PIKE, ARREST OF (See "POLICE").		
PITT-STREET (See "TRAMWAYS").		
PLAGUE (See "BUBONIC PLAGUE").		
POINTS OF ORDER:—		
Reported from Committee of Supply, 58, 435.		
Reported from Committee of the Whole, 266.		
RULINGS OF SPEAKER:—		
That a Temporary Chairman of Committees could take the Chair, notwithstanding that the Chairman of Committees had not been appointed, 49.		
That debate in Committee of Supply on items in Resolution for specific services must be confined to the items submitted, 58.		
That the provision in clause 4 of the Darling Harbour Wharves Resumption Bill, giving power to lease or sell certain of the land, was covered by the Title and Order of Leave; Speaker quoted decision of 17th August, 1897, in reference to the Totalisator Bill, 83.		
That amendment, for Call of the House, on a motion proposing a new Standing Order, could be admitted, 127.		
That sections 12 and 13 of the Public Works Act had been complied with by the Minister in moving motion to refer the matter of removing the Public Abattoirs from Glebe Island, to the Public Works Committee, 223.		
That an amendment to insert words "The Sydney Harbour Trust Commissioners" in clause 2 of the Industrial Arbitration Bill, before the Commissioners were appointed, was in order, 266.		
That the subject of the motion for the adjournment of the House in reference to land exchanges had not been discussed on a previous motion, 286.		
That the Fire Brigades Bill was out of order, because clause 25 conflicted with, and was contradictory of clause 65 of the Sydney Harbour Trust Bill, passed by this House, and now before the Council, 306.		
That the provision in the Racing Association Bill in regard to incorporation was not beyond the Order of Leave, and that the Bill did not require to be introduced in Committee, 318.		
That provision in clause 7 of the Early Closing Amendment Bill, which proposes to bring hotels, &c., selling tobacco, under the same law as tobacconists' shops was within the Order of Leave, 325.		
That proposal to put the motion for the adjournment of the House without debate on Friday sittings was not a contravention of the Standing Orders which gave the right to Members to debate such questions, 367.		
That although the Public Works Committee had varied the reference made to them in reference to the proposal to construct the Belmore to Fort Macquarie Electric Tramway, he would not rule the motion to carry out the work out of order, 367.		
That motion for adjournment of House in reference to thoroughfare for vehicular traffic through the Botanical Gardens, could be discussed in the financial debate in Committee of Ways and Means, and was out of order, 392.		
That as the Order of the Day was the property of the House, the second reading of the Tied Houses Bill could be moved by any Member, 409.		
That an Honorable Member discussing in Committee of Supply the estimate for "Railways and Tramways—Existing Lines—Working Expenses," was not in order in commenting in detail on a report of an officer on a new line of railway, 435-6.		
That a Minister was permitted to present papers to Parliament at any time, notwithstanding an address passed by the House requesting the production of the papers, had not been presented to the Governor, 441.		
That the introduction of the Patents and Trade Marks Bill should have been preceded by a Message from the Governor, 460.		

REFERENCES TO THE VOTES AND PROCEEDINGS, VOL. I—18TH PARLIAMENT—SESSION, 1900.	PAPERS ORDERED TO BE PRINTED.	
	VOL.	PAGE.
P		
POINTS OF ORDER (<i>continued</i>):—		
RULINGS OF SPEAKER (<i>continued</i>):—		
That the motion for the adjournment of the House in reference to the Police Superannuation Fund anticipated the discussion of a motion which was already on the paper, and was out of order, 522.		
That the Federal Elections Bill was not out of order, notwithstanding the Schedule referred to in Clause 6 was not given, as the Schedules could be introduced and discussed in Committee, 541.		
That motion for adjournment on influence of Members with Federal Electorates Commissioners anticipated discussion on the Federal Elections Bill, and was out of order, 549.		
That motion approving of Government entering into a contract for the supply of steel rails should have originated in Committee of the Whole, and was out of order, 549.		
That motion for adjournment of the House in reference to contract for steel-rails anticipated the discussion of a motion given this day on the subject, and was out of order, 557.		
That in regard to the motion of adjournment in reference to consumptive patients, Liverpool Asylum, having been already discussed in Committee of Supply and being open to further discussion on the third reading of the Appropriation Bill, he thought that the item could not be discussed on the third reading of the Appropriation Bill, and he had not sufficient information as to the proceedings in supply to rule the motion out of order, 577.		
RULINGS OF DEPUTY-SPEAKER :—		
That motion for adjournment of House in reference to legalising certain Municipalities did not deal with the subject embodied in the Municipalities (Amendment) Bill, and was in order, 610.		
That certain clauses in the Municipalities (Incorporation Validating) Bill was not beyond the Order of Leave, 610.		
That the requirements of the Public Works Act had been complied with on motion to refer the work "High-level Bridge over the Hawkesbury River at Richmond" to the Public Works Committee, 615.

Lays on Table Election Petition— <i>Taylor v. Smith</i> , Canterbury, 91.		
Clerk informs House of unavoidable absence of, and Deputy-Speaker took Chair, 597, 607.		
RULINGS OF :—		
That a Temporary Chairman of Committees could take the Chair notwithstanding the Chairman of Committees had not been appointed, 49.		
That Debate in Committee of Supply on items in resolution for specific services must be confined to the items submitted, 58.		
That the provision in clause 4 of the Darling Harbour Wharves Resumption Bill, giving power to lease or sell certain of the land, was covered by the Title and Order of Leave; Speaker quoted decision of 17th August, 1897, in reference to the Totalizer Bill, 83.		
That amendment, for call of the House, on a motion proposing a new Standing Order, could be admitted, 127.		
That sections 12 and 13 of the Public Works Act had been complied with by the Minister, in moving motion to refer the matter of removing the Public Abattoirs from Glebe Island, to the Public Works Committee, 223.		
That an amendment to insert words "The Sydney Harbour Trust Commissioners" in clause 2 of the Industrial Arbitration Bill, before the Commissioners were appointed, was in order, 266.		
That the subject of the motion for the adjournment of the House in reference to land exchanges had not been discussed on a previous motion, 286.		
That the Fire Brigades Bill was out of order, because clause 25 conflicted with and was contradictory of clause 65 of the Sydney Harbour Trust Bill passed by this House and now before the Council, 306.		

REFERENCES TO THE VOTES AND PROCEEDINGS, VOL. I—18TH PARLIAMENT—SESSION 1900.	PAPERS ORDERED TO BE PRINTED.	
	VOL.	PAGE.
S		
SPEAKER (<i>continued</i>):—		
RULINGS OF— <i>continued</i> :—		
That the provision in the Racing Association Bill in regard to incorporation was not beyond the Order of Leave, and that the Bill did not require to be introduced in Committee, 318.		
That provision in clause 7 of the Early Closing Amendment Bill, which proposes to bring hotels, &c., selling tobacco, under the same law as tobacconists' shops, was within the Order of Leave, 325.		
That proposal to put the motion for the adjournment of the House without debate on Friday sittings was not a contravention of the Standing Orders which gave the right to members to debate such questions, 367.		
That although the Public Works Committee had varied the reference made to them in reference to the proposal to construct the Belmore to Port Macquarie Electric Tramway, he would not rule the motion to carry out the work out of order, 367.		
That motion for adjournment of House in reference to thoroughfare for vehicular traffic, through the Botanical Gardens, could be discussed in the financial debate in Committee of Ways and Means, and was out of order, 392.		
That as the Order of the Day was the property of the House, the 2nd reading of the Tied Houses Bill could be moved by any member, 409.		
That an honorable member, discussing in Committee of Supply the estimate for "Railways and Tramways, existing lines—working Expenses," was not in order in commenting in detail on a report of an officer on a new line of railway, 435-6.		
That a Minister was permitted to present papers to Parliament at any time, notwithstanding an address passed by the House requesting the production of the papers, had not been presented to the Governor, 441.		
That the introduction of the Patents and Trade Marks Bill should have been preceded by a Message from the Governor, 460.		
That the motion for the adjournment of the House in reference to the Police Superannuation Fund anticipated the discussion of a motion which was already on the paper, and was out of order, 522.		
That the Federal Elections Bill was not out of order, notwithstanding the Schedule referred to in clause 6 was not given, as the Schedules could be introduced and discussed in Committee, 541.		
That motion for adjournment on "Influence of Members with Federal Electorates Commissioners," anticipated discussion on the Federal Elections Bill, and was out of order, 549.		
That motion approving of Government entering into a contract for the supply of steel rails should have originated in Committee of the Whole and was out of order, 549.		
That motion for adjournment of the House in reference to "Contract for Steel-rails" anticipated the discussion of a motion given this day on the subject, and was out of order, 557.		
That in regard to the motion of adjournment in reference to "Consumptive Patients Liverpool Asylum, having been already discussed in Committee of Supply, and being open to further discussion on the third reading of the Appropriation Bill," he thought that the item could not be discussed on the third reading of the Appropriation Bill, and he had not sufficient information as to the proceedings in Supply to rule the motion out of order, 577.		
RULINGS OF DEPUTY-SPEAKER:—		
That motion for adjournment of the House in reference to legalising certain Municipalities did not deal with the subject embodied in the Municipalities (Amendment) Bill, and was in order, 610.		
That certain clauses in the Municipalities (Incorporation Validating) Bill was not beyond the Order of Leave, 610.		
That the requirements of the Public Works Act had been complied with on motion to refer the work "High-level Bridge over the Hawkesbury River at Richmond" to the Public Works Committee, 615.		
DISSENT TO RULING:—		
Motion made (<i>Mr. Norton</i>) That House dissents from ruling in reference to Early Closing (Amendment) Bill, 339.

TWENTY-NINTH ANNUAL REPORT

OF THE

AUDITOR-GENERAL,

BEING ON

THE TREASURER'S STATEMENTS OF THE RECEIPTS AND EXPENDITURE OF THE CONSOLIDATED REVENUE FUND, AND OTHER MONEYS, FOR THE PERIOD 1ST JULY, 1898, TO 30TH JUNE, 1899.

(Under Audit Act, 1898, No. 5.)

1. THE Treasurer's Abstracts of his Receipts and Disbursements for the financial year ended 30th June, 1899, were received on 30th October, 1899, and were returned to the Treasury for such corrections as the prescribed audit showed to be requisite on the 27th December following, and were finally received back on the 6th April, 1900, with such corrections and amendments as were concurred with by the Treasurer, and I have now the honor to submit to the Legislative Assembly my Report thereon, as directed by section 45 of the "Audit Act, 1898."

2. The suggestions for improving the Annual Statements which were reported last year as having been made to, but not adopted by, the late Treasurer were renewed in letter of 27th December last above referred to, and, although the proposed alterations could not be conveniently made in the present Statements, it is understood that the present Treasurer will cause his own Accounts for the now current financial year to be prepared in the amended form suggested.

3. The improvements in question are, however, introduced into the following Report and Appendices:—

They consist of—1. A reclassification of the items making up the Consolidated Revenue Fund; 2. A rearrangement of the Loan Service Disbursements under classes; 3. A consolidation of the General Loan Fund operations under one Account.

THE

THE CONSOLIDATED REVENUE FUND ACCOUNT.

4. The condition of the Consolidated Revenue Fund at the 30th June, 1899, shows an improvement over its condition at 30th June, 1898, to the amount of £141,184 6s. 6d.—that is to say that the—

Debit Balance at 30th June, 1898, having
been... .. £2,898,713 14 1

while the

Debit Balance at 30th June, 1899, stood at ... 2,757,529 7 7

The Cash operations of the year show a net
balance in its favour of £141,184 6 6

The improvement shown in the Accounts of 1897–8 over the year 1896–7 having been £158,060 8s. 10d., the present result shows that the Revenue Receipts for 1898–9 were insufficient to meet the instalment due for the redemption of the old Treasury Deficiency Bills by a sum of £8,815 13s. 6d., which, consequently, has increased the Cash Overdraft from £571,129 14s. 1d. at 30th June, 1898, to £579,945 7s. 7d. at the 30th June, 1899, and may accordingly be stated thus:—

	£	s.	d.
Cash Overdraft	579,945	7	7
Outstanding Treasury Deficiency Bills—			
53 Victoria No. 9	1,152,884	0	0
59 Victoria No. 22	1,024,700	0	0

*Net Deficiency Balance at 30th June, 1899... £2,757,529 7 7

5. It must be distinctly understood that the figures here given, as well as the similar ones given in last Report, refer to the “Revenue” as a *Cash Account only*; that is to say, they represent the result of cash operations only as recorded year by year in the Public Accounts, and, as on account of the Consolidated Revenue Fund, quite distinct from the Trust Funds or the General Loan Fund transactions.

6. The mention of outstanding Treasury Deficiency Bills as *forming part of the Deficiency Balance* does not in any way alter the fact that the “Account” on which that Deficiency Balance has arisen is an Account of the “Revenue” pure and simple.

7. The adverse Balance may be regarded from two opposite standpoints, and may be described in the one case as having been occasioned by “a failure in anticipated Income,” or, in the other case, by “Obligations created and met in excess of anticipated Income.” In either case, however, the “Revenue” has become indebted for the amount of its adverse Balance to some source whence it drew the money to meet the obligations created and met in excess of its own resources to date of Balance.

8. In the course of the extensive criticism which my last Report has evoked, it has been argued that the adverse balance stated therein should not have included the amounts of the outstanding Treasury Deficiency Bills on the plea that the Acts of Parliament

* Net Deficiency as above	£2,757,529	7	7
Net Payments in London during 1898–9, not brought to account during Financial Year	201,646	5	0
Actual Deficiency, 30th June, 1899 (exclusive of £11,618 17s. 8d., payments by Bank of New South Wales—not brought to account)	£2,959,175	12	7

Parliament authorising the issue of those Bills covered and *thereby paid off*, at any rate temporarily, so much of the Revenue Debit Balance in declaring that “the proceeds of the Bills” were to be carried to and *form part of the Consolidated Revenue Fund*. Whencesoever those funds were to come they could only be of the nature of proceeds of Bills discounted payable at a future date. As it happens, all the Bills were placed with, or virtually discounted by, Trust Funds in the hands of the Treasury. It is obvious, therefore, that Parliament could never have meant that the Trust Moneys thus obtained were to be made into “Revenue” or, even if the Bills had been sold to the Public and cash received for them, the proceeds *being repayable*, could not possibly be converted into so much “Revenue”—the money could only be legitimately accounted for as borrowed money, until replaced by *Revenue free from obligation*.

9. It is remarkable that so much surprise was expressed at the statement of the position of the Revenue Account in my last Report, as if that position had been one of quite recent attainment and had not previously been drawn attention to. It is also remarkable how diverse have been the views expressed as to the significance of the figures, while those figures themselves have not been challenged as incorrect in any particular. The adverse balance stated in last Report on the Revenue Account as £2,898,713 14s. 1d., and now in the present one as reduced to £2,757,529 7s. 7d., is nothing more nor less than the result of a series of balances carefully ascertained at the close of each financial year and reported to Parliament in my Annual Reports on the Treasurer’s Abstracts of the Public Accounts of the Colony, as directed by the Audit Act.

10. It seems to be, therefore, of some importance that those annual results should be collocated so as to afford a bird’s eye view of the progressive condition of the Consolidated Revenue Fund, and, it may be, to assist in harmonising the opposite conclusions which have been entertained and expressed as to their significance. Commencing with the year 1883, to correspond in dates with a statement by the late Colonial Treasurer in No. 5 of his Financial Papers, dated 16th August, 1899, I have prepared a—

Statement showing position of the Consolidated Revenue Fund in respect to its Obligations at the close of each financial year, and its means of meeting the same from the close of the year 1883 to 30th June, 1899, as reported to the Legislative Assembly in the Annual Reports of the Auditor-General upon the Public Accounts for those years respectively, in accordance with the Audit Act.

That statement (marked A, *vide* pages 190-1) shows the following information :—

1. Amount of Financial Balance in reference to outstanding Obligations at the close of each year.
2. Amount of Obligations under Statutory Appropriations outstanding at the close of each year.
3. Balances of Obligations at the close of each financial year.
4. Balances of Obligations which lapsed under the 17th clause of the Audit Act of 1870, and Act No. 5, 1898.
5. Net amount of Payments in London prior to the close of the financial year, but not included in the Treasury Accounts for that year.
6. Amount of Treasury Deficiency Bills current at the close of the financial year, as per annual Statements.
7. Treasury Ledger Balances at the close of the financial year, as per annual Statements.
8. Balances of Temporary Issues recoverable but outstanding at the close of each financial year.

Together with references to the Annual Reports, whence the information has been collected.

In

11. In further illustration of the progress of the Deficiency Balance from its first occurrence at 31st December, 1886, to the 30th June, 1899, a second Statement (marked B, *vide* pages 192–3) shows :—

1st. The distribution of the gross Receipts placed to the credit of the Consolidated Revenue Fund (as shown by the Colonial Treasurer's Annual Statements) into "Revenue Proper" and "Temporary Advances Repaid," from the year 1887 to 30th June, 1899, inclusive, but excepting credits for Treasury Deficiency Bills.

2nd. The distribution of the gross Payments made out of the Consolidated Revenue Fund (as shown by the Colonial Treasurer's Annual Statements) into "Payments Proper" and "Temporary Advances," from the year 1887 to 30th June, 1899, inclusive, but excepting sums charged for the Redemption of Treasury Deficiency Bills.

That Statement shows that the Debit Balance of £2,757,529 7s. 7d., at 30th June, 1899, consisted of :—

Excess of Payments Proper over Revenue			
Proper	£1,860,757	11	3
Excess of Temporary Issues over Temporary Recoveries	896,771	16	4
	<hr/>		
Total	£2,757,529	7	7

12. The succeeding Statements C and D show how the Amounts of each of those divisions have been arrived at, *viz.* (*vide* pages 194 and 195) :—

Statement C shows the annual position of the Consolidated Revenue Fund Account, exclusive of Temporary Advances made therefrom, and of Re-credits on their account, as per separate Statement, and exclusive of sums borrowed upon Treasury Deficiency Bills, from the year 1887 to 30th June, 1899.

Statement D shows the annual position of the Account of Temporary Advances made from the Consolidated Revenue Fund from the year 1887 to 30th June, 1899, inclusive of the Payments and Re-credits on account of the Centennial Park and Martin Place, as accounted for in the Colonial Treasurer's Annual Statements.

Another Statement, marked E, page 196, supplies particulars of the Temporary Issues outstanding at the 31st December, 1883, and also at 30th June, 1899.

13. It is proper to remark, however, that while it is technically necessary to account for the transactions described as Temporary Issues or Advances, as if they were Recoverable Assets, they are only such, for the most part, with reference to the year in which they occur, inasmuch as they are, except some comparatively small amounts recovered in cash, adjusted by their being charged as Expenditure under Appropriations of the Revenue for the following years.

14. But that is not the case with respect to the payments for the Centennial Park under the Act 51 Victoria No. 9, and for the formation of Martin Place under the Act 53 Victoria No. 13, which the Treasury have classified as "Suspense Accounts." *Strictly speaking, the Acts quoted do not justify the expenses under them being accounted for as Temporary transactions, or otherwise than Final Payments chargeable within the year in which they occur, directly to the Consolidated Revenue Fund, out of which they are authorised to be made, without any condition as to their being replaced by specific sums which might thereafter accrue to the Revenue in connection with them. It is true enough that both Acts provide for the sale of certain land not required for the purpose for which those Acts were passed, and provide that the proceeds should be credited to the Consolidated Revenue Fund ;*

but,

but, however it may be assumed to have been the intention of Parliament that such Expenditure was to be dependent upon and reducible by such proceeds, no such intention is expressed in either Act.

15. The net expenditure for those two Services (up to 30th June, 1899—£696,468 13s. 3d.) has undoubtedly assisted in the creation of the adverse balance, and as the costs of those Services respectively are admitted to be legally chargeable against the Revenue, nothing is to be gained by keeping or stating them as separate debit accounts, and thus by their exclusion creating a balance to the credit of the Revenue in another part of the Account of the Consolidated Revenue Fund. On the contrary, the process adopted exhibits an unscientific system of bookkeeping. In striking a Financial Balance it may be legitimate enough to take credit for the expected value of an asset, such as the estimated value of the land referred to above, as a set off against a general Debit Balance; but under the provisions of the Special Acts referred to, there is no direction to treat the expenditure authorised by them as distinct Accounts separate from the General Current Account of the Consolidated Revenue Fund.

16. By whatever process the Balance on the Revenue Account may be struck at the close of the Financial Year, it is of primary importance that the precise significance of that Balance should be thoroughly understood at what date soever it may be struck. As a matter of fact, the Balance shown in the Revenue Account in the published Annual Statements thereof has never been anything more than the balance between the Receipts and Payments within the year, including balance brought forward from the previous year, without reference to Statutory Liabilities, and therefore whatever the balance was it constituted only one of the factors to a complete account of the condition of the Revenue.

17. Those Annual Balances have never as yet been made up as Profit and Loss Balances, nor has any Balance on the Credit side of the Account ever yet been free from liability so as to allow of its being reckoned as absolutely free money for application to public uses under Parliamentary Appropriation, or towards the reduction of taxes, or the reduction of the Public Debt or Deficiency. If, on the other hand, the Balance appears on the Debit side of the Account the amount of it becomes, as a matter of course, a primary charge on the growing produce of the Revenue in the following Financial Year.

18. Now the intention and aim of the Audit Act Amendment Act of 1895 was so to adjust the Appropriations of the Revenue as that they should apply only to payments estimated to be actually required to be made within and up to the close of a Financial Year—the 30th June—leaving any Cash Balance that might remain to be dealt with as a free sum in the arrangement of the Finance Accounts for the next Financial Year.

19. The Cash Balance at 30th June in any year is consequently the keynote to determine the condition of the Revenue and its relation to the Appropriation thereof. The amounts Appropriated for any year being limited to the Cash Payments to be made during that year, and the Revenue collected or credited in cash during any year being (for account purposes only) deemed to be the income for that year, the cash difference is substantially a Profit and Loss Balance, or, in other words, forms the "Cash Basis" of the system on which it was designed by the Audit Act
Amendment

Amendment Act of 1895 that the Public Revenue and its Appropriation to the Public Service should be accounted for. The Balance at the 30th June of any year should, therefore, be both a Cash and a Financial Balance, about the amount of which there should be no dispute.

20. Unfortunately, however, while the Audit Act Amendment Act of 1895 established the new principle on which the Annual Appropriation *out of* the Revenue was to proceed, it was only made to apply to such Appropriations for future financial years, commencing with the first day of July, 1895, without in any way recognising and providing for the fact that the Appropriation Act of 1895 did not expire until the 30th June, 1896—that the Appropriation Act of 1894 did not expire until 31st December, 1895—that there were Appropriations even of 1891, 1892, and 1893 then still alive—and that the Statutory Special Appropriations did not and could not lapse at the expiry of a financial year if not operated upon before that date. Those omissions have added to the confusion in regard to the true condition of the Public Accounts of 1895–6, and subsequently, which it was the expressed design of the Act quoted to remove. If the date of its commencement had been made, as events have proved it should have been more properly the 1st July, 1896, instead of 1st July, 1895, a large amount of trouble and misunderstanding would have been avoided. In regard to the mode of accounting for the permanent statutory obligations, special attention is requested to the remarks on the subject contained in paragraphs 15 and 16 of my Report on the Accounts of 1895–6.

21. In illustration of the foregoing remarks, a statement is appended showing that, at the 30th June, 1895, the date on which all past liabilities were supposed to have lapsed under the operation of the Audit Act Amendment Act of 1895, there were Statutory Appropriations undischarged to the amount of £1,895,337 12s. 10d., and subsequently increased by £723 18s. 5d., balances restored, to £1,896,061 11s. 3d., the Revenue Account having been at the same date overdrawn to the amount of £834,403 3s. 9d., according to the Treasurer's Account. The Statement marked F shows how those liabilities have been disposed of. (Page 197.)

22. If the Revenue Accounts were in a healthy condition there should always be a sufficient Cash Balance at 30th June to cover the then unpaid accrued interest on the outstanding Public Debt, and any other unpaid Statutory Obligations due at the same date. Thus, at the 30th June, 1899, there should have been cash in hand to cover the outstanding Special Appropriations shown on page 190 to have been at that date £595,226 19s. 0d. Any sum beyond such a Reserved Balance would be free money, available for Annual Appropriation by Parliament, and a properly-constituted Appropriation Account would always show how the Revenue Account stood in relation to the demands upon it by the aggregate Appropriations under Statute. Taking for example the gross Revenue Receipts for 1898–9 at £9,753,775 0s. 5d., and deducting therefrom the refunds and charges on collections during the year, there results a net sum of £9,572,911 19s. 11d. subject to Appropriation by Statute, and to the annual charge of £150,000 for the redemption of Treasury Deficiency Bills. The Appropriations by Statute for the Services of the year 1898–9, together with £150,000 already mentioned, having amounted to £10,302,449 13s. 5d., there is a *prima facie* excess of Appropriations over Income of £729,537 13s. 6d.; but, allowing for the surrenders of unrequired Balances at 30th June under the Audit Act Amendment Act of 1895, and allowing for the residue of fixed Appropriations which could not come within the year's payments on the cash
basis

basis system, and which, consequently, become a primary charge on the Income of the following year on the same system, there is really a small balance to the good on the year's "Revenue Appropriation Account," as follow:—

	£	s.	d.
To Net Revenue Receipts during the Financial			
Year 1898-9	9,572,911	19	11
„ Surrender of Appropriations unexpended			
at 30th June, 1899	153,985	11	0
„ To Balance of Fixed Statutory Appropria-			
tions, payable in the year 1899-1900 ...	595,226	19	0
	<hr/>		
	£10,322,124	9	11
	<hr/>		
	£	s.	d.
By Fixed Statutory Charges for the year			
1898-9	3,264,464	17	9
„ Annual Charge for the Liquidation of the			
Deficiency Debt (Treasury Bills Acts) ...	150,000	0	0
„ Annual Appropriation Act for 1898-9			
(No. 35 of 1898)	6,887,984	15	8
„ Balance credit, 30th June, 1899	19,674	16	6
	<hr/>		
	£10,322,124	9	11

23. As that balance includes a sum of £7,961 transferred from the General Loan Fund under a Loan Service Appropriation of 1889, on account of a Revenue Service of 1886 and previous years, that sum is accounted for further on as a credit to the Revenue Deficiency Account. But the whole balance, being shown above to be practically a "profit" on the year's income (as a single year's account), without any authority or liability to expend it, virtually reduces the Deficiency Debt, and in fact does reduce the debit cash balance which existed at the 30th June of the previous year on a similarly-framed account for the year 1897-8.

24. It may be useful here to show how, for a few previous years, the account of the Revenue Proper has been affected by the Statutory Appropriations out of it under a "Revenue Appropriation (a Profit and Loss) Account." Commencing with the year 1894, the first complete year prior to the change in the period of the Financial Year, and to the change in the conditions of the Annual Appropriations out of the Revenue, a series of Balance Sheets have been prepared, and are exhibited in the accompanying Statement marked G, pages 198-201.

25. An inspection of that statement will show that the year 1894 commenced with a debit balance of £72,378 9s. 7d., irrespective of the amount spent to the same date for purposes outside of the ordinary Appropriation Account to the extent of £818,895 6s. 4d. (*vide* Statement D), and that the year 1894 closed with a debit balance of £54,322 15s. 11d. Each of the following years also shows a debit result, the balance at 30th June, 1899, having reached a sum of £707,873 11s. 3d. If to that result be added the balance of Temporary Issues at the same date, £896,771 16s. 4d., the aggregate amount of Revenue Issues in excess of Income was £1,604,645 7s. 7d. The cash overdraft, as shown by the Treasury, having been £579,945 7s. 7d.

(*vide*

(*vide* Statement A, Column 7.), the difference represents the amount of the Treasury Deficiency Bills of 1895—£1,024,700. To reach that result, however, £600,000 of the new Deficiency Bills were applied to the redemption of a like amount of the Deficiency Bills of 1889. The amount outstanding of those Bills at 31st December, 1894, was £1,752,884, and at 30th June, 1899, £1,152,884, the Revenue having been charged each year with the actual payment of £150,000, and through the deficiency of Income for the purpose the four years charge, £600,000 in all, forms part of the Debit Balance of £707,873 11s. 3d. on the Appropriation Account at 30th June, 1899.

26. The Debit Balance of £72,378 9s. 7d., with which Statement G opens, is arrived at in this way: The Treasury Debit Balance at 31st December, 1893, was £911,028 4s. 7d., but was in excess to the amount of £19,754 8s. 8d., which had been improperly transferred to the Trust Fund Account, as explained in Report for 1893. From the debit thus reduced to £891,273 15s. 11d. there is subtracted the sum spent to that date for outside purposes, £818,895 6s. 4d., leaving an absolute excess of £72,378 9s. 7d.

27. The sum of £19,754 8s. 8d., quoted in preceding paragraph, is the balance of sums charged as paid from Revenue in 1893; but really transferred to the Trust Fund Account for after operations. It was consequently disallowed as for 1893, but was corrected in 1894, by £2,642 17s. 5d.; in 1895 by £1 11s. 11d.; in 1895-6 by £15,750 11s. 7d.; and finally in 1896-7 by £1,359 7s. 9d.

28. The propriety of crediting the Revenue Account in 1895 with a sum of £341,319 9s. 2d. for accrued interest recovered from the General Loan Account has also been challenged and discussed from different standpoints. As to the amount itself (the correctness of which has not been called in question), it is simply one of the deductions made from the sums received in terms of the accepted tenders for loans called for by the Government as part of the costs of negotiation. Being due to the Revenue, it should not have been credited to the General Loan Fund; or, at all events, since it was so credited, probably as a matter of convenience, it should have been immediately thereafter transferred to the credit of the Revenue Account. The effect of the delay in making such transfer has been that the General Loan Fund has had the benefit of the credit of that considerable sum and used it for ordinary expenditure on loan services, while the Revenue, being largely in debt, was deprived of it.

29. The transfer having restored to the Revenue Account what it had been deprived of in previous years, the amount, instead of being treated as a part of the ordinary Income of 1895, should properly have been "*specifically*" devoted to a reduction of the Deficiency to which the want of the credit of that considerable sum had contributed. Indirectly, that would appear to have been done by the limitation of the amount of the new Treasury Deficiency Bills of 1895-6, to the extent of the transfer, £341,319 9s. 2d.

30. Coming now to the Revenue transactions of the financial year ended 30th June, 1899, attention is requested in the first place to the amended classification of the Revenue and Receipts (already referred to), according to which the following Current Account has been prepared in continuation of the similar account shown in the Report for the year 1897-8:—

Dr.

TOTAL... ..										

It thus appears that the net Receipts were £9,721,957 17s. 11d., and the Payments £9,739,657 12s., creating an excess balance of Payments within the year of £17,699 14s. 1d. Deducting that excess from the credit balance of £62,363 13s. 7d. shown in the corresponding account for 1897-S there results still a credit balance of £44,663 19s. 6d.

31. While, however, the Revenue Account as a whole exhibits a deficiency, it must be obvious that any actual credit that may appear to arise upon a portion of the whole account can only be a nominal one, for account purposes, and can only be reckoned as a set-off against debits existing elsewhere in the same account. It does not, therefore, consist of free money available for disposal otherwise, and cannot, therefore, be legitimately carried forward under that character. As previously remarked (Paragraph 16) it is essential that quotations of balances be always made with reference to the facts which constitute them.

DEFICIENCY REVENUE ACCOUNT, 1898-9.

32. The remainder of the Revenue Account, hitherto stated separately, to show the progress of the Deficiency Account, is continued hereunder :—

Dr.		<i>Deficiency Account for 1895 (June) and previous years.</i>				Cr.

						£ 2,961,077	7 8

The "Gross" Deficiency, that is, the Accumulated Deficiency if no allowance be made for the Balance shown as at the credit of the Current Account, £44,663 19s. 6d., was £2,802,193 7s. 1d. The last-mentioned amount includes outstanding issues to the amount of £679,558 1s. 8d. (Appendix A, page 217), which may be recovered in future years, or be converted into *final* payments. During the year under review the Gross Deficiency was reduced by £158,884 0s. 7d.

Consolidated Revenue Statement, 1898-9.

33. For the sake of comparison with previous years it is desirable on this occasion to continue the Consolidated Statement of the gross Receipts and Disbursements from 1886 to 1899, showing the progressive condition of the deficiency as a cash account only. For a more minute analysis of these figures reference is requested to Statements A to G (pages 190-201). The information contained in those statements may not improbably render the continuance of this form of return unnecessary in future.

Revenue balance as per Treasury Statement	116,523 5 8
Overdraft, as above	<u>£579,945 7 7</u>

The "Net" Deficiency, £2,757,529 7s. 7d., includes unadjusted issues to the amount of £896,771 16s. 4d. (for details of which see Supplement to Appendix A, page 217), which fall to be adjusted in future years by cash or by transfer to the Appropriation Account.

34. From the foregoing Accounts Current and the explanations preliminary thereto, it may be seen that *before the Balance Surplus of Receipts over Disbursements* (£44,663 19s. 6d.) can be reckoned as an absolutely free Cash Credit Balance on the Current Revenue Account as a whole, and exclusive of the liability to meet the Treasury Deficiency Bills (£2,177,584) there requires to be provided a sum equal to it and the net Cash overdraft as well, shown above to be £579,945 7s. 7d., or together £624,609 7s. 1d. If the Outstanding Issues referred to previously, which may be said to have occasioned the immediate Cash Overdraft, were adjusted, the Revenue Account *as a whole* would then be in Credit, but only to the extent to which such adjustment might be *effected by cash*. Any improvement of the balance that might thus occur would still, of course, be subject to the liability of £2,177,584 on account of the Treasury Deficiency Bills, which, by the Treasury Bills Acts, will take about fifteen years to discharge at the rate of £150,000 per annum.

Further information as to the actual condition of the Revenue Account will be found under the "Analysis of Balances," pages 180 to 184.

SPECIAL

SPECIAL SUPPLEMENTARY REVENUE ACCOUNT, CHURCH AND SCHOOL LANDS ACT,
1897, 61 VICTORIA, No. 20.

35. Exception was taken in last year's Report to a credit of £4,081 as Premium and Interest on the realisation of Debentures to the amount of £56,000 for Expenditure on Public School Buildings, under section 14 of the Act 61 Victoria No. 20, as an improvident and incorrect transaction. During the year 1898-9 Funded Stock to the amount of £119,271 19s. 3d. was also taken credit for with a premium of £17,017 5s. 10d., which, together with certain interest upon it, and other securities, to the amount of £7,663 0s. 1d., has been passed to the credit of the Public School Buildings Account, 61 Victoria No. 20. All the three entries mentioned, making in all a sum of £28,761 5s. 11d., if legitimate at all, of which there is very considerable doubt, were certainly not credits to be expended upon Public School Buildings, but being received, rightly or wrongly, subsequently to the 2nd December, 1897, should have been carried directly to the credit of the Consolidated Revenue Fund, whence the amount cannot be drawn, except it be made the subject of a distinct Vote of Parliament.

36. This matter was gone into very fully in paragraphs 19 to 32 of my Report for the year 1897-8, and has occasioned a considerable amount of correspondence. The Treasury claim an opinion—obtained from Mr. Attorney-General Want—as justifying their action in enlarging the balance at the credit of the Public Instruction Endowment Account beyond the amount as it stood at the 2nd December, 1897, £202,499 18s. 11d., and which was the sum, and the only sum, dealt with by Parliament in passing the Act in question, while I hold most distinctly that of that sum only £193,871 19s. 3d. was pledged for expenditure on Public School Buildings. The opinion referred to, together with two letters addressed by me to the Treasury, under date 22nd May and 3rd August, 1899, on the subject of Mr. Want's opinion and the disputed balance, to which no replies have been received, are given in Appendix P.

37. Special attention is requested to the fact that the Funded Stock above quoted includes £106,781 19s. 3d., issued originally at 4 per cent., and *interminable*. The transfer of that Stock to the Government Savings Bank on the same terms is considered to have involved an unnecessary extra annual charge on the Revenue, as pointed out in last year's Report.

The balance shown by the Treasury on this account as £78,125 15s. 2d. at 30th June, 1899, should be reduced to £49,364 9s. 3d., and the balance be written off to Revenue. The amount of Payments made since the 30th June, 1899, is £30,000.

IRREGULAR CHARGE TO A VOTE.

38. On examination of the charges paid under Vote 55, "Special Grants to Country and Suburban Hospitals," there was found a payment of £300, a grant to the Soup Kitchen and City Night Refuge towards the expense of a separate building for extending the benefits of the Institution to poor women and children. The payment clearly ranked more properly under Vote 50 as having been provided for aid to women and children. The more correct course, however, was to have obtained a specific vote for the grant. Efforts were made to get Vote 55 relieved of this erroneous charge before the close of the year, but without effect. The payment had, therefore, to be disallowed, but it has since been transferred to the Treasurer's Advance Account, and will in due course appear in the next Estimates.

THE LIABILITIES OF THE REVENUE.

39. The total Liabilities of the Revenue for the year 1898-9 under statute, Special and Annual, are exhibited in full detail as usual in Appendix A and its Supplements, together with the discharge thereof by actual Disbursements and by Surrender of Balances under the Audit Act, 1898, or by writing off portions of the Special Appropriations which were no longer required.

40. The following is a summary statement of the result of the year's operations, showing the Balances of the Special Appropriations which could not be applied during the year, and are necessarily carried forward as first charges on the financial year commencing 1st July, 1899, and as referred to elsewhere in this Report :—

OTHER RECEIPTS AND PAYMENTS (REVENUE ADVANCE ACCOUNT)—CONSOLIDATED REVENUE FUND.

41. The sums shown at the foot of the Current Revenue Account on previous pages 158-9 as "Other Receipts" and "Other Payments," represent Advances and other Issues which, for one reason or another, are treated as temporary transactions only, some of which become finally parts of the Revenue Account Proper by transfer

transfer to Expenditure under Appropriation by Statute or by recredit as Cash. The total of such temporary transactions outstanding at 30th June, 1898, was £868,281 6s. 4d. The Balance of similar operations up to 30th June, 1899, and outstanding at that date, was £896,771 16s. 4d.—an increase on the year of £28,490 10s. 0d. Full details of those figures can be seen in the Supplement to Appendix A at page 217.

The Outstanding Balance at 30th June, 1899, was made up of—

EXPENDITURE IN EXCESS OF PARLIAMENTARY APPROPRIATIONS—INDEMNITY ACT.

42. The amount just quoted as "Expenditure Suspense Account," £62,388 16s. 11d. together with the Expenditure in excess of Parliamentary Appropriation to which attention was drawn in last Report, has now been included in the "Treasury Indemnity Act, 1899." The same Act includes similar unauthorised payments out of the Consolidated Revenue Fund during the period from the 1st to the 23rd September, 1899, pending the passing of the Supply Act No. 5, 1899, for the month of September. Those payments amounted to £302,075 3s. 8d., but they properly belong to the Accounts of the present Financial Year. The total unauthorised Payments from the 1st October, 1897, to the 23rd September, 1899, for which the Indemnity Act was passed, amounted to £1,278,940 10s. 7d. as fully set forth in the Act itself; but items making up the sum of £62,388 16s. 11d. require to be cleared by an Appropriating Vote.

TREASURER'S ADVANCE ACCOUNT.

43. The Treasurer's Advance Vote for 1898-9 of £100,000 was employed during the year in making payments to the extent of £168,022 12s. 6d., but by transfers of portions of those payments to Votes available for such adjustment and by recredits in cash, the net sum outstanding to be adjusted at 30th June, 1899, was reduced to £97,733 5s. Adding to this the still unadjusted Advance of £13,000 in 1893 to the Municipal Council of Penrith and a sum of £882 14s. 6d., advanced in 1897-8 for
Harbour

Harbour Improvements at Moruya, the whole amount issued under the Treasurer's Advance Votes of 1893, 1897-8, and 1898-9, which required to be adjusted at 30th June, 1899, was £111,615 19s. 6d. Full details showing how that sum is arrived at are given in Appendix C, pages 224-30.

It should be added here that the excess issue of the Vote for 1897-8, viz., £37,424 15s. 8d., which formed part of the unauthorised expenditure for that year, has been included in the Indemnity Act of 1899, referred to elsewhere.

44. So far as known, no progress has been made towards the settlement of the advance of £13,000 to the Municipal Council of Penrith, to which special attention was directed in paragraph 48 of last Report.

45. It is satisfactory to note that the special terms of the Advance Vote for 1898-9 transferring the whole Vote *in globo* to a Trust Fund Account have been omitted in the now current Vote for 1899-1900, thus preserving the operations upon it within the limits of the Revenue Account, as successfully contended for in 1894, and since carried out with most satisfactory results.

THE TRUST FUNDS ACCOUNTS.

46. The Trust Funds Accounts for the past year, excepting the Pension Accounts, show an expansion in both receipts and payments, closing with a gross credit balance of £9,257,888 7s. 7d., an increase of £792,070 0s. 6d., principally owing to the augmented balances at the credit of the Government Savings Bank—£378,466 2s. 1d., and of the Savings Bank of New South Wales—£250,000, in all £628,466 2s. 1d.

47. The following statement is an aggregate of the details shown at pages 3 and 70-71 of the Treasurer's Accounts, excluding, as usual, transfer entries for both receipts and payments, which, as adjustments only, form no proper part of either, to the amount of £523,688 15s. 6d :—

THE CIVIL SERVICE SUPERANNUATION ACCOUNT.

50. The chief feature of the Civil Service Superannuation Account is the steady reduction in the Balance at its credit, a further fall of £57,994 12s. 4d. having occurred during the year. The credit Balance at 30th June, 1899, stood at £328,917 2s. 1d., of which £313,000 remained invested in Treasury Bills at 4 per cent. interest, Bills for £25,000 having been transferred to the Sinking Fund of the Municipal Council of Sydney.

51. The gross Income shows a small decrease of £622 12s., and the gross Disbursements were also less by £5,914 16s. 6d. on the operations of the year; but the main cause of the loss of funds is to be found in the serious difference between the annual charge for Pensions and the Income available to meet it.

52. The Pension Roll, as it stood at 30th June, 1899, amounted to £90,604 2s. 10d., while the Income for the year was only £46,241 18s. 4d. New pensions to the amount of £5,673 6s. 10d. were added to the Roll, while lapsed pensions were struck off to the amount of £6,900 17s. 5d., the difference showing an annual rate reduction of £1,227 10s. 7d. in favour of the Fund. Full particulars of those rates are given in *Appendix M*, pages 262-4.

The annual charge upon the Schedule B Fund of the Constitution Act (£3,500) remained at £3,499 18s. 4d.

POLICE PENSIONS.

53. The aggregate Police Pension Funds—that is to say, the Police Superannuation Fund and the Police Reward Fund combined—were reported last year as in debt to the Treasurer's Advance Account for £9,068 3s. 3d. The transactions of the new year, 1898-9, exhibit a further deficiency of income to meet the charges for Police Pensions and Gratuities paid to 30th June, 1899, involving further aid through the Treasurer's Advance Account to the amount of £10,704 10s. Both those advances, making £19,772 13s. 3d., have now been covered by grants from the Consolidated Revenue Fund *without conditions of repayment*. The balances, respectively, of the two above-named Police Funds, to the aggregate amount of £1,369 2s. 4d., can therefore be correctly classed as cash balances at their credit on the close of the year; but they were insufficient to equal outstanding claims, as may be seen from the following statement:—

54. The annual charge for authorised Police Pensions, as at the 30th June, 1899, was £23,460 5s. 10d.—a small net increase of £296 5s. 5d. over the amount charged for the previous year, there having been thirteen new pensions granted for £2,136 in all, while eleven pensions lapsed to the amount of £1,839 14s. 7d. (*Vide Appendix M*, pages 263-4.)

55. The aggregate income of the two funds for the year 1898-9 was £14,969 19s. 6d., a decrease compared with the previous year of £311 7s. 2d. The payments for the same year 1898-9 aggregated £25,741 11s. 3d., showing by comparison with those of the previous year a decrease of £804 17s. 3d., the cash operations of the year therefore improved the combined funds by £493 10s. 1d. The accrued income being say at the rate of £15,000, and the Pension Roll of Payments being say £23,460, an annual addition of £8,460 is required to balance the annual liability for pensions without any allowance being made for liabilities on account of gratuities.

PENSIONS AND GRATUITIES GENERALLY.

56. The following abstract shows the total expenditure for Pensions within the past year to have been £135,958 1s. 1d. The Consolidated Revenue Fund provided £30,394 0s. 1d. of that sum under special and annual appropriations for the purpose, and the remainder £105,564 1s. was contributed by the members of the Civil Service and by the Police Pension Funds. For the same period the payments for gratuities aggregated £16,664 3s. 11d.—£12,958 5s. 9d. from the Revenue and £3,705 18s. 2d. from the Civil Service and the Police Pension Funds.

THE GENERAL LOAN ACCOUNT.

57. The form of the Statement of the Treasurer's General Loan Account, being the same as that adopted for the year 1897-8, is, of course, open to the same objections as those stated in my last Report, and the Statement cannot therefore be accepted. An amended abstract of the Loans Receipts and Disbursements, including a reclassification of the Services, has accordingly been prepared as a substitute for that submitted by the Treasury for audit, and will be found as Appendix D, page 231. That Statement shows the transactions free from re-credits and transfers, which only serve to confuse results and mar the usefulness of the account for public information. The figures in the following Account Current of the General Loan Fund for 1898-9 are an abstract of the totals shown in the detailed statement Appendix D, pages 231 to 243.

58. The additions to the funds available for Loan Services have been confined to the proceeds of the sales of Funded Stock in the Colony to the amount of £952,995 11s. 9d., bearing interest at 3 per cent. Deducting £1,250 for brokers' commission, the net amount realised was £951,745 11s. 9d. The ordinary Disbursements directly under Loan Service Votes amounted to £2,401,833 18s. 10d., showing a debit balance on the year of £1,450,088 7s. 1d. At the close of the year 1897-8 there was a credit balance of "Over Issues and Repayments" to the amount of £70,813 1s. 6d., of which there was applied during 1898-9, £7,099 4s. 4d., and written off to the General Account, £23,058 0s. 8d., leaving a balance of £40,655 16s. 6d., which, added to the balance available on 30th June, 1899, of the recredits of 1898-9, £167 0s. 5d., leaves a balance still open for Expenditure, apart from the ordinary Votes Account, of £40,822 16s. 11d. Nearly the whole of that balance arises from Loan Appropriations for Railway Services, which have long ago been completed, and ought to be written off as Liabilities. This course has been several times urged to be taken, but hitherto without effect.

59. The question of Liabilities in respect of the General Loan Services requires to be definitely settled with regard to both the raising and accounting for moneys borrowed for the purpose of defraying the cost of large works while the ordinary Revenue Income is insufficient. There is no limit fixed to the life of a Loan Appropriation as in the case of Revenue Votes, nor are there any limits as to how and when an authority to borrow shall be exercised. Nor is any provision made for dealing with balances of Loans or of Loan Appropriations. The authorities for borrowing and the authorities for appropriating moneys borrowed might be separated with great advantage. Attention is again most respectfully invited to this matter as dealt with in my Report on the Accounts for 1895-6, paragraphs 58 and 59.

60. The following Account Current shows in abstract the transactions in the General Loan Fund during the Financial Year, 1898-9, closing with a net debit balance of £1,421,898 3s. 11d:—

embodied in this statement, and which are enumerated in Appendix D, page 244 form part of the General Trust Funds, as stated by the Treasurer

61. The state of the Advances of Loan Moneys for the Purchase of Stores, although still shown in the Treasurer's Accounts as Trust Fund Accounts, is again introduced into the foregoing account as an important adjunct to it in framing a complete statement, so far as possible, of the whole transactions with Loan Moneys.

62. On the subject of Advances from the General Loan Account, it should be remarked here that among the Disbursements there are included some floating Advances, made chiefly to the Public Works Department, of which £27,225 were repaid in cash after the accounts were closed, and of which a further sum of £26,000 still remained unadjusted, the time for adjustment having been extended to 30th June, 1900. The effect of that arrangement is that the Disbursements, to the extent of the Advances referred to as unadjusted on 30th June, 1899, appear as final payments against the votes out of which the advances have been made. A considerable proportion of those advances are required for the immediate payment of wages, the distribution of which to specific services cannot be arrived at in time to fully adjust them by the close of the year.

63. To meet the difficulty the following suggestion was made to the Treasurer by letter of 26th June last—"That provision be made at the end of the Loan Service Estimates for a standing open sum to facilitate the payment of wages and other current charges for the service of works payable out of borrowed moneys," and that the terms of vote might be the following:—"To provide for the issue of floating advances to meet the immediate payment of current wages and other expenses on account of Public Works and Services, *within amounts authorised by Loan Acts*, pending distribution to specific Loan Service appropriations, and to be annually accounted for in connection with the General Loan Fund Account—say, £50,000." Further, "That the proposed provision be applicable only to votes already passed up to date of advances, and should not therefore, if adopted, be included in any amount that may be authorised to be borrowed for Services." That proposal was subsequently approved of by the Colonial Treasurer, but no action in that direction appears in the last Loan Appropriation Act. The proposed advance would be operated on similar lines to those of the Treasurer's Advance Vote, but with the important difference that its use would be strictly limited to services actually voted, for which the officers receiving advances out of it would be held responsible.

64. For want of such an open advance moneys issued and charged directly to a Loan Service Vote as an advance to be accounted for are frequently used for Expenditure that on adjustment is found to be chargeable to one or more Heads of Account other than that to which the advance was charged in the first instance. Under the existing practice the irregularities referred to are in many cases practically unavoidable, but the correction of them involves a large number of transfers which often occasion a good deal of inquiry prior to their being finally allowed to stand as arranged by the Departments concerned. It not infrequently happens that some of the Payments belong to the Revenue Account, and, while the Store Accounts above referred to are continued to be operated as Trust Accounts, many transfers of charges have to be made to and from those accounts. It may easily, therefore, be understood that by means of the proposed general floating Advance the above irregularities and inconveniences would, to a large extent, be avoided.

The Wages and Time Sheets are the principal source of difficulty in allotting the charges to their proper Heads of Expenditure; but the ascertained charges, on analysis of the wages paid from a general advance, would be at once transferred from it and rest under their appropriate Heads of Account, and the Advance Fund would be relieved thereby for further similar uses.

65. The Public Debt created under the Loan Acts (Funded) by the issue of Debentures, Inscribed Stock, or Funded Stock, for application to public works and services chargeable to the General Loan Fund has been varied during the year to the extent of a net addition of £575,595 11s. 9d., as shown below:—

LOAN CASH BALANCES AND WARRANTS.

70. The question as to the Unauthorised Payments for Loan Services without the Warrant of the Governor, to which attention has been directed in recent Reports, has so far been disposed of by Clause 3 of the "Loan Account (Transfer) Act, 1899," which grants an indemnity to the Colonial Treasurer, the Officers of the Treasury, and all persons concerned in the matter. The unwarranted payments in question extended over the period from August, 1897, to December, 1899, and amounted to the large sum of £3,820,071 19s. 2d.

71. The provision of Clause 2 of the same Act, as the words stand, have the effect of sanctioning the certificates of legal availability and applicability for any sums which have been authorised for expenditure by Parliament without any limiting

limiting proviso that such certificates must be based upon the General Loan Account being supplied with cash to meet such certificates in one or other of the ways specified in Clause 1.

72. Under the operation of Clause 2, accordingly, I have felt reluctantly obliged to certify to numerous instruments, and which have thus, under the Governor's signature, become Warrants to draw upon an account which had already a large debit balance upon it. The Governor's Warrants being substantially cheques against the General Loan Fund, some arrangement is necessary to obviate the anomaly of the Governor being asked to sign Warrants for issue of Loan Moneys in the absence of funds to meet them. This is all the more important as the terms of the Loan Acts provide for issues only under appropriations of moneys actually raised by loans, or, under the provision of clause 1 of the "Loan Account (Transfer) Act, 1899," by moneys temporarily lodged to the credit of the accounts drawn against, pending the actual raising of loans under the Authority of Loan Service Acts.

LOAN ADVANCES TO MUNICIPALITIES FOR WATER SUPPLY WORKS, COUNTRY TOWNS.

73. In Appendix L, page 261, will be found a statement of the transactions to 30th June, 1899, under the "Country Towns Water Supply and Sewerage Act of 1880," and "Amended Act of 1894," in continuation of a similar statement appended to last year's Report. No new advance had been made, and the amount of the Principal outstanding and repayable by Municipalities was £407,414 3s. 1d.—a slight decrease on the year. An adjustment is still required of the Orange Waterworks Account to the amount of £541 11s. 4d., as explained in former Reports.

74. Attention is again invited to the importance of amending the Act 57 Vic. No. 19, which omits provision for the disposal of the instalments repaid by Municipalities of Advances made to them under that Act. The amount, as yet, is small, but being a repayment of loan money, there appears no reason why the Act should have directed it to be credited to a Trust Account.

SPECIAL LOAN ACCOUNT—TEMPORARY ADVANCES TO SETTLERS.

75. Towards the relief of settlers in necessitous circumstances and financially embarrassed owing to prolonged droughts, an Act was passed in April, 1899, authorising the raising of a Loan by the sale of Inscribed Stock to the amount of five hundred thousand pounds, to be applied only in making temporary advances to relieve such settlers under special conditions prescribed by the Act, and in accordance with regulations to be made by the Governor and be carried out by a Board of Management.

76. The interest on the Loan was to be limited to $3\frac{1}{2}$ per cent., and the Loan itself to be redeemable after twenty years. The Treasury offered 3 per cent. only, and at that rate placed Stock to the amount of £220,050 at par, but at an expense of £650 for brokerage, the proceeds being credited as £219,400. Of those proceeds, an advance of £1,000 was made to the Board, but by the 30th June advances to settlers, in terms of the Act, had been made by the Board of Management to the amount of £415 only. As this new account practically belongs to the new Financial Year 1899–1900, the actual results of the now current operations of the "Advances to Settlers Act, 1899," will fall to be noted in next Report.

THE LONDON ACCOUNTS.

77. The transactions in London, so far as they have been brought into the Treasurer's Accounts and adjusted in Sydney, are all embodied in those Accounts under their respective Funds and Services, as detailed in Appendix E, pages 245-51.

The total Receipts and Disbursements in London during the period from 1st May, 1898, to 30th April, 1899, inclusive, were on account of the following Funds :—

	Receipts.	Disbursements.
Consolidated Revenue Fund ...	£13,171 13 10	£2,091,895 17 6
General Trust Fund ...	4,047 0 4	192,259 19 5
General Loan Fund ...	22 11 7	347,364 3 6

Totals from 1st May, 1898, to 30th April, 1899...	£17,241 5 9	£2,631,520 0 5
--	-------------	----------------

78. To bring the London transactions even with the date of the Sydney Accounts, there have to be added to the above the operations during May and June, and also remanets from March and April, 1899, which had not been adjusted in Sydney on closing the year's accounts to 30th June, 1899; the amounts are given hereunder :—

	Receipts.	Disbursements.
Consolidated Revenue Fund ...	£3,195 17 10	£204,842 2 10
General Trust Fund ...	325 14 0	46,342 10 6
General Loan Fund	9,344 17 0
	£3,521 11 10	£260,529 10 4

79. The Cash Balance in London, as quoted by the Treasurer on page 4 of his Abstracts, was £1,132,380 7s. 5d., but as at 30th June in London, according to the accounts of the Bank of England and of the London and Westminster Bank, and the Statement of Remittances in transit, the amount was £875,372 8s. 11d., the difference, £257,007 18s. 6d., representing the outstanding balance of accounts to be locally adjusted as above stated.

80. It is very much to be desired that some arrangement should be adopted whereby the transactions in London up to the close of the Financial Year should be embodied in the Sydney Accounts at the same date. With the facilities which now exist for immediate communication with London there should be no insuperable obstacle to the accomplishment of such a desirable result.

THE GENERAL PUBLIC ACCOUNT—STATE OF THE BALANCES.

81. The main divisions of the General Public Account, viz. :—The Consolidated Revenue Fund, Current and Deficiency Accounts; the Trust Funds, General and Special; and the General Loan Fund,—having been already dealt with separately, it now remains to show the relationship of those Funds to the General Cash Balance at the credit of the Treasury, in Sydney and London, on the 30th June, 1899, and especially the relationship in which the Securities representing investments of Trust Funds stand to the gross balances stated to be at the credit of those Funds. This is of some importance, as the "Credit balances on the 30th June, 1899," £7,552,570 11s. 3d., as given in the Treasurer's General Summary prefacing the details

details of his Receipts and Disbursements at page 3, are apt to be read as Cash Balances, being in the General Summary apparently the result of Cash Receipts and Payments, while the fact is that more than three-fourths of their amounts exist in the shape of securities at the Credit of the Trusts and at the Debit of the Government.

ANALYSIS OF THE BALANCES.

82. The results of an Analysis of the Treasury Ledger Balances will be found in the following four tabular statements:—

- (1) Ledger Balance of each Account on 30th June, 1899.
- (2) Cash " " " " as per Ledger.
- (3) Bank " " " " "
- (4) Cash " " " " as adjusted.

The "Ledger Balances" making up the total balance on the "General Public Account"—that is to say, the credit balance of the aggregated balances of the Consolidated Revenue Fund, the General Trust Funds, the General Loan Fund, Advances to Settlers Loan Account, and the Special Trust Funds—on the 30th June, 1899, amounted to £7,552,570 11s. 3d., according to the subjoined statement, which comprises the data whereupon the Treasury figures may be reconciled with the Bank Balances:—

Statement (1).

* Exclusive of £150,000, instalment towards redemption of Treasury Bills, which have no place in this Statement.

† As explained elsewhere, this balance should be reduced by £28,761 5s. 11d.

‡ To harmonise with the Bank Balance of the General Loan Account, the £1,500,000 advanced from General Trust Funds during 1895 will be, in the subsequent Statements, added to the £1,421,898 3s. 11d., shown above, and the General Trust Funds Balance, £8,610,703 19s. 6d., reduced to a like extent.

83. The aggregate Balance is composed of Cash and Securities, the face value of the latter being fully three times that of the cash portion. Excepting Securities and fixed deposits to the value of £41,333, the Securities represent Government Stocks, Debentures, and Treasury Bills, issued to provide money for Loan Services and Revenue Deficiencies, and sold to the Trusts in the General and Special Trust Funds Accounts. As these Trust Funds are placed under the care of the Government, and in the custody of the Colonial Treasurer, for the benefit of various agencies, they are *not* properly *Credits* in the general acceptance of the term, but represent so many *Liabilities* against the Government.

84. Those *Liabilities*, so far as they are represented by Government Securities for moneys borrowed from the Trust Funds, appear naturally in their place as a part of the General Public Debt of the Colony. The Colonial Treasurer, as Administrator

or

or Trustee of the Trust Funds and the Custodian of the Securities, is entitled, of course, to take credit in his accounts as such Trustee for the amount of Securities which he holds for the moneys he has lent to the Government; but the Public Account, as such, is not also entitled to take credit for those Securities against its liabilities for the Public Debt, inasmuch as the money for which the Securities in question were issued had been expended on the Services for which it was borrowed, and would have to be replaced if required for the purposes of the Trusts in emergencies.

85. When it is seen, from following Statement, that the amount of Trust Funds investments has reached the large sum of £5,698,825 13s. 2d., of which £41,333 represent "Miscellaneous Securities other than Government," and £5,657,492 13s. 2d. represent Government Securities, all of which, except the former amount (£41,333) has been expended in connection with Loan Services and Revenue Deficiencies, and yet appear as a part of the Credit Balances in the Public Accounts, *it becomes an important question* whether the General Trust Funds Account should not be shown as a *distinct branch* of the "Public Account" as kept in the Banks, *in the same form as the General Loan Fund Account is now shown*, but always reckoned, nevertheless, as directed by the Audit Act, as the one "Public Account."

86. The Ledger Cash Balance and the Face Value of the Securities on 30th June, 1899, of each Account were as follow:—

Cash Credit Balance , in Sydney and London, 30th June, 1899, available for Ordinary Operations			1,268,106 11 6		

* As explained elsewhere, this amount should be reduced by a transfer of £28,761 5s. 11d. to the Current Revenue Account.

† See note marked (†) on previous page.

87. It will be seen from the foregoing statement that after the face value of the Securities had been eliminated from the Ledger Balances, £7,552,570 11s. 3d., there remained a cash or Working Balance of £1,853,744 18s. 1d. This amount includes the Special Trust Funds which are not subject to issue under warrant, more particularly the Supreme Court Moneys which are not under the control of the Government. In addition to this amount further deductions on account of payments in London are necessary,

necessary, in all a total of £585,638 6s. 7d., thus reducing the available balance to £1,268,106 11s. 6d., which amount represents the whole current balance at the close of the year, available to be carried forward, for the ordinary operations of the succeeding year.

88. The Sydney banking business is transacted by the Bank of New South Wales, the Commercial Banking Company of Sydney (Ltd.), and the City Bank of Sydney; and the "London" business by the London and Westminster Bank and the Bank of England. The operations of the last-mentioned Bank are confined to the Inscription and Negotiation of Loans and the management of half-yearly dividends of Inscribed Stock, while the London and Westminster Bank transacts the ordinary London business in connection with the Public Service of the Colony.

89. The following statement (3) shows the Localities and Institutions where the money was lodged. The amount lodged in Sydney Banks and Treasury was £392,734 2s. 7d., and in London Banks £875,372 8s. 11d. :—

Summary of the foregoing Analyses.

91. To sum up the information contained in the four preceding Statements, it will be seen that, bringing the whole of the amounts of the several Funds, including transactions in London for the months of May and June, 1899, up to 30th June, 1899, the result is an aggregated Cash Credit Balance on that date of £1,268,106 11s. 6d., distributed, in the first instance, to the following Funds, viz. :—

	£	s.	d.	£	s.	d.
At Credit in Sydney :—

THE CONSOLIDATED REVENUE FUND—STATE AT 30TH JUNE, 1899.

92. The Consolidated Revenue Fund having been shown above, at previous page, as overdrawn, no portion of the above distribution can be assigned to it; but to complete the account the London Transactions to 30th June, 1899, not adjusted in Sydney till after that date, in respect to the Revenue Account, have to be added:—

Cash overdraft at Sydney, 30th June, 1899, page 161	£	s.	d.	£	s.	d.

Net Deficiency, 30th June, 1899				*£2,959,175	12	7

The previous history of this result is carried back to the 31st December, 1883, and is given in Statement A referred to in an earlier portion of this report.

93. As already remarked in a previous paragraph (85), it would greatly facilitate the explanation of the Balances, as well as improve the form of the Statements of the Public Accounts as a whole, were the cash transactions in connection with the General Trust Fund *shown in a distinct Bank Account*, and thus exhibit a more definite relation than they do at present to the "Public Account" as kept at the Banks, and a more definite relation to the Consolidated Revenue Fund Account.

THE RAILWAY AND TRAMWAY ACCOUNTS.

94. The total collections for Railway and Tramway Tolls and Miscellaneous Receipts in connection therewith as credited during the Financial Year, 1st July, 1898, to 30th June, 1899, amounted to £3,568,658 6s. 5d., against which there is a set-off by refunds of £55,166 11s. 2d., as detailed on page 31. The net Receipts were, therefore, £3,513,491 15s. 3d.

95. The Expenditure out of Revenue as brought to account within the same period, for Working and all other expenses chargeable to the Railways and Tramways Account, reached the sum of £2,035,982 16s. 8d. (*vide* page 270). The net balance on the year's operations shows then a credit in cash of £1,477,508 18s. 7d. The interest upon the money borrowed and expended for the service of the Railways and Tramways during the same period is computed at £1,491,616 5s. 2d. on the principle explained in former Reports. The general results of the Income and Expenditure for Railways and Tramways for the year ended 30th June, 1899, and also the total results from the commencement in 1850 to that date are shown in *Appendix O*, page 270. During

* Exclusive of Payments by the Bank of New South Wales, to the amount of £11,618 17s. 8d., on account of Revenue Services—not brought to account on 30th June, 1899.

During the year the Expenditure out of borrowed moneys was £589,156 4s. 10d., making a total so expended from the commencement in 1850 to 30th June, 1899, of £41,287,582 4s. 2d.

At the same date there were Unredeemed Securities for moneys borrowed to the amount of £44,555,793 4s. 6d., bearing an annual interest charge from the 1st July, 1899, upon the Consolidated Revenue Fund of £1,641,686 0s. 1d., or an average rate of 3·684 per cent. (*vide Appendix N*, pages 268–70).

LOCAL INSPECTION OF RAILWAY AND TRAMWAY STATION ACCOUNTS.

96. The Inspectors of the Railway and Tramway Station Accounts attached to this Department again report most favourably of the general condition of the Station Accounts throughout the Service during the past year. The number of Stations and offices requiring attention was 353, an increase of 13 over that of the past year, and the inspection of the whole of them was accomplished by the 30th June last. This is the first occasion, it is believed, on which such a satisfactory result has been obtained, the nearest approach to it having occurred in 1889, when, at the close of that year, there remained only three stations uninspected.

It is, further, a very gratifying circumstance that in no case was it found necessary to prosecute for default or to dismiss an officer in connection with the collection of the Railway Receipts, and out of the whole number of inspections it was only found necessary to report thirteen cases to the Railway Commissioners as more or less unsatisfactory.

97. The following Statement exhibits the "Earnings Account" of the Railways and Tramways combined, as verified by the Inspecting Staff:—

Balance Statement Railway and Tramway Earnings for the year ended 30th June, 1899.

<i>Dr.</i> To Net outstandings, 30th June, 1898	£50,863	6	0	
" " Miscellaneous...	7	13	7	
				£50,870 19 7

				3,493,829 12 8
				<u>£3,544,700 12 3</u>
<i>Cr.</i> By Cash remittances to Public Account after adjusting over-remittances...	£3,327,581	12	6	
" Accounts for Services paid by Public Departments through the Treasury	156,985	10	9	
" Transfers from Suspense Account, &c., of items wrongly credited	39	0	9	
" Adjusting entry to clear disallow- ance of proposed refund ...	329	13	4	
" Outstanding and uncollected Accounts (exclusive of £54,890 10s. 5s. unsold Tram Tickets)...	59,764	14	11	
				<u>£3,544,700 12 3</u>

98. The expansion of the traffic, and the constantly varying circumstances of time and place always and unavoidably create exigencies which have to be promptly met without strict regard to the existing rates of tolls as authorised by law. *Appendix J* contains a list of cases where the formal authority of the Governor and Executive Council was anticipated, but subsequently given.

99. In consequence of the prolonged drought in many parts, there has for some time past been a very large amount of exceptional traffic in the conveyance of live stock to and fro in search of grass and water. In such cases special rates and concessions have had to be made, and the actual transactions have occasioned a considerable amount of careful check against undue advantage being taken of the wise and considerate assistance rendered by the Railway Commissioners to the stockholders in their efforts to preserve their flocks and herds.

100. Special attention was also given by the Inspectors to the working of concessions under Regulations to school pupils to agricultural and other shows, to the issue of special tickets to representatives of the Press and others, and to the collections on the Tramway lines.

101. In all cases of special or ordinary investigation into their Accounts the Railway Commissioners and their officers have co-operated most cordially with this Department in giving prompt attention to all matters brought under their notice, which, more or less, influence the Railway Revenue or affect the charges for working expenses.

MISCELLANEOUS.

102. The usual Certificates of Discharge have been issued to the Treasurer under clause 35 of the "Audit Act, 1898." The amounts disallowed are shown in *Appendix I*, page 257. A large proportion of the disallowances in respect of irregularities in the Revenue Accounts have been dealt with by the Indemnity Act No. 48 of 1899, and as regards the irregular payments on account of Loan Services, a like indemnity has been passed under clause 3 of the Act No. 47 of 1899.

103. The Mint Bullion Accounts and the Accounts of the Government Savings Bank have been examined, and certified to agree with the books and vouchers representing the same.

104. The following special Statements, not otherwise referred to above, are also appended for information, viz. :—

Statement of Advances to Public Officers and others awaiting adjustment. (*Appendix F*, page 252.)

Statement of Surcharges raised and recovered upon the Revenue and Expenditure Accounts. (*Appendix G*, pages 253-5.)

Statement of Authorities granted by the Governor and Executive Council in relief of Public Accountants under sections 37 and 38 of the "Audit Act, 1898." (*Appendix H*, page 256.)

Statement of Authorities given by the Governor and Executive Council under the 23rd section of the "Audit Act, 1898," applying Unexpended Balances of Votes to other Services. (*Appendix A*, page 218.)

Statement of the Registration of Brands Account, 30 Victoria No. 12. (*Appendix K*, page 260.)

105. The foregoing observations and explanatory tables, together with the information afforded by the Appendices, afford, it is believed, a correct analysis of the facts and figures and their relations respectively to the several divisions of the
Public

Public Account, after the usual exhaustive Audit of the Abstracts of the Treasurer's Receipts and Disbursements within the year ended 30th June, 1899, subject, however, to any corrections that may arise upon the adjustment of outstanding advances and upon queries not yet fully answered.

106. The Statements C and D (pages 135 and 138-9), together with the detailed Statements of the Public Debt (pages 142-148), being, however, outside the requirements of the 29th clause of the "Audit Act, 1898," do not come under the examination and report required by the 43rd, and their contents rest, therefore, on the responsibility of the Treasurer.

DEPARTMENTAL.

107. The out-door inspection of the Accounts of the Collectors and Disbursers of the Public Revenue and Receipts, inaugurated in connection with this Department in 1897, has been carried out during the past year with as much advantage as may have been expected under the drawback of the continued absence of the Senior Inspector, on duty at the Government Asylums as Acting Director thereof.

108. The Ministerial and Metropolitan and Suburban Sub-departments have all been inspected and their Accounts thoroughly examined, including the Quarterly Statutory Inspections of the Accounts of the Registrar in Bankruptcy, Curator of Intestate Estates, and the Official Assignees. Those examinations numbered 87. The inspections of the country office accounts of the Crown Lands Agents, Clerks of Petty Sessions, Mining Registrars, Sub-Collectors of Customs, and others numbered 622.

109. Very few cases of irregularities had to be reported, but one very serious case of default was discovered in the accounts of the Land Agent at Bombala, to the amount at least of £1,029 14s. 10d., for which he was prosecuted and sentenced to one year and nine months' imprisonment.

110. At the request of the Chairman of the Metropolitan Pastures and Stock Protection Board, preferred through the Minister for Mines and Agriculture, a special investigation was made into the Board's accounts. The examination of those accounts disclosed misappropriations to the amount of £810 1s. 3d., extending back over a period of fourteen years, and was a dead loss to the Board.

111. The effect of those out-door inspections has doubtless to some extent been favourable to a better condition of the accounts of Accounting Officers generally, but the full benefit expected from the system, as in connection with this Department, has not been realised, for want of certain amendments required to the Audit Act to carry it out. For that and other reasons the Inspecting Staff, transferred from the Treasury to this Department in 1897, has recently been retransferred to the Treasury.

PERSONAL.

112. In concluding this Report I most respectfully invite the attention of the Legislative Assembly to a matter of personal interest to myself, although it is not wholly so. I refer to the manner in which the Salary attached to my office, as Auditor-General, was dealt with in the Estimates of Expenditure for the year 1893, whereby that salary was reduced from £1,000 to £920 per annum.

113. The facts are these: When a reduction was determined to be made in the rates of Salaries for the year 1893, the rule adopted in the preparation of the Estimates laid before Parliament for that year was to deduct 10 per cent. from all *Voted* Salaries of higher rate than £200 per annum.

114. By the operation of the Civil Service Act of 1884, the Statutory Salary under Schedule A to the Constitution Act, viz., £900 per annum, had been augmented by annual increments of £30 to the amount of £60 per annum, when those increments ceased by their repeal in 1886, but in 1891 a full addition of £100 was made by Vote, and so continued for 1892.

115. The Estimates for 1893 reduced that addition of £100 (to the Statutory Salary) to £20 only. Whether this was done by accident or design I am not aware, but in either case it was an obvious departure from the general rule patent throughout those Estimates for 1893 as compared with the passed Estimates for 1892.

116. The salary provided by Schedule A to the Constitution Act for the Auditor-General of the Colony could not be legally touched, as with the other salaries included in the same Schedule it is a distinct reservation to the Crown, and except by an amendment of or a violation of the Constitution it could not be diminished; but the action of the Government, or, perhaps, it may be more correct to say the action of the framers of the Estimates for 1893, practically reduced the statutory salary by £80 per annum, as it could never have been contemplated to apply the 10 per cent. rate to more than the amount of the augmentation which was provided by the Civil Service Act of 1884 and the subsequent Vote of Parliament for 1891 up to £100, that being the only portion of the salary rate which was subject to annual review by the Committee of Supply. Even allowing that the voted portion of the salary (£100) was made an exception, and included as subject to the 10 per cent. *pro rata*, no more than £10 per annum should have been levied upon it.

117. I consider, therefore, that I have been wronged to the extent of £80 per annum, and that I have a fair claim to have the requisite amount placed upon the Estimates to make good the loss which, as shown above, I have suffered in my annual salary since the year 1892.

118. In connection with this subject it may not be deemed out of place to point out that the rate of salary given to the Auditor-General for the Colonies of Queensland, South Australia, and New Zealand is fixed for each at £1,000 per annum, and the Colony of Victoria has three Commissioners of Audit at £1,000 per annum each, while the Public Accounts of the Receipts and Disbursements of this Colony are very much in excess of either of the colonies named. Moreover, when the rate of £900 per annum was assigned to the office so long ago as the year 1855 the Revenue and Expenditure proper only reached in all less than £2,300,000, while for the year 1898-9 the Revenue and Expenditure reached upwards of £20,000,000, besides other Receipts and Payments to an additional amount of more than £15,000,000—fifteen times as much—while the salary remains as it was forty-five years ago—at £900. Even that rate is subject to a tax of £36 per annum for the Superannuation Fund since the year 1884.

EDWARD A. RENNIE,

Auditor-General.

Department of Audit,
31st May, 1900.

8th January, 1900.

STATEMENT F.

STATEMENT showing the amount of the Undischarged Liabilities of the Consolidated Revenue Fund under Statutory and Annual Appropriations at the 30th June, 1895, and in what manner they have since been dealt with.

Nature of Liability.	Undischarged Liabilities under Appropriations at 30th June, 1895.	Amounts Paid during 1895-6.	Amounts Surrendered or Written Off during 1895-6.	Balances Open for Expenditure at 30th June, 1896.	Amounts Paid or Surrendered during 1896-7.	Amounts Paid during 1897-8.	Amounts Paid and Written Off during 1898-9.	Balance Outstanding 30th June, 1899.
Balances of Annual Appropriations for 1894 and previous years still alive at 30th June, 1895, and open for operations up to 31st December, 1895	£ s. d. 645,648 4 1	£ s. d. 286,782 11 4	£ s. d. 357,015 8 6	£ s. d. 1,850 4 3	£ s. d. P. 360 0 0 S. 1,490 4 3	£ s. d.	£ s. d.	£ s. d.
Balances of Appropriations for the Half-year ended 30th June, 1895 (including £66 13s. 4d. restored balance of 1893), and open for operation up to 30th June, 1896 ...	566,263 4 4	435,023 7 3	126,134 2 3	5,105 14 10	P. 2,009 13 6 S. 3,096 1 4
Balances of Special Statutory Appropriations undischarged for 1894 and previous years without limitation as to periods of open obligation	138,443 3 5	1,107 1 8	603 14 10	136,732 6 11	P. 111 0 0	P. 64,734 10 0 *W30,316 16 11	P. 125 0 0 } 41,445 0 0	41,445 0 0
Balances of Special Statutory Appropriations for the Half-year ended 30th June, 1895 (including £657 5s. 1d. restored balances for 1891, 1892, and 1893), with unlimited obligations as to time of discharge	545,706 19 5	529,891 18 5	266 10 6	15,548 10 6	P. 33 10 6	15,515 0 0
Totals... ..	£ 1,896,061 11 3	1,252,804 18 8	484,019 16 1	159,236 16 6	7,100 9 7	64,734 10 0	30,441 16 11	+56,960 0 0

* This sum was found to have been over-computed on account of a portion of the Interest on the Public Debt for the year 1889—a whole year's interest having been taken inadvertently into account instead of a half-year only. † These are open balances of the provision made for the redemption of the Railway Loan under 31 Vic. No. 11 and available for replacement to the Railway Loan Redemption Fund as explained elsewhere.

APPENDIX P.

CORRESPONDENCE *re* the treatment of the Balance at the Credit of "The Public Instruction Endowment Account" on the 2nd December, 1897, under the provisions of the 14th Clause of the Act 61 Victoria No. 20.

The Auditor-General to The Under Secretary for Finance and Trade.

Sir,

Department of Audit, Sydney, 22 May, 1899.

I have the honor to acknowledge receipt of your letter of 4th ultimo, furnishing at my request a copy of an opinion given, under date 3rd January, by Mr. Attorney-General Want, and also of the case submitted for that opinion by your Department respecting the "capital" or investment portion of the late "Public Instruction Endowment Account."

In view of the constitution of the Public Instruction Endowment Account by the Church and School Lands Dedication Act of 1880, 44 Victoria, No. 19, and of the very specific instructions conveyed therein as to the sources of income by which that special Trust Account created by the Act was to be constituted and fed, and as to what was to be done with the income, it appears to me that the opinion of Mr. Attorney-General Want is somewhat obscure and difficult of interpretation as a working direction.

While the opinion acknowledges that the Trust created under 44 Victoria, No. 19, terminated at 2nd December, 1897, it goes on to say that the interest on the investments belongs to the Trust and must be credited thereto. If that be so, then, so far as the interest is concerned, the Trust did not terminate at 2nd December, 1897, and the interest must be dealt with in terms of that Trust, which distinctly apply to *income* only.

The declared purpose of the Act of 1880 was that after the 31st December, 1882, the whole income derivable from the Clergy and School Lands and Orphan School Estates should be dedicated as a perpetual endowment in aid of public instruction; and the sixth clause of that Act enacts that "the whole income derived from the unsold lands (whether from leases or by way of rent, or from investments or otherwise howsoever), *as well as* the whole income derived from any investments of the proceeds of sales or leases of said lands *made before* the passing of this Act or *hereafter to be made* shall be paid to the Colonial Treasurer and be carried to the credit of an account to be called the Public Instruction Endowment Account, and shall be applied in aid of the public schools of the Colony, and in support of the State System of Public Instruction, and for no other purpose whatsoever."

It appears clear, therefore, that the Public Instruction Endowment Account was to be composed of income only; but the Treasury on opening that account in 1883, imported into it the capital arising from the sales of land, invested and uninvested, to the amount of £193,870 11s. 2d., and that sum, with a trifling difference, still formed part of the balance at 2nd December, 1897, as proceeds of land sold and invested at interest.

The annual interest thus derived from 1883 to 30th June, 1897, has been scrupulously paid over to the Consolidated Revenue Fund for public instruction purposes. If the Trust, so far as the interest on the investments is concerned, still survives the Act of 1897, as would seem to be implied by the Attorney-General's opinion, that interest must undoubtedly be paid over to the Consolidated Revenue Fund as before, but it cannot at the same time be treated as a portion of the money balance at 2nd December, 1897, and applied as directed under the first portion of Clause 14 of the Act of 1897, but being receivable or received after that date, must be carried by the Colonial Treasurer to the credit of the Consolidated Revenue Fund in terms of the second portion of the Clause 14 quoted—the capital representing land.

But to collect the interest from the revenue to pay it back to the revenue is obviously on the face of it an absurd procedure whether the capital which produces it be held as still in trust, or becomes the property of the revenue, as I firmly hold it does, but *at face value only*, beyond which there is no authority to apply any sums to Public School Buildings under the Act of 1897.

The opinion further states that "the debentures (including presumably Treasury Bills and Funded Stock) will have to be looked upon as an investment not capable of immediate realisation; but when the time of realisation arrives the money obtained should be credited to the funds of the Trust." The Trust having terminated at 2nd December, 1897, with a capital of £193,871 19s. 3d., represented by securities redeemable by the revenue at that amount only, the realisation referred to can only mean the conversion of that amount into cash to make good the book balance stated as at the credit of the Public Instruction Endowment Account on 2nd December, 1897, the balance, namely, which is directed to be applied towards the erection and maintenance of Public School Buildings.

That balance cannot be increased by any subsequent credit whether by interest or so-called premiums or realisations of securities, or by any other receipt, as no other funds can be applied (or in other words appropriated) as specified in the first portion of clause 14 of the Act of 1897. The cash portion of that balance has been shown in another communication to have been £8,627 19s. 8d., payable to the Consolidated Revenue Fund in terms of the Act 44 Victoria, No. 19, or as an outstanding claim at 2nd December, 1897. The remainder, £193,871 19s. 3d., represents the face value of the sums uninvested or then awaiting investment at the year 1883 (with an addition of £90 in 1893 by change of investments).

The whole amount invested represents the accumulated cash received from the year 1861 for the *sale only* of the Church and School Lands, under an authority of the Governor and Executive Council, given in 1861, and it is therefore held to represent the lands sold; whatever income might arise from those investments is considered to be the same as if derived from lands unsold, and so to come within the terms, "The whole of the moneys to be derived from the Church and School Lands, whether accrued due before or after the 2nd December, 1897, should be paid to the Colonial Treasurer, to be by him carried to the credit of the Consolidated Revenue Fund."

APPENDIX

APPENDIX P—*continued.*

In view of the foregoing statements, I cannot concur in considering the sums credited since the 2nd December, 1897, as premiums or interest, to be correct credits at all, because they are credited as additions to the money balance of £202,499 18s. 11d., with the intention, apparently, of expending those credits on Public School Buildings, for which I can see no Parliamentary sanction. Nor can I even concur in the propriety of the credits referred to being derived from securities which by the avowed purpose of the Act of 1897 to abolish the Trusts created by the Act of 1888, became the property of the revenue for the face value of which only the revenue was responsible while held by the abolished "Public Instruction Endowment Account," and which value only could that account if it had continued alive claim from the revenue on maturity.

The credits referred to are the sums of £4,081, and of £4,000 charged the Government Savings Bank for transfers to it of Government Debentures and Funded Stock, and the several interest credits to the amount in all of £7,663 0s. 1d., made up as follow:—

	£	s.	d.	£	s.	d.
Interest, 4 per cent., 36 Vic. No. 21—						
1st October to 31st December, 1897	1,067	16	5	
1st January, 1898, to 31st March, 1899	4,939	2	1	
				6,006	18	6
Interest on Treasury Bills, 55 Vic. No. 9—						
1st July, 1897, to 12th January, 1898		297	6	10
Interest on Debentures—						
1st July to 31st December, 1897		1,137	0	0
Interest on Funded Stock, 16 Vic. No. 1—						
10th February to 21st September, 1898		221	14	9
				<u>£7,663</u>	<u>0</u>	<u>1</u>

If these interest credits are to be maintained as credits to the revenue simply, it must not be overlooked that the same amount is charged as expenditure from the revenue to create the credits, and if with the intention of appropriating the same, whether with or without Parliamentary authority, the procedure is even a more anomalous one than in the preceding case.

I have, therefore, the honor to recommend to and strongly urge upon the favourable consideration of the Colonial Treasurer, *in the interests of the revenue*, that the sums of £4,081 and £4,000 be returned to the Government Savings Bank, and the Debentures and Funded Stock to which those charges refer be endorsed by the Treasurer as bearing interest at 3 per cent. only from date of transfer to the Bank. There can be no reasonable objection to such a course, and it certainly would not create a "dangerous" precedent, as it is one that is continually exemplified in monetary arrangements. I recommend, further, for reasons already given, that the credits for interest be cancelled, as involving absurd cross entries.

In conclusion, I hope and trust that the Colonial Treasurer will see his way to direct that the alterations above suggested be carried out before the termination of the present financial year. Were it not for the strong convictions I have that it is the right course, I should not certainly have again troubled the Colonial Treasurer on the subject.

I have, &c.,

E. A. RENNIE,
Auditor-General.

The Auditor-General to The Under Secretary for Finance and Trade.

Sir,

Department of Audit, Sydney, 3 August, 1899.

In reply to your letter of the 19th ultimo, respecting a difference in a balance stated by me in my letter of 28th June as at credit of the account "Towards the Erection and Maintenance of Public School Buildings," and a balance quoted as at credit of the said account in the Treasury books (but unaudited), I have the honor to refer you to my letter of 22nd May last, and to Paragraphs 19 to 32 of my report on the Treasurer's Accounts for the year 1897-8, which fully explain the reasons for the figures I have quoted, and which figures I also communicated to the Public Instruction Department on the 28th June last.

If it be the desire of the Government to apply the difference between the two balances to the purpose above referred to, it will be necessary either to amend the Act 61 Victoria, No. 20, or to obtain a Vote to apply the credits extra to the sum of £193,871 19s. 3d., received since 2nd December, 1897, to the Erection and Maintenance of Public School buildings. Without the clear sanction of Parliament I can recognise no larger sum than that shown as the money balance at credit on 2nd December, 1897, as available for issue under clause 14 of the Act 61 Victoria, No. 20.

I have, &c.,

E. A. RENNIE,
Auditor-General.

APPENDIX P—*continued.*

The Under Secretary for Finance and Trade to The Auditor-General.

Sir,

The Treasury, New South Wales, Sydney, 4 April, 1899.

Referring to your letters of 13th February and 22nd ultimo, I have the honor to hand you, enclosed, copy of the opinion of the Honorable the Attorney-General, dated 5th January, 1899, together with the case submitted by this Department in connection with two transfers made on the 16th February to the account "Erection and Maintenance of Public School Buildings." I may explain that the original papers are still required in this Department.

I have, &c.,

F. KIRKPATRICK,
Under Secretary for Finance and Trade.

Subject :—Investments held by the late Public Instruction Endowment Account.

The Treasury (Account Branch), Sydney, 1 December, 1898.

REFERRING to the opinion of Mr. Attorney-General Want of the 19th March last, sought in Treasury accountant's memorandum of previous 24th February,—“As to the disposal of premiums on debentures, the property of the late Public Instruction Endowment Account, sold or realised,” which opinion was to the effect, “that the premiums obtained, &c., &c., belong to the account, and cannot be paid to the Consolidated Revenue Fund.” The opinion of the Attorney-General might now be obtained in view of the foregoing, on the following points, viz. :—

- (1.) What should be the legal treatment of the interest, when accrued, on the investments held on behalf of the Trust erected under the Church and School Lands Act of 1897 (*i.e.*), for the “Erection and Maintenance of Public School Buildings, &c.,” *vide* Section 14 (*i.e.*), while still unsold?
- (2.) Did the said investments become, to all intents and purposes, dead on 2nd December, 1897, as stated by the Auditor-General in his letter of 28th June last, and, therefore, not capable of accruing interest, and, consequently, unsaleable?
- (3.) Would it be legal to cancel or discharge such securities issued by the New South Wales Government as from the 2nd December, 1897, and before the expiration of the currency for which they were issued, and before the discharge on maturity of others of the same series, as desired by the Auditor-General.

J. VERNON,
Accountant.

The Under Secretary for Finance and Trade.

Submitted.—F.K., 1/12/98. Approved.—G.H.R. The Crown Solicitor.—F.K., 1/12/98.

Subject :—Disposal of premium on sale of Debentures, the property of the Public Instruction Endowment Account (now closed).

Sir,

Crown Solicitor's Office, Sydney, 5 January, 1899.

I have the honor to return herewith the papers relating to the above matter, forwarded to me from your Department on the 1st day of December, 1898, and to state that I have submitted them to Mr. Attorney-General Want, a copy of whose opinion thereon will be found herewith.

I have, &c.,

GEO. COLQUHOUN,
Crown Solicitor.

The Under Secretary for Finance and Trade.

Copy Opinion of The Honorable The Attorney-General.

3 January, 1899.

At the time of the termination of the Trust created under the Church and School Lands certain of the funds were invested in Government debentures, and the question has now arisen as to the correct method of treating these debentures and the interest arising thereunder.

In my opinion, the interest belongs to the Trust, and must be credited thereto. With regard to the debentures, they will have to be looked upon as an investment not capable of immediate realisation; but when the time of realisation arrives the money obtained should be credited to the funds of the Trust.

J. H. WANT,
Attorney-General.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC ACCOUNTS.

(INTERIM REPORT BY MESSRS. T. A. DIBBS, J. RUSSELL FRENCH, AND F. N. YARWOOD, THE COMMITTEE APPOINTED BY THE GOVERNMENT TO INQUIRE INTO THE.)

Printed under No. 1 Report from Printing Committee, 26 June, 1900.

To the Honorable Sir WILLIAM LYNE, K.C.M.G., M.P.,
Premier and Colonial Treasurer of New South Wales,—

Sir,

8 June, 1900.

His Excellency the Governor, with the advice of the Executive Council, having appointed us a Committee to inquire into the Public Accounts and to report upon the state of the Finances of the Colony of New South Wales, we have the honor to inform you that, from the 2nd April (the date of our appointment) to the 8th June, 1900, the present date, we have held thirty-one meetings, and each Member of the Committee has given long and careful consideration to the various points involved. We have gone thoroughly into the matter with which we are dealing at the moment, and have taken lengthy evidence in respect thereto.

It appeared to us at a very early stage of our inquiry that it would be necessary, in dealing with the results arrived at, to divide our conclusions into three divisions: the

First:—Being an answer to the question, which is of considerable public interest, of whether the late Administration submitted the Accounts year by year to the public so as to show *bona-fide* results, *i.e.*, by placing a fair year's expenditure against a full year's income; and also whether the balance at the credit of the "Consolidated Revenue Fund Account," on the 30th June, 1899, *viz.*, £116,523 5s. 8d., represented a fair and true statement of an actual surplus of revenue over expenditure for the preceding four years during which the so-called "Cash" system had been in vogue;

Second:—The answers to the questions submitted to the Committee; and

Third:—The larger question of whether the arrangements hitherto in vogue, with regard to the methods of treating our Finances generally, and Loan Expenditure, are such as can be considered sound and likely to be permanently satisfactory to this Colony.

We have been unable up to the present to complete our Inquiry, which involves a large amount of investigation, but we have the honor, at this juncture, to submit a Preliminary Report which deals with the first branch of the Inquiry as detailed above.

In the first place, taking the Finances from the 1st July, 1895, to the 30th June, 1899 (the completed period during which the Cash system has been in vogue), and going through the figures "year by year," accepting the Accounts as they are published by the Treasury, which we must of necessity do, and further leaving out altogether the debatable portion as regards the division between the amount charged to "Loan Expenditure" and the ordinary and usual expenses of carrying on the

Government of the Colony, we find that the appearance of a surplus at the end of the first year (30th June, 1896) was produced to some extent by changing the date of the financial year from January-December to July-June, whereby the inclusion of a considerable amount of the Annual Expenditure proper to the Accounts of 1895-6 was avoided. Some of the items we refer to are as under, viz. :—

Treasury Bills Redemption	£75,000	} Approximate.
Railway Debentures Redemption, 53 Vic. No. 24	37,500	
Naval Expenses, say	13,000	
Interest on various Trust Accounts, and other items... ..	103,000	
Total... ..	£228,500	

And in addition to the above, the principle of treating part of the expenditure on services paid in 1895-6 as liabilities of previous years was not one which should have been adopted if it was intended (which we think ought to have been the case) to have shown a true and actual twelve months' Expenses against a twelve months' Revenue.

It is next to impossible without unduly prolonging the Inquiry, and would produce practically no different result in the end, for us to give an absolutely exact figure for the actual Expenses of the year 1895-6; but allowing for the elimination of cross entries, in order to simplify the Accounts (their appearance in the transactions of any of the years under review being now unnecessary), it seems to us that while the full year's Revenue collected was put to the Credit of 1895-6, the Expenditure charged against the same was relieved to such an extent as to produce an alleged Surplus of about £333,000 on the 30th June, 1896, whereas it is our unanimous opinion that, had the year 1895-6 been charged with a full ordinary twelve months' Expenditure, there would have been a considerable Deficiency. We unanimously estimate the same at :—

	£	s.	d.	£	s.	d.
Not less than	550,000	0	0			
The year 1896-7, in spite of the retrenchment carried through in that year by the Public Service Board, showed a Deficiency, according to the Treasurer's own figures, after eliminating cross entries as before, since they do not affect the ultimate result, of ...	204,159	5	1			
The year 1897-8 showed a Surplus of ...				19,416	1	0
The year 1898-9 showed a Deficiency of ...	2,789	4	11			
	£756,948	10	0			
<i>Less</i>	19,416	1	0			
Leaving for the four years a <i>Net Deficiency of</i>	£737,532	9	0			

The above figures are based on those of the Treasury itself, and are without taking into consideration the fact that on the Expenditure side the full payments in redemption of old Liabilities, which it appears to us should have been made during that period according to Law (31 Vic. No. 11), have been omitted to be charged to the extent of £68,292 10s.; while several small amounts have been put to the Credit of "Revenue" which ought rightly to have been considered as received in reduction of Liabilities prior to the 30th June, 1895, when the change in system took place.

During the whole of this branch of our Inquiry we have invariably, where we could conscientiously do so, given the Administration of that time the benefit of any doubt in connection with any matters which have arisen; but we cannot help coming to the conclusion that the Accounts for 1895-6 should have been submitted in such a manner as would have enabled the public to form a correct judgment of the effect of the change of system on that year's Accounts. We recognise that the Accounts as they were submitted, after the change of system to what has been termed

termed the "Cash" basis, conformed to the programme sanctioned by Parliament and embodied in the "Audit Act Amendment Act of 1895," and the "Treasury Bills Deficiency Act" of the same year. The Accounts, as so made up, brought out a Surplus; but, from a business point of view, we cannot see that any such Surplus really accrued to the period, but the contrary as we have shown, and we think this should have been clearly set forth at the time the Accounts were submitted. In other words, the result of our inquiry shows that, under all the circumstances of the case, the issue of Treasury Bills to the net amount of £1,024,700, as covering Liabilities of previous years and representing an ascertained Deficiency at the 30th June, 1895, was unnecessary, and had the effect of considerably and unduly lessening the Expenditure charged to the next ensuing year, and was, therefore, in our opinion, misleading, inasmuch as thereby the subsequent real condition of the Finances was not made apparent.

We append to this Report statements showing the figures of the Revenue for the four years referred to, and also the Expenditure as charged during the same periods, which speak for themselves, while we attach also a statement of the Expenditure in detail tabulated form, as disclosed by the Treasury arrangement of the figures, for the years:—

	£	s.	d.
1895-6 as	8,924,803	19	8
1896-7 ,,	9,491,644	2	1
1897-8 ,,	9,462,676	8	3
1898-9 ,,	9,756,974	1	3

An examination of which should assist in conveying to the mind of everyone the conclusion with regard to the representation of the alleged Expenditure for the year 1895-6, upon which we comment above. So much for the years of the so-called "Cash" system.

But, in addition, we give below figures from which it may be seen what, in our opinion, has been really the Deficiency of Revenue as compared with Expenditure and Redemptions during the period of four and a half years (1st January, 1895, to the 30th June, 1899) during which the Finances of the Colony were absolutely under the control of the late Administration, and again dealing with the situation in a spirit of liberality to the Treasurer of that time where any possible doubt arose, we find:—

	£	s.	d.
1st.—That the Debit Balance of the "Consolidated Revenue Fund" at 1st January, 1895, viz... ..	464,715	0	0
requires to be reduced by certain large items relating to previous periods, which cannot, in our opinion, be considered other than received in reduction of the above amount	339,625	2	10
Leaving a Net Inherited Debit Balance in relation to 1894 and preceding years of	£125,089	17	2
2nd.—Adjusting the subsequent figures as nearly as possible upon a business and sound financial basis (which would be that every year should bear its own proper burden), we find that the:—			
<i>Half-year</i> to the 30th June, 1895, resulted in a Deficit of	243,439	2	2
<i>Four years' period</i> , as shown on page 7 of this Report	737,532	9	0
While the amount within that period, referred to on page 8, as short charged for Redemptions (31 Vic. No. 11) in the Accounts, is as stated... ..	68,292	10	0
Making a <i>Total Deficit</i> for the four and a half years of	£1,049,264	1	2

These figures are, of course, inclusive of the amounts devoted to Redemption and Sinking Funds during the period.

In

In arriving at this result, your Committee have carefully considered whether any of the Expenditure charged in the above could be fairly treated as a Liability of preceding years, and, after fully ventilating the matter, and making careful comparisons with previous years, and with subsequent ones, have unanimously decided that the above is a fair and just statement of the result for the period mentioned, and these figures are arrived at after absolutely eliminating from the Expenditure such items as those relating to the "Post Office" and "Centennial Park" Suspense Accounts, with which we will deal fully when answering the questions submitted to us.

We have endeavoured, as far as possible, to submit a statement upon this occasion without any side issues whatever which can possibly be debatable, and have also eliminated for the present the very pertinent questions that will arise in our General Report, which we will submit later on, as to whether financially this Colony is justified in including in its Revenue all money received from Land Sales and Conditional Purchases on the one side, while, on the other side, there has been charged under the "30-Year Loan System" items for small works, to some extent unproductive of Revenue. We find the Expenditure under this heading, as shown by the Treasury, is in :—

					£
Half year 1895	16,310
Year 1895-6	166,475
„ 1896-7	145,755
„ 1897-8	144,054
„ 1898-9	185,078
					<hr/>
Total...	£657,672
					<hr/>

In the same Report we purpose dealing with the General Financial position of the Colony, and will then answer the questions submitted to us, and also make recommendations to the best of our ability with regard to what it will be advisable to do in order to place the Finance of the Colony upon a satisfactory administrative basis; but as this will involve a large amount of technical detail, we take this early opportunity of submitting to you a Report upon the investigations which we have made upon what we have deemed the first portion of our Inquiry.

We have the honor to be,

Sir,

Yours obediently,

T. A. DIBBS
(Chairman).

J. RUSSELL FRENCH.

F. N. YARWOOD.

EXECUTIVE MINUTE.

Committee of Inquiry into the Public Accounts.

2nd April, 1900.

