to do to the Inspector at least twelve hours before commencing such work.

Night-soil shall not be brought into the Municipal District.

36. No person shall bring or convey night-soil to any depôt within the limits of the said Municipal District from any place beyond the said limit.

Night-soil to be buried.

37. Every night-man shall upon arriving with his cart at the depôt make or cause to be made a pit or trench 5 feet in depth and of sufficient length and width to allow of a deposit of night-soil 1 foot 6 inches in depth; and all night-soil shall be buried in accordance with the agreement for the removal and depositing of the same between the contractor and the Council, and no offensive matter shall be permitted or placed in any place but that provided by the Council.

Particulars to be given at Inspector's Office.

38. Every registered night-man, when he shall use any night-cart or vessel for the removal of any night-soil or other offensive matter, shall within twelve hours after the performance of such work, report to the Inspector or other officer appointed in that behalf at his office the name of the occupier of the premises and the name of the street in which such premises are situated where he has been so employed, and also state the place where the contents of such night-cart or vessel were deposited.

39. For every offence against any of the provisions of these By-laws the offender shall upon conviction forfeit and pay a penalty not exceeding twenty pounds nor less than twenty shillings.

SCHEDULE.

MUNICIPAL DISTRICT OF DUNGOG.

Night-man's Certificate, No. . 30 Victoria No. 14.

Name.

Address.

Made and passed by the Council of the Municipal District of Dungog, this 23rd day of February, one thousand eight hundred and ninety-four.

(L.S.) F. A. HOOKE,

WILLIAM LLOYD,
Council Clerk.

Mayor.

By-LAW made and passed by the Municipal Council of Dungog this 3rd day of August, 1894, for the depositing of night-soil.

The Depôt for the depositing of night-soil, as approved of by His Excellency the Governor, with the advice of the Executive Council, is situated about $\frac{3}{4}$ of a mile west of the town boundary, on an acre of land adjoining an old abandoned shaft, and to be called "Depôt for Depositing Night-soil."

(L.S.) F. A. HOOKE,

WILLIAM LLOYD,
Council Clerk.

Mayor.

1894.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

**MUNICIPALITIES ACT OF 1867, AND NUISANCES
PREVENTION ACT, 1875.**
(BOROUGH OF ENFIELD—BY-LAWS.)

Ordered by the Legislative Assembly to be printed, 6 November, 1894.

Chief Secretary's Office,
Sydney, 1st November, 1894.

ENFIELD MUNICIPALITY.—BY-LAWS.

The following By-laws, made by the Council of the Borough of Enfield, under the "Municipalities Act of 1867," and the "Nuisances Prevention Act, 1875," having been respectively confirmed and approved by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Acts.

JAMES N. BRUNKER.

PART I.

BY-LAWS of the Borough of Enfield, made under the "Municipalities Act of 1867, and the "Nuisances Prevention Act of 1875."

1. The By-laws of the Borough of Enfield, dated the 2nd day of September, 1889, and published in the Government Gazette of the 3rd day of January, 1890, No. 3, are hereby repealed.

2. The Council shall meet every alternate Tuesday at the hour of half-past seven in the evening, or on such other day and at such other hour as may by resolution of the Council be from time to time appointed.

Course of procedure.

3. The following shall be the course of procedure at such meetings :—

- (1) The reading and confirmation of the minutes of the previous meeting.
- (2) The reading of official correspondence.
- (3) The presentations of petitions.
- (4) Reports brought up from Committees and officers.
- (5) Questions.
- (6) Motions of which notice has been given.
- (7) Orders of the day.
- (8) Such other business as may lawfully be brought before the Council.

Petitions.

4. All petitions shall be received as the petitions of the persons signing the same only, and it shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and report to the Council that he considers it unobjectionable.

Petitions and correspondence may be dealt with without previous notice.

5. The Council may at any meeting resolve without previous notice that any petition be received, and that the same or any correspondence read be referred to a committee.

Mayor to preserve order.

6. The Mayor shall preserve order, and may at any time call to order any Alderman that may appear to him to be out of order.

Questions put by Mayor.

7. The Mayor shall put all questions first in the affirmative, and then the negative, and may do so as often as he may deem necessary to enable him to determine the sense of the Council thereon, and thereupon he shall declare his decision which shall be final.

Mayor shall decide as to pre-audience of Aldermen.

8. If two or more Aldermen rise to speak at the same time, the Mayor shall decide which of them shall be entitled to pre-audience.

No Alderman to speak twice on the same question or amendment except in Committee.

9. No Alderman shall speak twice on the same question, unless in Committee or in explanation where he shall have been misrepresented or misunderstood: Provided that any Alderman, although having previously spoken, may speak once on every amendment, and that the mover of every question shall always have the right of final reply.

No Alderman to make personal reflections.

10. No Alderman shall digress from the matter under discussion or make personal reflections on, or impute motives to, any other Alderman.

No Alderman to speak more than ten minutes.

11. No Alderman shall speak upon any motion or amendment for a longer period than ten minutes without the consent of the Council.

Alderman using offensive expression to apologise.

12. When any Alderman shall make use of any language or expression offensive to any other Alderman, the Alderman offending shall be required by the Mayor, or if in Committee by the Chairman of such Committee, to withdraw such language or expression, and to make an apology satisfactory to the Council.

Debate may be adjourned.

13. A debate may be adjourned to a later hour of the same day, or to another day.

Alderman adjourning debate entitled to precedence on resumption.

14. Any Alderman upon whose motion any debate shall be adjourned shall be entitled to precedence on the resumption of the debate.

Division.—Penalty for refusing to vote.

15. Any Alderman shall be at liberty to call for a division, in such case the question shall be put first in the affirmative, and then in the negative, and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when such division is called for and shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings or more than forty shillings.

Divisions to be entered on the minutes.

16. All divisions of the Council shall be entered on the minutes of the proceedings.

17. Any Alderman may require the question or matter under discussion to be read for his information, and upon such request the question or matter under discussion shall be read.

Amendments—How to be put.

18. When a motion in Council shall have been moved and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded. No motion or amendment shall be discussed until it shall have been reduced into writing. If any amendment be carried, the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved. If any amendment upon an original question, or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Adjournments.

19. Any motion for adjournment, if seconded, shall be immediately put without discussion, but if such motion be negatived it shall not be competent for any member to make a similar motion until thirty (30) minutes shall have elapsed from the period of moving the motion which shall have been negatived.

Motions must be seconded.

20. No notice shall be taken by the Mayor of any motion unless it be seconded.

Motions to be in writing and not withdrawn without leave.

21. The Council Clerk shall put every motion into writing, which shall be signed by the mover; and every motion when seconded and read by the Council Clerk shall be considered the property of the Council, and shall not be withdrawn without consent of the Council.

Protests—Mode of protesting. Protests to be recorded, but may under certain circumstances be expunged.

22. Every member of the Council, the Mayor included, may protest against any resolution or vote by the Council. Notice of the intention so to protest must, however, be given at the meeting when such resolution is passed, or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the Minute-book, but if in the opinion of the Council it be inconsistent with the truth or disrespectfully worded it may by resolution on notice be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with reference in the margin to the resolution ordering such expunction.

Motions for rescission of previous order, &c.

23. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation and may have been remitted to the Council with suggested amendments of the same, or the passage after due notice as hereinbefore provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

Calls of the Council.

24. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

Mode of proceeding.

25. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered; such call shall be made as follows:—The Council Clerk shall call the names of all members in their alphabetical order, each member present shall answer to his name as so called, and if any members are absent a record shall be made of such absence, but if leave of absence to any such members shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

26. Any member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent shall not be legally excused as aforesaid, or who if absent and not so excused shall fail to show that by reason of extreme illness or any other sufficient cause he has been unable to send an excuse in writing as aforesaid, or who having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for any such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day there shall be further call, or the resumption of such consideration, and the provisions herein as to penalties for absence shall have reference to such further call, and, if there shall be more than one adjournment, this provision shall be taken to extend to the resumption of the considerations of such motion or matter of business after every such adjournment.

Council Clerk to give notice of Committee Meetings.

27. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman or any two members of such Committee.

Duration of special Committees.

28. The appointment of special Committees shall continue until the specified duty for which they shall have been appointed shall have been discharged: Provided that such Committee may at any time be dissolved by vote of the Council.

Rules to be observed in Committee of the whole, &c.

29. The rules of the Council shall be observed in Committee of the whole, except the rule limiting the number of times of speaking.

Report of Committee—how signed.

30. Every report of a Committee shall be signed by the Chairman thereof.

Proceedings—By-laws may be suspended on emergency.

31. Any of these By-laws relating to or affecting proceedings at meetings of the Council may be suspended pro tempore in cases of emergency, if all the members of the Council then present deem suspension necessary.

By-law Committee.

32. The By-law Committee shall prepare for confirmation of the Council drafts of all such By-laws as may be required for the good government of the Borough. They shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the Borough, and shall take such steps as may be necessary for the prevention or punishment of offences against such By-laws or statutes, and for the preservation of public health, order, and decency.

Committee of Works.

33. The Committee of Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

34. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection of the municipal revenue. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the Borough, and as to such matters or subject of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Draft of intended By-laws.

35. A draft of every intended By-law shall lie in the office of the Council for fourteen days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same; and public notice shall be given as hereinafter provided that such draft is so lying for inspection.

How notices are to be published.

36. In all cases where public notice is or shall be required to be given by any By-law, such notice may be given and published in some newspaper circulating in the Borough, and on the outer door of the Council Chambers.

Complaints against officers.

37. All complaints against any officers or servants of the Corporation must be in writing and must in every case be signed by the person or persons complaining, and no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the Mayor who, immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same and report thereon at the next meeting of the Council, or he may if necessary suspend such officer or servant till the Council shall have dealt with the charge.

38. In cases where security is required by the Municipalities Act it shall not be competent for the Council to accept as surety any of their members nor any person holding office under the Council.

Treasurer's account to be laid before the Council.

39. The Treasurer's account to be laid before the Council once in each month or oftener if required by the Council.

Expenses of proposed works to be first ascertained—Accounts to be examined by Finance Committee

40. No work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been previously ascertained by the Council; and all accounts to be paid by the Council shall be examined by a Finance Committee and reported on by them before any warrant shall be issued for the payment thereof.

Mayor and two Aldermen may authorise expenditure of ten pounds on emergent works.

41. The Mayor and any two Aldermen, or in the absence of the Mayor from the Municipality, any three Aldermen may, in writing, order any sum not exceeding ten pounds to be expended in repairing any public work under the control of the Council which may be suddenly damaged: Provided it shall appear to them that such repair cannot be delayed until the next sitting day of the Council; and then may appoint a proper person to execute such repairs: Provided always that the making or such order shall be reported at the next meeting of the Council; and provided also that not more than one such order shall be made between the termination of one meeting and the commencement of another.

Records, &c., to be kept private.

42. Excepting as otherwise provided by law, if any person shall, without the permission of the Council first had and obtained, show, lay open, or expose any of the books, papers, or records of the Council to any person not being a member of the Council, the person so showing, laying open, or exposing the said books, papers, or records shall on conviction thereof forfeit and pay a penalty of not less than ten shillings or more than five pounds, and on every subsequent conviction a penalty of not less than two pounds.

Custody of records, seal, &c.

43. The common seal and all charters, deeds, muniments, papers, and records of the Council shall be kept in the Council Chambers or office of the Council in the custody of the Council Clerk unless the Council shall otherwise order for any purpose; and the common seal shall not be used without the express authority of the Council, and every impression thereof so authorised shall be verified by the signature of the Mayor and Council Clerk.

Records, &c., not to be defaced or removed.

44. Any person who shall deface, alter, or destroy, or who shall attempt to deface, alter, or destroy any such common seal, charter, deed, muniment, paper, or record, shall, on conviction thereof, forfeit and pay for the first offence a penalty not exceeding five pounds nor less than two pounds; and upon every subsequent conviction a penalty of not less than twenty pounds.

Nor removed.

45. Any person who shall remove or attempt to remove any such seal, charter, deeds, muniments, paper, or records from the Council Chambers without leave from the Council first had and obtained shall on conviction thereof forfeit and pay a penalty of not more than twenty pounds nor less than two pounds; and for every subsequent offence a penalty of not less than five pounds.

Receipt for documents.

46. Every person removing any document or record with such consent as aforesaid shall give a receipt under his hand for every such document, which receipt shall be carefully preserved amongst the records until the document or other record to which it refers shall have been returned, when such receipt shall be destroyed.

Duties of Council Clerk.

47. The Council Clerk shall perform all the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder, he may be required to perform. He shall be the clerk of all Revision Courts held in the Borough under the provisions of the Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council, and he shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Special powers of Mayor.

48. The Mayor may from time to time define the duties of all officers and servants of the Corporation, and shall exercise a general supervision over all such officers and servants, and may order the preparation of any such return or statement or the giving of any such information by any such officer or servant as he may think necessary unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information.

Suits and penalties, &c.

49. All suits or informations for the enforcement of penalties for or in respect of any breach of the Municipalities Act of 1867, or of any Act or Acts amending the same, or of any By-law made thereunder, or of any statute, the operation of which may have been extended to the Borough, as may have been directed by the Council, or by the By-law Committee, or by the Mayor, shall be commenced or laid as follows:—When against a member of the Council or an auditor or any officer of the Council,—by the Council Clerk (unless such Council Clerk be the officer to be proceeded against) and in such case by any other officer named by the Council for that purpose. When against any other person by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by such other officer or person as shall from time to time be appointed for that purpose by the Council or the By-law Committee, or the Mayor, as the case may be. And no suit shall be brought, or information laid as aforesaid against any member of the Council, or auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council except on the order of the Council, or of the Mayor, nor against any other person, except upon the order of the Council, or the Mayor, or the By-law Committee. And no such suit shall be directed to be brought, nor shall any information be directed to be laid as aforesaid, except on an express resolution of the Council, in any case where the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council, or where on the trial or hearing of any such suit or information, the same shall have been dismissed on the merits: Provided that in any case the conduct or prosecution of any suit or information may, on order of the Council, be entrusted to an attorney.

PART II.**Collection and Enforcement of Rates—Times and mode of collection.****Rates under section 164 of the 31st Vic. No. 12—How collected.**

1. All rates levied or authorised to be levied under the provision of section 164 of the "Municipalities Act of 1867," and for the purposes mentioned in the said section, may be collected by half-yearly instalments. Each such instalment shall, as to every such rate, and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

Special rates.

2. All rates levied or imposed by the Council under sections 165, 166, and 167 of the "Municipalities Act of 1867," and for the purposes mentioned in the said section, or under the provisions of any of said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may by resolution at the time of making or imposing such rates or any of them have appointed.

Rates to be paid, &c.

3. All persons liable to pay rates shall pay the amount thereof within the time prescribed by the said Act into the office of the Council Clerk during office hours, that is to say, on every Wednesday evening from seven o'clock to half-past eight o'clock, and from half-past two o'clock to half-past four o'clock on every Saturday afternoon, or such other day or days as the Council may decide, public, Government, and Bank holidays excepted.

Defaulters.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

Enforcement of distress—Mayor to enforce payment.

5. It shall be the duty of the Mayor to lay such list before the Council, and the Council shall cause such defaulters to be sued for the amount of such rates in a court of competent jurisdiction, or cause distress warrants to issue against all such persons, and cause such warrants to be enforced.

Bailiff.

6. The Bailiff shall be appointed by resolution of the Council, and shall be at any time removable by a like resolution.

7. The Bailiff shall find two sureties to the satisfaction of the Mayor to the extent of twenty-five pounds each, for the faithful performance of his duty.

8. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

9. All levies or distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorised to perform the duties of that office.

Distress and sale.

10. If the sum for which any such distress shall have been made shall not be paid, with costs as hereinafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Borough as the said Bailiff may think proper to remove them to for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and costs, as hereinafter provided, to the owner of the goods so sold on demand of such surplus by such owner.

Inventory.

11. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made, and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the ratepayer on demand, at any time within one month after making such distress.

Goods may be impounded.

12. The Bailiff, on making a distress as aforesaid, may impound, or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates, as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner may direct order of sale.

13. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

14. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight (48) hours after having received the same.

Costs.

15. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under these By-laws, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULES.

SCHEDULE A.

Warrant of distress.

I, _____, Mayor of the Borough of _____ do hereby authorise you, _____, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate at _____, for _____, being the amount of rates due to the said Borough, to the _____ day of _____, for the said dwelling-house (or land or premises as the case may be), and to proceed thereon for the recovery of the said rates, according to the law.

Dated this _____ day of _____, 18 _____.

Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Borough of _____, dated _____, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate at _____ within the said Borough, for _____ being the amount of rates due to the said Borough to the day of _____

Dated this _____ day of _____, 18 _____.

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy where sum is not more than £20	2	0
Above that sum, in addition for every £1	0	1
For making and serving copy of inventory	2	0
For man in possession, each day or part of a day	5	0
For sale, commission, and delivery of goods, per pound on proceeds of the sale	1	0

PART III.

Streets and Public Places—Public Health and Decency—Streets, &c.

New roads to be reported upon.

1. No new public road, street, way, park, or other place proposed to be dedicated to the public shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by the Committee for Works and reported on to the Council by such Committee.

Plans of proposed new road, &c., to be adopted.

2. Whenever any proprietor or proprietors of land within the said Borough shall open any road, street, or way, or lay out any park or other place for public use or recreation, through, or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, or park, or other place, as aforesaid.

Dedication of new roads, &c.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans, so signed as aforesaid, shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or place to public use or recreation as aforesaid as may be considered necessary by the Committee of Works or General Purposes; and such further instrument of dedication shall also be preserved as a record of the Council.

Committee for Works to fix street levels, &c.

4. The Committee for Works, or any officer or person acting under the supervision of such Committee, shall be subject to such orders as shall from time to time be made by the Council in that behalf, and shall lay out and fix the levels of all public roads, streets, and ways within the Borough, and the carriage and foot ways thereof; and it shall be the duty of such Committee, officer, or person, to place posts at the corners of intersections of any such public roads and streets, and of the carriage-ways and footpaths of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council, as hereinafter directed.

Change of street levels.

5. Wherever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, the Committee for Works shall cause a plan and sections showing the proposed cuttings to be exhibited at the Council Chamber for fourteen days for the information and inspection of ratepayers; and shall notify by advertisement in some newspaper circulating in the Borough that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor, or Chairman, and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk. And such plan and section so signed and countersigned, shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

6. Any person who shall form, dig, or open any drain or sewer, or remove, or cause to be removed, any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any street or other public place within the said Borough without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall on conviction, forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound. That every owner or occupier upon whose land or premises are found growing any weeds known as Bathurst burr, Scotch thistle, sweetbriar, or other noisome weeds, shall on being required by the Inspector of Nuisances, or any other officer of the Council, cause the same to be destroyed, failing which shall be liable to a penalty not exceeding (£2) two pounds nor less than ten shillings.

Holes to be enclosed.

7. Any person or persons who shall dig or cause to be dug or made any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Borough, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same, and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Borough, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be longer than absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure, shall forfeit and pay for every such refusal or neglect any sum not exceeding five pounds.

Open spaces and steps adjoining the footways to be enclosed under penalty.

8. Every owner or occupier of any house, building, or land within the said Borough, having an entrance area, garden, or other open space, or any vacant building lot, or waterhole, or excavated space adjoining the footway of any street or public place in such Borough, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and on failure thereof every such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not being less than forty shillings nor more than five pounds. And every owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid, within seven days after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

9. When any road, street, or lane has been formed and the footpath put in order, the owners of all houses, or other structures abutting thereon, shall so arrange the roofs of such structures, by spouting or otherwise, as shall prevent the rain from flowing therefrom on to such pathway; and any owner or occupier who shall refuse or neglect to carry out this By-law shall forfeit and pay for every such offence, after due notice given, any sum not exceeding five pounds.

Wells to be covered over—Penalty.

10. Every person who shall have a well situated between his or her dwelling-house or the appurtenances thereof and any road, street, or footway, within the limits of the said Borough, or at the side of, or in any yard, or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently fastened over; and if any person having such well as aforesaid shall fail to cover over and secure the same within twenty-four hours after notice in writing shall have been given to him, or to her, by any officer of the said Council, or shall have left for such person at his or her usual or last known place of abode, or on the said premises, shall on conviction forfeit and pay the sum of ten shillings, and for every day after such notice that such well shall remain open or uncovered contrary to the provisions hereof, that person shall be deemed guilty of a separate offence against this By-law.

Temporary stoppage of traffic for repairs, &c.

11. The Committee for Works, or any officer, or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Entrances to public roads to have watertables kept free from obstruction.

12. Where an entrance has been made from any land by the occupier, tenant, or owner thereof to any public road within the Municipality, and the traffic caused by such entrance crosses the watertable and footpath of such public road, the occupier, tenant, or owner of any such land from which such

entrance is made shall keep the said watertable and footpath for a reasonable distance on each side; clear of all obstructions failing to do the same he or she shall on conviction forfeit and pay any sum not exceeding five pounds for every such offence, in addition to the cost of clearing such watertable and footpath as aforesaid. The owner or occupier of any property having an entrance for vehicles across the footway into his or her premises shall at his or her own cost put down cube sets, or other substantial material on such crossing, to the satisfaction of the Council; and where such owner or occupier shall fail to put down such cube sets or other material within fourteen days after receiving notice so to do from the overseer of work, the Council may have the work done at his cost, and recover the same in the usual way.

Prevention of nuisances.

13. Any person about to erect a closet shall, before commencing such work, give to the Council Clerk, seven days' notice in writing of his intention and of the proposed position of such closet, and in default thereof, or in case of his commencing such work without such notice being given, he shall be liable to a penalty not exceeding ten pounds or less than ten shillings.

14. No closet shall be erected except in such position as shall be approved by the Inspector of Nuisances, or any other officer appointed by the Council.

15. Every closet shall be built with walls 8 feet high, and shall not be less than 3 feet 6 inches wide and 4 feet 6 inches long, and shall be provided with a door capable of being fastened from the inside, and shall have ventilating holes 4½ inches wide.

16. When two or more closets adjoin each other, there shall be a brick or stone dividing wall of not less than 4½ inches in thickness between every two closets, and each wall shall extend from the floor to the roof so as to effect a complete separation.

17. A separate closet shall be provided for every tenant, and a breach of this By-law shall make the owners or occupiers of any premises upon which there shall be a joint closet liable to a penalty not exceeding five pounds nor less than one pound.

18. In schools, or in factories, or other places of business, where a number of persons exceeding twelve shall reside or be occupied or employed, one pan shall be provided for every twelve persons, with a capacity of not less than one cubic foot or more than two cubic feet, and separate closets shall be provided for each sex, penalty same as No. 13.

19. If any alteration shall be requisite in the opinion of the Inspector of Nuisances or other officer appointed by the Council in that behalf for preserving public health, or in the case of any existing closet, the owner or occupier of such premises shall receive seven days' notice to remove or alter the same, and if he fail to do so, and the Council shall adjudge such closet to be either injurious to the health or opposed to decency by exposure or otherwise, the same shall be altered by such Inspector of Nuisances or other officer, and the cost of such alteration shall be paid for by the owner, and the cost of such shall be recovered in any Court of Petty Sessions.

20. The place of deposit for night-soil shall be in such locality as may be from time to time determined upon by the Council and approved by the Governor in Council, and no night-soil shall be deposited in any other locality within the Municipality except as allowed by By-laws 27 and 28.

21. No person or persons shall be at liberty, without the permission of the Council, or the Inspector of Nuisances acting under instructions from such Council to bring into or carry night-soil on his or her premises brought from elsewhere, nor shall any person or persons be allowed to cart or convey any night-soil through any of the streets of the Borough of Enfield, without the consent of the said Council; and any person committing a breach of this By-law shall forfeit and pay for the first offence a penalty not exceeding five pounds nor less than twenty shillings, and for the second and every subsequent offence a penalty not exceeding ten pounds nor less than two pounds.

22. Unless otherwise provided by the Council, all night-soil shall be removed from all closets by the servants of or Contractors with the Council in watertight covered vehicles, between the hours of twelve (12) midnight and five (5) o'clock in the morning.

23. The Inspector of Nuisances or other persons appointed by the Council may visit and inspect any premises, or do any work authorised by the Nuisances Prevention Act of 1875, on all days except Sundays and public holidays, between the hours of ten (10) o'clock in the morning and four (4) o'clock in the evening.

24. All night-soil shall be removed not less than once in each week.

25. All closets shall be supplied with one or more iron pans to be approved of by the Council, and shall be kept in proper order to the satisfaction of the Inspector of Nuisances, and any breach of this By-law shall carry a penalty of not less than five shillings nor more than one pound.

26. After the expiration of three months from date of passing these By-laws no person or persons shall be permitted to have on their premises any open closets or cesspits for the deposit of faecal matter, and any person or persons allowing any such closets or cesspits to remain after receiving twenty-eight days' notice to remove the same shall forfeit a sum not exceeding five pounds nor less than one pound, and after such conviction, if not removed within a further period of fourteen days, shall upon conviction forfeit a further sum of not less than five shillings and not more than forty shillings for every day that the same shall remain unaltered or unremoved.

27. No person shall be permitted to cover up or cause to be covered up any existing cesspit with earth or any other material prior to giving notice to the Inspector of Nuisances until the same shall have been emptied to the satisfaction of the Council or officer acting on their behalf, any person offending against this By-law shall be liable to a penalty not exceeding five pounds nor less than one pound.

28. Any person allowing night-soil from any closet to fall into any street, right-of-way, water channel, gutter, creek, river, or reservoir, or in any other public place shall forfeit and pay a sum not exceeding five pounds nor less than one pound.

29. If at any time the cesspit in any premises shall overflow or cease to be water-tight, the owner or occupier shall within twenty-four hours give notice to the Inspector of Nuisances, otherwise such owner or occupier shall be liable to a penalty not exceeding ten pounds.

30. The Council may recover and the owner or occupier of the premises shall pay such sum for the emptying of cesspits, earth pans, or other receptacles as may be decided upon from time to time by resolution of the Council.

31. The owner or occupier of any premises within the Municipality or any other person who shall have or erect upon his premises any closet otherwise than in accordance with these By-laws, or who shall refuse or neglect to comply with the provisions of any of the preceding By-laws, or who shall commit any breach thereof shall (in cases where no special penalty is provided) forfeit and pay a penalty not exceeding five pounds nor less than one pound.

32. The Inspector of Nuisances, so far as relates to these By-laws, and in all other cases the said Inspector of Nuisances or any other officer duly appointed by the Council, shall be the person to see the foregoing By-laws carried into effect and to institute and prosecute all legal proceedings thereunder.

33. All words occurring in these By-laws and which also occur in the Nuisances Prevention Act of 1875, shall have the like meaning assigned to them as are provided in the 4th section of the same Act.

Public Health.

Houses to be purified.

34. If, upon the certificate of any duly qualified medical practitioner, it appears to the Council that any house or part thereof or the premises occupied in connection therewith within the limits of the said Borough is in such filthy or unwholesome condition that the health of any person or persons is or may be liable to be affected or endangered thereby, and that the whitewashing, cleaning, purifying, or fumigating of any house or part thereof or the premises occupied in connection therewith would tend to prevent or check infectious or contagious diseases, the said Council shall give notice in writing to the owner or occupier of the said house or of such part thereof or the premises occupied in connection therewith to whitewash, cleanse, purify, or fumigate the same as the case may require; and if the person to whom notice is so given shall fail to comply therewith within the time specified in the said notice he or she shall be liable to a penalty of not less than forty shillings nor more than ten pounds: Provided that such person shall be liable as for a separate offence for every day during which such house or part thereof or such premises shall remain uncleansed or unfumigated; provided also that no such penalties for offences on successive days shall collectively amount to any greater sum than fifty pounds.

Inspection of premises.

35. Upon the representation of any householder that the house, premises, yards, closets, drains, ashpits, or hog-styles of the neighbouring or adjoining premises are a nuisance or offensive the Inspector of Nuisances or any other person appointed by the Council shall make an inspection of the premises complained of, and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises, and if such premises shall be found to be a nuisance or otherwise offensive notice in writing shall be given to the proprietor or resident of such premises that if, within forty-eight hours after the service of such notice, the nuisance shall not be removed the Council may by their Inspector cause the same to be removed, the proprietor, tenant, or occupant of the aforesaid premises shall upon conviction be liable to a penalty not exceeding twenty pounds, in addition to the cost of such removal where it shall have been done by the Council.

Loitering.

36. All persons standing or loitering upon any of the carriage-ways, footways, or other public places in the Borough of Enfield, to the inconvenience of passers by, or in any way interrupting the traffic, who shall not discontinue to do so upon being required by any officer or servant of the Council of the said Borough, or by any police officer, shall be liable to a penalty not exceeding two pounds nor less than ten shillings.

Building notices.

37. Every person before commencing to erect any house, building, or fence, in any thoroughfare or street in this Borough, shall give notice of his intention in writing to the Borough Council, failing which he shall be liable to a penalty not exceeding forty shillings nor less than five shillings.

PART IV.

Noisome and offensive trades.

No noisome or offensive trades to be carried on to injury of inhabitants.

1. No person shall carry on any noisome or offensive trade within the said Borough, so as to injure or be a nuisance as hereinafter stated, to the inhabitants thereof.

Definition of noisome and offensive trades.

2. Any manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in consequence of, or in connection therewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, effluvia, or smoke shall arise, be formed or emitted or shall come forth which shall be calculated to injure or be a nuisance to the inhabitants of the said Borough, or any of them, shall be considered a noisome and offensive trade within the meaning of these By-laws.

Complaint.—Inquire and report.—Orders of Council thereon.—Notice to discontinue, &c.—Penalty.

3. Upon complaint in writing by any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property as to injure his or her health, or the health of any member of his or her family, or to be a nuisance to such householder, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises whereon such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds of such complaint, and shall report thereon to the said Council. And if the said Council shall on the consideration of such report, and after any such further inquiry as may be deemed necessary (if any), be of opinion that the said complaint is well founded, and that any manufacture, trade, calling, or operation so complained of and so conducted, followed, or carried on as aforesaid, is a noisome and offensive trade within the meaning of these By-laws, notice shall be given to the person or persons conducting, following, or carrying on such manufacture, trade, calling, or operation to cease and discontinue the same within such reasonable time not less than thirty days nor more than sixty days after the delivery of such notice as the said Council may direct, or so to conduct, follow, or carry on his or her or their manufacture, trade, calling, or operation as that within such reasonable time as aforesaid, the same shall wholly and permanently cease to be noisome and offensive within the meaning of these By-laws, either to the said complainant or to any other resident within the said Borough. And if such manufacture, trade, calling, or operation shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be noisome and offensive as aforesaid within the time named in such notice as aforesaid, then the person or persons conducting, following, or carrying on such manufacture, trade, calling, or operation shall for the first offence forfeit and pay a sum of not less than forty shillings nor more than five pounds; for a second offence a sum of not less than five pounds nor more than twenty-five pounds; and for a third an every subsequent offence a sum of not less than ten pounds nor more than fifty pounds.

Mode of proceeding when noisome and offensive trade is about to be introduced.—Penalty.

4. The like proceedings shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade or calling, or operation is about to be commenced or entered upon which is likely to prove noisome and offensive within the meaning of these By-laws, save and except that the notice to be given as aforesaid shall be given to the person or persons about to commence or enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them not to commence or enter upon the same, or to take such measures as shall effectually prevent the same from becoming noisome and offensive, within the meaning of these By-laws, to any resident within the Borough. And any person who shall in any case commence, enter upon, or continue any such

manufacture, trade, calling, or operation so that the same shall be in any way noisome and offensive, within the meaning of these By-laws, shall for every such offence forfeit and pay a sum of not less than ten pounds nor more than fifty pounds.

Service of notice—Liabilities.

5. Service of any notice as aforesaid upon the person apparently conducting, following, or carrying on such manufacture, trade, calling, or operation, or upon the person apparently for the time being in charge or having the control of any premises or land wherein or whereon any such manufacture, trade, calling, or operation is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last-known place of abode of such person, shall be good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation within the meaning and for all purposes of these By-laws.

PART V.

Fee for opening footpaths to lay pipes, &c.

1. That a uniform charge of five shillings be made in every case where, for laying gas, water, or sewerage pipes, or any other purpose, the kerbing, asphaltting, or paving of any footpath within the Borough, or any roadway within the Borough requires to be cut into, broken, or disturbed; that permission to be first obtained in writing from the Council Clerk for the time being, and the said fee of five shillings to be paid before any such work is commenced, the Council undertaking the repair of such kerbing, asphaltting, paving, or roadway; that a uniform charge of ten shillings be made in every case where for building or other purposes it is necessary to cart material over the kerbing, asphaltting, or paving, a width of not more than eight feet, that permission be first obtained from the Council Clerk, for the time being, and the said ten shillings be paid before such carting is commenced, the Council undertaking the proper repair of such kerbing, asphaltting, or paving. Any person failing to comply with any of the provisions of this By-law, shall upon conviction forfeit and pay a sum not exceeding forty shillings, in addition to the fees herein imposed.

2. Any person who shall cast any dead animal, or any animal with intent to drown the same into any public water-course, sewer, or water-hole, or who shall suffer slops, or suds to flow from his or her premises into any water-course or water-hole, or who shall permit or suffer any such slops or suds to flow from his or her premises over any of the footways, or streets of the Borough, shall on conviction forfeit any sum not exceeding five pounds.

Proprietors of private drains, &c., to repair and cleanse same.

3. All drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council, at the charges of the occupants of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired or cleansed, according to the direction of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

Drains for discharging surface water from land.

4. Every owner or occupier of land in, adjoining to, or near any street, if such land shall be so situated that surface or storm water from or upon the same shall overflow, or shall tend naturally, if not otherwise discharged, to overflow any footpath of said street, shall within seven days after service of notice by the Council for that purpose, construct and lay from such point on such land being near to the footway, as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel at the outer edge of the footway nearest to the said land, and through, under, and transversely to the footway such covered drain or trunk as and subject to the inspection of the Council or its proper officers; and in default of compliance with any such notice within the period aforesaid, or with the provisions of this section, such owner or occupier shall forfeit any payment not exceeding five pounds. And if within seven days after such conviction, such owner or occupier shall still have failed to comply with such notice or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds; and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds. And every such owner or occupier who shall still have made default as aforesaid, for more than seven days after such second or any future conviction, shall be held guilty of a further offence within the meaning of this section.

