Elizabeth Banks..	Clonmel, Ireland.	{ 20	{ Sept., 1858.	{ Fort-street, Sydney, 1 month. }	Third Division, Third Class.	Private Teacher 2 years.

34.—	Master's salary	£120	0	0
35.—	Average fees yearly.....	80	0	0
36.—	Assistant's salary.....	42	0	0
	Average fees yearly.....	30	0	0
		£272	0	0

37.—Religious instruction is given by reading and explanation in Bible History every day. Clergymen of all denominations visit the school. They state that they have no time to give religious instruction. The children attend the Sunday schools.

Names of Clergy—Rev. H. Tingcombe, C.E.; Rev. J. P. Roche, R.C.; Rev. C. W. Rigg, Wesleyan Local Patron.

CAMPBELL'S RIVER.

- 1.—Lagoon, Campbell's River.
- 2.—The materials of which the schoolhouse is constructed are of wood; it is substantially built, with thatched roof, boarded floor, lathed and plastered; it has lately been considerably enlarged, and requires no repairs at present.
- 3.—The number of superficial square feet contained in the area of the schoolhouse is 640.
- 4.—The number of superficial square yards of ground adjoining the school, for the use of the pupils, is 1,200.
- 5.—There are no water-closets at present, but are to be built immediately.
- 6.—There is but one room in the schoolhouse, which contains 640 superficial square feet, and 7,040 cubic feet.
- 7.—The average number of pupils assembled in the schoolroom is 27.45.
- 8.—The schoolroom is ventilated by four windows, made to open.
- 9.—The average number on the books is—males, 9.36; females, 18.09.
- 10.—Maximum age of male pupils in school, 13 years.
 Minimum " " " " 4 "
 Maximum " female pupils " 14 "
 Minimum " " " " 5 "
- 11.—The school is divided into two classes—1st, and 2nd.
 Average number in 1st class, 13.42.
 " " 2nd class, 14.03.
 Maximum age in 1st class, 12 years.
 Minimum " " " 4 "
 Maximum " 2nd class, 14 "
 Minimum " " " 7 "
- 12.—Five hours each day are devoted to study by the pupils; school opens for business at 9 A.M.; at 10½ there are ten minutes allowed for recreation, business is then resumed till 12; two hours are then allowed for dinner and recreation, when business re-commences, and school terminates at 4 P.M.
- 13.—No holidays or vacations were given.
- 14.—The total number of days appropriated to school studies, 68.
- 15.—The children that have entered have not in any case, as yet, finally left.
- 16.—The number of children in the locality of the school between the ages of 5 and 15 years, who do not usually attend, is 15.
- 17.—The fees charged at the school are—
- | | | | |
|---|----|----|---|
| For one child (quarterly)..... | £1 | 0 | 0 |
| Two children (same family—quarterly)..... | 1 | 10 | 0 |
| Three " " " "..... | 2 | 0 | 0 |
| Four or more " " " "..... | 2 | 10 | 0 |
- 18.—Book charges, 6d. quarterly each pupil.
- | | | | | |
|---|----|----|----|---|
| Donation from J. M'Phillamy Esq. | £ | 0 | 15 | 0 |
| For support of master..... | 2 | 10 | 0 | |
| From Commissioners of National Education | 15 | 0 | 0 | |
| Books and map | 6 | 0 | 0 | |
| Amount of school fees received from pupils to 30th September, 1858— | | | | |
| Appropriated to master's use | 15 | 0 | 0 | |
| Total amount received..... | 39 | 5 | 0 | |

19.—The average annual total cost of the education of each pupil is £1.433.

20.—The following are the subjects of instruction given to each class daily, with the time allotted to each subject:—

1ST CLASS.		2ND CLASS.	
	Hours.		Hours.
Writing	1¼	Writing	1¼
Reading and spelling	2½	Reading	1¾
Arithmetic	¾	Arithmetic	1
Geography	½	Grammar.....	½
		Geography	½

21.—The books used in each of the classes are—First class, 1st and 2nd book of lessons, 1st book of arithmetic; second class, sequel to No. 2 book of lessons No. 1, Sullivan's geography, spelling-book superseded, English grammar, Scripture lessons (O. T.) No. 1.

22.—No prints or diagrams are in use in the school; there is a map of the World, black-board, chalk, rulers, pens, pencils, ink, slates, and copy-books, all in good condition; a map of Australia much needed.

23.—The system of correction generally employed is confinement; when corporal punishment is resorted to, which rarely occurs, slapping with the cane is adopted; a copy of suggestions furnished by Mr. B. H. M'Cann, S. I., is herewith sent.

24.—The pupils of the school were examined with reference to their progress, once by Mr. Wilkins, and four times by Mr. B. H. M'Cann; no prizes or rewards of merit were given.

25.—The school was officially visited by Mr. B. H. M'Cann four times during the usual school hours; no report on state of the school exists.

26.—Name of head teacher—Thomas B. Carson.

27.—There are no assistant teachers, pupil teachers, or monitors, attached to the school.

28.—Birthplace of teacher—Kilkenny, Ireland.

29.—Age of teacher—30 years.

30.—Appointment to present office—1st July, 1858.

31.—Not trained as a teacher.

32.—Not trained; certificate of competency—Class III, Section B.

33.—Twelve months experience as private tutor in Ireland, and six months in this school previous to its coming under the non-vested system; previous occupation—chemist.

34.—Amount of salary of teacher—£15.

35.—Fees, allowances, and emoluments, exclusive of salary—£15.

36.—Total amount of income—£30.

37.—The children are daily made acquainted with the numerous moral truths, and Christian precepts, contained in the several lesson books. In the case of those able to read, an hour is also given each day to the reading and explanation of the Scripture extracts compiled by the Board, for the use of all children whose parents or guardians approve of their so reading them. The school was visited once a month by the Rev. G. M. Fox, Church of England Clergyman. The books used for religious instruction are—Scripture lessons, No. 1, Old Testament, Scripture lessons, No. 2, Old Testament, Scripture lessons, No. 1, New Testament, Scripture lessons, No. 2, New Testament.

“Suggestions to the Teacher.

“The principles and reasons of the several operations in arithmetic to be carefully explained, and the fact that ‘what a child learns without understanding, he acquires with disgust, and will soon cease to remember,’ to be constantly kept in mind.

“The children to be invariably classed and instructed in strict accordance with the table of minimum attainments, and all possible exertion made to raise as soon as possible the qualifications of those children three months in their respective classes to the standard required by that ‘table’; and those more than three months, to the degree of proficiency which may form a corresponding ratio. Each lesson to be well understood by the children before they are advanced to another. Writing from dictation to be taught to all the classes. The questions to be solved in arithmetic to be also dictated; in fact every opportunity possible is to be taken to cultivate and form the minds of the children, rather than cram them with knowledge. The copy-books to be examined and corrected as often as possible during the exercise; the children to be reminded that their eyes should be constantly directed towards the head-line, with a view of imitating it, in some such way as a painter or drawer would view the object or model to be copied. The more glaring errors to be particularly pointed out, so as to avoid their repetition.

“Marks of merit for clean and well written copies may, too, be given occasionally with advantage. A few of the more useful general rules of spelling to be familiarly exemplified. The reading of all the children to be particularly attended to; the words in a sentence requiring emphasis to be pointed out, also those which seldom receive a stress of voice, with a particular view to good reading; the children to be always made to understand what they read; the children to write exercises at home previously given them, and bring them to school directed to the master, who, after their examination and correction, can duly return them to the children.

“The lessons taught by the master during the day to be prepared the previous evening, and it would be well to draw the attention of the children to them each evening before they are dismissed, by writing their several pages on the black-board, so that they may come the better prepared to receive and understand the teaching of the master. The children to be always employed at some useful exercise. The master to question the children invariably on the lessons read, and occasionally when the books are closed to cause the children to state what they know of the lesson, to write it on their slates, and read it from their own writing. Perfect quietness to be observed during writing. The teacher never to give a second command until the first is obeyed; and to aim at governing the children by affection and reason, rather than by harshness and severity. The teacher always to remember that his teaching is intended for the whole class, so that he should never rest satisfied with an answer from one, but should put the question again and again, until answered and understood by all—at the same time answering aloud simultaneously is to be avoided.

“It

"It would be well if periodical examinations were held, so as to remove the "competent to the higher classes, and steps taken to acquaint the parents when their "children are so removed. All to be assembled in the playground fifteen minutes before "nine o'clock; examined as to personal cleanliness, drilled, and marched into school.

"Those who come late to be kept in the school the same length of time in the "evening that they were late in the morning, and employed at some specified and useful exercise.

"The same course of discipline to be observed at mid-day, and in the evening as "during the morning. All to go home in the order of their respective districts; and all "other suggestions not embodied in this schedule, and which I may have taken occasion to "introduce to the master's notice, as necessary for the efficient conduct of the school, to be "duly carried out.

"B. H. M'CANN."

CARCOAR.

1.—Town of Carcoar, parish of Errol, police district of Carcoar, county of Bathurst.

2.—The school premises are built of brick on a foundation of stone, and roofed with shingles of ironbark; the walls are very substantially built; the building is in good condition; requires a few improvements, which have been sanctioned by the Board of National Education, and will be made almost immediately.

3.—The entire building, including the teacher's residence, is built on an area of 2,246 square feet.

4.—The playground attached to the school, for the use of the pupils, contains 876 superficial square yards.

5.—The water-closets are substantial brick buildings on stone foundations; roofed with shingles; perfectly separated, and in good condition.

6.—There are two rooms—a large or general schoolroom, and a smaller or classroom. The schoolroom contains 765 superficial square feet, and 9,080 cubic feet; the classroom, 252 superficial square feet, and 3,024 cubic feet.

7.—The smaller or classroom being intended chiefly for special purposes, as, for instance, religious instruction by a Clergyman, committee room for the Local Patrons, &c.; the large room is the place in which the scholars usually assemble for instruction; the average number of pupils usually assembled there, for the year ending 30th September, 1858, was forty-one.

N.B.—The number is larger at the present time.

8.—In the schoolroom there are four and in the classroom two large windows, made to open at top at a height of from 7 feet to 9 feet 6 inches from the floor; each opening contains about 7 square feet, affording sufficient ventilation.

N.B.—This method of ventilation is not good; in windy weather it is very unpleasant, at times, useless. Ventilators in the roof are much preferable.

9.—On rolls:—boys, 22; girls, 33. Total, 55. Average daily attendance:—boys, 16; girls, 25. Total, 41;—for the year ending 30th September, 1858.

10.—Boys, maximum, 14; minimum, 3. Girls, maximum, 16; minimum, 3.

11.—The scholars are classified in accordance with the table of minimum attainments published by the Board of National Education; the classes, four in number, are named from the reading books used. Average number, 1st class, 23; 2nd class, 11; sequel class, 13; 3rd class, 8; total, 55. Maximum age, 1st class, 9 years; 2nd class, 13 years; sequel class, 16 years; 3rd class, 14 years. Minimum age, 1st class, 3 years; 2nd class, 5 years; sequel class, 7 years; 3rd class, 10 years.

12.—The pupils attend school 5 hours each day; the duties of the school commence at 9 A.M. and close at 4 P.M.; an interval from 12, noon, to 2 P.M. for dinner and recreation on the playground.

13.—The school is closed on Saturday and Sunday (of course); the vacations for 1858 were two, each one week, and occurred at Christmas and Easter.

14.—The total number of days appropriated to school duties during the year,—244.

15.—This school (commenced 2nd November, 1857,) has not been in existence long enough to furnish a return of the length of the period during which pupils, from the time of their first entrance to the time of their finally leaving school, remain there.

16.—There may possibly be as many as 20 in the district, between the ages of 5 and 15, who do not usually attend the school.

17.—The fees for instruction, as fixed by the Local Patrons, are, for the first pupil from a family, 1s. 6d. per week; second ditto, 1s.; third ditto, 6d.; all above that number, 6d. The average is less than 1s. per week; the fees were so arranged to meet the cases of large families. 2s. per annum are charged to each pupil for books, as directed by the Board of National Education; the maximum total annual charge for each pupil, £3 17s.; the minimum, £1 7s.; the actual average, £1 16s.

18.—Ninety-five pounds one shilling and six-pence (£95 1s. 6d.) the teacher's emolument; £108, teacher's salary from the Board of National Education; £4 16s. 6d., book fund, from pupils; two hundred and seven pounds eighteen shillings, (£207 18s.)

19.—£3 15s. 7½d.

20.—The first class receive instruction in reading, writing, and arithmetic, with object and other lessons; the second and sequel classes, in addition to the above, are instructed in English grammar and geography; in the third class, composition and book-keeping; the girls receive instruction in needlework; three-quarters of an hour is the time allotted to each subject of instruction.

21.—The only books used in the several classes in the school, are those sanctioned by the Commissioners of National Education; the classes are named from the reading books; the other books are used in common; first book of lessons; second book of lessons; sequel to the second book, No. 1; sequel to the second book, No. 2; third book of lessons; fourth book of lessons; supplement to the fourth book, English grammar; an attempt to simplify English grammar; arithmetic in theory and practice; book-keeping; epitome of geographical knowledge; a compendium of geographical knowledge; geography and history; Scripture lesson (Old Testament, No. 1); Scripture lesson (Old Testament, No. 2); Scripture lessons (New Testament, No. 1); Scripture lessons (New Testament, No. 2); Sullivan's English dictionary; spelling-book, superseded; geography generalized. Reading books, Nos. 1 and 2 are much worn; all the rest are in good condition; the numbers in use are adequate to the wants of the school; as far as books, which are at present obtainable, are concerned, no other kinds are necessary, but it is a serious evil that the only books obtainable are those adapted for the use of children in Great Britain and Ireland; a new set of books of an Australian character are imperatively requisite, and could now be prepared if a proper movement were set on foot, and a sum of money, commensurate with the object, appropriated to the purpose.

22.—The maps are the large school maps, constructed by Arrowsmith for the National Schools of Ireland, and published by Smith, of London; the maps in use are, The World (two Hemispheres), Europe, Asia, Africa, America, Australia, England, Ireland, Scotland; there are also 2 diagrams on the steam engine, one a section of the locomotive engine, the other a section of the double-action condensing engine; 3 small diagrams of the comparative sizes of animals, published by Darton; a black-board, 4ft. 4in. by 2ft. 10in., with easel-stand; a frame with 144 balls on 12 wires, for arithmetical calculations with the junior classes, and a plain map-stand; all the above are in good condition; the educational apparatus of the Colony is extremely meagre and certainly inadequate to the requirements; boxes of moveable letters have been used with much success in England, in promoting the progress of young children in reading; the maps imported are not such as are most useful in our schools; good school maps of New South Wales, Victoria, South Australia, Western Australia, Tasmania, New Zealand, the Polynesian Islands, the East Indies, the Pacific Ocean, the Indian Ocean, &c., are much wanted, and they should be constructed on some definite scale; a geological map of New South Wales; a few physical maps, shewing the currents of the Ocean, prevailing winds, &c.; a Celestial chart for the Southern Hemisphere, and astronomical diagrams, would be valuable additions, and should be accompanied by a treatise on geography, especially adapted to them; some good tablets from "Gould's Birds of Australia" and kindred works, would be a boon; cases of objects for lessons, properly selected and prepared, with a manual for the teachers, would be a great benefit. The preparation of these requisites and of suitable books, is a duty too important to be left to individual effort, and too vast for private resources.

23.—In cases of moral delinquency (*e.g.*), wilful disobedience, falsehood, use of improper or indecent language, corporal punishment is inflicted *privately*; minor breaches of discipline are punished by loss of position in class, &c., &c.; no instructions on this subject have been given by any Board, Inspector, visitor, or manager.

24.—The school was examined twice during the year by the Inspectors appointed by the Board of National Education; no prizes are given periodically in the school, no funds being available for such purpose; the only rewards of merit given are special rewards for special reasons, and provided by the teacher from his private resources.

25.—The school has been inspected by W. Wilkins, Esq., Superintendent of National Schools, and B. H. McCann, Esq., Organizing Master of National Schools; two days were occupied in the examination; reports have been made to the Board of National Education, but no copies of such reports have been furnished to the teacher.

NOTE.—If all official reports were printed, or copies furnished to the teachers, it would probably tend to the improvement of the schools.

26.—John Poole Ollis.

27.—No assistants, pupil teachers, or monitors, are attached to this school.

28.—Portsea, Hampshire, England.

29.—36 years.

30.—1st October, 1857.

31.—A trained teacher.

32.—At the Normal School of the British and Foreign School Society, Borough Road, London—six months, prior to the issuing of certificates under the Minutes of Privy Council; but by the Board of National Education the teacher is classified as Class II, Section B.

33.—

34.—£108 per annum.

35.—Fees from pupils, £95 1s. 6d.

36.—£203 1s. 6d., year ending 30th September, 1858.

37.—The Scripture lessons, as published by the Board of National Education, are read daily, as part of the usual business of the school; during his incumbency the Revd. H. Tingcombe (E.C.) visited the school regularly every week for the purpose of imparting religious instruction to the children of that denomination; the present incumbent has established a private school at his own residence; he has not visited the National School for that purpose; the Revd. H. Tingcombe used the Bible in the authorised version, and Questions illustrating the Catechism of the Church of England, by the Ven. John Sinclair, published by the Society for Promoting Christian Knowledge.

J. P. OLLIS,
Teacher.

CASTLEREAGH.

CASTLEREAGH.

- 1.—Nepean River, Castlereagh.
- 2.—Weatherboard erection, the present condition sufficiently comfortable.
- 3.—576 superficial square feet.
- 4.—There is an acre of ground fenced in belonging to the school buildings; of this only a small portion is found requisite for the use of the children, the whole of the land adjoining being available for their use.
- 5.—There is but one water-closet, constructed of slabs; as the school is not a large one this is found sufficient for present requirements.
- 6.—There is but one room—576 superficial square feet, 6,336 cubic feet.
- 7.—Average attendance, 18 children.
- 8.—There are four good sized windows, each of which can be drawn up so as to admit the air.
- 9.—The annual average number on the books, 34—19 boys, 15 girls; average attendance, 18—11 $\frac{3}{4}$ boys, 6 $\frac{3}{4}$ girls.
- 10.—Boys, 5 to 14 years; girls, 5 to 14.
- 11.—Three classes:—1st class, 17.5; 2nd, 11; 3rd, 5.5. 1st class, 5 to 11 years of age; 2nd, 9 to 14; 3rd, 11 to 14.
- 12.—5 hours; from 9 o'clock till 12, and from 2 till 4, the interval devoted to recreation.
- 13.—Only one holiday each week, Saturday; only one vacation during the year, viz., one week at Christmas.
- 14.—255 days appropriated to school studies during the year.
- 15.—I have not held the office of teacher sufficiently long to be able to answer this question.
- 16.—There are about 25 children in the locality, between the ages of 5 and 15 years, that do not attend this school.
- 17.—There are nine pupils admitted gratis in consideration of the poverty of their parents. Our scale of fees is 6d. for every child under 10 years of age, and 9d. for all above. There has been no charge for books hitherto.
- 18.—The annual amount of school fees, £27 9s. 8d., which is devoted to a supplement to the teacher's salary; salary granted to teacher from National Board, £60 per annum; amount received from all sources, £87 9s. 8d.
- 19.—Average annual cost of the education of each pupil, £2 11s. 5 $\frac{1}{2}$ d.
- 20.—On Monday, Wednesday, and Friday:—1st class from 9 to 9 $\frac{3}{4}$, writing on slates; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, reading; 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$, tables; 11 $\frac{1}{4}$ to 12, writing on slates from dictation. Afternoon:—2 to 2 $\frac{3}{4}$, reading; 2 $\frac{3}{4}$ to 3 $\frac{1}{2}$, writing on slates; 3 $\frac{1}{2}$ to 4, tables, &c. 2nd class, 9 to 9 $\frac{3}{4}$, arithmetic; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, geography; 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$, reading; 11 $\frac{1}{4}$ to 12, writing in books. Afternoon:—2 to 2 $\frac{3}{4}$, reading; 2 $\frac{3}{4}$ to 3 $\frac{1}{2}$, arithmetic; 3 $\frac{1}{2}$ to 4, writing on slates from lesson books. 3rd class, 9 to 9 $\frac{3}{4}$, reading; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, grammar; 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$, arithmetic; 11 $\frac{1}{4}$ to 12, writing in books. Afternoon:—2 to 2 $\frac{3}{4}$, Scripture lessons; 2 $\frac{3}{4}$ to 3 $\frac{1}{2}$, arithmetic; 3 $\frac{1}{2}$ to 4, writing on slates from lesson books.
Tuesday and Thursday:—1st class, 9 to 9 $\frac{3}{4}$, reading; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, writing on slates; 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$, tables; 11 $\frac{1}{4}$ to 12, writing on slates from dictation. Afternoon:—2 to 2 $\frac{3}{4}$, reading; 2 $\frac{3}{4}$ to 3 $\frac{1}{2}$, writing on slates; 3 $\frac{1}{2}$ to 4, tables, &c. 2nd class:—9 to 9 $\frac{3}{4}$, reading; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, arithmetic; 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$, grammar; 11 $\frac{1}{4}$ to 12, writing in copy-books. Afternoon:—2 to 2 $\frac{3}{4}$, reading; 2 $\frac{3}{4}$ to 3 $\frac{1}{2}$, arithmetic; 3 $\frac{1}{2}$ to 4, tables, &c. 3rd class, 9 to 9 $\frac{3}{4}$, arithmetic; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, reading; 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$, geography; 11 $\frac{1}{4}$ to 12, writing in copy-books. Afternoon:—2 to 2 $\frac{3}{4}$, Scripture lessons; 2 $\frac{3}{4}$ to 3 $\frac{1}{2}$, arithmetic; 3 $\frac{1}{2}$ to 4, mental arithmetic.
- 21.—Books used in the school:—1st class, 1st book lessons; 2nd class, sequel No. 1 to second book of lessons, 1st book of arithmetic, English grammar, Sullivan's introduction to geography; 3rd class, third book of lessons, Scripture lessons (O. and N. T.), English grammar, geography, arithmetic. The books are all in good condition, and they are at present found sufficient for the requirements of the pupils.
- 22.—The school contains tables, forms for the children, desks for writing, map of the World, and printed lessons.
- 23.—The system of correction is that which is usually employed in National Schools. I have had instruction on the subject from the Inspector.
- 24.—Previous to its becoming a National School it was examined annually by the Rev. J. Cameron; since it has been under the control of the National Board it has been examined once by the Inspector of National Schools. There has not been, hitherto, any distribution of prizes to the pupils.
- 25.—Since it has been a National School it has been visited once by the Inspector.
- 26.—Edgar Fuller.
- 27.—
- 28.—Waltham Abbey, Essex, England.
- 29.—34 years of age.
- 30.—20th July, 1857.
- 31.—Not trained.
- 32.—
- 33.—Although I have not been trained as a teacher, I have had three years experience in teaching as a monitor, in England, under the British and Foreign System connected with the Boro' Road School. My occupation before adopting that of teacher was clerk in a mercantile house.
- 34.—Teacher's salary, £60 per annum.
- 35.—Fees, £27 9s. 8d.

36.—£87 9s. 8d., total annual income of teacher.

37.—The only books used in the school for religious instruction are those supplied by the Board, viz., Scripture lessons.

*National School, Cessnock,
11 March, 1859.*

Sir,

I have the honor, by your directions, contained in circular No. 26, of the 15th ultimo, to submit the following Return to the National Board.

2. As my appointment was made by the Board on the 17th ultimo, and the school shall only be opened on the 14th instant, you can see that I can answer only very few of the questions required.

I have, &c.,
GEORGE CARROLL.

W. C. Wills, Esquire,
Secretary, Board of National Education,
Sydney.

CESSNOCK.

- 1.—Township of Cessnock.
- 2.—Constructed of brick, well plastered inside, and has a verandah, needs no repairs or improvement.
- 3.—286 square feet.
- 4.—9,680 square yards.
- 5.—One water-closet, built of brick, 5 feet square, in good condition.
- 6.—Only one room—286 square feet, and 2,288 cubic feet.
- 8.—One French casement, and one window that opens.
- 26.—George Carroll.
- 28.—County Limerick, Ireland.
- 29.—54 years.
- 30.—17th February, 1859.
- 31.—Not trained.
- 33.—Was nine months teaching a private school. Occupation before teaching—had a situation in the Legislative Council, and also at the Tarban Creek Lunatic Asylum.

CLARENCE TOWN.

- 1.—This school is situated at Clarence Town, Parish of Uffington, Police District of Dungog, County of Durham.
- 2.—The schoolrooms and teacher's residence are built of brick on a stone foundation.
- 3.—The whole building occupies an area of about 1,722 square feet, exclusive of a slab kitchen detached, about 14 x 12.
- 4.—There is an acre of land attached to the premises.
- 5.—There is a slab water-closet divided into two compartments, with two holes in each, and in good repair.
- 6.—The schoolroom contains 486 square feet, and about 4,860 cubic feet. The classroom, designed for religious instruction, contains about 150 square, and 1,425 cubic feet.
- 7.—All the children assemble in the schoolroom, and about 20 are usually taken to the classroom; the rest, numbering from 40 to 70, are taught in the schoolroom.
8. There are four windows in the two rooms, each $4\frac{1}{2}$ x 3 feet; the top sashes are let down.
- 9.—The annual average number of pupils on the books for the last three years was (111) one hundred and eleven, of which 53 were boys and 58 girls; the average daily attendance during the same period was 38 boys and 42 girls,—total 80.
- 10.—The maximum age of either sex is 14, the minimum 3 years.
- 11.—There are 5 classes in the school;—in the first class the ages range from 3 to 10; in the second, from 5 to 9; in the sequel, from 7 to 13; in the third, from 9 to 12; in the fourth, from 10 to 14.
- 12.—The hours of attendance are from 9 to 12 a.m., and from 1 or 2 to 3 or 4 p.m., respectively. There is a recess of 5 minutes for the boys, and the same for the girls, at 10 $\frac{1}{2}$ a.m., the former commencing when the latter ends.
- 13.—Every Saturday, the 26th January, 24th of May, and Good Friday, with a fortnight at Christmas, are the holidays observed.
- 14.—The number of days appropriated to school duties are 240.
- 15.—The average length of the time intervening between the first entrance into the school and their final leaving is about 3 years; this is not to be regarded as the average time each spends at school.
- 16.—The number of children between the ages of 5 and 15 years cannot be ascertained, but as the Census Returns give 295 as the whole population, nearly two-fifths have been in attendance at school.
- 17.—The weekly, half-yearly, or annual sum charged for each, varies according to the reputed circumstances of the parents, and averages five-pence per week for each; the total amount of fees received during the year ending 30 September, 1858, amounted to £117 16s. 7d., which formed a part of the teacher's salary.

18.—The teacher's salary from the National Board amounted to £120; and the salary of two pupil teacher's to £88 2s. 6d.; received for books, £6 2s. 8d.; in all, £332 0s. 9d.

19.—The annual average total cost of each child was £2 19s. 10d.

20.—During the forenoon each day, reading, writing, and arithmetic are taught; grammar and geography every alternate day; three-quarters of an hour to each subject is devoted. Book-keeping, algebra, and geometry are taught to the more advanced boys; in mechanics and other subjects the children are incidentally instructed in the course of their lessons.

21.—The pupils are instructed in the books published by the Board of National Education, of which there is a fair supply, and in tolerably good order. The children provide themselves with slates and copy-books; Chamber's algebra and Simpson's euclid are also used.

22.—The following maps and prints are used:—Map of the Ancient World, the World, Australasia, Asia, Australia, New South Wales, Africa, America, Scotland, England, Ireland, and Europe. Diagrams illustrating natural philosophy, 2 sheets; do. do. forms and colour, 2 sheets; do. do. zoology, 3 sheets; 1 do. planetary system.

23.—The teacher exercises his own judgment as to the nature and extent of punishment; but it is more by moral influence than by corporal punishment that the pupils are governed; it is when the former appears to be disregarded that the latter is resorted to, which consists of a caning on the hand. No instructions on this subject have been received from any superior authority.

24.—The school is examined once a year by the Inspector of National Schools, and about four times a year by the Organizing Master; no prizes are distributed.

25.—The official visits extend to from one to two days of close examination. The only reports on the state of the school accessible to the teacher are two entries in the Report-book by the Organizing Master, as follows:—

“9th February, 1858. Visited the school this day and found 87 children present, neat and clean. The pupils are making very satisfactory progress. W. McINTYRE.”

“19th May, 1858. Visited the school to-day, and found 85 pupils present, making good progress. W. McINTYRE.”

26.—The teacher's name is James Rutledge.

27.—The teacher is assisted by his wife, and also Donald and Kate McCormack, pupil teachers.

28. 29.—James Rutledge born in Ireland, is in the 42nd year of his age; his wife in Australia, is 33. Donald and Kate McCormack also born in Australia, are 19 and 17 respectively, and are in the fourth year of their apprenticeship.

30.—Was appointed to the Drayton National School, August, 1851, transferred to this school, 1855.

31. 32.—Not specially trained beyond spending a month at the National Model School, Sydney; holds Class II, Sec. A.

33.—Was nearly eight years a teacher under the Denominational Board, and two years a private teacher.

34.—The teacher's salary is £120. Salaries of two pupil teachers, £88 2s. 6d.

35.—The school fees, in addition to a house rent free, amounted to £117 16s 7d.

36.—Total amount of income on the 30th September, 1858, £325 19s. 1d.

37.—The Rev. A. Wayn, of the Church of England, frequently visited the school; and his successor, the Rev. T. L. Dodd, has also visited the school for the purpose of expounding the Holy Scriptures to the Protestant children; the Rev. R. Blain and Mr. William Johnstone have attended the school for the purpose of giving instruction to the Presbyterian children; it is presumed the Bible was the book used on these occasions.

JAMES RUTLEDGE,
Teacher.

CUNDLETOWN.

1.—On the Manning River.

2.—This is a wooden building with brick chimneys, and in good condition, being nearly new. In my opinion the only improvement needed is another coat of paint, as a preservative from the weather.

3.—The superficial content of the floors of the whole building is 1,540 feet, which includes 392 feet as a teacher's residence.

4.—There is one acre enclosed, and being forest ground the children enjoy the use of at least one-half of it.

5.—There are two suitable water-closets, in good repair, one for each sex, and built at a proper distance from each other.

6.—The superficial content of the schoolroom alone is 756 square feet, and solid content 7,560 feet. There are two classrooms, each consisting of 196 square feet, and solid content of each 1,960 feet.

7.—Forty in the schoolroom, and twenty in the classroom.

8.—Ample provision is made, the windows are large and so constructed that they either open partially or altogether, as may be necessary.

9.—Annual average on the books for the year ended December, 1858, 66. Annual average attendance for same period, 44. Of the roll number 66, 39 were males and 27 females. Of the annual average, 26 were males, and 18 females.

10.—Maximum age of males, 13; of females, 13. Minimum age of males, 3; of females, 4.

11.

11.—The school is divided into three distinct classes, but one of the classes consists of two divisions. Average in first class, 30; of second class, 23; in third class, 9. In first class, maximum age, 11; minimum age, 3; second class, maximum age, 13; minimum age, 5; third class, maximum age, 13; minimum age, 8.

12.—Six hours school. School commences at ten o'clock, and terminates at 4 o'clock, with one hour's intermission, viz., from 1 to 2 o'clock; during which all the children who live within a reasonable distance of the school go home to dinner; the others remain under my observation, and eat their dinners on the playground.

13.—By the general consent of the Local Patrons there is no school on Saturdays, but there is school on all other days, Sundays excepted. Since my connection with the Board, the only vacation we have had, has been ten days at Christmas, from the 24th December to the 2nd of January inclusive.

14.—254 days.

15.—This is a question to which I cannot give a very satisfactory solution, inasmuch as this school has only been in operation for one year and seven months. In looking over the register there are only four which I consider have finally left; and the average time which they remained was three months.

16.—At present I am not aware of any. The great majority of the population here, of all religious denominations, seeming to approve heartily of the National System, avail themselves of it to the utmost extent.

17.—Quarterly school fee for each pupil, 6s. 6d.; quarterly book fee for each, 6d., or 2s. annually;—total annual charge for each, £1 8s. According to a regulation of the Local Patrons of this school, parents of limited means can have their children taught at one-half the above rates.

18.—School fees for the year ending 30th September, 1858, £42 4s. 2d. The school fees are applied in the way of augmenting the teacher's income. Salary from the Board of National Education for the year ending 30th September, 1858, £108. Total, £150 4s. 2d.

19.—The annual average for the period above-mentioned was 41; consequently the average annual total cost of each was £3 13s. 3¼d.

20.—

TIME.	1ST. CLASS.	2ND.	3RD.
10—10 ⁵ / ₆	Inspection as to cleanliness and neatness of person and dress.		
10 ⁵ / ₆ —11	Reading, &c.	Writing on slates.	Arithmetic.
11—11 ¹ / ₂	Writing on slates.	Reading, &c.	Writing from dictation.
11 ¹ / ₂ —12	Learning to make digits.	Arithmetic.	Reading, &c.
12—12 ³ / ₄	Preparing a lesson.	Writing in copy-books.	
12 ³ / ₄ —1	Marking the class rolls, report book, &c.		
1—2	Recess.		
2—3	Reading, &c.	* Reading and Geography. † Reading and parts of speech.	Scripture extracts.
3—3 ¹ / ₂	Slates.	Multiplication Table.	* Geography. † Grammar.
3 ¹ / ₂ —4	Mental arithmetic.		
4—	Reading and explaining the general lesson.		

* On Monday, Wednesday, and Friday.

† On Tuesday and Thursday.

21.—The books used are those sanctioned by the Commissioners, and are as follows:—First book of lessons, 1st class; second ditto, 2nd class; third ditto, 3rd class; English grammar, 2nd and 3rd classes; arithmetic, 2nd and 3rd classes; Sullivan's spelling-book, superseded, 2nd and 3rd classes; introduction to geography, 2nd and 3rd classes; Sullivan's geography generalized, 3rd class; ditto dictionary, 3rd class; Scripture extracts, O.T. Nos. 1 and 2, N.T. Nos. 1 and 2, 3rd class.

The above list does not comprise all the books we have in hand, but only those at present in use. No other books are at present needed. The books are in good condition, and the school is adequately supplied.

22.—General lesson, notice to visitors, table of minimum attainments for each class, map of the World, Europe, Asia, Africa, America, Australia; there is also a black-board and a globe; they are all in good order, and no others are at present needed.

23.—For any palpable breach of discipline a child may be kept in school and denied the use of the playground; but as a general rule I aim at governing the children by kindness combined with firmness, and beating is seldom resorted to, unless the pupils are guilty of acts of cruelty or of disobedience. There are no instructions from any source on this subject.

24.—During the year the children of this school have been examined once by the Organizing Master of National Schools. No prizes or other rewards have been given.

25.—The Local Patrons individually visit the school occasionally. The head master of the National Model School, Sydney, visited, but did not examine this school, during the present year. In November last it was visited and examined by Wm. M'Intyre, Esq., Organizing Master, National Schools. The examination occupied about six hours. The only report existing, is as follows:—

“4th November, 1858. Visited this school to-day, and found 43 pupils present, neat and clean, and making satisfactory progress. Wm. M'INTYRE.”

I consider the school is at present in a flourishing condition, and has steadily increased since the time it was opened. It was opened nineteen months ago, with 23 pupils, and the actual attendance to-day (2nd March) was 65 pupils.

26.—William Goudy.

27.—None. The teacher's wife teaches sewing, &c., and also renders some assistance in the literary department of the school.

28.—County Down, Ireland.

29.—Teacher's age, 29 years.

30.—W. Goudy took charge of this school in July, 1857; was appointed a teacher for a National School in New South Wales in October, 1855,—and was appointed teacher of a National School in Ireland in January, 1847.

31.—Trained.

32.—Trained for a period of five months at the National Model School, Dublin, and also for one month at the Model School in Sydney. Present classification, Class II, Section A, or highest division of second class.

33.—Trained, and always a teacher.

34.—Annual Board salary since 1st February of the present year, £120; previous to that date, £108 per annum.

35.—Amount of school fees received for the year ending December, 1858, £46 17s. 2d. Received also £1 as an allowance for postage.

36.—Total annual income, £155 17s. 2d.

37.—The Scripture extracts are read daily; and the principles of the general lessons are inculcated by the teacher. The school is visited occasionally by the Rev. Mr. Quinliven, R. C., who imparts religious instruction to the children of his own denomination. No other books of religious nature, besides the Scripture extracts, are used in the school.

I certify that the foregoing queries have been faithfully and correctly answered.

WILLIAM GOUDY,
Teacher.

DUNMORE.

1.—The locality where the school is situated is Largs, or Dunmore, Parish of Middlehope, District of Maitland.

2.—The school is of brick, in fair condition, and, with the addition lately made, sufficiently large.

3.—The number of superficial square feet in the building is 650.

4.—The number of superficial square yards in the playground is 2,420.

5.—There is one water-closet—of slabs, substantially built, and divided in two compartments for the boys and girls respectively.

6.—The number of superficial square feet in the schoolroom, 558, cubic feet in the same, 5,580; in the classroom, superficial 92, cubic, 644.

7.—The average number assembled in each of the rooms is 50 and 25.

8.—Provision is made for ventilation by letting down the windows and occasionally opening the doors; there is also a trap-door in the ceiling, and a fireplace. In the classroom ventilation is effected through the openings between the slabs.

9.—The annual average number on the books is—boys 55, girls 57, total 112; average number attending (daily)—boys 36, girls 37;—total, 73.

10.—The maximum and minimum ages of the pupils in the school are respectively 14 and 3 years.

11.—There are four classes. The maximum and minimum ages of the 1st, 3 and 8 years; of the 2nd, 7 and 12; of the sequel to the 2nd, 8 and 12; of the third, 10 and 14.

12.—The pupils attend school from 9 A.M. till 3½ P.M. The school duties commence at 9 and terminate at 12 A.M., with an intermission of 10 minutes, commencing at 10½; school is again commenced at 1½ and continued till 3½ P.M. The first part of the recess, commencing at 12 o'clock, is usually occupied by those who do not go home (the greater number) in taking dinners, which together with water are given out in order. The boys then commonly play at cricket, and the girls, such as are not sewing, at some play approved of by the teacher. In wet weather slates and pencils are given out and drawing is encouraged.

13.—There is one holiday (Saturday) in each week; vacations of a week each occur at Christmas, Easter, and Midwinter.

14.—The total number of days appropriated to school duties is 244.

15.—The average length of time during which pupils from the time of their first entrance to the time of their finally leaving school, 2 years 3 months.

16.—The number of children in the district between the ages 5 and 15 years who do not usually attend school is from 30 to 40.

17.—Pupils are charged according to the class they are in, 3s., 4s., 5s., 6s. quarterly, average for each pupil, 4s. 6d. ; the quarterly charge for books is 6d. each pupil ; total annual charge 14s., 18s., 22s., 26s. ; total average for each pupil is 20s.

18.—The annual amount of school fees received from the pupils of the school during the twelve months ending the 30th September, 1858, £48 17s. 6d., appropriated to the teacher as part of his income. Received from Board of National Education, as salary for self and assistant, £145 6s. 8d. ; total from all sources, £194 4s. 2d.

19.—Average number on roll 111 } £194 4s. 2d. { £1 14s. 11³/₄d. } Average cost of
In daily attendance 77 } { 2 10s. 5¹/₄d. } each child.

20.—Subjects of instruction given to each class :—

* Write answers to questions written on black-board while reading.

† Such as changing places, making up rolls, and singing.

21.—The books used in the several classes of the school are only those authorised by the Board of National Education ; grammars and geographies might, I think, be introduced better fitted to the requirements of the children, and the length of time for which they generally remain at school. The books in use are in fair condition, and the number adequate.

22.—There are in the school-maps of the World, Europe, Australia, Palestine, and of the Ancient World ; there are also 2 black-boards. It would be a great benefit to have a good sized globe, and charts descriptive of the animal and vegetable kingdoms ; also, such simple apparatus as would enable the teacher to demonstrate the more useful theorems of natural science.

23.—The principle aimed at in the government of the school is, that by controlling and pre-arranging, nothing of importance shall go wrong without being speedily discovered and checked. I endeavour, also, to make my intention clearly known, and to convince the children that the rules made are for their benefit. The usual punishment is gentle admonition, reproof, or detention from play ; corporal punishment is, however, employed in cases of obstinacy, or in other cases where its use is thought beneficial, but always carefully, and never continued after it accomplishes its object. No instructions from any source have ever been given on this subject.

24.—The school is examined only when the officers of the Board visit it. No prizes or rewards are given.

25.—The school is officially visited by the Inspector and Organizing Master. The time usually occupied is from 4 to 5 hours. No report of the school exists within the time, which I think, is contemplated by the question.

26.—Name of head teacher, James Fraser.

27.—Name of pupil teacher, Peter Durie.

28.—Teacher was born in Forfarshire, Scotland. Pupil teacher, Maitland, N.S.W.

29.—Teacher's age is 34. Pupil teacher's, 14.

30.—Teacher was appointed in November, 1851. Pupil teacher, August, 1858.

31.—Trained for a period.

32.—Trained first at Mr. Steele's Infant School, subsequently at the National Model School—in all about 5 months. Possess a 1st Class B Certificate of the National Board.

33.—Before becoming a teacher, assisted parents on a farm, occupying a considerable portion of time in study.

34.—Teacher's salary, £132. Pupil teacher's, £30 annually.

35.—Receive exclusive of salary about £48.

36.—Total annual income of teachers derived from school, £210.

37.—The children are carefully instructed in some portion of the Scripture lessons every school day, and their minds tried to be brought under the influence of the spirit of love and forbearance inculcated by the general lesson. No Clergyman ever visits the school for the purpose of instructing the children in religious knowledge.

EDEN.

1.—The schoolhouse is situated in the Township of Eden, Police District of Eden, Twofold Bay.

2.—It is constructed of brick, on a stone foundation; the building in good condition, requires no repairs nor enlargement.

3.—In the schoolhouse there are 818 superficial square feet, in the master's apartment, 292; total 1,201.

4.—The ground for the use of the pupils contains 9,680 square yards, or 87,120 square feet.

5.—The water-closets are of brick, they consist of three apartments, one for boys, one for girls, and a third for the teacher, each $4\frac{1}{2} \times 5\frac{1}{2}$ feet in length and breadth, 7 feet high, pit of stone and lime, in good condition.

6.—The schoolroom is the only apartment appropriated for teaching, containing 810 superficial square feet, 9,720 cubic feet.

7.—The average number of pupils assembled in the schoolroom, 48.

8.—In the centre of the ceiling there is a ventilator, besides plenty of air can be admitted by the windows, which are large, and can be raised at pleasure.

9.—The annual average number on the books is 74; the average number attending the school, 45—30 boys and 15 girls.

10.—The maximum age of the males 21 years, minimum 3 years; maximum age of the females 18 years, minimum 3 years.

11.—The school is divided into three classes; the average number in each class is 22;—maximum age in the first class, 21 years; minimum, 3 years; in the second class, maximum 16 years; minimum, 10 years; in the third class, maximum 14 years; minimum, 12 years.

12.—The pupils attend the school 5 hours each day, commencing at 9 o'clock, terminating at 12, resuming at 2 and terminating at 4; the interval of 2 hours for dinner and play.

13.—There is one holiday in each week; the only vacations sanctioned by the Board are from the 24 December to 2 January inclusive.

14.—There are 252 days appropriated to school duties during the year.

15.—The average length of time which pupils remain at school from their first entrance to the time of their final departure, 2 years.

16.—The number of children in the locality, between the ages of 5 and 15 years, who do not attend school, 20.

17.—The sum charged for each pupil is 9d. per week, 9s. 9d. per quarter, 19s. 6d. half-yearly, £1 19s. annually; 2s. yearly is charged for books, making a total annual charge of £2 1s.

18.—The school was not in operation during the whole time specified in the question, it was opened November 9th, 1857; but assuming the same rates of fees for the closed period as the next succeeding, the annual amount of fees received, £74 10s. 9d., appropriated by the teacher; no amount received from any other source.

19.—The average annual total cost of the education of each pupil, £4 1s.

20.—The subjects on which instruction is given to the first class are spelling, meaning of words, reading, punctuation, and answering simple questions on the subject matter of the first book of lessons; the second class is taught to spell all words in the second book of lessons; the third class to read fluently the third book of lessons, spell the words, give their meaning, synonymous terms, understand affixes and prefixes, parse English sentences with the geography of the places; $\frac{3}{4}$ of an hour allotted to each lesson.

21.—First book of lessons for the use of the first class, second book of lessons for the use of the second class, third book of lessons for the use of the third class; books in use are in good order, no others needed, those at present in use adequate to the wants of the school.

22.—There is the general lesson, the time table, instructions to visitors, visitors' book, register book, daily report book, the class roll, cards of arithmetic, reading cards, one black-board, 5 maps in use—the maps of the British Isles, Australia, and Palestine required; also, diagrams of natural history, mechanics' drawing, a terrestrial and celestial globe.

23.—The system of correction employed in this school is the rod and reproof; no instructions from any source, oral or written, on the subject.

24.—The pupils have been examined twice a-year by the teacher, in presence of the Patrons and parents, when books are distributed as prizes.

25.—The school has not been officially inspected since its opening, owing, I suppose, to its isolated position; the enclosed is a copy of a report on the state of the school from the Patrons, prepared by the Hon. Secretary and correspondent. His concluding suggestion is worthy of attention in order to the success of a school in the country districts.

26.—James Martin.

27.—Elizabeth Martin.

28.

- 28.—Ballynahinch, County Down, Ireland.
 29.—Master, 35 years; mistress, 25 years.
 30.—Appointed to present office, October 28th, 1857.
 31.—Trained.
 32.—Trained at the Model School, Sydney, for one month, possessing the 1st of the Second Class Certificate.
 33.—Many years experience previous to present appointment. Before adopting that of teacher, employed graduating at the Free Church College, Edinburgh, and the Royal College, Belfast.
 34.—Annual amount of salary for master and mistress, £120—£10 per month.
 35.—The annual fees amounted, for the year ending 30th September, 1858, to £74 11s. 9d.
 36.—Total amount annually, or total annual income of teachers derived from the school, £194 10s. 9d.
 37.—Scripture lessons are read each day, on the reading of which occasion is taken to inculcate all the precepts of the Christian Religion. The school has been visited by a Church of England Clergyman and a R.C. Priest, but neither gave any instructions from the want of a classroom for special religious instructions. The books used in school for the above purpose are Scripture lessons, N. T., Nos. 1 and 2, and O. T., No. 2.

ELING FOREST.

- 1.—Eling Forest, Police District of Berrima.
 2.—The walls of the school building are composed of slabs, plastered on the inside; the roof is shingled; and there are two chimnies, built of stone; with the exception of the plastering the building is in tolerably good repair.
 3.—The schoolhouse contains 300 superficial feet.
 4.—About 3,200 square yards.
 5.—A slabbed building, roofed and shingled, and properly fitted up for children.
 6.—One room, containing 300 superficial square feet, and about 3,600 cubic feet.
 7.—From January 1st to the week ending February 18th, of the present year, the average number has been twenty.
 8.—No special provision made for ventilation.
 9.—Number on the books, annual average, 41; in attendance, 24—males 15, females 9.
 10.—The maximum age of boys attending the school is twelve years, the minimum ditto four years; girls, maximum age, in attendance, 14 years, minimum ditto 5 years.
 11.—The school is divided into three classes; the first containing ten scholars, the second fourteen, and the third seven; the minimum age of children in the first class is four years, the maximum in ditto ten years; in the second class the minimum age is six years, and the maximum twelve; the third class minimum age is nine years, and the maximum fourteen.
 12.—The children are in attendance seven hours daily, Saturday and Sunday excepted. The school commences at 9 o'clock, A.M., and closes at 4 P.M., in summer, and 3 P.M. in winter. At half-past 10 A. M. there is a short recess, not exceeding fifteen minutes, to prevent the confusion and disorder that would be occasioned by children leaving the school-room during the hours of instruction; there is also a mid-day recess of two hours in summer, and one in winter, for dinner and recreation.
 13.—Saturday of each week is a holiday. There is one vacation during the year, extending over a period of ten days, from December 24th to January 2nd, both days inclusive. Good Friday is also kept as a holiday.
 14.—The total number of school days throughout the year is 250.
 15.—The average time children attend school is ten months two weeks and four days.
 16.—The number of children between the stipulated ages in the district or locality where the school is situated, not in attendance, is 63.
 17.—The school fees vary from 4d. to 1s. each, per week. The annual charge for books is 2s. each pupil. The total annual charge for each pupil varies from 19s. 4d. to £2 14s.
 18.—The annual amount of school fees received from the pupils of the school during the twelve months ending the 30th September, 1858, was £29 17s.—the amount was appropriated to augment the teacher's salary for the year in question; the sum of £96 was also received from the Government, through the Board of National Education, making the total amount received, from all sources, towards the support of the school during the above-mentioned period, £125 17s.
 19.—The average annual total cost for the education of each pupil, for the year ending 30th September, 1858, was £4 9s. 10½d.
 20.—The enclosed time table will shew the several subjects of instruction given to each class, and the precise portion of time allotted to each of such subjects in each day throughout the week:—

From 3 to 4 P. M. the girls are employed at needlework.

21.—The first book of lessons is used by the pupils of the first class for reading and spelling; the second book by those of the second class; and the following books are used in the third class—third book of reading lessons, spelling-book superseded, English grammar, epitome of geographical knowledge, Scripture lessons (Old Testament) No. 2, ditto (New Testament) No. 2, first book of arithmetic. One dozen each of the 1st and 2nd sequels to the second book are needed, and one dozen third books; with the exception of the latter the books in use are in good condition, and in number adequate to the wants of the school.

22.—The schoolroom is furnished with the requisite forms and desks, a black-board and easels. There are also the following maps, two of which are in good condition—the World, Australia, and Australasia. There is no particular need of further apparatus at present.

23.—The mode of correction for wilful breaches of the rules of the school is that of depriving them of the privilege of associating with their schoolfellows during the hours of recreation, for more serious offences slight corporal punishment. The instruction of the Board of National Education, as given in the Order Book, is to the effect that the school should be governed, as far as possible, by moral influence.

24.—The school is examined by the Inspector of the Board of National Education, during his annual or special visits to the school. Prizes of books have occasionally been awarded to those who have made the greatest progress in their studies.

25.—The school is officially visited by the Inspector and Board of Local Patrons. The visits of the former are annual or special, the latter visit the school monthly; the time occupied in such visits varies according to the amount of business to be done; the usual amount of time spent in such visits is from one to three hours.

26.—Henry Samuel Davenport.

27.—Rebecca Davenport.

28.—H. S. D., Southwark, London, England; R. D., Walton-on-the-Naze, Essex, England.

29.—H. S. D., 26 years; R. D., 30 years.

30.—December 1st, 1858.

31.—Not trained.

32.—Attended the Model School, Sydney, six weeks previous to present appointment, and now receiving remuneration according to Class 3, Section B.

33.—Several years experience in Sabbath and other schools in England, and nearly twelve months in a school of forty children on the station of J. Fleming, Esq., near Ipswich, Moreton Bay. Previous to being occupied as teacher was engaged for six years as assistant in the Banking House of Sir C. Price, Marryat and Price, London.

34.—A joint salary of £84 per annum.

35.—School fees amounting at present to 15s. per week.

36.—Not precisely known at present; the amount anticipated for the present year is about £114.

37.—Reading and explanatory instruction in the Scripture lesson books, daily, by the teacher. No special religious instruction has been given by any Clergyman or Minister of Religion during the two months of the present year.

JOHN MORRICE, Local Patron.

H. S. DAVENPORT,
Teacher.

FALBROOK.

1.—Falbrook.

2.—Wood; repairs needed, plastering inside and painting outside; sufficiently large.

3.—One room, 390 square feet.

4.—9,680 square yards.

5.—Wood; recently erected.

6.—One room; 390 square feet, 3,900 cubic feet.

7.—23·47 pupils.

8.—Ventilated by two doors and three windows.

9.—On the books 17·75 boys, 14·25 girls; attending, 13·67 boys, 9·79 girls.

10.—Maximum age of boys, 13 years, minimum, 4 years; maximum age of girls, 14 years, minimum, 2 years.