It having been decided by the Cabinet that it is desirable in the public interest that a full inquiry and investigation should be made concerning the Public Accounts in order that a final determination may be arrived at as to the financial position of the Colony, and that a Committee should be appointed to inquire as aforesaid, I recommend to His Excellency the Governor that the following gentlemen be appointed as members of that Committee, namely :—

Thomas Allwright Dibbs, Esquire,
 John Russell French, Esquire,
 Frank Nelson Yarwood, Esquire,

and that while inviting them to exercise every latitude in the scope of the inquiry, the Committee be asked to give in their report, replies to the following questions, and to furnish the information sought under the various heads, to which their attention is particularly directed, namely :—

1. The amount of Revenue properly so-called, exclusive of such receipts as proceeds of Treasury Bills and transfers from the General Loan Account, received during the four and a half years from the 1st January, 1895, to the 30th June, 1899.
2. The amount expended from the Consolidated Revenue Fund during the same period.
3. The difference between the Revenue properly so-called and the Expenditure from the Consolidated Revenue Fund during the same period.
4. The amount of the expenditure charged to the two special Suspense Accounts, and the amount of the receipts credited to these Accounts, during the same period.
5. The difference between the Revenue properly so-called and the Expenditure from the Consolidated Revenue Fund during the same period, exclusive of the two Special Suspense Accounts.
6. The amount of Extraordinary Receipts taken into the Consolidated Revenue Fund during the same period, such as the proceeds of the new issue of Treasury Bills and the accrued interest transferred from the General Loan Account.
7. The amount of that part of the Cash Debit Balance on the Consolidated Revenue Fund Account existing on the 31st December, 1894, which was partly extinguished in the first half-year of 1895 by the excess of receipts over expenditure, resulting from the transfer of accrued interest from the General Loan Account, and partly by the proceeds of the new issue of Treasury Bills.
8. The net amount of the extraordinary receipts available for and utilised in meeting expenditure chargeable to the Consolidated Revenue Fund Account during the period of four and a half years referred to, after deducting that portion of the cash overdraft which was extinguished as above.
9. The amount of the total deficiency on the Consolidated Revenue Fund Account (Treasury Bills outstanding and cash debit balance) on the 31st December, 1894, inclusive and exclusive of the Special Suspense Accounts.

10. Whether the amount of accrued interest transferred from the General Loan Account to the Consolidated Revenue Fund Account belonged to the period prior to the end of the year 1894, and whether the proper effect of this transfer was the reduction of the deficiency existing on the 31st December, 1894?
11. If so, to what amount would this transfer of accrued interest properly reduce the deficiency existing on the 31st December, 1894, inclusive and exclusive of the Special Suspense Accounts?
12. Whether the law provides for the reduction of the deficiency on the Consolidated Revenue Fund Account by the annual redemption of Treasury Bills to the amount of £150,000? And, by operation of the statute, what should have been the amount of the deficiency on the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts?
13. The actual amount of the deficiency on the Consolidated Revenue Fund Account existing on the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts.
14. The increase in the deficiency thus created, or the reduction effected, during the period of four and a half years from the 1st January, 1895, to the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts, after providing for the reduction of the 1894 deficiency by the operation of the Statute, and by the transfer of accrued interest.
15. Whether the net proceeds of the new issue of Treasury Bills, £1,024,700, were not in effect used in meeting a deficiency in revenue as compared with the expenditure during the period of four and a half years referred to, exclusive of the Special Suspense Accounts, leaving a credit balance on the "Account Current" existing on the 30th June, 1899?
16. Whether, in changing the system of accounts, it was provided that certain expenditure should be met from the current Consolidated Revenue, and that the unexpended votes of previous years should be spent, and the payments met from the proceeds of the issue of Treasury Bills referred to?
17. Whether, if the unexpended votes were so used, a more equitable plan would not have been to have allowed them to lapse in changing the system of keeping the public accounts, seeing that it was provided that thereafter all unexpended votes should so lapse?
18. Whether the course pursued did not have the effect of reducing the expenditure chargeable to the first year of the new system below the ordinary expenditure of the Colony, and so yielding a credit balance on the new account on the 30th June, 1896?
19. The amount of the credit balance on the 30th June, 1896, and the amount to which it had been reduced by the 30th June, 1899.
20. The amount by which the expenditure charged to the year 1895-6 was less than the average expenditure of immediately preceding years, and the causes of this reduction in the expenditure. The amount charged to the proceeds of Treasury Bills in 1895-6.
21. Whether a sum of £216,000 was not saved from the vote in 1893 on account of Roads, Endowment to Boroughs, District Councils, and Shires under the proposed Local Government Bill, and this sum called back into existence and spent partly in 1894 and the first half-year of 1895, but the larger part in the year 1895-6, on the plea that the savings had been improperly made? And whether an examination of the annual expenditure on roads does not show that the action referred to enabled a large reduction to be effected in the amount charged to the year 1895-6 as compared with previous years?
22. Whether during the first half-year of 1895 the amount of accrued interest previously referred to was transferred from the General Loan Account, reducing the cash debit balance on the 31st December, 1894 (exclusive of suspense Accounts)? The debit balance on 30th June, 1895, which was extinguished by the proceeds of Treasury Bills. And of these proceeds, expended after the change in the system of keeping the public accounts was made, what sum was utilised in meeting claims on account of 1894 and previous years, and what sum in meeting those of the first half-year of 1895?

23. Whether the Consolidated Revenue Fund Account Current under the new system was relieved in the year 1895-6 by only charging it with one half-year's redemption of Treasury Bills in aid of Revenue, and of Railway Debentures?
24. Whether the act of applying £150,000 from the Sinking Fund established under Act 53 Vic. No. 24, towards meeting Railway Debentures matured under Act 31 Vic. No. 11, will not have the effect of compelling the Consolidated Revenue Fund at a later period to provide the amount relieved in the year 1897-8?
25. The amount by which the Consolidated Revenue has been relieved by charging to the proceeds of short-dated Loans, and in other ways, expenditure ordinarily provided from revenue? Whether the system of repayments established in connection with these loans is not one that tends simply to relieve the first few years during which it is in operation at the expense of future years and whether it should not be discontinued?
26. Whether a deficiency on the Consolidated Revenue Fund Account was not created during the period of four and a half years from the 1st January, 1895, to the 30th June, 1899, and if so, the amount of such deficiency:—
 - (a) Inclusive of Special Suspense Accounts.
 - (b) Exclusive of Special Suspense Accounts.
 - (c) As increased by amount taken from Sinking Fund to meet Debentures falling upon Revenue.
 - (d) As further increased by expenditure ordinarily defrayed from Consolidated Revenue, and provided from short-dated Loans, and in other ways.
27. The amount of the credit balance on the Consolidated Revenue Fund "Account Current" on the 30th June, 1896; 30th June, 1897; 30th June, 1898; and 30th June 1899.
28. Whether these balances represented cash in the Bank, and if so, which of them?
29. The actual condition of the Consolidated Revenue Fund Account on the dates specified above, as disclosed by the Bank Balances.
30. In the event of a discrepancy between the Ledger Balances and the Bank Balances, to what was this due; and whether the system under which such differences are possible may be correctly described as a "cash basis" system?
31. Whether it is correct to hand over large interest payments to the Bank of England in the month of June, and bring them to account on the 1st July following? Whether the Commissioners would recommend the London payments in May and June to be included within the financial year during which they actually are made; and whether the Special Suspense Accounts should be closed up?
32. Whether the present system of keeping the Public Accounts is a good one; and whether the Commissioners can suggest any improvements in the method of keeping the Accounts, or in their presentation, so that these may be more easily comprehended by the Public?
33. Whether the sum of £1,500,000 was transferred from Trust Funds to the General Loan Account as alleged by the Auditor-General?
34. Whether the present system of dealing with Trust Funds, and of utilising the balances as working balances in connection with the Consolidated Revenue Fund Account and the General Loan Account should be altered; if so, what changes would the Commissioners recommend?
35. Whether from the 1st October, 1897, to the 23rd September, 1899, payments to the amount of £1,278,940 were made from revenue without the authority of Parliament, and without the Auditor-General's certificate? Whether, in connection with these payments an Expenditure Suspense Account was opened; the effect of that Account?

36. The amount borrowed from the Savings Bank of New South Wales, Barrack-street, Sydney, to the 30th June, 1899, and to date?
37. The conditions under which these deposits were placed with the Treasury?
38. Whether any of these advances have been covered by Securities?
39. The purpose for which this money was obtained from the Trustees of the Savings Bank of New South Wales.
40. Whether from the month of November, 1896, to the close of the year 1899, payments to the amount of several million pounds sterling were made from Loan Funds without the Certificate of the Auditor-General, and whether such payments were therefore illegal.
41. The Balances of the various Accounts when the present Government assumed office.

I further recommend that instructions be given to all public officers to answer any questions which the said Committee may put to them, and to produce all statements, books, and documents which may be of service to them.

WILLIAM JOHN LYNE.

The Executive Council advise that the gentlemen herein named be appointed the Members of the Committee of Inquiry into the Public Accounts.—ALEX. C. BUDGE, Clerk of the Council.

Min. 15, 3/4/1900. Confirmed, 6/4/1900. Approved.—B., 3/4/1900.

COMMITTEE OF INQUIRY INTO THE PUBLIC ACCOUNTS.

INTERIM REPORT.

To the Honorable Sir WILLIAM LYNE, K.C.M.G., M.P.,
Premier and Colonial Treasurer of New South Wales,—

Sir,

8 June, 1900.

His Excellency the Governor, with the advice of the Executive Council, having appointed us a Committee to inquire into the Public Accounts and to report upon the state of the Finances of the Colony of New South Wales, we have the honor to inform you that, from the 2nd April (the date of our appointment) to the 8th June, 1900, the present date, we have held thirty-one meetings, and each Member of the Committee has given long and careful consideration to the various points involved. We have gone thoroughly into the matter with which we are dealing at the moment, and have taken lengthy evidence in respect thereto.

It appeared to us at a very early stage of our inquiry that it would be necessary, in dealing with the results arrived at, to divide our conclusions into three divisions: the

First:—Being an answer to the question, which is of considerable public interest, of whether the late Administration submitted the Accounts year by year to the public so as to show *bona-fide* results, *i.e.*, by placing a fair year's expenditure against a full year's income; and also whether the balance at the credit of the "Consolidated Revenue Fund Account," on the 30th June, 1899, viz., £116,523 5s. 8d., represented a fair and true statement of an actual surplus of revenue over expenditure for the preceding four years during which the so-called "Cash" system had been in vogue;

Second:—The answers to the questions submitted to the Committee; and

Third:—The larger question of whether the arrangements hitherto in vogue, with regard to the methods of treating our Finances generally, and Loan Expenditure, are such as can be considered sound and likely to be permanently satisfactory to this Colony.

We have been unable up to the present to complete our Inquiry, which involves a large amount of investigation, but we have the honor, at this juncture, to submit a Preliminary Report which deals with the first branch of the Inquiry as detailed above.

In the first place, taking the Finances from the 1st July, 1895, to the 30th June, 1899 (the completed period during which the Cash system has been in vogue), and going through the figures "year by year," accepting the Accounts as they are published

published by the Treasury, which we must of necessity do, and further leaving out altogether the debatable portion as regards the division between the amount charged to "Loan Expenditure" and the ordinary and usual expenses of carrying on the Government of the Colony, we find that the appearance of a surplus at the end of the first year (30th June, 1896) was produced to some extent by changing the date of the financial year from January-December to July-June, whereby the inclusion of a considerable amount of the Annual Expenditure proper to the Accounts of 1895-6 was avoided. Some of the items we refer to are as under, viz. :—

Treasury Bills Redemption	£75,000	
Railway Debentures Redemption, 53 Vic. No. 24		37,500	
Naval Expenses, say	13,000	} Approximate.
Interest on various Trust Accounts, and other items...	103,000	
Total...	<u>£228,500</u>	

And in addition to the above, the principle of treating part of the expenditure on services paid in 1895-6 as liabilities of previous years was not one which should have been adopted if it was intended (which we think ought to have been the case) to have shown a true and actual twelve months' Expenses against a twelve months' Revenue.

It is next to impossible without unduly prolonging the Inquiry, and would produce practically no different result in the end, for us to give an absolutely exact figure for the actual Expenses of the year 1895-6; but allowing for the elimination of cross entries, in order to simplify the Accounts (their appearance in the transactions of any of the years under review being now unnecessary), it seems to us that while the full year's Revenue collected was put to the Credit of 1895-6, the Expenditure charged against the same was relieved to such an extent as to produce an alleged Surplus of about £333,000 on the 30th June, 1896, whereas it is our unanimous opinion that, had the year 1895-6 been charged with a full ordinary twelve months' Expenditure, there would have been a considerable Deficiency. We unanimously estimate the same at :—

	£	s.	d.	£	s.	d.
Not less than	550,000	0	0			
The year 1896-7, in spite of the retrenchment carried through in that year by the Public Service Board, showed a Deficiency, according to the Treasurer's own figures, after eliminating cross entries as before, since they do not affect the ultimate result, of	204,159	5	1			
The year 1897-8 showed a Surplus of				19,416	1	0
The year 1898-9 showed a Deficiency of	2,789	4	11			
	<u>£756,948</u>	<u>10</u>	<u>0</u>			
<i>Less</i>	19,416	1	0			
Leaving for the four years a <i>Net Deficiency of</i>	<u>£737,532</u>	<u>9</u>	<u>0</u>			

The

The above figures are based on those of the Treasury itself, and are without taking into consideration the fact that on the Expenditure side the full payments in redemption of old Liabilities, which it appears to us should have been made during that period according to Law (31 Vic. No. 11), have been omitted to be charged to the extent of £68,292 10s.; while several small amounts have been put to the Credit of "Revenue" which ought rightly to have been considered as received in reduction of Liabilities prior to the 30th June, 1895, when the change in system took place.

During the whole of this branch of our Inquiry we have invariably, where we could conscientiously do so, given the Administration of that time the benefit of any doubt in connection with any matters which have arisen; but we cannot help coming to the conclusion that the Accounts for 1895-6 should have been submitted in such a manner as would have enabled the public to form a correct judgment of the effect of the change of system on that year's Accounts. We recognise that the Accounts as they were submitted, after the change of system to what has been termed the "Cash" basis, conformed to the programme sanctioned by Parliament and embodied in the "Audit Act Amendment Act of 1895," and the "Treasury Bills Deficiency Act" of the same year. The Accounts, as so made up, brought out a Surplus; but, from a business point of view, we cannot see that any such Surplus really accrued to the period, but the contrary as we have shown, and we think this should have been clearly set forth at the time the Accounts were submitted. In other words, the result of our inquiry shows that, under all the circumstances of the case, the issue of Treasury Bills to the net amount of £1,024,700, as covering Liabilities of previous years and representing an ascertained Deficiency at the 30th June, 1895, was unnecessary, and had the effect of considerably and unduly lessening the Expenditure charged to the next ensuing year, and was, therefore, in our opinion, misleading, inasmuch as thereby the subsequent real condition of the Finances was not made apparent.

We append to this Report statements showing the figures of the Revenue for the four years referred to, and also the Expenditure as charged during the same periods, which speak for themselves, while we attach also a statement of the Expenditure in detail tabulated form, as disclosed by the Treasury arrangement of the figures, for the years:—

	£	s.	d.
1895-6 as	8,924,803	19	8
1896-7 ,,	9,491,644	2	1
1897-8 ,,	9,462,676	8	3
1898-9 ,,	9,756,974	1	3

An examination of which should assist in conveying to the mind of everyone the conclusion with regard to the representation of the alleged Expenditure for the year 1895-6, upon which we comment above. So much for the years of the so-called "Cash" system.

But, in addition, we give below figures from which it may be seen what, in our opinion, has been really the Deficiency of Revenue as compared with Expenditure and Redemptions during the period of four and a half years (1st January, 1895, to the 30th June, 1899) during which the Finances of the Colony were absolutely

under the control of the late Administration, and again dealing with the situation in a spirit of liberality to the Treasurer of that time where any possible doubt arose, we find :—

	£	s.	d.
1st.—That the Debit Balance of the “Consolidated Revenue Fund” at 1st January, 1895, viz... ..	464,715	0	0
requires to be reduced by certain large items relating to previous periods, which cannot, in our opinion, be considered other than received in reduction of the above amount	339,625	2	10
<hr/>			
Leaving a Net Inherited Debit Balance in relation to 1894 and preceding years of	£125,089	17	2
<hr/>			

2nd.—Adjusting the subsequent figures as nearly as possible upon a business and sound financial basis (which would be that every year should bear its own proper burden), we find that the :—

<i>Half-year</i> to the 30th June, 1895, resulted in a Deficit of	243,439	2	2
<i>Four years' period</i> , as shown on page 7 of this Report	737,532	9	0
While the amount within that period, referred to on page 8, as short charged for Redemptions (31 Vic. No. 11) in the Accounts, is as stated	68,292	10	0
<hr/>			
Making a <i>Total Deficit</i> for the four and a half years of	£1,049,264	1	2

These figures are, of course, inclusive of the amounts devoted to Redemption and Sinking Funds during the period.

In arriving at this result, your Committee have carefully considered whether any of the Expenditure charged in the above could be fairly treated as a Liability of preceding years, and, after fully ventilating the matter, and making careful comparisons with previous years, and with subsequent ones, have unanimously decided that the above is a fair and just statement of the result for the period mentioned, and these figures are arrived at after absolutely eliminating from the Expenditure such items as those relating to the “Post Office” and “Centennial Park” Suspense Accounts, with which we will deal fully when answering the questions submitted to us.

We have endeavoured, as far as possible, to submit a statement upon this occasion without any side issues whatever which can possibly be debatable, and have also eliminated for the present the very pertinent questions that will arise in our General Report, which we will submit later on, as to whether financially this Colony is justified in including in its Revenue all money received from Land Sales and Conditional Purchases on the one side, while, on the other side, there has been charged under the “30-Year Loan System” items for small works, to some extent unproductive

unproductive of Revenue. We find the Expenditure under this heading, as shown by the Treasury, is in :—

				£
Half year 1895	16,310
Year 1895-6	166,475
„ 1896-7	145,755
„ 1897-8	144,054
„ 1898-9	185,078
				<hr/>
Total...	£657,672
				<hr/>

In the same Report we purpose dealing with the General Financial position of the Colony, and will then answer the questions submitted to us, and also make recommendations to the best of our ability with regard to what it will be advisable to do in order to place the Finance of the Colony upon a satisfactory administrative basis ; but as this will involve a large amount of technical detail, we take this early opportunity of submitting to you a Report upon the investigations which we have made upon what we have deemed the first portion of our Inquiry.

We have the honor to be,

Sir,

Yours obediently,

T. A. DIBBS

(Chairman).

J. RUSSELL FRENCH.

F. N. YARWOOD.

COMMITTEE OF INQUIRY INTO THE PUBLIC ACCOUNTS.

COMMITTEE OF INQUIRY INTO THE PUBLIC ACCOUNTS.

GENERAL REPORT.

To The Honorable SIR WILLIAM LYNE, K.C.M.G., M.P.,
Premier and Colonial Treasurer of New South Wales,—

21 July, 1900.

Sir,

The Third Division of this Inquiry, as defined in our Interim Report under date 8th June last, was foreshadowed to cover an answer to the question of whether the arrangements hitherto in vogue with regard to the methods of treating our Finances generally, and Loan Expenditure in particular, are such as can be considered sound and likely to be permanently satisfactory to the Colony.

To enable a conclusion to be arrived at in this matter, we deal below with the various component parts of the Colony's Accounts which affect the situation. We have carefully considered the different points involved from a business point of view; and although it has been stated in certain quarters that there are two ways of looking at the Public Finances, namely, from both the "Parliamentary" and the "Business" standpoint, we should like to say that, while we can quite understand the difference between the finances of a country lasting in perpetuity and those of a business corporation solely involved in operations for the purpose of paying dividends at stated periods, we have failed to discover any sound reasons for departing from what might be described as ordinary business lines; and seeing that the Government of this Colony is interested in the trading welfare of the community as landlord for a very great portion of the landed estate, railway owner over the whole Colony, and the largest employer of labour, it is, in our opinion, perhaps in the case of New South Wales more than in that of some other countries, absolutely essential that sound business lines should be followed in and common sense characterize the treatment of our Finances. Both the geographical position and the climatic conditions of this Colony demand that every attention should be directed towards lightening the burden imposed upon settlement and enterprise, if we are to be successful in competition in the markets of the world; and every care has therefore to be taken in order to see that the work of development which is carried out with capital borrowed from outside the Colony progresses only concurrently with an increase in both the wealth and the numbers of our population, so that the country may not be overweighted with a burden of debt from which no immediate relief can be obtained.

LAND REVENUE.

Dealing with the land revenue first, we may point out that for many years the Consolidated Revenue Fund was swollen by large direct sales of land. A feeling arose that this course was inadvisable, and auction sales were then very much reduced, but an increase took place in the sales on the deferred payment system, known as Conditional Purchases, and the total receipts under this system from 1883 (the first year in which the large reduction took place in the lands sold by auction) to the 30th June, 1899, amounted to £14,380,765. The whole of this amount has been treated when received as Revenue in the Accounts, although only an annually declining proportion represented interest. We have had figures laid before us, separating the interest from the principal in connection with these particular Accounts, from which it is apparent that a stage has now been reached when a very large proportion of the amount annually received represents payment on account of the Fee-simple.

From the year 1883 to 1899 the Public Accounts show that £4,050,386 has been received on account of other sales of lands, so that a total of £18,431,151 has been received and treated as ordinary Annual Revenue of the Colony during that period. It may be argued that, during part of the time, owing to the increase in population then going on, this was necessary and fair. Of late years, however, not only has the increase in the population by influx from outside sources been very much reduced, as the statistics clearly show (we quote the last fifteen years' figures below as a guide), but a practice has recently been introduced of charging to Loan Expenditure small works and other perishable items which, in earlier years, it was usual to treat as part of the ordinary Annual Expenditure of the Colony, while, in spite of these Land Receipts, for many years past the Consolidated Revenue has been based on lines, in our opinion, insufficient to meet what should have been charged as the Ordinary Annual Expenditure.

The Population figures we deem it necessary to lay before you are as under :—

End of Year.	Population.	Increase by Births over Deaths for Five Years.	Arrivals over Departures for Five Years.
1884	904,980
1889	1,081,820	111,862	64,978
1894	1,244,460	121,646	40,994
1899	1,356,650	107,632	4,558

The above figures show the slow growth of what we may term the adult permanent population of the Colony. Partly on this account, and partly because of the fact that, within a few years, there will be a decline in the income from the alienations under the system of Conditional Purchases (which will probably be very rapid as their maturity approaches), we consider it would be unwise to continue any longer

longer the system of treating Land Sales Proceeds (as they are described in the Accounts) as Revenue. The balances owing on Conditional Purchases are now reduced to some £10,000,000; and while possibly the present course can be continued for some years without, perhaps, under ordinary circumstances, seriously affecting the stability of the Finances—and there can be no doubt that there is a very large amount of valuable land still left in the hands of the Crown in this Colony—we unanimously consider that the time has now arrived, if the policy of retaining the lands in the possession of the State is not to be endangered, when the situation should be faced; and we suggest that, while perhaps the whole of these proceeds cannot at once be devoted to the reduction of the Deficiency Account, referred to later on, nevertheless an increasing proportion should be devoted to this purpose henceforth year by year. We are of opinion that the amount in the current year should not be less than £250,000, exclusive of the appropriation of £150,000 already provided by statute; and, after Federation is accomplished, in the event of an Australian Tariff being introduced which will leave a surplus to this Colony over and above the amount required to meet the ordinary expenses of the services retained by this State (which we think inevitable), no better object can be found to devote it to than the extinction as rapidly as possible of the large deficiency which at present exists in connection with the Consolidated Revenue Fund. And after this blot upon our financial position has been wiped out, we suggest that any surplus should be devoted to making provision for those items of a depreciating and ephemeral character which have in the past been charged to Loan Expenditure, although not in any sense revenue-producing or productive.

LOAN EXPENDITURE.

We give below figures showing the growth during the past twelve years of the Interest on the Public Debt, viz.:—

1887	£1,643,562
1888	£1,697,957
1889	£1,752,698
1890	£1,799,698
1891	£1,809,359
1892	£1,873,085
1893	£1,988,954
1894	£2,140,016
1895	£2,147,968
1896	£2,126,295
1897	£2,272,524
1898	£2,260,088
1899	£2,310,155

And we also give a comparative statement, which has been compiled from the Auditor-General's Reports, giving a dissection of the disbursements on Loan Services,

Services, exclusive of renewals of Loans, at the 31st December, 1890; the 30th June, 1895; and the 30th June, 1899; as under:—

Head of Expenditure.	31st December, 1890.			30th June, 1895.			30th June, 1899.		
	£	s.	d.	£	s.	d.	£	s.	d.
Railways and Tramways	38,149,638	12	10	39,413,837	19	10	41,287,582	4	2

Buildings for Public Instruction			739,433	18	4	822,377	11	6
Miscellaneous Public Works	*1,756,858	4	9		
	£46,051,449	9	2	£55,455,967	14	9	£61,948,816	15	9

* Includes Works and Buildings, Buildings for Public Instruction, and Public Works in Queensland.

After going carefully into the expenditure classified under these various headings, we find that certain items have been included which, in our opinion, it would not be wise to augment, and others against which some Sinking Fund, as we have previously indicated, should be provided as soon as practically possible. It is unnecessary to mention all the items we refer to; the inclusion of such articles as Rifles and Ammunition under the heading of "Fortifications, Military, and Naval Works" is a simple illustration of the departure from business principles that has been exhibited in the past in charging these and similar items to Loan Expenditure.

We are unanimously of opinion that any addition to the permanent debt of the Colony should be very rigorously watched and guarded against, unless the particular work carried out with borrowed moneys is sufficiently revenue-producing from the outset to pay at least the Annual Interest incurred in respect of the cost of construction. We are also of opinion that the so-called "Short-dated Loan" system should be abolished, and that unless a particular work is of such a character as to entitle it to rank with such reproductive Assets as Railways, Tramways, Telegraphs, and Sewerage, it should be paid for out of the Annual Current Revenue.

In making this recommendation we do not lose sight of advantages that have accrued to the Colony in the past through what has been called an "Active Public Works Policy"; but the conditions have now changed, and until there is a considerable increase in our population, so as to take the utmost advantage of what has already been done, we seriously doubt whether to continue on the same lines for any length of time would do more than create a temporary activity to be paid for later on at possibly more than its real commercial value. It is next to impossible to lay down any hard and fast lines in this matter; there can be no question that the strides we have made in the past have been great, and, as a whole, to the advantage of the country, but we certainly have no hesitation in saying that it would be wise to wait until our permanent tax-bearing population again shows more rapid increase before augmenting the burdens that must be borne by those now engaged in the producing and commercial interests of the Colony.

CONSOLIDATED REVENUE FUND ACCOUNTS.

We are strongly of opinion that it is necessary to present the Accounts in such a way as to show at a glance the result of the operations on the Consolidated Revenue Fund during each and every separate year, in order to end the state of uncertainty which has arisen in the public mind in consequence of the disputes which have raged during the last few years; and with this object in view, we recommend that the Accounts be treated in the following manner:—

(1) A Deficiency Account be opened. The deficiency to be established as on the 30th June, 1899. This Account we have made up (see Account No. 2 appended). To that Account we have debited the following:—

Treasury Bills, 53 Vic. No. 9	£1,152,884	0	0
Do 59 Vic. No. 11	1,024,700	0	0
Railway Redemption	150,000	0	0
Centennial Park Suspense Account...	228,416	17	8
General Post Office Suspense Account	468,051	15	7
			<hr/>		
Total	£3,024,052	13	3
			<hr/>		

From this amount we have deducted the balance of £116,523 5s. 8d. at the credit of the Consolidated Revenue Account Current, standing there as the outcome of the issue of the new Treasury Bills, leaving the deficiency on the 30th June, 1899, at £2,907,529 7s. 7d. This is exclusive of the sum of £1,500,000 estimated by the Public Service Board to be necessary to place the Superannuation Fund on a solvent basis. If this sum were raised by the issue of Bills and the amount placed to the credit of the Fund the deficiency would amount to £4,407,529 7s. 7d., exclusive of the liabilities on account of Police Pensions. As indicated further on, we have left the Government free to treat the deficiency on the Superannuation Fund in any way they please.

Against the deficiency of £2,907,529 7s. 7d., which we have established as existing on the 30th June, 1899, land was held at Martin Place and at the Centennial Park, of an estimated value at that date of £180,000 and £50,625 respectively; but, as indicated elsewhere, we are of opinion that the Special Suspense Accounts should

be

be closed up on the 30th June, 1899, and the total debit balances carried to the Deficiency Account, and that as the land is sold the proceeds should be placed to the credit of that Account in reduction of the deficiency. A reference to the Deficiency Account, as made up (Account No. 2), will show that we have dealt with the proceeds of the recent sale at Martin-place in this way.

There were also, on the 30th June, 1899, certain advances to be recovered after that date; but we consider it desirable to keep the accounts on a cash basis, and to take into the revenue of a year any sums which may be recovered on account of previous years, and, similarly, to include in the expenditure of the year any payments which will subsequently come back to the Consolidated Revenue. Such advances can never be great in the future, if our recommendations be carried out, and the Trust Funds placed under separate management. Large advances in anticipation of Loan Votes, which are shown to have been made in the past from Consolidated Revenue, were not really made from Revenue, because there was not money at credit to allow of this being done. We are of opinion that advances in anticipation of Loan Votes should be made from the balance at the credit of the General Loan Account, when this account has been placed in credit; and that, when it is desired to secure an advance in anticipation of raising Loan Funds, such advance should be obtained from the Commissioners controlling the Trust Funds.

(2.) The revenue of each year should be charged with the amount of the Statutory redemption of the deficiency debt—£150,000 at present, to be afterwards increased as recommended—and this sum carried to the credit of the Deficiency Account (see Account No. 2 for the year ended 30th June, 1900).

(3.) The accounts of each year should be kept separate; and the surplus or deficiency which may be established on the year's operations, after charging the annual sum in reduction of the deficiency as before explained, should be carried to the Deficiency Account (see Account No. 2 for the year ended 30th June, 1900). No cash balance from a preceding year should be brought forward in the Current Account. We have made up the Accounts for the year ended 30th June, 1900, in the form in which we should like to see them presented. (See Account No. 1.)

(4.) Separate banking accounts should be kept for the Account Current and the Deficiency Account, so that the balance with the bankers would always represent the true state of the current account. For interest purposes, the accounts would be taken together by the bankers in the usual way.

(5.) We are of opinion that the expenditure in connection with the despatch of the Military Contingents to South Africa, and with the outbreak of Bubonic Plague, being most exceptional items, and to some extent recoverable, should be removed from the ordinary transactions of the year ended 30th June, 1900, and in making up the accounts for that year we have carried this expenditure to the Deficiency Account (Account No. 2). Any sums received on account of this expenditure should be carried to the credit of the Deficiency Account at the end of each year hereafter; but any further expenditure should be charged to Current Revenue.

(6.) The Special Suspense Accounts having been closed up, any further expenditure in connection with the Martin-place and Centennial Park Lands should be charged to current revenue. The proceeds of the sales of these lands, however, as previously indicated, should be carried to the credit of the Deficiency Account, the deficiency on these transactions being already very large.

(7.)

(7.) As elsewhere indicated, we are of opinion that the total disbursements in London up to the 30th June in each year should be cabled out, and the actual cash balance existing at the close of the financial year shown in a subsidiary statement. Lack of data has prevented us from bringing the payments in May and June, 1900, to account in this way. But when the change is made, we think that the extra two months' London payments (including the interest-payment on Inscribed Stock to the Bank of England) should be carried to the debit of the Deficiency Account, so that the year in which the change is made should not be unduly burdened.

(8.) It should be clearly understood that the Deficiency Account as established by us (Account No. 2) should not be increased except by the annual deficiency which may be found to exist on the operations of any year, and with two additional exceptions, namely, first, the two months' London payments referred to, and second, provision for placing the Superannuation Funds on a solvent basis, provided that this matter is dealt with vigorously, and the funds placed on a sound actuarial basis by a single operation. But if the payment of superannuation allowances is to be made an annual charge, then this charge should fall upon current revenue.

(9.) The Deficiency Account (Account No. 2) should be carried on year by year, so that the operations of at least ten years may become visible at a glance, and it should always cover the transactions of a series of years, in order that a comparison may be made without trouble.

(10.) Any legislation which may be found necessary in order to carry out these suggestions should be passed.

DIFFERENCE BETWEEN TREASURY AND AUDIT OFFICE.

We have had laid before us papers dealing with various matters involving differences of opinion between these departments; and for the final adjustment of these questions and the settlement of any future difficulties that may arise in connection with the arrangement of Accounts or matters relating thereto, we suggest that a Permanent Committee of three should be appointed (one Officer from the Treasury and one from the Audit Office, with an independent Chairman), whose duty should be to inquire into such disputes and to come to a final decision in regard to them, to be binding on the different Officers.

We also strongly recommend that inquiries should be made as to whether such changes cannot be effected in the present Audit arrangements as to enable the work of Audit to be conducted continuously at the Treasury (instead of in a separate office as at present), and to make the Audit, if possible, more businesslike and effective, and much more economical, than it is now. The question of the earlier issue of the Report of the Auditor-General should also receive consideration; so as to be of service, we think it should be issued to the public within, at most, three months of the end of the financial year.

TRUST FUNDS.

In answer to Question No. 34, we deal fully with the Trust Funds. It is only necessary here to say that as the result of our consideration of these Accounts we recommend that the Trust Funds proper—that is to say, Funds of which the Treasurer is by statutory obligation Trustee—should be separated from the others and placed in the hands of a body of Trustees, of whom the Treasurer of the day should be Chairman.

No investments or alterations in dealing with such Funds should be made without the consent of a majority of the Trustees. The Uninvested Cash Balance required for the ordinary working of such Accounts should be dealt with as at present, and drawn upon or added to in the usual manner through the Treasurer, acting as Chairman of the Trust. The Cash Balance of these Accounts should be separated from the Consolidated Revenue Fund and placed to the Credit of a separate Account, in the Banks holding the Government Accounts. It would be the duty of the Trustees to make provision towards meeting any call for Cash that might be made upon the separate funds within their jurisdiction; and the permanent investment of all money should be strictly confined to the purchase of Government Stock, either direct from the Treasury or in the open market.

THE QUESTIONS.

In answering the forty-one Questions we deal with other features of the Finances. We have now only to add that we presented an Interim Report in order to clear away the contentious matter involved in our investigations; and on going closely into the Questions submitted to us, we find that the action we then took has practically rendered it unnecessary to give detailed figures in reply to many of the Questions, which involve answers which would only go to build up a similar result to what we have already shown in the Report referred to as a true and fair presentation of the Accounts for the period involved.

Answers to Questions,
Specimen Accounts,
Evidence and Appendix,

are attached hereto.

In conclusion, we desire to place on record our thanks for the assistance given us by our Secretary, Mr. J. R. Martin, whose intimate knowledge of the Accounts was of service to us; and our high appreciation of the care, thought, and earnestness that have been exhibited by all those who have been before us during this investigation. Every assistance has been given us by them, and all questions asked have been freely and thoroughly answered.

We have, the honor to remain,

Sir,

Your obedient Servants,

T. A. DIBBS
(Chairman).

J. RUSSELL FRENCH.

Question No. 4—

The amount of the Expenditure charged to the two Special Suspense Accounts, and the amount of the Receipts credited to these Accounts during the same period?

Answer—

The amount of Expenditure charged to the General Post Office and Centennial Park Suspense Accounts for the period of four and a half years ended 30th June, 1899, was £162,878 16 · 2

The amount of the Receipts credited to these Accounts during the same period was 1,434 3 1

The Expenditure, in excess of Receipts, being... £161,444 13 1

Question No. 24—

Whether the act of applying £150,000 from the Sinking Fund established under Act 53 Vic. No. 24, towards meeting Railway Debentures matured under Act 31 Vic. No. 11, will not have the effect of compelling the Consolidated Revenue Fund at a later period to provide the amount relieved in the year 1897-8?

Answer—

Yes; and in order to clear the Accounts, and thus obtain an intelligible idea of the position and a proper starting-point for the future, we have carried this amount, as on the 30th June, 1899, to the "Deficiency Account" more particularly described in the General Report.

Question No. 25—

The amount by which the Consolidated Revenue has been relieved by charging to the proceeds of Short-dated Loans, and in other ways, Expenditure ordinarily provided from Revenue? Whether the system of repayments established in connection with these Loans is not one that tends simply to relieve the first few years during which it is in operation at the expense of future years, and whether it should not be discontinued?

Answer—

The amount charged to "Short-dated Loans" is given in our Interim Report. The system of repayments adopted undoubtedly, as the Accounts show, considerably relieved the first few years; and in our General Report we advise the discontinuance of this system, and give our reasons for such recommendation.

Question No. 30—

In the event of a discrepancy between the Ledger Balances and the Bank Balances, to what was this due; and whether the system under which such differences are possible may be correctly described as a "Cash Basis" system?

Answer—

Discrepancies, or rather differences, at all times, between the Ledger and Bank Balances, are caused by the delay in the receipt of London Accounts, and by the Special Suspense Accounts which have hitherto existed. The designation of "Cash Basis" for the system of Accounts is an unfortunate one; as a matter of fact, at no time since the new system was introduced have the Ledger Balance figures, referred to as Cash Balances on the 30th June, been a true indication of the actual position of the Finances.

Question No. 31—

Whether it is correct to hand over large Interest Payments to the Bank of England in the month of June, and bring them to account on the 1st July following? Whether the Commissioners would recommend the London Payments in May and June to be included within the Financial Year during which they are actually made; and whether the Special Suspense Accounts should be closed up?

Answer—

It is not technically correct to treat London Payments in the way they have been dealt with, but, after very careful inquiry and consideration, we have come to the conclusion that, owing to the ramifications of the operations of the Government's transactions on "Trust," "Loan," and "Revenue" Accounts in London, it would not be advisable to cable out the details of the payments in May and June. We are unanimously of opinion, however, that such totals should be obtained by cable for a trifling expense at the end of each Financial Year as would enable a clear metallic balance of actual Cash on hand to be shown in a subsidiary statement; and we have recommended in our General Report, if this be done, to charge the extra two months' payments to Deficiency Account.

Question No. 32—

Whether the present system of keeping the Public Accounts is a good one; and whether the Commissioners can suggest any improvements in the method of keeping the Accounts, or in their presentation, so that these may be more easily comprehended by the Public?

Answer—

We have inspected the books at the Treasury and, without going thoroughly into them, item by item, we have no hesitation in saying that they appear to be well
and

and carefully kept. The system of book-keeping, under all the circumstances, seems to us as simple as it is possible to make it, while meeting all the legal requirements. With regard to the presentation of the Annual Accounts to the public, we have given considerable thought to this matter, and have made some important recommendations in our General Report.

In amplification of those remarks, we suggest that all Refunds and Rebates should, in future, be dissected, and instead of being treated as Expenditure, should be deducted from the Gross Receipts, under each particular heading to which they may belong, so as to show the Net Revenue from all sources in every case where possible.

We further recommend that Railway Receipts as well as Expenditure should be under separate headings in future accounts, as the object should be to show the Receipts for different Services rendered against the payments for the Expenditure on account of the same. At the same time, constant changes in the method of submitting Returns should be avoided; but all alterations necessary should, we think, be adjusted at once, so that the Statements after Federation has been accomplished may be in as permanent a form as possible, and as clear as circumstances will permit. Statutory authority for the form of Accounts should be obtained, so as to prevent future alteration without reference to Parliament.

As regards the "*Centennial Park Suspense Account*," we find, that the Expenditure under this head appears first in 1887:—

In that year the amount paid out was (charged to Ordinary Expenditure)	£20,285	0	0
In the next year there was a further sum spent of... ..	66,784	11	5
charged to Expenditure;			
In 1889	56,913	4	2
1890	26,250	3	10
1891	27,560	17	3
1892	1,617	6	2
1893		
Total charged to Ordinary Expenditure	199,411	2	10
In October, 1894, there being a Debit against the Consolidated Revenue Fund, it was split up, and then this amount first appears in the printed Accounts as under "Suspense" heading, and no change took place in the same to June 1895.			
In the year 1895-6 the Debit was increased by ...	24,960	16	11
In 1896-7 there was no change.			
In 1897-8 it was reduced by	6	0
In 1898-9, an increased further Debit of... ..	4,050	17	11
	228,422	17	8
	6	0	0
Leaving a Net Debit Balance on the Books on the 30th June, 1899, of	£228,416	17	8
Against which it was stated Land Sales would come in reduction.			

During

During the course of this examination we have found that, in August, 1896, it was officially stated that 39 acres were then available for sale, of an estimated value of £39,000. On several occasions in 1896 the matter was submitted for consideration, and in December of that year it was calculated that all the land legally available under the Act as it then stood, and remains now (viz., 101½ acres), was worth, at a high average price, £50,625. An alteration in the Act was suggested for the Cabinet's consideration whereby the available land for sale would be increased by a reduction of the park area originally provided for. By this increase to the area it was estimated that the sales would produce in all £137,875. Compared, therefore, with the figures at the Debit of the Account, it is self-evident, even if the increased area suggestion had been adopted (and we are told that no Act has yet been drafted), that there was a known shortage on this Account from the end of 1896-7 of

... ..	£86,496 19 9
And by the end of the year 1898-9, it was increased by	
additional Debits to—	90,541 17 8

We recommend that this Account should be closed up on the 30th June, 1899, and dealt with as indicated in our General Report.

“ *General Post Office New Street Suspense Account* ” appears as a separate Balance in list of Public Accounts at 31st December, 1892. The amount is then shown as under, viz. :—

<i>Payments</i> in 1890...	£159,647 14 8	<i>Receipts</i> ...	£5,811 7 6
„ 1891...	177,730 10 4	„ ...	23 14 2
	<hr/>		<hr/>
	£337,378 5 0		£5,835 1 8
	5,835 1 8		
	<hr/>		
<i>Dr. Balance</i> —	£331,543 3 4		

1892	Payments	£87,814 13 6	Receipts	£27,216 0 0	Dr.	£392,141 16 10
1893	„	29,947 3 0	„	102,523 5 3	„	319,565 14 7
1894	„	16,047 2 9	„	„	335,612 17 4
1895 (½-yr.)	„	132,929 1 6	„	„	468,541 18 10
1895-6	„	695 18 8	„	„	469,237 17 6
1896-7	„	25 2 2	„	„	469,262 19 8
1897-8	„	177 15 11	„	465 19 5	„	468,974 16 2
1898-9	„	„	923 0 7	„	468,051 15 7

Against the above Debit Balance of £468,051 15s. 7d., which is the cost without interest, the sum of £79,000 has recently been received from land sold, and it has been shown by expert evidence that the estimated value of the land left is about £100,000. It will thus be seen that, even if the above estimate be realised, there is a loss to be dealt with of £290,000 on this Account alone. This resumption took place under an Act of 1889, and it is quite evident from the above that a loss has been apparent in connection with this Account for many years past.

We recommend that this Account should also be closed up on the 30th June, 1899, as indicated in our General Report.

Question No. 33—

Whether the sum of £1,500,000 was transferred from Trust Funds to the General Loan Account, as alleged by the Auditor-General?

Answer—

Yes.

Question No. 34—

Whether the present system of dealing with Trust Funds and of utilising the Balances as Working Balances in connection with the Consolidated Revenue Fund Account and the General Loan Account should be altered; if so, what changes would the Commissioners recommend?

Answer—

We find, on investigation, that the Accounts published by the Treasury under the head of "Trust Funds" may be divided under three classes, viz. :—

- (1.) Trust Funds proper, *i.e.*, Funds of which the Treasurer is by Statutory obligation Trustee.
- (2.) Moneys deposited or borrowed for the purpose of assisting the General Banking Accounts of the Government, which are principally required for the General Loan Account. Under this head come the Savings Bank of New South Wales Deposits, now aggregating £2,640,000.
- (3.) Departmental Working Accounts including Store Accounts, and Advance Accounts, &c.

The present system of dealing with these Funds appears to require alteration, and it is therefore recommended, as indicated in our General Report, that—

The first of these Divisions, which constitutes the General Trust Funds proper, should be separated from the others, and should retain the heading of "Trust Funds."

The Accounts under this division should be placed in the hands of a body of Trustees, of whom the Treasurer for the time being should be Chairman.

No investments or alterations in dealing with such Funds should be made without the consent of a majority of the Trustees.

The Uninvested Cash Balance required for the ordinary working of such Accounts should be dealt with as at present, and drawn upon or added to in the usual manner through the Treasurer, acting as Chairman of the Trust.

The Cash Balance of these Accounts should be separated from the Consolidated Revenue Fund and placed to the Credit of a separate Account, in the Banks holding the Government Accounts, and should, in consideration of the fact that the Treasurer has to pay Interest on the Uninvested Cash, be allowed to be included in the aggregate amount of the General Banking Account, for Interest purposes only, in order that the Treasury may get the full benefit of the arrangement whereby the Government Bankers charge no Interest on any overdrawn individual Account so long as there is a Credit Balance on the aggregate Government Account.

It

It would be the duty of the Trustees further to see that ample provision was always made to provide for any call for Cash that might at any time be made upon the separate funds within their jurisdiction; and the permanent investment of all moneys should be strictly confined to the purchase of Government Stock, either direct from the Treasury or in the open market.

The Second and Third Divisions of the above to be described as "*Special Deposit Accounts.*"

With reference to the Amounts forming the Second Division, it is deemed very undesirable that amounts should be held at call or for short periods, and form, on such insecure tenure, an addition to the Public Debt. It is therefore recommended that:—

Statutory provision should be embodied by amendment in the Audit Act to the effect that no sums shall be taken on deposit, or in any like manner, for a longer period than twelve months, and that this class of accommodation should be accepted only from the "Trust Funds" at the Credit of the Trustees, or Government Accounts only, and in all cases, when possible, the Accounts should be squared annually before the 30th June, so as to simplify and avoid extraneous entries in the published Annual Public Accounts.

It is recognised that the state of the Money Market may at times render it undesirable to float a Loan, but it is considered that by allowing a period of twelve months all reasonable provision will be ensured for securing a favourable market.

It is also suggested, with regard to the "Special Deposits" from the Savings Bank of New South Wales, now held by the Government:—

That no further renewals of such Deposits be allowed, but provision made for either discharging them at maturity or exchanging them for Government Stock or Treasury Bills.

We would further remark, with reference to these Deposits, part of which was apparently taken to assist the "General Loan Account" through the medium of book entries, as advances to "General Loan Account"—£1,500,000—that it would be advisable, with a view to getting rid of both these objectionable items, that an authorised loan be floated at the first favourable opportunity. By this means the true financial condition of the "General Loan Account," as well as the liability of the Government, in regard to the Public Debt, would be made apparent.

The Committee think that such matters as the "Roberts' Bequest Trust" should not in any case be accepted, as no obligation to do so exists, and they recommend that Securities should be handed to the Authorities of the University, it being, in their opinion, highly undesirable that the Government Accounts should be burdened with matters which do not belong to Public Finance.

As regards the third class, viz., "Departmental Working Accounts."

"Store" and "Advance" Accounts: These might, as already remarked, be included under the general heading of "Special Deposit Accounts."

Remarks

Remarks on Special Trust Accounts.—These consist of Redemption Funds and Supreme Court Accounts, and each has its separate Banking Account, the whole being included in the General Banking Account for Interest purposes only.

With regard to the Redemption Funds, provision is already made in the several Acts under which they were instituted for the establishment of Trustees, but up to the present the provision has not been taken advantage of.

In the case of the Supreme Court Accounts, they are Working Accounts over which the Treasurer has only a nominal control. There is no reason why they should not remain as they are now under the control of the Courts.

Question No. 35—

Whether from the 1st October, 1897, to the 23rd September, 1899, payments to the amount of £1,278,940 were made from Revenue without the authority of Parliament, and without the Auditor-General's Certificate? Whether, in connection with these payments, an Expenditure Suspense Account was opened; the effect of that account?

Answer—

We have had evidence that payment of £1,278,940 was made, as stated in the question, and that the amounts were treated under "Expenditure Suspense" heading pending the ordinary Parliamentary authority being obtained. The failure, however, to obtain promptly this authority appears to us to have only been a technical point; at the same time, dealing with Public Funds, as the Treasury are daily, we think that, where it is absolutely necessary to act without full Parliamentary authority, such should be obtained in all cases without delay. We should have liked to have evidence from the late Treasurer of that time on this point; but we invited him to attend on two occasions, and he did not accept the invitation.

Question No. 36—

The amount borrowed from the Savings Bank of New South Wales, Barrack-street, Sydney, to the 30th June, 1899, and to date?

Answer—

To the 30th June, 1899	£2,415,000
„ 2nd May, 1900	2,640,000

Question No. 37—

The conditions under which these Deposits were placed with the Treasury?

Answer—

Practically at call, or short notice.

Question No. 38—

Whether any of these Advances have been covered by Securities?

Answer—

No.

Question No. 39—

The purpose for which this money was obtained from the Trustees of the Savings Bank of New South Wales?

Answer—

We believe to provide for advances to "Loan Account." We may here add that we do not think these advances should be included in Trust Fund Accounts.

They

They cannot in any sense of the word be considered "Trust Funds," nor was it obligatory upon the Treasurer to take them. We may further add that we consider that the Government placed itself in an unfavourable position by borrowing to such an extent on the terms they did, and we cannot understand why the Treasurer of that time (seeing the period over which these advances were obtained) did not insist upon issuing Stock for the amount borrowed, so as to obviate the existing position of liability to be called upon to repay such a large amount at call. It is our unanimous opinion, we may say, that there have been several occasions during the period covered when there would have been no difficulty in selling the Stock at satisfactory prices, and we would strongly urge upon the Government of the day to take such measures as may be necessary to relieve the Colony from its present liability in this particular direction.

Question No. 40--

Whether from the month of November, 1896, to the close of the year 1899, payments to the amount of several million pounds sterling were made from Loan Funds without the certificate of the Auditor-General, and whether such payments were therefore illegal?

Answer--

From the evidence put before us we find that, owing to the Auditor-General taking one view of the matter (subsequently, we may add, confirmed by high legal authority) and the Treasury another, certificates were not issued by the Auditor-General for certain payments totalling a large amount which it was essential at the time should be paid. An Act has since been passed in which the wording has been altered in such a way as to get over this difficulty, but we consider it is very debatable whether it is wise for this Colony, wealthy as it undoubtedly is, to continue spending Loan Funds to any large extent without first obtaining the money for same on such terms as would render it impossible for any one to call upon the Treasurer for repayment thereof on practically very short notice. In fact, it is undoubtedly only following on the lines of sound finance to say that, when the Money Market is not favourable for floating Loans, Expenditure should only be proceeded with very cautiously, as it is quite within the range of possibility that, were the Government forced by circumstances to go either to the London or the Colonial Market at a critical time for any large sum (such as in the present case has been allowed to accumulate without the issue of Scrip therefor), the money could and would possibly be obtained, but the price that might have to be paid for it would seriously affect the financial standing of the Colony's securities for long afterwards.

It is perhaps not out of place here for us to say that, instead of borrowing so largely from the Savings Bank of New South Wales at call, as the Government has done in the past, it would be well to encourage and popularise small local investments in Government Stock. This market is incapable of absorbing millions in this way, but it certainly would be wise, as far as possible, to enlarge the numbers of those living here who are financially specially interested in the politics of the country.

It is our unanimous and unhesitating opinion that, taking money at call other than through the Post Office Savings Bank, or on any other basis than that of the issue of Stock for a more or less lengthy period, should be avoided under almost any and every circumstance.

Question

Question No. 41—

The Balances of the various Accounts when the present Government assumed office?

COMMITTEE OF INQUIRY INTO THE PUBLIC ACCOUNTS.

MINUTES OF EVIDENCE.

FIRST DAY.—WEDNESDAY, 18 APRIL, 1900.

[The Committee met at the Board Room, Chief Secretary's Office.]

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

John Vernon, Accountant to the Treasury, examined:—

1. *Chairman.*] The accounts in the *Government Gazette*, showing the revenue proper and the expenditure proper, are really a reflex of your ledgers at the Treasury, are they not? They are, subject to audit. They are practically a reflex, or, rather, a forecast of our ledgers,—that is to say, our ledgers are balanced and these accounts are published. These are reconciled with any further alterations which may be made after the Auditor-General has gone through them in the annual accounts.

J. Vernon,
Esq.
18 April, 1900.

2. Can you tell me what the expenditure was on 31st March, 1895; I want to check your figures with figures which I have here before me? Taking the revenue first, that was £3,090,995 12s. 3d.

3. That is not the revenue proper according to my figures.

4. *Mr. French.*] Do you keep a book at the Treasury in which the items are recorded? Yes.

5. So, your published statements are from a book which you can show if necessary? Yes.

6. *Chairman.*] The answer I should expect you to give is £2,132,640 3s. 3d., that was the revenue proper? Yes.

7. What was the expenditure proper? The expenditure proper was £2,576,916 7s. 1d.

8. *Mr. French.*] What is the reason of the discrepancy between the two sets of figures you have quoted? The figures I first quoted include all the charges and credits to the Consolidated Revenue Fund, which would include such items as what we call "other receipts." Those are amounts expended and to be recovered.

9. The supplementary items, as far as expenditure is concerned, are sums charged and to be recouped, is that so? To be repaid.

10. From some source or other? From some source, certainly.

11. And, in fact, they are merely an interim charge to the Consolidated Revenue? That is all, but they would appear in the ledger balances.

12. If we eliminate these we will have to bring them in somewhere in regard to your Annual Statement of Account, the debits and credits? In regard to Ways and Means, they are all accounted for there. And to obtain the true condition—at least, what we contend is the true condition—you would need to bring in all the outstanding accounts at the close of the investigation. I can give the Commission a statement which can be very easily checked and verified from the annual accounts showing the revenue proper, the "other receipts" for each of the years included in the period of investigation.

13. *Chairman.*] Will you give me the revenue proper for the quarter ending 30th June, 1895? The revenue was £2,432,140 6s. 11d.

14. And the expenditure for the same period? The expenditure was £2,353,891 19s. 5d.

15. And the revenue and expenditure for the quarter ending 30th September, 1895? The revenue was £2,397,700 18s. 11d. and the expenditure £2,409,472 18s. 8d.

16. For the quarter ending December 31, 1895? The revenue was £2,444,020 6s. 1d. and the expenditure £2,615,121 3s. 10d.

17. For 31st March, 1896? The revenue was £1,985,090 3s. 4d. and the expenditure £2,331,199 11s. 10d.

18. For 30th June, 1896? The revenue was £2,425,033 14s. 6d. and the expenditure £2,530,483 12s. 8d.

19. For 30th September, 1896? The revenue was £2,281,431 6s. 3d. and the expenditure £2,231,261 2s.

20. That does not include £1,562 11s. 8d. belonging to the previous year. Do you wish to include the deficiency accounts?

21. No; we want the revenue and expenditure proper? We are now dealing with what is known as the new current account.

22. *Mr. French.*] What is that? That is since 30th June, 1895.

23. The cash system? Yes.

24. *Chairman.*] The amount I expected you to call out was £2,382,823 14s. 3d. Have you that amount there;—it must be there? I have that amount, but that is including £150,000 for Treasury Bills.

25. But still that is expenditure proper? Oh yes.

26. Was that ever credited? Yes; in the £1,174,000 issued, that was credited to the Consolidated Revenue.

27. And of that amount, the sum of £150,000 was cancelled? Yes.

28. As the amount of £1,174,000 for Treasury Bills was credited to Consolidated Revenue, the £150,000 is a fair debit to put in this figure?

Mr. French.] It may be a fair debit, but it ought to be left out, and brought in as a special item, or a note taken of it, because it is not expenditure proper.

Witness.] It is practically what we call another payment, because the Treasury Bills came in under "other receipts."

- J. Vernon,
Esq.
18 April, 1900.
28. *Chairman.*] Of the £1,174,700 the sum of £150,000 was returned? Yes.
29. Now, will you give me the expenditure up to 30th September as it should be? £2,232,823 14s. 3d. There is a sum of £150,000 which has been excised, and there is a small payment of £1,562 11s. 8d. on account of the services of 1895.
30. What are the figures for the quarter ending 31st December, 1896? The revenue was £2,332,215 6s. 6d. and the expenditure £2,745,910 19s. 10d.
31. And for the quarter ending 31st March, 1897? Revenue, £2,103,747 15s. 3d.; and the expenditure, £2,151,245 12s. 4d.
32. For the quarter ending 30th June, 1897? Revenue, £2,591,874 14s. 1d.; and the expenditure, £2,376,818 12s. 4d.
33. For 30th September, 1897? Revenue, £2,115,173 3s. 7d.; and the expenditure, £2,240,559 11s. 11d.
34. For 31st December, 1897? Revenue, £2,297,146 2s. 8d.; and the expenditure, £2,657,587 19s. 6d.
35. In the figures before me the expenditure appears as £2,602,000 odd? But there is an amount of £55,027 in adjustment of the vote advanced to the Treasury, which is a proper expenditure.
36. *Mr. Yarwood.*] I suppose the reason for showing that separately is because it belongs to another year? Yes; that is the expenditure paid from the Treasurer's Advance Account in the previous year, but, upon being voted by Parliament, it is brought into the expenditure proper.
37. *Chairman.*] What are the figures for the quarter ending 31st March, 1898? Revenue, £2,298,075 3s. 6d.; and the expenditure, £2,197,345 0s. 11d.
38. I see another difference in the figures there;—what is the amount of the difference? £14,300.
39. *Mr. French.*] What item is that? That is an item for expenditure on account of services for 1895–96.
40. *Chairman.*] Now, the figures for the quarter ending 30th June, 1898? Revenue, £2,771,739 19s. 6d.; and the expenditure, £2,366,358 14s. 4d.
41. For the quarter ending 30th September, 1898? Revenue, £2,226,145 17s. 6d.; and the expenditure, £2,248,694 10s. 7d.
42. For 31st December, 1898? Revenue, £2,450,835 10s. 7d.; and expenditure, £2,660,958 4s. 6d.
43. For 31st March, 1899? Revenue, £2,258,529 9s. 5d. I expect you have £2,591,063 19s. 3d. as the expenditure, but you want to add to that, for a similar reason to what I have already given, £134,223 15s. 8d. The figures should be £2,725,287 14s. 11d.
44. For the quarter ending 30th June, 1899? Revenue, £2,818,673 18s. 10d.; and the expenditure, £2,195,236 5s. 7d.
45. Now, take the starting point of January, 1895, what was the balance shown to the debit of the Consolidated Revenue on that date? The balance shown by the *Gazette* was £464,711 0s. 4. That was corrected upon audit to £464,715.
46. In my figures here I have the amount £496,400 1s. 5d.;—can you explain the difference? No, I cannot.
47. There is a difference there of £31,000 odd;—can you explain what that is? No, I cannot.
48. I may say that I got my figures from the *Government Gazette*? And those I have quoted are from the *Gazette*. The balance I have quoted is carried forward to the 1st April.
49. *Mr. French.*] Do the statements which you have read out to us tally with the Auditor-General's monthly statements? The Auditor-General makes no monthly statements. He only deals with the matter in the annual account.
50. Do the four quarterly statements agree with his annual one? Yes; there may be some adjustments in the last quarter, but substantially they will agree as I have read them out.
51. You do not publish until they do agree? Oh yes, we publish these on the 1st of the month.
52. And if they do not agree? The balance is always the same, but it is a matter between accounts. For instance, we might have included a small account as revenue when it might have been a trust fund or a loan, so that simply alters the revenue account, but it does not alter the total. That agrees and must agree, because we balance before we leave.
53. *Chairman.*] Taking your balance on 1st January, 1895, as £464,711 0s. 4d., and the various amounts you have called out, will that give us an idea of the revenue proper and the expenditure proper for that period? For those years; but in taking that £464,000 odd you must remember that that was a balance brought over which includes "other receipts," and which we have excised so far as this revenue proper is concerned.
54. *Mr. French.*] Then that is not a true balance as regards revenue and expenditure? It is the ledger balance of all.
55. But it is not a true balance as regards revenue and expenditure proper? No; practically if you were closing the business it would prove a true balance because you would gather in your outstandings, but in the meantime it is an interim balance.
56. Have you any information in the Treasury which would enable us to know what the outstandings were at the two periods;—do you keep any record of your outstanding liabilities? I think I could give you that information. I am not sure about 1895, as I was not in the Treasury in the year 1895.
57. We have taken a particular period;—we want to know how much there was outstanding at the commencement of that period that has been paid during that period, and how much there was left outstanding at the end of the period? I see.
58. *Mr. Yarwood.*] My idea was that we should throw the old accounts into liquidation? Virtually the matter has worked itself out; but there are no separate accounts.
59. *Mr. French.*] In order to have a proper conception of the period we are dealing with we must get a return of the items which were outstanding;—I suppose there were items outstanding on both sides? Oh, yes.
60. There ought to be some means of ascertaining what were the responsibilities outstanding before the period commenced which have become since a charge on the period, and there ought to be also a statement showing what items there were outstanding at the end of the period which ought to have been charged within the period? As far as 1899 is concerned, I can give you that easily. I understand that you want it for the two points, the beginning and the close of the period.
61. Quite so; it might simplify matters, and it would be information I would like personally;—I think it would be desirable to know exactly how we stood on 30th June, 1895, as regards any outstandings. I want

want to test the cash system, and see what it really means. We only want the outstandings on June 30, 1895, because we shall get the outstandings at the end of Mr. Reid's cash system period. Besides wanting to know the outstandings on December 31, 1894, I would like to know the outstanding items on June 30, 1895? What would you include among the outstandings?

J. Vernon,
Esq.
18 April, 1900.

62. By outstandings, I understand this—that at a given date there are certain payments as to which it is a moot point whether they should have been charged prior to that particular date—say, 30th June, 1895—or not, and which have been charged at some subsequent date. I should like to know those items, so that I may form an opinion as to whom they should be charged? That would be rather a long list to get out. I think I can give you the totals, and mainly the services.

63. I should like to know for myself, whether the other members of the Commission would care for the information or not, I do not know what there was outstanding on 31st December, 1894, which was subsequently paid, what was outstanding on 30th June, 1895, which was subsequently paid, and what has been ascertained to have been outstanding on 30th June, 1899, which has subsequently been paid for?

64. *Mr. Yarwood.*] I would like the information for the intervening years if you can give it, Mr. Vernon? That would be remarkably difficult, for this reason: On June, 1895, the new system came in, and there were no liabilities carried forward at the close of the year. Anything unpaid at the close of the year under the new system became a charge on the following year.

65. *Chairman.*] I would rather confine it to the two periods, and get the intervening years afterwards. Or we might confine it to the three periods at present? Very well.

66. *Mr. French.*] The figures you have given us are actual figures, that is to say, the actual revenue received and the actual expenditure incurred. It is not a question of votes and that kind of thing; it is actual? Yes; it is actual.

67. *Mr. Yarwood.*] When the House was asked to pass £1,174,000 Treasury Bills that was supposed, was it not, to wipe out the old régime altogether? Yes.

68. That was the estimate of the situation? Yes.

69. Could that estimate be produced;—are there any figures that would show how that was arrived at? I will see if I can find them. Not having been in the Treasury at the time I did not expect that old matter to be raised again.

70. *Mr. French.*] That virtually will be comprehended in my question. If Mr. Vernon is correct that all outstandings on 30th June were cleared up then a clean sweep of everything would be made and the liabilities assessed exactly, and a fresh start made on the 1st July. But I am not clear that it was so? There was an estimate made.

71. Only an estimate? It could only be an estimate.

72. *Mr. Yarwood.*] Which was subsequently found to be £150,000 too much? I had better get the figures for the Committee to show how that £150,000 was too much.

73. *Chairman.*] There were certain credit accounts on 31st December, 1894, that were closed and credited to Consolidated Revenue. Could you give us the particulars of these accounts. I will give you an illustration. There is a sum of accrued interest on loans credited to General Loans Account, £360,689 6s. 9d.; had that been credited to the Consolidated Revenue on 31st December, 1894, would that not have reduced the debit balance of £464,000 by that amount? Certainly it would have reduced it had it been credited.

74. That was an accumulation of charges from the Government of the Colony since the beginning of things? Yes, it was accrued interest on loans.

75. And had it been credited on 31st December, 1894, that £464,000 appearing as a debit to the account would have been reduced by that sum? It was used to reduce the liabilities before the balances of Treasury Bills were made up.

76. *Mr. French.*] That is not the point. It was not included in the figures which made up that debtor balance? No.

77. Where does it appear in the statements before these;—where would it appear before that entry was passed? It would appear under loans, that is to say in this way; we get interest on the raising of loans. There are certain discounts and certain interests allowed, and accrued interest arises which has always hitherto been credited to loans. The Auditor-General contended for a long time —

78. *Chairman* (interrupting).] Debited to loans, you mean? We call it credited to loans. At last, after repeated remonstrances, the Auditor-General succeeded in getting his wishes acceded to, and that was transferred.

79. *Mr. French.*] You debited loans to the credit of revenue? Yes

80. That does not appear in the figures you have given Mr. Dibbs? No, that is one of the special items.

81. *Mr. Yarwood.*] And did that entry bring the debit balance of the Loan Account up to what the scrip was that was actually issued on the part of the Colony? No.

82. Does that all apply to the period before? Yes.

83. What I mean is this—does it apply to loans absolutely issued before January 1, 1895? I think the whole of it does, but I am not quite certain about one or two small amounts. I will look these up.

84. *Chairman.*] I will repeat my question. Taking the debit balance of Consolidated Revenue at £464,000, had any entry been passed on January 1, 1895, would not that have reduced that amount by such sum? Yes.

85. Were there not other credit accounts on 31 December, 1894, that might have been brought into the account? Besides the special item you are speaking of?

86. Yes? There may have been other small credits, but I do not remember any at present.

87. Take one case for instance—the State Children's Relief Fund. There was £11,000 standing to the credit of that account. That account was closed, and the amount transferred to the Consolidated Revenue. That gave so much more revenue to start the cash system? I could not answer that question now.

88. Did I understand you to say that that entry of £360,000 odd was made at the request of the Auditor-General? Yes.

89. On the plea, I suppose, that as the full amount when the debentures fell due would be charged to the Consolidated Revenue, therefore the Consolidated Revenue should have the credit? I think that was the argument he used.

90. *Mr. Yarwood.*] That the loan debt should appear in the same way as the scrip appeared; that is so, is it not? What is known as the Loan Debt is always represented by the scrip issued, whether loans are floated at a premium or not.

J. Vernon,
Esq.
18 April, 1900.

91. *Chairman.*] Including that £360,000, there was something like £800,159 7s. 3d. of credit balances that were credited to the Consolidated Revenue, and there was a sum of £1,465 6s. 10d. debited to the account of scab in sheep. Had those entries been made that would have thrown that debit balance into a credit balance? To get at that you want to include the liabilities.
92. I will give you the figures if you will put them down. They are as follows:—£360,689 6s. 9d., £297,897 16s. 2d., £79,599 3s. 6d., £26,825 10s. 6d., £11,000, £10,439 16s. 11d., £7,349 13s. 7d., £4,774 4s. 5d., and £1,583 15s. 5d. The total of those is £800,159 7s. 3d. On the other side there was a debit account of £1,465 6s. 10d. transferred to Consolidated Revenue? I should like to verify these figures, as I am rather at a loss. I will have them ready for next meeting.
93. Those are all the items outside the revenue proper for the first eighteen months to 30th June, 1896? Yes.
94. Then you commenced the cash system? No; on 1st July, 1895.
95. But the entries I have given you extended over the year from 1895 to 30th June, 1896? Yes.
96. *Mr. French.*] Those are not the only items of a special character outside revenue and expenditure proper? No.
97. *Chairman.*] Will you allow me to correct you. I think they are the only items in the accounts of the first eighteen months, and they balance with your books? Yes; but I understood Mr. French to mean were they the only items in the other receipts or extraordinary receipts. Those are, I grant, the only items belonging to a time prior to the change of system.
98. The change of system was in 1895, but some of these were paid in 1896? Yes; but they belonged to 1893, 1894, and 1895.
99. Yes; but they are credit balances? Yes; but I understood Mr. French to ask whether these were the sole receipts which were extraordinary, which were not revenue proper.
100. I say they are. That is, I want you to verify it. I do not want to be dogmatic. I have balanced your books and have had my expert on to the matter so as to get a grip of the thing, and I find that in the first eighteen months, from January, 1895, to 30th June, 1896, those were the only entries?
101. *Mr. French.*] What I want to get is the expenditure proper and the revenue proper, the expenditure extraordinary and the revenue extraordinary, and then we shall have the whole thing before us, shall we not? Yes.
102. That is, at present, for the period we are discussing;—when we began to talk about revenue proper and expenditure proper I understood that certain things were eliminated? Yes, we call them “other receipts and payments.”
103. *Mr. Yarwood.*] Are there special items on both sides of the accounts? Yes.
104. Here is an item on 30th September, 1895, of “Advances to Contractors, £1,368 12s. 3d.,” amongst the payments—I want to get at the system under which these things are done—and there are advances repaid, £1,020;—what do you do with the balances under the cash system? The balance is simply carried forward and debited against the revenue until repaid; that is to say, the balance would affect the Consolidated Revenue Fund balance until repaid by the person interested.
105. If one Treasurer went out on 31st December, whatever was due from contractors would be revenue that arose during the next Treasurer’s period? Yes.
106. Under the old system you would have carried that forward as a financial asset? Yes, and we would still do so. We should show that as advances to be recovered. When the Treasurer was going out he would get up a Ways and Means statement, which is a balance account, and would show advances to be repaid as part of the revenue. I had better show you that account.
107. What was the nature of that contractor’s account? It occurred in the Railway Department, when I was accountant in the Railways. The origin of it was that the auditor had a difficulty in paying for any work done for any contractors, that is work performed before payment was made. So Parliament passed a small vote of £2,000 to pay for that service, which was to be recouped from year to year, and they carried on that vote for years. But it always got into a mess. The contractors did not pay for ten or twelve years. That is, they would not pay. For instance, if a man had a large contract on an extension, he would get us to repair his locomotives and waggons, and do all sort of work to help him on, and then probably there was a dispute for six, seven, or eight years. The account was never settled and all the while the revenue had to bear the brunt.
108. And he would go on drawing his 90 per cent. all the time, or whatever you were paying him? Yes, he would draw that before he started to quarrel.
109. In number 4 of the questions before us, reference is made to two special suspense accounts; what are those accounts? I presume they are the accounts which we call suspense accounts, such as the Post Office Improvements Account and the Centennial Park Account.
110. Are those the only two suspense accounts you have? Those are the only two at present.
111. What is the nature of those two? I can produce the Acts of Parliament under which they were started. It was supposed that the sale of the surplus land in both cases would be sufficient to defray all the expenditure incurred.
112. *Mr. French.*] That was the acquirement of the land, the formation, and everything? Yes.
113. *Mr. Yarwood.*] Will you give us the history of the Centennial Park Account;—was it a resumption? I think it was originally, but I am not quite sure of that. It occurred before I was in the Treasury. It was Crown lands handed over for water supply, I believe, and it was then in the control of the council. Whether the council gave it up without any compensation I am not sure.
114. *Chairman.*] Will you give us a copy of these suspense accounts? Yes.
115. *Mr. French.*] I understand there was a certain park which I think Sir Henry Parkes decided to form, and there has been charged to that in suspense a very large amount of money in connection with the beautifying of it, and sand-shifting, amongst other things, I presume, which amount has been charged to suspense and not to expenditure. This suspense account has mounted up to about £200,000, and is supposed to be repaid by the value of the Park and the value of the land which is available for sale within the Park? Yes.
116. And the same thing has happened with regard to the Post Office resumption? Yes, that is practically it.
117. *Mr. Yarwood.*] I understood it was the road frontages they were going to sell. Will you find out if they have the right to sell those, and if so, what is the value as compared with the balance to the debit of the account? That would be difficult to do.

118. Has that ever been done? That I am not aware of. That would be a matter of pure valuation. I think a valuation was made shortly after the Park was commenced. I think there was a valuation in the original papers.

J. Vernon,
Esq.

119. Are they holding the Centennial Park for the purpose of selling it in a better market, or are they in a position that it is illegal to sell it, or that they cannot sell it? That I do not know; is not within my knowledge.

18 April, 1900.

120. If it is illegal to sell it, that account has no business to exist? No.

121. *Chairman.*] There is another question that might arise out of that. Is it legal to charge these moneys which represent expenditure on the public lands of the Colony to a suspense account? Do you know the law on that, Mr. Vernon? I could not answer from memory, but I could look up the Acts under which the two accounts were formed. If I remember aright—of course, his is only given with reserve—the Act legalised this charge upon the Consolidated Revenue Fund, and subsequently the amount was placed to what was called a suspense account; that is to keep it out of the ordinary annual expenditure. That was merely a book entry of the amount, you might say.

122. *Mr. Yarwood.*] Will you look that question up? Yes.

123. *Chairman.*] I have heard that different Treasurers treated this matter in different ways;—were not the accounts closed once, and afterwards re-opened? I am not sure; it was before my time.

124. The complete suspense accounts copied from your ledger will show that? Oh, yes.

125. I understand that the accounts were opened by one Treasurer, closed by another, and re-opened by another? I believe that was the case with the Centennial Park Account.

126. I think you will find that there is £26,000 credited to the suspense account? There have been large credits to the Post Office Improvement Account.

127. Was there not £26,000 lately? That was the only item lately. There have been large credits besides that—over £100,000 considerably, I know.

128. *Mr. Yarwood.*] That is from the other sales? From the other sales.

129. *Chairman.*] Is there not some other suspense account as well as those two? Not that I am aware of, not in a similar class.

130. But others to help a Treasurer over, showing a cash balance? No, no others.

131. No other suspense accounts? Not that I am aware of.

132. *Mr. Yarwood.*] What is the Treasurer's Advance Account? That is for the purpose of meeting any urgent requirements which have not been provided for by Parliament.

133. *Chairman.*] That is a suspense account surely? It is not treated as a suspense account. I should call that simply an advance account in our phraseology.

134. *Mr. Yarwood.*] You balance on 30th June? Yes.

135. And, supposing there was a debit balance to the Treasurer's Advance Account, that would be a debit balance for amounts unauthorised by Parliament? Yes.

136. Does the Treasurer, in preparing his statement, consider that as expenditure of the year? No; only that portion which represents payments for services to be submitted for Parliamentary appropriation in terms of the Advance Vote. He confines the expenditure of the year to the expenditure authorised by Parliament.

137. The expenditure of the country is what is authorised by Parliament? Yes. It would be far better if the Committee would allow me to show them the Ways and Means balances which are framed by the Treasurer at the end of the year in proposing his estimates for Parliament. Then the Committee would see precisely how such accounts as the Treasurer's Advance, the Advances to Contractors, and accounts of that kind are dealt with.

138. *Chairman.*] The suspense accounts will show the record of the closing of the accounts and the opening of them again? Yes.

139. And will show the Minister in power? Yes. On referring to Question 1 I notice there are only two items to be excluded from revenue properly so called. I should like to know whether the other receipts exclusive of those two items are to be put into revenue properly so called?

140. *Mr. French.*] We want a statement showing those other receipts and the other expenditures.

Witness.] In the treatment of what we called revenue proper this afternoon we have excluded all other receipts.

141. *Mr. French.*] But I have asked you for a statement collateral with that required by Mr. Dibbs showing the other receipts. Having those statements we will have the lot before us, I presume? I understand.

142. *Chairman.*] Is the asset represented by the amount due by free selectors known to the Treasury? I think so, but it is not in my control.

[Adjourned till Thursday, 19th April, 1900.]

SECOND DAY.—THURSDAY, 19 APRIL, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

John Vernon, Treasury Accountant, further examined:—

143. *Chairman.*] Do you produce a statement showing the Consolidated Revenue proper, receipts and expenditure, from January 1, 1895, to June 30, 1899? This is it (produced).

J. Vernon,
Esq.

144. Will you quote the amount of the debit balance of the Consolidated Revenue on January 1, 1895? £464,711 Os. 4d.

19 April, 1900.

145. And will you quote from that document the Consolidated Revenue balance, the debit balance, on June 30, 1899? That is the debit proper, £1,718,906 11s. 2d.

146. And will you state what the difference is between those two accounts? £1,254,195 10s. 10d.

J. Vernon,
Esq.
19 April, 1900.

147. I take it that the Consolidated Revenue proper account has never been in credit during the whole of that period, that is from January 1, 1895, to June 30, 1899? That is so; of course you understand that the Treasury Bills are out, and also other receipts.
148. And the debit is an increasing one from 1st January, 1895, to 30th June, 1899, resulting in a difference of £1,254,195 10s. 10d.? Yes. [*Document marked Appendix A.*]
149. *Mr. French.*] I understand this is a plain statement taken from the *Government Gazette*? Yes.
150. You have not got the statement I asked for, that is the extraordinary receipts? I have the extraordinary receipts here shown in the same fashion, but I have not been able to bring out the figures shown to me by Mr. Dibbs yesterday afternoon. I agree with some of Mr. Dibbs' figures, but with others I do not.
151. *Mr. Yarwood.*] Do you agree as a whole? I have not tested the figures, but I can very soon do it. I understand, Mr. Dibbs, that the figures you gave me were for the first eighteen months.
- Chairman:* They were.
152. *Witness.*] There is a difference on the whole of that eighteen months of £72,732 14s. 3d.
153. *Chairman.*] What do you make the total? I make the total £727,426 13s. I might explain to the Committee that I have not had time to check the figures, as it is a very long job and I have my current work going on.
154. Question 1 on the paper is as follows:—"The amount of revenue properly so called, exclusive of such receipts as proceeds of Treasury Bills and transfers from the General Loan Account, received during the four and a half years from the 1st January, 1895, to the 30th June, 1899." What is your answer to that? £42,362,214 3s. 8d.
155. Question 2 is:—"The amount expended from the Consolidated Revenue Fund during the same period." What is your answer to that? £43,616,409 14s. 6d.
156. And the difference between the two you have already given us as £1,254,195 10s. 10d.? Yes; that is, with the balance of 1894 taken off.
157. *Mr. French.*] That is the difference between the revenue and the expenditure for that period? Yes.
158. *Chairman.*] Coming to Question 4, which is as follows:—"The amount of the expenditure charged to the two Special Suspense Accounts, and the amount of the receipts credited to these accounts, during the same period."? I have a statement which is not complete; the statement is being made up.
159. *Mr. Yarwood.*] We were talking about the two Special Suspense Accounts; I understood you to say those were the only two Suspense Accounts you had? Yes; of that nature.
160. I notice in Question 35 that an expenditure Suspense Account is referred to? That is a temporary account without the sanction of Parliament.
161. Is this expenditure Suspense Account referred to in Question 5? No. I take it that the two special accounts referred to are the Centennial Park Account and the Post Office Improvements Account. I may say that the Suspense Accounts are not referred to in the figures which you have had. Originally they came among the "other receipts."
162. *Mr. French.*] Would the answer to Question 3 be the same as to Question 5? Yes. If the Committee desire it we can make Question 1 to include the Special Suspense Accounts.
163. It will not affect the question if the answer is the same? But it will cause a difference in the answer to No. 3 by the amount of the Suspense Accounts. I should take Question 5 to mean the same thing as Question 3.
164. As to Question 6, can that information be shown in a statement? Yes; certainly.
165. *Mr. Yarwood.*] Referring to the first two items on Appendix A, totalling £345,699 13s. 9d., where were they brought into the revenue accounts? They were brought in in reduction of the deficiency accounts of June, 1895, and previous years.
166. As a matter of fact, I take it that, having settled the principle by the first two entries there, the other came in in the ordinary course? Yes, as a matter of course.
167. The first part of Question 12 reads as follows:—"Whether the law provides for the reduction of the deficiency on the Consolidated Revenue Fund Account by the annual redemption of Treasury Bills to the amount of £150,000." I want to know what law is referred to? I have an Act here which I will hand in. [*Handed in and marked Appendix B.*]
168. We now come to Question 13? If the Committee desire it, I can prepare a statement for consideration on this question. I will simply give a bare statement so as to enable the Committee to consider the question. *Mr. French.*] That would help us materially.
169. *Mr. Yarwood.*] Coming to Question 15, you told me yesterday that you would try to look up a paper in which the figures were given showing how the amount was made up, that is, the £1,174,000? This is the account presented to Parliament upon which the Treasury Bills were issued. [*Appendix C.*]
170. I now come to Question 16, to the following effect:—"Whether, in changing the system of accounts, it was provided that certain expenditure should be met from the current Consolidated Revenue, and that the unexpended votes of previous years should be spent, and the payments met from the proceeds of the issue of Treasury Bills referred to." I want to know what is the system under which this change took place. What authority, for instance, have you got from the Minister? Is it a minute from the Minister, or is it an Act of Parliament? The new system was inaugurated by Section 2 of the Audit Act Amendment Act of 1895, which enacted that every appropriation made after the commencement of the Act (*i.e.*, 18th November, 1895), out of the Consolidated Revenue Fund for the services of any financial year should lapse at the close of that year, and the Treasury Bills Deficiency Act of 1895, Section 6, directed that all sums of money raised by Treasury Bills issued under the authority of that Act should be carried to and form part of the Consolidated Revenue Fund, and the Colonial Treasurer might, from time to time, apply any such sums towards the extinction of the Deficiency Debt. Under the authority of these two acts the Treasury charged the liabilities of 1895 and previous years—including the debit balance on the Consolidated Revenue Fund on 31st December, 1894—to the proceeds of the bills, and charged current expenditure only to current revenue after 1st July, 1895.
171. Did you receive any special instructions in regard to the charge? That I cannot tell you, for I was not in the Treasury at the time, so I am not so conversant with the change. It took place a couple of years before I came into the Treasury. I could find out for the Committee whether there are any minutes about the change, and there are sure to be some.
172. I wish you would, because it would throw some light on the change of system? And I will give you the Treasurer's speech introducing the change to Parliament.
173. I am more concerned, as a matter of fact, in what the change in the detail work was than in anything else?

J. Vernon,
Esq.
19 April, 1900.

else? I can tell you what the old system was. Under the old system there was a certain appropriation made for the year's supplies. Any balance remaining unexpended at the end of that year was carried on as open for expenditure for, perhaps, two, three, or even in some cases four or five years.

174. *Mr. French.*] When you say that an unexpected balance was carried on, do you mean to any that actual entries were made in regard to the appropriations in the Treasury books? Yes.

175. By appropriations you mean the appropriations sanctioned by Parliament? Yes. In this paper [*Appendix D*] you will see the services of the years 1891, 1892, and 1893 carried forward. The special effect of the change was that on 30th June of each year the appropriations for the services of the preceding year were absolutely closed, and any balances then remaining were written off.

176. *Chairman.*] Credited to Consolidated Revenue? Yes. Consequently you will now find that these reports only show the services of the current year.

177. In other words, if £30,000 were voted to build a bridge, and only £10,000 were spent on 30th June, there would be under the old system £20,000 remaining to the credit of the Vote, but under the new system that account is closed? The £20,000 is written off, and has to be revoted.

178. *Mr. French.*] It does not affect the question of the accounts, because under the old system you would have carried it forward, but under the new system you write it off? The new system renders the accounts much more intelligible, because Parliament knows exactly what the Treasurer has to spend in the year. Under the old system Parliament never knew.

179. I cannot see for the moment that there is any very essential difference;—presumably your book-keeping is the same up to a point? Certainly.

180. Under the old system, if you had a balance of £20,000 you carried it forward to the next year? Yes.

181. And under the new system you write it off? Yes.

182. What difference does it make to the Treasurer? It makes no difference in the book-keeping, except as to comparative ease, nor to the Treasurer; it rather eases the Treasurer.

183. Because he has these unexpended Votes? Yes.

184. What it amounts to is this, that he gets a renewal of the Vote or it lapses? Yes; he gets a renewal of the Vote. Under the old system he did not get a renewal of the Vote, but simply spent it, and Parliament complained that they really did not know what was being spent.

185. *Mr. Yarwood.*] There was no finality? There was no finality to the year.

186. *Mr. French.*] But they could not spend more than the Vote? No; but it got lost in the time elapsing between the initiation and the final extinction of the Vote.

187. So in that sense the cash system is a distinct gain? Yes.

188. It brings the Treasurer to book every year? Yes.

189. *Chairman.*] Provided the outstanding accounts were shown on 30th June? I think they were quite as heavy under the old system. Under the new system a Treasurer knows very well that anything that is left outstanding on the current year he will have to provide for in his Estimates of the next year. He will have to fight for it again. Under the old system he had not to do that.

190. *Mr. French.*] That would amount in your view to a check upon his holding things over? Certainly.

191. Because he has the trouble of battling them through Parliament and the risk of not getting them through? Yes.

192. *Chairman.*] But if a contract is entered into the Parliament and bound to confirm the balance of the contract, supposing only a portion of it has been executed;—if only £10,000 is spent out of £50,000 Parliament must confirm the £40,000? It is my impression that they have been known to refuse it.

193. *Mr. Yarwood.*] That cancellation of votes does not apply to loan expenditure? No; that is distinct.

194. We now come to Question 17: "Whether, if the unexpended votes were so used, a more equitable plan would not have been to have allowed them to lapse in changing the system of keeping the public accounts, seeing that it was provided that thereafter all unexpended votes should so lapse"? On June 30th the Treasurer had certain unexpended balances. He had no cash balance. He had certain unexpended appropriations, and he was allowed to use these up to the extent of £1,174,000, and charge them to Treasury Bills.

195. *Mr. French.*] But only in that specific way. He was not allowed to carry them forward and work them out? Oh, no. [*Act 59 Victoria No. 10 put in and marked Appendix E.*]

196. *Mr. Yarwood.*] I now take Question 19. "The amount of the credit balance on the 30th June, 1896, and the amount to which it had been reduced by the 30th June, 1899"? In connection with that I hand in this paper. [*Appendix F.*]

197. The next is Question 20. "The amount by which the expenditure charged to the year 1895-6 was less than the average expenditure of immediately preceding years, and the causes of this reduction in the expenditure. The amount charged to the proceeds of Treasury Bills in 1895-6." Now can you give us a return of the average expenditure of immediately preceding years?

198. *Mr. French.*] Let us have it for, say, five years immediately preceding? I will give a statement of that.

[*It was subsequently decided later on in the day's examination that the witness should prepare a statement for the three years immediately preceding.*]

199. What is the Treasury Bills account? The Treasury Bills account simply paid the outstanding liabilities of 1895 and previous years right up to 30th June. The effect of that was that 1895-6—the first year of the new system—was not burdened with any outstanding liabilities of the previous year, and naturally that must have effected a saving in the expenditure.

200. *Mr. Yarwood.*] You practically got twelve months' revenue, and you paid eleven months' expenses? It is a little more than that I think.

201. *Mr. French.*] The effect of that closing off on 30th June, 1895, was that the liabilities were cleared off. In fact there were no outstanding liabilities on 30th June, 1895. So, really for the year commencing July, 1895, they were eased off to the extent of, say, practically a month's expenditure? Yes.

202. *Mr. Yarwood.*] We now come to Question 21. There again we must have some back figures, in order to make a comparison? I would suggest that the Committee refer to the Roads and Bridges Branch in this matter. We do not keep the roads in any detail.

203. But do you keep them all together? Yes.

204. *Mr. French.*] But you would know that on the Vote of 1893, under the old system, £216,000 would be carried forward, would it not? Oh, yes. That £216,000 was written off, and it was restored.

205.

- J. Vernon,
Esq.
19 April, 1900.
205. *Chairman.*] Was that credited to Consolidated Revenue? Yes.
206. On what date? I forget the date now.
207. Would it be prior to January, 1895? Yes. I cannot give you the exact date on which that was transferred, but I can easily get it.
208. That was a credit balance transferred to the Consolidated Revenue on a certain date? Yes.
209. That does not appear in my figures here? The expenditure of that £216,000 would appear in your figures there.
210. I understood you to say that there was a balance of £216,000 transferred to the Consolidated Revenue? Yes.
211. And that has been spent since? I suppose the whole of it has.
212. In which item in these figures of mine is it included? This is a vote or an appropriation we are speaking of. The expenditure would be scattered through those figures of yours. It was a saving originally, and then it was restored as having been erroneously written off and expended.
213. And then the entry would be to the credit of Consolidated Revenue? Yes.
214. *Mr. Yarwood.*] In Question 22 there occurs this passage: "The debit balance on June 30, 1895, which was extinguished by the proceeds of Treasury Bills?" The actual debit balance is shown on this statement for 31st December, 1894, and 30th June, 1895. [*Appendix G.*] That is the position as now ascertained. The former entries were partly estimates, because the liabilities had not come in. Now the account is wiped out we know exactly what it is, and that is the actual result.
215. I take it that, boiled down, the whole dispute is whether you wanted £1,174,000 Treasury Bills or not? I do not know of any dispute of the sort. I cannot give an opinion about that.
216. When I said the whole dispute I meant, is not that what is involved to a large extent in this question—in the details of this question? It would appear to be, certainly.
217. *Mr. French.*] What we really have to find out is what was covered by those Treasury Bills? That paper shows you exactly what was covered by the Treasury Bills.
218. What is your answer to Question 23, which is as follows: "Whether the Consolidated Revenue Fund account current, under the new system, was relieved in the year 1895-6 by only charging it with one half year's redemption of Treasury Bills in aid of revenue, and of railway debentures?" My answer is that it was relieved.
219. *Mr. French.*] Is there any Parliamentary authority for only charging half the redemption? I do not know of any.
220. *Mr. Yarwood.*] The Treasury Bills were to be repaid at the rate of £150,000 a year? Yes, and during the year they applied £75,000 to that purpose.
221. Allowing another £75,000 in the old balance? Yes.
222. Then at the end of 1896 you had a liability of £75,000 on account of those Treasury Bills which you had not provided for? You were asking about 1895-6 having been relieved to the extent of one-half. That is referred to in this paper. Ostensibly the reason, so far as I understand, was that the payment having been made in the half-year, the change of the system from the calendar to the financial year allowed half a year to be charged to the old deficiency, and half a year to the new system.
223. *Mr. French.*] The other half being charged to the deficiency of June 30, 1895? Yes.
224. *Chairman.*] What was the amount of the Treasury Bills issued? £2,600,000 was the original amount authorised.
225. To be repaid at the rate of £150,000 a year? Yes; and upon the retirement of the whole of these bills the £1,174,000 bills were to be retired in a similar way.
226. *Mr. Yarwood.*] In this paper it is described as Treasury Bills under the Deficiency Act of 1889. In the question itself the phrase is "Treasury Bills in aid of revenue and of debentures." Is that one and the same thing;—I suppose the Act of 1889 would show that? The Acts of 1889 would show that. There would appear to be two items referred to in the question—(1st) The Treasury Bills Act of 1889 in aid of revenue, and (2nd) the Railway Loan Redemption Act of 1889 for payment of railway debentures. Both payments are made on 31st December in each year, as provided in the Acts, and the payment for the year is made at its close. Thus one-half of this sum was made chargeable to the deficiency account, which closed on June 30, 1895, and one-half to the new account commenced on that date. I will put in those Acts.
227. *Mr. French.*] If the £150,000 is not annually provided, subsequent years will have to provide it? There is not the slightest doubt that the £150,000 will have to be provided out of the Consolidated Revenue, because Parliament in the first place authorised the retirement of £2,000,000 of railway debentures. £1,000,000 was authorised by the Act 31 Victoria, No. 11, and the other £1,000,000 by the Act 53 Victoria, No. 24. If I get you the Acts it will save the trouble of explanation. It is rather a long story, and there is a good deal of complication about it.
228. *Mr. Yarwood.*] To get an answer to Question No. 25 I would like to see the details of the actual expenditure under that heading, and also the details of previous expenditure, in order to compare one with the other? This is a return I got up for the Treasurer some time ago upon the same subject, but worked in rather a different fashion. This shows what are called short-dated loans, the payments for similar services which were formerly provided out of revenue, and also the payments each year. [*Appendix H.*]
229. *Mr. French.*] I assume that up to 1894 there were no such payments;—there were no short-dated loans of that class, and items like those were always charged to Consolidated Revenue? I would not like to say that. I am afraid that some of them were charged to permanent loans.
230. They were charged to the other loan account—the general loan? Yes.
231. Then there is really no comparison;—it depends upon the way the Treasury books are kept, or the way in which it is directed they shall be kept;—if the modern system is to charge certain items to short loans which were previously charged to revenue proper, and you say, Mr. Vernon, that you would not like to answer that nothing was charged to general loans which ought to have been charged to revenue proper, then we have no sure ground? If the Committee will allow me I might explain. This thirty-year loan business was started by the late Treasurer with the explanation to Parliament that, although they were items which did not appear to him properly chargeable to permanent loans, not being permanent and reproductive works, still he considered they would last for thirty years, and, therefore, he made a provision for a thirty years' sinking fund in connection with these items under those loans, so that when the works were worn out, or had lived their life, the Colony would not be at any charge for them.

232. The loans to which they were charged would be also wiped out? The cost would be transferred to revenue by the sinking fund. J. Vernon,
Esq.
233. That is to say, it was a gradual repayment? It was a gradual repayment out of the Consolidated Revenue. 19 April, 1900.
234. *Mr. Yarwood.*] Will you put in the speech of the Treasurer in connection with which the thirty-years' loan business was authorised? I will if you wish.
235. I would like it? Very well.
236. You do not say that the whole of these amounts have been charged to revenue; you say that some of them may have been charged to loans? Yes, some of them.
237. *Mr. French.*] I understand you to say as from this date, these have been separated, but that, although that is the amount represented as being charged to revenue for that year, you would not undertake to say that some of the amounts have not been charged to permanent loans which ought to be under the head of revenue. That is what I understood you to say? That is it.
238. So, in effect, this comparison, taken by itself without explanation, is fallacious, because there might be under all this a series of amounts which represented the amounts charged to the permanent loans. So we really have no basis in this return? The question you asked me, Mr. French, as I understood it was whether all the amounts represented by similar expenditure had been charged under revenue, and I said I would not like to say so, because some of them may have been charged under permanent loans.
239. *Mr. Yarwood.*] Then I would ask a further question:—Have the amounts that are put here been debited to revenue absolutely? Yes.
240. Take the item of roads and bridges in 1894, £480,000, was that spent on roads and bridges and charged to revenue? Yes.
241. As to Question 29, I want some information about the Bank balances? I will give that.
242. And can you give us a return which will be an answer to Question 30? Yes.
243. I now take Question 31; are there any amounts handed over to the Bank of England in June that are not brought into your accounts in July? Yes.
244. *Chairman.*] Is it one amount or more? £193,726 for interest.
245. The one amount? Yes, the one amount.
246. Are there any other such sums? Not that I am aware of. That will occur twice a year, that is the half-yearly interest.
247. *Mr. French.*] What happened on the establishment of the cash system; you first brought that into account on 1st July, did you not? Yes.
248. Each year has borne a year's interest? So far, yes. We took the view that the money, not being paid out until 1st July—not being due until 1st July—the Banks were only acting as our agents, and that the money was really as much the property of the Government up to the 30th of June in the Bank of England as in the London and Westminster.
249. *Chairman.*] Did that apply to payments in May as well as June? There were certain payments standing over in May last, that is to say, we do not get the returns for the expenditure of May from the Agent-General until, probably, July or August by virtue of the distance. We cannot get them in time.
250. You have thirty-five days, but could you not get them by cable? You have only thirty days from the end of May. The statement is too long to come by cable. It would be very expensive.
251. We get our entire balance-sheet on the 30th June by cable, and on the 31st December we get our balance-sheet almost that night from London? I dare say you would; but what would you have to cable? Perhaps I had better give you a copy of the account for last May and June.
252. *Mr. Yarwood.*] I now take Question 33—"Whether the sum of £,200,000 was transferred from trust funds to the General Loan Account as alleged by the Auditor-General." Do you know anything of that, or would you prefer the Auditor-General to answer the question? It is rather an awkward question for me to answer. I was not in the Treasury when it was done.
253. Do you know the time to which it refers? I know the time perfectly well; and I know, as a matter of fact, that it was trust fund money that supplied it. I would sooner not answer that question. I do not know it of my own knowledge, but at the same time I know by the books that the trust fund balances bore the cost. It did not do it ostensibly in the books.
254. *Mr. French.*] You say it did not do it "ostensibly"? No; it was under the Consolidated Revenue Fund and kept separate, and you will see it in the Public Accounts for 1896. There is the Treasurer's own statement at pages 2 and 3.
255. *Chairman.*] There were three amounts of £500,000 each? Yes.
256. It was not convenient to float a loan to refresh the Loan Account, therefore they borrowed money from the trust funds. The Treasurer finding it was inconvenient to float a loan of £1,500,000 to refresh the Loan Account makes a transfer from the trust funds to this account temporarily? He did not make the entry in his books at that date as being from the Trust Funds, but from the Consolidated Revenue Fund. That was made in the books of that date. Eventually, of course, it came from the trust funds.
257. The Consolidated Revenue had not money to stand it? No.
258. That view I put is tolerably right? I think so.
259. *Mr. French.*] It is merely an adjustment of entries; it is simply that some accounts were overdrawn which it was desired to bring into credit, and therefore a transfer was made from one side to the other. It did not enable the Treasurer to postpone raising a loan. You have no such credit of £1,500,000 trust fund? Not now, but we had then.
260. But they are not in the Bank books? I think so. The Public Account is composed of the Consolidated Revenue Fund and the Trust Fund.
261. But this transfer does not give you a penny of money, it only adjusts your accounts? It simply enables us to spend a certain amount on the General Loan; it does not give us a penny more money.
262. *Chairman.*] I think the Auditor-General has an opinion on that subject, because I remember he put his foot down, and the opinion of Sir Julian Salomons was obtained? That was on the general question of raising loans.
263. I thought it had reference to this matter of £1,500,000? I am not sure.
264. I think the Auditor-General has always contended that it was an irregular thing to do? No, not always; he consented to it in the first instance; it was done with his consent.

- J. Vernon, Esq.
19 April, 1900.
265. He did consent with regard to the first £500,000, and then found out his mistake? That I do not know. I think he approved of the first two sums of £500,000.
266. *Mr. Farwood.*] In Question 35 an Expenditure Suspense Account is referred to;—that is an account altogether apart from the Special Suspense Accounts, is it not? Yes. I will give you an Act in connection with that—the Indemnity Act—which will show the total of the Suspense Accounts.
267. Can you give us an answer to Question 36: “The amount borrowed from the Savings’ Bank of New South Wales, Barrack-street, Sydney, to the 30th June, 1899, and to date?” I can give you that in this paper. [*Appendix I.*]
268. As to Question 39, was the money all borrowed in one amount? No; it was borrowed in various amounts.
269. I now take Question 40: “Whether, from the month of November, 1896, to the close of the year 1899, payments to the amount of several million pounds sterling were made from Loan Funds without the certificate of the Auditor-General, and whether such payments were therefore illegal?”—I presume, in order to answer that question, it will be necessary to get at the authority of the Auditor-General, and I suppose that that will be defined in the Act under which he was appointed? No; there is a peculiar omission. Loan Funds are not mentioned in the Audit Act, and that is the point of which the Chairman spoke just now. An opinion was obtained from Sir Julian Salomons and Dr. Sly as to the action which the Treasury took in connection with the issue of Loan Funds without a warrant. I think that appears in full in the Auditor-General’s Report.
270. *Mr. French.*] The inference from this question is, of course, that prior to 1896 it was the custom, if there was no legal necessity, to get the Auditor-General’s certificate, was it not? It was the custom prior to that, and then the Auditor-General refused.
271. Refused to give a certificate? Refused to give a certificate. He adopted a new procedure altogether, and he insisted on the fact that money should be raised before the certificate was given. He refused his certificate, whereas the contention of the Treasury was that he should give a certificate and that the authority of Parliament was sufficient for him to issue a certificate, leaving it to the Treasurer to find the means of meeting his expenditure. That is what the whole dispute was about.
272. *Mr. Farwood.*] As to Question 41, you can give us all the information about that? Yes.
[*Balances of Public Accounts, dated September 18th, 1899, handed in and marked Appendix J.*]
[*Answers to other questions afterwards handed in by witness, and marked Appendix L 3. Other Returns marked M 3 to T 3.*]
- [Adjourned till Friday, 20th April, 1900.]