Preventing and extinguishing fires.

Fire or combustible materials.

5. Every person who shall place or knowingly permit to be placed in any house, yard, workshop, out offices, or other premises, fire, gunpowder, or combustible, or inflammable materials of any kind in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not less than one pound nor more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible, or inflammable materials, and every such person who shall suffer any such fire, gunpowder, or combustible, or inflammable materials to remain as aforesaid, for twenty-four hours after any such conviction shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

6. Every person who shall erect any fence or brush-wood, bushes, or other inflammable material, or who shall make or place any stack of hay, corn, straw, or other produce, or place as or for covering of any such stack any inflammable material so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not less than one pound nor more than five pounds; and shall also remove such fence, stack or covering, within a reasonable time after such conviction as aforesaid, failing which such person shall be deemed guilty of a further offence against this By-law.

Blasting rock, &c.—No rock to be blasted without notice to the Council Clerk.

7. Any person who shall be desirous of blasting any rock or other substance within 100 yards of any street or public place or dwelling house in the said Borough shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place and shall give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock, shale, or other substance within the limits aforesaid without giving such notice or shall not conform to the directions given to him by the said Council Clerk, he or she shall, on conviction, forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds.

Vehicles to carry lights after dark.

8. Every carriage, cart, dray, buggy, or other wheeled vehicle, usually drawn by horses, which shall be in or upon any street, thoroughfare, or public place within the said Borough earlier than in the day time within one hour before sunrise or later in the night than one hour after sunset shall have attached to it one or more sufficient lights which shall be kept burning conspicuously in order to prevent collisions or accidents. Any person failing to comply with the provisions of this By-law shall forfeit and pay a sum of not less than five shillings.

Walking pace to be maintained in turning corners of streets.

9. No person riding or driving within the Borough shall allow his or her horse or horses to go out of a walking pace whilst turning any of the street corners, nor whilst passing over crossings at the intersection of streets within the said Borough. Any person so offending shall forfeit and pay any sum not exceeding one pound nor less than five shillings.

Breaking in horses, &c.

10. Any person or persons who shall, in any street, road, or public place within the said Borough, furiously or carelessly drive any horse, mare, or gelding to or from any public watering place, creek, or river, or pasturage, or elsewhere, shall, on conviction, forfeit and pay any sum not exceeding forty shillings.

Trees in streets.

11. The Council shall have power to plant trees, shrubs, flowers, and other plants, as may be determined in any public street, road, or way within the Borough; and any person or persons wilfully injuring or destroying any of such trees, shrubs, or flowers, or any railing, fence, or thing protecting the same, shall on conviction, forfeit and pay a penalty of not more than ten pounds nor less than one pound in addition to the value of such tree, railing, fence, or thing so injured.

Rain not to be carried on to footpaths.

12. It shall not be lawful for any person whomsoever to allow to fall or to carry by means of pipes, gutters, or other contrivances, any rainwater from the roof of his or her premises or house upon any of the footways of any street or public place within the Borough; and any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances when required to do so by any officer of the Council, shall, on conviction, forfeit and pay for the first offence any sum not exceeding ten shillings, and for every subsequent offence any sum not less than ten shillings nor more than five pounds: Provided that the owner or occupier of any house or premises may, by means of pipes laid under the surface of such footways, and laid down to the

satisfaction and under the superintendence of the Overseer of Works or other officer acting in his behalf, convey any such rainwater into the gutter adjoining the nearest footway.

Obstructing public pathways.

13. If the owner or occupier of any land situate on the side of any street or road in this Borough shall permit any tree, shrub, or plant, kept for ornament or otherwise, to overhang any footpath or footway, on the side of such street or road, and on demand made by the Council shall not cut, lop, or cause to be lopped, all such trees, shrubs, or plants to the height of 10 feet at the least, the said Council, by their servants, labourers, or workmen, may cut or cause to be cut or lopped all such overhanging trees, plants, or shrubs, and remove or burn any such trees, plants, or shrubs, so cut or lopped, without being deemed a trespasser or trespassers.

Wilful trespass.

14. Every person who shall wilfully let in or knowingly suffer to enter upon the reserves of public recreation grounds any animal or animals without due authority, shall be deemed guilty of wilful trespass, and shall be liable for every such offence to a penalty not exceeding twenty pounds nor less than two pounds.

Penalty for destroying boundary marks, &c.

15. Any person pulling down, destroying, defacing, or injuring any marks, or other erection thereon, without the authority of the Council, shall forfeit and pay any sum not exceeding ten pounds nor less than one pound.

Exhibitions, &c., to be licensed.

16. No exhibition other than exhibitions licensed by the Colonial Secretary, under the provisions of the Act 14 Victoria No 23, or exhibitions of a temporary character specially provided for, shall be held or kept for hire or profit within the said Municipality nor shall any bowling alley, skittle alley, dancing saloon, or other place of public amusement other than a place licensed as aforesaid, or a place for temporary amusement, be used as such for hire or profit within the said Municipality, unless or until permission, in writing, be granted by the Mayor. Any person offending against this By-law shall forfeit and pay any penalty not exceeding five pounds nor less than one pound.

No exhibition, &c., on Sundays, &c.

17. No such exhibition or place of amusement as aforesaid shall be held or kept open, or used for the purpose of such public amusement on Sundays, Christmas Day, or Good Friday, and every person offending against this By-law, shall on conviction forfeit and pay a sum not exceeding five pounds nor less than one pound for every such offence.

Passed by the Municipal Council of the Borough of Enfield, this tenth day of July, in the year of our Lord one thousand eight hundred and ninety-four.

(L.S) KENNETH MATHESON,
EDWARD A. PYMAN, Mayor.
Council Clerk.

1894.
(SECOND SESSION.)

NEW SOUTH WALES.

PUBLIC VEHICLES REGULATION ACT OF 1873 AND AMENDMENT
ACTS OF 1886 AND 1890.
(BY-LAWS.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Chief Secretary's Office,
Sydney, 9th October, 1894.

METROPOLITAN TRANSIT COMMISSIONERS—BY-LAWS.

THE following By-laws, made by the Metropolitan Transit Commissioners under the "Public Vehicles Regulation Acts, 1873-1890," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Acts.

JAMES N. BRUNKER.

THE Metropolitan Transit Commissioners, empowered under the provisions of the Public Vehicles Regulation Act of 1873 and the Public Vehicles Regulation Act Amendment Acts of 1886 and 1890, do, by virtue of the authority vested in them by the said Acts, hereby make alterations and repeals in and of the By-laws under the said Acts, confirmed by His Excellency the Governor, with the advice of the Executive Council, on the 18th September, 1889, and certain additional By-laws, such alterations and repeals and additional By-laws being hereunder particularly set forth:—

By-laws 5, 6, 8, 27, and 40 of the By-laws passed by the Metropolitan Transit Commissioners on the 31st July, 1889, and published in the Government Gazette of date the 18th September, 1889, are hereby repealed, and the By-laws hereunder written numbered respectively 5, 6, 8, 27, and 40 are substituted in lieu thereof respectively.

By-law No. 37 of the said By-laws of the 31st July, 1889, is hereby repealed.

Schedules B, C, H, J, K, L, M, N, O, to the said By-laws of the 31st July, 1889, are hereby repealed, and the following Schedules marked respectively B, C, H, J, K, I, M, N, O, substituted in lieu thereof respectively.

5. Licenses for public vehicles, drivers, or conductors shall be in the form provided in Schedule B, for each such license respectively, or to the like effect, and no driver shall be at liberty to drive any other kind of vehicle than that specified in such license.

6. Every license granted under these By-laws shall be under the Common Seal of the Commissioners, and under the hand of the Chairman of the Board, or of the Chairman of the meeting at which such license shall have been granted, and also under the hand of the Registrar, and shall be, unless cancelled or suspended as hereinafter provided, in force from the date of such license up to and including the 31st day of January in the year next ensuing; and no such license shall include more than one public vehicle or one person: Provided that if by accident or otherwise any public vehicle shall become unfit for use, it shall be lawful for the owner thereof, during such reasonable time as it shall be undergoing repair, to substitute another vehicle therefor, but such substituted vehicle shall

in all respects be subject to these By-laws, and the owner as well as the person using it shall be liable for any non-compliance with these By-laws. In order to entitle an owner to the benefit of the above provision, he shall give notice in writing to the Registrar of his desire to substitute a vehicle as aforesaid, stating the cause of his being compelled to do so, and the period during which it will be necessary to ply the same; and no such substitute shall be used until it shall have been inspected and approved of by the inspector, or for a longer period than fixed by a permit license in the form of Schedule C hereto, or to the like effect, under the hand of the Registrar, and delivered to the owner.

A permit license may also be granted in respect of any vehicle or to any driver or conductor for any period not exceeding one month, and such vehicle and the driver or conductor thereof shall in all respects be subject to these By-laws in the same manner as if licensed, as before provided.

8. Licenses may be renewed, provided that the applicant for such renewal shall have conducted himself and his business creditably and satisfactorily; and every person desirous of renewing a license as an owner, driver, or conductor, shall sign and leave with the Registrar a form of requisition at least thirty days before expiration of the license, and every renewal license must be taken up on or before the 31st day of January in each year.

27. No owner, driver, or conductor shall, whilst acting as driver or conductor, wilfully or negligently do or cause any damage to the person or property of anyone, or be guilty of any breach of the peace, misconduct, or misbehaviour, or be intoxicated, or make use of any threatening, obscene, abusive, or insulting language, or by act behave in an insulting, threatening, or abusive manner; and no driver shall cruelly beat, ill-treat, over-drive, abuse, or torture any horse in his charge, but shall at all times be sober and careful in the discharge of his duties.

40. No licensed driver or conductor shall demand more than the legal fare fixed by these By-laws. If any person pay the driver or conductor by demand any sum exceeding the legal fare, he may recover the sum paid in excess, and the driver or conductor shall be liable to a penalty not exceeding ten pounds for every such exacting.

NEW CLAUSES.

37. The owner of every licensed carriage or cab must provide for the driver at least two clean and unfolded copies of a ticket containing a table of the fares payable for the hire of public vehicles, number of vehicle, owner's name and residence, in the form given in Schedule J, printed in clear and legible characters.

77. The licenses now in force shall continue to be good and in force until and inclusive of the 31st day of January, 1895, subject to liability of forfeiture, cancellation, or suspension in case of breach of any of the By-laws.

78. Omnibuses plying through Newtown to Circular Quay on Sundays and Holidays shall have the same line of road and shall perform the journey between Newtown Bridge and Circular Quay in the same time as shown in Schedule O for Kingston 'buses.

79. The Metropolitan Transit Commissioners may employ any licensed auctioneer to sell by public auction, in lots to be arranged by such auctioneer, all unclaimed articles found in public vehicles, after the expiration of three months from the finding of such articles.

Cash must be paid on the fall of the hammer; in case of any dispute at any such sale or in case of neglect to pay cash as aforesaid, the auctioneer shall at once submit any article the subject of such dispute or non-payment for fresh bidding.

Fourteen days' notice of any sale of unclaimed articles must be given by advertisement in some daily newspaper published in Sydney, and the number and description of articles to be sold shall be stated in such advertisement.

80. No driver shall use any contrivance for fixing the top rods of brougham cabs so that the passenger cannot at any time have complete control over the opening and closing of the doors irrespective of the driver.

SCHEDULE J.

Cab and Carriage Fares.

No. _____
Owner _____
Residence _____

By Regulation No. 37 the owner of every carriage must provide for the driver a printed ticket containing the fares, the number of the vehicle, and the owner's name and address.

See that the number corresponds with that on the vehicle.

Keep this ticket. In case of complaint apply to Metropolitan Transit Commissioners' Office, 153, Phillip-street, Sydney.

Rates and fares to be paid for any cab or carriage within the limits of this By-law in the City and Police District of Sydney:—

	£	s.	d.
For a cab, for any time not exceeding one quarter of an hour, to carry two passengers if required by the hirer	0	1	0
For every subsequent quarter of an hour or part thereof	0	1	0
But if engaged for more than one hour, then to be paid at the rate of nine pence for every additional quarter of an hour or part thereof.			
For a hackney carriage, for any time not exceeding one half hour, to carry five persons if required by hirer	0	2	6
For every subsequent quarter of an hour or part thereof	0	1	3
But if engaged for more than one hour, then the fare to be paid at the rate of one shilling and three half-pence for every additional quarter of an hour or part thereof.			

If the vehicle is discharged at any place that is beyond the following boundaries, viz., a straight line drawn from the undermentioned places to each succeeding one in the order in which they are placed, viz. :—

- Double Bay Wharf;
- Old South Head Road, at Ocean-street;
- Randwick and Bunnerong Roads, at toll-bar;
- Botany Road, at M'Evoy-street;
- King-street, at Church-street, Newtown;
- George-street, at Church-street, Camperdown;
- Abattoir Road, at Crescent-street, Balmain;

the driver thereof shall be entitled to his ordinary fare of time back to the City boundary, unless a special arrangement as to fare has been made at the time of hiring.

If the vehicle is engaged at any stand or place that is beyond the above mentioned boundaries, and is discharged at any distance beyond a radius of one and a half miles, the driver thereof shall be entitled to half fare back to the stand or place where he was engaged, unless a special arrangement as to fare has been made at the time of hiring.

Vehicles to travel at a speed of not less than six miles an hour, except when otherwise ordered by the hirer.

The drivers of such vehicles respectively shall be bound to take, if required, exclusive of the driver, four persons inside and one outside a hackney carriage, or two persons inside a cab.

The driver shall not be obliged to take any luggage exceeding fifty pounds in weight, being clean, and of such a description as may be placed inside or outside the vehicle without injuring the same, and the driver shall be entitled to claim one shilling for every hour or part thereof, for every additional fifty pounds weight or portion thereof so carried; but the person hiring such vehicle shall be allowed eighty-four pounds weight of luggage when the number of persons is short of the number aforesaid.

Whenever the number of persons carried shall exceed that named for each vehicle respectively, the driver shall be entitled to charge one-third more for each adult or two children over five and under fifteen years of age.

Tolls to be paid by the hirer.

Half-fare in addition to the ordinary fare after 10 p.m. and before 6 a.m.

SCHEDULE K. IN PLACE OF PRESENT SCHEDULE.

Van fares.

	£	s.	d.
For removal of goods from any wharf, stand, or place in the City or Police District of Sydney, for any time not exceeding one quarter of an hour	0	2	0
For every subsequent quarter of an hour or part thereof	0	1	0
The removal of household furniture shall be by the hour: For the first hour or part thereof	0	2	6
For every subsequent half-hour or part thereof	0	1	3
For two horse waggons the fare to be, for the first hour or part thereof, 4s.; for every subsequent half hour, or part thereof, 2s.; or by special arrangement.			

If the van is discharged at any place that is beyond the following boundaries, viz., a straight line drawn from the under-mentioned places to each succeeding one in the order in which they are placed, viz. :—

Double Bay Wharf ;
Old South Head Road, at Ocean-street ;
Randwick and Bunnerong Roads, at toll-bar ;
Botany Road, at M'Evoy-street ;
King-street, at Church-street, Newtown ;
George-street, at Church-street, Camperdown ;
Abattoir Road, at Crescent-street, Balmain ;

the driver thereof shall be entitled to his ordinary fare of time back to the City boundary, unless a special arrangement as to fare has been made at the time of hiring.

Tolls to be paid by the hirer.

If the vehicle is engaged at any stand or place that is beyond the above-mentioned boundaries, and is discharged at any distance beyond a radius of one mile, the driver thereof shall be entitled to half-fare back to the stand or place where he was engaged, unless a special arrangement as to fare has been made at the time of hiring.

Vans must be loaded and unloaded and travel without delay.

SCHEDULE L.

Commissioner.

ALFRED EDWARD,
Registrar and Chief Inspector.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

NEWCASTLE PAVING AND PUBLIC VEHICLES
REGULATION ACT.

(BOROUGH OF NEWCASTLE—BY-LAWS.)

Presented to Parliament, pursuant to Act 39 Vic. No. 36, sec. 9.

Chief Secretary's Office,
Sydney, 23rd August, 1894.

NEWCASTLE MUNICIPALITY.—BY-LAWS.

THE following By-laws made by the Council of the Borough of Newcastle, under the "Newcastle Paving and Public Vehicles Regulation Act," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

JAMES N. BRUNKER.

BOROUGH OF NEWCASTLE.—BY-LAWS.

THE Council of the Borough of Newcastle do, by virtue of the authority vested in it by the "Newcastle Paving and Public Vehicles Regulation Act of 1876," 39 Victoria No. 36, hereby repeal certain Time-tables and Schedules published in the Government Gazette of 1st June, 1894, and make and establish the following Time-tables and Schedules instead of those repealed, and declare that the following Time-tables and Schedules shall stand in place of and instead of the Time-tables and Schedules heretofore in force.

That Schedule I published in the Government Gazette of the 18th July, 1893, be repealed and the following substituted:—

SCHEDULE I.

Omnibus and omnibus car stands.

King-street on the north side, between Watt and Pacific Street (hereafter called Watt and King Street Stand).

Darby-street on the west side at the corner of Macquarie-street.

That the additional route published in the Government Gazette of 18th July, 1893, be repealed and the following substituted:—

Every alternate vehicle leaving the Stand at Watt and King Streets, shall go by the following route, viz., by way of Hunter-street, Hunter-street West, Darby-street, Laman-street, Bruce-street, Parry-street, and Darby-street, to the stand at the corner of Darby and Macquarie Streets.

Every alternate vehicle leaving the stand at the corner of Darby and Macquarie Streets shall go by the following route, viz., by way of Darby-street, Parry-street, Bruce-street, Laman-street, Hunter-street West, Hunter-street; and thence to the Stand at Watt and King Streets.

That Schedule J published in the Government Gazette of 18th July, 1893, be repealed and the following substituted:—

SCHEDULE J.

To and from the stand at Watt and King Streets by way of Hunter-street, Hunter-street West, and Darby-street, to the stand at the corner of Darby and Macquarie Streets,

To and from the stand at Watt and King Streets, by way of Hunter-street, Hunter-street West, and Charlton-street, to or from the western boundary of the Municipality.

To and from the stand at Watt and King Streets, by way of Hunter-street, Hunter-street West, to and from the Carrington Bridge.

To and from the stand at Watt and King Streets, by way of Hunter-street, Hunter-street West, and Charlton-street, to or from Wickham.

To or from the stand at Watt and King Streets, by way of Hunter-street, Hunter-street West, Darby-street and Patrick-street, to or from the stand on the southern boundary of the Municipality.

That Schedule K published in the Government Gazette of 18th July, 1893, so far as it applies to all vehicles plying to and from Kenrick-street, and also to those vehicles plying to or from Patrick-street be repealed, and that the following be substituted:—

Omnibuses or omnibus cars shall start from the Stands at Watt and King Streets, and also at the corner of Darby and Macquarie Streets, at intervals of every twenty minutes, from 8 a.m. until 11 p.m., and shall perform the journey and the parts thereof as follows:—

- From Watt and King Streets to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to St. John's Church in 7 minutes.
- " St. John's Church to Darby-street Stand in 3 minutes.
- " Darby-street Stand to St. John's Church in 3 minutes.
- " St. John's Church to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to Watt and King Streets in 7 minutes.
- " Darby-street Stand to Patrick-street Stand in 4 minutes.
- " Patrick-street Stand to Darby-street Stand in 4 minutes.

The whole journey to or from Watt and King Street Stand to the Stand in Darby-street, to be completed in seventeen minutes, and the whole journey from or to the Stands at Watt and King Streets and Patrick-street, to be completed in twenty-one minutes.

TIME TABLE.

Junction and Patrick Streets Vehicles.

Every vehicle leaving the stands at Darby and Macquarie Streets, and at Watt and King Streets, shall start at the under-mentioned times :—

8:20 a.m.	12:20 p.m.	4:20 p.m.	8:0 p.m.
8:40 "	12:40 "	4:40 "	8:20 "
9:0 "	1:0 "	5:0 "	8:40 "
9:20 "	1:20 "	5:20 "	9:0 "
9:40 "	1:40 "	5:40 "	9:20 "
10:0 "	2:0 "	6:0 "	9:40 "
10:20 "	2:20 "	6:20 "	10:0 "
10:40 "	2:40 "	6:40 "	10:20 "
11:0 "	3:0 "	7:0 "	10:40 "
11:20 "	3:20 "	7:20 "	11:0 "
11:40 "	3:40 "	7:40 "	11:20 "
12:0 noon.	4:0 "		

On Saturdays and holidays these vehicles will start at intervals of ten minutes.

Omnibuses or omnibus cars plying between Tighe's Hill, Wickham, and Newcastle, shall start from Watt and King Streets and Charlton-street Stands at intervals of every fifteen minutes from 8 a.m. till 11 p.m., and shall perform the journey and the parts thereof in sixteen minutes, as follows :—

- From Watt and King Streets to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to Union-street in 4 minutes.
- " Union-street to Cottage Bridge in 5 minutes.
- " Cottage Bridge to Union-street in 5 minutes.
- " Union-street to Tattersall's Corner in 4 minutes.
- " Tattersall's Corner to Watt and King Streets in 7 minutes.

Omnibuses or omnibus cars plying between Hamilton, Adamstown, and Charlestown, shall start from Watt and King Streets and Charlton-street stands, at intervals of every fifteen minutes, excepting when otherwise provided by Time Table, from 8 a.m. till 11 p.m., and shall perform the journey and the parts thereof in sixteen minutes, as follows :—

- From Watt and King Streets to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to Union-street in 4 minutes.
- " Union-street to Cottage Bridge in 5 minutes.
- " Cottage Bridge to Union-street in 5 minutes.
- " Union-street to Tattersall's Corner in 4 minutes.
- " Tattersall's Corner to Watt and King Streets in 7 minutes.

Omnibuses or omnibus cars plying between the Carrington Bridge and Watt and King Streets shall start from Watt and King Streets and Carrington Bridge at intervals of every fifteen minutes from 8 a.m. till 11 p.m., and shall perform the journey and the parts thereof in eleven minutes, as follows :—

- From Watt and King Streets to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to Carrington Bridge in 4 minutes.
- " Carrington Bridge to Tattersall's Corner in 4 minutes.
- " Tattersall's Corner to Watt and King Streets in 7 minutes.

Omnibuses or omnibus cars plying to and from Lambton and Wallsend shall start from Watt and King Streets Stands and Charlton-street in accordance with the Time Table, and shall perform the journeys to or from Watt and King Street and Charlton-street in sixteen minutes and the parts thereof, as follows :—

- From Watt and King Streets to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to Union-street in 4 minutes.
- " Union-street to Cottage Bridge in 5 minutes.
- " Cottage Bridge to Union-street in 5 minutes.
- " Union-street to Tattersall's Corner in 4 minutes.
- " Tattersall's Corner to Watt and King Streets in 7 minutes.

Omnibuses or omnibus cars plying between Newcastle, Broadmeadow, and Waratah, shall start from Watt and King Streets and Charlton-street Stands at fifty minutes past each hour from 8:50 a.m. till 10:50 p.m., and shall perform the journey and parts thereof, as follows :—

- From Watt and King Streets to Tattersall's Corner in 7 minutes.
- " Tattersall's Corner to Union-street in 4 minutes.
- " Union-street to Cottage Bridge in 5 minutes.
- " Cottage Bridge to Union-street in 5 minutes.
- " Union-street to Tattersall's Corner in 4 minutes.
- " Tattersall's Corner to Watt and King Streets in 7 minutes.

Provided, however, that the Inspector of Vehicles for the time being shall be at liberty to reduce the times of starting on all or any of the lines of road.

Every vehicle leaving the stand at Watt and King Streets for Hamilton, Adamstown, and Charlestown, shall leave at the undermentioned times :—

8:5 a.m.	12:5 p.m.	4:5 p.m.	7:35 p.m.
8:20 "	12:35 "	4:35 "	8:5 "
8:35 "	1:5 "	5:5 "	8:35 "
8:50 "	1:20 "	5:20 "	9:5 "
9:5 "	1:35 "	5:35 "	9:35 "
9:35 "	1:50 "	6:5 "	9:50 "

LOCAL GOVERNMENT COMMISSION.

(RETURN SHOWING COST OF.)

Ordered by the Legislative Assembly to be printed, 14 May, 1895.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 3rd May, 1895, That there be laid upon the Table of this House a Return showing,—

- “ (1.) The total sum expended by the Local Government Commission to date, including salaries, rent, and miscellaneous expenses.
“ (2.) The total cost to the Colony of this Commission.”

(Mr. Piddington.)

The Local Government Commission to The Principal Under Secretary.

Sir,

Sydney, 9 May, 1895.

We have the honor to acknowledge the receipt of your letter of the 6th instant, forwarding copy of an Order of the Legislative Assembly, and requesting that we furnish the information called for in such Order, and, in reply thereto, we have to inform you that the total sum expended by the Local Government Commission to date, including salaries, rent, and miscellaneous expenses, is £178 14s. 5d. This amount also represents the total cost to the Colony of this Commission to date.

No fees of any kind have been received by the Commissioners.

We have, &c.,

For the Commissioners,

C. E. R. MURRAY,

President.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LOCAL GOVERNMENT BILL.

(MESSAGE No. 24.)

Ordered by the Legislative Assembly to be printed, 8 November, 1894.

By Deputation from His Excellency,
FREDK. M. DARLEY,
Lieutenant-Governor.

Message No. 24.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Lieutenant-Governor recommends, for the consideration of the Legislative Assembly, the expediency of making provision to meet the requisite expenses in connection with "A Bill to establish Local Government over that part of New South Wales which is outside the boundaries of municipalities; to make further provision for the constitution of municipal districts, and for the alteration of the areas of existing municipalities; to amend the law relating to municipal loans and municipal rates, and the recovery thereof; to amend and to extend the provisions of the 'Municipalities Act of 1867'; to amend other Statutes in order to give effect to the aforesaid provisions; and for other purposes connected therewith or incidental thereto."

Government House,
Sydney, 8th November, 1894.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LOCAL GOVERNMENT BILL.

(PETITION FROM F. B. GALLEY, MAYOR OF CASINO, REPRESENTING THAT THE PROVISIONS CONTAINED THEREIN ARE ALTOGETHER INADEQUATE, AND ABSOLUTELY RUINOUS TO CERTAIN LANDHOLDERS.)

Received by the Legislative Assembly, 14 March, 1895.

To the Honorable Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of landholders and other residents on the Upper Richmond,—

HUMBLY SHOWETH:—

That at a public meeting held in Casino, on Saturday, 23rd February, the following resolution was unanimously adopted:—

- “That in the opinion of this meeting (composed of landholders in all parts of the proposed Kyogle Division, under the Local Government Bill), the provisions of that Bill are altogether inadequate to meet the just claims of the remote districts of the Colony, which have in the past not participated to any appreciable extent in the expenditure of public money raised by taxation, the sale of Crown lands and loans, as compared with those portions of the Colony not so remote from the metropolis that have had nearly every want supplied in the shape of public roads and other works.
- “2. That if Local Government, as suggested by the Honorable G. H. Reid in the Bill introduced by him in the Assembly on the 14th November last, should become law, it will absolutely ruin the landholders in districts in no way connected with Sydney, such as that comprised within the boundaries of the proposed Kyogle Division.”

Your Petitioners humbly pray your Honorable House to grant such relief as may be deemed expedient.

And your Petitioners, as in duty bound, will ever pray.

Signed for and on behalf of the Petitioners,—

F. B. GALLEY,
Mayor of Casino and Chairman.

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LOCAL GOVERNMENT BILL.

(PETITION FROM CERTAIN FARMERS AND OTHER RESIDENTS OF COOTAMUNDRA AGAINST.)

Received by the Legislative Assembly, 24 April, 1895.

The humble Petition of the undersigned Farmers and other Residents of the district of Cootamundra to
to the Parliament of New South Wales,—

HUMBLY SHOWETH:—

1st. That at a public meeting held in the Town Hall, Cootamundra, on the fourth day of
March, 1895, the following resolution was unanimously adopted:—

“That in the opinion of this meeting, the present is a most inopportune time to bring the Local
Government Bill into law, as the people are unable (owing to the severe and prolonged depression)
to bear further taxation; that Parliament should postpone consideration of the matter until
more prosperous times dawn upon the Colony; that a Petition to such effect be got up in the
district for presentation to Parliament.”

2nd. That your Petitioners, who attended that meeting, pray your Honorable House to take into
consideration the wishes of your Petitioners, as expressed in the said resolution.

And your Petitioners will ever pray.

[Here follow 47 signatures.]

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LOCAL GOVERNMENT BILL.

(PETITION FROM CERTAIN OFFICERS AND MEMBERS OF THE MUNICIPAL ASSOCIATION OF NEW SOUTH WALES, IN FAVOUR OF.)

Received by the Legislative Assembly 4 April, 1895.

To The Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Officers and Members of the Municipal Association of New South Wales,—

HUMBLY SHOWETH :—

1. That your Petitioners, representing the majority of the Municipalities at present established throughout the Colony of New South Wales, view with satisfaction the introduction to your Honorable House of a Bill to establish Local Government over the whole Colony.

2. That your Petitioners, while fully alive to the necessity of Municipal Councils being given larger powers than they possess under the existing laws, or than are proposed to be given under the Local Government Bill now under your consideration, are of opinion that the passing of this Bill will be a distinct advance in the direction of complete Local Government.

3. Your Petitioners, therefore, humbly pray that your Honorable House will endeavour to have the Bill passed into law during the present Session, with such amendments as, in your wisdom, may seem desirable.

And your Petitioners, as in duty bound, will ever pray.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS BILL.

(MESSAGE No. 11.)

Ordered by the Legislative Assembly to be printed, 12 September, 1894.

R. W. DUFF,
Governor.

Message No. 11.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to further regulate the sale, letting, disposal, occupation, and management of Crown lands; for the protection of certain homesteads; to enable the Crown, by purchase, resumption, exchange, and surrender, to acquire alienated lands; to amend the law relating to conditional purchasers in certain respects; to provide for forfeitures and validations in certain cases; to prevent impounding and actions for trespass upon unfenced holdings; to amend the law as to Local Land Boards and the Land Appeal Court; and to effect amendments in such Statutes as may be necessary to give full force and effect to the aforesaid provisions; and for other purposes connected therewith.

Government House,
Sydney, 12th September, 1894.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONDITIONAL PURCHASES PAYMENTS BILL.
(MESSAGE No. 72.)

Ordered by the Legislative Assembly to be printed, 20 June, 1895.

FREDK. M. DARLEY,
Lieutenant-Governor.

Message No. 72.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Lieutenant-Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to further promote settlement on lands conditionally purchased from the Crown by providing for the reduction of the annual payments in respect thereof, and for the reduction of the rate of interest now payable upon certain conditional purchases under the Repealed Acts from 5 to 4 per centum per annum; and to effect such amendments in such statutes as may be necessary for the aforesaid purposes.

*Government House,
Sydney, 20th June, 1895.*

1894-5.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

INTEREST ON CONDITIONAL PURCHASES BILL.

(PETITION FROM RESIDENTS AND FARMERS OF THE DISTRICT OF GEROGERY, IN FAVOUR OF.)

Received by the Legislative Assembly, 8 May, 1895.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The Resolution passed at a Public Meeting held at Gerogery, on 13th April,—

HUMBLY SHOWETH,—

Resolved that we, the residents and farmers of the District of Gerogery, do hereby endorse and approve of the Bill introduced by Mr. Thomas Rose on 11th of December, 1894, to provide for the remission of interest payable in respect of conditional and other purchases.

We respectfully ask that when dealing with the Bill you will give the same consideration to the resident selectors of the Colony as is provided for the pastoral and homestead tenants in the new Land Bill, viz., for any depreciation in the value of wheat, wool, stock, and other farm products, and for any diminution of the average yield of the land arising from causes over which they have no control.

We would respectfully state that the remission of interest would not affect the revenue of the Colony for fifteen years, and that it would place the selectors of New South Wales in the same position as the selectors of Victoria. We therefore pray honorable members desirous of having a *bonâ fide* farming community settled on the land to give Mr. Thomas Rose's Bill their hearty and loyal support in passing it into law.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 19 signatures.*]

A similar Petition was received,—

On 8th May, 1895, from residents and farmers of the District of Jindera; 20 signatures.

1894-5.

—

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

INTEREST ON CONDITIONAL PURCHASES.

(PETITION FROM CERTAIN RESIDENTS OF JINDERA, PRAYING FOR THE REMISSION OF THIS YEAR'S INTEREST ON THE UNPAID BALANCE DUE.)

—

Received by the Legislative Assembly, 5 March, 1895.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned residents of the Town and District of Jindera,—

HUMBLY SHOWETH:—

That, owing to the failure of the wheat crop, and the low price ruling for wheat and all other farm products, the farmers of this district will, we regret to state, be unable to pay this year's annual Government interest on their selections.

That the farmers of this district have not reaped over 4 bushels of wheat an acre.

That, after deducting seed for the coming season, the saleable product does not exceed 6s. an acre.

That the wheat crop cannot be put in and taken off for less than 12s. an acre.

That the farmers have thus worked their land this season at an absolute loss of 6s. an acre.

That the farmers have suffered much loss this season by their sheep dying in large numbers by an unknown disease; this, coupled with the failure of the wheat for the last two years, and the low price obtained for wool and wheat, have compelled them to seek relief by obtaining a remission of this year's interest on their selections.

Your Petitioners, therefore, respectfully pray that you will be pleased to take such legislative action as will enable you to grant the remission of this year's annual interest on the unpaid balance due on their conditional purchases, thus assisting the farmers to follow their usual occupation with the hope that they will reap better crops and prices the coming season.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 64 signatures.]

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONDITIONAL PURCHASES.

(PETITION FROM CERTAIN RESIDENTS IN THE ELECTORATE OF QUEANBEYAN AND OTHERS, PRAYING FOR RELIEF TO THOSE WHO WILL BE REQUIRED TO PAY INSTALMENTS ON THEIR HOLDINGS.)

Received by the Legislative Assembly, 2 April, 1895.