11.—Three classes; average, first class, 12; second class, 7; sequel to second class, 4. Age—maximum, 1st class, 11, 2nd class, 11, sequel to 2nd class, 14; minimum, 1st class, 2, 2nd class, 6, sequel to 2nd class, 10.

12.—Five hours each day; commence at 9 A.M., terminate at 4 P.M.; two hours (noon) for dinner and recreation; ten minutes at 10·30 A.M., for necessary calls, exercise, &c.

13.—Saturday in each week; vacation from 22nd December, 1858, to 3rd January, 1859 exclusive; holidays, two, viz :—26th January, and 2nd April (Good Friday), 1858.

14.—247 days during the year.

15.—Average time that pupils are on the , 202 days; average time they actually attend, 120 days.

16.—Four, within a radius of three miles.

17.—Annual sum, 18s. 5d.; ditto books, 2s.;—total, £1 0s. 5d.

18.—Commenced duties in January, 1858, can therefore furnish the amounts for nine months only.—School, £17 10s. 4d. part of teacher's income; salary from the Board, £63, from all sources, £80 10s. 4d.

19.—For nine months, £3 8s. 6d.

20.—First class, reading, writing, and elementary arithmetic; second, reading, writing, arithmetic, grammar, geography, general religious instruction, and natural history, by means of object lesson; sequel to second, same as above, and by means of object lessons, properties and uses of common substances. Religious instruction, 1 hour; reading and spelling, 1 hour; writing, 45 minutes; arithmetic, 1 hour; grammar, 25 minutes; geography, 35 minutes; other subjects, i.e., object lessons, 15 minutes.

21.—First class, 1st book of lessons; second class, 2nd book of lessons, grammar, geography, 1st arithmetic and Scripture lesson N. T. No. 1; sequel to second class, same as above, and sequel book No. 1; sequel book No. 2, none; number of 1st arithmetics inadequate; books in fair condition.

22.—Prints and diagrams, none; the maps are :—the World, Europe, England and Wales, two small maps of Palestine, and one of the British Isles, in good condition; wanted, diagrams in mechanics prints on natural history, black-board and easel, square and compass.

23.—For want of punctuality in attendance, corporal punishment and detention after hours; for disobedience and lying, corporal punishment; and for disorder, neglect, noise, &c., admonition and detention after hours. No instructions written or otherwise have been received on this subject.

24.—Mr. M'Intyre, Organizing Master, examined the pupils three times; no prizes have been given.

25.—The Organizing Master, three times, four hours each time. Observation of Mr. William M'Intyre, recorded in Visitors' Book, "The pupils attending this school are improved since my last visit."

26.—James McClelland.

27.—None.

- 28.—Banbridge, County Down, Ireland.
 29.—23 years.
 30.—January 6th, 1858.
 31.—Trained as teacher.
 32.—Model School, Sydney, for six months; Certificate, Class III. B.
 33.—Manager or overseer of warehouses.
 34.—£84.
 35.—£25 7s. 10d.
 36.—£109 7s. 10d.
 37.—The children of the Presbyterian religion have been instructed once by the Revd. Mr. M'Cullough—book used, the Holy Bible.
 I certify that this Return is correct.

JAS. M'CLELLAND, Teacher.

THOMAS BALDOCK, Local Patron.

FISHERY CREEK.

- 1.—Fishery Creek, near West Maitland.
 2.—Wood; new, and needs no repairs nor other improvements.
 3.—The whole building contains 1,152 square feet.
 4.—The land adjoining the school, for the use of the pupils, contains 2,420 square yards.
 5.—There are two spacious and separate water-closets for the use of the children; new, neatly built, weatherboarded and shingled.
 6.—The schoolroom contains 480 square feet, and 4,800 cubic feet; the classroom contains 160 square feet, and 1,600 cubic feet.
 7.—The average number of pupils usually assembled in the schoolroom, 29, and those usually in the classroom, 14.
 8.—The windows are well adapted for ventilation, and the school is built in an open and airy situation.
 9.—The average number of pupils on the books since the school was opened, 29—males, 18; females, 29. The average daily attendance for the same period, 29—males, 11; females, 18.
 10.—The maximum age of the males, 12 years,—of the females, 12 years; minimum age of the males, 5 years,—females, 4 years.
 11.—The school is divided into two classes. The average number in each class is 22, and the maximum age of the first class 10 years, minimum 4 years; maximum of the second class 12 years, and minimum 6 years.
 12.—The pupils attend school for 7 hours each day; school commences each day at 9 o'clock, A.M.; and closes at 4 o'clock, P.M. The times of cessation of school business between these hours are from 30 minutes past 10 o'clock to 40 minutes past 10, and from 12 to 2 o'clock for dinner and play.
 13.—Saturday each week is allowed as a holiday. There are three vacations during each year, each lasting one week, occurring at Easter, Midwinter, and Christmas.
 14.—There are 225 days during the year appropriated to school duties.
 15.—The average time the pupils usually attend school, from the time they are first admitted till the time they finally leave, cannot be told in this school as it is not long enough in operation.
 16.—There are twelve children in the locality, between the ages of 5 and 15 years, who have not attended this school.
 17.—The annual and average total charge for the instruction of each pupil is 22s. 5½d. No fee is charged for books.
 18.—This school has only been twenty-three weeks in operation previous to the 30th September, 1858; the school fees for that period, £12 15s. 6d. Salary from the Board for the same period, £45 4s. Total amount received from all sources for the above-mentioned time, £57 19s. 6d.
 19.—The average total cost per year for the education of each pupil is £4 2s. 6d.
 20.—The subjects of instruction given to each class, and the time allotted to each subject in each class, during each day in the week, are as follows:—First class—read, 1 hour and 30 minutes each day; write, 1 hour and 15 minutes; grammar, 30 minutes; geography, 45 minutes; arithmetic, 50 minutes. Second class—read, 1 hour; write, 1 hour and 15 minutes; grammar, 45 minutes; geography, 45 minutes; arithmetic, 1 hour and 5 minutes.
 21.—The books used in the school are those published or sanctioned by the National Board of Education in Ireland—they are in fair condition, there is a sufficient supply, and no other kinds of books are required.
 22.—There are no prints, diagrams, or other apparatus in the school, but one map of the World, and one black-board. The maps of Australia and America are the only others at present required.
 23.—The pupils are governed by moral influence. No instructions of any kind have ever been received from any person on the subject.
 24.—This school has never been examined except officially for the purpose of ascertaining the progress of the pupils. No rewards of any kind have ever been distributed among the pupils.
 25.—The school has been officially examined by the Board's Organizing Master three times during the past ten months; his first visit occupied two days; his other visits each one day. No report on the state of the school exists. The Organizing Master at his last visit appeared

appeared satisfied with the progress made by the pupils, and left no suggestions for the future management of the school.

26.—Teacher's name, William Thompson.

27.—Assistant teacher's name, Esther Thompson.

28.—Both teachers born County Antrim, Ireland.

29.—Teacher's age, 22; assistant's age, 24 years.

30.—They were appointed to the present office on the 13th April, 1858.

31.—Teacher was trained at the National Model School, Ballymena, County Antrim, Ireland.

32.—And trained at the Model School, Fort-street, for the period of three weeks, possessing Third Class Certificate of competency.

33.—Occupation of teacher, before adopting that of a teacher, was that of a school boy.

34.—Annual and joint salary of teachers, £96.

35.—Annual amount of school fees about £30.

36.—Total annual income of teachers, £126.

37.—Religious instruction is given one hour each day by the teacher to all children who are able to read, and whose parents approve of their reading the Scripture extracts furnished by the Board. No Minister of Religion has ever visited the school.

I certify this return is correct.

WILLIAM THOMPSON, Teacher.

FORT-STREET, SYDNEY.

1.—This school is situate in Upper Fort-street, Parish of St. Philip, and City of Sydney.

2.—The school buildings are constructed of stone and brick; they do not need repairs, improvement, or enlargement.

3.—The area of the school-buildings covers 11,535 square feet.

4.—The area of the school-grounds is 7,123 square yards.

5.—The water-closets are placed in the least exposed parts of the playground; that set apart for the boys' use is placed at the southern extremity, the girls' at the northern; they are in good repair.

6.—The boys' schoolroom contains 2,040 square feet, 36,400 cubic feet; the girls', 2,040 square feet, 36,400 cubic feet; two cloak-rooms, 358 square feet, 3,570 cubic feet. The infants' school includes 4 rooms:—No. 1 contains 576 square feet, 6,912 cubic feet; No. 2 contains 576 square feet, 6,912 cubic feet; No. 3 contains 288 square feet, 3,456 cubic feet; No. 4 contains 243 square feet, 3,037 cubic feet. In addition to this, 1,746 square feet of piazza or verandah are appropriated to the use of the pupils in unfavorable weather.

7.—In the boys' school 260 pupils are usually assembled; in the girls' school, 150 pupils; in the infants', 220 pupils.

8.—In the boys' school there are 2 doors and 9 windows, besides 2 ventilators in the ceiling. In the girls' school, the same. In the infants' school:—Room No. 1 has 1 door, 4 windows; room No. 2, has 1 door, 4 windows; room No. 3 has 2 doors, 2 fanlights; room No. 4 has 1 door, 4 windows.

9.—Annual average number on the books for 1858:—Boys, 495; girls, 312. Average attendance:—Boys, 413; girls, 241.

10.—The maximum age of the pupils is 16 years; the minimum, 2½ years.

11.—The boys' school has 6 classes. Average number in class:—1st class, 20 boys, maximum age, 11 years, minimum age, 7 years; 2nd class, 78 boys, maximum age, 13 years, minimum age, 7 years; sequel class, 76 boys, maximum age, 12 years, minimum age, 7 years; 3rd class, 38 boys, maximum age, 13 years, minimum age, 9 years; 4th class, 48 boys, maximum age, 14 years, minimum age, 9 years; 5th class, 30 boys, maximum age, 16 years, minimum age, 10 years. The girls' school has 6 classes. Average number in class:—1st class, 33 girls, maximum age, 12 years, minimum age, 7 years; 2nd class, 34 girls, maximum age, 11 years, minimum age, 6 years; sequel to 2nd class, 48 girls, maximum age, 12 years, minimum age, 7 years; 3rd class, 26 girls, maximum age, 14 years, minimum age, 9 years; 4th class, 19 girls, maximum age, 14 years, minimum age, 9 years; 5th class, 28 girls, maximum age, 16 years, minimum age, 9 years. The infant school has 4 classes. Average number in class:—1st class, 75 infants, maximum age, 5 years, minimum age, 2½ years; 2nd class, 90 infants, maximum age, 6 years, minimum age, 4 years; 3rd class, 84 infants, maximum age, 7 years, minimum age, 5 years; 4th class, 41 infants, maximum age, 7 years, minimum age, 5 years.

12.—The pupils attend school for five hours each day. Hour of commencing school, 8:55, morning; hour of closing school, 4, evening; mid-day recess, 12 to 2 o'clock. Those of the pupils who do not go home to dinner receive lessons, or are superintended at play. Both teachers and children are required to assemble on the premises at a quarter to 9 o'clock, and a quarter to 2 o'clock. The teachers do not leave the premises during the day.

13.—Number of holidays during the week, one, Saturday; half-holidays, none; Anniversary day and Queen's Birthday are holidays. There are three vacations during the year:—A week at Christmas, a week at Easter, and a week at Midwinter.

14.—Total number of days devoted to school duties yearly, 243.

15.—Average length of time in school, 2½ years.

16.—I have no means of knowing the number of children in the district who do not attend this school.

SCHOOLS IN NEW SOUTH WALES.

17.—The minimum rate of fees charged to the parents weekly, is—for one child in a family, 8d. ; two children, 6d. each ; three or more, 4d. each.

18.—The amount of school fees paid during this period, was	£1,324 6 9
Deduct drawing fees	28 17 6
	1,295 9 3
Reserved for books, apparatus, maps, &c., &c., 25 per cent.	323 17 3 $\frac{3}{4}$
	971 11 11 $\frac{1}{4}$
Distributed among teachers.....	971 11 11 $\frac{1}{4}$
Amount paid in salaries to the teachers from the Legislative grant ..	1,514 10 0
	£2,486 1 11 $\frac{1}{4}$

19.—Dividing the amount by the average number of pupils daily attending the school during the period, gives, as the annual average total cost of the instruction of each pupil, £3 10s. 1 $\frac{1}{2}$ d.

20.—Detailed enumeration of the subjects taught in each class :—

BOYS' SCHOOL.

21.—The books used in school are those published or sanctioned by the Board of National Education. They are in good condition, and sufficient in quantity. The fifth class use for reading, four Scripture lesson books—O. T., Nos. 1, 2, N. T., Nos. 1, 2; the fifth book of lessons, and the supplement to fourth book of lessons. The third class use two Scripture lesson books—O. T. No. 1, and N. T. No. 1. The sequel class use Scripture lesson book, N. T. No. 1, and sequel to second book of lessons. The second class use the second book of lessons. The first class use first book of lessons. The grammars and geographies are sometimes used; but most of the instruction is given orally in these branches.

22.—A list of prints, diagrams, and maps in use in school, is hereafter given. They are all in good condition, and sufficient in quantity.

List of prints, maps, diagrams, &c., &c. :—

3 maps of The World.
1 Ancient World.
2 maps of Europe.
2 " Asia.
4 " Australia.
2 " Africa.
2 " America.
2 " Palestine.

MAPS.

2 maps of England.
2 " Ireland.
2 " Scotland.
2 " British Isles.
1 " Pacific Ocean.
1 " United States.
1 " Mountains.

DIAGRAMS,

DIAGRAMS, PRINTS, &c.

6 Johnston's illustrations of natural philosophy.	1 print, printing machine.
52 music sheets.	1 " electric telegraph.
600 slates.	1 " gas works.
650 slate pencils	1 " locomotive engine.
2 globes.	3 " marine engine.
1 thermometer.	2 " human race and costume.
120 first books.	7 " vegetable kingdom.

32 reading tablets.	1 dial plate.
100 music books.	2 arithmetics.
92 tablets natural history.	8 black-boards.
8 tablets of the mechanical powers—screw, lever, wedge, pulley, wheel, and inclined plane.	4 map-stands.
1 print, paper machine.	83 fourth books.
	45 sequels to do.
	48 fifth books.
	512 Scripture lessons.

23.—Punishments are regulated according to the principles laid down in the following "orders" by the Inspector and Superintendent:—

" 12 September, 1855.

" No. 1. The power of inflicting corporal punishment can be exercised by the principal teacher in each department only. No assistant teacher is at liberty to chastise a child without the express direction of the head of the department; and pupil teachers are forbidden under any circumstances to strike a child or use violence in any manner. Teachers are requested to see that canes are not used for any purpose in the schools.

" No. 2. The Inspector and Superintendent of National Schools begs to direct the attention of teachers to the principles which, in his opinion, ought to regulate the infliction of corporal punishment. The question may be considered from three points of view; first, as regards the propriety of corporal punishment; secondly, the circumstances under which its application is justifiable; and thirdly, the extent to which it may be employed. There are many cogent reasons for dispensing with corporal punishment;—it tends to diminish, and eventually to destroy the child's self-respect; it excites anger and hatred in his mind towards the teacher; its effect transient; and it is liable to abuse, from the difficulty of proportioning the severity of the punishment to the heinousness of the offence. Whenever it can be safely disused, therefore, the cane should be entirely abolished as an instrument of punishment. With very young children, incapable from their tender age and dormant susceptibilities of comprehending a moral lesson, and requiring moreover to be accustomed to prompt unreasoning obedience, slight personal chastisement may be necessary, and therefore admissible. In reference to the circumstances under which the cane may be employed, it seems proper to restrict its use to extreme cases, such as wilful disobedience, or some really vicious action. It should never be resorted to for the punishment of trifling offences, such as chattering, laughing, or unimportant breaches of order, many of which are involuntary, *i. e.*, they arise from an exuberance of animal spirits, or from a deficiency of self-control on the part of the child. When such is the case, the child requires a large share of the teacher's vigilance and help rather than punishment; nor should children be punished corporally for inattention to the lesson; a fault which would be regarded by a candid teacher as evidence of a failure on his part to render the subject interesting. The continual resort to corporal punishment as a means of maintaining authority or procuring attention, is an unmistakable sign of weakness on the part of the teacher. As regards the extent to which the cane may be used, no exact rule can be given. If the teacher really feels an interest in his pupil's welfare, however, there is no danger of excessive punishment being inflicted. No weapon but a cane or a strap should be employed, and the child not be beaten upon any part of the person except the palm of the hand. In the extreme cases before alluded to, a considerate teacher will probably consult his colleagues before deciding upon the amount of punishment to be administered. Under no circumstances would he feel justified in marking a child. He will further avoid striking the children's heads, pulling their ears or hair, as being simply acts of brutality. The mode of chastising will often, when judicious, be more effective than the punishment itself. Without having a punishment hour, a good teacher will never chastise a child when in a passion or laboring under any excitement of feeling; he should rather manifest the utmost coolness and deliberation, yet as giving pain to his pupil rather 'in sorrow than anger.' This self-control, this freedom from mere animal passion, conveys in itself a great moral lesson to the child's mind, and counteracts in a great measure the injurious tendency of corporal punishment to produce bad feeling. Prudence will probably suggest the inexpediency of punishing a child on the report of a pupil teacher only, without a full investigation on the part of the teacher. Degrading punishment should never be employed. It may further be desirable to remind some teachers, that in a few short years their pupils will be men and women, whose sentiments with regard to National Schools and teachers may possibly exercise considerable influence, favorable or otherwise, upon the success of the system."

24. The pupils are formally examined twice a year. Prizes are distributed once a year at the Christmas examination; they consist of appropriate books, carefully selected.

25. The school is visited almost daily by the Inspector and Superintendent when at home; he formally examines every six months; his examination in no case extends to less than three weeks, and has occupied a period of six weeks; I possess no Report upon the condition of the school.

37.—Religious and moral instruction is given every day by the teachers, to their respective classes, from the Scripture lessons and reading books; the principles of the general lesson are also inculcated at stated periods every week; no Clergymen at present visits the school, for the purpose of giving *special religious instruction*.

GLEN WILLIAM.

- 1.—Glen William, in the Police District of Clarence Town.
- 2.—The school-building is constructed of wood; the teacher's residence, attached, is greatly in need of repair.
- 3.—The number of super. square feet contained in the area of the schoolhouse is 2,187.
- 4.—The number of superficial square yards contained in the ground adjoining the school, for the use of the pupils, is 9,680.
- 5.—The water-closet used by the pupils is built of wood, and in very good order.
- 6.—There are 600 square feet and 5,400 cubic feet contained in the teaching room.
- 7.—The annual average number that assemble together is 22.
- 8.—The windows and doors are open all day for the ventilation of the schoolroom.
- 9.—The average annual number on the books, are—boys, 25; girls, 23; and the annual average number attending, are—boys, 16; girls, 12.
- 10.—The maximum age of boys, 15; minimum age of boys, 5. The maximum age of girls, 14; the minimum age of girls, 5.
- 11.—The school is divided into three classes; the average number in each class, is—first class, 9; second class, 8; third class, 11. The maximum age of first class, 9; the minimum age, 5. The maximum age of second class, 12; the minimum age, 8. The maximum age of third class, 15; the minimum age, 9.
- 12.—The pupils attend school during 5 hours of the day, commencing at 9 A.M. and terminating at 12, noon. Commence at 1 P.M. and close at 3 P.M., the interval hour allowed for dinner and recreation.
- 13.—The pupils have Saturday in each week as a holiday; there are three vacations during the year; one week at Christmas, one week at Easter, and one week at Midwinter.
- 14.—The number of days appropriated for school studies during the year, are 232.
- 15.—The average length of time the pupils stay at school is 7 years, but it must not be inferred that they are continually at school during that period, as they may only be one or two quarter's in the year, their parents requiring them at home to assist in farm work.
- 16.—As the population of this district is so scattered, and some of them far apart, I have no means of knowing the number of children who do not attend this school.
- 17.—The charge for each pupil is 3d. per week, paid quarterly; 2s. 2d. per year is the annual amount for books, which is paid quarterly, and 13s. is the annual charge for each pupil.
- 18.—The annual amount of school fees received for the period above-mentioned is £21 14s. 6d., which is part of the teacher's salary; the book fee is set apart for the purpose of supplying the school with books, &c., and amounts to £4 5s. 1d.; and the salary received from the Board of National Education amounts to £96 per year. The total amount received is £122 9s. 7d.
- 19.—The annual total cost of the education of each child is £5 2s. 0½d.
- 20.—The first class instructed in reading, writing on slates, and the method of computing numbers; the second class instructed in reading, writing on slates, first simple rules of arithmetic, dictation, outlines of grammar and geography; the third class instructed in reading, writing on copies, the higher branches of arithmetic, grammar, geography, and dictation. The time allowed for the above-mentioned studies is as follows:—reading, $\frac{3}{4}$ of an hour, daily; grammar, $\frac{3}{4}$ of an hour, daily; geography, $\frac{1}{2}$ an hour, daily; reading, $1\frac{3}{4}$ hours, daily; arithmetic, 1 hour, daily; and dictation three times a week.
- 21.—The books used in this school are those that are published under the direction of the Commissioners of National Education; they are in good order, and no other kinds are required.
- 22.—The maps used are the World, Europe, Asia, Africa, America, Australia, Palestine, Ireland, Scotland, and a map of animals; they are quite sufficient for the wants of the school.
- 23.—No corporal punishment allowed; detention after hours is employed to preserve discipline; have received no instruction as regards correction.
- 24.—No set time of the year is appointed to examine the pupils; prizes have been given once or twice by the Local Patron.
- 25.—The school is officially visited by the Inspector and Sub-Inspector; the Sub-Inspector usually visits the school three or four times a-year, when the pupils are examined; the Inspector visits occasionally and examines them too.
- 26.—Richard Henry Jarman.
- 27.—Eliza Clunes Jarman.
- 28.—Born at Bowness, Cumberland, England.
- 29.—31 years of age.
- 30.—Appointed to present office in the beginning of January, 1858.
- 31.—Not trained as a teacher.
- 33.—Had nine months private teaching, and attended one month at Model School, Fort-street; business before adopting teacher, chemist and druggist.
- 34.—Annual amount of salary, £96.
- 35.—School fees received for the year ending 1858, £24 16s. 3d.
- 36.—Annual income of teacher, £120 16s. 3d.
- 37.—The pupils that can read are instructed in the Scripture lessons appointed by the Commissioners of National Education, every day; very seldom visited by any Clergyman.

GOSFORTH.

- 1.—Gosforth, near Maitland.
- 2.—Slabs and shingles; very open between the slabs; they require putting closer together, having shrunk much, being in many places two inches apart.
- 3.—Length, 36 feet,—breadth, 14 feet; $36 \times 14 = 504$ superficial square feet.
- 4.—School ground unenclosed; contains about 2 acres 2 roods 26 poles = 115,988 square feet.
- 5.—No water-closets of any description whatever.
- 6.—School, 336 superficial feet, 2,304 cubic feet; class-room, 168 superficial feet, 1,344 cubic feet; both under one roof, forming one building.
- 7.—Classroom, 12; school, 16, at present.
- 8.—Ventilated by two doors, four windows, 1 chimney.
- 9.—For the year 1858:—23 boys, 25 girls on the roll; 15 boys, 14 girls attending.
- 10.—Boys—maximum age, 13, minimum age, 5 years; girls—maximum age, 13, minimum age, 5 years.
- 11.—Three classes, viz. :—

First class ... number, 13 ... maximum age, 13 ... minimum age, 9 years.
Second „ ... „ 17 ... „ 12 ... „ 5 „
Third „ ... „ 12 ... „ 11 ... „ 5 „
- 12.—Commence at 9; recess at 10.30, for 10 minutes; 12 to 1, recreation; 1 to 3, study = 5 hours per diem.
- 13.—Saturday in each week; one vacation, Christmas, one week; holidays, on Anniversary of the Colony, Good Friday, and Queen's Birthday.
- 14.—52 weeks \times 5 days = 260 days — 10 days holidays = 250 school days in the year.
- 15.—Unable to state.
- 16.—Unable to say, the inhabitants are so scattered.
- 17.—4d. per week each; book money, $\frac{1}{2}$ d each per week = 19s. $1\frac{1}{2}$ d., total annual charge, per child.
- 18.—1858:—£22 9s. 10d. for master's support; B. money, £3 3s. $0\frac{1}{2}$ d. = £25 12s. $10\frac{1}{2}$ d., total amount from all sources.
- 19.—£25 12s. $10\frac{1}{2}$ d. \div 29 = 17s. $8\frac{1}{4}$ d.
- 20.—

Time.	First class.	Second class.	Third class.
9 to 9 5	Personal inspection as to cleanliness.		
9 5 to 9 45	Writing.	Reading.	Writing.
9 45 to 10 15	Reading and tables.	Writing.	Reading.
10 15 to 10 30	Recreation.		
10 30 to 11	Writing on slates.	Dictation.	Dictation.
11 to 12	Arithmetic and tables.		
12 to 1	Refreshment.		
1 to 2	Scripture lessons for all.		
2 to 2 30	Grammar* or geography. †		
2 30 to 2 55	Boys—writing on slates.	Girls—needlework.	
2 55 to 3	General lesson.	Marking roll book, &c.	

Monday and Thursday—Singing, 2.30 to 3.

* Tuesday, Thursday.

† Monday, Wednesday, Friday.

21 & 22.—

loose sheets tables.
 2 fifth books.
 10 fourth books.
 9 third books.
 18 second books.
 16 first books.
 3 supplements to fourth book.
 3 reading books (female.)
 1 dictionary.
 1 introduction to art of reading.
 12 spelling books (superseded).
 12 geographies.
 25 first book arithmetic.
 11 grammars.
 13 sequels to second books.
 26 Scripture histories.
 3 lessons on truths of Christianity.
 2 sacred poetry.
 3 elements of geometry.
 1 introduction to geography.

3 mensurations.
 1 appendix to do.
 2 book-keeping.
 2 treatises on arithmetic.
 1 visitors' book.
 1 map of the World.
 1 „ Europe.
 1 „ Australia.
 1 general lesson.
 notice to visitors.
 several sheets of lessons on pasteboard.
 1 roll book.
 1 register.
 1 daily report.
 copies of Board's regulations.
 3 Bibles.
 5 desks, each 6 feet long.
 1 master's do.
 5 forms.
 1 set of tablet lessons.

NOTE.—There are not sufficient Scripture lessons for the use of the school; another desk and form is much needed, as also a black-board. All the above are in fair order, except the first books and some of the Scripture lessons.

23.—Strict attention paid to the fact that the lessons are given at the exact time appropriated to them in the time table; moderate use of the cane, with extra lessons; work neglected in school hours to be done in the time appropriated to recreation.

Instructions

Instructions to the master from the Organizing Master, as directed by the latter part of the question :—

“ 1. It is necessary you should make yourself well acquainted with every lesson you have to teach.

“ 2. Classify your pupils according to the qualification when compared with the table of minimum attainments.

“ 3. Never remove any child into a higher class, until it has mastered the course prescribed for the class in which it is placed.

“ 4. Teach to each class in particular the subjects prescribed for it in the table of minimum attainments.

“ 5. Pay strict attention to the style of reading, and correct a bad style by making the pupils read familiar sentences. Read yourself sometimes, as an example. Make the children understand the subject read, and the meaning of all words in the lesson.

“ 6. Teach spelling regularly, by the dictation of sentences to be written by the pupils, and make them correct their own errors.

“ 7. Make the children keep their copy-books parallel with the desk when writing; give them to understand it is quality not quantity required; see that they copy the head line and not their own writing.

“ 8. Never allow any child to use a short pencil; every instrument used for writing should be four to five inches long.

“ 9. Inspect the pupils as to cleanliness every morning and evening daily.

“ 10. Address every pupil in such language as it can understand.

“ 11. Teach every subject at the time noted in the time table.

“ 12. In teaching arithmetic or dictation make every child correct its own errors.”

24.—Two or three times; no prizes given by the Organizing Master.

25.—By the Organizing Master two or three times; five or six hours; none to my knowledge.

26.—William Lythgow Macleod and Mrs. E. Macleod.

27.—None.

28.—London, England.

29.—Forty-five, and thirty-seven.

30.—September 12, 1857.

31.—Yes.

32.—Model School, Sydney, 6 weeks; none.

33.—Master mariner.

34.—£84 per annum, self and wife.

35.—4d. per week for each child = about 8s. per week.

36.—At present about £106 9s. 10d.; salary, £84; fees, £22 9s. 10d.

37.—Scripture lessons read daily for one hour, commented on and explained by the master. No Clergyman of any denomination has visited the school since I have been here. Scripture lessons selected from the Old and New Testaments; 2, sacred poetry; 3, lessons on the truths of Christianity.

N. B.—The answer to the 36th question is derived from the quarterly returns of 1858, the present year not being completed.

GOULBURN.

1.—Bourke-street, Goulburn.

2.—Brick, and plastered; good condition.

3.—1,800 superficial feet, including teacher's residence.

4.—Three or four acres of unoccupied ground, adjoining schoolhouse.

5.—Three brick water-closets, separate foot-paths; good condition.

6.—Two rooms, 180 superficial feet each.

7.—22 boys in one room, and 13 girls in the other.

8.—Lofty ceilings, with a passage running parallel with the schoolrooms, which keeps them well ventilated.

9.—Average number of scholars on the books, 41; average attendance, 34; average males, 21; average females, 13.

10.—Boys, maximum age, 14 years; minimum do., 3 years. Girls, maximum age, 13 years; minimum do., 3 years.

11.—Boys, four classes. In first class, 5—maximum age, 4 years; minimum do., 3 years. In second class, 9—maximum age, 9 years; minimum do., 6 years. In third class, 3—maximum age, 11 years; minimum do., 9 years. In fourth class, 5—maximum age, 14; minimum do., 11 years.

Girls, three classes. In first class, 2—maximum age, 3 years; minimum do., 3 years. In second class, 9—maximum age, 10 years; minimum do., 6 years. In the third class, 1—maximum age, 13 years.

12.—Five hours each day, commencing at 9 o'clock A.M., and terminating at 4 P.M. Cessation of study from noon to 2 P.M., for dinner and recreation.

13.—Vacation at Christmas, for a fortnight.

14.—About 270 days, deducting Saturdays.

15.—Any scholars who have left this school were at it eighteen months.

16.—There are so many schools in Goulburn, and so many children, that the teacher cannot answer this question; but it is his opinion that almost every child goes to some school or other.

17.—The average quarterly fee is £1; the annual charge for books is about 3s.; the average total charge, £4 3s. 18.

18.—£86 10s. was received as school fees, from 1st June to 31st December, 1858; salary for same period, £49; for books, £1 9s. Appropriated to the payment of £105 yearly rent for schoolhouse and teacher's residence.

19.—At the same ratio for a whole year the average annual cost for each pupil would be £5 10s.

20.—Boys, first and second classes—reading, spelling, and meanings, $1\frac{1}{2}$ hours; arithmetic and tables, 1 hour; writing, 1 hour; grammar, 1 hour; geography, $\frac{1}{2}$ hour. Third and fourth classes—Scripture lessons, 1 hour; reading, spelling, and meanings, 1 hour; writing, 1 hour; arithmetic, 1 hour; geography, $\frac{1}{2}$ hour; grammar, $\frac{1}{2}$ hour.

Girls, first and second classes—reading, spelling, &c., 1 hour; arithmetic and tables, 1 hour; writing, 1 hour; grammar, $\frac{1}{2}$ hour; needlework, $1\frac{1}{2}$ hours. Third and fourth classes—Scripture lessons, 1 hour; reading, spelling, and meanings, 1 hour; writing, $\frac{1}{2}$ hour; geography, $\frac{1}{2}$ hour; arithmetic and tables, $\frac{1}{2}$ hour; needlework, $1\frac{1}{2}$ hours.

Memo.—The time table varies the hours of these studies daily.

21.—First and second classes, boys and girls use the first and second books of lessons. Geography and grammar taught principally by illustration and repetition. Third and fourth classes use the third and fourth books of lessons, also the grammar, geography, and arithmetic of the National Schools. The books are at present sufficient, and in good condition.

22.—A set of surveying instruments belong to the school, and the boys are occasionally taken out for practical surveying. A few maps are required—of the World, Europe, and Australia.

23.—I find the best mode of maintaining discipline is to keep the unruly in the school-room during the hours of recreation. No written instructions on this head.

24.—At the close of the past year the school was examined in presence of the Rev. Wm. Ross. No prizes were given.

25.—Mr. M'Cann inspected this school at the close of the past year. Mr. M'Cann remained a forenoon examining the school; his Report, and that of the Rev. Wm. Ross, is herewith transmitted.

26.—Mr. and Mrs. Pentland.

27.—None.

28.—Perthshire, and Calcutta.

29.—46 and 36 years.

30.—June, 1858.

31.—Mr. P. trained.

32.—Sydney, six weeks.

33.—Answered by Question 32.

34.—£84 per annum.

35.—Fees as stated in Question 18, amounting to £86 10s. for seven months, from June to 31st December, 1858.

36.—Salary, £84 per annum; school fees, at the same ratio, for twelve months, would be about £150, making a total of £234 per annum.

37.—Many of the scholars receive religious instruction from the Rev. Wm. Ross, P. M., and the teacher, every Sunday; the others all receive religious instruction at their respective places of worship once a week, also.

COLIN C. PENTLAND,
Teacher.

SCHEDULE A. (*To be kept for future reference in the Register Book.*)

SUGGESTIONS TO THE TEACHER.

The children to be classed and instructed with especial reference to the table of minimum attainments.

Writing and arithmetic to be taught to first class, as directed in that table.

Grammar and geography to be taught to second, third, and fourth classes, not from text books, but as class lessons, previously prepared by the master. Writing from dictation to be taught to all the children. As a general rule the teacher to endeavor to cultivate the understanding of the children, and to form their minds, while imparting due information on the various subjects taught in the school. The fact that "what a child learns without understanding he acquires with disgust, and will soon cease to remember," to be constantly kept in mind.

The Rolls, Register, and Report Books, to be kept as pointed out; the inscription "National School" to be placed outside, on a conspicuous part of the school-buildings.

The Registers of the school to be headed simply "National School at Goulburn," and not "Mr. Pentland's Non-vested National School." The teacher to remember that so long as he receives salary from the National Board, the school must belong, during school-hours at least, to that body, and that, consequently, the title of it must be the "National Education Board's Non-vested National School."*

All other suggestions given orally to the teacher to be duly carried out.

B. H. M'CANN,
Organizing Master of National Schools, Western District.

* The matter can be fairly settled by adopting my former suggestion.

B. H. M'CANN.

A true copy; the original shewn to the Visiting Local Patrons.

COLIN C. PENTLAND.

GUNNING.

IONA.

- 1.—Iona, parish of Butterwick, police district of Maitland.
- 2.—Slab building; it is not in good condition; it requires the slabs to be battened and plastered; the schoolroom is large enough, but the classroom is too small and badly ventilated.
- 3.—There are 512 square feet in schoolroom, and 160 square feet in classroom, making a total of 672 square feet.
- 4.—There are 4,840 square yards contained in the ground, for the use of the pupils.
- 5.—Double water-closets, built of slabs and shingles, and in good condition.
- 6.—The schoolroom contains 512 square feet, and 4,608 cubic feet; and the classroom 160 square feet, and 1,440 cubic feet.
- 7.—32 pupils, average attendance in schoolroom; 16 in classroom,—for last quarter.
- 8.—The ventilation is bad in both rooms, particularly the classroom.
- 9.—The annual average on the books is 38; 17 the annual average of boys, and 21 the annual average of girls. The average for the quarter ending 25th December, 1858, is 15 boys and 17 girls, making a total of 32.
- 10.—Males, maximum, 15 years; minimum, 3 years. Females, maximum, 13 years; minimum, 4 years.
- 11.—The school is divided into three classes. Average number in first class, 12.2; in second class, 12.0; in third class, 8.2. First class, maximum, 10 years; minimum, 3 years. Second class, maximum, 12 years; minimum, 5 years. Third class, maximum, 13 years; minimum, 9 years.
- 12.—The pupils attend school six hours each day; the school-hours commence at 9 o'clock A.M. and terminate at 3 o'clock P.M.; ten minutes recess are allowed at half-past ten, and an hour at noon; such intervals are employed in recreation.
- 13.—There is one holiday in each week; the vacations are,—a week at Christmas, a week at Easter, and a week in June.
- 14.—245 days,—total number of days appropriated to school duties during the year.
- 15.—Average length of the period during which pupils, from the time of their first entrance to the time of their finally leaving school,—9 months 22 days.
- 16.—There are about 30 children, between the ages of 5 and 15, in this locality, who do not usually attend school.
- 17.—4d. is the weekly average charge for each pupil; 16s 4d. annual charge for each pupil; 13s. 10d., amount received last year for books.
- 18.—£31 4s. 3½d., amount of school fees for the year ending 30th September, 1858, appropriated to the use of the teacher; £84 from the Board of National Education;—total amount received, £115 4s. 3½d.
- 19.—Dividing the last-mentioned total by the average number of the pupils attending the school, during the period above-mentioned, it gives an annual cost of £3 0s. 7½d. for each pupil.
- 20.—Enumeration of the several subjects of instruction given to each class, and the portion of time allotted to each of such subjects:—

TIME.	FIRST.	SECOND.	THIRD.
From 9 to 9¾...	Writing.	Reading.	Writing.
From 9¾ to 10¼..	Reading.	Writing.	Reading.
	Recess for ten minutes.		
Thence to 11¼ ..	Reading.	Arithmetic.	Arithmetic.
11¼ to 12.....	Writing.	Grammar.	Grammar.
12 to 1.....	Recreation.		
1 to 2	Writing.	Scripture lessons	Scripture lessons
2 to 3	Reading.	Arithmetic.	Arithmetic.

Geography and English Grammar are taught every alternate day.

21.—Books used in each class: First class, first book of lessons; second class, second book of lessons; third class, third book of lessons, English grammar, spelling-book superseded, compendium of geography, arithmetic, Scripture lessons;—Scripture lessons are much wanted, there is not a sufficient number for the use of the pupils; there is a fair supply of other books and in tolerably good condition.

22.—The maps in use in the school are—the map of the World and the map of Australia; there is also a black-board and a clock for the use of the school; the maps are in good condition.

23.—The same system of discipline as adopted in the National Model School, in Sydney; no written instructions on the above subject.

24.—The school is examined by none except the Inspectors of the Board; no prizes are given.

25.—By Mr. M'Intyre, Organizing Master; I took charge of this school on the 1st November, 1858; it has been visited once since that date, and it was visited on the 15th September, 1858; the number of visits cannot be ascertained as they are not marked on the records of the school; the time occupied in inspecting the school is from two to three hours.

26.—John M'Farlane, teacher.

27.—Mary M'Farlane, assistant teacher.

28.—Scotland.

29.—40 and 33.

30.—25th January, 1853.

- 31.—Trained as a teacher.
 32.—At the National Model School, in Sydney, and at the Sessional School in Edinburgh; one month at the former and three months at the latter.
 33.—
 34.—Annual salary of teacher and assistant teacher, £96.
 35.—£31 4s 3½d., amount of school fees.
 36.—£127 4s. 3½d., annual income.
 37.—One hour each day is occupied by the children in reading Scripture lessons; the school is not visited by any Clergyman.

JAMBEROO.

- 1.—Jerara Creek, between Jamberoo and Kiama.
 2.—Of wood, with stone foundation; in good condition, but needs enlarging.
 3.—1,142 superficial square feet.
 4.—9,680 superficial square yards = 2 acres.
 5.—Built of wood; dimensions, 10 × 6 × 8 feet; in good condition, and of sufficient accommodation.
 6.—Schoolroom 576 feet super., 6,912 feet cubic; classroom 160 feet super., 1,600 feet cubic.
 7.—49 in schoolroom, and 12 in classroom.
 8.—By means of windows, of which there are three in schoolroom, and two in classroom; ventilation good.
 9.—During the period of the existence of the school (3 months only), on books, 71, average attending, 61; males, 38 on books, average attending, 32; females, 33 on books, average attending, 29.
 10.—Males, 16 years to 3; females, 15 years to 4.
 11.—Number of classes, 3—
 1st. Males 12— 9 years to 3. 1st. Females 17— 9 years to 4.
 2nd. " 10—13 " 6. 2nd. " 2—10 " 6.
 3rd. " 11—16 " 8. 3rd. " 10—15 " 9.
 12.—Six and a half hours, commencing at 9 A.M., terminating at 3 30 P.M.; two recesses, one from 10 30 to 10 35 A.M.; the other from 12 noon to 1 P.M. for dinner and recreation.
 13.—One only in each week, viz., Saturday; vacation at Christmas, ten days,—and at Easter, three days.
 14.—Total school days appropriated to studies, 248.
 15.—Short of information, the school having so recently been established.
 16.—About 60, of whom 40 have subsequently to the 30th September attended this school.
 17.—Sum charged quarterly, 5s.; annual charge for books 2s.;—total, £1 2s. annually.
 18.—For the period only of three months, fees received from the pupils, £11 4s., augmenting the teacher's salary; book fees, £1 8s., and teacher's salary, £24;—total amount received from all sources, £36 12s.
 19.—Average quarterly total cost of each pupil, 10s. 3¾d; total annual cost, £2 1s. 3d.
 20.—Copy of Time Table, Jamberoo National School—

	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.
9 to 9¾	Writing.	Writing.	Writing.	Writing.	Writing.
9¾ to 10½	Arithmetic.	Arithmetic.	Arithmetic.	Arithmetic.	Arithmetic.
	Recess for five minutes.				
thence to 11½	Reading.	Scripture.	Reading.	Scripture.	Reading.
11½ to 12	Geography.	Scripture.	Grammar.	Scripture.	Object lessons.
12 to 1	Recess for dinner.				
1 to 2	Grammar.	Geography.	Scripture.	Geography.	Grammar.
2 to 3	Natural history.	Scripture.	Arithmetic.	Natural history.	Scripture.
3 to 3½	Music.	Music.	Music.	Music.	Music.

The foregoing tables were used by the second and third classes only; the subjects of instruction to the first class are,—reading, diversified by writing on slates, spelling, elementary drawing lessons, Scripture lessons, and singing.

21.—First class—first book of lessons; second class—second book of lessons, sequel to second book of lessons, English grammar, first book arithmetic, Scripture lessons O. & N., geography generalised; third class—sequel to second book, third book of lessons, English grammar, geography generalised, treatise on arithmetic, Scripture lessons O. & N., spelling-book superseded, Sacred poetry. All the above books are published by the Commissioners.

22.—No prints or diagrams whatever; 6 maps, viz.,—Europe, Asia, Africa, America, Palestine, and a map of the two Hemispheres; desks 9, forms 15; all in good condition; a map of New Holland (which cannot be purchased) is much wanted.

23.—Generally I find that the expulsion of the offender or offenders from a lesson in geography, arithmetic, or especially music, is a sufficient punishment; for grave offences—such as fighting, theft, or especially cruelty, corporal punishment ought to be administered.

24.—The school having been so short a time established, would hardly warrant any examination of them, or any prizes or rewards being distributed among them.

25.—The school has been officially visited *only* by the Local Patrons, John Marks, Esq., M.L.A., John Black, Esq., C. M'Caffrey, Esq., J. Spinks, Esq., also by the Rev. John Kinross, Presbyterian, Rev. Hans Mack, Wesleyan, William Irving, Esq., and D. L. Waugh, Esq., J.P.

26.—Charles Tibbey, and Mary Ann Tibbey.

27.—None attached to this school.

28.—Both of London, England.

29.—Twenty-nine and twenty-eight respectively.

30.—15th June, 1858.

31.—Trained.

32.—At the establishment of the late P. Steel, for eight years; also at the Model National School, Fort-street, Sydney, for six weeks; Class III, Section A.

33.—Answered in the previous questions.

34.—£96 yearly, as head teacher.

35.—For the period only of three months, £11 4s., equal, therefore, to £44 16s. yearly.

36.—£140 16s. annually, which may be slightly augmented as the school is increased.

37.—Daily by the head teacher; by the Rev. John Kinross, Presbyterian Minister weekly; also, by the Rev. Hans Mack, irregularly, who use the Bible and catechisms; those used by the head teacher being second and third books of lessons, Sacred poetry, and the Scripture lesson books, both Old and New Testaments.

KIRKCONNELL.

1.—Kirkconnell.

2.—The foundations laid of stonework; the building exclusively of brick, and perfectly new; no improvements needed.

3.—2,142 superficial square feet contained in the area of the whole building.

4.—3,630 superficial square yards assigned for the use of the pupils.

5.—Two water-closets, built of brick and shingled; quite new.

6.—The schoolroom contains 720 square feet, 9,360 cubic feet; classroom—252 square feet, 3,276 cubic feet.

7.—They may be taken at an average of 34 at present.

8.—Four large windows in front, made to admit more than necessary ventilation.

9.—This being a new school, and only 5½ months in operation, a test cannot be applied by which to estimate its annual average, but there are 57 on the registry (26 males and 31 females); average number in attendance—16 males and 18 females.

10.—Ages of children range from 3 to 16 years; males 3 to 13, females 4 to 16.

11.—The school being in its infant state, the classes are two (1st and 2nd). Gross number in 1st class, 44; average, 26; ages, from 3 to 15 years. Gross number in 2nd class, 13; average, 8; ages, from 8 to 16 years.

12.—Seven hours each day, with a cessation of 1½ hours in Summer and 1 hour in Winter; this cessation is for dinner, recreation, &c. The school opens at 9 A.M., and closes at 4 P.M.

13.—Saturday in each week given as a holiday. It is contemplated to have only one vacation in the year, viz., 8 days at Christmas; and it is proposed to suspend school business on Good Friday and the day following.

14.—Two hundred and fifty days are reckoned upon for school duties during the year.

15.—In the present state of this new school, the time the children remain cannot be ascertained with any degree of certainty.

16.—Forty children between the ages of five and fifteen years do not attend.

17.—Highest classed pupils pay 1s. per week, junior class 6d. per week, sixpence per quarter for books;—total annual charge for each pupil—advanced pupils, £2 14s., junior pupils, £1 8s.

18.—The school commenced on the 13th of September last, so that the fees cannot be calculated for twelve months; fees go to the teachers; since September the fees amount to £20 10s. 6d.; no emoluments from any other source; only the annual salary from the Board of National Education—£108.

19.—As the school is only in operation a few months, it is nearly impossible to arrive at any correct figure; but from a rough calculation, the annual average cost for the education of each child might be said to amount to £1 12s., if average cost be only taken into account for fees and books; but inclusive of master's salary and value of dwelling, it is £5 19s. 6d., so far as yet ascertained, though the attendance is expected to be much larger.

- 6.—290 superficial square feet, and 2,295 cubic feet in schoolroom.
- 7.—Average number of pupils usually assembled is 45.
- 8.—The provision for ventilation is good, there being three windows and three doors to the schoolroom.
- 9.—The annual average number on the books is—males 36·4; females 25·1; total 61·5. The average number attending is—males 27·8; females 17·8; total 45·6.
- 10.—The maximum age of males is 14; of females, 16. The minimum age of males is 4; of females 3 years.
- 11.—This school is divided into two classes. The average number in the first class is—males, 21·2; females, 12; total first class, 33·2. Second class, males, 15·1; females, 13·2; total second class, 28·3. The maximum age in first class is 11; second class, 16 years. Minimum age in first class, 3; second class, 6 years.
- 12.—The children attend school 7 hours per day; school duties commence at 9 A.M., and cease for 10 minutes, from 10·30 to 10·40 for recreation; thence the duties are resumed till 12·10, when the rolls are called; and at 12·15 minutes the children leave for recreation and dinner, the time allowed for the same is 90 minutes, that is, from 12·15 minutes to 1·45 minutes. From 1·45 minutes to 2 o'clock, the children are assembled for drill and inspection as to cleanliness, &c.; and from 2 o'clock till 4, the duties of the school are resumed; and at 4 o'clock precisely the duties of the school terminate.
- 13.—There is no school on Saturday in each week; vacations during the year are—Christmas, two weeks, Good Friday, and the Anniversary of the Colony.
- 14.—248 days are appropriated to school studies during the year.
- 15.—The average length of time the pupils remain, from their first entrance to their finally leaving school, is 2 years 4½ months.
- 16.—There are but six children who do not usually attend school.
- 17.—The children of the first class pay each sixpence, those of the second class each one shilling per week; there is no charge for books; the total annual charge for each pupil is—first class 25s., second class 50s., or an average charge to each child per annum of 37s. 6d.
- 18.—This school had been re-opened only seventeen weeks previous to the 30th September, 1858, and the average is accordingly taken for that period. The amount of school fees received for seventeen weeks was £28 18s. (or at the rate per annum of £85); the appropriation of the fees was as follows,—for school books, £2; additional desk £2 10s.; three card or tablet lesson stands, 7s. 6d.; pens, 3s.; ink, 2s; penholders, 8s.; one box of slate-pencils, 2s. 6d.; four dozen slate-pencil holders, 3s.; repairing stools and desks, 5s.; rent of school-house and residence for seventeen weeks, @ 10s. per week, £8 10s.; water per week for children's use, 1s.; and for seventeen weeks, 17s.; assistant teacher, seventeen weeks (at the rate of £20 per annum), £6 12s. 9d; amount received from Board of National Education, for seventeen weeks, £35 6s. 2½d. nearly (or at the rate per annum of £108.) Total amount received for seventeen weeks was £64 4s. 2½d. (or at the rate per annum of £193.)
- 19.—The annual total cost of each child was £3 3s. 3¼d.
- 20.—The several subjects of instruction given to each class, and the portion of time allotted to each of such subjects in each day throughout the week, will be seen by the following table:—

HOOR.	MINUTES.	FIRST CLASS.	SECOND CLASS.
9 to 9½	45	Reading	Writing.
9½ to 10½	45	Writing	Reading.
10½ to 10¾	10		Recess.
10¾ to 11¼	35	Tables	Arithmetic.
11¼ to 12	45	Reading	Geography or grammar.
12 to 12¼	15		Call roll and enter report.
12¼ to 1¼	90		Recreation and dinner.
1¼ to 2	15		Inspect pupils, &c., drill, &c.
2 to 3	60	Writing	Scripture lessons.
3 to 4	60	Reading and geography	{ Boys, arithmetic. { Girls, needlework.

21.—The books used by first class are,—the first book of lessons; together with tablet lessons on reading, spelling, and arithmetic. The books used by second class are,—reading, grammar, geography, arithmetic, and Scripture lessons book No. 1; all of which books are published for the Board of National Education. The books are all good, none others are needed, and those in use are quite adequate to the required wants of the school.

22.—The prints, maps, instruments, &c., used in the school, are—one sheet of directions to visitors; one table of minimum amount of attainments required from each class; two general lessons, quoting exhortations from St. Paul; two maps, Africa and Australia; three tablet-stands; and one black-board.

23.—Moral influence.

24.—This school is examined by W. Wilkins, Esquire, Inspector, and W. McIntyre, Esquire, Organizing Master of National Schools, once by the former and three times by the latter gentleman during the year. At Christmas, prizes on moral, religious, and secular subjects are distributed.

25.—This school is officially visited by the Board's Inspector once a year, by the Organizing Master three times, each of those gentlemen remain in the performance of their duty from 9 A.M. till about 5 P.M., allowing time for dinner. No report on the state of the school exists. The school at present is progressing most favorably.

26.—John Nesbit.

27.—Maria Agnes Nesbit (wife), Elizabeth Nesbit (sister.)

- 28.—Birthplace, John Nesbit, Gibraltar; Maria Agnes Nesbit, Emmil, King's County, Ireland; Elizabeth Nesbit, Dublin.
 29.—Ages, John Nesbit, 28; Maria Agnes Nesbit, 24; Elizabeth Nesbit, 17 years.
 30.—1st February, 1853.
 31.—Trained.
 32.—National Model School, Sydney, six months; Mr. Edhouse's school, two and a-half years Second Class Certificate, Section B.
 33.—Went to school till I made application for the office as teacher.
 34.—Salary of head teacher, £108 per annum.
 35.—Fees at the rate of £85 per annum.
 36.—Total annual income of teachers is £193.
 37.—Religious instruction is given to the children belonging to the Church of England, by the Reverend Mr. Tyrrell, occasionally once a week; the books used in this school for religious instruction are those published by the Board of National Education.