THIRD DAY.—FRIDAY, 20 APRIL, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

Edward Alexander Rennie, Auditor-General, examined:—

- E. A. Rennie, Esq.
20 April, 1900.
273. *Chairman.*] You know that the purpose of this Committee is to inquire into the Public Accounts? Yes.
274. There were three sums of £500,000 each, if I remember rightly, credited to the Loan Account;—can you tell me what account was debited with those sums? They were transferred from the Public Account, which means the Revenue and Trust Accounts combined.
275. But was there any revenue proper to stand such a debit? No. The Treasury state them to have been transferred from the Consolidated Revenue Fund, but that is quite wrong, because there was not the money there to transfer.
276. I do not quite understand? The Treasury state them as having been drawn or advanced by the Consolidated Revenue Fund, but it could not have been so, inasmuch as the revenue had not the money to make the advance.
277. Can you give us the dates of these sums of £500,000? They were all prior to October, 1895.
278. Since 1st January, 1895? Yes. I could not be sure within the first six months, but at all events it was within the year 1895. Two sums of £500,000 each were transferred before 30th June, 1895, and the other £500,000 was transferred in the half-year ended 31st December, 1895, becoming part of the accounts for 1895–6.
279. But can you confine it between 1st January, 1895, and 31st December, 1895;—would it be within that period? A whole million was transferred before 30th June, 1895.
280. Were the three transfers of £500,000 each not unusual;—was that ever done by a previous Treasurer? It was unusual then, because the Loan Account was out of funds.
281. I will put it in another way: you had a Loan Account before you a great many years;—was there ever a credit of that nature to the Loan Account before? Not exactly. It may not have been of the same nature, but for several years the Government had not raised any money because the revenue was flush—that is to say, they had large balances to the credit of the revenue, and they transferred to the Loan Account hundreds of thousands of pounds—£500,000, £300,000, and so on; but at that time, prior to 1879, each Loan Act Account was kept by itself.
282. And at that time the Loan Accounts were in credit, I suppose? No, they were not in credit; but the Government wanted the money to go on spending the Loan Service Votes. It was simply that they did not borrow the money till afterwards, and, when they borrowed the money, the amounts were simply transferred back to the credit of revenue.
283. Then, I suppose, the Government had the power to borrow, and, in not exercising their powers of borrowing, that caused the Loan Account to run out? Yes, exactly. They refrained from borrowing under their authority.
284. Can you give me any idea, without reference, of about the amount the Government had power to borrow—that is, if they exercised that power the Loan Account would be very much refreshed? Their authority to borrow has always been very much in excess of their exercise of the power. For some years past the authorities to borrow have amounted to about £13,000,000—that is to say, they have had power to borrow, for the carrying out of works, to the extent of £13,000,000, but they have not exercised the power.
- 285.

285. *Mr. Yarwood.*] We have a question before us here, No. 33, which reads as follows: "Whether the sum of £1,500,000 was transferred from trust funds to the General Loan Account as alleged by the Auditor-General?"—I presume you have reported on this? Yes; that is stated over and over again throughout my reports in different places.

E. A. Rennie,
Esq.
20 April, 1900.

286. Can you tell me one year in which I shall find that report, to see what is alleged? I would refer you to paragraph 23, page 151, of the report for 1895. The origin of that was that I was refusing to give the Treasurer warrants because the warrants exceeded the funds in hand. Then it was proposed to transfer this £500,000 from the trust funds. I said, "You have no authority to use Trust Funds for such a purpose," and then Executive authority was obtained to use the revenue.

287. *Chairman.*] When you say "Executive," you mean the Ministers? The Executive Council, which includes the Governor. They took that authority, but my idea was, in reporting against the use of the trust funds, that the Treasury should allow the Loan Account to be overdrawn rather than make any transfer at all. It would have been better to let the thing go straight on, instead of transferring from the Trust Funds. The trust funds are all under special conditions, and none of those conditions that I know of allow the trust funds to be used in that way except by investment. If any trust funds were available for investment, then, of course, the Government could have used so much, and issued securities for it.

288. *Mr. French.*] What are the trust funds—what did these sums come out of? The large accounts are the Savings Banks'.

289. The Government have to pay interest on these sums? Yes.

290. They have to invest them? So far as the Post Office is concerned they do invest its deposits, but there is no condition about investment in the other—the Savings Bank of New South Wales.

291. But they pay interest on it? Yes; they pay interest on it.

292. Consequently they must be recouped in some way; it is not intended that the country shall pay it out of taxation; what I understand is this, that, so far as this £1,500,000 is concerned, the Treasurer received no money at all? No; except the deposits in the first instance.

293. This was merely an adjustment of accounts in the Treasury in some way or other—is not that so? No.

294. Practically the Treasurer got no money by this process at all? By the transfers?

295. Not a bit, did he? I beg your pardon.

296. Well, where did he get the money from? He must have got it out of the trust funds—obviously from the Savings Bank funds.

297. I am aware that he passed an entry, or that entries were passed, but no money passed, or no money was obtainable thereby? But he transferred it to the Loan Account, and then used it as loan money.

298. *Mr. Yarwood.*] If, instead of doing it in the way they did, they had issued scrip or inscribed stock, or whatever it is, to the trust funds, then it would have been all right? Yes; if they had issued legal securities for the money that would have made it all right.

299. What was gained from the appearance point of view by not doing that—by not issuing scrip; what was the object; was it so as not to add the amount to the permanent debt of the Colony? It is impossible for me to say what was in the mind of the Treasurer in doing that.

300. I mean, what was the technical difference—would this £1,500,000 have been added on to the public debt of the Colony? If securities had been issued for it it would.

301. *Mr. French.*] Otherwise it became part of the floating debt of the Colony? It would be a floating debt by making an overdraft on the Loan Account. So long as there is an overdraft on the Loan Account no matter where it comes from, that would be considered a floating debt, because the money had to be found some time or other.

302. Do I understand that this item has been kept out of the accounts, and does not appear in the statements as a liability of the Colony—I think it appears in your statements? The Treasurer made a separate account of it, which you will find at page 127 of the Public Accounts. He shows that as a debit balance in his abstract.

303. *Mr. Yarwood.*] But the figures of the Loan Account are as though that never existed? Oh, no; the Loan Account had it placed to its credit, and the present balance credit is derived from it.

304. *Mr. French.*] I see in the general statement of the Public Accounts, pages 130 and 131, for the period ended June 30, 1898, the General Loan Account is summarised, and amongst the items is this one "By amount advanced from Consolidated Revenue Fund, pending realisation of loans authorised, £1,500,000;" that is put in as a debt;—is that the amount? That is the same entry. That is the Treasurer's statement; but I do not recognise it.

305. Is it a matter of accounts as to whether anything was done that ought not to have been done, or would the effect on the Colony have been the same whether the legal form had been gone through of issuing so many debentures at the Treasury and taking the loan up from trust funds or whether it was done in the way it was done as an overdraft? It was the same in effect.

306. It was a borrowing from the trust funds, although not done in what you think the proper form? In other words the Public Account includes the revenue and the trust funds in one account. Well, they drew upon that, and you could not say whether they were drawing on revenue or on trust; but as a matter of fact there was no mistake about their taking trust funds.

307. *Chairman.*] Because the other account was always overdrawn? It must have been. The whole difficulty would have been saved if the Public Account, as far as it is kept in the bank, had distinguished between the revenue and the trust the same as the other accounts are. If the Revenue and the Trust Accounts had been separate, this difficulty would not have occurred, or rather the mystery about it would not have occurred.

308. *Mr. French.*] What would have happened would have been that the trust funds would have been largely in credit and the Revenue Account largely overdrawn? Yes.

309. But being just charged in the Public Account you cannot tell which is which? No, as kept at the Bank.

310. Upon what do you base your audit—that is to say, what do you conform the Treasury accounts to? To the appropriations made by Parliament. Parliamentary statutory authority is my guide in everything. But as to the trust funds there is a certain difficulty because they are not all under Acts of Parliament. At the same time under the general terms of the Audit Act I examine all the vouchers for receipts and payments as the Treasurer sends them to me every day.

311. That is for the trusts funds? For everything.

312.

- E. A. Rennie, 312. Loan and all? Loan and all. I get the whole of his transactions every day,—at least in four days or in about a week after they take place—and every day I get from the Bank an account of the actual cheques paid, and then I make a comparison. The Bank sheet is a check on the Treasury.
- Esq.
20 April, 1900.
313. But you exercise a check through the Statute of Appropriations? Yes. So far as the expenditure goes I do not go by the Treasurer's cash sheets or his vouchers, but I take the vouchers and check them under Acts or the Regulations affecting them.
314. The appropriations are made in a lump; you do not check them item by item, of course;—how are the appropriations made as affecting you and how do you get them? From the Appropriation Act, which details the sum to be expended for every Department and for specific purposes.
315. And you can only check within those amounts? That is all. If they exceed I at once surcharge the amount, and the Treasurer has to transfer that to some other account or pay it back in some way.
316. Do you exercise the same control with regard to the loan expenditure? Everything; yes, distinctly. And that is how part of the difficulties of the Loan Account have occurred in the last few years. I could not give a warrant, because the Treasurer had not raised the money. In the last two years about a couple of millions have been spent without the Governor's warrant.
317. *Chairman.*] That £1,500,000 is included in that? No; that is separate altogether.
318. £2,000,000 in addition to this £1,000,000? You could not say it is in addition; it is on a different line altogether. I could only give the Treasury a warrant according to the legal availability, and I say that those Loan Acts specifically said that the Government had authority to borrow certain sums, and out of those sums they were to expend money for certain services. The Loan Acts could not appropriate anything outside of what was borrowed; consequently, if the sums they borrowed were exceeded, I could not give a warrant.
319. *Mr. French.*] You felt that you could not give them a warrant although they might be within the borrowing powers under the Act? That might be; but, legally, I could not do it.
320. You had nothing to do with their financing; supposing they had obtained sanction from Parliament to borrow £5,000,000 for a particular work, and they had only borrowed £3,000,000, and financed the rest as best they could for the sake of advantage, we will say, you would not be able to let them have the £5,000,000 because they had not borrowed the full £5,000,000;—that is your view? Yes. But the last Act they passed upset that arrangement, by saying that if Parliament authorised it, I could give a warrant for it. I think that was entirely wrong.
321. They were shut out from using any methods of financing which might be open to them, and which might be very advantageous, other than those which were absolutely prescribed by Parliament in authorising the loan;—it might be disadvantageous to the Colony, might it not, if they had to float a permanent loan on less advantageous terms than they could temporarily provide the money for without really floating a loan? Oh, yes; of course.
322. But under your system they would not be able to do that, because you would not give them warrants? Yes, before; but, under this last Act, if Parliament authorised the expenditure, I must give a warrant for it. Since that I have given warrants for hundreds of thousands of pounds far beyond the loans actually raised. I am obliged to do it, but it is with a great grudge.
323. The effect of the old system was that, notwithstanding their being able to make much better financial arrangements than by completing the borrowing which had been authorised by Parliament, your refusal to give them a warrant unless they did complete the arrangement authorised by Parliament prevented them from carrying better arrangements out? I am not quite sure about that.
324. Well, it would be so; if Parliament sanctioned a work, and authorised the raising of £5,000,000 of money in a particular way for that work, and the Government, after raising £2,000,000 of the amount in the way prescribed by Parliament, then found they could finance temporarily the £3,000,000 on much better terms, and to much better advantage, than by going on with the original borrowing, you would not under the old system have given them warrants to enable them to complete that? No. What was really wanted to put the thing right was that they should not in the Loan Acts have limited the power of borrowing to debentures and inscribed stock. If they had introduced some other clause by which they could borrow money temporarily from other sources, it would have made it all right; but because the savings Bank of New South Wales deposit a lot of money in the Treasury, on terms between the Bank and the Government, that is not a loan in terms of the Loan Acts.
325. It is not technically a loan? It is not technically a loan. I can only go by the words of the Act of Parliament.
326. *Chairman.*] Do I understand that the Audit Act was amended lately to enable you to give these warrants which you could not give under the old Audit Act; can you give us the date of that Act—is the Amended Act subsequent to January, 1895? I have not a copy of the Act here, but it is quite recent. The only amendment of the Audit Act was that passed in 1895, introducing this new system of accounts.
327. *Mr. French.*] Which do you mean by the new system? The cash basis.
328. There was a new Audit Act passed to meet that, was there? Yes.
329. *Chairman.*] That was to float the Treasury Bills, was it not? That was a different thing altogether.
330. *Mr. French.*] Was there any material difference between the old Audit Act and that one? Oh, yes, all the difference in the world. The amending Act repealed a certain section in the old Act, which said that unless otherwise expressly enacted all payments should be made within the twelve months, or within three months afterwards.
331. That is the new Act? No, I am speaking of the old Act just now. I refer you to section 17, which I will read. [*Section read.*] That practically hung up the Votes for years. So it did with some of them, and that was a source of great confusion in some accounts. The Appropriation Act from year to year extended the life of the votes to the end of the following year; that is to say, for (say) 1893 it was in force till the end of 1894 before the Votes lapsed, and even then they could not lapse if there was a contract or an engagement outstanding. All payments in the following year under the authority of the old Act had to be made, and that period of the first three months was intended—it was put in by myself—to give us time to get the accounts from London.
332. Virtually the balance goes back to the revenue;—it does not come out of the revenue, because there are no entries passed on appropriations? We have to post the appropriations to know how we are going on. We must credit the account with a vote.

333. Oh, you do? Oh, yes. There is no transfer of money. And that is just what I am writing about in my report. There has never been any Revenue Appropriation Account. It has simply been cash payments and cash receipts, so you never have the liabilities. In other words, we never had a Profit and Loss Account.

E. A. Rennie,
Esq.
20 April, 1900.

334. *Chairman.*] Could you show in any way the liabilities of the Government on the 30th June last? I have here a return, "Statement A," showing the position of the Consolidated Revenue Fund in respect to its obligations at the close of each financial year, and its means of meeting the same from the close of the year 1883 to the 30th June, 1899, as reported to the Legislative Assembly in the annual reports of the Auditor-General upon the Public Accounts for those years respectively, in accordance with the Audit Act.

335. Is that prepared at the Treasury? No, it is my own. This return gives the following information:—"The amount of the financial balance in reference to outstanding obligations at the close of each year; the amount of obligations under statutory appropriations outstanding at the close of each year; balance of obligations at the close of each financial year; balance of obligations if lapsed under the 17th clause of the Audit Act of 1870, and Act No. 5, 1898; net amount of payments in London prior to the close of the financial year, but not included in the Treasury accounts for that year; Treasury Bills outstanding at the close of each year; Treasury balances at the close of each financial year; and the amount of balances of temporary issues recoverable but outstanding at the close of each financial year." (*Appendix K.*)

336. Do you close the financial year on the 30th June? Only since 1895, but previous to that it ended on the 31st December. This return begins from 1883, because the Treasurer lately laid a statement on the Table of the Legislative Assembly, beginning with 1883; so I made this begin from 1883 for the purpose of comparison. I also hand in "Statement B," which begins from 1887, because 1886 was the date of the previous deficit.

337. And the account has been debtor ever since? It has been debtor ever since. Statement B shows the revenue proper as separated from the temporary advances. (*Appendix L.*)

338. Do I understand that the Treasury know nothing of this "Statement A"? Not of that document; but all that information is given in my reports year by year. That is simply a collection of the results in my reports. I put them in there for the reason that the discussion and criticism on my accounts seemed to be based on the idea that this was a new revelation of the state of the accounts, whereas this has been going on for the last fifteen years. A statement was made about the revenue and the temporary issues as if the Treasurer were making use of the advances. In "Statement B" I have separated these two items, giving the Treasurer's gross receipts and payments. It shows the revenue proper and the temporary advances repaid. It also shows the payments proper and temporary advances made. I show the temporary advances repaid and made, showing the balances from year to year, which I have always treated as recoverable items—that is to say, they are sums to be adjusted which may turn out to be either credits or debits.

339. *Mr. Yarwood.*] When you say temporary advances, to whom were they made;—was it to the outside public? No, not to the outside public. There is the Treasurer's Advance Account, for example. The Treasurer gets £100,000 to use, but it is not adjusted until the following year; consequently it is an outstanding temporary advance during each year. And these other Suspense Accounts, as they have been wrongly called, including the Centennial Park and Martin-place Accounts, have always, for the most part, been treated as sums to be recovered.

340. The advances are practically amounts for which the Government have got something they can dispose of or collect; for instance, in the case of the two special Suspense Accounts they have improved the land? But there is no provision in the Act for such a purpose.

341. I am not speaking of the legal aspect, but as a matter of fact? They may perhaps in the next fifteen or twenty years, or perhaps less than that, dispose of the land, but in the meantime these items are wrongly treated as outstanding. With a view to giving some information as to what these accounts consist of I submit a return. (*Appendix M.*)

342. *Chairman.*] With regard to the Suspense Accounts in connection with the approaches to the Post Office and the clearing of Centennial Park, are those entries charged to suspense legally? No.

343. What should they have been charged to? Revenue, straight—both of them.

344. The two accounts together amount to about half a million? Over that; it is between £600,000 and £700,000. (*Appendix N.*) The Act known as the "Centenary Celebrations Act," 51 Victoria No. 9, is out of print, but I have copied the section referring to the appropriation. (*Appendix O.*) And section 3, after enumerating the purposes for which the land was to be vested, contains this passage: "And it shall be lawful for the Chief Minister, notwithstanding anything in this or any other Act contained, to convey the same to the purchasers thereof in such manner and subject to such provisions as the Governor may direct, and the proceeds of all such sales or leases shall be paid by the purchasers to the Colonial Treasurer, and shall be by him carried to the credit of the Consolidated Revenue Fund." There is no connection between that and the appropriation, and I maintain that the expense should have been a final payment out of the Consolidated Revenue Fund. I contend that the payments should have been charged directly to the Consolidated Revenue Fund, and made a charge on the year's Expenditure Account.

345. By law it should be so? It should be so. If they get the proceeds of these lands, these proceeds will simply go to the land revenue. There is no necessity for making a Suspense Account on that score.

346. *Mr. Yarwood.*] This appropriation is £200,000? Yes. Statement E (*Appendix N.*) gives particulars about the Centennial Park Account. The amount is really more than £200,000, because there have been two votes since. In Statement E the amount against the Centennial Park is £199,405 2s. 10d.; that is under the original appropriation.

347. That is out of the £200,000? Yes; but the money was not expended in the manner in which it was appropriated. £150,000 was to go to the State House, but the whole £200,000 was spent on the Park.

348. *Chairman.*] It is irregular from its inception? Yes, so far. Then in 1895-6 there was the sum of £24,960 16s. 11d., and in the following year £4,050 17s. 11d., making £29,011 14s. 10d. voted over and above the original sum.

349. *Mr. Yarwood.*] Had they not the right, originally, to sell the frontages? They have the right still, but they have never done anything yet. They have never surveyed them nor made any regulations about the sale, as far as I have been informed. I suppose it was because the market was not suitable. It was understood that whoever bought these lands should build according to some very fine plan so as not to mar the aspect of the Park.

- E. A. Rennie, Esq.
20 April, 1900.
350. *Chairman.*] These three sums combined make up the debit to Suspense Account for that particular fund? Yes, for the Centennial Park.
351. All the expenditure in connection with the Park has been charged to the Suspense Account, the original amount under the Act and the subsequent amount? Yes. At first there were two or three years paid from revenue, but the amount was afterwards taken out and put to Suspense Account.
352. *Mr. Yarwood.*] Is it all cash out of pocket? Yes. There have been some collections.
353. But I mean no interest has been added on to the capital cost? No, nothing of that kind.
354. *Chairman.*] I suppose there has been some little revenue from agistment? There have been some rentals for Martin-place, but not from the Centennial Park. There is an annual vote for maintaining it. I hand in copy of Section 3 of the Centenary Celebrations Act. [*Appendix P.*] My remarks also apply to the Post Office matter as will be seen by referring to the Act 53 Victoria, No. 13. There is no justification whatever for dealing with that matter in a suspense account.
355. *Chairman.*] What was the object of charging these items to Suspense Account? By doing that there arose a credit balance, whatever the object was.
356. *Mr. Yarwood.*] The argument is that from a business point of view they were going to pay it out of proceeds? The revenue ought to bear its own share and show it if it should be thus overdrawn.
357. *Chairman.*] Has there been any Act of Indemnity to square the Suspense Account? No, the question has never come up in that form as a piece of wrongdoing.
358. *Mr. French.*] You say it gave a credit balance; I suppose what you mean is that it saved a certain amount from being charged to the Consolidated Revenue Fund; as far as I can see it did not create a credit balance; what it did was to make the other balance larger—more in credit if you like to put it in that way? It did not create a credit balance.
359. It does not say when it is to be charged to the Consolidated Revenue; this may be in suspense and yet part of the Consolidated Revenue all the time. It must be remembered that in each case there is a tangible asset representing the item? My contention is that the payments should be charged to the Consolidated Revenue Fund, as directed under the Governor's warrant.
360. The question is whether it is not really a suspense account which forms a subsidiary part of the Consolidated Revenue Fund; and it is merely a matter of terms whether it has not been charged to the Consolidated Revenue, but charged in suspense. It is quite possible for that to be the true position of affairs? That may be.
361. *Mr. Yarwood.*] I suppose, as a matter of fact, all the money that has come in from the proceeds of sales, say in Martin-place, has gone to the credit of this account? Yes, they are all shown. You will see in one of the returns I have put in a credit to the Post Office item. I think that arose in connection with the temporary buildings, and there is a small sum of £6 to the credit of the Centennial Park item. I refer to the Public Account for the period ending 30th June, 1898, page 3.
362. This Suspense Account represents the true difference between the receipts and the expenditure? Yes.
363. *Mr. French.*] The true cost of the asset? Yes. You will find the payments and the credits on pages 113 and 114 of the Public Accounts for the period ended 30th June, 1897.
364. *Mr. Yarwood.*] I do not know that it is so, but it may be that in the year ended 30th June, 1896, there was a great falling off in the expenditure? Statement B (*Appendix L*) gives all the information on that point.
365. Are these the absolute cash figures? Yes, the payments proper, excluding the temporary transactions.
366. My point is this: Under the cash basis the books are closed on the 30th June, are they not? Yes.
367. Take the Lands Department for example: In the Lands Department there are certain salaries and expenses that apply to June? Yes.
368. When would those be paid out of the Treasury? For the month of June.
369. Yes? They do their best to pay them by the 30th June, or perhaps two or three days before.
370. Would there be any considerable amount outstanding of the ordinary expenses of the country on the 30th June of any year? There might be, but whatever there would be outstanding, say on 30th June, 1898, would be paid out of the next year, 1899, but then there would be a corresponding sum carried on into 1900. So the cash basis system does not really affect the total of payments within the year.
371. It did in the first year, did it not? No.
372. We were told yesterday that the old régime was wiped out on the 30th June, 1895? That is too broad a statement altogether. It is not so. I will read to you what I intend to say in my next report, which has not yet appeared in public.

“The intention and aim of the Audit Act Amendment Act of 1895 was so to adjust the Appropriations of the Revenue as that they should apply only to payments estimated to be actually required to be made within and up to the close of a Financial Year—the 30th June—leaving any Cash Balance that might remain to be dealt with as a free sum in the arrangement of the Finance Accounts for the next Financial Year.

“The Cash Balance at 30th June in any year is consequently the keynote to determine the condition of the Revenue and its relation to the Appropriation thereof. The amounts Appropriated for any year being limited to the Cash Payments to be made during that year, and the Revenue collected or credited in cash during any year being (for account purposes only) deemed to be the income for that year, the cash difference is substantially a Profit and Loss Balance, or, in other words, forms the “Cash Basis” of the system on which it was designed by the Audit Act Amendment Act of 1895 that the Public Revenue and its Appropriation to the Public Service should be accounted for. The Balance at the 30th June of any year should, therefore, be both a Cash and a Financial Balance, about the amount of which there should be no dispute.

“Unfortunately, however, while the Audit Act Amendment Act of 1895 established the new principle on which the Annual Appropriation *out of* the Revenue was to proceed, it was only made to apply to such Appropriations for future financial years, commencing with the first day of July, 1895, without in any way recognising and providing for the fact that the Appropriation Act of 1895 did not expire until the 30th June, 1896—that the Appropriation Act of 1894 did not expire until 31st December, 1895—that there were Appropriations even of 1891, 1892, and 1893 then still alive—and that the Statutory Special Appropriations did not and could not lapse at the expiry of a financial year if not operated upon before that date. Those omissions have added to the confusion in regard to the true condition

condition of the Public Accounts of 1895-6, and subsequently, which it was the expressed design of the Act quoted to remove. If the date of its commencement had been made, as events have proved it should have been more properly the 1st July, 1896, instead of 1st July, 1895, a large amount of trouble and misunderstanding would have been avoided." E. A. Rennie,
Esq.
20 April, 1900.

373. *Mr. French.*] I have asked the Accountant of the Treasury to get me a return showing the liabilities outstanding on 30th June, 1895, and he has promised to do so? It is all here in my reports.

374. I want that to enable me to judge of the effect of those on the revenue and expenditure for 1895-6. What were the liabilities outstanding on 30th June, 1895? I would refer you to page 173 of my report of 1896, giving all the particulars. It is only right to mention that there was written off in the following year a sum of £483,000 odd.

375. What does that mean, "written off"? I had to report what was outstanding, and the following year the Treasurer did not need to spend all that.

376. Those were outstanding appropriations? Exactly. They might have been all paid if claimed, but they were not needed.

377. *Chairman.*] Can you give us the same information for the period ended 30th June, 1899? Yes. I think it is all in print in an Appendix for my next report.

378. Can you tell us in the meantime whether the figures are as big? I think it is given in Statement A. [*Appendix K.*] That shows at the end of 1898-9 the balance of obligations at the close of that financial year was £3,352,756 6s. 7d.; but you have to take the Treasury Bills off that to the amount of £2,176,000 odd.

379. *Mr. French.*] The outstanding obligations, apart from the Treasury Bills, amount to about £1,000,000? Yes, about £1,000,000. There is no mistake about the correctness of the figures I have just quoted.

380. *Mr. Yarwood.*] When you say apart from the Treasury Bills, are those Treasury Bills issued? Yes. Statement A is a revenue account irrespective of any supplement to it. It simply shows how the debit balance is accounted for. At the end of the financial year 1898-9 the cash overdraft is reduced to £2,757,529 7s. 7d., and there are outstanding obligations under appropriations amounting to £595,226 19s. That makes a total of £3,352,756 6s. 7d. The cash overdraft was £579,945 7s. 7d., and the Treasury Bills £2,177,584, which together make £2,757,529 7s. 7d.

381. *Mr. French.*] The Treasury Bills provide for it *pro tantum*; they were issued to provide for it, were they not? I can hardly say that. The Treasury never got a penny of money for the Treasury Bills. The bills simply represented money which had already been expended.

382. *Chairman.*] But the proceeds were credited to Consolidated Revenue? There were really no proceeds at all, because the money had been drawn and spent years before.

383. Years before? Some of it, yes. The whole thing is very unsatisfactory, to my mind.

384. *Mr. French.*] The Treasury Bills are like Exchequer Bills? Well, the Exchequer Bills are given at the end of a quarter or of a year, and if the revenue is overdrawn, Exchequer Bills are issued, payable out of the growing produce of the subsequent revenue.

385. *Chairman.*] Are any documents issued for the £1,174,000;—are the Bills really in existence? Oh, yes, to the amount of £1,024,700.

386. And they are held by the Treasury as security for a certain trust account? All the details are given at the end of the account showing where they are. As a matter of fact, the Treasury Bills for £1,024,700 stand as issued in favour of the Government Savings Bank, at 3 per cent.

387. I have an idea that there was no necessity to issue these Treasury Bills at all? I came to that conclusion myself some time ago, so long as the obligation is recognised. The only thing is this: that in regard to the General Post Office Savings Bank, the Government are bound to secure their interest to the depositors, at a rate not exceeding 4 per cent. Then the Government had authority to invest these moneys in their own securities. They are simply given to the trust as a legal acknowledgment that they have drawn the money. Issuing the Treasury Bills on account of the Post Office Savings Bank, to which the Government pay 4 per cent., is practically the same thing as paying the depositors.

388. Is the Government paying 4 per cent. now to the Savings Bank Department? I think it is only about 3 per cent., except as to some of the old bills. It may be 4 per cent. in their case.

389. Then there was no necessity to issue those Treasury Bills? No; the whole account being in the Treasury, so long as the Treasury met their obligations, and paid the interest, as they were bound to do, there was no necessity to issue these bills at all.

390. *Mr. French.*] There was no cash raised? No; they did not give the Treasury 1d.

391. It was simply an adjustment of accounts? That was the position.

392. *Mr. Yarwood.*] There is an account which shows a deficit of £1,174,767;—afterwards, I understand, it was reduced by £150,000? Yes; but I could not tell you why.

393. Have you ever seen any accounts to show it? No. I think there was some statement of odds and ends of entries laid before Parliament showing a surplus of £173,000, I think. It is a printed document.

394. I want you to give us the loan debt of the Colony, the Treasury Bill debt of the Colony, and, according to you, the deficiency that exists? It is practically shown already.

395. Would that include all the liabilities? It would not include the appropriation liabilities. I do not count those as a public debt. All moneys that have been raised on securities I can give you easily enough.

396. But when you say appropriation liabilities I understand that under the present system they are closed on the 30th June? The annual appropriations are closed, but the interest on the Public Debt, any balances due under the Schedules of the Constitution, and some other statutory services are all what we call special statutory appropriations.

397. Can you tell what the liabilities under the special statutory appropriations on the 30th June were? Yes.

398. *Mr. French.*] Having the estimated deficiency on 30th June, 1895 and the £1,174,767, I take it that they include the unappropriated balances of appropriations? Yes; it must do.

399. That is to say, the system of the Treasury is to make entries in regard to the appropriations? Yes.

400. And in the liabilities you reckoned an unexpended appropriation, although it might never become a liability? Yes; that is exactly what we call living votes.

E. A. Rennie, Esq. 101. And, inasmuch as at the end of 30th June, 1895, you still had these unexpended votes and carried them on, that might or might not become a liability during the succeeding years? It might not; but, until the votes die, the money represented by them remains as already charged to the revenue under Ways and Means grants.

20 April, 1900.

402. Under the cash system that does not prevail; under the cash system all votes lapsed? In regard to the Appropriation Act only.

403. That is to say, transactions subsequent to June, 1895? Not transactions, but appropriations passed since that.

404. You explained that there were certain items like interest which were the outcome of prior Acts which still went on? They are a permanent liability on the public revenue. All these are finally charged on the revenue, but in my way of putting things, I take these off; I reckon them as first charges.

405. Although they are not legally first charges? Oh, yes. If you have securities to the amount of some thousands of pounds, and you do not get your interest up to 30th June until 1st July, you would not like to be told that the vote had lapsed, and you could not get it.

406. But that does not make it a first charge. What I meant by a first charge was a first charge in the ordinary acceptation. It does not come before any liability of the Government? I think it does. You are bound to provide for your debts before you spend anything.

407. But it would be *pari passu* with any other creditors of the same standing, although of a different character? The annual Appropriation Act, or rather the votes in Supply, are supposed to deal with free money after all the other things are provided for. That is the understanding, that the Appropriation Act only covers so much as the Government show the Parliament is available for expenditure.

408. These other liabilities having been incurred previously? Yes. If they appropriated all the revenue we will say for a year you would have no revenue to meet the interest on the Public Debt.

409. *Mr. Yarwood.*] Then a Treasurer can pay the interest on the loans without an order at all? He is bound to. The authority for paying exists prior to the Appropriation Act.

410. There is a question about the interest payable to the Bank of England. The interest on the loans that is paid as up to the 30th June or the 1st July is interest that has accrued in the previous six months? No doubt.

411. So that if money is handed to the Bank of England on the 20th June so that they can give it to the bond-holders on the 1st July, the Colony has really parted with it as on the 20th June? No doubt.

412. And it is for a debt incurred up to the 30th June? No doubt.

413. Then, in making the change of system, they could have provided for the six months that had accrued? Yes; but the new system only applies to the Annual Appropriation Act. It does not apply to these outstanding special appropriations.

414. That may be technically right, but looked at from a business point of view that would have been the proper thing to do—that is, to provide for it; but you say it only affects the annual appropriations? Yes; the amending Act ought to have been made more clear than it is. These authorities for expenditure are absolutely primary charges, but there is no reason why you should provide for the actual payments under those special Appropriation Acts being made a charge on the year the same as the other; but as it stands I could not close the account of these special appropriations, and I must carry those forward as a first charge on the next year's revenue. It comes to the same thing at the end of the year.

[Adjourned till Tuesday, 24th April, 1900.]

FOURTH DAY.—TUESDAY, APRIL 24, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

E. A. Rennie, Auditor-General, further examined:—

E. A. Rennie, Esq. 145. *The Witness.*] I have already been asked a question as to the dates when the three advances of £500,000 each were made. I have here a return (*Appendix Q*) giving those particulars. It also shows the Bank balances on the Public Account. The first advance to the General Loan Fund was made on 9th January, 1895, and the Public Account on the day before was in debt, £830,437 14s. 8d. The £500,000 was transferred on 9th January, and after the transfer the Public Account was in debt, £1,357,474 17s. 11d. The Public Account is the Revenue and the Trust Accounts combined. On the same date the General Loan Account to which the transfer was made was in credit £1,167,386 3s. 10d., on the 8th January, and after the transfer, the Loan Account was in credit £1,664,174 4s. 9d. It may seem strange that the General Loan Account should be in credit and yet want a transfer of £500,000. The fact was that the Treasury had warrants from me exceeding that amount considerably, so the amount to credit may have been all withdrawn the next day. It was not drawn out, but that was the position. And that explains why, although the Loan Account was in credit, it required to be replenished. The second advance to General Loan Account of £500,000 was on 10th April, 1895, and on the day before the Public Account was in debt £13,135 4s. 10d. After the transfer it was in debt to the amount of £510,589 17s. 7d. The third advance to Loan Account was made on 28th September, 1895. On the 27th September the amount to the debit of the Public Account was £168,203 6s. 9d., and after the transfer that account was in debit £647,699 1s. 1d. The Loan Account was in credit on the same date £381,179 15s. 9d., and after the transfer it was in credit £879,379 6s. 2d.

146. *Mr. French.*] Then we may conclude that these Trust Funds are amalgamated with the Public Account? That is to say, the Public Account, including the Revenue and the Trust Account. But at the dates of these transfers there was not a penny to the credit of the Public Account.

24 April, 1900.

417. *Mr. Yarwood.*] These figures do not show the Bank position of the Public Account? Those are the Bank balances. E. A. Rennie,
Esq.
418. Well, there was no money anywhere? No; the transfer simply increased the overdraft on the Public Account and the credit on the Loan Account. There was no money to transfer. The transaction altered the balance of the two accounts respectively. 24 April, 1900.
419. It practically made money available for your warrants on the Loan Account? Yes, certainly. The Treasury officers referred to me in great trouble as to what they were to do as I could not give them a warrant, and they proposed to transfer the £500,000 from the Public Account to the Loan Account. They said that they would be negotiating loans soon. Of course, I was wrong in giving a certificate. I should not have done it, but I did it to accommodate them. I understood that they were going to raise a loan soon, and I allowed the first advance to go.
420. *Chairman.*] And the second? And the second, and also the third, on the same conditions. I did not know what they were going to do, and they never let us know when they are going to raise a loan.
421. *Mr. French.*] You passed these amounts on certain representations from the Treasury? That is it.
422. *Chairman.*] On the ground that they were to be covered at once? Yes, or very soon, because it takes time to go to London for a loan. I think that Mr. French has the idea that I gave the Treasury a warrant because there was this sum to the credit of the Loan Account. That is not so. The balance has already been covered by existing warrants. That practically shut them up. They could not use the money except under my warrants previously given. They wanted more warrants, and I would not give them until they had replenished the account.
423. *Mr. French.*] The question between you and the Treasury was one of replenishment? That was all.
424. *Mr. Yarwood.*] The situation is this: that, although on 8th January, 1895, the General Loan Account was in credit to the amount of £1,167,388 3s. 10d., you had signed warrants that absorbed the whole of that money? Yes.
425. They wanted further warrants from you, and you said that some money must be put into the Loan Account. Yes.
426. I am not dealing with the question as to whether they got the money from a right or a wrong quarter, but they got the money from somewhere? Yes.
427. The Public Account is represented as being in debt on 8th January, 1895, £830,000 odd? Yes.
428. That includes the Consolidated Revenue and Trust Funds? Yes.
429. Well, if that was the position of the account where is the amount of the Trust Funds shown in that statement; evidently it had all been spent beforehand? It had all gone, every penny of it.
430. Then, for Consolidated Revenue and other purposes they have been in the habit of absorbing the whole of the Trust Funds? Yes, the Public Account was in debt for a long time, and there was not a penny to the credit of Revenue or the Trust Funds.
431. *Mr. French.*] The Trust Funds have been used up to the hilt from time to time? Yes.
432. Various Governments have used the funds of the Savings' Bank, but I understand there is an Act under which these funds should be invested? Yes. The Post Office Savings' Bank account exists on these conditions: the Treasury has power to invest surplus moneys—moneys that are not immediately required. Every penny that is placed in the Post Office Savings' Bank on deposit is paid over absolutely to the Treasury. Then the Post Office Savings' Bank draws from the Treasury certain sums which it expects to pay out.
433. What we call "tilt money"? Yes; I have to give them a warrant for them, and I sign warrants continually for the withdrawals for payment to the depositors. There is always a considerable balance uninvested of that sum. It is a kind of floating capital.
434. *Chairman.*] But it bears interest? Yes; the Treasury has to pay interest. The Treasury is liable to the depositors for the interest, but the Treasury pays interest to the bank on all the uninvested balance, whatever it is, besides the interest on the Treasury bills which they negotiate with the Bank, or rather which they issue to the Bank as representing the money.
435. *Mr. French.*] I think that in your Annual Reports you show the state of the Savings' Bank balance? Yes.
436. You show the total amount for which the Savings' Bank is liable to the public, and you show the mode in which that is invested? Yes; or rather the Treasury does.
437. I thought you did? No.
438. *Mr. Yarwood.*] Then the Treasury is practically the Post Office Savings' Bank? Yes.
439. As a matter of finance, in the particular case before us the Public Account was overdrawn £800,000 odd? Yes.
440. Supposing there had been a run on the Post Office Savings' Banks there would have been nothing to pay the public demands with? There is a large number of separate accounts, such as the Sinking Funds, and the moneys deposited by the Trustee Companies—£20,000 each—and a number of other accounts.
441. I do not understand this treatment of the £1,500,000; why there should have been any trouble between the Auditor-General and the Treasury is not clear to me; it looks to me as if the Auditor-General required that scrip or Treasury Bills, or something should be given for this money, and they were not given. Then I understand that according to the reports produced that did not have the effect of reducing the loan indebtedness; there is another feature about the case; it has been said that by these transfers they saved paying interest twice;—I would like to know on which of these balances interest was to be paid, and if so, how much? I would refer the Committee to the Public Accounts for 1897, pages 23 and 30, and to those for 1895, page 32.
442. I see you speak of "special deposits";—would there be any other deposits? No; there are no other. They are simply made under a clause in the Act, which is practically in these terms—that the Trustees may deposit in the Treasury sums of money on such terms as the Government may make with them. There is an arrangement that they should pay 3 or 4 per cent.
443. Are the terms of these deposits reported to you? The deposits are mostly for twelve months. I have been told that some of them are for six months only—that is, if the Savings' Bank wants the money the Treasury is bound to find it.
444. *Chairman.*] All the Trust Funds bear interest, do they not? The larger portion of them. Some of the Supreme Court moneys do not bear interest. A full account can be seen at page 163 of Report for 1897-8.

- E. A. Rennie, Esq.
24 April, 1900.
445. Is interest paid on the Trustee Companies' moneys—the Permanent Company, and the Perpetual Company? Yes; the larger amounts in money of the Trust Funds receive interest.
446. *Mr. Yarwood.*] On the 9th January, when the credit balance of the Loan Account of £1,167,000 odd was absorbed, what would they do—would they pay interest to the bankers? That has not occurred yet. There has always been a sufficient balance, and I do not think there is any fixed balance between the Treasury and the Banks on which interest has to be paid.
447. *Chairman.*] Do you approve of the present cash basis system in preference to the old system? Certainly I do.
448. Would you not recommend that the liabilities at the end of the financial year should be shown, and can they not be shown? I always do it in my reports, but the Treasury does not do it.
449. It can be done? It can be done.
450. And ought to be done? Of course.
451. *Mr. Yarwood.*] I take it that under the old system the amount of the liabilities would be to a large extent the appropriations that were unexpended? Yes.
452. Under this so-called cash system, portions of the appropriations were cancelled, were they not—that is, they were absolutely cancelled, if not expended, on the 30th June? Yes; the appropriations for that year.
453. What would the liabilities at the end of the year consist of, other than interest on the debts, and that sort of thing? The unexpended balance of votes.
454. I thought the votes were all abolished? The annual ones all disappear.
455. Have you any details of those liabilities that you could give us? They are all given in every one of my reports. I would refer you to Statement "A," handed in by me the other day.
456. *Mr. French.*] I thought that under the cash system, although all votes lapsed at the end of the year, yet any vote that had been made operative was carried on; you do not necessarily start a clean sheet, and wipe out everything in the way of appropriations; only those appropriations lapsed completely which had never been operated upon, never been given effect to? Not quite so. It is only the portion of a vote that is not used that lapses and is surrendered; but a whole vote, if not used, would be surrendered in like manner.
457. But if the Government have entered into contracts under appropriations, for which no money has yet passed, but for which they are liable, those appropriations run on? No; they have to be revoked.
458. *Chairman.*] Coming back to the cash system: how can the liabilities be shown by the Treasury, so that the public could get a grip of the position;—of what nature would the liabilities be? I show them all.
459. But the Treasury does not? That same question occurred to me the other day in connection with what I call the Revenue Appropriation Account. You take credit for all the revenue you receive, and on the other side you place all the liabilities as settled by Parliament. The balance of these two at the end of the year would show, or ought to show, whether you had a balance to the good, or a balance to the bad on Revenue Account. The Revenue Account would then show if you had any further money to spend.
460. *Mr. French.*] You are now speaking in view of bringing the matter before Parliament again in regard to future appropriations? Yes.
461. But if the appropriations have lapsed it does not so much matter? But the appropriations do not cover or exhaust the revenue sometimes. I will read you a passage from the rough draft of my next report, which bears on this point.

"If the Revenue Accounts were in a healthy condition there should always be a sufficient Cash Balance at 30th June to cover the then unpaid accrued interest on the outstanding Public Debt, and any other unpaid Statutory Obligations due at the same date. Thus, at the 30th June, 1899, there should have been cash in hand to cover the outstanding Special Appropriations shown on page — to have been at that date £595,226 19s. 0d. Any sum beyond such a Reserved Balance would be free money, available for ordinary Appropriation by Parliament, and a properly-constituted Appropriation Account would always show how the Revenue Account stood in relation to the demands upon it by the aggregate Appropriations under Statute. Taking, for example, the gross Revenue Receipts for 1898–9, as stated by the Treasury on page 13, at £9,753,775 0s. 5d., and deducting therefrom the refunds and charges on collections during the year, there results a net sum of £9,572,911 19s. 11d. subject to Appropriation by Statute, and to a charge of £150,000 for the redemption of Treasury Deficiency Bills. The Appropriations by Statute for the Services of the year 1898–9, together with £150,000 already mentioned, having amounted to £10,302,449 13s. 5d., there is a *prima facie* excess of Appropriations over Income of £729,537 13s. 6d.; but, allowing for the surrenders of the unrequired Balances at 30th June under the Audit Act Amendment Act of 1895, and allowing for the reserve of fixed Appropriations which could not come within the year's payments on the cash basis system, and which, consequently, become a primary charge on the Income of the following year on the same system, there is really a small balance to the good on the year's 'Revenue Appropriation Account,' as follow:—

	£	s.	d.
To Net Revenue Receipts during the Financial Year 1898–9	9,572,911	19	11
„ Surrender of Appropriations unexpended at 30th June, 1899	153,985	11	0
„ To Balance of Fixed Statutory Appropriations, payable in the year 1899–1900	595,226	19	0
	£10,322,124	9	11
	£	s.	d.
By Fixed Statutory Charges for the year 1898–9	3,264,464	17	9
„ Annual Charge for the Liquidation of the Deficiency Debt (Treasury Bills Acts)	150,000	0	0
„ Annual Appropriation Act for 1898–9 (No. 35 of 1899)	6,887,984	15	8
„ Balance credit, 30th June, 1899	19,674	16	6
	£10,322,124	9	11

462. *Chairman.*] What about contractors? Their claims would have to go into the next year's vote. The Contractors' Account might be in excess of the appropriation for the year. E. A. Rennie,
Esq.
463. *Mr. French.*] Mr. Dibbs means the debt incurred to the contractor prior to the end of the period;— you would not carry that forward to another appropriation? No; that would come into the votes for the next year. The Department would provide for that, but, nevertheless, it would be a liability of the period just ended. 24 April, 1900.
464. *Chairman.*] Suppose you owed me £2,000 on the 30th June, and did not pay me at all, would it be put down as a debt outstanding? The vote liable for it to 30th June would be written off.
465. But if they had not paid me that £2,000, it would surely be a liability for the Government to pay? As a matter of account it would go into the next year's statement; that is, it would be paid out of the next year's vote.
466. But surely it is a liability? Yes, of course it is a liability between the Government and the individual, but as between the Government and the Parliament it is a different thing.
467. But between the Government and the public, who want to understand the Public Accounts it is something? Suppose you insisted on having the £2,000 on the 30th June, the Treasurer could pay it out of his Advance Account if the account would allow it, and when he got a new vote he would transfer the item to it.
468. They can easily show a credit balance by holding over accounts which should have been paid on the 30th June? If they do that, it is a wrong thing to do, because if the appropriations are not exhausted they are available for all payments that can be made within the financial year.
469. But you know, as a matter of fact, that they defer these payments over the first of the month? I do not know what they do; I could not tell you that.
470. *Mr. Yarwood.*] But supposing they do? If they wilfully keep back a payment, and they have the money to pay it, it would be a wrong thing to do, and it would be a violation of the cash basis system.
471. *Chairman.*] I would like to supplement that system with a list of accounts unpaid as a merchant would do in making up his accounts? Perhaps this explanation may assist you: The cash basis system is, perhaps, a wrong term, but, at any rate, it means that the annual appropriations made by Parliament for providing for the needs of the Public Service are confined to the payments to be made within the twelve months, and these payments are supposed to be made according to the Estimates. Well, they might pay the whole of the Estimates up to the amount of the votes. The services of a department could not be paid beyond the votes, except through the Advance Account.
472. *Mr. Yarwood.*] Is there any limit to the Treasurer's Advance Account? £100,000.
473. Does it ever go above that? He cannot exceed that, but he may make payments considerably in excess of the £100,000.
474. Up to £100,000 the Treasurer is under the whip of Parliament? Yes. If, say, the next week after the Treasurer made an advance he got authority to charge it to a certain account then the expenditure would be transferred from the Advance Account to its proper account, and so the Advance Account would get credit for it.
475. *Chairman.*] I suppose that is one of the objectionable Suspense Accounts referred to? No; it is not quite the same thing.
476. Has it never come within your knowledge that accounts have been paid in July that ought to have been paid before? I cannot say, but people have told me that.
477. *Mr. Yarwood.*] Did the Government in the change of system get any advantage in the figures from that particular feature in the first year? That requires some little explanation. Supposing you started fresh with the 1st July, 1895, with no outstanding liabilities at all. You take your whole revenue for the year 1895-6, and you spend all the revenue that comes in up to the 30th June, 1896. Then suppose you have a number of outstanding claims that could not possibly come in, such as quarterly payments. Then anything outstanding necessarily comes to be paid in the following year, and the Parliamentary appropriation is for such payments. In regard to 1895-6, the Treasurer took the whole of the revenue for 1895-6, and left the outstanding claims of the previous year to be dealt with in some other way. In other words it is stated that all these outstanding appropriations of previous years up to 30th June, 1895, were supposed to be covered by the new Treasury Bills. By that process doubtless the payments during 1895-6 for the services of 1895-6 were very much less, but the whole of the payments for 1895-6, arrears and everything, ought to have come in against the revenue of that year, but the revenue was all taken to pay for 1895-6, and the other items were left to take care of themselves.
478. *Mr. French.*] The others were left to be provided for in some other way? Yes.
479. Nothing of the prior period was charged to that year, but in the natural order of things there was a large number of items at the end of the year which could not be brought into it, and, therefore, were not borne by that year, which eased that year to a certain extent? Yes, at that time.
480. The first year was thrown out by the process? Yes. I have here a memorandum of the outstanding liabilities of the Consolidated Revenue Fund at 31st December, 1894, 30th June, 1895, and 30th June, 1899. (*Appendix R.*) This shows that the grants to the Queen unused on the 30th June, 1895, amounted to £1,895,337 12s. 10d.; the cash overdraft was £834,403 3s. 9d.; and the Treasury Deficiency Bills amounted to £1,752,884. The figures on this memorandum correspond with mine, except in the matter of the small amount of £17,000, which I disallowed.
481. When the new cash system commenced these votes or appropriations lapsed? No; that is what I say the Audit Act Amendment Act failed to provide for. I might say that the grants by Parliament are absolute grants to the Crown.
482. *Mr. French.*] In trust, as it were? Well, the Crown claims them. The whole amount of the Ways and Means grant is an absolute charge upon the revenue, and the Crown may spend the whole of it, but some of these sums are not paid, and then the Crown surrenders these balances to the revenue, and they become free money for further use.
483. They absolutely surrender them? Yes.
484. What you mean by being surrendered is in relation to certain entries passed in the Treasury books? It is more than that, because the money is granted to the Crown. The Crown has it all. The Treasury is a mere machine for carrying out the work, but the Crown has the whole of these millions; and when the Crown finds that it has more money than it wants by reason of savings it surrenders the balance, and that comes back to the Government.

E. A. Rennie, Esq. 485. *Mr. Yarwood.*] In the statement which you have submitted, would it not be possible to transfer amounts into the Treasurer's Advance Account? That would be an irregular process. The Audit Act says that no money shall be paid except upon an account rendered, and if you make a payment out of revenue for anything except for an account rendered for actual services you do wrong.

24 April, 1900.

486. You do check that? Exactly. Here is an instance. In the year 1893 the Treasury handed £31,000 over to the Trust Fund, and I said, "You cannot do that, you have no accounts to show for that." So I disallowed it. If I were to disallow any payments that the Treasury made which were not made upon an account rendered the Treasury would have to make it good in some way.

487. *Mr. French.*] How are they to make it good? If they drew it from the Bank, and the Bank account was short according to my statement, I should surcharge the Treasurer, and he would have to pay the amount. He would have to go to Parliament, and get a vote for it.

488. *Mr. Yarwood.*] Did not the last Parliament legalise something of that sort? An Indemnity Act was passed in respect of moneys spent illegally, amounting to £1,278,000 odd. (*Appendix S.*) It was still worse with the loans. There it amounted to more than £2,000,000.

489. *Mr. French.*] In regard to both forms of expenditure, loan and revenue, what sort of check have you. I suppose you cannot discriminate whether certain accounts should be charged to loans or revenue? Yes, to a certain extent I can.

490. Take the case of any public work, say of a road, or, for example, Governor Phillips' statue; suppose that were charged to loan, would you think it within your province to say it should be charged to general expenditure? No, if Parliament voted it as a charge against loans.

491. Parliament votes certain things, but do they specifically vote that a certain road, say from A to B, shall be charged to loans? I go by the Loan Estimates.

492. And all expenditure on that road from A to B is passed by you without, of course, any knowledge on your part as to whether the money has been spent or not? I go by the certificate of the engineer.

493. Although part of the expenditure might really not be for the purpose of forming the road? There are a number of things, not of very great amount, which I am always challenging. As an illustration I might mention that a vote was taken for the erection of a light-house at Point Perpendicular. There was a road passing along there which they used for getting supplies. This road got out of repair, and when they repaired it they wanted to charge the expenditure upon it to the erection of the light-house. I said they could not do so, and they had to transfer it to the road vote. These things occur constantly.

494. Then that sort of thing does come within your cognisance? Yes; there were votes for the extension of the Treasury buildings and for certain additions, and, before these alterations were completed, they thought it desirable to make a change in the Account Room. I think it was proposed to spend about £200 for extra fittings. They referred the matter to me as to whether the expenditure could come out of the vote—it was a loan vote I believe. I said that the money authorised to be spent was authorised on a plan which had been laid before the Parliament, and I asked whether the proposal was included in that plan or not. I did not get any satisfactory answer, but they said that the proposed alteration was part of the scheme. I am not quite certain whether the correspondence has finished, but that is an illustration of the kind of check I employ.

495. *Chairman.*] But what about Governor Phillip's statue being charged to loans? If Parliament says it should be paid out of loans, I must go by that.

496. As a matter of fact, we know that that work was charged to loans;—was there ever a Parliamentary vote that it should be so charged? There must have been. Here comes in the Treasurer's Advance Account. He might pay that as a case of emergency. He might pay a couple of thousand pounds in such a case on his own responsibility, and put it down to loans or revenue, according to the decision of the Government.

497. *Mr. French.*] And then it becomes a charge to loans or revenue as the Parliament may decide? Yes.

498. *Chairman.*] As to the cash basis system, how can the Treasury show the liabilities at the end of the financial year? They are supposed to do it in the Ways and Means, in the Budget laid before Parliament. I think the Treasury should open a Ways and Means Account, as they do in Great Britain. There they ask for warrants for millions at a time—from two to ten millions—on Ways and Means only; but we are tied down here, and I think properly so, to dealing with the actual votes of Parliament.

499. *Mr. Yarwood.*] Have you anywhere amongst your papers a statement of the way in which these things are put before the British Treasurer, because I have read in two or three places that the Treasurer of Great Britain says that his balance is so much and his liabilities are so much? I am not sure whether I have such a paper, but I can give you a copy of the Finance Accounts of Great Britain. I know the process is much the same as here. The Crown goes to Parliament to obtain supplies for the services which it thinks have to be performed in the year. Parliament votes these amounts to Her Majesty. Before all these grants are made Parliament settles what they think should be expended. Then they pass another resolution *in globo* making good those supplies, which are called Ways and Means grants. Reference has been made to making provision for the outstanding liabilities at the end of a financial year. Take the case of a contract which is in hand, say for supplies to a lunatic asylum. The vouchers for the last month of the financial year cannot be made up on the 30th June, because they must include the 30th June. The accounts come in monthly. The account for June is paid in July, and forms part of the expenditure for the following year. Then when the account for the following May is paid that makes twelve months' actual expenditure.

500. *Mr. Yarwood.*] That shows how the introduction of the cash system threw the figures out? But it comes to the same thing in the second year.

501. But not in the first year? No.

502. *Chairman.*] If I were building the lunatic asylum, and there was an account for £150 against it which did not come in till after the 30th of June, I could say in making my balance on the 30th June, "Due to the lunatic asylum, estimated £150." The cash system loses its good quality if you do not show at the end of the financial year what are the outstanding liabilities of the year?

503. *Mr. French.*] It seems to me that any particular year under this present system might suffer or gain materially? There is another element. The grants by Parliament are made on the assumption that the revenue will be raised, but suppose the revenue is half a million short? The Treasurer could not restrain the expenditure on the lunatic asylum, or any other ordinary service. He could not interfere with that.

Then

Then again, in the course of a year the number of lunatics might seriously increase. You might estimate the expenditure beforehand, but estimates are not satisfactory; and if you make estimates you have to adjust them afterwards. It is better to take actual accounts.

E. A. Rennie,
Esq.
24 April, 1900.

504. *Mr. Yarwood.*] Suppose an account comes into the Lands Department, and they pass it on to the Treasury for payment, and then send it to you to see whether it is in order, does the original sender of the account know when it is paid, or does his interest in it cease when the account is passed on to the paying Department? I do not quite understand.

505. Suppose a clerk in the Lands Department passes an account for £20 for payment in favour of an outside person; suppose he certifies that he has seen the goods, and the prices are right; the account ultimately comes to you, and is passed to its proper appropriation? After it is paid.

506. Well, suppose it goes to the Treasury, do they, when they have paid the account, tell the man they have paid it? I suppose the man would know that for himself, but most of the accounts are paid to banks.

507. Suppose the Lands Department have passed accounts to the extent of half a million, can they form any idea at the end of half a year which of these accounts have been paid? No. Many of their accounts are, however, paid by themselves under advances from the Treasury.

508. *Chairman.*] I see that on the 30th June, 1899, the Treasurer leaves off on the Consolidated Revenue Account, including everything, with a balance of £116,523 5s. 8d.;—as Auditor-General, would you call that a surplus or a cash balance? It might have been the result of the transactions of the year. I could not tell exactly.

509. I am fixing it for this one year;—would you call it a surplus or a cash balance? I should say it could not be a surplus or a cash balance either, because his cash account was overdrawn to the extent of £600,000 or £700,000 in connection with the Suspense Accounts.

510. I am presuming that the Suspense Accounts are in? This is only a set-off against the overdraft of £600,000 or £700,000.

511. But would you say it was a surplus or a cash balance? I should say it was neither the one nor the other.

512. Because it does not show the Suspense Account;—is that your answer? Yes; that is to say, it is stated as a separate item at the same time that the Cash Account was overdrawn on two other items.

513. At all events, you would not call it a surplus? No; I could not call it that.

514. At page 46 of the transcript of your evidence you say, "There has never been any Revenue Appropriation Account"; and I asked you this question: "How can the Commission under these circumstances ascertain the real outstanding liabilities of any given period?" That is true enough. We never get any statement of liabilities with the annual account of receipts and payments.

515. Then your answer on page 46 is correct? Yes.

516. *Mr. French.*] I understand that the Treasury do not show it—not that it cannot be shown? The only statement is in Ways and Means. I pay no attention to the Ways and Means. They are no authority to me.

517. *Chairman.*] Mr. Reid has stated that his excess of expenditure over revenue was due to the payment of hundreds of thousands of pounds of the liabilities of his predecessors;—how can this be really ascertained, or how would you, if a member of the Commission, proceed to find out the correctness of this statement? Statement A, which I have put in, gives you that information *in globo*. It gives you the outstanding liabilities at the close of each financial year, and shows at the same time the Treasurer's balance of cash on the same date; it shows the liabilities outstanding, and the total balance outstanding, including the cash overdraft. I am sure you could not alter those figures. The details of course you can get from my reports.

518. *Mr. French.*] According to this statement the accounts have gone from a credit balance of £209,532 19s. 2d. in 1883 to a debit balance of £3,352,756 6s. 7d. in 1898-9—that is to say they have gone to leeward to the extent of £3,500,000 odd in sixteen years; the highest point was reached in 1894, when the balance of obligations is set down as £4,857,239 9s. 7d.; at the end of 1898-9 they are represented as being £3,352,756 6s. 7d.; I want to know how they have been reduced—I suppose the Treasury Bills account for that? They do not make any difference as to the liabilities.

519. The first column in this Statement A is the amount of the Treasury Bills deficiency at the close of the financial year, plus the debtor balance of the Treasury ledgers? Yes.

520. Taking column 2, these are not necessarily liabilities but what are left of the appropriations of Parliament you have been speaking of—appropriations unused? Unused.

521. Which under the cash system lapsed? No; they were expended or surrendered the following year. To show the outstanding and undischarged appropriations as they stood at June 30, 1895, I hand in this statement. (*Appendix T.*)

522. Do I understand that the revenue of 1895-6 really did bear some £300,000 charges of prior periods? Yes, certainly it did. It bore all that was not covered by the Treasury bills. Column 4 in Statement A shows sums that have lapsed of the appropriations given in column 2. Column 5 represents the payment in London for about two months which do not come in within the twelve months; but I have always reported them as showing a real addition to the expenditure of the year.

523. Column 8 shows the balance of temporary issues recoverable but outstanding at the close of each financial year? Statement E gives you an illustration of what they are. They are given there for December, 1883, and June, 1899, but I can give you the years in between if you like. This statement (*Appendix U*) shows how much of the last column in Statement A belong to the Centennial Park and the Post Office Approaches.

[Adjourned till Wednesday, April 25th, 1900.]

FIFTH DAY.—WEDNESDAY, 25 APRIL, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

E. A. Rennie, Auditor-General, further examined:—

E. A. Rennie, Esq. 524. *Mr. French.*] Suppose an appropriation is made for service "A," and suppose a portion of that appropriation is not required, is it allowable for the Treasurer to divert that appropriation to service "B";—is it possible under the Audit Act? Yes; there is a clause to that effect.

25 April, 1900. 525. Which clause is that? It is clause 18 of the original Act.

526. I have been informed that, supposing Parliament has sanctioned an appropriation for service "A," and it is found during the currency of the financial year that the whole of the appropriation is not required, it is then allowable to transfer the unexpended portion from service "A" to service "B," which may be totally different? In this connection I will read clause 23 of the Consolidation Act of 1898:—"23. If the exigencies of the Public Service render it necessary, the Governor may authorise the application of any balances under the head of any service for fixed establishments, other than special votes for public works remaining unexpended, for the purpose of supplementing any votes for other services found insufficient to meet the requirements thereof. A statement of all such applications of balances, as well as copies of all minutes of the Governor relative thereto, shall be submitted by the Auditor-General to Parliament within seven days if in session, and if not then within seven days after the commencement of the next ensuing session."

528. In that clause "the Governor" means the Executive Council? Yes; it always means the Governor, with the advice of the Executive Council.

528. Still you have to get the Governor's warrant? I get the minutes of the proceedings of the Executive Council, and these are all quoted at the end of my reports.

529. Then, of course, it must be done in the Executive Council; it cannot be done by any one Minister? No.

530. Still it gives the Executive Council power to, as it were, amalgamate the appropriations, as I understand that clause in the Audit Act? That bears on what I was stating yesterday about the whole of the Ways and Means being one sum granted to the Queen. Within that total of Ways and Means the Treasurer has a certain amount of latitude in dealing with it, and this clause enables him to do it in regard to particular votes; but you will notice an exception in the clause. It would not allow the Treasurer to take the balance on a bridge vote and put it to another vote, because that would interfere with the distinct appropriation by Parliament for a particular purpose; but suppose there were a balance on the Treasury vote, for example, that could go to the Colonial Secretary's Office if that office vote was short. They can only take the savings on a vote in that way. But generally they cannot tell what the savings are till near the close of the year.

531. *Mr. Yarwood.*] Then, if they retrenched a number of officers in the Lands Department, and saved money in that way, and they were put to further expense in the Treasury, they would be able to use the money voted for the Lands to pay the extra officers in the Treasury up to the amount they might have saved? Yes, exactly. In the case of my Department there is provision made for a certain number of Inspectors of Public Accounts. It was arranged that those officers should be transferred from my Department to the Treasury last February. Consequently they had to pass a minute in the Executive Council to transfer the provision made for my Department for those inspectors to the Treasury; but the total expenditure for both Departments is not increased in any way by that process—simply the officers go to the Treasury and do the same work. I may as well say now that a good deal of difficulty has arisen in regard to the proper provision which should be made for the Departments. In preparing the Estimates they very often cut off £500 here and £20 there, so as to bring the total within the estimated means of supply. That creates a good deal of difficulty. Take one case in point: There is a general vote for the Architect to repair, alter, and add to public buildings—some £4,000 or £5,000, I think it is. Well, when the estimates come before the Government for amendment or final preparation they may cut the £5,000 down to £4,000. The Works Department, who send in the estimate, know that £4,000 is not enough if they ask for £5,000, so when the end of the year comes you cannot get any repairs done. That creates a great deal of trouble through not providing sufficiently on the Estimates for the expenditure.

532. *Mr. Yarwood.*] Would that explanation of yours affect question 21 before us? Not a bit.

533. *Chairman.*] On page 49 of your evidence you say: "There are other Suspense Accounts as they have been wrongly called;"—can you enumerate these other Suspense Accounts referred to by you? When I gave that answer I did not mean that there were other suspense accounts; I meant the Centennial Park and the Post Office Accounts. I was dealing there with the sums to be recovered, and these sums to be recovered include those which I say are wrongly called Suspense Accounts. Statement E shows what I call the temporary advances.

534. Do you think these two special accounts should be closed by debiting them to Consolidated Revenue Account? I do, decidedly. I distinctly say that the expenses should be paid from, and charged direct to, the Consolidated Revenue Fund.

535. Are not the Ministers responsible in some way for going outside the scope of the Centennial Park and the Post Office Acts, and also for paying away more than the amount voted by Parliament? They have not spent anything beyond what is provided for in the two special Acts. Perhaps you are referring to the fact that I mentioned that the £200,000 was all spent on the Park, and that there were two small votes more recently—£25,000 for additional work of some kind one year and another small sum the next year. Those two sums were distinctly voted, with the word "suspense" to them.

536. I understand that your explanation is that the money was voted for the building of a State House, but that no State House was built, the money being spent in other directions? It was all spent on the Park. There is no mistake that it was understood that £150,000 was intended for the building of the State House. I think that is in print somewhere. That was the main thing which Sir Henry Parkes wanted

wanted. The £50,000 was supposed to tidy up the grounds and make a park of it, but instead of that being done the whole £200,000 was absorbed by the Park.

537. Can you tell me who was the Minister who first charged the expenditure on these works to the Consolidated Revenue? I really do not know who was the Minister at the time. It was about 1887 or 1888.

538. Who was the Minister that reversed these entries, and charged them to Suspense Account? I could not tell you that at this moment; in fact, I think I had something to do with making this a Suspense Account at the time.

539. *Mr. Yarwood.*] Did you suggest that they should be made Suspense Accounts? Yes, that first one, because it was well understood by the Colonial Secretary's office—I privately asked the question distinctly—that the proceeds of these lands of the Park unsold were intended to cover the expenditure. But there is nothing in the Act to show that, and hence my contention that the Act should be complied with by charging this expense direct to the Consolidated Revenue Fund.

540. *Chairman.*] Are not all improvements of Crown lands (and these were Crown lands, I suppose), charged to Consolidated Revenue? There may be some charged to Loan expenditure, for example; that large sum that was voted for improving the scrub lands in the west was, I think, charged to Loans.

541. Do you say that the scrub business was charged to Loans? Yes.

542. *Mr. French.*] Because Parliament so ordered it? Yes.

543. As I understand the position, you do not challenge anything that Parliament passes; if Parliament passes the most ridiculous things to loans you cannot challenge it? I must pass it. I am only called on to see that the directions of Parliament are carried out. I am really a Parliamentary officer.

544. *Chairman.*] Am I right in saying that your contention all along has been that the payments charged to the two suspense accounts should, in accordance with the Acts, have been charged to the Consolidated Revenue? I think so. It is only lately, since the question has been raised, that I have looked minutely into the Acts. I knew all along that it was paid out of revenue. The only question is how it should be stated.

545. You say in your evidence at page 56–57: "I came to that conclusion myself some time ago";—Can you say why you came to that conclusion? Because the matter was within the Treasury. If they had issued the Treasury Bills to the public it would have been a different thing. These bills were simply issued and dealt with within their own Department.

546. *Mr. French.*] What I understand you to mean when you gave that evidence was that the issue was a mere matter of form; that the obligation was there, and it was not necessary to ear-mark that obligation by Treasury Bills? Quite so.

547. *Mr. Yarwood.*] I thought the idea of issuing these Treasury Bills was to locate the deficiency that had to be provided for in connection with the accounts up to the date when the change was made; my idea was that they went to the House and asked the House for what I think they call a Deficiency Account, which was practically intended (I do not know whether it did or did not) to wipe out the old regime altogether, and they said, "Give us those Treasury Bills," and when they got the Treasury Bills, that located where the debt arose;—is that so? I can only refer you again to the Ways and Means statement of 1895–6, where the balance is brought out as £1,174,000, which is the basis on which the Bills were issued, and on which they obtained an Act afterwards to authorise the issue.

548. *Mr. French.*] If this is a correct estimate of revenue and expenditure, what ought to have been done was that all the accounts up to that point should have been liquidated; but I take it that that being an estimated statement of Ways and Means, they did not actually liquidate, but they mixed the accounts up in some way? I know the Treasury will give you a statement showing you how the money has been expended, but I should very much like to see it.

549. Referring to the amount of £464,715, what I understand by that is that in the Treasury books, as made up to that date, that is the debit balance, but on those accounts a number of items are dependent which would increase the amount if they had been brought into account at that date? Quite so.

550. *Chairman.*] I should like you to give us your opinion under the cash system whether an interest payment to the Bank of England before the close of the financial year should not be charged before that period; that is to say, should a payment made before 30th June be charged before 30th June? Certainly it should.

551. Would it not be a good plan, in order to make the cash system a perfect one, that all known liabilities should be charged? If they represent actual transactions for services, supported by certified accounts.

552. Could not the Agent-General cable in one sum the total of such payments he has made between his last account rendered to the Treasurer at Sydney and the 30th June each year? I conclude he could do that if he could analyse the accounts and say how much of the receipts and payments for the two months represented Revenue, Loans or Trust Funds, so as to give the three totals on each side. If he could do that no doubt it could be cabled out, and the Treasurer could include those items in his account.

553. *Mr. Yarwood.*] I suppose the Agent-General does not dissect the accounts? I do not think he does, because the London account is one public account. The Treasury does that here when it gets the vouchers.

554. I suppose the Agent-General has not the material? I do not think he has. He may know whether the expenditure is from revenue or loans; but I do not think he keeps a separate account.

555. *Chairman.*] The Treasury left off on the 30th June, 1899, with the Consolidated Revenue Account in credit £116,523 5s. 8d.? I think, as I said yesterday, that was neither a cash balance nor a surplus.

556. But if the Agent-General telegraphed that he had expended £500,000 or £600,000, that would have wiped that sum out? Yes, it would.

557. It occurs to me that under the cash system everything should be got in that can be got in, and that these particulars could be cabled out by the Agent-General? No doubt that can be done by arrangement; and more than that, the Treasury could instruct the Agent-General's clerk in such a way as to enable him to divide the account. In regard to the question of withholding payments and getting in revenue, I know that the Treasury, within a week or a fortnight of the close of the year, telegraph all over the Colony to the different Land Agents and other collecting officers to telegraph down the amount of their collection up to, say, the 29th of the month, and the Treasury credit this as if they had actually received it.

558. Through a Suspense Account? No; they pass the moneys in to Revenue.

559. How do they get the money? They get the money in a day or two afterwards. They always show so much in the hands of the receiver. That represents sums which he has to receive perhaps the next day.

E. A. Rennie,
Esq.
25 April, 1900.

E. A. Rennie, Esq. 560. As they telegraph for all these receipts, do they take the same trouble in connection with the expenditure; do they telegraph to London and all over the country for the expenditure? I do not think they do.

25 April, 1900.

561. *Mr. French.*] I suppose the practice you have referred to is not a new one? No, it is nothing new; I believe it has been done for years past. My view is that both receipts and payments should take their natural course—that nothing should be done to interfere with the ordinary course of business, because the whole system depends on that. It is cash receipts and cash payments, and if the Treasury interfere and get a lot of revenue in, and yet does not look after the expenditure, that spoils the whole system.

562. I suppose the expenditure in London is not very much? The amount outstanding is shown in Statement A.

563. *Mr. Yarwood.*] In your report you say, speaking of the £500,000 of Trust Funds, it was then proposed to replenish the account by advances of £500,000 from the Trust Funds, but upon that course being challenged as objectionable, was that by yourself? Yes.

564. Why did you do that? Because, as I said before, the Trust Funds were not available for such a purpose. 565. But, according to a statement you showed us yesterday, there were no funds available? No; but I was not referring to the actual amount at the moment, it was simply a question as to what should be done. They proposed to transfer £500,000 from the Trust Funds—I think it was the Trust Funds—and I said that they could not do that because Trust Funds are under special conditions and could not be applied to make an advance to the Loan Account.

566. The money was there—I mean to say the credit balance on the uninvested Trust Funds was there? I do not think it was. When I came to look at the account the other day there was no money to do that. The Bank balance on the “Public Account” was entirely overdrawn.

567. But in going into the details of the Trust Funds you showed us that certain amounts were ear-marked,—certain loans, certain Treasury Bills? I referred you to the Treasury statement of how the Trust Funds were invested; that is on page 4 of the Treasurer's statement. They show a debit balance on the Revenue Account of £1,166,000 at 30th June, 1895, but of that a million is dropped the following year and made into a separate account. We could not tell where it came from. In fact it could not come from anywhere, it was a mere book entry.

568. I refer you to Question 35. “Whether, from the 1st October, 1897, to the 23rd September, 1899, payments to the amount of £1,278,940 were made from revenue without the authority of Parliament, and without the Auditor-General's certificate. Whether in connection with these payments an expenditure account was opened; the effect of that account?” That is the amount in the Indemnity Act I handed in yesterday.

569. I suppose this is not a usual thing? There have been two or three indemnity Acts passed before.

570. Some of these expenses go back to 1897. Would it be a regular thing to run an arrangement of this sort from 1897 to 1899? The Treasurer should have taken an Indemnity Act before.

571. I take it then, that it is not usual to run it over such a long period? No, certainly not. There have been one or two or three indemnity Acts in past years, but they were nothing so extensive or serious as this.

572. I suppose in the Annual Statement these would be treated as not expenditure proper until the indemnification was passed? Not exactly so. These sums were paid, and at the moment when they were paid there was no Parliamentary sanction for them, but possibly in the course of a few days a Supply Bill would be obtained that would cover a number or the whole of them. At the moment the sums were paid they were paid without the authority of Parliament and without a warrant. That is why they were altogether illegal payments. Consequently the Treasurer had to get an Indemnity Act to indemnify himself and his officers for having violated the law.

573. *Mr. French.*] Am I right in putting it this way: That the various votes for these purposes specified here were overdrawn to that extent? At the moment, but they were all provided for afterwards.

574. By this Indemnity Act? Oh, no; votes were taken for these expenses afterwards.

575. They were overdrawn at the moment, but in due course Parliament passed a Supplementary Appropriation covering these sums, is that so? Not these specific sums, perhaps. Suppose these sums were paid two or three days before the Supply Bill came in. Then the Supply Bill enabled the Treasurer to pay all these sums legally. But they were never carried to a debit account, and then credited from the Supply Bill. They were just allowed to stand out. They stood as illegal payments until this indemnity was got; but that does not make this Act an Appropriation Act, because the moneys are all charged under appropriations afterwards.

576. Does it mean that this was really an indemnity for those persons who were concerned in making the payments before they should legally have been made? That is all it means.

577. *Mr. Yarwood.*] I do not understand the difference between what you call a Supply Bill and an Appropriation Act? The Supply Bill when passed becomes an Appropriation Act, but it is a temporary one. In ordinary circumstances, the amounts in the Supply Bills come into the annual Appropriation Act, but in some cases they include items which are not in the Appropriation Act, and consequently I have to take the Supply Bills (or more properly Supply Acts) as authorities for these special items.

578. *Mr. French.*] Having got the Supply Bill for these special payments, what necessity was there to get the Indemnity Bill? Because at the moment the sums were paid it was illegal to do so. It was simply to legalise, so to speak, what had been illegally done. I have already mentioned that the Treasurer had paid loan services for about £2,000,000 or more without warrant for two years past. I have here another Indemnity Act (*Appendix V*), and I will read section 3.

“3. Where, before the commencement of this Act, any moneys have been drawn from the General Loan Account for the payment of and have been paid for loan services duly authorised by law without any warrant of the Governor for the same, the Colonial Treasurer, the officers of the Treasury, and all persons concerned or engaged in the matter of such drawing and payment are hereby indemnified and saved harmless for and in respect of such drawing and payment.”

The amount is not mentioned, but it is for £2,000,000.*

579. *Mr. Yarwood.*] When was that Act passed? On 22nd December, 1899.

580.

* NOTE BY WITNESS.—I have since found it was for nearly double that sum.

580. *Mr. French.*] Have you any idea why these Acts were passed;—do you know the nature of the transactions? The transactions are of the same character as in the other Act—that is to say, they had no proper legal standing.

581. Was this an indemnity of a similar character to the other? So far as the payments were illegal, because the Treasurer had not the Governor's warrant, and he has not got it to this day.

582. *Mr. Yarwood.*] When you say the Governor's warrant, is that yours? No, it is the Governor's. Treasury cannot legally make any payment except upon a warrant signed by the Governor, and the Governor will not sign a warrant without my certificate. The sums mentioned in the warrant must be legally applicable to the services mentioned in it to secure my certificate.

583. Then you did not sign these loan warrants? There were none given in this case.

584. *Chairman.*] Was it merely the neglect of the Treasury which accounted for their not getting the Governor's warrant? It was my refusal to give the warrant, because they had not the moneys available. There is an important point in this Act, and it bears on what I have said to the effect that the Government should not have limited the form of borrowing to debentures, and so on. I refer to section 1 of the Act.

"1. (1) Where a special Act authorises money to be borrowed for loan services, it shall be lawful for the Governor in anticipation of the raising of any loan so authorised to transfer from the Trust Fund and from the Consolidated Revenue Fund to the General Loan Account any money at credit of those Funds respectively and to obtain advances from any bank keeping the Government Account, and carry the money so advanced to the General Loan Account, but so that the money so transferred and advanced shall not exceed in amount the money authorised by the special Act to be borrowed.

"(2) The money so transferred and advanced may be applied as if it were money borrowed under the special Act.

"(3) Any money so transferred and advanced, or any part thereof, may at any time be re-transferred and repaid from the General Loan Account to the Trust Fund or the Consolidated Revenue Fund, or the bank keeping the Government Account, as the case may be.

"(4) Where any money borrowed under the special Act, together with any money transferred or advanced to the General Loan Account, and not re-transferred or repaid in pursuance of this section, exceeds in amount the money authorised by such Act to be borrowed, the amount of that excess shall be re-transferred or repaid as aforesaid."

I would also refer to section 2, which I will read:—

"2. For the purposes of section seventeen of the Audit Act, 1898, any sums mentioned in the instrument referred to in that section shall be deemed to be legally available for and applicable to the service or purpose mentioned in such instrument, if those sums have been authorised for expenditure by Parliament for that service or purpose and have not previously been expended for such service or purpose."

That means that if there is the authority of Parliament to expend the money I must give them the warrant whether they have the money or not, and I do not think that is right. I am sure that was put in by the Treasury officers, because they argued that the Audit Act says that the Auditor-General must be guided by appropriations. This question gave rise to the law opinion that was obtained from Sir Julian Salomons and Dr. Sly. There was a marginal note on clause 12 of the Audit Act, saying, "The Auditor-General to be guided by appropriation." Well, if there is no loan money borrowed you cannot appropriate it.

585. *Mr. French.*] You held that they could not appropriate the credit—as we bankers should call it—or the right to borrow? That is it.

586. *Mr. Yarwood.*] Is interest paid on the Official Assignees' money? I know they pay interest on the bankruptcy estates. I would like to make a remark in connection with the Loan Account. In the year 1879, there was passed a Loans Funds Amalgamation Act. That arose from the fact that before that date there were as many as nine separate Loan Funds. It was the late Sir James Martin who wished to prevent the Treasury from using one Loan Fund for another. There was no apparent occasion to keep the funds in separate accounts, because we had the proper ledger accounts and could tell exactly how each appropriation was being spent. But this is the point: under that Act the Treasury claim to use any sum that is borrowed for any Act to the purpose of any other Act.

587. *Mr. French.*] And do they legally claim that? Yes, under that Amalgamation Act. That has been the case all along since 1879.

588. So, virtually, they have the full borrowing power of all the Acts for any one purpose;—is that so? Yes; they can use the money for any loan service, though raised for one only.

589. *Mr. Yarwood.*] In other words, if they go to the London market for a loan for a construction of railways only, they can spend it on anything they like? Yes. One consequence of the arrangement was this, that in 1884, in a great spirit of liberality, Parliament passed a Loan Act authorising the raising of £14,000,000 of money for a number of services, such as railways and others. Well, there were Loan Acts afterwards that were not borrowed upon at all. That is referred to in one of my reports. There is a statement showing that there were two or three Acts in respect of which they had spent nearly every vote, but they used the money they had raised under the 1884 Act. They went on borrowing under the 1884 Act.

590. *Mr. French.*] And, of course, you had to pass it? Yes, up to a certain point, when I began to find that I was giving them warrants for more than their cash.

591. You do not consider the right to borrow was the same as borrowing? Exactly. The sum they have the right to borrow now is £13,462,000. What is the use of passing another Loan Act every year—why not use that?

592. It seems to me it does not matter; the whole of the Acts are a charge upon the Consolidated Revenue for their principal? And for the interest.

593. There is no precedence in point of time? No. Some of these works authorised in 1884 are not completed yet. There is a sum of £500,000 voted for the city railway.

E. A. Rennie, 594. *Mr. Yarwood.*] When the Government want to raise a loan in London, do they issue prospectuses? Yes; the Treasury have them. That Loans Amalgamation Act has given me a great deal of trouble.

595. I think you said yesterday that you would try to get us some paper showing what the British Government do in connection with their finances? I cannot find anything bearing on that point.

596. *Mr. French.*] I am informed that the British Government have only one continuous account showing the revenue and the expenditure, and when they have to make up a deficiency in the account they make an entry, "Loan raised in aid of revenue"? Our system used to be the same; the heading used to be "Receipts in aid of revenue." Then the loans were always passed to the credit of the Consolidated Revenue Fund to be accounted for in the same way as the revenue. That was the case prior to the Loan Act, 35 Victoria No. 5. It is this amalgamation of separate Loan Acts which I object to. I maintain that the Loan Account is just as much a part of the Revenue Account as any other. I would like to call your attention to section 11 of the Audit Act. [*Section read.*] All the money the Treasurer receives without reference to any fund must go into one account in the Bank, and there is provision made in the Treasurer's cash sheet for as many divisions as he likes to show where the money has gone to. It is convenient to have a Bank account for loans and a Bank account for a number of other things as a mode of check, but the account as kept in the Bank is virtually a public account. That is what ought to be, according to the Audit Act. In the matter of classifying accounts, I might refer you to my Twenty-eighth Annual Report. You will see there how I classify the Revenue items, but the Treasury have not as yet adopted that system. In the Treasurer's statement of Loan Expenditure, you have to run over page after page to find out the amount of any particular class of loan expenditure—as for Railways, say; but I show the whole of the expenditure for Railways, and every other distinct class of Loan Services, in a concise and intelligible form.

[Adjourned till Thursday, 26th April, 1900.]

SIXTH DAY.—THURSDAY, 26 APRIL, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

George Henry Pitt, Chief Examiner, Department of Audit, examined:—

G. H. Pitt, 597. *Witness.*] I should like to make an explanation. I have gone through the forty-one questions, and if you will allow me I will answer them seriatim. As regards the Cash Balances, I desire to be examined thoroughly as to the relative position of the Accounts which comprise the Public Account. I should be very glad if the Committee would give me a little latitude, and also allow the examination to be very comprehensive. Referring for a moment to Question 32: "Whether the present system of keeping the public accounts is a good one; and whether the Commissioners can suggest any improvements in the method of keeping the accounts, or in their presentation, so that these may be more easily comprehended by the public?" I may say that I have for a considerable time past made a study of the present system, and have noted its defects. I am prepared to submit to the Committee what I consider an "up-to-date" system, and which I anticipate will command the sympathy of the Committee, because the returns of the Audit Department or the Treasury will be verified by the certificates of the General Managers of the Banks with which the Government deals, and their certificates will prove whether the accounts close at the end of the financial year with a cash credit or debit. Some very drastic reforms will be submitted, but they have been all carefully thought out. I will also be able to prove that there was not a penny-piece belonging to the Revenue for many years, and that the bills have not been absolutely redeemed during any of the years under review, because the deficiency balance between 31st December, 1894, and 30th June, 1899, according to Audit Department statement—which I can prove right to a penny—was increased by £22,000 odd. And if the clause in the Treasury Bills Act be interpreted to mean "absolute redemption"—that is, a reduction of the outstanding deficiency to the extent of £150,000 annually—not merely a cancellation—the deficiency was increased by an additional £600,000. The printed questions will allow me to cover all the ground in connection with the reform that I propose to submit in connection with the financial system.

598. *Chairman.*] I should like to know what experience you have had;—have you always been in a Government office? Most of my official life has been passed in a Government office. I am a civil engineer by profession, but I have always taken a great interest in the finances of the Colony—first as Chief Compiler in the Statistician's Office, and during my tenure of office in the Department of Audit. I have devoted a very considerable portion of my private time in locating the defects in the present system and devising a reformed one. In regard to this transfer of accrued interest, I may say that I was one of the prime movers in effecting the transfer. I contend that when floating loans in London these interest bonuses—it is a term of my own, and fits well—are distinctly a charge on the loan proceeds—in fact, a charge on negotiation.

599. You are now referring to the £360,000? That is to say, the £341,000 during 1895, and subsequent transfers. Continuing my remarks, I may say that I was led to the conclusion I formed because it was my duty when in the Statistician's Office to deal with the loans to the Colony, and when establishing the cost of the loan it came uppermost in my mind that these interest bonuses should have been properly regarded as charges on the loans. The Auditor-General went carefully into the matter about the same time, and when Mr. Reid came into office the transfer as recommended by the Auditor-General was made. So in reference to accrued interest I can only say it was a big windfall, but to exclude the item I cannot agree, especially as I was one of the movers in having it done.

600. *Mr. French.*] As regards that item, the only question is as to what period it belongs to? The £341,000 belongs to the deficiency of the Consolidated Revenue for 1894 and previous years.
601. *Chairman.*] First of all, we want to get your experience? My experience of the Government finance is spread over the period since 1889. I have taken a large interest in it from that date, and made considerable research as to the condition of the respective accounts.
602. All that time were you in the Statistician's Office? Up to 1st January, 1897, when I was transferred to the Audit Office as Chief Clerk, and now I hold the position of Chief Examiner.
603. Question 1 is as follows:—"The amount of Revenue properly so-called, exclusive of such receipts as proceeds of Treasury bills and transfers from the General Loan Account, received during the four and a half years from the 1st January, 1895, to the 30th June, 1899";—what is your answer to that? The phrase "properly so-called" is liable to misinterpretation. I find out by the questions which follow what is really meant. What we mean by Revenue proper and Expenditure proper is the accounts exclusive of the temporary advance accounts; but in this case it is intended, I infer, to mean the exclusion of these extraordinary receipts, such as the Treasury bills and the accrued interest only.
604. And any credit balance? No. Credit balance is not included. However, my answer is that the total amount of receipts was £43,417,297 7s. 4d. I hand in this paper. (*Appendix X.*)
605. Now we take Question 2: "The amount expended from the Consolidated Revenue Fund during the same period";—what is your answer to that? £44,437,937 11s. (*Appendix X.*)
606. And what is your answer to Question 3: "The difference between the revenue properly so-called and the expenditure from the Consolidated Revenue Fund during the same period"? £1,020,640 3s. 8d. The revenue "properly so-called" in these answers means that on the Revenue side should be excluded the proceeds of the new issue of bills, and the accrued interest and premiums on loans credited from 30th June, 1895, to 30th June, 1899. (*Appendix X.*)
607. *Mr. French.*] When you say Treasury bills, you mean the deficiency bills;—do you mean any particular set of bills—the £1,174,700? That is so.
608. Then that return is a return of the revenue and the expenditure for the period without allowing for any adjustments which were made to clear up a supposed deficiency. As these figures stand they bring out a deficiency of £1,024,000. We know that that deficiency was covered by the deficiency bills. Then I understand clearly that that statement does not include the deficiency bills which were intended to make up a considerable portion of that difference;—the fact is that they do not include the proceeds of the deficiency bills which were specially created for the purpose of meeting the deficiency, that is so, is it not? Yes. I will show that these bills should never have been floated at all. These bills and the instalment payments have caused no end of trouble, and the inclusion of such leads to confusion. For instance, there was a debit balance on 30th June, 1895, which was created into a credit balance on 30th June, 1896, by the proceeds of these bills. It has been contended that these were credited by the authority of Parliament. I admit that; but they are a confusing element, and the Auditor-General has taken the practical interpretation of the Act by treating his accounts (and I want to emphasise this particularly) exclusive of the Treasury bill receipts and the payments in redemption thereof. I have here a "base statement" which shows how the figures of the exhibits are made up, and I have reconciled the totals down to the deficiency, which will be shown in the Auditor-General's report for the year ended 30th June, 1899. (*Appendix W.*) This statement taken in connection with *Appendix X* will assist you considerably.
609. *Chairman.*] We now take Question 4: "The amount of the expenditure charged to the two special suspense accounts, and the amount of the receipts credited to these accounts during the same period";—what are the two suspense accounts? The General Post Office and the Centennial Park Accounts. We do not acknowledge them to be suspense accounts, although we put the word "suspense" in the Annual Report. The payments on account of the General Post Office amounted to £133,827 18s. 3d., and the receipts to £1,389; the Centennial Park expenditure was £29,050 17s. 11d., and the receipts £45 3s. 1d. That is for the period of four and a half years, ended 30th June, 1899. (*Appendix Y.*)
610. What is your answer to question 5: "The difference between the revenue, properly so called, and the expenditure from the Consolidated Revenue Fund during the same period, exclusive of the two special accounts"? My answer is, a debit of £859,195 10s. 7d. [*Appendix Z.*]
611. Question 6 reads as follows: "The amount of extraordinary receipts taken into the Consolidated Revenue Fund during the same period, such as the proceeds of the new issue of Treasury bills and the accrued interest transferred from the General Loan Account"? The extraordinary receipts were £1,423,322 5s. [*Appendix A2.*] There is what I consider another "extraordinary" receipt, which, in my opinion, is more extraordinary than the accrued interest, and ought never to have been in. There is a Profit and Loss Account connected with the Government Post Office Savings Bank. That institution is largely self-supporting, and meets all expenses of administration, except liabilities for interest on the capital expended on the building. The Savings Bank pays 3 per cent. interest to its depositors. The revenue of the Institution is derived from interest arising from investments of deposits in Government securities, and the interest allowed by Government on uninvested balance. On the former the interest rate ranges from 3 to 4 per cent. per annum; on the latter, a general rate of 3 per cent. The Institution also profits by obtaining money for short periods without bearing interest, no interest being allowed on deposits for broken parts of a month. The large balance accrued represents the profits for several years, and the balance not transferred is shown in their Profit and Loss Account. The Treasury partly, I am sorry to say, at the instigation of our Department, has taken £48,000 of this money and placed it as a miscellaneous receipt of Revenue. I have always contended that the profits belong to the depositors. The rate of interest may be varied by the Government; but under the Act the amount (payable to depositors) must not exceed 4 per cent. Of course, the profits for one year may not allow the authorities to strike any commercial fraction of a rate; but the profits could accumulate so as to allow, say, a 3½ per cent. rate being struck during any one year. The Government has practically said, "There is money to the credit of the Profit and Loss Account of the Post Office Savings Bank which must be transferred to Revenue." (*Appendix A2.*)
612. *Mr. French.*] It is a matter of opinion whether it belongs to the depositors? If it does not belong to the depositors, I am willing to admit that it belongs to the Institution, but it does not belong to the Government? In 1894, they took £25,000; in 1895, £5,000; in 1896, nil; in 1897, nil; in 1898, £244; and in 1899, £18,000. The whole amount is £48,000 odd. That is an extraordinary receipt which should never

G. H. Pitt,
Esq.
26 April, 1900.

- G. H. Pitt,
Esq.
26 April, 1900.
- never have gone into Revenue. The effect of this is to make the Government Savings Bank a profit-making institution, and this was never intended.
613. Was it taken into extraordinary receipts of the Government? Not the extraordinary receipts, but into the miscellaneous receipts.
614. *Mr. Yarwood.*] Is it in the £42,000,000? Yes.
615. *Mr. French.*] I came to the conclusion that the Post Office Savings' Bank was practically the Treasury, the Treasury being responsible to the public for the whole of the funds of the Government Savings Bank; how do they get at the £18,000; the Savings Bank has all the money to its credit at the Treasury;—is that the difference between the amount that is credited to the Savings' Bank by the Treasury, and the amount that is given to the depositors or put to the credit of the depositors in the bank itself? I herewith produce the balance-sheets of the Post Office Savings Bank. It is the duty of the Audit Office every year to see that the totals shown agree with the cash-books in the Post Office Savings Bank, and, after audit, the statement is signed by the Auditor-General. After the £25,000 were transferred, that left £9,000 to the credit of Profit and Loss for year 1894. That meant that, if the Bank were wound up, they would have £9,000 to the good.
616. So the £25,000 is absolute profit? Yes.
617. But is it a profit made during that year? No; the balance has been carried forward from year to year. You made a remark that the Government Savings Bank is practically a Government institution. Well, I differ from my respected chief in that respect, because I do not think it is, in the sense implied. Unfortunately that is one of the arguments which have been adduced to cause this transfer. Take the Barrack-street Institution: I contend that it is a protege of the Government, and I think I am right in saying that if that institution were in difficulties—and we had an example in 1892—the Government would have to come to its assistance—I admit in the former case legally, in this case morally only—just as readily as it would support the Post Office Savings Bank. Therefore, you might really argue that the profits of the Barrack-street Bank should go into the Treasury, although, I admit, that is a strained parallel. I say that the profits of the Bank belong to the Bank, and could be used in the way suggested, or for any losses accrued in purchasing or selling scrip; but I certainly do not agree in making the profits an item of Revenue proper.
618. *Chairman.*] Might it not be taken in another way—that these expensive buildings should pay rent to the Government, and might you not bring the receipts into Revenue proper in that way? But this would be a most irregular way to do it.
619. *Mr. Yarwood.*] I suppose there is an Act of Parliament for the foundation of the Savings Bank? Yes; but so far as I know, no part implies that the transfer of profits to Revenue should be made.
620. Would the Act not say under what arrangement the Bank was to be run? I say, subject to correction, that the money belongs to the depositors.
621. *Chairman.*] Would you not say, "Less a fair rental"? Well, say less a fair rental.
622. Does the Bank pay for its own stationery? Yes; I think it pays everything but rent. I may say that I went to Mr. Doak, and told him that I intended to state to this Committee that the Post Office Savings Bank is self-supporting, except as regards paying interest on the capital expenditure of the part of the Post Office building which they occupy; and I took it that his reply was in accord with my remark. Of course, only a proportion of the building—the Pitt-street end—is used in connection with the Savings Bank business.
623. What about insurance, and so on? Insurance is not included in their expenditure. As regards Mr. Doak's salary, I should qualify my statement by explaining that his salary is split up, and part of it chargeable to other financial divisions of the Post Office. I asked him whether he had not protested against this money being taken from his account, and he said that he had continually protested against it, but that his voice had not prevailed.
624. *Mr. Yarwood.*] When was the first transfer made? In 1894.
625. *Mr. French.*] This amount is really included in the big sum? Yes.
626. Over what length of time were these accumulations? From 1894 to 1899.
627. Was the first appropriation in 1894? Yes.
628. *Chairman.*] What is your answer to Question 7, which reads as follows:—"The amount of that part of the cash debit balance on the Consolidated Revenue Fund Account existing on the 31st December, 1894, which was partly extinguished in the first half-year of 1895 by the excess of receipts over expenditure, resulting from the transfer of accrued interest from the General Loan Account, and partly by the proceeds of the new issue of Treasury bills"? I hand this paper in as my answer. [*Appendix B 2.*] The debit balance of the revenue on 31st December, 1894, was £447,603 8s. 9d., and that is on a corresponding footing with the credit of £116,523 5s. 8d. on 30th June, 1899.
629. *Mr. French.*] It is exclusive of the two special Suspense Accounts? That is so.
630. *Chairman.*] I have the amount in my statement as £464,711? There was an item of about £17,000 which was gradually reduced in connection with the Trust Account. The Treasury gradually adjusted it year by year, and now both Departments fall into line—that is, on 30th June, 1899, we agreed in the working balances.
631. What is your answer to Question 8, which is to this effect:—"The net amount of the extraordinary receipts available for and utilised in meeting expenditure chargeable to the Consolidated Revenue Fund Account during the period of four and a half years referred to, after deducting that portion of the cash overdraft which was extinguished as above"? The statement (B 2) which I have put in is an answer to that question. (I also submit C 2.)
632. Now we come to Question 9: "The amount of the total deficiency on the Consolidated Revenue Fund Account (Treasury Bills outstanding and cash debit balance) on the 31st December, 1894, inclusive and exclusive of the special Suspense Accounts"? The amount of the total deficiency of the Consolidated Revenue Fund, inclusive of the Suspense Accounts, was £2,735,511 8s. 11d. That was 31st December, 1894; and, exclusive of the Suspense Accounts, the amount was £2,200,487 8s. 9d.; and if the allowance be made for net payments in London not brought to account prior to 31st December, 1894, there is a deficiency of £2,954,393 6s. 1d. [*Appendix D 2.*]
633. We now take Question 10: "Whether the amount of accrued interest transferred from the General Loan Account to the Consolidated Revenue Fund Account belonged to the period prior to the end of the year

year 1894, and whether the proper effect of this transfer was the reduction of the deficiency existing on the 31st December, 1894? The amount that belonged to the period 1894 was £366,601 2s. 10d. There was a sum of £4,000 odd in that year, but it did not belong to that period. There was a premium on loans of £25,000 which is included in the former amount. (*Appendix E 2.*)

G. H. Pitt,
Esq.
26 April, 1900.

634. *Mr. Yarwood.*] Was that a premium on a loan floated before that period? Yes.

635. *Chairman.*] A discount, you mean? No; a premium.

636. Did the Government get a premium on their loan? Yes; that was an exceptionally good issue.

637. Was the amount exactly £25,000? Not exactly. Referring to my papers I see that the premium on loans raised under 41 Victoria No. 7 was £25,116 18s. 9d. There is another small sum of £164 14s. 11d. to be taken into account. If you will add £341,319 9s. 2d. to £25,116 18s. 9d., you will get the amount of £366,436 7s. 11d., and that together with £164 14s. 11d. will make £366,601 2s. 10d. [*Appendix E 2.*]

638. *Mr. Yarwood.*] I am now looking at *Appendix A*;—do you know of any reason why these transfers should not be dated back so as to allow for any deficiency that accrued prior to December, 1894;—is there any reason why they should be brought into the accounts of the subsequent period;—should they not be dated back to arrive at a proper conclusion? But what good effect would result by such operation.