To the Honorable Sir Joseph Palmer Abbott, Speaker, and the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of your Petitioners,—

RESPECTFULLY SHOWETH:—

1. That on the 31st day of March, 1895, your Petitioners, in common with the conditional purchasers and occupiers of Crown lands throughout the territory of New South Wales, are required to pay the sum of one shilling per acre of their respective holdings, in terms of the Act in virtue of which they hold possession of their lands.

2. That heretofore they have annually discharged this obligation.

3. That, owing to the abnormally depressed state of the markets, the price obtainable for agricultural produce of all kinds are such as, added to losses experienced by great mortality amongst your Petitioners' stock, and loss of occupation by many of their number as carriers, consequent on the extension of our railway system, to have reduced your Petitioners to a condition of absolute penury, which makes it extremely difficult for them to provide food and clothing for themselves and their families, and place it utterly beyond their power to meet their engagements with the Crown, falling due as aforesaid.

4. Your Petitioners desire respectfully to point out to your Honorable House that unless some such measure of relief be immediately afforded them, their respective lands must become forfeited to the Crown, and in such case they and those dependent on them be made homeless, and deprived of the means of subsistence.

5. That, in view of these facts, your Petitioners humbly pray that your Honorable House will see fit to pass a measure providing,—

(1.) For the suspension of the payment of interest due as aforesaid; and

(2.) For an alteration of the condition of payment, by substitution of sixpence per acre per annum in lieu of one shilling per acre, and a provision extending the total of such payments over a period of sixty-four years, instead of thirty-two years, as in terms at present in force.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 284 signatures.]

NEW SOUTH WALES.

FARMERS' AND SETTLERS' ASSOCIATIONS.

(PETITION FROM GUNNING FRANCIS PLUNKETT, PRESIDENT, AND JOHN LOUIS TRÉFLÉ, SECRETARY, IN FAVOUR OF CERTAIN RESOLUTIONS DEALING WITH THE LAND AND OTHER LAWS.)

Ordered by the Legislative Assembly to be printed, 12 September, 1894.

The humble Petition of the undersigned, representing the Farmers' and Settlers' Associations of the Colony,—

To the Honorable the Speaker and Members of the Legislative Assembly, in Parliament assembled,—
RESPECTFULLY SHOWETH:—

That the following resolutions were agreed to by delegates assembled together at Young, representing the aforesaid Farmers' and Settlers' Associations.

Central Division Leases.—That this Conference confirms the resolution in regard to the Central Division Leases being made available for settlement, passed at the recent Cootamundra Conference.

Land Value Taxation.—That, in the opinion of this Conference, an unimproved value tax on all private holdings over the maximum allowed by law is justifiable and expedient.

Holdings of Special Areas.—That, in the opinion of this Conference, all special areas outside suburban boundaries be reduced in price £1 per acre, and that all moneys already paid go towards principals and interests, and all future instalments to be paid as is usual in ordinary conditionally-purchased land; and that Parliament be petitioned to at once pass a short Bill dealing with the subject.

Loans to Farmers.—That, in the opinion of this Conference, some system should at once be devised by the Government for advancing money to farmers and settlers at a reasonable rate of interest, and the Crédit Foncier system would best accomplish that end pending the establishment of a State bank.

Relief to Holders of Special Areas.—That a deputation, consisting of delegates from various parts of the Colony, be appointed to wait upon the Minister for Lands to urge upon him the necessity of bringing forward a Bill giving relief to the holders of special areas, as set forth in a previous resolution passed by the Conference, the Secretary to organise such deputation.

Excise Duties on Colonial Tobacco.—That excise duties on Colonial tobacco be abolished.

Finality of Selection.—That this Conference confirms the resolution passed by the Cootamundra Conference relating to finality of selection, viz.:—That the best method of bringing about finality of selection is to limit the area which shall be alienated to any holder; and this Conference is of opinion that a stringent condition should be imposed upon all future holders that, if they transfer, they shall sell only to residential buyers, always provided that this law shall have no retrospective effect.

Survey of Land.—That this Conference desires to impress upon the Government the necessity of proceeding at once with the survey of lands intended to be made available for settlement in the Central Division, but does not commit itself to the principle of survey before selection.

Making up Maximum Selection.—That, in the opinion of this Conference, any new Land Bill should contain a provision allowing resident selectors to make up the maximum area within 10 miles of their present residence.

Elective Land Boards.—That this Conference confirms the resolution agreed upon at the Cootamundra Conference in reference to Elective Land Boards, *i.e.*, the Chairman to be appointed by the State, and the other two members to be elected by the landholders, or selectors in each district.

Income Tax.—That, in the opinion of this Conference, an income tax, as an equitable form of taxation, should be dealt with by Parliament.

Forfeited Selections.—That, in the opinion of this Conference, any selector whose selections should become forfeited through inability to pay instalments should have the right to the appraised value of his improvements from the incoming selector.

And your Petitioners, therefore, pray that you will be pleased to take the foregoing resolutions into your favourable consideration before dealing with the land or other laws of this Colony; and your Petitioners, as in duty bound, will every pray.

GUNNING FRANCIS PLUNKETT, President.

JOHN LOUIS TRÉFLÉ, Secretary.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

THE LAND LAWS.

(PETITION FROM W. E. COPE, MAYOR OF CASINO, AS CHAIRMAN OF A PUBLIC MEETING OF SELECTORS, IN FAVOUR OF CERTAIN AMENDMENTS.)

Received by the Legislative Assembly, 20 September, 1894.

To the Honorable Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of Selectors and other Residents in the Richmond River District, in public meeting assembled,—

HUMBLY SHOWETH:—

That the sad experience of the selectors and landowners in this district during the past four years proves that the existing land laws, and their administration, are of too oppressive a character to enable them to profitably occupy the land so far removed from port of shipment, railway communication, and in many cases roads of any kind under present conditions.

Most of such selectors are true pioneers, and after expending not only all their own available capital, but in some cases also sums of borrowed money, now find themselves, owing to the low price of live stock and produce, the remoteness of their holdings from every market, and the harassing conditions of the present land laws, landed in severe straits; and if tangible relief be not afforded they will be compelled to lose the result of years of hard labour, money invested, and even the homes of their families.

In any Amending Land Bill to be dealt with by Parliament, we would humbly suggest that provisions should be included based upon the following lines:—

1. Classification (and survey) of all unalienated Crown land in the Eastern and Central Divisions at least, based upon its proximity to markets or railways, and its capabilities for agricultural or grazing pursuits.
2. The abolition of survey fees.
3. That no unalienated Crown land in the Eastern and Central Divisions be dealt with for free selection or leasing purposes (as hereinafter suggested) until after survey.
4. Finality of selection.
5. The introduction of a system of leasing by the Crown of all classes of country land (except reserves absolutely necessary for public requirements) for terms ranging from fifteen to ninety-nine years, to be named by the parties applying for such leases; rental of these leases to be based upon the capital value of the land, with provision for reappraisal, if considered necessary by the Crown, every fifteen years; and that at the end of the term selected by the applicant, or sooner should he consider the reappraised rental excessive, the then value of improvements necessary for the profitable occupation of the land, effected by such applicant, to be paid to the outgoing tenant by the ingoing tenant. That applicants for such leases be only required to pay down a deposit of £5 for any area up to 300 acres of agricultural land, or £10 for any area of grazing land up to 1,500 acres, such deposits to be credited towards the first year's rent.
6. That the deposit payable for all future selections be 1s. per acre; balance, without interest, to be paid by yearly instalments—commencing the third year from date of application—of 6d. per acre until capital value of land is paid off.
7. The abolition of the provision for fencing selections or leases, with the addition of a safeguard preventing any holder from impounding stock off any portion thereof, except such as may be enclosed.
8. That members of the Land Board, other than the Chairman, be chosen (by ballot) by the property-holders in each land district, on the one-man-one-vote principle.
9. The abolition of the sale by auction of any Crown land, except town or suburban lots.

10. That provision be made for a reappraisalment of all conditional leases held under the Crown Lands Acts of 1884 and 1889, should the holders make application for such; new appraisements to be based upon the capital value of the land so held.
11. That provision be made so that any holder of either selected or freehold land may bring their holdings under the leasing conditions mentioned; and that such holders be credited with an equitable proportion of the sums already paid to the Crown, as future rental for a portion of whatever term they may apply for a lease of such land, by which means a large area of alienated land could be resumed by the Crown, and again become a State asset, without any direct outlay by the State.
12. That no land leased on the conditions mentioned be permitted to be transferred by the holders during currency of lease, except to such as are prepared to *bonâ fide* occupy and utilise the land so transferred; that no original applicant be permitted to transfer such leased land until he has occupied the same for a period of five years; and that no individual be permitted to hold more than one such lease from the Crown, or be the holder of more than one transferred lease.
13. That as regards all agricultural land to be leased or selected, within a reasonable distance of any port, market, or railway line, provision be made for the cultivation within five years of a reasonable proportion of such holdings in some form
14. That as regards all selections applied for since January, 1885, provision be made to reduce the annual instalment to 6d. per acre without interest.
15. That in reference to existing conditional leases the present fines of 5 and 10 per cent. for non-payment of what is practically an advance payment of twelve months' rental be abolished, and that a fine of 5 per cent. only be imposed upon holders who have failed to pay rental prior to six months of the then current year having elapsed.
16. That provision be made to enable holders of conditional purchases to subdivide their areas and sell any part of same, provided they pay up balance due to the Crown on that portion of the area to be sold, and pay cost of subdivision of holding.
17. That the present system of making declarations in regard to selections at the end of three and five years be abolished.
18. That the present system of holding ponderous inquiries under section 20 of the Act of 1884 for trivial omissions or neglect by selectors either as regards residence or other conditions be abolished, and that such inquiries be provided for only in cases shown by the Inspectors' reports to be flagrant.
19. That the Land Board's discretionary powers be enlarged so as to enable them to definitely find that conditions in regard to selections have been fulfilled in all cases where the non-fulfilment is shown to be of a purely technical character.
20. That the minimum annual rent provided for in section 90 of the Crown Lands Act of 1884 be reduced to £1 per annum, as it is manifestly unfair to charge applicants for small areas as special leases the minimum sum named in that section, irrespective of the position or extent of the land.

Your Petitioners are of opinion the land laws of this Colony are of the most illiberal character as compared with those in any of the other Colonies, and the administration thereof very frequently of a harassing nature.

Your Petitioners therefore pray that you will take these matters into consideration, and so amend the land laws as to enable people to make homes upon the lands of the Colony under more favourable and liberal conditions than have obtained in the past.

And your Petitioners, as in duty bound, will ever pray.

Signed for and on behalf of the Selectors and other Residents of the Richmond River,

W. E. COPE,
Chairman and Mayor of Casino.

1894.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

THE LAND LAWS.

(PETITION FROM CERTAIN FREE SELECTORS RESIDING IN THE NORTH COAST DISTRICTS, PRAYING FOR AN AMENDMENT OF.)

Received by the Legislative Assembly, 30 October, 1894.

The Honorable the Legislative Assembly, in Parliament assembled.

May it please your Honorable House.

We the undersigned, free selectors residing in the North Coast Districts,—

HUMBLY SHOWETH :—

That we have selected lands in accordance with the provisions of our land laws, and have complied with the terms imposed upon us. But the teaching of bitter experience has forced us to the conclusion that there is no recompense in the occupation of the heavily-timbered lands of the Coast Districts away from navigable streams to repay us for the great labour necessary to clear our holdings for agriculture and to make homes on them. Hundreds of our industrious selectors have worked on their selections, not only from daydawn till after the sun has gone down, but for sixteen hours out of the twenty-four during harvest time, and during moonlight nights, in burning the timber off our lands. Many of us have not only expended our time in labouring in this way, but we have expended what capital we started our settlements with, and we now find, after painful experience, that, do what we can, our holdings cannot be made to maintain those of us who have families; and we state without fear of contradiction that not one selector in every hundred has earned off his land as much in money per annum as the labouring maintenance man employed on the public roads earns in wages.

Taking into consideration the arbitrary and compulsory terms of our land laws, which compels a selector to reside on his holding for a term of five years, during which time he has expended the whole of his capital, the result of which is the selector finds himself tied to his lands because he feels his all has been sunk there, and because he has no means left to start anywhere else with. It is not only the great labour and cost of clearing the land the selector has to confront, but from the day we plant our seeds till our crops are harvested our products are subject to destruction from all kinds of pests. From these causes, and from disasters from rain and floods, many of us have become so impoverished and disheartened that we would be glad to part with our selections for a part of the value of the labour and money we have expended upon them. Our public lands were a gift to the people of this Colony from our mother country, and we feel sure that a patriotic Legislature never intended that our land laws should bring disaster on selectors or convert them into impoverished State tenants or State debtors. Yet this is the condition of thousands of conditional purchase selectors within the heavily-timbered areas of the Eastern Division of the Colony.

Therefore we humbly pray your Honorable House will do what is possible to improve the condition of your Petitioners by bringing in a new Land Bill that will remove some of the burdens imposed upon us by the present land laws, and that will mitigate the conditions under which those who desire to make homes on the lands in the future may acquire freeholds from the Crown.

We humbly pray that your Honorable House will abolish the interest charged on the balance owing on our lands, and that no such charge shall be made on future selectors of land. And we pray that the payments of the balance of principal may be made by yearly instalments of sixpence per acre. Under the present condition of payment, conditional purchasers are liable to pay £1 14s. 11½d. per acre for their lands, and to be kept tenants and debtors to the Crown for thirty-two years, and in the course of nature thousands of our selectors will not live to transfer their holdings free of debt to their children.

We believe our land laws to be the most repellant, both with regard to conditions and administration, of any in the whole world.

Therefore we pray that you will grant the redress we ask for in this Petition, and that you will in other ways so amend the conditions under which homes can be acquired from the Crown as will enable future settlers to make homes on the land under more favourable conditions than your Petitioners have experienced.

And we, your humble Petitioners, as in duty bound, will ever pray.

[Here follow 181 signatures.]

1894.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE LAND LAWS.

(PETITION FROM CERTAIN RESIDENTS IN THE NORTH COAST DISTRICTS, PRAYING FOR AN AMENDMENT OF THE 24TH CLAUSE OF THE CROWN LANDS ACT OF 1884.)

Received by the Legislative Assembly, 30 October, 1894.

The Honorable the Legislative Assembly, in Parliament assembled.

May it please your Honorable House,—

We, your humble Petitioners, residing in the North Coast Districts, most humbly pray that you will repair the gross abuse that has taken place under the 24th section of the Land Bill of 1884 with regard to the allotments of Special Areas, by reducing the price of all Special Areas remote from centres of population to £1 per acre.

And we, your humble Petitioners, as in duty bound, will ever pray.

[*Here follow 103 signatures.*]

(SECOND SESSION.)

NEW SOUTH WALES.

CROWN LANDS.

(DEDICATION OF CERTAIN LANDS UNDER ACTS 48 VIC. No. 18, SEC. 105, AND 53 VIC. No. 21, SEC. 41.)

Presented to Parliament, pursuant to Acts 48 Vic. No. 18, sec. 105, and 53 Vic. No. 21, sec. 41.

Department of Lands,
Sydney, 25th September, 1894.PROPOSALS UNDER SECTION 105, CROWN LANDS ACT OF 1884,
AND SECTION 41 OF THE CROWN LANDS ACT OF 1889,
IN RESPECT OF THE PUBLIC RECREATION GROUND AT
WAGGA WAGGA SOUTH.

WHEREAS His Excellency the Governor, with the advice of the Executive Council, being of opinion that it is expedient in the public interest to resume the whole of the 3 acres and 39 perches of land dedicated on the 12th day of January, 1883, for a public recreation ground at Wagga Wagga, has directed that this notice, under my hand, shall be published in the Government Gazette, setting forth the mode in which it is proposed to deal with the land in question. Now, therefore, notice is hereby given, in pursuance of such direction, and in accordance with the provisions of the 105th section of the Crown Lands Act of 1884 and the 41st section of the Crown Lands Act of 1889, that it is proposed to deal with the said land in the manner following, that is to say:—To revoke the dedication thereof heretofore made, and to dedicate in lieu thereof for public recreation 20 acres of land in the same locality (to include the said 3 acres and 39 perches), a description of which said 20 acres is set out in the Schedule hereto.

[Ms. 94-3,802 Ind.]

J. H. CARRUTHERS.

THE SCHEDULE REFERRED TO.

Area proposed to be dedicated.

County of Wynyard, parish of South Wagga Wagga, town of South Wagga Wagga, area 20 acres: Commencing on the left bank of the Murrumbidgee River, at the easternmost corner of allotment 1 of section 87; and bounded thence by a line part of which forms the north-eastern boundaries of that allotment and of allotments 3, 4, and 5 bearing north 30 degrees 11

minutes west 7 chains and 17 links to the northernmost corner of allotment 3 aforesaid; thence by part of the north-western boundary of that allotment bearing south 59 degrees 49 minutes west 2 chains 50 links to the easternmost corner of allotment 2 of section 43 aforesaid; thence by the north-eastern boundary of that allotment and a line, in all bearing north 30 degrees 11 minutes west 5 chains 50 links to a peg marked P.R.; thence by part of the north-western side of Johnston-street bearing south 59 degrees 49 minutes west 4 chains; thence by the north-eastern boundary of allotment 5 of section 42 bearing north 30 degrees 11 minutes west 2 chains; thence by the northern boundaries of that allotment and of allotments 4, 1, and 6 of same section, being lines bearing respectively north 78 degrees 50 minutes west 1 chain 66½ links, north 78 degrees 4 minutes west 1 chain 69 links, north 69 degrees 43 minutes west 2 chains 32 links, and north 72 degrees 10 minutes west 67 links to the northernmost corner of allotment 6 of section 42 aforesaid; thence by a line bearing north 36 degrees 45 minutes east 1 chain 80 links to the Murrumbidgee River aforesaid; and thence by that river upwards, to the point of commencement. Plan catalogued Ms. 189 Wga.

Description of area proposed to be resumed.

County of Wynyard, parish of South Wagga Wagga, town of Wagga Wagga, area 3 acres 0 roods 39 perches: Commencing on the left bank of the Murrumbidgee River, at a point where the north-eastern side of Church-street meets that river; and bounded thence on the south-west by that street bearing south 30 degrees 13 minutes east 7 chains and 30 links to Johnston-street; on the south-east by that street bearing north 59 degrees 47 minutes east 5 chains to Flood-street; on the north-east by that street bearing north 30 degrees 13 minutes west 5 chains and 68 links to the Murrumbidgee River; and on the north by that river downwards, to the point of commencement,—as shown on plan catalogued M. 321-1,834.

1894.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT.

(RETURN SHOWING AREA AVAILABLE FOR SELECTION IN THE CENTRAL DIVISION.)

Ordered by the Legislative Assembly to be printed, 25 September, 1894.

RETURN showing Area available for Selection in the Central Division.

AREA available for Selection in Central Division.

	Acres.
Area (excluding reserves) at present available for selection	7,176,147
Area (including reserves) of leaseholds of which no extensions have been applied for and which will expire in 1895	1,632,071
Area (including reserves) of leaseholds, extensions of which were applied for but no extension recommended by Boards; leases will expire in 1895... ..	1,862,812
Total	10,721,030

Area (including reserves) within leaseholds of which extensions of 1 year and under have been recommended	1,856,742
Area (including reserves) within leaseholds of which extensions of 2 years and over 1 year have been recommended	1,480,367
Area (including reserves) within leaseholds of which extensions of 3 years and over 2 years have been recommended	1,904,644
Area (including reserves) within leaseholds of which extensions of 4 years and over 3 years have been recommended	1,437,650
Area (including reserves) within leaseholds of which extensions of 5 years and over 4 years have been recommended	8,304,783

THOSE parts of the Land Board Districts of Hay and Wagga Wagga which fall within the Central Division are taken to fairly represent "Riverina," so far as that Division is concerned. They comprise the Land Districts of Wagga, Urana, Tumberumba North, Narrandera, Hillston, Hay, Deniliquin, Corowa, Cootamundra Central, and Balranald South.

	Acres.
Area (excluding reserves) at present available for selection	1,125,902
Area (including reserves) of leaseholds of which no extensions have been applied for and which will expire in 1895	195,727
Area (including reserves) of leaseholds, extensions of which have been applied for, but Boards recommend no extension, and which will expire in 1895... ..	1,417,559
Total	2,739,188

Area (including reserves) within leaseholds of which extensions of 1 year and under have been recommended	Nil.
Area (including reserves) within leaseholds of which extensions of 2 years and over 1 year have been recommended	12,544
Area (including reserves) within leaseholds of which extensions of 3 years and over 2 years have been recommended	360,077
Area (including reserves) within leaseholds of which extensions of 4 years and over 3 years have been recommended	142,823
Area (including reserves) within leaseholds of which extensions of 5 years and over 4 years have been recommended	2,089,201

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PASTORAL HOLDINGS IN THE CENTRAL DIVISION.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 10 May, 1895.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 2nd May, 1895, That there be laid upon the Table of this House,—

“ A Return giving the names, areas, Land Districts wherein situated, and dates of termination of leases of all pastoral holdings in the Central Division for which extension of leases have not been granted under “ the 43rd clause of the Crown Lands Act of 1889.”

(*Mr. Thomas Brown.*)

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACTS.

(REGULATIONS.)

Ordered by the Legislative Assembly to be printed, 11 June, 1895.

Department of Lands, Sydney, 3rd June, 1895.

CROWN LANDS REGULATIONS.

It is hereby notified, for public information, that His Excellency the Lieutenant-Governor, with the advice of the Executive Council, has, in pursuance of the "Crown Lands Act of 1884," the "Crown Lands Act of 1889," and the "Crown Lands Act of 1895," made the Regulations hereinafter set forth, for the purpose of carrying into full effect the said Acts and any Acts specified in the first section of the last-mentioned Act.

J. H. CARRUTHERS.

REGULATIONS MADE UNDER THE "CROWN LANDS ACT OF 1884," THE "CROWN LANDS ACT OF 1889," AND THE "CROWN LANDS ACT OF 1895."

1. The Timber and Quarry Regulations published on the 25th day of March, 1895, as a Supplementary *Government Gazette*, No. 206, are hereby confirmed.

Save as aforesaid, all Regulations heretofore made in pursuance of the "Crown Lands Act of 1884" and "Crown Lands Act of 1889" are hereby repealed; but such repeal shall not of itself prejudice or affect any proceeding, matter, or thing lawfully done or commenced or contracted to be done under the authority of any such regulation; and any application pending on the 1st day of June, 1895, or any caveat in respect thereof shall, until the confirmation, approval, granting, disallowance, refusal, or other final disposal thereof, be dealt with in manner required by such repealed regulations unless the express provisions of the Act of 1895 and any regulations made in pursuance of such provisions shall be applicable thereto.

2. In these regulations, unless the context necessarily requires a different meaning, the expression

"The Act of 1884" means the "Crown Lands Act of 1884."

"The Act of 1888" means the "Crown Lands Act Further Amendment Act."

"The Act of 1889" means the "Crown Lands Act of 1889."

"The Act of 1895" means the "Crown Lands Act of 1895."

"Applicant" includes a company, corporation, or partnership in all cases where a company, corporation, or partnership may lawfully make the application in question; and includes the representative or lawful assign of the applicant in all cases where such representative or assign is entitled to take the applicant's place in respect of the application.

"The Board" means the Local Land Board of the district in which the lands in question are situated, unless and until another Local Land Board has been specially directed by the Minister in pursuance of section 5 of the Act of 1889, to deal with the matter, question, or inquiry in connection with which the term is used.

"The Chairman" means the Chairman or Acting Chairman of such Board as aforesaid.

"The Form" with a number added means the form of that number appended to these Regulations.

"The *Gazette*" means the *Government Gazette*.

"The Land Agent" means the Land Agent, Assistant Land Agent, or Acting Land Agent of the district in which the lands in question are situated.

"The Under Secretary" means the Under Secretary for Lands.

Save as aforesaid, words of which an interpretation is given in section 4 of the "Act of 1884," or in section 4 of the "Act of 1889," have the same meanings in these regulations, unless the context necessarily requires a different meaning.

THE MINISTER.

3. Whenever by the existing Acts or these regulations any application, notice, tender, document, or communication is directed to be sent or forwarded to the Minister, the same shall be addressed to the Under Secretary for Lands, who shall have authority to correspond with all persons and otherwise act under the direction of the Minister.

4. Whenever by the existing acts or these regulations any estimate, report, or inquiry is to be made by a Board for the information or guidance of the Minister, or whenever it is necessary for the purposes of administration that the facts of any case be investigated or determined, the Under Secretary, acting as aforesaid, may refer the matter to the Board, and the Board shall proceed accordingly.

LAND OFFICES AND LAND AGENTS.

5. Any district heretofore notified in the *Gazette* as a Land District shall continue to constitute the same; but Land Districts may be increased or reduced in number, or the boundaries thereof may be varied or modified by proclamation of the Governor in the *Gazette*. Land Offices shall be at such places as are now appointed for that purpose, and the place appointed for any such office may, by proclamation of the Governor in the *Gazette*, be varied from time to time.

6. Land Offices shall be open to the public for the transaction of business between the hours of 10 a.m. and 1 p.m. and 1.45 and 4 p.m. on each of the business days of the week except Saturday, when the offices shall close at noon. The above hours shall be determined by the "Standard Time Act of 1894," 58 Vic. No. 11, and are hereinafter referred to as the office hours. The offices shall be closed on all public holidays. The Land Agent shall on all occasions during office hours afford information to the public free of charge.

7. The Land Agent shall keep separate registers—to be provided for the purpose—for conditional purchases, homestead selections, improvement purchases in gold-fields, conditional leases, homestead leases, settlement leases, residential leases, annual leases, permissions to ringbark, and other matters. The said registers shall contain particulars of all applications, deposits, and other payments, and shall be kept in such form and manner as may from time to time be directed.

8. The Land Agent, if required by the form, shall record on each application received by him a note of the day, hour, and so far as possible the minute, on which the same was received by him, the time being determined according to the "Standard Time Act of 1894," 58 Vic. No. 11; and shall fill up and sign the receipt thereon, if any, for all moneys paid or documents delivered in connection therewith.

9. The Land Agent shall, unless otherwise directed, transmit under cover all applications and notices of complaint received by him, and all documents relative thereto to the Chairman at the Head Office of the Board immediately after the receipt thereof.

10. The Land Agent shall transmit to the Colonial Treasurer all moneys received by him, under or by virtue of the repealed or existing Acts or regulations at the times and in the manner prescribed by the regulations for the guidance of Collectors of Revenue, published in the *Gazette* of the 5th February, 1892, No. 78, so far as they can be applied until fresh regulations are made in that behalf.

11. A list of applications for conditional purchases, homestead selections, conditional leases, homestead leases, residential leases, or settlement leases shall, within two days after the lodgment of the applications, be exhibited by the Land Agent in a conspicuous part of his office, and shall be kept so exhibited for fourteen days.

12. The Land Agent shall not refuse to receive any application for Crown lands, however illegal it may appear to be, if tendered on the proper form, and accompanied by the proper declaration, fee and deposit, if any, required; but in all such cases the Land Agent shall warn the applicant of any objection thereto, and make on the application a marginal note of such objection to be considered by the Board; but no premature application for a purchase or lease of Crown lands shall be deemed to have been duly made.

13. Every application shall clearly show the precise nature thereof, and the name and address of the applicant; and if a form is provided for an application of the kind in question, such form shall be properly filled in and shall supply the particulars thereby required. Any alteration or erasure in an application shall, except as hereinafter provided, be verified by the initials of the person who signs the same.

14. If land applied for is in more than one Land District, the application may be lodged with the Land Agent of either of such Districts, who shall thereupon give notice by telegram and letter to the Land Agent of the other of such Districts; and the Chairman of the Board District which includes the Land District, wherein the application is lodged, shall forthwith refer the matter to the Minister for direction.

BALLOTS.

15. A ballot, in order to determine how conflicting applications tendered to the Land Agent at the same time shall stand to each other in order of priority, shall be held in the following manner:—The Land Agent shall make a list of the names of the several applicants, and shall number in consecutive order the names appearing on the list. The Land Agent shall select those of the marbles provided for the purpose, which bear the same consecutive numbers as appear on the said list, and each applicant, if he so desire, may place, in the box supplied for the purpose, the marble, which bears the number corresponding to that appearing opposite to his name on the said list, or otherwise the Land Agent shall do so. When all the selected marbles are in the box, the Land Agent shall, in the presence of as many of the parties as possible, lock up the box, turn it round on its axis, and then draw off all the marbles one by one; and if any stoppage occurs in the delivery of the marbles, the box may be turned round as often as may be necessary. As the first marble comes out the Land Agent shall write the number 1 against the name of the applicant whose number on the list is the same as that on the marble which first comes out; and as one by one of the remaining marbles come out, the Land Agent shall, in like manner, write the numbers 2, 3, and so on, against the names of the respective applicants; and the applications shall stand to each other in order of priority, according as the marbles representing them come out as aforesaid. The Land Agent shall, after all the marbles have been drawn off, sign and certify the aforesaid list, and note therein the withdrawal of any application, and forward the list to the chairman, and shall post up in his office a signed and certified copy thereof.

For the purposes of this regulation any duly authorised agent who tenders an application may act for the applicant.

16. When the Land Agent is directed by the Board to hold a ballot he shall hold the same in manner set forth in the preceding regulation, after having given such notice to the applicants, as may be specified by the Board.

LOCAL

LOCAL LAND BOARDS.

17. Any Land District, or number of Land Districts which now by notification in the *Gazette* constitute a Land Board District, shall continue to constitute the same, with a Head Office at such place as may have been specified in the notification. But any Board District or the position of its Head Office may in like manner be altered from time to time. All applications, notices, papers, or documents addressed to the Board or the Chairman shall be lodged at or forwarded to the Head Office of the Board, unless the same are required to be lodged with the Land Agent.

18. A Board shall consist of not less than two members. Every member of the Board, other than the Chairman, shall be entitled to the following fee for attendance:—For every sitting of not more than three hours' duration, not exceeding £1 1s.; for a whole day, not exceeding £2 2s.—and to such allowances for travelling expenses or otherwise as the Minister may approve.

19. All proceedings of a judicial nature shall be holden in open Court at some convenient place within the Land District wherein the land forming the subject of investigation is situated, unless the Minister otherwise allow or direct; and all parties concerned in any matter shall be entitled to be heard.

20. Meetings shall be held as often as may be required for the despatch of business, and at such times and places as the Chairman shall appoint. If at any such time and place no quorum be present, any member then present may adjourn the meeting to some future day, and all matters then pending shall stand adjourned accordingly. If there be no member present, all such matters shall stand adjourned until the next day, which is not a Sunday or public holiday.

21. Any meeting of the Board, and any inquiry, application, or other matter brought before the Board, may be adjourned from time to time and from place to place.

22. Minutes of all proceedings of the Board shall at each meeting be taken in the minute book supplied for the purpose, and shall be forthwith signed by the Chairman. The minutes shall be taken with sufficient fulness to show what the order or decision of the Board in each proceeding may have been.

23. Any decisions, findings, reports, orders, or recommendations given or made by the Board shall, if touching the merits of the case, be drawn up in terse and appropriate language on the proper form, if any, or otherwise in writing.

24. Any documents which have been read as evidence before or by the Board in any case shall be marked by the Chairman as exhibits.

25. The Board may permit any error in any notice, particulars, or application to be amended, or any omission therefrom to be supplied, and such amendment or insertion shall be made as permitted, and shall be verified by the initials of the Chairman. Provided that if any party concerned has, in the opinion of the Board, been materially misled by any such error or omission the proceedings may at the request of such person be adjourned.

26. Every summons or subpoena for the attendance of any person before the Board to give evidence in any proceeding, whether the same be issued by order of the Board or on the request of any party concerned, shall be in Form 1.

27. When the Board has made any order for the payment of money, a warrant of distress, in the Form 2, signed by the Chairman, and addressed to any constable, peace officer, or other person, may be issued for the purpose of enforcing such order; and such warrant may be delivered to the person to whom it is addressed to be executed.

28. The deposit made by a caveator or complainant shall not be refunded or paid over in accordance with any order made by the Board in that behalf until after the time for appealing has elapsed; and if an appeal is duly made and prosecuted, the deposit shall abide the order of the Land Appeal Court.

29. Any person who desires to appeal to the Land Appeal Court from any determination, decision, recommendation, or award of a Board shall, within twenty-eight days after the same has been made or given, lodge with the Chairman a notice of appeal, in the Form 3, together with the sum of £5 as security for the cost of the appeal, and shall also give a similar notice to the other party or parties to the proceeding (if any). For the purposes of this regulation the Crown shall be deemed to be a party to all appeals in which its rights, interests, or revenues are concerned; and any notice of appeal to be given to the Crown as a party shall be given to the Under Secretary.

30. When notices of appeal against any decision or order of the Board have been given and a deposit lodged as aforesaid, the execution of the decision or order shall be stayed until the appeal has been duly disposed of or the withdrawal thereof has been duly notified to the Chairman.

THE CHAIRMAN.

31. The Chairman shall bring all cases and matters before the Board at the meeting next after the arising of the same or as soon thereafter as practicable, unless he has power to deal, and deals, with the same by himself. Applications of the same kind shall, as far as practicable, be dealt with in the order of their receipt.

32. The Chairman shall, in all matters ministerial or administrative in their nature, conform to such directions as may from time to time be lawfully given by the Under Secretary and may deal with all such matters, not sitting in open Court. Where a case has been returned or remitted to the Board under any order of the Land Appeal Court in that behalf, the Chairman shall perform and do all such ministerial acts and things as may be directed or required for the purpose of enabling the Board to carry such order into full effect.

33. Copies of or extracts from applications for conditional purchases or conditional, homestead, residential, or annual leases may, prior to the consideration of such applications by the Board, be referred by the Chairman to the District Surveyor for report.

34. Before any application or matter of a kind mentioned in section 37 of the Act of 1895 is dealt with by the Chairman, not sitting in open Court, he shall give, or cause to be given, to the parties concerned reasonable notice that he intends so to deal with the same; and a time shall be specified at which any parties concerned may appear before him and show cause why the application should not be granted, or up to which time cause may be shown by letter addressed to the Chairman, at the Head Office of the Board.

35. In addition to matters specifically enumerated in section 37 of the Act of 1895, the Chairman shall have power on behalf of the Board to—

- (a) direct survey of lands proposed by the District Surveyor to be allotted upon an application for a conditional purchase or conditional lease, when the applicant consents in writing to take the said lands;
- (b) vary any order prescribing the kind of fencing to be erected on a conditional purchase or conditional lease.