LOUISA CREEK.

- 1.—Louisa Creek Gold Fields.
 2.—The school is built of wood, with a bark roof; it needs repair, and a new floor; it is sufficiently large.
 3.—It is 25 ft. × 15, the classroom 9 ft. × 15.
 4.—One acre for the use of the pupils.
 5.—The water-closet is divided into two parts, 4 ft. × 4 in each part; it needs a new roof.
 6.—Schoolroom, 7 ft. high, 25 × 15; classroom, 7 ft. high, 9 × 15.
 7.—One room,—36 children usually assembled.
 8.—The windows are on pivots for the purpose of ventilation.
 9.—Forty-six children, 23 boys and 23 girls.
 10.—From 2½ years to 12 years old.
 11.—Four classes,—the first class from 2½ years to 4 years, second class from 4 years to 7 years, third class from 7 to 11 years, fourth class from 10 to 12 years.
 12.—Five hours each day, commencing at 9; recess at 10½ spent in the playground; an interval of 2 hours at twelve o'clock spent at dinner and recreation. School is resumed at 2 o'clock, and terminates at 4 o'clock.
 13.—All Saturdays are holidays, one week in August, one week at Christmas, two days at Easter, two days at Louisa Creek races, one day one of my scholars was dead, and the Anniversary of the Colony, making in all sixteen days.
 14.—Total number of school days in the year, 244.
 15.—Seven months and twenty-four days.
 16.—40 children from 5 years to 15 who do not attend.
 17.—6d. per week, for books 6d. per quarter. For each child £1 8s. per annum.
 18.—£22 received from October, 1857, to September, 1858, appropriated to the teacher's domestic wants. £20 collected by local subscription expended in fencing the school grounds, and in the purchase of a school bell. Received for books £5, and salary £84.
 19.—The average annual total cost for each child, £3 5s.
 20.—First class, spelling, one hour each day; second class, spelling, reading, writing, and ciphering, one hour; third class, reading, writing, arithmetic, geography, grammar, and sewing, one hour and a-half each day; fourth class, reading, writing, arithmetic, book-keeping, and sewing, one hour and a-half.
 21.—Tablets, first class; first and second books, second class; first sequels, and second books, third books, geography, grammar, arithmetic, and Scripture lessons, third class; fourth books, geography, grammar, arithmetic, book-keeping, and Scripture lessons, fourth class. The books in use are in good condition, and sufficient in number for some time.
 22.—Only one map of the World, 4 desks, 2 fixtures, and 7 forms, all in very bad condition; a black-board is much needed, a map of Australia, Ireland, England, and Scotland.
 23.—Those who come late in the morning are detained at some exercise after 4 o'clock, according to instructions imparted to me by Mr. M'Cann, Organizing Master; in other cases I impose additional tasks, or curtail the usual play-time.
 24.—The pupils were examined 4 times,—twice by the Patrons, once by Mr. Wilkins, and once by Mr. M'Cann; no prizes have been given to the pupils at any time.
 25.—The school was visited by Mr. Wilkins last August; he remained two days; he visits once a year. Mr. M'Cann visited twice, he remained two days at first, and one day last. As teacher, I beg to remark, that the income of this school is not sufficient to support my family, for which reason I intend resigning on the 31st instant.
 26.—Matthew Dubigg.
 27.—None.
 28.—Limerick, Ireland.
 29.—Age, 33 years.
 30.—May 15th, 1857.
 31.—Not trained as a schoolmaster.
 32.—No certificate of qualification.
 33.—Ecclesiastical student, before adopting that of schoolmaster.
 34.—£84 per annum.
 35.—Exclusive of salary, £22.
 36.—Total income of teacher derived from the school, £106.
 37.—No religious instruction is imparted—never visited by a Clergyman of any denomination. List of books used in the school for the purpose:—Scripture lessons, O.T. Nos. 1 and 2, N.T. Nos. 1 and 2.

M'DONALD RIVER.

- 1.—M'Donald River, Lower Hawkesbury.
- 2.—Constructed of wood; present condition of the building is good; it does not require repairs, enlargement, or other improvement.
- 3.—Area of schoolhouse, 720 square feet.
- 4.—Superficial square yards of ground for use of pupils, 1,210.
- 5.—Two closets built of slab 6 x 4½ feet, and 5½ feet high, in good condition.
- 6.—Superficial square feet, and cubic feet, contained in each room appropriated for teaching, 308 and 3,147.
- 7.—Number of pupils in each room (1 room), 23¾.
- 8.—The provision which is made for the ventilation of such room is four windows 3 x 2½ feet, and one door.
- 9.—Annual average number on the books, 35¼; males, 17¼; females, 18. Annual average number attending the school, 23¾; males, 11½; females, 12¼.
- 10.—Maximum age of males, 15; minimum age of males, 5; maximum age of females, 14; minimum age of females, 8.
11. Number of classes, 3. Average number in each class:—1st class, average number on the books, 10¾; in attendance, 6½. 2nd class, average number on the books, 13½; in attendance, 9. 3rd class, average number on the books, 11; in attendance, 8½. 1st class, maximum age, 9; minimum age, 5. 2nd class, maximum age, 14; minimum age, 7. 3rd class, maximum age, 15; minimum age, 8.
- 12.—Five hours; commencing at 9 and terminating at 3 o'clock (see letter 25 October, 1855); the times of intervening cessation of study are from half-past 10 to twenty-five minutes to 11, and from 12 to 1 o'clock. The intervals are employed in play and taking lunch.
- 13.—One holiday; parents will not send their children for half a day on Saturday, owing to the distance, from 1 to 2 miles. One week at Christmas.
- 14.—The total number of days appropriated to school studies during the year, 253.
- 15.—The average length of the period during which pupils, from the time of their first entrance to the time of their finally leaving school, remain there, 14½ months.
- 16.—The number of children between the ages of 5 and 15 years, in the district or locality, who do not usually attend there, 2.
- 17.—The annual sum charged to each pupil for instruction, £1 6s.; books, 2s.;—total, £1 8s.
18. The annual amount of school fees received from the pupils of the school during the twelve months ending 30th September, 1858,—£36 15s. 6d. The appropriation of such fees consigned to the teacher; amount received from other sources towards the support of the school:—From Board of National Education, teacher's salary, £96; allowance for postage, £1; for books, £2 9s. 6d.—for the latter amount, books, slates, pens, ink, and pencils have been purchased;—total, £136 5s.
- 19.—Dividing the last-mentioned total by the average number of the pupils actually attending the school during the period abovementioned gives the average annual total cost of the education of each pupil,—£5 14s. 8½d.
- 20.—Time-table:—

21.—A list of the titles of all books used in each of the several classes in the school:—1st class,—first book (alphabet, spelling, and reading). 2nd class,—second book (reading), grammar, geography, and arithmetic. 3rd class,—third book, Scripture lessons, Old and New Testaments (reading), grammar, geography, and arithmetic; present condition of the books, good; other kinds of books are not needed; the number at present in use is adequate to the wants of the school.

22.—A descriptive list of all prints, diagrams, maps, instruments and other school apparatus used in the school:—Comparative sizes of wild quadrupeds, ditto of domesticated and British wild quadrupeds, ditto of birds; maps of Asia, America, and Australia; tablet lessons, arithmetic, ditto spelling and reading; 1 black-board, 1 (side) desk 18 feet, 1 ditto 11 feet 4 inches; 1 form 10 feet, 1 ditto 9 feet, 2 ditto 7 feet, 3 ditto 6 feet; present condition, good—others are not needed.

23.—System of correction employed in the school to preserve discipline:—Confinement after school-hours; no written or other instructions have been received on this subject.

24.—Once a year by the Local Patrons; no prizes or rewards of merit are given.

25.—The school is not visited or inspected, owing to the situation, it being in an out of the way place, and difficult of approach; no report on the state of the school exists; the present condition of the school is considered good.

26.—Name of head teacher,—William Shaw.

27.—Names of pupil teachers, or monitors,—Catherine, Irwin, and Emily Shaw.

28.—Birthplace of teacher, Ireland; ditto of pupil teachers, or monitors, Mauritius.

29.—W. Shaw, 46 years of age; Catherine Shaw, 18 ditto; Irwin Shaw, 16 ditto; Emily Shaw, 14 ditto.

30.—Date of appointment to present office,—1st February, 1853.

31.—Trained.

32.—Trained at the Model School, Sydney, for one month; certificate of competency—Class III, Section A.

33.—Previous occupation,—a clerk.

34.—Salary of head teacher,—£96 per annum.

35.—Fees, allowances, and emoluments, exclusive of salary,—allowance for postage, £1; school fees, £36 15s. 6d.

36.—Total annual income of teacher, or teachers, derived from school,—£133 15s. 6d.

37.—No religious or moral instruction is given, except in the daily lessons from the Scripture books (Old and New Testament) by the teacher; the school is not visited by any Clergyman.

I certify that this Return is correct.

WILLIAM SHAW,
Teacher.

GEORGE FLEMING, Local Patron.

MAJOR'S CREEK.

1.—Major's Creek, District of Braidwood.

2.—The schoolhouse, constructed of sawn timber, recently erected, needs no other repairs than closing the perpendicular boards which compose the walls and partitions. It is sufficiently commodious for present use.

3.—The school-building covers an area of 880 square feet.

4.—The portion of land allotted for the exclusive use of the pupils consists of 590 square yards.

5.—Owing to an insufficiency of funds there are no water-closets attached to the building. The Patrons have under consideration to devise measures to supply this desideratum.

6.—There are two rooms appropriated to instruction consisting of 392 and 168 square, and 3,258 and 1,512 cubic feet respectively.

7.—The average number of pupils in each room is 40 and 20.

8.—The schoolrooms are, it is presumed, thoroughly ventilated, a current of air flowing from and to front and rear; the impure atmosphere having free access to the roof.

9.—The annual average number of pupils on the books was 52 boys and 57 girls, and the annual average number attending the school was 27 boys and 32 girls.

10.—The age of the pupils are,—

	Boys.	Girls.
Minimum	3	3
Maximum	23	18

11.—The pupils are divided into three classes, viz. :—

	1st.		2nd.		3rd.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
Average number in attendance	18	20	4	5	5	7
Minimum age	3	3	8	6	10	10
Maximum age	9	13	14	14	23	18

12.—There are 5 hours daily devoted to instruction—from 9 A.M. to 4 P.M.; a cessation of two hours occurring from noon to 2 P.M., during which the pupils repair to their respective abodes to partake with their families of the mid-day meal; should they return before two o'clock they amuse themselves with various sports on the piece of ground opposite the school-house devoted to that purpose.

13.—Saturday is observed as a holiday, by order of the Patrons, heretofore there has been but one vacation annually, consisting of a week at Christmas.

- 14.—There are 250 days devoted to instruction during the year.
 15.—The total average of each pupil's attendance at school is about $3\frac{1}{2}$ years.
 16.—There are about 50 children on Major's Creek and adjoining Gold Fields, between 5 and 15 years, who do not attend school.
 17.—The following is the scale of weekly fees sanctioned by the Patrons, viz. :—6d., 9d., and 1s. each, together with 6d. per month for each pupil towards a book fund.
 18.—The amount of school fees received during the year ended 30th June, 1858, was £47 6s. 9d., which sum was appropriated towards the support of the teachers; the sum paid by the Commissioners during the same period amounted to £99, thus making the total amount for the support of the National School at Major's Creek equal to the sum of £146 6s. 9d.
 19.—The annual average cost of each pupil's education has been £2 9s. 7d.
 20.—Daily curriculum of studies, viz. :—

	1st. Hours.	2nd. Hours.	3rd. Hours.
Writing on slates	1
Studying lessons under monitor	$\frac{1}{2}$	$\frac{1}{2}$...
Repeating lessons to master	$1\frac{1}{2}$	$\frac{1}{2}$...
Spelling	1
Writing figures on slates... ..	1
Writing on copy-books	$\frac{1}{2}$	$\frac{1}{2}$
Reading	$\frac{1}{2}$	$\frac{1}{2}$
Arithmetic	2	2
Grammar	$\frac{1}{2}$	$\frac{3}{4}$
Geography	$\frac{1}{2}$	$\frac{3}{4}$
Writing exercises	$\frac{1}{2}$

Females engaged at needlework from 3 to 4 P.M., daily.

21.—The books in use are the 1st, 2nd, and 3rd reading books, Sullivan's grammar and geography, and those works on arithmetic published by the Board, all of which are in serviceable condition and in sufficient quantity.

22.—The school is furnished with maps of Europe, Asia, Africa, America, Palestine, and the Ancient World. A diagram of an artificial terrestrial globe with the axis, equator, tropics, polar circles, ecliptic and meridian of Greenwich delineated thereon, a pair of compasses, and a black-board.

23.—For obscene, irreligious or offensive expressions, or actions, the ferula is resorted to; for irregularity or inattention the culprit is made to stand in a conspicuous part of the room for some time. No instructions on this head has been received.

24.—The school has been visited officially by an officer of the Commissioners. The teacher received a number of books styled "Autograph of Freedom," from Mr. W. Forster, of Goulburn, which he has distributed as prizes to the children.

25.—W. Wilkins, Esq., Superintendent of National Schools, inspected the school in May last; no report of its condition was handed to Mr. Treehy, but Mr. Wilkins was pleased to speak most favorably of the manner in which the school has been conducted.

26.—Teachers, David and Elizabeth Louisa Treehy.

27.—Monitress, Elizabeth Anne Treehy.

28.—David and Elizabeth Louisa Treehy, born in Ireland; Elizabeth Anne Treehy, born in Sydney.

29.—David and Elizabeth Louisa Treehy, aged 40 years respectively; Elizabeth Anne Treehy, aged 13 years.

30.—Date of appointment—1st January, 1857.

31.—Mr. Treehy has not been trained to the duty of teacher.

32.—Present rank, Class II, Section B.

33.—Mr. Treehy satisfactorily conducted a school for three years previously to his employment under the National Board; he was also engaged as a clerk in a public office in Sydney for a period of thirteen years.

34.—Teachers, £108 annually; monitress, nihil.

35.—The only fees or emoluments accruing to the teachers are those specified in Nos. 17 and 18.

36.—£146 6s. 9d., total amount received for the year.

37.—The pupils of the Roman Catholic communion attending the school receive religious instruction once a week from two young ladies appointed for that purpose by the Revd. Mr. O'Brien, the only Clergyman who has visited the school. The only book used in imparting religious instruction is "An Abridgment of the Christian Doctrine."

Braidwood,
8 December, 1856.

Sir,

I do myself the honor to forward you the following directions and suggestions for your guidance in managing the school at Major's Creek.

DIRECTIONS AND SUGGESTIONS.

1. To read over carefully the Regulations and Circulars of the Board, so as to ascertain a thorough knowledge of the same.

2. To keep the school register, class roll, and daily report book, in accordance with the form prescribed by the Board for each, and to make every school entry in the said books at the proper time. Also to take care that every school Return required by the Board be forwarded to the Secretary at the time specified for each, correctly and neatly.

3.

3. To classify the children attending the school in accordance with their ability to read, as pointed out in the school register, taking care that no reading book is read containing matter above the comprehension of the child reading it.

4. To construct a suitable time table to regulate the school business, taking into consideration the points and matter referred to in (Appendix F) the Board's Regulations, and suspend it in the schoolroom.

5. To use every exertion to promote regularity, punctuality, order, and cleanliness, and a becoming manner in all children attending the school, and to set them a good example in all things.

6. To provide, as soon as possible, a set of reading tablets for the first class, and a set of good copy lines for the higher classes. To provide long pencils or pencil-cases for all the children, and a black-board on which to illustrate the rules, practice, and principles of arithmetic orally. Also to write on it daily, copies of letters, and very short words for the young children to copy on slates.

7. To inculcate carefully the principles of the general lesson (Appendix G) on the minds of all the pupils. To use the National School books, and to teach as pointed out in their several prefaces, attending strictly to the preface of the first book as a good rule for teaching every subject.

I have, &c.,
W. M'INTYRE.

Mr. David Treehy,
Major's Creek.

MANLY COVE.

1.—Manly Cove.

2.—A new building of stone, with a shingled roof.

3.—66 ft. × 21 ft. 6 in. = 1419 sq. ft. ÷ 9 = 157 sq. yds. 6 ft.

4.—82 ft × 59 ft. = 4838 sq. ft. ÷ 9 = 537 sq. yds. 5 ft.

5.—There are two water-closets, weatherboard, on a stone foundation, with double seats of cedar, and a wooden partition, open at the top, to allow a free passage of air through holes cut in the doors.

6.—Large room, 42 ft. 9 in. × 18 ft. = 769 sq. ft. 6 inches × 12 ft. = 9234 cub. ft.
Small room, 18 ft. × 10 ft. = 180 sq. ft. × 12 ft. = 2160 cub. ft.

7.—At present twenty-three, in the large room only; the school only recently opened.

8.—The rooms can easily be well ventilated by opening the windows on either side, of which there are six in the large room, and two in the small room.

9.—

10.—The maximum age of boys, 14 years; the minimum age of boys, 4 years. The maximum age of girls, 16 years; the minimum age of girls, 4 years.

11.—Three; the average number in each class as under:—

First class—boys	8
Second „ „	3
Third „ „	2
First „ girls	3
Second „ „	4
Third „ „	3

The maximum and minimum age in each class as under:—

	Maximum.	Minimum.
First class—boys	11	4
Second „ „	9	7
Third „ „	14	11
First „ girls	7	4
Second „ „	14	8
Third „ „	16	9

12.—Five. Studies commence at 9 A.M., and close at 12 noon. Studies recommence at 2 P.M., and close at 4 P.M. The interval of study is employed by the teacher in lunch, and superintending the pupils in the playground, prior to re-assembling at 1.45 P.M.

13.—Saturday—the whole day.

14.—

15.—

16.—Thirty.

17.—The weekly charges made to the pupils are one shilling each, and nine-pence each; where a number of children come from the same family a difference is made in the charge, to induce parents to send their children to the school.

18.—The funds (fees) are appropriated towards the maintenance of the teacher. The school was opened in a temporary building, Sept. 28th, 1858, until the present new building was ready, which was occupied, 16th February, 1859.

19.—

20.—Spelling, reading, orthography, writing in books, grammar, geography, arithmetic (written and mental), algebra and geometry, with drawing.

First class—Reading and spelling	2	hours	daily.
„ Writing on slates.....	2	„	„
„ Elementary arithmetic	1	„	„

Second

Second class—Reading and spelling	2	hours	daily.
" Writing (slate and paper)	$\frac{3}{4}$	"	"
" Arithmetic	1	"	"
" Grammar	$\frac{1}{2}$	"	"
" Geography	$\frac{3}{4}$	"	"
Third class—Reading and spelling	2	"	"
" Writing (slate and paper)	$\frac{3}{4}$	"	"
" Arithmetic	1	"	"
" Grammar	$\frac{1}{2}$	"	"
" Geography	$\frac{3}{4}$	"	"

With the more advanced pupils the following subjects are taught:—

Tuesday and Thursday...Geometry	1	hour	daily.
Wednesday and Friday...Algebra.....	$\frac{1}{2}$	"	"
Tuesday and Friday.....Drawing	$\frac{1}{4}$	"	"
Vocal music half an hour daily.			

21.—The first class use the first book of lessons, published under the sanction of the Commissioners of National Education in Ireland. The second class use the second book of lessons, published as aforesaid, and Sequel No. 1. The third class use the third book of lessons, also the Scripture lessons, Old Testament, parts 1 and 2, and the New Testament, parts 1 and 2, published as aforesaid. These books are all in good condition, having but lately been supplied.

22.—The internal arrangements are not yet completed.

23.—Extra lessons, drill, and confinement, if necessary, the rod being seldom resorted to.

24.—No examination of pupils has yet taken place, either privately or publicly.

25.—No official inspection has yet been made, nor have any prizes been distributed to the pupils.

26.—John Wiblen.

27.—No assistant teachers, nor pupil teacher, nor monitor.

28.—Abingdon, Berkshire, England.

29.—Thirty-four.

30.—August 5th, 1858.

31.—Trained.

32.—At the Normal College of the British and Foreign School Society, Borough Road, Southwark, London, six months, in the year 1845; also at the Model National School, Upper Fort-street, Sydney, N.S.W., two months, in the year 1857. Possess a Second Class Certificate of competency.

33.—Originally a draper.

34.—£108 head teacher.

35.—School fees, house rent, and fuel.

36.—

37.—The principles of the general lesson are occasionally expounded to the pupils by the teacher, and occasional collective lessons on moral subjects are given to the pupils, and incidentally through the reading lessons of the day. No special religious instruction has been imparted to the pupils yet, the school having so recently been opened. No Clergyman, nor Minister of any Denomination, has yet visited it. No books are used but those published by the Board of National Education in Ireland.

MORANGAROO.

1.—The school is situated in the locality of Morangaroo, Police District of Hartley.

2.—The building is constructed of slabs and stone; is about to be repaired.

3.—The number of superficial square feet contained in the building is 986.

4.—There is an enclosed paddock of about 10 acres adjoining the school.

5.—There is a temporary water-closet.

6.—There is only one room set apart for teaching, containing 235 superficial square feet, and 2,565 cubic feet.

7.—The present teacher, having filled his office only for a few weeks, is unable to answer this and some other questions.

8.—The provision made for the ventilation of the schoolroom, is the windows being made to open upon a pivot.

9.—The number on the books is 28—males, 13; females, 15. Average number in attendance, 25—males, 12; females, 13.

10.—Maximum age of pupils, 15; minimum ditto, 3.

11.—The school is divided into four classes—in the 1st class, 5; 2nd class, 6; 3rd class, 6; 4th class, 11.

12.—The pupils attend school during 6 hours each day, school duties commencing at 9 o'clock A.M., and terminating at 4 P.M. The pupils go home to dinner at 12 o'clock, and return before 2 o'clock, at which time the afternoon duties commence.

13.—Saturday in each week is a holiday. The Local Patrons have decided that there will be two vacations during the year, viz., one week at Christmas, and one week at Easter.

14.—About 250 days will be appropriated to school duties during the year.

15.—The teacher cannot answer this question for reasons stated in No. 7.

16.—The number of children in the district between the ages of 5 and 15 years, who do not usually attend school, is 3.

17.—The weekly sum charged for each pupil is 9d. ; amount charged for books, about 2s. 3d. each. Total amount charged for each pupil will be about £1 8s.

18.—Cannot answer this question. The teacher's salary is £72.

19.—Cannot answer this question.

20.—The subjects of instruction given in the school comprise reading, writing, grammar, arithmetic, and geography.

FIRST CLASS.

Reading and spelling	2	hours each day.
Writing on slates	1	" "

SECOND CLASS.

Reading, spelling, and explanation of lessons, &c. ...	2	" "
Explanation of geographical terms	$\frac{1}{2}$	" "
English grammar	$\frac{1}{2}$	" "
Writing, &c.	1	" "
Multiplication table and arithmetic	$1\frac{1}{2}$	" "

THIRD CLASS.

Reading, spelling, and explanation of lessons ...	1	" "
Grammar	$\frac{1}{2}$	" "
Geography	$\frac{1}{2}$	" "
Writing copies	1	" "
Arithmetic	$1\frac{1}{2}$	" "

FOURTH CLASS.

Reading, spelling, explanation of lessons, derivation of words	1	" "
Grammar	$\frac{1}{2}$	" "
Geography	$\frac{1}{2}$	" "
Writing copies	1	" "
Arithmetic	$1\frac{1}{2}$	" "

Writing from dictation, 1 hour, Wednesday and Friday; religious instruction, Friday half an hour. The girls are taught sewing from $\frac{1}{4}$ to 3 o'clock to 4 each day.

21.—Books used in the several classes :—1st class,—First book of lessons. 2nd class,—Second book of lessons. 3rd class,—Third book of lessons, English grammar for use of schools, introduction to geography, first book of arithmetic, Scripture lessons (O. T.) No. 1, ditto No. 2, Scripture lessons (N. T.) No. 1, ditto No. 2. 4th class,—Fourth book of lessons, English grammar, introduction to geography, first book of arithmetic, Scripture lessons (O. T.) No. 1, ditto No. 2, Scripture lessons (N. T.) No. 1, ditto No. 2. The books are all in good order.

22.—Required—1 black-board, maps of the World, Europe, England, Scotland, Ireland, Palestine, Australia, Pacific Ocean, half-dozen geographies, half-dozen grammars, half-dozen arithmetics, and book of needlework.

23.—To preserve discipline in the school, corporal punishment is employed in extreme cases.

24 and 25.—The teacher is unable to answer these questions, having been only a few weeks in his present office.

26.—Name of head teacher, John Hume.

27.—Assistant teacher, Emily Hume.

28.—Birthplace of John Hume, Greenlaw, Berwickshire, Scotland; E. Hume, Berwick-upon-Tweed.

29.—Age of head teacher, 52 years.

30.—Appointed to present office, 24th January, 1859.

31.—Trained as a teacher.

32.—Trained at the Model School, Fort-street, two months.

33.—Received a classical education at the parish school, Greenlaw; attended the College of Edinburgh four sessions; taught a school in Berwick-upon-Tweed from 1827 to 1837; was a few months in Germany; joined the British and Foreign School, Boro' Road, London, in January, 1838, and left in August of the same year for this Colony, with a Government appointment, at a salary of £300 a year, with the view of introducing Lancaster's system; taught a school in Sydney for four years; when the establishment was broken up, I received a gratuity of £150; has been engaged in teaching nearly ever since; was sent by the Board of National Education to Bathurst in 1853; resigned the appointment at the close of 1856; was farming for two years; applied to the Board to be re-appointed, and was sent to Moran-garoo; opened school on January 24th, 1859.

34.—Annual amount of head teacher and wife, £72.

35 and 36.—Unable to answer.

37.—Religious instruction given to the pupils three times a week by the teacher. Have received no visitors since the opening of the school.

JNO. HUME.

MOSQUITO ISLAND.

- 1.—Mosquito Island.
- 2.—The school is chiefly constructed of wood, and is in good condition.
- 3.—Its area is 230 superficial feet.
- 4.—The area of the adjoining ground is 1,936 square yards.
- 5.—Wood and bark, and is in good condition; area, 16 square feet.
- 6.—The room appropriated for teaching contains 230 superficial, and 1,897 cubic feet.
- 7.—The average number of pupils assembled in it is 19 5.
- 8.—The provision for ventilation consists of 1 door and 3 windows.
- 9.—The number on the class roll is 23, viz.:—8 males and 15 females. The average for last quarter was 7 7 males, 12·35 females, total 20·05. The school is not long enough in operation to know the annual average.
- 10.—Maximum ages,—males, 10 years; females, 15 years. Minimum ages,—males, 5 years; females, 8 years.
- 11.—The school is divided into two classes:—Number in first class,—7 males, 8 females—total 15. Number in second class,—1 male, 7 females—total 8.
- 12.—The pupils attend during 5 hours each day, viz.:—From 9 A.M. to 12, and from 2 to 4 P.M. The most of the children go home to dinner between 12 and 2.
- 13.—There is one holiday in each week, viz., Saturday. There has been one vacation since the school was opened, viz., from 24th December, 1858, to 10th January, 1859.
- 14.—Ninety-seven days from 1st October, 1858, to 1st March, 1859.
- 15.—So few have left the school that it is impossible to know the average length of the period during which pupils remain at school.
- 16.—There are 5 children on the Island, between the ages of 5 and 15 years, who do not usually attend school; of these, 2 are sometimes at service, and sometimes at school, and are therefore on the books; 2 have attended for a short time, but from a deficiency in their speech, which they seem more inclined to conceal than to remove, they could not be persuaded to say a lesson, and were, therefore, not enrolled; 1 attended rather irregularly last quarter but made no appearance this quarter.
- 17.—The charge for instruction is 4d. per week, for books ½d. per week; the charge for books is not insisted upon when parents are unwilling to pay it.
- 18 and 19.—The school was not opened till 1st October, 1858, the annual cost is therefore unknown; it may be estimated at £4 stg. for each pupil, including salary, school fees, book fees, and school apparatus.
- 20.—The classes are instructed from 9 to 9¾ in reading; from 9¾ till 10½ in writing; from 10½ to 11¼ in arithmetic; from 11¼ to 12 in reading; at 12 they go to dinner, when they come back, they either play or come into school to read the map, at their own option; from 2 to 2½ geography; from 2½ to 4 reading, and oral instruction in grammar, or examination on subjects of lessons already read.
- 21.—The books used are the Board of National Education's first and second book of lessons; first arithmetic; sequel to second book, No. 1; and Scripture lessons, Old Testament, No. 1. The books are in good condition; sequel to second book, No. 1; Scripture lessons, O.T. No. 1, and N.T. No. 1, are needed—6 each.
- 22.—The apparatus consists of one map of the World, 6 feet 8 inches by 3 feet 6 inches; and one black-board, 3 feet 3 inches by 2 feet 6 inches; both in good condition. A map of Palestine is needed, as also a map either of Australia or of Europe.
- 23.—Confinement in the corner, or in the school at playtime, and, in stubborn cases, the cane, are the corrections used. No instructions have been received upon this subject from any quarter whatever.
- 24.—The pupils have not been examined, nor have they received prizes.
- 25.—Mr. M'Intyre, Organizing Master, visited the school officially once, and spent a part of two days in it; he left no report.
- 26.—Name of teacher, Hugh M'Intyre.
- 27.—Assistant teacher, none.
- 28.—Birthplace of teacher, Killmatlie, Scotland.
- 29.—Age of teacher, 48 years.
- 30.—Date of appointment to present office, 1st October, 1858.
- 31.—Was trained as a teacher in Scotland, in early youth.
- 32.—Attended the Model National School, Sydney, during one month as a visitor, and one month as a candidate. Was favoured by the Board of National Education with an appointment to one of their Schools at the highest rate of salary then allowed to the teacher of any country school under their direction, which, it is humbly submitted, is equivalent to a First Class Certificate.
- 33.—Was trained, and have about twenty years experience in teaching previous to undertaking present appointment; before adopting the occupation of a teacher, was attending school, and occasionally assisting on father's farm.
- 34.—Annual salary of teacher, sixty pounds sterling.
- 35.—Fees for last quarter, five pounds sterling.
- 36.—Probable total annual income of teacher derived from school, eighty pounds sterling; or including an evening class, ninety pounds sterling.
- 37.—The Reverend William Chaucer, Presbyterian Minister, visited the school three times, gave no instructions during school-hours, but preached after the school was dismissed, when a considerable number of the children attended; there are no books used in the school for religious instruction except the Board of National Education's Scripture lessons.

HUGH M'INTYRE, Teacher.

MUDGE.

MUDGEES.

- 1.—Perry-street, Mudgee.
- 2.—Stone; now undergoing extensive enlargements.
- 3.—2,680 feet.
- 4.—9,680 square yards, (2 acres.)
- 5.—Weatherboard, with shingled roof, small, and somewhat exposed.
- 6.—(a) Schoolroom, 774 superficial feet, 8,514 cubical feet; (b) classroom, 234 superficial feet, 2,574 cubical feet.
- 7.—Schoolroom, 90 children; classroom, 40 children.
- 8.—Schoolroom ventilated by means of four windows having moveable sashes at top and bottom; classroom, by two windows as above.
- 9.—Annual average number on books, 130, of which there are 90 boys and 40 girls; average attendance (annual), 110, of which there are 80 boys and 30 girls.
- 10.—Boys, maximum, 14 years; minimum, 3 years. Girls, maximum, 13 years; minimum, 3 years.
- 11.—Four classes—
 - (a) Infant class: Average number, 35; maximum age, $6\frac{1}{2}$ years; minimum age, 3 years.
 - (b) First class: Average number, 36; maximum age, 8 years; minimum age, 4 years.
 - (c) Second class: Average number, 35; maximum age, 12 years; minimum age, 6 years.
 - (d) Third class: Average number, 36; maximum age, 14 years; minimum age, 9 years.
- 12.—School-hours from 9 till 12 and from 2 till 4 o'clock; a mid-day recess of 2 hours for refreshment and recreation.
- 13.—The school is closed on Saturdays; the vacations during the year are three, viz.: One week at Easter; one week at Midwinter; and one week at Christmas.
- 14.—246 days.
- 15.—Twelve months.
- 16.—About 150, as nearly as can be ascertained.
- 17.—Average annual fee paid by each pupil:—Instruction, £1; books, 2s; total, £1 2s.
- 18.—Annual amount of school fees for the twelve months ending September 30th, 1858: £168 1s. 1d., of which £13 10s. 2d. has been expended on school stationery, and £154 10s. 11d. to teacher's income; Government salaries, per National Board, £174. Total £342 1s. 1d.
- 19.—Average annual cost of each child's education, £2 12s. $7\frac{1}{2}$ d.
- 20.—

<p>(a) Infant class: The rudimentary training usually given in infant schools.</p> <p>(b) First class: Reading..... 2 hours. Writing..... 1 hour. Arithmetic 1 hour. Grammar $\frac{1}{2}$ hour.</p>
---	---

21.—A list of the titles of books used in the several classes:—First class, National Board's 1st book; second class, ditto 2nd book; third class, ditto 3rd book, ditto 1st arithmetic, Sullivan's grammar, Sullivan's geography, Scriptural lessons from Old and New Testaments; the books are in good condition and sufficient in quantity; no others are absolutely needed.

22.—Diagrams, maps, &c., Varty's illustrations of animals, outlines of common objects, maps of Europe, Asia, Africa, America, and Australia, a terrestrial globe, and black-board; additional maps and apparatus will shortly be added.

23.—Discipline mild but effective.

24.—The children are examined monthly by the Head Master; occasionally by the Organizing Master; and annually by the Head Inspector, William Wilkins, Esq.; no prizes have been given as no funds exist for such purposes.

25.—By the Inspector, William Wilkins, Esq., and by the Organizing Master, Mr. B. H. M'Cann; the Inspector has visited once during the year, devoting two days to the school; the Organizing Master has visited the school once during the year, giving one day to inspection; no formal report upon the school exists other than what may be in the National Board's Office, as transmitted by the Inspector; the teacher would merely remark that the school has a healthy hold upon the community; at the commencement of the year 1858 the number on the books was 80; at the close of the same year the number was 160, with an average of 130 scholars.

26.—Head master, Mr. James Webber Allpass.

27.—Assistant teacher, Mr. Thomas M'Intyre; teacher of needlework, Mrs. Allpass.

28.—Mr. and Mrs. Allpass are natives of England; Mr. M'Intyre is a native of Ireland.

29.—Mr. Allpass, 36 years; Mr. M'Intyre, 21 years.

30.—Mr. Allpass appointed to present school, July 10th, 1857; Mr. M'Intyre, April 7th, 1858.

31 and 32.—The head teacher, Mr. Allpass, was trained at the British and Foreign Normal School, London; period of training, 12 months; holds a Certificate of A, 2nd Class. The assistant teacher, Mr. M'Intyre, was trained at the Model School, Dublin, for a period of 9 months; holds certificate of B of 2nd class.

- 33.—
 34.—Head master, £120 per annum ; assistant, £108 per annum.
 35.—Fees, £154 10s. 11d. ; head teacher's share, £104 10s. 11d. ; assistant teacher's share, in cost of board and lodging, £50. £154 10s. 11d.
 36.—Total annual income of teacher and assistant teacher, £328 10s. 11d.
 37.—The general religious instruction provided for by the Board of National Education is given by the teacher one hour in each day ; the school has received no visits from the Clergy ; for the general religious instruction the teacher uses the National Board's Scripture lessons from the Old and New Testaments.

NEWCASTLE.

- 1.—Under the Congregational Church, Newcastle.
 2.—Brick ; windows need repair ; the room too small, and unfitted for the full development of the National system.
 3.—900 square feet.
 4.—No land.
 5.—No convenience of any kind belonging to the school.
 6.—One room only ; 900 square feet ; 13,500 cubic feet.
 7.—130 at the present time.
 8.—Windows, opening opposite to each other ; wide door-way, constantly open ; gratings below the floor, and at the top of the room. A large horizontal fan is about to be erected, to be worked by clock-work.
 9.—The school has been in operation about 14 months ; the total number admitted during that time—155 males, 131 females, total 286 ; making a yearly average during that time of 133 males and 112 females, total 245.
 10.—Maximum, 15 years ; minimum, 3 years.
 11.—Three classes. The boys' first, second, and third classes average 26, 21, and 35, respectively ; and the girls' first, second, and third classes average 23, 20, and 12, respectively. The ages are—first class, maximum, boys 10, girls 7 ; minimum, boys 3, girls 3. Second class—maximum, boys 15, girls 12 ; minimum, boys 6, girls 6. Third class—maximum, boys 13, girls 13 ; minimum, boys 7, girls 7.
 NOTE.—The minimum ages in the second and third classes are those of pupils who have been for a considerable time in the school, and have been lately transferred from lower classes.
 12.—Five hours, daily, from 9 to 12, and 2 to 4. Fifteen minutes allowed for exercise at half-past 10 ; recess from 12 to 2. Some of the senior scholars are engaged (voluntarily) at map drawing during recess. Dinner and play fill up the time of the juniors.
 13.—Holiday on Saturday. This day set apart for special religious instruction, if required. Two vacations, one week in June, and one week in December.
 14.—299 days, including Saturdays.
 15.—Shortest period one day, longest fourteen months.
 16.—No means of answering this question.
 17.—Weekly payments—first class, 6d. ; second class, 9d ; third class, 1s. Special arrangements are made if circumstances do not admit of these charges being maintained. Seven pupils have been admitted *free*, by the voluntary act of the teacher. If absent for a week children do not pay for that week ; so no annual sum can be named. No charge has been made by the present teacher for books, &c, but he has supplied them out of the usual school fees.
 18.—The receipts to September, 1858, were—from fees, £87 14s. 10d., from Government, £84—making a total of £171 14s. 10d. The master has received *all*, and paid for *all*.
 19.—Average attendance, 72 ; average annual cost of education, £3 3s. 10d.
 20.—First class, five hours, daily :—Reading, 1½ hours ; writing, 1½ hours ; arithmetic, 1 hour ; object lessons, 1 hour. Second and third classes, five hours daily :—General reading and orthography, 1 hour ; grammar and geography (alternate days), 1 hour ; Scripture reading or oral instruction, 1 hour ; writing, 45 minutes ; slate arithmetic, 45 minutes ; music and mental arithmetic (alternate days), 30 minutes.
 NOTE.—The time of exercise (when taken) to be deducted from grammar and geography.
 The senior boys are now voluntarily engaged, during the dinner-time, in preparing a set of large maps (6 by 5) for the expected new school.
 The girls are taught needlework four hours in the week.
 21.—Third class, third reading book ; second class, second ditto ; first class, first ditto. Sullivan's grammar for upper class ; and a series of elementary lessons, prepared by the teacher, for the lower class. First book of arithmetic. In good order ; number sufficient. Hullah's manual. Mulhauser's writing would be useful.
 22.—Some prints of animals, trades, and natural productions. Hullah's music on a roll of calico, 40 yards in length ; three black-boards ; easel ; 150 pencil-holders ; 100 pen-holders ; 100 slates ; two maps belonging to the school—eight large ones in preparation, at the expense of the teacher ; an abacus ; a natural history collection is in course of formation.
 23.—Corporal punishment avoided as much as possible. The upper class is governed by the influence of a general court (held on Friday), where and when all merits or demerits are judged, and awards made. Wilful and repeated disobedience causes the offender to be subject to corporal punishment.

24.—Half-yearly, by the Local Patrons and the master. Visitors are permitted to examine, if they think proper. Prizes in books, drawing material, implements for needle-work, &c., were distributed, at the expense of the master, December, 1858.

25.—Mr. M'Intyre; three visits; time occupied on last occasion, 1½ days. (See Appendix.)

26.—Samuel Henry Ind.

27.—Mrs. Emily Ind assists Mr. Ind. An assistant has been appointed, but has not yet arrived in Newcastle.

28.—London.

29.—36 years.

30.—August, 1858.

31.—Trained.

32.—Abbey-street Normal Schools, London. Three years. No certificate issued.

33.—Accustomed to teaching from boyhood. No other profession.

34.—Master, £120.

35.—Fees to December, 1858, £128 8s. 9d.; deduct rent, £40—making a clear income of £88 8s. 9d.

36.—£242 8s. 9d.

37.—Daily reading in National School Scripture lessons, and a familiar lecture on Friday afternoon. Saturdays set apart for Denominational instruction, if Clergymen attend.

APPENDIX A.

Suggestions to Teacher by Mr. M'Intyre, 16th October, 1858.

- 1.—A number of children in both second and third classes read very poorly.
- 2.—A number of pupils in the third class are only qualified for the second.
- 3.—It is my opinion that when pupils are admitted they ought to be classed in accordance with their qualifications, as compared with the table of minimum attainments.
- 4.—Your pupils are but little acquainted with arithmetic, and very bad at numeration and notation; two out of twenty-nine in the third class being only able to write from dictation 17,050,800.
- 5.—The knowledge of grammar and geography is poor: of these subjects the second class know nothing; the third class, in the majority of cases, guessing at the parts of speech, and have but little knowledge of the course prescribed in geography.
- 6.—The children are very noisy, and ought to be assembled on the space of ground in front of the school, always before entering school and before dismissal.
- 7.—It is essentially necessary that the pupils in each class be made well acquainted with the subjects prescribed for that class.
- 8.—These suggestions do not hint at duties which you have neglected, but at deficiencies, which it is, in my opinion, your duty to remedy.

W. M'INTYRE.

P.S.—You should not allow the young children to use such short pencils.

The teacher begs to observe, that the third class immediately detected the error in syntax apparent in paragraph 4.

APPENDIX B.

Report of Local Patrons after the Examination, December, 1858.

I, the undersigned, hereby certify that I was present at the examination of the scholars in attendance at the Non-vested National School of Newcastle, held on 22nd December, 1858, and found as follows:—

1. The scholars were respectable in appearance, and well-disciplined. The examination shewed that they understood well the different subjects taught, and proved to my mind the superiority of the system pursued by the teacher, who evidently held complete control over, and was a favorite with, the pupils, whose eagerness to answer the questions put to them, and the correctness of the answers given, shewed that Mr. Ind had faithfully performed his duty to those entrusted to his care. A considerable number of the parents were present, and expressed themselves highly pleased with the result of the examination, and that the school would have their most strenuous support; and from the fact of a large increase in the number of scholars having taken place since that time, it is evident that public opinion is greatly in favor of the National system of education as pursued by Mr. Ind.

THOS. ADAM,
Secretary to the Local Patrons.

ORANGE.

- 1.—Orange.
- 2.—Brick; the present condition is fair, but needs some repairs on inside.
- 3.—1,800 superficial feet contained in the area of the building.
- 4.—2,176 square yards for the use of playground.
- 5.—1 water-closet made of slabs, divided into two compartments; one compartment for boys, and one for girls; needs repairs. Another water-closet exclusively for boys is much required.

6.—Three rooms are appropriated for teaching. No. 1 contains 384 superficial feet, and 4,416 cubic feet; No. 2 contains 149½ superficial feet, and 1,718½ cubic feet; No. 3 contains 243¾ superficial feet, and 1,706¼ cubic feet.

7.—Average number of pupils usually assembled in each of these rooms is 18.

8.—The provision for ventilation is good—1st, by a fanlight over principal entrance; 2nd, the windows are made to open at top and bottom.

9.—Annual average on the books, 85. Annual average attending school (23 boys and 31 girls), 54.

10.—Maximum age of pupils—boys, 15 years—girls, 13; minimum age of pupils—boys, 3 years—girls, 3.

11.—School is divided into 3 classes or sections. No. 1 contains 48 pupils; No. 2, 21 pupils; and No. 3, 14 pupils. The maximum age of No. 1 is 10 years; No. 2, 14 years; and No. 3, 15 years. The minimum age of No. 1 is 3 years; No. 2, 5 years; and No. 3, 8 years.

12.—The pupils attend school 5 hours during each day. Morning, from 9 to 12; a recess of 10 minutes is allowed during this time. Afternoon, from 2 to 4 in summer, and from 1 to 3 in winter; from 12 to 2 in summer, and from 12 to 1 in winter, is used as an interval for dinner and recreation.

13.—The only holiday during the week is Saturday. Good Friday and the Queen's Birthday are holidays. At Christmas, a vacation of 2 weeks.

14.—243 days are appropriated to school duties during the year.

15.—8 months average length of time at school.

16.—40 children, between 5 and 15 years of age (within a radius of 3 miles from school), who do *not* usually attend.

17.—The weekly charge for a family of 4 children or more is six-pence each; for a family of 3, eight-pence each; of 2, ten-pence; and for 1, a shilling. Total annual charge for each pupil is £1 19s. 7d.

18.—Amount of school fees received during 12 months ending 30th September, 1858, and appropriated to the use of the teacher, £94 3s.; amount of salary received from the Board at Sydney, £96. Total amount received from all sources, £190 3s.

19.—The average annual cost of each pupil, £3 10s. 5d.

20.—Subjects of instruction given to each class, and the time allotted to each of such subjects:—

TIME TABLE FOR 1ST AND 2ND CLASSES.

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.
9 to 9½ 9½ to 10½	Writing. Reading.	Reading. Writing.	Writing. Reading.	Reading. Writing.	Writing. Reading.
10½ to 11½ 11½ to 12	Arithmetic. Geography.	Arithmetic. Grammar.	Arithmetic. Geography.	Arithmetic. Grammar.	Arithmetic. Geography.
2 to 3	Arithmetic tables.	Reading.	Arithmetic tables.	Reading.	Arithmetic tables.
3 to 3½	Reading.	Arithmetic tables.	Reading.	Arithmetic tables.	Reading.
3½ to 4	Writing from dictation.	Object lesson.	Mental arith- metic.	Writing from books.	Object lesson.

TIME TABLE FOR 3RD CLASS.

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.
9 to 9½ 9½ to 10½	Reading. Writing.	Writing. Reading.	Reading. Writing.	Writing. Reading.	Reading. Writing.
10½ to 11½ 11½ to 12	Arithmetic. Geography.	Arithmetic. Grammar.	Arithmetic. Geography.	Arithmetic. Grammar.	Arithmetic. Geography.
2 to 3	Scripture lesson.	Prefixes and affixes, &c.	Scripture lesson.	Roots and spelling.	Scripture lesson.
3 to 3½	Writing from dictation.	Scripture lesson.	Writing from dictation.	Scripture lesson.	Dictation from S. S. book.
3½ to 4	Mental rules.	Writing from S. S. book.	Arithmetic.	Writing from dictation.	Mental rules.

21.—A list of the titles of all books used in each of the several classes:—1st class;—First book of lessons; set tablet lessons, arithmetic; ditto spelling and reading. 2nd class;—Second book of lessons; sequel to the second book, No. 1; sequel to the second book, No. 2; set tablet lessons, arithmetic. 3rd class;—Third book of lessons; fourth ditto; supplement to the fourth book; English grammar; arithmetic in theory and practice; book-keeping; epitome of geographical knowledge; a compendium of ditto; mensuration; Scripture lessons (Old Testament), No. 1; ditto ditto, No. 2; ditto (New Testament), No. 1; ditto ditto, No. 2; sacred poetry; lessons on the truth of Christianity; Professor Sullivan's English dictionary; spelling-book superseded; geography generalized; Tate's arithmetic. The books are in fair condition, and adequate to the wants of the school.

- 22.—The maps used in school are Europe, Asia, Africa, and America. The map of Australia is needed.
- 23.—Correction employed to preserve discipline, a strap of leather applied to the hand; pupils late in coming to school are detained after school-hours the same length of time they were late in coming, and employed in writing difficult words. Instructions on this subject left by Mr. M'Cann, Organizing Master of National Schools.
- 24.—Examined once by Mr. M'Cann; no prizes given.
- 25.—Officially visited and examined by W. Wilkins, Esq., Superintendent and Inspector of National Schools, once a year; one whole day during school-hours occupied in the performance of this duty. No report on the state of the school exists.
- 26.—Name of teacher, Malcolm Groat.
- 27.—No assistant teachers, pupil teachers, or monitors.
- 28.—Place of birth, Thurso, Scotland.
- 29.—Age, 44 years.
- 30.—Date of appointment, 30th August, 1854.
- 31.—Trained.
- 32.—At the Model National School, Sydney; during 2 months, nearly.
- 33.—Attendant Librarian, British Museum, London.
- 34.—Annual amount of salary, teacher, £96.
- 35.—Fees, allowances, and emoluments, *exclusive* of salary, £94 3s.
- 36.—Total annual income derived from school, £190 3s.
- 37.—General religious or moral instruction given from the Scripture lessons, and general lesson, three times a week, by the teacher. No Clergyman or Minister of Religion visits the school.

MALCOLM GROAT,
National School.

Orange, 28 Feb., 1859.

PADDINGTON.

- 1.—Paddington, in the Police District of Sydney, and Parish of Alexandria.
- 2.—The school-building is constructed of iron, and is in very good condition. No repairs are needed.
- 3.—The number of superficial square feet contained in the area of the school-houses, is for the large school-building, 1,164; classroom, 282; and infants' room, 516;—giving a total of 1,962 square feet.
- 4.—The number of superficial square yards in the land or ground adjoining the school for the use of the pupils is 3,578.
- 5.—The water-closets are substantially built of brick, and shingle-roofed. They are in good condition.
- 6.—The number of superficial square feet contained in the main room, 1,164, of cubic feet, 16,971; in the classroom, 282 square feet, cubic feet, 4,117; in the infants' room, 516 square feet, and 4,902 cubic feet;—making a total of 1,962 square feet, and 25,990 cubic feet.
- 7.—The average number of pupils assembled usually in such rooms is as follows:—Large room, 80; classroom, 30; and infants' room, 41.
- 8.—These rooms are ventilated, first, by windows; secondly, by skylights; and thirdly, by a series of holes perforated round the basement of the buildings. By this arrangement a draft of fresh air is continually passing through the building, and, judging from long experience, I am inclined to think the ventilation of the large room is perfect. The ventilation of the infants' room might be improved by the insertion of a skylight.
- 9.—The average number on the books as far as the period specified, has been of males 141, females 104.5; making a total of 245.5. The average number in attendance for the same time, has been of males 91.2, females 59.8; making a total of 151.
- 10.—Maximum age of males, 16; minimum age, 2. Maximum age of females, 15; minimum age, 2.
- 11.—The school, not including the infants, is divided into four classes. The average number in each class is as follows:—Fourth class, 36; third class, 40; second class, 51; first class, 49; and infants', 69.5;—total, 245.5. In the fourth class, the maximum age is 16, the minimum, 8; in the third class, the maximum age is 14, the minimum, 7; in the second class, the maximum age is 12, and the minimum, 7; in the first class, the maximum age is 11, and the minimum, 5; in the infants', the maximum age is 6, and the minimum, 2.
- 12.—The number of hours spent in school during each day is five. The school opens at 9 A.M., and closes at 12 A.M. for mid-day recess; it re-opens at 2 P.M., and closes for the day at 4 P.M. There is a morning recess at 10.20 A.M., which usually lasts for about ten minutes; this interval is generally taken up by the children with the performance of necessary duties. There is a mid-day recreation from 12 A.M. to 2 P.M., when the majority of the children go home to dinner; the remainder are placed in charge of their respective teachers, who superintend them in the playground.
- 13.—Every Saturday is observed as a holiday. There are usually two vacations in the year; one occurs at Easter, and continues for about ten days; the other takes place at Christmas, and lasts for about three weeks.
- 14.—238.
- 15.—The average length of time pupils remain at school is one year and four months.
- 16.

16.—I have no means of arriving at the answer to this question, first, because I am uncertain whether to include the pupils who attend other schools; and, secondly, because the locality has not been apportioned into school districts.

17.—The minimum weekly charge for one child is 8d., for two in a family, 1s. The quarterly charge varies with the circumstances of the parent, sometimes it is 6s. 6d., at others 10s. 6d., and occasionally one guinea. The average annual charge for each pupil actually in attendance is £1 12s. 8d. I do not understand what is meant by the total annual charge for each pupil, unless it supposes the money to be paid in advance; with this condition, the total annual charge for each pupil would be £4 4s., £2 2s., £1 14s. 8d., and £1 6s.