639. With a view of arriving at the deficiency at stated periods; the latter part of the question asks whether the proper effect of this transfer was the reduction of the deficiency existing on the 31st December, 1894;—I want to know why they should be made applicable to accounts subsequent to that date? They could be allotted to the periods.

640. As a matter of propriety, and if the Commission decide upon arriving at the deficiencies at stated periods then it is not the proper thing to put these back to distributing years;—you know no reason why they should be applicable only to the period for which the entries were passed? I know of no reason. But if this course be followed there are other receipts that you may have to treat similarly.

641. *Mr. French.*] Do you remember any other items? Yes; there was another receipt of £7,961, if I remember the amount correctly, which was transferred to the Revenue Account during year 1898-9, from the loans because the revenue temporarily bore this expense some years before, and when the Loan Act was passed it should have been adjusted. It was not adjusted until the financial year ended—30th June, 1899.

642. *Mr. Yarwood.*] I understood you to say something about this accrued interest arising after the loan was floated,—that is, when this interest was due? I would like to give a little history of this accrued interest.

643. I should be glad to have it? We are obliged to go to the London market for most of our loan moneys, although I have a scheme which would do away with our depending so much on the London market. The interest bonus is really a sop or bonus offered to the investors. Suppose a loan had been floated in March, and the interest commences on the 1st January—so, if the prospectus is complied with, the investors will get interest as if they had paid their money on the 1st January. As a matter of fact, they pay a deposit (say) on the 5th March, 25 per cent. on the 21st March, and so on. Well, the item in question is the “interest bonus” from January to March of the first instalment, and so on. When computing the interest payable by the Colony, after allowing for redemption at par on maturity, it is regarded as a charge of negotiation. After carefully weighing the matter in connection with the practice followed, I came to the conclusion it was a charge of negotiation, and as all charges of negotiation are debited to the loan proceeds, the interest bonus must be treated likewise. The underlying principle in connection with this accrued interest is that, till the money is actually planked down, no charge for interest should be made against the Consolidated Revenue Fund.

644. In the total that appears as the loan debt of the Colony,—does that agree with the scrip that is outstanding? Our loan debt is made up of stock outstanding.

645. Is that actually meant as represented by stock? Yes; we redeem at par. In this case par would be 100; issue par may not be 100. We redeem by paying £100 sterling for every £100 stock.

646. The figures that appear in the Auditor-General's reports as the loan debt of the Colony represent the actual debt of the Colony? Yes—loans are paid off or renewed, as the case may be, at the dates of maturity.

647. Up to the time this entry was passed, this was not so? The accrued interest has to do with the proceeds of the loan, not the indebtedness of the Government to the investors.

648. This was credited to revenue? Yes, temporarily paid out of Revenue, then paid back from proceeds of the sale of the stock. The Government still owe the amount to the investors, and for every £100 of stock £100 sterling will be paid at the date of maturity.

649. *Chairman.*] What is your answer to the latter part of Question 10,—“Whether the proper effect of this transfer was the reduction of the deficiency existing on the 31st December, 1894”? My answer is, without doubt.

650. We now take Question 11: “If so, to what amount would this transfer of accrued interest properly reduce the deficiency existing on the 31st December, 1894, inclusive and exclusive of the special suspense accounts? As an answer to that, I hand in this paper (*Appendix F 2*).

651. Question 12 reads as follows:—“Whether the law provides for the reduction of the deficiency on the Consolidated Revenue Fund Account by the annual redemption of Treasury Bills to the amount of £150,000. And, by operation of the Statute, what should have been the amount of the deficiency on the 30th June, 1899, inclusive and exclusive of the special Suspense Accounts”? I will now read to the Committee section 6 of the Treasury Bills Deficiency Act of 1889. (*Section read.*) The bills have never been redeemed if the growth of the deficiency of the period under review be considered. They have only been practically cancelled. The Auditor-General does not include the proceeds of the bills, or the payment in connection with the redemption thereof, in the body of the account, but establishes the “gross” balance, and at the side shows the composition of such balance. The former (gross balance), of course, exhibits the “actual” drift of the revenue. I may state that whether the course adopted by the Treasury or the Auditor-General be followed, the results converge on the same totals, but with this difference—the extraneous credit is kept fully in view in the Auditor-General's statements. (*Appendix H 2.*)

652. *Mr. French.*] We want something to show why and how this is a deficiency on the Consolidated Revenue Account if, by Act of Parliament, it has been provided for by Treasury Bills in a special way;—the Auditor-General apparently does not recognise anything of this sort;—he carries it on as a deficiency, although

G. H. Pitt,
Esq.
26 April, 1900.

although it has been provided for temporarily by Act of Parliament. I should like to see the Acts of Parliament under which the deficiencies have been provided for? Will you allow me to correct the assertion that the Auditor-General does not recognise the Treasury Bills? He does recognise them. I say that he has so drafted the account that the public may see the true state of such, instead of submerging this large credit, under which a debit was made into a credit, and so allowing the country to go merrily on with apparently a large credit balance. The Auditor-General says: "I will not allow the balances to be inflated by these returns, but I must interpret the law in a practicable way, and therefore when I establish a total deficiency I say so much covered by bills and so much overdraft." As stated before, the figures of the Treasury run all through the Auditor-General's statements, and care is taken they remain uppermost. I was in Victoria the other day, and I took advantage of my visit to see the officials there. I had a chat about their finances. It seems that Victoria has been of late adopting up-to-date reforms in accounts, and it appears that colony does the same as we do as regards establishing the "gross deficiency," although I must say they recognise the proceeds of the bills in the account proper. Their Deficiency Bills amounted to £200,000. They add the £200,000 on, and say, "Deficiency on account of revenue, 30th June, 1899, to be made good in future years," the figures including bills outstanding. A leading official whom I saw said that he thought our method of showing the total deficiency was a satisfactory one, and that they followed a like course.—On 31st December, 1894, the deficiency, including bills, amounted to £2,735,511 8s. 11d.; on 30th June, 1899, it was, including bills, £2,757,529 7s. 7d.

653. So, apparently, there was no increase in that period? Yes, there was.

654. "Apparently," I say? There was over £22,000. That was an important factor. There was £22,017 18s. 8d. increase of deficit between those two periods. Now comes the important part. If that section in the Treasury Bills Act which I have read is to have any tangible effect at all, the £600,000 worth of Bills redeemable during that period should have been *absolutely* paid off. On these lines, practically, a deficiency of £622,017 18s. 8d. accumulated during that period. That is to say, that the section of the Act was practically a mere cypher. The redemption of the Bills was merely nominal, and effected at the expense of the overdraft. The Act of 1895 says that all these instalments must be in payment or redemption of the first issue—the 1889 and 1890 issues—and there can be no redemption in connection with the second issue until the first deficiency is extinguished.

655. What is to be understood by that section of the Act you have read? That the payment should be absolute.

656. Has the Government ever carried that out? No.

657. Not in one single instance? They have carried it out as far as the cancellation was concerned. Of course in some individual years the decrease in the deficiency (compared with that of the former year) was larger than the £150,000, and, consequently, during that individual year, an absolute or partly absolute redemption took place; but taking the collective period 1889–1899, or 1895–1899, the records show an increase of the deficiency, and, consequently, prove on the face of it that the redemption was formal only.

658. Have they ever gone through the formality? Yes, the formality. On the 31st December of each year they must reduce the amount of the Bills by £150,000.

659. *Mr. Yarwood.*] Have they done that absolutely? No, nominally. They have reduced the amount of the Bills, but they have not reduced the deficit absolutely.

660. *Mr. French.*] In fact what they have done is this: They have drawn upon their ordinary account (the Consolidated Revenue, presumably) for £150,000, and have paid it into this account, thus fulfilling this Act to the letter, but they really had not the funds, or they derived the funds by trading upon an overdraft account? That is it. I do not want to take a mean point in this question, and so I would like to mention that the 1895 Act is worded so, I take it, that the Bills of the first issue may be extinguished from the proceeds of the second.

661. *Mr. Yarwood.*] Surely an ordinary business man would assume that if the country was to take £150,000 worth of Treasury Bills which were issued for a certain deficiency every year the intention—I do not mean to say the legal reading was—that the debt of the country was to be written off? Yes, not to be paid off from another borrowing.

662. *Mr. French.*] I would like to ask you as an experienced officer in the Audit Department whether the meaning of the return brought out by the Auditor-General in his last statement did not amount to this: that the deficiency was practically carried on notwithstanding the Deficiency Bills? That is right; that is the result. If you include the proceeds of Bills in the receipts you cloud the issue, and in the end you establish figures that you have to wade through in order to get at the truth, but by keeping the balances pure you see exactly how matters stand and the true drift of the revenue.

663. Between the Parliament and the Government, and the Parliament and the country, I have understood that for the time being these deficiencies were wiped out? Yes; but they are not being wiped out.

664. If these Acts under which the deficiencies were wiped out for the time being provide that the deficiencies shall be repaid at the rate of so much a year, it is simply that the overdraft has been made to bear the brunt of it, and the deficiency has been reduced;—the effect is the same, and the deficiency is simply carried on? That is it.

665. And that is summed up in the ninth paragraph of the twenty-eighth Annual Report of the Auditor-General, as follows:—"The first of those Acts authorised an issue of Treasury Bills to the amount of £2,600,000, but the deficiency was subsequently found to require only an issue to the amount of £2,502,884. By the 31st December, 1894, those Bills were reduced to £1,752,884 by a literal compliance with the conditions of their issue, but the deficiency itself was not reduced thereby; but, on the contrary, the literal writing off of the difference of £750,000 merely converted it into an addition to the cash overdraft which had been accruing independently of the Treasury Bills liability, and raised that cash overdraft at 31st December, 1894, from £232,627 8s. 11d. to £982,627 8s. 11d." So the balance of 1894 was much the same as the balance of 1889, including the Treasury Bills which were yet outstanding, and had not come under the operation of the £150,000 a year? That is it. To use an algebraic expression the total is practically a constant. The Bills were never absolutely redeemed.

666. *Mr. Yarwood.*] The question is whether the law provides for the redemption? I say it does; that is absolutely.

667. I want the Act put in. I want to see what provision was made in the Act to stop that particular practice? —

668. *Mr. French.*] At any rate you say that the law does provide for a deficiency? Yes. [*Act 52 Victoria, No. 9, put in and marked Appendix G 2.*]

669. *Chairman.*] What should have been the amount on 30th June, 1899? The Auditor-General only quotes absolute figures. He practically ignores the principle underlying the redemption clause by showing that the deficiency increased only £22,017 18s. 8d., but actually it increased £622,017 18s. 8d.; that is inclusive of Suspense Accounts.

670. *Mr. French.*] I take it that it is £150,000 multiplied by the number of years? Yes. [*Return put in and marked Appendix H 2.*]

671. *Mr. Yarwood.*] Were the Treasury Bills floated for a deficiency, or in connection with the remodelling of the railway service;—what were the Bills actually for when the 1889 Act was passed? I will explain. The Public Account in the Bank of New South Wales, the Commercial Bank, and the City Bank, is comprised really of two accounts, the Revenue Account and the General Trust Funds. Prior to the Bills being created, the Government were using the uninvested balance of trust moneys as a common cheque is used in connection with the two funds, the account in the Bank being one collective account. They were using the trust moneys till the deficit began to grow to a large extent, and during 1889 and 1890 the Government created the Bills to cover the deficiency of 1886 and previous years. But they had spent a large amount of the money between 1886 and 1889 on account of that period, and the Government really covered the amount by Bills and also provided for prospective payments on account of period named. Like action was taken in connection with the second deficiency. It was only a nominal proceeding to cover by Bills, as most of the money, as said before, was already spent and taken from trust funds. There is a very clear statement of the trust funds which I will put in (*marked Appendix N 2.*)

672. There was something special done when the late Mr. Eddy wanted the rolling stock—something about a million? That is a subject entirely distinct from the one under review.

673. It does not affect this history? Not at all.

674. But was not that put in some shape or form;—was it not to be redeemed by yearly payments? That money never came out of the trust funds at all; it came out of loans.

675. *Mr. French.*] Referring again to Question 12, the latter portion may be understood to mean the deficiency proper for those years, not the actual deficiency brought out by the Auditor-General being the total deficiency of the country? It is the deficiency for the period of four and a half years ended 30th June, 1899, and up to that period. Appendix H 2 shows it.

676. *Chairman.*] What is the answer to Question 13, which runs as follows:—“The actual amount of the deficiency on the Consolidated Revenue Fund Account existing on 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts”? My answer is the actual amount, inclusive of Suspense Accounts, is £2,757,529 7s. 7d., and exclusive of Suspense Accounts, £2,061,060 14s. 4d. (*Appendix I 2.*)

677. What is your answer to Question 14:—“The increase in the deficiency thus created, or the reduction effected, during the period of four and a half years from the 1st January, 1895, to the 30th June, 1899, inclusive and exclusive of respective Suspense Accounts, after providing for the reduction of the 1894 deficiency by the operation of the statute, and by the transfer of accrued interest”? I can answer Question 14 as it is put, but such implies that the amount of £600,000 payable in redemption of Treasury Bills was due on 31st December, 1894, and that the credit to accrued interest of the period 1st January, 1895, to 30th June, 1899, was also available on 31st December, 1894? I hand in a paper on that question (*Appendix J 2.*)

678. *Mr. Yarwood.*] I would like the figures from the very inception of this particular Act of Parliament, Appendix G 2? Very well.

679. *Mr. French.*] The Auditor-General states that 1886 was the year of the first debit balance, or the first deficiency, and I understand from his reports that from that time forward there has been a deficiency? That is so; and the fact that they have been increasing proves conclusively that no Bills were redeemed, because if the deficit is increasing how could the Bills have been redeemed. (I will be pleased if my answer to question 12 be read in conjunction with the above remarks.)

680. That is to say, redeemed in a business sense? Yes.

681. They have been redeemed in a legal sense, but not in a business sense? Yes.

682. *Mr. Yarwood.*] In reporting on this matter, and in order to be fair, we must deal with this from its inception. Will you, in connection with Questions 11 to 13, prepare a paper showing the previous workings. I want to see the history of that liability? You mean that you wish me to take Appendix H 2 back to 1890?

683. Yes? I will do that. (*Supplementary Appendix H 2.*)

[Adjourned till Friday, April 27, 1900.]

SEVENTH DAY.—FRIDAY, 27 APRIL, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

George Henry Pitt, Chief Examiner, Department of Audit, further examined:—

684. *Witness.*] In connection with my answer to Question 12, I now submit Appendix H 2, which I have amplified to include information from the inception of the payment of the bills.

685. *Chairman.*] We now come to Question 15:—“Whether the net proceeds of the new issue of Treasury bills, £1,024,700, were not, in effect, used in meeting a deficiency in Revenue, as compared with the expenditure during the period of four and a half years referred to, exclusive of the Special Suspense Accounts, leaving a credit balance on the account current existing on the 30th June, 1899.” What is your answer to that? If the proceeds of the bills be left out, there was a debit balance of £908,176 14s. 4d., and when the bills were credited that put the balance up to the 30th June, 1899, to a credit of £116,523 5s. 8d. (*Appendix K 2.*)

G. H. Pitt,
Esq.

27 April, 1900.

G. H. Pitt,
Esq.
27 April, 1900.

686. Now we take Question 16 :—“Whether, in changing the system of accounts, it was provided that certain expenditure should be met from the current Consolidated Revenue, and that the unexpended votes of previous years should be spent, and the payments met from the proceeds of the issue of Treasury bills referred to”? My answer to that question is, yes, certain expenditure. I use the word “certain” at the Auditor’s suggestion. The Treasury Bills Act of 1895 was passed to meet the liabilities of June, 1895, and previous years, and therefore the practical effect would be that in 1895–6, so much would be chargeable to the current year’s revenue, and so much to the proceeds of bills.

687. *Mr. Yarwood.*] The question uses the words “provided that certain expenditure should be met”; what is the mode of procedure for making the provision? When we say “provided,” it is simply implied that the estimate of the deficiency as established was recognised under the Treasury Bills Act.

688. But is it done by Act of Parliament, or minute, or what? By the former. The system was changed to what has been so far called the “cash basis,” which, in my opinion, is a misleading term under present conditions. For two years after the initiation of the new system the old system was current, in other words, there was no defined cleavage. Dealing with these questions individually we cover to a large extent the same ground again, because further on we explain that it would have been much better if the Audit Act Amending Act had provided that all of the unexpended votes of period prior to 1st July, 1895, should be absolutely written off, not only annual, but special appropriations, and then the year 1895–6 would have started with a clean slate. But there were difficulties in the way which will be dealt with further on.

689. The question speaks of changing the system of accounts;—what I want to get at is this: Was there any Ministerial minute or direction from the Auditor-General or anybody else to guide them in the matter as to how this was going to work out? Only the Audit Act Amendment Act. That implies the change.

690. *Chairman.*] Now we take Question 17 :—“Whether, if the unexpended votes were so used, a more equitable plan would not have been to have allowed them to lapse in changing the system of keeping the Public Accounts, seeing that it was provided that thereafter all unexpended votes should so lapse”? My answer to that is this: Judging from present experience, I am strongly of the opinion that the Audit Act Amendment Act should have provided for the lapsing of all Annual Votes of period up to 30th June, 1895, while the Special Appropriations might have been regarded as liabilities of the year in which the payments were met, that is to say, there should have been a distinct cleavage between the old and new systems at 30th June, 1895. As a matter of fact, the inclusion in the Act of such provision would not have prevented some overlapping, as the Act was not assented to until November, 1895, or five months after the inception of the so-called cash basis system. In the absence of such provision, the balances of 1894 and June, 1895, appropriations were available for six and twelve months respectively after 1st July, 1895.

691. We now take Question 18—“Whether the course pursued did not have the effect of reducing the expenditure chargeable to the first year of the new system below the ordinary expenditure of the Colony, and so yielding a credit balance on the new account on the 30th June, 1896”? Where it says in that question “chargeable to the first year of the new system” I take that to mean chargeable to the current revenue. My answer to the question is yes.

692. Now we take Question 19. “The amount to the credit balance on the 30th June, 1896, and the amount to which it had been reduced by the 30th June, 1899?” The credit balance of the Current Revenue Account of Auditor-General on the 30th June, 1896, was £274,878 19s. 8d. (amended balance), and the balance on the 30th June, 1899, was £44,663 19s. 6d. The credit balance was reduced during the four years by the sum of £230,215 0s. 2d. I will now explain the three accounts of the Consolidated Revenue Fund which have been established by the Auditor-General:—

ACCOUNTS CURRENT—CONSOLIDATED REVENUE FUND.

The following accounts current show how the Consolidated Revenue Fund has been effected by the operations during the financial year ended 30th June, 1899 :—

Account No. 1—Current Revenue Account.

This account has been prepared under the system adopted during the year 1895–6, and which was initiated in accordance with the amended provisions of the Audit Act introduced during 1895.

Account No. 2—Deficiency Revenue Account.

This account is correlative with Account No. 1, and similarly came into existence under the altered conditions. It will be current as long as the present deficiency exists, and it is quite probable that it may outlive such, and be made a most useful medium for adjusting any prospective deficiencies. The Account will always exhibit the actual amount of the accumulated deficiency at the close of each of the financial periods. Under present conditions, as no accretions can be made to the debit shown, a shrinkage in the deficiency should be evident each year. It is well, however, to remark that the much-desired result can only eventuate if the condition of Account No. 1 at the close of each financial year should be such that the annual receipts are at least sufficient to cover all payments during the year, including the £150,000 payable in the redemption of Treasury Bills.

Account No. 3—General (or Consolidated) Revenue Account.

This is a concrete account, and is formed by the amalgamation of Accounts Nos. 1 and 2. Practically speaking it is somewhat of an excrescence, and had certain preparatory arrangements been made immediately before the introduction of the new system, on 1st July, 1895, under the Audit Act Amendment Act of that year, its continuance beyond the period just named would not have been necessary. When the system under which the Accounts are now presented is remodelled—and it is very essential that immediate action should be taken if the cash basis system is to become an actuality—this Account will, it is hoped, be found unnecessary and be expunged.

Account

Account No. 1.—Current Revenue Account, 1898–9.

G. H. Pitt,
Esq.

The year's operations closed with a credit balance of £44,663 19s. 6d. The net receipts were £9,721,957 17s. 11d., and the payments £9,739,657 12s., thus showing an excess of payments to the extent of £17,699 14s. 1d. This debit balance, however, was converted into a credit of £44,663 19s. 6d. by bringing forward the credit balance of the previous year, 1897–8, of £62,363 13s. 7d.

The old practice of bringing forward the balance of the previous year's operations is open to question, and I am strongly of the opinion that the balance at the close of the financial year, whether a debit or credit, *should be wholly transferred to the Deficiency Account*, thus removing any overlapping, and placing each year's financial transactions on a distinctive basis. (Under the proposed new or remodelled system I deal with this question.) The Current Revenue Account for 1898–9 is given in the following statement:—

Account No. 1.—Current Revenue Account.—Financial Year ended 30th June, 1899.

An innovation has been adopted in the accounts of the year under review, by it being shown that if no credit balance had been brought forward the year would have closed with a debit of £17,000 odd, but by bringing forward the credit balance of the previous year of £62,000, it closed with a credit balance of £44,000.

Account No. 2.—Deficiency Revenue Account, 1898-9.

Deficiency Account for 1895 (June) and previous years.

The "Gross" Deficiency, that is, the accumulated deficiency if no allowance be made for the Credit Balance of Account No. 1, £44,663 19s. 6d., was £2,802,193 7s. 1d. The last-mentioned amount includes outstanding advances to the amount of £679,558 1s. 8d., which may be recovered in future years. Probably, however, the bulk will be converted into final payments. During the year under review the "gross" deficiency was reduced by £158,884 0s. 7d. :—

* Included in Revenue Credit Balance (£116,523 5s. 8d.), 30th June, 1899, page 8, Treasury Statement, 1898-9.

Account No. 3.—General (or Consolidated) Revenue Account, 1898-9.

As previously stated, this Account is formed by the amalgamation of Accounts Nos. 1 and 2; hence, if the credit balance of the former, £44,663 19s. 6d., be placed against the overdraft of Account No. 2, £624,609 7s. 1d., the result will be £579,945 7s. 7d., the figures given in the subjoined statement; or, if the credit, £44,663 19s. 6d., abovementioned, be placed against the “gross” deficiency, £2,802,193 7s. 1d., shown in Account No. 2, the “Net” deficiency on 30th June, 1899, was, as shown below, £2,757,529 7s. 7d.

I may here remark that to follow closely the Treasury figures the Auditor-General has adopted the gross Receipts and Disbursements, and consequently, if an attempt be made to amalgamate the net returns given in Accounts Nos. 1 and 2, the basis on which the returns have been established will have to be taken into account—the results or balances, of course, will be the same. The figures in every case are exclusive of the Proceeds of Treasury Bills and the payments in redemption thereof, but the totals include all operations in connection with the two Accounts, placed wrongly, I contend, to Special Suspense Accounts, the Centennial Park Account, 51 Vic. No. 9, and General Post Office—New Street Resumption Account (Martin Place), 53 Vic. No. 13 :—

State of Deficiency from Year of first Deficiency, to 30th June, 1899.

Year:	Receipts, including “Temporary Advances Repaid” exclusive of proceeds of Treasury Bills.		Disbursements, including Temporary “Advances Made” (exclusive of payments in redemption of Treasury Bills).

The “Net” Deficiency, £2,757,529 7s. 7d., includes outstanding advances to the amount of £896,771 16s. 4d., which may be recovered in future years. Probably, however, the bulk will be converted into final payments.

G. H. Pitt, Esq.
27 April, 1900.

693. The next question is No. 20 "The amount by which the expenditure charged to the year 1895-6 was less than the average expenditure of immediately preceding years, and the causes of this reduction in the expenditure. The amount charged to the proceeds of Treasury bills in 1895-6."? A minute ago we were saying that at the introduction of the new system there were outstanding liabilities of the old system to be paid. During 1895-6 there were claims paid on account of 1891, 1892, 1893, 1894, and six months of 1895. In all they amounted to £952,807 8s. 11d. Those were all charged to the proceeds of Treasury bills. I may say that these are Treasury figures. The expenditure proper during 1895-6 was £9,852,219. That is the expenditure during the year irrespective of the period of service. (*Appendix L 2.*)

694. *Mr. French.*] That is the total expenditure for the year? Yes, expenditure proper.

695. Inclusive of anything which might belong to previous years? Yes. You may remember that I said it would have been much better if the Audit Act Amending Act had provided for a distinct cleavage on the 30th June, 1895. If that had been done the charge against the current year's revenue would have been £9,852,219.

696. Supposing there had been no such things as Treasury Deficiency Bills ever thought of or contemplated, is that what you would have reckoned the expenditure for that year—1895-6? That stated would be the expenditure of the year.

697. But, supposing we had never heard of Treasury bills, would that have been the way in which the figures would have been brought out in the year's accounts? Undoubtedly.

698. There is an assumption in the question that the expenditure was less;—now, we want to know how much less it was? I have taken the average both ways to be fair. The expenditure *on account* of the various years was as follows:—

	£
1892	10,866,731
1893	9,816,876
1894	9,694,530
1895 (6 months)	4,709,821
1895-6	8,899,411

These are payments on account of the years 1892 to 1895-6 irrespective of the years of payment. I will now give you the amounts paid during the year, on account of 1892 to 1895-6, irrespective of the period of service—that is to say, the amounts paid *within* the year:—

	£
During 1892	9,648,604
1893	10,081,754
1894	9,480,453
1895 (6 months)	4,924,340
1895-6	9,852,219

The average annual expenditure for the previous period commencing from 1892 was £10,025,130, and the expenditure during 1895-6, on account of 1895-6, was £8,899,411, and the expenditure below the average of previous years was £1,125,719. The expenditure during 1892 on account of 1892, irrespective of period of service, was £9,648,604, and the average for the whole period is £9,752,900. The amount paid during the year 1895-6 and charged to Current Revenue Account was £8,899,411. And the amount below the average of previous years was £853,489. These are my answers to Question 20. (*Appendix L 2.*)

699. *Mr. Yarwood.*] You have drawn that memorandum up from 1892? Yes.

700. I suppose there would have been nothing abnormal about any of those years;—you could have an average extending over further years? I could easily do it.

701. Suppose you go back another two years. In this memorandum you go from 1892 to 1895. That looks like the period of one Treasurer. I do not know whether as a matter of fact it was so, and I do not care —?

702. *Chairman.*] We now take Question 21:—"Whether a sum of £216,000 was not saved from the vote in 1893 on account of Roads, Endowment to Boroughs, District Councils, and Shires under the proposed Local Government Bill, and this sum called back into existence and spent partly in 1894 and the first half year of 1895, but the larger part in the year 1895-6 on the plea that the savings had been improperly made. And whether an examination of the annual expenditure on roads does not show that the action referred to enabled a large reduction to be effected in the amount charged to the year 1895-6, as compared with previous years"? The unexpended balance of 1893 roads vote was £216,283. During the following year £19,764 was expended out of the balance of the appropriation of 1893 (£216,283), leaving a balance of votes unexpended of £196,519. Under section 15 of the Appropriation Act of 1895, the life of the unexpended balance (£196,519) of the roads vote of 1893 was extended to 31st December, 1895, and the amount distributed thus,—£43,643 expended during the half-year 1895; £152,680 expended during the year 1895-6; £196 surrendered, making a total of the last three amounts of £196,519. The expenditure from Roads and Bridges vote on account of each year, irrespective of date of payment, was as follows:—

1893	£591,210
1894	£585,322
1895 (half-year)	£248,380
1895-6	£387,207
1896-7	£547,761
1897-8	£514,880
1898-9	£528,075

A large reduction was effected in the annual expenditure during 1895-6, whether the figures be compared with years prior or subsequent to the year under special review. It may be remarked that as regards the years 1895-6, 1896-7, 1897-8, and 1898-9, the figures are on a very fair comparable basis. What I mean by that is this: that in account No. 1 (Current Revenue Account), to which I have referred, only £387,207 would be put in, whereas the normal expenditure on roads and bridges—and it is pretty regular from year to year—ranges from £500,000 to £525,000, so there is a gain in that year of somewhere near £125,000.

703. *Mr. Yarwood.*] That means that under the cash basis they paid £125,000 less than they would normally, and transferred that £125,000 to the bank? Yes. G. H. Pitt,
Esq.
704. *Chairman.*] In other words, the road vote was starved? I would not like to say that.
705. *Mr. Yarwood.*] I suppose, as a matter of fact, most of the road expenditure is paid straight away—it is weekly wages, I suppose? I can speak with a little experience on that subject, as I was once a Road Superintendent. The vote provides for the salaries of officials throughout the Colony engaged in this division of the Works Department. It provides also for the construction and maintenance of the roads. 27 April, 1900.
706. That is wages? Yes; maintenance includes wages. I contend that to show a healthy revenue there must be a large expenditure therefrom on minor works. I have always found that is a sure guide of an elastic revenue. If there is any large expenditure on construction and maintenance you may well infer that the revenue is pretty healthy. If it is not healthy you find the expenditure wherever possible being thrown into the loan votes. The vote is not all for wages; there is a considerable expenditure incurred for opening roads.
707. But they give advances on them from time to time? The works were perhaps let before 1895–6.
708. Still it would be a normal expenditure? A normal expenditure is between £500,000 and £525,000. Whatever way we like to take the figures, the expenditure against the current year of 1895–6 was a long way below the average of previous, or subsequent, years.
709. *Chairman.*] We now take Question 22. It is really several questions. We will take the first part as follows:—“Whether during the first half-year of 1895 the amount of accrued interest, &c., previously referred to was transferred from the General Loan Account, reducing the cash debit balance on the 31st December, 1894 (exclusive of Suspense Accounts).” Can you answer that portion of the question? Yes, it undoubtedly reduced the debit balance. (*Appendix M 2.*)
710. The next part of the question runs thus:—“The debit balance on the 30th June, 1895, which was extinguished by the proceeds of Treasury Bills”? The debit balance, exclusive of Suspense Accounts, of the Consolidated Revenue Fund on 30th June, 1895, was £149,340 2s. 9d. That debit balance was converted into a credit of £875,359 17s. 3d. That is what is meant by being extinguished. From 1895–6 to 1898–9 the debit increased £758,836 11s. 7d. Subtracting that amount from £875,359 17s. 3d., we get the old item of £116,523 5s. 8d. as the credit balance on 30th June, 1899. The proceeds of bills included in the receipts of 1895–6 available for payment on account of liabilities in 1895 (June), and previous years, amounted to £875,359 17s. 3d. The payments made during 1895–6 and 1896–7 (at which latter date the payments on account of the old system ceased), amounted to—1895–6, £304,183 12s. 11d.; 1896–7, £652,295 12s. 2d.; making a total of £956,479 5s. 1d. The Auditor-General maintains that after the 30th June, 1897, no payments can take place on account of the Deficiency, hence from that date the deficiency should steadily decline.
711. Prior to 1895? Yes; that means that it reached high-water mark. On superficial investigation it would appear that the proceeds available, £875,359 17s. 3d., were inadequate to meet the payments. Not so, as the shortage in the cash is explained by the fact that the figures were influenced by operations in temporary advance account, while the payments were subsequently reduced by repayments to credit of votes. (*Appendix M 2.*)
712. *Chairman.*] We now take Question 23:—“Whether the Consolidated Revenue Fund Account current under the new system was relieved in the year 1895–6 by only charging it with one half-year’s redemption of Treasury Bills in aid of revenue and of Railway Debentures”? My answer is, yes; but the remark must be coupled with an explanation. The Act states that the £150,000 Bills shall be redeemed on the 31st December of each year. Bills to that amount were nominally redeemed (practically cancelled). The liability to pay the £150,000 was regarded, and I think rightly so, as spread over the calendar year 1895. As the first half of that year belonged to the deficiency period, £75,000 was debited, and I contend rightly so, to the proceeds of Bills, and £75,000 to the current year 1895–6. The Audit Department agreed with the arrangement, and the £75,000 payable in connection with the Railway Loan Redemption Fund was treated in like manner.
713. *Mr. Yarwood.*] But when you closed the accounts up on the following 30th June, 1896, if you wanted to show the outstanding liabilities you would have shown £75,000 as an accrued liability? What do you mean by outstanding liabilities?
714. Supposing you were dealing with the accounts on a cash basis. You had altered your accounts from the ordinary year—January to December—to from June to June? Yes; you mean July to June.
715. Well, in the period January to June, 1895, you provide for £75,000 accrued liability? Yes, on the principle that a bank does.
716. Then on the 31st December you pay £150,000, £75,000 that was provided for, and £75,000 that is due; but in presenting the accounts on the following 30th June they ought to have provided again for £75,000 to get at the true position? No; the deficiency period overlapped in the one calendar year, and the same conditions did not obtain in the second.
717. In the way it has been done, does it not appear as if £75,000 was in the first account, which is for six months, and £75,000 is in the next twelve months’ accounts? No; because the money is payable only on one day—31st December.
718. Supposing the 30th June, 1896, to end the first financial year? But you cannot do that; the Act says that the payment must be made on the 31st December.
719. I know that, but looked at from a business point of view, on the 30th June, 1895, no matter what the Act says, you said that £75,000 applied to that period, which you would pay on the 31st December? Yes. I regard the liability as spread over the year.
720. Having that £75,000 you add another £75,000 to it and you present your account on the 30th June, 1896, showing only £75,000 to the debit? I must confess I am puzzled. The period was from the 1st July, 1895, to the 30th June, 1896, and the amount was payable just exact in the middle of that period, on the 31st December. The Treasury reasoned that from the 1st January, 1895, to the 31st December, 1895, there were £150,000 due, and as January to June, 1895, belonged to the deficiency period, and July to December, 1895, belonged to the financial year 1895–6, they allotted the £150,000 to the respective periods. The next instalment was not due till the 31st December, 1896.
721. But supposing there had been £75,000 payable half-yearly? Such conditions could not obtain.
722. But that is the way you treated it at that time? Yes, from a liability standpoint only.

- G. H. Pitt,
Esq.
27 April, 1900.
723. Well, is not that year's account lightened to the extent of £75,000? I admit it if there were no charging back to the proceeds of Bills. The £75,000 would have been debited to Current Revenue.
724. On the 30th June, 1896, you would say £75,000 for the redemption of the debentures of that year? Yes, a liability.
725. And on June, 1897, you would say, £150,000? No; £75,000 liability as before, or £150,000 payable on the previous 31st December, for the financial year. I have always maintained that the Treasury did quite right in the course they followed.
726. But the point is that we have to consider the accounts as business men would look at them, and to say as business men whether 1895-6 fairly bore what it would have borne provided there had been an absolutely clean slate? But there was no cleavage. I have said and maintain there should have been a cleavage. The Current Revenue of 1895-6 was debited with £75,000 of the expenditure of the year only; the remainder to proceeds of Bills.
727. *Chairman.*] We will now take Question 24 :—"Whether the Act of applying £150,000 from the Sinking Fund established under Act 53 Victoria, No. 24, towards meeting railway debentures matured under Act 31 Victoria, No. 11, will not have the effect of compelling the Consolidated Revenue Fund at a later period to provide the amount relieved in the year 1897-8." My answer is as follows :—"On the 30th June, 1897, the principal to be repaid in connection with loan 31 Victoria, No. 11 (Railway Loan of 1867), was £206,700. During 1897-8 this amount was reduced to £2,400 by the repayment of £204,300—£54,300 of which were paid from Current Revenue of 1897-8, and the whole balance at credit of Railway Loan Redemption Fund, 53 Victoria, No. 24, special trust account, was used in payment of the remaining portion £150,000. The withdrawal of this amount was done partly at the suggestion of the Auditor-General; but on the understanding that the amount withdrawn was to be replaced, as the Auditor-General contended that the appropriation of £150,000 under 31 Victoria, No. 11, would be current till used. Hence the Consolidated Revenue Fund will be required to replace the amount withdrawn, £150,000. Whether in the near future or after the conditions of the Railway Loan Redemption Fund Act, 53 Victoria, No. 24, have been complied with is a question for the Colonial Treasurer to decide. If the latter course be adopted the £150,000 appropriation of 31 Victoria, No. 11, will remain current for several years, and that will be somewhat awkward."
728. *Mr. French.*] One would infer from this question that the answer would be that it would have the effect of compelling the Consolidated Revenue Fund to provide the amount; but you do not go so far as that? Oh, yes, I do.
729. *Chairman.*] We now take Question 25 :—"The amount by which the Consolidated Revenue has been relieved by charging to the proceeds of short-dated loans, and in other ways, expenditure ordinarily provided from revenue, whether the system of repayments established in connection with these loans is not one that tends simply to relieve the first few years during which it is in operation at the expense of future years, and whether it should not be discontinued." What is your answer to that question? "Short-dated loans" is a colloquialism which is not exactly right. The loans have a thirty years' currency, and I think that is a long period. To establish the figures desired would be somewhat difficult. The system of dividing the annual loan appropriation Acts into two broad divisions, "permanent and reproductive works" and "other works,"—to be paid out of the Consolidated Revenue Fund in thirty years by means of an annual sinking fund—was first adopted by the late Administration under the 1894 Loan Appropriation Act. The principle of redeeming loans by sinking funds is an old and approved one, but in the present case it is questionable whether the principle should have been followed, as the system provides another loop-hole for evasion of the liabilities of revenue. The liabilities against the "permanent and reproductive" division of the loan appropriation have been extended to cover the purchase of ammunition, jam jars, pickle jars, blankets, toilet covers, wardrobes, tables, chairs, carpets, lamps, wicks, bulls, pigs, donations to hospitals, gratuities. The other division of appropriations in connection with Sinking Fund services provides for expenditure on all-fours with those just enumerated, and it follows that repetitions of purchases on similar classes of articles take place, but proportionately in a larger way. The Audit Department has always protested against saddling the Loans Fund with charges on account of perishable articles. Under any circumstance the Revenue should never have been relieved of such liabilities as those aforementioned. By so doing every penny that is debited to Loan funds brings up the so-called surplus of Revenue; in fact the charging of such services to Loans is a strong index that the Revenue is not sufficient to meet its growing liabilities. One sure index of an elastic revenue is its ability to meet expenditure on minor works in addition to the cost of maintenance of the State machinery. The appropriations in connection with the Sinking Fund division of the Loan Appropriation Acts for each of the years since the inception of system in 1894, are given in the statement which I now hand in (*Appendix N 2*).
- [Adjourned till Monday, 30 April, 1900.]

EIGHTH DAY—MONDAY, 30 APRIL, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.,

F. N. YARWOOD, Esq.

George Henry Pitt, Chief Examiner, Department of Audit, further examined:—

730. *Chairman.*] In endeavouring to answer the first three questions, although I commenced on the 1st January, 1895, with the same balance as Mr. Vernon does, £464,711 0s. 4d., and leave off with the same balance, £116,523 5s. 8d., as he does, I make the answer to No. 1 question £1,200,107 7s. 3d.; Mr. Vernon makes it £1,254,195 10s. 10d., while Mr. Pitt makes it £1,020,640 3s. 8d.; this shows the unreliableness of the *Government Gazette*, which professes—and we have it in evidence that it is so—to be a reflex of the balances of the ledgers in the Treasury; with the consent of the Commissioners, I propose to ask Mr. Pitt to reconcile these answers, and afterwards to ask Mr. Vernon also to do so? Mr. Vernon would no doubt show how his figures are made up, and if I cannot find out how his figures are made up, I will reconcile mine own.

G. H. Pitt,
Esq.
30 April, 1900

731. We now proceed to Question 26:—“Whether a deficiency on the Consolidated Revenue Fund Account was not created during the period of four and a half years from the 1st January, 1895, to the 30th June, 1899, and if so, the amount of such deficiency—(a) Inclusive of Special Suspense Accounts; (b) exclusive of Special Suspense Accounts; (c) as increased by amount taken from Sinking Fund to meet debentures falling upon Revenue; (d) as further increased by expenditure ordinarily defrayed from Consolidated Revenue, and provided from short-dated loans, and in other ways”? As to (a), (b), and (c), we are really going over the same ground again. As to (d), it is impossible to give that information without going to an enormous amount of mechanical labour; but I have already given the information in an appendix which has been put in—that is, I have given the total amount of these short-dated loans. To answer paragraph (d) would involve the examination of every voucher, and even then the vouchers may not disclose everything. *Appendix N 2* will give the information in the best form in which it can at present be established.

732. *Mr. Yarwood.*] Would any of these items that have been dragged into this have ordinarily gone into ordinary loan expenditure? Quite possibly.

733. I take it the line of demarcation between loan expenditure and revenue expenditure is not a defined one? Unfortunately not.

734. *Mr. French.*] You do not know, nor is there any means of information in the Audit Department which would enable you to tell, who allocates them—that is, whether they are done by the Treasury or by the Departments? We are not in the know in that respect; but I infer that the Works Appropriations are drafted in the Works Department, and then submitted to the Treasury, who go through the Estimates, and prepare the loan appropriations and votes. The answer to paragraph (a) is £22,017 18s. 8d.—that is, the increase during the four and a half years. That is the amount, exclusive of the annual statutory obligation of £150,000.

735. That is the deficiency so far as the actual period itself is concerned, but not allowing for obligations imposed upon them by law for a prior period? That is it. The answer to paragraph (b) is that there would be a credit of £139,426 14s. 5d.

736. That means excluding the operations of the Suspense Accounts for that period? Yes.

737. It is important to bear in mind that the answers to paragraphs (a) and (b) are exclusive of the inherited obligation to pay off £150,000 in respect of 1889? Yes. There were £132,929 spent on the General Post Office under the General Post Office Suspense Account.

738. Are the figures given by you in questions (a) and (b) exclusive or inclusive of the transfer on account of the accrued interest? Both inclusive of the amount of accrued interest.

739. You include the accrued interest credit of £341,000 in connection with 1894 and prior loans? Yes.

740. And you include all the special credits *re* accrued interest? Yes. As regards the answer to paragraph (c), this is a mere matter of adding on £150,000. The £150,000 was not taken out of the Current Account, but from the balance at credit of Railway Loan Redemption Fund. If you remember, I said that there were £206,700 on 30th June, 1897, outstanding under 31 Victoria No. 11, and when this sum matured the late Treasurer asked the Auditor-General whether he could get any assistance from the Railway Loan Redemption Fund, 53 Victoria No. 24. It was suggested that the money could be temporarily used, but on the understanding that the money must be repaid to the Railway Loan Redemption Fund.

741. But there was a specific amount taken? Yes, £150,000. If the late Treasurer had paid that £150,000 out of Current Revenue for 1898–9, the balances would have been influenced (that is reduced) accordingly.

742. Would not the best way to answer the paragraph be to say that the amount was £150,000? That is [*Appendix O 2*], if the £150,000 had been paid from Revenue the debit balance would have been increased to a like extent.

743. As regards paragraph (d), you can only answer it in a general way, and by referring to answers to previous question? Yes, and by reference to *Appendix N 2*.

744. *Chairman.*] Question 27 runs as follows:—“The amount of the credit balance on the Consolidated Revenue Fund Account Current on the 30th June, 1896, 30th June, 1897, 30th June, 1898, and 30th June, 1899?” I take that to mean the Treasury Account Current. We have a Current Revenue Account which I have explained. The amount of the credit on the 30th June, 1896, was £476,530 1s. 10d.; on the 30th June, 1897, it was £114,444 16s. 6d.; on the 30th June, 1898, it was £122,211 1s. 10d.; and on the 30th June, 1899, it was £116,523 5s. 8d. (*Appendix P 2*.)

745. That includes the Treasury bills, £1,174,000? Yes.

746. We now take Question 28: “Whether these balances represented cash in the Bank, and if so, which of them?”—what is your answer to that? Not any of the amounts represented cash in the Bank.

747. Question 29 reads thus: “The actual condition of the Consolidated Revenue Fund Account on the dates specified above, as disclosed by the Bank balances”? I would like to pass over that question for the present.

G. H. Pitt,
Esq.
30 April, 1900.

present. I have prepared a statement giving the cash balances and the ledger balances for the year ending 31st December, 1894; the same information up to 30th June, 1895; the same information up to June, 1896; the same information up to 30th June, 1897; the same information up to 30th June, 1898; and the same information up to 30th June, 1899; also for the period ending 14th September, 1899—three days before the former Ministry went out—when there was an independent audit. And I have given the information up to 31st January and 28th February, 1900, which is the latest I can give, as I have not the London accounts for the later months. I would like that question to stand over till I can bring in the answer to it in connection with other matters. (*Appendix Q 2.*)

748. We now take Question 30: "In the event of a discrepancy between the ledger balances and the Bank balances, to what was this due; and whether the system under which such differences are possible may be correctly described as a 'cash basis' system?" There is a discrepancy. The discrepancy is due to the difference between the Appropriation and the Cash Account. As regards the cash basis system, I contend that the provisions of the Audit Act Amendment Act have never had full play. No attempt has been made by the Treasury to establish a Current Revenue Account and a Deficiency Account in the Treasurer's statement of Public Accounts. I must add, however, that such division is shown in the Ways and Means statement, but the figures given in this document are not subject to audit; hence the term "cash basis" has certainly a limited interpretation when taken in connection with the system of working the existing accounts. In the Public Accounts of the Treasury there is no marked change in the statements. The continuity of the old system was maintained—there is no dividing-line in any way. But the Auditor-General adopted a dividing-line, and he has gradually improved the Account annually, with the result that the 1898-9 statements are very comprehensive. Will the Committee allow me to emphasise the difference between the Cash Account and the Appropriation Account?

749. *Mr. Yarwood.*] Yes? The Appropriation Account is regulated by Parliament. The Cash Account is regulated by exigencies that arise. For instance, any expenditure that takes place must be debited to the Cash Account at once, but in regard to Appropriation Account it is a matter as to whether the appropriation is one of the year or belongs to the succeeding financial year. Take the 1897-8 item of £193,726, over which there has been so much controversy, the amount transferred to the Bank of England. That would affect the Cash Account, but under the present conditions it does not affect the Appropriation Account of 1897-8. We must not overlook the fact that the Treasury could not include the amount under the present appropriation system in their accounts for 1897-8, as fourteen months' appropriations are involved; that is to say, the two corresponding months of the previous year's transactions were posted to the same account during the earlier part of the year. The Cash Account is quite a different matter. It is irrespective of what year the appropriation belongs to.

750. *Mr. French.*] Is the Cash Account a true representation of the state of affairs? No, not under present conditions; I am going to show that.

751. From your remarks just now I should assume that the Cash Account is no criterion whatever? The Cash Account is no criterion. The cash of £116,523 5s. 8d. on 30th June, 1899, had no metallic basis.

752. It looks to me by your explanation a suspense account, pending the adjustment of these various matters with the appropriation later on, or at some time, I presume? Through the non-inclusion of the London accounts and other matters, the £116,000 does not represent the true state of affairs. If you would kindly proceed to Question 31 I will take up this matter later on.

753. *Chairman.*] We will take Question 31: "Whether it is correct to hand over large interest payments to the Bank of England in the month of June, and bring them to account on the 1st July following;—whether the Commissioners would recommend the London payments in May and June to be included within the financial year during which they actually are made;—and whether the Special Suspense Accounts should be closed up?" I will take the first sentence of the question first. Liabilities of interest on inscribed stock mature on the 1st July each year. To meet these payments the Government of New South Wales is required, under agreement with the Bank of England, to pay to credit of that institution ten days, or thereabouts, before the date of maturity the full amount of interest payable. The Bank places this sum to an account of its own called the Dividend Account. The money consequently passes absolutely from the control of the Government of New South Wales, and the Audit Department accordingly debits the amount as a final payment against the Public Account. The matter of the year of appropriation does not affect the entry whatever. The appropriation account is quite distinct from that of the cash account. Unfortunately, the distinctive basis of each account has not been recognised, hence the confusion. As to the second part of the question, I strongly recommend that a common financial year—1st July to 30th June of year following—be adopted in Sydney and London. I intend to deal with this question more fully when submitting certain reforms I consider necessary in the existing system. As to the third portion of the question, I would say that the Special Suspense Accounts should certainly be again regarded as an ordinary item of the Consolidated Revenue Fund, whence they were, in my opinion, illegally withdrawn. I may quote the two sections of the two Acts in question. I will read section 5 of the Centenary Celebration Act, 51 Victoria, Number 9, and section 6 of the General Post Office Approaches Act, 53 Victoria, Number 13. [*Sections read.*] The Auditor-General has followed the law, and will not budge one iota in connection with the mode of presentation adopted in these accounts. I have always considered that these accounts were placed in Special Suspense to relieve a sick revenue balance, and, had opposite conditions obtained, the operation would not, I believe, have been thought of. The past history of these accounts partly confirms this supposition, for the Centennial Park Account was opened during 1887 as a Revenue Account, and continued as such till 1894 when it was placed in Suspense by the late Government. Similarly the General Post Office Resumption Account was opened in revenue in 1890, and placed in Special Suspense by a previous Administration in 1892. The third Suspense Account, "Advances to General Loan Account," was opened as a Revenue Account during 1895, and placed in Special Suspense during 1895-6. As a matter of fact not one penny of these advances came from Revenue Account but from General Trust Funds, and the full amount still remains unadjusted although the money has been wholly spent on loan services. As the £1,500,000 has not been covered by securities it cannot appear as liabilities of public debt. Hence the total debt liabilities of the Colony are short by the amount stated (and also £50,000 advanced during 1897-8 by the Curator of Intestate Estates and spent in a like manner).

754. That is, the three sums of £500,000 each? That is it.

755. We now take Question 32 :—“ Whether the present system of keeping the public accounts is a good one; and whether the Commissioners can suggest any improvements in the method of keeping the accounts, or in their presentation, so that these may be more easily comprehended by the public”? I consider the present system which has been in vogue, with slight alterations, during the last twenty to thirty years is faulty, and out of touch with present requirements; while the mode of presentation of the accounts for public scrutiny is open to considerable improvement. I desire to submit to the Committee an improved system which I am convinced is practical and simple, and the results will be easily comprehended by the public. In fact, the system proposed will, I take it, satisfy all current demands for reform. I have here an analytical statement which I will hand in :—

G. H. Pitt,
Esq.
30 April, 1900.

Analysis of the Balances.

The “ Credit balances on the 30th June, 1899,” £7,552,570 11s. 3d., as given in the Treasurer's General Summary prefacing the details of his Receipts and Disbursements at page 3, are apt to be read as Cash Balances, being in the General Summary apparently the result of Cash Receipts and Payments, while the fact is that more than three-fourths of their amounts exist in the shape of securities at the Credit of the Trusts and at the Debit of the Government.

The results of an Analysis of the Treasury Ledger Balances will be found in the following four tabular statements :—

- (1) Ledger Balance of each Account on 30th June, 1899.
- (2) Cash ” ” ” ” as per Ledger.
- (3) Bank ” ” ” ” ”
- (4) Cash ” ” ” ” as adjusted.

The “ Ledger Balances” making up the total balance on the “ General Public Account”—that is to say, the credit balance of the aggregated balances of the Consolidated Revenue Fund, the General Trust Funds, the General Loan Fund, and the Special Trust Funds—on the 20th June, 1899, amounted to £7,552,570 11s. 3d., according to the subjoined statement, which comprises the data whereupon the Treasury figures may be reconciled with the Bank Balances :—

Statement (1).

* Exclusive of £150,000, instalment towards redemption of Treasury Bills, which have no place in this Statement.

† To harmonise with the Bank Balance of the General Loan Account, the £1,500,000 advanced from General Trust Funds during 1895 will be, in the subsequent statements, added to the £1,421,898 3s. 11d., shown above, and the General Trust Funds Balance, £8,610,703 19s. 6d., reduced to a like extent.

The aggregate Balance is composed of Cash and Securities, the face value of the latter being fully three times that of the cash portion. Excepting Securities and fixed deposits to the value of £41,333, the Securities represent Government Stocks, Debentures, and Treasury Bills, issued to provide money for Loan Services and Revenue Deficiencies, and sold to the Trusts in the General and Special Trust Funds Accounts. As these Trust Funds are placed under the care of the Government, and in the custody of the Colonial Treasurer, for the benefit of various agencies, they are *not* properly *Credits* in the general acceptance of the term, but represent so many *Liabilities* against the Government.

Those *Liabilities*, so far as they are represented by Government Securities for moneys borrowed from the Trust Funds, appear naturally in their place as a part of the General Public Debt of the Colony. The Colonial Treasurer, as Administrator or Trustee of the Trust Funds and the Custodian of the Securities, is entitled, of course, to take credit in his accounts as such Trustee for the amount of Securities which he holds for the moneys he has lent to the Government; but the Public Account, as such, is not also entitled to take credit for those Securities against its liabilities for the Public Debt, inasmuch as the money for which the Securities in question were issued had been expended on the Services for which it was borrowed, and would have to be replaced if required for the purposes of the Trusts in emergencies.

When it is seen, from following Statement, that the amount of Trust Funds investments has reached the large sum of £5,698,825 13s. 2d., of which £41,333 represent “ Miscellaneous Securities other than Government,” and £5,657,492 13s. 2d. represent Government Securities, all of which, except the former amount (£41,333) has been expended in connection with Loan Services and Revenue Deficiencies, and yet appear as a part of the Credit Balances in the Public Accounts, *it becomes an important question whether the General Trust Funds Account should not be shown as a distinct branch of the “ Public Account” as kept in the Banks, in the same form as the General Loan Fund Account is now shown, but always reckoned, nevertheless, as directed by the Audit Act, as the one “ Public Account.”*

G. H. Pitt,
Esq.
30 April, 1900.

The Ledger Cash Balance and the Face Value of the Securities on 30th June, 1899, of each Account were as follow :—

Cash Credit Balance, in Sydney and London, 30th June, 1899, available for Ordinary Operations			1,268,106 11 6

* See note marked (†) on page 41.

It will be seen from the foregoing statement that after the face value of the securities had been eliminated from the Ledger Balances, £7,552,570 11s. 3d., there remained a Cash or Working Balance of £1,853,744 18s. 1d. This amount includes the Special Trust Funds which are not subject to issue under warrant, more particularly the Supreme Court moneys which are not under the control of the Government. In addition to this amount further deductions on account of payments in London are necessary, in all a total of £585,638 6s. 7d., thus reducing the available balance to £1,268,106 11s. 6d., which amount represents the whole current balance at the close of the year, available to be carried forward, for the ordinary operations of the succeeding year.

The Sydney banking business is transacted by the Bank of New South Wales, the Commercial Banking Company of Sydney (Ltd.), and the City Bank of Sydney; and the "London" business by the London and Westminster Bank and the Bank of England. The operations of the last-mentioned Bank are confined to the Inscription and Negotiations of Loans and the management of half-yearly dividends of Inscribed Stock, while the London and Westminster Bank transacts the ordinary London business in connection with the Public Service of the Colony.

The following statement (3) shows the Localities and Institutions where the money was lodged. The amount lodged in Sydney Banks and Treasury was £392,734 2s. 7d., and in London Banks £875,372 8s. 11d.:—

I will now read a memorandum which I have prepared as part of my answer to Question 32. It is as follows :—

Review of the Condition of the Finances as disclosed by the foregoing analysis :

The ordinary financial operations in connection with the Treasury are transacted under the following accounts :—The Consolidated Revenue Fund, the General Trust Funds, and the General Loan Fund. In connection with the Consolidated Revenue Fund there is a small special account called the "Towards Erection and Maintenance of Public School Buildings, &c., Account, 61 Vic. No. 20"; and likewise side by side with the General Loan Fund there is a Special Loan Account called the "Advances to Settlers Account Act No. 1 of 1899." The aggregate cash balance of these funds—that is, the cash in hand on 30th June, 1899—was £1,268,106 11s. 6d. The distribution to the respective accounts is given in subjoined statement :—

Total, London				875,372	8	11
Total, Sydney and London, 30 June, 1899				£1,268,106	11	6

The

G. H. Pitt,
Esq.
30 April, 1900.

The total cash available for the ordinary operations of the Government in Sydney and London on 30th June, 1899, was, therefore, £1,268,106 11s. 6d. If from this sum be taken the £287,156 19s. 1d. at credit of the two Loan Funds, the balance available for the Working Account of the Consolidated Revenue Fund and General Trust Funds (or, as it is officially called, the Public Account) was £980,949 12s. 5d. From the following statement it will be readily seen that the £980,949 12s. 5d. belonged wholly to the General Trust Funds and the Public Schools Account, 61 Vic. No. 20, and also that withdrawals to the extent of £781,591 12s. 7d. had taken place from the two funds mentioned to meet payments for Revenue Services:—

	£	s.	d.	£	s.	d.	£	s.	d.
Uninvested balance—General Trust Funds, as per Appendix U 2 ...	1,730,432	6	4						
<i>Less—</i>									
London payments on account of Trust Fund services, May and June, 1899... ..	46,016	16	6						
	1,684,415			9	10				
<i>Add—</i>									
Credit balance, "Public School Account," 61 Vic. No. 20				78,125	15	2			
Total Ledger uninvested balance of General Trust Funds and Public School Account, 61 Vic. No. 20							1,762,541	5	0
Cash in hand of General Trust Funds and Public School Account, 61 Vic. No. 20							980,949	12	5
Shortage in cash caused by withdrawals on account of payments for Revenue services							£781,591	12	7

On reference to Appendix U 2, which shows "Distribution of Trust Funds on 30th June, 1899," it will be found that the amount £1,730,432 6s. 4d. is the residue of the "Uninvested" balance after allowance had been made for the £1,500,000 advanced to the General Loan Funds during 1895.

Amongst the many accounts which comprise the General Trust Funds, the "Savings Bank of New South Wales Deposit Account" is second in importance, so far as the volume of the Credit Balance is concerned. The account was first opened during February, 1891, under Executive Authority. The deposits were made under section 17 of the Savings Bank Act of 1862, and it is quite *optional* for the Trustees to *deposit*, and for the Colonial Treasurer to *accept*, these moneys. As no claims can be made against the account, other than the liability to repay the Trustees of the Savings Bank, it follows that these Deposits were used to supplement the Consolidated Revenue Fund balance, and to cover the £1,500,000 advanced to General Loan Fund during 1895. On the 31st December, 1891, the amount of deposits was £590,000; on the 30th June, 1899, the amount at credit had increased to £2,415,000; and lately further additions of £25,000, £50,000, and £150,000 respectively have been made, making a total of £2,640,000 advanced.

The Cash balance on the 30th June, 1899, of the Public Account, as previously stated, was £980,949 12s. 5d. At the same time the amount of these deposits (exclusive of the £1,500,000 advanced to General Loan Fund), included in the aforementioned balance, was £915,000. The £980,949 12s. 5d. was the only money available at that date to meet payments on account of Revenue and General Trust Fund services, and of this amount £915,000 represented deposits obtained from the Savings Bank of New South Wales.

For Banking purposes the balance of the General Trust Funds (included in which are the deposits specially reviewed) is amalgamated with that of the Consolidated Revenue Fund, and consequently the aggregate balance becomes a drawing account for either fund.

Large remittances to London are made from this "aggregate balance" to meet liabilities of Revenue and Trust Funds. Annual payments in London in connection with the Revenue Account exceed two millions, while payments on account of Trust Funds services do not reach two hundred thousand. The Trust Fund balance, both in Sydney and London, therefore, plays a more important part in the Revenue operations than appears on the surface, and deposits like those of the Savings Bank of New South Wales are a convenient medium for keeping the banking account (of the Public Account) in credit. There are many disadvantages under the system under which the accounts are worked, and I think the changes which I propose to suggest would result in the adoption of a system more in touch with modern requirements, and which would, I am convinced, satisfy all current demands for reform.

One result, and a very important one, of the analysis is that it clearly shows that the Treasury Credit Balance on the 30th June, 1899, £116,523 5s. 8d. (page 8), had no material backing—no metallic basis. On the contrary, the analysis shows that the combined balance of the General Trust Funds and the Public Schools Account, 61 Vic. No. 20, had been used to the extent of £781,591 12s. 7d. for liabilities of Revenue.

Apparently

Apparently the present system under which the accounts are presented requires remodelling, at least to the extent that when the figures showing the balance of the Consolidated Revenue Fund at the close of the financial year are established, they will be a reflex of those given in the Bank certificates (less unrepresented cheques). Past experience has disclosed that a simple system covering all requirements could be initiated; but before any reforms can take place the General Trust Funds must be placed under a separate and independent administration (this suggestion does not imply that the Treasurer will be debarred from using the funds; on the contrary, the new system would provide ample facilities for obtaining advances), a distinct banking account established in Sydney and London for the Consolidated Revenue Fund, and a common financial year observed in Sydney and London. If such reforms were adopted the results would be as foreshadowed above, that is, that the Treasurer's Revenue Balance would be verified by the certificates of the General Managers of the Banks transacting the Government business; an independent check would be always available to certify as to whether the year's operations had closed with a cash credit or otherwise; and the uncertainty which exists as to the true condition of the Consolidated Revenue Fund would be removed."

G. H. Pitt,
Esq.
30 April, 1900.

Deficiency, Consolidated Revenue Fund, 30th June, 1899.

The local Cash Overdraft of the Consolidated Revenue Fund on 30th June, 1899, was £579,945 7s. 7d. These figures are not affected by the transactions during May and June, 1899, in London, as it is the practice of the Treasury to recognise the Financial Year in London as ending on 30th April. For very many years it has been the practice of the Auditor-General to include the operations of May and June in the transactions of the year under review in order to present the actual condition of the Revenue, and of latter years to allow a reconciliation of the Revenue Balance with the Bank Balances. As previously suggested, a common Financial Year should be observed for Sydney and London. To effect the desired change it would be necessary to cable out *in globo* particulars of May and June operations, and the amounts posted in that form. The totals could be distributed amongst the sub-heads of Accounts when full particulars had been received by mail.

* The Actual Deficiency on 30th June, 1899, was £2,959,175 12s. 7d., made up as follows:—

	£	s.	d.	£	s.	d.
Cash Overdraft	579,945	7	7			
London Payments:—						
Payments, March–April, adjusted in Sydney, August, 1899	1,156	13	5			
Net payments, May and June, 1899, adjusted in Sydney, July–August, 1899	200,489	11	7			
				201,646	5	0
Actual Cash Overdraft, 30th June, 1899						781,591 12 7
Treasury Bills Current, 30th June, 1899:—						
Deficiency, 1886 and previous years, 53 Vic. No. 9 ...	1,152,884	0	0			
Deficiency to 30th June, 1899, 59 Vic. No. 22	1,024,700	0	0			
						2,177,584 0 0

* Actual Deficiency, 30th June, 1899, to be made good in the future £2,959,175 12 7

* Exclusive of Payments by the Bank of New South Wales to the amount of £11,618 17s. 8d. on account of Revenue services—not brought to account on 30th June, 1899.

756. *The Witness.*] I would also like to read to the Committee certain suggestions which I have drawn up in connection with proposed reform of the financial system, they are as follows:—

1. A Trust Fund Act to be passed, vesting the funds in trustees—say, as in Victoria, the Treasurer, the Speaker of the Legislative Assembly, and a Committee of the Lower House, called, say, the Committee of Public Accounts.

(In connection with that Act I would like to say that for the last five or six years I have been a strong advocate for a Trust Fund Act, and when the Auditor-General put the Victorian Act into my hand—which was passed in December, 1897—I found that it covered the whole ground of the reforms I had been advocating for five or six years. I read the Act carefully, and when in Victoria lately on private business I took the opportunity to see a leading official of the Treasury, who administers the Special Trust Fund. I was able to go into the matter with him, and I am convinced that what I am suggesting to the Committee are really up to date suggestions.)

2. Expunge from the General Trust Funds all bookkeeping accounts of the Consolidated Revenue Fund and the General Loan Fund.

3. Place the accounts expunged to Advance Accounts. If the money had been originally advanced from Revenue place it to Revenue Advance Account; if from Loan Fund place it to Loan Advance Account.

4. All cash and securities of the General Trust Funds to be transferred to the control and keeping of the Trust Fund Trustees (including the deposits of the Government Savings Bank), and any moneys held by the Treasurer under the account, "Deposit Account, Savings Bank of New South Wales." (Bank in Barrack-street.)

5.

G. H. Pitt,
Esq.
30 April, 1900.

5. The Trust Fund Trustees to open a banking account in Sydney in, say, the Bank of New South Wales or with the Commercial Banking Company of Sydney, the account to be drawn upon by cheques signed by two of the trustees and countersigned by the Auditor-General. (That is the Victorian principle.)

6. The Treasurer to transact, as heretofore, all business in connection with ordinary receipts of, and payments from, the General Trust Funds; to carry on such operations a Treasurer's Banking Account to be opened in any of the Banks of issue transacting Government business by advances obtained from the trustees. The Treasurer should be required to adjust the Trust Fund Account periodically, and especially on the last day of the financial year, when the account should be absolutely closed. A fresh account to be opened on the first day of each financial year.

7. Any Trust Fund operations in London to be transacted through the Consolidated Revenue Fund Banking Account at the London and Westminster Bank, and the adjustment (by repayment to the Consolidated Revenue Fund) to be effected locally when cable and also mail advices have been received from London.

8. If necessary, the Trust Fund Trustees might advance to the Treasurer moneys in aid of Revenue Account or Loans Account, but on the condition that all advances will be repaid before or on the last day of the financial year, so that the balance shown will not be inflated by any extraneous credit. No difficulty in connection with the repayments can arise, as under the banking arrangement suggested cash might be withdrawn from the Revenue or Loan Account, notwithstanding such accounts had been overdrawn. In the case of the Advance to Loans it might subsequently be found necessary to cover the amount by securities, and thereby embody it in the public debt.

9. The course suggested in paragraph 8, however, should be avoided when possible, and, in view of "direct aid," a system similar to that adopted in connection with the Supreme Court moneys (Special Trust Funds) lodged in the Bank of New South Wales, namely, that the trustees place a bulk sum in the Bank at Trustees' Current Account as a set-off against possible overdrafts in Revenue or Loans. Under such a system the true condition of the balance of the Consolidated Revenue Fund or the Loans would always be disclosed by the daily bank-sheets, as no inflations by extraneous credits could take place. The amount at credit of a Trustees' Current Account could be so regulated as to allow of the Revenue or Loan Bank Balances being largely overdrawn without one penny of interest on overdrafts being payable to the Banks. The Government to allow Bank current rates of interest on deposits of the trustees in compensation for placing these sums at non-interest bearing account (Current Account).

10. The trustees should be empowered to take over all moneys under the control and in the possession of the Master in Equity, the Master in Lunacy, the Curator of Intestate Estates, the Registrar of Probates, and trust moneys held by any other officers of the Supreme Court, also any cash and securities held by the Public Works Department as deposits on tenders; in fact, all trust moneys held by officers of the Service generally.

11. The Trustees to be empowered to take money on deposit for long periods or otherwise, according to the discretion of the trustees, from the public under direct authority of wills, or from executors or administrators, and be empowered to pay current rates of interest, although it might prove judicious to fix the maximum rate payable.

12. All sinking funds in connection with the redemption of loans, Government or municipal, to be placed under the control of the trustees.

13. By placing the Trust Funds under trustees the anomaly of the Treasurer's dual position of debtor and creditor would be removed. The good results which would accrue by the adoption of the reform suggested cannot be too much emphasised, as a disturbing factor, which has been largely responsible for what I consider the misleading figures established, would be eliminated from the balances.

14. The funds held by the trustees would always provide a substantial reserve for the Government to obtain local aid whenever required, and these funds would prove a valuable adjusting medium in the loan borrowings, especially on the London market. The trustees could always come to the rescue when there was a tightness in the Home market. Adjustment of advances could be subsequently made when the terms of the London market for loan issues were acceptable to the Government.

15. The trustees to invest surplus money either (a) in purchase direct from Government of securities of short or long dated currencies; (b) by purchase in open market, care being taken that no loss of principal accrues by subsequent redemption at par; (c) by making advances to Treasurer during any financial year. Under the banking system suggested, however, such advances would hardly be necessary; (d1) by placing large sums at current account in Banks of Issue transacting Government business (this account must be an item, or form part of, the General Banking Account); (d2) by placing at fixed deposit in Banks of Issue transacting Government business; (e) on mortgage of approved real estate, but on very stringent conditions.

Consolidated Revenue Fund.

1. A Current Revenue Account similar to that shown in the Auditor-General's 1898-9 report to be adopted.

The old practice of bringing forward the balance of the previous year's operations to be discontinued, and the balance at the close of the financial year—if a credit, and in excess of £150,000—to be allotted, say, as follows:—

- (a) £150,000 in payment of annual instalment in redemption of Treasury bills.
- (b) Moiety of remaining balance transferred to Trust Fund Trustee Account in payment of cash owing by Revenue to General Trust Funds (*the amount of which on 30th June, 1899, was £781,591 12s. 7d.*).
- (c) And the remaining moiety of balance in payment of reduction of Public Debt, by payments direct, or by placing such to credit of a Sinking Fund, or, if considered advisable, to be placed to a separate account and ear-marked for expenditure on Public Works.

If

If the balance be a debit, the whole amount to be adjusted by a transfer of an equal sum from the Deficiency Revenue Account. The Current Revenue Account of the following year would, therefore, start with a clean sheet, or, to use a popular phrase, will start with a "clean slate." The balances of the Current Revenue Account in London on the last day of the financial year to be "cleared" through the Sydney banks and their London offices.

G. H. Pitt,
Esq.
30 April, 1900.

2. The gross and net revenue under each sub-item to be given, as shown in the Victorian accounts, thus:—

Gross Revenue.	Refunds.	Net Revenue.
(1.)	(2.)	(3.)

The figures in column (2) can be supplied by the Department of Audit.

757. *Mr. French.*] What do you mean by refunds? Revenue and receipts credited in excess or error legally returnable as refunds of Duties, Railway Rebates, &c., or Temporary Credits like Customs drawbacks.

758. Queensland shows the cost of obtaining the revenue per Department, which is a very good idea? South Australia, I think, has the best system. Their accounts show that very clearly. I am a strong advocate for this column of Revenue Refunded. The Department of Audit prepares annually a statement of Revenue Refunded under the four main divisions of Revenue—that is, Taxation, Land Revenue, Receipts for Services Rendered, and General Miscellaneous Receipts. I might respectfully suggest that the Committee recommend that we should follow the Victorian system, which is such an excellent one. For example, I cannot tell you how much we refund on spirits, but the Victorian accounts can show you that, and refunds under any sub-item. However, the balance of my proposed scheme is as follows:—

3. Under the conditions mentioned in paragraph 1, no overlapping of the operations of one year with the other could take place, and each year's accounts would be placed on a distinct basis.

4. The Revenue Accounts now worked in Trust Fund to be transferred to the Revenue. (An Advance Account, showing the amount owing to the Revenue, is established annually, and shown as an Appendix to the Auditor-General's Report; but the Revenue Advance Accounts in Trust Funds cannot under the present system be included in such statement.)

5. A common financial year—1st July of one year to 30th June of the following year—to be observed in Sydney and London.

6. Banking Accounts in connection with the Current Revenue Account to be opened in Sydney and London.

7. In Sydney at each of the institutions now conducting banking business (it would be inadvisable to increase the number beyond the present three); in London and Westminster Bank, and Bank of England.

7A. (Revenue) Drafts on London to be debited to Current Revenue Account.

8. Transactions—Consolidated Revenue Fund, Trust Fund, and Loan Fund—in London during May and June to be cabled out *in globo*; those of May as soon after the month has closed, and those of June as soon after 3 p.m. on the 30th June as possible. London time being 10 hours 15 minutes later, this would cause little delay in the publication of returns—a drawback, if drawback at all, not worthy of notice. If practicable it might be arranged that operations be suspended in London during the 30th June—that is to say, the receipt and pay books of the last day be closed for that one day only, or if such be found impracticable, any adjustments might be effected in the local banks before 10 o'clock on the morning of the 1st July.

9. To complete the desired information from London at the close of the financial year, it would be necessary to cable out the balances on the 30th June of the Bank of England, and the London and Westminster Bank, and the amount of remittances brought to account by the latter Institution during May and June. (I would confine the remittances (from Sydney to London) to London and Westminster Bank as at present.)

10. The total receipts and the total payments to be cabled *in globo*, and the totals inserted in the respective accounts (Consolidated Revenue Fund, Trust Fund, and Loan Fund) in the Treasurer's statement under the head of, say, "Receipts (or Expenditure) in London, May (or June), to be apportioned to sub-heads of accounts when the full advices have been received by mail."

11. An officer of the Department of Audit or Treasury, well experienced in appropriations and accounts generally, to be attached to the Agent-General's staff in London to apportion the receipts and expenditure to the various heads of Revenue, Trust and Loan Accounts, so as to allow the *in globo* figures to be established as accurately as possible. The local officers would subsequently check the totals as established, and, if found necessary, the allotments might be modified, and the balances of the respective funds varied accordingly.

12. A Deficiency Revenue Account to be operated similar to that shown in the Auditor-General's Report for 1898–9; this account to be regarded as correlative with the Current Revenue Account. The account, if kept on the basis suggested, will always disclose the true condition of the Revenue Deficiency, as well as being a purifying medium for the Current Revenue Account. [See paragraph (1).]

13. A Deficiency Revenue Account to be opened in the Bank of New South Wales, or with the Commercial Banking Company, *in Sydney only*.

14. If the system suggested were followed, the Cash Balance on the 30th June of the Current Revenue Account (as well as the Deficiency Account), as stated by the Treasury and Audit Department, could always be verified by the certificate of the General Managers of the Sydney Banks and the London Bank statements—that is to say, the balances shown on the certificates of the 30th June of the Managers of the Bank of New South Wales, Commercial Banking Company (Limited) of Sydney, and City Bank of Sydney, added to the balances shown on the Bank sheets of the Bank of England and the London and Westminster Bank, together with the amount of remittances in transit, which could be established from data obtained from the Sydney and London Bank sheets would, in the aggregate, equal the balance as shown at credit or debit of the Consolidated Revenue Fund in the Treasurer's statement. This would establish

G. H. Pitt, Esq.
30 April, 1900.

establish an independent check which would be always available to certify as to whether the year's operations had closed with a cash credit or otherwise. The uncertainty which exists as to the true condition of the Consolidated Revenue Fund from a cash standpoint would, under the proposed arrangement, be removed.

759. *Mr. French.*] This is, of course, on the purely cash basis, irrespective of any appropriations of the years to which it belongs? As a matter of fact, appropriation and cash accounts would be practically synonymous terms. It will be the true cash basis system. There will be very few payments that can be thrown out of the year if this course were followed.

[Adjourned till Tuesday, 1 May, 1900.]

NINTH DAY.—TUESDAY, 1 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

George Henry Pitt, Chief Examiner, Department of Audit, further examined:—

G. H. Pitt, Esq.
1 May, 1900.

760. *Witness.*] I would like to correct an answer I gave to a question yesterday, or rather to qualify it. When dealing with Question 26, and giving an answer to the sub-heads (a), (b), and (c), the Committee may remember that I said the deficiency was £22,017 18s. 8d. I put before the Committee my ideas in regard to the interpretation of certain sections in the Treasury Deficiency Acts, 53 Vic. No. 9, and 59 Vic. No. 22. Those sections really imply that the redemption of the Bills is absolute. I am referring to the £150,000 a year. We said that the increase in the deficiency between 31st December, 1894, and 30th June, 1899, was £22,017 18s. 8d.; and if the statutory obligation in connection with the annual redemption of these Bills had been met—and I contend it should have been met—there would have been a deficiency of £622,017 18s. 8d. I wish to qualify the answer I gave, and to say that the £600,000 should be taken into consideration in a similar manner to that adopted in answer to Question 12.

761. *Mr. French.*] You are now referring to Appendices H 2 and O 2? Yes. The £622,017 18s. 8d. is inclusive of everything, but no allowance has been made for proceeds of the Bills in the figures.

762. If you eliminate the special credit for accrued interest it makes the Deficiency greater by that amount? Yes.

763. It is inclusive of any entries passed in connection with the Treasury Bills Deficiency of 1895;—that is, payments on account of 1895 and previous years? Yes. Having made that clear, I now desire to bring under the notice of the Committee the Bank balance book, which is a reflex of the information supplied by the Bank certificates of the general managers of the Sydney Banks transacting Government business. The ordinary Government business is transacted under two banking accounts—the Public Account (which represents the Consolidated Revenue Fund, and the General Trust Funds amalgamated), and the General Loan Fund. The balance of the General Loan Fund is always exhibited in the Bank sheets. As to the Revenue, its (Dr.) balance is coupled with the General Trust Fund (Credit); its true condition is, therefore, clouded. If a separate Banking account were adopted for the Revenue Fund, the unsatisfactory condition would always be uppermost, and under the proposed Banking arrangement, no extraneous or abnormal credits could hardly take place.

764. What do you mean by an extraneous credit? An extra credit, which, I consider, simply inflates the balances and cloaks the true position.

765. Do you mean a credit not recognised by law? Temporary credits. As to the law, that will not make the Colony one penny richer or poorer. And as for keeping books according to law, I may say there is also another side, the practical side—and that is the side we are now dealing with. We have kept the books according to the practical side (and with a due observance of the law), and I am going to show the Committee that on the 14th September, three days before the present Government took office, and also on the 31st January and 28th February of the present year, the Revenue Account, from a cash standpoint, was overdrawn to the extent of over a million,—that is to say, that, including the two Special Suspense Accounts, and the London Payments to date mentioned, and Sydney Payments by the Bank of New South Wales, an inroad of over a million (exclusive of Treasury Bills) had been made into the General Trust Funds to meet Revenue Payments.

I will now continue with the remainder of the scheme which I outlined in my evidence yesterday. I completed my suggestions as to reforms in the present system in connection with the Consolidated Revenue Fund and the General Trust Funds. I have a few suggestions here as regards the General Loan Fund. They are as follow:—

1. A separate Banking Account to be opened in London at the London and Westminster Bank, the Sydney Account to be carried on as heretofore—that is, at the Bank of New South Wales.

There is no Loan Account at present in England. All payments on account of loans are made from the Public Account in London, which consists of the Consolidated Revenue Fund and the General Trust Funds, and when advices are received by mail the adjustments take place locally. Under the scheme which I suggest that will be done away with by the establishment of a Loan Banking Account in London.

1A. Drafts (Loan) on London to be debited to General Loan Fund.

2. A common financial year, from the 1st of July of one year to the 30th June of the following year, to be observed in Sydney and London.

3. A Loan Advance Account to form part of the General Loan Fund, and to be worked on similar lines to that of the Revenue. All Loan Advance Accounts now included and operated upon in General Trust Funds to be transferred to the Loan Advance Account.

4. An Advance Account, similar to that shown for Revenue, and included in appendices to the Auditor-General's report, to be established. The total shown would represent the amount of temporary advances requiring adjustment. Adjustments may be effected by the payments being converted into finals, or by repayments in cash.

5. The Loan Advance Account would purify the General Loan Fund proper, as, by means of the former, all temporary payments would be kept out of the Account Proper—that is to say, all payments embodied in the Account Proper would be *final*.

6. Cable out, *in globo*, May and June transactions. For further information, see paragraphs 8 and 9 the Consolidated Revenue Fund remarks.

7. A lump vote, Treasurer's Loan Advance Account, similar to the Treasurer's Vote, in Revenue to be taken under a Loan Appropriation Act to enable the proper working of the Advance Account. The Treasurer's Loan Advance Account would differ from its prototype in Revenue by the fact that all expenditure therefrom would be on account of Services in connection with loan votes authorised.

8. The wording of the votes in Loan Appropriation Acts to be definite, and no drag-net terms to be inserted, such as "etc." The general sub-headings also to be so drafted as to be circumscribed in interpretation, as in the past Appropriation Acts under these headings much expenditure on services of minor importance has been provided for, and consequently the payments could not be challenged.

766. *Mr. Yarwood.*] I believe that, as a matter of law, "etcetera" is not worth a snap of the fingers? That is so in my opinion. If Parliament chooses to allow fittings and furniture to be included in Loan Estimates, we cannot prevent payment being made for such articles. We have protested against the practice, and have asked that such items shall not be inserted. I believe I am giving the Treasury proper credit in saying that in the last Loan Act, that of 1899, these objectionable words to a large extent were dropped out, as there are very few "etceteras" and very few drag-net headings. So evidently some influence has been brought to bear to limit payments on Services of this class from loans. But there is not the slightest doubt that a large expenditure which should have been against Revenue has been placed under the head of Loan Services, thus relieving the Revenue of legitimate charges; consequently the Revenue Balance has gained accordingly. I will now add to the suggestions I have already made in connection with an up-to-date Revenue System. [*Paragraph 2 of suggestions under this heading quoted.*] The Revenue Accounts Current consists of the Accounts Nos. 1, 2, and 3, as already referred to. I will now put in some statements which will further illustrate the system proposed in connection with the Banking arrangement. (*Appendix R 2.*) I have also here a strip of paper ruled to show how the General Banking Account would stand under the new conditions. (Folio 42.) The figures in the Bank-book are posted from the daily Bank-sheets signed by the General Managers of the Bank of New South Wales, the Commercial Banking Company of Sydney (Ltd.), and the City Bank. The Deficiency Revenue Account need only be kept in one Bank, because there will be next to no operations connected with it, the receipts at the end of the year forming the bulk of the transactions.

767. *Mr. French.*] It is only a balance; but if the Deficiency exceeded the credit the Bank would want to charge interest? No.

768. Why not? I have arranged for that. This system will cost the Government no more than under the present one, and is merely an extension of the present "General Banking Account." I will now deal with the balance as if it were a credit. I have already said that there were three accounts—1, the Current Revenue Account; 2, the Deficiency Revenue Account; and 3, the General Revenue Account. Now if the credit balance of £44,663 19s. 6d. be placed against the debit balance of the Deficiency Account you come to the overdraft on the General Account; that is, if from the £624,609 7s. 1d. overdraft of Account No. 2 be deducted the credit £44,663 19s. 6d. of Account No. 1, there remains an overdraft of £579,945 7s. 7d., shown in Account No. 3—General Account. Add to these the net payments in London not brought to account at 30th June, 1899, £201,646 5s., and the total will be £781,591 12s. 7d. overdraft. Supposing the Current Revenue Account closed with a balance of £160,000, under the distribution proposed £150,000 would be used in absolutely paying off the Bills, and £5,000 would go towards liquidating the amount owing to the Trust Funds—that is, paid to the Trustees—and £5,000 to a Sinking Fund in reduction of the Public Debt. That would close that account absolutely, so that the next year would start without a debit or a credit. If the Current Revenue Account closed with a debit balance, all they would have to do under my scheme would be to debit the Deficiency Account with the amount and credit the Current Revenue Account with amount of overdraft. The Deficiency Revenue Account would then be increased by the amount of the overdraft. That would put the Current Revenue Account all right, and allow the Treasurer to start with a clean slate on the first day of the new financial year. I was largely influenced in my present suggestion in connection with the disposal of the balances by what I saw in Victoria. In 1898–9 Victoria started for the first time the system of getting rid of her credit balance at close of Financial year. I asked the Treasury official in regard to the Current Revenue Account, what he would do when the year closed with a debit, and he said they had not arrived at that position yet, and that the Treasurer had said they must never drift into that unenviable condition. However, it is impossible to always close the year on the right side. I said to him, "You have a Deficiency Account, as we have; why not throw it into that account?" He replied, "That is a good idea, and when the time arrives I may consider the proposal." So Victoria has now adopted the principle of presenting a clean slate every year in connection with her Current Revenue Account; and in my scheme I propose the same. Nothing would be brought forward, and the *pure* annual payments would be put against the *pure* annual revenue, and a *pure* balance on the Deficiency Revenue Account would be shown each year in the Banking Account. My scheme converges entirely on the Bank Managers' certificates. The Deficiency Account would be confined to the one Bank and one certificate; that of the Bank of New South Wales would be required only. The Audit Office would no doubt be required to see that this scheme was adhered to. (*Appendix R 2.*)

769. This would be a sort of Floating Bill Account;—you contemplate that you will get Parliamentary sanction to deal with it in this manner, that the deficiency will be recognised? I do not think so. I think the Treasurer under Executive authority will have the necessary power to make any arrangements he may think proper in connection with the proposed changes in the Banking Account.

770. You do not propose that the Treasury shall have the power to create an indefinite deficiency;—under the present system the reason why they get Bills is to get some sort of Legislative authority or documentary authority for the deficiency? There will be no necessity to float or create Bills under the scheme proposed; in fact, any intrusion of Bills will go far to mar the whole arrangement.

771. There is no necessity, in fact? There was no necessity for floating these bills.

G. H. Pitt,
Esq.
1 May, 1900.

- G. H. Pitt,
Esq.
1 May, 1900.
772. The necessity is shown by the fact that there was a deficiency in the Public Accounts which required to be recognised in some shape; you say it does not require to be recognised. No doubt it could be so arranged. I mean to say that the effect is the same as in the case of a merchant who chooses between giving a bill to his banker and discounting that bill, or having an overdraft; the difference is between a bill and an overdraft;—is not that the difference? Well, whatever way you like to take it.
773. The bills are something specific, like a promissory note, but this would be in the nature of an overdraft? I would not like to answer yes, because I disapprove of the issue of Treasury bills, as better arrangements can be made. I say that the financial transactions of the Government have, in many instances, no parallel outside, although you, with your matured experience, may see a parallel.
774. You know what a promissory note is; well, I say that the parallel is exact; the financier of the Government says, "We will define the debt, and create a Bill to be repaid at a specific time"; but your idea is that it is better to leave the debt as an overdraft? Yes. I have said that I agree with the Auditor-General that, if we had a proper financial system, there should have been no bills in existence; and it is largely through these misleading credits intruding into the Accounts that the Committee are now inquiring into the state of the finances. I say the bills ought never to have been issued. The first bills were created to cover the deficiency of 1886 and previous years, but not till December, 1899, was the overdraft covered. Here is the crux of the whole question. If it were absolutely necessary to cover the deficiency by huge promissory notes, why was it not illegal from 1886 to 1889 to treat the excess payments as a pure overdraft?
775. But he had the bills in hand? He had no bills till 1889 and 1890.
776. He had the authority for £2,600,000 of bills? No; not in 1886. The Act was passed in 1889.
777. You mean that there was a deficiency uncovered by bills up to 1889? Yes. The bills were created in 1889 to cover the deficiency of 1886 and previous years.
778. You mean that the bills were not unnecessary, but that they were superfluous? Yes; superfluous.
779. *Mr. Yarwood.*] I understand that the Treasury bills were simply got to earmark a certain amount of the deficiency of the Treasurer's predecessors, and were to be gradually liquidated in years to come.
780. *Mr. French.*] Just as we do in the Bank; we know that a customer has an overdraft which he cannot meet, so we take promissory notes, payable perhaps every six months, and they might extend over a period of five years? But I take it you cannot compare the Government of the Colony with a private individual.
781. Why not? The credit of the Colony is always at the back of a Treasurer; therefore he does not require to give a promissory note in the sense implied.
782. However, what you mean is that the issue of the bills was superfluous? Yes. I think the members of the Committee will agree with me that whatever system shows the true state of the finances of the Colony should be encouraged; and I say that when these so-called credits—Treasury bills, or what not—are put in, they cloak the true state of the balance. Our office would not, I think, have challenged the Treasury if it had not floated these bills.
783. That is a proof that the bills were superfluous? Yes.
784. You mean there was no necessity to create the bills? No necessity to create the bills. Now, as regards a separate Banking Account for the Revenue Account, Sir James Martin said, many years ago, that there was a danger in keeping the Loan Account in the Revenue, because the proceeds of loans might be diverted to Revenue purposes. I would apply the same argument which he applied in 1871 or 1872 to the Trust Moneys. I may say that with regard to the balances shown in the Ledger showing the Bank balances there is not a farthing of Revenue in the Public Account balance shown for (say) 31st January, 1900. The balance at that date, whether in Sydney or London, belonged to Trust Funds.
785. But where an account has been amalgamated, as I understand that has been amalgamated, by Act of Parliament, you must take all the consequences that follow? No. The Audit Act does not require the Revenue to be amalgamated with the Trust Funds and form one banking account. The General Loan Fund has a separate banking account and it forms part of the Public Account as defined by the Audit Act.
786. We had it from Mr. Rennie, I think, that the Public Account includes a number of accounts? That is true; but I would like to read what the Auditor-General says in his report for 1897-8, at page 178:—"It becomes an important question whether the General Trust Funds Account should not be shown as a distinct branch of the Public Account, and kept in the banks in the same form as the General Loan Fund Account is now shown, but always reckoned, nevertheless, as directed by the Audit Act, as the one Public Account."
787. You recommend that instead of the Trust Accounts being worked as one with the Public Account they should be eliminated altogether and put into the hands of Trustees, and the Loan Account fed by specific loans or votes? The main principle in this system is to keep each account pure. Do not feed the accounts, but create a bank account like the Loan Account. If you were to put in an advance of £20,000 to an account, and so increase the balance, you would have an inflated balance. Take, for instance, the £50,000 advanced to Loan Fund during 1897-98 by the Curator of Intestate Estates. In subsequent years this temporary credit will be lost sight of, and so an inflation to that extent is submerged till the advance is adjusted. The £50,000 are still outstanding.
788. *Chairman.*] I think the idea is not a bad one, but it might be carried out without the cumbrous system of Trustees? Two factors in our present financial troubles were maladministration of the Treasurer's Advance Account and the Trust Funds. It is very necessary the latter should be under Trustees.
789. *Mr. French.*] As I understand, you do not object to the Government utilising the Trust Funds, but you object to the unscientific method in which they are used, and you wish to put them on a normal footing, so that they can only be used in a certain channel? That is it. By putting the matter under Trustees there is the safeguard. In Victoria the Treasurer is Chairman of the Board of Trustees; and if the Treasurer be absent, another Minister must take his place; so the Treasurer has sufficient control over the Trust Funds. When the Treasurer knows that he cannot obtain the Trust moneys without proper investigation as to purpose of expenditure, he will exercise greater care than could possibly obtain under the present system. During 1892 there was a sum of £415,000 spent from the Treasurer's Advance Account. The Treasurer is yearly given a bulk vote to expend on unforeseen expenses, and it is necessary that he should have this vote. The last Administration wisely cut down the Treasurer's Advance Account. In the first six months of 1895 it was cut down to £25,000, and they kept the expenditure well within the £25,000.

£25,000. But this lopping-off was too drastic, as the advance for 1895-6 amounted to £100,000. During the next two years the expenditure therefrom was moderate, but in 1897-8 and 1898-9 a large excess over the total vote is observable. In consequence of the abnormal expenditure in connection with the bubonic plague and the despatch of the contingents to South Africa, the expenditure from the Treasurer's Advance Vote for this year will be exceedingly large. To explain why the total expenditure exceeds the total voted, I may explain that money is recovered and put back into the Treasurer's Advance Account and expended again, and that is how the £200,000 became £400,000. The elastic appropriation of the Treasurer's Advance Account on the one hand, and the power the Treasurer has to utilise the Trust moneys on the other, have provided ready means for creating the present deficiency. If you allow those funds to be still under the control of the Treasurer, there is always the danger of improvident expenditure. 790. The effect would be that you would only leave the Revenue proper and the proceeds of loans within the control of the Treasurer;—does it come to that? That is it; but he will have part control of the trust moneys through being one of the trustees, and, as chairman, large individual influence.

There is an excellent provision in the Victorian Act, which says that the Trustees can advance to Treasurer, in aid of Revenue, £500,000; but that amount must never be exceeded, and under no conditions can the advance remain open on and unadjusted on the 30th June, hence the balances at the close of the year can never be disturbed by the extraneous receipts. The Act has emphasised the important principle that the £500,000 must not be in the Revenue balances on the 30th June—otherwise a credit of £500,000 would appear beyond the pure balance. I would suggest that there should be one bulk sum at the credit of the Trustees Banking Account.

791. *Witness.*] Going back to Questions 28 and 29, I now submit a return (*Appendix Q 2*) showing the ledger and cash balances up to 31st December, 1894; 30th June, 1895; 30th June, 1896; 30th June, 1897; 30th June, 1898; 30th June, 1899; 14th September, 1899, or three days before the late Government gave place to the present Government; to 31st January and to 28th February, 1900. I have shown some figures in red for 30th June, 1897, so that you can make a comparison with the figures of other years included in *Appendix 2 P*. The "actual" cash shortages in Revenue, that is the cash shortage outside the bills altogether, were as follow:—

	£	s.	d.
On December 31, 1894	1,221,361	1	2
June 30, 1895	1,056,280	15	8
June 30, 1896	428,370	14	3
June 30, 1897	828,503	0	5
June 30, 1898	777,702	12	4
June 30, 1899	793,210	10	3
September 14, 1899	1,053,935	11	0
January 31, 1900	1,072,151	15	6
February 28, 1900	1,148,728	19	4

—plus the outstanding bills at respective dates, and the result is the Deficiency to be liquidated.

I may say, referring again to Question 30, that the Auditor-General has from 1895-6 loyally recognised the establishment of a so-called cash basis system, and the Current Revenue Account balance is the outcome of it at the end of the year. In regard to bringing the Treasury bills to credit as shown by Treasury the Auditor-General has the right to interpret the Acts as he thinks best, and he says "I will show transactions in connection with the bills, but I will not allow the proceeds to intrude in the account proper, but show the outstanding bills as part of the composition of the balance."

Coming back to the expenditure during 1895-6 on account of that year, I may say that the expenditure for that year was below the normal on account of the liabilities of the period prior to 1895-6 being thrown back on previous years, and made a charge against the proceeds of bills. The expenditure for 1895-6 for that year was £8,899,411 (Treasury); for 1896-7, £9,462,262 (Audit Department); 1897-8, £9,397,784 (Audit Department); and 1898-9, £9,734,100 (Audit Department). Take the Roads expenditure for example. The expenditure charged to 1895-6 was £387,000, but the normal expenditure was about £520,000. It has been well said that the year of transition between the old and new systems was of great benefit to the accounts of that year.

Referring again to the Special Suspense Accounts. We will suppose, for the sake of argument, that it was legal to relieve a sick revenue of the heavy excess payments. Well, I have here a newspaper paragraph giving particulars of the sale of the allotments in Martin-place, and in that paragraph these words appear as having been uttered by the Premier:—"As far as the five unsold lots were concerned the Government did not intend to let the land lie idle. Unless it was disposed of soon he intended to close the account." Assuming that the five lots will bring prices on a par with those sold—corner lot and two adjoining lots—even then there will be at least £256,000 short of the £468,000 debit, and there is not the slightest possibility of any further receipts being obtained. What is the use of saying that the Suspense Accounts should be kept out, when we know that the residue of the excess payments will be a final charge on the Revenue Account. With these facts in view, the act of throwing them out apparently will not result in any permanent good. If it were legal to treat them as Suspense Accounts from 1894 to the present time in the case of the Centennial Park Account, and from 1892 to now in the case of the Post Office Account, it was illegal to regard them as Revenue Accounts from 1887 to 1894 in the case of the former, and from 1890 to 1892 in the case of the latter.

I think there has been a little misconception as to what the Auditor-General said about the Public Account. The Auditor-General means that the Revenue, the Trust Funds, and the Loans must form the Public Account of the Colony, but he does not mean that there must not be a separate banking account for each. His exact words will be found on page 178, paragraph 89 (latter end), of his report for 1897-8.

792. *Chairman.*] With regard to the two lots of Treasury bills, had they been reduced *bonâ fide* under the two Acts of Parliament, they should have been extinguished by this time? No; the Bills created under the Act of 1895 are not to be redeemed till the first issue has been extinguished.

793. Are not the first ones extinguished? No; there is a sum of £1,002,884 at present time outstanding.

794.

G. H. Pitt,
Esq.
1 May, 1900.

- G. H. Pitt, Esq.
1 May, 1900.
794. At the rate of £150,000 a year? Yes; the deficiency will be an incubus round the neck of the Colony for the next twenty years.
795. *Mr. French.*] Not so long as that, I think. Starting from the beginning it will be about fifteen years.
796. *Chairman.*] The four and a half years' lot, amounting to £600,000, are out of the first issue? Yes; but they have only been practically cancelled, and, as shown previously, not absolutely paid off.
- [Adjourned till Wednesday, 2 May, 1900.]

TENTH DAY.—WEDNESDAY, 2 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

George Henry Pitt, Chief Examiner, Department of Audit, further examined:—

- G. H. Pitt, Esq.
2 May, 1900.
797. *Chairman.*] We now take Question 33—"Whether the sum of £1,500,000 was transferred from Trust Funds to the General Loan Account as alleged by the Auditor-General"? £1,500,000 was transferred in three parcels of £500,000 from the General Trust Funds during 1895. The dates were: 9th January, 1895, £500,000; 10th April, 1895, £500,000; 28th September, 1895, £500,000. The whole of this has been expended on Loan services, but not being covered by securities, the amount, as previously stated, does not appear in the Public Debt; so the Public Debt statement is always short by £1,500,000. The Auditor-General has continually pressed for this adjustment, but up to the present without success.
798. *Mr. French.*] Is it not covered by specific securities, and does not appear in the specific indebtedness of the Colony? That is it.
799. The £1,500,000 was part of the Public Account? Yes.
800. The £1,500,000 was advanced from that part of the Public Account which you call the Trust Fund? The Public Account consists of two accounts—Consolidated Revenue Fund and General Trust Funds—in the Banks, and from these the £1,500,000 was taken; but by the analysis [*shown in Exhibit*] it is shown that there was no money, so it could not be from Consolidated Revenue Fund.
801. *Mr. Yarwood.*] According to the Auditor-General's Report it seems that objections were raised to the scheme of advancing out of the Trust Funds in this way, and then it was said, "We have made an advance, but from Consolidated Revenue?" I brought this matter before the Auditor-General, and I understand that he was approached, and concurred in the arrangement as a temporary arrangement. But he complains that the arrangement was never completed.
802. *Mr. French.*] It is a matter of opinion as to how far the Government were entitled to use these funds pending the raising of a loan, because the Auditor-General has explained to us that the Government had the power; that there were outstanding authorities to the amount of about £13,000,000, and there would be no difficulty, as a matter of form, in making those applicable if it was thought desirable; but in the meantime, as a temporary measure, they borrowed from the funds which they had in hand;—of course it is a matter of opinion as to what length of time "temporary" might be taken to mean? Loans have been floated subsequently, and the advances have never been adjusted. All this money has been spent on loan services, and is absolutely gone.
803. *Mr. Yarwood.*] What was prominent in my mind was this: from the evidence we got from the Auditor-General it appeared to me that the difficulty between the Auditor-General and the Treasurer was a technical difficulty; and then I put a question to the Auditor-General as to what advantage there was in not floating a loan in the ordinary way out of the Trust Funds? They could have done it. These moneys were taken from the Savings Bank, and they had been placed in the Savings Bank on deposit for six and twelve months, so those moneys could not cover the loan.
804. *Mr. French.*] Suppose, instead of approaching the Savings Bank, the Treasurer had approached the Commercial Bank and the Bank of New South Wales, would that transaction have been shown in the same way in the accounts? Yes; as lately advances from the Bank of New South Wales and Commercial Banking Company of Sydney have been treated as Trust Accounts.
805. Well, for all practical purposes the Savings Bank has become their banker in the sense that it has made a special loan of £1,500,000? I should like to explain my answer to that question. If I were to say "Yes" to that question, some might say, "How can you prove that?" I cannot prove it. I cannot prove that that money was obtained from the Savings Bank in Barrack-street to pay the amount in question; but I know as a matter of fact that that money was used for that purpose.
806. The effect is the same? The effect is the same.
807. Supposing the Bank of New South Wales and the Commercial Bank had agreed to lend the Treasurer £750,000 each, and had taken no specific securities, the Treasury would have held that they should not have put the loan into the Public Debt, because it was not a part of the Public Debt, but only a temporary advance pending some future negotiations. The item would have appeared in the printed statement of accounts as "Amount advanced from the Bank of New South Wales and the Commercial Bank pending realisation of loans authorised"? Inasmuch as this money was wholly expended on loan services, and has continued for five years, it ought to have appeared as an addendum to the public indebtedness of the Colony.
808. *Chairman.*] I see by the Public Accounts that on the 30th June, 1898, or thereabouts, an advance of £50,000 was made by the Curator of Intestate Estates; is that an advance due by the Government just now? Yes.
809. Is that shown as part of the Public Debt of the Colony? No.
810. Well, that ought to be if the statement is properly prepared? That is another amount at call. We ask for particulars of such items, but sometimes the Treasury tells us that there is a verbal agreement. I think in this case there must have been some arrangement under Supreme Court Judge's order. Where there is a verbal agreement we cannot, of course, get any material evidence.
811. Had that loan never been made would not the balance on 30th June, 1898, have been reduced from £1,530,664 Os. 1d. to £1,480,664 Os. 1d.? Yes.

