## Part 4 Minister's plans

1

### 50 Minister's plans

2

(1) The Minister may, by order published in the Gazette, make a plan (a *Minister's plan*):

3

4

(a) for any part of the State that is not within a water management area, or

5

6

(b) for any water management area, or part of a water management area, for which a management plan is not in force, or

7

8

(c) for any water management area, or part of a water management area, for which a management plan is in force, but only so as to deal with matters not dealt with by the management plan.

9

10

11

(2) A Minister's plan must deal with any matters that a management plan is required to deal with, and may also deal with any other matters that a management plan is authorised to deal with, other than matters that are already dealt with by a management plan.

12

13

14

15

(3) Before making a plan that establishes environmental water rules, the Minister must obtain the concurrence of the Minister for the Environment to the establishment of those principles.

16

17

18

(4) Except to the extent to which this Act otherwise provides, a Minister's plan has the same effect as a management plan.

19

20

(5) The Minister must cause each Minister's plan to be periodically reviewed at intervals of not more than 5 years.

21

22

## Part 5 Implementation programs

### 51 Implementation programs

- (1) The Minister may, by order in writing, establish a program for implementing a management plan or Minister's plan (an *implementation program*).
- (2) Before establishing the first implementation program for a management plan, the Minister must consult with the management committee by which the plan was prepared.
- (3) An implementation program must set out the means by which the Minister intends that the objectives of the relevant management plan or Minister's plan are to be achieved.
- (4) On establishing an implementation program, the Minister must ensure that:
  - (a) notice of that fact is published (in a local newspaper and in such other manner as the Minister considers appropriate) to persons in the area to which the program relates, and
  - (b) copies of the program (as currently in force) are made available for inspection during normal office hours, free of charge, at suitable locations within the area.
- (5) The Minister is to ensure that the implementation program is reviewed each year for the purpose of determining whether the implementation program is effective in implementing the management plan or Minister's plan to which it relates.
- (6) The results of each review under this section are to be included in the annual report for the Department under the *Annual Reports (Departments) Act 1985*.

<b>Part 1</b>	<b>Basic landholder rights</b>	2
<b>Division 1</b>	<b>Domestic and stock rights</b>	3
<b>52</b>	<b>Domestic and stock rights</b>	4
(1)	An owner or occupier of a landholding is entitled, without the need for an access licence, water supply work approval or water use approval:	5
(a)	to take water from any river, estuary or lake to which the land has frontage or from any aquifer underlying the land, and	6
(b)	to construct and use a water supply work for that purpose, and	7
(c)	to use the water so taken for domestic consumption and stock watering, but not for any other purpose.	8
(2)	Subsection (1) does not authorise a landholder to construct a dam or water bore without a water supply work approval.	9
(3)	In this section:	10
	<i>domestic consumption</i> , in relation to land, means consumption for normal household purposes (including the watering of a garden not exceeding 0.5 hectares in area, not being a garden that is used for the commercial production of agricultural produce) in domestic premises situated on the land.	11
	<i>stock watering</i> , in relation to land, means the watering of stock being raised on the land, but does not include the use of water in connection with intensive animal husbandry.	12
<b>Division 2</b>	<b>Harvestable rights</b>	13
<b>53</b>	<b>Harvestable rights</b>	14
(1)	An owner or occupier of a landholding within a harvestable rights area is entitled, without the need for any access licence, water supply work approval or water use approval:	15

(a)	to construct and use a dam for the purpose of capturing and storing rainwater run-off, and	1 2
(b)	to use water that has been captured and stored by a dam so constructed,	3 4
	in accordance with the harvestable rights order by which the area is constituted.	5 6
(2)	A single dam may be used both for rainwater run-off that has been captured and other water that has been lawfully taken from a water source, but only if the harvestable rights order so provides.	7 8 9
(3)	This section does not allow a landholder:	10
(a)	to supply any other land with water that has been captured and stored under this section, or	11 12
(b)	to construct or use a dam that obstructs the flow of a river, unless the river is declared by the relevant harvestable rights order to be a minor stream for the purposes of this Division.	13 14 15
<b>54</b>	<b>Harvestable rights orders</b>	16
(1)	The Minister may, by order published in the Gazette, constitute any land as a harvestable rights area and may, by the same or a subsequent order so published, name the area and fix its boundaries.	17 18 19
(2)	The order by which a harvestable rights area is constituted must specify the following:	20 21
(a)	the proportion of the average rainwater run-off that may be captured by landholders in the area (being no less than 10% of that average),	22 23 24
(b)	the procedures to be followed for calculating the average rainwater run-off for a landholding in the area.	25 26
(3)	The order may allow an existing dam to be used both for rainwater run-off that has been captured and other water that has been lawfully taken from a water source.	27 28 29
(4)	The order may also deal with the following matters:	30
(a)	the types and locations of dams that may be used by a landholder to capture and store rainwater run-off,	31 32