NOTICES.

36. Notice of the time and place appointed for any proceeding before the Board; and of the nature of the proceeding, shall be given to all parties concerned therein in the Form 4, and such notice may be issued by the Chairman, or, under the direction of the Chairman, by the clerk in charge of the Head Office of the Board, or other authorised officer.

37. Any such notice may either be served personally upon the person to whom the notice is intended to be given, or be left at such person's usual or last known place of abode or of business, or be sent by registered letter addressed to such person at any such place. If several persons have joined in lodging a caveat or complaint, notice to one of such persons shall be sufficient, and not more than one of them shall have a right to be heard before the Board in support of such caveat or complaint.

38. If a person to whom any such notice is to be given is absent from New South Wales or his place of abode or of business is not known cannot be found, the Chairman may give such directions for substituted service on any other person, or for the substitution for service of notice by advertisement in the *Gazette*, as may in his opinion be best suited to the circumstances of the case; and on any such directions being carried out notice shall be deemed to have been given.

39. Not less than fourteen days' notice of the time and place appointed for any proceeding before the Board shall, as far as possible and except as hereinafter provided, be given to the applicant, caveator, complainant, or other party or parties known to be concerned; and whenever "the prescribed notice" or "due notice" is referred to in the existing Acts or in these regulations, fourteen days' notice shall, whenever possible, be given.

40. If at the time and place appointed it shall appear that any party concerned has been overlooked in the giving of notices, or that a notice intended to be given to any party has not been given, the Board may order notice to be given for some future day, although the same will be less than fourteen days from the actual giving of such notice, or from the date of such order, and may in the meantime adjourn the proceeding.

41. If after notice of the time and place of any proceeding has been given to any party concerned, he shall fail to be present, the Board may proceed in his absence, and may adjudicate as fully and effectually as if such party had appeared in pursuance of the notice; but the Board shall use every exertion to ascertain the true facts of the case.

42. Any notices or documents required by these regulations to be served by any applicant, complainant, or party otherwise concerned in any proceeding before the Board upon any other party concerned in the same proceeding may be served in manner set forth in Regulation 36.

CAVEATS.

43. In every case where a caveat is permitted by the existing Acts or these regulations the caveat shall be in Form 5, and shall clearly show what application or proceeding is objected to, the grounds of objection, and the name and address of each objector, and may be lodged by leaving the same at the Head Office of the Board, or sending the same to the Chairman in a registered letter addressed to him at such office. Provided that caveats against applications for the rescission of reservations or for the reclamation of lands within the Metropolitan Land District shall be sent to the Under Secretary. In every case a deposit of £10 shall accompany the caveat.

44. Except in the cases mentioned in this regulation, the period within which any caveat may be lodged shall be fourteen days after the making of the application.

- (a) Caveats under section 36 or under section 65 of the Act of 1884 shall be lodged within the respective periods specified for that purpose in the said sections.
- (b) A caveat against a previous application for Crown lands by a person subsequently applying for the same land, or any part thereof, may be lodged within fourteen days after the making of the subsequent application; but if the time and place for the consideration by the Board of the previous application have been appointed, before a caveat in virtue of the subsequent application has been lodged, the caveator shall not be entitled to receive notice of such time and place, but if then present shall be entitled to be heard.

COMPLAINTS.

45. Complaints may, in any of the cases mentioned in the next regulation, be prosecuted before the Board by any unauthorised person, if a notice in the Form 6, addressed to the Chairman and verified by a statutory declaration setting forth the grounds of such complaint, and a deposit of £10 as security for costs, have been lodged with the Land Agent.

46. Complaints may be made in any case where the complainant alleges—

- (a) that any holder of land, whether held under conditional purchase or homestead selection, or under any lease, has obtained the same in violation or fraud of statutory provisions.
- (b) that a forfeiture of any such land as aforesaid has been incurred for any cause other than the non-payment of money—

But a complaint shall not be lodged as to a conditional purchase made under any repealed Act after a certificate of conformity has been issued in respect thereof; and a complaint shall not be lodged as to any land after grant issued—

- (c) that he is aggrieved by a permission to wholly or in part inclose a road, a watercourse, or by anything done in pursuance of such permission.

47. Copies of the notice and statutory declaration shall, within seven days from the lodging thereof or such further time as the Board may allow, be served by the complainant upon all persons against whom the complaint is made; and such service may be effected in manner set forth in Regulation 37.

HOMESTEAD

HOMESTEAD SELECTIONS.

48. When a subdivision for the purposes of section 13 of the Act of 1895 has been effected, the Chairman, under direction of the Minister, shall appoint a time and place for an inquiry by the Board as to the improvements upon any block or blocks in the subdivision; and any person known to have ownership or tenant right in improvements upon any block shall be a party to the proceedings in respect of the said block. The Board, upon such inquiry, shall find the value to an incoming tenant of the improvements on the said block or blocks, and the person who is entitled to receive payment of such value, finding separately in respect of each block; and to that end may take into consideration any official report by a surveyor, inspector, or appraiser (whatever may have been the occasion or purpose of the said report) bearing upon the existence or value of such improvements.

49. An application for a homestead selection shall be in the Form 7, and may be lodged with the Land Agent, during office hours, on any Thursday, not being a public holiday.

The application shall be signed and the declaration printed on the back of the Form shall be made by the applicant, who shall tender the application in person.

The application shall be accompanied by one-half-year's rent on the block applied for at the rate of $1\frac{1}{2}$ per centum per annum on the capital value, as notified, of such block, or in the case of a homestead selection without residence before grant, then at the rate of $3\frac{1}{2}$ per centum per annum on the said value; and also by a survey fee according to the scale prescribed for additional conditional purchases, unless a different scale or fee be notified in the *Gazette* specifying the date from and after which the said block should be available for selection: Provided that if the application be for a homestead selection with residence before grant, one-third only of such survey fee need be paid with the application.

50. The provisions as to ballots and caveats hereinbefore contained shall apply to applications for homestead selections, except that an application for a block as a homestead selection without residence before grant shall not be included in the same ballot with an application, or with applications for the same block as a homestead selection with residence before grant. In the event of applications conflicting, any applicant, other than the person, whose application has priority, may forthwith withdraw his application; and upon such withdrawal as aforesaid a refund shall be made of any moneys lodged with an application.

51. The Chairman shall appoint the time and place, at which the applicant is to satisfy the Board that he or she is qualified to make the application, and that the same has been made in accordance with the provisions of the Act of 1895, and in particular that the same has been made in good faith. If the application is for a homestead selection without residence before grant, the applicant shall at the same time satisfy the Board that his calling prevents him living on the selection, and that he ultimately intends to establish his home there; and the Board, if so satisfied, shall not confirm the application until the applicant has proposed, and the Board has approved, a deputy to live on the selection.

52. When the Board disallows an application, a refund shall be made of any moneys lodged therewith; unless the Board is satisfied that the application was made otherwise than in good faith.

53. When an application has been confirmed, the balance, if any, of survey fee, shall be paid to the Land Agent or Colonial Treasurer by two equal yearly instalments on dates corresponding to the date of the confirmation; the rent for the second half of the first year shall be paid to the Land Agent or Colonial Treasurer within six months after the date of confirmation; and until grant issued the rent for each succeeding half-year shall be paid in advance to the Land Agent or Colonial Treasurer, before the respective dates in each year corresponding to the confirmation, and to the expiration of the six months next following the confirmation.

54. In any case where the Minister has not appraised the value of the improvements on a block before the same is applied for, the Local Land Board shall upon or after the confirmation of the application proceed to appraise the value, or permit the removal, of such improvements in accordance with the general provisions hereinafter contained.

55. In any case where the applicant for a homestead selection desires to show that the value of the improvements on the block applied for, as appraised by the Minister, is less than at the date of such appraisal, he shall, in accordance with the general provisions hereinafter contained, either give notice to the Chairman in Form 8 before his application comes on for consideration by the Board, or else not later than one month after the confirmation, lodge an application in Form 9; and the Board shall in either case proceed in accordance with the general provisions hereinafter contained.

56. One-fourth of the value of the improvements on the block, for which an application has been confirmed, shall be paid on or before the date in the ensuing year corresponding to the date of confirmation; and the remaining fourths of such value shall, in the like manner, be paid in the three succeeding years, one-fourth of such value being paid in each year, before the date in such year corresponding to the date of confirmation. With any such payment shall be paid the interest then due on the proportion of the aforesaid value for the time-being unpaid. If the Crown be entitled to receive payment, the payment shall be made to the Land Agent or Colonial Treasurer.

57. An application before grant issued for leave to cease living upon homestead selection may be made to the Chairman in Form 10, and shall state the grounds upon which, and the period during which, the leave is sought; and leave may be granted upon any fair and reasonable ground relating to the applicant's business, health, education, or public or private duties, or upon any other ground which has been previously approved by the Minister.

58. The Chairman shall, after the expiration of five years from the date of confirmation, and may at any previous time, appoint a time and place for an inquiry by the Board as to the performance of the conditions in respect of a homestead selection; and the certificate to be issued by the Board at the inquiry at the expiration of five years shall be in Form 11.

HOMESTEAD GRANTS.

59. A homestead grant shall be in Form 12, and before the same is issued, all sums shall be paid to the Colonial Treasurer which are required to make up the amount due as rent up to the 31st day of December in the then current year, the said rent after the execution of the grant being at the rate of $2\frac{1}{2}$ per centum on the capital value of the land.

60. The rent for every year succeeding the execution of the grant shall be paid to the Colonial Treasurer on or before 31st December in the previous year.

61. A certificate by the Minister that all the obligations of a homestead grant have been duly fulfilled up to the date of such certificate shall be in Form 13; and when a transfer of lands granted under any such grant is lodged with the Registrar-General for registration, the said certificate shall be lodged therewith. Application for the said certificate shall be made in writing to the Under Secretary.

62. An instrument surrendering to the Crown lands granted under a homestead grant shall be in the Form 14; and the acceptance of the surrender shall be notified in the *Gazette*; and the said notification shall be *prima facie* evidence that the lands therein specified are revested in the Crown.

63. Where the person who applied for a homestead selection has been compelled by adverse circumstances to abandon or surrender the same, he may apply to the Chairman, in Form 15, for a certificate to that effect; and the Board shall thereafter inquire into the truth of the matter alleged, and shall grant the applicant a certificate, in the Form 16, if a proper case is established for the same.

64. An application for tenant right in the improvements upon lands granted under a homestead grant, and afterwards forfeited, shall be made in Form 17, and shall be lodged with the Under Secretary.

PROTECTION OF HOMESTEAD SELECTIONS.

65. An instrument for registration under section 23 of the Act of 1895 shall be in Form 18, and the owner of the homestead selection, before lodging the said instrument, shall make the declaration printed on the back of the said Form.

66. If a grant of the homestead selection has not been issued at the date of the lodging of the said instrument, it shall be lodged with the Land Agent; if a grant of the homestead selection has been issued at the date of the lodging of the said instrument, it shall be lodged with the Registrar-General.

67. The Land Agent on the receipt by him of any such instrument as aforesaid shall note thereon the day, hour, and minute when the same was received by him and sign such note, and shall thereafter enter in the Register, provided for the purpose, particulars of the homestead selection, of the owner registering the same, and of the date of the aforesaid receipt; and shall also index the said entry in the book to be provided for that purpose. The Land Agent shall thereafter forward the aforesaid instrument to the Under Secretary.

The aforesaid books shall be open to inspection by the public at all times during office hours upon payment of a fee of two shillings.

68. The Registrar-General, on the receipt by him of any such instrument as aforesaid, shall make an entry on the folium of the Register Book containing the grant of the homestead selection, an entry referring to such instrument and to the time of the lodging thereof.

69. The like entry shall be made by the Registrar-General in connection with any such instrument as aforesaid lodged with the Land Agent and forwarded to him by the Under Secretary, when the grant of the homestead selection is being, or has been, registered.

HOMESTEAD GRANTS OUT OF LEASES.

70. An application for a homestead selection out of lands held under pastoral, homestead, or settlement lease, or lease of inferior land shall be made in Form 19 to the Land Agent, and shall be accompanied by a survey fee according to the scale prescribed for original conditional purchases.

The Board, the Chairman, and the District Surveyor shall respectively have the same duties and powers in respect of any such application as in respect of an application for an original conditional purchase; and when such application has been confirmed the applicant shall pay the balance, if any, of the cost of survey.

71. The capital value of the land shall be determined upon a reference by the Minister, and before a grant is issued the applicant shall pay quit-rent at the rate of $2\frac{1}{2}$ per centum per annum on the capital value of the land from the date of the execution of the grant to December 31st of the then current year.

CONVERSION OF CONDITIONAL PURCHASE INTO HOMESTEAD SELECTION.

72. An application for the conversion of a conditional purchase, together with any conditional lease held by virtue thereof, into a homestead selection shall be made to the Under Secretary in Form 20. Interest up to the date of the execution of the grant on the sum, which for the purposes of such grant is taken to be the capital value of the land, shall be paid before the grant is issued.

APPLICATIONS FOR CONDITIONAL PURCHASES AND CONDITIONAL LEASES.

73. Applications for original or additional conditional purchases or for conditional or additional conditional leases may be tendered to the Land Agent on any Thursday, not being a public holiday, during office hours as hereinbefore defined.

74. Every application for an original conditional purchase shall be made on Form 21, and shall be signed by the applicant, and accompanied by a declaration on Form 22. The application and declaration shall be tendered by the applicant in person.

75. Every application for an additional conditional purchase shall be made on Form 21, and shall be signed by the applicant or by some person lawfully empowered to make the application in his name, and shall be accompanied by a declaration, in the Form 23, made by the applicant or other person who signs the application. The application and declaration shall be tendered by the applicant in person, or by his agent duly authorised for the purpose in writing.

76. Every application for a conditional lease or additional conditional lease shall be made on Form 24, and shall be signed by the applicant or some person lawfully empowered to make the application in his name. The application shall be tendered by the applicant in person or by his agent duly authorised in writing.

77. No application for an additional conditional purchase or for any conditional lease shall be made in virtue of a conditional purchase standing in the name of a person who has died or been declared a lunatic or become an insane patient, unless and until the applicant has been registered in accordance with Regulation 314.

78. Where an application for an additional conditional purchase or the declaration appropriate thereto, or an application for a conditional lease, is made or tendered by any agent, an authority in writing, showing that the agent is entitled so to act shall be delivered to the Land Agent.

79. An application for an additional conditional purchase, or for a conditional lease is made in virtue of any conditional purchase or purchases transferred and held by way of mortgage or security, shall be in the name of the mortgagee, and a statutory declaration as to the existence and nature of such mortgage or security shall in all cases where the same is required by section 20 of the Act of 1889, be delivered to the Land Agent together with the application; and if the application is signed by the person entitled to the equity of redemption in the conditional purchase or purchases transferred and held by way of mortgage or security as aforesaid, the written consent of the transferee shall also be delivered to the Land Agent at the same time.

80. Where an unmarried woman makes a conditional purchase, and afterwards marries, any application for an additional conditional purchase or conditional lease of the same series, made by her after her marriage and during her coverture, shall have endorsed thereon a statement by her husband that he consents to, and joins in, such application, unless the original conditional purchase is her separate property.

81. Not more than one application for an original conditional purchase shall be made by the same applicant on the same day unless every previous application has been duly withdrawn, either before or immediately after a ballot.

82. Applications for additional conditional purchases or conditional leases of the same series may be made after the application for the original conditional purchase has been made, although the same may not have been confirmed.

83. An application for an additional conditional purchase out of a conditional lease shall not be made until the application for such conditional lease has been confirmed.

84. With every application for any conditional purchase or any conditional lease the proper deposit and fees shall be handed to the Land Agent.

85. The survey fee to be paid with every application shall be charged on the aggregate area applied for, irrespective of whether the land is measured or unmeasured, or a subdivision of measured land is involved, according to the following scales, that is to say:—

FOR AN ORIGINAL CONDITIONAL PURCHASE.

	£	s.	d.
For any area not exceeding 4 acres	1	0	0
For every additional acre or fraction of an acre up to 10 acres, 3s. 4d.	2	0	0
For 10 acres	3	0	0
For every additional acre or fraction of an acre up to 20 acres, 2s.	4	0	0
For 20 acres	5	0	0
For every additional acre or fraction of an acre up to 40 acres, 1s.	8	0	0
For 40 acres	10	15	0
For every additional 5 acres or fraction of 5 acres up to 80 acres, 2s. 6d.	14	15	0
For 80 acres	18	15	0
For every additional 10 acres or fraction of 10 acres up to 320 acres, 2s. 6d.			
For 320 acres			
For every additional 15 acres or fraction of 15 acres up to 640 acres, 2s. 6d.			
For 640 acres			
For every additional 20 acres or fraction of 20 acres up to 1,280 acres, 2s. 6d.			
For 1,280 acres			
For every additional 40 acres or fraction of 40 acres up to 2,560 acres, 2s. 6d.			
For 2,560 acres			

FOR AN ADDITIONAL CONDITIONAL PURCHASE OR FOR A CONDITIONAL LEASE.

	£	s.	d.
For any area not exceeding 4 acres	0	15	0
For every additional acre or fraction of an acre up to 10 acres, 2s. 6d.	1	10	0
For 10 acres	2	5	0
For every additional acre or fraction of an acre up to 20 acres, 1s. 6d.	3	0	0
For 20 acres	3	15	0
For every additional acre or fraction of an acre up to 40 acres, 9d.	6	0	0
For 40 acres	8	1	3
For every additional 5 acres or fraction of 5 acres up to 80 acres, 1s. 10½d.	11	1	3
For 80 acres	14	1	3
For every additional 10 acres or fraction of 10 acres up to 320 acres, 1s. 10½d.			
For 320 acres			
For every additional 15 acres or fraction of 15 acres up to 640 acres, 1s. 10½d.			
For 640 acres			
For every additional 20 acres or fraction of 20 acres up to 1,280 acres, 1s. 10½d.			
For 1,280 acres			
For every additional 40 acres or fraction of 40 acres up to 2,560 acres, 1s. 10½d.			
For 2,560 acres			

86. If the application be for an additional conditional purchase of the whole of the lands held by the applicant under conditional lease, and a survey fee has already been paid in respect of such lease, no subdivision or other fee shall be payable therewith. If the application be for an additional conditional purchase of part of the lands held by the applicant under conditional lease, and a survey fee has already been paid in respect of such lease, a fee shall only be paid for the subdivision of the conditional lease at the rate of 1s. per chain, or fraction of a chain, of such subdividing lines or line or portions thereof, as do not form part of the existing surveyed lines. In no case shall less than £2 be charged for subdivision when the area applied for comprises 40 acres or more.

87. If the land to be applied for as a conditional purchase is unmeasured, the intending applicant shall, before sending in his application, mark one corner of such land, either by putting a conspicuous mark upon a tree standing at such corner and cutting an L trench 6 feet long and 9 inches deep, or by erecting a post not less than 6 inches in diameter and projecting above the surface not less than 2 feet firmly set in an L trench of the dimensions aforesaid. In standing water the corner may be marked by a tree or a post as aforesaid without the trench, and in rocky country by a mound of stones and a post as aforesaid fixed therein and projecting 2 feet above the mound; and such post or boundary-mark shall be specified as the starting point of the description: Provided that if the unmeasured land adjoins a measured portion or a portion surveyed and marked on the ground by any authorised officer, the intending applicant, instead of marking a corner, may adopt and specify as the starting-point of the description one of the corners of such portion, if the same can be found; but if not, a corner shall be marked in manner aforesaid.

88. Unless a subdivision is applied for, measured lands shall be taken in portions as measured, and shall be so described; but both measured and unmeasured lands may be taken together.

89. Main roads, intended frontage roads between villages, towns, or settlements, travelling stock reserves, lakes, permanent swamps, creeks, rivers, or watercourses, shall ordinarily constitute frontage. But the Board may for special reasons decide that, in any particular case, a travelling stock reserve, road, intended road, lake, swamp, creek, river, or watercourse which ordinarily constitutes frontage shall not do so.

90. Where a road follows the general course of a creek, or two roads are in close proximity, and the road or creek or both roads constitute frontage, the more important frontage shall be adopted as the boundary of a conditional purchase or lease; and, as a rule, preference shall be given to the creek as the more important frontage.

91. Any person claiming a right to any land the subject of an application for a conditional purchase or conditional lease may lodge a caveat against the application in manner provided in Regulation 43. No caveat shall be required from a person merely claiming a right to any improvements which such land may contain.

PROCEEDINGS BEFORE BOARD.

92. At the time and place appointed the Board shall in open Court consider the application for a conditional purchase or conditional lease, and the applicant shall, in every case, before the application is confirmed, satisfy the Board by evidence that he or she was competent or entitled to make the application, and that the same was made in good faith; if the Board is not so satisfied, whether by reason of the non-appearance of the applicant or otherwise, it shall disallow the application.

This regulation shall extend to applications pending on June 1st, 1895.

93. Where any additional conditional purchase or a conditional lease is applied for in virtue of a conditional purchase, and the grant has been issued in respect of such last mentioned conditional purchase, the applicant shall, before the application is confirmed, produce before the Board either the said grant, or a certificate of title issued thereon, or a copy certified by the Registrar-General of the folium of the Register Book containing such grant.

94. Where the Board has authorised the correction of any error in or omission from any application for a conditional purchase or conditional lease, the Chairman shall amend the same and mark it "as amended"; and where the correction of any error in or omission from any declaration has in like manner been authorised and effected, the truth of the declaration as amended may be re-declared before the Chairman in manner provided for the making of solemn declarations, or the defective declaration may be replaced by a declaration containing the necessary corrections.

95. Where the Board allots any land other than that applied for, or causes any application for a conditional purchase or conditional lease to be modified or varied, or where any errors in or omissions from the description (the correction whereof has been authorised as aforesaid) are considerable or numerous, the Chairman shall, at the time of confirmation, amend the application by marking it "as amended according to the plan of survey," and may attach such plan or a certified copy thereof to the application.

96. After the expiration of twenty-eight days from the confirmation of an application for a conditional purchase or conditional lease, if no notice of appeal has meanwhile been given, a certificate of confirmation in the Form 25 shall be issued.

97. Where the deposit, rent, or survey or other fee tendered with an application is not adequate to the lands allotted by the Board, the Board may confirm the application, subject to the payment of such further sums by way of deposit, rent, or survey or other fee, as may be specified; and may fix a period, within which such sums shall be paid. And no certificate of confirmation shall be issued to the applicant until such sums have been duly paid; and in the event of their not being paid within the period so fixed, the application may be disallowed.

98. Upon or after the confirmation of any application for a conditional purchase or conditional lease, the Board shall, in accordance with the general provisions hereinafter contained, appraise the value or permit the removal of any improvements on the land for which the application has been confirmed.

99. Upon or after the confirmation of any application for a conditional lease, the Board shall appraise the amount of the rent thereof; and for that purpose may take into consideration any report by a surveyor who, under authority of the District Surveyor, has measured the land and reported as to the state, character, and value thereof.

100. Where the Board proposes to modify an application for a conditional purchase or conditional lease, or to allot any land other than that applied for, the applicant may there and then withdraw his application. But in any other case notice of the withdrawal of an application (not being a withdrawal before or immediately after a ballot) shall be given to the Chairman on Form 26, and shall set forth the grounds on which the withdrawal is sought. The Board shall determine whether the withdrawal shall be permitted and whether any refund shall be allowed, and if allowed, what shall be the amount thereof.

CONDITIONS OF CONDITIONAL PURCHASES AND CONDITIONAL LEASES.

101. The Board shall so far as possible prescribe, at the confirmation of an application for a conditional purchase or a conditional lease, the kind or kinds of fencing to be erected in fulfilment of the condition of fencing, and a note of its decision shall be endorsed on the certificate of confirmation whenever the same is

is issued ; but the indorsement may afterwards be varied, and nothing done under this or the next following Regulation shall bind the conditional purchaser or conditional lessee to fulfil the condition of fencing rather than the condition of improvement.

102. A conditional purchaser or conditional lessee, who intends to fulfil the condition of fencing, may, at the confirmation of his application, there and then ask for an exemption from fencing any part or parts of a boundary of a conditional purchase or conditional lease on the ground that the same has frontage to any permanent river, creek, or other natural boundary, or that a sufficient fence is in existence on such boundary, or that an existing fence, although not erected on the actual boundary line, is sufficiently useful and substantial for the purpose ; but the omission then to make such application shall not prevent the same being made at any time before the expiration of the period (or extended period) allowed for fencing. Any such application made after confirmation shall be made to the Chairman on Form 27.

103. An application for permission to wholly or in part enclose a road or watercourse, which forms the boundary of a conditional purchase or conditional lease, may at any time be made by the conditional purchaser or conditional lessee to the Chairman on Form 28. A separate application shall be made in respect of conditional purchases and conditional leases of different series. The holder of any land which appears to be directly affected by the proposed arrangement shall have notice of the time and place appointed for the consideration of any such application.

104. An application for an extension of the period for the fulfilment of the condition of fencing in respect of any conditional purchase or conditional lease, may, at any time before the expiration of such period, be made to the Chairman on Form 29.

105. An application by members of one family for exemption from any condition of fencing or improvement in connection with their conditional purchases or conditional leases, other than the erection of a ring fence, shall be made to the Chairman on Form 30. All the members of the family whose holdings are to be included within the proposed ring fence shall join in such application, and the application shall be made not later than three years from the confirmation of that purchase, which shall have been first confirmed, or within such extended period as may have been granted for the erection of fencing in respect thereof.

106. An application for the suspension of the conditions of residence and fencing or improvement, or any of them attaching to a conditional purchase or conditional lease, may be made to the Chairman on Form 31, and shall clearly set forth the grounds on which such application is based.

107. Notice of the intention of a wife to fulfil the condition of residence attaching to a conditional purchase made by her before marriage, upon a conditional purchase held by her husband, or of a husband to fulfil his term of residence upon a conditional purchase held by his wife, or of the intention of a minor to reside with his or her parent on a conditional purchase or conditional lease adjoining the minor's conditional purchase, shall be in Form 32, and shall be sent by registered letter or delivered to the Chairman.

108. An application that the value of any conditional purchase within a special area may be determined by appraisal shall be made in Form 34 to the Land Agent, accompanied by a fee of £3, before September 1st, 1895. A separate application shall be made in respect of conditional purchases of different series. Until the value of a conditional purchase has been so determined, all payments in respect thereof shall continue to be made, as if no application had been lodged.

109. An application for the suspension of the condition of payment attaching to a conditional purchase shall be made to the Land Agent in Form 35, accompanied by a deposit of five shillings, and by a declaration to the effect printed on the Form, which shall be made by the holder of the conditional purchase, except in the case where the conditional purchase is held by way of mortgage, in which case the declaration shall be made by the owner thereof, subject to such mortgage. Two or more conditional purchases of the same series held by the same person may be included in one application. The application shall be forwarded by the Land Agent to the Under Secretary.

110. An application for the subdivision of a conditional purchase shall be made to the Land Agent in Form 36, and shall be accompanied by a sketch showing the proposed subdividing line or lines and a separate survey fee for each of the proposed subdivided portions—at the rate charged for additional conditional purchases—and also a deposit of £1. The Local Land Board, after report by the District Surveyor, shall settle the subdividing line or lines, so that the subdivided portions shall, as far as practicable, be measured in accordance with the rules prescribed in the Act of 1889 for the measurement of conditional purchases ; but no such portion shall be measured so as to obtain undue advantages at the expense of any other of such portions, or so as to depreciate the value thereof, in case the same becomes forfeited to the Crown. When the land has been measured in accordance with the subdivision as settled by the Board, the applicant shall pay to the Land Agent the balance, if any, of costs incurred, whether for survey or otherwise ; after the payment of such balance, and of all sums accrued due in respect of the conditional purchase, the Chairman shall give notice to the applicant and to the Land Agent that subdivision has been effected ; and thereupon all necessary payments made may be in respect of the subdivided portions separately.

TENANT RIGHT IN IMPROVEMENTS UPON CONDITIONAL LEASES.

111. An application by the last holder of a conditional lease, which has been forfeited or surrendered for tenant-right in the improvements thereon, shall be in Form 17, and shall be lodged with the Under Secretary.

PAYMENTS ON CONDITIONAL PURCHASES AND CONDITIONAL LEASES.

112. The annual payment due to the Crown upon conditional purchases shall be made to the Colonial Treasurer or Land Agent, the times for such payment and the amounts payable being as follows :—

- (a) In the case of a conditional purchase applied for before August 10th, 1875, and not brought under the instalment system, the time for payment shall be between January 1st and April 1st in each year, and the amount so payable shall be the interest at the rate of 5 per centum per annum on the balance of purchase money for the time being unpaid.
- (b) In the case of a conditional purchase applied for before August 10th, 1875, and brought under the instalment system, and in the case of a conditional purchase applied for between August 10th, 1875, and January 1st, 1885, the time for payment of instalments shall be between January 1st and April 1st in each year.

- (c) In the case of a conditional purchase applied for between January 1st, 1885, and December 1st, 1889, the time for payment of instalments shall be between the day in each year corresponding to the day of the confirmation of the application for the conditional purchase and a date three months after such first-mentioned day.
- (d) In the case of a conditional purchase applied for after December 1st, 1889, the time for payment of instalments shall be between the day in each year corresponding to the day of the application for the conditional purchase and a date three months after such first-mentioned day. The first instalment is payable on the expiration of three years from the date of application.

Two or more instalments, or the balance in full, may be paid in respect of any conditional purchase applied for before January 1st, 1885; and after the issue of a certificate of conformity in respect of conditional purchases applied for after that date.

113. An application under section 35 of the Act of 1884 by any holder of a conditional purchase made before the commencement of that Act for the conversion of his holding into a holding under the conditions of payment prescribed by that section shall be made to the Land Agent on Form 33. Any such application made between January 1st and March 31st inclusive in any year, shall take effect from January 1st in the same year; any such application made after March 31st in any year, shall take effect from January 1st, in the ensuing year.

114. The rents of conditional leases shall be paid annually in advance to the Land Agent or the Colonial Treasurer, as follows:—

- (a) Where the lease was granted under the provisions of section 52 of the Act of 1884, the time for paying the rent shall be between the 1st and 30th September in the year preceding that, for which the payment is to be made.
- (b) Where the lease was applied for before the December 1st, 1889, under sections 48 or 54 of the Act of 1884, the time for paying the rent shall be before the date in each year corresponding to the date of confirmation.
- (c) Where the lease has been applied for after December 1st, 1889, the time for paying the rent shall be before the date in each year corresponding to the date of the application for the lease; provided that until rent at the appraised rate has been notified, the rent paid in each year shall be the provisional rent of two pence per acre.

Where the rent of a conditional lease is notified after June 1st, 1895, any balance of rent due at the appraised rate shall be paid to the Land Agent or the Colonial Treasurer within one month from the date of notice in the *Gazette*.

MINERAL CONDITIONAL PURCHASES.

115. The holder of any conditional purchase made under sections 13, 21, or 22 of the "Crown Lands Alienation Act of 1861" may apply to the Land Agent on Form 37 for the conversion thereof into a conditional purchase for mining purposes. With any such application a sum calculated at the rate of five shillings per acre of the conditional purchase shall be paid to the Land Agent: Provided that no such application shall be made in connection with a conditional purchase which has been forfeited, or is liable to be forfeited, for any breach of the conditions thereof.

116. The holder of any conditional purchase converted as aforesaid, shall not during a period of three years succeeding such conversion be required to pay any interest or instalment of purchase-money; but at the expiration of such period, or within three months thereafter, he shall, for the then current year, and thence forward shall, between the 1st day of January and the 31st day of March in each year, pay to the Land Agent interest on the balance of purchase-money calculated at the rate of 5 per cent. if he has not previously paid instalments, or, if otherwise, instalments at the rate of two shillings per acre.

117. The holder of any conditional purchase for mining purposes, whether converted or otherwise, may, by application as provided in Regulation 88, bring his purchase under the provisions of the Act of 1884 so far as regards conditions of payment: Provided that the yearly instalment shall in any such case be at the rate of two shillings per acre.

118. The holder of any conditional purchase converted as aforesaid, shall, at the end of the third year from the date of the application to convert the same, make a declaration in the Form 38 that a sum of £2 per acre has been expended in mining operations thereon other than for gold: Provided that if the term for such expenditure has been extended under the provisions in that behalf, two declarations in the form aforesaid shall be made: the first at the end of the third year to the effect that such expenditure has been at the rate of £1 4s. per acre; and the second at the end of the fifth year to the effect that such expenditure has been brought up to £2 per acre.

INQUIRIES AS TO FULFILMENT OF CONDITIONS, CERTIFICATES OF CONFORMITY, &c.

119. The Chairman may at any time direct a duly authorised person to report whether the conditions of residence and fencing or improvement, attaching to a conditional purchase or conditional lease are being or have been duly complied with; and on the receipt of such report the Chairman may appoint a time and place for the holding of an inquiry before the Board as to the matters aforesaid. Provided that if any such report tends to show that the aforesaid conditions, or any of them, have not been or are not being duly complied with, the Chairman may forward such report to the Minister for consideration and any necessary direction.

120. If upon the holding of an inquiry, whether upon a reference by the Minister or not, the Board shall find that any one or more of the prescribed conditions of residence and fencing or improvement, attaching to the conditional purchase or conditional lease, are not being or have not been duly fulfilled, it shall draw up its findings accordingly, and, unless an appeal against such decision is duly lodged, shall forward such findings to the Under Secretary.

121. After the expiration of five years from the date of the application for a conditional purchase applied for before June 1st, 1895, the Chairman shall appoint a time and place for the holding of an inquiry before the Board whether all conditions applicable to the conditional purchase, except that of payment of the balance of instalments, have been duly complied with, and shall cause notice—that the Board will hold

hold the said inquiry and will, if satisfied of such compliance as aforesaid, issue a certificate to that effect— to be published in the *Gazette* not less than thirty days before the holding of the said inquiry; and the like notice shall be conspicuously posted on the outside of the Head Office of the Board and of the Land Office for not less than fourteen days preceding the time so appointed. Provided that in any case where the conditions, other than that of payment, can be fulfilled in respect of any such conditional purchase as aforesaid before the expiration of five years from the date of the application, the holder thereof may, at any time after such conditions have been fulfilled, lodge with the Chairman an application in Form 39 for the issue of such certificate as aforesaid, and in any such case the Chairman shall appoint a time and place, and cause notices to be published in manner hereinbefore provided.