G. H. Pitt,
Esq.
2 May, 1900.

812. We now come to Question 34: "Whether the present system of dealing with Trust Funds and of utilising the balances as working balances in connection with the Consolidated Revenue Fund Account and the General Loan Account should be altered; if so, what changes would the Commissioners recommend"? Yes. Changes in the present system of administration of the Trust Funds are absolutely essential if the mode of presentation of the Public Accounts is to be improved. I have already dealt with the proposed improvements which I consider necessary.

813. Question 35 reads as follows:—"Whether from the 1st October, 1897, to the 23rd September, 1899, payments to the amount of £1,278,940 were made from Revenue without the authority of Parliament, and without the Auditor-General's certificate. Whether in connection with these payments an expenditure suspense account was opened, the effect of that account"? Yes. From the 1st October, 1897, to the 23rd September, 1899, £1,278,940 were paid from Revenue without appropriation, and consequently without the Auditor-General's certificate. The vouchers to the payments were headed "Expenditure Suspense Account," which is presumed to mean that a separate account was kept in that office. An Indemnity Act had to be passed (assented to, December, 1899) to indemnify the Colonial Treasurer and officers of the Treasury concerned in these unauthorised withdrawals.

814. *Mr. French.*] Supposing, as has happened once or twice when there have been particular reasons for it, that they have got Supply, do you recognise that Supply? Oh, yes.

815. *Chairman.*] Have you a return showing how the £1,278,940 is made up? It is in the Indemnity Act.

816. *Mr. French.*] I asked Mr. Rennie this question: "Am I right in putting it this way—that the various votes for these purposes specified here were overdrawn to that extent?" And Mr. Rennie replied, "At the moment, but they were all provided for afterwards." Having been provided for afterwards, it puzzles me to see why an Indemnity Act was necessary, because that provision in itself was an indemnity. The Treasurer anticipated the payment on the 1st May, then by the middle of May he had got the whole thing through on his Estimates, and they were passed by the Auditor-General. This Indemnity Act did not enable the Auditor-General to pass them—he had already passed them? But you must comply with the Constitution, and you cannot legally spend moneys from Revenue without Parliamentary sanction.

817. But the sanction was obtained a few days afterwards? But that is not the point, otherwise any Treasurer could go on and spend *ad libitum*.

818. So he can, it appears? But Parliament might oust the Government for unconstitutional acts.

819. So they could, but they did not oust the Government, and Mr. Rennie was quite satisfied? The whole thing is in a nut-shell. No money can pass from the Revenue with Parliamentary appropriation, and if any Treasurer spends money without that sanction, he is violating the Constitution.

820. But if on the following week after he has made his payments he gets the necessary Parliamentary sanction in an appropriation, or whatever it may, and you pass it? We must pass it, but not till then.

821. But is not that the indemnity in itself. The indemnity seems to me a sort of little device for making that right which had really been made right, because the Auditor-General had passed it, making right a past act. After Mr. Rennie's answer to which I have just referred, I put this question to him: "By this Indemnity Act?" and Mr. Rennie replied: "Oh, no; votes were taken for these things afterwards." You mean they were a redundancy? No; the Act gave no authority to transfer the suspense expenditure to the respective votes.

822. *Mr. Yarwood.*] Does it make any difference to the appearance of the accounts in any way the delay in passing that Indemnity Act? In the account of 1899 that was sent to us for audit there were £62,388 16s. 11d. amongst the temporary advances, Expenditure Suspense Account, and the amount was entered in bulk form.

823. From a business point of view, the expenses were that much more than was shown? Yes; the expenditure under Suspense Accounts was kept out of the Account proper, as no authority was obtained at the time to place the items in that Account.

824. *Chairman.*] We now take Question 26: "The amount borrowed from the Savings Bank of New South Wales, Barrack-street, Sydney, to the 30th June, 1899, and to date"? The balance of amounts deposited by the Savings Bank of New South Wales, Barrack-street, on the 30th June, 1899, was £2,415,000, and at the present date the balance of the deposits has increased to £2,640,000.

825. Question 37 is as follows:—"The conditions under which these deposits were placed with the Treasury"? The deposits were made under section 17 of the Savings Bank Act of 1862. The conditions under which these deposits were made were arranged between the Treasurer and the Trustees. The deposits are generally placed for one year at current rates of interest. It is quite optional for the Trustees to deposit and for the Colonial Treasurer to accept these moneys. Hence, if at the date of maturity of a parcel of the deposits the Treasurer and Trustees fail to agree as to the conditions required (rate of interest would be no doubt the chief factor), a deadlock would probably ensue, which might result in the Trustees demanding the deposits at dates of maturity of the respective parcels.

826. *Mr. Yarwood.*] Can you tell me if any previous Treasurer has ever had these deposits? Yes, the practice started in 1891 by Executive authority. There is a return amongst the Appendices showing how the advances have mounted up each year.

827. *Chairman.*] We now take Question 38: "Whether any of these advances have been covered by securities"? No, the amount is uncovered.

828. *Mr. Yarwood.*] I suppose if there were securities you would know;—I mean to say there cannot be any question about it? Oh, no. At one time deposits from the Savings Bank were covered by securities. The Committee may remember that some years ago £4,000,000 of Treasury bills for Loan purposes were raised; it was after the crisis, I think. The Government issued short-dated loans—Treasury bills, for works—a most unusual thing.

829. *Chairman.*] It was before the crisis, I am sure. I remember I was in London at the time? Well, of these, £3,250,000 were raised in London, and £750,000 locally. The local issue was taken up by the Savings Bank, Barrack-street, and when the bills matured the money was placed, I think, as one of these deposits.

830. We now take Question 39: "The purpose for which this money was obtained from the Trustees of the Savings Bank of New South Wales"? The money was used to supplement in a very large measure the exhausted balances of the Consolidated Revenue Fund, and in a special case during 1895 for a like service in connection with the Loan Fund balance. The first deposit was made during 1891, and the balance of the amount

G. H. Pitt, Esq.
2 May, 1900.

amount of deposits at the close of that year was £590,000. On 30th June, 1899, the balance of advances had increased to £2,415,000, and further additions of £50,000, £25,000, and £150,000, respectively, have been made, making a total of £2,640,000, which represents the liabilities of the Government to the Trustees at the present time.

831. We take Question 40 : " Whether from the month of November, 1896, to the close of the year 1899, payments to the amount of several million pounds sterling were made from Loan Funds without the certificate of the Auditor-General, and whether such payments were therefore illegal"? Yes, such payments were made, and they were illegal. The amount paid without warrant was £3,820,071 19s. 2d. Peculiar conditions, however, surrounded these irregular payments, which necessitated appeals being made to the Crown Law Officers, pending a full investigation, which spread over a very long period, and which eventuated in a final decision, largely in favour of the course followed by the Auditor-General, as regards the main principle at issue, being given by Sir Julian Salomons and Dr. Sly, payments on account of Loan Services continued. During the interim no certificates were granted as to availability. During 1899 an Act, No. 47 of 1899, was passed. Under clause 2, section 17 of the Audit Act, 1898, was amended, and from the passing of this Act the Auditor-General is required to grant a certificate on an appropriation basis only, and not as heretofore on a cash, in addition to an appropriation basis. If the Auditor-General had been called upon under the old conditions to grant a warrant with the Loan Account, one and a half millions in debit, he would have declined, but under the present conditions he must give certificates, just as in the case of the Revenue. In the case of the Revenue the balance is considered a growing one, and whether it is in debit or credit the Auditor-General has always granted a certificate.

832. *Mr. Yarwood.*] I suppose that is to prevent the Auditor-General from hampering the Treasurer,—of course I am not using the word "hampering" in an offensive sense; but that is the logical idea? Yes.

833. *Chairman.*] I suppose the primary cause of these irregularities, the payments to the amount of several millions, was the excess of Trust moneys the Treasurer had from the Savings Bank? No.

834. But these irregularities would not have occurred if it had not been for the Trust moneys? That does not apply in this case.

835. *Mr. French.*] I notice this passage in the Audit Act: "Before countersigning such instrument as aforesaid such Auditor-General shall ascertain that the sums therein mentioned are legally available and applicable for the purpose and service mentioned in such instrument." As a business man I should have taken the view of the Treasury, but I can see the Auditor-General's position. It is on the safe side distinctly.

836. *Chairman.*] Would not the natural result have been that if the Treasurer had not had control of these Trust Funds he would have had to go to the London market to borrow, and thus comply with the law? So far as the question under review is considered, it was whether the Auditor-General should grant certificate against an appropriation and a cash basis, or against appropriation only. The control and use of the Trust Fund is, I think, a side issue.

837. The last question (41) is as follows:—"The balances of the various accounts when the present Government assumed office"? I hand in a statement in answer to that question. [*Appendix S 2.*] I may say in conclusion that I have prepared what I call "Concluding remarks" to my evidence, and with the permission of the Committee I will read them. They are as follows:—

I have endeavoured to submit, as a witness before the Committee, confirmatory evidence of the correctness of the Auditor-General's figures, as set forth in his reports, and which I conscientiously consider exhibit the true condition of the Revenue Account.

I wish particularly to emphasise the fact that in my evidence throughout I have tendered it without any bias, political or official. I consider the Revenue Account to be in a very unsatisfactory state, and that remedial measures should at once be taken to remodel the present system.

The inclusion of the General Trust Funds in the Revenue Bank Balances has done incalculable harm, as the constant addition to the former has cloaked the serious condition and drift of the latter.

I have for years advocated a separation of the two funds, and that the trust moneys be placed under independent control. Victoria lately (1898-9) has adopted the latter course, and as similar conditions prevail there, including a deficit, New South Wales should follow the good example set by the sister Colony.

I formerly favoured three independent trustees; but the Victorian plan has its benefits, and, perhaps, would prove the more workable and economical—that is, that the Treasurer, the Speaker of the Legislative Assembly, and a Committee of Public Accounts (of the Legislative Assembly), conjointly form a trustee body to administer the funds.

The inclusion of the Treasurer in the composition of the Committee, I think, is justifiable, as he should be closely in touch with the operation in Trust Moneys, and probably he would exercise his influence for good in the administration thereof, while his presence can in no way be considered as implying any possible wrong application of the funds; as effectual safeguards exist to prevent any immoderate or illegal use.

The Auditor-General has long contended that there should be a Committee of Public Accounts composed of members of the Legislative Assembly—one exists in the Imperial Parliament, and as stated, in Victoria. The proposed Trust Fund Act would provide for such a body, and its sphere of operations might be enlarged by its labours being directed towards assisting in deciding knotty questions between the Auditor-General and Treasury, and so pave the way for reconciling differences of opinions which constantly arise as to the mode of keeping and presenting the accounts, and so assist materially in bringing the figures of both Departments into line.

I have come to the conclusion that the unsystematic mixing of General Trust Fund moneys with those of the Revenue, and the maladministration of the Treasurer's Advance Account in past years have been two of the primary factors in building up the heavy accumulated Deficiency.

To 1894 the amount voted under Treasurer's Advance Account was £200,000. During first six months of 1895 the advance was reduced to £25,000, and the annual vote subsequent to that period has been £100,000. An important step in reform was therefore taken during the first half of 1895 by removing any possibility of the heavy excess expenditure of previous periods under the Advance Vote. There are, however, indications that the expenditure from Treasurer's Advance is again becoming excessive. I would suggest that the Advance Account be limited as at present to £100,000, and that under no circumstances should the gross expenditure exceed that amount—that is to say, the total expenditure should not include any payment from recredits. To continue this subject, I may state that the gross expenditure during

G. H. Pitt,
Esq.
2 May, 1900.

during 1892 from the vote of that year was £415,158; during 1893, £424,680; during 1894, £292,021. A significant drop, however, took place during the first six months of 1895, when only £24,188 were expended out of a possible £25,000 or more. 1895-6 was also a pattern period, as only £45,707 was expended out of the £100,000 voted for that year. Also 1896-7 was a good year, £92,973 being expended only. The wise policy followed during the periods named, however, was not continued during 1897-8 and 1898-9, as the expenditure for former period was £228,201, and for the latter £168,023. As I said before, the expenditure should be limited to the £100,000, and this can only be done by disallowing expenditure from recredits. I am well aware that to hedge round the Treasurer's Advance Account with stringent conditions will at times cause irregularities in another direction, but I have said enough to show that by the immoderate use of the Treasurer's Advance Vote in the past a large expenditure has been incurred which would have been avoided if the Advance Appropriation had not been available, while apparent proof is adduced that the Estimates of Expenditure of the year in which the abnormal expenditure took place had been cast considerably short of the actual liabilities.

While these liabilities were being heaped up the Trust Moneys were being largely used to meet payments made beyond the strength of the Revenue, and the result was that at the close of 1889 the Revenue Account showed a balance on the wrong side to the extent of £1,850,061. It was decided during that year to relieve the balance of all excess payments made on account of 1886 and previous years, and, consequently, bills to the value of £2,502,884 were created during 1889 and 1890 to cover the heavy withdrawals from Trust Fund, as well as to provide for future payments on account of liabilities of 1886 and previous years.

During the period 1st January, 1887, to 30th June, 1895, a second deficiency arose, and like action was taken to adjust the Revenue Account by the use of bills to the value of £1,024,700. Payments on account of the 30th June, 1895, and previous years ceased absolutely, so far as the Audit Department is concerned, on the 30th June, 1897, and under existing conditions credits only can be made to Deficiency Account.

The 1895 bills issued were not intended to cover the debit balance of the Special Suspense Accounts. The overdraft (uncovered) of the Deficiency Revenue Account on the 30th June, 1899, amounted to £624,609 7s. 1d.; at the same time the debit balance of the two Special Suspense Accounts of the Deficiency Account amounted, in the aggregate, to £666,558 1s. 8d., or an excess of £41,948 14s. 7d. Consequently, in the £116,523 5s. 8d. shown in the Treasury Credit Balance, page 8, the last-mentioned amount is included—that is to say, bills to the value of that amount are current and in excess of requirements, if the Suspense Accounts be thrown out.

As previously stated to the Committee, I consider that under a proper up-to-date system these bills need not have been created, but Acts might have been passed providing for the liquidation of deficiency by annual instalments. Under such a system the large misleading credit "Proceeds of Bills" would never have intruded into the accounts. Further, no obligations, legal or otherwise, ever existed to compel the Treasurers to follow this course. I would be pleased if this clause be read in conjunction with the proposed banking arrangement.

Adverting to the subject which forms the basis of the foregoing remarks, I may state that if the Trust Moneys were placed under the administration of Trustees, and the expenditure under the Treasurer's Advance kept within safe limits, two prominent weaknesses of the old system would be removed.

As regards the manner in which the accounts have been presented in the Auditor-General's Reports, I can bear testimony to the care and attention bestowed by my esteemed Chief in the interpretation of the laws regulating income, appropriation, and expenditure. The Account No. 3—General or Consolidated Account, on which so much controversy has taken place—is certainly kept in accord with the legal requirements, especially when taken conjointly with Account No. 1 (Current Revenue Account), and Account No. 2 (Deficiency Revenue Account).

The Auditor-General is very careful to comply with the law regulating the accounts, and in the Revenue Account under review (No. 3) the composition of the aggregate balance is carefully exhibited—that is to say, the figures are given showing that the bulk of the excess payments is covered by Treasury bills.

When a new and up-to-date system is proposed, I hope it will not be found unnecessary to continue Account No. 3. Under present conditions, however, it is absolutely a necessity.

By the abolition of Account No. 3 (folio 35), and the adoption of an improved banking arrangement, the underlying principle embodied in the Audit Act Amendment Act will have full play by a true cash-basis system being adopted.

Re pure balances: Again I strongly and respectfully recommend to the consideration of the Committee the absolute necessity of keeping separate Banking Accounts for the Revenue in Sydney and London, and also the adoption of a common financial year (irrespective of locality), and that under no circumstances should the balances be inflated and rendered impure by the inclusion of temporary advances (extraneous credits), and so under such a system the true condition of the Revenue Account from a cash standpoint will always be apparent to the public by perusal of the bank statements.

In conclusion, I wish to reiterate my answer to the Committee's question put at the opening of my evidence, "Had I anything to do with the framing of the 41 printed questions?" Again, I reply in the negative; but I must couple with this emphatic assertion the qualification that, as previously explained to the Committee, Mr. Martin showed me a question in regard to the Barrack-street Savings Bank Deposits, and I advised that the question be split into three—(I will strengthen this remark by oath if the Committee desire); nor did I know the nature of such till the printed document was handed to me by the Auditor-General, which had been forwarded to him when the general distribution took place. I have to add that I have given my evidence in connection with this investigation with great pleasure, as I long to see an up-to-date system adopted, and so remove the reproaches continually hurled by the public at the present obsolete system. I desire to express thanks for the courtesy which has been extended to me by the Committee.

838. Have you made the reconciliation I referred to yesterday between the three sets of figures given in answer to questions 2 and 3? I hand in now a statement (*Appendix F 2*); and although I do not establish the difference, still this statement will enable the Treasury to establish the difference between the two Departments.

[Adjourned till Thursday, 3 May, 1900.]

ELEVENTH DAY.—THURSDAY, 3 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

F.
Kirkpatrick,
Esq.
3 May, 1900.

Francis Kirkpatrick, Under Secretary for Finance and Trade, examined:—

839. *Chairman.*] Will you please look at the statement prepared by Mr. Vernon, Accountant of the Treasury, showing the Consolidated Revenue and Expenditure proper, and state what the balance was on the 1st January, 1895? This paper shows the balance to have been £466,711 0s. 4d.

840. Will you state the balance on the 1st July, 1895? I see it is given here on the 30th June, 1895, as a debit balance of £830,738 13s. 8d.

841. And on the 31st March, 1899? £2,342,344 4s. 5d.

842. On the 30th June, 1899? £1,718,906 11s. 2d.

843. What has been the drift between the 1st January, 1895, and the 30th June, 1899? According to these figures it appears to have been £1,252,195 10s. 10d.

844. What has been the drift between the 1st January, 1895, and the 31st March, 1900? £1,610,818 19s. 5d.

845. Therefore, the drift has increased from, on 30th June, 1899, £1,252,195 10s. 10d. to £1,610,818 19s. 5d. on the 31st March, 1900? Yes; that is according to this statement.

846. That is Mr. Vernon's statement? I do not care whose it is. I say it is according to this statement. But I do not hold with it, for this reason: that on the 1st January, 1895, there were certain unexpended balances of the year 1894 available to meet claims which were subsequently paid and met by the proceeds of Treasury Bills.

847. But these figures are taken from the *Government Gazettes*? They do not correspond with the figures shown by the *Government Gazettes*, I think.

848. *Mr. French.*] Do I understand you to say that you are prepared to stand by these figures? No; quite the contrary.

849. *Chairman.*] There has been some money credited to the Consolidated Revenue for the period from 1st January, 1895, to 30th June, 1899, from the Government Post Office Savings Bank;—can you give me that information now? No; I could not give it to you now from memory.

850. It was £48,000, or thereabouts? I do not dispute that; but I am not sure about it.

851. Has not a sum of £360,689 6s. 9d. been credited to the Consolidated Revenue in what I may call a windfall? There was an amount credited of something about that figure. It is shown in the Ways and Means. Looking at Appendix A it seems to have been that amount.

852. *Mr. French.*] It is signed by Mr. Vernon? Yes. He knows more about the details of this than I can remember.

853. *Chairman.*] How was this progressive total drift—

The Witness (interrupting): I do not like the word "drift."

854. *Chairman.*] Well, how was this total amount of £1,718,906 11s. 2d. provided for? There were Treasury Bills floated to meet the unpaid accounts on account of 1895 (half-year) and previous years to the extent of £1,174,000. Then part of that was afterwards cancelled.

855. I am quite aware of those Treasury Bills, but that is an extraneous credit, and has nothing to do with this fund; that account was overdrawn to that extent;—and was not that really, as a matter of fact, covered by Trust Funds? Well, yes, because the Trust Funds were invested in the Treasury Bills.

856. Was ever a statement showing this continued drift or indebtedness placed before the Treasurer of this or any previous Administration? No; because the deficiency on account of 1894 and previous years, and half-year 1895, was met by the proceeds of Treasury Bills, and there was no necessity to show it again.

857. What struck me was that if I had been Treasurer, and saw it mounting up from £464,000 odd to £1,718,000 odd, it would open my eyes at once? It never went to that.

858. But these are the Treasury figures? But such a statement was never shown. That could not be shown, because the sum of £1,174,000, proceeds of Treasury Bills, was credited.

859. What I want to show is that for this period the Revenue has never overtaken the expenditure for the entire period. The deficiency has been gradually growing from £464,000 to £1,718,000 when Mr. Lyne took charge, and since Mr. Lyne took charge it has gone up to £2,000,000. However, I will pass away from that to another subject. There have been certain moneys charged to Suspense Account, being expenditure in connection with the Centennial Park and the Post Office approaches. The net payments during four and a half years for the Post Office approaches amounted to £132,438 18s. 3d., and on the Centennial Park £229,000? There were certain moneys so charged.

860. Taking the balance of £116,523 5s. 8d. on 30th June, 1899—do you consider that a surplus? Undoubtedly; it was the balance at the end of that year, leaving the Suspense Accounts out of the question.

861. Do you consider it a cash balance? It would not be a cash balance, because the Revenue had advanced certain amounts, or there were certain amounts chargeable to the Revenue on account of the Suspense Accounts which could not be met from the Revenue and at the same time leave a credit balance. That amount is a ledger balance.

862. But you consider it a surplus? Undoubtedly.

863. Taking into account the Trust Funds, was it a cash balance or a surplus? It was a surplus so far as the revenue and expenditure were concerned. It was not a cash balance, it was a ledger balance.

864.

NOTE BY WITNESS.—The questions respecting the balances were subject to verification of the figures. The figures, however, with the exception of those in answer to the first question, do not correspond with the figures shown by the *Gazettes*; they are, therefore, incorrect. The figures shown by the *Gazettes* are as follows:—

	£	s.	d.
Balance 1st January, 1895—Debit	464,711	0	4
„ 30th June, 1895 (exclusive of £1,000,000 transferred to Loan Account)—Debit	166,450	2	1
„ 31st March, 1899—Debit.....	504,090	19	2
„ 30th June, 1899—Credit.....	116,523	5	8

F.
Kirkpatrick,
Esq.

3 May, 1900.

864. Taking into account the Trust Funds, was it even a cash balance in the proper sense of the word as applied, for instance, to the balance sheet of a firm? You could hardly consider it a cash balance, seeing that these accounts which had to be afterwards provided for in some way were outstanding—that is, the Suspense Accounts.
865. Would a merchant or a trading company show it as such? A merchant would show his liabilities and his assets against them. There were valuable assets in both of the cases referred to.
866. There was a sum of £3,000,000 or £4,000,000 of Trust Funds. If the Treasurer had not had these Trust Funds, could he have carried on without floating loans to cover the deficiency on the Consolidated Revenue Account? The Suspense Accounts must have been provided for in some way.
867. I am not speaking of the Suspense Accounts now. There were £3,000,000 or £4,000,000 of trust moneys, and, I ask, if these trust moneys had not existed, could the Treasurer have carried on without floating bills to cover the deficiency in the Consolidated Revenue? I say the Suspense Accounts must have been provided for in some way. Of course it would have been necessary to raise a loan if he had not had the trust moneys.
868. I suppose we may take it that the deficiency in the Consolidated Revenue Account has been a progressive one for many years? Up to the time it was met by the Treasury bills, yes.
869. And before then? I have a little statement here I would like to hand in to the Committee. It shows the history of the accumulated deficiency, 1895 (half-year) and previous years. This is made up from the Ways and Means as submitted by each Treasurer to the House. I made it up in August last for Mr. Reid. I gave a copy of it to the Minister of the day. [Appendix V 2.]
870. You will notice by Mr. Vernon's statement that on 31st March, 1899, the Consolidated Revenue was overdrawn £2,342,040, and that on the 30th June, 1899, it had been reduced to £1,718,906 11s. 2d.? I notice those figures.
871. How do you account for this sudden reduction? I have not looked into the matter at all. I could not answer that question.
872. Is it due to the abnormally low expenditure for the quarter ended 30th June, 1899? £2,195,236 would seem to have been the amount for that quarter according to this statement.
873. Will you look at the amount for 30th June, 1897, according to that statement? The expenditure was £2,376,818.
874. And for 30th June, 1898? £2,366,358.
875. And for 30th June, 1899? £2,195,236.
876. Are not great efforts made to get in as much revenue as possible before closing the financial year? Not great efforts; we keep the office open till 4 o'clock to enable people to pay in instead of paying in on the first of the month.
877. Are not telegrams sent through the country to get moneys in? Sometimes we send to the Land Agents, as they do not generally remit until the end of the month, instructing them to remit up to the 28th of the month. Circulars are sent.
878. Are any similar efforts made to get in the Expenditure Accounts? We expect the people to look after the collection of their own accounts.
879. I have heard that the Departments have held back accounts so as to defer payment until after the 1st July;—has that come within your knowledge? Yes, but there is a reason for it; the balances of their votes are insufficient to bear the expenditure.
880. Is it a fair conclusion to say that during the period from 1st January, 1895, to 30th June, 1899, the revenue proper has not been sufficient to overtake the expenditure? It would not be fair to say that, and for this reason, that during that period certain payments were made on account of 1894 and previous years, which it would not be right to charge to the revenue of 1895 and subsequent years.
881. Does not that statement before you show a continuous deficit? I admit that, but it requires an explanation. It is capable of an explanation.
882. And is not this state of things continuing to the present hour? I could not answer that; I do not hold with this statement at all. In my opinion it is not a proper basis to go upon.
883. But these figures are taken from the *Government Gazette*? But this statement is not audited, and I prefer to go upon the Auditor-General's annual reports.
884. But, at all events, you can give an answer to this view of the position;—it is remarkable to me that £400,000 becomes £2,300,000? Those amounts are not in any of the Treasury Accounts.
885. I got them from the *Government Gazette*? If so, they are prepared in a certain way, and for a certain purpose.
886. Then the *Government Gazette* is not a true reflex of the ledger balances? I am not aware that these balances as shown in this statement are shown in the *Government Gazette*.
887. But if I can show them to you? If you can show them to me I will believe them.
888. Is not the same state of things continuing? I would not like to answer that until the accounts of the year are made up.
889. *Mr. Yarwood.*] Do you mean for the year ended 30th June, 1899? No, this year.
890. Are the accounts audited for 30th June, 1899? Yes; but we have not received the report.
891. But the audited statement could be got? It could be obtained, but I have not received it, because it has to be laid upon the Table of the House.
892. I do not mean the report, I mean the figures. I suppose we shall be able in this inquiry to get the audited figures to 30th June, 1899? Yes. There were one or two slight corrections as to which we do not hold with the Auditor-General, but this will not interfere with the account being presented.
893. *Chairman.*] But assuming the figures shown on that statement, it appears that during the period 30th June, 1899, to 31st March, 1900, there has been a further drift of £356,623 8s. 7d.? I would not agree to that.
894. But if these figures are correct, and they are Mr. Vernon's figures? I do not dispute that as I do not know, but if so they are made out for a certain purpose. However, I say there are no ledger accounts in the Treasury that show those balances.

895.

NOTE BY WITNESS.—In addition to the sum of £2,195,236 stated to have been the expenditure for the quarter ended 30th June, 1899, I find on reference to the *Gazette* a further sum expended of £62,660 under the heading of Expenditure Suspense Account.

F. Kirkpatrick, Esq.
3 May, 1900.

895. But they are copied from the *Government Gazette*? I would like to see the *Government Gazette* showing those figures.

896. You will have an opportunity to-morrow of checking them. I will admit that this statement is a novel way of showing the position, but I think that is the way the Treasurer should show it to know how he is drifting. However, assuming those figures to be correct, that is the drift? I do not believe that the present Government is drifting to that extent.

897. That makes, at all events, the gross debit of the Consolidated Revenue Account £2,075,529 19s. 9d.? Yes, assuming those figures to be correct. Might I ask if this statement contains the Expenditure Suspense Accounts?

898. No; this is Consolidated Revenue proper and Expenditure proper taken from the *Government Gazette*, and it is put in this way, showing the continual drift in this account that, sooner or later, must be put right. However, that is my contention at present? I do not like the basis.

899. *Witness.*] If this statement does not include the Expenditure Suspense Account, I will defy any person to produce a *Government Gazette* showing these debit balances on those dates.

900. *Chairman.*] Do you not think that this continual drift should be stopped in some way? It has been stopped; it was stopped by Mr. Reid.

901. I understand that the Treasury Bills Act provides that instalments of £150,000 shall be paid off annually by charging the same to Consolidated Revenue? Yes, that is correct.

902. Has this reduction been made, and have instalments been charged to the Consolidated Revenue Account during the last four and a half years from January, 1895, to June, 1899? Yes; the reduction has been made every year. But perhaps I might make some explanation here, which may be of service to the Committee. When Mr. Reid was going to introduce his new system he said to me, "I am going to make provision by Treasury bills for all the outstanding liabilities up to 30th June, 1895," to give the new system a clear start. He not only provided for the outstanding liabilities according to the balances of appropriations, but those which had accrued, and there were two which had accrued although the amounts were not payable till 31st December, for which he made provision. One was the £150,000, for which he put down £75,000 for the redemption of the Treasury bills, and the other was the item of £75,000 on account of the railway loan of £1,000,000, for which he put down £37,500. He included those in the liabilities which he intended to provide for, and did provide for, by the Treasury bills. He explained that matter fully at the time, and showed the two items in his accounts under the heading of Special Appropriations. I know what he did, because I was with him when he decided to make the change in the Accounts. He then had a Bill prepared to cover the whole of the deficiencies, amounting to £1,174,000, and this sum was placed to the credit of the revenue, wiping out the overdraft that then existed. In order to assist the Committee, I might hand in a little statement which I prepared in August, 1899. I prepared this with a peculiar object, so that any person taking the abstracts of the Public Accounts laid upon the Table of the House by the Auditor-General would be enabled to go through them, and see what was met by the proceeds of the Treasury bills, because there was a doubt existing as to what had been charged to the Treasury Bills Account; and to satisfy myself upon that subject I made this statement. [*Handed in, and marked appendix W 2.*] It is not exactly correct as an account, and I will explain to the Committee the reason why it is not. This shows that the total amount of the bills was £1,174,700, afterwards reduced by the amount of £150,000 cancelled. That left £1,024,700 as the amount of the bills outstanding. The proceeds of these Treasury bills were used to meet the following expenditure:—

	£	s.	d.
Services of 1894 and previous years	865,735	6	7
Services of 1895 (half-year)	153,423	10	3
Total	£1,019,158	16	10

That is not the correct nor final statement of this account. There were certain amounts credited in the Consolidated Revenue Account after the 1895 half-year and previous years had been closed, which have not been credited to this account, and, on the other hand, there are certain accounts still unpaid in the pay-branch which should be shown as liabilities, but so far as the abstracts of the Public Accounts go this was taken from them, and can be verified by any person. This is not prepared as a statement of account.

903. *Mr. French.*] But as an approximate memorandum? Yes; to show exactly what the Treasury bills were used for. I may say that I believe Mr. Lyne handed a copy of this to Mr. Pitt, because Mr. Pitt told me he had gone through it, and he was satisfied it was correct.

904. *Mr. Yarwood.*] In making this up have you shown when these amounts were paid? That is shown in the Statement.

905. They were all paid by the 30th June*? Yes.

906. *Mr. French.*] Do you mean paid within that period? Yes.

907. The cash was disbursed within that period? Yes, from those Treasury bills. It may not have been exactly from those bills, at that time, because they may not have been raised. In fact, they were not; but at the same time these were payments made from January to June, 1895, on those accounts.

908. Those payments which were made were really included in the amount estimated to be provided for in the bills? It was rather more than an estimate.

909. Actual? Yes, so far as could possibly be ascertained at the time; but it was subject to certain changes.

910. Could I get the details of the item £772,224 0s. 6d.? Yes, you could get the details of every amount.

911. *Chairman.*] Referring to the annual payments in redemption of bills, they have not been charged to Consolidated Revenue during the four and a half years from January, 1895, to June, 1899? Oh, yes, they have.

912. Are you sure? Certain, with the exception that I spoke of when I said that Mr. Reid split up the £150,000 and charged £75,000 to 1895 and previous years.

913. You will be able to show the Commission that? Undoubtedly.

914. *Mr. French.*] That is the £150,000 a year? Yes.

915.

* Referring to payments January to June, 1895, shown in the statement.

F.
Kirkpatrick,
Esq.
3 May, 1900.

915. *Mr. Yarwood.*] Does your recollection go far enough to say that during the eighteen months ended 30th June, 1896, there was only one year's redemption charged in the two accounts? That is right.
916. That is, the account was for a period of eighteen months, but he put the other half in the next time;—that is correct? Yes, that is correct.
917. *Chairman.*] I suppose the reason that it was not charged was that there was no money at the credit of the Revenue Account? The Auditor-General would have reported the matter to Parliament if the statutory obligation had been omitted.
918. I was under the impression that certain things had been cancelled, and that the payments had been debited to the Consolidated Revenue? The payments have always been debited.
919. And you could show that to us? Yes.
920. Since the initiation of the Treasury bills in 1899, have any Treasurers charged these annual payments to Consolidated Revenue—I mean the £150,000? They have always been charged to Consolidated Revenue.
921. I was under the impression that they were simply cancelled? The amounts are transferred back again, and Treasury bills cancelled.
922. Have there been any other windfalls credited to Consolidated Revenue during the period of four and a half years, such as the £360,000? I do not remember.
923. A person told me that some balances of the School Estates had been credited to Consolidated Revenue? They could not have been credited to the Consolidated Revenue except as a separate account. They were shown in the Trust Accounts, but it is not now a Trust Account; it is a separate account under the Revenue.
924. What was the amount? About £200,000.
925. That was a credit account in the Treasury? The amount was standing to the credit of the Public Instruction Endowment Account. There was an Act passed which brought it into the Revenue, but the amount has never been taken into the Consolidated Revenue Account proper. It has always been kept a separate account in the Bank. At any rate, if it is not a separate account in the Bank, it is a separate account in our ledger. On thinking it over, I remember it is not a separate account in the Bank.
926. *Mr. French.*] Does that statement, on which you have been answering questions—that is the statement put before you by the Chairman—represent the true state of the Consolidated Revenue? No, it does not.
927. You do not recognise that statement as being the statement of the Consolidated Revenue, from your point of view? I do not, nor is it the point of view of the Treasury, or in accordance with Treasury figures.
928. Although, of course, that statement does show a progressive drift, yet, from your point of view, there was no drift between the periods after the final clearing up by the second issue of Treasury Bills? There has been no drift. I am certain of it.
929. A question was asked you about the delay in paying accounts, and you have stated that the revenue is got in, as far as you can do so, up to the date of the close of the financial period; do you say that there has or has not been a delay in making payments for which you could legitimately draw cheques;—does the Treasury make a practice at the end of a financial period of delaying payments deliberately in order to improve the balance? I may tell you this, though, that some Departments take it upon themselves to issue circulars to contractors, telling them that if they do not apply for their money before the 30th June they will not get it.
930. That they will not get it? Yes, for three months; and consequently that causes a rush. I told some of these gentlemen that I was thinking of putting up a notice on the Treasury to this effect:—"This Department will be open on the 1st July." I do know that some Departments hold accounts—large amounts some of them—for a considerable time, until they got the new appropriation.
931. But where there was an appropriation, or had been an appropriation? The normal business went on.
932. Without any attempt on the part of the Treasury or the other Departments to delay the payments simply because it was the close of the financial period? The only attempt ever made was to stop any abnormal proceedings. In the case of people who got these circulars from other Departments, I stated that the Treasury was going to be open on the 1st July.
933. Do you mean that matters went on normally? That is it.
934. You mean that on the 30th June, or the 27th or 28th June, all claims as they came in in a normal way were met? Yes; I simply endeavoured to stop any abnormal proceedings.
935. *Mr. Yarwood.*] About these Special Suspense Accounts for the Centennial Park and the Post Office Approaches: we will presume, for the sake of argument, that there is going to be a deficit;—is it your view that the revenue will have to pay that, or do you consider that any special steps will have to be taken with regard to the matter? I do not consider it would be right to charge the revenue of any one year for any deficiency that might occur between the assets and the liabilities of those accounts.
936. Are you not treating the Suspense Accounts as part of the Consolidated Revenue? No; they are part of the Consolidated Revenue under the Act, but they are not considered as ordinary revenue, or ordinary expenditure. They are Suspense Accounts.
937. It has been obvious to me as an ordinary individual that the amount that would be realised by Martin-place would not cover the account;—for a long time I have seen that? It is expected that there will be a deficiency there.
938. But it could have been anticipated years ago by a sensible man? Yes; I suppose so.
939. And no provision has been made for it up to the present? That is so.
940. Did the two accounts both exist in 1891? I do not think the Post Office Account did.*
941. What is the hitch about the Centennial Park—why has the land not been sold? I am not prepared to answer that.
942. I have seen statements with regard to it, as to whether it was legal to sell it? I think it is, but I am not prepared to say positively.
943. No hitch has come to your knowledge? No.

* NOTE BY WITNESS.—The Post Office Account commenced in July, 1890, I find.

F.
Kirkpatrick,
Esq.
3 May, 1900.

944. *Chairman.*] Taking the balance of £116,523 5s. 8d. at the credit of the Consolidated Revenue, if that credit of £360,689 6s. 9d. had not been credited to the Consolidated Revenue Account, would not that have thrown the account into debit to the extent of £244,166 1s. 1d.? It would seem so.*

945. Did not the Centennial Park and the Post Office Approaches Acts say that the money expended was to be charged to the Consolidated Revenue? They did. With reference to the sum of £360,689, accrued interest, you will find it in the Ways and Means for the half-year ended 30th June, 1895. When Mr. Reid prepared his statement he brought forward his balance from 1894 and previous years, and on the other side he took in the £360,689 to reduce the amount he had to cover by the Treasury Bills.†

946. *Mr. Yarwood.*] If he had not taken in the £300,000, the deficiency would have been greater? Undoubtedly. He brought forward the estimated deficiency of 1894 and previous years as £1,324,897 7s. 6d. By taking in the receipts, and this particular credit of £345,699, he brought down the estimated deficiency of 1895 (half-year) and the previous years as £1,174,767 14s. 4d. When Mr. McMillan prepared his Bill to meet the deficiency for 1886 and previous years by Treasury Bills, he also took the balance shown by the Account with Ways and Means, and if you turn up the account dated 10th April, 1889, you will find that he also included all the payments for 1886 and previous years in excess of receipts, and made provision for them, no matter when such payments were made, whether in 1886, 1887, 1888, or 1889, by the Treasury bills he obtained in 1889, amounting to £2,600,000. That was the amount in the Act, but it was afterwards reduced to about £2,500,000.

947. After that the accounts were continued in the ordinary course? Yes; undoubtedly.

948. What I mean by the ordinary course is that the appropriations were dealt with at the end of that year? The new arrangement by Mr. Reid did not take effect until the 1st July, 1895, and up to that date all the old appropriations held good. An appropriation has a life of two years, and longer, if contracts or engagements had been made or entered into.

949. *Mr. French.*] Going back to the drift, from the statement which Mr. Dibbs put before you there is a manifest drift? Undoubtedly; but that statement does not include the proceeds of Treasury bills seemingly.

950. Mr. Dibbs asked you whether a statement like that showing the drift had ever been brought before the Treasurers;—I apprehend that when the Treasurer, of whatever period it was, arrived at the conclusion that there was this deficiency of £1,174,000, that was tantamount to acknowledging that there had been a drift? Yes; but he wiped that off.

951. And supposing that was the case, and that a clean start was made on the 1st July, 1895, you state that so far as the matter is within your knowledge there has been no drift since? None whatever. I am positive as to this.

952. *Mr. Yarwood.*] We are asked in these questions put before us whether the present system of dealing with the Trust Funds should be altered. You have been a long time in this business? Forty-one years in the Treasury building.

953. And you have seen a good many Treasurers? Twenty-two, I think.

954. I am not making any imputation, but I would like to know what your experience is with regard to that, and whether it would be advisable to separate the Trust Funds from the ordinary account? They are separated now.

955. We had the Bank Balance Book here the other day, and we were told—or I gathered that this is what the witness meant—that there is a public debt account? No, a public revenue account.

956. Well, a public revenue account, and that that consists of the Consolidated Revenue and the General Trust Funds? Yes; that is quite correct.

957. Now, I want to know whether, with all your experience, you would advise a separation of these matters? It would do no harm to have different banking accounts. The state of affairs would, perhaps, be more easily seen. The public would then see at a glance how much there was in the revenue account, because they can never tell now the position except by taking the other side of the account. It would be an advantage to see how much is at the credit of the Trust Account, and how much to the credit of General Revenue.

958. Question 37 runs as follows:—"The conditions under which these deposits were placed with the Treasury." Would this matter come within your knowledge? Everything comes within my knowledge. The conditions were that 3 per cent. interest was to be paid, and, as a matter of fact, if the moneys were actually wanted, we were to give them back. Some time ago there was a rush on the Bank. The Government had £600,000 of the Bank's money. Mr. See was Colonial Treasurer at the time, and he instructed me to go to the Bank, and ascertain if they wanted the £600,000. I had to fight my way through the crowd, as they evidently thought I wanted my money out of the Bank. After a good deal of pushing I managed to get in by the gate, and I went upstairs, and saw the directors. I gave them my message, and they said they did not require the money. It is understood that, if there was any similar rush, the Government would pay the money held in deposit. Referring again to the statement shown to me by Mr. Dibbs, I might tell the Committee the reason why I do not consider that it corresponds with any account in the Treasury. In the Treasury we brought to account the proceeds of the Treasury bills, and, having taken the credit of £1,174,000, less the £150,000 afterwards cancelled, all those debit balances disappeared.

959. *Mr. French.*] There is an actual entry passed? Yes, actual cash.

960. Was that actual entry passed in your books in connection with the 1889 lot? Undoubtedly. Mr. McMillan did not do it at once, as it might have been too great a drain on the Trust Funds. In December, 1889, he passed through sufficient to cover the balance at the debit of the revenue at that time, and a little more. It left a credit of about £60,000, I think, after making the transfer of £1,907,100. Then, afterwards, in August, 1890, he invested further Trust Funds in the balance of the Bills amounting to £616,784.

961. We will find these particulars in the Treasury books? Undoubtedly.

962. We will find a debit to one account, and a credit to the other? Certainly.

963.

* NOTE BY WITNESS.—The accrued interest credited did not come into this balance at all. It was credited in the 1895 and Previous Years' Account, and had it not been the amount to have been met by Treasury Bills, would have been so much larger.

† NOTE BY WITNESS.—I have not the document from which the figures £360,689 are quoted, but I find, on referring to the Ways and Means of 27th August, 1895, the amount should be £345,699 13s. 9d.

F.
Kirkpatrick,
Esq.
3 May, 1900.

963. Can you tell me what the debit account is called, or what the sums are debited to? I am not certain as to the exact name of the account, but the transaction can be seen in the Treasury books.
964. If you passed a credit to the Consolidated Revenue you must have debited some account? Yes; the credit would come in as the proceeds of sale of Treasury bills. The bills were sold to the Trust Accounts.
965. *Mr. Yarwood.*] Would you look at Questions 38 and 39? With regard to 38 I may say that at the present time none of the advances are covered by securities. Some time ago they were partly invested in Treasury bills—the old lot of 1891—but none of these later ones.
966. You say that the rate of interest is 3 per cent.? Yes; but there has been a change, and I think that a portion of it is at $3\frac{1}{2}$ per cent. That runs up to 30th June. This refers to the later operations, the renewals.
967. During the time the major portions of these things were dealt with, could you say it was 3 per cent.? Yes.
968. What is your answer to Question 39? My answer is that it was not stipulated for what purpose. That rested with the Government. The Bank was glad to get 3 per cent. for its money, I suppose.
969. *Chairman.*] Do you think it is a proper thing to transfer the profit on the Post Office Savings Bank to the Consolidated Revenue? Certainly.
970. Suppose a loss were to take place, such as a defalcation of £50,000? The Revenue would have to bear it.
971. *Mr. French.*] Your view is, that as the Revenue would bear any loss, whether it was a loss in interest or by defalcation, or any other cause, any profit that is made is given to the Consolidated Revenue as a consequence? Yes.
972. *Mr. Yarwood.*] The view that is taken of the General Post Office is that it is a Department of the Treasury? They have an independent Minister; it is not a Department of the Treasury. The Treasury could not give any instructions or directions to the Post Office.
973. But, financially, it is part of the Treasury? All Departments to a certain extent work independently with the Treasury.
974. But the money that is received in the Bank is handed to you? Yes.
975. And I suppose that, bar some moneys they keep for ordinary purposes, you draw all their moneys? Yes; only the Postal Department would not like to be classed as under the Treasury.
976. *Chairman.*] Do you not think it would be a fair thing for the Government to charge the Post Office Savings Bank a good amount for rental of their premises before striking the Profit and Loss Account? Yes, I think so.
977. *Mr. French.*] Will you please look at question 31. I would like to know what the practice has been with regard to handing over interest payments to the Bank of England;—was there a change of practice at any time, or has that always been the practice? Before Mr. Reid took office we used to get accounts from the banks in England of the payments made, and then we brought them to account in the Treasury books. When he came in he said, “That is a peculiar way of dealing with the matter, because it is four or five months after the payments are made before you charge them. Get a cable from England, and charge accordingly.” For instance, at the end of the month we get a cable message from England of the transactions of the previous month, so far as the interest payments are concerned, and we charge the amount. So the transactions in June for interest would not be reported until the first week in July, and then we make the entry in our books. So Mr. Reid brought about an improvement in that direction.
978. Previously they were brought to account in your books on receipt of advices? Yes.
979. Now they are brought by a system to account on the 1st July? Not exactly on the 1st, but during the month of July they are brought to account as regards the payments for interest during the month of June. During the first week of July, or the first week in any month, we get a cable message from the Agent-General telling us what is the amount paid for interest on inscribed stock or on debentures, and on that we make the necessary adjusting entries.
980. *Mr. Yarwood.*] Has that been the rule ever since the 30th June, 1895? Yes.
981. Then the statement up to June, 1896, would contain all but one London payment? It would contain all but the payments during the month of June on account of interest, and the payments during May and June for other services.
982. *Mr. French.*] You see no difficulty in getting the London payments into account by cable? None whatever, if they could give us the proper headings.
983. That only involves a system of advising the proper headings? But the cables might be expensive. They might have to send us a hundred words.
984. You would not want so many as that? Sometimes there are a great many entries.
985. I do not mean to cable each entry, but the results for the month of June. The mail advices would bring you to the end of May? To the end of April, and the results of May and June would have to be cabled. Of course we would not have the details.
986. *Chairman.*] The total could be given? Yes; but we might not know to which head of service to charge the amounts making it up.
987. *Mr. Yarwood.*] How do they make the payments in London;—do you send vouchers from this side and say “Please pay So-and-So”? No. Letters of credit are issued for the interest on debentures and other services, and these are operated upon. Interest on letters of credit are not sent for inscribed stock, which is paid by the Bank of England.
988. But before you pay anything out of the Treasury here the voucher goes through a Department, and then to you;—but what about the London vouchers? They are paid when they come to us.
989. You only give general instructions with regard to the payments? Yes; letters of credit are forwarded for all services except interest on inscribed stock.
990. On the 30th June, 1896, the Consolidated Revenue—the General Account—showed a credit balance of £476,530 ls. 10d.? Yes.
991. That is, after including £1,174,000 Treasury bills, of which £150,000 was cancelled? Yes.
992. That left £326,530 ls. 10d. as virtually the balance on that date—the 30th June, 1896? Yes.
993. Taking the balance of £116,523 on 30th June, 1899, there is clearly a drift of £210,000—that is, taking the entire account; the country has gone astern to that extent? I do not know that it has, and I will tell you the reason. When the balance of £326,530 was shown, there were certain outstanding accounts which had to come in, and were paid subsequently.

- F. Kirkpatrick, Esq.
3 May, 1900.
994. But then the £1,174,000 was credited to cover everything? I mean on account of that current year. I admit that during that time—1896 to 1899—the expenditure exceeded the revenue by £210,000, but that does not show that there was a drift. It merely shows that the outstanding accounts were paid.
995. *Mr. French.*] What is your answer to Question 25? I could not say if it as been relieved.
996. And your answer to Question 35? That can only be answered in the affirmative.
997. *Mr. Yarwood.*] What was the nature of the Indemnity Act? The Indemnity Act was to relieve the Treasurer from the effect of having broken the law. The Treasurer and all the Treasury officials broke the law in paying without the appropriation of Parliament and without the warrant of the Governor certain moneys for current expenses. I may say in connection with all these matters that they were payments made for services which had previously been authorised by Parliament,—that is, they were current services, not new services, but the appropriations had run short. Take, for instance, the railway wages. We continued to pay the railway wages, although the appropriation was exhausted. The services were all in the nature of current services which had formerly been provided for by Parliament, but the appropriation for which was insufficient. At the same time the law was broken.
998. *Mr. French.*] Technically broken? Yes.
999. But the country had to be carried on? Undoubtedly.
1000. *Mr. Yarwood.*] There was no advantage in carrying that arrangement on for so long? You mean so far as the accounts were concerned.
1001. Yes? No advantage whatever. On the contrary, if it had been stopped it would have made the accounts look much better than they were in reality.
1002. When you got the Indemnity Act, did it cover the accounts? It was merely to cover the procedure.
1003. It would not affect any of the items “above or below the line,” as it is called? Not in any way. The payments had been made and charged to proper accounts, but the appropriations had been exceeded.
1004. Will you look at Question 40? The payments were illegal to that extent, as the Audit Act provided that the Auditor-General was to be guided by the appropriation of Parliament. That the reading of the Treasury was correct is proved by the fact that an Act has been passed known as the Loan Account (Transfer) Act, 1899, which enables the Auditor-General to certify to warrants, if the sums stated therein have been authorised by Parliament, without any reference to the question as to whether funds were available or not. That is the law at the present time, and the Auditor-General has been signing warrants ever since that Act was passed, notwithstanding that we had not raised any money for loan services. That goes to show that the position taken by the Treasurer—that the Auditor-General should be guided by the Parliamentary appropriation—is apparently considered to be the sound one. One question arose at the time. If the Treasurer had not paid, contractors would have been put to serious inconvenience, and we might have had to close the door, as the Auditor-General would not sign the warrants. After a great deal of correspondence, the matter was submitted to two eminent Barristers-at-Law—Dr. Sly and Sir Julian Salomons—and these eminent counsels, after considering the question, decided that the Auditor-General was right upon a technical point, and that the money had not been raised by loan. So there was not anything really wrong in it.
1005. That is not imputed, I think; it may have been irregular? Yes, it was irregular to the extent that warrants had not been obtained.

[Adjourned till Monday, 7 May, 1900.]

TWELFTH DAY.—MONDAY, 7 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN.)
J. RUSSELL FRENCH, Esq. | F. N. YARWOOD, Esq.

[The Committee met in private.]

THIRTEENTH DAY—TUESDAY, 8 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN.)
F. N. YARWOOD, Esq.

The Chairman announced that Mr. French was absent through illness.

Robert Rowan Purdon Hickson, Under Secretary for Public Works and Commissioner for Roads,
examined:—

- R. R. P. Hickson, Esq.
8 May, 1900.
1006. *Chairman.*] We observe in the Public Accounts certain amounts debited to the Consolidated Revenue and certain amounts debited to the Loan Account;—we want to know whether it is the heads of the Departments that have the direction in the matter, that is, as to what should be charged to Loans, and what to Consolidated Revenue? In preparing my estimates for the year, I submit what works have been recommended, and what works should, in my opinion, be carried out, and the Minister marks these either against Revenue or Loans—either against Revenue, the Long Loan, or the Thirty Years' Loan.
1007. Does every Ministerial head of the Department do the same thing? That I could not say—I could only speak for our own Department. But we are practically the only Department that has Loan Estimates.
1008. Does the Minister go beyond you in these matters, or does he take your recommendation? The general practice is, that works of a reproductive character and permanent, such as railways, are put on the Long Loans. Works of a more or less temporary character, that is to say, that have a life of twenty-five or thirty years, are put on the Thirty Years' Loan. For some years past there have been very few actual works put on the Revenue Estimates at all. Those estimates are nearly entirely composed of salaries, the Roads Maintenance and the Dredge Staffs.

1009.

R. R. P.
Hickson, Esq.
8 May, 1900.

1009. Then you would recommend and your Minister would confirm, is that it? I recommend what should be voted, but he decides after consultation with me as to which items should go under the various headings.

1010. I do not know whether it is a fair question or not, but do you ever disagree on that point;—that is, are there not some things charged to Loans that ought to be charged to Consolidated Revenue? I do not know that there is anything charged to the Long Loans that should be charged to Revenue. It is a very moot point whether the principle of the Thirty Years' Loan is a sound one or not. My own opinion about the Thirty Years' Loan is that, if carried out in its entirety, there is no objection to it; but to carry it out properly you should, in my humble opinion, each year vote a thirtieth of the amount and put it away to a suspense account, so that at the end of the thirty years you would have that money in your hand to renew the structure.

1011. And not to be mixed up with the General Accounts of the Treasury? That is so.

1012. Suppose you had built a bridge at a cost of £30,000, and you found it necessary some years afterwards to spend £5,000 upon it, would you consider that expenditure for repairs a fair charge to Loans, or should it be charged to Consolidated Revenue? I do not think any repairs should be charged to Loans.

1013. For instance, Governor Phillip's statue is charged to Loans;—in your opinion, ought that to be charged to Loans—is that a reproductive work? No.

1014. Is it not a liability, and not an asset—something that requires painting, and looking after every year? I think that under the system we have got into too many things are charged to Loans.

1015. Ammunition, for instance, ought not to be charged to Loans? I should think not. I did not know it was.

1016. *Mr. Yarwood.*] I know that in one Loan Estimate that was submitted to Parliament for approval Magazine rifles appeared;—would that come under the Works Department? No; the Chief Secretary's Department. I find that since 1894, inclusive, we have been spending about £130,000 a year, chargeable to the Thirty Years' Loan. In the letter I got from your Secretary, I am asked whether these services were properly chargeable to Loans, and I am also desired to afford information showing the amount by which the Revenue has been annually relieved since the introduction of the Thirty Years' Loan system. It would be impossible for me to give that information, for the simple reason that, apparently, the revenue has been relieved to the extent of £130,000 a year; but if it came to putting these items on the Revenue Estimates I might not have got anything. [*Statement put in and marked X 2.*]

1017. Would there be amongst those items on the short-dated Loans any that have on past occasions been charged to the long-dated Loans? I think not; at all events, very few. The items that are in that list would be charged to Revenue.

1018. But you have no hard and fast line between the two, I take it? There is no hard and fast line, but the general one which I have referred to. Works of a reproductive or permanent character are charged to the Long Loans—not necessarily reproductive and permanent combined, because, for instance, a building like this one that we are sitting in is not reproductive, but, at the same time, it is permanent. Such a building is charged to Loans.

1019. But it saves the Government rent; it is reproductive in that way? In that sense it is. All works of a more or less temporary character, such as wooden post offices and timber bridges, which in the past used to be charged to Revenue, have for the last six or seven years been charged to the Thirty Years' Loan, on the principle that at the end of thirty years you would have to rebuild them, because they would be worn out. That principle appears sound enough as long as you put a thirtieth of the amount away into some suspense account, so as to have it at the end of the thirty years to rebuild a structure. But if you do not do that, the whole thing becomes a farce.

1020. Is thirty years your estimate of the life of every one of such works? It is about the average.

1021. I saw "wood-blocking" in one of the estimates. You would not reckon that that had thirty years' life? We have had wood-blocking down for ten years, and it seems as good as the day it was put down. Some things last forty-five years, some last twenty years, so we take thirty years as about the fair average of all the buildings and structures.

1022. *Chairman.*] You said just now that the Thirty Years scheme was introduced six or seven years ago? Yes; I think it was in 1894 or 1895.

1023. It was under Mr. Reid, was it not? It was Mr. Reid who introduced it. [*Loan Acts put in, and marked Appendices Y 2, Z 2, A 3, B 3, C 3, and D 3.*]

1024. Do you consider it fair to charge the Loan Account with the converting of a dredge from one class into another class? I think so—that is, if it is a fair thing to charge the dredge in the first instance to Loans. In converting it you are practically making a new vessel of it.

1025. You would charge it to the Thirty Years' Loan? The dredges have been charged to the Long Loans. A dredge at the end of thirty years, owing to the repairs that have been made to it, is nearly as good as the day it was built, because we are always putting new engines and boilers in them and patching them up.

1026. Why do you think that the repairs to a bridge should be charged to Revenue and repairs to dredges be charged to one of the Loan Accounts? I do not think they are exactly on the same footing, although I am not very strong about the dredge matter, but I think the repairs of bridges ought to be charged to Revenue.

1027. *Mr. Yarwood.*] The line of difference between the questions Mr. Dibbs put to you, I take it, was that this was the conversion of a dredge, and you say that that service should be charged to what the original dredge was charged to; if you repair the bridge you pay that out of Revenue? Yes.

1028. But if you rebuild the bridge which has been charged to Loans? We cannot keep a bridge in repair as we can keep a vessel. A vessel is being continually kept in repair by a new boiler one year or a new engine the next year, so that at the end of thirty years it is as good as at the beginning. But a bridge all wears out at the same time, approximately in about thirty years. Then you have to start *de novo* and put up a new structure.

1029. Perhaps you build a bigger one? Probably you may if traffic has increased.

1030. Under the old regime before the Thirty Years' Loan system what would they have done? I think the service was mostly charged to Revenue, but that was a little before my time before I had control of the expenditure.

1031. There has been a large increase in the Loan debt of the Colony in late years;—I am not referring to the last five years, but, say, the last twenty years;—I suppose it would not come within your province to tell me how the proportion of the Railway debt compared with the total debt of the Colony would stand as compared

R. R. P. compared with twenty years ago? I could not tell you off-hand, but I could get that information at once
 Hickson, Esq. from my accountant. We could give you any details of the Loan expenditure for many years back.
 8 May, 1900.

1032. There is one question we are asked in the list of questions set before this Committee, that is Question Number 21, which reads as follows:—"Whether a sum of £216,000 was not saved from the Vote in 1893 on account of Roads, Endowment to Boroughs, District Councils and Shires under the proposed Local Government Bill, and this sum called back into existence and spent partly in 1894 and the first half-year of 1895, but the larger part in the year 1895-6, on the plea that the savings had been improperly made. And whether an examination of the annual expenditure on Roads does not show that the action referred to enabled a large reduction to be effected in the amount charged to the year 1895-6 as compared with previous years." I do not want you to answer that question, but I want to ask you something with regard to it. We have had figures put before us showing a certain annual expenditure on the roads to the debit of Consolidated Revenue. Can you tell me what the nature of that annual expenditure is, because, according to the figures, there is undoubtedly in the subsequent years a regularity in the amount spent on roads and bridges, and charged to Consolidated Revenue, that is in striking contrast with the amount that was charged in the first year of the cash system;—I want to know if there is anything in the nature of the expenditure that would make any considerable item in it—anything else but a consistent annual outgoing? No; not in roads and bridges.

1033. What does the item consist of? It consists of the maintenance pure and simple of all the roads and the minor bridges and small culverts throughout the Colony. A good deal of that is done by maintenance men who are regular hands—there are about 1,500 of them—by small contractors, and sometimes butty gangs. We do some new road construction out of the amount, but the sum placed at my disposal for the last few years has been so small that we have not been able to do anything worth speaking of in the matter of new road construction, but whenever we can I do some new road construction, such as the cutting off of a hill, making a deviation, and putting on some new metalling.

1034. Do you remember what the amount of the expenditure yearly is;—it is about half a million, isn't it? It was £560,000 last year.

1035. Will you look at this paper, which shows the amount spent annually for some years past;—is there any reason—anything in the conduct of things—that would account for the difference in the amount shown? That is done by the Treasurer. I make up the amount that I ask for for the roads and bridges for the year, and that is submitted to my Minister, who goes through it, and, perhaps, strikes off a little bit. Eventually, it goes to the Cabinet, and they deal with the whole of the Estimates that are submitted by the Departments. My estimate goes direct from my Minister to the Cabinet. It is dealt with there, and, when the total expenditure of the Departments is added up, perhaps it is found to reach farther than the Treasurer is prepared to go, and the Estimates are sent back to the Departments to be cut down to a certain amount. For the last few years our Estimates have been sent back to be cut down to £550,000.

1036. I notice a big amount before the crisis of 1893, and in 1894 it was lopped-off considerably;—I suppose that was on account of the crisis? Yes.

1037. And in 1895-6 the figures go back to £719,000 odd? That was to make up for what was cut off before.

1038. In 1895-6 I suppose you put on extra labour? Yes. There is a peculiar feature in connection with the expenditure on roads. During that period of ten years our roads have increased to the extent of 11,000 miles additional in length, and notwithstanding that we have from £200,000 to £300,000 annually less to spend on them.

1039. *Chairman.*] And the rate of wages is about the same? The rate of wages is a little more. We are paying 7s. a day now, and in 1890 we were paying 6s.

1040. *Mr. Yarwood.*] But as a road gets older it does not want so much money spent on it? Oh, yes, it does. To maintain it, it wants the same. In point of fact it wants more, because the traffic is increasing throughout the Colony, and the roads are getting more cut up. I would like the Committee to refer to my annual report, as it gives the particulars of the expenditure, and draws attention to the point I have just brought out.

1041. *Chairman.*] Can you tell us whether it is the custom, when each Department sends in its estimates, that they have to submit to the reducing process? I fancy they all do.

1042. You do not know of your own knowledge? I could not say from my own knowledge.

1043. Can you think of anything that might interest the Commission in regard to a different mode of keeping the books in your Department? I might suggest that you should ask my accountant to give evidence in connection with that. I think you will get it clearer from him than from me, because he is a professional accountant. I am entirely in accord with him in his views, and I think he can suggest some radical and important changes.

1044. You look upon him as a good accountant? He is one of the best accountants in the service.

1045. Has he always been in your Department? He was Examiner of Accounts for many years, and when the change was made in 1896 he was transferred to the position of Chief Accountant. We have been trying for many years to get rid of red tape as much as possible. We have reduced the forms. We were overburdened with forms. And the Chief Accountant has been helping me in every way, but so far we have not been successful. With regard to the system of payments, I may say that our expenditure is about a million and a half in the year. About half of that is paid direct by our own cheques, and the other half is paid by the Treasury. This leads to endless trouble. Contractors do not know where to go for their money; sometimes they go here and sometimes they go there. Sometimes we tell them that the amount is paid, and subsequently we find that the vouchers are lying in the Treasury for some reason or other.

1046. *Mr. Yarwood.*] What is the dividing line between the two systems? Practically none whatever. The Treasury sometimes takes a voucher and keeps it there and pays it, and sometime we pay a voucher.

1047. *Chairman.*] There is no system? No recognised system. We try to pay as much as we can in our own Department, because we can do it much more quickly, and give more satisfaction.

1048. *Mr. Yarwood.*] Do you account to the Treasury for your payments? Yes, and they refund the amount to us.

1049. *Chairman.*] I have frequently heard that accounts are delayed—I do not say in your Department. For instance, customers of the Bank come to me and say that they cannot get their money till the first week in July. Do you know, speaking of your own Department, whether there is any delay in the payment of accounts at the end of the financial year—the 30th June? Yes, there is sometimes delay.

R. R. P.
Hickson, Esq.
8 May, 1900.

1050. That delay might be avoided? Well, it might if the money were in the Treasury.
1051. But the cheques are always honored? That is really a Treasury matter.
1052. *Mr. Yarwood.*] Was there any confusion when the system was changed;—one witness told us that an impression had got abroad that everything ought to be paid by the 30th of June, and he said there was a bit of a rush on the Treasury by people who wished to get their money, because they thought that if they did not get their money on the 30th June they would not get it at all? I could not tell you anything about that of my own knowledge. All accounts that we pay are paid when they are due. We do not wait for the 30th of June, or any other time.
1053. Where do you get your money from? Back from the Treasury.
1054. You have a banking account of your own? Yes; we have £30,000 to our credit.
1055. That is a sort of Suspense Account in the meantime? A floating advance. We pay whatever we can from that. For, instance, we pay all wages. Salaries, of course, are paid at the Treasury. We pay small contracts from our banking accounts; in fact, we pay as much as the account will stand. Then vouchers are sent in in an abstract form to the Treasury, and the money that we have paid is refunded to us.
1056. Do you, in that account, mix up any deposits from contractors? No; we keep a separate account for those.
1057. Is that separate account kept by your Department? Entirely. That is a separate account, kept in a separate set of books.
1058. When you get a tender, the person tendering has to tender so much? He has to deposit money or a cheque, and that is put to a deposit account that we keep in the Bank, and the money is refunded to the contractors when it becomes due—that is, when the contract is finished.
1059. Supposing I tendered for a work and did not get it, when would I get my deposit back? Within a week. We cannot send them all back straight away, because it is not always clear which is the lowest tender; but some can be sent away, and are sent back the next day. But some have to be kept a week or perhaps a little longer. With a lump sum contract, of course, you can tell at once whether it is the lowest, but if it is a contract on schedule rates you cannot tell till the calculations are made.
1060. *Chairman.*] We notice that the expenditure for the year ended 30th June, 1899, was abnormally low; it was considerably less than in previous years—say three years ago;—can you suggest a reason why it was so? No, I cannot.
1061. What I want to get at is whether the Department held back accounts in order to help the Treasury over the 1st July? I could not say.
1062. But so far as your accounts are concerned? So far as our accounts are concerned nothing was kept back—that is, I am speaking of the accounts we pay ourselves. We cannot tell about the Treasury accounts until a Contractor complains.
1063. Can you give me any idea where we can get that information from? From the Treasury, I presume.
1064. If they could tell us? I suppose they could tell you.
1065. *Mr. Yarwood.*] I notice the item, "Erection of Court-house, Peak Hill, £2,000; amount expended, £2,000";—I take it that the first amount is your estimate of the probable cost, but surely the amount expended would not come to the same to a penny? Probably in that case it was more.
1066. What would you do with regard to the balance? We would get that from a general vote which we have.
1067. *Chairman.*] Have you any suggestions which you could make? I think not. I will send you a copy of my Annual Report, which will give you some figures.

Edward Twynam, Chief Surveyor, Department of Lands, examined:—

1068. *Chairman.*] We want to get some particulars about the land in Martin-place, such as the frontage and depth, and the amount which the sale realised? The sale of the land at Martin-place has been conducted wholly by the Department of Public Works from the outset; but I have here the information that you asked for in the letter of your Secretary. This lithograph of the sale held on 14th February, 1900, shows the remaining unsold allotments, and, at the upset prices which were advertised, the value of these allotments would be £98,028. There were three allotments sold at that sale, and they realised £79,365. I have got these figures from the valuator of the Public Works Department, Mr. Sievers.
1069. *Mr. Yarwood.*] Did he put a value on the land? The upset prices were not published, and I apprehend he recommended the reserved prices. If the unsold allotments cannot be sold now they will sell by-and-bye at the prices I have given.
1070. As to Martin-place, I take it that that is the whole of the land to be realised on? I believe so.
1071. When that street was being made there was some talk, and as a matter of fact something was done, about what they called a betterment principle;—does that betterment principle in any way apply to this particular part of the ground? It cannot affect the upset price of this land. The betterment applied to the compensation which was paid for interfering with other land further up the street.
1072. There was money paid? I believe so, but I am not able to tell you much about it. I was not here at the time.
1073. There is a certain amount put down as representing the expenditure in connection with this particular bit of property: the account is called the General Post Office Approaches Account; taking a reasonable view of the situation, it is evident that there is a big loss on the whole affair—you can assume that;—now, did the country gain anything beyond a wider street opposite the Post Office by this particular transaction? I am not able to tell you. I have not been concerned in the affair in any way whatever, and the only way in which I could get that information would be by looking up the Parliamentary papers.
1074. It is not within your knowledge? No; it is not.
1075. *Chairman.*] A Municipal Bill was passed in connection with the widening of Moore-street;—was the Government called upon to pay to the Corporation anything for betterment in the same way as the Commercial Bank and the Bank of New South Wales had to pay? This land in Martin-place was not Crown land. It was resumed under the General Post Office (Approaches Improvement) Act, 1889, for the purpose of opening up the street.

E. Twynam,
Esq.
8 May, 1900.

- E. Twynam, Esq.
8 May, 1900.
1076. But when this street was resumed had the Government to pay as their neighbours had to pay, a betterment sum for the widening of Moore-street? I am not able to tell you.
1077. *Mr. Yarwood.*] Was this land ever offered for sale before? I think that the whole of the land was offered for sale before the last auction.
1078. At the time when the Mutual New York Life Insurance Company bought? Yes; I think all the allotments were offered together.
1079. *Chairman.*] What have you to say about the Centennial Park matter? The Centennial Park was resumed under the Centenary Celebration Act, to which there is a schedule describing the land resumed. That area is indicated by the green edging on this plan which I produce. Under the Act it was enacted that there should be an area set apart for a State-house, and an area of not less than 640 acres for a public park, and after such portions had been so set apart the remainder of the land so vested was to be laid out in building sites, and sold or leased by public auction. That Act is dated 13th July, 1887, but there has been no land sold or leased, neither has there been any State-house area laid out. But by proclamation of 16th February last the whole area has been proclaimed a public park by direction of the Lieutenant-Governor.
1080. There are no roads laid out in the park for building sites? The green edging on the plan represents the whole area resumed under the Act. By this Act it is expressed that the land shall be appropriated in certain ways, namely, that there shall be not less than 640 acres to the park, and a certain area for a State-house—by the way, it does not state how much for the State-house,—and the residue of the land was to be sold or leased. I believe there have been a good many difficulties in the way of dealing with these matters, but by order of the Governor lately the entire area has been proclaimed as a public park. The aggregate area is 745 acres.
1081. *Mr. Yarwood.*] That is about 100 acres over and above what they wanted? It is not specified what area was to be set apart for the State-house. However, over the 640 acres for a park there would be left 105 acres.
1082. There would be 100 acres for sale if they used 5 acres for a State-house? If they did so; yes.
1083. There has been an area appropriated in one place for a reservoir, and a reservoir has been constructed in the park? Yes. The difficulty which they were under, I think, was that they could not enforce the regulations for the proper conduct of the park until the area was proclaimed. They had some trouble with trespassers and with some other people, who simply defied the rangers, and I believe that was the reason why they appropriated the entire area for the park.
1084. *Chairman.*] Then there is no chance now of reducing the amount to the debit of that account? It can be done by revoking the action taken over a part of the land. I believe there was also another difficulty in the way. In the Act it is provided that the plan of the disposal of the land shall be approved by the Governor by the 28th day of January, 1888. That was not done, and so that made another difficulty. Sub-section (b) of section 3 of the Act reads as follows:—"A portion not being less in area than 640 acres shall be set apart by the Governor as a public park. Such park shall be designated the Centennial Park, and shall be laid out according to plans to be approved by the Governor, but so that the same may be opened to the public on the 26th day of January, 1888." [*Act 51 Vic. No. 9, together with Proclamation, handed in and marked Appendices E 3 and F 3.*] That implies that the plan shall be approved previous to the opening of the park. This Act was administered by the Chief Secretary.
1085. *Mr. Yarwood.*] Can you tell me whether your Department has been asked at any time to divide off sections with the view of disposing of the land? Yes. I think it was about the year 1889 when a design was made for a subdivision of such part of the land as was not required for the park. There the matter ended. About three years ago, I think, by direction of Mr. Carruthers, I went into the matter very carefully, and a design was made with the view of subdividing the park outside the dwarf wall to the westward of the park, and another portion on the outskirts of the park which was not wanted for public recreation. I am aware that Mr. Carruthers advised the subdividing and leasing of the land, but he only advised, as he did not administer the Act.
1086. But he did not advise selling it? I am not sure; I think that his intention was to lease, and not to sell.
1087. *Chairman.*] Was any estimate made? Estimates were made as to the value of the land.
1088. Had you only one frontage on the green line? The land was subdivided to the best advantage. Mr. Carruthers had the idea of enlarging the area for sale by taking some land from the old rifle range. He expected to get land vested in the Sydney Council, and the rifle range.
1089. *Mr. Yarwood.*] When you say that Mr. Carruthers made the recommendation you speak of, would there be a minute from him to another Department suggesting what should be done? He would send the papers on to the Chief Secretary, simply stating his opinion.
1090. Could we have those papers? I suppose you could by asking for them from the Chief Secretary's Department.

Andrew James Doak, Controller of the Government Post Office Savings Bank and the Money Order Office, examined:—

- A. J. Doak, Esq.
8 May, 1900.
1091. *Chairman.*] The Commission would like some information with regard to your Profit and Loss account; as to how it has accumulated from time to time, and how you have disposed of it. Have you any information with you? Yes; your Secretary asked for that information, and I have brought here a list showing each year's profits from 1871 to 1899. [*Appendix G 3.*]
1092. I notice that in 1880 there was a very large profit as compared with previous years? That is on account of the valuation of the debentures.
1093. The increased value of your investments? Yes. The Treasury treated the accounts somewhat differently from what I did. If they purchased debentures at 95, they charged the Trust Account with 95, and credited it with 100. They only keep one account, a Trust Account, and they debit and credit the same account with the transaction. I do not. I keep two accounts—an Investment Account as well as a Savings Bank Trust Account.

A. J. Doak,
Esq.
8 May, 1900.

1094. At the end of ten years you took stock, and you found that your debentures increased in value, and this is a book entry to that amount? That is scarcely so. It was done to bring the books in accord with the Treasury books, as the Treasury books showed one thing, and Savings Bank books showed another. So in that particular year an adjustment was made. Mr. Hill was controller that year.
1095. *Mr. Yarwood.*] In your books do your investments stand at their par value? At their par value; it does not matter what the cost is.
1096. *Chairman.*] Some of your investments you got at 95, and they were afterwards worth 100? Yes, and some which cost 114 were taken at 100.
1097. What is this premium of £13,000 odd which I notice in the return? On a large investment.
1098. What would the investment be? Four per cents., I fancy.
1099. Bought from the Government? Yes.
1100. Bought at a premium? I fancy it was bought from the Church and School Estate, but I am not sure; I have nothing to do with that.
1101. Do you know the amount of stock they sold you in 1899? I could not tell you upon which particular investment that was; this paper shows the whole of the investments. This was prepared by the Treasury.
1102. I notice in 1895 you lost £9,302 18s. 8d.;—was that caused by defalcations? No; the Treasury without notice reduced the rate of interest on the uninvested balance (which was considerable at that time) from 4 to 3 per cent. It was a reduction of 1 per cent. on one million and some odd thousand pounds.
1103. *Mr. Yarwood.*] What did you do after that to restore the account? We reduced the interest payable to the public. That was done in the beginning of the following year. It is not possible to reduce the interest without giving notice to the public.
1104. *Chairman.*] You made a profit in 1896 of £1,250, and in 1897 of £15,000 odd;—how do you account for the difference? The business increased rapidly, and no large premiums were paid; the premiums are charged against the profits.
1105. All your stock is at par value? Par value.
1106. I suppose you suggested to the Government to take these profits? No; I did not.
1107. Why? Because I did not think it was a proper transaction. The Savings Bank Act does not justify the payment of such moneys to Revenue.
1108. *Mr. Yarwood.*] Was that the first occasion that the transfer was ever made—the sum of £5,000 in 1893? That was the first transfer.
1109. I suppose the legality of the thing was gone into at the time? Before the transaction was completed I suggested that Executive authority be obtained.
1110. Would they consult the Attorney-General on that point? I think not.
1111. *Chairman.*] Were the two amounts of £5,000 and £25,000 taken by the Dibbs' Government? I could not say.
1112. 1893 was the time of the Dibbs' Government, and 1894 was partly the Dibbs' Government and partly the Reid Government? It was done at the suggestion of the Treasury Inspectors. They go through my books every year.
1113. *Mr. Yarwood.*] Supposing for the sake of argument it was proper to make these transfers of profit; looking at the thing from a common sense point of view the money that is transferred should only be such sums as arise within a certain period;—what I want to get is the figures to show how much could have been transferred, supposing on the 31st December, 1894, all you had made had been transferred and you started afresh? I have given the profits each year as distinguished from the accumulated profits.
1114. *Chairman.*] Could you make out a statement showing the increase from year to year? Yes.
1115. I would like to know the date when the £25,000 was paid over to the Treasury in 1894? I could not tell you by the papers before me.
1116. You could let us know that? I tried to get the papers, but they were at the Treasury at the time.
1117. What is your idea as to what should be done with the profits if the Treasury is not to receive them? My idea is that the profits should be retained as a sort of Reserve Fund in the Savings Bank.
1118. In case of accidents? In case of accidents, such as the depreciation of the debentures. [*Copy of the Savings Bank Act handed in and marked Appendix H 3.*]
1119. *Mr. Yarwood.*] From what section of that Act do you draw the conclusion that this money did not form part of a Consolidated Revenue? Section 15 seems to me conclusive. It reads as follows:—"All expenses incurred in the administration of this Act shall be paid out of the moneys received under the authority of the Act." The Act does not give authority to make any other payments, except repayments to depositors with interest. That is referred to in section 5.
1120. Section 6 appears to provide that if there is any deficiency the Consolidated Revenue shall make it good? That is so.
1121. It does not deal with any surplus? There is nothing in the Act.
1122. *Chairman.*] Your only objection to the Government taking the money is that it is not in accordance with the Act;—you have no objection personally? Certainly not. It is only because the Act does not authorise it.
1123. Do you pay any rent for your building? No.
1124. You have a large frontage to Pitt-street? We have the whole Pitt-street frontage.
1125. *Mr. Yarwood.*] Where does the profit from the Money Order Office go? That is all revenue.
1126. The Savings Bank transactions are pure and simple Savings Bank affairs? Exactly. The Postage Act provides for the Money Order business, but that is a different Act altogether.
- 1126½. Has there been any amendment of the Savings Bank Act? No.

[Adjourned till Wednesday, 9 May, 1900.]

FOURTEENTH DAY—WEDNESDAY, 9 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

John Vernon, Treasury Accountant, further examined:—

J. Vernon,
Esq.
9 May, 1900.

1127. *Witness.*] I now hand in a Return showing the particulars of the General Post Office New Street Resumption Account Suspense Account. [*Marked Appendix M 3.*]

1128. *Chairman.*] Looking at this Return, do I understand that Mr. Reid, finding a sum of money had been charged to Consolidated Revenue some time in 1894, credited his Consolidated Revenue Account, and charged his Suspense Account? He carried it to a separate Ledger Account as a Suspense Account. Of course there was no money passed.

1129. That did not go to the credit of the Consolidated Revenue except as a separate account? Just as a separate account. Of course it would credit the Ledger Account.

1130. Was that credited in 1894? Yes.

1131. Did that credit entry in 1894 make the Consolidated Revenue better? I should have to look that up, but I don't think so. It would be simply treated as a transfer. The Revenue Ledger Account would undoubtedly be better by the amount transferred to the Suspense Account, but it would not come in as an item in the year's revenue.

1132. If the items for the five years, from 1894 to 1899, had been charged to Consolidated Revenue, that would have made the matter worse for the Treasurer? Yes.

1133. *Mr. Yarwood.*] I have here a return that was given to us yesterday by Mr. Doak, of the Savings Bank. It is a progressive statement of the profit and loss that has been made by the Savings Bank, and gives a list of the transfers to the Consolidated Revenue. In 1895, £5,000 seem to have been transferred to the Consolidated Revenue, and apparently, according to this return, a debit balance was left at the end of the year of about £5,200. Would you know off-hand how that was? No; I would have to look it up.

1134. But you would not make transfers from the Post Office Savings Bank profit unless the profit was there? Certainly not. I cannot understand it at all.

1135. I think I know where the explanation lies. Did you not reduce the rate of interest to the Government Savings Bank without giving them notice? I believe that we originally paid 4 per cent., and the rate was reduced to 3 per cent. with the reduction of the general interest on loans.

1136. What I wanted to get more particularly was the fact that a transfer of profit has never been made unless the profit was there? I cannot comprehend its being made unless the profit was there. I have never known such a case. [*Witness handed in a paper marked, "Memorandum of Liabilities on the Consolidated Revenue Fund as on 31st December, 1894, 30th June, 1895, and 30th June, 1899, marked Appendix K 3."*]

1137. In this paper, which you have just handed in, I notice this passage: "The amount of balances of votes and repayments written off which might be taken on an estimate, £140,116." What are those? Those are unexpended balances on the votes of Parliament, the appropriations for the year. You can never expend a vote exactly. You have all sorts of items from a pound up to some thousands of pounds, perhaps, on a certain vote which is taken in a lump sum. These items are written off at the end of the financial year, written off absolutely, and at the end of the financial year ended 30th June, 1899, £140,116, consisting of such unexpended balances, was written off.

1138. Can you give us the details of that item? Yes. That note (referring to statement) was really put by me to afford the Commission some idea of what might be outstanding. It was on that basis that the liabilities of 1895 and previous years were estimated; so I thought that might be convenient for the Committee to have. I also have here an accurate statement, showing the absolute expenditure charged to the Treasury Bills. Mr. Kirkpatrick's statement was somewhat approximate.

1139. With reference to the statements compiled (by order of the Committee) from the quarterly *Gazette* statements, I wish to state that I do not regard the quarterly statements as at all satisfactory as a basis.

1140. *Mr. French.*] Not when they are put together? Not when they are put together, because in dealing with the Consolidated Revenue Fund we take it in portion. The Consolidated Revenue Fund, as shown in the books, embraces at least two divisions—that is to say, it embraces what has been regarded as the Deficiency Account, and also the Account Current. Well, in taking the quarterly statements you get the transactions in gross. It seems to me that in dealing with these things the audited accounts should be taken as an Accountant would take them.

1141. You mean the Auditor-General's accounts? Yes. I look upon these quarterly statements as interim accounts, simply published for the information of the public, they are correct as regards the final outcome—that is to say, in the final they are correct; but, if you commence to dissect them, then you get items in gross and not in net. These accounts are the Treasurer's statements audited by the Auditor-General.

1142. *Mr. Yarwood.*] If the Auditor-General makes any amendment, and you accept it or you settle it between you, that is the final result? That is the final result.

1143. Can you give us the accounts to 30th June, 1899? I can give the Committee the Treasurer's accounts as submitted to the Auditor-General, and as finally agreed to. Among the papers which I am handing in are a copy of the month's London accounts, the Bank of England balance statement, and a duplicate copy of the London accounts. I may say that I have prepared a series of balance statements made up in my own fashion which I would like to deposit with the Committee. I would not like my name identified with any compilation made up on a quarterly statement. The *Government Gazettes* are not audited statements, and the fact of returns for any month being published on the first day of the succeeding month shows conclusively that they are not final statements. While the balance must come out the arrangement of the details may be altered.

1144. *Chairman.*] Can you suggest some simpler mode of carrying on the accounts of the Treasury? I would very much like the Commission to visit the Treasury and see the work that has to be carried on. Our books may not be so simple at first sight as one would like to see them. They are not as simple as they could be in any ordinary public office, because we have to deal with accounts in two ways. We have to deal with appropriations of Parliament, and we have to deal with expenditure. And there is another thing. It is other people's moneys that we are spending, and we are bound down by Acts of Parliament

and

and by legal restrictions on every side. I have no doubt that the Commission will at first sight think that affairs can be simplified, and I should be only too glad to simplify them if possible. Our system may be rather unwieldy, but I do not see at present how we are to simplify it.

1145. Is it likely to be less unwieldy from the fact of the recourse to the cash system? There is no doubt that the cash system, as it is called, has simplified affairs very much.

1146. *Mr. Yarwood.*] That is the act of blotting out the appropriations? Yes. Under the old system the appropriations were kept open for four or five years, and this caused difficulty.

[Adjourned till Thursday, 10 May, 1900.]

J. Vernon,
Esq.
9 May, 1900.

FIFTEENTH DAY—THURSDAY, 10 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

John Roxburgh Martin, Special Clerk to the Under Secretary for Finance and Trade, examined:—

1147. *Chairman.*] I understand that you have had considerable financial experience, or, at all events, J. R. Martin, Esq. experience in figures and balance-sheets? Yes; I was practically Acting Government Statistician for three years.

1148. The Commission think of asking you to-day what your answer would be to the questions that have been set before them;—have you your replies in writing? I would rather give my evidence verbally, because, thinking the Committee might ask me for some information, I had begun to prepare certain statements, but these I have not completed. Still, I am ready to-day to tell the Committee what I know about these questions, and, indeed, about the matter in dispute as a whole.

1149. Take the first question? Before answering that question, I think it would be better if I gave my view of the matter in dispute.

1150. You wish to make a statement before we ask the questions? I think it would be better. The whole matter in dispute is this:—Mr. Lyne, Mr. M'Millan, Dr. MacLaurin, the financial editor of the *Daily Telegraph*, Mr. Bruce Smith, and Mr. See have all said that, during the four and a half years between the 1st January, 1895, and the 30th June, 1899, Mr. Reid accumulated a deficiency of, practically, a million pounds. It has sometimes been estimated at much more than that, but it has generally been set down at a million pounds. Mr. Reid says he has not accumulated this deficiency; and that is really the point at issue—whether he has done so or not. It is most important that the matter should be thoroughly threshed out, because a good deal depends upon the decision from a public point of view. It is really more than a mere dispute between the present Premier and the late one. Mr. Lyne came into power a few months ago, after a tenure of office by the previous Government of five years. During the last four of those years the country was told that there had been a surplus on the twelve months' transactions, and that the income had been equal to the expenditure. The people were led to believe that the finances were in a flourishing condition; that there had been a surplus annually, representing cash in the Bank; yet Mr. Lyne, on assuming office, finds a depleted Treasury. The latest statement to this effect was made by Mr. Carruthers, when he delivered his Financial Statement before the last Government went out of office; he then said, that on the transactions of the year ended 30th June, 1899, there was a surplus of £147,000.

1151. In face of the fact that the credit balance on that vote was £116,523 5s. 8d.? Yes. I may say that the statements presented in Committee of Ways and Means are not parallel with those in the Public Accounts, for this reason: In Committee of Ways and Means the Treasurer considers how he can provide the revenue to meet the estimates of expenditure which he submits to Parliament, and he takes credit in his statement for advances which will afterwards be recovered. Mr. Carruthers said on that occasion: "This is our surplus. Honorable members may ask, where is this surplus? I am happy to reply that it represents cash in the Bank; at least, to the amount of £116,000—the small balance is represented by sums to be afterwards recovered." These may not be his own words; but that is practically what he said. Well, Mr. Lyne has the accounts placed in his hands, and he finds that there was actually no cash in the Bank at the credit of the Consolidated Revenue Fund Account on the 30th June, 1899, but that this account was very largely overdrawn; not only that, he also finds that the General Loan Account had a very large debit balance; and he discovers that the cash balances of the Trust Funds had been used to meet the deficiencies on the Consolidated Revenue Fund Account and the General Loan Account. It is his duty, of course, as Treasurer, to see that the finances of the Colony are placed on a sound basis; he must make his income meet his expenditure, and if he finds the revenue insufficient, he must adjust his taxation correspondingly. But here he finds himself placed in this peculiar position. The country may state that the previous Treasurer was always able to bring out a surplus with the revenue at his disposal; in addition to that, Mr. Lyne is pledged not to go to the Custom House for more revenue; while as for the question of increasing the Income Tax, nobody would dream of proposing that at the present moment. Yet, if the finances of the country are not on a sound basis, it is absolutely incumbent on the Treasurer to do something in the near future; and he will have a very good opportunity for action as soon as Federation comes about. Then, he must adjust the basis of taxation; for heavy duties are sure to be imposed by the Federal Parliament, and he will have a much larger revenue coming in. Indeed, there are many financial reasons why the action of the Federal Government should be anticipated. But when the Treasurer goes down to the House to state what he proposes to do, he must be able to show Parliament that his proposals are justifiable. And I think, in this connection, apart altogether from the matter in dispute between Mr. Lyne and Mr. Reid, that the Report of the Committee will be of great public usefulness, because it will show, or ought to show, the people the real position of the Colony, and let them know whether during the last four years the revenue has equalled the expenditure, or whether part of the expenditure has been dealt with in another way, and met from Treasury Bills instead of from taxation. Well, an examination of the accounts during the period of four and a half years from 1st January, 1895, to 30th June, 1899, shows that the actual expenditure charged to the Consolidated Revenue Fund Account, exclusive of the Special Suspense Accounts, was £43,378,554 3s. 2d. I shall show the

Committee

J. R. Martin,
Esq.
10 May, 1900.

J. R. Martin, Esq.
10 May, 1900.

Committee afterwards where I get these figures. During the same period the revenue proper (and that is really a contraction, in my opinion, for "Revenue properly so-called," as stated in the questions—that is to say, receipts which are properly called revenue) was £42,316,642 1s. 3d., showing an excess of expenditure over the whole period of £1,061,912 1s. 11d.

1152. Mr. Vernon made it £1,254,000; but your figures are nearer to Mr. Pitt's figures? My figures are exclusive of the Special Suspense Accounts. The deficiency would be greater with the Suspense Accounts included.

1153. You know what Mr. Pitt and Mr. Vernon said? Yes. Of course, it is a matter of opinion whether some items are revenue proper, and my view of what is such may differ from Mr. Pitt's or Mr. Vernon's, but the difference should only be trifling. To continue, I may here point to an extraordinary fact. Mr. Reid brought out a surplus every year; he practically told the country he had a surplus every year, yet during the period of four and a half years he spent over a million more than he received. How did he manage to do this? If we take the advances which he recovered in excess of the advances which he made, apart from the windfall from the General Loan Account, we find that he recovered a net amount of £251,849 4s. 9d. And if we deduct this amount from the deficiency in revenue of £1,061,912 1s. 11d. we are left with a net deficiency during the period of four and a half years of £810,062 17s. 2d. Now, that is the deficiency created by Mr. Reid on a cash basis, after giving him the benefit of a quarter of a million net recoveries on account of 1894 and previous years. To that deficiency of £810,062 17s. 2d. must be added the sum of £150,000 which was taken from the Railway Loan Redemption Fund, in the year 1897-8, to meet a charge which properly fell upon revenue; and, in connection with this matter, I may say that the present Treasurer has during the last few weeks been requested by the Auditor-General to replace that amount to the Trust Funds. Adding this amount of £150,000 to the previous sum, the deficiency becomes £960,062 17s. 2d. Further, at the end of December, 1894, Mr. Reid instituted a system of thirty-year loans, to provide for services which up to that time had been defrayed from revenue. In this way the revenue during the last four and a half years has been relieved by, say, £550,000, after making a small deduction on account of items which might have been charged under the previous system to permanent loans. Adding that sum of £550,000 to the amount previously arrived at, we get a total deficiency during the period of £1,510,062 17s. 2d., after casting out the Suspense Accounts (which were asked to bear a charge of £25,000, spent in sand-shifting at the Centennial Park), and after giving the Treasurer of the day the benefit of a quarter of a million net advances recovered on account of 1894 and previous years.

1154. Do your figures agree with the Auditor-General's reports? There is nothing in my statements which conflicts with the Auditor-General's reports.

1155. *Mr. French.*] You can reconcile your figures with those reports? I can. I say that I have arrived at this deficiency of £1,510,062 17s. 2d., after relieving the revenue of the amounts placed in suspense, but taking into consideration the services provided for by short-dated loans. Of course, it is necessary to show by the balances how the deficiency is arrived at. On the 31st December, 1894, the deficiency on the Consolidated Revenue Fund Account, exclusive of the Suspense Accounts, amounted to £2,217,599, on the basis of the Treasury returns; while the Auditor-General gave the corresponding amount as £2,200,487 8s. 9d. On that date there was a small difference between the Auditor-General and the Treasury, amounting to £17,111 11s. 3d., which was afterwards adjusted, so that the balances of the two departments on the 30th June, 1899, are identical. The balance I have taken is the Treasury amount of £2,217,599, and it is necessary to find out how this balance was reduced. In the first half of the year 1895 there were certain transfers from the General Loan Account to the Consolidated Revenue Fund Account, amounting altogether, to £366,601 2s. 10d.

1156. *Mr. Yarwood.*] That is the accrued interest? It is accrued interest and something more. The Auditor-General and the Treasury have taken only accrued interest into account; but I will show the Committee that there were other items transferred at the same time, but carried to the Consolidated Revenue Fund Account in another way. On page 85 of the Public Accounts for the half-year of 1895, in the General Loan Account, a sum of £366,601 2s. 10d. is shown to have been transferred to the Consolidated Revenue Fund Account, and that credit properly reduced the deficiency on account of 1894 and previous years. But on page 13 it is shown that the accrued interest, to the amount of £341,319 9s. 2d., is taken in under the head of "other receipts," while the two items of "Premium on Loan raised" and "Interest on deferred payment of Instalment," to the amount of £25,281 13s. 8d., are taken in as revenue proper. That accounts for part of the difference between my statement and the others. In the latter the two items mentioned have been included as revenue proper.

1156½. *Chairman.*] You say a part of the difference, not the whole difference? It is not the whole difference; there are other items. The two sums I have mentioned were not, of course, Revenue proper. In addition to the transfer from the General Loan Account, to the amount of £366,601 2s. 10d., the sum of £600,000 was by law, during the period of four and a half years, paid off on account of the old deficiency. As the redemption is effected in the month of December, and there were four Decembers in the period, only £600,000 was paid off, instead of £675,000, as might at first be supposed. Adding the amount of £600,000 to the previous sum of £366,601 2s. 10d., we get a total of £966,601 2s. 10d., by which the deficiency existing on the 31st December, 1894, was reduced; so that the balance of the 1894 deficiency which existed on the 30th June, 1899, after crediting the transfer from the General Loan Account, and providing for the redemption according to law, was only £1,250,997 17s. 2d. But the actual deficiency existing on the 30th June, 1899, both according to the Treasury and to the Auditor-General, was £2,061,060 14s. 4d., without the Suspense Accounts. There had, therefore, been an increase in the deficiency during the period of four and a half years of £810,062 17s. 2d., according to the balances. That sum of £810,062 17s. 2d. is the deficiency I established between the revenue and the expenditure, after giving credit for a quarter of a million advances recovered from 1894 and previous years.

1157. *Mr. French.*] You say that that agrees with the Auditor-General? Yes. Now, this is a peculiar state of affairs. There is no question that such a deficiency was established during the late Treasurer's tenure of office. How did he manage to do so, and still emerge with a credit balance? Simply by changing the system of keeping the public accounts. It is contended by him that he paid away a million pounds on account of liabilities of his predecessors. Even if he had done so, I can establish a deficiency on account of his meeting from the proceeds of short-dated loans those services which were formerly provided for by revenue; and, also, on account of his taking £150,000 from the Railway Loan Redemption Fund to meet

a charge upon Revenue. But those are, in my opinion, minor matters in comparison with the issue of Treasury bills, because, after all, Parliament approved of the system of thirty-year loans, and if it is shown by the Committee to be a bad one, I suppose Parliament will knock it on the head. But while the late Treasurer contended that he paid away a million pounds on account of liabilities of his predecessors, it has been contended, on the other side, that he did nothing of the kind. Certainly, it can only be argued that he did pay away, on account of his predecessors, a million which was not rightly chargeable to revenue, if it can be shown that during the period of four and a half years he paid away that sum in excess of a fair average expenditure of the Colony for that time. Now, the figures show that his expenditure during the four and a half years did not include an extra million; but that he simply utilised the change in the system of keeping the accounts to charge £1,000,000 of expenditure to Trust Funds instead of providing for it out of taxation.

J. R. Martin,
Esq.
10 May, 1900.

1158. You do not mean directly, of course? It was taken directly, and then it was covered by bills. It can very easily be proved whether he paid away £1,000,000 more than ought to have been debited as a fair charge to revenue. The expenditure charged to the year 1893 was £9,816,876 6s. 8d., and the expenditure charged to the year 1894 was £9,694,889 18s. I may say that these amounts show a considerable reduction as compared with the expenditure of 1892 and previous years, simply because we got to bad times and had to reduce our expenditure; but taking those two years—the two reduced years—and averaging them, we get an annual expenditure of £9,755,888 2s. 4d. Now, the amount spent during the year 1895–6, the first year of the new system, was £9,852,218 17s. 6d.; that is to say, Mr. Reid practically spent the average of 1893 and 1894. But he only charged his revenue during that year with £8,899,411 8s. 7d.; that is to say, he charged his revenue with a sum which was less than the average of 1893 and 1894 by £856,476 13s. 9d.