- (b) the means by which the maximum capacity of a dam that may be used by a landholder to capture and store rainwater run-off is to be calculated, 1  
2  
3
  - (c) the arrangements that may be made by landholders of adjoining land for the shared use of a single dam for the capture of rainwater run-off, 4  
5  
6
  - (d) such other matters as are necessary or convenient to give effect to the order. 7  
8
- (5) For the purpose of calculating any matter under an order under this section, a reference in the order to an area of land is, in the case of land that is valued under the *Valuation of Land Act 1916*, a reference to the area of a portion or parcel of land that is separately valued under that Act. 9  
10  
11  
12  
13
- (6) An order under this section may deal with any matter by reference to a map held in the head office of the Department. 14  
15
- (7) Any map that is so referred to is to be available for public inspection, free of charge, during normal office hours at the head office of the Department and at the regional office for the area to which the relevant order relates. 16

24
- (2) This section does not authorise a native title holder: 25
  - (a) to construct a dam or water bore without a water supply work approval, or 26  
27
  - (b) to construct or use a water supply work otherwise than on land that he or she owns. 28  
29
- (3) The maximum amount of water that can be taken or used by a native title holder in any one year for domestic and traditional purposes is the amount prescribed by the regulations. 30

## Part 2 Access licences

1

### Division 1 Preliminary

2

#### 56 Access licences

3

- (1) An access licence entitles its holder:
    - (a) to specified shares in the available water within a specified water management area or from a specified water source (the *share component*), and
    - (b) to take water:
      - (i) at specified times, at specified rates or in specified circumstances, or in any combination of these, and
      - (ii) in specified areas or from specified locations, (the *extraction component*).
  - (2) Without limiting subsection (1) (a), the share component of an access licence may be expressed:
    - (a) as a specified maximum volume over a specified period, or
    - (b) as a specified proportion of the available water, or
    - (c) as a specified proportion of the storage capacity of a specified dam or other storage work and a specified proportion of the inflow to that dam or work.
  - (3) Shares in available water may be assigned generally or to specified categories of access licence.
  - (4) In the case of a local water utility licence, its share component is to be expressed as a specified volume per year.
  - (5) The Minister may, by order published in the Gazette, declare that the access licences for specified water management areas are to be issued separately for the share components and extraction components.
- Note.** If the share component and extraction component of an access licence have been issued separately, those components may be held by different persons.

- (6) In the case of a water management area for which separate access licences are issued for the share component and extraction component, any requirement of this or any other Act for a person to be the holder of an access licence (such as section 342) is taken to be a requirement for the person to be:
- (a) the holder of an access licence for the share component, and
  - (b) the holder of an access licence for the extraction component.
- Note.** An access licence:
- (a) does not confer a right on any person to use water for any particular purpose (that right is conferred by a water use approval), and
  - (b) does not confer a right on any person to construct or use a water supply work (that right is conferred by a water supply work approval).

## 57 Categories of licence

There are the following categories of access licence:

- (a) local water utility access licences,
- (b) major utility access licences,
- (c) domestic and stock access licences,
- (d) regulated river (high security) access licences,
- (e) regulated river (general security) access licences,
- (f) regulated river (supplementary water) access licences,
- (g) unregulated river access licences,
- (h) aquifer access licences,
- (i) estuarine water access licences,
- (j) coastal water access licences,
- (k) such other categories of access licence as may be prescribed by the regulations.

**Note.** Local water utility access licences and major utility access licences will be held by local water utilities and major utilities, respectively. Those utilities (like anyone else) may also hold other categories of access licences. However, an access licence does not become a local water utility access licence or major utility access licence merely because it is held by a local water utility or major utility.