122. Notice of the time and place appointed for any such inquiry as aforesaid shall be given to the conditional purchaser, and if the conditional purchase has been transferred to the holder thereof; and to every person who has duly lodged a caveat against the issue of a certificate of conformity.

123. If the Board shall be satisfied that all conditions applicable to the conditional purchase, except as hereinbefore mentioned, have been duly complied with, it shall issue to the then holder of the conditional purchase a certificate in the Form 40. If the Board shall find that any condition (except as hereinbefore mentioned) has not been duly complied with it shall draw up a report embodying such finding, and, unless an appeal against such finding is duly lodged, shall forward such report to the Minister.

124. When an original conditional purchase applied for before June 1st, 1895, is transferred before the issue of a certificate of conformity in respect thereof, and the said certificate is, after such transfer, duly issued to the then holder of the conditional purchase, any former holder thereof may make application to the Chairman in form 41 for a certificate under section 22 of the Act of 1884, that all the required conditions applicable to such conditional purchase (except that of payment of balance of purchase money) have been fulfilled; and the Board shall thereafter deal with such application, and, if a proper case be established, shall issue to such former holder a certificate in Form 42. Every such certificate shall show on the face thereof that the conditional purchase in respect of which it is issued has been transferred.

125. After the expiration of five or ten years from the date of the application for any conditional purchase applied for after June 1st, 1895, the Chairman shall appoint a time and place for the holding of an inquiry before the Board whether the conditions applicable thereto, except that of payment of balance of instalments, have so far been duly complied with; and notice of the said inquiry shall be conspicuously posted on the outside of the Head Office of the Board and of the Land Office for not less than fourteen days preceding the time so appointed, and due notice thereof shall also be given to the conditional purchaser, and if the conditional purchase has been transferred, to the holder thereof; and to every person who has duly lodged a caveat against the issue of a certificate of conformity.

126. If the Board shall be satisfied that the conditions, except as hereinbefore mentioned, have so far been duly complied with in respect of the conditional purchase, it shall issue a certificate of conformity in the Form 38 to the then holder of the conditional purchase. If the Board shall find that any condition, except as hereinbefore mentioned, has not been duly complied with, it shall draw up a report to the Minister to that effect, and, unless an appeal against such decision is duly lodged, shall forward such report to the Under Secretary.

127. Any person may apply to the Chairman in the Form 15 for a certificate that he has been compelled by adverse circumstances to abandon, or surrender a conditional purchase; and the Board shall thereafter inquire into the truth of the matters alleged, and shall grant to the applicant a certificate in the Form 16 if a proper case is established for the same.

128. In any case where such a certificate has, before December 1st, 1889, been refused on the ground that a forfeiture of the conditional purchase had previously been declared, the applicant may renew his application and the Board may grant or refuse such a certificate, as if the former application had not been made.

129. An application for the issue of a fresh certificate of conformity, in place of one that has been lost or destroyed, shall be made to the Chairman in Form 43; and the Chairman shall upon receipt thereof publish in the *Gazette* a notice of such application, and of the time and place when the same will be heard. After the expiration of not less than fourteen days from the date of such publication the Board may, if satisfied of the loss or destruction of the original certificate, and of the applicant's right to hold the certificate, issue a fresh one in the Form 44.

CONDITIONAL PURCHASES WITHOUT RESIDENCE.

130. Regulations having reference to conditional purchases shall so far as possible apply to conditional purchases without residence. An application by the holder of any such conditional purchase for permission to substitute, wholly or in part, other improvements in lieu of fencing shall be made to the Chairman on Form 45.

AUCTION SALES.

131. If an upset price be notified in the *Gazette* or otherwise declared it shall include the value of the improvements, if any, and the bidding shall start at an amount not less than such upset price. A deposit of not less than one-quarter of the amount bid shall be paid at the time of sale, except in any case where it has been decided to remit to the person bidding the whole or any part of the value of improvements included in the upset price, in which case the deposit may be one-quarter of the amount bid, less the value so to be remitted. If the sale is not upon special terms, payment of the balance of the amount bid shall be made within three months after the date of sale, or within such further period as the Minister may allow, subject to a fine of 10 per cent. If the sale is upon special terms, payment of such balance, and of interest thereon, shall be made in accordance with the special terms.

132. Payment of the balance of the amount bid, and of any interest or fine that may have been incurred, shall be made to the Colonial Treasurer or the Land Agent.

AFTER AUCTION SALES.

133. An application for a grant of any town or suburban Crown lands or of Crown lands within population area which have been offered for sale at auction and not sold shall be upon Form 46, and shall be lodged with the Land Agent during office hours on any business day not being a Thursday or public holiday, and

and shall be accompanied by a deposit of 25 per centum of the upset price at which the land applied for was last offered for sale; but in any case where such upset price includes the value of improvements on the land, and the Governor has decided to remit the value of such improvements to the person applying, the deposit may be 25 per centum of such upset price less the value so to be remitted: Provided that such an application shall not be lodged for land which is subject to a reservation from auction sale, and where a notification has been published that any land will be offered for sale by auction an application for such land shall not be lodged until such auction is over.

134. Any such application shall describe the nature and value of any improvements on the land applied for, and, if the application is approved, such approval shall be notified in the *Gazette*, but the Minister shall have power to refuse any application.

135. The period for the payment of the balance of purchase money allowed by the terms and conditions of sale as notified in the *Gazette* shall be calculated from the lodging of the application.

IMPROVEMENT PURCHASES ON GOLD-FIELDS.

136. Every application under section 46 of the Act of 1884 to purchase land by virtue of improvements shall be made to the Land Agent in the Form 47, during office hours on any business day not being a public holiday. Every such application shall be accompanied by a deposit of £1, and the applicant shall, at the same time, pay a survey fee of £1, unless a survey fee of equivalent amount has already been paid in respect of the area applied for. Caveats may be lodged against any such application by any person claiming a right to the land so applied for, or to the improvements in virtue of which the application is made. The Board shall on the application coming on for consideration require proof of the facts necessary to support the application; and if it finds that the applicant is entitled to make the purchase it shall proceed to appraise the amount of the purchase money. If the application be withdrawn or refused, any costs incurred in dealing therewith may be deducted from the deposit. If the application be granted, the deposit may be credited as on account of the purchase money.

137. The improvements shall include a residence or a place of business, and otherwise be of a character to be approved by the Board; and the right to purchase shall be limited to the land, or, if the land be measured, to the allotments or portions, on which the improvements are, if sufficient in area, or, if otherwise, to such allotments and the allotments immediately adjacent thereto, provided the maximum area is not thereby exceeded, and the applicant is in authorised occupation of all the land applied for. If the area of any allotment or portion taken by itself or with others causes the maximum area to be exceeded, the Board may approve of the subdivision thereof. The land if unmeasured shall be measured in accordance with the general design of subdivision and with the rules of measurement applicable to conditional purchases so far as the same can be applied. The boundaries and area of any land applied for may be modified by the Board, or the Minister.

138. The applicant shall pay the purchase money to the Colonial Treasurer within three months after notification in the *Gazette* of the Governor's approval of the purchase. If payment is not so made the purchase may be forfeited and the deposit and survey fee forfeited.

SPECIAL SALES.

139. Applications—

- (1.) For the rescission of any reservation of water frontage, or of land adjoining such frontage—
- (2.) For the reclamation and purchase of land beyond or below high-water mark—
- (3.) For the purchase of lands to which no way of access exists, or which are of insufficient area for conditional sale, or in any other case within section 66 of the Act of 1884—
- (4.) For the closing and purchase of unnecessary roads bounding or traversing any lands held in fee-simple—
- (5.) For the closing of unnecessary roads which pass through conditional purchases, and for the addition thereof to such purchases—

shall be made on Form 48, and sent to the Under Secretary.

140. Provided that where land has been resumed from any portion held in fee simple or from any conditional purchase or conditional lease for the purpose of opening a road, and an existing road traversing or bounding such portion or purchase has thereby been rendered unnecessary, no application as aforesaid shall be required in respect of any portion of the unnecessary road which may be granted or allotted in full or part satisfaction for the land so resumed.

141. A plan shall be forwarded with the application, showing with accuracy the land applied for, the position of adjoining land held by the applicant or other proprietors, and all other particulars necessary to illustrate the intention of the applicant, and the effect of compliance with the application.

142. Every application shall be accompanied by a receipt showing that a deposit of £10 on account thereof has been lodged with the Colonial Treasurer. The deposit, less the costs incurred in connection with the application, shall form part of the sum payable as the purchase money if the application be complied with, but shall be refunded, less such costs, if the application be refused. If the application is not proceeded with the deposit shall be forfeited.

143. Any application may be referred by the Minister to the Board for consideration and for appraisement of the value of the land applied for.

144. The purchase money, deed fee, and all sums payable for costs, shall be paid to the Colonial Treasurer within three months from the date of the notification in the *Gazette* calling for the same.

145. In cases of reclamation no grant or Treasury certificate of payment in full shall be issued, until the reclamation has been completed to the satisfaction of the Minister or of the Board, as the case may be.

VOLUNTEER ORDER SELECTION.

146. Applications for grants of land under the Volunteer Regulation Act of 1867 shall be made on Form 49, and shall be tendered to the Land Agent during office hours on any business day, not being a Thursday. The land shall be measured in the same form as a conditional purchase of the like area. If the application be for part of a measured portion, the same rules of subdivision shall apply, and the survey fee prescribed for a conditional purchase of equal area shall be paid.

SETTLEMENT

SETTLEMENT LEASES.

147. When a subdivision for the purposes of section 24 of the Act of 1895 has been effected, the Chairman, under the direction of the Minister, shall appoint a time and place for an inquiry by the Board as to the improvements upon any farm or farms in the subdivision; and any person known to have ownership or tenant right in improvements upon any farm shall be a party to the proceedings in respect of the said farm. The Board, up such inquiry, shall find the value to an incoming tenant of the improvements on the said farm or farms, and the person who is entitled to receive payment of such value, finding separately in respect of each farm, and to that end may take into consideration any official report by a surveyor, inspector, or appraiser (whatever may have been the occasion or purpose of the said report) bearing upon the existence of value of such improvements.

148. An application for a settlement lease shall be in the Form 50, and may be lodged with the Land Agent, during office hours, on any Thursday, not being a public holiday.

The application shall be signed, and the declaration printed on the back of the Form shall be made, by the applicant, who shall tender the application in person.

The application shall be accompanied by one half-year's rent on the farm applied for at the rate of $1\frac{1}{4}$ per centum per annum on the capital value, as notified, of such farm; and also by a survey fee according to the scale prescribed for original conditional purchases, or where the area exceeds 2,560 acres, according to the following scale. In any case where the cost of survey shall be less than the scale rates, the difference may be refunded:—

	£	s.	d.
For 2,560 acres	18	15	0
For every additional 40 acres up to 3,840 acres at 2s. 6d.			
For 3,840 acres	22	15	0
For every additional 40 acres up to 5,760 acres at 2s.			
For 5,760 acres	27	11	0
For every additional 40 acres up to 7,680 acres at 1s. 6d.			
For 7,680 acres	31	3	0
For every additional 40 acres up to 10,240 acres at 1s.			
	34	7	0

149. The provisions as to ballots and caveats hereinbefore contained shall apply to applications for settlement leases; and in the event of applications conflicting any applicant may withdraw his application before the ballot, and any applicant, other than the person successful in the ballot, may withdraw his application immediately after the ballot; and upon such withdrawal as aforesaid a refund shall be made of any moneys lodged with an application.

150. The Chairman shall appoint the time and place, at which the applicant is to satisfy the Board that he or she is qualified to make the application, and that the same has been made in accordance with the provisions of the Act of 1895, and in particular that the same has been made in good faith.

151. When the Board disallows an application, a refund shall be made of any moneys lodged therewith, unless the Board is satisfied that the application was made otherwise than in good faith.

152. The rent for the second half of the first year shall be paid to the Land Agent or Colonial Treasurer within six months after the date of the notification of the execution of the lease, and the rent for each succeeding year shall be paid in advance to the Land Agent or Colonial Treasurer, before the date in each year corresponding to the date of execution of the lease.

153. A settlement lease shall be in Form 51, with such modifications and additional provisions, covenants, and conditions as to the Governor may seem expedient in the public interest; and when a settlement lease has been executed by the Governor a notification to that effect shall be published in the *Gazette*, and the lease shall be forwarded to the Land Agent for delivery to the lessee. The lessee shall, within three months after such notification, take delivery of the lease, and shall give a receipt in writing for the same in Form 52, and such receipt shall have the same force and effect as if the lessee had duly executed the said lease or a counterpart thereof. If the lessee fail or neglect to take delivery of the lease, or to give such receipt as aforesaid within the aforesaid three months, the Minister may by notification in the *Gazette* declare the said lease to be null and void, and the same shall thereupon become null and void to all intents and purposes, and the application for the lease shall be deemed to have been disallowed, and any moneys lodged with the application shall be forfeited to the Crown.

154. In any case where the Minister has not appraised the value of the improvements on a farm before the same is applied for, the Local Land Board shall, upon or after the confirmation of the application, proceed to appraise the value, or permit the removal, of such improvements in accordance with the general provisions hereinbefore contained.

155. In any case where the applicant for a farm desires to show that the value of the improvements on the farm applied for, as appraised by the Minister, is less than at the date of such appraisal, he shall, in accordance with the general provisions hereinafter contained, either give notice to the Chairman in Form 8 before his application comes on for consideration by the Board, or else not later than one month after the confirmation, lodge an application in Form 9, and the Board shall, in either case, proceed in accordance with the general provisions hereinafter contained.

156. The value of the improvements on the farm, for which a lease has been granted, shall be paid within three months after the date of the execution of the lease as notified in the *Gazette*, and if not so paid shall bear interest at the rate of four per centum, calculated from such date as aforesaid. Payment of the aforesaid value and interest shall be completed before the expiration of three years from such date as aforesaid; and not less than one-third of such value shall be paid before the expiration of one year, and not less than two-thirds of such value shall be paid before the expiration of two years, from such date as aforesaid; and with such one-third and two-thirds respectively shall be paid the interest then due on the proportion of the aforesaid value for the time being unpaid. If the Crown is entitled to receive payment of the aforesaid sums the payment thereof shall be made to the Land Agent or the Colonial Treasurer.

157. Where the person who applied for a settlement lease has been compelled by adverse circumstances to abandon or surrender the same, he may apply to the Chairman in Form 15 for a certificate to that effect; and the Board shall thereafter inquire into the truth of the matters alleged, and shall grant the applicant a certificate in the Form 16 if a proper case is established for the same.

IMPROVEMENT LEASES.

158. Improvement leases shall be disposed of by auction or tender in accordance with the provisions hereinafter contained.

159. When an improvement lease has been executed by the Governor a notification to that effect shall be published in the *Gazette*, and the lessee shall, within three months after such notification, take delivery of the lease from the Under Secretary and give a receipt in writing for the same in Form 52, and such receipt shall have the same force and effect as if the lessee had duly executed the said lease or a counterpart thereof. If the lessee fail to take delivery of the lease or to give such receipt as aforesaid, the Minister may, by notification in the *Gazette*, declare the said lease to be null and void, and the same shall thereupon become null and void to all intents and purposes, and any sums paid on account of the lease shall be forfeited to the Crown.

160. The rent for the second and every succeeding year of an improvement lease shall be paid annually in advance to the Colonial Treasurer before the date in each year corresponding to the date of the execution of the lease.

APPLICATIONS FOR HOMESTEAD LEASES.

161. Applications for homestead leases, or for additional homestead leases, shall be lodged with the Land Agent during office hours on any Wednesday not being a public holiday. The application shall be signed by the applicant, and shall be tendered by the applicant in person, or, if for an additional homestead lease, by the applicant or an agent authorised in writing, and any authority as aforesaid shall be delivered to the Land Agent together with the application. And no application for an additional homestead lease in virtue of an original homestead lease standing in the name of a person who has died, or been declared a lunatic, or become an insane patient, shall be made, unless and until the applicant has been registered in accordance with Regulation 314.

162. An application for an original, or additional, homestead lease shall be in the Form 53; every application for an original homestead lease shall be accompanied by a statutory declaration on Form 54, made by the applicant.

163. With every application for a homestead lease a sum calculated at the rate of one penny per acre of the area applied for, and £10 as payment in part of the cost of survey, shall be paid to the Land Agent.

164. If the land has been measured it shall be applied for in portions as measured; but measured and unmeasured land may be applied for together. The following provisions shall be observed as to the form in which original and additional homestead leases may be applied for and measured:—

- (1.) If the land is unmeasured and has a frontage the depth thereof shall not be less than twice the width; but if the land is unmeasured and has no frontage the same shall be in the form of a rectangle, the length of which shall not exceed twice the width; the boundaries, other than the frontage, shall, so far as practicable, be directed to the cardinal points.
- (2.) Additional homestead leases shall, in conjunction with any previous leases of the same series, give a figure of the general form and dimensions before mentioned; and the intervention of a road or creek shall not be an objection to an application for an additional homestead lease, if the lands applied for are otherwise adjoining.

165. In all cases the boundaries of the lands applied for, whether with or without frontage, and whether measured or unmeasured, may be varied or modified by the Board, although such variation or modification may have the effect of altering the frontage, depth, or form of the lands, or the direction of the boundaries thereof. When two or more leases are applied for in the same locality their boundaries may be altered by the Board, so as to conform to the design which is most suitable for the subdivision of the country and to the distribution of natural advantages.

166. Applications for homestead leases tendered on the same day shall take priority according to the order in which they are received. The provisions as to ballots hereinbefore contained shall apply to applications for homestead leases; and in the event of a ballot being necessary, any applicant may withdraw his application before or immediately after the ballot; and upon such withdrawal a refund shall be made of any moneys lodged with an application.

167. Any person claiming a right to any land the subject of an application for a homestead lease, may lodge a caveat against the application in manner provided in Regulation 43. No caveat shall be required from a person merely claiming a right to any improvements which such land may contain.

168. At the time and place appointed, the Board shall in open Court consider the application for a homestead lease for the purpose of making a recommendation to the Minister that the same be granted or refused, and the applicant shall in every case satisfy the Board by evidence that he or she was competent and entitled to make the application, and that the same was made in good faith, before the Board recommends that the application be granted. If the Board is not so satisfied, whether by reason of the non-appearance of the applicant or otherwise, it shall recommend that the application be refused.

This Regulation shall extend to applications pending on June 1st, 1895.

169. When the Board recommends that an application be granted, it may, in manner hereinafter provided, proceed to appraise the value or to permit the removal of any improvements on the land applied for; and the Board may also proceed to appraise the rent of the homestead lease applied for.

170. The Chairman may, in the name and on behalf of the Minister, direct a survey to be made of any lands of which the Board recommends a lease to be granted, but the making of such survey shall not bind the Minister to approve the granting of a lease in the form as surveyed or in any other form; and upon completion of the case, the Board shall report to the Minister its recommendation as aforesaid, and the grounds on which the same is based, and its recommendations or findings on all other matters relevant to the application.

171. The Minister may refuse any application or may approve the same with or without modification, whether such refusal, modification, or approval have or have not been recommended by the Board. The approval of an application shall be notified in the *Gazette*, and the applicant shall, within sixty days from the date of such notification, pay to the Land Agent such sum for the survey of the lease as may be specified in such notification, and any balance of the appraised rent which may be due.

172. If a lease as approved differs materially in form or situation from that applied for, the applicant may, within ninety days from the said notification, give notice to the Board on Form 55, of his intention not to accept the same, and may apply for a refund of his deposit; and the Minister shall notify in the *Gazette* whether he accepts or refuses such notice of non-acceptance.

CONDITIONS OF HOMESTEAD LEASES.

173. In any case where the Board recommends that an application be granted, the Board may at the same time prescribe the kind or kinds of fencing to be erected in fulfilment of the condition of fencing, and may grant an exemption from fencing any natural or other boundary; and if the lease be granted, the said orders shall be as effectual as if made after the granting thereof: Provided always that any order as to the kind or kinds of fencing may afterwards be varied upon application by the lessee, and that the omission by the applicant to ask for an exemption at the aforesaid time shall not prevent him subsequently making an application therefor as hereinafter provided.

174. The holder of any homestead lease may, at any time before the expiration of the period limited for the fulfilment of the condition of fencing, apply to the Chairman on Form 29 for an extension of such period.

175. The holder of any homestead lease may, at any time before the expiration of the period limited for the fulfilment of the condition of fencing, apply to the Chairman on Form 27 for an exemption from fencing any natural or other boundary of such lease.

176. A homestead lessee shall, prior to the date of commencing to reside on his lease during any year wherein residence is required thereon, give notice on Form 56 of his intention so to reside, and in such notice shall specify the date from which he intends to reside.

177. The rent of a homestead lease shall be paid to the Colonial Treasurer annually in advance, before the date in each year corresponding to the date of the commencement of the lease, or if the lease has been applied for after December 1st, 1889, then before the date corresponding to the date of the application for the lease. In the latter case a provisional rent of one penny per acre shall be payable until the appraised rent has been called for.

178. An application for a new appraisalment of the rent of a homestead lease, in accordance with the provisions of section 9 of the Act of 1895, shall be in the Form 57, and shall be sent by registered letter or delivered to the Under Secretary before September 1st, 1895, accompanied by a receipt showing that a deposit of £5 has been paid to the Colonial Treasurer.

179. The holder of any homestead lease may apply to the Chairman on Form 31 for the suspension of any condition of residence or fencing attaching thereto.

180. Inquiry may at any time be made, in the like manner as is provided in Regulations 119 and 120, whether the conditions attached to a homestead lease are being fulfilled; and after the period allowed for the completion of the conditions of residence and fencing has elapsed, the Board shall inquire and report to the Minister whether the said conditions have or have not been duly fulfilled.

181. Notice of the intention to surrender a homestead lease shall be in the Form 58, and shall be sent by registered letter or delivered to the Under Secretary not less than twelve months before the date of the intended surrender.

182. Where a person who has applied, after June 1st, 1895, for an original homestead lease has been compelled by adverse circumstances to abandon or surrender the same, he may apply to the Chairman in Form 15 for a certificate to that effect; and the Board shall thereafter inquire into the truth of the matters alleged, and shall grant the applicant a certificate in the Form 16 if a proper case is established for the same.

183. A Crown lease in the Form 59 shall, upon application and payment of a deed fee of £1, be issued to a homestead lessee, who shall give a receipt for the same in Form 52, and such receipt shall have the same force and effect as if the lessee had duly executed the said lease or a counterpart thereof.

184. A copy of every agreement by the subletting of a homestead lease shall be verified by a statutory declaration to which the said copy shall be attached as an annexure, and in which the person making the declaration shall declare that he has compared the said copy with the original agreement, and that the copy thereof annexed to the declaration is a true and full copy of the original agreement. The said declaration and annexure shall be delivered or sent by registered letter to the Chairman within one month from the making of the agreement.

PASTORAL LEASES.

185. Notice of intention to surrender a pastoral lease shall be in the Form 58, and shall be sent to the Under Secretary.

186. An application for the subdivision of the area held under pastoral lease shall be in the Form 60, and shall be sent to the Under Secretary:—

- (1.) The application shall be accompanied by a receipt showing that a deposit of ten pounds has been paid to the Colonial Treasurer, and by a description and sketch of the proposed subdividing line or lines, together with an estimate of the grazing capability of each proposed subdivision.
- (2.) The Minister may modify or alter any proposed subdividing line, or lines, and may require any line or lines to be surveyed.
- (3.) All costs of report, survey, or otherwise incurred in dealing with the application, shall be borne by the lessee.
- (4.) All arrears of rent or other dues shall be paid up before the application is made.

187. When a subdivision has been approved, the Crown lease (if any) shall be delivered up; and each subdivision shall then be registered in the name of the pastoral lessee. The terms of the leases of the subdivided portions shall be for the unexpired term of the original lease; and the Minister shall apportion the rent of the whole leasehold between the subdivisions. The rents apportioned as aforesaid shall be taken to be the appraised rents of the subdivisions, unless and until altered in pursuance of the existing Acts.

188. A Crown lease in the Form 59 shall, upon application and payment of a deed fee of £1, be issued to a pastoral lessee, who shall give a receipt for the same in Form 52, and such receipt shall have the same force and effect as if the lessee had duly executed the said lease or a counterpart thereof.

189. For the purposes of any applications under section 43 of the Crown Lands Act of 1889 for the extension of a pastoral lease in the Central Division, which it may still be permissible to make, Regulation 104 of the Regulations of December 2nd, 1889, shall be deemed not to have been repealed.

An application to withdraw an application for the extension of a pastoral lease in the Central Division shall be made on Form 61, and shall be sent by registered letter or delivered to the Under Secretary within thirty days after publication in the *Gazette* of a notification of the final decision on the application for extension.

190. An application for the appraisalment of the rent of an area left under pastoral lease, after a withdrawal under the provisions of sections 3 or 6 of the Act of 1895, shall be in Form 62, and shall be forwarded to the Under Secretary within two months after the date of the *Gazette* notice of withdrawal.

191. An application for a new appraisalment of the rent of any pastoral lease in the Western Division, in accordance with the provisions of section 9 of the Act of 1895, shall be in the Form 57, and shall be sent by registered letter or delivered to the Under Secretary before September 1st, 1895. The application shall be accompanied by a receipt showing that a deposit according to the subjoined scale has been paid to the Colonial Treasurer.

<i>Scale.</i>				£	s.	d.
For any area not more than 10,240 acres	5	0	0
For any area more than 10,240 acres and not more than 50,000 acres	10	0	0
For any area more than 50,000 acres and not more than 100,000 acres	15	0	0
For every additional 100,000 acres or part thereof	5	0	0

192. An application by the holder of a pastoral lease in the Central Division for permission to make improvements on the land held under lease shall be made to the Chairman in Form 63; and the declaration printed on the back of that Form shall be made by the holder of the lease, or by the owner thereof subject to a mortgage, or by some other person whom the Chairman may deem sufficiently responsible. And the consent of the Crown to the making of improvements shall be evidenced by a permission under the hand of the Chairman in Form 64.

193. The rent of a pastoral lease shall be paid annually in advance to the Colonial Treasurer before the date in each year corresponding to the date of the commencement of the lease.

OCCUPATION LICENSES.

194. An application for a preferential occupation license of lands held under an expired or expiring pastoral lease in the Central Division, shall be made by the holder of the lease, or if the lease has expired then by the last holder thereof or his successor in title, in Form 65, and shall be accompanied by a receipt showing that a provisional license fee as specified in the next following Regulation has been paid to the Colonial Treasurer. The said application shall be sent by registered letter or delivered to the Under Secretary within the period hereinafter mentioned—

- (a) If an extension of the lease under section 43 of the Act of 1889 has not been applied for, the application shall be sent or delivered as aforesaid not less than six months before the expiration of the lease.
- (b) If an extension of the lease has been applied for and refused, the application shall be sent or delivered as aforesaid within sixty days after the notification in the *Gazette* of the final decision on the application.
- (c) If the application for an extension has been withdrawn, the application for a preferential occupation license shall be sent or delivered as aforesaid within sixty days after the giving of the notice of withdrawal.
- (d) If the pastoral lease has been extended under section 43 of the Act of 1889 or section 3 of the Act of 1895, the application shall be sent or delivered as aforesaid not less than two months before the expiration of the extension.

195. The rate of license fee payable with an application for a preferential occupation license shall be the same for every 640 acres of the estimated area, as the rate then payable for the original resumed area, if the applicant occupies the same, but if not then the rate shall be two pounds for every 640 acres; and such an amount shall be paid on account of the license fee as at the aforesaid rate will cover the period from the commencement of the preferential occupation license to the 31st day of December then next ensuing.

196. In any case where lands are withdrawn from pastoral lease in the Central or Western Division under the provisions of sections 3, 6, or 8 of the Act of 1895, the lessee may apply for a preferential occupation license of the withdrawn area in Form 65. The application shall be delivered or sent by registered letter to the Under Secretary before the withdrawal takes effect, and shall be accompanied by a receipt showing that a provisional license fee, as prescribed by the last preceding Regulation, has been paid to the Colonial Treasurer.

197. An application by the holder of a preferential occupation license in the Central Division for permission to make improvements on the land held under the license shall be made to the Chairman on Form 63; and the declaration printed on the back of that Form shall be made by the holder of the lease, or by the owner thereof subject to a mortgage, or by some other person whom the Chairman may deem sufficiently responsible. And the consent of the Crown to the making of improvements shall be evidenced by a permission under the hand of the Chairman in Form 64.

198. An application for a new appraisalment of the license fee of any occupation license in the Western Division, in accordance with the provisions of section 9 of the Act of 1895, shall be in the Form 57, and shall be sent by registered letter or delivered to the Under Secretary before September 1st, 1895, accompanied by a receipt showing that a deposit according to the scale subjoined to Regulation 191 has been paid to the Colonial Treasurer.

199. The license fee of an occupation license (whether preferential or otherwise) shall be paid annually in advance before December 1st in each year.

SCRUB LEASES.

200. Any notification by the Minister that land shall be open to scrub leases shall also specify the areas, conditions, and terms of such leases, and the manner of granting the same. Any such notification may from time to time be modified, varied, or cancelled.

201. An application for a scrub lease may be made to the Under Secretary on Form 66, and the lands applied for shall be described in the application, so as to admit of the ready identification thereof. Any application made after notification as aforesaid shall be accompanied by a receipt showing that a provisional survey fee, at the rate of £2 per linear mile of the estimated length of boundaries, has been lodged with the Colonial Treasurer. The said survey fee shall be available for payment of the cost of surveying any lines or boundaries in connection with any application, although the same may be other than those described or applied for.

202. Application as aforesaid may be made before the lands have been declared to be scrub lands, and before a notification has been published that scrub leases thereof will be granted on application; and, if so made, shall be accompanied by a receipt showing that a provisional survey fee at the aforesaid rate and a sum of £10 has been deposited with the Colonial Treasurer to cover the expenses of dealing therewith. If it be decided to grant scrub leases of such lands on application, the person so applying shall be deemed to be the first applicant for a lease thereof. Any such application may be forwarded to the Board for the purpose of obtaining its report and recommendation thereon.

203. Any pastoral or homestead lessee who desires a scrub lease of any portion of his leasehold may apply to the Under Secretary in manner provided by the last regulation. If the application is granted, a memorial of the scrub lease shall be inscribed on the registered entry of the pastoral or homestead lease, and a memorial of the pastoral or homestead lease on the registered entry of the scrub lease.

204. The Minister's approval of any application shall be notified in the *Gazette* and in such notification any species of trees, or any area within the leasehold, may be exempted from clearing operations, and, if so exempted, shall not be interfered with, unless a permit to ringbark be granted in manner hereinafter provided.

205. The lessee shall, within six months after the commencement of a scrub lease, begin to clear the land, and unless it be otherwise specified in the notification shall, within two years after such commencement, clear not less than one-fifth of the whole area, and thereafter shall during each succeeding year clear not less than an additional one-fifth thereof until the whole area be cleared, and shall during the term of the lease keep such cleared land free from all scrub which may have been mentioned in the aforesaid notification.

206. If upon inquiry it shall appear to the Board that from excessive drought, or other sufficient cause, the required clearing or any part thereof, or any other condition, has not been completed within the proper period or periods, the Board may recommend an extension of any such period, and the Minister may thereupon extend the same.

207. The Minister may at any time direct the Board to inquire whether any lessee is fulfilling the conditions of his lease; and the Chairman shall thereupon appoint a time and place for holding the inquiry.

208. The Chairman may from time to time direct reports to be furnished as to the progress made, and the methods employed in the performance of the conditions of the lease; and may cause notice to be given to the lessee of a day when he shall show cause before the Board why he should not do such work and adopt such methods as may be specified in the notice.

209. If any sums paid with an application for a scrub lease exceed the cost of survey and report or inquiry, the balance may on the granting of the lease be credited as on account of the rent; if the cost of survey and report or inquiry exceed the sums paid, the lessee shall pay the deficiency to the Colonial Treasurer within one month after notification in the *Gazette* of the amount thereof. If the application be withdrawn or refused the applicant shall pay all costs of survey, report, or inquiry incurred in dealing therewith; and if the deposit and provisional survey fee are not sufficient for the purpose, the deficiency shall be paid to the Colonial Treasurer within one month after notification in the *Gazette* of the amount thereof.

210. Rent for the first year of the lease, if let upon application, shall be paid within one month from the date of the *Gazette* notification calling for the same; and rent for the second and every subsequent year of any scrub lease shall be paid annually, in advance, to the Colonial Treasurer before the date in each respective year corresponding to the date of the commencement of the lease.

211. An application for the extension of the term of a scrub lease or lease of inferior lands shall be in the Form 67, and shall be sent by registered letter or delivered to the Under Secretary.

212. A scrub lease may be surrendered at any time by sending to the Under Secretary a notice in the Form 58, not less than twelve months before the date of the intended surrender: Provided that the surrender shall not take effect unless all rent due up to such date shall have been paid.

SPECIAL LEASES OTHER THAN SCRUB LEASES.

213. An application for a special lease under sections 89, 90, or 92, of the Act of 1884, shall be made to the Chairman, in the Form 68, and the application shall set forth the position and extent of the lands sought to be leased, the objects for which such lease is desired, and such other information as may tend to facilitate the dealing with the application. The application shall be accompanied by plan or tracing showing the position of the land applied for, and by a consent in writing from every person whose consent is necessary to the validity of the lease, and by a receipt showing that a deposit of £3, and a survey fee according to the scale given in Regulation 62, have been paid to the Colonial Treasurer. Such deposit and survey fee, less the cost of survey and report, the minimum cost of report being taken to be ten shillings and sixpence, shall be refunded if the application is refused; but otherwise any balance of the deposit shall be credited as on account of the first year's rent.

214. All such applications shall be considered by the Board, for the purpose of making a recommendation to the Minister; in the event of any application being approved, the applicant shall be apprised of the proposed conditions of the lease; and if the lease be applied for under the said 89th section, notice of the intention to grant the same shall be notified in the *Gazette*.

215. The rent of a special lease shall be paid to the Colonial Treasurer annually in advance.

LEASES OF SNOW LANDS.