1159. *Chairman.*] The years of the crisis? £856,476 13s. 9d. less than the average of the years of the crisis. During that year of 1895–6 he charged to Treasury bills £952,807 8s. 11d. Now, look at these figures and just see what they mean. You start out with a reduced expenditure during the years of the crisis, and you get a certain amount; and in 1895–6 you find that there is charged to Treasury bills £952,000 odd, and the expenditure charged to revenue in the first year of the new system is £856,000 less than the average of the years of the crisis. It is as clear to me as noon-day that the change of system simply allowed the first year's expenditure to be divided between the Trust Funds (that is what I call the Treasury bills) and revenue. And that is proved by the difficulties in which the Treasurer found himself after the end of his first year. Having relieved his revenue of a sum of £856,000 during that year, he was only able to establish a credit balance of £326,530 1s. 10d., after deducting £150,000 for Treasury bills which were afterwards cancelled; that is to say, he lost half a million on the year. He had not revenue to meet his expenditure, and he never had sufficient revenue afterwards. If he lost half a million on the year 1895–6, there must be an explanation why he did not lose half a million on the following year. Towards the end of the year 1895–6 the Public Service Board made sweeping reductions in the Service; they claim, and I believe with reason, that they saved £300,000 a year. They graded the Service before the close of June, 1896; but, of course, the savings did not take effect until the following year of 1896–7. They saved £300,000, and they relieved Mr. Reid's revenue to that extent; consequently he had to find the balance of £200,000. He actually made a loss of that amount, because his credit balance was reduced from £326,530 1s. 10d. to £114,444 16s. 6d. on the 30th June, 1897. Of course, he was still in difficulties. He had to keep the Roads vote at a quarter of a million less than should have been spent on them; and it is well known that the roads have been cut right into their foundations, and that it will take a large sum of money to put them in proper repair, and I do not see how the present Government can find it until taxation has been adjusted. The expenditure on roads averaged, during the five years from 1890 to 1894, the sum of £700,000. In 1895–6, Mr. Reid spent on roads £719,990; but he only charged revenue during that year with £387,207, and charged the difference of £332,783 to Treasury bills. In 1896–7 his expenditure on roads was only £547,761; for he could not charge any more to Treasury bills without making a new issue. In 1897–8 his expenditure on roads was £514,881, and in 1898–9 it was £526,477—that is to say, during the last three years he has spent on the roads and charged to revenue half a million annually instead of three-quarters of a million. During 1897–8 the accounts show that the credit balance on the Treasury "Account Current," without the Suspense Accounts, increased from £114,444 16s. 6d. to £122,211 1s. 10d.—that is to say, there was, on the transactions brought to account, a surplus of £7,766, but that surplus was only produced by the Auditor-General authorising the taking from the Railway Loan Redemption Fund of a sum of £150,000 which was lying as a sinking fund for another purpose, in order to apply it towards the redemption of debentures maturing under Act 31 Vic., No. 11. I have heard it stated here, by an officer of the Audit Department, that in fairness to Mr. Reid that sum of £150,000 must be considered a legacy from his predecessors. It was nothing of the kind; it was largely of Mr. Reid's own creation, as I shall show the Committee. During the year 1897–8, under the ordinary condition of things, a sum should have been set apart for the extinction of the debentures, and that should have cleared off the million to be redeemed; but, as in former years they did not care to buy those debentures in the open market, the whole of the annual sum provided by law for their extinction was not used, and the balance was returned to revenue. The actual sum falling upon revenue in 1897–8 was roughly, £204,000; and of that sum Mr. Reid paid £150,000 from Trust Funds, and charged his revenue with the balance paid over—that is to say, he charged it with less than the annual amount to be provided in the ordinary course. On page 170 of the Auditor-General's Report for 1897 it is shown that during 1896–7 (this was the year prior to the year in which the redemption was made) £38,235 was paid by Mr. Reid instead of £70,000; that is, he had a saving on that year of £31,765. During the year 1895–6, instead of £70,000, he only paid £15,670, effecting a saving on that year of £54,330. And during the half-year of 1895, instead of £35,000, he made payments to the amount of £19,485, effecting a saving of £15,515. That is to say, during those two and a half years he paid away a sum less by £101,610 than the amount provided by statute; and yet the Committee is informed that that was a legacy from Mr. Reid's predecessors.

1160. *Mr. Yarwood.*] I find from the audited statements that in the year 1895–6, amongst the disbursements out of the revenue, there is a sum of £126,510 for redemptions of every kind—that is the first year of the

the

J. R. Martin, Esq.
10 May, 1900.

the new system ; then in 1896-7 the amount is £265,810 for the annual redemptions, and for 1897-8 it is £285,948 2s. ;—can you tell me whether during those four years there ought to have been the same redemption? Yes ; the difference is charged to Treasury bills. In regard to one item in particular it may be said that new Treasury bills were issued to redeem the old ones. But to go on with my explanation, this utilisation of £150,000 from Trust Funds shows how the credit balance existing on the 30th June, 1897, was preserved from extinction.

1161. *Mr. French.*] What do you mean by the credit balance? The sum of £114,444 16s. 6d. at credit on the 30th June, 1897, increased to £122,211 1s. 10d. in the way described ; otherwise, it would have been a debit balance of £27,788 18s. 2d. In the last year of 1898-9, of course, the credit balance was reduced from £122,211 1s. 10d. to £116,523 5s. 8d. ; that is to say, there was no surplus, but a deficiency on the year's transactions brought to account. I can only say what the Treasurer himself has stated in public, that he has found that sum was only kept there by unpaid accounts. And yet there is supposed to have been no drift during the period of four and a half years ! It is all very well for Mr. Reid to say that he paid £1,000,000 on account of the liabilities of his predecessors. Even if they had been liabilities, when the change of system was made on the 30th June, 1895, the balances of Appropriations ought to have been cut clean down, so that the year 1895-6 would have been charged with a full year's expenditure ; and if the revenue was found to be insufficient, extra taxation should have been put on the people, and the public should not have been misled. But I should like to point out that "liabilities," from the point of view of a Government official, are not such as would be so regarded by a business man. Both in the Department of Audit and in the Treasury, for a long period, "liabilities" existing at the end of a year have really been equivalent to the outstanding unexpended votes. So, indeed, were they liabilities before the change of system was made ; for so long as the unexpended votes were available for expenditure, and so long as the law provided that they might be spent during succeeding years, they were always cast back as liabilities upon the revenue of a certain year. They were, therefore, rightly called liabilities, because they were open for expenditure, and might be expended and charged back as liabilities to the year in which they were voted. But even if the sum of £1,174,700 had represented real liabilities, such as balances of votes for contracts on works in connection with which it would have been open to the Treasurer to stop the expenditure, but which it would have been unwise on his part to stop, because the previous expenditure would have been wasted ; even then they ought to have been cut clean down, because it was specially provided that the year 1895-6 should not be charged with any unexpended balances due on account of works that had been placed in hand in that year. Section 2 of the Audit Act Amendment Act passed by Mr. Reid is as follows :—

"Every appropriation made after the commencement of this Act out of the Consolidated Revenue Fund of the Colony for the service of any financial year shall lapse and cease to have effect for any purpose at the close of that year, and any balance of the moneys so appropriated which may be unexpended at the close of such financial year shall be surrendered to the revenue for the general use of the Colony : Provided that in the case of public works the full amount of the estimated expense of completing each work shall be included in the estimates of expenditure on which the item appears, divided into the amounts estimated to be required for expenditure in each financial year over which the work is expected to extend ; and these amounts shall be provided, for as follows :—The estimated expenditure for the first year in the Appropriation Act for that year ; and the estimated expenditure for any following year shall be provided for as a Special Appropriation for that year."

So that even if the issue of Treasury bills to the amount of £1,174,700 had represented liabilities in the true sense of the word,—that is to say, if the bills had represented works in connection with which there were unexpended votes necessary to complete the works, then the votes still ought to have been cut clean down at the change of system, because in that Act it is provided that the estimated expenditure on works put in hand during 1895-6 shall be divided, and only one portion charged against that year. But, in my opinion, the issue of Treasury bills did not represent liabilities from the point of view of a business man. Take, for example, the roads, on which one-third of the proceeds of the issue of Treasury bills was spent, after the cash debit balance existing on the 30th June, 1895, was extinguished. Road maintenance is carried on from day to day, and the work can be stopped by the Premier whenever he pleases. On the 30th June, 1895, there were certain unexpended votes, and these did not represent liabilities at all. If Mr. Reid had wished to spend them merely for the purpose of keeping the roads in repair, in addition to making provision for a proper charge against the revenue of the year 1895-6, he could have done so, and there would have been no objection to the course pursued ; and in that case he would have spent £1,000,000 instead of £700,000. But he only spent £719,990 during the year, and of that amount he charged £332,783 to Treasury bills, and used this sum in reduction of his own expenditure during the first year of the new system—that is, he only charged £387,207 to the revenue. After meeting the cash debit balance on the Treasury Account current there was a sum of extraordinary receipts, as you might call them, of £926,586 2s. 10d., left to be spent after the change of system—available for expenditure. Of that sum £332,783 was spent on the roads of the Colony. No one can contend for a moment that that represented a liability of the predecessors of the Treasurer of the day. If you add to this sum of £332,783 the sum of £75,000, which was not paid until December, 1895, in extinction of the old debentures, and the sum of £37,500 in redemption of Railway debentures, which were certainly not liabilities of the old period, you get the amount of £445,283 out of a total available for expenditure of £926,586 2s. 10d. ; so that, even allowing that the difference between these sums represented actual liabilities, and that it was right to allow those liabilities to be covered by Bills, there is a deficiency of nearly half a million alone, and that must be increased by the sum of £150,000, for which the Auditor-General is pressing now, and by the amount relieved to the Revenue by the system of thirty-year loans. In addition to the roads, however, there are many more items of the same kind. For instance, there is one item among the accounts which caught my eye casually, an amount charged to Bills in 1895-6, on account of the office of the Government Statistician. I was in the office at that time, and I am of opinion that when the change of system was made any unexpended votes of that office ought to have lapsed, and the expenditure during the year made a charge on the revenue of the year. I am not aware of any charge which could be fairly called a liability of the previous year on account of the previous Government.

1162. *Mr. Yarwood.*] I notice some items here under the head of Naval Expenditure. There seems to be a reduction to the amount of £12,000 in 1895-6, as compared with the two following years. Can you explain

explain that difference? I should say at once that the difference has been charged to Treasury bills. Yes; I see in the Auditor-General's Report for 1896 before me that there is an amount of £13,101 charged to Treasury Bills. I would draw the attention of the Committee to this feature. Prior to the change of system every Treasurer, when he submitted his Estimates to Parliament, had to provide for all claims coming forward from the Revenue of the year irrespective of the date. Here are the Estimates for 1894 submitted to the House, and if the Committee look at them they will see under every heading of Contingencies the words "irrespective of date of claims." That was done away with; there was nothing of the kind when the Estimates for 1895-6 were submitted, simply because all claims coming forward on account of preceding years were provided for from Treasury bills, and there was only one year to be covered. When Mr. Reid decided to issue the bills, he was taken to task in Parliament about his proposal. It was contended by Mr. Lyne, Mr. McMillan, and other Members that the course proposed was wrong, and that the effect of it was simply to relieve the Revenue of a fair charge during the first year. In my opinion, subsequent events have proved that that view was quite correct. But Mr. Reid afterwards presented a statement—I am quoting from the Ways and Means for the year 1895-6—in which he shows how this deficiency of £1,174,767 14s. 4d. is arrived at, and he appends a note to that amount as follows:—

"This balance includes a sum of £750,000 paid in reduction of the deficiency for 1886 and previous years, and also a sum of £300,000 in reduction of the Public Debt for railways.

Well, the deficiency was either one thing or the other. It could not be both. And for anyone to state in Parliament that it was actually proposed to take up Treasury bills with Trust Funds in order to pay liabilities which included £750,000 in reduction of the old deficiency, and a sum of £300,000 in reduction of the debt for railways, is absolutely nonsensical.

1163. *Chairman.*] It was untrue? It was untrue. The amount was either paid before or afterwards, and it was certainly not paid afterwards. And, in regard to this annual redemption of £150,000 in extinction of the Deficiency Bills, I do not agree with the Auditor-General when he states that the redemption was not absolutely effected. I say that not only was it effected literally, but it was effected absolutely. It was a Statutory obligation—a first charge upon the revenue. It was provided by Parliament that, in order to reduce the deficiency existing on the Consolidated Revenue Fund Account of the Colony (and I may say, parenthetically, that, so far as I am aware, there is no deficiency to such a large amount existing in any other Colony), a sum of £150,000 should be paid off every year, and that the Treasurer should find the money. Well, the Treasurer provided in his Estimates for the reduction of the deficiency, and it was reduced. The entry is there in the books, and the redemption was absolutely effected. I believe the Treasury officials, if you call them, will inform you that the sum of £150,000 was put back to the Savings Bank deposits, with which the Treasury bills were taken up. The redemption had to be effected before expenditure was made from the annual votes. The Act, however, did not prevent another Treasurer from creating a further deficiency, and that is what was done. The Auditor-General fell into a blunder when, in his 1898 Report, he devoted two or three pages towards showing that this redemption was not absolute, but only literal. It is, of course, practically correct to say that the bills were only redeemed at the expense of the cash overdraft; but I say that the redemption has always been made, not only literally, but absolutely; the explanation being that at the same time the Treasurer has created a further deficiency. I should like to go into the questions in detail, and give the Committee the basis on which my statements to-day have been made. I can put my hand on every figure, and I believe I can satisfy the Committee that the country is going to leeward; that the revenue of the country at the present day is absolutely insufficient to meet the expenditure, and has been so for four years; and that a readjustment of taxation is absolutely necessary. There is not a shadow of doubt about that. I don't know whether the Committee would like me to state anything about this set of questions about which there has been so much talk; but I am quite prepared to do so. In my opinion, the questions have been compiled with the sole object of eliciting the true facts of the case, and presenting these facts before the country in a proper manner. There was no trickery about their compilation, as has been suggested.

1164. *Mr. French.*] I don't know that there has been anything suggested to that effect? It has been said that there was; that the questions were the result of deliberate trickery, and the persons who compiled them were charged with deliberate trickery. It has been stated that they were drawn up with the object of deluding the public, and of making the Committee give misleading answers. I say that every question is submitted in a perfectly open and honest manner, and to each of the questions there is only one reply, and that is the true reply. The questions are quite honest and straightforward, and a true knowledge of the accounts cannot be obtained, and a proper conclusion cannot be arrived at, unless the subject-matter of the questions is dealt with. The Treasurer dictated the heads upon which the opinion of the Committee was to be sought. I have certain information here I should like to give the Committee as the basis on which I have made my statements. I can show the Committee, in the Auditor-General's reports, the verification of my figures. If Mr. Reid relieved his revenue of the amount in question, and by means of certain devices made the public believe that his taxation was sufficient for all purposes, then an explanation is due to the public.

1165. But that is what we have got to find? Yes; you have got to find whether we have not been trying to get along with too little revenue.

[Adjourned till Friday, 11th May, 1900.]

SIXTEENTH DAY—FRIDAY, 11 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq. | F. N. YARWOOD, Esq.

John Roxburgh Martin, Special Clerk to the Under Secretary for Finance and Trade,
further examined:—

J. R. Martin, Esq.
11 May, 1900.

1166. *Chairman.*] Will you now proceed with the continuation of your statement? I think I said yesterday that I could reconcile with the Auditor-General's Reports the deficiency I then established. The figures I referred to yesterday I started to compile on Tuesday, and I established the results which I stated to the Committee. This morning between 11 and 1 o'clock I referred to the Auditor-General's Reports, and, just as I supposed, I have made a complete reconciliation without any trouble whatever. The Auditor-General gives the balance on the Consolidated Revenue Fund Account as a whole; that is to say, including the Special Suspense Accounts. The difference between the Treasury Account Current, which excludes the Special Suspense Accounts, and the Consolidated Revenue Fund Account as a whole, treated as such by the Auditor-General, only amounts to about £160,000 during the period of four and a half years; so that, in order to show the Committee that my figures are correct, it may be well for the present to work on the accounts as a whole. I should like the members of the Committee, therefore, to keep before them the balances as established by the Auditor-General from the 31st December, 1894, to the 30th June, 1899. The figures are as follow:—

	£	s.	d.
On 31st December, 1894	2,735,511	8	11
On 30th June, 1895	2,570,177	4	7
On 30th June, 1896	2,993,304	7	8
On 30th June, 1897	3,056,774	2	11
On 30th June, 1898	2,898,713	14	1
On 30th June, 1899	2,757,529	7	7

There was a slight adjustment, as I think I explained yesterday, made during that period between the Treasury figures and the Auditor-General's figures. The difference on the 31st December, 1894, was £17,111 11s. 3d.; on the 30th June, 1895, it became £17,209 19s. 2d.; on the 30th June, 1896, it became £1,359 7s. 9d.; on the 30th June, 1897, the balances were the same, as they were also in the latter two years. After making these adjustments, the deficiency, according to the Treasury Accounts, was as follows:—

	£	s.	d.
On 31st December, 1894	2,752,623	0	2
On 30th June, 1895	2,587,387	3	9
On 30th June, 1896	2,994,663	15	5
On 30th June, 1897	3,056,774	2	11
On 30th June, 1898	2,898,713	14	1
On 30th June, 1899	2,757,529	7	7

These balances, although perhaps it is not visible at first sight, show that Mr. Reid created a deficiency during the period of four and a half years to the amount of £971,507 10s. 3d.

1167. That was the amount you gave us yesterday? Yesterday I gave, without the Special Suspense Accounts, the sum of £810,062 17s. 2d.; the figures I am now using, for the purpose of proving their agreement with the Auditor-General's Reports, are inclusive of the Special Suspense Accounts, and the deficiency on this basis is £971,507 10s. 3d. During the period of four and a half years the expenditure proper amounted to £43,541,432 19s. 4d. During the same period the revenue proper amounted to £42,318,037 1s. 3d. There was an excess of expenditure during the period of £1,223,395 18s. 1d.

1168. *Mr. French.*] An excess of expenditure over receipts? Yes. During the period of four and a half years Mr. Reid recovered the sum of £251,888 7s. 10d. in excess of his advances, and as I think that sum might very fairly go to his credit on a cash basis, I have deducted it from the deficiency, thus reducing the amount to £971,507 10s. 3d. Of course, to this amount would have to be added the transfer of £150,000 from the Railway Loan Redemption Fund, and also the amount of £550,000 (if it were considered to be a relief of revenue) expended from the thirty-year loans, for certainly these charges were met from revenue prior to the 31st December, 1894. Add these two sums of £150,000 and £550,000 referred to, and that would make a total deficiency of £1,671,507 10s. 3d.; that is to say, a sum of £161,444 13s. 1d. more than the amount I gave yesterday, being the net expenditure charged to the Special Suspense Accounts during the period of four and a half years.

1168½. Will you tell us what the total revenue and expenditure were? Yes. I have given the amount of the revenue proper as £42,318,037 1s. 3d. Now I will add the amount of recoveries, £1,152,862 14s. 2d., and I get £43,470,899 15s. 5d. That is the total revenue and receipts, including everything except a sum which was neither revenue proper nor a recovery, but a credit to be used in reduction of the 1894 deficiency—that is to say, the transfer from the General Loan Account to the amount of £366,601 2s. 10d. Taking this sum into consideration, that would give a total of £43,837,500 18s. 3d. against a total expenditure of £44,442,407 5s. 8d.; but the former amount, as I have pointed out, includes a sum belonging to the old deficiency.

1169. *Mr. Yarwood.*] I am going to wash up to the 30th June, 1895, and clean the slate properly to the best of my knowledge and belief; well, I find that the advances that appear in those accounts are wiped out in subsequent items; so it looks on the face of it as though, when that item of £1,024,000 was considered, the Treasury said, "There are certain advances outstanding, we will get those in and put them to

the

the credit of the account ;” and apparently one wipes out the other ; then subsequently to that they made certain advances, advances to contractors and others, and they received certain advances. Well, it is absolutely necessary that we should know what the balance was on the 30th June, 1895? That is, I believe, shown in the Auditor-General’s Report.

J. R. Martin,
Esq.
11 May, 1900.

1170. Will you get that for us? Yes. To go on, I have cast a net quarter of a million of recoveries in to Mr. Reid’s credit, and yet I find an excess of expenditure amounting to £971,507 10s. 3d. The only receipt I have left out of revenue is the transfer from the General Loan Account of £366,601 2s. 10d. During the first half-year of 1895 the Revenue proper amounted to £4,537,667 19s. 8d. I have made up the Revenue proper for myself, and my figures will differ from those of the Treasury Accountant, who may have cast some items such as the transferred Premium on Loans into Revenue proper, and will also differ from those of the Auditor-General, who has apparently cast the whole of the transfer of accrued interest belonging to 1894 and previous years into the Revenue proper of the first half-year of 1895 ; but as everything I have not put into Revenue proper I have put into “Other Receipts,” it comes to the same thing in the end. Against the Revenue for that period the Expenditure proper was £5,057,282 2s. 10d. ; so that there was a deficiency on the half-year of £519,614 3s. 2d. Now I take in the advances recovered and made during the same period. The advances recovered amounted to £355,150 4s. 3d., and the advances made amounted to £36,801 7s. 6d. That gave a credit on the advances to the amount of £318,348 16s. 9d. Taking the two classes together, we get a net deficiency on the half-year of £201,265 6s. 5d. On the 31st December, 1894, the deficiency existing was £2,752,623 0s. 2d. after the adjustment made to bring the figures of the Auditor-General into line with those of the Treasury. During the half-year of 1895 there was a transfer from the General Loan Account to the amount of £366,601 2s. 10d. That reduced the deficiency on 31st December, 1894, existing on the 30th June, 1895, to £2,386,021 17s. 4d. The actual deficiency as disclosed in the reports of the Auditor-General, slightly adjusted to the Treasury figures, as before explained, was £2,587,387 3s. 9d., showing an increase of £201,265 6s. 5d. ; and that is the deficiency which I have just established between the revenue and the expenditure.

In the year 1895–6, the revenue proper amounted to £9,254,337 16s. 2d., and the expenditure proper to £9,879,914 16s. 2d. There was, therefore, a deficiency in the revenue to the amount of £623,577. During the year advances were recovered to the amount of £140,259 18s. 2d., and advances were made to the amount of £74,059 9s. 10d., giving the Treasurer a credit of £66,200 8s. 4d. Taking the two classes together, the revenue and expenditure proper, and the other receipts and expenditure, the net deficiency on the year was £557,376 11s. 8d. The balance of the 1894 deficiency existing on the 30th June, 1895, was £2,386,021 17s. 4d. During the year there was a statutory redemption to the amount of £150,000, reducing the 1894 deficiency to £2,236,021 17s. 4d. The actual deficiency existing at that date, according to the Auditor-General’s reports, slightly adjusted to the figures of the Treasury, was £2,994,663 15s. 5d. Therefore, up to the 30th June, 1896, a new deficit of £758,641 18s. 1d. had been created, and that amount of £758,641 18s. 1d. is the amount obtained by adding the debit of £557,376 11s. 8d. to the debit of £201,265 6s. 5d. in the first half-year of 1895.

During 1896–7 the revenue proper amounted to £9,288,358 19s. 10d., and the expenditure proper to £9,470,167 6s. Therefore, there was a debit balance of £181,808 6s. 2d. on the operations of the period. The recoveries during the year amounted to £181,334 19s. 6d., and the advances made to £211,637 0s. 10d. Therefore, there was a debit balance on the other receipts and other expenditure of £30,302 1s. 4d. Taking both classes together, the net deficiency on the year was £212,110 7s. 6d. Add that to the deficiency established during the previous year and a half, and the total amount becomes £970,752 5s. 7d. On the 30th June, 1896, the balance of the 1894 deficiency existing was £2,236,021 17s. 4d. Deducting the Treasury bills redeemed during the year, the amount becomes £2,086,021 17s. 4d. The actual deficiency existing was £3,056,774 2s. 11d., being an increase of £970,752 5s. 7d., as previously established between the revenue and expenditure figures.

During 1897–8 the revenue proper amounted to £9,482,564 8s. 8d., and the expenditure proper to £9,397,600 6s. 7d. Therefore, there was a credit balance on the year to the amount of £84,964 2s. 1d. The recoveries made during the year amounted to £265,111 12s. 1d., and the advances made amounted to £342,015 5s. 4d., the debit balance on these operations being £76,903 13s. 3d., leaving a net credit balance on both classes of £8,060 8s. 10d. That reduced the deficiency in revenue of the previous two and a half years to £962,691 16s. 9d. On the 30th June, 1897, the balance of the 1894 deficiency existing was £2,086,021 17s. 4d. During the year 1897–8, bills to the amount of £150,000 were redeemed, bringing down the deficiency to £1,936,021 17s. 4d., while the actual deficiency was £2,898,713 14s. 1d., showing a new deficiency of £962,691 16s. 9d.

During the year 1898–9, the revenue proper amounted to £9,755,107 16s. 11d., and the expenditure proper amounted to £9,738,468 7s. 9d., giving a credit balance of £16,639 9s. 2d. In the course of the year recoveries to the amount of £211,006 0s. 2d. were received, and advances were made to the amount of £236,461 2s. 10d., being an excess on advances of £25,455 2s. 8d. Taking these two classes together, the debit balance on the operations of the year was £8,815 13s. 6d. ; add that to the previous total, £962,691 16s. 9d., and you obtain a net amount of £971,507 10s. 3d. on the operations of the four and a half years. On the 30th June, 1898, the balance of the 1894 deficiency existing was £1,936,021 17s. 4d. Reducing that by £150,000 of bills redeemed during 1898–9, the balance of the 1894 deficiency is brought down to £1,786,021 17s. 4d. The actual deficiency existing at that date, according to the Auditor-General, was £2,757,529 7s. 7d. The increase was, therefore, £971,507 10s. 3d., and that is exactly the deficiency in the revenue during the four and a half years, after giving Mr. Reid credit for an excess of recoveries during the period of £251,888 7s. 10d.

1171. *Mr. French.*] And yet the Auditor-General in his balances only shows a drift of £22,000? The reason why the Auditor-General shows in his balances an apparent drift of only £22,000, is this :—You start out on the 31st December, 1894, according to the Auditor-General, with a deficiency of £2,735,511 8s. 11d. ; the corresponding amount of the Treasury is £2,752,623 0s. 2d. ; but, taking the former amount, the Auditor-General shows on the 30th June, 1899, a deficiency of £2,757,529 7s. 7d. Apparently, these figures only show a drift to the amount of £22,000, and, as £17,000 of that was adjusted, it is really only a drift of £5,000 ; but during the period there was transferred from the General Loan Account the sum of £366,601 2s. 10d. which belonged to the period prior to the 31st December, 1894, and has been included in the revenue on which the balance on the 30th June, 1899, has been struck. Consequently, that sum of
£366,601

J. R. Martin,
Esq.
11 May, 1900.

£366,601 2s. 10d. has either to be added to the last figure, or, more properly, it has to be deducted from the former. Therefore, the drift is over £370,000, even after we allow for the adjustment between the Treasury figures and the Auditor-General's figures. And, furthermore, during the period of four and a half years, the 1894 deficiency was reduced according to law by the amount of £600,000, yet we find that the balance has not been reduced. Therefore, it stands to reason that there has been another deficiency created during the period to the amount of £600,000. And if you add that to the previous figures obtained by the transfer from the General Loan Account, and to the small amount of the "drift" according to the balances, you get the deficiency which I have established to the amount of £971,507 10s. 3d. The balances as disclosed by the Auditor-General are only a check on the revenue and expenditure. If after you make up the revenue and expenditure account, and take out the proceeds from Treasury bills and the transfer from the General Loan Account, you find an excess of expenditure of £971,507 10s. 3d., it must be capable of explanation according to the balances, because the balances are only made up on the basis of the revenue and expenditure. Well, I have given the explanation of these figures. In the balances there is included a sum of £366,601 2s. 10d. which reduced the 1894 deficiency, and at the same time there is a drop of £600,000 on the same account—that is to say, the Auditor-General's balances include two movements, a downward and an upward. There is the downward movement of the 1894 deficiency, and of the transfer from the General Loan Account; and there is the upward movement created by the excess of expenditure over revenue during the period of four and a half years. As to the bills, Mr. Reid has stated on many occasions that he redeemed them during each of the four years; and he is quite right when he says that he has redeemed those bills. Consequently, when you find that the deficiency on the Consolidated Revenue Fund Account has not gone down to that amount, you can well come to the conclusion that it has increased in another way; and so it has increased, not only by the amount of £600,000, but by the amount transferred from the General Loan Account. I will read out the figures in this statement which I have prepared as evidence. I do not care who the man is, but he cannot take that statement to pieces. It is substantially correct, and it shows an actual deficiency.

1172. *Chairman.*] That statement, in your opinion, brings out the deficiency of £971,507 10s. 3d.? Yes. That sum includes £161,444 13s. 1d. charged to the Special Suspense Accounts. But it does not include the sum of £150,000 taken from the Railway Loan Redemption Fund, and the relief to revenue by the amounts charged to short-dated loans, which I estimate at £550,000. These sums would have to be added. The first part of the statement shows the revenue and expenditure proper during each period, and the difference between the two:—

Period.	Revenue and Expenditure Proper.					
	Revenue.		Expenditure.		Balance on operations in period.	
	£	s. d.	£	s. d.	£	s. d.
1895	4,537,667	19 8	5,057,282	2 10	Dr.	519,614 3 2
1895-6	9,254,337	16 2	9,877,914	16 2	Dr.	623,577 0 0
1896-7	9,288,358	19 10	9,470,167	6 0	Dr.	181,808 6 2
1897-8	9,482,564	8 8	9,397,600	6 7	Cr.	84,964 2 1
1898-9	9,755,107	16 11	9,738,468	7 9	Cr.	16,639 9 2
	42,318,037	1 3	43,541,432	19 4	Dr.	1,223,395 18 1

The second part shows the recoveries and advances made:—

Period.	Advances recovered and made.					
	Recoveries.		Advances.		Balance on operations in period.	
	£	s. d.	£	s. d.	£	s. d.
1895	355,150	4 3	36,801	7 6	Cr.	318,348 16 9
1895-6	140,259	18 2	74,059	9 10	Cr.	66,200 8 4
1896-7	181,334	19 6	211,637	0 10	Dr.	30,302 1 4
1897-8	265,111	12 1	342,015	5 4	Dr.	76,903 13 3
1898-9	211,006	0 2	236,461	2 10	Dr.	25,455 2 8
	1,152,862	14 2	900,974	6 4	Cr.	251,888 7 10

The third part of the statement shows the net deficiency or surplus on the operations of each period, taking the two classes together, and also the gradual growth of the new deficiency:—

Period.	Net Deficiency or Surplus, after throwing in Recoveries.		Growth of New Deficiency.	
	£	s. d.	£	s. d.
1895	Dr.	201,265 6 5		201,265 6 5
1895-6	Dr.	557,376 11 8		758,641 18 1
1896-7	Dr.	212,110 7 6		970,752 5 7
1897-8	Cr.	8,060 8 10		962,691 16 9
1898-9	Dr.	8,815 13 6		971,507 10 3
	Dr.	971,507 10 3		971,507 10 3

The

The fourth part of the statement shows the deficiency on the Consolidated Revenue Fund Account at the end of each period, with the adjustment necessary to bring the figures into line with those of the Treasury:—

J. R. Martin,
Esq.
11 May, 1900.

Date.	Deficiency on Consolidated Revenue Fund Account, according to Auditor-General.		Difference between Auditor-General and Treasury gradually adjusted.			Deficiency, according to Treasury Accounts.	
	£	s. d.	£	s. d.	£	s. d.	
31 Dec., 1894.....	2,735,511	8 11	17,111	11 3	2,752,623	0 2	
30 June, 1895.....	2,570,177	4 7	17,209	19 2	2,587,387	3 9	
30 „ 1896.....	2,993,304	7 8	1,359	7 9	2,994,663	15 5	
30 „ 1897.....	3,056,774	2 11	Nil.		3,056,774	2 11	
30 „ 1898.....	2,898,713	14 1	Nil.		2,898,713	14 1	
30 „ 1899.....	2,757,529	7 7	Nil.		2,757,529	7 7	

And the last part of the statement shows the downward and upward movement of the balances, with the growth of the new deficiency, corresponding with the figures in the third part of the statement:—

Date.	Deficiency existing on 31st December, 1894.	Reduced by			Balance of 1894 Deficiency existing.	Actual Deficiency existing at date.	Growth of New Deficiency.
		Transfer from General Loan Account.	Statutory redemption charged to Consolidated Revenue Fund, afterwards carried to Trust Fund.				
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	
31 Dec., 1894.....	2,752,623 0 2						
30 June, 1895.....		366,601 2 10		2,386,021 17 4	2,752,603 0 2	201,365 6 5	
30 „ 1896.....			150,000 0 0	2,236,021 17 4	2,994,663 15 5	758,641 18 1

30 „ 1899.....			150,000 0 0	1,786,021 17 4	2,757,529 7 7	971,507 10 3	

1173. Have you anything to say with regard to Questions 1, 2, and 3? I may say that these questions are obviously intended to include the Special Suspense Accounts, as these accounts form, with the Treasury Account Current, the Consolidated Revenue Fund Account as a whole according to law, and it is this account that the Auditor-General deals with in his annual report. The revenue proper, and correspondingly the expenditure proper, exclude not only such receipts as the transfer from the General Loan Account and the proceeds of the Treasury bills, but the advances recovered and the advances made. The answer to Question No. 1 is £42,318,037 1s. 3d. That includes revenue carried to the General Post Office Account to the amount of £1,389, and a sum of £6 carried to the Centennial Park Account. The answer to Question No. 2 is £43,541,432 19s. 4d., and that includes expenditure charged to the Post Office Account to the amount of £133,827 18s. 3d., and to the Centennial Park Account of £29,050 17s. 11d. Bringing the revenue proper and the expenditure proper together, we find the answer to question No. 3, which is an excess of expenditure to the amount of £1,223,395 18s. 1d.

1174. And Question No. 4? Question No. 4 asks that the receipts and expenditure in connection with the two Special Suspense Accounts may be set down, in order to arrive at the difference between the revenue and the expenditure proper without the Suspense Accounts in Question Number 5. The answer to Question Number 4 is Revenue, General Post Office Account, £1,389; Centennial Park Account, £6; total revenue, £1,395. Expenditure, Post Office Account, £133,827 18s. 3d.; Centennial Park Account, £29,050 17s. 11d.; total expenditure, £162,878 16s. 2d. The net expenditure on this account during the period of four and a half years was £161,483 16s. 2d.

1175. Question No. 5? Question No. 5 simply asks for the difference between the revenue and expenditure proper in connection with the Consolidated Revenue Fund Account, exclusive of the Special Suspense Accounts. The revenue is £42,316,642 1s. 3d., and the expenditure £43,378,554 3s. 2d., being an excess of expenditure to the amount of £1,061,912 1s. 11d.

1176. Question No. 6? Question No. 6 asks for the amount of Extraordinary Receipts taken into the Consolidated Revenue Fund during the same period of four and a half years, such as the proceeds of Treasury bills and the accrued interest transferred from the General Loan Account. The answer to this question, according to my calculations, is £1,391,301 2s. 10d. I may say that in my opinion "Extraordinary Receipts" cannot be interpreted to include advances recovered and repayments to credit of Votes, as these are ordinary transactions, although they are not revenue proper.

1177. Mr. Yarwood.] Was that the amount of those Treasury bills, £1,024,000, and the accrued interest? Yes. The total is arrived at by taking the proceeds of the sale of New South Wales Treasury bills issued under the Deficiency Act of 1895 to the amount of £1,174,000, and deducting £150,000 on account of the bills withdrawn and cancelled, leaving a net amount of £1,024,000. To that sum I add £366,601 2s. 10d., being Premium on Loan raised under the Act 41 Vic., No. 7, £25,116 18s. 9d.; Interest on Deferred Payment of Instalment, £164 14s. 11d.; and Accrued Interest on Loans raised under Acts 41 Vic., No. 7, to 55 Vic., No. 35, £341,319 9s. 2d. I may say that in the Public Accounts, under the heading of the General Loan Account, these three items, amounting altogether to £366,601 2s. 10d., are shown as having been transferred together, but in the Consolidated Revenue Fund Account only the accrued interest has been carried to "Other Receipts," and the premium and the interest on the deferred payment have been placed to the revenue proper. Consequently; that accounts in some measure for the difference between the Accountant's figures of Revenue proper and mine. I have taken them out, and he may have left them in. Also, I may say on this point that the Auditor-General includes in his Revenue proper, in the first half-year of 1895, the whole of the transfers. He includes the accrued interest too, because he was the instigator of this transfer, and he holds that it was always Revenue proper, although it had been carried to the General Loan Account. Consequently, although it came into the account in the shape of a windfall, yet it was Revenue proper; that is his view.

1178.

J. R. Martin, 1178. In regard to the £1,174,000—they went down to the House and got £1,174,000, did they not? Yes.
 Esq. 1179. Then how did they cancel the £150,000;—did they go down to the House and say that they had to
 11 May, 1900. amend their return, or that they were redeeming £150,000? They simply cancelled the bills when they found they did not require the money.

1180. It is just the same as if they had asked for £1,024,000? Yes, practically. I may say that there is an entry passed in the Expenditure Accounts for that sum.

1181. I have not looked into the accounts published, but I suppose that in 1894 they redeemed those bills, that £150,000, as usual;—they added to the expenditure £150,000 for redemption of the old bills, I mean? Yes; redemption was carried out in 1894.

1182. Then in 1894 there would be £150,000; in the half-year for 1895 there would be £75,000; and in the year 1896, £75,000? During the half-year of 1895 there was no payment at all, but during the the year 1895–6 the sum of £150,000 was redeemed, and they charged £75,000 to Treasury bills and the other £75,000 to revenue. In regard to this matter of "Extraordinary Receipts," including the transfer from the General Loan Account, I may say that in addition to the sum of £366,601 2s. 10d. which I have taken, there are many other small amounts carried into revenue proper which are found scattered here and there throughout the accounts during the period of four and a half years, but I have let these go as revenue proper during the period, because it is only wasting time to follow them out. For instance, in the first half-year there is another sum of accrued interest transferred, to the amount of £4,380 4s. 7d. I put that in as revenue proper because, the principle having been recognised by the transfer of the large amount, I suppose it may be accepted that any other receipts coming in on the same account were revenue proper.

1183. Could they ever make a loss on that basis? No, not so far as I am aware.

1184. *Chairman.*] Question No. 7? Question No. 7 asks for the amount of that part of the cash debit balance on the Consolidated Revenue Fund Account which existed on 31st December, 1894, and which was partly extinguished in the first half-year of 1895 by the excess of receipts over expenditure resulting from the transfer of accrued interest from the General Loan Account, and partly by the proceeds of the new issue of Treasury bills. The answer to that question is £464,715. That is according to the statement of the Treasury. According to the Auditor-General, the Cash Debit Balance on the Treasury Account Current (and that is what is meant by "That part of the Cash Debit Balance" because the other part relating to the Special Suspense Accounts is excluded) was £447,603 8s. 9d., the difference of £17,111 11s. 3d. being the adjustment to which I referred in making my previous statement,—that is, the adjustment between the two balances. The total cash debit balance on the Consolidated Revenue Fund Account on the 31st December, 1894, was £999,739 0s. 2d.; that is to say, in addition to the sum of £464,715 referred to in the question, there was a debit balance of £335,612 17s. 4d. on the Post Office Account, and a debit balance of £199,411 2s. 10d. on the Centennial Park Account. From my point of view, a good deal attaches to the question of the balance existing on the Consolidated Revenue Fund Account as a whole, because if the account was still one account according to law, and if a legal separation had never been made, and if no separate Banking account had been opened, it is quite obvious that if a large overdraft was left on the Special Suspense Accounts that would always have the effect of swamping any Ledger credit which might exist on what I call the Treasury Account Current. That has always happened during Mr. Reid's tenure of office. When he went down to Parliament and stated that he had a credit balance on the operations brought to account, that was right enough. He had in one or two years a credit balance on the transactions of the year brought to account, although he had not even that in the year 1896–7, because there his credit balance fell by the amount of about £200,000. But when he went further, and said that that represented cash in the Bank, it appears to me that it could not be so, because any such credit balance would always be swamped in the Bank by the existing deficiency on the Suspense Accounts. Not only that, but the London payments made in May and June every year to the amount of £200,000 were not brought to account, and were paid away before the close of the financial year. Consequently, any credit balance on the "new account" alone, even if it had been kept separately, would not be in existence in the Bank on the 30th June in any year, unless it were in excess of the London payments. In only one year was it in excess of the London payments during the two months, and that was the first year of the new system.

[Adjourned till Monday, 14th May, 1900.]

SEVENTEENTH DAY—MONDAY, 14 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

John Roxburgh Martin, Special Clerk to the Under Secretary for Finance and Trade, further examined:—

J. R. Martin, 1185. *Chairman.*] What answer have you to Question No. 8? I might say in regard to Question No. 8
 Esq. that the "net amount of extraordinary receipts available for and utilised in meeting expenditure chargeable
 14 May, 1900. to the Consolidated Revenue Fund Account during the period of four and a half years referred to," means the amount of those receipts after you deduct the portion of the cash overdraft which was extinguished.

1186. *Mr. Yarwood.*] That is the four hundred and odd thousand pounds? Yes. The answer to the question is £926,586 2s. 10d. Of this amount, the sum of £68,336 4s. 11d. was absorbed during the first six months of 1895, before the change of system was made. That amount is arrived at by comparing the actual debit balance of £166,450 2s. 1d. on the Treasury Account Current on the 30th June, 1895, with the sum of £98,113 17s. 2d. to which the transfer of £366,601 2s. 10d. would have reduced the balance of £464,715 had the revenue been equal to the expenditure during the period of six months. The balance of the sum of £926,586 2s. 10d., namely, £858,249 17s. 11d., was available after the change of system was made. If you deal with the revenue and expenditure during the period of six months of 1895, you find that, after you strike out the transfer from the General Loan Account, there was a debit balance of £68,336 4s. 11d. on the transactions of the six months, even after you include in the receipts the recoveries from previous years.

1187.

1187. *Chairman.*] Question No. 9? Question No. 9 asks for the amount of the total deficiency on the Consolidated Revenue Fund Account on the 31st December, 1894, inclusive and exclusive of the Special Suspense Accounts. The answer is, £2,752,623 Os. 2d. inclusive of the Special Suspense Accounts, and £2,217,599 exclusive of the Special Suspense Accounts. The first amount is arrived at as follows:—

J. R. Martin,
Esq.
14 May, 1900.

Cash Debit Balance, 31st December, 1894—	
Treasury Account Current	£464,715 0 0
Post Office New Street Resumption Account	335,612 17 4
Centennial Park Account	199,411 2 10
<hr/>	
Total Cash Debit Balance	£999,739 0 2

Adding to this total the sum of £1,752,884 Treasury bills outstanding, you arrive at the grand total of £2,752,623 Os. 2d., inclusive of the Special Suspense Accounts. I should like to point out to the Committee that in the Statements of Revenue Accounts as published by the Treasury there is no account showing the amount of Treasury bills outstanding, and I think that is an omission which might be rectified. You will find the amount in the Auditor-General's report, but you will not find it in the Treasury accounts. I believe the reason is that it is held that there is no such deficiency as that which is covered by the bills.

1188. *Mr. French.*] On what principle? The argument is to this effect—that as Parliament has passed an Act covering that deficiency by Treasury bills, therefore the deficiency does not exist.

1189. The deficiency does not exist on that footing, but what about the debt? Well, that is the argument. That is why they do not publish the balance, I understand.

1190. But they do include the Treasury bills in the Public Debt? Oh, yes! they include them as a floating debt.

1191. The Treasury bills are in the estimate of the Auditor-General as part of the deficiency, but the Treasury says, "No; these have been wiped out by a temporary expedient," and they show them in the public indebtedness? But they do not show them in connection with the balances on the Consolidated Revenue Fund Account, or in any way in connection with the revenue and expenditure accounts of the Colony.

1192. *Chairman.*] Question No. 10? Question No. 10 asks whether the amount of accrued interest transferred from the General Loan Account to the Consolidated Revenue Fund Account belonged to the period prior to the end of the year 1894, and whether the proper effect of this transfer was the reduction of the deficiency existing on the 31st December, 1894. Not only has the deficiency existing on the 31st December, 1894, properly to be reduced by the accrued interest, but also by other credits, such as the Premium on Loan and Interest on Deferred Payment of Instalment likewise transferred from the General Loan Account. The peculiarity about the Premium on Loan is that it was in connection with the very first loan covered by the transfer of accrued interest; it goes back a long time, namely, to Act 41 Vic. No. 7, yet it is taken into revenue proper, and the accrued interest into "other receipts."

1193. Question No. 11? Question No. 11 simply asks for the amount of the 1894 deficiency reduced by the transfer of £366,601 2s. 10d. from the General Loan Account. The answer to the question is £2,386,021 17s. 4d. inclusive of the Special Suspense Accounts, and £1,850,997 17s. 2d. exclusive of the Special Suspense Accounts.

1194. Question No. 12? Question No. 12 asks whether the law provides for the reduction of the deficiency on the Consolidated Revenue Fund Account by the annual redemption of Treasury bills to the amount of £150,000, and by operation of the statute, what should have been the amount of the deficiency on the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts. I may say that that simply brings the deficiency of 1894 down to the amounts established in my previous statement; that is what I call the downward movement of 1894 deficiency. The answer to the first part of the question is, Yes; and to the second part, £1,783,021 17s. 4d., inclusive of the Special Suspense Accounts, and £1,250,997 17s. 2d. exclusive of the Special Suspense Accounts. I explained before that I am of opinion that the plan of the Auditor-General in dealing with this redemption is entirely wrong. He argues that because he saw by the increase in the cash debit balance on the Consolidated Revenue Fund Account as a whole that the redemption was more than balanced by the increase in the cash debit balance, therefore the redemption had only been made in name, and had never taken place. That is flying right in face of the law, and right in the face of the actual entries in the Treasury books. Of course, the Treasury Deficiency Bills Act of 1889 did not say that a Treasurer should not establish another deficiency; and, as I have before explained, that is what actually took place, and that is what I call the upward movement of the balance on the Consolidated Revenue Fund Account. As a matter of fact, the Auditor-General simply struck out the item from the Expenditure Accounts altogether. That is why he shows, in a short table dealing with the revenue and expenditure in the middle of his report, the expenditure as so much less than the Treasury officials show it to have been. Not only that, but he also reduces the expenditure in another way. In the course of a financial year, for instance, the Treasury officials might make advances to the amount of a quarter of a million, and during the year £150,000 might be recovered before the operations are closed. Well, the Auditor-General would strike out the £150,000 on each side; it would be shown neither as expenditure nor revenue. He only includes in those figures the advances outstanding at the end of the year, not those that have been made and recovered within the same year. Consequently, the figures embodied in his report are at issue with those of the Treasury shown in the full statement of accounts preceding his report; but the balances must always close.

1195. *Mr. Yarwood.*] Does he show the amount that is owing on these Advance Accounts? Oh, yes; he always shows the amount to be recovered. I should like, in connection with Question No. 12, to refer again to the note appended by Mr. Reid to his statement showing the establishment of the deficiency of £1,174,000, in which he said that the balance included a large amount—£750,000—paid in extinction of the deficiency debt, and also an amount—£300,000—paid in extinction of the railway debt. I can see, of course, what was in his mind; but that statement is confusing—that note as it stands is confusing. It could only be justifiable on the ground that if his predecessors had not had their accounts charged with the annual redemptions, this debit balance would not have existed.

1196. You are referring to the £464,000 odd? No; the debit balance of £1,174,700 established by Mr. Reid, and represented by him to be a deficiency created by his predecessors. The argument would be, that if the redemptions referred to, amounting to £1,050,000, had not been made, there would have

J. R. Martin, Esq.
14 May, 1900.

have been, on the 31st December, 1894, a credit balance of £585,285, instead of a debit balance of £464,715; and instead of an issue of £1,174,700 of Treasury Bills being necessary, the small sum of £124,730 would have sufficed. But this was not the impression created; and in presenting such a statement, he flies right in the face of this fact, that the redemption had been actually made, and he could not well come forward and say it had not been made. As a matter of fact, there is no doubt that such a note as the one I refer to, appended to accounts submitted to Parliament, which is composed largely of men who do not understand accounts, is not calculated to make the issue plainer.

1197. *Mr. French.*] Assuming that the deficiency of 1886 and previous years was really £2,600,000, and that the deficiency now existing is £2,757,000, it would appear as if we had only drifted to the amount of £150,000, taking the Colony as a whole? Yes.

1198. But that goes back again to the question whether there was a real deficiency, and whether you can take that as a fair test of what has happened. It is startling, after what we have heard, to be told that we have only gone back £150,000 in thirteen years? If you compare the deficiency existing at the end of 1886 with the deficiency existing on December 31, 1894, or June 30, 1895, after increasing it by the amount of balances of votes afterwards expended, you have got a proper comparison, but if you carry it further, and compare the deficiency of 1886 with the deficiency on June 30, 1896, you have not got a fair comparison, in consequence of the change of system.

1199. But supposing there had been no change of system, and we had gone on as before, that would have been the result—a drift of £150,000 in thirteen years? Yes; provided you make the comparison between 1887 and 1899, and do not include the Special Suspense Accounts in the latter year. In 1887 the debit balance was £2,159,000, and on 30th June, 1899, about £2,100,000 without the Special Suspense Accounts, which represented an additional sum of £696,000. I may say that the annual redemption of £150,000, provided by Parliament for the extinction of the deficiency debt is very small, and it will take seven years before we get to the second issue of Treasury bills. I think that as soon as the Treasurer receives the surplus from the extra duties which the Federal Parliament will impose, the amount to be annually redeemed ought to be increased to £250,000 annually, instead of £150,000. There really is no deficiency to such an extent, as far as I am aware, existing in any of the other Colonies, and we are supposed to be the richest of the group. We have a land revenue of £2,000,000 annually, and our taxation is not much more than half that of the average of the other Colonies, yet we allow this deficiency debt to remain at its old figure. There is another important point in connection with the issue of these Treasury bills, as compared with the previous transaction by Mr. McMillan. It has been contended that the action taken by Mr. Reid was perfectly right, because Mr. McMillan took the same step, and Mr. Reid only followed suit. But there is a great difference between the two transactions; the cases are not at all parallel. Mr. McMillan in 1889 covered by Treasury bills the deficiency of 1886 and previous years; that is to say, he did what Mr. Reid afterwards did, and not only did he cover the cash debit balance existing on December 31, 1886, but he also covered the payments made in 1887, 1888, and 1889 on account of what might be truthfully called the liabilities of 1886 and previous years. That is the course followed by Mr. Reid; but here is the difference between the two cases: In Mr. McMillan's time, the year 1887 was not relieved of any amount at all, because having been relieved of expenditure on account of 1886, it was in turn charged with payments made in 1888, 1889, and 1890 on account of 1887, and so on. Mr. Reid did not do the same thing at all.

1200. Because of the change of system? Yes. There is also another important point. Mr. McMillan did not issue the bills during the year in which the payments were made, and so relieve his revenue. That again brings you back to the advantage which Mr. Reid got to the extent of £1,000,000 in consequence of the change of system. There are three ways of looking at the transaction. There is this way,—you can say that the transaction was wrong, and that the unexpended votes should have been allowed to lapse. Or you can say that the transaction was absolutely right, that it was carried out, and ought to have been carried out, and that the year 1895-6 did not benefit by it. Or you can say that it was right to cover the unexpended votes with Treasury bills, and that 1895-6 did benefit by the change of system, but that it was right to give the first year of the new system a fair start, and not charge it with a full year's expenditure—in fact, to give it a start of (say) two months, and not start it from scratch, so that it would take some time before the expenditure overtook the revenue. The first is the right view.

1201. *Chairman.*] Question No. 13? Question No. 13 asks for the actual amount of the deficiency on the Consolidated Revenue Fund Account existing on the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts. The answer is, £2,757,529 7s. 7d., inclusive of the Special Suspense Accounts; and £2,061,060 14s. 4d., exclusive of the Special Suspense Accounts.

1202. Question No. 14? Question No. 14 is simply drawn up with the object of finding the increase in consequence of the upward movement of the new deficiency as established by me in the last column of my statement. Inclusive of the Special Suspense Accounts, the amount is £971,507 10s. 3d.; and exclusive of the Special Suspense Accounts, £810,062 17s. 2d.

1203. Question No. 15? Question No. 15 asks whether the net proceeds of the new issue of Treasury bills, £1,024,700, were not, in effect, used in meeting a deficiency in revenue as compared with the expenditure during the period of four and a half years referred to, exclusive of the Special Suspense Accounts, leaving a credit balance on the account current existing on the 30th June, 1899. Of course, that was so. According to Question No. 5, the excess of expenditure over revenue was £1,061,912 1s. 11d., exclusive of the Special Suspense Accounts; and, according to Question No. 3, £1,223,395 18s. 1d., inclusive of the Special Suspense Accounts. But, according to the answer to Question No. 14, the deficiency, according to the balances, was only £810,062 17s. 2d. and £971,507 10s. 5d., respectively. That shows that the excess of expenditure has been reduced by taking into account net advances recovered to the amount of £251,849 4s. 9d. exclusive of the Special Suspense Accounts, and £251,887 17s. 10d. inclusive of the Special Suspense Accounts. These advances, of course, affected the balances. The recoveries are shown in detail in the evidence I gave on Friday. Accepting the total of £810,062 17s. 2d. exclusive of the Suspense Accounts, and deducting this from the answer to Question No. 8 (the net extraordinary receipts carried into revenue after extinguishing the cash debit balance on December 31, 1894, £464,715), namely, £926,586 2s. 10d., we are left with a credit balance on June 30, 1899, of £116,523 5s. 8d. So that, apart altogether from the question whether it was right or wrong to take up these bills, there is no doubt that the proceeds were used for the purpose of meeting a deficiency in revenue during the period of four and a half years. I might point out to the Committee that the

the first fifteen questions simply arrive at the results I gave on Friday last. I have here two returns which I have prepared showing the deficiencies according to the balances. The first includes the Suspense Accounts.

J. R. Martin,
Esq.
14 May, 1900.

CONSOLIDATED REVENUE FUND ACCOUNT, 1ST JANUARY TO 30TH JUNE, 1899 (INCLUSIVE OF SPECIAL SUSPENSE ACCOUNTS).			
	£	s.	d.
Actual Expenditure charged to account (Question No. 2).....	43,541,432	19	4
Less Actual Revenue from proper sources (Question No. 1).....	42,318,037	1	3
Excess of Expenditure during period of 4½ years (Question No. 3).....	£1,223,395	18	1
Less Advances recovered in excess of advances made (Question No. 15).....	251,888	7	10
Deficiency created by Mr. Reid on items brought to account only (Question No. 14) without reckoning relief to revenue afforded by transfer of £150,000 from Railway Loan Redemption Fund, and by institution of system of 30-year loans for services formerly defrayed from revenue, say, £550,000.....			971,507 10 3
Deficiency existing on 31st December, 1894 (Question No. 9).....	2,752,623	0	2
Less Transfers from General Loan Account of amounts belonging to the period prior to 31st December, 1894 (Questions No. 6 and 10).....	366,601	2	10
Less Reduction of 1894 Deficiency by operation of statute = 4 years at £150,000 = £600,000 (Question No. 12).....	600,000	0	0
		966,601	2 10
Balance of 1894 Deficiency existing on 30th June, 1899 (Question No. 12) ...	1,786,021	17	4
Actual Deficiency existing on 30th June, 1899 (Question No. 13).....	2,757,529	7	7
Increase of Deficiency in 4½ years, according to balances.....			£971,507 10 3

The second excludes the Suspense Accounts:—

CONSOLIDATED REVENUE FUND ACCOUNT, 1ST JANUARY, 1895, TO 30TH JUNE, 1899 (EXCLUSIVE OF SUSPENSE ACCOUNTS).			
	£	s.	d.
Actual Expenditure charged to account (Question No. 5).....	43,378,554	3	2
Less Actual Revenue from proper sources (Question No. 5).....	42,316,642	1	3
Excess of Expenditure on period of 4½ years (Question No. 5).....	£1,061,912	1	11
Less Advances recovered in excess of advances made (Question No. 15).....	251,849	4	9
Deficiency created by Mr. Reid on items brought to account only (Question No. 14) without reckoning relief to revenue afforded by transfer of £150,000 from Railway Loan Redemption Fund, and by institution of system of 30-year loans for services formerly defrayed from revenue, say £550,000.....			810,062 17 2
Deficiency existing on 31st December, 1894 (Question No. 9).....	2,217,599	0	0
Less Transfers from General Loan Account of amounts belonging to the period prior to 31st December, 1894 (Questions Nos. 6 and 10).....	366,601	2	10
Less Reduction of 1894 Deficiency by operation of statute, 4 years at £150,000 (Question No. 12).....	600,000	0	0
		966,601	2 10
Balance of 1894 Deficiency existing on 30th June, 1899 (Question No. 12) ...	£1,250,997	10	2
Actual Deficiency existing on 30th June, 1899 (Question No. 13).....	2,061,660	14	4
Increase in Deficiency in 4½ years, according to balances.....			£810,062 17 2

1204. Question No. 16? Question No. 16 asks "Whether, in changing the system of accounts, it was provided that certain expenditure should be met from the current Consolidated Revenue, and that the unexpended votes of previous years should be spent, and the payments met from the proceeds of the issue of Treasury bills referred to?" The answer to the question is, Yes. The cash debit balance on the Treasury Account Current on 30th June, 1895, when the change of system was made, was only £166,450 2s. 1d., and the bills were afterwards issued and the proceeds taken in as revenue, and that gave Mr. Reid his advantage.

1205. Question No. 17? Question 17 asks "Whether, if the unexpended votes were so used, a more equitable plan would not have been to have allowed them to lapse in changing the system of keeping the Public Accounts, seeing that it was provided that thereafter all the unexpended votes should so lapse?" I say, decidedly, yes. I showed on Friday that the expenditure charged to the year 1895-6 was simply reduced, as compared with 1893 and 1894, by almost the same amount that was charged to Treasury bills during the year; and the system adopted was not the same as that followed by Mr. McMillan in 1886, because in the one case the accounts went on as before, and in the other case they did not.

1206. Question No. 18? Question No. 18 asks "Whether the course pursued did not have the effect of reducing the expenditure chargeable to the first year of the new system below the ordinary expenditure of the Colony, and so yielding a credit balance on the new account on 30th June, 1896? My answer is, Yes. The particulars are as follow:—

	£	s.	d.
Expenditure in 1895-6	9,852,218	17	6
Less charged to Treasury bills	952,807	8	11
Charged to year 1895-6	£8,899,411	8	7
Charged to 1893	9,816,876	6	8
Charged to 1894	9,694,889	18	0
Total of two years	£19,511,766	4	8
Average of 1893-94	£9,755,888	2	4
Charged to 1895-6	8,899,411	8	7
Difference	£856,476	13	9

J. R. Martin,
Esq.
14 May, 1900.

So that the Committee will see that the amount charged to Treasury bills in 1895-6 was practically the amount by which the expenditure charged to revenue was less than the average. I should like to point out that the average of the three years succeeding 1895-6 has been affected by the savings in the Public Service, and also by the reduction in the Roads Vote. If you compare the amount charged in 1895-6 with the average of 1893-94, you practically find that the amount by which 1895-6 was relieved is equal to the expenditure from Treasury bills; but if you go forward to the years 1896-7, 1897-8, and 1898-9, you will find that the difference is not so great.

1207. *Mr. French.*] Have you those averages? In 1896-7 the amount was £9,466,059 19s.; in 1897-8, £9,383,122 10s. 8d.; and in 1898-9, £9,734,417 9s. 10d. A saving of £300,000 was made by the Public Service Board, and that practically commenced with the year 1896-7. The grading was made before June, 1896, but the savings did not take effect until the following year. If you compare 1895-6 with the preceding years the difference is greater, because the reductions mentioned did not take effect in 1895-6. Also in regard to the Roads expenditure, the average charged to previous years was £700,000, and that was maintained in 1895-6 by the utilisation of the proceeds of the Treasury bills. But when you get to the year 1896-7 and the following years, you find that the average is £500,000.

1208. The expenditure in 1898-9 has again been brought up to the average of 1893-4, in face of those reductions? Yes; of course, they curtailed the expenditure in 1893 and 1894 as much as they could; and, after all, the expenditure of a country like this has a tendency to grow.

1209. *Chairman.*] Question No. 19? Question No. 19 asks for the amount of the credit balance on the 30th June, 1896, and the amount to which it had been reduced by the 30th June, 1899. On the 30th June, 1896, the credit balance, exclusive of the Suspense Accounts, was £476,530 1s. 10d. From that amount there has to be deducted the sum of £150,000 represented by Treasury bills afterwards cancelled, which brings the credit balance on that date down to £326,530 1s. 10d. On the 30th June, 1899, that amount had been reduced to £116,523 5s. 8d. It is rather important to note that reduction, because a great many people in this country got the idea that the Treasurer was able to bring out a surplus in every year of the last four years. In my opinion, the credit balance of £326,531 1s. 10d. on June 30, 1896, was only established by the utilisation of the Treasury bills to defray payments properly falling on the year's revenue; but in 1896-7 there were practically no payments from Treasury bills, and we find that there was a deficiency of about £200,000 on the year, for the credit balance fell to £114,444 15s. 6d. I speak from memory, but I think it was just after that credit balance was announced that I noticed in the Press a request by a business man, whose name I forget, but who was well known in the city, urging the Government to undertake a certain work, and pointing out as proof that the work could be undertaken that the Treasurer had been able to wind up the year with a credit balance, and that therefore the finances of the country must be in a flourishing condition, whereas there was actually a deficiency on the year's transactions to the amount of £200,000.

1210. *Mr. Yarwood.*] I do not think the Treasurer ever said anything to the effect that there was a surplus; he may have been understood to say so? That was the only year, I think, speaking from memory, in which the term "surplus" was avoided. In the other years the term "surplus" was used.

1211. *Chairman.*] Mr. Kirkpatrick says there was a surplus? In the following year of 1897-8 there was really a surplus of about £8,000 on the transactions brought to account, because the credit balance had increased to £122,211 1s. 10d. I use the words "brought to account" advisedly, for this reason: In that year, altogether apart from unpaid accounts, £150,000 was taken from the Railway Loan Redemption Fund. The amount was lying there for another purpose altogether, and if that sum had been charged to the revenue, instead of a credit balance of £122,211 1s. 10d., there would have been a debit balance of about £37,000, and that debit balance would have been about £6,000 greater on the 30th June, 1899. So, even after the great advantage which the new system got by the issue of the Treasury bills, that "surplus" has been wiped out long ago, or ought to have been, if the operations had been brought to account.

1212. *Mr. Yarwood.*] Was it in 1897-8 when the transfer was made? Yes; I may say that the Auditor-General's balance on the account current is very much less than the credit balance of the Treasury. The Auditor-General holds that there is a large amount of the proceeds of the Treasury bills unexpended, that is, of the £1,024,700; he claims that about £35,000 or £40,000 is unexpended legally, so that the actual credit balance on the new account current on 30th June, 1899, would not be £116,523 5s. 8d., but about £35,000 or £40,000 less.

1213. Then he said that there was £35,000 of the old business unexpended? Yes, standing in the Treasury books. I have not seen a note of the transactions in dispute, but there may be something to be said in favour of the Auditor-General's view, for this reason: Section 17 of the old Audit Act reads as follows:—

"Unless expressly enacted to the contrary, all sums of money which shall be appropriated to the Public Service for any year and which shall not be expended during such year, or within the first three months of the following year, shall lapse, and shall not be issued or applied in any future year to the particular service for which the appropriation shall have been so made unless a contract or engagement shall have been made and entered into, before the expiration of such year, by which a liability so to issue or apply the same shall have been incurred."

This term of fifteen months was increased to two years by the Annual Appropriation Act. The effect of that was this, it gave a life of two years to every vote of Parliament, unless a contract or engagement were entered into, and a contract or engagement was thus constituted: If an amount were voted—say for taking the census, £5,000—and before the expiry of the two years £100 had been paid away on account of salaries, that would constitute an engagement which would have the effect of keeping the vote alive until it was all expended, or until the balance was written off. That was the law according to the old system. The Audit Act Amendment Act repealed that section absolutely, and the only law existing which enabled Mr. Reid to utilise the proceeds of the bills in 1895-6 in that way was the section in the Appropriation Act which extended the life of votes from fifteen months to two years. Well, section 17 of the Audit Act having been repealed, it would seem impossible for Mr. Reid legally to have utilised the proceeds of the bills in meeting payments on account of the unexpended votes; but I suppose he contended that he was able to use them under the section of the Appropriation Act I have referred to. However, in that section there is no statement about any contract or engagement, it simply gave a life of two years to a vote. And if we take the unexpended votes prior to the change of system, we find that the latest period is the half-year

of 1895; and calculating from the beginning of January, 1895, the life of the latest vote under the old J. R. Martin, Esq. system must have expired on the 1st January, 1897, according to law, and anything paid away after that date on account of the old deficiency would be illegal, and a proper charge on the new account. But I believe the Treasury is unaware how the Auditor-General makes up his balance. 14 May, 1900.

1214. *Chairman.*] Question No. 20? Question No. 20 asks for the amount by which the expenditure charged to the year 1895-6 was less than the average expenditure of immediately preceding years, and the cause of this reduction in this expenditure; also the amount charged to the proceeds of Treasury bills in 1895-6. The amount by which the expenditure was less than the two preceding years of 1893 and 1894 was £856,476 13s. 9d., and the amount charged to the proceeds of bills was £952,807 8s. 11d., the two amounts being practically identical. The cause of the reduction was the change of system, which prevented the year 1895-6 from bearing a full year's expenditure.

1215. Question No. 21? Question No. 21 asks whether a sum of £216,000 was not saved from the vote in 1893 on account of roads, endowment to boroughs, district councils and shires, under the proposed Local Government Bill, and this sum called back into existence and spent partly in 1894 and the first half of 1895, but the larger part in the year 1895-6, on the plea that the savings had been improperly made; and whether an examination of the annual expenditure on roads does not show that the action referred to enabled a large reduction to be effected on the amount charged to the year 1895-6 as compared with previous years. I might say that this is a very important matter. In 1895-6 the late Treasurer spent £719,990 on roads, and of that sum he only charged to his revenue £387,207, and he charged to the proceeds of Treasury bills £332,783. The total amount spent during the year was only equal to the average amount spent in the five years from 1890 to 1894. During those five years there was spent a total sum of £3,483,437. If you average that you get £696,687 per annum. And if you take the amount charged against each year, you find that the average for these five years was £715,973. So you must come to the conclusion that the proper expenditure on the roads of the Colony during a single year was £700,000. That was practically the amount that Mr. Reid spent in 1895-6, but he charged back £332,783 to the proceeds of Treasury bills. This sum of £216,000 was part of a vote which was passed by Parliament in 1893; and as times were bad, and as the roads, having had this large amount of money spent upon them for many years, were in a good condition, it was open to the Ministry of the day to say that they would not spend all the sum that was voted by Parliament. They were quite right; they could afford to save the sum of £216,000, and they wrote it off according to law. But Mr. Reid, on coming into power towards the end of 1894, went down to Parliament quivering with indignation, and said that it was a most improper saving, and that he was going to call it back into existence. And he did call it back into existence, and spent it on the roads. If he had spent it in addition to the sum of £700,000, it would have been justifiable, but the figures show that he used it to reduce his expenditure in 1895-6, which was a most improper thing to do.

1216. *Mr. Yarwood.*] But very clever? It was very clever; but you must acknowledge that the sum was not a liability of his predecessors, and you must take the £216,000 off to start with. The difference, of course, between this vote and the full amount of £332,783 charged to Treasury bills, was charged to 1894 and 1895. Of the sum of £216,000 a small part was spent in 1894 by Mr. Reid; afterwards, another part was spent in the half-year of 1895; so that when the change of system was made there was unexpended on account of the sum of £216,000 a balance of £153,514, and the difference between that sum and the sum of £332,783 charged to Treasury bills was supposed to be expended on account of Votes of 1894 and the half-year of 1895.

1217. *Chairman.*] Question No. 22? Question No. 22 asks, "Whether, during the first half-year of 1895, the amount of accrued interest previously referred to was transferred from the General Loan Account, reducing the cash debit balance on the 31st December, 1894, exclusive of the Suspense Accounts; the debit balance on 30th June, 1895, which was extinguished by the proceeds of Treasury bills; and of these proceeds, expended after the change in the system of keeping the Public Accounts was made, what sum was utilised in meeting claims on account of 1894 and previous years, and what sum in meeting those of the first half-year of 1895." My answer is that on the 31st December, 1894, the debit balance of the Treasury Account Current was £464,715. On the 30th June, 1895, that balance had been reduced to £166,450 2s. 1d.; that is the amount which, in my opinion, should have been covered by Treasury bills, and not the unexpended votes in addition to that sum. In connection with this question, I should like to point out the misleading character of the return compiled by Mr. Kirkpatrick, and presented to this Committee—that is, the statement showing that the bulk of these proceeds were expended on the services of 1894 and previous years, and only a very small part on account of the half-year of 1895. As soon as I looked at this statement I saw that it was misleading, and could only have the effect of misleading Parliament, for whom apparently it had been compiled. When it first came under my notice a few months ago, I took it and placed the transactions in the order of date, and I found that the net payments after the change of system was made amounted to £626,273 on account of the half-year of 1895, and only £226,435 on account of 1894 and previous years, making a total of £852,708 paid away after the change of system. These are the figures included in the statement laid before the Committee by Mr. Kirkpatrick, but simply arranged in a proper manner.

1218. *Mr. Yarwood.*] The statement I have is made by Mr. Vernon? I refer to the statement placed before the Committee by Mr. Kirkpatrick, who stated he had compiled it. The payments from Treasury bills after 1st July, 1895, according to the Treasury statement, were as follow:—During 1895-6, on account of 1894 and previous years, £302,521; on account of 1895 (six months) £650,286, making a total of £952,807. During 1896-7, on account of 1894 and previous years, £1,719; and on account of 1895 (six months) £2,363; making a total of £4,082. During 1897-8 on account of 1894, £14,300; and on account of 1895 (six months), nil. The total payments amounted to £971,189. From that sum I deduct the receipts during the three years, amounting to £92,105 on account of 1894 and previous years, and £26,376 on account of 1895 (six months), making a total of £118,481. The net payments after 1st July, 1895, amounted to £226,435 on account of 1894 and previous years, and £626,273 on account of 1895 (six months), the total being £852,708; but in the original statement it is actually shown that nearly all the proceeds were spent on account of 1894 and previous years. The change of system was made on 30th June, 1895. At that date there was a debit balance of £166,450 2s. 1d. The proceeds of the bills were not brought to account until long after that date; as a matter of fact, the Act

was

J. R. Martin, Esq., was not passed until December, 1895. Therefore, the proceeds could only have been applied to meet payments after 30th June, 1895, and the bills were only issued to meet payments on account of unexpended votes of the half-year of 1895 and previous years. That bears out my contention that the statement compiled by Mr. Kirkpatrick, apparently with the object of laying it before Parliament, is absolutely misleading. It was intended to show that when the change of system was made there was a very large deficiency on account of 1894 and previous years; but there was not such a deficiency, because part of it had been extinguished in the ordinary course of business during the half-year of 1895, before the change of system was made.

14 May, 1900.

1219. *Chairman.*] Question No. 23? Question No. 23 asks whether the Consolidated Revenue Fund Account Current, under the new system, was relieved in the year 1895-6 by only charging it with one-half year's redemption of Treasury bills in aid of revenue and of Railway debentures. That was so, and I can only say it was a most extraordinary action, because on the 31st December, 1894, nothing had accrued whatever on account of those redemptions, and on the 30th June, 1895, nothing was due by law. Indeed, nothing was due until December, 1895. If the Treasurer had desired to charge a half-year's redemption to the proceeds of the Treasury bills, that would have been all right if he had charged the year 1895-6 with a full year's redemption; but he did not do that. Obviously, the division was only made to relieve the first year of the new system, in addition to relief in other ways.

1220. Question No. 24? Question No. 24 asks whether the act of applying £150,000 from the Sinking Fund established under Act 53 Vic. No. 24, towards meeting Railway debentures matured under Act 31 Vic. No. 11, will not have the effect of compelling the Consolidated Revenue Fund, at a later period, to provide the amount relieved from the year 1897-8. That question was written out before the Auditor-General took action to compel the present Treasurer to replace that sum of £150,000 to the Railway Loan Redemption Fund.

1221. *Mr. French.*] But it has been replaced? Not yet. The Treasurer informed the Auditor-General that the matter would be referred to this Committee.

1222. *Mr. Yarwood.*] Did Parliament authorise the step? The late Treasurer told Parliament what he was going to do in this matter, but Parliament did not give him any special authority for taking that course.

1223. But it was part of his Ways and Means Statement? Yes. The law says that £2,000,000 of Railway debentures shall be redeemed, £1,000,000 under one Act and £1,000,000 under another; and if they take the Sinking Fund established in connection with one Act, and use the amount in the redemption of £150,000 due under the other Act, then, of course, the revenue must afterwards be responsible.

1224. If the Treasurer does not put it back, what will the Auditor-General do;—will he report it to Parliament? Of course, the Treasurer must put it back. The bills must be redeemed according to law, unless the law is altered. £75,000 is supposed to be put aside every year under Act 53 Vic. No. 24 to a Trust Fund. There is a special account in the Bank of New South Wales for the fund. After letting the money lie for two or three years the funds would accumulate to £150,000 or £225,000; the Government might then take the money out and redeem debentures.

1225. But in this case they did not, is that it? They took £150,000 from the fund and applied it to another purpose. The Railway Loan Redemption Fund was established for the purpose of redeeming £1,000,000 under Act 53 Vic. No. 24, and £150,000 was lying at that time to the credit of the fund in the Bank of New South Wales. Then, under Act 31 Vic. No. 11, a prior Act, which provided for the redemption of another £1,000,000 of Railway debentures, a large sum fell due—over £200,000—and this large sum fell due because in previous years the Treasurer had not applied the full annual sum of £70,000 provided by law for the extinction of the debentures, but had effected a saving in some years. During Mr. Reid's tenure of office, in the two and a half years prior to this date, he had had the advantage of £101,000 in consequence of the non-application of the full sum of £70,000 annually towards the extinction of these debentures. But as the effect of providing from the Consolidated Revenue the full amount of £204,000 payable in 1897-8 would have apparently extinguished the credit balance of the new account which then existed, the Auditor-General gave his permission, for the time being, to take £150,000 from the Railway Loan Redemption Fund, charging the difference of £54,000 to revenue.

1226. *Chairman.*] A most extraordinary weakness on the part of a man who has been so stiff all along? Very weak indeed; he sees his mistake now, and tries to get the money back.

1227. To get it back would seem to require an entry of this kind, to credit the Railway Sinking Fund with £150,000 and debit the Consolidated Revenue? That would seem to be the simplest way of getting out of the difficulty.

1228. *Mr. Yarwood.*] Might it not be argued that they ought to have included this in the amount for which they ought to have provided in making the Treasury bills? They could not do that, because the larger part was saved after the change of system. In Mr. Reid's own two and a half years, from 1st January, 1895, to 30th June, 1897, he saved £101,000. During that period the sum of £175,000 should have been spent from revenue in redemption of these debentures maturing under Act 31 Vic. No. 11; but Mr. Reid saved £101,000 on that amount. So if you had had really to provide for the amount outstanding when the change of system was made, you would not have got anything like £150,000.

1229. Is the present Treasurer going to put it back? The money has not been put back yet, because the present Treasurer said that he would rather not do anything until the Committee of Inquiry had gone into the question and made a recommendation, and he would act on their recommendation.

1230. *Chairman.*] Question No. 25? Question No. 25 asks for the amount by which the Consolidated Revenue has been relieved by charging to the proceeds of short-dated loans, and in other ways, expenditure ordinarily provided from revenue; whether the system of repayments established in connection with these loans is not one that tends simply to relieve the first few years during which it is in operation at the expense of future years, and whether it should not be discontinued. This is an important question. If we take, for the sake of illustration, the annual expenditure on the services for which the system of short-dated loans was instituted at £150,000, then we find that the thirtieth part of that sum, which is to be set aside annually under the Act, is £5,000, and if we suppose that the expenditure of £150,000 is maintained right to the end of thirty years, we find that during the whole period loans to the amount of £4,500,000 have been contracted, and in consequence of the operation of the Sinking Fund the sum of £2,325,000 has accumulated and gone towards the reduction of the debt, leaving outstanding at the end of the thirty years the balance of £2,175,000. Now, of the total relief to revenue of £2,175,000, there would

would be a relief of £1,225,000 during the first ten years; during the second period of ten years the relief to revenue would be £725,000; and during the third period of ten years the relief to revenue would be £225,000. Therefore, it follows clearly that the system only relieves the present generation at the expense of the future generation, because there will be owing at the end of the thirty years a sum of £2,175,000, and as the annual payments to the sinking fund will then be £150,000, you get back to the exact position from which you started.

J. R. Martin,
Esq.
14 May, 1900.

1231. *Mr. French.*] Is there any specific legislation with regard to these short-dated loans? Yes.

1232. It seems to me that the term short-dated loans is a misnomer? Well, the others can be renewed, and these have to be paid off. I think it is a particularly pernicious system. Mr. Yarwood seemed to think otherwise. But at present we are getting about £2,000,000 of revenue from lands. The revenue from land alienation is gradually decreasing—

1233. *Mr. Yarwood.*] Have you any figures for that? I will get you the figures; anyhow, it is decreasing. In 1881 the revenue from land alienation was £2,483,338, and in 1889 the revenue from alienation was £1,204,308.

1234. *Chairman.*] A loss of how much? It is not exactly a loss, because the policy of the country has changed, and we are getting a larger revenue from occupation than we did then. In 1881 we only got a revenue from occupation of £337,651, whereas in 1898-9 we had a revenue from occupation of £702,588. The effect of this very large land revenue upon our finances is that it saves our people from a great burden of taxation which they would otherwise have to bear, and which is borne in the other Colonies.

1235. Therefore, there is no necessity for these short-dated loans? Quite so; there should be no necessity, because not only are we being relieved by the utilisation of these land proceeds from bearing very heavy taxation, but we are also, under this new system, passing on to posterity another sum which we had hitherto defrayed from revenue. It is only we that get relief; posterity cannot get relief, because their sinking funds will be equivalent to our expenditure from revenue in thirty years' time. While the revenue from land alienation is diminishing, the proceeds from occupation are increasing, so that we still have a land revenue of £2,000,000. The effect of this is as follows:—According to the latest statistics which I am able to find, without actually compiling them for myself, the taxation per head in this Colony is £1 18s. 5d.; in Victoria, £2 9s. 6d.; in Queensland, £3 4s. 6d.; in South Australia, £2 9s. 2d.; in Western Australia, £6 17s. 8d.; in New Zealand, £3 14s. 2d.; and in Tasmania, £2 18s. 9d. In these figures we see the effect of our land revenue, combined to a small extent with our excellent administration of railways. But here is the point: Instead of hypothecating part of that revenue, as we ought to do, for permanent and reproductive works, we use the whole of the proceeds to reduce our taxation. And we now go still further, and besides refusing to apply any of it to permanent works, we say that we will not expend even the sum of £150,000 annually on works which are neither reproductive nor permanent, but which will only last thirty years, and out of that large revenue of £2,000,000 we will only apply a few thousand pounds towards a sinking fund for the redemption of these loans. We cast everything on posterity, and we take everything for ourselves which we can get.

1236. *Mr. French.*] We cast too much on posterity? Yes.

[Adjourned till Tuesday, May 15, 1900.]

EIGHTEENTH DAY—TUESDAY, 15 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

John Roxburgh Martin, Special Clerk to the Under Secretary for Finance and Trade, further examined:—

1237. *Mr. French.*] Now we come to Question No. 26, which is the crucial question? It is. Inclusive of the Special Suspense Accounts, the deficiency on the operations brought to account would be £971,507 10s. 3d., and exclusive of the Special Suspense Accounts, £810,062 17s. 2d. Taking the sub-head (c), "as increased by amount taken from Sinking Funds to meet debentures falling upon revenue," the amount, inclusive of the Suspense Accounts, is £1,121,507 10s. 3d., and exclusive of the Special Suspense Accounts, £960,062 17s. 2d. As to sub-head (d), "as further increased by expenditure ordinarily defrayed from Consolidated Revenue and provided from short-dated loans, and in other ways," I take £550,000. The actual expenditure from these short-dated loans is over £600,000, and I simply take £550,000 as the relief to revenue, making an allowance for services which might have been met from long loans if this system had not been in operation. That would make the deficiency on the 4½ years, inclusive of the Suspense Accounts, £1,671,507 10s. 3d.; and exclusive of the Special Suspense Accounts, £1,510,062 17s. 2d.

J. R. Martin,
Esq.
15 May, 1900.

1238. That is putting in the sum of £550,000 as having been charged to short loans, but which ought to have gone to expenditure? Yes.

1239. *Mr. Yarwood.*] What is the nature of your dividing line? The services which might have been met from long loans, if the new system had not been brought into operation, could only reach a very small amount. I know it is considered that the amount would have been very small.

1240. *Mr. French.*] Was not the expenditure charged to these loans over a million? I do not think that the actual expenditure within the period was more than £650,000.

1241. *Mr. Yarwood.*] Does not the Treasurer make any statement of what they charged to short loans? It could be taken out.

1242. *Mr. French.*] When we talk of short loans, is a short loan actually raised—a thirty-year loan—or what has happened? I will show an Act which will explain it—58 Vic. No. 14. This is a Loan Act passed for the issue of Stock, to meet certain services proposed to be covered by loan moneys to a large amount; and it is provided within that Act that, in connection with certain services which are specified, there shall be annually set apart as a Sinking Fund one-thirtieth of the amount raised on their account and spent upon them.

- J. R. Martin, 1243. Does not the Act contemplate any means by which the General Loan Account shall be replenished so as to meet the expenditure; it must be replenished somehow;—I suppose the items would be charged to General Loans? Yes.
- Esq.
15 May, 1900.
1244. Would they not be credited with something to balance that? At the end of the thirty years the redemption would be made.
1245. Not till then? Not till then, I think.
1246. Well, the General Loan Account gets into debit? The General Loan Account gets into debit on account of the expenditure from loans.
1247. And, in your view, it would keep on getting into debit till the end of the period? They did not float special loans to meet these services in connection with which a sinking fund is provided, but included them in the Act under which long loans are issued; and they simply charged the expenditure in connection with them to the General Loan Account.
1248. The result of that would be that if they did not replenish from some other source they would get into debit? They would always replenish the Account with the proceeds of loans floated from time to time. To the General Loan Account they credit the proceeds of the loans, and debit the expenditure; it is a receipts and disbursements account.
1249. They included the thirty years' loans amongst it? Oh, yes; in the ordinary loan expenditure.
1250. And if they raised and spent £160,000, they put £5,000 or £6,000—whatever the thirtieth was—to a sinking fund? Yes, which is a Trust Fund.
1251. Of course, they have filled up the Loan Account by taking in £1,500,000 from Trust Funds? You could take it this way: that part of the expenditure referred to in Question No. 26 (d) might have been met from the transfer of £1,500,000 of Trust Funds. It may be argued in that way; at any rate the expenditure was met from the Account to which the money has been credited.
1252. *Chairman.*] Question No. 27? Question No. 27 asks for the amount of the credit balance on the Consolidated Revenue Fund Account Current on 30th June, 1896; 30th June, 1897; 30th June, 1898; and 30th June, 1899. On the 30th June, 1896, the amount at credit was £176,530 1s. 10d.; but, as bills to the amount of £150,000 were cancelled afterwards, the real amount may be said to have been £326,530 1s. 10d.; on the 30th June, 1897, the amount was £114,444 16s. 6d.; on the 30th June, 1898, it was £122,211 1s. 10d.; and on the 30th June, 1899, it was £116,523 5s. 8d.
1253. And at that date the Treasury and the Audit Department agreed? Yes, with this exception—that the Auditor-General holds that of this sum of £116,523 5s. 8d., represented by the Treasury to be the credit balance on the Account Current, from £35,000 to £40,000 really represents unexpended proceeds of Treasury bills, because the Treasury charged to the old deficiency certain amounts which the Auditor-General would not allow; but together the Auditor-General's credit balances on the two working accounts, exclusive of the Suspense Accounts, amount to £116,523 5s. 8d., so the two Departments practically agree on the total.
1254. Question No. 28? Question No. 28 asks whether these balances represented cash in the Bank, and, if so, which of them? I say that none of these balances represented cash in the Bank.
1255. Question No. 29? Question No. 29 asks what was the actual condition of the Consolidated Revenue Fund Account on the dates specified above, as disclosed by the Bank balances. My answer is that on 30th June, 1896, the Consolidated Revenue Fund was in debit to the amount of £428,370 14s. 3d.; on 30th June, 1897, to the amount of £828,503 0s. 5d.; on 30th June, 1898, £777,702 12s. 4d.; and on 30th June, 1899, £793,144 4s. 6d. Of course, these are the debit balances on the Consolidated Revenue Fund Account as a whole, inclusive of the debits on the Special Suspense Accounts, but there was no cash in the Bank.
1256. *Mr. French.*] It is all boiled down to this: that it is the Trust Funds which provide the current credit balance? Quite so. Those amounts which I quoted are the amounts arrived at after bringing to account the payments made in London in May and June.
1257. *Mr. Yarwood.*] In connection with these payments, made in May and June, what evidence have we got to show whether the year 1895-6 carried a whole twelve month's expenditure;—I may say straight away that while I can see that such a course would be to the advantage of a Bank or an institution that works for a profit and declares dividends, I am not yet clear that there is any advantage to the country in going to the expense of having figures cabled out from London of the expenditure if the year's accounts carried a fair year's expenditure? But don't you see that you do not really get down to a "cash basis" system if you do not bring the London payments to account. You arrive at a cash balance supposed to exist on the 30th June which did not actually exist, because it had all been paid away in the two months previous to the date of the balance.
1258. If the year has borne twelve months' expenditure, I do not know that it is absolutely necessary to bring it any further. However, that is one of the features of the thing that has occurred to me? That system has gone on for a quarter of a century, from the time when the mails took a long time to come out. That is the origin of the system, but it must be changed some day in order to bring the results up to date.
1259. What I want to know is,—that is, if you know—whether in those payments that were charged to the old deficiency there were London payments included? I have no doubt there were a few, but not more than a proper proportion.
1260. Not £200,000 or £300,000? Oh, no; there could not have been anything like that. I think the first year of the new system must have borne a full year's interest charge—on account of payments to bondholders only, however.
1261. That, I may say, is obvious from the accounts? Just to show you the effect of not bringing those London payments to account within the financial year, I may say that, if you take the Bank balances on those four dates and cast out the Suspense Accounts altogether as if they had never existed, you will find that, instead of the credit balances which were arrived at and declared in Parliament by the Treasurer, you have on the 30th June, 1896, a credit balance of £265,239 3s. (but as £150,000 was afterwards cancelled, the balance was really £139,239 3s.), and ever afterwards you have a debit balance. On the 30th June, 1897, the debit balance was £130,817 3s. 1d.; on the 30th June, 1898, it was £80,310 18s.; and on the 30th June, 1899, £96,675 11s. 3d. Those were the debit balances on the Consolidated Revenue Fund Account after casting out the Suspense Accounts altogether. I am showing

showing that, even if the Suspense Accounts had never existed, the system pursued in connection with the London payments had the effect of converting the supposed credit balance on the Account Current into a debit balance. J. R. Martin, Esq.

15 May, 1900.

1262. But would you not be charging the new administration with fourteen months' accounts? If you make a change, you must recognise that the first year must bear fourteen months' London payments. That must be clearly understood, and the Treasurer whose accounts bear this charge of fourteen months' London payments must set it forth clearly before the public, so that he will get due credit for it.

1263. I do not see the necessity for that so far. I do not look at this question from any other point of view but the public point of view; and I take it that what the public wants from us is a statement as to whether the country has been paying its way in the last four or four and a half years, at any rate during the old regime. One man says it has, and another man says it has not. Now the public want to know whether we, as business men, impartial men, after looking at the accounts fairly, as any ordinary business man will look at them, can say whether the country has paid its way. I am quite prepared, on the one side, to give any relief that may be legitimately given, but I am not prepared to either load one side or unload the other more than what I think is fair? If the Committee make a recommendation, it will be a recommendation for the future, and it will not affect the past. That is the only point.

1264. *Chairman.*] Question No. 30? Question No. 30 is practically answered, because it asks, in the event of a discrepancy between the ledger balances and the Bank balances, to what was this due. To put the matter plainly, it was simply due to the existence of the debit balances on the Suspense Accounts in the first place, and to the system pursued in connection with the payments in London in May and June in the second place. And, in my opinion, a system of accounts under which such differences are possible is not correctly described as a cash-basis system, because there is no cash basis. There is no cash at all as the basis of the system, and yet it is called a "cash-basis" system.

1265. Question No. 31? Question No. 31 asks whether it is correct to hand over large interest payments to the Bank of England in the month of June, and bring them to account on the 1st of July following; and whether the Commissioners would recommend the London payments in May and June to be included within the financial year during which they actually are made; and whether the Special Suspense Accounts should be closed up. The latter part of the question is for the Committee to answer. In regard to the first part, I do not think the practice is correct. In my opinion, the money passes out of the hands of the Government and it goes finally. They cannot touch it afterwards in any way.

1266. *Mr. French.*] Is that the new system;—was it introduced lately? No.

1267. The period has got no advantage through that? Oh, no; not at all.

1268. *Mr. Yarwood.*] The only thing is whether we should not get an idea of the expense of cabling the items? You would have to divide the payments between the Consolidated Revenue Fund Account, the General Loan Account, and the Trust Funds.

1269. *Chairman.*] Question No. 32? In connection with Question No. 32, which asks whether the present system of keeping the Public Accounts is a good one, and whether the Commissioners can suggest any improvements in the method of keeping the Accounts or in their presentation so that these may be more easily comprehended by the public, I would simply draw the Committee's attention to a matter which has been already referred to by Mr. Yarwood—that is, that the Summary Statement of Accounts is confusing to the public, who do not have a special knowledge of the Accounts. In any suggestions you may make for their improvement, I am sure you will have the cordial co-operation of the present Accountant, Mr. Vernon. I have before me a statement of the balances on the Public Accounts on 30th June, 1898. Here is the Consolidated Revenue Fund Account Current stated as the "Consolidated Revenue Fund Account," and showing a credit balance on 30th June, 1898, of £122,211 1s. 10d. Farther down you find two other accounts which are part of the Consolidated Revenue Fund Account, but which are not shown as part of the Consolidated Revenue Fund Account.

1270. What are those? The General Post Office Account and the Centennial Park Account. The three accounts might be kept under one heading. Then, again, take the General Loan Account. Here it is shown to have had a credit balance of £1,530,664 0s. 1d. But there was actually a debit balance existing at that time, because they had taken into credit three transfers from Trust Funds of £500,000 each, making a sum of £1,500,000, and in addition to that they had borrowed and taken into account £50,000 from the Curator of Intestate Estates; so that there was a small debit balance actually on the account at that date, and it is not shown.

1271. In other words, it is misstated? As the Account stands, an explanation is required.

1272. Question No. 33? Question No. 33 asks whether the sum of £1,500,000 was transferred from Trust Funds to the General Loan Account, as alleged by the Auditor-General;—my answer is that that was so, and it had the effect of showing the public debt to be £1,500,000 less than it actually was in the Public Debt statement.

1273. *Mr. Yarwood.*] That has been stated before, and yet I am not clear on that score;—when I raised the point with the Auditor-General he turned up his book and showed that £1,500,000 is added on? If you turn up the statement of Public Debt you will not find that sum of £1,500,000; and if you compare the Public Debt as made up on 31st December, 1893, with the amount owing on 30th June, 1899, you will find that in addition to the growth of the Public Debt as thus disclosed, it has been £1,500,000 more.

1274. *Mr. French.*] The conclusion I came to was that the reason why they omitted it was that they held they had a credit balance, until they began to use it, it was not part of the Public Debt? It might be so.

1275. That is the only justification, so far as I can see? That could be the only justification.

1276. *Mr. Yarwood.*] Was not the reason for that the fact that they did not get anything for it? That was one of the reasons, that it was not covered. But the amount is part of the Public Debt and might be shown. There is no reason why they should not put in another line in the Statement, and show that they owed another £1,500,000.

1277. I thought the insinuation was some time ago, when I heard it first, that it was done to deceive the public, but I am not quite clear about that; still, the sum of £1,500,000 is shown in the General Loan Account? I know nothing of that insinuation, if such was ever made. I may say in connection with the General Loan Account, that the balance on that account is not quoted in the statistics of the Colony. It is a mere receipt and expenditure account. The public debt of each colony is made up every year, and the growth is closely watched, not only in Australia, but at home, and that sum of £1,500,000 does not appear in the amount of public debt of New South Wales.

1278.

- J. R. Martin, Esq.
15 May, 1900.
1278. *Mr. French.*] The only reason I can see that might be a justification is that they have not commenced to operate upon it, that the credit balance was more than the amount of the loan? Not when you take into consideration that they had actually borrowed £50,000 from the Curator of Intestate Estates.
1279. I cannot understand about that £50,000, because it seems to me that that was to some extent repaid? It is existing now. At any rate it was there a few weeks ago.
1280. *Chairman.*] Question No. 34? Question No. 34 asks whether the present system of dealing with Trust Funds and of utilising the balances as working balances in connection with the Consolidated Revenue Fund Account and the General Loan Account to be altered; and, if so, what changes the Commissioners would recommend. That is a question for the Commissioners, but I think there are many arguments in favour of separating the Trust Funds from the Consolidated Revenue Fund Account.
1281. Question No. 35? Question No. 35 asks whether from the 1st October, 1897, to the 23rd September, 1899, payments to the amount of £1,278,940, were made from revenue without the authority of Parliament, and without the Auditor-General's Certificate; whether in connection with these payments an Expenditure Suspense Account was opened, and the effect of that account. Such payments were made without the Auditor-General's Certificate, and without the Governor's Warrant, because the votes had been exhausted, and an Indemnity Act was afterwards passed by the present Treasurer with the object of protecting the officials of the Treasury in respect of the action which they had taken. I take it that the Treasurer cut his estimates too fine. In Committee of Ways and Means he had to present certain estimates, and show how he was going to find revenue to meet the expenditure; he cut his estimates too fine, and before the year expired he had to meet certain payments which could not be covered by the votes he had taken in the House, or by his Advance Account. The accounts for the last year present a good illustration of that.
1282. *Mr. Yarwood.*] His advance account was supposed to be £100,000 in debit? He asked for £100,000, and spent it all.
1283. *Chairman.*] And Mr. Reid took credit once or twice that he did not exceed the amount? Yes; I have here a copy of the Public Accounts for the year ended 30th June, 1899, which I got from the Accountant of the Treasury some months ago, when I entered the Treasury. I made up from this copy of the Public Accounts for 1899 the statement of revenue and expenditure which I have presented to the Committee, and I left out of the expenditure proper the sum of £62,388 16s. 11d., which is shown here, not as expenditure proper, but as an Expenditure Suspense Account, to be adjusted. That was a mere advance copy, and in later copies this sum has been included in "Revenue proper." Now, during the last financial year the votes in connection with which these payments charged to the Expenditure Suspense Account were made, became exhausted, and they could not bear any further liabilities; and as the Advance Account was exhausted, they had to make these payments without legal authority. I have not included them in my statement of the expenditure proper, but I have cast them into "other payments," because they are not yet proper expenditure, Parliamentary authority for that expenditure not having been obtained, and they will not constitute expenditure proper, I should say, until the supplementary estimates have been passed by the present Treasurer. But, as I based the deficiency I established on the "other payments" and the "expenditure proper" together, it makes no difference to the total.
1284. *Mr. Yarwood.*] But there is no doubt that it was spent? It was spent—without Parliamentary authority.
1285. I want to follow that out, because you have made a remark which is rather interesting. I want to follow the dissection of the Treasurer's Advance Account balance as on 30th June, 1899. It would be in debit so much, would it not, because he had taken so much money for which he had not got Parliamentary consent? Quite so; that is, he had met from the Account payments which would afterwards be submitted to Parliament.
1286. Well, in the statement of the disbursements for 1900, they will include disbursements on account of the year 1899, will they not? Yes, they will.
1287. That is, if they follow the same principle? Yes.
1288. I should like to have these disbursements? You may have them. (*Statement afterwards handed in by witness and marked Appendix U 3.*) The effect of the Expenditure Suspense Account was this, that by cutting the Estimates too fine the Statement in Committee of Ways and Means might bear a better appearance than otherwise it would do. If you go to Parliament and present certain expenditure accounts, and estimate revenue that will not meet those accounts, you will not make a very good impression on the public mind or on Parliament.
1289. *Chairman.*] Question No. 33? Question No. 36 asks for the amount borrowed from the Savings Bank of New South Wales, Barrack-street, Sydney, to 30th June, 1899, and to date. To 30th June, 1899, the amount was £2,415,000, and to this date, 15th May, £2,640,000.
1290. Question No. 37? Question No. 37 asks for the conditions under which these deposits were placed with the Treasury. My answer is that they were placed practically at call.
1291. Question No. 38? Question No. 38 asks whether any of these advances have been covered by securities. To that question I answer, No.
1292. Question No. 39? Question No. 39 asks the purpose for which this money was obtained from the Trustees of the Savings Bank of New South Wales. That is a question which the Treasurer might answer. But I might say that under the Act there was no necessity for the Treasurer to take that money at all.
1293. *Mr. French.*] It was a matter of financing? Quite so.
1294. *Chairman.*] Question No. 40? Question No. 40 asks whether, from the month of November, 1896, to the close of the year 1899, payments to the amount of several million pounds sterling were made from loan funds without the certificate of the Auditor-General, and whether such payments were, therefore, illegal. That is the case; it has been explained before.
1295. Question No. 41? Question No. 41 asks for the balances of the various accounts when the present Government assumed office. In connection with this question, I should like to refer to the statement of the independent auditors which has already been placed in evidence before the Committee. That shows the credit balance on the Consolidated Revenue Fund Account on 14th September, 1899, (a day or two before the present Government took office), to have been £47,236 7s. 11d. Now, there the "Consolidated Revenue Fund Account" is stated without qualification; but that was not the balance on the Consolidated Revenue Fund Account.

1296. *Chairman.*] Can you give us your answer to the question? My answer to the question is that there was a debit balance on that date, on the Consolidated Revenue Account, of £1,053,935 11s.,—after bringing all payments to account, however. J. R. Martin, Esq.

15 May, 1900.

1297. As against £47,000 credit? Yes. I go on to the "General Loan Account." That account shows a debit balance of £156,244 2s. 3d. That is not the debit balance on that account, although certainly immediately above that there is an entry "Advances to General Loan Account Debit Balance £1,500,000." In order to arrive at the debit balance on the General Loan Account on the date in question you have to add £1,500,000 transferred from Trust Funds, and another sum of £50,000, borrowed from the Curator of Intestate Estates, so that the debit balance on the General Loan Account would be £1,706,244 2s. 3d. I might say that while the debit balance on the Consolidated Revenue Fund Account, when the present Government assumed office (including all payments) was £1,053,935 9s. 11d., it was £1,072,151 15s. 6d. on 31st January, 1900, and on 28th February, 1900—which is the latest date I have—it was £1,019,578 15s. 10d. So that there had actually been an improvement up to that time, from the date on which the present Government assumed office, to the amount of about £34,000. Of course the revenue had expanded, but there was heavy expenditure.