Clause 58	Water Management Bill 2000
Chapter 3	Water management implementation
Part 2	Access licences
Division 1	Preliminary

<b>58</b>	<b>Priorities between different categories of licence</b>	1
(1)	For the purposes of this Act, the following priorities are to be observed in relation to access licences:	2
(a)	local water utility access licences, major utility access licences and domestic and stock access licences have priority over all other access licences,	3
(b)	regulated river (high security) access licences have priority over regulated river (general security) access licences and regulated river (supplementary water) access licences,	4
(c)	regulated river (general security) access licences have priority over regulated river (supplementary water) access licences.	5
(2)	If one access licence (the <i>higher priority licence</i> ) has priority over another access licence (the <i>lower priority licence</i> ), then if the water allocations under them have to be diminished, the water allocations of the higher priority licence are to be diminished at a lesser rate than the water allocations of the lower priority licence.	6
<b>59</b>	<b>Available water determinations</b>	7
(1)	From time to time the Minister may, by order in writing, make a determination as to the availability of water for the various categories of access licence in relation to a specified water management area or water source (an <i>available water determination</i> ).	8
(2)	The regulations may make provision for or with respect to the manner in which an available water determination is to be publicly notified.	9
<b>60</b>	<b>Rules of distribution applicable to making of available water determinations</b>	10
(1)	Except while an order under subsection (2) is in force, the following rules of distribution apply to the making of an available water determination:	11
(a)	the rules of priority established by section 58,	12
(b)	the provisions of any relevant bulk access regime,	13
(c)	the provisions of any relevant management plan,	14
(d)	the provisions of any relevant implementation program.	15

		13
		14
(4)	A discretionary condition referred to in subsection (3) takes effect on the day on which the notice referred to in that subsection is served on the holder of the access licence or on such later day as may be specified in the notice in that regard.	15
		16
		17
		18
<b>68</b>	<b>Revocation of conditions</b>	19

		21
		22
<b>69</b>	<b>Duration of access licences</b>	23
(1)	An access licence (other than an access licence for a major utility) has effect:	24

		27
(b)	for 20 years, in the case of a local water utility access licence.	28

<b>108</b>	<b>Surrender of approvals</b>	11

Chapter 4	Joint private works
Part 2	Private irrigation districts
Division 7	Supply of water

<b>180</b>	<b>Circumstances in which private irrigation board not obliged to supply water</b>	1
		2
(1)	Nothing in this Part requires a private irrigation board to supply water to any land or landholder if, by reason of drought, accident or otherwise, the board is of the opinion that it is impracticable to do so.	3
		4
		5
(2)	Unless the private irrigation board otherwise determines, any failure to deliver water to a holding does not relieve the landholder of the holding of any liability for payment of rates and charges, and rates and charges continue to be leviable in respect of the holding despite any such failure.	6
		7
		8
		9
		10
<b>181</b>	<b>Landholders may be required to provide distribution works</b>	11
	A private irrigation board may, by notice in writing given to the landholder of any holding, require the landholder:	12
		13
(a)	to provide on his or her holding:	14
(i)	ditches or channels of such a size and capacity as will enable water to be delivered to his or her land at not less than such rate of delivery as the board may stipulate in the notice, and	15
		16
		17
		18
(ii)	water storage works, in such locations and of such nature and extent as the board may stipulate in the notice, for the water to be supplied by it for domestic and stock purposes, and	19
		20
		21
		22
(b)	to maintain, continuously and effectively, any ditches or channels referred to in paragraph (a) (i) so that water may be carried or passed at not less than the rate so stipulated.	23
		24
		25
<b>182</b>	<b>Sale of surplus water</b>	26
(1)	If the full quantity of water to be supplied under this Division has been supplied or, despite any sales made under this section, will be supplied, a private irrigation board may, subject to the conditions of any water supply work approval held by it, agree to sell by measure to the landholder of any holding water from the works of the private irrigation district subject to such terms and conditions as may be agreed to by the board and that landholder.	27
		28
		29
		30
		31
		32
		33
(2)	If the Minister authorises a private irrigation board to take water in addition to the water the board is entitled to take under its access licence, the board may agree to sell by measure the water it is so	34
		35
		36

authorised to take to the landholder of any holding within its private  
irrigation district, subject to such terms and conditions as may be  
agreed on by the board and that landholder.

**Division 8            Effect of new subdivisions**

**183    Supply of water for domestic and stock purposes to new holdings  
resulting from subdivisions**

- (1) If a holding, whether an irrigated or non-irrigated holding, is  
subdivided, a new holding resulting from the subdivision is not entitled  
to a supply of water for domestic and stock purposes from a private  
irrigation board's water supply works until a date determined by the  
board (not being a date earlier than the date on which the board  
became aware of the disposition of that new holding).
- (2) If rates for a period or year ending on 30 June, being the period or year  
during which the date specified by a private irrigation board under  
subsection (1) occurred, have not, before the date so specified, been  
levied in respect of the holding that was subdivided, the board must  
levy the rates for the whole of that period or year in respect of each of  
the new holdings that resulted from the subdivision, and that was  
disposed of.