18.—The annual amount of school fees received from the pupils during the twelve months ending September 30, 1858, was £245 1s. 2d. One-fourth of this amount went to the Board for the purchase of books for the school, the remainder was divided among the teachers. The amount received in the shape of salaries for the same period was £490 5s., making a total of £735 6s. 2d.

19.—The average annual total cost of each child's education for that period is £2 16s. 9d.

20.—

FOURTH CLASS.

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.
Morning. 9 to 9 $\frac{3}{4}$	Reading.	Drawing.	{ Physical geography.	{ Reading.	Geography.

21.—Fourth class:—The reading books of this class are the fourth; all other instruction is given *vivâ voce*; the teacher avails himself of the black-board and other apparatus to illustrate and explain the different subjects; at present no other books are necessary. Third class use the third books; both fourth and third books are in very fair condition. Second class read sequel to the second book; the books are in fair condition. First class read from second book; occasionally they read simultaneously from cards; the books generally are in fair condition. Infants' class:—the upper division read from the first books, the lower from cards; the books are in fair condition.

22.—(a) List of prints:—One on color, one on form, man-of-war, six on the mechanical powers. (b) Diagrams:—Natural philosophy, Nos. 1 & 2, astronomical, animal kingdom, vegetable kingdom. (c) Maps:—World, Scripture world, Europe, Asia, Africa, America, Australia, Pacific Ocean, Palestine, England, Scotland, and Ireland. (d) Other apparatus:—There are besides five black-boards, one Pestalozzi-board, a series of Hullah's music sheets, and a series of cards on the animal kingdom; the whole of the apparatus are in good condition, and sufficiently meet the demands of the school.

23.—The system of correction used in this school is based, as far as circumstances will permit, on the means of moral influence. The system is less corrective than preventive. As a foundation whereon to build the superstructure of order, a continuous course of drill is observed. Where moral persuasion fails recourse is had to sterner remedies, but it may be stated that corporal punishment is only used in extreme cases.

24.—The school is examined at least once a year—often twice, and I believe arrangements are being made to have it examined four times a year. The examiner is W. Wilkins, Esq., the Board's Chief Inspector. Prizes are distributed every Christmas, to the most deserving pupils in each class. These are books containing for the most part general information, and purchased with a view to the carrying out the school instruction.

25.—The school is officially visited by W. Wilkins, Esq., on an average about six times every year. The time occupied in the performance of this duty varies from one hour to a day. This does not include the time usually devoted to the Christmas examination, which extends over a period of three or four days.

26.—Edwin Johnson.

27.—Rebecca Johnson, Frances M. Little, assistant teachers; Mary Ross, Jonathan H. Banks, pupil teachers.

28.—Birthplace of Edwin Johnson, Liverpool, Lancashire; of Rebecca Johnson, Sydney; of Frances M. Little, Sydney; of Mary Ross, Brixton, near London; of Jonathan H. Banks, Clonmel, Tipperary.

- 29.—Edwin Johnson, 24; Rebecca Johnson, 21; Frances M. Little, 17; Mary Ross, 17; Jonathan H. Banks, 15 nearly.
- 30.—Edwin Johnson, July 1st, 1857; Rebecca Johnson, May 6th, 1856; Frances M. Little, January 1st, 1858; Mary Ross, January 18th, 1859; Jonathan H. Banks, August 2nd, 1858.
- 31.—Edwin Johnson, Rebecca Johnson, and Frances M. Little, trained; Mary Ross and Jonathan H. Banks, in training.
- 32.—Edwin Johnson, Kneller Hall Training College, for a period of two years; holds a Certificate of Merit of the second division of that year; Rebecca Johnson, Fort-street Model Schools; holds a Certificate of Competency, A division of the Third Class; Frances M. Little, certificate not fixed.
- 34.—Edwin Johnson, £216; Rebecca Johnson, £96; Frances M. Little, £60; Mary Ross, £45; Jonathan H. Banks, £30.
- 35.—Edwin Johnson, £90 18s. 7d.; Rebecca Johnson, £44 17s. 2d.
- 36.—Edwin Johnson, £306 18s. 7d.; Rebecca Johnson, £140 17s. 2d.
- 37.—Religious instruction is given five times a week by the principal teacher; special moral instruction is given every Friday evening; the school up to Christmas was visited by the Rev. J. Milne, of the Presbyterian Church; he gave special religious instruction to the members of this Church; Old Testaments Nos. 1 and 2, and New Testaments Nos. 1 and 2, of the Commissioners of National Education; the general lesson.

PANBULA.

- 1.—Panbula, in the Police District of Eden.
- 2.—Constructed chiefly of brick—cottage style; it needs repairs, alterations, and enlargement; the teacher's residence is, although of the same material as the school, only a shed forming the rear of the building; its dimensions are 30 feet by 9; average height, 8 feet.
- 3.—Measuring on the outside of the building, the area, including a verandah in front of the school, is 1,088 superficial square feet.
- 4.—The land on which the school stands is estimated at one acre; the town reserve is also used as a playground by the children, it being contiguous to and opposite the school.
- 5.—The water-closet has been very recently built; it is 8 feet by 4 and divided into two equal compartments, with the doors at opposite ends; the materials are weatherboards and shingles.
- 6.—Boys' room: 232 superficial square feet; capacity, 2,655 cubic feet. Girls' room: 190 superficial square feet; capacity, 2,173 cubic feet.
- 7.—In the boys' room, 28; in the girls' room, 20.
- 8.—One casement, area $12\frac{1}{2}$ square feet; one door, area 24 square feet; and one fire-place to each room.
- 9.—Having been here only since the middle of last December I cannot give the required information from my own knowledge, and my making use of the records of the school would not be as reliable an answer as the certified returns forwarded to the National Education Office can be; the average number attending the school during the present quarter, commencing January, is as follows:—Males, 33; females, 17. The number on the books is—males, 45; females, 27.
- 10.—Males, maximum, 12; minimum, 5 years. Females, maximum, 13; minimum, 4 years.
- 11.—Two classes: 1st class, weekly average, 37; 2nd class, ditto, 30; ages the same as in (10); the classes are sub-divided, but I arrange all those who cannot read,—the second book of lessons as 1st class, and those who are using the second lesson book as 2nd class.
- 12.—From 9 A.M. to 4 P.M., being 7 hours; school opens at 9 A.M. to 12, noon; closed for 2 hours; opens again at 2 and closes at 4; the interval of cessation is employed by some in taking lunch and in play; by others going home to lunch and returning.
- 13.—One holiday,—Saturday; one vacation of nine days at Christmas.
- 14.—250 days.
- 15.—I should say 6 years.
- 16.—About 28.
- 17.—The average charge for each pupil has been 4d. per week; the highest fee which I have received, or my predecessor, for one of a family, being only 6d.
- 18.—I cannot answer.
- 19.—I cannot answer.
- 20.—
- | | | HOURS. | | | HOURS. |
|--------------------------|---------------|---------------|--------------------------|---|---------------|
| 1st class: Reading | 1 | $\frac{3}{4}$ | 2nd class: Writing | 1 | $\frac{3}{4}$ |
| Writing | 1 | $\frac{1}{4}$ | Reading | 1 | $\frac{3}{4}$ |
| Geography | $\frac{3}{4}$ | | Grammar | 1 | $\frac{3}{4}$ |
| Arithmetic | 1 | $\frac{1}{4}$ | Arithmetic | 1 | $\frac{1}{4}$ |
| | | | Geography | | $\frac{1}{2}$ |

Needlework is taught for one hour every day to such females of both classes as require it.

21.—1st class, 1st book of lessons; 2nd class, 2nd book of lessons and the Scripture lessons; other books than those in the school are not necessary, as there is a supply of books in the school for advanced classes.

22.—Maps of Europe, Asia, Africa, America, and Australia, all in good condition; 3 desks and 6 forms, each 8 feet long; 1 eight-day clock; there are 2 forms, 2 desks, 60 hat pins, and 1 black-board needed.

23.—The correction for breaches of discipline is slapping on the hands or detention in the room after the school has been dismissed.

24.—I cannot, of my own knowledge, answer these questions.

25.—I cannot answer.

26.—James Stritch.

27.—Anne J. Stritch, wife of the preceding.

28.—Ireland.

29.—47 years.

30.—3rd December, 1858.

31.—Trained as a teacher.

32.—At the National Model School, Sydney, Class III, Sec. B.

33.—

34.—£84 per annum.

35.—An average fee of 4d. for each per week.

36.—I cannot answer.

37.—That contained in the first and second books of lessons and in the Scripture lessons, together with the general lesson; I conceive that religion and morality may be learned, more or less, from all the books established by the National Board; the Scripture lessons are read every day and the general lesson every other day.

JAMES STRITCH.

Pambula National School,
15 March, 1859.

PARRAMATTA.

1.—Ross-street, Parramatta.

2.—Schoolhouse, constructed of weatherboards, much dilapidated; in want of repairs and enlargement.

3.—The building is 41 ft. × 27 ft. 6 in. = 1127½ superficial square feet 6 inches.

4.—Playground, 70 ft. × 36 ft. = 280 square yards.

5.—Two water-closets attached, much in want of repairs.

6.—There are three rooms occupied by the pupils; the first 13 ft. 6 in. × 12 ft. 6 in., and 7 ft. 7 in. high = 170 10' superficial = 1295 5' 10" cubic feet. Second room, 17 ft. 9 in. × 12 ft. 9 in., and 8 feet high = 226 3' 9" superficial = 1810 cubic feet 6 in. Third room, 12 ft. 9 in. × 8 ft. 6 in., and 8 feet high = 108 4' 6" superficial = 867 cubic feet.

7.—Average number of pupils usually in room No. 1, 30; second room, 20; and in the infant room, 25.

8.—Ventilation of each room. First room, two doors and one window; second room, four doors and two windows; third room, one door and one window.

9.—Boys' annual average on the books, 38; girls, 48. Average number attending the school, boys 27, girls 37.

10.—Males, maximum age, 13 years; minimum, 3 years. Females, maximum age, 15 years; minimum, 3 years.

11.—The school is divided into four classes. First class, average, 25; second class, ditto, 20; third class, ditto, 18; fourth class, ditto, 12. First class, maximum age, 5 years; minimum, 3. Second class, maximum age, 9 years; minimum, 6 years. Third class, maximum age, 11 years; minimum, 8 years. Fourth class, maximum age, 15 years; minimum, 10 years.

12.—Five hours attendance each day, commencing at 9 A.M., and ending at 4 P.M. Five minutes recess at half-past 10. Cessation from 12 to 2 each day. Employed during those intervals with the pupils in the playground.

13.—Saturday is the only holiday during the week. Vacations—one week at Christmas, one at Easter, and the Anniversary of the Colony one day.

14.—Total number of days appropriated to school studies during the year, 246.

15.—Average length of period pupils remain in the school, four years.

16.—No means of ascertaining.

17.—Weekly payments, from two-pence to one shilling each; annual charge for books, two shillings for each pupil; very few pay this fee.

18.—Amount of school fees for the year ending 30th September, 1858, £64 15s. 5d., appropriated for the benefit of the teacher; teacher's salary from the Board, £87 10s.; assistant teacher, £96; rent of schoolhouse, £52; postage, £1; fees received for books, £1 5s. 6d. Total amount received, £302 10s. 11d.

19.—Total average annual cost of each pupil, £4 14s. 6½d.

20.—Monday, Wednesday, and Friday.—From 9 to 9¼, first class, reading; second class, writing; third and fourth classes, writing. From 9¼ to 10½, first class, writing on slates; second class, reading; third and fourth classes, reading. Recess for five minutes. Thence to 11¼, first class, arithmetic; second class, geography; third and fourth classes, grammar. From 11¼ to 12, first and second classes, singing; third and fourth classes, dictation. Recreation from 12 to 2. From 2 to 3, first class, reading; second class, writing; third and fourth classes, Scripture lessons. From 3 to 4, first and second class, girls, needlework; first class, boys, reading; second class, boys, writing on slates. From 3 to 3½, third and fourth classes, numeration. From 3½ to 4, third and fourth class, girls, needlework; third and fourth class, boys, mental arithmetic. Tuesday and Thursday.—From 9 to 9¼, first class, writing on slates; second class, reading; third and fourth classes, writing. From 9¼ to 10½, first class, reading; second class, writing; third and fourth classes, reading. Recess for five minutes.

minutes. Thence to 11 $\frac{1}{4}$, first class, arithmetic; second class, grammar; third and fourth classes, geography. From 11 $\frac{1}{4}$ to 12, first class, grammar; second class, arithmetic; third and fourth classes, arithmetic. Recreation from 12 to 2. From 2 to 3, first class, reading; second class, dictation; third and fourth classes, Scripture lessons. From 3 to 4, first and second class, girls, needlework; first class, boys, writing on slates; second class, boys, grammar; third and fourth class, girls, needlework; third and fourth class, boys, dictation.

21.—First class, first book of lessons; second class, second book of lessons; third class, third book of lessons; fourth class, fourth book of lessons. First book arithmetic. Condition of the books:—First and second books of lessons, very bad; third and fourth books of lessons, good; Scripture lesson books wanted; first and second books not sufficient.

22.—Prints four, viz.:—The ship, the comparative sizes of wild quadrupeds, the comparative sizes of birds, and the planetary system. Maps three, viz.:—One of Europe, one of Australia, and one of the World. There are four desks, eleven forms, and one black-board; condition pretty good; desks and forms much wanted.

23.—Mode of correction:—Those who are able to write, kept in after school-hours, to write on slates a certain number of short words a certain number of times; those who are not able to write are kept standing for a certain length of time; others not allowed out during the recess, according to their faults. Those who come in late, are kept in the school-room for the same length of time after school-hours. No instruction from any source on this subject.

24.—Three times during the past year, the pupils were examined by the Rev. Mr. Coutts, Local Patron. No prizes or other rewards distributed.

25.—Mr. Wilkins, Inspector of National Schools, visited the school four times during the year 1858; on two occasions he was four hours each day in the school, once three hours, and once for two hours and a half. Inspector's last report to the Board, August, 1858. Reports from visitors' book:—

Parramatta, 23 December, 1857.

This day the National School, under the direction of Mrs. Neill and Miss Styles, was examined by me, and I am happy to state that the school appears to be conducted efficiently and satisfactorily, although it is to be regretted that no better accommodation has yet been found. The present premises are much too small for the number of children generally in attendance. This day the number of boys present were 37, and the number of girls 44. The health of both teachers and scholars must necessarily suffer from being so crowded.

REVD. JAMES COUTTS,
Local Patron.

Visited the Parramatta National School, and heard the assistant teacher examine with ability the third and fourth classes on English and Irish geography. The answers were good, and the children appeared generally intelligent. I cannot but regret the absence of religious instruction.

J. G. NIXON,
Incumbent of St. Peter's, Cook's River.

26 April, 1858.

Visited the Parramatta National School this day, and examined the several classes, and was very well satisfied with the appearance of the scholars, the readiness and accuracy with which they answered the various questions, bore testimony to the diligence and ability of the teachers.

JAMES COUTTS,
22 December, 1858. Minister of St. Andrew's, and one of the Local Board.

26.—Head teacher, Mary Jane Neill.

27.—Assistant teacher, Eliza Styles; monitresses in the infant school, Margaret and Sarah Neill.

28.—Birthplace of head teacher, Belfast, Ireland; assistant teacher, Dublin, Ireland; monitresses, Parramatta, New South Wales.

29.—Head teacher, 45 years; assistant teacher, 26 years; respective ages of monitresses, 14 and 12 years.

30.—My late husband was appointed September, 1852. After his decease, which occurred in September, 1855, I was appointed, November 1st of the same year; assistant teacher appointed 1st January, 1856.

31.—Not trained as teacher; assistant trained as teacher.

32.—Assistant teacher, teachers' training establishment, Marlborough-street, Dublin; period one year; Third Class Certificate.

33.—Head teacher has had experience in teaching for the last 27 years; 6 years in America, 18 years in Parramatta assisting her late husband, and for the last 3 years by herself. No business before adopting that of teacher.

34.—Salary of head teacher, £87 10s.; assistant teacher, £96. Monitresses none.

35.—School fees, £64 15s. 5d.; allowance for rent of schoolhouse, £52; postage, £1; for books, £1 5s. 6d.

36.—Total annual income of the teachers, £302 10s. 11d.

37.—The school is visited by the Rev. James Coutts, Presbyterian Minister. No books used in the school for the purpose of communicating religious instruction.

PEEL.

1.—The school is situate in the Village of Peel, Police District of Bathurst, and County of Roxburgh.

2.—The school is built of brick, on a stone foundation, and shingled; it is in good condition, and does not require repairs, enlargement, or improvement.

3.—The number of superficial square feet contained in the area of the schoolroom is 761; in the classroom, 216; and in the teacher's residence, 522; total, 1,499.

4.—The number of superficial square yards contained in the ground or land adjoining the school, for the use of the pupils, is 9,680.

5.—There are two regular sized water-closets provided for the use of the pupils, built of brick, and shingled; they have two seats in each, and are in good condition.

6.—The schoolroom contains 761 superficial square feet, and 9,132 cubic feet; the classroom contains 216 superficial square feet, and 2,592 cubic feet.

7.—The average number of pupils usually assembled in the schoolroom is about 54; and in the classroom, about 30.

8.—The provision made for ventilation in the schoolroom is four windows, each 6 feet by 6 feet, made to open above and below; the classroom contains two windows, each 6 feet by 3 feet 6 inches, which open above and below; it has also a ventilator in the ceiling.

9.—The average number of pupils on the books for the last year was 38 males, and 36 females, total 74; the average number attending the school for the same time was 29 males, and 25 females, total 54.

10.—The maximum age of the males, at present attending the school, is 13 years, and of the females, 16 years; the minimum age of the males is 3 years, and of the females, 3 years.

11.—The school is divided into four classes; the average number in each class, with the maximum and minimum age of the pupils in each class, is as follows:—

First class,	22	pupils;	maximum	age,	10	years;	minimum,	3	years.
Second "	12	"	"	"	16	"	"	8	"
Third "	10	"	"	"	11	"	"	8	"
Fourth "	10	"	"	"	13	"	"	12	"

12.—The pupils attend school five hours each day, commencing at 9 o'clock A.M., and terminating at 3 o'clock P.M., in winter, and 4 o'clock in summer; with cessation from 12 to 1 o'clock in winter, and from 12 to 2 o'clock in summer; the interval is occupied by the children generally going for dinner; those who do not go for dinner, and the others while assembling, are under the care of the teacher, in the playground, who corrects what is wrong, and prevents boisterous play.

13.—Every Saturday is a holiday; there is vacation for one week at Christmas.

14.—The total number of days devoted to school studies during the year is 254.

15.—The average length of the period during which the pupils have remained in this school, from the time of their first entrance to the time of their finally leaving, (for the three years in which it has been in operation) is about twelve months.

16.—The number of children between the ages of 5 and 15 years in the district or locality where the school is situate, who do not usually attend school, is about 10.

17.—The weekly charge for each pupil for instruction is as follows:—Under 6 years of age, 6d. per week; 6 to 10 years of age, 9d. per week; over 10 years of age, 1s. per week; in no case, however, is any family charged more than 2s. per week; they are not called upon to pay any extra charge for books; therefore the total annual charge for each pupil is—under 6 years of age, £1 6s.; 6 to 10 years of age, £1 19s.; over 10 years of age, £2 12s.; in no case is any family called upon to pay more than £5 4s. per annum.

18.—The amount of school fees received from the pupils of the school, during the twelve months ending the 30th September, 1858, was £80; after deducting 5 per cent. from this sum, to supply the school with pens, ink, pencils, &c., the remainder £76, was appropriated to the use of the teacher; the salary from the National Board for the above period was £108, making the total amount received from all sources during the year £188.

19.—Dividing the last-mentioned total by the average number of pupils (66) actually attending the school during the period above-mentioned, gives the average annual cost of the education of each pupil, £2 16s. 11 $\frac{1}{2}$ d.

20.—The following is a detailed enumeration of the several subjects of instruction given to each class, and the precise portion of time allotted to each of such subjects, in each day throughout the week:—

FIRST CLASS.				H.	M.
Reading and spelling, with explanation of words and sentences	2	0
Writing from copies, and dictation	1	15
Arithmetic, including mental calculation	1	15
Geography	0	30

SECOND CLASS.

Reading, with spelling and explanation	1	15
Writing from copies	0	45
Writing from dictation	0	30
Arithmetic, including tables	1	15
Geography	0	45
Grammar	0	30

THIRD CLASS.

	H.	M.
Reading, including spelling, and explaining the most difficult passages, Saxon and Latin prefixes and affixes	1	30
Writing from copies, and dictation	1	15
Arithmetic, including tables and the easy rules of mental arithmetic ...	1	15
Geography	0	30
Grammar	0	30

FOURTH CLASS.

Reading, with explanation, and Greek and Latin roots	1	30
Writing from copies, and dictation, including composition	0	45
Arithmetic, including mental arithmetic	1	15
Geography, mathematical, physical, and political	0	30
Grammar	0	30

All the girls occupy one hour each day learning needlework.

21.—The following is a list of the titles of all books used in each of the several classes :—
First class—The National Board's first book of lessons. Second class—The National Board's second book of lessons, sequel to the second book of lessons, first book of arithmetic; Professor Sullivan's English grammar, introduction to geography and history, spelling-book superseded. Third class—The National Board's third book of lessons, Scripture lessons, first book of arithmetic; Professor Sullivan's English grammar, introduction to geography and history, spelling-book superseded, English dictionary. Fourth class—The National Board's fourth book of lessons, supplement to the fourth book of lessons, Scripture lessons, arithmetic in theory and practice, epitome of geographical knowledge, book-keeping, mensuration; Professor Sullivan's English grammar, geography generalized, spelling-book superseded, English dictionary; Dr. Thomson's Euclid. The books are all in good or fair condition, and are adequate to the present wants of the school; no other kinds are at present needed.

22.—There are seven large maps used in the school, viz. :—one of The World, Europe, Africa, America, and Palestine, and two of Australia; there are also two small blank maps, viz. :—The World, and Europe, and a map of geographical terms; a small globe, a set of tablet lessons, and a small black-board fixed above the fireplace; a large black-board with easel is much required; a map of Asia would also be desirable.

23.—The following suggestion by the National Board's officer is strictly carried out, to preserve discipline in the school; "corporal punishment to be rarely, if ever, resorted to; the teacher to aim at governing the children by affection, and reason, combined with "firmness and constant attention to details, rather than by harshness and severity." Pupils when noisy or boisterous, are made to stand alone, until they shew signs of repentance, or promise amendment.

24.—There is an examination of the school every year, at Christmas, at which the Local Patrons, parents of children, and the public generally take part; at the close of the examination, prizes, consisting of books, work boxes, and writing cases, are awarded to the most deserving pupils.

25.—The school was officially inspected once during the past year by W. Wilkins, Esq., the National Board's Inspector, his visit occupied one entire day; the school was also officially visited three times during the past year, by B. H. McCann, Esq., the National Board's Organizing Master, for the Western District, his visits occupied the greater part of two days, each time; the teacher is not aware of any report existing on the state of the school.

26.—The name of the head teacher is Patrick Mulholland.

27.—He is not assisted, except by his wife, who instructs the female children in needlework.

28.—The birthplace of the above is Ireland.

29.—The teacher's age is 33 years.

30.—He was appointed to the office of National teacher in the year 1844.

31.—He is a trained teacher.

32.—He was trained in the Normal Establishment of National Education, in Dublin, for the period of six months; he possesses a certificate of competency for 3rd Division of First Class.

33.—He never followed any other occupation or business but that of teacher.

34.—The joint salary of the teacher and his wife is £120 per annum.

35.—The school fees for the year 1858 amounted to £76; the teacher also possesses a free house and garden, worth about £20 per annum.

36.—The total annual income of the teacher is £216.

37.—All the children who are able to do so read the Scripture lessons of the National Board, three-quarters of an hour each day, taught by the master; special religious instruction has been given twice during the last two years, in the classroom, by Rev. Mr. Lyle, Church of England Clergyman, to the children belonging to his denomination.

PATK. MULHOLLAND, Teacher.

WM. CUMMINGS,
Local Patron.

UPPER PICTON.

UPPER PICTON.

- 1.—The school is situate at Upper Picton.
- 2.—The materials of which the school is constructed consist of brick on a cut stone basecourse, and a stone foundation; the present condition of the building is excellent, and is not, at present, in need of repairs, enlargement, or improvement.
- 3.—The number of superficial square feet contained in the area of the schoolhouse is 690 square feet.
- 4.—The number of superficial square yards contained in the land adjoining the school, for the use of the pupils, is 2,300 square yards.
- 5.—The water-closets, two in number, provided for the use of the pupils, are constructed, one of brick, on stone foundation the depth of the sinking; the other, of stone, on a similar base; and both are provided with necessary furniture. Their present condition is clean and perfect.
- 6.—The children are all taught in the one room, there being no division therein; the number of superficial square feet contained in such room being 690, and of cubic feet 6,900.
- 7.—The average number of pupils usually assembled in the above room is 50.
- 8.—The provision made for the ventilation of the schoolroom is effected by five windows, measuring each 3 feet by 4 feet; two wind-drafts in the ceiling; and, considering the elevated position of the school, perched, as it were, on nearly the highest ground in a very elevated country, an almost thorough and complete ventilation is secured.
- 9.—The annual average number of children on the books is—of boys, 37, and of girls, 40; and the average number attending the school amounts to about 24 boys and 26 girls.
- 10.—The maximum age of the boys in the school is 13 years, and the minimum age is 4 years; the maximum age of the girls is 15 years, and the minimum 4 years.
- 11.—The number of classes into which the school is divided is 4; the average number in each class is 13; and the maximum and minimum age in each class is as follows:—
- | |
|--|
| 1st class, maximum 9 years, minimum 4 years. |
| 2nd " " 12 " " 6 " |
| 3rd " " 10 " " 7 " |
| 4th " " 15 " " 9 " |
- 12.—The number of hours during each day the pupils attend school is five, commencing at 9 o'clock, and terminating at 4 o'clock; the times of intervening cessation of study are at 10½ o'clock, for about five minutes, and from 12 till 2 o'clock; the former is employed in getting drink, &c., &c.; the latter interval after dinner is employed—by the girls, principally at needlework—by the boys, at various kinds of amusement, under the superintendence of the teachers.
- 13.—The number of holidays in each week, none; of half-holidays in each week, one; the number of vacations in the year is two, the duration of one is about a fortnight, of the other three days. The vacations occur at Christmas and at Easter.
- 14.—The total number of days appropriated to school studies during the year is 272 days.
- 15.—No cases have occurred to enable the teacher to state the average length of the period during which pupils, from their entrance to the time of their finally leaving the school, remain there, the school being in operation little more than two years.
- 16.—The number of children between the ages of 5 and 15 years, in the district where the school is situate, who do not usually attend, cannot be answered by the teacher with any degree of precision; the number is estimated at from 40 to 60 children.
- 17.—The quarterly sum charged to each pupil for instruction is 6s. 6d.; the annual charge for books 2s. 2d.; and the total annual charge for each pupil is £1 8s. 2d.
- 18.—The annual amount of school fees received from the pupils of the school during the twelve months ending 30th September, 1858, was £70 3s. 6d., appropriated to the teacher's use; which, with £108 amount of salary for teacher, and £3 12s. 3d. amount received for books, makes a total amount of £181 15s. 9d. received, from all sources, towards the support of the school during the above-mentioned period.
- 19.—Dividing the last-mentioned total by the average number of the pupils actually attending the school during the period above-mentioned, the average annual total cost of the education of each pupil amounts to £2 4s. 10½¹/₂d.
- 20.—The subjects of instruction given to each class are as follows: 1st class—reading, writing, arithmetic, and object lessons on natural history. 2nd class—reading, writing, grammar, geography, arithmetic, and natural history. 3rd class—the same as last, with the science of common things explained additional. 4th class—reading, writing, geography, grammar, arithmetic, composition, and natural history.
- The precise time allotted to each subject in each day, throughout the week, is as follows: 1st class—reading, 2¼ hours; writing, 1¼ hours; arithmetic, ½ hour; object lesson, ½ hour. 2nd class—reading, 1½ hours; writing, 1½ hours; arithmetic, 1¼ hours; and on each alternate evening natural history by object lesson, 1½ hours, instead of arithmetic; grammar and geography on alternate days, ¾ hour. 3rd class—reading and writing, 1½ hours each; common things explained, alternating with grammar and geography, ¾ hour each; arithmetic, ¾ hour; and natural history, ½ hour. 4th class—reading, 1½ hours; writing, ¾ hour; arithmetic, 1¼ hours; geography and grammar, with composition, alternately, ¾ hour; and natural history, ¾ hour.
- 21.—Books used in each of the classes in the school:—1st class, first book of lessons; 2nd class, second book of lessons; 3rd class, third book of lessons, Scripture lessons (first and second, Old and New Testament), Sullivan's geography and grammar, first book of arithmetic; 4th class, fourth book of lessons, Scripture lessons, Nos. 1 and 2 of Old and New

New Testament, Sullivan's geography and grammar, Walkinghame's and first book of arithmetic. The present condition of the books now in use is fair; other kinds of books are not, at present, needed, and the number of books at present in use is adequate to the wants of the school.

22.—The maps in the school are those of Europe, Asia, Africa, America, Australia, with two maps of the hemispheres, a map of the comparative sizes of animals. There are no diagrams, prints, or instruments, in the school. Three desks, each ten feet long, with forms to match; six desks, each desk 6 feet long, with seats to match—all in good condition; a black-board in swinging frame, with about five dozen slates, pencils, and pens, constitute the furniture of the school; no others are at present needed.

23.—The system of correction employed in the school to preserve discipline is that by short confinement after school-hours, interdiction from play during hours of recreation. Corporal punishment is seldom resorted to—moral influence has usurped the place of the rod. The attention of all National School teachers is drawn to a resolution of the Commissioners of National Education, to the effect that corporal punishment, in any shape, is interdicted. To pinch the ear, pull the hair, to strike on the head with the knuckles, or beat with a rod or strap on the hands or any part of the body, are practices strictly forbidden by the resolution above referred to.

24.—The pupils of the school are examined, with reference to their progress, once a year, by the Inspector and Superintendent. No prizes, or other rewards of merit, are given in the school.

25.—The school is officially visited by the Inspector. The school is visited by the Inspector once a year, the length of time occupied in this visit being one day. The Patrons have visited the school twelve times during the past year, each visit occupying about one hour. The teacher believes a report on the state of the school does exist, but he is unable to furnish it, it being in the hands of the Inspector. The teacher has no remarks to make on the Inspector's report of his school; and with reference to the present condition of the school the teacher has only to state, that the school still holds the full confidence of the public and neighbourhood, and has not retrograded either in vigour or character.

26.—Name of head teacher, John Haynes.

27.—Names of assistant teachers—Margaret Haynes, Mary Haynes.

28.—Birthplace of the two former, Ireland; and of the latter, at sea, on voyage to Australia.

29.—John Haynes, about 41 years; Margaret Haynes, about 40 years; Mary Haynes, about 16 years.

30.—Date of appointment to present office, October, 1856.

31.—Not trained as a teacher.

32.—Answered in the foregoing.

33.—The experience the teacher has had in teaching, previous to present appointment, extended over eight years—five years at Maitland, and three at Singleton. The occupation before adopting that of a teacher was clerical.

34.—The annual salary of teacher (joint salary of teacher and wife) is £108.

35.—Fees, exclusive of salary, for the year, about £70; there are no allowances or emoluments.

36.—Total annual income of teacher, £178.

37.—There is no religious or moral instruction given in the school; the school is not visited by any Clergyman or Minister of Religion; the school is not supplied with books for such purpose.

PITT TOWN.

1.—This school is situated at the Australian Agricultural Company's Mines, Pitt Town, near Newcastle.

2.—The building is weatherboard; it has a brick chimney, four pairs of sashes, and one folding light; and, having been newly erected, needs no repairs, enlargement, or improvement.

3.—Dimensions of schoolroom,—36 × 18 feet = 648 feet.

4.—The number of superficial square yards contained in the ground adjoining the school,—1240 $\frac{1}{4}$, or 2 roods 1 perch.

5.—The water-closet is a newly erected building, weatherboard, shingled, with a ledge door and proper fastenings.

6.—The number of superficial square feet contained in the schoolroom is 648, and of cubic feet, 9,396.

7.—This school was not opened till the 8th of November, 1858, consequently all the averages given in this return are calculated from the first 13 weeks attendance; the schoolroom is undivided, and the average attendance 90.

8.—All the necessary ventilation is derived from the roof.

9.—The average number of children on the books have been 105 (*i.e.*), 52 boys and 53 girls; and in attendance, 47 boys and 43 girls; total in attendance, 90.

10.—The maximum age of pupils 12, minimum 3; of boys, maximum 10, minimum 3; girls, maximum 12, minimum 3.

11.—The school is divided into three classes :—

	On the books.		Totals.	Attendance.		Totals.	Max. age.		Min. age.	
	Boys.	Girls.		Boys.	Girls.		Boys.	Girls.	Boys.	Girls.
1st class.....	23·3	21·7	45·	20·	17·4	37·4	9·	9·	3·	3·
2nd „	14·	18·	32·	12·	15·	27·	10·	10·	5·	5·
3rd „	15·	13·	28·	14·6	11·	25·6	10·	12·	6·	6·
Total.....	52·3	52·7	105·	46·6	43·4	90·	10·	12·	3·	3·

12.—The pupils attend school 5 hours each day on 5 days of the week, commencing at 9 A.M.; they vacate for fifteen minutes at 11 o'clock, and close at 12; re-assemble at 1 P.M., and close at 3 P.M. The time from 11 to 11½ A.M., is allowed the children to play, slake their thirst, &c., and from 12 to 1 P.M. to go home for refreshment.

13.—Saturday is always a holiday; and, besides these, Good Friday and a week at Christmas, with a few days, more or less, as it may happen to fall, either early or late in the week; all other holidays must be by special permission of the Local Patrons.

14.—It will evidently appear from the foregoing, that the number of days appropriated to school duties during the year will be about 250.

15.—Having but just entered upon the second quarter, I have no sufficient data for saying what the period may be through which the pupils in this locality remain at school. I can state a fact bearing on this part of your circular:—A boy 9 years of age was received into the school on the 10th January, and, although most lamentably behind in every rudiment of knowledge, was taken away on the 18th February to work with his father in the mines.

16.—I have all the children above 5 and under 15 that are not working in the mines; the number of whom does not exceed 12.

17.—The weekly charge for each pupil is—for one, 8d.; more than one, 6d.; these prices were fixed by the Local Patrons; the annual charge does not exceed £2 for a single child; nor, when more than one from a family, £1 10s., including ½d. per week from each child for a book fund.

18.—I can only state the amount of fees received for the first quarter, and from such premises give the probable amount annually. There has been received by me for—

13 weeks' fees	£31 4 0
To 3 months' salary	24 0 0
Total	£55 4 0

These fees are appropriated to my own use, being a little more than 6½d. per week for each child in attendance. The probable annual amount will then be—

To fees for 4 quarters, at £31 4s. per quarter...	£124 16 0
„ 12 months' salary, at £8 per month	96 0 0
„ Annual allowance for postage, &c.	1 0 0
„ Estimated cost for books, at ½d. each child } per week	9 15 0
Total	£231 11 0

19.—The annual average cost for the education of each pupil will be from the foregoing, £2 11s. 5½d.; and apportioned thus,—average cost to Government £1 1s. 4d., average cost to parents £1 10s. 1½d.

20.—1st. class:—This is, properly speaking, an infant class, but, in addition to the alphabet, they are taught to form the letters on slates from examples set them on the black-board; to perform mentally simple operations in addition, subtraction, and multiplication; to know the days of the week and months of the year, and, such as are using the first book, to spell all the monosyllables that may occur in their lesson, or to the mind of the teacher; to know the sound of the vowels; and the names, uses, and habits of the domestic animals, and the uses of common things. The time in the 1st class is divided as follows,—Morning: reading, 1 hour; spelling, ½ an hour; writing on slates, ½ an hour; vacation, 15 minutes; mental training, ¾ of an hour. Afternoon: reading, 1 hour; writing on slates, ½ an hour; mental training, ½ an hour. During the week: reading, 9½ hours; writing on slates, 5 hours; mental training, 6¼ hours; spelling, 2½ hours; general lesson, ½ an hour; vacation, 1¼ hours; total, 25 hours. 2nd class:—The pupils of this class are taught to read from the second book; to spell the principal words of their lessons, and to give their meanings; to name all the parts of speech in the lesson read; to define the parts of speech; to write from examples set them on the black-board, and, such as are competent, from slips in copy-books, and from dictation; to know and define the common geographical terms; to perform, mentally, operations in arithmetic; to write numbers from dictation, and to work sums in addition and subtraction, and to know the properties and uses of common substances. The time in this class is allotted as follows,—Morning: From 9 to 9½, writing from copies; 9½ to 10, writing from dictation; 10 to 10¾, reading; 10¾ to 11, naming the parts of speech; 11 to 11¼, vacation; 11¼ to 12, arithmetic and tables. Afternoon: From 1 to 2, on alternate days, geography and grammar; 2 to 3, reading and spelling. During the week: reading, 7 hours; writing, 5 hours; grammar, 3¼ hours; geography, 2 hours; spelling, 2 hours; arithmetic and tables, 4 hours; general lesson, ½ an hour; vacation, 1¼ hours; total, 25 hours. 3rd. class:—The proper designation for this class is a second sequel; the pupils

pupils are taught as specified by the time table, and in their stated order,—Morning: From 9 to 9½, reading Scripture lessons; 9½ to 10, answering questions on the lesson read; 10 to 10½, writing from slips; 10½ to 11, writing from dictation; 11 to 11¼, vacation; 11¼ to 12, arithmetic. Afternoon: From 1 to 1½, on alternate days, grammar and geography explained; 1½ to 2, answering questions on the lesson given; 2 to 2½, reading from 1st sequel; 2½ to 3, spelling the most difficult words, give their meanings, and, as often as possible, their synonyms, and to parse fully some sentence selected from the lesson read. During the week: reading, 4½ hours; interrogating, 4½ hours; writing, 5 hours; spelling, 1½ hours; arithmetic, 3½ hours; grammar, 1½ hours; geography, 1½ hours; object lesson, 1 hour; general lesson ½ an hour; vacation, 1¼ hours; total, 25 hours. The only exceptions to these tables are—1st: On Monday morning a lesson is given to the whole school, setting forth the precepts of the general lesson as binding on every heart and conscience. 2nd: To the sequel class on Thursday afternoon 1 hour is given to an object lesson, illustrative of one of the three kingdoms in nature. 3rd: On Friday afternoon the second and sequel classes repeat the whole of the most useful arithmetical tables; after which, such portions of their grammar and geography lessons as may have come particularly under their notice during the week are again reverted to, and close by singing a hymn from their reading books.

21.—The books in use are all the publications of the Irish National Board, and are as follows,—the 1st, 2nd, 3rd, and 4th books for reading (the two last are not used at present), and the two sequels to 2nd book, English grammar, introduction to geography, spelling-book superseded, a treatise on arithmetic, the 1st book of arithmetic, a treatise on mensuration and book-keeping, 4 volumes of Scripture lessons, a set of arithmetical and reading sheets; the whole constituting a grant from the Board are all in good condition, and amply sufficient for present purposes.

22.—The tablets hung round the walls of the school are—1st: 20 colored prints framed in cedar and fixed on boards, forming 10 double tablets, each having another print on the reverse side; the subjects of these prints are such as their title indicates, *i. e.*, preceptive illustrations of the Bible. 2nd: one tablet of colors, and another of forms, having a box of letters, colors, and forms to match. 3rd: the general lesson, notice to visitors, and table of minimum attainments, a map of the World, Australia, and Asia; we have a black-board 4 ft. square, master's desk and stool, 8 desks each 8 ft. long, and stools sufficient to seat a hundred and fifty children.

23.—The system of correction employed to preserve discipline is mostly of a moral and gentle kind, such as standing out, putting down in the class, or being made to sit without the desks in the immediate front, and under the eye of the teacher; physical correction only resorted to for lying, swearing, cruelty to their schoolmates, or wilfully persisting in talking after repeated warnings. I have never received any communications on this subject, from either the Inspector, Local Patrons, or Parents, there having been no just cause for complaint.

24.—This school having been open but one quarter I have nothing to report, but that it has not been examined by either the Inspector, Local Patrons, or Minister of Religion.

25.—For the same reason as above, it is quite out of my power to give an answer to this question.

26.—Matthew Willis.

27.—Assistant teachers: Mrs. M. Willis and Mary Willis, who has been appointed provisionally a pupil teacher, and whose examination is pending.

28.—Matthew Willis, born at Wallingford, Berks; Mrs. M. Willis, born at Christchurch, Hants; and Mary Willis, born in London.

29.—Matthew Willis, 48 years of age; Mrs. M. Willis, 41 ditto; Mary Willis, 16 ditto.

30.—Appointed a National School teacher at Gosforth, in the Police District of Maitland, in September, 1856, and to the present school in November, 1858.

31.—Not a trained teacher.

32.—Class 3, section A.

33.—Had been a Sabbath school teacher for 15 years; a city missionary 2½ years; conducted a private school 1½ years; and attended the Model School, Fort-street, 2 months previous to my appointment to Gosforth; my former occupation was a modeller and carver.

34.—The amount of salary received by me for myself, wife, and daughter, inclusive, is, for one quarter, £24.

35.—Amount received for fees for 13 weeks, £31 4s.

36.—Total annual income from the above estimate, inclusive of £1 as an allowance for postage, &c., £221 16s.

37.—Religious instruction given to the sequel class every morning, and to the whole school on Monday morning, while, with every reading lesson, morality is strictly enjoined by the teacher; all religious instruction drawn exclusively from the Scripture lessons and general lesson.

MATTHEW WILLIS.

PORT MACQUARIE.

1.—Clarence-street.

2.—Brick, in pretty good condition, and quite large enough.

3.—3,080 feet outward measure, or 2,530 feet interior measure.

4.—3,000 square yards.

5.—Old and unfit for use until repaired.

6.—Two rooms—each contains 1,250 superficial square feet; each also contains 15,000 cubic feet.

7.—About 30 in each room.

8.

- 8.—Each room has for ventilation four windows, two doors, and a fireplace.
- 9.—Average roll, 74, viz. :—44 boys, 30 girls. Average daily attendance for 1858,—30 boys, 25·5 girls; total average, 55·5.
- 10.—From 3 to 16 years of age.
- 11.—Three classes :—First, second, and third. First class contains 15 pupils, from 3 to 6 years old; second class, 30 pupils, ages from 5 to 11 years; third class contains 25 pupils, from 9 to 16 years old.
- 12.—Five hours daily instruction, viz. :—9 to 12 A.M., and from 2 to 4 P.M.; for dinner and recreation, 12 to 2 P.M.
- 13.—Saturdays, the 26th of January, the 24th of May, and Good Friday; also a week in December, and a week in June.
- 14.—296 days of school duties each year.
- 15.—About $2\frac{1}{2}$ years the average of each.
- 16.—From 50 to 60.
- 17.—Weekly charges from 3d. to 9d. each; average weekly contribution, $4\frac{1}{2}$ d. each; yearly charge for each pupil, £1 1s. $11\frac{1}{2}$ d.
- 18.—School fees for the 12 months ending 30th September, 1858, £57 1s. 10d., for the support of the teacher; yearly salary from the National Board, £87 10s. 0d.;—total sum for the support of the school, £144 11s. 10d.
- 19.—Fees, £57 1s. 10d.; salary, £87 10s. 0d.;—total sum received, £144 11s. 10d., divided by 55·5, the average daily attendance for the year,—gives the total annual cost for the instruction of each pupil to be £2 12s. $1\frac{1}{4}$ d.
- 20.—First and second classes exercised daily from 9 to $9\frac{1}{2}$ A.M., with numeration, notation, tables of multiplication, weights, and measures; then form in classes for reading and spelling till $10\frac{1}{2}$;—third class engaged in arithmetic from 9 to $10\frac{1}{2}$ A.M.; then all march out for play till $10\frac{3}{4}$; form in lines, march;—third class reading, spelling, &c.; second class and first class, writing on slates till $11\frac{1}{2}$ daily course, then from $11\frac{1}{2}$ to 12 exercised simultaneously—Monday, in singing, Tuesday, mental arithmetic, Wednesday, geography, Thursday, arithmetic, Friday, grammar.
- Evening school :—2 to $2\frac{1}{2}$ P.M., writing in the books; the infant portion exercised with lessons on objects, &c., from $2\frac{1}{2}$ to $3\frac{1}{2}$; the first and second classes form for reading and spelling, the others employed with arithmetic. At 3 P.M. the girls commence needlework, the rest employed in writing a lesson dictated for them—till 4 P.M.
21. National series :—first, second, sequel to second, third, fourth, fifth reading books; Scripture lessons, geography, grammar, and arithmetic. Other books might be added to the present number with advantage.
- 22.—Illustrated reading lessons on farming; do. on animals; do. mechanical operations; do. astronomy; mathematical instruments; Hemispheres, England, Scotland, Ireland, and Palestine;—all old and unfit for further use. A new series much needed; also, a black-board, and swings.
- 23.—Retain them when the school is dismissed, and let them write on the slate the word *talking* or *playing* for 50, 100, or 20 times; make them stand alone, and thus disgrace them, or by a stripe on the palm of the hand.
- 24.—The pupils are publicly examined on the anniversary of Her Majesty's Birthday by the teacher; other persons are invited to question them, which they do, after which *books* are presented to them; also a public tea party is prepared—pupils have free admission; visitors pay one shilling each; after tea a few friends address the meeting on the importance of education.
- 25.—Mr. Wm. McIntyre made his first and only visit to this school on the 16th of November, 1858, and spent six days here.
- 26.—Thomas Greenwood Hird.
- 27.—
- 28.—Bradford, Yorkshire, England.
- 29.—Aged 36 years.
- 30.—July, 1853.
- 31.—Yes.
- 32.—Private school, by a brother; about 2 years.
- 33.—Took charge of a school in England on my own responsibility, May 14th, 1843, and have continued teaching up to the present. I left England in 1848, was employed as teacher during the voyage, arrived at Sydney in July, took charge of the Wesleyan school, and taught there till January, 1853, when I resigned my situation, and went to Ballarat for about ten weeks; hence I was employed as teacher about 12 years before I entered on this situation in July, 1853.
- 34.—Yearly salary for 1858, £87 10s. 0d.
- 35.—School fees, £57 1s. 10d.
- 36.—Total yearly income, £144 11s. 10d.
- 37.—Scripture lessons, and the general lesson daily.

 PYRMONT.

- 1.—Pyrmont.
- 2.—Stone; in indifferent state of repair.
- 3.—About 260 square feet.
- 4.—About 360 square yards.
- 5.—None.
- 6.—About 260 square feet, 2,080 cubic feet.
- 7.—30.

- 8.—None beside the doors, windows, and fireplace.
- 9.—16 males, 34 females, on the books.
- 10.—The maximum, 15; minimum, 3 years.
- 11.—Three classes; 10 in 1st class, 11 in 2nd ditto, 13 in 3rd; 5 years maximum age in 1st class, 3 minimum ditto; 10 maximum, 5 minimum, for 2nd class; 15 maximum, 10 minimum, in 3rd class.
- 12.—Five hours, commencing at 9 A.M., terminating at 4 P.M. Interval from 12 noon to 2 P.M. for dinner.
- 13.—Holidays, two; Sunday and Saturday. Vacations, three, of one week; one at Christmas, ditto Easter, and Midwinter.
- 14.—240 days.
- 15.—The school has been established so lately as not to admit of this question being answered.
- 16.—The teacher cannot answer this question.
- 17.—From 3d. to 1s. per week; total amount, 12s. to 48s. No annual charge for books.
- 18.—The school commenced at the date indicated; the school fees are appropriated to the support of the teacher, who pays the rent for schoolhouse; salary at the rate of £48 per annum from National Board has been received from 1st November, 1858; nothing received from other sources.
19. As the school was not in operation during the period named, this question cannot be answered.
- 20.—Reading, writing, arithmetic, geography, grammar, Scripture history, and needlework. Monday, Wednesday, and Friday, 9 to 10½ reading and writing; recess from thence to 11¼; arithmetic, geography, and grammar, to 12; 2 to 3 writing, reading, and Scripture history; 3 to 4 needlework; Tuesday, Thursday, and Friday, the same.
- 21.—Sequel to the 2nd book of lessons, 2nd book of lessons, 1st reading book, Sullivan's geography of history, English grammar, arithmetic (a treatise on), Scripture history; a few others needed.
- 22.—A map of the World.
- 23.—No such instructions.
- 24.—The school twice visited by the teacher of the Model School, Sydney. Some prizes distributed at the end of each quarter by the teacher.
- 25.—By the officers of the National Board; no report of the state of the school. The school is to be looked upon as in course of formation in a district which has been much neglected.
- 26.—Caroline Leith.
- 27.—None at present.
- 28.—Of teacher, Scotland.
- 29.—28.
- 30.—1st November, 1859.
- 31.—Trained as a governess.
- 32.—At private schools.
- 33.—Experience in teaching as governess for several years in England, and in forming the school at Pymont, previous to appointment by National Board.
- 34.—As above, £48 per annum.
- 35.—School fees as above, out of which rent to be paid.
- 36.—About £72.
- 37.—By teacher, from the books sanctioned by the Board, each afternoon; Scripture lessons from the Old and New Testament.

RAYMOND TERRACE.

- 1.—Raymond Terrace, Parish of Eldon, County of Gloucester.
- 2.—The house used as schoolhouse, teacher's residence, &c., is built of brick, and is in good condition.
- 3.—1,188 superficial feet.
- 4.—24,200 square yards.
- 5.—There is one water-closet used by the pupils, weatherboard, and in good condition.
- 6.—There are two rooms appropriated to teaching, one containing 266 superficial feet, and 2,881 cubic feet; the other containing 143 square feet, and 1,551 cubic feet.
- 7.—Average number of pupils who have assembled in the large room, 27; in the small room, 15.
- 8.—The schoolrooms are well provided with means of ventilation, they are lofty and are each furnished with a chimney; the larger room has two windows (French lights) 7 feet 3 inches in height by 3 feet wide, and one door; the smaller room is provided with one window, 5 feet 3 inches high by 3 feet 4 inches.
- 9.—Annual average number of children attending the school, 54.25; girls, 25.25; boys 29.
- 10.—Maximum age—boys, 14 years; girls, 13. Minimum age—boys, 3 years; girls, 4 years.
- 11.—The school is divided into three classes:—average number in 1st class, 24.25; 2nd class, 23; 3rd class, 7. Maximum age, 1st class, 7 years; 2nd class, 13 years; 3rd class, 14 years. Minimum age, 1st class, 3 years; 2nd class, 5 years; 3rd class, 9 years.
- 12.—The pupils attend the school four hours each day, on five days in the week. School duties commence at 9 A.M. and terminate at 4 P.M. A recess of a quarter of an hour is observed

observed in the morning for recreation, and the interval from 12 till 2 is devoted to refreshment.

13.—One day (Saturday) in each week is set apart as a holiday. Three vacations are observed throughout the year, of one week's duration each, at Christmas, Easter, and Midwinter.

14.—240 days during the year are devoted to school duties.

15.—The school has not been sufficiently long established to afford information upon this point.

16.—The district is too extensive to permit of this being accurately ascertained, there are however about 40 children attending another school at Raymond Terrace, (R.C.) and probably not less than 30 who do not attend any school.

17.—The fees charged to each pupil have been 6d. and 1s. per week, according to the circumstances of the parents; only 9 pupils have paid the higher fee. An annual charge of 2s. is made for each child, in order to provide slates, maps, and necessary furniture, but this fee is not generally paid, many evading it.

18.—The total amount of school fees received to the 30th September, 1858, was £37 7s. 8d.; but this does not indicate the annual amount, as the school was not in operation before the 1st February, 1858; the total amount of school fees received during the year ending 1st February, 1859 was £60 10s.; of which sum £40 were paid for rent of schoolhouse and premises, and the balance £20 10s. remained for the benefit of the teacher; £108 were received during that period from the Board of National Education for teacher's salary; total amount received from all sources towards the support of the school during the period above-mentioned, £168 10s.

19.—Average annual cost of the education of each pupil, £3 1s. 1½d.