1298. I should like to ask one or two questions with regard to the Consolidated Revenue proper;—I think that one or two previous witnesses from the Treasury stated, when I showed them the Consolidated Revenue proper on a progressive principle, that they had no such figures in the Treasury, or words to that effect; they rather ignored the figures I placed before them. Now, I ask you whether this written statement of figures, as given to the Committee by Mr. Vernon, showing the revenue proper and the expenditure proper, is not strictly correct? Yes. The revenue and expenditure totals would be practically correct. But the commencing balance of £464,711 0s. 4d. would be reducible by credits.

1299. Will you quote from this statement and give me each year the figures showing the drift?

	£	s.	d.
On January 1, 1895, the debit balance was	464,711	0	4
By December 31, 1895, the debit balance had increased to	1,013,611	11	2
By December 31, 1896, that sum had increased to	1,830,258	19	2
By December 31, 1897, that sum had increased to	2,148,528	19	8
By December 31, 1898, that amount had decreased to	1,875,585	18	11
On March 31, 1899, the debit balance was	2,342,344	4	5
On June 30, 1899, the debit balance was	1,718,906	11	2

1300. This statement shows the revenue and expenditure proper without the Suspense Accounts; and these accounts amounted, according to Mr. Vernon's statement, to a credit of £1,434 3s. 1d. and a debit of £162,878 16s. 2d., making the position so much worse. Is that a fair statement of the drift of the Consolidated Revenue Proper Account from 1st January, 1895, to 30th June, 1899? I certainly think that the difference between £464,711 and £1,718,906 is a fair indication of the drift during the period. I can see, of course, why it was objected to; but in my opinion there can be no real objection to the statement in the way I have explained. It shows the revenue proper and the expenditure proper during the period, and it shows how the deficiency has actually increased. Of course, the proceeds of the Treasury bills have not been brought to account; the proceeds of those bills were obtained, on certain representations, to meet expenditure which would be made, but which I hold was a fair charge on the revenue of the year. The statement shows the expenditure chargeable to the Consolidated Revenue Fund Account, and it seems to me that the reason why the statement was objected to, if it was objected to by previous witnesses, was, not on account of its incorrectness, but because it showed the accumulation of the debit balance, which was held to have been extinguished by the Treasury bills. In my opinion, of course, the debit balance was not extinguished by the Treasury bills; the expenditure was simply met in a certain way, but the deficiency existed then and still exists. I have heard it stated that the statements in the *Government Gazette* cannot show the true revenue and the true expenditure. I do not quite hold with that opinion. Certain totals are arrived at, and, of course, after the accounts are presented to the Auditor-General for audit he may make changes; he may take out a certain amount of expenditure charged to a certain vote, and say that it ought to be charged to another vote; consequently, in connection with the details, there may be many alterations, but in connection with the total expenditure, and in connection with the balances, there cannot be any material difference; and you are, I see, only dealing here with totals. In regard to the last quarter shown, that ended 30th June, 1899, it appears that there is a very large reduction in the expenditure. The quarterly figures are new to me, because I have not dealt with the quarterly returns; and I find them interesting. I think that this statement serves a very useful purpose, irrespective of the annual returns, and for this reason: At the end of the first year of the new system, there was a credit balance of over £300,000. At the end of the second year, there was a credit balance of £100,000. In my opinion, if every item had been brought to account in the third year of the new system that should have been brought to account, that credit balance of £100,000 would not have existed. But I know why it was preserved; it was preserved because the Auditor-General gave permission to take £150,000 from the Railway Loan Redemption Fund. And it has seemed to me that in the fourth year of the new system there ought to be a reason why that credit balance was still preserved from extinction, and, although the figures are new to me, yet I am inclined, from the statement now before me, to regard it as being explained by the low expenditure in the last quarter of the year. I think that the expenditure of the quarter ended June, 1899, shows that there were unpaid accounts at the close of the financial year. [*Statement handed in by Chairman, and marked Appendix V 3.*]

[Adjourned till Thursday, 17th May, 1900.]

NINETEENTH DAY—THURSDAY, 17 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

The Committee considered the evidence so far taken.

17 May, 1900.

TWENTIETH DAY—FRIDAY 18 MAY, 1900.

[The Committee met at the Offices of the Commercial Banking Company of Sydney.]

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

| F. N. YARWOOD, Esq.

18 May, 1900.

The Committee continued their consideration of the evidence.

TWENTY-FIRST DAY—MONDAY, 21 MAY, 1900.

[The Committee met at the Board Room, Chief Secretary's Office.]

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

| F. N. YARWOOD, Esq.

21 May, 1900.

The Committee continued their consideration of the evidence.

TWENTY-SECOND DAY—TUESDAY, 22 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

| F. N. YARWOOD, Esq.

Francis Kirkpatrick, Under-Secretary for Finance and Trade, recalled and further examined:—

F.
Kirkpatrick,
Esq.

22 May, 1900.

1301. *Chairman.*] The Committee desire to ask you a few questions as to the diminished expenditure of 1895–6 as compared with subsequent years: First of all, I refer to your evidence, where you state the balance of the Consolidated Revenue on 30th June, 1899, showed a surplus of £116,523 5s. 8d.; you remember those figures? I do.

1302. Should that amount not be reduced by £5,137 4s. 2d., being the unexpended payments for the Treasury bills? I think that balance was altogether apart from any balance at the credit of the old 1895 Deficiency Account.*

1303. Was the Treasury Bills Account closed by transferring that £5,000 odd to the Consolidated Revenue? It was in the Consolidated Revenue.

1304. Do you know for a certainty whether that was credited to the Consolidated Revenue? I am certain that the proceeds of the Treasury bills were credited to the Consolidated Revenue.

1305. And there was a balance unused in a statement you gave us? That statement was not exactly correct, but it showed a small balance.

1306. Am I to understand that the surplus of £116,000 odd was reduced to £111,000 odd by the transfer of the £5,000? The account for 1898–1899 with Ways and Means was made up exclusive altogether of the balance of the proceeds of the bills.

1307. I think we made out that there was £5,137 4s. 2d. unexpended on account of these Treasury bills? I am not certain if the amount corresponded with the balance in the Treasury books or not. I do not think it quite corresponded. I have not looked into the matter.

1308. *Mr. Yarwood.*] When the estimate of the deficiency was made up there were certain liabilities which you considered as liabilities of the past? Yes; 1895 and previous years.

1309. Can you tell us how that basis was arrived at? By taking the balances of the appropriations outstanding.

1310. And did the Treasury consider that that was a clean start for the new system? The Treasurer considered it so. The Treasurer considered that by making provision for the balances of 1895 and previous years by means of bills the new system got a clean start.

1311. And did you take in receipts on the other side as well? The balances of the liabilities outstanding would not be affected by the receipts. The receipts were all taken into account in arriving at the state of the deficiency.

1312. The receipts that would come in? The receipts that would come in, with the exception of a few that came in afterwards and went into General Revenue. Referring to the £116,000, might I ask whether that was the balance shown by the *Government Gazette*?

1313. *Chairman.*] Yes, by the *Gazette*? Any balance shown by the *Gazette* statement would include the balance of the unissued Treasury bills—about £5,000. I think the Ways and Means showed something like £146,000 or thereabouts. The balance shown by the Account for that year with Ways and Means would not include the balance of the unused proceeds of bills.

1314. *Mr. Yarwood.*] But it forms part of the Credit Balance? It forms part of the balance at the credit of the Revenue, as shown by the figures in the *Gazette*.

1315. And from these reports, too? Yes. The old account is sometimes shown separately by the Auditor-General.

1316. That may be, but I am referring to the Treasury Account? As far as the balance at the credit of the Consolidated Revenue is concerned, it would be shown.

1317.

* NOTE BY WITNESS.—This answer is not correct; the balance on old account, 1895 and previous years, was included. At the time I answered I was thinking of the surplus on 30th June, 1899, shown by the account for the year 1898–1899, with Ways and Means.

F.
Kirkpatrick,
Esq.
22 May, 1900.

1317. In a paper which we have prepared, we have put in the appropriations of the year in columns, and then we have added to them the subsequent appropriations; we have added them altogether, and at the bottom of the page you will see that we get at the comparative total of the actual expenditure of the year after it has been passed by Parliament, and we find that the total expenditure for 1895-6, under the new system, was £8,925,794 2s. 7d., and in the next year it was £9,491,644 2s. 1d.;—what is the reason of the difference? I could not tell exactly without going into the figures, but I may state there would be a considerable saving in the first year of the new system; that is, considerably less expenditure in the first year.

1318. *Mr. French.*] Why, that is the point? Well, the explanation is very simple to any person that understands how the new system worked. The new arrangement under the amended Audit Act was to the effect that the expenditure *during* a year was to be the expenditure *for* the year. Consequently there were no liabilities of previous years carried forward. That is to say, that an expenditure which took place in June, 1896, would not come in for payment until July, 1896, because the accounts are rendered monthly. Consequently, in the first year of the new system there would be considerably less expenditure. I do not know that this accounts for all the difference, but it would go a long way towards accounting for it.

1319. Does that mean to say that the year 1895-6 does not show a true normal state of expenditure? It does not show the normal expenditure, and for the reason stated.

1320. *Mr. Yarwood.*] Have you any idea of how much? I could not say that. It could be, to some extent, arrived at by taking the contingent expenditure of the various Departments for the month of June, and ascertaining what such expenditure would amount to. For June, 1895, the outstanding balances of appropriations were provided for by Treasury Bills. For June, 1896, the accounts for services would not be paid until the month of July, 1896, when, of course, the expenditure would go into the following year. It is all done according to law.

1321. *Mr. French.*] That is all right; but the question is what the effect of it was? The effect was that the expenditure was less than the normal expenditure for the first year.

1322. Am I right in saying that the appropriations which had been sanctioned by Parliament, the authorisations which were outstanding on 30th June, 1895, were all taken? Yes, and provided for by Treasury Bills.

1323. That is, when starting the new system, although under normal circumstances those items would have come into the expenditure of the subsequent period if you had not adopted this new plan? That is, so far as the actual expenditure is concerned; but they would not have been charges against the revenue of subsequent years, even if the Government had not adopted this new system. That is, each year would have been shown as so much short or otherwise; but to get a clean start, Mr. Reid covered all outstanding liabilities by bills.

1324. That is to say, liabilities in the sense of authorisations? Yes.

1325. Of course, they were not liabilities which you were obliged to recognise? Oh, yes, they were; undoubtedly they were. The expenditure had been incurred by the Departments.

1326. But was not the effect of that method to give 1895-6 a very large advantage in regard to both its predecessors and successors? It gave it an advantage to a certain extent, because the accounts for contingent expenditure on account of June, 1896, would not be received until July, 1896, and then the expenditure would form a charge against the next year's revenue under the amended Act.

1327. I conclude that the effect was, not to relieve 1895-6 of what had happened before the period, but really to weight the subsequent years? The subsequent years' revenue had to bear any payments made for 1895-6 services, as the balances of appropriations lapsed on 30th June, 1896. It is also possible that a good many appropriations for 1895-6 were less than they were for 1896-7.

1328. *Mr. Yarwood.*] Why would that be? I could not say unless I went into the matter; but the yearly appropriations never correspond.

1329. It is a very strange thing that, as far as the accounts are concerned, the expenditure shown as the expenditure of 1895-6 is a good deal less than in any one year since, even although we know that in the latter period there have been savings in the Public Service, according to the Public Service Board, of £300,000? Yes, that would account for part of it; and another part of it would be accounted for by the £75,000 and the £37,500 charged to 1895 and previous years.

1330. What was the idea of drafting the accounts in that way, because, as a matter of fact, the way it works out is that the year 1895-6 affords no indication of the country's position in any shape or form? It was the starting of the new system, and, of course, under the circumstances there must be an advantage the first year, because the expenditure was thrown forward.

1331. Why was the expenditure thrown forward? The change of system demanded it. Parliament passed an Act stating that the expenditure was to be charged, apart altogether from the appropriations, against the revenue of the year in which the payments were actually made.

1332. On the other side of the account there does not seem to have been the same care taken, because I find several amounts in amongst the receipts, if the particulars in the Public Accounts go for anything, charged to previous years;—in the account for 1899 I find an item "Transfer from General Loans—Cost of Meat Market, Pyrmont, &c., £7,961," credited to the revenue of that year;—when did that arise? That would not be a payment out of the revenue for that year. The expenditure was transferred to Loans.

1333. But when did the £7,961 arise? It may have arisen some years previously.

1334. And is simply transferred in this year? Yes; that is, it was charged to revenue first, and transferred in that year to the Loan expenditure, because it properly belonged there. I think that particular item was done under the authority of an Act of Parliament. It was included in the Act, and the Loan Act would show that it was to meet expenditure in connection with the Meat Market which had been charged to the revenue, some years before.

1335. What we want to get at is, not what was authorised by Parliament, but what is right from a business point of view. From a business point of view the Government is in this condition: That it has a certain income which belongs to that year, and ever since the 30th June, 1895, the figures, from a business point of view, would be supposed to be worked in this way, that the legitimate income for the year would go to the credit, and the legitimate expenditure would go to the debit. Well, now, are there not several amounts put to the credit amongst the receipts that really arose in previous years? I do not think

F.
Kirkpatrick,
Esq.
22 May, 1900.

think there is very much. With reference to that particular matter, if you turn up the Ways and Means you will find what has been actually credited for that year.

1336. Well it is here? It would be shown there as other receipts, I think.

1337. And goes to form part of the £116,000? That may be. A copy of the Ways and Means for August, 1899, would show what the revenue was, and what was taken in.

1338. Will you look at page 12 of the Public Accounts for 1897. There is an item "Amount transferred from the Public Instruction Endowment Account, surplus receipts, balance for 1896-7, £13,000." It seems there has been a change in that account lately. I want to know what the nature of the account is? It is all changed. Previously it was kept in the Trust Funds, and the amount of the receipts—that is the interest and other items of revenue of this particular account—were transferred at the end of the year to the Consolidated Revenue. That is how it stood before the last Act was passed.

1339. How does it stand now? It stands now as a separate account in our books.

1340. Is the Fund kept separate? The account is kept separate, but it is not kept separate in the Bank.

1341. What is the transfer of the £13,000? That is the surplus receipts. I take that to be the receipts during that particular year on account of interest investments and other items.

1342. Particulars of the item are given on pages 76 and 77. There the amount is given as £16,127 17s. 1d.? That is the receipts from rent and investments.

1343. And interest? Yes, and interest. There was an expenditure of £17,799 2s. 3d., including the transfer.

1344. On page 12 for the Public Accounts for 1896 there are a number of items under the heading "Amount of unclaimed sums at the credit of the following Trust Fund Accounts, transferred in accordance with the provisions of the Audit Act to the Consolidated Revenue Fund on the 30th June, 1896." Where those incomes of 1895-6? They were balances at the credit of those accounts; and in accordance with the terms of the Audit Act when certain moneys lie to the credit of Trust Funds for two years they are transferred to the Revenue.

1345. Then was it fair to say that there was a deficiency of £1,024,000 when they drew those bills? The years stated opposite the various items are the years in which the amounts were credited to the Trust Accounts. The amounts could not have been transferred before the expiration of two years from the dates credited.

1346. But it was a surplus fund arising in 1895? No; they could not have been transferred before, because they were liable to be paid out until the two years expired.

1347. Does that apply to the item "Balances of Intestate Estates"? That is somewhat in a different position. I think the period is something like six years, but the principle is the same. You will see that in the heading it says "Transferred in accordance with the provisions of the Audit Act." These items do not in any way affect the previous years' accounts.

1348. Why not? Because they could not be credited then. And there were corresponding credits in 1895 and previous years.

1349. But they helped to swell the income of 1895-6? There were previous amounts which helped to swell the revenue of previous years in the same way.

1350. You say that the balances of Intestate Estates can only be transferred in six years? I think it is six years. It is either three years or six.

1351. Then there are items with regard to the Hurlstone Training School and technical education? I could not say anything with reference to those unless I looked up the details, because they are not in the same category, I think.

1352. Then in the Public Accounts for 1896, page 12, there is an item "Transfer from Trust Fund, Government Savings Bank Account, the estimated amount of departmental expenses for the year 1895-6, pursuant to clause 15 of Savings Bank Act, 1870"—was that the amount of expenses during 1895-6? Yes, estimated.

1353. Subsequent to that, there are some transfers of profits arising in the Savings Bank; well, that did not all arise in the years to which it was credited? I could not answer that without looking up the particulars. [*Statements afterwards handed in and marked Appendices J 3 and X 3.*]

1354. I should like to have that information, and I wish you would make sure about the item—Balances of Intestate Estates,—because in the Public Accounts for 1893 I find an amount credited for 1888; and on page 13 of the same accounts there is an item, "Premium on Loan raised, 56 Victoria No. 1, £7,077 4s. 6d.";—when would that loan be floated? In all probability the loan was raised in 1896, but I would not be certain. [*Statement showing Balances of Intestate Estates transferred, afterwards handed in and marked Appendix Z 3.*]

1355. And in the Public Accounts for 1895 there is the item, "Premium on Loan raised, 41 Victoria, No. 7, £25,116 18s. 9d.";—what year would that be? I will ascertain.

1356. And the same Loan Act is mentioned lower down on the page. I only want to know as a matter of curiosity what the idea is of putting the one item of Premium on Loan where it is, while the item of Accrued Interest is put in another part of the page? I find one of these items is credited to the revenue proper, the other is not. [*Statement afterwards handed in and marked Y 3.*]

1357. In the Public Accounts for 1898, page 12, there is a credit in Miscellaneous Receipts of £6,251 14s. 4d. under the heading of Church and School Lands Act, 1897;—that has nothing to do with Public Instruction has it? Not now. The revenue derived from the Church and School Lands was formerly credited to the Public Instruction Endowment Account, but under the Act of 1897 it belongs to the Consolidated Revenue Fund.

1358. That would be the surplus of income over expenditure in that particular branch? No; it represents the income, I am informed. The expenditure is provided for by a vote of Parliament. [*Statement afterwards handed in and marked W 3.*]

1359. There is another item on page 13 of the Public Accounts of 1898. "Accrued interest on loan raised 50 Victoria No. 28, £5,114 1s. 6d.;—when was that floated? Would you be able to tell without looking it up? No, I could not.

1360. In the Public Accounts for 1897 there is the item, "Sale of Government property, £9,933 19s. 8d.;—what is that? It is the proceeds of a miscellaneous collection of articles sold.

1361.

NOTE BY WITNESS:—On reference to the Account I find the amount was credited to Revenue under the head of Unclassified Receipts.

1361. It is not land? No; I do not know that it includes the overtime sale of Customs goods, but it includes sale of old stores at the Colonial Stores Department, and, perhaps stores sold by other Departments.

F.
Kirkpatrick,
Esq.
22 May, 1900.

1362. At the end of the period ended 30th June, 1899, there is a certain amount expended under the Expenditure Suspense Account and the Treasurer's Advance Account, and there is a certain outstanding balance in connection with the "Accountant's Stamp Account," "Scab in Sheep," and "State Children";—will you get me the exact balance owing on these accounts on 30th June, 1899? Yes. The peculiarity about the item in connection with State children is that whilst the Government can charge under the Act, they must afterwards obtain an appropriation for the amount; so in reality the appropriation would appear in the year when it is really not required, because the money had been spent.

1363. Referring to the item of £62,338 16s. 11d. on page 33 of the Public Accounts for 1899 under the heading of "Further expenditure," I suppose that money had absolutely left the Treasury on the 30th June? It had absolutely.

1364. *Mr. French.*] What I understand from this comparison which has been drawn up, and which, you may take it, is actually based on Treasury figures, is that the year 1895-6 has not suffered any unfair advantage from anything which belongs to previous years? It has not.

1365. No items have been omitted from this account which ought to have been put in and charged to the Treasury Bills? That is so.

1366. And the reason why the expenditure, in your judgment, shows less than in previous years is that at the end of the last month of one period certain items are carried over into the next period? Yes. But I want you to understand that as a matter of law the balances of appropriations lapsed.

1367. But as a matter of fact there is certain expenditure which goes over? Undoubtedly.

1368. So in, your opinion, 1895-6 has not gained at the expense of previous years; but it has gained at the expense of subsequent years, and at the final period there is an overlapping which goes into the next period? That is correct. 1895-6 might be considered to have gained at the expense of previous years, to some extent owing to only one half-year being charged in connection with two items for which in the other years the whole amount is charged, I mean the £75,000 and the £37,500 already referred to.

1369. But nothing has been omitted from 1895-6 which ought to have been put into 1895-6, and the real reason, in your opinion, of this apparent discrepancy is that a certain amount is carried forward from one year to another? Yes; and it might follow that the appropriations for 1895-6 were less for some services than the appropriations for subsequent years.

1370. Then, did the operation of this wiping up at the closing of the period enable them to make less appropriations? Yes; in some cases it was seen that a change of system would necessitate less expenditure.

1371. Of course, you look at the matter purely from the legal Parliamentary standpoint? Yes.

1372. If you get certain sanction to certain things, that makes it right? Yes. The Treasury Department acts altogether in accordance with the requirements of the Audit Act and other Acts.

1373. Then, it probably has happened that in certain cases 1895-6 has been relieved through the fact that, having provided for these things in the past, you required to make less appropriations for this particular year? Undoubtedly, to some extent. The expenditure in reality would not be the normal expenditure. It was seen at the time that in subsequent years the expenditure would, of course, be greater.

1374. *Mr. Yarwood.*] If we want to judge the financial position of the Colony, we must look at 1895-6 as an exceptional year? It would not be a good year for purposes of comparison on account of the change of system.

1375. *Chairman.*] I notice that the Auditor-General states that the debit to Consolidated Revenue General Account on 1st January, 1895, was £2,752,623 Os. 2d.;—having got £1,024,700 of debentures, which amount had been credited to Consolidated Revenue, does that reduce the Debit Balance to £1,727,923? There never was such a balance. The Auditor-General, for some reason of his own, refused to accept the amount that was credited to the revenue on account of the proceeds of the Treasury Bills issued to meet the deficiency of 1886 and previous years, but there never was such a balance as that stated in the Treasury Accounts.

1376. Do you say that the Auditor-General is wrong in stating that fact? It is a matter of opinion. I do mean to say that the figures do not correspond with the Treasury figures.

1377. *Mr. French.*] I suppose that is because the Auditor-General does not credit the proceeds of either class of Treasury Bills, either those of 1886 or the last lot? Yes.

1378. That is the reason why he brings that out? Yes.

1379. *Chairman.*] How does the Auditor-General make up the figures of £2,752,623? I have not attempted to make up the Auditor-General's figures—he would do that best himself.

1380. But I suppose he can do it? He should be able. But the difference arises as I have stated from not crediting the proceeds of the Treasury Bills. It arises principally from that cause, and he also, I think, includes the balances at the debit of the Suspense Accounts.

1381. *Mr. Yarwood.*] I notice that in the accounts of the last four years there appears the redemption of 1924 stock, 1925 stock, and 1927 stock; how is it that there is a year missing? There is probably no stock falling due in 1926.

1382. *Mr. French.*] The Auditor-General does not recognise the Treasury Bills as being a permanent relief of the Consolidated Revenue;—therefore he keeps the balance on, whatever it may be, after allowing for the £150,000 reduction; but the Treasury recognises it as a permanent reduction, that is to say, they say that it has been provided for by law? The Treasury Bills were actually sold to the Trust Funds, and the proceeds credited to the revenue.

1383. And in the interim they are part of the Public Debt? Yes; they are shown in the Public Debt Statement.

1384. *Mr. Yarwood.*] I suppose the Treasury figures are right;—what I mean is, that the only difference the Auditor-General makes is as to whether the figures are correctly placed according to the law that may be passed for the time being? The figures are correctly shown according to the law. I do not think that the Auditor-General disputes that.

1385. Question. Well, in going into the finances if we accept the Treasury statement as correct we are going on a correct basis? Yes.

F. Kirkpatrick, Esq.
22 May, 1900.

1386. There would be nothing material or that would affect the balance in any way? Nothing that I am aware of. The question all hinges in my opinion upon the outstanding liabilities in connection with the Treasury Bills, and the Suspense Accounts. The Auditor-General takes those in when making up his debit balance. We do not.

1387. You treat those as though they were Trust Funds? We treat the Treasury bills as part of the Public Debt, and the Centennial Park and Moore-street Resumption Accounts as Suspense Accounts.

[Adjourned until Friday, 25th May, 1900.]

TWENTY-THIRD DAY—FRIDAY, 25 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq., | F. N. YARWOOD, Esq.

Robert Lucas Nash, Financial Editor, *Daily Telegraph*, examined:—

R. L. Nash, Esq.
25 May, 1900.

1388. *Chairman.*] We understand that you have taken considerable interest in the finances of the country for the last few years, and we shall be glad if you will favour us with your views in regard to the transactions of the Government from 1st January, 1895, to 30th June, 1899, a period of four and a half years? Of course it has been my duty to follow the finances of the country closely. I heard all Mr. Reid's financial statements, and it was necessary for me to go into the matter very carefully; so when the questions which have been put to this Committee were published, I, for my own satisfaction, went through them in detail, and framed what I regard as answers to them, so that I should be in a position to deal with the subject. Therefore, if the Committee like, I shall be prepared to consider each question in detail, or to take up any point which the Committee may wish to deal with.

1389. *Mr. French.*] I think a good framework for you to proceed upon would be the questions themselves, because you have evidently based your figures on those lines, and your views will be a guide to us from an independent source. I do not know that it would be necessary to take you right through these questions. There are certain questions which are matters of opinion? Some are undoubtedly matters of opinion, and some I could not answer. Perhaps, before going through the questions, I might make a short statement. The light in which I regard the financial position is this: When in 1893 and 1894 the revenue fell off seriously, Sir George Dibbs cut down the expenditure borne by revenue as far as it could be cut down. In some respects he cut it down beyond what was possible on an average of years, because such items as roads and bridges (always the first to be curtailed in times of pressure) might be reduced for one year or two, but that would involve additional outlays afterwards. Consequently, though Mr. Reid effected a further saving by the reorganisation of the Public Service, I hold that it was impossible for him legitimately to reduce the ordinary expenditure below the level of 1894; in fact, with the growth of the Colony and the debt, the 1894 level will prove too low. The revenue was somewhat inadequate in 1894, and for years afterwards the various sources of income proved inelastic; yet Mr. Reid reduced his revenue by remissions of taxations by about half a million per annum. Subsequent experience has shown that almost the entire amount of that half million was needed to keep the accounts in a proper condition. Of course, had Mr. Reid had more prosperous times during the period of his administration he would have presented better results. The drought and depression were admittedly against him, but he had to take the position as he found it, and it is necessary that revenue should be able to stand the strain of adverse years. Parliament, too, on various occasions, refused Mr. Reid the new revenue he asked for. It cut down his Land and Income Tax proposals, and made the cost of administration greater; it refused his stamp duties; and when, in 1898, he definitely told Parliament that his revenue was insufficient, it refused to put on most of the new duties he then asked for. Thus he was reduced to expedients. But, admitting all this, I think it can be shown that in every year he was nearly half a million short of the revenue needed to adequately balance his accounts.

1390. That is your thesis; what figures have you to prove that thesis? In answering these questions I think that will be proved conclusively.

1391. Not as to the half a million, surely? Yes, as to the half million.

1392. That means 2½ millions? I will say £2,100,000.

1393. What can you adduce in proof of that? Shall I take that point up first, or will you go through the questions?

1394. You might go through the questions and then deduce that from your answers to the questions? Very well. I will take question No. 1: My answer is that the Public Accounts show a revenue of £42,340,165 on the four and a half years, and from Suspense Accounts of £1,395, making in all £42,341,560. But I consider that £25,117 included in the revenue proper to the first half of the year 1895, should rightly have been deducted from the cash deficiency on 31st December, 1894, leaving the total revenue for the four and a half years at £42,316,443. I may say that I have taken my figures from the Public Accounts, and I have balanced them all the way through. I have prepared the statements of revenue and expenditure in tabulated form, giving, in addition to the ordinary Revenue and Suspense Accounts, "Aids to Revenue," and "Advances Repaid," because that was necessary to bring out absolute balances in the accounts; but I need not go into these figures now.

1395. *Mr. Yarwood.*] In drafting your figures, where an advance is made in one year and repaid in another, have you left it out or added it to your figures? I have only dealt with it for the purposes of balancing.

1396. I now take question 2: The answer is that the expenditure on Revenue Account during that period was £43,440,943, and upon Suspense Account, £162,878, making together £43,603,821. This takes no account of what, it may be considered, should otherwise have been charged against revenue during these years.

1397. My answer to Question 3 is that £1,262,261 is the difference between revenue and expenditure, including Suspense Accounts, as shown above, plus £25,117 already referred to, making £1,287,378.

1398. The answer to Question 4, dealing with the Suspense Accounts, is: Post Office Street Account—Receipts, £1,389; expenditure, £133,828; Centennial Park Account—Receipts, £6; expenditure, £29,051. The excess of expenditure was, therefore, on the Post Office Street Account, £132,439, and on the Centennial Park Account £29,045, making a total of £161,484. This disagrees with the previous answer by about £39. I could adjust that difference, but I have not done so. 1399.

1399. My answer to Question 5 is that £1,100,778 is the difference shown between revenue and expenditure, excluding Suspense Accounts, as shown in the accounts, plus £25,117, making £1,125,895. I have, all through, taken that £25,117 separately. It is not separated as the accounts are rendered, but I considered it ought not to be treated as current revenue, so I have mentioned the amount separately. Including the Suspense Accounts, the amount would be £1,287,378.

R. L. Nash,
Esq.
25 May, 1900.

1400. My answer to Question 6 is as follows:—

The extraordinary receipts taken into Consolidated Revenue were—			
Transferred from General Loan Account in 1895...	£341,319
Also in the same period	25,117
Treasury Bills	1,024,700
Total...	£1,391,136

This excludes £161,483 taken from the Trust Funds to cover outlay on Suspense Accounts, making £1,552,619. Personally I am in doubt whether the £341,319 and the £25,117 were rightly to be credited to revenue at all, though the Auditor-General maintained that they should be. Previous Treasurers had declined to make the transfer.

Mr. French: Really, they have been credited to the deficiency.

Mr. Yarwood: It might be well to explain that deficiency account to Mr. Nash. We deal with the accounts in this way: On the 30th June, 1895, the Government said, "We will have a white ship." Well, they take the receipts from 31st December, 1894, to 30th June, 1895. They put that on one side and they add to it that £300,000 odd accrued interest. Therefore, they have a certain amount, and on the other side they take the deficit they had on 31st December, 1894, and the expenses in between 1st January, 1895, and 30th June, 1895, plus these disputed appropriations, which, they say, were the liabilities of the past; and the difference between those two accounts is that £1,024,700, save and except the £5,000 profit which they admit they had on the transaction. That is the old Deficiency Account. Then they start the new accounts. That is what Mr. French is referring to when he talks of the old deficiency.

The Witness: Does not the Auditor-General admit a bigger profit than that?

Mr. Yarwood: Oh yes, he does, but it is immaterial. I was only suggesting that you should know what Mr. French referred to when he spoke about the Deficiency Account, as it was an account which I knew you could never have seen.

The Witness: Continuing my answers to the questions, I now come to Question 7. My answer is: the whole amount of the cash deficiency in December, 1874, or £464,715 was extinguished.

1401. My answer to Question 8 is that £926,421, extraordinary receipts, were utilised in meeting the expenditure in the four and a half years. To arrive at that sum, I take £1,391,136 and deduct from it £464,715.

1402. The answer my figures show to Question 9 is that £2,752,623 was the deficiency on revenue on 31st December, 1894, inclusive of Suspense Accounts; and £2,217,599, exclusive of Suspense Accounts.

1403. The answer I should give to Question 10 is as follows:—The Auditor-General had pointed out the existence of this amount of accrued interest for years, and, if correct, it certainly belonged to a period long prior to the year 1895. It should, therefore, if dealt with at all, have been deducted from the Cash Overdraft on 31st December, 1894.

1404. My answer to question 11 is that this accrued interest properly reduced the deficiency on 31st December, 1894, to the following:—inclusive of Suspense Accounts, £2,386,187; and exclusive of Suspense Accounts, £1,851,163.

1405. As to Question 12: the law duly provides for this reduction of £150,000 in the Treasury Bills, and had there been an equilibrium between revenue and expenditure, there would have been a reduction of £600,000 in the deficiency on 30th June, 1899,—that is, to £1,786,187, inclusive of Suspense Accounts; and to £1,251,163, exclusive of Suspense Accounts. Parliament also provides for the repayment of the Railway Loan, 53 Victoria No. 24, by £75,000 a year. That does not reduce the Debit Balance against revenue, but should reduce the public debt by £300,000 in the four and a half years.

1406. You mean the four years? Well, it is really in four years. The position was that in four years revenue was charged with only three and a half years' expenditure on these particular items.

1407. The answer to Question 13 is that the deficiency on Consolidated Revenue Account on 30th June, 1899, was inclusive of Suspense Accounts, £2,757,530; and exclusive of Suspense Accounts, £2,061,061. I consider these deficiencies should be increased by £150,000 Sinking Fund, appropriated to redeem debentures in 1898, and by a number of outlays improperly charged to the General Loan Account.

1408. *Mr. French*.] You mean under the Short Loan system? No; there are a number of items on the permanent debt which I consider utterly wrong. For instance, they charge to Permanent Loan Account, repairs to Government House. Well, that is indefensible.

1409. *Chairman*.] That is not the Thirty-year Loan you are speaking of? No, the permanent debt.

1410. The answer I should give to Question 14 is as follows:—The increase in the deficiency shown on the four and a half years in the accounts on 30th June, 1899, was, inclusive of Suspense Accounts, £971,343; and exclusive of Suspense Accounts, £809,898. These exclude the £150,000 referred to in my answer to Question 13.

1411. As to Question 15, the proceeds of the Treasury Bills were utilised as follows:—

To cover net cash deficiency 31st December, 1894	£98,279
„ 4½ years' deficiency	809,898
„ Surplus, 30th June, 1899	116,523
			£1,024,700

Those three items, arrived at in answer to previous questions, show precisely the amount of the Treasury Bills, and I think they show where the money went. In addition, the increase in the Suspense Accounts was provided for out of Trust Funds.

1412. My answer to Question 16, as to the utilisation of the proceeds of Treasury Bills, is yes.

1413. As to Question 17, respecting the change of system in keeping the Accounts in 1895, the answer is again yes. Mr. Reid was fully entitled to cover the cash deficiency on 30th June, 1895, but he claimed that there was an excessive amount of expenditure involved in these unexpended votes. I am unable to find any evidences of this excess.

R. L. Nash, Esq. 1414. My answer to Question 18, as to the reduction of expenditure charged to 1895-6, is yes. The Credit Balance on 30th June, 1896, was also obtained in that way.
 25 May, 1900. 1415. As to Question 19, according to the Auditor-General's report—

The Credit Balance on 30th June, 1896, was	£476,530
Less Treasury Bills	150,000
									<u>£326,530</u>
Credit Balance on 30th June, 1899	£116,523
									<u>£210,007</u>

The Auditor-General, I believe, contends that that £116,523 is not correct.

1416. *Mr. French.*] I think he agrees with that balance? He does; but he says that only £74,574 is on the new account, and that the balance is really due to the old account.

1417. *Mr. Yarwood.*] Still he agrees as to the whole? He agrees as to the whole.

1418. The other is a question of legal allocation? Yes.

1419. Coming to Question 20, I have taken the two years 1893 and 1894. The average expenditure for those years is £9,879,569; and the expenditure charged to 1895-6, £8,899,411, which is less than the average of the two preceding years by £990,158. Of course, the cash expenditure in the year 1895-6 was nearly up to the average of the two years I referred to, 1893 and 1894.

1420. As to Question 21, I am not absolutely certain whether the amount called back on the Road Votes, &c., was £216,000, but to both the questions included in Question 21 my answer must be yes. The expenditure on Roads and Bridges in 1895-6 was £719,990, of which only £387,207 was charged to that year.

1421. *Mr. French.*] The rest was charged to deficiency account? Yes.

1422. As to Question 22, the Cash Debit Balance on 31st December, 1894, was £464,715, less, as I should state it, £366,436 transferred from General Loan Account, leaving £98,279. The debit balance on 30th June, 1895, was £166,450. The question is somewhat involved, but I should think that £166,450 would be correct as covering the deficiency on both periods.

1423. To Question 23, as to the relief of the accounts in 1895-6 by short-charging redemptions of Treasury Bills, I answer yes.

1424. *Mr. Yarwood.*] With regard to that question, is it your opinion that from the accounts as you have seen them, on account of the change of system to 30th June instead of 31st December a half-year has dropped; in other words, it has been skimmed over. And if we were to close the accounts now on 31st December instead of 30th June, would the effect not be that a full year's reduction of those Treasury Bills would have to appear in the Account? Yes, certainly. It was a questionable proceeding, but that is the result. In fact, in one full year only half a year's amounts were charged, and that could not be right.

1425. My answer to Question 24, as to the effect of the appropriation of £150,000 from the Sinking Funds is, that, rightly, it should be repaid to the Sinking Funds.

1426. As a matter of fact, it had no business to be done? It had no business to be done.

1427. As to Question 25, the expenditure under the Thirty Years' Loans in the four and a half years has been £657,675. Previously, in most cases, such charges had been provided out of revenue, and, I think, rightly so. I do not wish to be held to condemn the principle of Thirty Years' Loans for other purposes now charged to permanent debt. Such purposes charged to permanent debt in 1898-9 would be "Conversion of tramways, £70,043." That is charged to permanent debt.

1428. That is actually expended? Actually expended, and charged to permanent debt. Yet steam motors become practically valueless, and the conversion consists in the electrical installation. It is right that the conversion should be made; but I think that the old expenditure should be written down. That might be dealt with by a Thirty Years' Loan, so that the extra amount should be gradually written off.

1429. Do you remember what the Glasgow Municipal Council did when they converted the trams in Glasgow? They wrote them down, but in such an exceedingly wholesale fashion that I do not think it would be at all likely to be taken as a precedent for our Government to follow. Then there is another item charged to loans in 1898-9—"Improvements in grades and curves on the Railways, £78,237." As we travel along the railways we can see these abandoned curves and gradients everywhere, but the capital account is charged with the original expenditure and the new expenditure, and both are charged to permanent debt. I think in that case the new expenditure should not be charged to the permanent debt. Then there is another item in 1898-9—"Trial Surveys, £14,520." These were charged to permanent debt. I should think that two-thirds of the trial surveys come to nothing. There is nothing permanent to represent them, and yet they are charged to the permanent debt. It is also a question whether resump-tions of lands might not be dealt with in the same way. It is necessary to resume lands for various purposes, but these lands have already been sold and the amount paid into revenue, and yet, when the Government want the land back, they pay capital for it. I do not know whether if the land was sold again the amount would be paid into revenue. Anyhow, that leads to a peculiar state of affairs. The purposes to which the Thirty Years' Loans are now applied are to relieve revenue from ordinary charges, as can readily be seen from the following comparison:—

Expenditure on Public Works out of Revenue.

Maintenance and Construction.

1890	£1,227,380
1891	1,486,803
1892	1,384,203
1893	1,101,251
1894	762,867
1895 (half-year)	469,263
1895-6	978,497
1896-7	854,871
1897-8	574,041
1898-9	549,042

In

In 1894, when there came the pinch in the revenue, Sir George Dibbs reduced the expenditure to £763,000. Then, when Mr. Reid came into office in 1895, for two years at any rate he had plenty of funds, and in the first half of 1895 he expended £469,000, and in 1895-6 £978,000. After that, the extraordinary sources of revenue ceased, and he had to make allowances. In 1896-7 his expenditure was £855,000; in 1897-8 it was £574,000; and in 1898-9 it was £549,000. So, in 1898-9 he expended on maintenance and construction of public works out of revenue not much more than one-third of what was expended in 1891. The figures which I have just given include roads and bridges which in the year 1898-9 absorbed £488,974, leaving £60,068 for all other purposes. That £60,068 would mean the up-keep of public buildings, wharfage, harbour, and river works, fortifications, &c.

R. L. Nash,
Esq.
25 May, 1900.

1430. *Mr. French.*] In order to arrive at a proper conclusion these figures would require analysis? I take them from an account published regularly by the Government Statistician.

1431. But they have to be analysed? He analyses it. I have shown by these figures that the expenditure on public works out of revenue has been cut down greatly. Until 1895 the average was considerably over a million. Now it has gradually been reduced until it is little over £500,000. This, I consider convincing as to the purposes to which the thirty years' loans have been applied. Even ordinary maintenance charges are not now adequately borne by revenue. I am most strongly of opinion that the maintenance of the existing roads and bridges, public buildings, harbour works, and fortifications cannot be adequately provided for at under £1,000,000 per annum. Until 1894 the charge was much in excess of that, but I am quite convinced that in naming £1,000,000, I am understating the amount which ought really to be charged against revenue. I therefore consider the Thirty-years' Loan system as now applied is an improper relief to revenue.

1432. Coming to Question 26 my answer is as follows:—(a) £971,343 deficiency on the four and a half years, inclusive of Suspense Accounts; (b) £809,898 deficiency, exclusive of Suspense, but under the conditions of the Suspense Accounts, I consider that £31,484 of the expenditure on those accounts during the four and a half years should also have been borne by ordinary revenue.

1433. *Mr. Yarwood.*] Can you tell us why? Well I might refer to sand-shifting at Centennial Park. That was started, I think, to give the men something to do. My answer to (c) is to raise the four and a half years' deficiency to £1,121,343. That was exclusive of £130,000 Suspense Accounts charged against Trust Funds. As to (d) the additions which I consider would have been required to put the Consolidated Revenue Account on a sound basis are somewhat numerous, including out of the Thirty-years' Loan expenditure, say, £600,000. I am not quite certain of that amount. I have not gone through the entire four and a half years, but I should think the amount was £600,000. In addition, large amounts were borne wrongfully, as I consider, by the permanent debt, and the best way I can put the matter is this: Take the proper charges for public works, as already stated, at £1,000,000 per annum. The estimated proper charge against revenue in the four and a half years would be £4,500,000, and I maintain that that is below what it ought to have been. The amount actually charged for the first half-year of 1895 would be £469,263, leaving a deficiency of about £30,000. For 1895-6 amount actually expended was £978,497, leaving a deficiency of about £21,000. The deficiencies in those two periods, when Mr. Reid had plenty of money, were very small.

1434. *Mr. French.*] The expenditure was normal? The expenditure was normal. In 1896-7 the amount actually expended out of revenue was £855,000, leaving a deficiency of £145,000. In 1897-8 the amount actually charged against revenue was only £574,000, and the deficiency was £426,000. In 1898-9 the amount actually so charged was £549,000, and the deficiency was £451,000, reckoning, of course, £1,000,000 as the normal expenditure. Therefore on these four and a half years the amount actually charged against revenue was £3,425,714, and the deficiency—reckoning £4,500,000 as the normal charge—was £1,074,286.

1435. *Mr. Yarwood.*] You base that £1,000,000 estimate on previous figures? On previous figures, and I say it is a low estimate. Adding in this £1,074,286, I am of opinion that if revenue had borne the charges it should properly have borne during these four and a half years, there would have been needed £2,122,754 to have balanced the accounts.

1436. *Chairman.*] That is how you make the very big deficiency? Yes; I am taking what the position was before and how it has been dealt with recently. You may say that the accounts do not show that deficiency, and they do not; but if you look upon the necessary up-keep of the Government establishment as a going concern that, or something near it, ought to be the deficiency. The figures I have given do not include any provision against the serious deficiency on the Superannuation Fund—that is, a deficiency of about £1,400,000.

1437. *Mr. Yarwood.*] How do you get at that? That is actuarial. The figures I have given do not take into consideration the propriety of augmenting the Sinking Fund when the additional Treasury Bills were created in 1895. It was always my view that when Mr. Reid created an extra batch of Treasury Bills he should have increased the Sinking Fund, but he never did. It will be seen from the figures I have given that when there was plenty of revenue from extraordinary sources in 1895-6 the charges for maintenance of public works were fairly up to the £1,000,000 level. It was only after the extraordinary sources failed that recourse was had seriously to Loan Votes to relieve revenue charges, and they were relieved only just adequately to maintain the credit balance, as will be seen from the answer to the next question.

1438. The answer to Question 27, as to the Credit Balances shown by the Consolidated Revenue Fund Account, is as follows:—30th June, 1896, £476,530 (less £150,000); 30th June, 1897, £114,445; 30th June, 1898, £122,211; 30th June, 1899, £116,523. Thus, in the past two years, there was practically an equilibrium in each year, although in November, 1898, an insufficiency was admitted, and £300,000 additional taxation was asked for, which, in the main, Parliament refused. On 2nd November, 1898, Mr. Reid evidently desired to put his accounts straight. He said, in the Legislative Assembly, "I propose, seeing as I do that it is absolutely necessary that the revenue should be increased, to ask the Committee to increase the revenue. I have, therefore, come down to the House in all frankness prepared to say that it will be necessary to increase the taxation of the country." His proposals were Customs duties on tea, coffee, cocoa, dried fruits, jams, rice, &c., and to double the probate duties. Had Parliament granted his requests, his accounts in 1898-9 would have been able to bear a more stringent inquiry than they can at present. He asked for additional revenue, and told the House on that occasion that additional revenue was absolutely necessary. When the House refused to grant it to him, he was compelled to resort to expedients.

R. L. Nash,
Esq.
25 May, 1900.

Witness here put in the following summary statement, upon which his answers had been based :—

Revenue and other Receipts.

	Revenue.	Suspense.	Together.	Aids to Revenue †	Advances Repaid.	Total.
	£	£	£	£	£	£
1895 (half-year)	4,562,949*	Nil.	4,562,949	380,898	315,572	5,259,419
1895-6	9,253,939	Nil.	9,253,939	1,040,850	124,470	10,419,259
1896-7	9,287,000	Nil.	9,287,000	1,359	181,335	9,469,694
1897-8	9,482,092	472	9,482,564	Nil.	265,112	9,747,676
1898-9	9,754,185	923	9,755,108	Nil.	211,006	9,966,114
£	42,340,165	1,395	42,341,560	1,423,107	1,097,495	45,012,162

* £25,117 should be deducted, Premium on Loan raised in 1881. Should rightly have reduced deficiency on 31st December, 1894.

† Aids to Revenue :—Interest on Loans raised from 1881 to 1893 £341,320
 Railway working expenses recovered from 1894 39,578
 Treasury Bills 1,024,700
 Unexpended balances, 1891, &c 13,150
 Repayment 1,359
 £1,423,107

Expenditure on Consolidated Revenue Fund.

	Cash Expenditure (Revenue Account)	Suspense Accounts	Together.	Advances made.	Total
	£	£	£	£	£
1895 (half year)	4,924,353	132,929	5,057,282	36,801	5,094,083
1895-6	9,852,219	25,695	9,877,914	74,060	9,951,974
1896-7	9,470,142	25	9,470,167	211,637	9,681,804
1897-8	9,397,423†	178	9,397,601	342,015	9,739,616
1898-9	9,796,806	4,051	9,800,857	174,072	9,974,929
£	43,440,943	162,878*	43,603,821	838,585	44,442,406

* £130,000 of this amount charged in 1895 held to be rightly chargeable to Suspense

† £150,000 deducted from Sinking Funds to repay Railway Loan should also have been charged.

Revenue Deficiency.

	On Revenue (as above).	On Suspense (as above).	Deduction from Revenue	Sinking Funds Appropriated.	Deficiency shown from above Accounts	Maintenance of Public Works (Required to cover).	Amount required to place Revenue on adequate Basis.
	£	£	£	£	£	£	£
1895 (half-year).....	361,404	2,929	25,117	389,450	30,737	420,187
1895-6	598,280	25,695	736,475	21,503	757,978
1896-7	183,142	25	183,167	145,129	328,296
1897-8	(+) 84,669	(+) 294	150,000	65,037	425,959	490,996
1898-9	42,621	3,128	45,749	450,958	496,707
£	1,100,778	161,483	25,117	150,000	1,307,378	1,074,286	2,381,664

In stating the Deficiency (amount needed to effectively maintain the Government services) at £2,122,754 (say £2,100,000), I have deducted the apparent excess of "Advances Repaid," which represented £258,910, from the above £2,381,664.

Adjustment.

Treasury Bills	£1,024,700
Less—Deficit, December, 1894	£ 98,279
Surplus, June, 1899	116,523
	<u>214,802</u>
Suspense Accounts (less £130,000)	809,898
Special aids to Revenue—	31,483
1895—Railway expenses	£39,578
1895-6—Balances, 1891	16,150
1896-7	1,359
	<u>57,087</u>
Sinking Funds, 1897-8	150,000
Advances Repaid (net)	258,910
	<u>£1,307,378</u>
Public Works undercharged	1,074,286*
	<u>£2,381,664</u>

* Of this amount the new 30-Years' Loans have borne about £600,000, and the Permanent Debt a further considerable sum, charges which formerly were borne by Revenue.

R. L. Nash,
Esq.
25 May, 1900.

1439. Coming to Question 28, the net cash in the Banks on 30th June last at credit of the Public Account was £74,233, and there was, in addition, an illusory balance in London of £1,132,380. These covered amounts due on Trust Funds, Consolidated Revenue, &c., to about £4,000,000. The cash in the Banks on Consolidated Revenue Account is an undiscoverable amount. I do not understand where the cash balances belong, and I would rather give the question up.

1440. As to Question 29, I am not certain how to answer it. It all depends whether the Suspense Accounts are included. As for the Bank balances, they disclose nothing in reference to this point.

1441. As to Question 30, relating to the ledger balances and the Bank balances, a discrepancy certainly exists, but the reason is evident. There is no Consolidated Revenue Account kept in the Government Banks.

1442. You know there are "differences"; cannot you say whether the system may be described as a cash-basis system? I should not like to express an opinion on the point. The Banks keep the Government accounts on a cash-basis system. If the Government system does not agree with that system, it would certainly not be a cash-basis system.

1443. As to Question 31; the reply to the first two questions is contained in the reply to a further question, whether the liability accrued prior to 1st July or not. The interest actually disbursed in London on that day was accruing throughout the preceding half-year; and both in the United Kingdom and in the United States the necessary provision is made before the financial year closes. It has likewise to be made in this Colony, but it is not charged, and the cash balances are swollen in consequence. A company with debentures or deposit interest payable on the day following the closing of its accounts would not charge that interest to the following year or half-year. It is time the Special Suspense Accounts were dealt with with a view to their liquidation. I do not say that it is necessary to instantly shut them up, but provision should be made to liquidate them. It seems likely to result in either charging the deficiencies on the Suspense Accounts to the permanent debt or to Treasury Bills.

1444. Coming to Question 32, as to whether improvements can be suggested in the keeping of the accounts, that is a very important question if you go into the whole matter of keeping the accounts. There are, I consider, many points at which the present system of keeping the accounts can be improved, though they are only in part matters of bookkeeping, and must always depend upon the rectitude of the Minister in charge. I beg to offer the following suggestions for the consideration of the Committee. Of course a good many of these points that I am referring to you may say are not questions of account but questions of expediency and policy. You may not consider it within your province to deal with these points, but I should like to put my views before you. They are as follows:—

1. There should be a better recognised period of the year for presenting the Treasury accounts to Parliament, together with the Estimates for the following financial year. In the United Kingdom, in Victoria, Queensland, South Australia, and other colonies it is almost invariable to make the financial statement shortly after the financial year closes. If it were a standing provision here that finance stood first on the list on the first Government night in Parliament after, say, 21st July, a regularity would be introduced into our proceedings which is now lacking.
2. Statutory accounts are prepared and published in the *Gazette* quarterly and yearly, and by the Auditor-General, the report of the Auditor-General being mostly published long after public interest in the past year's accounts has ceased. The *Gazette* returns, too, are seldom referred to. What the public have to rely on almost entirely are the Treasurer's financial statements and the accompanying accounts, which are not statutory. It would be an advantage, therefore, if the accounts presented by the Colonial Treasurer in July were in statutory form, and they should contain detailed comparisons under headings something like the following:—

Detailed Revenue Statement.

Estimated Revenue for the year ended 30 June (last).	Actual Revenue in the year ended 30 June (last).	Estimated Revenue for the year ending 30 June (current).
--	--	--

Detailed Statement of Expenditure.

Amount voted for the year ended 30 June (last).	Amount expended in the year ended 30 June (last).	Amount Estimated to be expended in the year ending 30 June (current).
---	---	---

1445. How would you deal with the Treasurer's Advance Account? I have not referred to it here, but I think the amount expended on that account ought certainly to form a part of the expenditure for the year in which the outlay was incurred. What I wish to point out is that the statements now presented by Colonial Treasurers do not indicate how the preceding estimates were borne out by actual results; nor, what is really very important under the Audit Act, what balances unexpended upon previous votes were utilised to swell expenditures which were not voted by Parliament. These accounts presented with the Financial Statement should also contain a complete list of those expenditures for the preceding year, not at the date passed by the Auditor-General. I think that any item which has not been passed in the ordinary way should be specially referred to. There should be something to draw attention to it. At the present time the Colonial Treasurer might present his statement, and yet the Auditor-General might have disqualified every item, and there would be nothing to show the public the position.

1446. In the statements submitted to Parliament, showing a surplus or a deficiency for the year, you would show it in such a way that the items which the Auditor-General had got to pass, or, in other words, the items which he had not passed, would be shown separately? Yes, and it should be compulsory to show them in the Financial Statement. Continuing my suggestions, I come to a third point, as follows:—

3. An entirely distinct account should be kept in respect to the Trust Funds, specially distinguishing those funds against which cash must be held. This account should set forth the total amount of the

R. L. Nash,
Esq.
25 May, 1900.

the Trust Funds, the securities held against them, the advances made from them, and the cash balance remaining. And that balance should agree with the balances in the banks. When transfers are made from this account either to General Loan Account or to any other account, such transfer should at once form part of the public debt, being represented by securities. In New Zealand and South Australia public trustees are appointed to report specially to Parliament.

1447. The same as in Victoria? I am not certain.

1448. Do you know who are the public trustees in those cases;—I mean what are their offices? I do not know, but I could easily find out. My fourth suggestion is as follows:—

4. A Consolidated Revenue Account should be opened at the Government bankers, the balances shown being adjusted with the Treasurer's statement. The public accounts should, therefore, be divided into "The Public Trusts Account" and the "Consolidated Revenue Account."

5. The Suspense Accounts should, I consider, be closed shortly, the debits being covered by Treasury Bills redeemable by annual instalments. The serious deficiency on the Superannuation Fund, say, £1,400,000, should be dealt with in the same way.

1449. Have you gone into the question of what deficiency there would be on the Suspense Accounts? No; that would involve making an estimate of the value of the existing property, and I am not qualified to do that.

6. The Audit Act should definitely provide for the expenditure on the General Loan Account being vouched for by the Auditor-General as the expenditure has to be vouched for on the other accounts. The Audit Act provides that all expenditure on Public Account shall be vouched for by the Auditor-General in the usual way; but when it comes to the General Loan Account the Act is absolutely silent.

1450. *Mr. French.*] How do you mean it excludes the General Loan Account? I consider that the Colonial Treasurer has almost a free hand with the General Loan Account; he is under no obligations.

1451. But he is under the Audit Act? No; you cannot find any reference to the General Loan Account in the Audit Act.

1452. *Mr. Yarwood.*] You mean that the Auditor-General should have the control? It should be necessary for him to certify to expenditure in the General Loan Account, the same as in every other account.

1453. *Mr. French.*] I am not aware that he does not do it? He does do it; but there is no provision in the Audit Act. One of the later questions asks whether certain expenditure made from the Loan Funds was not illegal, and I say it was not illegal. Mr. Reid did not act illegally in making that expenditure without the Certificate of the Auditor-General. The Treasurer has under the Audit Act a free hand with the Loan Account.

1454. Then why was the question submitted to Sir Julian Salomons and Dr. Sly? I had forgotten that.

1455. There is the strongest evidence that the expenditure on the Loan Account is as much under the Auditor-General's control as other expenditure? It is not provided for in the Act—that is to say, the new Act of 1898, which superseded all other Audit Acts. I went through the new Act thoroughly to find if there was any reference to Loan Accounts at all, and I discovered that even the smallest reference to the General Loan Account was excluded.

1456. *Mr. Yarwood.*] The impression on my mind was that the Auditor-General in his evidence said that he could not give a warrant formerly unless there was money to the credit of the Account, and that subsequent Acts had been drawn up in such a way that he had to sign warrants whether the money was there or not;—anyhow, the Auditor-General did not say that he had not control over the Loan expenditure? My opinion is that the Colonial Treasurer can legally expend loan money without the authority of the Auditor-General.

[Adjourned till Monday, 28th May, 1900.]

TWENTY-FOURTH DAY—MONDAY, 28 MAY, 1900.

Present:—

T. A. DIBBS, ESQ. (CHAIRMAN).

J. RUSSELL FRENCH, Esq. | F. N. YARWOOD, Esq.

Robert Lucas Nash, Financial Editor, *Daily Telegraph*, further examined:—

R. L. Nash,
Esq.
28 May, 1900.

1457. *Witness:* We were discussing on Friday the question whether it was legal to spend money on General Loan Account without the Auditor-General's warrant. The Audit Act No. 5 of 1898 repeals the whole of the Audit Act of 1870 and the Audit Act of 1895, and although I cannot say personally that I know every Act which has been passed in New South Wales, yet I do not know of any Act under which it is provided that the Auditor-General's warrant must be given. In the Audit Act of 1898 they deal specially with the Trust Funds, the Public Account, and the Consolidated Revenue Account; but the General Loan Account is not mentioned from one end of the Act to the other. They lay down any number of provisions in regard to the other accounts, but that account is left out.

1458. *Mr. French.*] As has been pointed out, the present Audit Act is a consolidated Act; it has not altered the law; we had Mr. Heydon's assurance that he had not altered any of the previous Acts. The present Act is in substitution of the former ones;—any opinion based on the previous Acts must stand good with the present Act? But every previous Act has been repealed.

1459. But that does not make any difference. If Mr. Heydon is right in his assurance that the present Act simply consolidates the former Acts and does not alter the law, and he gave that assurance to Parliament, then everything passed under the former Acts would apply to this Act. And Mr. Want, Sir Julian Salomons, and Mr. Sly say that, although it is not specifically provided, yet it is inferred from the Act that the Auditor-General should give a warrant? I cannot find that there is the least provision for the Auditor-General's warrant with regard to expenditure on Loan Account; and Mr. Reid acted on that assumption.

1460. I do not think that Mr. Reid acted on that assumption? Well, he acted as though he did act on that assumption. 1461.

1461. The following I take from Counsels' opinion on the question when submitted to them:—"The Audit Act of 1870, taken literally, does not seem framed to apply to any moneys other than revenue; but we think that the safer course in the public interest is to give Section 10 of that Act a liberal interpretation, and to construe it as including under 'all moneys received into the Treasury' public moneys from all sources whatsoever." That is what Sir Julian Salomons and Dr. Sly laid down. Mr. Want practically agrees with that opinion, because he does not dispute the position that the Auditor-General's certificate is required, but he says that the Auditor-General's certificate ought to be given. I certainly think the Auditor-General's certificate ought to be given; but there is not statutory evidence that it is required.

R. L. Nash,
Esq.
28 May, 1900.

1462. Of course that is a legal opinion which I have quoted, and the strength of that legal opinion is against you? I simply read the Act.

1463. I have read you the words of the legal opinion, and I have no doubt that that would be held to be the course? It may be, but when you are asked whether Mr. Reid acted illegally, as I think one of the questions puts it, in spending money in certain years without the Auditor-General's certificate, I should say that he has not acted illegally. I read the Act before, and I have read it through again very carefully. However, to continue the suggestions which I was making on Friday, I proceed to offer further suggestions for the consideration of the Committee.

7. All sinking funds ought to be invested within, say, six months of the dates when they accrued, either in the securities of the loans for the redemption of which they were provided, or, failing that investment, then in other existing stock or Treasury Bills. In all the thirty years' Loan Acts there is a clause which permits of the investment of the sinking funds, which should not be ignored, as it is at present.
8. The balances in the hands of the Government bankers in London on the 30th June should be cabled, and only such amounts should appear in the published cash balances here. This should involve the payments made to the Bank of England in June being deducted from the cash and included in the payments for the year. That, of course, has no reference to the period during which Mr. Reid was in office. We should then be following precisely the course which is pursued in the United Kingdom, the United States, and a number of other countries. They always make provision in that way for the interest falling due on the following day.
9. The Auditor-General's report should be presented at a date much earlier than is now usually the case. The provision is that it has to be presented to Parliament, but that is no reason for withholding its publication. In other colonies these reports are published much earlier. It is said here that they cannot be published, but there is no reason why if a report is to be presented to Parliament it should not be published in anticipation. If it has been ready for months, why should it not be issued? It can be formally presented to Parliament all the same.

1464. The theory is that Parliament is entitled to see it first? They do not wait for that in other colonies. I got the South Australian report in about three months after the accounts were closed.

10. It is a question whether a Committee of Public Accounts such as they have in England would not be a material advantage in adjusting all points in dispute between the Treasury and the Auditor-General. Such a Committee would be appointed by Parliament, not by the Government, with power to determine whether the public welfare warranted a departure from the strict letter of the Acts under which moneys are received and expended. Thus all questions should be settled as they arise, and not left indefinitely in dispute as at present. That Committee of Public Accounts reports regularly to Parliament as to its action, but it only settles matters of account in dispute.
11. The system of issuing thirty years' loans has proved a vicious one for the purposes on which they are now expended, and should be discontinued. For some other purposes now provided for by permanent debt the system might prove useful.
12. Proper Stores Accounts ought to be kept. I have evidence that in some departments such accounts are not properly kept. I made an inquiry with regard to the Military Stores Accounts, and this is what Mr. Kirkpatrick sent me on the 26th April: "Separate accounts are kept under the various items as shown on the Loan Estimates, and the Assistant Commissary-General of Ordnance takes the stores on charge when received as to quantities only, and issues on approved requisitions to the various Permanent and Volunteer Military Forces." Therefore he takes an account of quantities, but not of values. He knows how much he holds in stock, but when a Loan expenditure has been incurred that amount was not written off when the stores are withdrawn for use.

1465. *Mr. Yarwood.*] Then what do they do with the account? The Loan Expenditure on Stores Account goes on accumulating, but the stores are not there. Parliament votes a sum for the purpose, but it is never written off.

1466. *Mr. French.*] If Parliament votes, say, £50,000 for rifles, they are taken into the store as so many rifles? Yes.

1467. *Mr. Yarwood.*] But then they appear as paid for? They are charged to Loan Account.

1468. They are put on the Loan Estimates, are they not? Yes, and when a further lot is wanted that is put on the Loan Estimates. But no allowance is ever made for those which are issued or used up.

1469. Is it not a question whether rifles ought to be charged to Loan at all? I think that is a material question. I certainly think they ought not to be charged to Loans at all.

13. The proceeds of land sales, approaching £1,000,000 annually, are not revenue in the ordinary acceptance. They ought rightly to be separated from rentals and interest. In New Zealand there is established a Public Works Fund; and if here a similar fund were constituted to which the income from land sales were appropriated and supplemented, should occasion arise, from ordinary revenue, and against which all expenditure on roads and bridges, court-houses, gaols, charitable institutions, &c., were charged, the great blot upon our system of financing would be removed. These are the works to which the thirty years' loans have recently been applied, and which in times of deficient revenue more than one Colonial Treasurer has charged to loans to relieve his ordinary expenditure. You can plainly see that. If you take a long series of years you will find in any period of depression succeeding Colonial Treasurers have

R. L. Nash,
Esq.
28 May, 1900.

have charged these items more largely to capital in times of depression than they have at other times. I do not wish to say that it has been done exclusively latterly, though that practice has been resorted to to a larger extent than previously. Still it is a practice which has been resorted to for many years past.

1470. The amount is not quite a million? Well, it is impossible to say exactly.

1471. You can reckon £500,000 for those conditional purchases, according to the papers that have been put in by the Treasury;—I only wish to show you that for your information? But that information has never been published by the Treasury.

1472. This paper which I hand you gives the actual figures? From this it would appear that the amount would be about £750,000 a year. I should like to go through this paper carefully. It seems to me at first sight that is an under-statement. However, to continue my suggestions, it may be said that the appropriation to which I have referred would diminish the ordinary revenue by about £1,000,000, or £750,000 if this paper is correct. At the same time it would reduce the expenditure chargeable against revenue, as last year, by about £600,000, leaving another £400,000 or less for the relief of Loan Votes. Such a Public Works Fund should be properly constituted and administered. It would be fitting that this amount received from the alienation of the public estate should be specially devoted to the benefit of the land and the Public Works, and not absorbed in the ordinary revenue. It is, of course, merely an expression of personal opinion that a Public Works Loan Fund should be established to deal with that matter.

14. Our present system of issuing loans repayable on a fixed date (and by the way I do not know whether this is a recommendation which you would be inclined to make, because it has not really anything to do with the accounts at the present time), is likely to prove injurious, and indeed has already done so. The State should hold the option of repayment after a fixed date, or should accumulate sinking funds. For instance, we had a loan falling due at the end of 1893 or 1894, and under ordinary circumstances we should have issued a 3 per cent. stock, but we had actually to issue a 4 per cent. stock at a discount to repay that loan. If we had had at that time our £16,000,000 loan falling due we might not have replaced it under 5 per cent.

1473. *Chairman.*] That was the time of the panic? Yes; it is a very serious matter to have large amounts falling due on fixed dates. If we had had a £16,000,000 loan falling due only six months ago, what position should we have been in?

1474. *Mr. Yarwood.*] Would the price obtained for the loan be likely to be materially affected? It would be very greatly affected. In the case of British Consols, and in all Indian Government Stocks, which are issued on terms approved by the British Government, they are all issued as fixed for a certain date, and thereafter repayable at Government option, and it is a form of security the British public takes to very well.

1475. *Chairman.*] These interminable loans were not liked at all one time? No; but at present the London market appreciates these loans, and they stand well with investors.

15. In view of the much higher proportion of non-productive works latterly charged to General Loan Account, I consider it would be a great advantage and safeguard if a Schedule were directed to be appended to all Loan Bills giving the following particulars:—

Schedule A, Part I.—Works estimated to yield Direct Revenue to the Treasury.

* State whether new work, or if to replace existing work, state cost of existing work.

Nature of Work.*	Estimated duration of Work.	Estimated cost of construction when complete.	Already Voted	Amount now to be Voted.	Estimated Annual net Revenue.
------------------	-----------------------------	---	---------------	-------------------------	-------------------------------

1476. *Mr. Yarwood.*] You would have to destroy existing appropriations? Oh, no!

1477. Have they not appropriations for £13,000,000? You cannot destroy them. You could not make it retrospective. Schedule A, Part II, would be as follows:—

Part II.—Works not expected to yield direct revenue to the Treasury.

* State whether new work or if to replace existing work, state cost of existing work.

* Nature of work.	Estimated duration of work.	Estimated cost of construction when complete.	Already voted.	Amount now to be voted.
-------------------	-----------------------------	---	----------------	-------------------------

The effect of this Schedule would be to afford a critical insight into our Loan Expenditure, which is now wholly wanting. The General Loan Account affords the one available outlet for the relief of an inadequate Consolidated Revenue Account, and should, consequently, be protected. At present, Loan Acts are mostly rushed through Parliaments at the extreme end of the Session, when effective criticism is virtually impossible. It may be said that such elaborate Loan Estimates are not usually prepared by other Governments. But in the United Kingdom where Telegraphs, Public Buildings, Fortifications, and other works are practically all charged to revenue, they are not needed. In Australia with its unparalleled Loan Expenditure, we should safeguard the reproductive nature of that burden on the people. In connection with that I should like to put in a statement showing the annual Loan Expenditure. This gives the figures from 1890 to 1899, and shows the total expenditure in each year; on works earning revenue; on works not earning revenue; and the proportion of works not earning revenue. The works earning revenue include railways, tramways, telegraphs and telephones, water supply and sewerage, wharfs and docks. There may be other small works, which you may say contribute to the revenue, but they are not directly contributing. Wharfs and docks to a great extent do not earn revenue, but still I have included them.

1478. *Chairman.*] Do you say that the wharfs and docks do not earn revenue? For instance, in Newcastle they do not charge wharfage, nor at Wollongong.

1479. *Mr. French.*] But the wharfs there are part and parcel of the railway system: the railway is supposed to get the revenue from the wharfs? Anyhow I have included the whole expenditure on wharfs and docks in this statement. From 1890 to 1894 the expenditure on works not earning revenue was 19·0 per cent. of the total of loan expenditure. In the next half-year—that is, the first half of 1895—it rose to 32·2 per cent. Then in 1895–6 it rose to 39·4; in 1896–7 to 40 per cent.; in 1897–8 it was 38·8 per cent.; and in 1898–9 it dropped to 33·4 per cent. If we take the five years from 1890 to 1894 we find that the average

average expenditure on works not earning revenue was 19·6 per cent. of the total loan expenditure, and the average for the last four years has been 37·9 per cent.

1480. *Mr. Yarwood.*] Where did you get those figures from? I took them from the Accounts of the Loan Expenditure.

1481. You have worked those out? Yes. The figures were easily ascertained. I took them from the Statistician's statement, not from the Auditor-General. He may possibly disagree with the Auditor-General slightly. On 30th June, 1899, the total Loan Expenditure was £62,151,764, of which £52,593,464 had been expended on works earning revenue, and £9,558,300 on works not earning revenue, the proportion unproductive of revenue being 15·4 per cent. You will see that the proportion in the years from 1890 to 1894 was not very greatly in excess of the 15·4, but afterwards the increase was enormous. As a matter of fact, since the end of 1889 the proportion of unproductive expenditure has increased 5 per cent., and if it goes on at this rate we shall have it up to 25 per cent. before long. In connection with this matter, I have also another statement showing the expenditure in the Public Works Department—that is, the cost of that Department borne by revenue. The annual average of cash expended out of revenue for the six years from 1889 to 1894 was £1,162,562; and for the four and a half years following the annual average was £918,481, showing a reduction on expenditure of £244,081. There was actually charged against revenue in the six years up to the end of 1894, £1,216,911 per annum; and in the four and a half years following the amount actually charged was £781,589, the reduction in the period being at the rate of £435,322 per annum in the amount actually charged. Now it is quite certain that with all the increased expenditure which has been going on during these years out of capital, the up-keep of these buildings and works must have increased, not diminished. Therefore, I consider that that reduction of £435,322 does not show the extent to which the Department has actually gone back.

1482. *Mr. French.*] Those figures in themselves would not prove anything, because it may be that in one period there was an unusual amount charged to revenue, and in the next period nothing at all? If there had been any special and extraordinary expenditure during that time upon these public works, it would have all gone to capital, in either period.

1483. Question 33 asks whether £1,500,000 was transferred from the Trust Funds to General Loan Account? My answer is, practically so. That was the amount transferred.

1484. What do you mean by "practically so"? It was lying at the credit of the Public Account.

1485. The question looks as if there was a deal of mischief in it, such as the misapplication of Trust Funds. As a matter of fact, if the Trust Funds were only used as a conduit pipe for the Savings Bank money, there is nothing in it? If they had said, "Advanced from the Public Account," it would have been correct.

1486. As to Question 34, my answer is that the Trust Funds as they accumulate must of course be used. But I have answered this question in answering Question 32.

1487. As to Question 35, whether £1,278,940 had been expended on revenue account without the Auditor's certificate, my answer is, that this apparently was the case, and it was an omission which could easily have been rectified; technically, it rendered those who made the payments liable. Mr. Reid, if he liked, could have obtained an Indemnity Bill at any moment, but he seemed at the last rather as though he were too much preoccupied to put such matters right. He seemed to have so much to do and so many worries that he would leave these technical details alone. He thus put himself needlessly in the wrong.

1488. As to Question 36, in reference to the debt due to the Savings Bank, I answer: To 30th June, 1899, £2,415,000; and to 30th April, 1900, £2,640,000.

1489. Question 37. I have heard that long-dated securities would not be accepted by the Barrack-street Savings Bank. I do not know precisely what passed, but I have always been under that impression.

1490. Question 38. These advances from that institution were not covered by securities, recognised as such, or included in the Public Debt. The Government must have given some acknowledgment.

1491. Question 39. The purpose of those advances was apparently to replenish the Public Account. I have not gone further in this matter. I have my own opinion as to where the money went after it got into the Public Account.

1492. Question 40 deals with the expenditure on Loan Account without the Auditor-General's certificate. The Auditor-General has referred to this in his Annual Reports. But in view of the absence of all mention of the General Loan Account in the Audit Act of 1898, I am inclined to think that the Colonial Treasurer is accorded an exceptionally free hand in dealing with that Account.

1493. Question 41. I cannot answer that question.

1494. I have here a statement showing the expenditure from capital on roads and bridges. Of course, when they were spending money so valiantly in 1892, it went up very rapidly. Previously to 1890 the expenditure was very small; but last year, a comparatively quiet year, they spent more from capital on that account than during any year on record.

1495. *Mr. French.*] Of course, it is a debatable question as to how much you are entitled to charge expenditure of that kind to capital? Yes; and there are a lot of new items in the capital expenditure at the present time, such as forest-thinning, altering dredges, promotion of settlement, and so on.

1496. *Mr. Yarwood.*] Did we ask you whether you knew any reason why the revenue expenditure to 30th June, 1895, should be as high as it was? Well, there was a large amount of funds available—I do not know whether you would call it revenue—and, naturally, the expenditure was retained at the old level.

1497. But it is more than the old level? I see by this paper it went on at close on £10,000,000 per annum.

1498. And in the next year it is £8,900,000? There were reasons why as much should be charged to that preceding half-year as possible.

1499. The £800,000 we are receiving from conditional purchases must be a declining quantity? Yes. In all the Colonies it has been apparent for many years past that the land revenue is shrinking, partly, perhaps, from the policy of the different Governments having changed. There is no doubt that the land revenue from sales is diminishing, but not from rents.

1500. But the conditional purchase payments are declining? Yes.

[Adjourned till Tuesday, 29th May, 1900.]

R. I. Nash,
Esq.
28 May, 1900.

TWENTY-FIFTH DAY—TUESDAY, 29 MAY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

29 May, 1900. THE following letter from the Government Statistician, who had been requested to attend at 2 p.m., was read:—

Government Statistician's Office, Sydney, 29th May, 1900.

The Chairman, Committee of Inquiry into the Public Accounts,—

Sir,

Last evening I received your request to be present at your meeting to-day, in order, if I had any information prepared, to answer the questions submitted to you. I beg to say that, beyond reading the questions when first published in the *Herald*, I have not given the matter any consideration. If, however, you think I can be of any service to you, I will be very pleased to give the subject of the questions my attention, but not for a few days, as my eyes have failed and I read with difficulty. You will find my views of the Public Accounts embodied in the "Statistical Register," and the "Wealth and Progress of New South Wales"; copies of these publications I send you under separate cover.

Yours faithfully,

T. A. COGHLAN,

[Books received, and letter noted.]

The Chairman read the following statement, received from the Under Secretary for Finance and Trade:—

The Treasury (Account Branch), Sydney, 9th April, 1900.

Subject:—Adjustment of £150,000 borrowed from the Railway Loan Redemption Fund to meet Debentures falling due under 31 Vic. No. 11.

THE provisions of the Railway Loan (31 Vic. No. 11) for Redemption were, that a sum of £70,000 was to be appropriated each year towards the payment of interest, the reduction of the loan (by annual drawings of £20,000), and the purchase of debentures.

The provisions of the Railway Loan Redemption Act of 1889 (33 Vic. No. 24) were, that a sum of £75,000 should be carried to a special trust fund annually until such fund should have accumulated to £1,000,000, the fund being expressly limited to the paying of railway loans. It was provided that the accumulated sum should be held available for use (for the above purpose only) in the extinguishing of railway debentures as they became due.

With regard to the provisions of the first loan, it was soon found impracticable to purchase debentures, as they rose to a heavy premium. It was (in 1893) proposed to place the surplus appropriations to a Trust Account for the purpose of paying off the loan, but the proposal was abandoned on the Auditor's objection, and the surplus appropriations were written off the books as unexpended.

The provisions of the Railway Loan Redemption Act have been carried out and some portion thereof utilised. In 1896 a sum of £375,000 was expended in discharging railway debentures under Act 29 Vic. No. 23, and in 1897-8, on the debentures under the Act 31 Vic. No. 11 falling due, a sum of £150,000 then lying at the credit of the Railway Loan Redemption Fund was advanced for the purpose of paying off these railway debentures.

The Auditor-General, however, objects to this action, on the grounds that, a statutory provision having existed on the 31 Vic. No. 11, to allow the provision under 33 Vic. No. 24 to be used would not carry out the intentions of Parliament, which evidently were to ensure in all the repayment of £2,000,000; and therefore the question resolves into one as to time of settlement.

Under these circumstances, and the Colonial Treasurer having decided that a recoupment be now made, the question as to the method to be followed should be now decided.

It may be mentioned that the Railway Loan Redemption Fund still has four and a half years to run before the money can be finally required, and therefore the Treasurer is free to elect what sum shall be discharged annually.

There are several ways in which the adjustment might be made, and they are here stated for the Treasurer's decision:—

- (1) To pay the £150,000 in one sum from the current year.
- (2) To pay the amount in five instalments of £30,000 each, commencing with June.
- (3) To pay it in four instalments of £37,500 each, commencing with December next, in which month the statutory instalments fall.
- (4) To revive the Treasury deficiency bills cancelled, and defray £111,000* from the proceeds of their issue, which would leave £39,500 as chargeable to revenue, and prolong the discharge of the Treasury bills by one year.

Submitted,—

J. VERNON,

Accountant.

Submitted.—F.K., 10/4/1900. This shows that the Auditor-General considers the money should not have been dealt with in the manner it was, and I should like it forwarded to the Committee on the Finances.—W.J.L., 24/4/1900. The Secretary to the Committee on the Public Accounts.—F.K., 25/4/1900.

John William Holliman, Secretary, Public Service Board, examined:—

J. W.
Holliman.

29 May, 1900.

1501. *Chairman.*] We have received a letter from you, dated May 25th, giving us a statement of savings effected under the administration of the Public Service Act of 1895; and Mr. Yarwood wishes to ask you some questions with regard to it.

1502. *Mr. Yarwood.*] When did the savings begin to take effect as far as the Treasury payments were concerned. In this statement you show a saving of £301,000 odd. When would the reduction start; did the savings all start at once? No, at varying periods; but it is most difficult to answer a question like that off-hand.

1503.

* This being the sum of appropriations written off before June 30, 1895.

1503. But generally speaking? The greater part of the reduction—that is, the reduction due to the retirement of officers and the re-arrangement of the salaries, which is the largest item—would have taken effect about the middle of 1896; that is speaking generally. The re-grading of the Departments, of which this saving is the result, was effected by the Board in the first half of 1896; and the majority of the officers were retired by the middle of that year. So that the larger part of the savings took effect from about the middle of 1896; but I could not say absolutely without making an investigation.

J. W.
Holliman.
29 May, 1900.

1504. The point arises as to whether the reduction of expenses in consequence of the action of the Public Service Board would in any way affect the expenditure of the year ended 30 June, 1896; when I say "in any way" I mean materially—say by £100,000? I should think it would not materially affect the year ended 30 June, 1896.

1505. But it would commence afterwards? It would commence afterwards.

1506. That agrees, as a matter of fact, with the statement of the Treasurer in the Ways and Means. Probably so, as the Government would cease to pay the salaries of the retired officers about 30 June, the majority of them having been retired from that time.

1507. According to a memorandum which I have here, and in which I have taken out the expenditure for 1896-7, the reduction between that year and 1894—which is the first nominal year—is only £102,000; how did you arrive at the figures shown in your statement? I have the details here. Generally speaking they were obtained in this way: The Board was furnished with returns at the beginning of 1896 of the number of officers in each department, and the salaries paid. That was taken as a basis of comparison with the state of the Service after the grading work had been done.

1508. Have you any of those returns here? I have the returns at the office, but I have the summaries here.

1509. That return before you is, I notice, dated December, 1897? This return was made up for a special purpose at that period, but of course the figures would not alter afterwards. The saving was one effected at a particular period, and the return made up in December, 1897, has been used for other purposes later on when necessary.

1510. Would you mind calling out the figures showing the savings in each Department? Yes; they are as follows:—

	£	s.	d.
Chief Secretary's Department	20,350	9	11
Treasury	28,719	19	0
Lands Department	19,627	3	5
Mines and Agriculture	13,230	0	4
Justice Department... ..	50,610	16	0
Public Instruction	19,881	4	2
Public Works	29,636	19	1
Postal and Electric Telegraphs	49,943	10	0
Attorney-General	2,293	0	0
Total	£234,294	1	11

This amount was reduced by certain savings effected in the Dredge Service which, it was argued, would have been effected whether the Public Service Act was brought into existence or not.

1511. But those savings would be reflected in those figures? They should be. The following is the statement showing the savings effected:—

Approximate Statement of Savings effected under the Administration of the Public Service Act of 1895.

	£	s.	d.	£	s.	d.
Total saving effected by the retirement of officers and the re-arrangement of salaries, &c., of officers retained in connection with the grading of the various Departments	234,294	1	11			
Less saving on the Dredge Service which would have been effected in any case	13,064	0	0			
				221,230	1	11
Additional saving effected by the reduction of class of schools and corresponding reduction in salaries of School Teachers (approximate estimate only)				10,000	0	0
Savings effected in Prisons Department since the grading of that Department (as per Statement of Comptroller-General)				6,862	0	0
Savings effected in the Registrar General's Department subsequent to the grading (as stated by Registrar-General)				3,735	0	0
Savings effected in connection with the Government Printing Office subsequent to the grading (as stated by Government Printer)				6,600	0	0
Fees previously received by officers now paid into the Consolidated Revenue (approximate estimate only)				7,000	0	0
Estimated saving in the equipment and travelling expense of the various Departments under present regulations (approximate estimate only)				24,000	0	0
Estimated saving in connection with the supply of stores, being the difference between the average annual expenditure for the three years prior to the passing of the Public Service Act, viz.—£110,770, and the estimated amount required to meet expenditure for the present financial year under the new Tender Board arrangements, £87,000 (say) £23,000				23,000	0	0
Total				£301,827	1	11

John Roxburgh Martin, Special Clerk to the Under Secretary for Finance and Trade, recalled and further examined:—

J. R. Martin. 1512. *Chairman.*] I understand that you have prepared a statement which you wish to submit to the Committee, showing the manner in which the proceeds of the Treasury Bills were applied? When I gave my evidence formerly I stated that, in my opinion, when the change of system was made the unexpended votes should have been allowed to lapse, and only the Cash Debit Balance existing on the Treasury Account current covered by Treasury Bills. I held that the issue of the Treasury Bills for a larger sum than that could only have had the effect of relieving the first year of the new system of practically an equivalent amount; and I have gone through the Public Accounts and found evidence which seems to me to be sufficient to support the view I then put forward. In the course of an hour or two I took out sums amounting altogether to £788,555 2s. 10d. I have classified the items into four divisions. The first one covers "Roads." During the five years from 1890 to 1894 inclusive, the average amount spent on roads was £696,687 per annum, and the average amount charged to these years was £715,973; so that, practically, the expenditure was £700,000 per year. In 1895-6, £719,990 0s. 9d. was expended, and of that sum there was charged to revenue only £387,207 0s. 8d.; while the amount charged to Treasury Bills was £332,783 0s. 1d. Of this latter amount, £153,513 14s. 6d. was charged back to the year 1893. That was the balance of the sum of £216,000 called back into existence by the late Treasurer. In addition to that, he spent the unexpended votes of 1894 and 1895, amounting to £76,590 10s. 2d. and £102,678 15s. 5d. respectively. This mode of procedure simply had the effect of relieving the first year of the new system of a portion of the annual expenditure on roads. In the following years, the amount spent on roads was considerably reduced in consequence of the unsatisfactory state of the revenue, and since 30 June, 1896, it has only been slightly in excess of £500,000 per annum. Class 2 of this statement is, perhaps, the most interesting of all, and I think the list of items fully bears out what I said on a previous occasion. In addition to the statutory redemption of the old Treasury Bills, £150,000 for the year, which was simply divided between revenue and the new Treasury Bills, I found on investigation, that there were other items of the same class. There was the reduction of the Railway debt under Act 53 Vic. No. 24, in connection with which the statutory sum of £75,000 was also halved. In addition to this, the interest on the old Treasury Bills issued under Act 53 Vic. No. 9, amounting in that year to £56,471 10s. 4d., was also halved—£28,235 15s. 2d. being charged to revenue, and £28,235 15s. 2d. being charged to Treasury Bills. These three items, which are obviously not liabilities of the old system, amount to £140,735 15s. 2d. If to this you add the Roads, £332,783 0s. 1d., you get a sum of £473,518 15s. 3d. without going any further. But in this table I also show that the subsidy to the Australasian Squadron, which is about £37,000 or £38,000 per annum, was divided in the year 1895-6—£24,860 being charged to revenue, and £13,101 to Treasury Bills. These amounts together total £37,961; while in 1896-7, the amount was £37,989, and in 1897-8, £37,820. The conveyance of mails amounted to £211,001 7s. 7d. in 1897-8, and to £211,901 17s. 10d. in 1896-7, while in 1895-6 the amount paid was £208,744 5s. 3d., exclusive of any sum charged back to 1894. I might here explain that the way in which I have made up this statement meets any objection which might be raised on the ground of short expenditure of 1894, for I have not taken into account the expenditure charged back to 1894. For instance, the payments shown as made in 1895-6 simply include the amount charged to the half-year of 1895, with the amount charged to revenue; and any unexpended votes of 1894 and previous years are left out of account in class 2, although, for reasons before explained, they are included in class No. 1. As I have said, in 1895-6 the conveyance of mails amounted to £208,744 5s. 3d., and of that sum £171,348 7s. was charged to revenue and £30,395 18s. 3d. to Treasury Bills. The cable subsidies amounted to £17,812 19s. 4d. in 1897-8, and to £17,122 15s. 1d. in 1896-7, while in 1895-6 the total amount paid was £16,462 3s. 2d., of which only £9,764 2s. 1d. was charged to revenue, and £6,698 1s. 1d. to Treasury Bills. There cannot be any great variation in the amount of the mail subsidies—the colonies generally have to pay so much per year, according to the business done and the population; and the total amounts here agree very closely in each year, yet I find that the payment in 1895-6 was practically halved. Another important item is the working expenses of the railways. Before turning up the Public Accounts, from which I obtained these particulars, I looked at the Railway Report, and found that the working expenses in the year 1895-6, charged by the Railway Commissioners to their account, was over £1,550,000. That was to 30 June, 1896, the date when the Railway year ends. Then I turned up the amount charged to revenue in 1897-8, according to the Public Accounts, and found that it was £1,587,033 3s. 1d.; and I found that in 1896-7 it was practically the same amount, being £1,571,109 5s. 10d. I then turned up the accounts for the year 1895-6, and found that the amount charged to revenue was only £1,512,233 17s. 2d., and that the amount charged to the half-year of 1895, and paid from Treasury Bills, was £59,951 7s. 10d., making a total of £1,572,185 5s., practically the amount paid in the two following years. There is thus ample evidence that the ordinary working expenses of the railways for a year were divided between Treasury Bills and revenue in the first year of the new system. There is no doubt about that; you have the Railway Report showing what the working expenses of the year were, according to the Commissioners, and you have the Public Accounts showing the amount charged to the revenue of the year as being very much less. Of course, I regard that as simply due to the change of system as it was changed; that is to say, a Government department can only have its normal expenditure within a year, and if you allow it to work on unexpended balances in one year, and meet the payments in connection therewith from Treasury Bills—if you allow it to utilise those unexpended balances in this way, and then at the end of the year you say that in the following year you will not allow the department to utilise the unexpended balances remaining, and to charge the payments in connection therewith back to the revenue of the year, but will make a clean cut at the end of the year, then you must relieve the year of a large amount of expenditure. Taking the working expenses of the tramways, I find that the amount charged to 1897-8 was £252,026 11s. 3d., and the amount charged to 1896-7 was £250,888 12s. 11d., while in 1895-6 the amount charged to revenue was £246,749 9s. 8d., and to the half-year of 1895 £15,494 19s. 7d., making a total of £262,244 9s. 3d. That is in excess of the amounts charged to the two following years. In regard to the item "Protectorate of New Guinea," there was an annual subsidy of £5,000 payable. I find that amount charged to the year 1897-8, to the year 1896-7, and to the year 1894; but in 1895-6 I can only find one-half year's payment of £2,500, and that is charged, not to revenue, but to Treasury Bills; so that although the Colony paid a subsidy of £5,000 per annum, I cannot find that the revenue of 1895-6 was charged with a penny on that account. I have looked very carefully for the amount

amount, and I am sure it is not there. In some way, in consequence of the change of the financial year from December 31 to June 30, only one half-year's payment was made in 1895-6, and that was not charged to the first year of the new system.

1513. *Mr. Yarwood.*] Did you look in the first half-year of 1895? Yes. I thought they might have charged two half years to the half year of 1895, but I could not find it.

1514. On page 21 of the Public Accounts I find £5,000 for the year ending 30 June, 1895? Yes, but that is charged back to 1894.

1515. Then what is charged in 1894; is it the 1893 one? Yes, I suppose so. There is nothing charged to revenue in 1895-6, not a penny. In the half year of 1895 they paid £5,000, and charged that to the year 1894. That was apparently the subsidy of the year 1894.

1516. At any rate, the situation is that the Balance-sheet of the year ended June 30, 1896 (unless the amount appears in subsequent years), is devoid of any charge whatever? The amount is not charged at all. Not a penny is charged to the revenue of 1895-6. There are twelve months' payments which have slipped out.

1517. If they did charge it back we ought to find two amounts jammed in somewhere? You find £5,000 paid on account of 1894. Well, they did not pay that until the first half-year of 1895. Then in 1895-6 you find £2,500 charged back to 1895, and the payment met from Treasury Bills.

1518. That is, to 30th June, 1895? Yes. And then by 30th June, 1896, another sum of £5,000 should have been payable; but apparently they dropped one year behind then, and I suppose they have been one year behind ever since. I am certain of this fact, that while the Colony paid £5,000 a year in connection with the subsidy for the administration of New Guinea, the revenue of the year 1895-6 was not charged with a penny.

1519. *Mr. French.*] Then we are a year behind? Yes. This matter is exactly on all fours with the redemption of the Treasury Bills and the reduction of the railway debt. [*Statement afterwards obtained from Mr. Vernon, and marked Appendix B 4.*] There are a number of other items, consisting principally of interest payments and commissions paid, which have been divided in a most extraordinary way, I think. Take the management of the payment of dividends on inscribed stock by the Bank of England, in London, which comes to about £18,000 a year. In 1897-8, £18,600 was charged to revenue; and in 1896-7, £18,626 2s. 2d. In 1895-6 there was charged to revenue and to the half-year of 1895 combined, £16,923 6s. 7d., obviously a year's payments, and yet it is found that only £8,428 was charged to revenue, and £8,495 6s. 7d. to Treasury Bills. There is the annual expense of the management of payment of dividends on the inscribed stock of the Colony in London deliberately divided in the first year of the new system between Treasury Bills and revenue. Take the interest on the Civil Service Superannuation Funds. Of course, the interest charged is not so large now, as the funds are diminishing. In 1897-8 the amount was £4,533 16s. 9d., and in 1896-7, £6,929 0s. 6d.; while in 1895-6 the amount was £6,894 11s. 11d.; yet that was simply halved in the same way, £3,705 2s. 1d. being charged to revenue, and £3,189 9s. 10d. to Treasury Bills. There could be no objection to Mr. Reid's action in issuing Treasury Bills to cover all these half-yearly payments if he had charged the first year of the new system with one year's expenditure; but if he changed the system in such a way as to save his revenue, in the first year, of half a year's payments, then he was not justified in issuing bills to provide for the other half.

1520. *Mr. Yarwood.*] And further than that, although the original arrangement and idea may have been perfectly right—that was, to pay everything up to 30th June—what you take objection to is the continuance of it afterwards, and claiming the difference between the two sides of the account as a surplus? Of course I do. It may be quite possible that when they changed the system they did not see the effect of it; but after seeing the effect of it I think an explanation was due. I now take the next item, "Interest on Special Deposits of the Savings Bank of New South Wales." These deposits are increasing, and of course the interest payable is increasing. In 1897-8 the amount was £69,735 3s. 6d., and in 1896-7 it was £51,732 15s. 9d. In 1895-6 the total amount charged to revenue and bills was £42,700 15s. 9d., of which £6,138 15s. 9d. was charged to Treasury Bills and £36,562 to revenue. Taking the next item, the "Interest charged on Municipal Council Sinking Funds," which is only a very small amount, ranging between £600 and £800, that also has been divided. In 1897-8, they charged £800 to revenue; and in 1896-7, £680 7s. 4d.; while in 1895-6, the total amount was £561 3s. 6d.; this amount being practically halved, £301 5s. 7d. being charged to revenue and £259 17s. 11d. to Treasury Bills. There are other items in the statement—but I will only quote one case, the payment under the Pastures and Stock Protection Act, the amount of which is rather over £1,000. In 1897-8 the amount charged to revenue was £1,566 14s. 8d., and in 1896-7 it was £1,590 12s. 3d. As far as I can see, the payment in 1895-6 was £1,052 12s. 10d., and there was not a penny of that charged to revenue. The total amount of the items in clause 2, which I took out in about three-quarters of an hour, is £291,731 12s. There cannot be a shadow of a doubt that the revenue was relieved by the amount of these items. And if you add that sum to the amount expended on roads you get £624,514. In addition to the roads, there were other items of public works in the same category. In Class 3 of the statement I have put two items. One is the special grant to Municipalities £30,027 16s. 8d. That is charged back to the half-year of 1895, and, of course, defrayed from Treasury Bills, but I do not see how it can be considered a liability of the old system, because the grant was based on the rates collected in the half year ended August, 1895, after the change of system was made. Well, a certain procedure must be gone through before a Municipal Council can obtain payment of its grant; the Council Clerk must make up an abstract of receipts and disbursements, and that abstract must be sent to the Government Statistician for certificate; and in many cases it is returned to the Council Clerk for correction. Then it is again sent by him to the Government Statistician, who certifies to its accuracy, and forwards it to the printer for publication. After it has been published in the *Gazette*, the Treasury makes the payment to the Municipal Council. So that you can see that if the grant was based on the half-year's collections of rates to August, 1895, it must have been well on in the first year of the new system before the payments were made.

1521. But the Treasurer was pledged to make the payment before 30th June, 1895? Very likely; but the revenue of the year 1895-6 did not bear a penny on that account, although in 1896-7 the Treasurer made grants to the amount of £59,391 18s. 1d. I have no doubt that the promise was made before the change of system, but can it be considered a liability.

J. R. Martin, Esq. 1522. *Mr. French.*] That is the difficulty—as to what, from a business point of view, apart from a Government point of view, can be considered a liability. In fact, that is virtually what we have to decide, and it is a very difficult question.

29 May, 1900.

1523. *Mr. Yarwood.*] There is one thing, and that is that you are slightly assisted by subsequent figures, to some extent. If the figures for the expenditure had been £8,900,000 for years subsequent to 1895–6, one would have said that it was the cleverness of the Treasurer when the change was made—I mean the good financing and economy—that enabled him to reduce the expenditure. What makes one critical is that that is the only year in which the abnormally low expenditure takes place? In the first year of the new system the Treasurer brought out a credit balance of £300,000; in the second year he had his expenditure relieved to the extent of £250,000 or £300,000 by the Public Service Board, and yet he lost £200,000. What is the logical conclusion? In Class 3 there is another item which I have put as a special payment—£8,885 8s. 7d.—on account of relief works in Centennial Park. Well, that must have been paid in wages. No doubt the work was authorised before the change of system was made.

1524. *Mr. French.*] But it is only a Suspense Account? No; it was expended over and above the sum of £25,000 charged to Suspense, for which the original Vote was taken. In Class 4, I have taken out certain items from the Government Departments, and I simply compare the amounts charged to revenue in the year 1895–6, plus the amounts charged to Treasury bills, with the amounts charged to the year 1894. I find that, on the items I have out, the amount charged to the year 1894 on account of the Chief Secretary's Department was £779,610 19s. 7d.; and the amount paid in 1895–6 was £776,407 15s. 1d.—practically the same amount, yet of the latter a sum of £42,149 10s. 4d. was charged to Treasury bills. In the Colonial Treasurer's Department, on the items selected, there was a sum of £269,596 10s. 10d. charged to 1894. The total payments in 1895–6 amounted to £251,376 13s. 2d., of which £16,243 17s. 4d. was charged to Treasury bills. In the Lands Department £274,000 £s. 10d. was charged to 1894, and practically the same amount in 1895–6, namely, £277,233 19s. 11d., of which £18,268 10s. 5d. was charged to Treasury bills. In the Justice Department there was £202,272 10s. 7d. charged to 1894. The total amount paid in 1895–6 was £195,424 13s. 3d., of which £7,504 16s. 9d. was charged to Treasury bills. In the Department of Mines and Agriculture there was a sum of £21,717 2s. 4d. charged to 1894; and practically the same amount was paid in 1895–6—£123,248 3s. 3d., of which £15,389 3s. 1d. was charged to Treasury bills. In the Public Works Department a sum of £300,346 16s. 10d. was charged to 1894; while in 1895–6 the total amount was £265,207 9s. 5d., of which £25,571 7s. 7d. was charged to Treasury bills. That shows a considerable reduction when you compare the two sums together with the amount charged to the year 1894, but the Department was also affected by the amounts charged to the short-dated loans, and in addition to the revenue being relieved by the utilisation of the unexpended votes, it was also relieved by the short-dated loans in that year, and that diminished the total. The total amount of the items I took out for the year 1894 is £1,917,550 7s., and against that sum there was charged £1,763,771 8s. 7d. against revenue in 1895–6, while £125,127 5s. 6d. was defrayed from Treasury bills, making a total of £1,838,898 14s. 1d. I have not included in the payments shown to have been defrayed from Treasury bills amounts that were defrayed from this source on account of 1894 and previous years, in case it should be said that the expenditure in the year 1894 was small, and that it was proper to charge those items back. In my opinion this statement, which I shall put in as evidence, shows very clearly the operation of the change of system, and is a justification of the contention that when the change of system was made the unexpended votes should have lapsed. Such a course would have had the effect of charging the first year of the new system with a full year's expenditure, and would not have charged it with a penny more than a full year's expenditure. I may say further that I only selected the items included in the statement, because they were principal items. There are many more items in the Public Accounts for 1895–6 which, if taken out and compared, would bring the total deficiency to the amount I arrived at; but I judged that the Committee would only wish to get an approximate idea of what was done.

The following is the statement in full:—

PAYMENTS made by the Colonial Treasurer during the financial year ended 30th June, 1893, and charged, not to revenue, but to the first half-year of 1895 and defrayed from the proceeds of Treasury bills: a comparison with other years, showing that the payments were part of a full year's expenditure, and proper charges on the revenue of the first year of the new system.