**184    Supply of water for irrigation purposes to a new holding resulting from  
a subdivision**

- (1) If an irrigated holding is subdivided and any new holdings are thereby  
created, the private irrigation board must, subject to subsection (2),  
allocate to such of the new holdings as the landholder of the  
subdivided holding nominates the whole of the quantity of water last  
allocated to the holding that was subdivided.
- (2) If the landholder nominates more than one new holding to which the  
quantity of water is to be allocated, the private irrigation board may  
allocate the water to those holdings in such proportions as it  
determines.
- (3) A private irrigation board may allocate to such of the new holdings as  
the board determines the quantity of water last allocated to the  
subdivided holding if:

Clause 184	Water Management Bill 2000
Chapter 4	Joint private works
Part 2	Private irrigation districts
Division 8	Effect of new subdivisions

---

(a)	the landholder of the subdivided holding fails to make a nomination within the time specified by the board in a notice sent by post to the landholder at the landholder's last known address, or	1 2 3 4
(b)	a holding nominated by the landholder does not contain land capable of being irrigated from the works of the private irrigation district or to which, in the opinion of the board, it is impracticable to convey water for irrigation from those works, or	5 6 7 8 9
(c)	a holding nominated by the landholder is too small to justify an allocation of water, or	10 11
(d)	the allocation of water in the manner nominated is otherwise detrimental to the administration of the private irrigation district concerned.	12 13 14
(4)	If a private irrigation board makes an allocation under subsection (3), it is to notify the landholder of the subdivided holding and the landholder of each new holding of the allocation.	15 16 17
(5)	An allocation of water to a new holding made under this section has effect on and from a date to be specified in the instrument by which the allocation is made (not being a date earlier than the date on which the private irrigation board became aware of the first disposition of any of the new holdings resulting from the subdivision).	18 19 20 21 22
(6)	The landholder of a new holding resulting from a subdivision referred to in subsection (1) is not entitled to an allocation of water by the private irrigation board for irrigation purposes otherwise than in accordance with this section.	23 24 25 26
(7)	If the charges for water have not been levied for the current year for the subdivided holding, the private irrigation board must levy the charges for the whole of that year in respect of the new holding to which the water previously allocated to the subdivided holding has been allocated in accordance with this section.	27 28 29 30 31
<b>185</b>	<b>Additional works required as a result of subdivision</b>	32
(1)	The person who, immediately before the disposition of a new holding resulting from a subdivision, was the landholder of the holding (the <i>previous landholder</i> ) must construct at his or her own cost such works as are necessary to provide:	33 34 35 36

- 
- (a) means of conveying water to the new holding from the private irrigation board's water supply works and, if an allocation of water is made to the new holding for irrigation, means of measuring the water so supplied, and 1  
2  
3  
4
- (b) means of access from roads to any works of the private irrigation district or any works provided for the purposes of paragraph (a) if that access would not be available except by crossing a channel of the private irrigation district, and 5  
6  
7  
8
- (c) means of access across a channel of the private irrigation district to the new holding if that means of access is required by reason of the subdivision. 9  
10  
11
- (2) All works to be constructed under subsection (1): 12
- (a) in respect of the supply of water to a new non-irrigated holding, must be constructed before the new holding is disposed of or within such period after the disposition of the new holding as the private irrigation board may in any particular case allow, and 13  
14  
15  
16  
17
- (b) in respect of the supply of water to a new irrigated holding, must be constructed within such period as the private irrigation board may, by notice in writing, have notified to the landholder of the holding that was subdivided. 18  
19  
20  
21
- (3) All works constructed or to be constructed under subsection (1) must be constructed in accordance with the approval in writing of the private irrigation board in respect of location, design, form, dimensions and construction. 22  
23  
24  
25
- (4) At the request of the previous landholder, a private irrigation board may undertake, at the landholder's cost, the construction of any works required by this section. 26  
27  
28
- (5) A private irrigation board may construct such works as have not been constructed by the previous landholder, and any costs and expenses (including any compensation paid or payable by the board under Division 5 by reason of the construction of the works) are payable to the board either by the previous landholder or by the new landholder, as the board may determine. 29  
30  
31  
32  
33  
34
- (6) If any part of the costs and expenses referred to in subsection (5) is recovered by the private irrigation board from the new landholder, the new landholder may recover from the previous landholder the whole or that part of those costs or expenses, as the case may be. 35