20.—The following table shews the subjects of instruction imparted to each class, with the time that is allotted to each of such subjects:—

FIRST CLASS.							
	M.	T.	W.	T.	F.		Total.
Reading.....	2	2	2	2	2		10
Writing.....	1¾	1¾	1¾	1¾	1¾		8¾
Tables.....	½	½	½	½	½		2
Singing.....	½	½	½	½	½		2
Geography.....	½	½	½	½	½		1
Recess.....	¼	¼	¼	¼	¼		1½
	5	5	5	5	5		25

SECOND CLASS.							
Reading.....	¾	¾	¾	¾	¾		3¾
Writing.....	¾	¾	¾	¾	¾		3¾
Arithmetic.....	¾	1	¾	¾	1		4¼
Grammar.....	¾	¾	1½	¾	¾		2½
Geography.....	¾	¾	1	¾	¾		2¼
Scripture lessons	1	1	1	1	1		5
Dictation.....	¾	¾	¾	½	¾		1½
Singing.....	¾	¾	¾	¾	¾		1
Recess.....	¼	¼	¼	¼	¼		1½
Hours...5	5	5	5	5	5		25

THIRD CLASS.							
Reading.....	¾	¾	¾	¾	¾		3¾
Writing.....	¾	¾	¾	¾	¾		3¾
Arithmetic.....	¾	1	¾	¾	1		4¼
Grammar.....	¾	¾	1½	¾	¾		2½
Geography.....	¾	¾	1	¾	¾		2¼
Scripture lessons	1	1	1	1	1		5
Dictation or composition }	¾	¾	¾	½	¾		1½
Singing.....	¾	¾	¾	¾	¾		1
Recess.....	¼	¼	¼	¼	¼		1½
Hours...5	5	5	5	5	5		25

The girls receive two hours instruction in needlework twice a week.

21.—The only books used by the pupils of this school are the reading books published by the direction of the Board of National Education in Ireland, all other subjects being taught orally. The children of the 1st class are taught from the tablets and 1st book of lessons; the 2nd book of lessons and the sequel to the 2nd book are used in the 2nd class; and the children of the 3rd class read from the 4th class books. There is a deficiency of 1st class books and of Scripture lessons, but the books in use are in good condition, and with the exception referred to, adequate to the present requirements of the school.

22.—There are four maps in constant use in the school. 1. The map of the World. 2. Map of Europe. 3. Map of Palestine. 4. Map of Australia; these are in good condition.

dition. There are also 5 prints,—3 illustrative of zoology, 1 of botany, and 1 of naval architecture; but there is an utter want of prints or diagrams, which would facilitate the teaching of natural philosophy or of mathematical and physical geography.

23.—The proper order and discipline is as far as possible maintained without the infliction of corporal punishment, the teacher relying upon the kindly influences which are exerted upon his pupils, to produce the desired effect; personal chastisement, however, is occasionally administered to the most unruly, but other modes of punishment are more frequently adopted, such as the deprivation of liberty or of any indulgence which the other children may enjoy. No instructions or remarks have at any time been received upon this subject from any quarter whatever, during the time that this school has been in operation.

24. In addition to the official visits of the Organizing Master noticed hereafter, the pupils of this school were publicly examined previous to the Christmas vacation of 1858, by Lieutenant Sadleir, R.N., and W. Keene, Esq.; 10 children were, on this occasion, each presented with a handsome book of an useful and instructive character, in consideration of the progress they had made in their studies; a workbox was awarded to the girl who excelled in needlework; and a complete set of cricketing apparatus was given to the children generally, (who were also feasted and entertained) as a reward for past exertions and an incentive to future efforts.

25.—Wm. McIntyre Esq., the Organizing Master of the National Schools in this district, is the only official visitor who has inspected the school. This gentleman has examined the children on two different occasions, and has passed from 4 to 5 hours each time in his inspection. The following is a copy of the report which he left on his first visit to the school:—

“ 17th March, 1858.

“ Visited this school to-day, and found 35 pupils present, neat and orderly.

“ WM. MCINTYRE,

“ Organizing Master.”

At the last visit of the Organizing Master, he thus reported upon the state of the school:—

“ 11th June, 1858.

“ Visited this school to-day, and examined the pupils on their prescribed course of study; I am gratified to state the children were very clean and orderly, and making satisfactory progress, the first class is very intelligent.

“ WM. MCINTYRE,

“ Organizing Master.”

With reference to the present condition of the R. T. N. School, the teacher has much gratification in being able to testify to its progress and present satisfactory state; in the face of determined and continued opposition from parties hostile to its establishment it has steadily increased, and though in existence but 12 months, upwards of 100 children have been admitted as pupils, of whom 76 are now on the rolls; the average attendance has lately greatly increased, that of the week ending March 4th, 1859, amounted to 57.8 and 60.2 March 11th; a large accession to the number of pupils is anticipated, and in that case, the present school premises, though the largest and most commodious that could be obtained in the township, would be altogether insufficient to the necessities of the school.

26.—Charles Mountain.

27.—Angela Mountain.

28.—Birthplace of C. Mountain, London; birthplace of A. Mountain, Paris.

29.—Age of C. Mountain, 32 years; age of A. Mountain, 35 years.

30.—Appointed teacher to the Raymond Terrace National School, 21st January, 1858.

31.—Not trained as teacher.

32.—

33.—The writer entered the service of the Board of National Education in December, 1855, after a probation of two months at Fort-street Model School; taught at the Lochinvar National School, 10 months; at William-street Model School, 4 months; and at Parading Ground National School, 11 months. Profession previous to teaching; engraving upon wood.

34.—Joint annual salary of teacher and wife, £108.

35.—Amount of fees received during the year, £60 10s.

36.—Total annual income derived from all sources, £168 10s. (less £40 to be deducted for rent of school premises.)

37.—Religious and moral instruction is imparted to the children daily by the teacher, through the medium of the Scripture lessons, which render valuable aid to the teacher in this portion of his duties; one hour each day is devoted to the reading and exposition of these lessons. No Clergyman or Minister of Religion has visited the school since its establishment, though solicited to do so; the refusal or non-compliance with this request has been grounded upon conscientious scruples to the National system.

REDBANK.

1.—Redbank.

2.—The material of which it is constructed, wood; the present condition is good; it needs no repairs nor enlargement.

3.—The number of square feet in the area of the school, 525 feet.

4.—The square yards of the ground for the use of the pupils, 2,450 yards.

5.—The condition of water-closets, none.

6.—One room for teaching—square feet, 375; the cubic feet, 3,000.

- 7.—The average number of pupils usually assembled in each room,—1 room, 34 pupils.
- 8.—The provision made for ventilation,—well ventilated, door and windows being left open.
- 9.—The annual average number on the books, 58 pupils (for 1858); and average number attending the school,—males, 19; females, 15; total, 34 (for 1858).
- 10.—The maximum age of the pupils,—males, 15; females, 15; the minimum age,—males, 3; females, 3.
- 11.—The number of classes into which the school is divided,—3 classes; 1st class, average number, 20 pupils (for 1858); maximum age, 7; minimum, 3; 2nd class,—average number, 17 (for 1858); maximum age, 9; minimum, 5; 3rd class,—average number, 21 pupils; maximum age, 15; minimum, 9 (for 1858).
- 12.—The school-hours,—6 hours, commencing at 9, terminating at 3 o'clock; recess at 10½, for five minutes; recreation from 12 to 1 o'clock.
- 13.—The number of holidays in each week, one (Saturday); one vacation, from 25th December to 2nd January (Christmas).
- 14.—The total number of school-days during the year, 255.
- 15.—The average length of period during which pupils, from their first entrance to their finally leaving school remain there, five years.
- 16.—The number of children between the ages of 5 and 15 years in the locality where school is situate, who do not usually attend, 10.
- 17.—The weekly sum charged to each pupil for instruction, 2d; for books, ½d. per week; the total annual charge to each pupil, 10s. 7½d.
- 18.—The amount of school fees for the year ending the 30th September, 1858, £14 0s. 3½d, given to the teacher, £96 from the Board; total, £110 0s. 3½d.
- 19.—The annual average total cost of the education of each pupil, £3 10s. 11½d.; average number attending, 31 pupils, for the year ending 30 September, 1858.
- 20.—The several subjects of instruction given to each class, and the time allotted to each subject in each day throughout the week:—

TIME TABLE.

Monday, Wednesday, and Friday.

Time.	1st class.	2nd class.	3rd class.
9 to 9¾	Writing	Reading	Arithmetic.
9¾ to 10½	Reading	Writing	Geography.
Recess, 5 minutes.			
10½ to 11¼	Arithmetic ...	Arithmetic	Reading.
11¼ to 12	Geography	Tables	Grammar.
12 to 1 Recreation.			
1 to 2	Writing	Reading	Scripture lessons.
2 to 2¾	Reading	Writing	Writing.
2¾ to 3	General lesson	General lesson	General lesson.

Tuesday and Thursday.

9 to 9¾	Reading	Writing	Reading.
9¾ to 10½	Writing	Reading	Grammar.
Recess, 5 minutes.			
10½ to 11¼	Grammar	Dictation	Tables and arithmetic.
11¼ to 12	Arithmetic	Grammar	Dictation.
12 to 1 Recreation.			
1 to 2	Reading	Reading	Scripture lessons.
2 to 3	Writing	Geography	Writing and mental arithmetic.

21.—A list of the titles of all books in each class in the school:—1st class, first class books and tablets; 2nd class, second class books and sequel; 3rd class, third class books; Scripture lessons, and arithmetic book; the books are good; no books are needed; the number of books are quite adequate to the wants of the school, and many more.

22.—A descriptive list of all maps, &c:—One map of the World, one map of Europe, one map of Canaan, one map of England, one map of Australia, two black-boards, tablets; they are all good; no others are needed.

23.—An account of the system of correction employed in the school:—Gentleness combined with firmness; the cane only resorted to in extreme cases; the teacher shewing the example of punctuality, regularity, and order.

24.—How often during the year examined,—once; no prizes or rewards are given.

25.—By whom is the school officially inspected? By W. Wilkins and W. McIntyre, Esquires; once a year, and two days occupied in his duty; no report of the school exists in it; the present condition I (teacher) think is very favorable and cheering.

26.—Name of teachers,—William Small,—M. Small (his-wife).

27.—Assistant teacher,—None.

28.—Birthplace of teacher,—County Longford, Ireland.

29.—Age, 45.

30.—Date of appointment to present office,—1852.

31.—A trained teacher.

32.—Trained at Dr. Carlile's Institution, No. 9, Lower Ormond Quay, Dublin, for one year; also at Fort-street, Sydney, for two months; certificate of competency,—3, Class B.

33.—

34.—Annual amount of salary, £96.

35.—Fees, about £14.

36.—Total annual income of teacher, £110.

37.—What religious or moral instruction given? Scripture lessons and general lesson; the former one hour each day, the latter three times each week for 15 minutes, and many lessons in the third class book, by the teacher; visited by Rev. J. T. Carter, Minister of the Established Church of Scotland; books used for that purpose,—Bible and Presbyterian Catechism.

I certify that this Return is correct.

GEORGE M'CARTNEY.

SEAHAM.

1.—The school is situated in the Township of Seaham, Police District of Raymond Terrace.

2.—The building is constructed of corrugated iron; it is very much in want of repairs, principally from the ravages of the white ant in the wood-work, and the rusting of the iron for want of painting.

3.—The building is 36 feet long by 36 feet wide, equal to 1,296 superficial square feet.

4.—There are two acres of unenclosed land adjoining the school premises set apart for the use of the pupils.

5.—The water-closets are built of weatherboards, with iron roof; they are in good repair.

6.—There is only one room appropriated to teaching, which is 36 feet long, 18 feet wide, and 9 feet high, equal to 648 superficial square feet, or 5,832 cubic feet.

7.—The average number usually assembled in this room is 31.

8.—The schoolroom is ventilated by four glass doors; two on each side, which are kept open during school-time; there are also two ventilating holes in the ceiling.

9.—The annual average number on the books is 62, and the average attendance of boys 13.5, and girls 17.6; total, 31.1.

10.—The maximum and minimum ages of the pupils of both sexes are 15 and 4 years.

11.—The school is divided into 3 classes, the 1st being the lowest and the 3rd the highest; the average number in the 1st class is 14; 2nd class, 10; and the 3rd class, 7;—making a total of 31. The maximum age in the 1st class is 9 years; in the 2nd class, 12 years; and the 3rd class, 15 years. The minimum age in the 1st class is 4; in the 2nd class, 7 years; and in the 3rd class, 11 years.

12.—The school business commences at 9 o'clock in the morning and terminates at 3 o'clock in the afternoon; there is a cessation, for a few minutes, at half-past 10 o'clock, and another from 12 to 1 o'clock; during these intervals the children are in the playground, overlooked by the teacher.

13.—There is no school on Saturdays; the only vacations given, previously to this year, were one week at Christmas and one week at Easter.

14.—The total number of days appropriated to school studies during the year is 247.

15.—The children remain at school about 1 year and 3 months on the average.

16.—Within a radius of 3 miles from the schoolhouse there are about 40 who do not usually attend school.

17.—The fees paid by the pupils are as follows:—For 3 children of one family, 1s. per week; for 2 ditto ditto, 9d. per week; for 1 child, 6d. per week; since the commencement of this year a charge of $\frac{1}{2}$ d. per week, for each pupil, has been made, but previous to that time no specific charge was made for the purchase of books.

18.—The amount of school fees received for the year ended 30th September, 1858, was £20 12s. 1d.; this amount was applied towards the augmentation of the teacher's salary; the only other emolument received by the teacher was the Government salary, which amounted to £113, making a total of £133 12s. 1d.

19.—The average attendance for that period was 27, which will give the average annual cost of each pupil £4 19s.

20.—The children are instructed in reading, writing, arithmetic, grammar, geography, and music; the precise time allotted to each is as under:—

	MONDAY.		WEDNESDAY.		FRIDAY.		TUESDAY AND THURSDAY.		
	1st Class.	2nd Class.	1st Class.	2nd Class.	1st Class.	2nd Class.	1st Class.	2nd Class.	3rd Class.
	h. m.		h. m.		h. m.		h. m.		h. m.
Reading	1.45	1.45	1.45	1.45	0.45	0.45	1.45	1.45	0.45
Writing	1.15	1.15	1.15	1.15	0.45	0.45	1.15	1.15	0.45
Arithmetic	0.45	0.45	0.45	0.45	0.45	0.45	0.45	0.45	0.45
Grammar	0.45	0.45	0.45	0.45
Geography	0.45	0.45	0.45	0.45	0.30	0.30	0.45
Object lesson, music, &c.	0.30	0.30	0.30	0.30	0.30	0.30	0.30	0.30	0.30
Scripture	1.00	1.00	1.00

21.—The titles of the books in use are 1st, 2nd, and 3rd book, 1st arithmetic, Scripture lessons, Old and New Testament, Nos. 1 and 2; some of the Scripture lesson books are in bad condition; a supply of these is needed; there is a sufficient supply of the others.

22.—The maps in use are—World, Europe, Australia, and Australasia; the apparatus—black-board, map-stand, 10 desks, 12 forms, and book press; the desks, black-board, and map-stand are very rickety.

23.—The aggressors are generally punished by being kept in the schoolroom during play-time; corporal punishment is rarely resorted to; there are no instructions from any source on this head.

24.

- 24.—There is a monthly examination of the children, conducted by the teacher in the presence of the Local Patrons and any other persons who attend; no prizes or rewards are given.
- 25.—The school is officially visited twice a-year by the Inspector or the Organizing Master; the irregular attendance is a great drawback to the progress of the children.
- 26.—Richard Barton.
- 27.—There are no assistant teachers, pupil teachers, or monitors.
- 28.—The teacher was born in Preston, Lancashire, England.
- 29.—The age of the teacher is 28 years.
- 30.—The teacher was appointed in June, 1855.
- 31.—Trained as a teacher.
- 32.—Trained at the Fort-street Model National School for 6 months; holds Certificate A, Class II.
- 33.—No occupation before appointment.
- 34.—The teacher's present salary is £108 per annum.
- 35.—The average annual amount of fees is £21 19s.
- 36.—The total income is about £140 per year.
- 37.—One hour in each day is set apart for religious instruction, to be given by the teacher; no Clergyman or Minister of Religion attends at the present time.

SINGLETON.

- 1.—Singleton.
- 2.—The school is new, constructed of brick with a substantial stone foundation, and well adapted, as to extent, to present wants.
- 3.—972 square feet in school, and 400 square feet in residence.
- 4.—The school-ground, including that on which the school, schoolmaster's house, and houses for the convenience of the pupils are built, is $\frac{1}{2}$ acre.
- 5.—They are new, substantially built of brick, with a stone foundation of six feet underground enclosing the soil pits.
- 6.—720 and 252 square feet in the schoolroom and classroom respectively; 10,080 and 3,528 cubic feet.
- 7.—55 and 25 more or fewer.
- 8.—Doors, a fireplace, and windows to draw from below, in other words the lower sash of the window is moveable; there is no provision for the escape of the heated air.
- 9.—The average number on the books for the past year was,—boys, 64.75; girls, 41; average attendance,—boys, 49.9; girls, 30.9.
- 10.—Maximum age, 13; minimum, 3.
- 11.—There have been but three classes hitherto in this school, although that class which is reckoned the first is sub-divided and treated according to the ages and attainments of the pupils, and may therefore be regarded as sub-divided into three sections; according to this division the answer is given:—

	Number.	Maximum Age.	Minimum Age.
3rd class	20	13	10
2nd class	28	13	7
1st class, 1st section	19	9	6
" 2nd section	10	7	4
" 3rd section	15	5	3

- 12.—Five hours; from 9 to 12 A.M., and from 2 to 4 P.M.; at half-past 10 o'clock there is an interval of about ten minutes for recreation; from 12 to 2 the pupils are either at their homes or amusing themselves in the school-yard.
- 13.—A fortnight at Christmas, three days at Easter, and the half of Saturday (sometimes the whole of it), are the year's vacations and holidays.
- 14.—All lawful days, with the exception in answer 13.
- 15.—About one year.
- 16.—I cannot answer this question with any degree of accuracy; but taking into account the fact, that on my class roll the numbers for a considerable time past have exceeded 100, I think upwards of 200 do not attend this school, and many of these attend no school.

17.—The fees are according to the number of children attending from a family,—1s. for one, 1s. 6d for two, 2s. for three, and so on, per week; for books, 2s. per year. If only one from a family attend, the whole expense for one at present rate is about £2 10s.; but taking the average $\frac{1}{4}$ must be deducted, thus reducing the cost to £1 17s. 6d.

18.—About £178, appropriated by the teacher; as questions appear to be mixed up so as to make the same answer be repeated, I am at loss for a full answer. The only other source from which I am aware that any other amount has been derived for the support of the school is the National Board's fund, out of which I received as salary £132, and out of which £20 were paid as rent for the premises then occupied for school purposes. This draft of £20 is now at an end since the new buildings are occupied. These three sums would make £330. To this has to be added the share of the rent paid by the Local Patrons (£20), making in all £350; but in estimating the real cost of the school the item, £40, for rent need not be included, as it was temporary, and has now ceased. Further, the school fees amount to more than they would, according to the scale fixed by the Local Patrons, because several parents, of their own accord, paid more than the rate. Hence the actual expense

expense of the school, in so far as either the Government or the public is concerned, would be considerably reduced.

19.—£350 ÷ 81 = £4 6s. 5³/₄d.; deducting rent and higher optional fees, the cost of educating each pupil would be about £3 12s.

20.—Reading and spelling, the derivation and meaning of words, the meaning of the lessons read; English grammar in all its parts; geography in all its branches; arithmetic, written and mental; writing, &c. To each of the lessons on the subjects above stated there are devoted about three-quarters of an hour five days in the week; one hour is devoted every one of these days to Scripture lessons. The youngest of the pupils who cannot be employed as above are occupied with object lessons, or writing on their slates when not reading.

21.—In the two higher classes the books used for reading, &c., are the fifth, fourth, and third class books; grammar, geography, and arithmetic, are taught chiefly without text books; but when used, these are those sanctioned by the Board—the Irish National School books. In the lower classes are used the sequel to the second book, the second book, the first book, card lessons, and sacred poetry books. The books are in very good condition; no other kinds of books are needed, the number is adequate, a stock being kept on hand to meet emergencies.

22.—The mechanical powers; twelve prints, with lessons on natural history; eleven maps, viz., those of The World, Europe, Asia, Africa, America, Australia, Pacific Ocean, Palestine, Scotland, England, and the Ancient World. In addition to a good supply of desks and forms, there is a black-board, a stand for hanging maps, diagrams on cards, ink wells, teacher's desk, table for girls' work, pointer, &c., &c. There is plenty of furniture in the meantime, and in very fair condition; but as the school is new, it is intended to have it supplied with new furniture, differently constructed and arranged.

23.—The system of correction employed in the school is that practised in the best regulated educational establishments; no instructions on this subject have been received from any quarter. The discipline in the school has been commended by the parties referred to.

24.—There is an annual examination of the pupils before the Christmas holidays; there are prizes awarded to the most deserving in the shape of useful books, and there are books also bestowed as gifts upon all the others. For the past two years the Organizing Master conducted the examination; previously, the teacher conducted it under the inspection of the Local Patrons and visitors.

25.—By the Inspector and Organizing Master. About once in the quarter for the past year, when about one day was devoted to the duty. Organizing Master's written statements.

"30th April, 1858.

"Visited this school to-day, and found 89 pupils present, neat, clean, and orderly.

"WM. M'INTYRE."

"26th August, 1858.

"Visited this school to-day, and found 83 pupils present, neat, clean, and orderly, and making satisfactory progress.

"WM. M'INTYRE."

"21st December, 1858.

"Visited this school to-day, and found 72 pupils present, neat, clean, and orderly, and making satisfactory progress. N.B.—53 boys, 32 girls present at the examination.

"WM. M'INTYRE."

The examination took place upon the 22nd December, the day after the Organizing Master's official visitation of it, and was conducted by him as referred to in his N.B.

26.—Alexander Leith Forbes.

27.—Mrs. Forbes; and Charles Flashman, pupil teacher; no monitors are employed.

28.—The teacher and his wife were born in Aberdeenshire, Scotland; the pupil teacher was born in Devonshire, England.

29.—The age of the teacher is 36 years, that of his wife 36 years, and that of the pupil teacher is 14 years.

30.—October, 1853.

31.—Trained in Scotland and England.

32.—At no particular institution, but in the actual practice of teaching, with the exception of the month's attendance required at the Model School, Sydney, in 1853; the teacher is classed—Class 1st., 2nd Division.

33.—This question has been answered in the two preceding answers.

34.—Annual salary of head teacher, £132, paid monthly; of pupil teacher, £20.

35.—£178 fees, as stated in answer No. 18.

36.—The total annual income of the teacher, as stated in answer No. 18, is £310; and of the pupil teacher for the past year, it was £20.

37.—Instruction, religious and moral, is given from the Scripture lessons extracted from the Old and New Testaments, the books of sacred poetry, the general lesson, &c.; an hour is devoted five days in the week to Scripture lessons. By the teacher and his assistants. The Rev. James M'Culloch, a Presbyterian Clergyman, attends about once a fortnight, sometimes oftener, for an hour, to instruct the Presbyterian children; the books used by him, I believe, are the Bible and Shorter Catechism.

ALEXR. L. FORBES.

SMITHFIELD.

SMITHFIELD.

- 1.—Smithfield, Parish of Cabramatta, in the Police District of Liverpool.
- 2.—School building is built of brick, is in thorough repair, and contains ample space for the present attendance.
- 3.—There are six hundred and forty-five superficial square feet in the whole building.
- 4.—One acre of land, 4,840 square yards.
- 5.—Two substantially built brick closets in thorough repair.
- 6.—The principal room contains four hundred and twenty superficial square feet, and four thousand two hundred cubic feet; small room contains two hundred and twenty-five superficial square feet, and two thousand two hundred and fifty cubic feet.
- 7.—Twenty-nine in the small room, and thirty-one in the principal room.
- 8.—For ventilation—four doors, six windows, and two fireplaces.
- 9.—Annual average on the books—boys, 39·0; girls, 28·5. Total, 67·5. Average number in attendance, boys, 25·5; girls, 16. Total, 41·5.
- 10.—Boys, minimum age, 3; maximum, 18. Girls, minimum age, 3; maximum, 11.
- 11.—School divided into three classes; first class into two divisions. First division—Boys, 16—minimum age, 3; maximum, 8. Girls, 13—minimum age, 3; maximum, 10. Second division—Boys, 9—minimum age, 5; maximum, 10. Girls, 2—ages 8 and 9 years. Second class.—Boys, 3—minimum age, 9; maximum, 15. Girls, 9—minimum age, 6; maximum, 11. Third class—Boys, 6—minimum age, 10; maximum, 18. Girls, 2—age 7 and 9 years.
- 12.—School business commences at 9 A.M.—from 9 till 12, and from 1·30 till 3·30. At 10·30 recess for 10 minutes, and from 12 till 1·30, for refreshment and recreation.
- 13.—No school on Saturdays; vacations, Queen's Birthday, Good Friday, Easter Monday, and 10 days, or a fortnight, at Christmas.
- 14.—In 1858 school was open 246 days.
- 15.—From one to four years.
- 16.—Not more than 12 in the village.
- 17.—For one child from a family, 6d. a week; for two children from the same family, 4d. each; for three, or more, from the same family, 3d. each. Each child pays 6d. per quarter towards a book fund.
Per annum, one child, £1 7s.; for two children, £1 17s. 4d.; for three children £1 19s. 4d.
- 18.—The total amount of school fees for the year ending 30th September, 1858, £21 14s. 5d. Book Fund, in operation from 1st of April, 1858, amounted to £3 6s. 6d. School fees appropriated as part salary for teachers; book fees, for supplies of books and necessary apparatus. By local subscription, £14 10s., and a grant by the Commissioners of £32; disbursed in repairing the schoolhouse, partition fence, slab kitchen, and hall. Teacher's salary for the year, £96.
- 19.—Average total cost for the education of each pupil, attending during the year ending 30th September, 1858, £4 1s 9½d.
- 20.—First Class.—From 9 to 9·45, writing; 9·45 to 10·30, reading; 10·30 to 10·40, recess; 10·40 to 11·15, spelling; 11·15 to 12, arithmetic; 12 to 1·30, recreation; 1·30 to 2·15, grammar or geography, alternately; 2·15 to 3, writing from dictation, or arithmetic; 3 to 3·15, reading, or lessons on familiar objects; 3·15 to 3·30 singing.
Second Class.—From 9 to 9·45, reading; 9·45 till 10·30, writing; 10·30 to 10·40, recess; 10·40 to 11·15, Scripture lessons; 11·15 to 12, arithmetic; 12 to 1·30, recreation; 1·30 to 2·15, grammar or geography, alternately; 2·15 to 3, lessons from memory reduced to writing, dictation, or mental arithmetic; 3 to 3·15, spelling; 3·15 to 3·30, singing.
Third Class.—From 9 to 9·45, writing; 9·45 to 10·30, reading; 10·30 to 10·40, recess; 10·40 to 11·15, Scripture lessons; 11·15 to 12, arithmetic; 12 to 1·30, recreation; 1·30 to 2·15, grammar or geography, alternately; 2·15 to 3, parsing, or history; 3 to 3·15, mental arithmetic, or dictation; 3·15 to 3·30, singing.
All girls from 2·15 to 3·15, needlework.
- 21.—First Class.—Tables, first class books, introduction to geography, rudiments of English grammar.
Second Class.—Second class books, Scripture lessons, Old and New Testaments, No. 1; first book of arithmetic, compendium of geography, English grammar, spelling-book superseded, and Sullivan's dictionary.
Third Class.—Third and fourth books, Scripture lessons, Old Testament, Nos. 1 and 2, New Testament, No. 1, first book of arithmetic, ditto theory and practice, compendium of geography, geography generalised, epitome of geographical knowledge, grammar, bookkeeping, geometry, spelling-book superseded, and Sullivan's dictionary; the books are all in good condition and sufficient in number, the book fund being enough for the demand.
- 22.—Tablets, ship, black-board, maps of the World, England, Ireland, America, Australia, Australasia; in good condition and sufficient.
- 23.—Punishment, by standing in front of the class or upon the form; by keeping them in after school-hours; by extra lessons and sometimes by corporal punishment. Have received no instructions respecting it.
- 24.—The school was inspected by Mr. J. Byrnes on the 22nd May, 1856, and by the Government Inspector three times since; no prizes or rewards have been given but once by the teacher on his birthday, when the children had tea and a few books and work-bags given to the most industrious; two of the Patrons were present.
- 25.—The Inspector, Mr. Wilkins, comes about once a-year, and is occupied nearly the whole of the day; Mr. McCann, Organizing Master, visited the school for one day in March last;

last; no report on the state of the school exists more than the duplicate quarterly returns forwarded to the Central Board.

- 26.—Samuel Sydney Smith.
 27.—Eliza Augusta Smith.
 28.—Master born at Alfriston, Sussex; mistress born at North Newton, Wilts.
 29.—Master's age, 32; mistress' age, 29 years.
 30.—Appointed to Smithfield, June 11th, 1855.
 31.—Not a trained teacher.
 32.—
 33.—Taught a blind class by their fingers, in Brighton, Sussex, and kept a night-school in Wollongong; was formerly a salesman in a Manchester warehouse; mistress formerly a dressmaker.
 34.—Government salary for joint services of master and mistress, £96 per annum.
 35.—School fees only.
 36.—For the year ending 30th September, 1858, total amount of teachers' remuneration, £117 14s. 5d.
 37.—Scripture lessons read and classes questioned every morning by the teachers; no Clergyman has ever attended for imparting religious instruction; the books are those authorised by the Board of National Education.

I certify that this return is correct.

SAMUEL SYDNEY SMITH,
 Teacher.

STANHOPE.

- 1.—Stanhope.
 2.—The schoolroom and teacher's residence is constructed of ironbark slabs; a double chimney of brick is erected between the sittingroom and schoolroom, forming a fireplace to each apartment; roof shingled, ceiling of calico; eleven glazed windows in the entire building, viz., six in the schoolroom, two in the sittingroom, and three in the bedrooms; schoolroom floored with Colonial sawn timber; teacher's residence floored with ironbark slabs; entire building divided into four apartments, viz., schoolroom, sittingroom and two bedrooms; an additional bedroom connected with the main building has recently been built at the expense of the teacher; a detached kitchen is required—the present sittingroom being used for all domestic purposes.
 3.—The building is 55 feet by 16, containing 880 superficial square feet.
 4.—One imperial acre, a small portion of which is enclosed as a flower-garden; the whole enclosed by a substantial four-railed fence.
 5.—The water-closet is a small building six feet square, constructed of ironbark slabs; roof shingled, divided by a slab partition in the centre, forming one closet for each sex; in bad repair; cesspool requires deepening; it is placed in a very conspicuous position; if retained in the same spot a slab wall would render it more private; it would be a great improvement could it be removed, and two others built at opposite corners of the schoolground.
 6.—Schoolroom 25 feet in length, 16 in breadth, 8 feet in height; containing 400 superficial square feet, and 3,200 cubic feet.
 7.—Nineteen.
 8.—The schoolroom is well-ventilated, being provided with six windows (three on each side), which turn on a pivot, so that they can be opened or closed at pleasure; the slabs of the building are very open.
 9.—Average annual number on the books, 38.75; average annual number attending, 19; males, 10.025; females, 8.975; total, 19.
 10.—Maximum age:—males, 14; females, 14. Minimum age:—males, 3; females, 3.
 11.—Five classes:—

Classes.	Numbers.	Maximum Age.	Minimum Age.
1st	14	11	5
2nd	8	14	8
Sequel	2	14	11
1st infants	9	4	3
2nd infants	5	7	4

Total 38

12.—Five hours, commencing 9 A. M., terminating 4 P. M.; intervening cessation from 10.30 A. M. to 10.45 A. M., and from 12 A. M. to 2 P. M.; first interval, drill and play; second interval, drill, play, and dinner.

13.—Weekly (Saturday); also Her Majesty's Birthday, and Anniversary of the Colony; one vacation at Christmas, from December 24th to January 1st, inclusive.

14.—251.

15.—In consequence of this school being closed from 1855 to 1856, and the register being kept in an irregular manner up to that time, it is impossible to give an accurate average of the time pupils remain; most of the children now at school have been on the books from the time the present teacher took charge, and some of their names are inserted in the old register; from information received from the children themselves, the period appears to be about four years.

16.—Twenty-six in the immediate neighbourhood who do not attend any school; embracing a wider district (say a radius of three miles), the number would be greatly increased; in the absence of a ferry or any safe means of crossing the river, many are prevented

prevented from attending who otherwise would; others are kept at home by their parents, for the sake of their labor.

17.—Fees, 3d. per week or 12s. 6d. per year; books, ½d. per week, or 2s. per year; total, 14s. 6d. per year. The above is the scale of fees chargeable at the school; from one-third of the pupils nothing is obtained—their parents pleading poverty as an excuse for non-payment.

18.—Amount of school fees received from the pupils, for the year ending 30th September, 1858	13 15 0
Appropriation:—	
Weekly fees for instruction by the teacher amounting to	12 13 6
Weekly fees for books—by slates, pencils, pens, ink, boards for tablets, &c., for the use of the school...	1 1 6
Total amount	<u>£13 15 0</u>

Salary received from the Board of National Education, from October 1st, 1857, to November 30th, 1857, at £84 per annum	14 0 0
From December 1st, 1857, to September 30th, 1858, at £96 per annum	80 0 0
Total amount	<u>£94 0 0</u>

Total amount received from all sources, from the 1st October, 1857, to the 30th of September, 1858 £107 15 0

19.—Dividing the sum of £107 15s. by 19 (the average number attending the school), gives the sum of £5 13s. 5d. as the average annual cost of education for each pupil.

			Needlework	...	3.0
Total	...	<u>25.0</u>	Total	...	<u>25.0</u>

21.—1st Class—First reading book, second reading book, arithmetical tablets, English grammar, Sullivan's geography; 2nd Class—second reading book, sequel to second reading book, English grammar, Sullivan's geography, arithmetical tablets; Sequel—sequel to second reading book, third reading book, English grammar, Sullivan's geography, first book arithmetic; 1st infants—reading tablets section 1; 2nd infants—reading tablets sections 2 and 3, arithmetical tablets. Scripture and general lesson used collectively; all in good condition, none required—those in use quite adequate.

22.—The apparatus consists of 3 maps, one each, of the World, Europe, and Australia; 2 sets of tablets, one set each; reading and arithmetic, 1 general lesson, 1 table of minimum attainments, all in good condition; 2 dozen slates; a good supply of pencils, pens, ink, and copy-books; 2 double desks, 6 feet in length 2 in breadth; 4 forms, 6 feet in length; 6 forms, 5 feet in length. The desks are old and out of repair; a great improvement would be effected by substituting 6 single desks, 6 feet in length, to be placed across the school-room; a black-board is much needed. The records of the school consist of 11 quarterly returns, dated from the 21st April, 1856, up to the 24th December, 1858; 3 yearly returns, 1856, 1857, 1858; 1 register, incomplete, 1 daily report, used by the former teachers; 1 new register, 1 daily report, 1 class roll, these were supplied by the Board on the re-opening of the school, 1856; 1 visitors' book.

23.—The discipline of the school is preserved by kind, yet firm treatment; corporal punishment is not resorted to, excepting in extreme cases; and for the repetition, after warning, of actual vice, it is then inflicted by strapping the hand. In cases of carelessness in reading or writing, or forgetfulness of any previous lesson, confinement during the hours of recreation, the time being occupied by writing on a slate the portion of the lesson forgotten; the child is made to understand why he is punished, and also for what reason; after the infliction of any kind of punishment, care is taken not to taunt or ridicule the child, any child found guilty of such a fault is corrected. No instructions on this subject have been received from any Board of Education, Official Visitors, or Managers of Schools.

24.—The pupils were examined by Mr. W. M'Intyre, Organizing Master of National Schools, twice during the last year. No prizes or rewards are given. A feast, at the teacher's expense, was provided for all the children on New Year's Day. No other examination has taken place.

25.—By Mr. W. M'Intyre, Organizing Master, National Schools; twice in the year, about 4 hours; copy from daily report:—

" 9th April, 1858

" Visited the school to-day, and found 21 pupils present.

" W. M'INTYRE,

" Organizing Master."

" 18th August, 1858.

" Visited this school to-day, and found 16 pupils present, making fair progress.

" W. M'INTYRE,

" Organizing Master."

The children at present attending are making fair progress, considering the irregularity of their attendance.

26.—William Monk.

27.—Fanny Maria Monk

28.—William Monk, born at the village of Stone, near Aylesbury, Buckinghamshire, England; Fanny Maria Monk, born at Dorchester, near Oxford, England.

29.—William Monk, 31; Fanny Maria Monk, 29.

30.—5th April, 1856.

31.—William Monk, not trained as teacher; Fanny Maria Monk, trained as teacher at a private seminary for young ladies.

32.—Fanny Maria Monk, trained at Mrs Beeby's private seminary, Leighton Buzzard, Bedfordshire, England; served seven years. Had a private school previous to her husband taking his present appointment.

33.—William Monk, profession, land surveyor and draughtsman, served 3 years as such on the East Indian Railway previous to arriving in New South Wales; certificate of this statement can be produced, if called for.

34.—Joint salary, £96 per annum.

35.—Fees, £12 13s. 6d.

36.—Total annual income, £106 13s. 6d.

37.—A lesson every afternoon from 2 to 2 45 P.M. is given to all the children by the teacher, from the general and Scripture lessons authorised by the Board of National Education. Not visited by any Clergyman or Minister of Religion. Scripture lessons Nos. 1 and 2, New Testament, Nos 1 and 2, Old Testament, published by direction of the Board of National Education.

WILLIAM MONK, Teacher.

SUGAR LOAF.

1.—Sugar Loaf, or Village of Mulbring, Parish of Stanford, County of Northumberland, Police District of East Maitland.

2.—Wood; tolerable condition; no repairs needed.

3.—406 square feet.

4.—About 2,420 square yards.

5.—There are two water-closets, built of slabs, each water-closet has a seat; the seat of one water-closet has one circular aperture, the seat of the other has two.

- 6.—Schoolroom, 273 square feet, 2002 cubic feet } The cubic feet are taken to the
 Classroom, 133 square feet, 975 cubic feet } lower surface of the tie-beams.
- 7.—Classroom used but a short time each day; about 10 use the classroom to 15.5 who do not.
- 8.—Being built of slabs, there is always a free current of air through the building.
- 9.—Average number on books for 1858—boys, 18.5; girls, 25.2; total, 43.7. Average attendance for 1858—boys, 11.2; girls, 14.3; total 25.5.
- 10.—During present quarter—Maximum age of males, 10; minimum, 3. Maximum age of females, 15; minimum 3.
11. As regards school business, three, viz.:—First, second, and sequel,—
- | | Average number on Class Roll, taken on four quarters in 1858. | Maximum age during 1858. | Minimum age during 1858. |
|--------------|---|--------------------------|--------------------------|
| First | 12.5 | 10 | 3. |
| Second | 18.0 | 14 | 5. |
| Sequel | 13.2 | 14 | 7. |
- 12.—Time Table:—

MONDAY, WEDNESDAY, AND FRIDAY.

TIME.	FIRST CLASS.	SECOND CLASS.	SEQUEL CLASS.
A.M.			
9 to 10.....	Writing.	Writing.	Scripture lesson.
10 to 10 $\frac{3}{4}$	Reading.	Reading.	Writing.
10.55 to 11.15 ..	*Writing.	Recreation—Ten minutes.	
11.15 to 11.35 ..	Reading	*Writing tables.	*Grammar.
11.35 to 12	Writing.	Reading.	Writing words at the head of lesson.
12 to 1	Dinner and recreation.	Writing.	Reading sequel book.
P.M.			
1 to 2	Arithmetic.	Arithmetic.	Aritmetic.
†2 to 2 $\frac{1}{2}$	Reading.	Writing from second book.	Parsing in writing, paraphrasing, &c.
2 $\frac{1}{2}$ to 3	Mental arithmetic.	Mental arithmetic.	Mental arithmetic.

* Geography on Tuesday and Thursday.

† Girls at Needlework from 2 to 3.

- 13.—One holiday, namely, Saturday; until lately, the only vacation a fortnight at Christmas; by present regulations—One week at Christmas, one week at Easter, and one week at Midwinter.
- 14.—250.
- 15.—Scarcely 1 $\frac{1}{2}$ years.
- 16.—About 12.
- 17.—On an average, about 4d. weekly for instruction; the charge for keeping up a supply of books is one half-penny weekly, in 50 weeks amounting to 2s. 1d. The yearly receipt deducting vacation, total annual charge, 18s. 9d.
- 18.—19s. 5s. 3 $\frac{1}{2}$ d. towards teacher's support; Board of National Education, £120 salary; the Board likewise allow £1 for postage, making a total amount of £140 5s. 3 $\frac{1}{2}$ d.
- 19.—£6 0s. 4 $\frac{3}{4}$ d.
- 20.—See 12.
- 21.—First class, tablet lessons; second class, second book of lessons; sequel class, sequel to second book of lessons, grammar, first book of arithmetic, dictionary occasionally; no other books needed at present, the number is adequate.
- 22.—2 sheets pictures of animals; 2 sheets astronomical plates. Their condition is tolerable, others may be needed, but I am not, without deliberate reflection, prepared to say what others; map of World and Australia must be added to this list.
- 23.—Keproof and detention.
- 24.—About three or four times each year by W. Wilkins, Esq., or by W. M'Intyre, Esq.; no prizes.
- 25.—W. Wilkins, Esq., and W. M'Intyre, Esq., about three or four times—about three or four hours, sometimes longer.

Copy of a Report by W. M'Intyre, Esq.

" 9th August, 1858.

" Visited this school to-day and found 33 pupils present, all pretty clean, and " making fair progress.

" W. M'INTYRE."

The reports are generally favorable than otherwise.

26.—Joseph Taylor.

27.—Emma Taylor.

28.—Joseph Taylor, Manchester, England; Emma Taylor, London, England.

29.—Joseph Taylor, 37; Emma Taylor, 33.

30.—Appointment to first school under the Board of National Education, 25 September, 1851; has been under the Board of National Education constantly since this date; appointment to school at Sugar Loaf bears date of 2nd June, 1855. The school to which the teacher was appointed on the 25th September, 1851, was that at Gosforth, near West Maitland.

31.—The teacher does not know whether it can be said of him that he was trained as a teacher. (See next.)

32 and 33.—See remarks under 31. The teacher, therefore, adds that he attended the Model School, Fort-street, Sydney, for about six weeks; some time previous had been engaged in giving private tuition, and was engaged under the Denominational Board for about one year and eight months. Appointment by Board may be considered a certificate of competency. Wine and vinegar maker.

34.—£120.

35.—Postage allowance, £1; annual average of school fees, about £17; total, £18.

36.—£138.

37.—The Scripture lessons published by the Commissioners of National Education are read every morning by the children. Not regularly visited by any Minister of Religion. The books used are the Scripture lessons just mentioned; some considerable time back Mr. Blain left some Testaments for the use of catechists.

SOUTH HEAD.

- 1.—South Head.
- 2.—The building is of stone, in good substantial repair, and amply sufficient in size.
- 3.—682 square feet.
- 4.—10,912 square yards.
- 5.—One water-closet, in good condition.
- 6.—The schoolroom only, 682 square feet, 2,192 cubic feet.
- 7.—16.
- 8.—One door at each end of the schoolroom, also 4 windows constructed to open at the top.
- 9.—Number on the rolls, boys, 11; girls, 12. Average attendance, boys, 8; girls, 8.
- 10.—Boys, maximum age, 14 years; minimum age, 3 years. Girls, maximum age, 10 years; minimum age, 4 years.
- 11.—Boys, 2 classes—Average number, 1st class, 5.5; maximum age, 7 years; minimum age, 3 years. 2nd class, average number, 5.5; maximum age, 14 years; minimum age, 9 years. Girls, 2 classes—Average number, 1st class, 6; maximum age, 8 years; minimum age, 4 years. 2nd class, average number, 6; maximum age, 10 years; minimum age, 8 years.
- 12.—5 hours daily, viz., from 9 A.M. to 12 noon; 2 P.M. to 4 P.M. The intervening hours, 12 noon to 2 P.M., are devoted to recreation and dinner.
- 13.—One day each week, viz., Saturday.
- 14.—Twenty-one days (for the month of January).
- 15.—No return can be made to this question.
- 16.—4.
- 17.—

18.—No return can be made under this head, the school having been only opened in December, 1858.

19.—No return can be made under this head. See No. 18.

20.—Boys, 2nd class, each morning in the week:—9 o'clock, Scripture lesson; 9.30, arithmetic; 10.30, writing in copy-books; 11.30, collective instruction in tables of arithmetic, weights, measures and capacity, and object lessons. Monday afternoon:—2 o'clock, reading lesson; 2.30, grammar; 3, geography; 3.30, writing on slates from dictation. Tuesday afternoon:—2 o'clock, reading lesson; 2.30 spelling-book superseded; 3, history; 3.45, general lesson. Wednesday afternoon:—2 o'clock, reading lesson; 2.30, geography; 3, grammar; 3.30, writing on slates from dictation. Thursday afternoon:—2 o'clock, reading lesson; 2.30, grammar; 3, history; 3.30, writing on slates from dictation. Friday afternoon:—2 o'clock, reading lesson; 2.30, spelling-book superseded; 3, history; 3.45, general lesson. Girls, 2nd class, each morning in the week:—9 o'clock, scripture lesson; 9.0, arithmetic; 10.30, writing in copy-books; 11.30, collective instruction in tables of arithmetic, weights, measures and capacity, and object lessons. Monday afternoon:—2 o'clock, reading lesson; 2.30, grammar; 3, needlework accompanied with oral instruction. Tuesday afternoon:—2 o'clock, reading lesson; 2.30, spelling-book superseded; 3, needlework, &c.; 3.45,

3.45, general lesson. Wednesday afternoon :—2 o'clock, reading lesson; 2.30, geography; 3, needlework, &c. Thursday afternoon, 2 o'clock, reading lesson; 2.30, grammar; 3, needlework, &c. Friday afternoon, 2 o'clock, reading lesson; 2.30, spelling-book superseded; 3, needlework, &c.; 3.45, general lesson. Boys, 1st class, each morning :—9 o'clock, reading and spelling lessons; 10.30, writing on slates; 11.30, collective instruction in tables of arithmetic, weights, measures and capacity, and object lessons. Each afternoon :—2 o'clock, reading and spelling lesson; 3, arithmetic. Tuesday and Friday, 3.45 o'clock, general lesson. Girls, 1st class, each morning :—9 o'clock, reading and spelling lessons; 10.30, writing on slates; 11.30, collective instruction in tables of weights, measures and capacity, and object lessons. Each afternoon :—2 o'clock, reading and spelling lessons; 3, arithmetic. Tuesday and Friday :—3.45 o'clock, general lesson.

21.—First book of lessons, second ditto, sequel to second book, sequel No. 2, theory and practice of arithmetic, Sullivan's geography and history, spelling-book superseded, grammar. These are in good condition, and sufficient of their kind, but books of a more advanced nature are much needed for some of the elder pupils.

22.—We have no maps, prints, instruments, or apparatus of any sort. Something of the kind, particularly maps, prints, and a black-board, are much needed.

23.—The only correction used is to confine refractory and ill-behaved children during the mid-day recess.

24.—No examination has yet taken place.

25.—The school has not yet been officially visited.

26.—Edwin Lee.

27.—None.

28.—London.

29.—39 years.

30.—December, 1858.

31.—Not trained.

32.—See 31.

33.—Many years experience in Sunday schools, and week evening schools for secular instruction to the poor. By trade, confectioner.

34.—£60.

35.—School fees, £5 1s. 6d., for month of January.

36.—For one month (January) £10 1s. 6d.

37.—The Revd. G. W. Richardson, Clergyman of St. Mark's, Church of England, visits the school fortnightly to give religious instruction to the children. The only book used is the Bible.

EDWIN LEE, Teacher.

South Head National School,
28 February, 1859.

Sir,

I have the honor to forward herewith, the Return (in duplicate) as required by the Board.

To questions 15, 18 and 19, no Return can be made, as the school was only opened in December, 1858.

To questions 35 and 36, I have given the Return for one month (January) as the nearest approximation I could make.

I have, &c.,

EDWIN LEE.

W. C. Wills, Esq.

TAMWORTH.

- 1.—Tamworth.
- 2.—Brick; needs a few repairs.
- 3.—630 square feet.
- 4.—One acre, unfenced.
- 5.—Built with slabs, and shingled. In good condition.
- 6.—Consists of one room, containing 630 superficial square feet, and 9,135 cubic feet.
- 7.—40 in the one room.
- 8.—None, except by the open door and windows.
- 9.—Boys, average number on the books, 34; average attendance, 21. Girls, average number on the books, 28; average attendance, 19.
- 10.—Boys, maximum age 14 years, minimum, 4; girls, maximum 15, minimum, 4.
- 11.—Three classes—1st class, average number, 19; maximum age, 8; minimum, 4. 2nd class, average number, 6; maximum age, 11; minimum, 7. 3rd class, average number, 15; maximum age, 15; minimum, 7.
- 12.—Five hours, commencing at 9, and terminating at 4, with two hours (12 till 2) for dinner and recreation, with 5 minutes recess at 10.30 A.M.
- 13.—One half-holiday, with a fortnight's vacation at Christmas.
- 14.—275 whole days.
- 15.—16 months.
- 16.—35.
- 17.—To some 6d. per week, to others 9d.; for books, 2s. per annum. Annual charge, to the former 27s., to the latter 39s. 6d.

18.—£63 3s. 3d. (2) Towards teacher's salary. (3) £3 8s. 6d. from children towards a book fund. (4) From all sources, £174 11s. 9d.

19.—£3 15s. 10 $\frac{1}{2}$ d.

20.—1st class, three-quarters of an hour devoted every morning to each of the following subjects, viz. :—Reading, writing, learning to count, making figures, or a simple object lesson; afternoon—reading one hour, writing three-quarters of an hour, singing one-quarter of an hour. 2nd and 3rd classes, the mornings of Monday, Wednesday, and Friday, three-quarters of an hour devoted to each of the following subjects, viz. :—(1) reading, (2) writing, (3) grammar, (4) arithmetic. Afternoon, 3rd class, Scripture lesson, one hour; 2nd class, second book of lessons; 3 o'clock to 3:45 both classes to geography; thence to 4 o'clock, singing. Tuesday and Thursday vary but little from the above, simply substituting parsing or dictation for half an hour.

21.—1st class, first book of lessons; 2nd class, second book of lessons, first book of arithmetic, grammar for use of schools, with introduction to geography; 3rd class, third book of lessons, English grammar for use of schools, introduction to geography, arithmetic for use of schools, and Scripture lessons from Old and New Testament. (2.) Rather worn. (3.) No other needed. (4.) Not adequate; but more ordered.

22.—A dozen reading sheets on boards, general lesson, map of the World, a map of Europe, a desk fixed to the wall; six forms, in pretty good condition. Needed, another desk, distinct maps of Asia, Africa, and Australia, a black-board, with engravings from natural history. Every school ought to possess a globe.

23.—By moral means, chiefly; I would rather shame a boy than cane him, but would do the latter soundly were he still refractory. No written instructions upon the matter.

24.—No examination. No prizes hitherto.

25.—By Mr. M'Intyre. (2.) Once a year—occupied several days in the performance. (3.) "14 July, 1857.—Visited this school to-day, and found present 20 children, pretty clean and tidy. I have much pleasure in stating that the children are making very favorable progress under the care of Mr. and Mrs. Crawford. The bridge being swept away is against the efficient working of the school. If the furniture suggested be provided the school will be much benefited.—W. M'INTYRE."

"6 November, 1858.—Visited this school to-day, and found 30 pupils present, pretty clean and tidy, and making fair progress.—W. M'INTYRE."

(4.) Have reason to think a different Report was forwarded to Sydney. Twelve months ago the school was weakened by the opening of a private school, but all who left are fast returning.

26.—John Crawford.

27.—Mrs. Crawford.

28.—Bromsgrove, Worcestershire.