Summary.

James Henry Robinson, Senior Clerk of Records, The Treasury, examined —

J. H. Robinson, Esq.
29 May, 1900.

1525 Chairman] You are a clerk in the Treasury? Yes
1526 And you produce certain papers? Yes, in connection with the Centenary Celebration Act. They refer to the Centennial Park
1527 You leave these as an exhibit? Yes.

[Adjourned till Monday, 4th June, 1900]

TWENTY-SIXTH DAY.—MONDAY, 4 JUNE, 1900.

Present:—

T. A. DIBBS, ESQ. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

Carlton Gabbet Livingstone Boyce, Sub-Accountant, Treasury Department, examined:—

[Witness handed in Statements of Interest Payments in 1895-6, which were charged back; marked Appendices C 4 and D 4.]

C. G. L.
Boyce, Esq.
4 June, 1900.

1528. *Mr. Yarwood.*] Referring to the interest on Treasury bills under 53 Vic. No. 9: When the change of system took place, it appears, according to what I make the figures, that £28,235 15s. 2d. was charged to 1895, £28,235 15s. 2d. to 1895-6, £51,971 was charged to 1897, £47,192 was charged to 1898, and £43,250 was charged to 1899; the accounts from the half-year of 1895 to the end of the year 1895-6 apparently contained only twelve months' interest; we want to know whether that is so? We paid the interest right through to the 30th June, 1895, and charged it to the services of 1895—that is, it would be payable on the 1st July, but charged back to the year 1895 deficiency account on appropriations retained. 1529. Then how does the item charged in 1895-6 come to be only half the usual amount? We took all the appropriations to cover outstanding claims for interest and everything else to the 30th June. These appropriations did not lapse, so whatever claims came in subsequent to the 30th June were charged to the deficiency account provided for by Treasury bills.

1530. In 1895? That is in 1895; so the next year would only show one half year, because under the new system of the Audit Act Amendment Act all appropriations lapse on the 30th June. Therefore the interest which accrued from 1st July, 1895, to 31st December, and which was payable on the 1st of January, would be charged to the current year—that is, 1895-6. The next half-year, which would be the 30th June, would not be payable, and was not payable, until the 1st of July; so it comes into the subsequent year. As the appropriations lapsed on the 30th June they became a charge on the next year; and that is where the first year of the new system gained.

1531. So, if you reverted to the 31st December in the balancing there would be a twelve months' interest come in to the accounts? Yes; under the old system there would be.

1532. You are quite sure about that? Yes.

1533. Does the same remark apply to the naval expenses? Yes; to the whole of the expenses. You will notice a number of amounts paid amounting to £650,285 18s. 8d. Those are transactions during the year 1895-6. Of the total expenditure for the year making up the sum of £10,451,974 6s., the sum of £650,285 18s. 8d. is charged to the half-year ending 1895. That is provided for by Treasury bills. You will also notice that there is interest there in both places paid in the same period—that is, for the year. For 1895-6 we only estimated and appropriated one moiety, and the other moiety appeared in the 1895 Estimates. [*Statement regarding Naval Expenses afterwards handed in, and marked Appendix E 4.*]

1534. *Mr. French.*] In fact you dropped out half a year? No, we did not drop it; we charged back. We charged one-half to 1895 half-year, and during 1895-6 we only charged six months.

1535. It is really a pushing forward; the year 1895-6 gained, of course? Yes. I have a memorandum here which is in brief what I have said. I will put it in as an appendix to my evidence.

1536. As to the liabilities, I understand them to be only contingent liabilities? Yes.

1537. Certain of these liabilities which are spoken of, and required to be provided for, were really appropriations outstanding? Yes.

1538. But they might or might not become a reality—that is, not necessarily become a reality? Not necessarily. Appropriations are taken for a certain work, and it sometimes happens that a contract is not entered into—and so in some cases the votes would lapse. Under the old system, every year the Balance-sheet—that is the balance of appropriations—was sent round to the Departments, in order to ascertain how much was to be written off. That meant that the Treasury wishes to know what contracts were outstanding. If a Department said that a certain work was going on, and that they would require so much, the amount required was retained, and the balance was written off. But when the knife was put through—that is, when the break of system came—the Departments were asked how much of the appropriations they would require to carry out works they had already entered into. The amount of the appropriations was then taken as the liability. The liabilities for interest and so on were our own. Following the same principle, all interest to the 30th June was made chargeable to the old system, and so we find that in the Estimates to 30th June, 1895, we estimated one-half, and in 1895-6 we estimated another half. And as interest claims came in months afterwards, they were charged back to the Treasury Bills Deficiency. We started on 1st July, 1895, with the new interest, with a clean sheet.

1539. Was not the effect of that to give you a very good start? So it would.

1540. The effect of that on succeeding years was to make the first year very favourable? Yes. That would not have been apparent had the reconstruction been on the basis of the old system. Under the old system, votes never lapsed while there was an outstanding contract; but under the new system votes must lapse on 30th June; and interest which accrued on the 30th June would not be payable till the 1st July, and would be chargeable on the votes of the year commencing 1st July.

1541. *Mr. Yarwood.*] Take the Post Office Savings Bank;—when do you pay the interest up to? Only once a year—the 31st December. We pay in January.

1542. And the Savings Bank in Barrack-street too, I suppose? No; they are paid half-yearly. Interest on inscribed stock falls due on different dates.

1543. When the new system was introduced, what was to prevent you from paying the Post Office Savings Bank half a year's interest? Nothing at all. But they only ask for it once a year, and we only pay once a year. That had always been the custom.

1544. *Chairman.*] I suppose that when the new system commenced half a year's interest had accrued? Yes.

1545. *Mr. French.*] I suppose you make an entry of all the appropriations? Yes; it is a credit in the account.

1546. I suppose it is only a memorandum? No; it is the same as if you give a man credit for an overdraft in your bank. The appropriation must not be overdrawn, and within the limits of the appropriation the Departments must work. When the appropriation is exhausted they must find some other means of meeting the expenditure. We were bound by the balance of appropriations, which we take as liabilities. We could not exceed them.

1547. And need you fulfil them? That rests with the other Departments. If they said that they had contracts or engagements, and vouchers come in which apparently are proper claims against the Votes, they must be paid.

1548.

C. G. L.
Boyce, Esq.
4 June, 1900.

1548. How does it come about that the expenditure of 1895-6 was unquestionably lessened by the operation of the Audit Act Amendment Act? By the very fact of appropriations lapsing on the 30th June, and the half-year's interest accruing on the 30th June not being paid till the 1st of July, or the commencement of the new financial year.

1549. And the next year bore the interest? Yes; and so it goes on up to the present day.

1550. And on the 30th June, 1900, something will have to be carried forward to 1901? Yes.

1551. Do you consider it necessary to get an appropriation for the interest, or is it a statutory obligation? It is what we call a special appropriation, or statutory obligation. That does not apply to the interest on Trust Funds. That is what we call an annual appropriation.

1552. Does the Treasurer have to go to Parliament every year to get an appropriation for the Trust Fund interest? Yes.

1553. *Chairman.*] How can he know the amount? We have to estimate it.

1554. How can you make an estimate twelve months ahead? It is pretty difficult; but after so many years' experience we can come pretty close to it.

1555. *Mr. French.*] I suppose it is necessary that you should stand by the appropriations? Yes, otherwise we would have to get indemnity. We are liable to pains and penalties if we pay without appropriation. That is where the Advance Account comes in—to meet urgent cases.

1556. *Chairman.*] But you do pay without appropriation, because you pay to the debit of the Advance Account? That is an appropriation of Parliament to meet unforeseen circumstances, and has to be subsequently accounted for.

1557. *Mr. French.*] That is a lump sum for contingencies? Yes. I may say that in making the estimates the first thing estimated is the revenue. Then that is cut out by the expenditure. You cannot go beyond it.

1558. *Mr. Yarwood.*] How was it that you brought in a surplus of £300,000? That is after results. In most instances our revenue has exceeded the amount estimated.

1559. *Mr. French.*] I understand that you expected the revenue proper for 1895-6 to produce £9,200,000 odd, and you cut the expenditure out of that? Yes. You must recollect that the accounts of 1895-6, shown in the 1896-7 Ways and Means Account, are the after results. Comparing the account of the after results of 1895-6 with the estimated account for the same year shown in the previous Financial Statement, you will see that both the receipts and expenditure are exceeded. There is an increase in the revenue side, and a saving in the expenditure side of the same account by savings on appropriation—that is, the amounts written off on the 30th June not required, or lapsed under the Audit Act Amendment Act. The saving was not made in 1895-6 by the amounts paid for interest charged back to Deficiency Account, as those sums not being included in the estimates of 1895-6 left an equal amount available for other services of the year—that is, the whole amount of estimated revenue was cut out by expenditure, excluding the interest items under consideration charged back.

1560. I suppose that the surplus of £330,000 is virtually the amount of votes unexpended? Yes.

Witness withdrew; and the Committee considered the evidence so far taken.

[Adjourned till Tuesday, 5th June, 1900.]

TWENTY-SEVENTH DAY—TUESDAY, 5 JUNE, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

The Committee considered their progress Report.

TWENTY-EIGHTH DAY.—WEDNESDAY, 6 JUNE, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq.

F. N. YARWOOD, Esq.

Edward Alexander Rennie, Auditor-General, recalled and further examined:—

E. A. Rennie, Esq.
6 June, 1890.

1561. *Mr. Yarwood.*] We have an exhibit here in connection with the Railway Loan under Act 31 Vic. No. 11, which, so far as my recollection goes, provides that £70,000 a year should be put by for the redemption of the loan itself and for payment of interest in connection with it? Yes.

1562. We have taken out the figures from the accounts for 1895-6, and so on, and we find that in the year 1895-6 there only appears altogether the sum of £35,172 10s., of which £15,670 was charged to the year; in the next year 1896-7 there was only the sum of £38,235 charged; in the year 1897-8 there was a sum of £50,370 10s. charged, and in the year 1898-9 £2,405. I believe I am correct in saying that the date on which the loan expired was 1st January, 1898; and what we want to know is why, as the statutory obligation is apparently one of £70,000 annually, there only appears in the accounts the amount which I have quoted? That is because the interest, originally £50,000 a year, was very much reduced in consequence of the annual drawings of debentures.

1563. Yes, but that is adding the interest on. If you take the 1897 report, for instance, at page 30 you will find the redemption of the debt put at £26,800, and the interest at £11,435;—that is, the Treasury division of the amounts, I believe? Yes; the £11,435 is interest, and the reduction lower down on the page is £26,800.

1564. That is, the two added together make £38,235? Yes.

1565. The Act provides for £70,000, does it not? Yes, £70,000 to pay interest and the annual drafts. The interest is much lower because the amounts of the outstanding debentures are very small. There would be the drawings on the 31st of December of the previous year—that is, 1896. While there is £20,000 to be drawn, you will find a number of tickets that have already been purchased off, so there might be only £18,000 or £19,000 to pay. At all events, the difference between the total charged in this list and the £70,000 mainly arises from the shortening of the charge for interest.

1566. But if the Act says that £70,000 is to be put on one side, is it legal to reduce the amount to £38,235? These are the actual payments. The £70,000 might not be wholly paid till two or three years afterwards. The interest is paid just as people ask for it. The conditions of the Act are given on page

page

page 158 of my last report—that is, for the year ended 30th June, 1893. You will see a number of paragraphs there under the heading of “Liquidation of the million loan raised under the Railway Loan Act of 1867.”

1567. I see that the conditions were as follow:—“From the 1st day of January, in the year one thousand eight hundred and sixty-eight, to the thirty-first day of December in the year one thousand eight hundred and seventy-one, inclusive, the sum of fifty thousand pounds shall be appropriated and applied by the Government of New South Wales each year towards the payment of interest on the said Loan, and thereafter” (and we are dealing with thereafter) “the sum of £70,000 shall be appropriated and applied each year during the currency of the loan in the following manner, namely:—

- “1. Towards the payment of interest on the loan.
- “2. Towards the reduction and final extinction of the loan by the payment of £20,000 as a Sinking Fund of 2 per centum to be determined by annual drawings at par.
- “3. Towards the purchase of the debentures of the loan.”

1568. I read the following from your report:—

Debentures were issued accordingly, bearing interest at 5 per cent., for the full amount of £1,000,000, with a currency of thirty years from the 1st of January, 1868. The loan was negotiated in London through the agency of the Bank of New South Wales and realised a net sum of £968,503 13s. 10d., which was brought to account in Sydney in 1869.

At the 30th June, 1897, it had been computed that the outstanding debentures, payable on the 1st of January, 1898, would amount to £208,000, and that the balance of the annual appropriations of £70,000 unapplied to fulfil the conditions of the loan would be £207,752 10s. Upon winding up the account, however, it was found that the prescribed annual drawings of £20,000 had not always been correctly accounted for—firstly, by the failure in some cases to withdraw the cards with the numbers of the debentures purchased prior to the drawings; and secondly, by the omission in the London accounts to discriminate in some cases between the payments made there for bonds drawn and bonds purchased. In this way the entries in the Sydney accounts became irregular and unreliable.

Another serious irregularity was occasioned by the purchase in London of the debentures of this loan to the amount of £10,500 with money provided to redeem what is known as the Mudgee Road Loan of £22,000, under the Act 36 Victoria No. 2, which practically reduced the appropriation liability under 31 Victoria No. 11 by that amount.

Over and above those disturbing elements the procedure in regard to the purchase of debentures with the growing excess of the annual provisions of the £50,000 for the payment of interest, in consequence of the growing reduction of the amount of interest bearing principal, has certainly also occasioned no inconsiderable irregularity in the progressive redemption of the loan during its currency. It had been considered by the Treasury that, as the purchase of the debentures when offered in the open market could only be effected at a premium, and that often at a high rate, it was necessary to provide votes out of the revenue to meet such premiums, whereas, if necessary at all to incur the expense, they were clearly chargeable on the annual provision of £70,000. The amount of premiums so paid reached the sum of £19,429 15s. 6d., besides £323 15s. charged as “Unforeseen Expenses.” Attention was several times invited to this procedure in past reports, as occasioning an unnecessary extra charge upon the revenue.

The total amount of the outstanding debentures really due at 1st January was found by their actual presentation for payment to be £206,700, of which £2,400 have only been brought to account since 30th June last. The balance of £204,300 fell due within the financial year 1897–8, and properly forms part of the current charges under the Audit Act Amendment Act of 1895, but, as before stated, the Treasurer, finding a balance of £150,000 lying idle at the credit of the “Railway Loan Redemption Fund,” applied the same, in the meantime, towards the redemption so far of the debentures in question, being part of the Railway Debt; but as that balance will be required hereafter, it is necessary to retain as unexpended an appropriation of £150,000 under the Million Loan Act of 1867, 31 Vic. No. 11.

1569. In the second last paragraph I have read, you refer to the annual provision of £70,000? Yes; that is correct.

1570. Well, the annual provision, according to these accounts, under the new regime, even leaving out 1895–6, does not appear to have been £70,000. What I want to get at is this: ought it not to have been £70,000; and, if not, why not? Well, I could not explain that. I say that the figures are still wrong as a reserve for special appropriation.

1571. For 1895–6, there should have been £70,000; for 1896–7, there should have been £70,000; and for 1897–8, there should have been £70,000, instead of the figures which are quoted. Does it not boil itself down to this—that the Treasury has failed to make provision for the difference between £70,000, and the figures that are given in these accounts? That is to say, they did not include the full annual provision of £70,000 in their estimates laid before Parliament.

1572. And they made up the balance of their Consolidated Revenue without charging it with that amount? That is, at reduced rates. I might as well mention that in my report for 1893 you will find there is a long correspondence about the mode of dealing with that £1,000,000 loan. It is in Appendix D. That shows how the account stood at the end of 1892. They have repeatedly talked of writing off, and I have said that it was distinctly illegal to write it off under any circumstances. The correspondence begins on page 185 and goes on to page 190, and it is very much to the point on the subject of the appropriation.

1573–4. They never altered the Act, did they? No; it was never altered. The £70,000 is, I apprehend, made up in this way: £50,000 was payable on the £1,000,000 loan at 5 per cent.; then there was the £20,000 drawings at the end of each year; they provided £70,000; but it was palpable that, after £20,000 a year had been drawn off, interest was not required to the amount of £50,000. It was wholly a speculative Act—that is, that whatever they saved upon the interest in that way should be applied to further reduce the debt by purchase in the market. The charge for interest and the reduction were to have been £70,000 a year, without diminution at all, until maturity.

1575. Of course, from a business point of view, the stupid part about the Act, if I can call it so, was in actually specifying that they must buy the bonds? I do not know that it says they *must* do so; it says, “To be applied towards the purchase.” I argued that with the Treasury officers. I said, “You do

E. A. Rennie, Esq. not need to buy. If you cannot buy at par, put the money on one side, and invest it if you like; but there is nothing in the Act to show that you must purchase these debentures at any higher rate than par"; and I think that the whole thing was computed on that understanding. That is what I believe is the case; but, as I show in my report, there is £20,000 that they unnecessarily charged the revenue with by buying at a premium on the London market.

6 June, 1900.

[Witness withdrew.]

Henry Norman MacLaurin, Member of the Legislative Council, &c., &c., submitted replies to the questions as follows:—

Hon. Dr. MacLaurin, M.L.C. 1576. (1.) The amount of revenue properly so-called, exclusive of such receipts as proceeds of Treasury bills and transfers from the General Loan Account, received during the four and a half years from the 1st January, 1895, to the 30th June, 1899? *Answer*: £42,284,257 11s. 4d. This question includes the Special Suspense Accounts. Details:—

Centennial

Hon. Dr.
MacLaurin,
M.L.C.
6 June, 1900.

Centennial Park Account.

Half-year 1895	Nil	(A.-G.'s Report, 1895, p. 117).
Year 1895-6	£25,000 0 0	(" 1896, p. 113).
" 1896-7	Nil.	(" 1897, p. 105).
" 1897-8	Nil.	(" 1898, p. 123).
" 1898-9	4,050 17 11	(Public Accounts, 1899, p. 47).
Total	£29,050 17 11	

Adding these three Accounts together, we get :—

Half-year 1895	£5,057,282 2 10
Year 1895-6	9,877,914 16 2
" 1896-7	9,470,167 6 0
" 1897-8	9,397,600 6 7
" 1898-9	9,800,857 4 8
Total	£43,603,821 16 3

1578. (3.) The difference between the revenue, properly so-called, and the expenditure from the Consolidated Revenue Fund during the same period ?

Revenue (Question No. 1)	£42,284,257 11 4
Expenditure (Question No. 2)	43,603,821 16 3
<i>Answer</i> : Excess of Expenditure	£1,319,564 4 11

1579. (4.) The amount of the expenditure charged to the two Special Suspense Accounts, and the amount of the receipts credited to these accounts during the same period ?

<i>Revenue—</i>	
G.P.O. New Street Account	£1,389 0 0
Centennial Park Account	6 0 0
	£1,395 0 0
<i>Expenditure—</i>	
G.P.O. New Street Account	£133,827 18 3
Centennial Park Account	29,050 17 11
	162,878 16 2
Excess of Expenditure	£161,483 16 2

For details of each year's transactions, see Questions Nos. 1 and 2.

1580. (5.) The difference between the revenue, properly so-called, and the expenditure from the Consolidated Revenue Fund during the same period, exclusive of the two Special Suspense Accounts ?

Excess of Expenditure, inclusive of Suspense Accounts	£1,319,564 4 11 (No. 3.)
Less Excess of Expenditure on Suspense Accounts	161,483 16 2 (No. 4.)
<i>Answer</i> : Excess of Expenditure	£1,158,080 8 9

1581. (6.) The amount of Extraordinary Receipts taken into the Consolidated Revenue Fund during the same period, such as the proceeds of the new issue of Treasury bills and the accrued interest transferred from the General Loan Account ? *Answer* : £1,423,322 5s. Details :—

Premiums and accrued Interest on Loans.

1895 Accrued Interest (p. 13)	£345,699 13 9
1895 Premium (p. 13)	25,116 18 9
1895-6 Interest on Deferred Payments (p. 13)	164 14 11
	£370,931 7 5
1895-6 Accrued Interest	14,989 13 0
1895-6 Premium	7,077 4 6
	22,066 17 6
1896-7 Premium (p. 13)	456 0 0
1897-8 Accrued Interest (p. 13)	5,114 8 6
1897-8 Interest on Overdue Instalment (p. 13)	3 11 7
	5,118 0 1
Total	398,622 5 0

Treasury Bills.

1895-6 Issue (p. 13)	£1,174,700 0 0
1896-7 Cancelled (p. 32)	150,000 0 0
	£1,024,700 0 0
<i>Answer</i> : Total	1,423,322 5 0

Hon. Dr. MacLaurin, M.L.C.
6 June, 1900.

1582. (7.) The amount of that part of the Cash Debit Balance on the Consolidated Revenue Account existing on the 31st December, 1894, which was partly extinguished in the first half-year of 1895 by the excess of receipts over expenditure, resulting from the transfer of accrued interest from the General Loan Account, and partly by the proceeds of the new issue of Treasury Bills? *Answer*: £447,603 8s. 9d., according to the Auditor-General. This is found as follows:—

Cash Debit Balance (A.-G.'s Report for 1894, p. 158)	£982,627	8	11
<i>Less</i> Suspense Accounts:—			
Post Office Street Account (p. 121)	£335,612	17	4
Centennial Park Account (p. 125)	199,411	2	10
	<u>535,024</u>	<u>0</u>	<u>2</u>
Balance—"that part" which was extinguished	£447,603	8	9

According to the Treasury, the balance on the Account Current on the 31st December, 1894, was £464,715 (A.-G.'s Report for 1894, page 3). The difference of £17,111 11s. 3d. was gradually adjusted, the balances of the two Departments being in agreement on 30th June, 1897, 30th June, 1898, and 30th June, 1899.

1583. (8.) The net amount of the extraordinary receipt available for and utilised in meeting expenditure chargeable to the Consolidated Revenue Fund Account during the period of four and a half years referred to, after deducting that portion of the cash overdraft which was extinguished as above?

Extraordinary Receipts (Question No. 6)	£1,423,322	5	0
Deduct Cash Overdraft (Question No. 7)	447,603	8	9
<i>Answer</i>	<u>£975,718</u>	<u>16</u>	<u>3</u>

1584. (9.) The amount of the total deficiency on the Consolidated Revenue Fund Account (Treasury Bills outstanding and cash debit balance) on the 31st December, 1894, inclusive and exclusive of the Special Suspense Accounts? *Answer*: £2,735,511 8s. 11d., inclusive of the Special Suspense Accounts, according to the Auditor-General (Report for 1894, page 158). This sum was made up as follows:—

Cash Overdraft	£982,627	8	11
Treasury Bills	1,752,884	0	0
	<u>£2,735,511</u>	<u>8</u>	<u>11</u>
Deduct Suspense Accounts (<i>see</i> Question No 7)	535,024	0	2
<i>Answer</i> : Exclusive of the Special Suspense Accounts	<u>£2,200,487</u>	<u>8</u>	<u>9</u>

1585. (10.) Whether the amount of accrued interest transferred from the General Loan Account to the Consolidated Revenue Fund Account belonged to the period prior to the end of the year 1894, and whether the proper effect of this transfer was the reduction of the deficiency existing on the 31st December, 1894? Yes.

1586. (11.) If so, to what amount would this transfer of accrued interest properly reduce the deficiency existing on the 31st December, 1894, inclusive and exclusive of the Special Suspense Accounts? Deficiency, 31st December, 1894 (*see* Question No. 9):—

	Inclusive of Suspense Accounts.	Exclusive of Suspense Accounts.
	£2,735,511 8 11	£2,200,487 8 9
<i>Less</i> —Accrued Interest and Premiums on Loans (<i>See</i> Question No. 6)	398,622 5 0	398,622 5 0
<i>Answer</i>	<u>£2,336,889 3 11</u>	<u>£1,801,865 3 9</u>

1587. (12.) Whether the law provides for the reduction of the deficiency on the Consolidated Revenue Fund Account by the annual redemption of Treasury Bills to the amount of £150,000? And, by operation of the statute, what should have been the amount of the 1894 deficiency on the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts?

Yes; see section 6 of the Treasury Bills Deficiency Act of 1889 (53 Vic. No. 9):—"On the 31st day of December, 1890, the sum of £150,000 shall be paid from the Consolidated Revenue Fund to the credit of a Special Trust Fund Account in a Bank doing the Government business, and the like sum shall be paid to the said Special Trust Fund Account annually thereafter, for the purpose of paying off the said Treasury Bills, until such Bills are finally extinguished; and the Colonial Treasurer shall, from time to time, out of such Special Trust Fund pay off and redeem such Treasury Bills to the extent to which there may be moneys to the credit of such Special Trust Fund Account."

As the Treasury Bills are redeemable in the month of December, the amount of the redemption may be taken as £600,000 (4 years at £150,000). This would reduce the 1894 deficiency existing on the 30th June, 1899, as follows:—

	Inclusive of Suspense Accounts (<i>See</i> Question No. 11.)	Inclusive of Suspense Accounts. (<i>See</i> Question No. 11.)
	£2,336,889 3 11	£1,801,865 3 9
<i>Less</i>	600,000 0 0	600,000 0 0
	<u>£1,736,889 3 11</u>	<u>£1,201,865 3 9</u>

The Auditor-General has argued that these Bills were not absolutely redeemed, because the cash overdraft increased while the redemption was made. This view is erroneous. The Bills were absolutely redeemed, and the money was annually replaced to the credit of the Post Office Savings Bank deposits, with which the Bills were taken up. The explanation is, that while the old deficiency was being reduced, a new deficiency was being created. Consequently, the note appended by Mr. Reid to the deficiency of £1,174,700 which he established, and which he covered by Treasury Bills (see page 7 of the Estimates of Ways and Means for 1895-6), to the effect that this amount included a sum of £750,000 paid in reduction of the deficiency of 1896 and previous years, and also a sum of £300,000 in reduction of the Public Debt for railways, was misleading.

Hon. Dr.
MacLaurin,
M.L.C.
6 June, 1900.

1588. (13.) The actual amount of the deficiency on the Consolidated Revenue Fund Account existing on 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts? The Auditor-General's Report for 1899 is not yet published, but I am aware that his balance on the 30th June, 1899, agrees with that of the Treasury. The answer to the question is:—

£2,757,529 7s. 7d., inclusive of Suspense Accounts.
£2,061,060 14s. 4d., exclusive of Suspense Accounts.

These amounts are arrived at as follows:—

Treasury Account Current	Cr. £116,523	5	8	P.A., 1899, page 3.	
Post Office Street Account	...	Dr. £468,051	15	7	page 3.	
Centennial Park Account	...	Dr. £228,416	17	8	Dr. £696,468	13	3	page 3.

Cash Debit Balance on Consolidated Revenue Fund Account, exclusive of London Payments in May and June...	Dr. £579,945	7	7
Add Outstanding Treasury Bills on 30th June, 1898 (Auditor- General's Report for 1898, page 154)	£2,327,584	0	0	
Less Redeemed in 1898-9 (Public Accounts for 1899, page 30)	150,000	0	0	
		Dr. 2,177,584	0	0
Total, 30th June, 1899, inclusive of Suspense Accounts		2,757,529	7	7
Deduct Suspense Accounts		696,468	13	3
Total, exclusive of Suspense Accounts		£2,061,060	14	4

1589. (14.) The increase in the deficiency thus created, or the reduction effected, during the period of four and a half years from the 1st January, 1895, to the 30th June, 1899, inclusive and exclusive of the Special Suspense Accounts, after providing for the reduction of the 1894 deficiency by the operation of the Statute, and by the transfer of accrued interest?

Inclusive of Suspense Accounts—

Actual Deficiency, 30th June, 1899 (Question No. 13)	£2,757,529	7	7
Balance of 1894 Deficiency at 30th June, 1899 (Question No. 12)	1,736,889	3	11
Increase in Deficiency	£1,020,640	3	8

Exclusive of Suspense Accounts—

Actual Deficiency, 30th June, 1899 (Question No. 13)	£2,061,060	14	4
Balance of 1894 Deficiency at 30th June, 1899 (Question No. 12)	1,201,865	3	9
Increase in Deficiency	£ 859,195	10	7

1590. (15.) Whether the net proceeds of the new issue of Treasury Bills, £1,024,700, were not, in effect, used in meeting a deficiency in revenue as compared with the expenditure during the period of four and a half years referred to, exclusive of the Special Suspense Accounts, leaving a credit balance on the "Account Current" existing on the 30th June, 1899? According to Question No. 5, the excess of expenditure over revenue was £1,153,080 8s. 9d., exclusive of Special Suspense Accounts, and according to Question No. 3, £1,319,564 4s. 11d., inclusive of Special Suspense Accounts. But according to the answer to Question No. 14, the deficiency according to the balances was only £859,195 10s. 7d., exclusive of the Suspense Accounts, and £1,020,640 3s. 8d., inclusive of the Suspense Accounts. That shows that the excess of expenditure has been reduced by taking into account the advances recovered to the amount of £298,884 18s. 2d., exclusive of the Suspense Accounts, and £298,924 1s. 3d., inclusive of the Special Suspense Accounts. These amounts are made up as follows:—

Account Current.

	Recoveries on account of 1894 and previous years.		Recoveries on account of 1895 and subsequent years.		Advances made from January, 1895, to June, 1899.	
	Cr.	£ s. d.	Cr.	£ s. d.	Dr.	£ s. d.
1895	(p. 13)	345,391 4 7	(p. 13)	9,758 19 8	(p. 37)	36,801 7 6
1895-6	(p. 13)	82,576 9 3	(p. 13)	53,043 5 10	(p. 41)	74,059 9 10
1896-7	(p. 13)	7,211 5 9	(p. 13)	175,483 1 6	(p. 32)	211,637 0 10
1897-8	(p. 13)	324 4 3	(p. 13)	264,787 7 10	(p. 28)	342,015 5 4
1898-9	(p. 13)	Nil.	(p. 13)	211,006 0 2	(p. 33)	174,072 5 11
		£435,503 3 10		£719,078 15 0		£838,585 9 5
		Add Centennial Park Account.				
1895-6	(p. 112)	39 3 1	
		£435,503 3 10		£719,117 18 1		£838,585 9 5

Hon. Dr.
MacLaurin,
M.L.C.
6 June, 1900.

This gives a net sum of recoveries to the amount of £316,035 12s. 6d., inclusive of the Special Suspense Accounts, and £315,996 9s. 5d., exclusive of the Suspense Accounts. From these amounts require to be deducted the adjustment of £17,111 11s. 3d., referred to under Question No. 7. The adjustment was made as follows:—

31st December, 1894	£17,111 11 3
30th June, 1895	17,259 19 2
30th „ 1896	1,359 7 9
30th „ 1897	Nil.

These recoveries give Mr. Reid an advantage of nearly £300,000 net. Deducting the amounts from the deficiency in revenue (Questions Nos. 3 and 5), we find:—

	Inclusive of Suspense Accounts. (No. 3.)	Exclusive of Suspense Accounts. (No. 5.)
Deficiency in Revenue	£1,319,564 4 11	£1,158,080 8 9
Less Net Recoveries, adjusted	298,924 1 3	298,884 18 2
Deficiency on Cash Basis	1,020,640 3 8	859,195 10 7

These amounts agree with the answers to Question No. 14. Taking the net extraordinary receipts available for expenditure, £975,718 16s. 3d. (Question No. 8), and deducting the Cash Deficiency of £859,195 10s. 7d., exclusive of Suspense Accounts, we are left with a credit balance of £116,523 5s. 8d. on 30th June, 1899, as per Treasury Accounts.

1591. (16.) Whether, in changing the system of accounts, it was provided that certain expenditure should be met from the current Consolidated Revenue, and that the unexpended votes of previous years should be spent, and the payments met from the proceeds of the issue of Treasury Bills referred to? Yes. The cash debit balance on the account current at the 30th June, 1895, when the change of system was made, was, according to Auditor-General, £149,240 2s. 11d. Mr. Reid obtained permission to issue Treasury Bills to the net amount of £1,024,700 to meet this small balance, plus payments after the change was made (see Audit Act Amendment Act of 1895 and Treasury Bills Deficiency Act of 1895).

1592. (17.) Whether, if the Unexpended Votes were so used, a more equitable plan would not have been to have allowed them to lapse in changing the system of keeping the Public Accounts, seeing that it was provided that thereafter all unexpended votes should so lapse? The point at issue is this: If the £1,024,700 Treasury Bills really represented payments by Mr. Reid in excess of a full expenditure during the four and a half years chargeable to revenue, then Mr. Reid is right; if otherwise, then Mr. Lyne is right. It has been said that the Bills covered "liabilities" outstanding on the 30th June, 1895. Even if they did, it is a question for the Committee to decide whether it was right, in changing the system, to relieve the first year of the new system of these charges. An examination of the accounts for 1895-6 shows that it was not right to do so. But, in my opinion, they were not liabilities at all—they were merely unexpended votes, which, under the old system would have ultimately become a charge upon the year 1894 and previous years, but under the new system should certainly have lapsed, because they were as much under the control of Mr. Reid as his own votes. Take the expenditure on roads as an illustration. In the year 1895-6 Mr. Reid spent £719,990, which really represented an average year's expenditure up to that time. But only £387,207 was charged to revenue, the balance of £332,783 being charged to Treasury Bills—equal to one-third of the net proceeds. Now, road maintenance may be said to be carried on from day to day, and this money was spent after the change in system, and could not possibly represent liabilities existing on the 30th June, 1895. As a matter of fact, Mr. Reid's estimates for the year 1895-6 showed proposed expenditure on roads £650,000, less "unexpended votes" £200,000, leaving a balance of £450,000 chargeable to revenue. Here it will be evident that Mr. Reid's estimates for the new system were framed with an eye to the relief to the revenue which was afforded by the Treasury Bills. So that the difficulty cannot be overcome by setting the unexpended votes on 30th June, 1895, against the unexpended votes on 30th June, 1896, because the estimates were not framed to cover a year's normal expenditure, but only an artificially diminished year's expenditure. It has been contended that the course pursued was right, because it was the course which was taken by Mr. McMillan in regard to the previous deficiency. This argument really shows that the course pursued was absolutely wrong, for the cases are not parallel. In 1889 Mr. McMillan covered the deficiency of 1886 and previous years, including the payments made on account of those years subsequent to the 31st December, 1886, as was done by Mr. Reid. But—and here lies the very great difference—in the first case, the year 1887 having been relieved of the payments on account of 1886, was in turn burdened by those made in 1888, and so on; while, in the second case, Mr. Reid changed the system, and, having relieved the year 1895-6, prevented it from being burdened by payments in 1896-7.

1593. (18.) Whether the course pursued did not have the effect of reducing the expenditure chargeable to the first year of the new system below the ordinary expenditure of the Colony, and so yielding a credit balance on the new account on the 30th June, 1896? Yes.

Expenditure charged to 1893	£9,816,876 6 8
„ „ 1894	9,694,889 18 0
Total	£19,511,766 4 8
Average	£9,755,888 2 4
Expenditure charged to 1895-6	£8,899,411 8 7

1594. The amount of the credit balance on the 30th June, 1896, and the amount to which it had been reduced by the 30th June, 1899—

30th June, 1896, Credit Balance	£476,530	1	10
Less Treasury Bills afterwards cancelled	150,000	0	0
					£326,530	1	10
30th June, 1899	116,523	5	8

See Public
Accounts.

Hon. Dr.
MacLaurin,
M.L.C.
6 June, 1900.

Both of these amounts include the unexpended proceeds of Treasury Bills.

1595. (20.) The amount by which the expenditure charged to the year 1895-6 was less than the average expenditure of immediately preceding years, and the causes of this reduction in the expenditure. The amount charged to the proceeds of Treasury Bills in 1895-6—

Average expenditure charged to 1893 and 1894 (<i>see</i> Question No. 18)	£9,755,888	2	4
Charged to 1895-6	8,899,411	8	7
<i>Reduction</i>	£ 856,476	13	9
Amount charged to Treasury Bills in 1895-6	952,807	8	11

These two amounts are practically identical. The cause of the reduction was simply the change in system, as it was changed, which permitted part of a year's normal expenditure to be defrayed from Treasury Bills. That the first year of the new system was relieved is now admitted on all sides.

1595. (21.) Whether a sum of £216,000 was not saved from the vote in 1893 on account of Roads Endowment to Boroughs, District Councils, and Shires under the proposed Local Government Bill, and this sum called back into existence and spent partly in 1894 and the first half-year of 1895, but the larger part in the year 1895-6, on the plea that the savings had been improperly made? And whether an examination of the annual expenditure on roads does not show that the action referred to enabled a large reduction to be effected in the amount charged to the year 1895-6 as compared with previous years? To both these questions the answer is "Yes." The amount was afterwards spent as follows:—

1894	£25,621	12	2	(Public Accounts, 1894, p. 26)
1895	43,641	0	2	(do 1895, p. 18)
1895-6	153,513	14	6	(do 1896, p. 17)
				£222,778	6	10	

Part of the sum of £25,621 12s. 2d. was, in all probability, spent before Mr. Reid came into office. Total amount expended from revenue on roads during five years 1890-94, £3,483,437; average per annum, £696,687. Total amount charged to these five years, £3,579,868; average, £715,973. Total amount spent in 1895-6, £719,990, distributed as follows:—

Charged to Treasury Bills:—

1893	£153,513	14	6
1894	76,590	10	2
1895	102,678	15	5
					£332,783	0	1
Charged to Revenue	387,207	0	8
					£719,990	0	9

These figures show that Mr. Reid simply used the unexpended balances of appropriations to reduce his own expenditure.

1597. (22.) Whether during the first half-year of 1895 the amount of accrued interest previously referred to was transferred from the General Loan Account, reducing the cash debit balance on the 31st December, 1894 (exclusive of Suspense Accounts)? The debit balance on 30th June, 1895, which was extinguished by the proceeds of Treasury bills? And of these proceeds, expended after the change in the system of keeping the public accounts was made, what sum was utilised in meeting claims on account of 1894 and previous years, and what sum in meeting those of the first half-year of 1895? Yes. According to the Auditor-General, the cash debit balance on the Consolidated Revenue Fund Account, exclusive of the Special Suspense Accounts, was £447,603 8s. 9d. on the 31st December, 1894. In consequence of the transfers from the General Loan Account, this balance had been reduced to £149,240 2s. 11d. (according to the Auditor-General) on the 30th June, 1895, when the change of system was made, and it was to meet this balance, plus the unexpended votes, that the Bills were issued. According to the attached Treasury statement, the payments from Treasury Bills after the 30th June, 1895, amounted to £971,189, of which £318,540 was paid on account of 1894 and previous years, and £652,649 on account of the half-year of 1895. Bringing to account the receipts, the net payments become £852,708, of which £226,435 was disbursed on account of 1894 and previous years, and £626,273 on account of the half-year of 1895. The following is the Treasury statement referred to, with the transactions divided into two—before the change of system, and after the change of system. It is necessary to remember that this statement shows

Hon. Dr. MacLaurin, M.L.C.
6 June, 1900.

a total expenditure of £1,019,158 from the proceeds of Bills, while the Auditor-General holds that the legal expenditure from the Bills was about £30,000 less than this sum, the difference representing proper charges to the new account:—

1598. (23.) Whether the Consolidated Revenue Fund Account Current under the new system was relieved in the year 1895-6 by only charging it with one half-year's redemption of Treasury Bills in aid of Revenue, and of Railway Debentures? Yes.

Payments from Revenue in 1895-6.

Redemption of Bills	£75,000	(Public Accounts, 1896, p. 41)
Reduction of Railway Debt	37,500	(do 1896, p. 41)

Payments from Proceeds of Bills in 1895-6.

Redemption of Bills	£75,000	(Public Accounts, 1896, p. 28)
Reduction of Railway Debt	37,500	(do 1896, p. 28)

These payments afford a good illustration of what took place when the change of system was made. There are others of the same kind. For instance, the interest on the old Treasury Bills (issued under Act 53 Vic. No. 9), to the amount of £56,471 10s. 4d., was also divided between Revenue and Bills, £28,235 15s. 2d. (Public Accounts for 1895-6, p. 39) being charged to Revenue, and £28,235 15s. 2d. (page 28) to proceeds of Bills.

1599. (24.) Whether the act of applying £150,000 from the Sinking Fund established under Act 53 Vic. No. 24, towards meeting Railway Debentures matured under Act 31 Vic. No. 11, will not have the effect of compelling the Consolidated Revenue Fund at a latter period to provide the amount relieved in the year 1897-8? Yes. Under the Railway Loan Act of 1867 (31 Vic. No. 11) a sum of one million pounds was borrowed for the completion of certain railway lines, the debentures bearing interest at the rate of 5 per cent., and having a currency of thirty years. It was provided that for the first four years the sum of £50,000 should be appropriated for the payment of interest, and afterwards the sum of £70,000 annually towards (1.) payment of interest; (2.) reduction and final extinction of loan by payment of £20,000 as a sinking fund of 2 per cent. by annual drawings; (3.) purchase of debentures. Afterwards, the Act 53 Vic. No. 23 (1889) authorised the issue of a loan for a large amount, including £1,000,000 for the reconstruction and improvement of railway rolling-stock and permanent way, and in order to recoup this amount from revenue a short Act, 53 Vic. No. 24, was passed at the same time, providing for the appropriation annually of a further sum of £75,000, to be placed to a sinking fund to be used for the extinction of a million pounds of the public debt of the railways, the money to be applied from time to time in redemption of debentures as they might become due. For the first eight years after the loan of 1867 was issued, the full appropriation was used as provided by the Act; but from 1876 down to 1890 small balances, ranging from £267 to £5,135, were unused, and, of course, the revenue account got the advantage of these (Auditor-General's Report for 1897, page 170). In 1891 the payments became much less, dropping to £55,675; and during Mr. Reid's tenure of office only £15,670, instead of £70,000, was paid in 1895-6, and £38,235, instead of £70,000, in 1896-7, his "New Account Current" benefiting to

to the extent of £90,095 in those two years. Consequently, when the outstanding debentures matured at the 1st January, 1898, it was found that instead of the annual appropriation of £70,000 being sufficient to meet all the liabilities, the total presented for payment amounted to £206,700, of which £204,300 was paid in 1897-8, and £2,400 carried forward to 1898-9. But the sum of £204,300 was not provided out of current revenue, as should have been the case, the revenue having benefited to a very large extent by the short payments; instead, Mr. Reid took £150,000 standing at the credit of the Railway Loan Redemption Fund, established under Acts 53 Vic. Nos. 23 and 24, and charged only the balance of £54,300 to the Consolidated Revenue Fund Account—£15,700 less than the ordinary annual appropriation of £70,000. And, as the Auditor-General says, this amount of £150,000 (Report for 1898) must be paid back to the Trust Funds from the Consolidated Revenue Fund in order to extinguish the second million, the redemption of which was provided for under the 1889 Act. The Auditor-General has, I understand, already asked the present Treasurer to replace this sum.

Hon. Dr.
MacLaurin,
M.L.C.
6 June, 1900.

1600. (25.) The amount by which the Consolidated Revenue Fund has been relieved by charging to the proceeds of short-dated Loans, and in other ways, expenditure ordinarily provided from revenue? Whether the system of repayments established in connection with these loans is not one that tends simply to relieve the first few years during which it is in operation at the expense of future years, and whether it should not be discontinued? The payments from these Loans are as follows:—

1895	£16,310
1895-6	166,475
1896-7	143,755
1897-8	144,056
1898-9	185,078
Total	£655,674

These figures have been obtained from a Treasury Statement. It is possible that a small portion of the expenditure might, under other circumstances, have been charged to permanent debt. The relief to revenue might, therefore, be set down at £600,000. It is apparent that so long as the expenditure from such loans continues, so long will the annual payments to Sinking Funds increase, until at the end of thirty years these payments to Sinking Funds will equal the former expenditure from revenue on the services for which the loans were raised, and there will be a large debt outstanding. It is, therefore, only the present generation which is relieved.

1601. (26.) Whether a deficiency on the Consolidated Revenue Fund Account was not created during the period of four and a half years, from the 1st January, 1895, to the 30th June, 1899; and, if so, the amount of the deficiency:—

- Inclusive of Special Suspense Accounts.
- Exclusive of Special Suspense Accounts.
- As increased by amount taken from Sinking Fund to meet Debentures falling upon Revenue.
- As further increased by expenditure ordinarily defrayed from Consolidated Revenue, and provided from short-dated Loans, and in other ways?

Yes:—

(a)	£1,020,640	3	8	(Question No. 15).
(b)	£ 859,195	10	7	(Question No. 15).
(c)	£1,170,640	3	8	Inclusive of Suspense Accounts.
	£1,009,195	10	7	Exclusive of Suspense Accounts.
(d)	£1,770,640	3	8	Inclusive of Suspense Accounts.
	£1,609,195	10	7	Exclusive of Suspense Accounts.

1602. (27.) The amount of the credit balance on the Consolidated Revenue Fund "Account Current" on the 30th June, 1896; 30th June, 1897; 30th June, 1898; and 30th June, 1899? For these amounts, see Statement of Balances at beginning of Public Accounts:—

30th June, 1896—	£476,530	1	10	less £150,000 bills redeemed,	£326,530	1s.	10d.
30th ,, 1897—	114,444	16	6				
30th ,, 1898—	122,211	1	10				
30th ,, 1899—	116,523	5	8				

1603. (28.) Whether these balances represented cash in the Bank, and if so, which of them? None of them represented cash in the Bank.

1604. (29.) The actual condition of the Consolidated Revenue Fund Account on the dates specified above, as disclosed by the Bank Balances? The General Trust Funds and the Consolidated Revenue Fund Account are kept in one banking account, known as the Public Account, but the division of the balances may, of course, easily be made by reference to the two accounts. The following are the balances on the Consolidated Revenue Fund Account, obtained in this way:

30th June, 1896	Dr. £428,370	14	3
30th ,, 1897	Dr. 828,503	0	5
30th ,, 1898	Dr. 777,702	12	4
30th ,, 1899	Dr. 793,144	4	6

These are the amounts after bringing to account the London payments in May and June, and after including the Suspense Accounts, which are part of the Consolidated Revenue Fund Account.

Hon. Dr.
MacLaurin,
M.L.C.
6 June, 1900.

1605. (30.) In the event of a discrepancy between the Ledger Balances and the Bank Balances, to what was this due; and whether the system under which such differences are possible may be correctly described as a "cash-basis" system? Due to the existence of the Special Suspense Accounts, and the exclusion of the payments in London in May and June from the transactions of the current year. The system cannot be a "cash-basis" system when there is no cash as a basis.

1606. (31.) Whether it is correct to hand over large interest payments to the Bank of England in the month of June, and bring them to account on the 1st July following? Whether the Commissioners would recommend the London payments in May and June to be included within the financial year during which they are actually made; and whether the Special Suspense Accounts should be closed up? I should say that it is right to regard such payments as absolute when the money is handed over to the Bank of England, and I think the Special Suspense Accounts should be closed up.

1607. (32.) Whether the present system of keeping the Public Accounts is a good one, and whether the Commissioners can suggest any improvements in the methods of keeping the accounts, or in their presentation, so that these may be more easily comprehended by the public? For the Commissioners.

1608. (33.) Whether the sum of £1,500,000 was transferred from Trust Funds to the General Loan Account as alleged by the Auditor-General? Yes. The transfer was made in three sums of £500,000 each. The Executive authority in each case states that the transfer was from the Consolidated Revenue Fund Account; but that is absurd, as there was no cash at the credit of this account when the transfers were made. The Executive authority also stated that the transfer was made "pending realisation of loans," but the money was never repaid to Trust Fund. And the amount was not covered by securities, in my opinion, because the money really coming from Special Deposits of the Saving Banks of New South Wales, which are placed with the Government practically at call, it could not be so covered. Mr. Reid might have issued a loan, but apparently he did not wish to go to the market at an inopportune time.

1609. (34.) Whether the present system of dealing with Trust Funds and of utilising the balances as working balances in connection with the Consolidated Revenue Fund Account and the General Loan Account should be altered; if so, what changes would the Commissioners recommend? This is a question for the Commissioners, but I think it would be wise to place the Trust Funds under the administration of an independent body of Trustees, who might make advances to the Government.

1610. (35.) Whether from the 1st October, 1897, to the 23rd September, 1899, payments to the amount of £1,278,940 were made from revenue without the authority of Parliament, and without the Auditor-General's certificate? Whether, in connection with these payments an Expenditure Suspense Account was opened; the effect of that Account? Yes, and the present Treasurer passed an Indemnity Act covering these payments. The Estimates had been pared down to such an extent that the appropriations became exhausted, as well as the Treasurer's Advance Account, and there was no course open but to pay the pressing claims coming forward and charge them to a Suspense Account.

1611. (36.) The amount borrowed from the Savings Bank of New South Wales, Barrack-street, Sydney, to the 30th June, 1899, and to date?

30th June, 1899	£2,415,000
At date	2,640,000

1612. (37.) The conditions under which these deposits were placed with the Treasury? Practically at call.

1613. (38.) Whether any of these advances have been covered by securities? No.

1614. (39.) The purpose for which this money was obtained from the Trustees of the Savings Bank of New South Wales? I should say, to replenish the Public Account.

1615. (40.) Whether from the month of November, 1896, to the close of the year, 1899, payments to the amount of several million pounds sterling were made from Loan Funds without the Certificate of the Auditor-General, and whether such payments were therefore illegal? Yes; an Indemnity Act was passed by the present Treasurer. The Auditor-General, having given his certificate for payments exceeding the amount of loan funds in hand, refused to sign further warrants, holding that in terms of the Audit Act he was bound to see that there was a cash basis existing for any instruments furnished by him. Mr. Attorney-General Want held that he was wrong; but the Auditor-General's view was upheld by Sir Julian Salomons and Dr. Sly. The law has now been altered. Mr. Reid had the authority of Parliament to issue further loans, which would have given him the money required, but apparently he did not wish to go to the market for money at an inopportune time.

1616. (41.) The Balance of the various Accounts when the present Government assumed office? After bringing to account all payments, on the 14th September, 1899, the balances were as follow:—

Consolidated Revenue Fund Account Dr. £1,053,935 11s.

According to the independent Auditors' statement, there was a debit balance of £156,244 2s. 3d. on the General Loan Account, but to that sum must be added £1,500,000 taken from General Trust Funds, and £50,000 borrowed from the Curator of Intestate Estates.

Witness also forwarded copy of Paper on Public Accounts, compiled in October, 1899. [*Marked appendix G 4.*]

THIRTY-EIGHTH DAY, TUESDAY, 3 JULY, 1900.

Present:—

T. A. DIBBS, Esq. (CHAIRMAN).

J. RUSSELL FRENCH, Esq. |

F. N. YARWOOD, Esq.

John Vernon, Esq., Accountant, the Treasury, re-called, and further examined:—

J. Vernon,
Esq.

3 July, 1900.

1617. *Mr. Yarwood.*] We are asked in this inquiry to make any suggestions we can with regard to the presentation of accounts as far as the public is concerned;—that will not entail any Act of Parliament or anything of that sort, will it;—you can publish what accounts you like? I do not think that the form of the account has been laid down in a statutory way at all. I think we may put our accounts in what way we like; but we must present them.

1618. In our interim report we attached accounts, as you probably saw;—have you seen those? I have seen them, but I have not had time to examine them closely. They were separate accounts for each year, I think.

1619. Yes; I think that is the scheme we are going to suggest; I think that the Committee will suggest that each year's accounts should be shown separately, and that any balance there may be should be transferred to another account? Yes.

1620. In the *Gazette* published accounts of yours, you only detail the full expenditure for the year, do you? Yes. Those are the gross figures, as I think was explained before to the Committee. They will be slightly altered by being made net. The receipts will be put against the expenditure; that is, in making up an account like the one attached to the interim report the expenditure under the several Departments would not appear exactly the same as in that account before you.

1621. That is, owing to that further appropriation which you have to get? Owing to repayments being taken off also.

1622. We had one paper in which we put the amounts paid under appropriations in one column, and in another column the amounts not paid under appropriations, such as amounts paid out of the Treasurer's advance, so as to get the total of each Department, and also to get at the foot of that total what further appropriations were to be sanctioned by Parliament;—you could do that, could you not? Yes, quite easily.

1623. And you notice in that paper that we have put the redemption of debts as a separate item at the bottom? Yes, I noticed that.

1624. It seems to me hardly fair to say that the expenditure of the Colony is, for instance, £10,143,000, when that expenditure includes £150,000 for the reduction of the Loan deficiency and various other items? Quite so.

1625. It is no use making things appear worse than they are? No.

1626. Well, can you give me the receipts as well, so that I can draft an account on the lines we suggest? How do you mean?

1627. For last year? I could not give you that.

1628. But you will be able in a day or two? I will be able shortly.

1629. We do not want to suggest an account which you cannot work in any way? I am quite sure of that, but I do not see any difficulty whatever in working the accounts on the plan given in your interim report. That is, of course, provided that you have another account in which you carry on your results.

1630. Well, do you see any objection to that? None whatever. In fact, I should rather prefer it.

1631. Do you see any objection to calling it a deficiency account;—it is not a nice name, is it? Well, it is not a pleasant name; and besides—I suppose you will tell me it is rather a remote idea—suppose you had not a deficiency account. Suppose you had a surplus instead. It has happened before, you know.

1632. Well, what name would you suggest? I have been thinking that over. You want a name that will apply equally to both. I think some more descriptive name could be obtained for it. I cannot think of such a name just at the moment, but it seems to be really a continuous account. The account would be the summarised continuous account of results.

1633. *Mr. French.*] The results of a series of years' operations? Yes.

1634. I suppose you do not want to have a deficiency account and a surplus account? No. You want a continuous account showing the aggregate results of the transactions for whatever series of years you wish from the time you commence.

1635.

J. Vernon,
Esq.
3 July, 1900.

1635. In that case you will have to make a deficiency account and a surplus account? Why mention either?
1636. Is your idea that it shall be a continuous and never-terminating balance? Oh, no; I would not have that. You start, say this year, with a deficiency account. Well, by a series of good years you at last arrive at a period when at the end of the year you have an actual surplus over all your deficiencies. You must show that in your account before you deal with it, and it was only to provide for that that I was thinking of a name. Surely some name can be got, because the account itself will show a deficiency or a surplus quite plainly.
1637. *Mr. Yarwood.*] Whatever the balance is? Whatever the balance is.
1638. In working the accounts you have at the end of the time so much cash independent of so much to be recovered; you have what you call a cash balance? Yes.
1639. And then there is a recoveries balance; for instance, in 1889 the cash balance was, I think, £116,000, and the recoveries balance—which you describe as a real asset—was about £30,000, making about £147,000 in all; well, I think the Committee is going to suggest that, whatever the balance is, the accounts should be wiped off every year; how can you deal with it so as to do away with the recoveries balance; you see that there will be so much money spent under Parliamentary appropriation, and so much for which Parliamentary appropriation has to be obtained;—and that is the total expenditure of the country? Independent of that there are other expenditures. Those are what we term advances to be recovered, such as payments made for other Governments, and there are other things I cannot mention at present.
1640. *Chairman.*] That will be easily got over by debiting the Consolidated Revenue with the amount? You can get over it by leaving it out.
1641. What about passing an entry to the credit of Suspense Account? “Suspense Account” is an awkward name just now.
1642. *Mr. Yarwood.*] Suppose you left it out and made a transfer? If you left it out you would take your actual cash balance.
1643. And each year would show its own clean receipts and its own clean expenditure, would it not? To a certain extent; but to show it in a business system, it seems to me absolutely necessary that you should take in as an asset any amounts which you have paid, and which may be recovered the day after. If you do that, then you bring in your advances to be recovered.
1644. Which you must do, really? Which you must do.
1645. *Chairman.*] Could you call it an adjusting account;—you credit the Consolidated Revenue with these recoveries that take place? I think that suggestion might be applied to what Mr. Yarwood has termed a deficiency account. However that could be easily arranged for, I have no doubt. It could be shown separately. Indeed we have always shown it separately.
1646. *Mr. Yarwood.*] But I do not want to do anything which would entail a credit appearing in the next accounts. I want as far as I can, to leave the income clear for the next year. According to the way in which you show it now, as far as the public are concerned, you take your ordinary receipts, and then you take the accounts that apply to previous years which have been returned? Then I am afraid you cannot do that without infringing the Audit Act.
1647. What I want to get at is this, not necessarily to absolutely agree with the Audit Act, but to issue a public statement from the Treasury. I quite agree that if you take the books and accounts and follow them right through, you can trace where a thing goes out, and where it comes back again, and that is very convenient; but could that not be treated as a subsidiary statement, or, if you like, treat the published statement as a subsidiary statement;—what we are asked to do is to make a suggestion for the presentation of the accounts to the public? I really think in that case it would be better to adhere to the cash system, and let your recovery come in the next year as cash, not to reckon your advances to be recovered as a credit at all.
1648. *Chairman.*] Simply to make a note at the foot of your account with an asterisk that there is so much to be recovered in the next year? Yes.
1649. *Mr. Yarwood.*] Then you would not include it in your income? Simply make a note at the bottom somewhat to the following effect:—“In addition to the above there is so much to be recovered from advances made for other Governments,” or whatever it might be.
1650. For instance, supposing you wipe off 1899 and start 1900, you will have so much revenue and so much expenditure, will you not? Yes.
1651. And if the expenditure does not equal the revenue, you will have a balance of revenue; that balance we will describe as a surplus, and that will include the cash you are supposed to have and the amount to be recovered? No; it would not include the amount to be recovered, because we would not have received that. Do you mean a small subsidiary statement at the bottom throwing out both?
1652. Yes, showing that the income was so much, the expenditure was so much, and that the surplus is so much; and then that that surplus is made up of a cash balance and amounts to be recovered, so much. Will you look at this paper which I have made up from your statements. There are certain items with red stars against them;—those are the cross entries? Some of these are not cross entries. The item “Scab in Sheep” is not. At the beginning of each year a certain levy is supposed to be made on the stock-owners for the prevention of scab in sheep. The term has now come to be “Prevention of general diseases in sheep.” Well, the expenditure and the maintenance of the necessary staff of inspectors have to be going on all the time, and the Government has to pay them trusting to the recovery from the levy which is made upon the squatters. That is very much behindhand often. Sometimes they do not strike a rate. The last two years they have been striking a rate which is really below what ought to cover the expenditure.
1653. Who strikes the rate;—is it the squatters? I think the Pastoral Board strikes the rate, but I am not sure whether it is not the Stock Branch that strikes the rate—that is, the Minister for Mines and Agriculture. I do not suppose that we shall ever be able to recover the whole of this amount, but it is not settled at present. Directly it is settled we will simply write off what we cannot recover.
1654. As ordinary expenditure? As ordinary expenditure.
1655. Take the item “State Children’s Relief.” That does not come under the ordinary expenditure, does it? To a certain extent. Under the Act there is an appropriation—that is to say, we are authorised to appropriate the amount required in excess of the ordinary Parliamentary appropriation; so if the vote applicable to State children runs out before the completion of the year we have still to pay on and keep the thing going; but, under the Act, the sum so used has to be voted the succeeding year. 1656.

- J. Vernon, Esq.
3 July, 1900.
1656. Is that the best way to work it? It is the only way to work it, unless you can induce Parliament to take a sufficiently large vote to prevent our having recourse to the statutory provision.
1657. I suppose there is something peculiar about the working of it? It is about the only example we have of the kind, because, generally, statutory appropriations are fixed. This is unfixed. "Revenue refunded" is another; but still that is not the same, because we have to obtain a vote of Parliament for the amount paid.
1658. On the other question, if you will let me have the income I will set it out in a business way, as I would suggest its being done, and then I will let you have it, and you can think the matter over, and raise any objections that may occur to you. We want all the objections that can be brought against it, because it is no use to make a recommendation which afterwards you may find unworkable for some reason or other? I do not see any difficulty whatever, so far.
1659. Now that I have come to understand them, I can see that in the statements that are published you give a lot of very valuable information, but, as regards this redemption business, any ordinary man looking at it might say that the Colony was only so much over;—that would be unfair to the Colony? It would.
1660. To include ordinary payments and old debts in your ordinary expenditure might be necessary, from a statutory point of view; but from a business point of view we do not do that sort of thing? Certainly not; but there would be great difficulty in giving a Profit and Loss Account on our lines.
1661. I know that, but I do not propose a Profit and Loss Account? We can arrange the matter so as to show all those payments which are really due for other years or in redemption of debts. We can show those separately, quite easily.
1662. Then there is another thing that has been raised here: you have revenue and receipts, £212,000; drawbacks and refund duties, £18,379;—the question has arisen whether those could not be deducted from the income as not forming really a part of the expenditure? It would be a far more business-like way of treating them.
1663. Well, can it be done? We could not do it in the monthly statements, but I think it might be done in the annual statements. It would entail a considerable amount of labour, but I think it would be worth while—that is to say, if you want to deduct them you would have to keep them in their separate classes.
1664. But there are only four or five classes? Revenue refunds run right through the whole of the classes of revenue.
1665. Suppose you put all the refunds together that apply to taxation? That would not mean much.
1666. But if you only kept them in those four divisions? I think we should find that followed by a demand for each item.
1667. Suppose you were asked to give it now, what should you do? I should give it as it stands. I would not take any notice of the refunds.
1668. We do not want to give useless work? I quite agree with your point that it ought to be done, and I do not see any difficulty in doing it. It may mean a little more work.
1669. Then I think we will recommend that? It would be worth doing, undoubtedly.
1670. We were over at the Treasury, and they showed us the nature of the London payments. One essential thing that we want to impress upon the Treasury is that it is advisable to render a year's accounts as a year's accounts, and not to allow the figures to be in any way subject to explanation. The reason I say that is because I look upon it as a mistake if fourteen months of London expenses are put into one year's accounts? Undoubtedly it would.
1671. It then becomes a question of, "We had so much surplus or so much deficiency, but ——" Then the "buts" commence. We do not want any "buts." I am quite prepared personally to recommend that, if it is advisable to square the London payments up to date, that the extra two months should be put into Deficiency Account. The point is, can it be done? Do you mean whether it can be brought square up in the time?
1672. Yes? Well, not from a business point of view, unless—and this is the alternative—you allow at least three months for gathering in the information.
1673. Do you mean by that that you wait for your papers from London? Yes.
1674. Could you so mark your papers when they go to London that there would not be any difficulty in locating them to the different classes by cable? You could mark them so as to get them in gross. You would come very near—perhaps within a few hundred pounds. Still you would not be correct.
1675. Then how would you adjust it afterwards if you had the accounts closed; would it not involve cross entries? It would simply come into the next year.
1676. Well, then would it not mix up that annual statement? Bound to.
1677. What is the advantage of bringing in the London payments? I do not know whether I ought to give an opinion, seeing that question has been battled about so much. There would be no advantage from my point of view, as long as twelve month's payments were included in the twelve months. Of course, there may be circumstances where the May and June payments, as the year ends on the 30th June, may be extraordinarily heavy, and so destroy the average; but that is a very remote possibility, and so long as twelve months London payments are included in each financial year, I really do not see that there is anything to grumble about.
1678. Except that it spoils the figures of the actual cash balance, does it not? It may.
1679. That is, the actual cash balance at a certain date? It may; that is, if you test the actual cash balance by the cash which is in London at a certain date. If you set yourself down to ascertain the cash at any certain date you must wait till you have final advices from your most distant point. To do that we should have to probably wait three months before we could publish the statement.
1680. But you in the Treasury like to publish your statements promptly. There would be nothing to prevent a subsequent return being made? It would look bad.
1681. What I mean is this: that the Auditor-General issues a report, and there would be nothing to prevent him from saying what the cash balance was. I saw a cash balance for £1,000,000, and when I asked for an explanation it appeared that the May and June payments had not been made? There is nothing to prevent the Auditor-General doing it, because he is not bound to time.
1682. Suppose you have a dispute with the Auditor-General, and you do not agree, what is done then; what has been done;—do you have any disputes now? Yes, plenty. The matter depends on the Treasurer's decision.
- 1683.

1683. In England, seemingly, they have a committee? They have a committee, to which is delegated the power of deciding what shall be done; and disputes are constantly referred to that committee.

1684. Would a committee be of any advantage here? Undoubtedly it would.

1685. There would be finality then? There would be. As it is, you can scarcely hope for finality, because you have two equal powers disputing.

1686. About the Trust Funds;—you make a suggestion about dividing the Trust Funds into classes? Yes.

1687. It has been suggested to the Committee that the Trust Funds should be put under trustees, on the Victorian principle;—have you studied the Victorian principle at all? I have not. Of course, some of the Acts under which the special trusts work have originally provided for trustees.

1688. Apparently, from what we have been told, the whole of the Trust Funds in Victoria are held by trustees, of whom the Colonial Treasurer is the Chairman;—

1689. *Mr. French.*] We have no information on that point exactly.

1690. *Mr. Yarwood.*] But we have the Victorian Act put in.

1691. *Mr. French.*] Probably what are referred to are the Trust Accounts, which Mr. Vernon very properly recognises as the only Trust Account.

1692. *The Witness.*] Take the Municipal Council of Sydney Sinking Fund: the Government is just acting in the way that the trustees you mention would act with regard to the Government. The Government is acting in regard to the Council as its trustee.

1693. *Mr. Yarwood.*] Is the Government, then, acting on behalf of the bondholders? The Government is really the security of the bondholder.

1694. *Mr. French.*] To that extent only.

1695. *Mr. Yarwood.*] There are some private things, such as the Challis Fund? There is the Sydney University bequest, the Roberts bequest, and the Challis Fund. The Roberts bequest was, I think, taken at the request of the University, so that they might get interest on it.

1696. Where did the advantage to the Government come in? I do not see any.

1697. Where is the advantage to the Government in taking money at call like that? None whatever that I see. The Roberts bequest (£4,000) is invested in inscribed stock.

1698. But is the money repayable at call;—is it an investment by the trust? I do not know the terms on which that was taken. It was taken some years ago.

1699. There is another fund I should like to get a little information about—that is, the Civil Service Superannuation Fund;—has there ever been any estimate made of what will be the end of that? I believe there have been several, but they have not come officially under my notice. There is no doubt that the fund, as it is being expended, will only last three or four years.

1700. *Mr. French.*] Is that fund invested at all specifically? £315,000 is invested now.

1701. Of course, there is really a big liability on the country in connection with that? Yes, and the Service is subscribing still, or rather it is a forced subscription.

1702. *Mr. Yarwood.*] I suppose the Act does not in any way limit it to the Fund itself? No; I think not. The former Superannuation Fund was stopped in 1876, I think. I know that I received my contributions back in common with others, and then this Fund was started in 1884 with £100,000 subscription by the Government.

1703. Have you any idea of the magnitude to which it is actuarially wrong? I have heard various statements—from £2,000,000 to £4,000,000; but I think they are all exaggerated.

1704. Is that a reliable authority? No; I would not give it as a reliable authority. I know it went into millions; but whether that was a reliable actuarial calculation I cannot say.

J. VERNON,
Accountant.

B.

[To Evidence of John Vernon, Esq., Treasury Accountant.]

New South Wales, Anno Quinquagesimo Nono, Victoriae Reginae.

No. XXII.

An Act to authorise the issue of Treasury Bills to cover the Deficiency Debt up to 30th June, 1895; to provide for the redemption of such Bills; to enable Trustees and others to invest therein; to amend the Treasury Bills Deficiency Act of 1889; and for other purposes. [Assented to 23rd December, 1895.]

WHEREAS it is expedient to authorise the issue, as occasion may require, of Treasury bills to the amount of one million one hundred and seventy-four thousand seven hundred pounds, to cover the Deficiency Debt of the Colony up to thirtieth day of June, one thousand eight hundred and ninety-five: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows:—

1. The Governor, with the advice of the Executive Council, may cause Treasury bills for any amounts of money not exceeding in the whole (except as hereinafter provided) the sum of one million one hundred and seventy-four thousand seven hundred pounds to be made out and issued by the Colonial Treasurer in the manner and subject to the provisions hereinafter expressed. Preamble.
Government may raise £1,174,700 by Treasury bills.

2. All such Treasury bills shall be made out at the Treasury in such manner and form and with such cheques, orders, and counterfoils as the Colonial Treasurer shall deem most safe and convenient. And such bills may be for one common sum or for different sums as principal moneys, and shall be signed by the Colonial Treasurer and the Auditor-General, and by such other persons as the Governor, with the advice of the Executive Council, shall authorise and direct. And the names of such other persons shall be registered in the Treasury, and published in the *Gazette* before any Treasury bills signed by them shall be issued. How bills to be made out and signed.

3. All such Treasury bills shall be numbered consecutively, beginning with number one and progressing arithmetically by units. How to be numbered.

4. All principal moneys for which any such Treasury bills are made out shall be chargeable upon, and paid out of, the Consolidated Revenue Fund, and shall bear interest which shall be payable half-yearly at a rate not exceeding four pounds per centum per annum in respect of such principal moneys and shall be chargeable upon, and be paid out of the said Consolidated Revenue Fund. Principal sum and interest charged on the Consolidated Revenue.

5. Such Treasury bills may be issued on such dates and for such amounts and periods of currency as the Governor, with the advice of the Executive Council, may direct, and may be renewed from time to time, and for the purpose of such renewal fresh bills may be issued as hereinbefore provided. Treasury bills may be issued on certain dates.

6. All sums of money raised by Treasury bills issued under the authority of this Act, shall be carried to and form part of the Consolidated Revenue Fund, and the Colonial Treasurer may from time to time issue and apply any such sums of money towards the extinction of the said Deficiency Debt. Moneys raised to form part of Consolidated Revenue. Application of moneys raised by Treasury bills.

7. (i) For the purposes of the redemption of the Treasury bills issued under the authority of this Act, the sum of one hundred and fifty thousand pounds set apart annually under section six of the Treasury Bills Deficiency Act of 1889 shall, notwithstanding the final extinction of the Treasury bills issued under the provisions of such Act, be, so long as any bills issued under this Act remain current, a continuing appropriation for the purposes of, and be applicable, in the manner hereinafter provided, to the redemption of the bills issued under this Act, in addition to any sums which Parliament may have appropriated for a similar purpose; provided that, upon the final extinction of the bills under the Act first before-mentioned, the said sum of one hundred and fifty thousand pounds shall become and be available for the purposes of redemption herein mentioned on the thirtieth day of September in each year, anything in the Treasury Bills Deficiency Act of 1889 to the contrary notwithstanding. Appropriation for redemption.

(ii) On the thirtieth day of September in each and every year, or as soon thereafter as may be lawful if the Appropriation Act for the current year has not been then obtained, the moneys mentioned in subsection (i) hereof shall, to the extent to which they may be available, be paid out of the Consolidated Revenue Fund to the credit of a Special Trust Fund Account in a Bank doing Government business, and the Colonial Treasurer shall, concurrently with such payment to credit of such Special Trust Fund Account, pay off and redeem Treasury bills issued under the provisions of this Act to a like extent, until the whole of the said Treasury bills shall have been redeemed.

8. In case any such Treasury bill shall be defaced by accident the Colonial Treasurer may cancel the same, and cause a new bill to be made in the Treasury in lieu thereof, and such cancelled bill shall be filed in the Treasury, and the new bill shall have the like currency, and be in all respects subject to the same conditions, and bear the same number, date, and principal sum, and rate of interest as the cancelled bill. Defaced bill may be exchanged.

Provision when bills have been lost, &c

9. If any person by evidence, upon oath, or affidavit, or solemn declaration (which may be taken or made before any Commissioner for Affidavits), satisfies a Judge of the Supreme Court that he was the holder of a Treasury bill bearing a number, date, principal sum, and rate of interest specified by him in his evidence, and that such bill has not been paid off but has been lost or accidentally burnt or otherwise destroyed, such Judge shall certify to that effect; and thereupon the Colonial Treasurer shall have power to cause a new bill to be made in the Treasury bearing the same number, date, principal sum, and rate of interest as the bill so lost or destroyed, and to be delivered to such person upon his giving sufficient security to the Colonial Treasurer to indemnify the Treasury against any double payment if the missing bill shall thereafter be presented for payment.

Discharged bills to be cancelled.

10. All such Treasury bills which have been paid off and discharged, and all defaced bills as aforesaid, shall be cancelled. And after they have been cancelled, and the accounts thereof have been audited and allowed, and the cheques, indents, and counterfoils delivered back into the Treasury, all such bills, together with such cheques, indents, and counterfoils, shall be burned or otherwise destroyed under the authority of the Colonial Treasurer.

Power to trustees and others to invest in Treasury bills.

11. Treasury bills issued under this Act are hereby declared to be for all purposes Government Securities, and all corporations and other persons whatsoever shall have power to invest in the purchase of such Treasury bills any property held by them, whether as trustees or otherwise, which they are not expressly forbidden to invest in, Government Stocks or securities without on that account being liable as for a breach of trust or incurring any liability whatsoever, provided that such investment is in other respects reasonable and proper.

Short title and interpretation

12. This Act may be cited as the "Treasury Bills Deficiency Act of 1895," and in its construction when any Government officer is mentioned the person for the time being duly authorised to act for such officer shall be taken to be included.

[To Evidence of John Vernon, Esq., Treasury Accountant.]

New South Wales, Anno Quinquagesimo Nono Victoriae Reginae.

No. X.

AN Act to regulate the appropriation and application of Public Moneys to Public Purposes; to amend the Audit Act; and for other purposes. [Assented to 18th November, 1895.]

WHEREAS in past years much confusion has arisen in regard to the true condition of the public accounts, and it is desirable that the public income and expenditure should be put on a cash basis: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows:—

1. Section seventeen of the Act thirty-third Victoria number eighteen is hereby repealed.

2. Every appropriation made after the commencement of this Act out of the Consolidated Revenue Fund of the Colony for the service of any financial year shall lapse and cease to have effect for any purpose at the close of that year, and any balance of the moneys so appropriated which may be unexpended at the close of such financial year shall be surrendered to the revenue for the general use of the Colony: Provided that in the case of public works the full amount of the estimated expense of completing each work shall be included in the Estimates of Expenditure on which the item appears, divided into the amounts estimated to be required for expenditure in each financial year over which the work is expected to extend; and these amounts shall be provided for as follows—the estimated expenditure for the first year in the Appropriation Act for that year; and the estimated expenditure for any following year shall be provided for as a special appropriation for that year.

3. If before the close of any financial year no Act is passed granting and appropriating moneys out of the Consolidated Revenue Fund of the Colony to meet the requirements of the next succeeding financial year, the Treasurer may pay or make advances against such sums as may be necessary to meet such requirements, current and accruing, subject to the following conditions:—

(i) That the authority of the Treasurer hereunder shall cease immediately upon the passing of the Appropriation Act for such next succeeding financial year within which such authority may be exercised, and shall not in any event extend beyond the period of the first month thereof.

(ii) That upon the passing of such Appropriation Act all payments made under the authority of this section shall be regarded and treated for all purposes as payments made out of the supply granted by such Act under the head or class of service appropriate thereto.

(iii)

Preamble.

Repeal.
Appropriation Acts to lapse at end of financial year.

Contingent authority of Treasurer to pay moneys for Public Service pending passing of Appropriation Act.

(iii) That the payments hereby authorised shall be at such rates and shall not in the whole exceed such an amount as would be equivalent to the authorised expenditure under the Appropriation Act for the immediately preceding financial year for a corresponding period of time in respect of all salaries, pay, wages allowances, contracts for supplies or services, rents, Treasurer's advance and other recurrent charges, and of all ordinary contingencies of any office or department, provided for by the Appropriation Act for such immediately preceding financial year and set forth in the Estimates relating thereto. Provided always that if the Estimates of expenditure for such succeeding financial year shall have been presented to the Legislative Assembly before the thirtieth day of June in any year, and the rate of expenditure in such Estimates is, in any case, lower for any service than the rate of expenditure authorised in the last Appropriation Act, the expenditure under the authority of this Act shall not exceed such lower rates.

Treasurer to pay under Governor's warrant or order

4 The Treasurer shall make the payments authorised by this Act in such manner and in such proportions as the Governor by warrants or orders in writing under his hand and directed to the said Treasurer shall from time to time order and direct, and the payments so to be made shall be charged upon and payable out of the Consolidated Revenue Fund of the Colony.

Interpretation

5 For the purposes of this Act, the expression "financial year" shall mean the period from the first day of July to the thirtieth day of June, and the first of such financial years shall be the period from the first day of July, one thousand eight hundred and ninety five, to the thirtieth day of June, one thousand eight hundred and ninety six. And the term "Special Appropriation" shall be deemed to mean a provision which shall be included amongst appropriations by statute, not requiring to be voted.

Short title

6 This Act may be cited as the "Audit Act Amendment Act of 1895."

[To Evidence of E. A. Rennie, Esq., Auditor-General.]

STATEMENT A.

STATEMENT showing position of the Consolidated Revenue Fund in respect to its obligations at the close of each Financial Year, and its means of meeting the same from the close of the year 1883 to 30th June, 1899, as reported to the Legislative Assembly in the Annual Reports of the Auditor-General upon the Public Accounts for those years respectively, in accordance with the Audit Act.

Reference to the Auditor-General's Annual Report upon the Public Accounts.	Amount of Financial Balance in reference to Obligations at the close of each year.	Amount of Obligations under Statutory Appropriations Outstanding at the close of each year.	Balances of Obligations at the close of each Financial Year.	Balances of obligations which lapsed under the 17th clause of the Audit Act of 1870, and Act No. 5, 1898.	Net Amount of Payments in London prior to the close of the Financial Year, but not included in the Treasury Accounts for that year.	Amount of Treasury Deficiency Bills current at the close of the Financial Year, as per Annual Statements.	Treasury Ledger Balances at the close of the Financial Year, as per Annual Statements.	Balances of Temporary Issues recoverable but outstanding at the close of each Financial Year.

O.

[To Evidence of E. A. Rennie, Esq., Auditor-General.]

CENTENARY Celebration Act, 51 Victoria No. 9.

5. For the construction of the State House and of the approaches thereto, and of all suitable offices in connection therewith, and for the laying out, planting and enclosure of the Centennial Park, and for all necessary works in connection therewith, the sum of two hundred thousand pounds sterling is hereby appropriated from the Consolidated Revenue Fund, which sum shall be payable by the Colonial Treasurer in such manner and subject to such conditions as the Governor may determine.

P.

[To Evidence of E. A. Rennie, Esq., Auditor-General.]

CENTENARY Celebration Act, 51 Victoria No. 9.

3. The lands so vested shall be appropriated and applied to the respective purposes hereinafter set forth :—

- (a) A suitable portion shall be set apart for the erection thereon according to a plan, to be approved by the Governor, of a building commemorative of the Hundredth Anniversary of the Foundation of the Colony, and such building (to be designated "The State House"), shall be designed and constructed so as to provide—
- A great Hall or Amphitheatre (to be designated "The Phillip Hall"), for the holding of national assemblages and commemorative celebrations and services of a national or special character.
 - A museum (to be designated "The Carrington Institute"), where shall be deposited as they can be collected, all books, documents, maps, printed or written matter and reliques as may be illustrative of the historical material and industrial stages of the Colony's progress, and of the various aboriginal races of Australia, their customs, languages, and ethnological characteristics.
 - A gallery for the reception of statues or pictures of the Governors of the Colony and other persons whose names are honourably associated with the Colony.
 - A Public Mausoleum for the interment of those who have been honoured by a public funeral pursuant to a resolution of both Houses of Parliament.
- (b) A portion not being less in area than six hundred and forty acres shall be set apart by the Governor as a public park. Such park shall be designated "The Centennial Park," and shall be laid out according to plans to be approved by the Governor; but so that the same may be opened to the public on the twenty-sixth day of January, one thousand eight hundred and eighty-eight.
- (c) After such portions have been so set apart the remainder of the lands so vested shall be laid out in building sites and sold or leased by public auction in such areas at such times and subject to such conditions and provisions (including, if necessary, the description of buildings to be erected thereon) as the Governor may prescribe.

And it shall be lawful for the Chief Minister, notwithstanding anything in this or any other Act contained to convey the same to the purchasers thereof in such manner and subject to such conditions as the Governor may direct, and the proceeds of all such sales or leases shall be paid by the purchasers to the Colonial Treasurer, and shall be by him carried to the credit of the Consolidated Revenue Fund.

[To Evidence of E. A. Rennie, Esq., Auditor-General.]

New South Wales, Anno Sexagesimo Tertio Victoriae Reginae.—Act No. 48, 1899.

An Act to indemnify the Colonial Treasurer, the Officers of the Treasury, and other persons, in respect of certain unauthorised withdrawals and payments from the Public Accounts of the Colonial Treasurer in the Banks keeping such Accounts. [Assented to 22nd December, 1899.]

WHEREAS certain sums of money have been withdrawn from the Public Accounts of the Colonial Treasurer in the Banks keeping such Accounts without the authority of Parliament for the purpose of paying the claims of contractors and others in anticipation of the sanction of Parliament, which said sums are shown in the Schedule hereto, and amount to the sum of one million two hundred and seventy-eight thousand nine hundred and forty pounds ten shillings and seven pence: And whereas the respective sums so withdrawn and payments so made were necessary to carry on and maintain the Public Service: And whereas it is expedient to indemnify all persons concerned or engaged in the matter of such withdrawals or payments: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows:—

1. The Colonial Treasurer, the Officers of the Treasury, and all persons whosoever concerned or engaged in making the said withdrawals or payments are hereby indemnified and held harmless for and in respect of the withdrawal and expenditure of the said sum of one million two hundred and seventy-eight thousand nine hundred and forty pounds ten shillings and seven pence.

2. This Act may be cited as the "Treasury Indemnity Act, 1899."

Indemnity to Colonial Treasurer, and his Officers, &c.
Short title.

The Treasury, New South Wales,
Sydney, 19th December, 1899

WILLIAM JOHN LYNE,
Treasurer.

T.

[To Evidence of E A Rennie, Esq., Auditor General]

In the Supplement to Appendix A (Nos 1 and 2) to my Report on the Accounts of 1895-6, there is given a detail of the outstanding and undischarged appropriations as they stood at 30th June, 1895, and consisted of the four following distinct classes—

	£	s	d
Balances of annual appropriations for 1894 and previous years still alive at 30th June, 1895, and open for operation up to 31st December, 1895	645,648	4	1
Balances of appropriations for the half year ended 30th June, 1895 (including £66 13s 4d restored balances of 1893, and open for operation up to 30th June, 1896)	566,263	4	4
Balances of special statutory appropriations undischarged for 1894 and previous years without limitation as to period of open obligation	138,443	3	5
Balances of special statutory appropriations for half year ended 30th June, 1895 (including £657 5s 1d restored balances from 1891, 1892, and 1893), with unlimited obligation as to time of discharge	545,706	19	5
	£1,896,061	11	3

At the opening of the new financial year, 1st July, 1895, to 30th June, 1896, the revenue was thus liable for the whole of the above sum of £1,896,061 11s 3d, and at the same date for an overdraft to the amount of £534,403 3s 9d, or together, to a sum of £2 730,464 15s 0d, respectively of the postponed debt represented by the outstanding Treasury Deficiency Bills for £1,752,884

Of the total liabilities by appropriations, shown above as £1,896 061 11s 3d, there has since been written off a sum of £518,922 18s 7d, leaving £1,377,138 12s 8d as having been actually paid, towards which the new Treasury Deficiency Bills contributed only £1,024,700, thus leaving a sum of £352,438 12s 8d paid out of the Revenue Account for 1895-6 and subsequent years

[To Evidence of E. A. Rennie, Esq., Auditor-General]

New South Wales. Anno Sexagesimo Tertio Victoriae Reginae.

Act No. 47, 1899

An Act to authorise the loan of money from the trust fund and the consolidated revenue fund and the bank keeping the Government account to the general loan account, and to provide for the application and repayment of such money; to amend section seventeen of the Audit Act, 1898; to indemnify the Treasurer and other officers and persons in respect of certain drawings and payments from the general loan account made without the warrant of the Governor, and for purposes consequent on or incidental to those objects. [Assented to, 22nd December, 1899]

BE it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows.—

Money may be transferred from trust fund and consolidated revenue fund to general loan account
Application of money borrowed
Re transfer of such money.
Re transfer when borrowing powers exceeded.
Amendment of section 17 of Audit Act, 1898.
Indemnity for payments out of general loan account without warrant
Definitions.
Short title.

1. (1) Where a special Act authorises money to be borrowed for loan services, it shall be lawful for the Governor in anticipation of the raising of any loan so authorised to transfer from the trust fund and from the consolidated revenue fund to the general loan account any money at credit of those funds respectively, and to obtain advances from any bank keeping the Government account and carry the money so advanced to the general loan account; but so that the money so transferred and advanced shall not exceed in amount the money authorised by the special Act to be borrowed.

(2) The money so transferred and advanced may be applied as if it were money borrowed under the special Act.

(3) Any money so transferred and advanced, or any part thereof, may at any time be re transferred and repaid from the general loan account to the trust fund or the consolidated revenue fund, or the bank keeping the Government account, as the case may be.

(4) Where any money borrowed under the special Act together with any money transferred or advanced to the general loan account, and not re-transferred or repaid in pursuance of this section, exceeds in amount the money authorised by such Act to be borrowed, the amount of that excess shall be re-transferred or repaid as aforesaid.

2. For the purposes of section seventeen of the Audit Act, 1898, any sums mentioned in the instrument referred to in that section shall be deemed to be legally available for and applicable to the service or purpose mentioned in such instrument, if those sums have been authorised for expenditure by Parliament for that service or purpose and have not previously been expended for such service or purpose.

3. Where, before the commencement of this Act, any moneys have been drawn from the general loan account for the payment of and have been paid for loan services duly authorised by law without any warrant of the Governor for the same, the Colonial Treasurer, the officers of the Treasury, and all persons concerned or engaged in the matter of such drawing and payment are hereby indemnified and saved harmless for and in respect of such drawing and payment.

4. In this Act—
"special Act" means the Act under which any sum of money is authorised to be raised for any purpose therein specified; and
"loan service" means any purpose specified in any such special Act

5. This Act may be cited as the "Loan Account (Transfer) Act, 1899."

G 2.

[To Evidence of G. H. Pitt, Esq., Chief Examiner, Department of Audit]

New South Wales. Anno Quinquagesimo Tertio Victoriae Reginae.
No. IX.

An Act to authorize the issue of Treasury Bills to cover the Deficiency Debt of 1886 and previous years.
[Assented to, 21st September, 1889]

Preamble.

WHEREAS it is expedient to authorize the issue, as occasion may require, of Treasury Bills to the amount of Two millions six hundred thousand pounds, to cover the Deficiency Debt of the Colony for the year one thousand eight hundred and eighty-six, and previous years;—Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows:—

Government
may raise
£2,600,000 by
Treasury Bills
How Bills to be
made out and
signed

1 The Governor in Council may cause Treasury Bills for any amounts of money not exceeding in the whole the sum of Two millions six hundred thousand pounds to be made out and issued by the Colonial Treasurer in the manner and subject to the provisions hereinafter expressed

How to be
numbered.

2 All such Treasury Bills shall be made out at the Treasury in such method and form and with such cheques, indents, and counterfoils as the Colonial Treasurer shall deem most safe and convenient And such Bills may be for one common sum or for different sums as principal moneys, and shall be signed by the Colonial Treasurer, the Auditor General, and by such other person or persons as the Governor in Council shall authorize and direct And the names of such other persons so to be authorized to sign such Bills shall be registered in the Treasury, and published in the *Government Gazette* before any Treasury Bills so signed shall be issued.

How principal
sums to be paid
Date of Bills and
rate of Interest

3 All such Treasury Bills shall be numbered consecutively, beginning with number one and progressing arithmetically by units.

4 All principal moneys for which any such Treasury Bills may be made out shall be chargeable upon, and paid out of, the Consolidated Revenue Fund, and shall bear interest payable half-yearly, at a rate not exceeding four pounds per centum per annum in respect of such principal moneys Such interest shall be chargeable upon, and be paid out of the Consolidated Revenue Fund

Treasury Bills
may be issued on
certain dates
Annual amount
to be paid to
extinguish
Treasury Bills

5 All such Treasury Bills may be issued on such dates and for such amounts and periods of currency as the Governor in Council may direct, and may be renewed from time to time until the said Deficiency Debt be extinguished.

Defaced Bills
may be
exchanged.

6 On the thirty first day of December, one thousand eight hundred and ninety, the sum of One hundred and fifty thousand pounds shall be paid from the Consolidated Revenue Fund to the credit of a Special Trust Fund Account in a Bank doing the Government business, and the like sum shall be paid to the said Special Trust Fund Account annually thereafter, for the purpose of paying off the said Treasury Bills, until such bills are finally extinguished; and the Colonial Treasurer shall, from time to time, out of such Special Trust Fund pay off and redeem such Treasury Bills to the extent to which there may be moneys to the credit of such Special Trust Fund Account.

Application of
moneys raised
by Treasury
Bills
Provision for
Bills lost, &c

7 In case any such Treasury Bill shall be defaced by accident the Colonial Treasurer may cancel the same, and cause a new Bill to be made in the Treasury in lieu thereof, and such cancelled Bill shall be filed in the Treasury. And such new Bill shall have the like currency, and be in all respects subject to the same rules, methods, and continuance, and bear the same number, date, and principal sum, and rate of interest as such cancelled Bill.

Cancelling of
discharged
Bills

8 The Colonial Treasurer may from time to time issue and apply towards the extinction of the said Deficiency Debt any sum or sums of money produced by any such Treasury Bills.

Power to
trustees to
invest.

9 Upon proof being made on oath before a Judge of the Supreme Court by any credible person that any Treasury Bill issued under this Act and held by him, the number and sum whereof shall be specified by him in his evidence, has been lost or accidentally burnt or otherwise destroyed before the same shall have been paid off, and upon such Judge certifying that he is satisfied with such proof, the Colonial Treasurer may cause a new Bill to be made in the Treasury bearing the same number, date, principal sum, and rate of interest as the Bill so lost or destroyed, and to be delivered to such person upon his giving sufficient security to the Colonial Treasurer to indemnify the Treasury against any double payment if the missing Bill shall thereafter be presented for payment

Moneys raised to
form part of
Consolidated
Revenue
Commencement,
short title, and
interpretation.

10 All Treasury Bills issued under the authority of this Act which shall be paid off and discharged, and all defaced Bills as aforesaid, shall be cancelled And after being so cancelled, and the accounts thereof audited and allowed, and the cheques, indents, and counterfoils delivered back into the Treasury, all such Bills, together with such cheques, indents, and counterfoils, shall be burned or otherwise destroyed under the authority of the Colonial Treasurer.

11 All Treasury Bills made out or issued under the authority of this Act shall be "Government Securities" within the meaning of the Act twenty-six Victoria number twelve (the "Trust Property Act of 1862") and of the Act seventeen Victoria number twenty-six or any Act in force for the time being relating to Friendly Societies; and all corporations, companies, or co partnerships, and all trustees, executors, and administrators, whether incorporated, established, or appointed before or after the passing of this Act not expressly forbidden to invest their funds in the purchase of Government Stock or securities by their charter Act of Incorporation, deed of settlement, or of partnership, trust, deed, settlement, testamentary, or other instrument whatsoever respectively, are hereby authorised and empowered to invest such funds in the purchase of and to hold Treasury Bills issued under or for the purposes of this Act without incurring or committing any breach of trust or of any condition, restriction, or provision contained in any such Act, charter, or other instrument whatsoever as aforesaid.

12 All such sums of money as shall be raised by Treasury Bills to be issued under the authority of this Act shall be carried to and form part of the Consolidated Revenue Fund

13 This Act may be cited as the "Treasury Bills Deficiency Act of 1889," and in its construction the expression "Governor in Council" shall mean the Governor with the advice of the Executive Council And when any Government officer is mentioned, the person for the time being duly authorised to act for such officer shall be taken to be included.

Net proceeds of Treasury Bills (new issue) credited March, 1896					1,024,700	0 0
Proceeds of Bills, available for payments during 1895-6 and 1896-7, for services of 1895 and previous years					875,359	17 3
Balance 1895-6	Dr	547,470	7 8			
,, 1896-7	Dr	209,393	15 2			
,, 1897-8	Cr	7,766	5 4			
,, 1898-9	Dr	9,738	14 1			
				Dr	758,836	11 7
Credit Balance at 30 June, 1899					£116,523	5 8

Expended during 1895-6 and 1896-7, on account of 1894 and previous years

Paid n	On account, 1892	On account, 1893	On account, 1894	Total
	£ s d.	£ s d	£ s d	£ s d
1895-6	2,953 13 9	155,429 8 10	144,081 2 7	302,464 5 2
1896-7	1,359 7 9		360 0 0	1,719 7 9
	4,313 1 6	155,429 8 10	144,441 2 7	304,183 12 11

Expended during 1895-6 and 1896-7, on account of six months to June, 1895

	£ s d.
1895-6	650,285 18 8
1896-7	2,009 13 6
	£652,295 12 2

The proceeds of Bills included in the receipts of 1895-6, available for payment on account of Liabilities 1895 (June) and previous years, amounted to £875,359 17s 3d. The payments made during 1895-6 and 1896-7 (at which latter late the payments on account of old system ceased) amounted to—

	£ s d
1895-6	304,183 12 11
1896-7	652,295 12 2
Total	£956,479 5 1

On superficial investigation it would appear that the proceeds available, £875,359 17s 3d, were inadequate to meet the payments, £956,479 5s 1d. Not so—as the shortage in the cash is explained by the fact that the figures were influenced by operations in Temporary Advance Account, while the payments from proceeds of Treasury Bills were subsequently reduced by repayments to Credit of Votes

V 2.

[To Evidence of Francis Kirkpatrick, Esq., Under Secretary for Finance and Trade.]

HISTORY of the Accumulated Deficiency, 1895 (Half-year), and previous years.

Account for 1887.

According to the accounts with Ways and Means of 10th April, 1889, the year 1887 closed with a deficiency of £325,012 12s. 6d., which was carried forward to the account for 1888.

Account for 1888.

On 10th April, 1889, after providing for the deficiency in 1887, the year 1888 was estimated to close with a deficiency to the extent of £37,285 17s. 9d.

Account for 1889.

On 10th April, 1889, the account for 1889, after providing for the deficiency in 1888, was estimated to close with a surplus to the amount of £25,192 12s. 3d. On 4th December, 1889, the surplus was estimated at £52,483 19s. 9d., but owing to the supplementary charges exceeding the estimate the surplus was, on 16th October, 1890, reduced to £40,458 12s. 2d.

Account for 1890.

On 16th October, 1890, it was estimated the transactions for the year 1890 and previous years would result in an estimated accumulated surplus of £208,435 16s., which was appropriated £150,000 for repairs to Roads and Bridges, and £56,500 Special Grant to Municipalities; so that as ascertained on 1st December, 1891, the year 1890 closed with a credit balance to the extent of £47 14s. 7d.

It will be apparent from the foregoing that up to the end of the year 1890 there was no deficiency.

Account for 1891.

On 16th October, 1890, after providing £150,000 for Roads and Bridges and £56,500 for Municipalities out of the accumulated surplus of 1890 and previous years, it was estimated the year would close with an accumulated surplus of £73,413 6s.

On 1st December, 1891, consequent upon Supplementary Estimates and other charges (including a recharge of £200,000 in connection with Centennial Park expenditure), amounting in all to £1,147,580 11s. 5d., an estimated deficiency was shown to the amount of £589,802 4s. 2d.

On 19th January, 1893, the deficiency was increased to £772,162 3s. 2d., principally by further supplementary items and reduction in estimated savings.

Account for 1892 and previous years.

On 1st December, 1891, when the account for 1892 was first admitted, it was estimated that in consequence of new taxation, &c., there would be a surplus to the amount of £358,055 10s., which would reduce the deficiency of 1891 to £231,746 14s. 2d.

Owing, however, to all the Taxation proposals not having been agreed to, and to a falling off in the Revenue generally, the account with Ways and Means of 19th January, 1893, shows that the deficiency, instead of being reduced, had increased from £772,162 3s. 2d. to the sum of £1,251,864 9s. 5d., an increase of £479,702 6s. 3d.

On 19th October, 1893, it was found the estimated deficiency for 1892 and previous years had increased to the sum of £1,299,541 9s. 6d.

On 1st February, 1894, the estimated deficiency was reduced (by savings on votes of over £100,000) to £1,198,322 15s. 1d., which was to be provided for out of the proceeds of Treasury Bills.

Account for 1893 and previous years.

On 19th January, 1893, it was anticipated that in consequence of further proposed new taxation to the amount of £340,000, the account for 1893 would show a surplus of £854,770, thus reducing the estimated accumulated deficiency at the end of the year to the sum of £397,094 9s. 5d.

On 19th October, 1893, it was shown the estimated deficiency for 1893 and previous years was £1,500,780 14s., an increase of £201,239 4s. 6d. The deficiency of £1,500,780 14s. it is stated is to be provided for out of the proceeds of Treasury Bills.

On 1st February, 1894, the account for 1893 (exclusive of the debit balance from 1892, which was not brought forward) shows an estimated surplus of £69,483 9s. 2d., carried forward to the account for 1894.

On 7th November, 1894, the estimated deficiency in the accounts for 1893 and previous years, carried forward to 1894 (after reducing the expenditure by £199,508 19s. 6d., on account of Centennial Park expenditure transferred to a suspense account) was £1,092,995 8s. 1d.

Account

V 2—continued.

Account for 1894 and previous years.

On 19th October, 1893, it was estimated there would be a surplus on this account by itself of £117,389.

On 1st February, 1894, the estimated credit balance on the accounts for 1893 and 1894, to go in liquidation of deficiency of 1892 and previous years, was £47,372 9s. 2d.

On 7th November, 1894, the estimated deficiency for 1894 and previous years had increased to £1,465,225 16s.

On 9th May, 1895, the estimated deficiency on the accounts for 1894 and previous years carried forward had been reduced, principally by savings on votes, to £1,322,651 18s. 6d.

On 27th August, 1895, the estimated deficiency carried forward was £1,324,897 7s. 6d.

Account for half-year ended 30th June, 1895, and previous years.

The account with Ways and Means of 7th November, 1894, showed that the estimated deficiency, 1895 (half-year) and previous years, to be provided for by Treasury Bills amounted to £1,356,233 0s. 1d.

On 9th May, 1895, the deficiency to be provided for by Treasury Bills was reduced to £1,216,253 3s. 11d.

On 27th August the estimated deficiency to be provided for by Treasury Bills was ascertained to be £1,174,767 14s. 4d.

The deficiency was provided for by Treasury Bills issued under Act 59 Victoria, No. 22, to the amount of £1,174,700.

The outstanding liabilities on 30th June, 1895, however, afterwards reduced by savings on Votes, and Treasury Bills were cancelled to the extent of £150,000, leaving the amount of Treasury Bills outstanding under the Act £1,024,700. The Treasury, New South Wales, 19th August, 1899.

W 2.

[To Evidence of Francis Kirkpatrick, Esq., Under Secretary for Finance and Trade.]