216. The prescribed survey fee for leases of snow lands shall be at the rate of £2 per linear mile of the actual length of the boundaries thereof, as specified in the notifications in the *Gazette*.

217. Notice of a lessee's intention to claim an extension of his lease shall be given on Form 69.

ANNUAL LEASES.

218. An application for an annual lease of vacant Crown lands not reserved from lease or license shall be made on Form 70, and shall be lodged with the Land Agent during office hours on any business day not being a Thursday or public holiday. The lands applied for shall be contiguous so as to form a single tract, and shall be described in the application so as to admit of the ready identification thereof. The application shall be accompanied by a deposit which, in the case of annual leases previously offered for sale at auction and not bid for, shall be the amount of the upset rent, and in any other case shall be at the rate of £3 for every 640 acres or less area. The provisions as to ballots and caveats hereinbefore contained shall apply to applications for annual leases; and in the event of a ballot being necessary, any applicant may withdraw his application before the ballot, and any applicant other than the person successful in the ballot may withdraw his application immediately after the ballot; and upon any such withdrawal, a refund shall be made of any moneys lodged with the application.

219. If an application is made after the land applied for has been notified in the *Gazette* for lease or license by auction or by tender, the application shall not be proceeded with, unless and until the attempt to let by auction or tender has failed.

220. The Board shall consider the application for the purpose of recommending the Minister to approve or refuse the lease, and to that end may modify the application in such way as it may deem expedient in the public interest, or in the interest of other applicants, and may allot in satisfaction thereof lands not originally applied for; and where it recommends the Minister to approve a lease, it shall forthwith proceed to appraise the rent thereof and the annual value of the improvements on the land to be leased. The Minister shall thereafter, in any case where he approves the lease, notify in the *Gazette* his approval thereof, and the amount of the rent thereof. If the application be withdrawn otherwise than before or immediately after a ballot, or be refused, a sum not less than ten shillings and sixpence may be deducted from the deposit to cover costs incurred in dealing with the application, and the balance shall be refunded.

221. Rent up to the end of the first year shall be paid to the Colonial Treasurer or Land Agent within one month from the notification in the *Gazette* of the amount thereof. Rent for every succeeding year shall be paid in advance to the Colonial Treasurer or Land Agent before the 30th September in each year.

ARTESIAN WELL LEASES.

222. An application under the provisions of section 45 of the Act of 1889, for permission to bore and search for water in any land in the Western Division held under annual lease or occupation license, and for a lease of some portion thereof to be described in the application shall be sent to the Under Secretary on Form 71, and be accompanied by a receipt showing that a deposit of £10 has been paid to the Colonial Treasurer. With the application shall be furnished a plan showing the proposed site of the bore relatively to some survey mark or corner of a measured portion, or to any point otherwise sufficiently determined, and the lands which the applicant desires to have reserved on account thereof.

223. The Minister may refuse, or modify the application, and may apply the aforesaid deposit towards payment of the costs of any inquiry, survey, or report in connection with the application. If the application is granted the lessee shall, within one calendar month after the notification of the lease, pay any such costs incurred for survey or otherwise as are not covered by the deposit.

224. Payment of the rent of any lease granted upon any such application as aforesaid shall continue to be made at the same date as the rent of the annual lease or fee of the occupation license, and shall be subject to the general provisions hereinafter contained as to the payment of rents.

225. The Minister may direct the Board to hold an inquiry as to the *bond fides* of any application, or the manner in which boring operations are being or have been conducted, or the actual or probable results of such operations, or otherwise; and the Board shall duly proceed to hold the inquiry as directed, and shall find the facts and report such findings to the Minister.

RESIDENTIAL LEASES.

226. For the purposes of the regulations here following, a mineral field shall be deemed to be any Crown lands which the Governor may by proclamation in the *Gazette* have declared to be a mineral field within the meaning of section 48 of the Act of 1889, and a gold-field shall be deemed to be any Crown lands which may have been or may hereafter be duly proclaimed to be a gold-field within the meaning of the Mining Act or of any Act amending or replacing the same; and the Warden shall be deemed to be the Warden appointed for any such gold-field, or in case of a mineral field, the Warden of any gold-field who has been appointed to act in pursuance of the said section in respect of such mineral field.

227. Any holder of a miner's right or mineral license may make application for a residential lease of Crown lands within a gold or mineral field on Form 72 to the Land Agent of the Land District in which the lands applied for are situated, during office hours upon any business day, not being a Thursday or public holiday. Every such application shall be signed and tendered by the applicant in person, or by his agent duly authorised, for either or both purposes, in writing, and shall be accompanied by a deposit of £1, a survey fee according to the scale for original conditional purchases as set forth in Regulation 85, and a provisional rental, calculated at the rate of 1s. per acre or anything less than one acre of the land applied for. Measured portions shall be taken in portions as measured, and shall be so described, but measured portions and unmeasured lands may be applied for together: Provided that in every case, whether the land applied for is measured or unmeasured, or both, the Board shall have power to modify or vary the boundaries, area, or conformation thereof.

228. If the land applied for is unmeasured, the applicant shall, before lodging his application, mark a corner thereof by a post firmly set in the ground, and projecting not less than three feet, and shall make such post the starting point of the description contained in his application. Unmeasured lands shall be applied for and measured in accordance with the general design of subdivision, and with the rules of measurement applicable to conditional purchases, so far as the same can be applied.

229.

229. The Chairman may, with or without a report from the District Surveyor, refer any such application to the Warden, for the purpose of obtaining his recommendation in respect thereof; and the Warden shall thereupon proceed as in the next regulation provided.

230. As soon as possible after reference as aforesaid, the Warden shall inspect the land applied for, and if it shall appear to him that the land is not lawfully occupied under the authority of the Mining Act, or of any Act amending or replacing the same, or, if occupied, that such occupation is by the applicant in virtue of his miner's right or mineral license, and that the granting of the lease applied for is not open to objection as tending to hamper or prejudice any lawful mining or any public interest connected therewith, he may recommend that it be granted. If it shall appear to the Warden that the land applied for is not occupied, or, if occupied, that it is occupied by the applicant, as aforesaid, and that any apparent objection to the application of such kind as is hereinbefore mentioned is capable of being removed by a modification of the form or position of the land as applied for, he may recommend that it be granted subject to modification. If he is of opinion that the land may be required for other purposes before the expiration of the term named in the application, he may recommend that a lease be granted for such shorter term as may appear expedient. The Warden shall, in each case, make a recommendation whether the application be granted or refused, or be granted subject to specified modification as to area, position, term, or otherwise, and shall also state the grounds upon which his recommendation is based. The Warden, after making his recommendation as aforesaid, shall transmit the same, and all papers connected with the application, to the Chairman.

231. In every case where the granting of an application as made or modified, has been recommended by the Warden, the Chairman shall, after report by the District Surveyor, and if no sufficient objection appear to exist and unless the application shall meanwhile have been withdrawn, direct that the land whereof a lease is recommended as aforesaid shall be surveyed, and after such survey has been made, shall appoint a time and place at which the Board shall consider the application with a view to the appraisalment of rent and improvements, and to all such other matters in connection therewith, as the Warden is not hereinbefore empowered to deal with; and when the case is complete, the Board shall report to the Minister. If the land applied for be within the boundaries of any proclaimed city, town, or village, or within any reserve, a lease thereof shall not be granted, unless the Board report that the land applied for may be occupied without prejudice to the public interest.

232. A residential lease shall commence from the date of the notification thereof in the *Gazette*, and upon such notification any right of occupying any portion of the land comprised thereunder in virtue of the lessee's miner's right or mineral license shall, except for the purposes of section 46 of the Act of 1884, thereupon cease and determine. Within one calendar month from the date aforesaid, the lessee shall pay to the Land Agent all sums specified in such notification as due to the Crown on account of the first year's rent or for survey or subdivision fee or otherwise.

233. If an application be granted, any such balance of the sums paid with the application, as may remain when all costs of survey, inquiry, and report have been deducted therefrom, shall be credited as on account of the first year's rent; if an application be refused, the said balance shall be refunded; if an application be withdrawn, the said balance may be forfeited.

234. Rent for every year of the lease succeeding the first shall be paid annually in advance to the Land Agent before the date in each year corresponding to the date of the commencement of the lease.

235. The Minister may at any time direct that the rent of any residential lease shall be reappraised.

236. Every residential lease shall be subject to the conditions here following, that is to say,—

- (i) The lessee shall, during the whole currency of the lease, reside and make his usual and only home upon the lands comprised thereunder; and such conditions shall begin to operate immediately from and after the expiration of three months from the notification of the lease.
- (ii) The lessee shall, within twelve months from the notification of the lease, erect such buildings and fences as shall be necessary for actual residence upon, and beneficial use of, the land, if the same have not already been erected.
- (iii) The lessee shall, during the whole currency of the lease, hold a miner's right or mineral license.
- (iv) Any portion of the land which, in the opinion of the Minister, is required for mining or for public purposes, may be withdrawn from the lease.
- (v) Any duly authorised person may enter upon the land to seek, work, and win gold or any other mineral.
- (vi) And all other conditions which may be specified in the aforesaid notification of the lease.

237. No residential lease shall be held by or transferred to any person not then holding a miner's right or mineral license, and if so held or transferred may be forfeited.

238. The Minister may at any time direct the Board to hold an inquiry whether the conditions of a residential lease have been or are being duly complied with.

239. Upon any default in payment of the rent, or upon any failure to comply with or perform the conditions of the lease, any residential lease may be forfeited by notice in the *Gazette*.

240. A residential lease shall confer upon the holder no right to the gold or other minerals contained in the demised land, and he shall not seek, work, or win such gold or minerals unless and until he has been authorised thereto by the Minister.

241. Upon the withdrawal for mining or public purposes of land from a residential lease, the Minister may grant such compensation for any improvements which may be destroyed, injured, or removed by reason of such withdrawal, as shall appear to him just.

MINING ON RESIDENTIAL LEASES.

242. The holder of a residential lease, or any other person, may apply to the Warden of the District in the Form 73 for an authority to search for gold or any other mineral upon any land comprised in a residential leasehold.

243. An applicant for such authority, other than the holder of such residential lease, shall, when called upon to do so, deposit with the Warden such a sum of money as shall, in the opinion of the Warden, be necessary to cover the cost of repairing the damage done to the surface of the leasehold or to any improvements thereon, by reason of the search which shall be made under his authority. Failure to make such deposit shall be deemed an abandonment of the application for authority.

244.

244. Applications shall be recorded by the Warden in the order of receipt, and shall be numbered and dealt with in that order. With the least possible delay, after receipt of an application from any person other than the holder of such residential lease, the Warden shall cause a "search area" to be marked off, of such dimensions and in such a position as to cause as little damage to the residential lease or the improvements thereon as possible, having regard to the objects and opinions of the applicant for such authority. And the Warden shall thereupon estimate the amount of damages likely to be caused to any improvements, the property of the lessee, by the mining operations necessary in prospecting the land embraced within such residential lease.

245. The Warden shall, with the least possible delay thereafter, transmit the application to the Under Secretary for Mines, together with a report and a recommendation thereon. After consideration of the application with the Warden's report and recommendation thereon, the Secretary for Mines may refuse the application, or may grant the same, subject to the deposit of such sum of money as the Secretary for Mines may prescribe, and subject to such conditions as he may impose.

246. Forthwith after the granting of any such authority it shall be forwarded to the Warden for delivery to the applicant, but before handing over such authority to the applicant the Warden shall require him to deposit the sum of money prescribed by the Secretary for Mines. If the applicant refuse to make the deposit, the authority shall be returned to the Department for cancellation, and shall be cancelled accordingly.

247. Any such authority may be cancelled by the Secretary for Mines if the person to whom it has been granted shall fail, for a period of one month, to use it for the purpose of searching for the mineral named therein.

248. Upon discovery by the holder of any such authority of payable gold or other mineral, he shall forthwith report such discovery, giving full particulars to the Warden, who shall forthwith inspect and report upon such discovery, and shall state whether in his opinion the value of the deposit discovered would justify the withdrawal of the whole or any part of the land from leasehold, and what compensation should be paid to the holder of the residential lease for any improvements which may be destroyed, injured, or removed by reason of such withdrawal. And the Minister may thereupon withdraw from the leasehold such land as is necessary, and award such compensation to the leaseholder as shall appear to him just.

249. The holder of any authority as aforesaid shall have the right of ingress, egress, and regress into, over, and upon the land comprised in the residential lease referred to in such authority, but such right shall be exercised with as little inconvenience to the leaseholder as may be practicable.

AUCTION AND TENDER.

250. The sale by auction or tender of any leases or occupation licenses shall be subject to the general provisions here following, except in cases where any special provision in that behalf is made in the existing Acts.

251. No such sale by auction shall be held until the expiration of thirty days after notice of the sale has been published in the *Gazette*. Such notice shall state the time and place of sale, the upset rental or fee, the special conditions (if any) subject to which the leases or occupation licenses are to be granted, and the added amounts which, whether as survey fee, estimated value of improvements, or otherwise, are to be paid at the time of sale.

252. On the sale of an annual lease or an occupation license, the upset rental or fee shall be so fixed as to include the estimated annual value of the improvements, if any, on the land, and the amount bid shall be paid at the time of sale.

253. On the sale of any lease the bidding shall start at the upset rental or fee; and, except in the case of an annual lease, the first year's rent and one quarter of the estimated value of the improvements, if any, shall be paid at the time of sale. Payment of the balance of such estimated value shall be made to the Colonial Treasurer or the Land Agent within three months from the time of sale.

254. The survey fee, if any, shall in every case be paid at the time of sale.

255. Any lease or occupation license, the price bid for which, together with any added amounts as aforesaid, is not forthwith paid, shall then and there be reoffered for sale at auction.

256. Any lease or occupation license offered at auction and not sold, may either be reoffered at auction on some future occasion, or disposed of by tender in manner hereinafter mentioned, or otherwise dealt with.

257. Whenever it is intended to let by tender any lease or occupation license, notice of such intention shall be published in the *Gazette* at least thirty days before the date up to which tenders may be lodged, which date shall be specified in the notice, together with the minimum rental or fee. The minimum rental or fee shall, in the case of an annual lease or an occupation license, be so fixed as to include the estimated annual value of the improvements, if any, on the land. In the case of any other lease the estimated value of the improvements shall be specified in the notice. The survey fee, if any, payable in each case shall also be specified in the notice. A plan or tracing, showing the boundaries of the land to be let, shall be exhibited at the office of the Land Agent, and at the Head Office of the Board. The tenders for the leases or occupation licenses, shall be addressed to the Under Secretary, and may be deposited in a box to be kept for that purpose at the Department of Lands, or may be transmitted by post, and if so transmitted shall be placed in the box unopened. Tenders shall be sealed and endorsed "Tender for Annual Lease," or as the case may be, and the endorsement shall specify the Land District in which the land is situated.

258. Tenders shall be made in the Form 74, and shall clearly describe the land applied for in terms of the notice calling for tenders, and shall be accompanied by a receipt showing that a sum of £2 10s. has been paid to the Land Agent or the Colonial Treasurer as a deposit thereon, except that in the case of a tender for a lease of inferior lands the deposit shall be £2. The deposit paid by the person whose tender is accepted shall be credited on account of the first year's rent or fee; all other deposits shall be refunded.

259. At the expiration of the time specified for lodgment of tenders the tender-box shall be sealed by an officer duly authorised in that behalf; and on the following day, or as soon thereafter as possible, the box shall be opened, and the tenders examined by a Board of Officers appointed for that purpose. A list giving particulars of all such tenders and of the respective amounts offered as rent or fee shall be made by the said Board of Officers and transmitted to the Minister, together with such tenders.

260. If there be only one tender, the tenderer shall be entitled to the lease or occupation license if the rent or fee offered be not below the minimum specified. If there be two or more tenders, the lease or license shall be granted to the person whose tender offers the highest rent or fee, not being below the minimum specified; but if no one tender be higher than all the others, a fresh day shall be named, on or before which the persons making the highest tenders shall be at liberty to send in fresh tenders, which shall be dealt with as hereinbefore provided, and in such case a fresh tender shall not be accepted for an amount less than that specified in the previous tender by the same person. But notwithstanding anything to the contrary in this regulation, any tender may, for sufficient reasons, be rejected, and fresh tenders may be called for if deemed necessary.

261. Particulars of all tenders opened by the said Board of Officers shall be recorded in a tender-book, to be kept for that purpose; and upon the acceptance of any tender the same shall be notified in the *Gazette*. The successful tenderer, except in the case of a tender for a lease of inferior lands, shall within one calendar month from notification of demand pay to the Colonial Treasurer any sums due for the first year's rent, or as survey fee or estimated value of improvements or otherwise. In the case of a tender for a lease of inferior lands the period for payment of all sums as aforesaid shall be sixty days from the said notification.

262. The rent or fee for the second and every succeeding year of a lease or occupation license let by auction or tender, and any sums payable therewith as the annual value of improvements shall be paid in accordance with the provisions in that behalf hereinbefore contained.

APPRAISEMENT AND PAYMENT OF RENTS AND FEES.

263. Whenever it is necessary for the purposes of the existing Acts that the rate of any rent or fee be appraised and no time is fixed or indicated by these regulations for the appraisal thereof, the Minister may direct the Board to appraise the same; and the Chairman shall as soon as possible after any such direction as aforesaid appoint a time and place for holding the appraisal directed.

264. When the amount of any rent or fee has been finally determined the same shall be notified in the *Gazette*.

265. Payment of any sums found to be due to the Crown on the appraisal or re-appraisal of any rent or fee shall, in the case of occupation licenses or pastoral leases, be made within two calendar months, and in the cases of any other lease within one calendar month, after notification in the *Gazette* of the amount of the appraised or re-appraised rent or fee.

266. All rents and license fees shall, save as otherwise provided in the existing Acts or these regulations, be paid to the Colonial Treasurer annually in advance, provided that the rents of conditional and annual leases may, and the rents of residential leases shall, be paid to the Land Agent. If any rent or license fee is not paid on or before the day prescribed for the payment thereof, it shall bear interest at the rate of ten per centum per annum.

267. Rent or license fee for any land added to the area under any lease or license, whether the same be improved or not, shall be paid together with the rent or fee for the original area. Provided that the rent or fee due for such portion of the current year of the lease or license, as succeeds the date of such addition, shall be paid within two calendar months after notice of the adjustment of the account for such current year, as hereinafter provided.

268. For the purpose of determining any amount to be added to or deducted from any rent or fee the same shall be deemed to accrue due from day to day.

269. At the end of each year the accounts in connection with any rent or fee and with any deductions or refunds therefrom or additions thereto shall, if necessary, be adjusted for each pastoral or homestead lease or occupation license, and any sums due to the Crown on the footing of such account, shall be paid to the Colonial Treasurer within two calendar months from the date of notice to the lessee or licensee of such adjustment.

270. The rent of any pastoral or homestead not brought under the provisions of the Act of 1889, shall continue to be paid at the same times and in the same manner as before the commencement of that Act. Provided that any sum added to such rent by the addition of any land to the lands under such lease shall be paid in manner provided by Regulation 267.

PAYMENT FOR IMPROVEMENTS.

271. Where any land containing improvements becomes the subject of any homestead selection, purchase, or lease, or application therefor, the Board shall deal with the matters arising from the existence of such improvements in the manner provided hereunder.

272. If the improvements belong to the Crown, the Board shall appraise the capital or annual value thereof, as the case may require, when the application for a homestead selection, purchase or lease of the land containing the improvements comes before it for consideration, or at such other time as the Board may then appoint.

273. If the improvements do not belong to the Crown, the Board shall appraise the capital or annual value thereof, as the case may require, when the aforesaid application comes before it for consideration, or at such other time as the Board may then appoint, in any case where the applicant, or the person having ownership or tenant-right in the improvements, gives thirty days' notice to the Chairman in Form 8 that he desires the Board then to appraise the value of the improvements, or in any case where the parties concerned then appear and desire the Board to appraise the value.

274. If the Board does not deal with the matter of the improvements, when the aforesaid application is before it for consideration, the applicant for the homestead selection, purchase or lease, or any person claiming ownership or tenant-right in the improvements, may thereafter apply to the Chairman on Form 9, giving particulars in his application of the improvements and of the approximate values and dates of the erection thereof; the application shall be accompanied by a deposit of £10 to cover any costs of dealing therewith, which the Board may order the person lodging the same to pay. The Board shall, upon an application being so lodged, as soon as practicable thereafter, appraise the capital or annual value, as the case may require, of the improvements.

275.

275. The foregoing provisions shall not require the Board to appraise the value of the improvements in any case where it recommends that the application under consideration be refused. Where the Board appraises the value of the improvements and makes an order for the payment thereof against an applicant, the said appraisal and order shall have no effect if the purchase or lease applied for is subsequently disallowed or refused, but otherwise shall be valid and effectual to all intents and purposes.

276. In any case where the Board appraises the value of improvements it may at the same time give permission to remove improvements which are of a removable nature. But a person having ownership or tenant-right in improvements shall be entitled to have the value appraised of such of them as he does not desire to remove. The Board in giving permission to remove improvements shall specify the period within which the removal shall be effected.

277. The Board on appraising the capital or annual value of any improvements, whether the property of the Crown or of a private person, shall, subject to any provisions in that behalf contained in the existing Acts and these Regulations, fix the dates, and specify the amounts, at and by which payment of such value is to be made.

278. Payment of the appraised value of any improvements which are the property of the Crown, shall be made to the Land Agent or the Colonial Treasurer.

279. The Board shall require from any person claiming to be entitled to receive payment of the value of improvements proof that he is so entitled; but a person may prove that he is entitled to receive payment of the value of improvements, although the value of such improvements has been appraised as being the property of some other person or of the Crown; and on such proof being given the Board may cancel or vary any former order made in respect thereof.

280. In any case where the value of improvements requires to be determined or appraised, and no other provision in that behalf is made in these regulations, the Minister may refer the matter to the Board, and the Board shall proceed to determine or appraise such value.

281. The Minister may direct an estimate to be made of the value of any improvements on lands which he proposes to sell by auction or to let under lease by auction or by tender. Before any such auction is held or tender called for, notice of such estimated value shall be given.

282. Every application to remit or refund to the owner or maker thereof the value of improvements on any land sold by auction or otherwise, or let under lease or license, shall be sent to the Under Secretary in the Form 75. The application shall contain a list of the improvements and of their estimated values, together with a short statement of the grounds on which the application is made.

RESUMPTIONS AND WITHDRAWALS.

283. Before determining travelling stock routes or camping-places within any land held under lease or license, the Chairman shall cause to be posted in a conspicuous manner outside the Head Office of the Board particulars of the proposed routes or camping-places, and shall in like manner cause to be posted outside the office of the Land Agent or Agents, in whose district or districts the proposed routes or camping-places may be, a map or sketch showing the position of the proposed routes or camping-places, and a notice specifying a time, not being less than fourteen days from the date thereof, within which objections in writing may be lodged with the Chairman; and the Chairman shall appoint a time and place at which the Board shall hear in open Court all persons who have lodged objections within the time mentioned, and the Board shall thereafter make a report to the Minister.

284. Before any resumption from any lands conditionally purchased or conditionally or otherwise leased or held in fee-simple is made for the purpose of opening a road, canal, or cutting for irrigation purpose, the Minister may cause to be posted in a conspicuous manner outside the Head Office of the Board particulars of the proposed resumption, and may in like manner cause to be posted outside the office of the Land Agent or Agents in whose district or districts the proposed road, canal, or cutting may be, a map or sketch showing the position thereof and a notice specifying a time, not being less than one month from the date thereof, within which objections in writing may be lodged with the Minister; and the Minister may, if he think fit, direct the Board to hold an inquiry as to any proposed resumption. The Board in any such case shall hear in open Court all persons who have lodged objections within the time specified as aforesaid, and shall thereafter make a report to the Minister.

285. Any person who desires that the Crown shall acquire land, either by way of purchase or exchange, for the purpose of access or approaches to any natural water tank or dam, or for a road or travelling stock route, or camping reserve or watering-place, or for any like public purpose, may submit written proposals and particulars to the Minister, accompanied by a deposit of £5 5s. to cover the cost of report; and the Minister may thereafter refer the proposals to the Board to the end that an inquiry may be held and a report made.

286. The Chairman, upon a reference by the Minister, shall transmit to the District Surveyor for report any proposals so referred, which involve an exchange; and on the receipt of the report and before such inquiry is held, shall cause a plan or tracing illustrating any proposed exchange, to be exhibited at the Office of the Land Agent for a period of not less than one month; and shall also notify in the *Gazette* and in a local newspaper particulars of any proposed exchange. The Board shall hold an inquiry as to any proposals, so referred, and make a report to the Minister.

287. Any person claiming to be entitled under section 111 of the Act of 1884 to a road of access may make a written application therefor to the Chairman, accompanied by a deposit of £5 to cover the costs for survey and dealing with the application, and shall with his application submit a rough sketch of the locality and of the proposed road. The Chairman may order any report from the District Surveyor or otherwise which he may deem necessary, and the Board shall thereafter proceed to deal with the matter in open Court.

288. When an application is made that a road may be opened for public use, the Minister may require a deposit of not less than £2 to be paid by the applicants to the Colonial Treasurer before any inquiry into the application is authorised; and unless in the opinion of the Minister the application was made *bonâ fide* in the public interest, and on sufficiently reasonable grounds, such deposit may be retained.

289. An application for compensation upon any lands being withdrawn from any lease under the provisions of the Act of 1884 may be made on Form 76 to the Under Secretary, and shall supply particulars of such lands and improvements, and of the dates when the improvements were made.

290. Upon the resumption under the provisions of section 42 of the Act of 1889, of any land, the Minister may by letter call on the person from whose land any such resumption has been made to elect, and within one month to inform the Minister in what manner he elects to have compensation, if any required, made to him; and in default of such election being made or information thereof being given, the Minister may proceed to grant compensation in any manner he may think just.

291. The Minister may, after the expiration of the month aforesaid, refer to the Board any matter arising in connection with the resumption and the granting of compensation therefor, and to that end may direct the Board to appraise the respective values of any land so resumed, and of any land proposed to be granted, allotted, or leased in exchange, or to determine what lands are a fair equivalent for any land so resumed.

292. If no such reference is made by the Minister within three months, the person, out of whose land the resumption has been made, may at any time apply to the Board to appraise the value of any land so resumed.

293. On any reference or application as aforesaid the Chairman shall appoint a time and place for the Board to deal therewith, and the Board shall in due course proceed to deal therewith, and to report its decisions to the Minister.

EXCHANGES.

294. An application for the grant of Crown lands in exchange for any land in respect of which a grant has been issued, or may be called for, or in respect of which the only condition not fulfilled is that of payment of balance of purchase money, shall be made by the holder of the lands offered for surrender in exchange in the Form 77, and shall be sent to the Under Secretary. The application may include any number of portions, and shall supply such particulars of the lands affected and of the improvements thereon as are required by the form.

The application shall be accompanied by a receipt showing that a provisional survey fee, and a deposit of £10 towards any other costs which may be incurred, have been paid to the Colonial Treasurer.

295. The provisional survey fee to be paid with any such application as aforesaid shall be calculated on the aggregate area applied for in exchange, irrespective of whether the land is measured or unmeasured, according to the following scale, that is to say :—

	£	s.	d.
For any area not exceeding 40 acres	4	0	0
For every additional 5 acres or fraction of 5 acres up to 80 acres	0	2	6
For 80 acres	5	0	0
For every additional 10 acres or fraction of 10 acres up to 320 acres	0	2	6
For 320 acres	8	0	0
For every additional 15 acres or fraction of 15 acres up to 640 acres	0	2	6
For 640 acres	10	15	0
For every additional 20 acres or fraction of 20 acres up to 1,280 acres	0	2	6
For 1,280 acres	14	15	0
For every additional 40 acres or fraction of 40 acres up to 2,560 acres	0	2	6
For 2,560 acres	18	15	0
For every additional 100 acres or fraction of 100 acres up to 5,000 acres	0	5	0
For 5,000 acres	25	0	0
For every additional 500 acres or fraction of 500 acres up to 1,000 acres	1	0	0
For 10,000 acres	35	0	0
For every additional 1,000 acres or fraction of 1,000 acres up to 50,000 acres	1	0	0
For 50,000 acres	75	0	0
For every additional 1,000 acres or fraction of 1,000 acres up to 100,000 acres	0	15	0
For 100,000 acres	112	10	0
For every additional 1,000 acres	0	10	0

296. The Crown lands to be granted in exchange for surrendered lands may be granted in one or more blocks, and each such block shall, as far as possible, be subject to the same limitations as to frontage and measurement as apply to conditional purchases.

297. Where one or more conditional purchases are offered for surrender, the Crown lands allotted in exchange may be allotted for such conditional purchases jointly and in one or more blocks, and in any such case payments, due to the Crown in respect of each and all of such conditional purchases shall continue to be made, as if no surrender had been accepted; and where default is made in any payment in respect of any conditional purchase, the Governor may, out of the lands allotted in exchange for that and other conditional purchases jointly, forfeit any lands which appear to him to be equal in area and value to the lands formerly held under the conditional purchase in respect of which the default has occurred; and for that purpose any person authorised by the Minister may enter upon the lands so allotted, and do all such acts and things as may be necessary to set out the lands proposed to be forfeited in any such case as aforesaid.

298. The Minister may direct an inquiry to be held and a report and recommendation to be made by the Board in connection with any application for exchange; and no proposal for an exchange shall be carried out until such inquiry has been held and report and recommendation obtained, and unless the values of all lands to be surrendered or allotted in the exchange have been determined by the Board.

299. Any application may be withdrawn by the applicant, or refused by the Minister, or, with the consent of the applicant, may be modified by the Minister.

300. Upon any application being approved by the Minister, the applicant shall pay the excess value as appraised of any area to be granted in the exchange, and, if so required, the value of any improvements thereon which are not his property. The Minister may, before or after the approval of any application, call upon the applicant to produce any grants, certificates, or other evidences of title of or to the land proposed to be surrendered, and an instrument of surrender shall be executed in Form 14.

301. No grant shall be issued in exchange until all purchase moneys, costs, fees, and duties in connection with the surrendered lands and the application and such grant have been paid.

302. In the case of any application or proposal made, before June 1st, 1895, for the exchange of lands in the Eastern Division, and not refused on its merits or withdrawn, the applicant or his successor in title shall, if he desires the same to be revived, signify in writing before September 1st, 1895, his willingness to proceed with the application.

TRANSFERS.

TRANSFERS.

303 Transfers of conditional purchases, and of conditional leases and rights of conditional lease held in virtue thereof, shall be made in Form 78. The said form and a copy on parchment for registration may be obtained at each Land Office on a payment of a fee of 2s. 6d.

304. All certificates of confirmation or conformity which have been ordered to be issued to the transferor shall, at the time of making the transfer, be handed by him to the transferee; and such certificates shall not pass by delivery otherwise than by delivery to a person taking by a duly executed transfer or by operation of law.

305. All leases of Crown lands and all occupation licenses may, unless otherwise provided in the existing acts, be transferred in the manner hereinafter set forth: Provided that the transferee shall take lease or license subject to all conditions not fulfilled at the time of the transfer, and to all forfeitures accrued.

306. Transfers of occupation licenses and of leases other than conditional leases shall be made in Form 79. But in any case where a conditional lease is held in virtue of granted lands, and the said lands are transferred by a transfer under the Real Property Act, a transfer of the said conditional lease in the said Form 79 shall also be made.

307. Every transfer shall be signed by the transferor and transferee, and such signature shall, except as in the next Regulation provided, be attested by a barrister, attorney, notary public, Justice of the Peace, Commissioner for Affidavits, or Land Agent.

308. If the transferor or transferee is a marksman, his signature shall be attested by a barrister, attorney, notary public, or Justice of the Peace, who shall endorse on the transfer a certificate that the same was previously read over and explained to such marksman, and that he acknowledged and appeared fully to understand the effect thereof. If such certificate is given by an attorney, in his capacity of attorney, Justice of the Peace, or notary public, a further certificate shall be attached to the effect that the witness was not employed to prepare the transfer.

309. Transfers of conditional purchases, and of conditional, homestead, residential, or annual leases shall be lodged with the Land Agent. Transfers of occupation licenses, and of all leases, other than as aforesaid, shall be lodged with the Under Secretary.

310. A fee of £2 shall be paid for every transfer of a pastoral, homestead, or scrub lease, or of a lease of snow lands, and of £1 for every transfer of an occupation license or of a lease other than as aforesaid or than a conditional lease.

311. When any transfer is duly lodged with the Land Agent, he shall record the same, and forthwith forward the said transfer and copy, if any, to the Under Secretary for Lands in Sydney, and if the transfer refers to any conditional purchase applied for after January 1st, 1885, shall notify the same to the Board.

312. When any transfer is lodged, any required certificate or declaration shall also be lodged therewith. With any transfer of a conditional purchase a copy thereof for registration, and a sum of 7s. 6d. to cover the cost of registering the same in the General Office for the Registration of Deeds shall also be lodged. The stamp duty shall also be paid to the Land Agent at the same time.

313. Where a transfer is made by a married woman, who is not empowered to transfer as if she were a *femme sole*, her husband's consent must appear on the transfer, and the certificate of acknowledgment required by the Registration of Deeds Act (7 Vic. No. 16), section 16, and set forth in the Schedule thereto, shall be furnished, and the fee of 10s. shall be paid to the Land Agent at the time of lodgment of transfer.

314. Any person who is entitled to hold a conditional purchase or conditional or homestead lease as the representative of a purchaser or lessee who has died or been declared a lunatic, or become an insane patient, may procure himself to be registered as the holder thereof whether in a representative capacity or otherwise by forwarding an application to the Under Secretary, accompanied by the certificate from the Crown Solicitor that he is entitled to be so registered.

315. In any case of transfer (whether of a purchase, lease, or license) by any person who is not the registered holder thereof, a certificate from the Crown Solicitor that he is entitled to transfer the land shall be lodged with the transfer.

316. The transfer by way of mortgage or security of a homestead lease before the expiration of the prescribed term of residence shall be in the Form 80; and when any such transfer is lodged, a statutory declaration shall be lodged therewith, showing that such transfer is *bona fide* by way of mortgage, and also what and whose moneys are intended to be secured thereby, and what portion of such moneys has already been advanced, and what pastoral leases or other homestead leases are held by the transferee; and such other particulars as the Minister may require.