29.—J. Crawford, 37 years; Mrs. Crawford, 35.

30.—March, 1855.

31.—Trained.

32.—Borough Road, London. (2.) Six months. (3.) At that period certificates were granted to only a very few, who attended twelve months. I was not one of those.

33.—

34.—£108 per annum for both.

35.—£64 10s. 3d. (last year.)

36.—£172 10s. 3d.

37.—Unsectarian. (2.) Daily. (3.) By the master. (4.) Never once visited by any Minister or Clergyman. (5.) Chiefly from the Scripture lessons of the Old and New Testament.

J. CRAWFORD, Teacher.

TARALGA.

1.—30 miles from Goulburn, in the County of Argyle, in the Police District of Goulburn.

2.—Stone; requires repairs and enlargement.

3.—179 square feet 134 inches

4.—86,940 square feet 10 inches.

5.—None

6.—Boys: One room for teaching, 1 square foot, and 9 cubic feet. Girls: One room for teaching, 1 square foot 12 inches, and 9 $\frac{3}{4}$ cubic feet.

7.—Males, 14; females, 11.

8.—One window in each room for ventilation.

9.—The average number on books from 3rd May to 30th September, 1858: Males, 14.8; females, 11.8. Average number attending the school: Males, 12.4; females, 9.5. The school was not in operation four weeks in July on account of Mrs Phillips' sickness.

10.—The maximum age of males, 14; minimum of males, 5. The maximum age of females, 14; minimum of females, 6.

11.—Three classes. First class, 6; maximum age, 10; minimum, 5. Second class, 6; maximum age, 14; minimum, 7. Third class, 9; maximum age, 14; minimum, 10.

12.—The number of hours each day the pupils attend school, 6; the hour of commencing, 9 A.M., and terminating 4 P.M.; one hour allowed for recreation.

13.—Half-day holiday on Saturday, one week at Christmas, one week at Easter.

14.

14.—Total number of days appropriated to school duties from the time of commencing, 3rd May, to the 30th September, 1858, allowing four weeks in July for Mrs. Phillips' sickness, 98 days.

15.—The school too recently established to form a just estimate.

16.—The number of children between the age of 5 and 15 years in the district who do not usually attend school, 80.

17.—Quarterly charge for each pupil for instructions, 3s. 3d.; annual charge for books, 1s. The total annual charge for each pupil, 14s.

18.—The amount of school fees received from 3rd May to the 30th September, 1858, £6 19s.; received for same period, book fees, £1 1s. 6d., not appropriated.

19.—The average cost of each pupil from 3rd May to the 30th September, 1858, 7s. 7½d.

20.—Reading, writing, grammar, geography, arithmetic, and needlework. Reading, 4 hours; writing, 2½ hours; grammar, 1½ hours; geography, 1 hour; arithmetic, 2½ hours; needlework, 1½ hours.

21.—1st class, first book; 2nd class, second book; 3rd class, third book. The books are in good order; Scripture lessons much required.

22.—None. Maps and black-board with furniture much required.

23.—The system of correction employed in the school,—the pupils are detained in school during recreation. No instructions on this point have been received.

24.—The pupils were not examined by any party from the 1st May to the 30th September, 1858, nor were there any prizes awarded. The Inspector, Mr. M'Cann, has attended since.

25.—The school has been officially visited by the Patrons frequently.

26.—Stephen and Isabella Phillips.

27.—None.

28.—Stephen Phillips, born in Leeds, Yorkshire, England; Isabella Phillips, born in Liverpool, Lancashire, England.

29.—Stephen Phillips—age, 40; Isabella Phillips—age, 37.

30.—Date of appointment, 1st May, 1858.

31.—Not trained.

32.—Third Class, B. Non-vested.

33.—Both private teachers for many years.

34.—Amount of salary, £15 per quarter for both.

35.—School fees.

36.—Total income of teachers from 1st May to the 30th September, 1858, £26 19s.; annual income, £60, with the fees added.

37.—General lesson given three times a week; there are no books. The school has been visited by the Revd. Wm. Ross, Presbyterian Minister, and the Very Revd. Dean Welsh, Roman Catholic Clergyman, since the 30th September, 1858.

TARLO.

1.—Tarlo.

2.—The building is of wood, and in good condition at present.

3.—Six hundred superficial square feet.

4.—Nine thousand six hundred and eighty square yards.

5.—No water-closets.

6.—Two hundred and forty square feet in one room, one hundred and twenty in the other—eighty cubic feet, forty do.

7.—From thirty-two to thirty-three in the large schoolroom.

8.—The rooms are well built and airy.

9.—The school has only been in existence since the 18th November, 1858, and there is a daily average of thirteen boys and twenty girls.

10.—Eight, maximum age of boys—and sixteen of girls; four, minimum age of boys—and four of girls.

11.—Two classes: twenty-four, average number in first class—and nine in the second; in the first class, ten the maximum age, and three the minimum; in the second, sixteen the maximum age, and five the minimum.

12.—Five hours during each day, commencing at ten and terminating at four o'clock; one hour, from one to two, allotted to recreation.

13.—Saturday is the only holiday allowed in the week; three vacations annually, one week at Christmas, one at Easter, and one in Midwinter.

14.—Two hundred and forty-five.

15.—The teacher has had no opportunity of judging.

16.—From fifteen to twenty, as nearly as I can judge.

17.—Nine-pence weekly; two shillings for books annually; £2 1s. annual charge for each pupil.

18.—The Tarlo National School was not in existence on the 30th September, 1858.

19.—*Vide* reply to No. 18.

20.—To the first class.—reading, writing, and arithmetic; three hours daily are allotted to reading, one hour to writing and one to arithmetic; to the second class,—reading, writing, arithmetic, grammar, and geography, to each of which subjects an equal portion of time is daily allotted; one hour to reading, one to writing, &c., &c.

21.—The first book of lessons is used in the first class; the second book and the Scripture lessons in the second class; the books in use are in good condition; works on geography and

and grammar are urgently required; the number of first and second books is adequate to the wants of the school.

22.—The books are the only school apparatus; there are no maps, and they are much wanted.

23.—Confinement is chiefly employed; occasionally corporal punishment is resorted to; no instruction received from Inspectors, Managers, &c., &c.

24.—The pupils were examined on the 24th December, 1858, by Mr. M'Cann, an authorized agent of the Board; no prizes have hitherto been awarded.

25.—Mr. M'Cann remained at the school the greater part of the day; no report exists.

26.—Samuel B. Shaw.

27.—Mary Anne Shaw.

28.—Hull, Yorks, England, birthplace of S. B. Shaw; Goulburn, birthplace of M. A. Shaw.

29.—Twenty-nine, age of S. B. Shaw; twenty-five, of M. A. Shaw.

30.—November 18th, 1858.

31.—No.

32.—*Vide* No. 31. No certificate hitherto.

33.—Very little experience in teaching. Clerk under the Government.

34.—Eighty-four pounds.

35.—Nine-pence per week from each pupil.

36.—About £130 per annum.

37.—Visited on one occasion by the Revd. W. Ross, Presbyterian Clergyman; no books used.

S. B. SHAW,
Teacher.

TILIMBY.

Tilimby, National School,
Paterson, 14 March, 1859.

Gentlemen,

I have the honor of forwarding an answer to your several questions contained in circular No. 26, dated 15th February, 1859, which I received from the Revd. T. Stirton on the 20th ultimo, and hope the replies will meet with your approbation.

The whole of the Returns are made up to the 30th September, 1858, with the exception of some new desks, &c., that have been added since.

Yours &c.,

JOHN ENGELHART.

1.—Tilimby, Paterson.

2.—Slabs, lathed and plastered inside and out, with brick chimney—lately been repaired.

3.—29 ft. by 17 ft., or 493 superficial square feet.

4.—An enclosed bush paddock containing 5 or 6 acres, or about 24,200 superficial square yards.

5.—A bush one at present; a slab one about being erected at my own expense.

6.—There is no other room attached to the schoolroom.

7.—Average 32.9.

8.—Four windows, with ventilation in ceiling.

9.—Total average, 47; boys, 24, girls, 23.

10.—Boys, maximum 13, minimum 4; girls, maximum 13, minimum 4.

11.—The school is only divided into two classes, viz., first and second. First class 17 scholars, maximum 10, minimum 4. Second class 30 scholars, maximum 13, minimum 6.

12.—Five hours; commencing at 9 o'clock in the forenoon, and terminating at 4 o'clock in the afternoon, allowing two hours—from 12 to 2—for dinner and recreation.

13.—There is no school held on Saturdays; that is the only holiday in the week; nor was any vacation given from the time the school was enrolled until Christmas, when a fortnight was allowed.

14.—105 days, from 1st May to September 30th.

15.—No children having left the school during the above period I cannot judge on this subject.

16.—It is impossible to guess at the number of children, the families are so much scattered, and many are attending other schools nearer them.

17.—The charges for instruction are as follows:—

Weekly Payments—		Total for the Five Months.	
2 at 1s. per week.....	0 2 0	2 4 0
15 „ 6d. „	0 7 6	7 17 6
Quarterly—			
14 at 6s. 6d. per quarter ...	4 11 0	7 11 8
11 „ 10s. „	5 10 0	9 3 4
5 „ 13s. „	3 5 0	5 8 4
Total.....		£32 4 10	

I make no charge extra for the use of books unless purchased.

18.—Total amount received to 30th September, £11 10s. 10d., and 6s. 3d. for books sold—appropriated towards furnishing extra books for the use of the school and personal expenses; no other fees have been received for the school except salary, which gives a total of £36 17s. 1d.

19.—I find the average cost of each child's education for the five months is 15s. 8d.
20.—

FIRST CLASS.

	Monday. Hours.	Tuesday. Hours.	Wednesday. Hours.	Thursday. Hours.	Friday. Hours.	Total. Hours.

	<u>5</u>	<u>5</u>	<u>5</u>	<u>5</u>	<u>5</u>	<u>25</u>

21.—First book lessons, second ditto, sequel ditto 1st and 2nd, geography, grammar, Scripture reading lessons—as provided by the Board of National Education. The books are all in good order, and sufficient for all immediate wants of the school.

22.—A map of the World and a map of Europe, in good condition; six new desks, and forms in sufficiency. A map of Australia is much needed and has been promised.

23.—Generally by suspension from recreation, with impositions, and, for grievous offences, the cane. I have had no instructions on this subject.

24.—During the time the school has been enrolled it has been visited but once, and was examined by the Revd. T. Stirton. There has been no prizes or rewards given yet in the school.

25.—The Revd. T. Stirton and W. M'Intyre, Esq. Mr. M'Intyre, who first organized the school, staid some time. The Rev. T. Stirton, on the 30th August, was about 2 hours, and wrote the following in the Report Book:—"Attended the school on Monday, the 30th August, and heard the 2nd class examined in geography; being without books the scholars answered tolerably well; the school was quiet and orderly.—T. STIRTON, L. P."

26.—John Engelhart.

27.—None.

28.—

29.—

30.—May 1st, 1858.

31.—Not trained.

32.—

33.—By keeping the school nearly two years previous to appointment. Photographic artist.

34.—£5 per month, or £60 annual.

35.—£14 17s. 1d.

36.—£36 17s 1d.

37.—None, only such as is shewn in answer to question 20. The school is only visited by the Rev. T. Stirton, Presbyterian Minister. The Scripture reading lessons.

JOHN ENGELHART.

TOMAGO.

1.—Tomago.

2.—Metal.

3.—The number of superficial square feet contained in the area of the schoolroom, 905 feet 1' 8".

4.—The number of superficial square feet contained in the ground for the use of pupils, 21,390 feet.

5.—Two closets, metal, out of repair.

6.—The number of superficial square feet, 905 feet 1' 8", and cubic, 10,559 feet 11' 5" 4" in schoolroom.

7.—The average number of pupils usually assembled in this room, 33.

8.—For ventilation, 8 windows.

37—0

9.

9.—The annual average number on the books, boys, 23·5; girls, 28·5; total, 52. The average number attending the school,—boys, 12·40; girls, 15·18; total, 33.

10.—The maximum age,—boys, 14 years; girls, 16 years; minimum age,—boys, 3 years; girls, 4 years.

11.—Number of classes in the school, 3; average number in each class,—1st class,—boys, 13; maximum age, 10; minimum, 3; 1st class,—girls, 14; maximum age, 14; minimum, 4. 2nd class,—boys, 7; maximum age, 14; minimum, 7; 2nd class,—girls, 10; maximum age, 16; minimum, 5. 3rd class,—boys, 4; maximum age, 14; minimum, 12; 3rd class,—girls, 4; maximum age, 14; minimum, 10.

12.—Number of school-hours, 5, commencing at 9 o'clock, closes at 12 o'clock; opens at 1 o'clock, closes at 3 o'clock. The hour from 12 to 1 employed for lunch and exercise.

13.—Number of holidays in each week, 1—Saturday; Good Friday, Queen's Birthday, and Anniversary, are kept; one vacation, two weeks at Christmas.

14.—Total number of days appropriated to school duties during the year, 258.

15.—The average length of the period during which pupils, from the time of their first entrance to the time of their finally leaving school, remain there, 5 years.

16.—The number of children between 5 and 15 years in the locality, who do not attend the school, 30.

17.—The weekly sum charged to each pupil, 4d; annual for books, 2s.; the total annual charge for each pupil, 19s. 4d.

18.—The total annual amount of school fees received from the pupils,	£13	18	7
Appropriated to teacher's use, for books, and expended on books	1	11	6
Teacher's salary from Board	49	0	0
For repairs done to the school, and teacher's house, from Board...	20	0	0
From the residents for same purpose	12	0	0

Total amount received from all sources towards the support of the school, during the 12 months ending 30th September, 1858... 96 10 1

19. The average annual total cost of each pupil, £2 18s. 5½d.

20. A detailed enumeration of the several subjects of instruction given to each class, and the time allotted to each subject, in each day throughout the week:—

1st class,—On Monday—9 to 9¾ writing; 9¾ to 10½ reading; recess for a ¼ of an hour, to 11¼ arithmetic; 11¼ to 12 geography; 12 to 1 lunch; 1 to 2 writing and ciphering; 2 to 3 reading and tables. Tuesday—9 to 9¾ writing; 9¾ to 10½ reading; recess ¼ an hour, to 11¼ various questioning; 11¼ to 12 arithmetic; repeated every alternate day to the end of the week.

2nd class,—Monday—9 to 9¾ writing; 9¾ to 11 reading, spelling, explaining; 11 to 11½ geography; 11½ to 12 arithmetic; 12 to 1 dinner; 1 to 2 ciphering; 2 to 3 reading and tables. Tuesday—9 to 9¾ reading; 9¾ to 10½ writing; 10½ to 11¼ dictation; 11¼ to 12 grammar; 1 to 2 writing and ciphering; 2 to 3 reading and tables; repeated to the end of the week, each alternate day.

3rd class,—Monday—9 to 9¾ reading; 9¾ to 10½ writing; 10½ to 11¼ arithmetic; 11¼ to 12 geography; 12 to 1 dinner; 1 to 2 Scripture lessons; 2 to 3 arithmetic and needlework. Tuesday—9 to 9¾ reading; 9¾ to 10½ writing; 10½ to 11¼ dictation; 11¼ to 12 grammar; 1 to 2 Scripture lessons; 2 to 3 arithmetic and sewing. Wednesday—9 to 9¾ reading; 9¾ to 10½ writing; 10½ to 11¼ mental arithmetic and tables; 11¼ to 12 geography; 1 to 2 Scripture lessons; 2 to 3 arithmetic and needlework. Thursday—9 to 9¾ reading; 9¾ to 10½ writing dictation on slates; 10½ to 11¼ writing in books; 11¼ to 12 grammar; 1 to 2 Scripture lessons; 2 to 3 arithmetic and needlework. Friday—repetition of the lessons of the preceding days of the week; arithmetic as usual from 2 to 3.

21.—A list of the titles of all books used in each of the several classes in the school, by 1st class,—1st book; 2nd class,—2nd book, grammar, geography, arithmetic; 3rd class,—3rd book, grammar, geography, arithmetic, Scripture book. The state of the books in general bad; the Scripture lessons are in a very dilapidated state; the number in the school is not adequate to the wants of the school.

22.—A descriptive list of apparatus and maps in the school:—One black-board, 5 maps, viz.:—the World, Asia, Scotland, Australia, and Ireland, condition good; required, the map of Europe, a desk for the teacher, and two for the children's use.

23.—Correction,—the cane is occasionally resorted to, but the more general and effectual is confining after school-hours for a limited time, and employed during the time. No directions from any, with respect to punishment.

24.—The school is visited by Mrs. Windeyer; no rewards have been given during the last year.

25.—The school was officially visited by Mr. M'Intyre twice during the last year, occupied in these duties, I believe, from 10 o'clock A.M. to 2 o'clock P.M. Copy of reports:—

" 18th March, 1858.

" Visited this school to-day, and found 20 pupils present.

" WM. M'INTYRE,
" Organizing Master."

" 30th July, 1858.

" Visited this school to-day, and found 29 pupils present, neat and clean, and making " satisfactory progress.

" WM. M'INTYRE,
" Organizing Master."

Teacher remarks,—The school, I think, progresses notwithstanding the irregular and unpunctual attendance.

- 26.—Name of teacher,—Jane Creamer.
 27.—No assistants, pupil teachers or monitors.
 28.—Birthplace of teacher,—England.
 29.—Age, 34 years.
 30.—Date of appointment to present office,—1st March, 1858.
 31.—Trained as a teacher.
 32.—In Ireland, at the Clare Model School for 1 month, was afterwards appointed to the same school as teacher, for a period of 5 years; system, Church of England. Also at the Model School, Fort-street, Sydney, for one month. No certificate of competency, none being then awarded.
 34.—Annual salary, £84.
 35.—School fees, £13 18s. 7d.
 36.—Total annual amount of teacher's income derived from school, £62 18s. 7d.
 37.—The religious and moral instruction is given by the teacher, when the Scriptures are read in the afternoon. No Clergyman visits the school.

JANE CREAMER, Teacher.

TOWRANG.

- 1.—Towrang.
 2.—Of stone, in good repair.
 3.—600 superficial square feet.
 4.—An acre.
 5.—Of wood, in good repair.
 6.—One room, containing 576 superficial square feet, and 9,216 cubic feet.
 7.—Twenty-five.
 8.—Four windows, having swing sashes.
 9.—The school lately opened, receives a weekly increase; at present amounting to 26.
 10.—From 2½ to 13 years.
 11.—Four classes:—
- | | 1st. | 2nd. | 3rd. | 4th. |
|------------------|--------------|---------|--------|----------------|
| Average number:— | 8 | 5 | 6 | 6 |
| Age:— | from 9 to 13 | 10 to 7 | 8 to 4 | 6 to 2½ years. |
- 12.—4¼ hours—commencing at 10 A.M., closing at 4 P.M.; cessation at 11½ A.M. 5 minutes for recreation; and from 1 to 2 P.M. dinner hour.
 13.—One holiday, on Saturday. The school being so recently opened we cannot further report.
 16.—Eighteen.
 17.—From sixpence to one shilling, charged according to the circumstances of the several families. For books four shillings per annum. Total annual charge per pupil, £1 9s. to £2 15s.
 18.—None to report.
 19.—Ditto.
 20.—1st class
- | | Spelling. | Reading. | Writing. | Arithmetic. | |
|------------|---|----------|----------|--------------------|---------|
| Morning | 1 hour | ½ hour | ½ hour | ½ hour | |
| 2nd class | 1 " | ½ " | ½ " | ½ " | |
| 3rd " | 1 " | ½ " | ½ " | ½ " | |
| 4th " | Alphabet, relieved by frequent exercises and picture lessons. | | | | |
| Afternoon. | Reading. | Writing. | Grammar. | Mental arithmetic. | Music. |
| 1st class | ½ hour | ½ hour | 20 min. | 20 min. | 20 min. |
| 2nd " | " | " | " | " | " |
| 3rd " | " | " | " | " | " |
| 4th " | Alphabet as before. | | | | " |
- Geography and grammar are taught alternately. Recapitulation of all lessons on Friday. Moral songs are sung and tables chanted at every change of exercise.
 21.—First book of lessons, second book of lessons, sequel to ditto, compendium of geography, English grammar, Scripture lessons No. 1, first book of arithmetic, third book of lessons.
 22.—None; much want a few maps, diagrams, and prints.
 23.—Sympathy of numbers; that failing, corporal punishment.
 24.—
 25.—Not inspected.
 26.—Richard Todd.
 27.—Four monitors:—Samuel Grubb, Charlotte Irby, Thomas Grubb, Eliza Skidmore.
 28.—Teacher born in London; monitors at Darby Murray's Flats.
 29.—" 28 years. " from 10 to 13 years.
 30.—January 10th, 1859.
 31.—Not trained.
 32.—
 33.—Formerly head monitor of the Bishopsgate British School, London; previous occupation, storekeeper.
 34.—Not settled.
 35.—None.
 36.—Not known.
 37.—Explanation and application of Scripture lessons, New Testament No. 1, by teacher, once every day. Visited by the Rev. John Watsford, Wesleyan.

TUMUT.

TUMUT.

- 1.—Tumut.
- 2.—A brick building, lately erected, shingled, &c.
- 4.—An open green.
- 5.—In course of construction.
- 6.—15 × 15 & 12 × 8.
- 7.—At present there are 7 children who attend during the day, and 9 who attend at night, being unable to attend in the day.
- 8.—Lofty, and one window in each room.
- 9.—Thirty. 3 girls and 13 boys; 6 more are coming immediately. Owing to the school having been just established, the attendance is as yet small, to what it will be when the fact is known throughout the district, and, besides, this being harvest time, the services of many children are required at home.
- 10.—The pupils who attend at night are from 12 to 16 years of age, those in the day are from 3 to 12.
- 11.—
- 12.—Day pupils from 9 A.M. to 4 P.M., night pupils from 7 P.M. to 10 P.M.
- 13.—One, viz., Saturday; one vacation, a fortnight at Christmas.
- 14.—Two hundred and sixty days.
- 15.—Five hours a day, three at night.
- 16.—Three hundred or more.
- 17.—For 2 from one family, 10s. each per quarter; for 2 from one family, 12s. each per quarter; for 1 from one family, 15s. each per quarter; night school, 2s. per week.
- 18.—Only established January 1st, 1859.
- 19.—
- 20.—Grammar, spelling, reading, writing and arithmetic, instruction in the French and Latin languages if required.
- 21.—Mavor's spelling, Leny's grammar; National School books will be used but they have not yet arrived.
- 22.—None; maps, &c., needed.
- 23.—By threatening to expel them from the school.
- 24.—
- 25.—Per Local Patrons.
- 26.—James William M'Cutcheon.
- 27.—None.
- 28.—Clapham, Surrey, England.
- 29.—Twenty-five.
- 30.—January 1st, 1859.
- 31.—Not trained; was educated at Clapham Grammar School, head master, James Balaam, Esquire, M.A.
- 32.—
- 33.—Two years, and previously was clerk in the Royal Mint, Sydney.
- 34.—£60.
- 35 and 36.—Impossible to tell at present, school having been so recently established.
- 37.—The Revd. Mr. Fox (C.E.) has promised to give religious instruction to the children.

VIOLET HILL.

- 1.—Violet Hill, American Creek, near Wollongong.
- 2.—Constructed of weatherboard, shingled, lathed and plastered, quite new.
- 3.—576 sq. feet.
- 4.—2,420 sq. yards.
- 5.—There are two water-closets, constructed of weatherboard, quite new, with two seats in each. They are in excellent condition.
- 6.—576 sq. feet, and 5,184 cubic feet. This is the ordinary calculation from length, breadth, and height, but there being no ceiling there is more space vacant than stated.
- 7.—There is but one room, and the school being new and only opened a day or two ago, the average number of pupils cannot be stated. At present there are about 40.
- 8.—There is sufficient ventilation.
- 9.—For the reason given above the average number of pupils cannot be stated.
- 10.—14 and 4 years.
- 11.—Divided into three classes. In first book are 28, and the maximum and minimum age 12 and 4. In second book are 6, and max. and min. 14 and 6. In third book are 4, and max. and min. 12 and 8.
- 12.—The pupils attend the school 6 hours each day, school duties commencing at 10 A.M. and terminating at 4 P.M. There is an interval from 12 to 1, during which time those pupils who can go home for dinner, and those who cannot (owing to the distance of their homes) remain under the eye of the master to eat lunch and play.
- 13.—There will be a holiday each Saturday. There will be the usual vacations sanctioned by the Board—a week at Christmas, Easter, and Midwinter, respectively.
- 14.—I cannot say, of course, how many days there may be, for reason previously specified.
- 15.—I cannot answer for same reason.
- 16.—Ditto ditto
- 17.—The charge fixed *at present* is 3d. per week. The book fee is $\frac{1}{2}$ d. per week.

- 18.—Cannot be answered.
 19.—Ditto.
 20.—Time table not yet made out. In first class there will be reading and spelling, with easy exercises in slate-writing and numbers. In second class, reading, spelling, and meaning, with slate-writing and arithmetic, and preliminary knowledge of geography and grammar. In third class, more advanced exercises on the same subject.
 21.—The Irish National School books. First, second, and third books of lessons. The books are new, and quite adequate at present to the wants of the school.
 22.—The maps have not yet arrived.
 23.—I shall try to ensure order and diligence with as little of corporal punishment as possible. To ensure this I shall practise various methods, not confining myself to any one in particular.
 24.—Cannot be answered.
 25.—It will be visited by the Inspector of National Schools. The remainder of the question cannot be answered.
 26.—John M'Creddie.
 27.—There are none.
 28.—Barr, Ayrshire, Scotland.
 29.—26.
 30.—18th February, 1859.
 31.—Not trained in any Normal Institution, but as Assistant Teacher.
 32.—Attended Sydney Model School, Fort-street, for one month. Enrolled in Class 2, Section A.
 33.—Have taught for 10 years as assistant teacher and schoolmaster. Never engaged in any other occupation or business.
 34.—Annual salary, £120.
 35.—Cannot be answered.
 36.—Ditto.
 37.—There is the usual employment of Scripture lessons sanctioned by the Board of National Education. I am not aware of any arrangement entered into with any Minister to impart religious instruction.

WATTLE FLAT.

- 1.—Wattle Flat, Sofala.
 2.—Slabs, zinc roof; in bad condition; repairs, enlargement, or other improvement required.
 3.—667½ superficial feet.
 4.—Two acres not fenced, nor any portion set apart for the use of the children; No. of square yards, 9,680.
 5.—Two water-closets, lately erected, built of slabs, bark roofs, slabs rather far apart.
 6.—The schoolroom contains 300 superficial feet, or 2,700 solid feet; the classroom contains 97½ superficial feet, or 731¼ solid feet.
 7.—Thirty-three.
 8.—Good; windows hung on pivots, to open inwards and outwards.
 9.—The number entered, since the school opened on the 2nd August 1858,—males, 37; females, 32; total, 69; average attendance, males, 19.42; females, 13.59; total, 33.01.
 10.—Maximum age of males, 14 years, minimum, 4 years; maximum age of females, 12 years, minimum, 4 years.
 11.—Three classes; 18 in 1st class, maximum age 12 years, minimum, 4; 13 in 2nd class, maximum age 10 years, minimum, 5; 15 in 3rd class, maximum age 14 years, minimum, 8 years.
 12.—Five hours, except on Saturday, 3 hours; from 9 A.M., to 12 noon, from 1 P.M. to 3 P.M.; the intervening hour from 12 to 1 employed by the pupils for dinner and recreation.
 13.—Half-holiday in each week, school being opened only from 9 to 12 on Saturday. Vacation, one at Christmas, commencing on the 24th December, and ending on 2nd January, inclusive, 10 days; 7 days at Easter, commencing on Good Friday and ending on the Thursday following.
 14.—135½ days from the opening of the school on the 2nd August, 1858, to the 31st January, 1859.
 15.—Cannot ascertain.
 16.—Forty-nine.
 17.—Children under 6 years of age pay 6d. per week; under 9 years, 9d.; over 9 years, 1s. These fees include one penny per week for book fund. Total annual charge for each child under 6 years, £1 6s.; under 9 years, £1 19s.; over 9 years, £2 12s.
 18.—Amount of contributions paid by pupils from the 2nd August to 30th September, 1858, £7 3s. 3d.; appropriated for books, 14s. 11d.; payment of teacher, £6 8s. 4d.; received from Government, £18;—total £25 3s. 3d.
 19.—Cost of each pupil for the two months from 2nd August to 30th September, 1858, 18s. 7½d.; average attendance, 27; total annual cost of each pupil, £5 11s. 10½d.
 20.—1st class, reading, 1 hour and 30 minutes each day; writing, 1 hour and 30 minutes each day; arithmetic, 1 hour and thirty minutes each day; tables, 30 minutes each day; geography; 2nd and sequel to 2nd class, reading, 45 minutes each day; writing on copies, 45 minutes each day; writing from dictation, 45 minutes each day; English grammar, 45 minutes on Monday, Wednesday, and Friday; geography, 45 minutes on Tuesday, Thursday,

day, and Saturday; arithmetic, 45 minutes each day; Scripture lessons, 45 minutes each day; tables, 30 minutes on Monday and Thursday; object lessons, 30 minutes on Wednesday; mental arithmetic, 30 minutes on Tuesday and Friday. Needlework is taught to the girls for 45 minutes each day.

21.—1st class, 1st book of reading lessons; 2nd class, 2nd book of reading lessons, Scripture lessons, Old Testament No 1; sequel to 2nd class, sequel to 2nd book No. 2, Scripture lessons, Old Testament No. 1. The books are in good condition; no other kinds are needed; the present supply is ample for the wants of the school.

22.—No apparatus of any kind in the school, with the exception of one map of the World. A map of Australia, maps of the four Continents, and a black-board are required.

23.—To enforce punctuality of attendance, the Organizing Master of National Schools for the Western District has directed that the pupils be detained the same length of time in the evening as they were absent in the morning, and employed at some useful exercise. Deprivation of the entire or some portion of the time allotted to recreation, or detention in the evening is resorted to, for the punishment of other offences corporal punishment is but rarely resorted to, and only for some gross breach of order or misconduct.

24.—The school has not been visited nor the pupils examined by the Patrons since it opened.

25.—Inspected by the Inspector and Superintendent of National Schools, W. Wilkins, Esq., on the 14th September, 1858; time occupied, about 3 hours. By the Organizing Master of National Schools, Western District, Mr. B. H. M'Cann, about the 6th October, 1858; time occupied, 6 hours. If there are any reports on the state of the school, they are in possession of the Board of National Education.

26.—John O'Brien.

27.—None.

28.—Ireland.

29.—30 years.

30.—24th June, 1858.

31.—Trained.

32.—At the training schools of the Board of National Education, Ireland, for six months; at the National Model School, Sydney, one month.

33.—None

34.—£108.

35.—Fees from the 2nd August, 1858, to 30th January, 1859, £21 9s. 11d.

36.—Total income from the 2nd August, 1858, to 31st January, 1859, £75 9s. 11d.

37.—All the children who are able read the Scripture lessons (under the superintendence of the teacher) every day. The school has not been visited by any Clergyman for the purpose of imparting religious instruction. The books used are the Scripture lessons Old Testament No. 1, Old Testament No. 2, New Testament No. 1, New Testament, No. 2.

WOLLOMBI.

1.—Township of Wollombi.

2.—Constructed of wood, with stone chimneys, weatherboarded and shingled. The inside of the building is undergoing repairs at present. A verandah required.

3.—1,446 square feet.

4.—1,361 square yards for the pupils use.

5.—Two water-closets, constructed of wood; the roofs shingled; in good condition.

6.—Larger room, 510 square feet, and 6,012 cubic feet; smaller room, 308 ditto, and 3,147 ditto.

7.—The smaller room was used for the first time during the week ending 26th February, 1859; the average number in the larger for that week was 50, and smaller 21.

8.—The upper half of each window opens on pivots.

9.—On the books during 1858:—Average, 55.5 males, and 52.5 females. Average attendance for 1858:—36.5 males, and 32 females.

10.—Maximum of males, 16 years; minimum, 4 years: maximum of females, 15 years; minimum, 4 years.

11.—The school is divided into four classes. The average number on the rolls, in each class, is—first class, 23.5; second, 63.3; third, 14.0; and fourth, 7.2. Maximum and minimum ages in each class:—First, 9 and 4 years; second, 14 and 5 years; third, 16 and 9 years; and fourth, 15 and 11 years.

12.—The males attend five hours, and the females six, each day; the extra hour of the latter is occupied by sewing. School commences at 9 o'clock A.M., and terminates at 4 o'clock P.M., each day, except on Saturday, when it terminates at noon. Periods of cessation:—10½ to 10¾ A.M., the pupils are in the playground; 12 to 1 o'clock P.M., at home for dinner; 1 to 2 o'clock P.M., girls sewing, and the boys in the playground.

13.—Half-holiday on the afternoon of each Saturday. Three vacations, viz.:—one week at Easter, one at Midwinter, and one at Christmas.

14.—295 days.

15.—There are no records of this school but for the last three years. The following reply can only be considered an approximation, as some have remained at the school during that time, and numbers have been previously at other schools:—One year and three months.

16.—About 50.

17.—First class, 3d. per week, second 4d., third 6d., and fourth 6d., for each pupil. Annual charge for books, 2s. each. Total annual charge for each pupil:—First class, 14s. 3d.; second, 18s. 4d.; third, 24s. 6d.; and fourth, 24s. 6d.

18.—School fees, £39 6s. 5d., appropriated to the teacher's use. Salary from the National Board, £120; from same source for pupil teacher's salary for 2 months, £2 10s.; amount from the pupils for books, £4 4s. 6d. Total amount from all sources, £166 0s. 11d.

19.—Dividing by 70, the average attendance for the time specified, the average annual cost for each pupil's education is £2 7s. 5¼d.

20.—First class:—Reading, 2½ hours each day; writing, 1 do. do.; arithmetic, 1¼ do. do. Second class:—Reading, 1½ hours each day; writing and dictation, 1¼ do. do.; arithmetic, 1 do. do.; geography, ½ do. do.; English grammar, ½ do. do. Third and fourth classes:—Reading, 1¼ hours each day; writing and dictation, 1 do. do.; arithmetic, 1¼ do. do.; geography, ¾ do. do.; English grammar, ½ do. do. Book-keeping, 2 hours each week; geometry, 2 do. do.; algebra, 2 do. do.; mensuration, 2 do. do.

21.—First class, first book of lessons; second class, second book of lessons, and sequel to second book, Scripture lessons, and spelling-book superseded; third class, third book of lessons, Scripture lessons, spelling-book superseded, English grammar, and arithmetic; fourth class, fourth book of lessons, Scripture lessons, English grammar, geography generalized, spelling-book superseded, arithmetic, book-keeping, geometry, algebra, and mensuration. The number of books are sufficient.

22.—Several large maps, viz., the World, Europe, Asia, Africa, America, Australasia, and Pacific Ocean. Five black-boards—one 5 ft. × 5 ft., one 4 ft. × 3 ft., two 2 ft. × 2 ft., one 2 ft. × 1½ ft. A pair of globes would be useful for instructing the higher classes in geography, and prints of animals for lessons on natural history. The maps and other apparatus are in good condition.

23.—Confinement in the schoolroom while the rest of the pupils are in the playground, or confinement after school-hours. Corporal punishment is seldom resorted to. No instructions from any party on this point.

24.—The pupils are examined twice a year by the teacher in presence of the Local Patrons, and such other persons as choose to attend. No prizes or rewards are given.

25.—The school is inspected officially by the National Board's officers. It has been twice inspected during the last year, and about four hours each time were occupied in examining the pupils. The following are the reports by visitors that were entered in the Visitors' Book:—

" 15th October, 1856.

" Visited the school, and was much pleased with the general appearance and orderly behaviour of the children.

" JOHN EGGLESTON,
" Wesleyan Minister."

" 23rd January, 1858.

" Visited the school for a short time, and was pleased with the appearance of the scholars, and, from the correctness of the replies to questions put, convinced that great labor had been bestowed by the teacher.

" JOHN PEMELL,
" Wesleyan Minister."

" 17th May, 1858.

" Visited the school this day, and also on several days previously during the present month, and always during school-hours, and invariably found Mr. Wright and his assistants busily employed in the work of instruction.

" I feel pleasure also in saying, that from what I observed I believe Mr. Wright possesses in an eminent degree that happy influence over the minds of his pupils which enables him to govern without resorting to severe corrections.

" MICHL. BYRNE."

" 13th July, 1858.

" Visited this school to-day, and found 71 pupils present, neat and orderly. The children are making satisfactory progress.

" WM. M'INTYRE."

" 8th September, 1858.

" Visited this school to-day, and found 74 pupils present, neat and clean.

" WM. M'INTYRE."

The teacher has no remarks to offer.

26.—John Wright.

27.—Pupil teacher, Anna Maria Wright; monitor, Eliza Matilda Wright.

28.—John Wright, born in County Tyrone, Ireland; Anna M. Wright, do. do. do.; Eliza M. Wright, born in County Armagh, Ireland.

29.—John Wright, 37 years; Anna M. Wright, 15 years; Eliza M. Wright, 13 years.

30.—John Wright was appointed to present office in January, 1856; Anna M. Wright in August, 1858. Monitor not officially appointed.

31.—Head teacher trained.

32.—Trained at the Irish National Board's Normal School, Marlborough-street, Dublin, for a period of six months. Certificate of competency. Highest division of second class from the New South Wales National Board, and second division of highest class from the Irish National Board.

33.—

34.—Head teacher, £120 per annum; pupil teacher, £15 per annum.

35.—School fees for the year 1858, £44 5s. 9d.

36.—£179 5s. 9d. for the year 1858.

37.—The religious or moral instruction given in the school is the reading of the Scripture lessons to the teacher. Two Wesleyan Clergymen gave one visit each during the last three

three years; their names are—Rev. J. Eggleston and Rev. J. Pemell. The Church of England Clergyman gives religious instruction to those of his denomination who choose to attend at the Church on every Wednesday evening. When there is a Roman Catholic Clergyman in the township he gives religious instruction to those of his denomination who attend at the Catholic Chapel, one evening each week. The books read in the schoolroom during the hour appointed for religious instruction are the Scripture lessons.

WOLLONGONG.

- 1.—Wollongong.
- 2.—Of brick, with stone foundation, which material is very bad; the building is, at present, undergoing thorough repairs.
- 3.—1,760 square feet.
- 4.—8,470 superficial square yards.
- 5.—Commodious, well ventilated, and in good order.
- 6.—Each school contains 720 square feet, and 10,080 cubic feet; each classroom, 126 square feet, and 1,170 cubic feet.
- 7.—45 in the boys' division, with an average of 15 in the classroom; 18 in the girls' division, with an average of 12 in the classroom.
- 8.—Commodious windows, with ventilators in the ceiling.
- 9.—For 1858 the number on the books was 96 boys and 59 girls; the average number attending was 58 boys and 39 girls.
- 10.—Boys' school, maximum age, 18; minimum, 4. Girls' school, maximum, 15; minimum, 4.
- 11.—Three classes in both schools; 3rd class, boys 20, maximum and minimum 18 and 11; 2nd ditto, 28 (15 and 9); 1st ditto, 40 (11 and 5). 3rd class, girls 20, maximum and minimum 15 and 8; 2nd ditto, 14 (8 and 6); 3rd ditto, 16 (7 and 4.)
- 12.—5 hours:—Commence at 10, terminate at 1; resume at 2, terminate at 4; interval of cessation from 1 to 2, such period spent in recreation by both sexes.
- 13.—One holiday, viz., Saturday; no half-holidays allowed; three vacations in the year, viz, 1 week at Christmas, 1 week at Easter, 1 week at Midwinter.
- 14.—245 days.
- 15.—Two years is an average period, but it is very fluctuating owing to the arrival and departure of so many in the district, and the uncertainty of their stay.
- 16.—Cannot be ascertained owing to the existence of several schools in the neighbourhood.
- 17.—Weekly amount charged to each pupil is 6d.; yearly charge for books, 2s. Total amount charged to each pupil, £1 6s. 6d.
- 18.—Annual amount of school fees received during the twelve months ending the 30th September, 1858, amounted to £102 13s., said amount applied to personal expenditure; none other received excepting Government salary; total amount, £279 13s., including fees and salary.
- 19.—Average annual cost of each child's education, £3 0s. 9½d.
- 20.—Boys' school as follows:—Monday morning, 10 to ¼ to 11: 3rd class, writing; 2nd, object lesson; 1st, reading. Thence to ½ past 11: 3rd class, grammatical exercises; 2nd, geography; 1st, slate and copy-writing. Thence to ½ past 12: 3rd class, arithmetic; 2nd, reading; 1st, grammar. Thence to 1: 3rd class, geography; 2nd, grammar; 1st, spelling and dictation.
Monday afternoon:—3rd class, Scripture reading and spelling to 3; 2nd and 1st classes, arithmetic on slate and board. Thence to ¼ to 4: 3rd and 2nd classes, dictation; 1st, reading and spelling. Thence to 4: Exercise on the general lesson to all the classes.
Tuesday morning:—10 to ½ past 11: 3rd class, reading, parsing, and spelling, with derivatives. 2nd and 1st: reading and spelling. Thence to ½ past 12: 3rd class, geography; 2nd, numeration on slates; 1st, spelling. Thence to 1: 3rd class, arithmetical questions; 2nd, copy writing; 1st, tables.
Tuesday afternoon:—2 to 3: 3rd class, Scripture reading and spelling; 2nd and 1st, arithmetic on slate and board. Thence to 4: 3rd class, slate arithmetic; 2nd and 1st, reading and spelling.
Wednesday morning:—10 to ¼ to 11: 3rd class, copy writing; 2nd, slate arithmetic; 1st, reading. Thence to ½ past 11: 3rd class, parsing exercises; 2nd, geography; 1st, slate and copy writing. Thence to ½ past 12: 3rd class, slate arithmetic; 2nd, reading and spelling; 1st, spelling and tables. Thence to 1: 3rd class, grammar; 2nd, geography; 1st, dictation and spelling.
Wednesday afternoon:—2 to 3: 3rd and 2nd classes, tables and spelling; 2nd and 1st, arithmetic on slate and board. 3 to 4: Minister attends to give religious instruction; 3rd and 2nd classes, dictation; 1st, grammar.
Thursday the same as Tuesday; Friday the same as Wednesday.
- 21.—3rd class use the following books: 4th reading book, 1st book of arithmetic, English grammar, geography generalised, spelling-book superseded, extracts from the Old and New Testament, Nos. 1 and 2. 2nd class boys use the following books: 4th and 3rd book of lessons, English grammar, 1st book of arithmetic, spelling-book superseded, introduction to geography, Scripture lessons, Old and New Testament, Nos. 1 and 2. 1st class boys use the following books: 1st book, 2nd book, sequel to 2nd, No. 1, Scripture lessons, New Testament, No. 1,—a good supply of books for the various classes throughout the school.
- 22.—1 map of The World, 1 ditto Europe, 1 ditto Asia, 1 ditto Africa, 1 ditto America, 2 ditto Ireland, 2 ditto Scotland, 1 ditto Palestine, 2 ditto Australia, 1 black-board: an abundant

abundant supply of slates, pencils, pencil-holders, pens, and ink; the maps are in tolerable condition, being in use for 6 years; a better map of Australia would be a desirable attainment.

23.—Corporal punishment mildly administered; detention after school-hours; any flagrant breach of discipline duly reported to the Local Patrons.

24.—Yearly, by the Inspector; prizes have been once awarded during a period of seven years, in the shape of instruction books, selected by the Patrons.

25.—W. Wilkins, Esq., once one day; no report of the state of the school exists as to its present condition; it is well attended by both sexes.

26.—Jabez Jones Clarke.

27.—Euphemia M'Cormack, female teacher, a daily monitor chosen from the seniors, appointed to assist the teacher, likewise a daily monitor.

28.—J. J. Clarke born in Bath, county of Somerset; E. M'Cormack, in the Isle of Mull, Argyleshire.

29.—Male teacher, 34; female teacher, 22.

30.—J. J. Clarke appointed 1st November, 1851; E. M'Cormack, 1st May, 1857.

31.—J. J. Clarke trained from the age of 16; E. M'Cormack, not trained.

32.—Bathwick Hill School, Sion House Academy, St. Helier's, Jersey, Portway House, Weston, near Bath, for various periods at the above institutions; certificate of competency, Class II, Section A; female teacher, Class II, Section A.

33.—Trained from boyhood; no other occupation.

34.—Annual amount of salary of head teacher, £120; female ditto, £60.

35.—Weekly fee of 6d. from each child; allowances and emoluments, none.

36.—Total annual income of the male and female teacher, for 1858, including fees, amounted to £280 8s. 6d.

37.—Instruction in the Scriptures, on an average, twice a month; Dissenting Ministers, Rev. George Charter, Independent Minister; Rev. James Watkin, Wesleyan Minister; the Bible and Catechism.

WOOLLA WOOLLA BRUSH.

1.—Woolla Woola Brush, Manning River.

2.—Constructed of wood, and shingled.

3.—551 feet superficial area of building.

4.—4,840 yards, or 1 square acre.

5.—Not yet erected.

6.—257 superficial feet, and 2,200 cubic feet in the room appropriated to tuition.

7.—Twenty-eight.

8.—Window in front and back.

9.—Since the school commenced on 1st September, 1858, the average number of pupils has been 37 on the books, and average number attending 28,—22 females, 15 males.

10.—From 5 to 14 years, males; and from 5 to 13, females.

11.—Into four classes, viz., arithmetic, writing, reading and spelling, and primer class for the youngest children so far as practicable to class them; but the school being but recently established, and want of proper books, has prevented as yet a complete classification. In the arithmetic class 8, from 8 to 14 years of age; in the writing class 10, from 7 to 14 years of age; in spelling and reading class 20, from 7 to 14 years of age; in primer class 16, from 5 to 8 years of age.

12.—The pupils attend daily from 9 to 12 in the forenoon; cessation of study from 12 to half-past 1, and terminating their studies at half past 4, making an average of from 5 to 6 hours study daily. The interval from 12 to half-past 1 employed in the playground of the school.

13.—The only holiday in the week is Saturday. The vacations are—Christmas, one week; Easter, from Good Friday to Easter Tuesday; and at Whitsuntide, three days.

14.—The total number of days appropriated to teaching, exclusive of Sundays and holidays, 248.

15.—Only one pupil has been withdrawn from the school since its commencement.

16.—Twelve. N.B.—There are also several children about 4 years of age.

17.—No specified sum is charged to each pupil, as the salary to the teacher is at present paid by subscription of the parents of the children attending. The parents also at the present time provide the children with books.

18.—There are no school fees nor any other sources of support to the school but the subscriptions of the parents of the pupils.

19.—According to the present system of subscription, £1 1s. 7d. per annum.

20.—In the forenoon, the usual routine of reading, spelling, and writing, from 9 to 11; and in the afternoon from half-past 1 to 4, in reading and arithmetic for the arithmetic class. The writing class is engaged in writing, spelling and reading in the forenoon from 9 till 12, and in the afternoon in reading and spelling. The junior class is engaged in learning to read both in the forenoon and afternoon during the same period; but for the reason stated in No. 11, a proper classification is at present impracticable.

21.—No books have yet been supplied to the school, but such as the parents have thought fit to supply each child with individually.

22.—None at present.

23.—Slight corporal punishment, or detention in school with extra lessons, according to the fault or neglect of study. No instructions whatever have been given to the teacher on this subject.

- 24.—This school having been so recently opened no examination has yet taken place.
 25.—No visitation as yet, for the reason stated in No. 24.
 26.—Thomas John Weaver.
 27.—No assistants.
 28.—Odeham, near Winchester, England.
 29.—Sixty.
 30.—Engaged from 1st July, 1853.
 31.—Not trained as a teacher.
 33.—Engaged in private tuition, and in the superintending of two schools in the Colony for upwards of ten years previous to present engagement. Occupation, prior to adopting that of a teacher, as banking and mercantile clerk.
 34.—Annual salary, £40.
 35.—No fees, allowances, or emoluments whatever, exclusive of salary.
 36.—Total annual income, £40.
 37.—Religious and moral instruction from the Catechism and Scriptures twice a week by the teacher of the school.

T. J. WEAVER,
Teacher.

WORREGEE.

- 1.—Worreege, Shoalhaven, county of St. Vincent.
 2.—Built chiefly of slabs, with shingled roof, two brick chimneys, one of which requires rebuilding, no other repairs or improvement necessary; teacher's residence detached, built of the same materials, with one brick chimney; present condition perfect.
 3.—Area of the schoolhouse, 639 square feet.
 4.—Superficial measurement of schoolground, 9,680 square yards.
 5.—Two water-closets, built of slabs, present condition perfect.
 6.—Superficial and cubic measurement of each room appropriated for teaching,—schoolroom, 410 square feet, 3,490 cubic feet; classroom, 229 square feet, 1,942 cubic feet.
 7.—Average number assembled in the schoolroom, 12.
 8.—Ventilated by doors, windows, and fireplace only.
 9.—Annual average number on the books, 18; annual average number attending, 12; boys, 7; girls, 5.
 10.—Maximum age of boys, 14; minimum age of boys, 5. Maximum age of girls, 13; minimum age of girls, 4.
 11.—Number of classes, 3; number in each class, 6; maximum and minimum age in each class—1st class, maximum 8, minimum 5; 2nd class, maximum 12, minimum 9; 3rd class, maximum 14, minimum 10.
 12.—Number of hours each day the pupils attend school, 5; commencing at 9 A.M. and terminating at 3 P.M.; one hour's cessation for dinner and recreation.
 13.—One holiday in each week (Saturday), and one week's vacation at Christmas.
 14.—Total number of days devoted to school studies throughout the year, 254.
 15.—Average period pupils remain at school from their first entrance to their finally leaving, $7\frac{1}{4}$ months.
 16.—Number of children in the locality of the school who do not usually attend there, about 20.
 17.—Weekly sum charged to each pupil, 6d.; annual charge for books, 2s. 2d.; total amount charged for each pupil, £1 8s. 2d.
 18.—Annual amount of school fees received from the pupils during the year ending September 30th, 1858, £10 7s. 9d., to augment the teacher's salary; amount received from the Board of National Education, £96; total amount received from all sources during the year, £106 7s. 9d.
 19.—Average annual total cost of the education of each pupil, £8 10s. $7\frac{3}{4}$ d.
 20.—Course of instruction given to each class, and the portion of time allotted to each subject in each day throughout the week:—

1ST CLASS.

Monday, Wednesday, and Friday.
 1 hour Scripture lesson
 $\frac{3}{4}$ " Arithmetic
 $\frac{3}{4}$ " Writing
 1 " Reading
 $\frac{3}{4}$ " Geography
 $\frac{3}{4}$ " Object lessons

Tuesday and Thursday.
 1 hour Scripture lesson
 $\frac{3}{4}$ " Writing
 $\frac{3}{4}$ " Grammar
 1 " Arithmetic
 1 " Reading
 $\frac{1}{2}$ " Other subjects.

2ND CLASS.

$\frac{3}{4}$ hour Arithmetic
 1 " Scripture lesson
 $\frac{3}{4}$ " Geography
 1 " Writing
 1 " Reading
 $\frac{1}{2}$ " Dictation

1 hour Scripture lesson
 $\frac{3}{4}$ " Reading
 $\frac{3}{4}$ " Grammar
 1 " Arithmetic
 $\frac{3}{4}$ " Writing
 $\frac{1}{2}$ " Object lesson.

3RD CLASS.

1 hour Scripture reading
 1 " Writing
 1 " Arithmetic
 1 " Geography
 1 " Reading

1 hour Scripture reading
 1 " Writing
 1 " Arithmetic
 1 " Grammar
 1 " Reading

21.—List of books used in each class,—1st class :—First book of lessons; reading tablet lessons; arithmetic tablet lessons. 2nd class :—second book of lessons; sequel to second book of lessons; first book, arithmetic; first book, grammar; first book, geography. 3rd class :—third book, lessons; English grammar; arithmetic; geography; Scripture lesson books; spelling-book superseded. Present condition of the books, perfect; and the present number sufficient for the wants of the school.

22.—1 map of the World, of Europe, of Australia, and of Ireland; prints on natural history; a black-board; and ball-frame; the whole in good order, and no others required.