317. Any person holding a homestead lease in virtue of any such transfer as aforesaid, and desiring, before the expiration of the prescribed term of residence, to transfer his mortgage over the homestead lease, may do so by executing a transfer of mortgage in Form 81, and with such transfer of mortgage shall be lodged a statutory declaration by the transferor of the mortgage, setting forth that the said transfer is *bona fide*, and giving particulars of the advances which have already been made under the mortgage, and of the sums which still remain due thereunder; and the Minister may also require the proposed transferee of the mortgage to make and lodge a statutory declaration, giving such particulars in connection with the transfer as he may see fit to require. It shall be in the discretion of the Minister to allow or refuse to allow any such transfer of mortgage to be registered, and any registration obtained by the fraud of either the transferor or transferee may be cancelled after notice has been given to the parties concerned.

318. Every holder of a pastoral lease who proposes to be registered as the holder of a homestead lease, and every holder of a homestead lease who proposes to be registered as the holder of another homestead lease, and every holder of a homestead lease who proposes to be registered as the holder of a pastoral lease, shall, with his transfer, lodge a statutory declaration, showing whether such transfer is by way of mortgage or not; and if it be by way of mortgage, what and whose moneys are intended to be secured thereby, and what portion of such moneys has already been advanced. The Minister may in any case require full particulars to be furnished and verified by statutory declaration as to all other pastoral and homestead leases held by the intending transferee, and as to all mortgages affecting such leases. It shall be in the discretion of the Minister to allow or refuse to allow any such transfer to be registered, and any registration obtained by fraud may be cancelled after notice has been given to the parties concerned.

319. With every transfer of a pastoral lease (not being by way of mortgage, release of mortgage, or transfer of mortgage) the transferee shall lodge a statutory declaration, stating whether he holds, or causes to be held on his behalf, any homestead lease otherwise than by way of mortgage. With

With every transfer of a homestead lease (not being by way of mortgage, release of mortgage, or transfer of mortgage) the transferee shall lodge a statutory declaration, stating whether he holds, or causes to be held on his behalf, any pastoral lease or any other homestead lease otherwise than by way of mortgage.

320. No transfer shall be registered or recognised if any rent, payment, or other dues to the Crown are in arrear, or unless executed and lodged in manner hereinbefore provided, and appearing to be otherwise unobjectionable. Any such lodgment of a transfer as aforesaid shall be a sufficient notification thereof within the meaning of section 117 of the Act of 1884.

321. The Minister may refer any transfer back to the Land Agent or to the parties for the purpose of having the same corrected or amended, and may refuse to admit any transfer to registration unless satisfied by statutory declaration or otherwise of any facts in connection therewith or on which the validity of the same may appear to depend.

322. When a Crown lease has been issued to a pastoral or homestead lessee, the fact of such issue shall be entered in the register at the Department of Lands, and no transfer of the lessee's interest shall thereafter be recognised or recorded, unless the said Crown lease is lodged with the transfer for the purpose of being endorsed with a memorial of the transfer.

PERMISSIONS TO RINGBARK.

323. Any person desirous of ringbarking trees on Crown lands held by him under lease or license may apply on Form 82. The application shall be addressed to the Land Agent, and be accompanied by a sketch of the locality, and by a fee of £2 for an area not exceeding 1,920 acres, £3 for an area not exceeding 5,120 acres, £4 for an area not exceeding 10,240 acres, and £5 for any area in excess of 10,240 acres. No person shall be entitled to a refund of such fee, except in any case where the application is allowed to be wholly withdrawn, and no expense is incurred.

324. No application or permission shall be necessary to ringbark on lands held under conditional lease unless included within a reserve; and any lessee or licensee may, without permission, destroy any of the following scrubs:—Mallee, Yarran, Warrya, Pine, Belar, Bull Oak, Brigalow, Flooded Box or Coolabah, Turpentine-bush, Briar, Blackthorn, Needle-bush, Sifting-bush, Budtha or Rosewood, Dogwood, Ti-tree, Black Wattle, or Green Wattle, or any scrub described as noxious in his official report by any surveyor, inspector, or appraiser, who may have visited the land. For the purpose of this Regulation, scrub as mentioned above shall include any tree or shrub having a diameter less than 12 inches, or a circumference less than 36 inches at 4 feet from the ground.

325. The Board may, at any time, upon giving due notice to the lessee or licensee to whom permission to ringbark has been granted, inquire whether the conditions imposed in the permission are being fulfilled; and if the Board be satisfied that such conditions are not being fulfilled, it may withdraw the permission.

326. A permit to ringbark shall be in the Form 83, and shall specify the period during which it is to remain in force, and every person engaged in ringbarking shall hold a permit or an authority in writing from the lessee or licensee holding a permit as aforesaid.

APPLICATIONS TO WORK MINERALS.—PAYMENT OF ROYALTY ON COAL, &c.

327. If any owner of land which has been alienated subject to any minerals therein being reserved to the Crown shall desire to dig, mine for, win, or remove any mineral other than gold, silver, lead, tin, and antimony, he shall make application to the Secretary for Mines in the Form 84 for a permit to do so; and if after inquiry the Secretary for Mines shall recommend that such application be granted either as made or in a modified form, the Governor may grant a permit in Form 85, subject to the following conditions, and to such other conditions as shall according to the circumstances of each case appear to the Governor proper:—

- (1.) The owner shall keep a book in which shall be forthwith entered the quantity and value of the minerals raised from his land; and such book shall at all times during each working day be open to the inspection of the Inspector of Mines or any other officer duly authorised by the Secretary for Mines; and the owner shall render such Inspector or officer every assistance in making such inspection.
- (2.) Within the first seven days of the months of January, April, July, and October of each year, the owner, or his duly authorised agent or manager, shall forward to the Secretary for Mines a return setting out the quantity and value of the minerals raised during the preceding quarter, together with a statutory declaration verifying such return, and declaring that the quantity and value of all the mineral raised from the land during the preceding quarter has been correctly entered in the said book under the proper dates, and has been included in such return.
- (3.) With each such return the owner shall pay or cause to be paid royalty upon the mineral raised, computed at the following rates:—For coal, sixpence per ton; for minerals other than gold, silver, lead, tin, and antimony, two pounds ten shillings per centum of the market value thereof at the pit-mouth, and such value may be ascertained and determined as the Secretary for Mines shall in each case direct.
- (4.) All surface and underground works shall at all times during each working day be open to inspection, survey, or measurement by the Inspector of Mines, or any other Officer of the Department of Mines duly authorised by the Secretary for Mines; and such Inspector or Officer may use all apparatus or appliances ordinarily used at the mine for the purpose of descending or ascending any pit or other excavation; and the owner shall render every such Inspector or Officer all necessary assistance to enable him to make a complete inspection, survey, or measurement of such mine.
- (5.) The Secretary for Mines may cause to be made at any time an inspection of the book aforesaid, or an inspection, survey, or measurement of the mine, for the purpose of checking any such statement as aforesaid or any entry in the book or for any other purpose.
- (6.) If the owner shall make a false return of the mineral or minerals raised from the land, or shall fail, neglect, or refuse to pay royalty upon the mineral raised, according to the foregoing scale, or shall obstruct or refuse to assist any Inspector or other Officer in making an inspection of the books or of the mine, the Governor may suspend for a time or absolutely cancel the permit granted to such owner, and the right of such owner to remove mineral from such land shall cease during such suspension, or after such cancellation, as the case may be.

328. It shall be lawful for the Governor, upon the recommendation of the Secretary for Mines and Agriculture, to exempt any mine or class of mines (other than coal mines) from the payment of the royalties prescribed in the last preceding Regulation, or to suspend the payment of such royalties in respect of the minerals (other than coal) raised from any mine or class of mines for any given period, or to alter the rate at which such royalty shall, during any given period, be computed in respect of any mineral (other than coal) raised at any mine or class of mines.

329. The royalty payable on coal raised from land demised on and after the 1st January, 1885, shall be paid at the times and in the manner prescribed by the Regulations in force for the time-being relating to mineral leases.

MISCELLANEOUS.

330. Any claim of contribution towards the cost of erecting or maintaining any fence, or any dispute or question as to the erection, completion, or repair of any fence, may be brought before the Board for adjudication or settlement by lodging with the Chairman a notice in Form 86, or as near thereto as the circumstances of the case permit, and such notice shall state what other parties are concerned in the matter in question. A copy of such notice shall within seven days from the lodgment thereof be served by the moving parties upon such other parties. Any order made by the Board on finally disposing of any such matter shall be drawn up on the proper form, if any, or otherwise in writing.

331. Where any person aggrieved by any total or partial inclosing of a road or watercourse has lodged a complaint in manner hereinbefore provided, the Board may on the hearing thereof, if satisfied as to the merits of such complaint, cancel any permission granted in that regard and may make an order for the removal of any gate, fence, or other structure erected in pursuance of such permission.

332. Whenever land intruded upon within the meaning of the 131st and 133rd sections of the Act of 1884 is not under lease or license, the proper officer shall proceed against the trespasser; but the Minister may empower and authorise any lessee or other lawful holder whose holding has been intruded on as aforesaid, to prefer an information or otherwise proceed against the offender.

333. For the purposes of survey under the Crown Lands Acts, it shall be lawful for any duly authorised surveyor, with his assistants, to enter upon any Crown land of any leasehold tenure, to trace and determine the boundaries of any area or areas which may become the subject of inquiry, application, or measurement; and to mark and fell trees, to open and remove fences, and do all acts which may be necessary for such purpose as aforesaid: Provided that no unnecessary damage shall be done, and that all damage shall, as far as practicable, be repaired. And any person wilfully obstructing any surveyor in the exercise of the powers hereby conferred, or wilfully removing or defacing any survey mark, shall be liable to a penalty not exceeding ten pounds.

334. The forms to be used for the transaction of all matters referred to in the existing Acts or in these regulations, shall be those published by authority and at the Government Printing Office. None other shall be recognised or accepted. And whenever the "proper form" is mentioned in these regulations the words shall be taken to refer to the form appropriated to the purpose in question and published as aforesaid. Provided that in any case where the Forms prescribed by these regulations have not been received at the proper offices, the Forms previously in use may be used until June 8th, 1895, or until the receipt of the proper Forms, whichever shall first happen.

335. At the time of completion of any purchase a fee of £1 shall be payable for each deed of grant from the Crown; the like fee shall be payable for each Crown lease issued to a pastoral or homestead lessee; and no deed shall be delivered until the said fee, together with the stamp duty, if any, has been paid. Deeds may be delivered at the Registrar-General's Office, Sydney, to the grantee or lessee or to any person holding his written order duly attested by a Justice of the Peace, Commissioner for Affidavits, or Notary Public, or on the application of the grantee or lessee shall be transmitted to any Land Agent for delivery.

Register Book, Vol. Fol. .

NEW SOUTH WALES.

*Homestead Grant.*

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth:—

TO ALL to whom these presents shall come, Greeting:—

WHEREAS in conformity with the Crown Lands Act of 1895, the Block of Crown Lands, in our Colony of New South Wales, which is hereinafter described, was, on the day of in the year 18 , applied for as a Homestead Selection by

of AND WHEREAS all things required by law have been done to enable a Homestead Grant of the said Block to be made, in manner hereinafter appearing: NOW KNOW YE, that We, for Us, Our Heirs and Successors, do hereby Grant unto the said

h Heirs and Assigns, subject to the several and respective Provisoes, Exceptions, Reservations, Obligations, and Conditions hereinafter set forth, ALL THAT piece or parcel of land in Our said Colony, containing by Admeasurement be the same

more or less, situated in the County of and Parish of

COMMENCING

As shown on the Plan in the margin hereof, being Block No. , notified as available for selection in the *Government Gazette* of the day of 18 , with all the Rights and Appurtenances whatsoever thereto belonging: TO HOLD

unto the said h Heirs and Assigns for ever, to the intents and subject to the Obligations hereinafter limited and contained, That is to say, that the said

 , h Heirs and Assigns, shall live upon the lands hereinbefore expressed to be hereby granted, having his or their respective homes and places of abode thereon, and shall pay for the said lands an annual quit-rent of two and one-half per centum of the capital value thereof, as

the same may, from time to time, be determined in due course of law, paying the said quit-rent to Our Colonial Treasurer, or such other Officer in our said Colony as may from time to time be appointed for that purpose, at such date or dates in each year as may from time to time be duly prescribed: AND it is hereby expressly declared that if the said

h Heirs and Assigns, do not live upon the said lands and pay the quit-rent in manner hereinbefore required, that then and in any such case it shall be lawful for the Governor for the time-being of Our said Colony to declare the said lands to be forfeit to Us, Our Heirs and Successors: Whereupon these presents shall become void and of no effect. AND FURTHER, that if the said

, h Heirs and Assigns, do not duly pay the quit-rent in manner hereinbefore required, it shall be lawful for the Governor for the time-being of Our said Colony, by an Officer duly authorized for that purpose, to enter into and distrain upon the said lands, and to dispose according to law of the distress and distresses then and there found, to the intent that thereby or otherwise the said quit-rent and every part thereof so unpaid, and all costs and expenses occasioned by the non-payment thereof may be paid and satisfied: PROVIDED NEVERTHELESS AND IT IS HEREBY DECLARED that these presents are made upon and subject to the condition that if at any time the said lands shall be found to contain any Minerals, as defined in the Mining Act of 1889, the Governor for the time being of Our said Colony may thereupon cancel, wholly or in part, the Grant of the said lands, upon the terms and in the manner in the said Act provided: And upon notification of such Cancellation the said lands, or so much thereof as may be included in the said notification, shall thereupon revert to Us, Our Heirs and Successors, and this Our Grant shall, to the extent aforesaid, cease to operate or to have effect: PROVIDED ALSO, and we do hereby reserve unto Us, Our Heirs and Successors, all such Minerals as aforesaid, which may be contained in or under the said lands, together with full power and authority for Us, Our Heirs and Successors, and such person or persons as may from time to time be authorized by Us, Our Heirs and Successors, or by the Governor for the time-being of Our said Colony, or otherwise, in accordance with the Acts for the time-being in force for the regulation of Mining within Our said Colony, to enter upon the said land, and to search for, mine, dig, and remove the said Minerals, with full right of ingress, egress, and regress, for the purposes aforesaid: PROVIDED ALSO, AND WE DO HEREBY FURTHER EXCEPT AND RESERVE unto Us, Our Heirs and Successors, all such parts and so much of the said land as may hereafter be required for a Public Way, or Public Ways, Canals, or Railroads, in, over, and through the same, to be set out by Our Governor for the time-being of Our said Colony, or some person by him authorised in that respect; AND ALSO all Sand, Clay, Stone, Gravel, and Indigenous Timber, and all other Materials, the natural produce of the said land, which may be required at any time or times hereafter by the Government of Our said Colony, for the construction and repair of any Public Ways, Bridges, or Canals, or for Naval purposes, or Railroads, or any Fences, Embankments, Dams, Sewers, or Drains necessary for the same, together with the right of taking and removing all such Materials; AND ALSO the right to enter upon the said lands for the purpose of inspecting the same, or surveying the same, or any adjoining lands; AND ALSO the right of full and free ingress, egress, and regress, into, out of, and upon the said land, for the several purposes aforesaid, or any of them: IN TESTIMONY WHEREOF, We have caused this Our Grant to be Sealed with the Seal of Our said Colony.

*Certificate by the Secretary for Lands that the Obligations of a
Homestead Grant have been fulfilled.*

IN pursuance of Section 17 of the Crown Lands Act of 1895, I hereby certify that all the obligations of the Homestead Grant, executed on the day of _____, and Registered Vol. _____ Fol. _____ of the land mentioned hereunder, have been duly fulfilled up to the date hereof.

Crown Lands Acts.

VICTORIA, by the Grace of God, of the United
Kingdom of Great Britain and Ireland
Queen, Defender of the Faith, and so
forth :—

To all to whom these Presents shall come,

GREETING :—

WHEREAS WE, for Us, Our Heirs and Successors, have promised,
engaged, and contracted to grant a Lease
of the available Crown Lands which may from time to time be con-
tained within the holding hereinafter described in manner hereinafter
appearing : AND WHEREAS
of

in Our Colony of New South Wales, being entitled to the said lease of
such Crown Lands, has required the issue of these Presents in
testimony thereof, and has paid a fee of £1 upon and for the same :
NOW KNOW YE, that in consideration of the promise of the said
to pay the rent
which may from time to time be payable, and to perform all other
conditions, duties, and obligations which may from time to time
attach or be attached to the said lease under and in virtue of the
requirements of the Crown Lands Acts and the general provisions of
the law in that behalf, to

and in pursuance of such promise,
engagement, and contract, as aforesaid, WE DO HEREBY GRANT unto
the said

his executors, administrators, and lawful assigns, a
Lease of the Crown Lands which may, from time to time, be contained
within the holding described in the Schedule hereto annexed, and be
available for the purpose of such lease, upon such conditions as to the
payment of rent or otherwise, and for such term as from time to
time may have been, or may hereafter be, enacted, defined, and
prescribed by the "Crown Lands Act of 1884," the "Crown Lands
Act of 1889," or the "Crown Lands Act of 1895," or any Act amend-
ing or replacing the same, and by any Regulations made under any
such Act : PROVIDED ALWAYS that these Presents shall only
operate subject to the said Acts and Regulations, and shall not

extend the said term, or fix any fresh date for the commencement thereof, or vary or affect any statutory or other right of the Crown or any statutory or other liability, duty, or obligation of the said

his executors, administrators, and lawful assigns, or exempt the said holding or any of the said lands from continuing to be, or from becoming subject to the operation of any power, incident, or condition, to which it or they may now be or may hereafter become subject in virtue of any such provisions of the said Acts and Regulations or any of them as may apply or extend to holdings or lands under

Lease. AND

FURTHER PROVIDED that any forfeiture, liability, duty, or obligation already incurred, or that may hereafter be incurred, in respect of the said holding may be enforced or enacted as if these Presents had never been issued, and that all usual, proper, and reasonable covenants between Us, Our Heirs and Successors, and the said

his executors, administrators, and lawful assigns, shall be deemed to be implied herein, and that these Presents shall only operate as if all such covenants as aforesaid were included herein, and the said

had duly executed the same.

IN TESTIMONY whereof I have hereunto set my Hand and affixed the Seal of the Colony of New South Wales, at Government House, Sydney, in the said Colony, this day of , 18 .

THE SCHEDULE HEREINBEFORE REFERRED TO:—

RECEIVED into the Office of the Registrar General, at Sydney, this _____ day of _____, A.D. 18 _____, at _____ o'clock in the _____ noon, from _____ of Sydney, a copy of the within Transfer, verified by _____ of _____ and numbered _____ Book.

Registrar General.

EXTRACTS FROM REGULATIONS AS TO TRANSFERS.

Transfers of conditional purchases, and of conditional leases and rights of conditional lease held in virtue thereof, shall be made in Form 78. The said form and a copy on parchment for registration may be obtained at each Land Office on payment of a fee of 2s. 6d.

All certificates of confirmation or conformity which have been ordered to be issued to the transferor shall, at the time of making the transfer, be handed by him to the transferee; and such certificates shall not pass by delivery otherwise than by delivery to a person taking by a duly executed transfer or by operation of law.

Every transfer shall be signed by the transferor and transferee, and such signature shall, except as in the next regulation provided, be attested by a barrister, attorney, notary public, Justice of the Peace, Commissioner for Affidavits, or Land Agent.

If the transferor or transferee is a marksman, his signature shall be attested by a barrister, attorney, notary public, or Justice of the Peace, who shall endorse on the transfer a certificate that the same was previously read over and explained to such marksman, and that he acknowledged and appeared fully to understand the effect thereof. If such certificate is given by an attorney, in his capacity of attorney, Justice of the peace, or notary Public, a further certificate shall be attached to the effect that the witness was not employed to prepare the transfer.

Transfers of conditional purchases, and of conditional, homestead, residential, or annual leases shall be lodged with the Land Agent. Transfers of occupation licenses and of all leases, other than as aforesaid, shall be lodged with the Under Secretary.

When any transfer is duly lodged with the Land Agent, he shall record the same, and forthwith forward the said transfer and copy, if any, to the Under Secretary for Lands in Sydney, and, if the transfer refers to any conditional purchase applied for after January 1st, 1885, shall notify the same to the Board.

When any transfer is lodged, any required certificate or declaration shall also be lodged there-

with. With any transfer of a conditional purchase a copy thereof for registration, and a sum of 7s. 6d. to cover the cost of registering the same in the General Office for the Registration of Deeds shall also be lodged. The stamp duty shall also be paid to the Land Agent at the same time.

Where a transfer is made by a married woman, who is not empowered to transfer as if she were a *femme sole*, her husband's consent must appear on the transfer, and the certificate of acknowledgment required by the Registration of Deeds Act (7 Vic. No. 16), section 16, and set forth in the Schedule thereto, shall be furnished, and the fee of 10s. shall be paid to the Land Agent at the time of lodgment of transfer.

In any case of transfer (whether of a purchase, lease, or license) by any person who is not the registered holder thereof, a certificate from the Crown Solicitor that he is entitled to transfer the land shall be lodged with the transfer.

No transfer shall be registered or recognised if any rent, payment, or other dues to the Crown are in arrear, or unless executed and lodged in manner hereinbefore provided, and appearing to be otherwise unobjectionable. Any such lodgment of a transfer as aforesaid shall be a sufficient notification thereof within the meaning of section 117 of the Act of 1884.

The Minister may refer any transfer back to the Land Agent or to the parties for the purpose of having the same corrected or amended, and may refuse to admit any transfer to registration unless satisfied by statutory declaration or otherwise of any facts in connection therewith or on which the validity of the same may appear to depend.

Any person who is entitled to hold a conditional purchase or conditional or homestead lease as the representative of a purchaser or lessee who has died or been declared a lunatic, or become an insane patient, may procure himself to be registered as the holder thereof whether in a representative capacity or otherwise by forwarding an application to the Under Secretary, accompanied by the certificate from the Crown Solicitor that he is entitled to be so registered.

NEW SOUTH WALES.

CROWN LANDS ACTS.

(SUBSTITUTION OF REGULATION NO. 178 FOR THAT AT PRESENT IN FORCE BEARING THE SAME NUMBER.)

Presented to Parliament, pursuant to Acts 48 Vic. No. 18 and 53 Vic. No. 21.

Department of Lands, Sydney, 7 August, 1894.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following new Regulation, No. 178, being substituted for that at present in force bearing the same number under the Crown Lands Acts.

[Ml. 94-7,167]

J. H. CARRUTHERS.

178. Whenever it is necessary for the purposes of the existing Acts that any rent or fee be appraised, and no time is fixed or indicated by these Regulations for the appraisal thereof, the Minister may direct the Board to appraise the same.

1894.
(SECOND SESSION.)

NEW SOUTH WALES.

CROWN LANDS ACTS.

(SUBSTITUTION OF REGULATIONS NOS. 105 AND 106, FOR THOSE AT PRESENT IN FORCE BEARING THE SAME NUMBERS.)

Presented to Parliament pursuant to Acts 48 Vic. No. 18 and 53 Vic. No. 21.

Department of Lands, Sydney, 8 June, 1894.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Regulations Nos. 105 and 106 being substituted for those at present in force bearing the same numbers under the Crown Lands Acts.

[Ml. 94-4,949.]

HENRY COPELAND.

105. Every application to withdraw an application for extension as aforesaid shall be made on Form 34, and shall be sent by registered letter or delivered to the Under Secretary within thirty days after publication in the *Government Gazette* of a notification of the final decision on the application for extension. Such publication shall not be made in the *Gazette* until after any appeal or reference which may have been made to the Land Appeal Court shall have been dealt with.

106. Every application for an occupation license of lands of which the applicant's pastoral lease is about to expire shall be in Form 35, and shall be sent by registered letter or delivered to the Under Secretary, together with a provisional license fee at the rate required by section 33 of the Act of 1889, if in the Eastern Division, or if in the Central Division, at the same rate per section of 640 acres of the estimated area as may be payable for the area originally resumed, if the applicant shall occupy the same, but if not, then at the rate of £2 per section, calculated from the date of expiration of the pastoral lease to the 31st December of the same year.

If the lessee has not applied for an extension of the pastoral lease, the application for an occupation license as aforesaid shall be lodged not less than six months before the expiration of the lease.

If an extension of the lease has been applied for, a notification shall (after any appeal or reference which may have been made to the Land Appeal Court has been dealt with) be published in the *Gazette* of the final decision on the application for extension; and if such application shall be refused, the application for an occupation license shall be sent by registered letter or delivered to the Under Secretary (with the required license fee) within sixty days after such notification, or if the application for an extension shall be withdrawn, the application for an occupation license shall be sent or delivered within sixty days after the date of notice of withdrawal.

CROWN LANDS ACT.

(NOTIFICATION OF SUBSTITUTION OF AMENDED REGULATION, No. 15.)

Presented to Parliament, pursuant to Acts 48 Vic. No. 18 and 53 Vic. No. 21.

NOTIFICATION OF THE SUBSTITUTION OF AMENDED REGULATION, No. 15, FOR THAT AT PRESENT IN FORCE BEARING THE SAME NUMBER UNDER THE CROWN LANDS ACTS.

Department of Lands, Sydney, 22 February, 1895.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following amended Regulation, No. 15, being substituted for that at present in force bearing the same number under the Crown Lands Acts.

[Ml. 95-2,384]

J. H. CARRUTHERS.

15. The Land Offices shall be open to the public for the transaction of business between the hours of 10 a.m. and 1 p.m., and 1.45 and 4 p.m. on each of the business days of the week except Saturday, when the offices shall close at noon. The above hours shall be determined by "The Standard Time Act of 1894," 58 Vic. No. 11, and are hereinafter referred to as the office hours. The "Land Office day" shall be such as may be notified in the *Gazette* as the day upon which Land Agents shall attend at their Land Offices for the purpose of receiving applications for the sale or lease of Crown Lands. The offices shall be closed on all public holidays. The Land Agent shall on all occasions during office hours afford information and assistance to the public free of charge.

1894-5.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACTS, 1884-9.

(REGULATIONS FOR CUTTING TIMBER UNDER.)

Ordered by the Legislative Assembly to be printed, 2 April, 1895.

Department of Mines and Agriculture,
Sydney, 22nd March, 1895.

TIMBER AND QUARRY REGULATIONS.

The following Regulations for the issue of licenses and permits to cut timber, and for other purposes having been made by his Excellency the Lieutenant-Governor, with the advice of the Executive Council, under the "Crown Lands Act of 1884," and the "Crown Lands Act of 1889," respectively, are published in accordance with the requirements of the above-cited Acts.

These Regulations are in lieu of the existing Timber, State Forest, and Quarry Regulations, which said Regulations are repealed, but without prejudice to any existing licenses or permits.

[95-4,095]

SYDNEY SMITH.

REGULATIONS FOR CUTTING TIMBER ON CERTAIN CROWN LANDS.

1. Fuel, wood-cutters', and cedar licenses to cut and remove timber from Crown Lands may be obtained on application to a Land Agent, Clerk of Petty Sessions, or other person duly authorised by the Minister in that behalf.
2. The fee for a license authorising the holder to cut and remove any kind of timber (not exempted under Regulations Nos. 5 and 31) for fuel only, except cedar, beech, blackwood, Moreton Bay pine, silky oak, rosewood, red and black bean, and coachwood, shall be 20s. per annum, 5s. per quarter, or 2s. 6d. per month.
3. The fee for a wood-cutters' license to authorise the holder to cut and remove any kind of timber (not exempted by Regulations 5 and 31) except cedar, beech, blackwood, Moreton Bay pine, silky oak, rosewood, red and black bean, and coachwood, shall be £3 per annum, or 15s. per quarter, or 5s. per month.
4. The fee for a cedar license to authorise the holder to cut and remove cedar, beech, blackwood, Moreton Bay pine, silky oak, rosewood, red and black bean, and coachwood, as well as other timber not exempted by Regulation 31 shall be £6 per annum, or 10s. per month. No tree of the species named herein shall be felled of a less girth than that specified in Regulation No. 14, without special authority in writing from the Forester of the district.
5. Such licenses shall only be available for the districts named thereon; they shall be subject to the conditions of the General Regulations applying to timber licenses and permits as set forth in No. 23 and following Regulations; and they shall not authorise the licensee to cut or remove any timber or description of timber or trees, the cutting of which may be prohibited by notice in the Gazette, or to cut or remove timber or trees on any of the lands hereinafter described, viz.:—State forests, timber reserves, reserves for public recreation, or for sites for towns or villages, or permanently dedicated for any public purpose, lands within 1½ chains of any navigable river, or held under conditional lease, or special lease, or measured for sale, or within an enclosure of less than 200 acres, or within half a

mile of a head station. The holder of a conditional lease may, subject to the above Regulations, cut and remove timber from his leased land, if not within a state forest or timber reserve, or the holder of a license under these Regulations may, with the consent of the lessee cut and remove timber from any such conditional lease.

TIMBER RESERVES.

6. For the purposes of these Regulations, reserves for the preservation of timber supply may be classed as A, B, or C, by notification in the Gazette: Provided that until otherwise classed, reserves notified under the 39th section of the "Lands Acts Amendment Act of 1875" shall be held to be of Class C, and all other timber reserves of Class A. And further, provided the classification of any reserve may be altered from time to time, as may be deemed expedient.
7. In cases where it may be deemed necessary to alter the classification or close a timber reserve or portion thereof against timber-cutting, the Minister may demand the surrender of any license or permit authorising timber-cutting upon such land, and may authorise the refund of any fee paid in advance not exceeding an amount proportionate to the unexpired term of such right or license, or the permit or license may be transferred, on endorsement by the Forester in charge, to another reserve or to a portion of a reserve of the same class as that for which the permit or license was issued.

Regulations for cutting timber on timber reserves, Class A or B.

8. Lists showing the timber reserves, or portions of them, open to the operations of timber-cutters' licenses under Class A or Class B respectively, at a fixed fee, and without royalty, shall be exhibited at the Lands Office of the district in which such reserves are situated.

9. Timber-cutters' licenses, Class A, at a fee of £6 per annum, or 10s. for each month, and Class B licenses at £9 per annum, or 15s. for each month, may be obtained on application to the Land Agent of the district, to the Forest Department, Sydney, or to such other place as the Minister may appoint. Such licenses shall authorise the holder to enter upon any

timber reserve named thereon, to cut and remove trees above the minimum girth as specified in No. 14 of these Regulations, and not specially exempted from operation of such licenses or permits by notice in the Gazette or otherwise, and they shall be subject to the conditions of the General Regulations applying to timber licenses and permits as set forth in No. 23 and following Regulations.

Regulations for cutting timber under general saw-mill permits on timber reserves, Class C.

10. General permits, at a fee of £6 per annum, or 10s. per month, authorising the holder to employ a specified number of men may be obtained upon application to the Forest Department, Sydney. Such application may be forwarded through the Forester of the district, or, if there be no such Forester, through the Crown Lands Bailiff. Such permits will only be available for the reserves named thereon, and they may be restricted to a specified portion of a reserve, or to trees of a specified species. They shall be subject to Regulation No. 14, as to minimum girth of trees to be felled, and to the general conditions of the Regulations applying to timber licenses and permits as set forth in No. 23 and following Regulations.

11. Timber felled under general saw-mill permits shall, unless otherwise expressly ordered by the Minister, be subject to a royalty of not less than 3d. or more than 3s. per 100 superficial feet as may be decided by the Minister: Provided that when trees are suitable for splitting only the royalty may be charged at not less than 1s. 6d. per 100 cubic feet.

Payment of Royalty.

12. Returns of royalty due during each month shall, within seven days after the end of the month, be forwarded by the licensee to the Forester or other officer in charge, for verification; and the licensee, upon verification thereof, shall pay the amount due to the Forester within fourteen days, or within such extended time as may be allowed by the Minister; and no alleged inaccuracy shall be held an excuse for delaying such payment beyond the prescribed period, but any proved inaccuracy shall be taken into consideration in any subsequent account or a refund may be made of any approved overcharge. Timber shall not be removed from a reserve until the royalty be paid, unless it be removed to an authorised depôt.

13. Upon approval of the Minister, timber subjected to royalty may be removed to and stored for a specified time in an authorised depôt, provided it be marked with a distinctive brand registered with the Forester; and, further, provided that such timber shall at all times be open to the inspection of the Forester or other authorised officer, who shall have power to seize such timber should it be removed, or to detain it should he have reason to suspect that there is intention to remove it from such depôt before payment of royalty, or should any breach of the Regulations with respect to such timber be committed by the licensee.

Minimum girth of trees.

14. No trees within a timber reserve or on lands exempted under Regulations 5 and 31 unless permitted by special conditions of the license or by written authority of the Forester in charge, shall be felled of a less girth than that prescribed hereunder, but the Minister may at any time cancel any such written authority, or may alter the minimum girth at which any particular kind of timber may be felled.

The prescribed girth shall be as set forth hereunder, measured at a height of 5 feet from the ground, excepting ironbark, which shall be measured at 2 feet from the ground:—

TIMBERS.

Botanical name.	Local name.	Girth. ft. in.
<i>Araucaria Cunninghamii</i>	Hoop or Moreton Bay pine	7 6

<i>Tristania laurina</i>	Water gum.....	3 0

* West of Great Dividing Range, 4½ feet for Ironbark and 4 feet for stringybark.

Trees not named in this list may be cut at the minimum girth that may be endorsed on the license, or as specified in writing by the Forester in charge.

MISCELLANEOUS LICENSES AND PERMITS.

Timber for Piles, Mining Props, &c.

15. The Minister may grant to the holder of a permit or license permission to cut a specified number of piles or props, or to cut down and remove a specified number of trees, from any part of a timber reserve; and he may fix and prescribe the terms and conditions under which such cutting will be permitted.

Thinning-out Timber.

16. The Minister may, in any case where he deems it advisable, authorise the destruction of trees for the purpose of improving the growth of those remaining, and may fix the terms and conditions under which such trees may be cut down and removed.

Tree Permits.

17. On application to the Forest Department, Sydney, permits may be obtained, subject to these Regulations, for cutting and removing from a reserve a specified number and kind of trees on payment of a fee to be fixed according to the number and description of the trees, or the right to cut at a fixed rate per tree may be offered at auction: Provided that no such permit shall be issued for a less amount than 10s., and that the trees shall be felled and removed within the period named in such permit.