23.—To preserve discipline in the school, the children are generally tasked and deprived of liberty during recess for recreation.

24.—The school was examined twice during the year by the Local Patrons, prizes given annually, description—books upon natural history, travels, &c.

25.—The school was once officially visited during the year by Inspector of National Schools, for one day.

26.—William Rose, teacher.

27.—Have no assistant or pupil teachers.

28.—Birthplace, Cardiff, Glamorganshire.

29.—Age, 27 years.

30.—Date of appointment, May 29th, 1855.

31.—Not trained as a teacher.

32.—Possess a Third Class Certificate from the Board of National Education.

33.—Previous occupation, mercantile clerk.

34.—Annual salary, £96 per annum.

35.—School fees, £10 7s. 9d.; postage allowance, £1.

36.—Total annual income derived from the school, £107 7s. 9d.

37.—Religious instruction given every day by the teacher from Scripture lessons, compiled for that purpose for the system.

WILLIAM-STREET.

1.—William-street, Woolloomooloo, Parish of St. James.

2.—Brick walls upon a stone foundation, with stone quoins, covered with shingles, no ceiling, in good repair.

3.—5,686 square feet.

4.—2,820 square yards.

5.—Brick walls upon a stone foundation, newly erected.

6.—Boys school, 1,675 square feet, 22,968 cubic feet; girls school, 1,675 square feet, 22,698 cubic feet; infants school, 625 square feet, 11,718 cubic feet; junior infants school, 820 square feet, 8,610 cubic feet.

7.—Boys school, 220; girls school, 100; infants school, 90; junior infants school, 80.

8.—The opening of windows, apertures in wall with iron grating.

9.—Total, 790,—Boys, 463; girls, 327.

10.—Maximum age of boys, 17 years; minimum age of boys, 2½ years; maximum age of girls, 14 years; minimum age of girls, 2½ years.

11.—Boys school—five classes :—First class,—average number, 69, maximum, 10 years, minimum, 5 years; second class,—average number, 57, maximum, 13 years, minimum, 8 years; sequel class,—average number, 50, maximum, 10 years, minimum, 6 years; third class,—average number, 37, maximum, 17 years, minimum 8 years; fourth class,—average number, 36 years, maximum, 15 years, minimum, 9 years. Girls school—four classes :—First class,—average number, 35, maximum, 14 years, minimum, 5 years; second class,—average number, 30, maximum, 13 years, minimum, 7 years; third class,—average number, 29, maximum, 14 years, minimum, 7 years; fourth class,—average number, 30, maximum, 14 years, minimum, 8 years. Infants school—four classes :—First class,—average number, 36, maximum, 9 years, minimum, 6 years; second class,—average number, 51, maximum, 8 years, minimum, 5 years; third class,—average number, 35, maximum, 7 years, minimum, 4 years; fourth class,—average number, 87, maximum, 7 years; minimum, 2½ years.

12.—5 hours,—9 o'clock to 4 o'clock, 10 minutes recess at 10½, 12 o'clock to 2 o'clock recreation.

13.—Saturday in each week, two vacations in the year,—at Easter 6 days, at Christmas ten days, Anniversary of the Colony, and Queen's Birthday.

14.—293 days.

15.—9 months.

16.—No means of ascertaining.

17.—The minimum fees have been fixed at the following rates :—For two children, each 6d., for three or more, each 4d., for one in the family, 8d; reading books, stationery, and all other requisites, are provided without any additional expense to their parents.

18.—£631 17s. 0d. amount of school fees, £473 17s. 9d. distributed to teachers, £157 19s. 3d. purchase of school requisites, £732 0s. 0d. Government aid.

19.—Total amount, £1,363 17s. 0d.; 790 children, annual cost of each, £1 14s. 6½d.

20.—First class :—Reading and spelling, 2 hours; slate writing, 1 hour; elements of geography and grammar alternately, ½ hour; arithmetic, 1 hour; arithmetical tables ½ hour. Second class :—Reading and spelling, 1½ hours; slate arithmetic, 1 hour; elements of geography and grammar alternately, ½ hour; writing on paper, 1 hour; oral lessons on common things, ½ hour; arithmetical tables, ½ hour. Third class :—reading and Scripture lessons, 1 hour; grammar, etymology, syntax, ¾ hour; writing on paper, ½ hour; slate arithmetic, ¾ hour;

hour; descriptive and physical geography, 1 hour; mental arithmetic, $\frac{1}{2}$ hour; composition and singing alternately, $\frac{1}{2}$ hour. Fourth class:—Reading, 1 hour; grammar and geography alternately, 1 hour; arithmetic and composition alternately, 1 hour; Scripture lessons, $\frac{3}{4}$ hour; singing, writing in books, dictation alternately, $\frac{3}{4}$ hour; geometry and mensuration, $\frac{1}{2}$ hour.

21.—Books used in the school are those published by the Commissioners of National Education in Ireland; the number in use is quite adequate to the wants of the school.

22.—Globe, 2 maps of World, 3 maps of Australia, 2 maps of Pacific Ocean, 2 maps of Ancient World, 1 map of United States of America, 2 maps of Africa, 2 maps of North and South America, 1 map of British Isles, 2 maps of Europe, 2 maps of Palestine, 2 maps of Asia, 1 map of England, 1 map of Ireland, 1 map of Scotland, 4 diagrams of natural philosophy, 3 plates of animal kingdom, 3 plates of vegetable kingdom, 1 astronomical diagram, 2 plates of races of men, 52 natural history plates, 31 Scripture prints, 8 plates of the mechanical powers, prints of ships.

23.—Prevention of play, detention after the regular school-hours, and corporal punishment when necessary. Extracts from written instructions,—“Whenever it can be safely disused, therefore, the cane should be entirely abolished as an instrument of punishment.” It seems proper to restrict its use to extreme cases, such as wilful disobedience, or some really vicious action. “Degrading punishment should never be employed.”

24.—Public annual examination by the Inspector of Board of National Education, when rewards in books are distributed.

25.—By the Inspector of Board of National Education; periods and time of examination not fixed.

26 to 33.—William Sloman, Plymouth, England, 47 years; British and Foreign School Society, London, 2 years; 2 class, A division, November, 1855. Assistant teachers:—Frederick Bridges, Windsor, New South Wales, 20 years; Board of National Education, Sydney, 4 years; 2nd class, B division, July, 1857. Margaret Berry, Naas, Ireland, 28 years; Marlborough-street Model School, Dublin, 6 months; 3rd class, A division, February, 1857. Hannah Duffy, Sydney, New South Wales, 20 years; Board of National Education, 4 years; 2nd class, A division, May, 1857. Eliza Faulder, London, 20 years; Board of National Education, 4 years; 3rd class, October, 1856. Margaret O’Connell, Sydney, New South Wales, 20 years, Board of National Education, 4 years; 3rd class, July, 1856. Pupil teachers:—Luke Finigan, Shoalhaven, New South Wales, 17 years. John Sloman, Modbury, England, 16 years. William Alcock, Redditch, England, 14 years. James Meenen, Sydney, New South Wales, 14 years. Wilhelmina Roberts, Hobart Town, Tasmania, 18 years. Johanna Ryan, Thurles, Ireland, 17 years. Honoria Kenny, Sydney, New South Wales, 17 years. Margaret Foran, Dublin, Ireland, 15 years.

34.—Head teacher, £264; assistant teacher (male) £156; assistant teachers (female) £132, £96, £74, and £74 respectively.

35.—A proportionate amount according to salary of three-fourths of school fees.

36.—Head teacher, £420; assistant teacher (male) £240, female teachers, girls school, £182 and £114; female teachers, infants school, £168 and £150.

37.—Daily reading of Scripture lessons from Scripture extracts published by the Commissioners of National Education.

WATERLOO ESTATE.

1.—Waterloo Estate, Redfern.

2.—Wooden building, in good condition.

3.—1,377 square feet.

4.—4,419 square feet.

5.—Two distinct water-closets, with three seats each.

6.—One room containing 20,655 cubic feet.

7.—50.

8.—Six large windows and two back-doors.

9.—This school has been opened nearly four months, the average daily attendance is 50; 35 males and 15 females.

10.—Boys from 3 years old to 15; girls from 3 years old to 15.

11.—Four classes; one first class, two second, and one third. First class, ages from 3 years old to 7; second class, ages from 4 years old to 13; third class, ages from 7 years old to 15.

12.—Pupils attend 5 hours each day; school commences at 9, terminates at half-past 3; the intervening cessation, from 12 to half-past 1, is employed in eating and playing.

13.—Every Saturday is a holiday; there is a week’s vacation at Christmas, Midsummer, and Michaelmas.

14.—246.

15.—Opened 15th November, 1858.

16.—No statistics in the district to obtain the information from very transient population.

17.—First class pupils are charged 6d. per week, second class, 9d., and third, 1s.; no charge has as yet been made for books, copy-books excepted.

18.— } Opened 15th November, 1858.

19.— }

20.—Subjects to classes are reading, writing, arithmetic, geography, grammar, and singing. First class, hours daily,—reading, $2\frac{1}{2}$; writing, $1\frac{1}{4}$; arithmetic, $1\frac{1}{4}$. Second class, hours daily,—reading, $1\frac{1}{2}$; writing, $1\frac{1}{4}$; arithmetic, $1\frac{1}{4}$; geography, $\frac{1}{2}$; grammar, $\frac{1}{4}$; singing,

singing, $\frac{1}{4}$. Third class, hours daily,—reading, $1\frac{1}{2}$; writing, $1\frac{1}{4}$; arithmetic, $1\frac{1}{4}$; geography, $\frac{1}{2}$; grammar, $\frac{1}{4}$; singing, $\frac{1}{4}$.

21.—First class use the school sheets; second class use the 2nd and 2nd Sequel Irish National; third class use the 3rd I. N. R. B. small arithmetic grammar I. N. The present number of books is adequate to the wants of the school.

22.—Maps of the World, Asia, Africa, America; the Map of Australia has not yet arrived from Europe, expected soon; no others are needed.

23.—Kept in to tasks; in severe cases corporal punishment, *i. e.*, slaps on the hand with a cane.

24.—There have been no examination or prizes given as yet.

25.—No report on the state of school exists; the school is increasing in number, and improving in character.

26.—James Gray.

27.—No assistants or pupil teachers; three monitors, who are changed weekly.

28.—James Gray, Dublin.

29.—James Gray, aged 34.

30.—15th November, 1858.

31.—Trained as a teacher.

32.—Borough Road, London; six months; no certificate.

34.—Head teacher, £60 per annum; monitors, nothing.

35.—Fees, £1 2s. per week; no other allowances or emoluments.

37.—Moral instruction, derived from the National School general lesson and similar subjects, given by the head teacher. Rev. Joseph Beazley, Independent Minister, visits for purposes of inspection.

No. 3.

THE SECRETARY TO THE NATIONAL EDUCATION BOARD to THE UNDER SECRETARY.

National Education Office,

Sydney, 29 April, 1859.

SIR,

Referring to my letter No. 495, of date 22nd March last, forwarding Returns of seventy-three National Schools as therein mentioned, I now do myself the honor to forward, as per Appendix, Returns of thirty-two additional schools which, with the others already furnished, will amount to one hundred and five, being the whole of the schools under the superintendence of the Board from which Returns are required for the information of the Legislative Council in accordance with your letter dated 17th December, 1858.

I have, &c.,

THE UNDER SECRETARY,
Colonial Secretary's Office.

W. C. WILLS,
Secretary.

APPENDIX.

LIST of Returns of Schools referred to in the letter of the Board of National Education, No. 737, of date 29th April, 1859.

No. 73 brought from Appendix to Board's letter, No. 495, of date 22nd March, 1859.

Secretary.

BROOKFIELD.

BROOKFIELD.

- 1.—Brookfield.
- 2.—Of wood; fair; roof needs repairs, slabs require re-fixing, and two schoolrooms want plastering.
- 3.—672.
- 4.—4,700.
- 5.—None.
- 6.—Room No. 1, 448 superfic. sq. ft., 4,032 cubic ft.; room No. 2, 224 superfic. sq. ft., 2,016 cubic ft.
- 7.—Room No. 1, 22; room No. 2, 10.
- 8.—Room No. 1, three windows and two doors; room No. 2, two windows and two doors.
- 9.—38; males, 14; females, 12.
- 10.—Males, maximum 12, minimum $2\frac{1}{2}$; females, maximum 13, minimum $2\frac{1}{2}$.
- 11.—Three. 1st class, 14; 2nd class, 9; 3rd class, 3. 1st class, maximum 9, minimum $2\frac{1}{2}$; 2nd class, maximum 12, minimum 4; 3rd class, maximum 13, minimum 7.
- 12.—Five. 9 A.M. Summer, 4 P.M. Winter, 3-30 P.M. From 10-30 to 10-40 A.M., recess; from 12 to 2 P.M. in Summer, and from 12 to 1-30 P.M. in Winter, recreation.
- 13.—One; one, 10 days, Christmas.
- 14.—252.
- 15.—Six months.
- 16.—40.
- 17.—3d.; 2s.; 14s. 6d.
- 18.—£13 13s. 11d, appropriated by teacher; £120; £133 13s. 11d.
- 19.—£3 14s. $3\frac{1}{4}$ d.
- 20.—1st class, reading $1\frac{3}{4}$ hours, writing $1\frac{3}{4}$ hours, arithmetic $1\frac{1}{2}$ hours; 2nd class, reading $1\frac{1}{4}$ hours, writing and dictation $1\frac{1}{4}$ hours, arithmetic $1\frac{3}{4}$ hours, grammar and geography on alternate days $\frac{3}{4}$ hour, object lessons once a week instead of grammar lesson $\frac{3}{4}$ hour; 3rd class, reading $\frac{3}{4}$ hour, writing and dictation $\frac{3}{4}$ hour, arithmetic $1\frac{3}{4}$ hours, Scripture lessons 1 hour, grammar and geography on alternate days $\frac{3}{4}$ hour, object lessons once a week instead of grammar lesson $\frac{3}{4}$ hour; needlework to females 1 hour daily, taken from time allotted to arithmetic.
- 21.—1st class, Irish National School 1st book; 2nd class, ditto 2nd book, ditto 1st book arithmetic; 3rd class, ditto sequel to 2nd book, ditto 1st book arithmetic, ditto English grammar, ditto Scripture lessons N. T. No. 1, Sullivan's introduction to geography. Fair. Other books not needed. Adequate.
- 22.—3 Darton's prints of animals, viz., birds, wild quadrupeds, and domesticated and British wild quadrupeds; 5 maps, viz., the World, Europe, America, Australia, and Scotland; and 1 writing board. Good. An easel is needed.
- 23.—Moral influence, and corporal punishment with cane. No written or other instructions on this subject.
- 24.—Pupils are examined once a year, by the teacher, with reference to their progress; no prize or other rewards are given.
- 25.—School is officially inspected by Mr. McIntyre, Organizing Master, twice or thrice a year; time occupied in inspection from one to three hours. For report on state of school, reference to be made to the Board of National Education. The parents of pupils are nearly all occupied in farming pursuits; the children are constantly kept at home; the teachers have not a fair opportunity of bringing on their pupils, and are otherwise placed very disadvantageously. The school fees being payable weekly, instead of quarterly, encourages the great irregularity of attendance.
- 26.—Augustus New Hallifax.
- 27.—Mercy Hallifax.
- 28.—England.
- 29.—Teacher 35, assistant teacher 22.
- 30.—November, 1853.
- 31.—Trained.
- 32.—At Model National School; two months; holding certificate of 2nd Class, section A.
- 33.—Ten years previous experience in teaching. None.
- 34.—£108.
- 35.—£13.
- 36.—£121.
- 37.—Religious and moral instruction is given as prescribed by the Board of National Education, and as contained in the Scripture lessons and other reading books used in the school, daily, by the teacher. Not visited by any Clergyman or Minister of Religion. For titles of books used for such purpose refer to paragraph 21.

AUGS. N. HALLIFAX,
Teacher.

BLANEY.

- 1.—Blaney, in the Police District of Bathurst.
- 2.—The schoolhouse is a temporary one; it is built of slabs, plastered inside, and thatched; it is not weatherproof.
- 3.—The number of superficial square feet in the schoolroom is 399; in the sitting-room, 156; in the bedroom, 120.
- 4.—The land adjoining the school is unenclosed and an open bush.
- 5.—There are no water-closets provided for the use of the pupils or the teachers.

6.—The number of superficial square feet in the one schoolroom is 299; calculating from the floor to the wall-plate of the room, there are 2,392 cubic feet in it; there is no ceiling, and the height from the wall-plate to the ridge of the roof is six feet.

7.—Calculating for six months (about which time the school has been in existence), the average number of pupils in the room has been 32; the scholars assemble in one room.

8.—There is no provision of any kind made for the ventilation of the schoolroom except by the doors, and there is no fireplace.

9.—As the school has not been in existence for a year, an annual average cannot be given; the average number of males who have attended for the time is 16; of females, 15.

10.—Maximum age of males, 16 years; minimum age of males, 3 years. Maximum age of females, 17 years; minimum age of females, 3 years.

11.—The school is divided into three classes. The average number in the first class has been 25; in the second class, 22; in the third class, 11. The maximum age in the first class is 14 years; in the second class, 17 years; in the third class, 14 years. The minimum age in the first class is 3 years; in the second class, 8 years; in the third class, 10 years.

12.—The pupils attend the school for five hours each day. In the forenoon the school duties commence at half-past nine o'clock and terminate at half-past twelve; in the afternoon the school duties commence at two o'clock and terminate at four o'clock; the interval is passed in dining and recreation.

13.—Saturday and Sunday are holidays in each week; there are no half-holidays; the only vacation there has been in this school was one week at Christmas.

14.—This school was opened on the 23rd of August, 1858; and since that day to the 25th of March, 1859, 150 days were appropriated to school duties.

15.—This school has been in existence for so short a period that a calculation cannot be made.

16.—In a circuit within two miles of the school, the number of children who do not attend it may be between 20 and 30.

17.—The weekly sum charged to each pupil is fifteen pence; the annual charge for books is two shillings and two-pence; and the total annual charge for each pupil is £3 7s. 2d.

18.—As the school has been in existence for so short a period no return can be made.

19.—No return can be made, for the reason mentioned in No. 18.

20.—1st class—reading, writing, arithmetic, and transcription; 2nd class—reading, writing, geography, English grammar, dictation, arithmetic; 3rd class—reading, writing, geography, English grammar, dictation, composition, arithmetic; grammar and geography are taught on alternate days; three-quarters of an hour are allotted to each subject in each day.

21.—In the 1st class the first book of lessons is used; in the 2nd class, the second book of lessons and the sequel to it are used; in the 3rd class, the third book of lessons is used; grammar and geography are taught orally, by the use of maps and a black-board; Scripture lessons are read on alternate days, for three-quarters of an hour; the condition of the books is good, and the number at present in use is adequate to the wants of the school; all the books are sanctioned by the Board of National Education.

22.—There are two maps—one of Europe, and another of the World; likewise a black-board and slates; their condition is good; all the other maps used in schools, except those mentioned above, are needed—especially one of Australia.

23.—The children are corrected chiefly by confinement, occasionally by corporal punishment; the discipline of the school is so well maintained that correction of any kind is seldom resorted to; the teachers have received no instruction from any parties on this subject.

24.—The school was examined once by Mr. M'Cann—one of the Inspectors employed by the Board of National Education; no prizes or other rewards of merit have been yet given.

25.—The school has been officially visited by Mr. M'Cann, the Inspector; it has been examined once, and two days were occupied in the examination; some of the Local Patrons also visit the school; there is no copy of any report on the state of the school left with the teachers.

26.—William Chisholm.

27.—There are no assistant teachers, pupil teachers, or monitors, attached to the school, except the teacher's wife.

28.—Birthplace of the teacher and of his wife is Inverness in Scotland.

29.—Age of teacher, 39 years; age of his wife, 29 years.

30.—28th of July, 1858.

31.—Trained at the Model School, Fort-street, Sydney, for one month.

32.—I possess the second class, section B, of certificate of competency.

33.—I was educated at the Royal Academy of Inverness, and afterwards at the University of King's College, Aberdeen; for three years I was head master of the Grammar School at Goulburn, and for thirteen years previously I was engaged as private tutor in different families.

34.—The teacher and his wife receive £108 yearly; there are no assistants of any kind.

35.—Fifteen-pence is fixed as the weekly fee for each pupil; there is likewise a free residence for the teachers.

36.—As the school has not been in existence for a year an annual estimate cannot be given.

37.—Religious and moral instruction is given by the teacher, for one hour a day on two days each week, from the Scripture lessons authorized by the Board of National Education; the school has not been as yet visited by any Clergyman for the purpose of examining any of the scholars. Books used for religious and moral instruction are—Scripture lessons, Old Testament, Nos. 1 and 2; Scripture lessons, New Testament, Nos. 1 and 2.

BOW BOW.

- 1.—Bow Bow Creek, near Tinonee.
- 2.—Day school, slab and shingle, building new; night school, slab and bark, in good condition.
- 3.—Day school, 465 square feet; night school, 360 square feet.
- 4.—Day school, 43,560 square feet.
- 5.—There are none at present.
- 6.—Day school, 4,650 cubic feet; night school, each room, 960 cubic feet.
- 7.—Day school, 17 pupils; night school, 9 pupils.
- 8.—Both amply ventilated.
- 9.—Cannot tell as yet.
- 10.—Day school—minimum 5, maximum 16; night school—minimum 12, maximum 22.
- 11.—Day school, 3 classes, average 6 each; night school, 2 classes, average 5 each.
- 12.—Five hours daily at day school, commencing at 9 A.M., and closing between 3 and 4 P.M., with an hour's recreation at mid-day; three hours at night school, from 6 to 9 P.M.
- 13.—Half-holiday every Saturday.
- 14.—Cannot say as yet.
- 15.—Day school, 5 hours; night school, 3 hours.
- 16.—Ten.
- 17.—8d. for a single child, and 4d. for every subsequent child of same family; charge for books not fixed; 7 pupils are instructed gratis, being too poor to pay.
- 18.—Unable to say as yet.
- 19.—Unable to say as yet.
- 20.—

2 to 3	Scripture lessons	Read	Arithmetic

Half-holiday on Saturday.

Night school—with the exception of Mondays and Thursdays, when reading is exchanged for Scripture lessons, each class reads, writes, and ciphers alternately.

21.—Only such books as were despatched by the Board are in use; a list of them is enclosed.

22.—No maps, &c., received.

23.—By confinement and impositions; profane language and direct insubordination by corporal punishment.

24.—Cannot say as yet.

25.—By the Local Patron and Magistrate.

26.—Samuel Edmonstone Plumb.

27.—None.

28.—Kensington, near London.

29.—30 years and six months.

30.—Monday, 14th February, 1859.

31.—Not.

32.—Ex-student of University College, London.

33.—A Commissioned Officer of the 6th Regiment Bengal Native Infantry, of the H. E. I. C. S.

34.—

35.—About £30 a year.

36.—

37.—That supplied by the Board; twice a week by the teacher.

BLACK CREEK.

- 1.—Black Creek, Parish of Braxton, Police District of Maitland.
- 2.—Wood and mortar, commonly called a slab building; material chiefly wood, and in good condition for term of lease.
- 3.—About 500 superficial square feet contained in area of schoolhouse or building.
- 4.—About 2,420 square yards contained in land adjoining the school for the use of the pupils.
- 5.—Two wooden houses used as water-closets by the pupils, situated on the ground, in good repair, &c.
- 6.—About 312 superficial square feet, and 3,744 cubic feet, contained in the one room appropriated for teaching.
- 7.—The average number of pupils usually assembled in the one room is 32.
- 8.—There are two doors, two windows, and one chimney in the above room, for ventilation.
- 9.—The average number on the books is—males, 33; females, 17. The average number attending the school is—males, 22; females, 11.
- 10.—The maximum and minimum ages of the pupils in the school are—males, 14 to 4; females, 13 to 3.
- 11.—The school is divided into two classes, the average number attending in first class is 26, and that in second class is 7. Maximum and minimum ages in first class are 11 to 3; and, in second class, 14 to 8.
- 12.—The hours of attendance of the pupils each day are 5, from 9 A.M. to 12 o'clock, and from 2 P.M. to 4 P.M.; an interval of two hours, from 12 to 2 P.M., for dinner, &c.
- 13.—The only holiday given in the week is Saturday; and for the vacations, one week at Easter, one week at Midwinter, and one week at Christmas.
- 14.—The total number of days appropriated to school duties in the year is 240.
- 15.—This return cannot be rendered owing to the school having been so often closed.
- 16.—The number of children in district or locality, between the ages of 5 and 15 years, may be from 15 to 20, who do not usually attend school.
- 17.—The weekly charge to each pupil for instruction is 6d., except in some cases where there are more than two in a family. No charge is made for books.
- 18.—The amount of the school fees received from the pupils for the half-year ending the 31st of December, 1858, was £19 7s. 5d., and the same appropriated to the support of the teacher, together with the sum of £27 received from the Board of Education. Total amount received, £46 7s. 5d.
- 19.—The annual average cost of the education of each pupil is about £2 17s.
- 20.—The following is the time table used in the school,—class A, junior division, includes pupils in first and second classes; class B, senior division, includes pupils in sequel class.

TIME TABLE.

	Reading.	Writing.	Arithmetic.	Geography.	Grammar.	Object lessons.	Tables, &c.	Lessons on form.	Examined subjects.	Mental arithmetic.	Dictation.	Scripture history.
	Hours	Hours	Hours	Hours	Hours	Hours	Hours	Hours	Hours	Hours	Hours	Hours
CLASS A.												
Monday	1½	1½	1½	1½	...	1	1
Tuesday	1½	1½	...	1½	1½	1
Wednesday	1½	1½	1½	1½	1½	1
Thursday	1½	1½	1½	1½	...	1	1
Friday	1½	1½	1½	1
Total....	5½	3¾	1½	2½	2	3	1¾	5
CLASS B.												
Monday	1¾	1	3/4	1	1	1
Tuesday	1	1	1	1	1	1	1
Wednesday	1¾	1	1	1	1	1	1	1
Thursday	1	1	1	1	1	1	1
Friday	1	1	1	1	1	1
Total....	5¼	1½	5	2½	2½	1	1½	¾	1	5

The total number of hours of attendance daily is 5.
Do. do. weekly, 25.

- 21.—The books in present use in the school are the first, second, and sequel books of lessons, English grammar, introduction to and compendium of geography, first book of arithmetic, and English dictionary. The books are in good condition, with the exception of two or three copies, and are adequate to the present wants of the school.
- 22.—The school is furnished with sets of tablet lessons on the first book, one map of the World, and black-board. Maps of Australia and Europe much needed, and any others habitually supplied by the Board thankfully received.
- 23.—The system of correction usually employed to preserve discipline is either by tasks after school-hours or by gentle corporal punishment. No written or other instructions from the Board or any of its officers on the subject.
- 24.—The pupils were examined once during the half-year; the school was not furnished with books, &c., till the end of September.

25.—The school has been visited occasionally by the Local Patrons, and once as stated above by the Organizing Master, Mr. William M'Intyre, on the 1st of October, 1858, who left a minute in the report book, stating that he had visited the school and found 37 pupils present. The whole was occupied. The school having been so neglected previous to its re-opening in June, that the teacher found the pupils extremely deficient, but trusts they are now progressing.

26.—Name of teacher, Henry Barber.

27.—No assistant teachers, monitors, &c., attached to the school.

28.—Birthplace of teacher, London.

29.—Age of teacher, 42.

30.—Date of appointment to present office, June, 1858.

31.—Not trained as a teacher.

32.—None.

33.—Three years experience in Morpeth and neighbourhood as private tutor. Occupation before adopting that of a teacher, mercantile—partly in England and in France.

34.—Annual salary at present received by the teacher at the rate of £54, or £4 10s. per month.

35.—Fees received in the half-year ending December, 1858, £19 7s. 5d.

36.—Total annual income at present derived from the school by the teacher is at the rate of £92 14s. 10d.

37.—No religious or moral instruction, but by the teacher, and that derived from the Scripture history used in the school.

BISHOPSGATE.

1.—The school is situated in Francis-street.

2.—The schoolhouse has a stone foundation, and brick walls; it has a shingled roof, and hardwood floor; it is ceiled; it is in good condition. I am not aware that it requires either repairs or improvement.

3.—The superficial area of the schoolhouse is 980 square feet.

4.—The superficial area of the land adjoining the schoolhouse for the use of the pupils is 950 square feet.

5.—There are two water-closets for the use of the pupils, one for boys and one for girls; the access is separated by a partition six feet high. The soil requires removing.

6.—The schoolhouse consists of one room, the cubical measurement of which is 17,640 feet.

7.—The number of children usually assembled in the schoolroom is 53.

8.—The schoolroom is ventilated by means of two doors, ten ventilators in eight windows, and seven small ventilators in the ceiling.

9.—The school has not been in existence a year.

10.—The maximum age of boys, 16 years; ditto of girls, 15 years—the minimum age of boys, 4 years; ditto of girls, 3 years.

11.—The school is divided into four classes:—1st class, average number 26, maximum age 9 years, minimum age 3 years; 2nd class, average number 17, maximum age 11 years, minimum age 5 years; 3rd class, average number 16, maximum age 14 years, minimum age 7 years; 4th class, average number 6, maximum age 16 years, minimum age 8 years.

12.—We have five hours each day for secular instruction. Lessons commence at 9.10 A.M., and continue until 12.10, when they are suspended for dinner and recreation, which are had during one hour and twenty minutes. Lessons are resumed at 1.30, until 3.30 P.M.

13 and 14.—The school has not been in existence a year.

15.—The school has not yet furnished data for such calculation.

16.—The number of children between the ages of 5 and 15 years in the neighbourhood not attending the school, I believe, exceeds 400.

17.—The weekly amount charged for each pupil, as school fees, is 8½d.; for books, ½d.; total 9d.

18.—The school did not exist on the 30th September, 1858.

19.—The school has not existed a year.

20.—The several subjects taught in each class, and the precise portion of time allotted to each of such subjects are as follows, the time being stated in minutes:—

FIRST CLASS.						SECOND CLASS.

21.—The books used in the school are those published by direction of Commissioners of National Education in Ireland. They are in good condition, and quite adequate to the wants of the school. They are used as follows:—1st class, first book of lessons; 2nd class, second book and Scripture lessons No. 3; 3rd class, third book and Scripture lessons Nos. 3 and 4; 4th class, fourth book and Scripture lessons Nos. 1 and 2, also Henry's first Latin book. I am not aware that we require any other books.

22.—We have neither prints, diagrams, nor instruments in the school. We have a globular map of the World, and separate maps of Europe, Asia, Africa, North America, South America, England, Ireland, Scotland. The above are mounted, and in fair condition. A map of Australia has been ordered, but not yet obtained. We have also a black-board and easel, a mapstand, and nine desks. We need a black-board, and some drawing instruments, also some diagrams on natural philosophy, and a few sheets on natural history.

23.—Regularity of attendance is sought by means of notes addressed to the parents of irregularly-attending pupils. Punctuality is sought by detaining pupils for late attendance during the noon recess, or after school is dismissed in the evening. For disorderly conduct pupils are detained as above, or striped on the hand. I have not received any official instructions in reference to discipline.

24.—The school has not been in existence a year.

25.—The school is officially visited by W. Wilkins, Esq., Inspector and Superintendent of National Schools. It was visited by W. Wilkins, Esq., on the 9th March, 1859.

26.—James Buckland is the head teacher of the school.

27.—Mary Jane Ireton is a pupil teacher in the school.

28.—James Buckland was born in England; Mary Jane Ireton was born in Ireland.

29.—James Buckland is 34 years old; Mary Jane Ireton is 19 years of age.

30.—James Buckland appointed 4th Nov., 1858.

31.—James Buckland has been trained as a teacher; Mary Jane Ireton is under training.

32.—Trained at York-street Wesleyan Model School during the period of ten months; also at the National Model and Training School, Fort-street, during the period of six weeks. Certificate A, Section 3.

33.—James Buckland has been trained.

34.—James Buckland's monthly salary, £8.

35.—Fees, £9 10s. 9d. per month.

36.—The school has not been in existence a year.

37.—Religious instruction is given at 9 A.M., during ten minutes each day. Similar instruction is given on Friday in each week, from 3.30 until 4 P.M. The New Testament only is used. The instruction has been given by the teacher.

BOWNING.

1.—Bowning, Police District of Yass.

2.—The materials of which the school is constructed are chiefly of bricks; the school-house in a most dilapidated state.

3.—The area of the school building is about one hundred and ninety-two square feet.

4.—The land adjoining the school consists of about two acres, but not fenced in.

5.—No water-closet provided.

9.—The numbers on the class roll are 12 boys and 6 girls; the average of boys daily 6.6; girls, 3 daily.

10.—Their ages are from 3 to 15.

11.—The school is divided into two classes—the first class from 3 to 11 years; the second class from 7 to 15 years.

12.—The number of hours during each day the pupils attend,—from 9 in the morning until 12 at noon; and from 2 P.M. until 4 P.M.

13.

- 13.—No holidays, except a week at Christmas.
 17.—The weekly sum charged to each pupil for instruction is from sixpence to one shilling.
 18.—The amount of school fees received from the 29th November last, until the 1st March, 1859, was 15s. 6d.
 20.—The subjects of instruction are reading from 9 to 9 $\frac{3}{4}$ first class, second class writing; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$ first writing, second class reading; thence to 11 $\frac{1}{4}$ first class arithmetic, second class grammar; from 11 $\frac{1}{4}$ to 12 first class grammar, second class arithmetic. Recreation from 12 to 2. From 2 to 3 $\frac{1}{2}$ first class reading, second class writing; 3 $\frac{1}{2}$ to 4 singing.
 21.—Books used in the classes are the first book of lessons, sequel to the second book, English grammar, compendium of geography, and New Testament, No. 1.
 22.—No maps or other school apparatus for use.
 23.—The correction employed in the school,—only firmness and gentle means.
 25.—The school was visited by Mr. M'Cann, from the National Board of Education, in December last.
 30.—Received the appointment on the 14th November last.
 35.—The fees, 15s. 6d., with no other emolument except the yearly salary of £84.

JAMES SINCLAIR,
Master.

CORDER.

- 1.—National School, Corder, Parish of St. John, District of Camden, Picton, and Narellan.
 2.—Brick building, in good condition.
 3.—832 square feet.
 4.—One acre of ground.
 5.—Two—boys and girls; brick building, in good condition.
 6.—832 square feet, and 11,648 cubic feet.
 7.—40 the average number.
 8.—Six windows, which open from the top.
 9.—Average half-yearly attendance, (the time the school has been under the National System) boys, 21; girls, 29.
 10.—Ages of the whole school—

	Maximum.	Minimum.

- 12.—Five hours—five minutes are allowed for play between the hours of 10 and 11 o'clock; from 12 to 2, dinner and recreation. Commencing at 9 A.M., and ending at 4 o'clock P.M.
 13.—Saturday, weekly; a fortnight is allowed at Christmas, and a week at Easter.
 14.—No. of school days, 245.
 15.—The average time of attendance may be taken at 3 years.
 16.—About 30 who do not attend.
 17.—The sum charged for each child, quarterly, is 7s.—6s. 6d. fees, and 6d. for a book fund.

18.—	Amount of fees	£17	0	10
	Book Fund	0	17	6
	Master's salary	15	0	0
		£32 18 4		

The amount of fees received during 3 months ending 30th September, 1858 (the time the school has been under the National System); the fees and salary are appropriated to the Master's use.

- 19.—Average cost of each child for 3 months ending September 30th, 1858, 12s. 6 $\frac{3}{4}$ d.
 20.—
- | | |
|------------------|-----------------|

| Grammar | 3 $\frac{3}{4}$ |

25 Hours.

21.—National School books of Ireland—first, second, and third books ; Scripture lessons from Old and New Testaments. No books are required.

22.—Map of the World, black-board, and spelling cards, all in good condition ; maps are required.

23.—To detain the children after school-hours ; no directions.

24.—By the teacher, weekly.

25.—The school has not been officially visited.

26.—James Humphreys, age 42.

27.—Winifred Humphreys, age 34.

28.—The birthplace of each—England.

30.—June 1st, 1858.

31.—Not trained.

33.—Eleven years. A baker.

34.—
 Master's salary..... £15 0 0
 Average fees..... 17 0 10

£32 0 10

The amount for 3 months.

37.—No instruction given, and no books are used. By the Revd. W. C. Rigg, Wesleyan Minister.

CAMPSIE.

1.—In the District of Paterson.

2.—The building is in a very dilapidated state, and composed of slabs let in the ground ; the roof also is in need of repair.

3.—350 superficial feet contained in area of the school building.

4.—9,680 square yards in the ground adjoining, for the use of the pupils, not enclosed.

5.—These conveniences were provided by ourselves, composed of large saplings sunk into the ground and secured by rails at the top, and covered in with bark, over an excavation of 72 cubic feet. Estimated value of labor in erecting this building, £2.

6.—350 superficial, and 2,450 cubic feet.

7.—14 average number usually assembled.

8.—The slabs are so arranged as to admit free ventilation on all sides, with light also through the roof.

9.—The annual average number on the books, and attending school, is 10 boys and 13 girls ; total, 23.

10.—The oldest boy is 14, and the oldest girl is 14.

11.—Three classes ; average in first class is 8, in second is 8, third class is 7. Age, first, from 5 to 6 ; second, from 6 to 10 ; and, third, from 10 to 14.

12.—5 hours daily, viz. :—From 9 to 12 A. M., and from 1 to 3 P. M. ; recess, from 12 to 1. The above period is employed in accordance with the prescribed regulation of the time table.

13.—No holiday, except on Saturdays. The school is only vacated for one week, at Christmas, during the year, and Good Friday.

14.—251 days of actual duty.

15.—Three years.

16.—The number of children in the District not attending are—boys, 21 ; girls, 21 ; total, 42.

17.—The annual charge made to some of them is nil, others will pay in pumpkins, &c., something to the amount of 3s. per quarter, and two families are charged as much as 6d. per week for each child ; these last pay also 6d. per quarter towards the book fund, the others 3d.

18.—The late Patron of the school paid up to the time he left 1s. per week for each of his family, which accounts for the large amount received during the past year,—£16 4s. 6d., and 18s. for the books. The latter amount is credited to calico account, nails, glass, &c., required for the schoolhouse ; no other moneys received, Government salary excepted. Total amount received, £113 2s. 6d.

19.—Cost of each pupil, £4 18s. 4d.

20.—From 9 till 9½, writing ; 9½ till 10½, reading ; recess, 5 minutes ; 10½ till 11½, sums ; 11½ till 12, grammar ; recreation, from 12 till 1 P. M. ; 1 till 1½, geography ; 1½ till 2, Scripture reading ; 2 till 2½, sums ; 2½ till 3, mental arithmetic. The same routine alternate days throughout the week.

21.—The first book used in first class, second book in second, and third in the third class ; the two latter use also grammar, geography, and ciphering books. A supply of first and second books is required, also a sum book ; all others are in good condition, and plenty of them.

22.—A map of Australia, and a map of Europe.

23.—The same system as observed at Fort-street.

24.—The school has been visited twice by the Local Patrons.

25.—The Sub-Commissioner has visited twice ; first examination lasted five hours ; the last time he came after our time for closing the school.

26.—George May Lee.

27.—Helen Lee, teacher of needlework.

28.—G. M. Lee, Wills, Somersetshire.

29.—Helen Lee, aged 42 ; G. M. Lee, 49.

30.—Appointed as teacher, June, 1852, but had been engaged in schools 5 years previously.

31.—Trained at the Model School, Fort-street.

32.—Three months; third class certificate.

33.—Original profession, surgeon and apothecary.

34.—Annual amount of salary, £96, now reduced to £84.

35.—£17 2s. 6d.

36.—£113 2s. 6d., total amount of income.

37.—We are not visited by any official in religion, but our Scripture lessons are daily read in the school.

G. M. LEE.

COWRA.

1.—Township of Cowra, Parish of Cowra, Police District of Carcor, County of Bathurst.

2.—The building is entirely constructed of wood, with bark roof. Not in good condition, repairs being necessary.

3.—The school is situated on an open reserve.

4.—The playground consists of many acres surrounding the schoolhouse.

5.—The water-closets are only now being erected.

6.—There are two rooms for the use of the school, the second being a parlor attached to the schoolroom which is sometimes used as a classroom. The schoolroom contains 464 superficial square feet, 7,048 cubic feet; the classroom contains 144 superficial square feet, 1,728 cubic feet.

7.—The larger room is the place in which the pupils generally assemble. The average number for the year ending September 30, 1858, was 40.

8.—There are 4 windows in the schoolroom, affording sufficient ventilation.

9.—Annual average number on the rolls:—Boys, 20; girls, 22; total, 42. Average daily attendance:—Boys, 18.6; girls, 21.4; total, 40.

10.—Maximum age, boys, 19 years; minimum age, 5 years. Maximum age, girls, 16 years; minimum age, 5 years.

11.—There are 3 classes in the school; the pupils are classified according to their attainments. The average number of pupils in the 1st class is 11; maximum age, 12 years; minimum age, 5 years. The average number in the 2nd class is 15; maximum age, 9 years; minimum age, 6 years. The average number in the 3rd class is 16; maximum age, 19 years; minimum age, ten years. Total, 42.

12.—The attendance of the pupils is 5 hours each day—from 9 A.M. till 4 P.M. An interval of two hours allowed, from 12 noon to 2 P.M., for dinner and amusement on the playground.

13.—The school is closed on Saturday. The vacations for 1858 were two—1 week each—Christmas and Easter.

14.—The total number of days appropriated to school duties during the year, 244.

15.—The school has not been in existence long enough to conclude the average length of the period during which pupils remain in the school; but it is to be regretted that many parents (in the bush) send their children to school for 6, or, perhaps, 12 months, believing that in that space of time they will, or should, become excellent scholars. One reason for this may be, that the services of the children do really become of great value, even at an early age.

16.—There are not more than three children between the ages of 5 and 15 in the township who do not, or have not, attended the school.

17.—The sum charged to each pupil is £1 per quarter. There are many scholars in the school who are not charged, either from their parents being poor, or from the great wish they have to expend all they possibly can in getting strong drinks. It is to be regretted that there are many children of the above class who would never, perhaps, have become acquainted with scholastics had they not been wrung out of the hands of their parents on the above terms. Two shillings per annum is charged to each pupil for books, as directed by the Board of National Education. The total amount per annum is £4 2s. each pupil.

18.—From the time the school became connected with the Board of National Education to the 30th September, 1858, the sum received was £42. The fees are appropriated to the teacher's credit or advantage. The teacher's salary from the Board of National Education for three months ending 30 September, 1858, was £15; book fund, £1 1s.—£58 1s.

19.—Average from the above total, £5 16s. 1d.; actual average of each pupil as the school is at present, £3 9s.—including those who do not pay.

20.—The first class is instructed in reading, writing, and arithmetic, with object and other lessons; second and sequel classes, in addition to the above, grammar and geography; third class, composition, book-keeping, and music; needlework to all the girls; three-quarters of an hour is the time allotted to each subject.

21.—The books used in the several classes are,—first book of lessons, second ditto, sequel to second book No. 1, sequel to ditto No. 2, third book of lessons, fourth ditto, English grammar, arithmetic—theory and practice, book-keeping, Sullivan's English dictionary, spelling-book superseded, geography generalized; in good condition, with the exception of the first books of lessons which is much worn; the numbers in use are sufficient for the present wants of the school. Although the books, as far as numbers are concerned, are adequate to the requirements of the scholars, they are certainly not of the character best adapted to our Australian rising generation, being books written expressly for our Home children.

22.—The maps used in the school are,—the World, Europe, and the British Isles; in good condition. It will be seen from the above list that the school is very scantily supplied with maps, or indeed any kind of apparatus, a black-board being the only article that can be added to the above list; other maps are much needed, such as Asia, Africa, and America, also maps of a more Australian character are much required, as those imported do not meet the necessity of this Colony efficiently. Prints of birds and beasts would be a great benefit to the school, as also a frame with balls for arithmetical calculations for the younger classes.

23.—No corporal punishment is inflicted in this school. Where good discipline is kept up very little correction will be found necessary, but, little as that may be, it is always of the greatest importance to the school to punish when the slightest fault has been observed; great nicety is often required in correction, as for instance,—if a child really loves the school such an one would not, perhaps, willingly offend, and requires to be dealt with as the offence deserves and not as it always appears. The great secret of punishing with effect lies with those only who study well the disposition of the pupils under their charge, and who are looked up to as an example by them,—from such a teacher a word, nay, even a look will often have the desired effect. No instructions on this subject have been given from any Official Visitor, Inspector, or Manager.

24.—The school was examined three times during the year, once by W. Wilkins, Esq., Superintendent of National Schools; twice by B. H. McCann, Esq., Organizing Master of National Schools. Prizes have been awarded quarterly for efficiency in the different branches of learning. The rewards given were books suitable to the ages and tastes of the pupils; also, the girls are rewarded with their work.

25.—The school has been visited by the Inspectors appointed by the Board of National Education; four days were occupied in the three examinations. The school was inspected also by A. Lynch, Esq., who reported thereon in the public papers; copies of reports have not been furnished to the teacher.

26.—Name of teacher—Maria Rigant.

27.—No assistant teachers attached to the school.

28.—Birthplace of teacher—London, England.

29.—Age of teacher—27 years.

30.—Date of appointment—1st July, 1858.

31.—Not specially trained.

33.—Five years experience in teaching previous to undertaking present appointment; classified as Class III., Section A.

34.—The salary from the Board of National Education during 1858 was £60, but now it is £72 per annum.

35.—The fees from the pupils during the part of the year the school was connected with the Board of National Education was £43 1s.

36.—The total income for the part of the year ending 30 September, 1858, was £58 1s.

37.—Religious instruction is given daily by the teacher; the lessons being such as may be drawn from the books sanctioned by the Board of National Education; no Ministers or Clergymen residing within a distance of thirty miles of the school.

MARIA RIGANT.

COBBITY.

1.—Non-vested National School, Cobbity Paddock, Parish of Saint John's, District of Camden, Picton, and Narellan.

2.—Slabs and shingles.

3.—21 × 13 = 273 square feet.

4.—4,840 square yards.

5.—None.

6.—Superficial square feet, 273; cubic, 2,457.

7.—4 sash windows.

8.—35 pupils.

9.—Average yearly attendance: Boys, 18; girls, 17.

10.—Ages of the whole school: Maximum, girls, 13; boys, 14. Minimum, girls, 4; boys, 3.

11.—Boys, 1st class, maximum, 8; minimum 3. 2nd class, maximum, 11; minimum, 7. 3rd class, maximum, 11; minimum, 4. Girls: 1st class, maximum, 9; minimum, 4. 2nd class, maximum, 11; minimum, 6. 3rd class, maximum, 12; minimum, 7.

12.—Five hours; ten minutes are allowed for play between 10 and 11 o'clock; from 12 to 2 o'clock, dinner and recreation; commencing at 9 A.M.; closing at 4 P.M.

13.—Saturdays, a fortnight at harvest, Christmas week, and a week at Easter.

14.—Number of school days, 240.

15.—4 years.

16.—The locality abounds in settlers; the Registrar has not supplied the number; had he done so I could have forwarded this return 14 days earlier; I think 30 children do not attend.

17.—The amount charged for each child, quarterly, is 7s.; fees, 6s. 6d.; book fund, 6d.

18.—The school was established July 1st, 1858; not established 12 months; 30th September, 1858, may be estimated; fees, £40; £4; £60; total, £104.

19.—Average annual cost of each child, £2.

20.

20.—Reading, including religious instruction, $5\frac{1}{4}$ hours; writing, dictation, and composition, 6 hours; arithmetic, 6 hours; geography, $2\frac{1}{4}$ hours; object lessons, $1\frac{1}{2}$ hours. Total, 25 hours.

21.—National school books of Ireland, 1st, 2nd, 3rd, Scripture lessons.

22.—The Hemispheres.

23.—In the early discipline of the child the object is to restrain it alike from the extreme of obstinacy and of too great pliancy. In the latter instance the child must be shewn that he is in danger of becoming the slave of circumstances; of being dragged at the wheel of every folly; written on by every finger, and of willing only with the will of others. Some children are self-willed, requiring to be frequently shewn the errors of their obstinacy, to be left at times to suffer its effects, and to have it shewn them in various ways that he only is fit for the society of voluntary agents, who is prepared to yield; to get the child to govern itself the teacher must wisely govern it. The problem is, to form the child to obedience without impairing his freedom. No original quality of the mind, even though existing in dangerous excess, should be opposed directly or crushed. Brought within proper limits it will have its value, and this is best done by cherishing, appealing to, and developing a counter-balancing disposition. In other words, attention should be given, not so much to the weakening of any one quality as to the strengthening of its opposite. The mother who saw her child running to the edge of a precipice did not attempt to save it by a shriek or a scold, but bending down and baring her bosom, the child ran back to it. A teacher should never despair of bringing harmony into the character of a child, by thus counteracting the excess of one quality by the compensative influence of another. The evil deplored may be only a fit,—the idiosyncrasy of childhood. At all events the child should never be led to imagine his disease is incurable. An unpromising spring not unfrequently issues in an abundant harvest, and an intractable childhood (as Bacon remarks), like a crooked piece of oak, which makes the knee-timbers of a ship, may be qualified to occupy an important post in society. The apparent incapacity or intractableness of some children is only the early indication of *individuality* of character. An unreflecting educator strives to force every mind into the same mould and to form it in the same press, resenting the least obstacle offered by the child as treason against his machinery. Like the Red Indian's squaw, who fastens every child, from birth, to the same board, he reduces his pupils to mental mummies. By kindness, firmness, and mixing amongst them, I endeavour to win their respect and preserve the discipline. (No directions).

24.—By the teacher, weekly.

25.—By the Inspector of National Schools.

Table.—26 to 34 questions answered:—John Steele Rablah, aged 37; born at Barnard Castle, near Rokeby; appointed 23 Oct., 1858; certificate, Class 3, Sec. B.; 3 years; not trained. Pamela Rablah, aged 36; Brompton, Yorkshire.

DENNIS ISLAND.

1.—At Dennis Island, Police District of Bathurst.

2.—Lathed, plastered, and ceiled inside; outside, slabs all in good condition.

3.—480 superficial square feet.

4.—4,840 superficial square feet.

5.—None.

6.—480 superficial square feet, 5,760 cubic feet.

7.—26 pupils.

8.—By sashes.

9.—In the ratio of 33 pupils, 26 pupils; boys, 11·9—girls, 14·1.

10.—The maximum males, 24 years, the minimum, 4 years; the maximum females, 25 years, the minimum, 4 years.

11.—3 Classes.—In the first class, 15 pupils—oldest, 10 years; youngest, 4 years. In second class, 9 pupils—oldest, 24 years; youngest, 7 years. In third class, 9 pupils—oldest, 25 years; youngest, 12 years.

12.—7 hours, commencing at 9 A.M., and terminating at 4 P.M. $1\frac{1}{2}$ hours for dinner, during which cessation cricket, marbles, and ball playing are going on; $\frac{1}{4}$ hour recreation at $\frac{1}{2}$ past 10 A.M., in which cessation leaping and running are going on.

13.—One day in each week (Saturday). Vacations, three—one week at Christmas; one week at Easter, and one week at Midwinter.

14.—245 days.

15.—No experience of that nature in this school.

16.—8 children.

17.—After the ratio of £2 14s. to each pupil for instruction, and in the ratio of 4s. per annum for books. Total, £2 18s. per annum.

18.—After the ratio of £104 8s.; seven pounds four shillings appropriated for books; £97 4s. for support of teachers.

School fees after the ratio	£104	8
Board's salary	60	0

Total £164 8

Receives nothing from other sources.

19.—After the ratio of £4 19s. 7·633d. for each pupil.

20.—Each class receives instructions on the same subjects, varied in the part of the day given. Reading Scripture lessons and books of lessons, one hour the former, and three-quarters of an hour the latter, boys and girls each day.

Girls.		Boys.	
Reading ...	1 $\frac{3}{4}$ hours.	Reading ...	1 $\frac{3}{4}$ hours.