18. Such permits may be confined to certain portions of a reserve or to trees marked by a Forester. Every tree felled under such permits shall, if not marked by the forester, be branded or marked so that it may be recognised by the Forester. Such permits shall be subject generally to these Regulations, and shall not be transferable. If any person under colour of any such permit cut down more or other trees than those prescribed or marked, he shall be deemed guilty of an infringement of these Regulations and liable to the penalty prescribed in that behalf.

Village and other Reserves.

19. In cases where it may be advisable to permit the cutting of timber on reserves and other lands exempted under Regulations Nos. 5 and 31 and not comprised in timber reserves, the Minister may grant permission under such class of permits or licenses, and under such special conditions as he may think fit, and such permit or license shall be subject to these Regulations.

Regulations applying to Stripping Wattle-bark on Timber or other Reserves or Crown Lands.

20. Licenses to strip wattle-bark on timber or other reserves, or Crown Lands, or to strip the bark of such other trees as the Minister may permit to be stripped for tanning purposes on such lands, may be obtained on application to the Forest Department, Sydney, or at such other place as the Minister may appoint.

21. Such licenses shall ordinarily be in force from 1st September to 31st January following. They shall empower the holder to enter upon any lands named on the license, and shall be subject to these Regulations, excepting as to the stripping of bark. The fee shall not be less than 10s. nor more than 40s. per month. Bark stripped shall be subject to such royalty, if any, as the Minister may impose.

22. Excepting as otherwise provided in Regulation No. 4, no tree of less girth than 15 inches of the black or feather leaf species, nor less than 12 inches of the golden or broad leaf species of wattle, measured at 2 feet from the ground, shall be stripped; and the licensee will be required to thoroughly strip one tree before commencing another.

General provisions applying to Licenses and Permits.

23. A permit, license, or a certificate under Regulation No. 32, must be held by each person getting, felling, cutting, or removing timber, or in digging for and removing gravel, stone, clay, shells or other material on timber or other reserves, or Crown Lands; such permit, license, or certificate must be produced upon the demand of any Forester, Crown Lands Bailiff, police officer or other authorised person; and any person failing to produce such license or certificate will be liable to be proceeded against under these Regulations.

24. No tree shall be felled within a chain and a half of any navigable stream, unless such tree be previously marked for felling by a Forester or other person authorised in that behalf; and if any tree be felled in such a manner as to obstruct any road, track, or navigable stream, the Forester may cause such obstruction to be removed at the cost of the licensee, or of the person felling the tree, should he neglect or refuse to perform the work.

25. Any person felling timber shall mark, so that it may be readily recognised, the log and stump of each tree immediately it is felled, with the brand registered on the license, or with a distinctive mark or brand previously registered with the Forester in charge.

26. Excepting in the case of wattle-trees and trees ringbarked under the provisions of the law, no bark shall be stripped from a standing tree, and no tree shall be felled for the sole purpose of obtaining the bark.

27. All timber felled on timber or other reserves or Crown Lands, and all bark stripped from trees thereon, shall be removed from such reserves, or Crown Lands during the currency of the license or permit under which it was felled or stripped respectively, unless the license be renewed: Provided that persons shall not have a right to hold felled timber more than three months without special permission. Any person desiring an extended term for removing timber may forward an application to the Forester of the district, or in case of there being no Forester to the nearest Crown Lands Bailiff, setting forth particulars of the quantity, description, and brands of the timber claimed, how long felled, locality where lying, and cause of non-removal, with particulars of the licenses under which the timber has been held; and if the Minister is satisfied that difficulties exist to the removal of the same within the prescribed period, he may extend such time for removal upon such terms and conditions as he shall think proper; and all such timber or bark which is not removed within such period, or such extended period will be held to be abandoned.

28. No person shall be allowed to hold more than 50,000 superficial feet of timber on any timber or other reserve or Crown Lands at one time under one license unless it be drawn to a saw-mill, yard, or depôt. Should any other person acquire, through purchase or transfer, more than that quantity, he may apply for a separate license for each 50,000 feet or portion thereof in excess; but the Minister may refuse to permit any person to hold more than the first named quantity. In the case of contractors and others employing a number of licensed men, the Minister may increase the maximum quantity that may be so held.

29. Licenses or permits to strip bark, cut or remove timber, or to dig for and remove gravel, stone, sand, clay, shells, earth, or other material, shall confer no right on any person to occupy, cultivate, or improve, or to erect machinery or permanent residences upon timber or other reserves, or Crown Lands, and shall confer no right of grazing, and excepting as herein expressly provided, they shall not be transferable, and shall not confer any privilege of exclusive possession, save as to the timber or other material actually in process of being cut, procured, or removed, or the timber, branded and held in accordance with these Regulations.

30. The Minister may impose special conditions upon holders of any permit or license.

Exemption of Timbers on defined areas or of certain Trees from operation of Licenses.

31. The kurrajong and quandong trees are exempted from the operation of all timber licenses or permits, and cutting them down is prohibited; but in time of drought, if the leaves of the kurrajong-tree are required for feed for stock, the lighter branches may be lopped.

Any other description of trees in specified localities, or all timber on defined areas, may be from time to time exempted from the operation of licenses and permits, and the felling prohibited by notice in the Gazette.

Licenses or Permits for Contractors and others employing a number of men.

32. Holders of Class C permits may employ any number of persons, and contractors or others who hold two or more permits or licenses may employ one person for every permit or license held without further payment; but they shall issue to each person so employed a certificate in the form of Schedule 1. These forms may be obtained by the permit or license-holder on application at the office where the permit or license was issued. The permit-holder or licensee, upon issuing a certificate, shall, as soon as practicable, forward a duplicate thereof to the Forester of the district, or if there is no Forester to the nearest Crown Lands Bailiff, and attach the butt to the permit or license; the date of discharge of any person to whom a certificate has been issued should be entered by the permit-holder or licensee on the butt.

33. A certificate shall be subject to the same conditions and restrictions as the permit or license under which it is issued, and shall become void if the holder leave the employ of the licensee by whom it is issued. If more than one person at the same time work or be employed under the same permit or license, excepting it be a permit or license issued under Regulations Nos. 10, 16, 17, 43, all such persons shall be deemed to be unlicensed.

Sites for Saw-mills and Agistment Areas.

34. Where lands on timber reserves are not under lease, and are available for the purpose, licenses for sites for saw-mills may be granted for areas not exceeding 10 acres, or for areas not exceeding 160 acres, for the agistment of stock used for drawing timber by timber licensees or permit-holders.

35. The fee for saw-mill site licenses shall be £3 per annum for the first 5 acres, and 1s. for each acre additional; and the fee for agistment licenses shall be £5 for the first forty acres, and 1s. for each acre additional, but a reduction of one-fourth of such fees may be made for each quarter of the year expired.

36. Applications describing clearly the boundaries of the land applied for, and accompanied with a bank draft or post-office order, payable to the Under Secretary for Mines and Agriculture for the amount of fee, may be forwarded through the Forester of the district, who will transmit it with his report. Should there appear no objection, the applicant may be permitted to occupy the area applied for, or with boundaries so modified and under such special conditions as the Minister may direct.

37. Saw-mill sites and agistment licenses will confer no right to cut timber. They must be used bona fide for the purposes for which they are granted, or they may be cancelled.

Quarry Licenses.

38. Licenses authorising the holder to dig for and remove from Crown Lands or timber reserves, Class A or B, any gravel, stone, sand, clay, shells, earth, or other similar material, may be issued upon application to a Land Agent or other person duly authorised. The fee for such license shall be £4 per annum, £1 for three months, or 10s. per month.

39. Such licenses shall not apply to lands hereinafter described, viz., land specially set apart for or held under quarry or brickmaking permits; timber reserves, Class C; reserves for public recreation; lands dedicated to public purposes; lands within the boundaries of any city, town, or village, or within half a mile of any head station—without permission of owner; lands held under conditional lease, or special lease, or land measured for sale, or within an enclosure of less than 200 acres; or lands proclaimed by notice in the Gazette as specially exempted from such licenses.

40. A separate license or certificate must be held by every person employed in digging, quarrying, or removing stone, sand, clay, earth, shells, and similar material. Such license or certificate must be produced upon demand, in accordance with Regulation 23, and the material must be removed during the currency of the license under which it was obtained or of one constantly renewed.

41. No excavation by a licensee under Regulation 38 or permit-holder under Regulation 43 shall be made so as to cause injury to any road, track, or bank of navigable river, or be made in a place likely to cause public injury; and the Minister, should he consider it necessary, may require such licensees or permit-holders to erect a sufficient fence or barrier around any excavation before it is made more than 20 inches deep, and should he neglect or refuse to do so, may cause it to be erected at cost of such licensees or permit-holders.

42. Notwithstanding the exceptions in Regulation No. 39 the Minister may authorise the holder of a license under Regulation 38 to enter upon any specified unalienated land, for the purpose of getting or removing material required by the licensee, subject to such restrictions and conditions as the Minister may think fit to impose.

Permits for quarrying, brickmaking, and similar purposes.

43. The Minister may grant quarrying or brickmaking permits, authorising the holders to occupy specified portions not exceeding 1 acre of quarry, timber, or other reserves, or Crown Lands for the purpose of quarrying stone, digging, or removing brick-earth, &c., at a fee of not less than £10 per annum. Permits shall be subject to such terms, conditions, and restrictions as the Minister may think fit to impose.

Penalties.

44. All timber, bark, stone, shells, and other material which there may be good reason to believe has been abandoned, or which has not been removed within the time specified by these Regulations, or has been cut or obtained or drawn from timber or other reserves, or Crown Lands without authority, or contrary to the provisions of these Regulations, and all timber, bark, stone, shells, and other materials upon which any royalty is due and unpaid may be seized by any Forester, Crown Lands Bailiff, police officer, or other person duly authorised in that behalf. Notice of such seizure, in writing, shall be posted up at the nearest Court of Petty Sessions of the district; and unless a claim to such material shall be made, and a legal ownership established to the satisfaction of a Bench of Magistrates at the first Court of Petty Sessions held fourteen days after notice of such seizure has been posted, the timber or material may be sold or otherwise disposed of: Provided, however, the claim may be heard before fourteen days have expired, should the persons interested in the seizure have received sufficient notice to enable them to attend. If the claimant prove to the satisfaction of the Bench that he has duly complied with these Regulations, and is otherwise lawfully entitled to the seized timber or material, its restoration may be ordered. If the claimant fail to so prove his claim the timber or material shall be confiscated.

45. Timber, bark, or other material forfeited or confiscated may, if necessary, be removed to any convenient place, and may be sold by auction or by private contract, or be otherwise disposed of, in such manner as the Minister may from time to time direct, and the proceeds of any such sale, after deduction of expenses, shall be paid into the Consolidated Revenue.

46. Any person barking or wilfully destroying any sapling or tree, or chopping so as to have the effect of injuring or destroying a tree without felling it, unless under a duly authorised permission to ringbark or strip, shall be liable to a penalty of not less than 1d. nor more than 10s. for each tree injured or destroyed: Provided no penalty shall be incurred in the case of trees thinned out under the authority of the Minister, or in the case of persons cutting tracks necessary for the removal of timber.

47. Any person disobeying, infringing, or violating the provisions or conditions of these Regulations, or the conditions of any license, permit, or certificate thereunder held by him, will be liable to a fine of not less than 20s. and not exceeding £5 for the first offence, not less than £5 and not exceeding £10 for the second offence, and not less than £10 nor exceeding £20 for the third, exclusive of the value of any timber or material destroyed.

48. The breach of any condition or obligation, or the failure to perform any act or matter specified in any such license, permit, or certificate issued under these Regulations, shall have the effect of rendering such license, permit, or certificate liable to forfeiture, and the Minister may thereupon or thereafter declare such license, permit, or certificate forfeited, and may direct that no license under any of these Regulations be issued to the person or persons committing such breach.

49. All fees for licenses or permits, and the proceeds of sale of any timber, stone, or other material which may be seized and sold, are to be paid over and accounted for by the officers receiving the same in the same manner as other public money passing through their hands, and a return of licenses issued is to be forwarded at the end of each quarter of the year to the Forest Department, Sydney.

50. The forms to be used for the issue of licenses and permits under these Regulations, shall be those published by authority, and at the Government Printing Office.

SCHEDULE No. 1.

No.	NEW SOUTH WALES.	No.
<i>Certificate for employes under Timber and Forest Regulations.</i>		<i>Notice of issue of Certificate.</i>
To whom issued	<i>Certificate for Employes under a Forest, Timber, or Quarry Permit or License.</i>	THE undersigned hereby notifies that a Certificate has this day been issued to
For what purpose	It is hereby certified that the holder of this Certificate is employed by the undersigned for the purpose of	for the purpose of

Date of discharge of holder of Certificate	† If unexempted Crown Lands, insert name of Land District. If a Reserve, state the number, description, and portions as specified in the License.	

[ENDORSEMENT.]

LICENSES OR PERMITS FOR CONTRACTORS AND OTHERS EMPLOYING A NUMBER OF MEN.

32. Holders of Class C permits may employ any number of persons, and contractors or others who hold two or more permits or licenses may employ one person for every permit or license held without further payment; but they shall issue to each person so employed a certificate in the form of Schedule 1. These forms may be obtained by the permit or license-holder on application at the office where the permit or license was issued. The permit-holder or licensee, upon issuing a certificate, shall, as soon as practicable, forward a duplicate thereof to the Forester of the district, or if there is no Forester to the nearest Crown Lands Bailiff, and attach the butt to the permit or license; the date of discharge of any person to whom a certificate has been issued should be entered by the permit-holder or licensee on the butt.

33. A certificate shall be subject to the same conditions and restrictions as the permit or license under which it is issued, and shall become void if the holder leave the employ of the licensee by whom it is issued. If more than one person at the same time work or be employed under the same permit or license, excepting if be a permit or license issued under Regulations Nos. 10, 16, 17, or 43, all such persons shall be deemed to be unlicensed.

1894.

(SECOND SESSION.)

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(REPEAL OF REGULATION NO. 14 OF THE TIMBER AND QUARRY REGULATIONS AND ADOPTION OF
REGULATION IN LIEU THEREOF.)

Presented to Parliament pursuant to Act 48 Vic. No. 18, sec. 145.

Department of Mines and Agriculture,
Sydney, 24th August, 1894.REPEALING OF REGULATION NO. 14 OF THE TIMBER AND QUARRY REGULATIONS AND ADOPTION OF
A REGULATION IN LIEU THEREOF.His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation No. 14 of
the Timber and Quarry Regulations, published in the Government Gazette of the 14th June, 1894, being repealed, and of the
following Regulation being adopted in lieu thereof.

[94-12,675]

SYDNEY SMITH.

Minimum girth of trees.		Botanical name.	Local name.	Girth. ft. in.
14. No trees within a timber reserve or on lands exempted under Regulations 5 and 31 unless permitted by special conditions of the license or by written authority of the Forester in charge, shall be felled of a less girth than that prescribed hereunder, but the Minister may at any time cancel any such written authority, or may alter the minimum girth at which any particular kind of timber may be felled.		<i>Eucalyptus eugenioides</i>	*Stringybark	6 0
		<i>macrorrhyncha</i>		
		<i>capitellata</i>		
		<i>Eucalyptus melliodora</i>	Yellow box	4 6
		<i>Eucalyptus maculata</i>	Spotted gum	7 0

(SECOND SESSION.)

NEW SOUTH WALES.

CROWN LANDS ACTS.

(CANCELLATION OF REGULATIONS NOS. 250, 251, 252, 253, 254, AND SUBSTITUTION OF AMENDED REGULATION NO. 255 FOR THAT AT PRESENT IN FORCE BEARING THE SAME NUMBERS.)

Presented to Parliament, pursuant to Acts 48 Vic. No. 18 and 53 Vic. No. 21.

Department of Lands,
Sydney, 4th September, 1894.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 250, 251, 252, 253, and 254, being cancelled, and the following Amended Regulation No. 255 being substituted for that at present in force bearing the same number under the Crown Lands Acts.
[Ml. 94-8,028]

J. H. CARRUTHERS.

255. If any owner of land which has been alienated subject to any minerals therein being reserved to the Crown shall desire to dig, mine for, win, or remove any mineral other than gold, silver, lead, tin, and antimony, he shall make application to the Secretary for Mines in the Form 62 for a permit to do so; and if after inquiry the Secretary for Mines shall recommend that such application be granted either as made or in a modified form, the Governor may grant a permit in Form 63 subject to the following conditions, and to such other conditions as shall according to the circumstances of each case appear to the Governor proper:—

- (1.) The owner shall keep a book in which shall be forthwith entered the quantity and value of the minerals raised from his land; and such book shall at all times during each working day be open to the inspection of the Inspector of Mines or any other officer duly authorised by the Secretary for Mines; and the owner shall render such Inspector or officer every assistance in making such inspection.
- (2.) Within the first seven days of the months of January, April, July, and October of each year, the owner or his duly authorised agent or manager shall forward to the Secretary for Mines a return setting out the quantity and value of the minerals raised during the preceding quarter, together with a statutory declaration verifying such return, and declaring that the quantity and value of all the mineral raised from the land during the preceding quarter has been correctly entered in the said book under the proper dates, and has been included in such return.
- (3.) With each such return the owner shall pay or cause to be paid royalty upon the mineral raised computed at the following rates:—For coal, sixpence per ton; for minerals other than gold, silver, lead, tin, and antimony, two pounds ten shillings per centum of the market value thereof at the pit-mouth, and such value may be ascertained and determined as the Secretary for mines shall in each case direct.
- (4.) All surface and underground works shall at all times during each working day be open to inspection, survey, or measurement by the Inspector of Mines or any other Officer of the Department of Mines duly authorised by the Secretary for Mines; and such Inspector or Officer may use all apparatus or appliances ordinarily used at the mine for the purpose of descending or ascending any pit or other excavation; and the owner shall render every such Inspector or Officer all necessary assistance to enable him to make a complete inspection, survey, or measurement of such mine.
- (5.) The Secretary for Mines may cause to be made at any time an inspection of the book aforesaid, or an inspection, survey, or measurement of the mine, for the purpose of checking any such statement as aforesaid or any entry in the book or for any other purpose.
- (6.) If the owner shall make a false return of the mineral or minerals raised from the land, or shall fail, neglect, or refuse to pay royalty upon the mineral raised, according to the foregoing scale, or shall obstruct or refuse to assist any Inspector or other Officer in making an inspection of the books or of the mine, the Governor may suspend for a time or absolutely cancel the permit granted to such owner, and the right of such owner to remove mineral from such land shall cease during such suspension, or after such cancellation, as the case may be.

1894.
(SECOND SESSION.)

NEW SOUTH WALES.

CROWN LANDS.

(NOTIFICATION OF AMENDED REGULATION NO. 286 SUBSTITUTED FOR THAT AT PRESENT IN FORCE BEARING THE SAME NUMBER; ALSO ADDITIONAL REGULATIONS NOS. 287 TO 296 INCLUSIVE, AND ADDITIONAL FORM NO. 78)

Presented to Parliament, pursuant to Acts 48 Vic. No. 18, and 53 Vic. No. 21.

Department of Lands,
Sydney, 23rd October, 1894.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following amended Regulation No. 286 being substituted for that at present in force bearing the same number under the Crown Lands Acts.

[Roads 94-336-2]

J. H. CARRUTHERS.

286. On any application being made for a road to be opened for public use the Minister may require a deposit of not less than £2 to be paid by the applicants into the Treasury before any inquiry into the application shall be authorised, and such deposit may be retained unless in the opinion of the Minister the application was made bona fide in the public interest, and on sufficiently reasonable grounds.

Department of Lands,
Sydney, 23rd October, 1894.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following additional Regulations Nos. 287, 288, 289, 290, 291, 292, 293, 294, 295, and 296, and an additional Form No. 78 under the Crown Lands Acts.

[Ml. 94-9,601]

J. H. CARRUTHERS.

287. The holder of a residential lease, or any other person, may apply to the Warden of the District in the Form 78 for an authority to search for gold or any other mineral upon any land comprised in a residential leasehold.

288. An applicant for such authority, other than the holder of such residential lease, shall, when called upon to do so, deposit with the Warden such a sum of money as shall, in his opinion, be necessary to cover the cost of repairing the damage done to the surface of the leasehold or to any improvements thereon, by reason of the search which shall be made under his authority. Failure to make such deposit shall be deemed an abandonment of the application for authority.

289. Applications shall be recorded by the Warden in the order of receipt, and shall be numbered and dealt with in that order. With the least possible delay, after the receipt of an application from any person, other than the holder of such residential lease, the Warden shall cause a "search area" to be marked off, of such dimensions and in such a position as to effect as little damage to the residential lease or the improvements thereon as possible, having regard to the objects and opinions of the applicant for such authority. And the Warden shall thereupon estimate amount of damages likely to be caused to any improvements, the property of the lessee, by the mining operations necessary in prospecting the land embraced within such residential lease.

290. The Warden shall, with the least possible delay thereafter, transmit the application to the Under Secretary for Mines, together with a report and a recommendation thereon.

291. After consideration of the application with the Warden's report and recommendation thereon, the Minister may refuse the application, or may grant the same, subject to the deposit of such sum of money as the Minister may prescribe, and subject to such conditions as the Minister may impose.

292. Forthwith after the granting of any such authority it shall be forwarded to the Warden for delivery to the applicant, but before handing over such authority to the applicant the Warden shall require him to deposit the sum of money prescribed by the Minister. If the applicant refuse to make the deposit, the authority shall be returned to the Department for cancellation, and shall be cancelled accordingly.

293. Any such authority may be cancelled by the Minister if the person to whom it has been granted shall fail, for a period of one month, to use it for the purpose of searching for the mineral named therein.

294. Upon discovery by the holder of any such authority of payable gold or other mineral, he shall forthwith report such discovery, giving full particulars to the Warden, who shall forthwith inspect and report upon such discovery, and shall state whether in his opinion the value of the deposit discovered would justify the withdrawal of the whole or any part of the land from leasehold, and what compensation should be paid to the holder of the residential lease for any improvements which may be destroyed, injured, or removed by reason of such withdrawal. And the Minister may thereupon withdraw from the leasehold such land as is necessary, and award such compensation to the leaseholder as shall appear to him just.

295. The holder of any authority as aforesaid shall have the right of ingress, egress, and regress into, over, and upon the land comprised in the residential lease referred to in such authority, but such right shall be exercised with as little inconvenience to the leaseholder as may be practicable.

296. For the purposes of these Regulations the expression "The Minister" means the Minister for Mines.

Form 78.

CROWN LANDS ACTS: REGULATION NO. 287.

Application for Authority to search for Mineral on a Residential Lease.

To the Honorable the Minister for Mines.

Sir,

I hereby apply for authority to search for within the parcel of land at _____, demised under residential lease to _____, being portion _____, in the parish of _____, in the county of _____

(Signature and address of applicant.)

Receipt by Warden.

Received this _____ day of _____, 18 _____, at the hour of _____, and numbered in register.

Warden.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(ADDITIONAL TIMBER, STATE FOREST, AND QUARRY REGULATION.)

Ordered by the Legislative Assembly to be printed, 26 February, 1895.

Department of Mines and Agriculture,
Sydney, 19 February, 1895.

ADDITIONAL TIMBER, STATE FOREST, AND QUARRY REGULATION.

ADDITIONAL REGULATION IN TERMS OF THE CROWN LANDS ACT, 1884 (48 VIC. NO. 18).

HIS EXCELLENCY THE GOVERNOR, WITH THE ADVICE OF THE EXECUTIVE COUNCIL, HAS BEEN PLEASED TO APPROVE OF THE FOLLOWING REGULATION AS AN ADDITIONAL TIMBER, STATE FOREST, AND QUARRY REGULATION, IN TERMS OF SECTION 115 OF THE CROWN LANDS ACT, 1884 (48 VIC. NO. 18), AND TO BE READ AS REGULATION NO. 50.

[95-1,441.]

SYDNEY SMITH.

REGULATION NO. 50.

The forms to be used for the issue of licenses and permits under these Regulations shall be those published by authority and at the Government Printing Office.

1894-5.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT OF 1889.
(RULES OF THE LAND APPEAL COURT.)

Ordered by the Legislative Assembly to be printed, 26 June, 1895.

Department of Lands,

Sydney, 18 June, 1895.

RULES OF THE LAND APPEAL COURT.

It is hereby notified, for public information, that His Excellency the Lieutenant-Governor, with the advice of the Executive Council, has, in pursuance of the "Crown Lands Act of 1889," made the following Rules, having reference to the Land Appeal Court.

J. H. CARRUTHERS.

RULES OF THE LAND APPEAL COURT.

1. All Rules of the Land Appeal Court heretofore made are hereby repealed; but the repeal of the said Rules shall not operate so as to affect any appeal or reference now pending in the Land Appeal Court; and any such appeal or reference may be carried on until the final disposal thereof, as if the Rules hereby repealed were still in force.

2. The official seal of the Land Appeal Court shall have a device and impression of the Royal Crown, with a label surrounding the same with this inscription—"The Seal of the Land Appeal Court of New South Wales."

3. Every member of the Land Appeal Court shall take the Oath of Allegiance and the Judicial Oath as set forth in the "Promissory Oaths Act." Such oaths shall, in the case of the President of the said Court, be taken before any Judge of the Supreme Court, and in the case of any other member thereof shall be taken before any such Judge or before such President.

4. The Registrar and all other officers appointed for the service of the Land Appeal Court shall be under its full control, and in the performance of their respective duties shall conform to the directions which the Land Appeal Court may from time to time give or cause to be given in that behalf.

5. The Land Appeal Court shall cause notice of the times and places at which its sittings will be holden to be published by the Registrar in the *Gazette*; but any such notice may in like manner be varied or withdrawn, and the Court may, notwithstanding any such notice, make such order in the premises as to it may seem expedient.

6. The Registrar's Office shall be open to the public on all days, not being Sundays or public holidays, between the hours of 10 a.m. and 4 p.m., except on Saturdays, when the same shall be closed at 12 noon.

7. Certificates, subpoenas, summonses, and other documents shall be issued at the Registrar's Office on payment of the respective fees contained in the Schedule hereto annexed. Any notices required to be given to the Registrar, and any affidavits or other documents required to be filed with the Registrar, shall be delivered or transmitted to him at such office.

8. Any notice, summons, subpoena, or other similar process of the Land Appeal Court shall be sufficiently authenticated if the same be signed by the Registrar and a *fac-simile* of the seal of the Land Appeal Court be stamped upon the same.

9. The Registrar shall keep the following books, that is to say:—

- (1.) A register of all appeals and references entered for hearing before the Land Appeal Court.
- (2.) A register of all deposits and fees paid into the Land Appeal Court.
- (3.) A minute-book of all proceedings before the Land Appeal Court, and of all orders made thereupon.

Such books shall be kept in due and regular form, and the entries therein shall be made at the time when the matter for entry arises.

10. When any case has been heard or dealt with by the Land Appeal Court, the Registrar shall report the result thereof to the Minister [in such form and manner as the Minister may from time to time direct.

11. Any final order made by the Land Appeal Court shall, as between party and party, take effect from the issue of a certificate thereof: Provided that any certificate issued by the Registrar may upon cause shown be rectified or amended by the Land Appeal Court.

12. The Registrar shall prepare a draft certificate of any such order as aforesaid, and give notice to the parties concerned of an appointed day when they may attend before him, and if so advised, may take exception to the terms thereof.

13. Upon the day appointed the Registrar shall settle the terms of such certificate, and on issuing a certificate shall sign the same and affix thereto the seal of the Land Appeal Court.

14. If a certificate settled by the Registrar as aforesaid does not properly set forth the order made by the Land Appeal Court, any party to the proceeding may there and then require the issue thereof to be stayed for seven days and may within such period apply upon motion to have the terms thereof settled by the Court.

15. The formal parts of any such certificate shall be according to Form 1, and the other parts thereof shall be according to the order made in that behalf by the Land Appeal Court.

16. A duplicate of every certificate issued as aforesaid shall be filed by the Registrar.

17. In any case which the Minister or a Board has referred or returned to the Land Appeal Court or in which the Crown has appeared as a party, the Registrar shall furnish the Minister with a certificate of the order which the Court may have made in respect thereof.

18. No certificate of any order made by the Land Appeal Court shall be issued by the Registrar until after the expiration of fourteen days from the making of such order, or, in the case of any appraisalment within the provisions of section 6 of the Act of 1889, until after the expiration of one month from the making of such appraisalment; and if a case for the Supreme Court or a reference by the Minister is pending in respect of any order or other matter no certificate shall be issued until the same has been disposed of.

19. Any summons or subpoena issued by the Registrar shall be in Form 2.

20. When any notice of appeal has been received by a Chairman, he shall forthwith forward the same to the Registrar, together with all papers connected with the case. When a Board has referred or returned any matter to the Land Appeal Court, the Chairman shall in like manner forward to the Registrar all papers connected with the case.

21. On any case being referred or returned to the Land Appeal Court by a Board the Registrar shall forthwith notify the fact to the Minister.

22. When the Minister desires to refer any case to the Land Appeal Court, notice of such reference and of the grounds thereof shall be given in writing to the Registrar; and all papers connected with the case shall thereafter be forwarded to the Registrar.

23. When a Board refers or returns any case to the Land Appeal Court, the Minister shall be a party to all proceedings taken upon or in connection with such reference.

24. When any appeal, to which the Crown is not directly a party, appears to the Minister to involve any question of law or fact by the decision of which the rights, interests, or revenues of the Crown will, or may, be affected, he may, before the hearing, give notice in writing to the Registrar that, as representing the Crown, he intervenes and claims to be deemed a party thereto; and the Minister shall thereupon become a party to all proceedings that may thereafter be taken in connection with such appeal: Provided that by leave of the Court, to be obtained upon application in a summary way, the Minister may at any subsequent stage of such proceedings intervene and become a party as aforesaid.

25. When the Minister or a Board has referred or returned any case to the Land Appeal Court, the parties to such case before the Board may appear and be heard by the Land Appeal Court.

26. The Registrar shall in every case cause the Land Appeal Court to be supplied with three copies of all the evidence and of all documents referred to therein.

27. On payment of a fee according to the scale given in the Schedule hereto annexed, the Registrar shall supply copies of all evidence and documents in a case.

28. The Registrar shall give not less than fourteen days' notice to all parties concerned of the sittings of the Land Appeal Court at which any appeal or reference will be heard. Such notice shall be in the form or to the effect of Form 3, and be prepared by the Registrar in duplicate, and the service thereof upon any party other than the Minister shall be effected in the following manner: One copy of such notice shall be served by delivering the same to the person intended to be served, or by delivering

the same to some person apparently of the age of fourteen years or upwards, at the usual or last known place of abode or business of the person intended to be served. The person serving such notice shall indorse on the duplicate copy of the same a statement of the manner in which the service has been effected, or if service has not been effected, of the attempts made to effect service, and such statement shall be verified by statutory declaration to be also indorsed on the said duplicate copy of the said notice; and the said copy so indorsed as aforesaid shall be forthwith transmitted to the Registrar for production before the Land Appeal Court.

29. When the place of abode or business of any party concerned in an appeal or reference as aforesaid is not known or cannot be found, or where for any other reason service of the aforesaid notice shall not be effected in accordance with the directions hereinbefore given, the Land Appeal Court may give such direction for substituted service on any other person, or for the substitution for service of advertisements in one or more newspapers as may in its opinion be best suited to the circumstances of the case, and on any such directions being carried out, service may be deemed to have been effected.

30. Any person who proposes to take objection to the hearing of an appeal—on the ground that the notice required by section 17 of the Crown Lands Act of 1884 to be given to him, as a party to the proceeding before the Board was not duly given—shall, within one week from the day upon which he receives notice from the Registrar of the sittings of the Land Appeal Court at which such appeal will be heard, give, by registered letter, notice to the person appealing that he intends to object to the hearing of the appeal, and of the matters upon which he will rely in support of his objection. And the costs incurred by either party in respect of an objection to the hearing of an appeal on any such ground as aforesaid shall be taken to be separate and distinct from the general costs of the appeal.

31. Any other notices to be given by the Registrar may be served in the same manner as any notice required to be given by a Chairman; and the President may give directions for substituted service and for the substitution of notice for service in the same manner as a Chairman is empowered to do in respect of any notice required to be given by such Chairman.

32. The number and order of speeches on the hearing of any appeal or reference shall, as far as practicable, conform to the practice prevailing in the Supreme Court upon the hearing of appeals from the Equity Court.

33. In any case in which a party other than the Minister desires to be heard by an attorney or agent, not being a barrister or solicitor of the Supreme Court retained for the purpose, an instrument in writing duly appointing such attorney or agent and defining the limits of his authority, if any, to bind such party in respect of the giving of consents and the making of submissions and compromises shall previously be filed with the Registrar.

34. The Land Appeal Court may permit, and the President thereof may verify or make, all such amendments as may be permitted before a Board.

35. Whenever the Land Appeal Court has made a reference to the Registrar to assess the costs payable to any party under the order of the Court, the same shall be allowed according to the discretion of the Registrar: Provided that any party may apply to the Court for a review of any assessment of costs as aforesaid.

36. Matters of the following kinds may be brought before the Land Appeal Court and dealt with on motion:—

- (1.) The settling of the terms of any certificate of the order of the Court.
- (2.) The reviewing of any decision of the Registrar in respect of costs.
- (3.) The settling of the terms of any case for the Supreme Court.
- (4.) The remitting to a Board of any case which is incomplete, or in which it appears that evidence which any party desires to offer ought to be taken before such Board.

- (5.) Any application for leave to adduce fresh evidence before the Court in any matter.
- (6.) Any application that any appeal or reference may be heard elsewhere than may have been previously ordered.
- (7.) Any application to postpone any matter or for further time to comply with any rule or order.
- (8.) Any other matter which the Court may allow so to be dealt with.

37. Not less than seven days' notice of any motion shall be given to the Registrar and to the other parties concerned, and except in cases 1, 2, and 3, within the last preceding rule, the grounds on which the application is based shall be stated in such notice and be supported by affidavit. The formal parts of any such notice of motion shall be according to Form 4.

38. Any affidavit used in any motion as aforesaid shall be filed with the Registrar, and a copy thereof shall be served on the other parties concerned not less than four days before any such motion comes on to be heard, and affidavits in answer or reply may in like manner be filed and served but without limit as to time.