21.—First Class.—First book of lessons, arithmetic, Dr. Sullivan's geography. Second Class.—Second book of lessons, arithmetic, Dr. Sullivan's geography, Scripture lessons. Third Class.—Third book of lessons, arithmetic, Dr. Sullivan's geography, Scripture lessons, Truth of Christianity, lessons on.

22.—One map of Europe, one map of the World, one black-board, sixteen forms, three desks, pens, ink, and copy-books, all in good condition. Want one map of Australia.

23.—No flogging, nor tasking. The misdemeanor is written upon a slate with chalk, and the pupil parades the school with the slate held up above the head, and then stands in front of his class until the misdemeanor is read audibly by the pupils in his class.

24.—Once in six months, by two of the Local Patrons. Rewards of merit are distributed once a year; books of moral and religious narrative.

25.—By Mr. Wilkins, Superintendent, once a year,—in the case of this school in the first month after it had been nationalized—one day. By Mr. M'Cann, as Organizing Master, seven visits, one day each; his suggestions are appended. The school is being worked out efficiently, and the people in the locality are well satisfied.

26.—George Turner.

27.—Assistant, Mrs. George Turner.

28.—Leeds, in the West Riding of Yorkshire, each.

29.—Each 37 years.

30.—1st July, 1858.

31.—Trained as a teacher, more particularly to teach Chemistry.

32.—At the Leeds Mechanics' Institution and Literary Society, for a period of two years; none issued at that period.

33.—Has followed the occupation of practical chemist.

34.—Salary, from Board, for teacher and wife, £60.

35.—Fees and allowances, £97 4s.

36.—Annual income of teachers, £157 4s.

37.—Religious instruction is given weekly by the Rev. Mr. Gaud, and the Rev. Mr. Angwin, or their substitutes, Wesleyan, and moral instruction by the teachers daily. Books for religious instruction are the Bible and the Wesleyan Catechism. For moral instruction the books of lessons issued by the National Board of Education are used; each inculcates morality.

Suggestions by Mr. B. H. M'Cann, as Organizing Master.

The children to be invariably classed and instructed in strict accordance with the table of minimum attainments, and all possible exertion made to raise the qualifications of those children, three months in their respective classes, to the standard required by that table, and those more than three months to the degree of progress which may form a corresponding ratio.

The spelling of the first class to be carefully attended to. The simple subjects contained in their lessons, and the words which admit of explanation, to be carefully impressed on the minds of the children. Each to be well understood by them before they are advanced to another. The same observation to apply to the other classes. Writing to be taught to all the classes from dictation. The questions to be solved in arithmetic may be also dictated; in fact, every opportunity is to be taken to cultivate and form the minds of the children rather than cram with knowledge.

The copies to be examined and corrected as often as possible during the exercise. The children being reminded that their eyes should be constantly directed towards the head-line, with a view of imitating it in some such a way as a painter or drawer would view the object or model to be copied. The more glaring errors to be particularly pointed out so as to avoid their repetition. Marks of merit, for clean and well written copies, may too be given occasionally with advantage.

A few of the more general rules of spelling to be exemplified. The reading of all the children to be particularly attended to. The words in a sentence usually requiring emphasis to be pointed out; also, those which seldom receive a stress of voice, with a particular view to good reading; the children to be always made to understand what they read. The master to question the children invariably on the lessons read, and occasionally, when the books are closed, to cause the children to state what they know of the lesson, to write it on their slates, and read it from their own writing. Perfect quietness to be observed during writing. The children to be always employed at some useful exercise. The teacher never to give a second command until the first is obeyed, and to aim at governing the children by affection and reason, rather than by harshness and severity.

The teacher always to remember his teaching is intended for the whole class, so that he should never rest satisfied with an answer from one, but should put the question again and again until answered and understood by all; at the same time answering aloud simultaneously is to be avoided.

The children to write exercises at home upon subjects previously given, and bring them to school directed to the master, who, after their examination and correction, can duly return them to the children. The lessons taught to be prepared the previous evening; and it would be well to draw the attention of the children to them each evening before they are dismissed, by writing their several pages on the black-board, so that they may come the better prepared to receive and understand the teaching of the master.

All to be assembled in the playground fifteen minutes before nine o'clock, examined as to personal cleanliness, drilled, and marched into school. Those who come late to be kept in the school the same length of time in the evening that they were late in the morning, and employed at some specified and useful exercise.

The course of discipline to be observed at mid-day, and in the evening, as in the morning. All to go home in their respective districts, and all other suggestions not embodied in this schedule, and which I may have taken occasion to introduce to the master's notice as necessary for the efficient conduct of the school, to be duly carried out.

DRAYTON.

- 1.—Drayton, Darling Downs.
- 2.—The school is constructed of wood, viz., slabs and shingles. It is much too small for the present number of children attending, and is greatly in want of repairs.
- 3.—There is an area of 585 superficial square feet contained in the building.
- 4.—The ground adjoining the school for the use of the pupils contains 4,840 superficial square yards.
- 5.—In August last two water-closets were put up at the expense of the teacher, constructed of slabs and shingles, and 5 feet \times 5 feet each. One is exclusively used by males, and the other by females.
- 6.—It was found necessary to remove the partition between the boys' and the girls' room, which, together, contain 3,009 cubic feet.
- 7.—The average number of children usually assembled in the schoolroom, 41.
- 8.—No provision is made for ventilation, except opening the doors and windows; this, however, can seldom be done, as the school is situated 4 feet above the level of the street, in which, with open windows, the children can see all that takes place.
- 9.—Annual average number on the books:—Males, 36; females, 25. Average number of children attending school:—Males, 24; females, 17.
- 10.—The maximum and minimum age of the pupils:—Males, maximum, 14 years; minimum, 3 years; females, maximum, 12 years; minimum, 3 years.
- 11.—The school is divided into four classes:—1st class, maximum age, 7 years; minimum age, 3 years; average number, 23. 2nd class, maximum age, 14 years; minimum age, 6 years; average number, 20. 3rd class, maximum age, 11 years; minimum age, 8 years; average number, 12. 4th class, maximum age, 14 years; minimum age, 10 years; average number, 6.
- 12.—Each day the pupils attend school during five hours; duties commence at 9 o'clock in the morning, and terminate at 5 in the afternoon. A cessation from study is allowed at 10:30 for 5 minutes, and also from 1 to 2 o'clock. These intervals are passed by the greater number of the pupils in the playground, and under the supervision of the teacher.
- 13.—Saturday is a holiday in each week, no other is given. The vacations are a fortnight at Christmas, and a week at Easter.
- 14.—The total number of days appropriated to school duties during the year, 240.
- 15.—The average length of the period during which pupils, from the time of their first entrance to the time of their finally leaving school, remain there,—the school has not been in operation long enough to give this average.
- 16.—The number of children between 5 and 15 years in Drayton, who do not usually attend there, 11.
- 17.—The annual sum charged to each pupil for instruction, £1 5s. 11 $\frac{3}{4}$ d. The annual charge for books, 2s. The total annual charge for each pupil, £1 7s. 11 $\frac{3}{4}$ d.
- 18.—The annual amount of school fees received from the pupils of the school, during the twelve months ending the 30th September, 1858, £79 5s. The amount received from the pupils towards the book fund, £2 17s.; this last sum was expended in books, and the former appropriated to the use of the teacher. The total amount received from all sources towards the support of the school during the above-mentioned period, £195 2s.
- 19.—
- 20.—The following is a detailed enumeration of the several subjects of instruction given to each class, and the precise portion of time allotted to each of such subjects in each day throughout the year;—Monday, Wednesday, Friday:—1st class, 9 to 9 $\frac{3}{4}$, writing; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, reading; 2nd class, 9 to 9 $\frac{3}{4}$, reading; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, writing; 3rd class, 9 to 9 $\frac{3}{4}$, writing; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, grammar; 4th class, 9 to 9 $\frac{3}{4}$, writing; 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$, grammar—A recess for 5 minutes—thence to 11 $\frac{1}{4}$. 1st class, arithmetic; 11 $\frac{1}{4}$ to 12, geography; 2nd class, 11 $\frac{1}{4}$, geography; 11 $\frac{1}{4}$ to 12, arithmetic; 3rd class, 11 $\frac{1}{4}$, drawing; 11 $\frac{1}{4}$ to 12, arithmetic; 4th class, 11 $\frac{1}{4}$, drawing; 11 $\frac{1}{4}$ to 12, arithmetic. 12 to 2, recreation. 2 to 3, 1st class, reading; 3 to 3 $\frac{1}{2}$, writing; 3 $\frac{1}{2}$ to 4, mental arithmetic; 2nd class, 2 to 3, reading; 3 to 3 $\frac{1}{2}$, grammar; 3 $\frac{1}{2}$ to 4, mental arithmetic; 3rd class, 2 to 3, Scripture lessons; 3 to 3 $\frac{1}{2}$, geography; 3 $\frac{1}{2}$ to 4, mental arithmetic;

arithmetic; 4th class, 2 to 3, Scripture lessons; 3 to 3½, geography; 3½ to 4, mental arithmetic. Tuesday and Thursday:—1st class, 9 to 9¾, reading; 9¾ to 10½, writing; 2nd class, 9 to 9¾, writing; 9¾ to 10½, grammar; 3rd class, 9 to 9¾, reading; 9¾ to 10½, geography; 4th class, 9 to 9¾, writing; 9¾ to 10½, geography—A recess for five minutes—thence to 11¼, 1st class, arithmetic; 11¼ to 12, geography; 2nd class, 11¼, reading; 11¼ to 12, arithmetic; 3rd class, 11¼, grammar; 11¼ to 12, arithmetic; 4th class, 11¼, grammar; 11¼ to 12, arithmetic. 12 to 2, recreation. 2 to 3, 1st class, writing; 3 to 3½, reading; 3½ to 4, tables; 2nd class, 2 to 3, reading; 3 to 3½, geography; 3½ to 4, tables; 3rd class, 2 to 3, Scripture lessons; 3 to 3½, arithmetic; 3½ to 4, revision of arithmetic; 4th class, 2 to 3, Scripture lessons; 3 to 3½, arithmetic; 3½ to 4, revision of arithmetic. From 3 to 4 females do needlework.

21.—List of the titles of all books used in each of the several classes of the school:—1st class—first book of lessons, tablet sheets. 2nd class—second book of lessons, sequel to ditto, introduction to geography. 3rd class—third book of lessons, geography generalized, English grammar, first book of arithmetic, Scripture lessons. 4th class—fourth book of lessons, sequel to ditto, second book of arithmetic, grammar, mensuration, Scripture lessons. The above-mentioned books are in good order, and the number in use is adequate to the wants of the school.

22.—Maps are much wanted, principally those of Asia, Palestine, Ireland, England, and Scotland. The following is a list of maps, &c., used in the school:—Map of the World, Europe, and Australia, 1 diagram of animals, 1 diagram of astronomy, notice to visitors, general lesson, table of minimum amount of attainments required from each class in a National School.

23.—The principal system of correction employed in the school is "keeping in"; corporal punishment is seldom resorted to, and then only when other methods have failed. No written instructions from the Board, Official Visitors, Inspectors, or Managers of the school, have been supplied to the teacher on this subject.

24.—An annual examination of the school takes place at Christmas, when the pupils are examined by the teacher, and prizes distributed to the most deserving, and presents to all. The prizes were Peter Parley's annuals, and others in the same style.

25.—No report on the state of the school exists.

26.—The teacher's name is John Rendall.

27.—Assisted by Mrs. Rendall.

28.—John Rendall born in Rendall, Orkney, Scotland. L. A. Rendall, born in Worcester, England.

29.—J. Rendall, aged 31 years. L. A. Rendall, aged 30 years.

30.—Appointed to present office, 5th August, 1856.

31.—Trained at the Sydney Model National School, for one month.

32.—Certificate of competency, Class II, Section A.

33.—Previous to present appointment the teacher held the situation of private tutor for eight years.

34.—Annual amount of teacher's salary, £108.

35.—Total annual income of the teachers derived from the school, £195 2s.

36.—Fees, emoluments, allowances, exclusive of salary, £87 2s.

37.—Religious and moral instruction is given daily from 3 to 4 o'clock by the teacher, and the books used are the Scripture lessons supplied by the board. The Revd. B. Glennie, Church of England Minister, visited the school weekly up to the end of March last, for the purpose of instructing his own children; since that date no Minister of any denomination has visited the school to give religious instruction.

JOHN RENDALL, Teacher.

DUNGOG.

1.—Township of Dungog.

2.—It is constructed entirely of wood, and needs repairs and a fireplace.

3.—The schoolhouse contains 480 square feet (area).

4.—The area of the school land is 2,420 square yards.

5.—There never have been any water-closets provided.

6.—The room appropriated for teaching contains 1,964 square feet, or 5,520 cubic feet.

7.—About forty-five of both sexes.

8.—Ventilation is obtained by opening the doors and raising the windows. The school is often very hot, and the air quite stifling in the Summer, while in the Winter it is just as cold.

9.—On the books, annual average for 1856-7-8—boys, 39.6; girls, 46. Average number in attendance—boys, 22.8; girls, 21.5.

10.—Maximum age—males, 13; females, 14. Minimum age—males, 4; females, 4.

11.—The school is divided into 8 classes, viz., 4 of boys and 4 of girls.

	Average No.	Maximum Age.	Minimum Age.
1st class	18.6	9	4
2nd class	18.4	13	6
Sequel class.....	7.5	14	9
3rd class	5.4	13	10

12.—Five hours each day—morning, 9 to 12; afternoon, 1 to 3. At 10½ A.M., there is 15 minutes recreation, and from 12 till 1 for dinner.

13.

13.—Saturday in each week is a holiday. There are three vacations—a week at Christmas, a week at Easter, and a week in Midwinter.

14.—The total number of days appropriated to school studies during the year is 295.

15.—About three years.

16.—I have no means of finding this out.

17.—The weekly fee for each child, three-pence; the annual charge to each child for books is two shillings. Total annual charge for each child, 15 shillings.

18.—Annual amount of school fees received during the twelvemonths ending 30th September, 1858, £30 15s. 6d., which is an increase of the teacher's salary. Teacher's salary, £120; paid by the children for books, £1 15s. Total amount, £152 10s. 6d.

19.—The average number of pupils during the year ending September 30th, 1858, was 47·2; dividing £152 10s. 6d. by 47·2, gives £3 4s. 7½d, the average annual cost for each pupil.

20.—1st class :—reading, 2½ hours; writing, 1¾ do.; arithmetic, ½ do. 2nd class :—reading, 1¾ hours; writing, ¾ do.; arithmetic, 1¾ do.; grammar, ½ do.; geography, ½ do. Sequel and third class same as second. Grammar and geography are each taken on alternate days. Object lessons are given during the reading lessons.

21.—1st class :—reading tablets; 2nd class :—2nd reading book, 1st book of arithmetic; sequel :—sequel reading book, 1st book of arithmetic, English grammar, introduction to geography and history, Sullivan's dictionary; 3rd class :—3rd reading book, 1st book of arithmetic, English grammar, introduction to geography and history, Sullivan's dictionary, arithmetic in theory and practice. With few exceptions all these are in pretty good condition; they are sufficient both in kind and number.

22.—Maps :—The World, Asia, Africa, America, Australia, England and Wales, Scotland, Ireland, the Ancient World, and the Pacific Ocean. A sheet of colored illustrations, showing the planetary system, the seasons, tides, phenomena of day and night, altitudes of the sun in Summer and Winter in the latitude of London, the earth and its atmosphere, the phases of the moon, eclipses, and the comparative magnitudes of the planets. Johnston's illustrations :—No. 1, properties of bodies; No. 2, mechanical powers. Illustrations of the vegetable kingdom :—No. 1, roots; No. 2, flowers; No. 3, fruits; No. 4, wild and garden vegetables; No. 5, corn. Sources of food. Varieties of the human species, sheet No. 1. 2 sheets illustrative of the vertebrata and the invertebrata, shewing the forms, but not the comparative sizes of the animals. Darton's indestructible prints :—Comparative sizes of wild quadrupeds, comparative sizes of birds, comparative sizes of domesticated and British wild quadrupeds. A black-board mounted on a frame. All these, except Darton's indestructible prints, and Johnston's illustrations, No. 2, are in very good condition, and are sufficient.

23.—Discipline is preserved usually by firmness and mildness; corporal punishment is inflicted when other means fail. Among some written suggestions left with the teacher by the Organizing Master is one to the effect that, in order "to maintain authority, orders should be given in a low tone of voice with great firmness, and a second command should not be given till the first has been obeyed."

24.—The pupils are examined only during the occasional visits of the Inspector and the Organizing Master. No prizes are given.

25.—The school is officially visited or inspected by the Inspector and the Organizing Master. This school has been visited twice by the Inspector, and three times by the Organizing Master, in the course of the last three years. The time occupied at each visit was about two hours.

26.—Mr. Griffin.

27.—There are none.

28.—Haverfordwest.

29.—30 years.

30.—January, 1856.

31.—Trained.

32.—Westminster, for one year, besides much experience as a teacher in private schools.

33.—

34.—£120 per annum.

35.—Fees about £30; an allowance of £1 per annum for postage.

36.—Total annual income of teacher derived from school, £151.

37.—Religious or moral instruction is daily given by the teacher during the reading of the Scripture lessons, as well as by explanation of the general lessons, and inculcation of its precepts.

ELLALONG.

1.—Ellalong.

2.—Slabs, and shingled.

3.—360 feet in the area.

4.—Nil.

5.—In course of erection.

6.—Superficial and cubic feet, 1,080.

7.—Thirty-three.

8.—Well ventilated.

9.—Forty-three—21 boys, and 22 girls.

10.—From 6 to 15 years.

11.—Two classes, 17 in one, and 16 in the other, the eldest 15, and the youngest 6 years.

12.

- 12.—5 hours, from 9 A.M., till 3 P.M.; $\frac{1}{4}$ of an hour allowed for play, morning and afternoon.
- 13.—None, except half-holiday on Saturday, and such as are sanctioned by the Board.
- 14.—260 days.
- 15.—The school has been in operation only 9 months.
- 16.—There are upwards of 60 who do not attend in consequence of the inconvenient situation of the school.
- 17.—10s. per quarter, or £2 per annum.
- 18.—I have received but £12 from the opening of the school, in consequence of the failure of crops.
- 19.—10s. per quarter, which is willingly done in kind seasons.
- 20.—Reading, writing, geography, grammar, arithmetic, and Scripture history. Half an hour is allowed to each class daily for the above subjects, excepting Scripture history, and Saturday is devoted solely to exercises therein.
- 21.—First class read in books termed first book of lessons. Second class in second book; other books are required, the number in present use being hardly adequate.
- 22.—None; some are much needed.
- 23.—Occasional corporal punishment. Have not received any *written* instructions from W. McIntyre, Esq., or Local Patrons.
- 24.—Twice since the school has been opened, by the Organizing Master upon two several occasions, and once by the Revd. C. Spencer, A.M. No prizes have been awarded.
- 25.—By the Local Patrons and the Organizing Master. Twice it has been visited, and the whole day has been occupied in examining the children. No report has been recorded, save that forwarded to the Board by the Organizing Master. Copy of approval herewith enclosed.
- 26.—Andrew James McLaren.
- 27.—None.
- 28.—Edinburgh.
- 29.—38.
- 30.—June 14th, 1858.
- 31.—Not trained.
- 32.—Answered in 31.
- 33.—Employed as private tutor, in this Colony, to the Revd. C. Spencer, A.M.; also in France and Italy—previous to coming here—as a chemist.
- 34.—£52 from the Board solely.
- 35.—School fees.
- 36.—They vary.
- 37.—None has been given except by the Revd. C. Spencer, A.M., and that in strict accordance with the rules of the Board. Old Testament, Nos. 1 and 2. New Testament, Nos. 1 and 2.

ARALUEN.

- 1.—Araluen, District of Braidwood.
- 2.—Slabs and shingled.
- 3.—450 superficial square feet.
- 4.—Half-an-acre.
- 5.—None.
- 6.—300 superficial square feet, and 3,000 cubic feet in the schoolroom.
- 7.—Average number of scholars, 28.
- 8.—None, except ordinary means.
- 9.—Only established 6 months.
- 10.—Maximum age, 15 years; and minimum age, 3 years.
- 11.—Three classes; average in each class, 10; maximum age in first class, 6 years; minimum age in first class, 3 years. Maximum age in second class, 15 years; minimum age in second class, 6 years. Maximum age in third class, 13 years; minimum age in third class, 5 years.
- 12.—Pupils attend 5 hours each day. Hour of commencement, 9; termination, 4 o'clock. Cessation from $10\frac{1}{2}$ to $10\frac{3}{4}$ o'clock, 15 minutes employed in play, from 12 to 2 o'clock employed in going home to dinner and returning.
- 13.—One holiday (Saturday) in each week. Three vacations in the year, viz.:—one week at Christmas, one week at Easter, and one at Midwinter.
- 14.—240 days.
- 15.—School not established sufficient time to ascertain.
- 16.—10 children.
- 17.—Weekly sum charged each pupil, 1s.; annual charge for books, 2s.; total annual charge, £2 14s.
- 18.—School only established 6 months.
- 19.—School only established 6 months.
- 20.—First class:—9 to $9\frac{3}{4}$, learning spelling; $9\frac{3}{4}$ to $10\frac{1}{2}$, writing on slates; $10\frac{3}{4}$ to $11\frac{1}{2}$, reading; $11\frac{1}{2}$ to 12, tables; 2 to 3, writing on slates; 3 to 4, reading and spelling. Second class:—9 to $9\frac{3}{4}$, reading; $9\frac{3}{4}$ to $10\frac{1}{2}$, 2 days grammar, 2 days geography, 1 day mental arithmetic; $10\frac{3}{4}$ to $11\frac{1}{2}$, writing; $11\frac{1}{2}$ to 12, tables; 2 to 4, reading and arithmetic. Third class:—9 to $9\frac{3}{4}$, reading; $9\frac{3}{4}$ to $10\frac{1}{2}$, 2 days grammar, 2 days geography, 1 day mental arithmetic; $10\frac{3}{4}$ to $11\frac{1}{2}$, writing; $11\frac{1}{2}$ to 12, 1 day mental arithmetic, 1 day tables, 3 days slate arithmetic; 2 to 3, reading and spelling; 3 to 4, slate arithmetic.

- 21.—First class use first book ; second class use second book ; third class use third book. Books in good condition ; no other books needed ; present number adequate.
- 22.—None.
- 23.—Tasks, confinement and corporal punishment.
- 24.—No examinations ; no prizes.
- 25.—Never visited since established.
- 26.—Harper H. Soulby.
- 27.—No assistant or pupil teacher.
- 28.—Boston, England.
- 29.—Thirty-five years.
- 30.—September 20th, 1858.
- 31, 32.—Not trained.
- 33.—Employed as Denominational Teacher at Brisbane, Moreton Bay ; previous occupation, miner.
- 34.—Annual salary, £60.
- 35.—Allowed from Mr. Burnell, £26 per annum.
- 36.—Not in operation a year
- 37.—No religious instruction given. Not visited by any Clergyman. No religious books used.

FAIRY MEADOW.

1.—Fairy Meadow, $2\frac{1}{2}$ miles from Wollongong, in the District of Illawarra.

2.—The schoolhouse or building is weatherboards, with shingled roof, projected, and surrounded with cast-iron gutter piping to catch a supply of water. The foundation of the whole building is also of wood, charred piles and sleepers, standing on a soft subsoil, on the lower part of the ground, which is for the most part under water in the Winter season, or whenever an ordinary fall of rain occurs. The building is entirely new, having been brought to its present state of completion in November, 1858. It contains five rooms on the ground floor, and one small apartment above. The schoolroom and classroom have their side walls lathed and plastered, and wainscotted all round four feet from the ground. The ceilings are open to the roof. The teacher's apartments, four rooms, are neat and comfortable, and three of them are lathed and plastered right through. On the whole this is a good and substantial building, but for the want of adequate funds it seems to be left in an unfinished state. In order to meet the present requirements of the District, this being the only school in it, I think that the present building should be enlarged to double its present size, or the whole building might be appropriated for school purposes, and a separate teacher's residence erected. The want of water is very much felt here, as the only times we have a tolerable supply is when it rains, and then it is scarcely in demand ; but in fine weather, when it is much needed by the children, we either cannot afford to give it to them, or else it is so fetid that it would be dangerous to allow them to drink it. There is at present no tank or well on the school premises, nor can water be procured at a less distance than half a mile from the schoolhouse. I think it would tend (by way of improvement) very much towards preserving the building, if a fall "from," instead of "to," the foundation could be made. The whole building requires painting on the outside, as also some portions of the interior. A verandah is also much needed on the west or back part of the building, where the teacher's apartments are ; and a shed or some kind of shelter is required for the children from the intense heat of the sun during the mid-day recess, and in rainy weather, instead of confining them to the schoolroom, as is the necessary case at present. The want of these latter improvements, hinders the teacher from conducting a mid-day class for some other branch of instruction not included in the ordinary list, which might be done with much advantage, but which under present circumstances is quite impracticable. A bell and a clock are also much needed for the school, and the whole of the school-ground (for many reasons) should be cleared and stumped, and closely fenced in.

3.—The schoolroom measures 18×30 feet, the classroom 12×18 feet, and the area respectively of each room is 540 feet and 216 square feet, giving a total of 756 sq. ft. The teacher's apartments contain 624 sq. ft., therefore, total in the whole building equal 1,380 square feet.

4.—There is exactly half an acre of land (or 2,420 sq. yards, or 21,780 sq. feet) fenced in for the use of the pupils, but it is at present much encumbered with large stumps and heavy felled timber, in the centre of which stands the schoolhouse ; and there is another half-acre besides, intended for same purpose, but which is not yet fenced in (for the want of funds), and cannot therefore be used at present.

5.—The water-closets are constructed of weatherboards, with oak-shingled roof ; the elevation is 7 feet from the ground, upon a ground plan of 6×7 feet ; having a drain with no outlet, which measures also 6×7 , and 6 feet deep. This drain invariably fills up level with the flooring of the closets whenever a moderate fall of rain comes, and is then very unpleasant. The closets themselves are exceedingly unpleasant in the afternoon and evening, when the strong westerly winds blow from the mountains into the apartments of the teacher, as they are only 25 yards distant from the front of the same, and quite unsheltered. There is not a separate closet for the teachers. The closets are divided into three small compartments, with a seat in each, and a separate entrance and private door. On the whole they are neat and substantial, but too small, too exposed, and far too near to the schoolhouse.

6.—The number of square feet in the schoolroom, 540, and of cubic feet, 5,400 ; in the classroom there are 216 square feet, and 2,160 cubic feet ; total square feet, 756, and cubic feet, 7,560.

7.—In the schoolroom the average number usually assembled, at the end of the quarter (February) was 57·05, and for the classroom, 16.

8.—At present the school building appears to be in an unfinished state, and the ceilings of the teaching apartments are left open to the roof, by which means abundance of irregular wind is obtained. By raising all the windows, and opening the doors of the school, another supply is also procured. The schoolroom is generally very close in the morning, but in the afternoon we have a beautiful breeze from the sea. The heat from 11 o'clock in the morning to 5 o'clock in the afternoon, on the west side of the building where the teacher's residence is, is very oppressive. No systematic or scientific plan for ventilation has been had in view in the construction of the school, although this could have been done in the first instance with but little trouble and small expense. I think a closed plastered ceiling, with a revolving shaft ventilator (reaching from the outside of the top of the roof into the interior of the school) far better than open ceilings and open doors and windows.

9.—The school has only been open since December 6th, 1858, and therefore an annual average cannot be given, but the number at present on the books (March, 1859,) which has been steadily increasing since the opening of the school is 84. The school is attended by children of both sexes, collected into one room. There are at present 40 males and 44 females entered on the books of the school. The average number attending at present is 75·2 or 36·4 males, and 38·8 females.

10.—The maximum male pupils age is 13 years, the minimum age $3\frac{1}{2}$ years. Of the females the maximum age is 14 years, and the minimum age $3\frac{1}{2}$ years. There are 52 children under the age of 9 years, 15 of whom are also under 6 years of age; and there are 18 who are under the age of 12 years.

11.—There are six classes in the school, 3 of boys and 3 of girls, ranking from 3rd to the 1st or alphabet class. The following table will exhibit at one view the average number and ages in each class:—

	Average number in each class.	Maximum Ages.	Minimum Ages.		Average number in each class.	Maximum Ages.	Minimum Ages.
Boys.				GIRLS.			
3rd Class	11	13	10	3rd Class	9	14	9
2nd Class	4	13	7	2nd Class	11	11	7
1st Class.....	22	11	$3\frac{1}{2}$	1st Class	19	11	$3\frac{1}{2}$

12.—The pupils attend school for five days in the week, and remain on the school-grounds for $6\frac{1}{2}$ hours each day. The school opens at $9\frac{1}{2}$ o'clock in the morning, and closes at 4 o'clock in the afternoon. A recess of 10 minutes is given at 11 A.M., and $1\frac{1}{2}$ hours at $12\frac{1}{2}$ to 2 for dinner, recreation, and drill, under the superintendence of the teachers. In bad weather, during this interval, when the children are compelled to take shelter in the schoolroom, the girls are generally instructed in needlework, &c., the younger children in building, &c., with artificial bricks, &c., and the boys, under partial restraint, are engaged in mental or other innocent recreation practicable indoors.

13.—Saturday is the only weekly holiday; and the number of vacations during the year is three, each lasting for one week only, which takes place respectively, at Easter—Midwinter—and Christmas.

14.—Deducting Sundays and holidays from the total number of days in the year, there will be 244 school days for actual study in this school during the year.

15.—I have no data as yet to judge from to enable me to furnish these particulars, as the school has only been opened since the 6th of December, 1858.

16.—Within a distance of one mile from the schoolhouse each way, I have ascertained by actual inquiry, that there are 84 children living convenient to the school, between the ages of 5 and 15 years, who do not attend this school—nor any other (except in the case of 4 children, who walk six miles a day to another school, under peculiar circumstances); I have every reason to believe, as from actual inquiry made, that most of the above will soon be entered on the books of this school, either for daily or evening instruction; by far the greater part of these 84 children cannot read at all; I believe there are about 20 others—of whom I did not get positive knowledge—that might be added to the number; there is no other school within a distance of three miles in one direction, and seven miles in any other direction.

17.—The weekly charge for each pupil is sixpence; the annual charge for books, 2s. 2d.; and the total annual charge for each pupil, £1 8s. 2d.

18.—As I am unable to state the particulars required by this question, it may suffice to state these particulars with reference to the quarter, during which the school has been in operation; the amount received as school fees from December 6th, 1858, to March 4th, 1859, £15 14s. 4d., which is appropriated in augmentation of the teacher's salary, which together with the sum of £27 (the quarterly amount received from the Board of National Education as stipend, according to classification) make a total amount received from all sources towards the support of this school for the quarter, £42 14s. 4d.

19.—Dividing the last-mentioned total by the average number of the pupils in attendance will give—£42 14s. 4d. ÷ 75·2 = £2 5s. $5\frac{1}{4}$ d. as the total average cost annually of the education of each pupil attending this school.

20.—At present, the 3rd and 2nd classes in the school receive instruction in Scripture and secular reading, English grammar, analysis, slate and copy-book writing, slate and mental arithmetic, geography, and music; the first or lowest class in the school is instructed in reading, slate-writing, simple arithmetic, the second division of arithmetic, the rudiments

of grammar and of geography, and tables, and singing; the whole of the girls are taught plain and fancy needlework, &c.; the time allotted to each subject is as follows:—

3RD AND 2ND CLASSES.		Time.	1ST CLASS.		Time.
Read each day	...	1½	Read, each day	...	1½
Write "	...	¾	Write "	...	¾
Arithmetic	...	¾	Arithmetic "	...	¾
Geography (Monday, Tuesday, Wednesday, Thursday)	...	¾	Geography (2nd division)	...	¾
Grammar (ditto alternately)	...	¾	Grammar "	...	¾
Mental arithmetic (Tuesday, Thursday)	...	¾	Tables "	...	¾
Music (Monday, Wednesday, Friday)	..	¾	Singing "	...	¾
Sewing, each class two days	...	1	Sewing "	...	¾

N.B.—After the school has been in operation for six months, the following subjects, viz.,—geometry, algebra, perspective and other drawing; object lessons, &c., will be taught to the higher classes twice a week, for ¾ hour each subject, and the Latin and book-keeping.

21.—The books of the school at present are all new, but not quite adequate to the wants of the same in number, the original supply being made for a school of much less numbers than actually now attend—probably for 50 or 60 scholars; whereas the present number on the school roll is 83, which is likely to increase; if one dozen more were added to each set of those already in use, I think our wants would be permanently satisfied; the books at present used in the school, are those only which are sanctioned by the Board of National Education, Sydney; the descriptive titles of the books used in each class are—

3RD CLASS—(BOOKS IN USE.)		No.	2ND CLASS—(BOOKS IN USE).		No.
Scripture lessons (O. T.) No. 1	...	24	...used also by 2nd class	...	24
" " (O. T.) No. 2	...	24

Geography	...	1			
English grammar	...	1			
			1ST CLASS.		
			1st book of lessons	...	24
			Lesson tablets	...	12

22.—The prints, &c., in the school, are the following, viz.,—12 tablet lessons of monosyllable (arranged phonetically); 3 pictures of domestic vegetables and fruits; 3 pictures, astronomical diagrams of the moon, seasons, and solar system; 3 pictures, science (color, form, and the ship); 1 picture, animals from "Noah's Ark"; 2 pictures, domestic flowers; 3 maps, Asia, Africa, and America; 4 maps (master's) land and water, hemispheres, Europe, Palestine; 1 black-board and stand, 10 forms, 6 desks, 2 chairs, 1 table, 1 general lesson, 2 time tables, 1 general attainments, 1 visitors' rules; 1 inventory of school apparatus, 1 plan of school furniture, 1 register book, 1 daily report book, 1 class roll book; those required in addition are,—1 black-board and stand, 2 map-stands, 1 chest of minerals, &c., for object lessons, 1 chest geometrical solid figures for perspective drawing, diagrams illustrative of ethnography, zoology, mechanics, chemistry, steam, electricity, natural history, and natural philosophy, &c.; text books to correspond, and a small library for the scholars.

23.—I may state in reply to the information required on this head, that the mode of correction used in this school is not based upon the rod; corporal punishment belonging to the past age and not to the present; the more civilized, enlightened, and elevating mode of correction peculiar to this period of improvement, that of appealing to the affections of the children, and cultivating the faculties of the mind, and in fact good moral training, is the dominant power in preserving good discipline in this school; as the great work of the teacher is to form the judgment, discipline the intellect, and train the morals of his pupils throughout the whole of their school course; no system of correction which does not harmonize with an enlightened age and people, and which does not tally with the task and proper duty of the teacher, will either assist the work of education, or tend to perfect or preserve the discipline of the school; good teaching, and good moral training alone, are sufficient for these things; the rod creates terror and hurts the feelings, degrades the intellect and creates hypocrisy, and it destroys that love and confidence which should exist between master and pupils; I have never received instructions on this head from any Board of Education, nor from official visitors; but from conversation with the Inspector of National Schools, on this subject, I have found his views very much to correspond with my own; and he is a gentleman of high education and standing, and of great experience in the management and discipline of schools; the same opinions are held by the most enlightened men of the present age, both in this and the mother country, and are I believe, the chief guide to all good and intelligent teachers, in preserving the discipline of their schools; managers, and Local Patrons of school, generally, have recommended to me the free use of the rod, as the only means of preserving order in the school, and many parents in this country advocate the same course; but I have found another power more effective in preventing error, and more permanent in its effects upon the minds and constitutions of the pupils; a power which answered well my own case as a pupil, and which I have found answered best in all my experience as a teacher, namely, industry in the teacher, and good moral training.

24.—No examinations as yet have been held in this school, but I believe two half-yearly examinations will be held publicly, at Midwinter, and at Christmas, respectively, at which prizes will probably be distributed, and such examinations will be conducted either by the Inspector of National Schools, or by the Local Patrons of the school, and the teachers, and in the presence of the parents of the children, and other persons in the district interested in the cause of education and the progress of the young.

25.—Two of the Local Patrons have visited the school since its opening, on three different occasions, who have reported their entire satisfaction with the order and progress of the children; no written report exists yet of the school; several of the parents of the children have also visited the school, and have returned home delighted and satisfied at what they saw; the National Schools Inspector will officially visit this school on the 22nd March, 1859, and again, on two other occasions during the present year, to examine and report on the condition of the school, and the progress of the children; these latter visits will probably occupy at least one whole day, and perhaps two days each; with reference to the actual condition of the school in the opinion of the teachers, sufficient may be gathered from the following remarks:—As this is the first school ever established in the district, a very heavy task and responsibility devolve upon the teachers, as may be judged from the fact, that of 84 scholars entered on the roll, 58 required to be taught the alphabet, 20 could not read easy lessons in monosyllables, and not one could read an ordinary lesson correctly; whilst the other branches, included in a common course of education, appear to have been more than proportionably neglected, or else, perhaps, not at all procurable; I am happy, and do not hesitate to state, that the school at present is in good discipline, and the pupils have advanced far beyond my early expectations; and that the school now bids fair to become quite equal to the best of its class, under the Board of National Education.

26.—Samuel King Miller; assisted by Mrs. Miller.

27.—We have no assistant teacher, &c.

28.—Samuel King Miller, born at Corner Hall, Hemel Hemsted, Hertfordshire, England; Mrs. Miller, born at Coombing Park, Carcoar, near Bathurst, New South Wales.

29.—S. K. Miller, 28 years, 17th March, 1859; Mrs. Miller, 19 years, 21st March, 1859.

30.—November, 1858.

31.—Master, trained as a teacher; mistress, trained for one year and a half under the master, prior to present appointment, and for a short time attended the Model National School.

32.—Master, trained at the London Central District School; six years; my last certificate which I held when in England, granted by the Committee of Council of Education, was First Class Competency, and that which I last obtained had not; Her Majesty's Inspector of Schools (E. C. Tuffnell, Esq.) advised me to emigrate to Sydney; would have been Third Class Efficiency; I have twice attended at the Model National Schools, Sydney, including a period of 12 weeks in training; and my present class certificate, under the National School Board, is Class II, B, which is at least three degrees lower than my former classification.

33.—Mrs. Miller had 18 months experience with me previous to present appointment at another large school at Carcoar, besides the necessary training at the Model Schools in Sydney; prior to this, her occupation was in private life with her parents.

34.—A joint salary of £108.

35.—Fees already received amount to £15 14s. 4d.; no other emoluments are attached to the school.

36.—Total amount already received, £42 14s. 4d.

37.—From the Scripture lessons book of the National Schools, for one hour every day, by the teacher; no Clergyman visits the school as yet; and the only books used at present are the ordinary school-books above-mentioned.

SAMUEL KING MILLER,

Master.

FOUR MILE CREEK.

1.—Four Mile Creek, four miles from East Maitland.

2.—Built of brick, with stone foundation; recently erected; in good repair; does not at present need enlargement.

3.—Teacher's residence and schoolroom, 648 superficial square feet.

4.—One acre.

5.—Two water-closets, built of slabs, with bark roof; in good condition.

6.—The number of superficial square feet, 324; of cubic, 729.

7.—Twenty-six.

8.—Ventilator in the ceiling.

9.—Annual average number on the books:—boys, 17; girls, 14; total, 31. In attendance:—boys, 14; girls, 12; total, 26.

10.—Maximum males, 13; minimum, 5. Maximum females, 14; minimum, 5.

11.—Two classes, viz., first and second; number, 18—13. Maximum in 1st class, 12; minimum, 5. In 2nd class:—maximum, 14; minimum, 8.

12.—Five hours; commences 9 A.M.; ten minutes recess at half-past ten; from 12 to 2, dinner and recreation; thence to 4 P.M.

13.—One week at Easter, one week Midwinter, and one at Christmas. Days:—Anniversary of the Colony, Queen's Birthday, and Good Friday.

14.—The number of days, 241.

- 15.—Twelve months; they continue at school as long as they remain in the locality.
- 16.—Nine.
- 17.—Sixpence per week; books, 2s. per annum; total annual charge, £1 6s. for each pupil.
- 18.—£13 12s. 6d., appropriated by the teacher to increase his stipend; from the National Board, £94; no amount from any other source; total amount from all sources, £107 12s. 6d.
- 19.— $30 \div £107 \text{ 12s. 6d.} = £3 \text{ 11s. 9d.}$, annual cost.
- 20.—First class:—reading, one hour and a quarter; writing and dictation, one hour and a quarter; arithmetic, half an hour; geography, half an hour; Scripture lessons, half an hour; object lessons, half an hour; grammar, half an hour. Second class:—reading, one hour and a quarter; writing and dictation, one hour; arithmetic, three-quarters of an hour; grammar, half an hour; geography, half an hour; Scripture lessons, half an hour; object lessons, half an hour.
- 21.—First class:—first book of lessons, spelling and reading sheets. Second class:—second book of lessons, sequel to the second book, English grammar, first book of arithmetic, introduction to geography. The above are those sanctioned by the Commissioners of National Education. In good condition, and adequate to present wants.
- 22.—One map of the world, one of Australia, one black-board; all in good condition, and quite sufficient for present wants.
- 23.—I find it much better to prevent breaches of discipline than to correct it. In extreme cases, corporal; no written instructions from any quarter.
- 24.—Four times during the year, by the Board's Inspector; books have been distributed periodically; titles—histories and voyages.
- 25.—By the Inspector and General Superintendent, District Inspector; the latter four times during the year, the former occasionally; half-day; have not seen any report of the school.
- 26.—Jonathan Hollingworth.
- 27.—No assistants.
- 28.—Manchester, England.
- 29.—Thirty-nine years.
- 30.—1st of January, 1857.
- 31.—Not trained.
- 32.—Class III, Section A.
- 33.—Seven years private teacher, and twelve years a denominational teacher; no occupation or business prior to that of teacher.
- 34.—None.
- 35.—None.
- 36.—£107 12s. 6d.
- 37.—Religious instruction given daily from Scripture lessons, by the teacher; visited by the Rev. W. Purves, Presbyterian Minister; Scripture lessons sanctioned by the Board of National Education.

GUNDAGAI.

- 1.—Gundagai, Parish of North Gundagai, Police District of the Lachlan.
- 2.—Of wood, weatherboarded, and plastered inside, the foundation of stone; with the exception of the teacher's sittingroom and bedroom, the other rooms are unceiled, rendering them intolerably cold in the winter.
- 3.—The schoolrooms contain 1,260 square feet; the teacher's residence and classroom, 720 square feet.
- 4.—2 acres or 9,680 square yards (unenclosed.)
- 5.—The water-closets are built of wood, and weatherboarded, very commodious; the cesspool is of good size and bricked up, has not been cleansed since the occupation of the school, and will require no cleansing for a considerable time.
- 6.—The school-building is divided into three compartments. No. 1, where the children assemble, contains 460 square feet, and 5,520 cubic feet to the girders. Nos. 2 and 3 contain 350 square feet, and 4,200 cubic feet, 440 square feet, and 5,280 cubic feet respectively.
- 7.—40 children of both sexes average the assembly in No. 1, Nos 2 and 3 are used as classrooms.
- 8.—Four double sashes on the south side of the building; one double sash at each end, east and west.
- 9.—During the three-quarters of a year that the school has been in operation, the average number on the books has been—males, 35.6; females, 28.3. The average attendance—males, 20.59; females, 17.66.
- 10.—Maximum age of males, 14; minimum, 3 years. Maximum age of females, 16; minimum, 3 years.
- 11.—Three classes; 1st class—average number, 14; 2nd class—average number, 15; 3rd class—average number, 30.
- 12.—Five hours; from 9 to 12 A.M.; from 2 to 4 P.M. During the hours of recreation from 12 to 2 P.M., the great majority of the pupils return home to dinner, a few remain. Innocent recreation of all kinds is allowed, and a strict supervision to prevent rough or mischievous amusements.
- 13.—Saturday is the only holiday in each week; one week at Christmas and a week at Easter, are the two and only vacations.

- 14.—250 days.
- 15.—The record and books of the school having disappeared or been lost at the period of the flood at Gundagai in 1852, the teacher has no data to form an average.
- 16.—The township of South Gundagai, isolated by the Murrumbidgee River, sends no children to the school; there are about 40 children from the ages of 5 to 15, many of whom attend a private school; in the locality of this school, the number of children of the above ages not attending is small, probably 20, the great portion of an age to be serviceable at home.
- 17.—The weekly charge for one pupil, 1s.; more than one, 9d.; one family only pays quarterly, at the rate of 9s. per quarter; the others pay weekly or monthly; 2s. per annum is charged to each pupil for books, &c.; the total annual charge for each pupil is £2 5s. 9d.
- 18.—To the 30th September, 1858, the school had been in operation but one quarter; for that period the amount of fees received, was—for tuition, £14 3s. 6d.; book fees, 5s. 6d.; appropriated to the use of teacher, £14 3s. 6d.; unappropriated, 5s. 6d.; teacher's salary for quarter, £24; total amount from all sources, £38 9s.
- 19.—Estimated average annual total cost of the education of each pupil, £3 16s. 10d.
- 20.—The subjects of instruction in each class,—first class:—reading; writing on slates; simple arithmetic; object lessons; simple tables. Second class:—reading; writing on paper; arithmetic; grammar; geography; object lessons and tables. Third class:—reading; writing; grammar and parsing; compound arithmetic; geography; Scripture lessons; object lessons and tables. The precise portion of time allowed for each subject each day:—reading, including spelling and the subject matter of the lesson, 1½ hours; writing on paper, on slates, or from dictation, 1½ hours; arithmetic, ¾ of an hour; grammar, ¾ of an hour, geography, ½ an hour alternately; object lessons or tables, ½ an hour; needlework, each day, 1 hour.
- 21.—The books used in the different classes,—first class:—first book of lessons; first book of arithmetic; English grammar. Second class:—second book; first book, arithmetic; geography generalised. Third class:—third book; Scripture lessons, Old and New Testament; first book, arithmetic. A copy of each of the Board's publications is in the hands of the teacher. The books are in fair condition and sufficient for the present wants of the school.
- 22.—The prints, diagrams, &c., are—a table of minimum attainments; general lesson, 2 copies; notice to visitors, 2 copies; maps of the World, Europe, Africa, Asia, and America; 1 set of tablet lessons. The maps are slightly injured from the rain, during the heavy Summer storms, driving under the shingles of the roof. Colored prints of natural history, and diagrams of the first principles of natural philosophy, would be of great benefit.
- 23.—The system of correction consists in detention in school after school-hours, to write or repeat a lesson; corporal punishment is seldom needed, and only applied in cases of flagrant breaches of discipline. The teacher finds that order is better preserved by gentle means than by strict coercion; no written or other instructions have been given by any Board of Education, Official Visitors, Inspectors, or Managers, on the subject.
- 24.—Since the opening of the school, there has been no examination of the pupils in reference to their progress; no prizes or other rewards of merit have hitherto been distributed.
- 25.—The Organizing Master, Mr. M'Cann, visited, officially, the school in the second quarter after its opening, and was occupied three days in the performance of his duty. A copy of a report on the state of the school, left by him, is hereto attached, marked A.
- 26.—William T. Holland.
- 27.—Marian Holland, the wife of the above.
- 28.—London; of his wife, Deal.
- 29.—38 years and 39 years respectively.
- 30.—May, 1858.
- 31.—Not trained as a teacher.
- 32.—Passed the month of training, ordered by the National Board, at the Model School, in Sydney; possesses no certificate of competency.
- 33.—Three years experience in England teaching the preparatory collegiate studies. Three years in the United States as teacher of the French and English languages; two years in Brazil as a teacher of English and writing. Had no occupation or business before adopting that of teacher.
- 34.—Annual amount of salary of head teacher, £96.
- 35.—Estimated annual amount of fees, £65 (no allowances and no emoluments exclusive of salary).
- 36.—Total estimated annual income of teacher, derived from school, £160.
- 37.—Religious instruction has been given on two occasions only, at long intervals, by the Rev. Mr. Fox, of Tumut, during his periodical visit, as there is no resident Clergyman. Mr. Fox is a Minister of the Church of England. No religious books of any denomination are in the school.

WILLIAM T. HOLLAND,
Teacher.

A.

COPY OF REPORT ON THE NATIONAL SCHOOL, GUNDAGAI.

Schedule A.

To be kept in Report Book,
B. H. M'CANN.

Suggestions to the Teacher.

A time table to be constructed in accordance with the Board's Regulations, and suspended in the schoolroom. The records of the school to be more accurately kept in future. When making out the next quarter's rolls the boys and girls to be separated, and each class to occupy a folio. The children are not to be entered until they have *actually attended*.

attended. Everything pointed out in reference to the keeping of the books (records) to be carefully attended to. The children to be classed, and instructed with especial reference to the "Table of Minimum Attainments," and all possible exertion made to raise all the children, three months in their respective classes, to the standard required by that "Table," and those more than three months, to the degree of progress which may form a corresponding ratio.

The reading, grammar, and geography of second class, and the parsing and mental arithmetic of third class to be especially attended to; also, all suggestions verbally made.

B. H. M'CANN,
Organizing Master of National Schools.

REMARKS ON THE FOREGOING REPORT.

The teacher begs respectfully to remark that the absence of time tables in the school arose from having no means of regulating the time. The teacher's watch was accidentally broken before his arrival, and no watch or time-piece of any description was obtainable, notwithstanding the most strenuous exertion. The time, and distribution of studies were approximated, as nearly as possible under the circumstances, and only on the morning previous to the arrival of Mr. M'Cann the teacher succeeded in procuring a small clock.

The inaccuracies in the books were simply of misapprehension, and not from want of care. From the universal want of instruction very great difficulty was experienced in forming the classes at the commencement, and the third class, consisting of the elder pupils, were instructed in the first rudiments of arithmetic, and classified in the record accordingly; hence arose inaccuracy.

The condition of the School, &c.

The unfinished state of the schoolrooms renders them extremely cold in the Winter notwithstanding two fires are constantly kept up. A very large amount of fuel is consumed without producing any sensible effect beyond a few feet, rendering it imperatively necessary to allow the smaller children and girls to sit around the fires—thus interfering greatly with the usual order of the school.

The school ground being unenclosed, the position of the water-closets is much exposed being within a few feet of a much frequented by-road. The school furniture is of very rough materials, purchased by the teacher, and put together by him. No assistance of any kind has been given to the teacher in furnishing the school. Appropriate furniture is much needed.

WILLIAM T. HOLLAND,
Teacher.

GRAFTON.

- 1.—Grafton, Parish of Great Marlow, Clarence River.
- 2.—Weatherboard, in good condition, built about 3 years.
- 3.—40 by 24, or 960 square feet.
- 4.—About $1\frac{1}{2}$ acres
- 5.—Two water-closets, built of slabs, in good condition, one for the use of the boys, the other for the use of the girls.
- 6.—One room, 960 square feet, 7,940 cubic feet.
- 7.—The average daily attendance for the last quarter was 77 children; the greatest number at one time in the room was 86.
- 8.—The windows have flying sashes, and there are two traps in the ends of the rooms.
- 9.—The annual average for 1858 on the books,—boys, 60.5; girls, 46.75; total, 107.25. The daily average for 1858 in attendance was,—boys, 42.15; girls, 32.0; total, 74.15.
- 10.—Maximum,—boys, 15; girls, 14; minimum,—boys, 4; girls, 4.
- 11.—3 classes. 1st class,—average number, 40; maximum, 6; minimum, 4. 2nd class—average number, 37; maximum, 15; minimum, 6. 3rd class,—average number, 30; maximum, 14; minimum, 8.
- 12.—5 hours daily, 3 on Saturday. School commences at 9 and 2, and closes at 12 and 4. From 12 to 2 is spent after luncheon in the playground.
- 13.—Half-day on Saturday; a vacation at Christmas for two weeks.
- 14.—274 days in the year.
- 15.—Those who remain residents of the township seem to give an average of $1\frac{1}{2}$ years, but the greater part of the children pass through the school in less than a year.
- 16.—No means of knowing.
- 17.—4d. and 6d. per week; 3 children pay 10s. per quarter, one half-penny is deducted for each child in attendance for books and school materials, the annual cost, including books, supposing the child to be present throughout the year, would be 16s. 8d., £1 5s., and £2.
- 18.—The total amount of fees received for the year ending 30th September, 1858, was, purchase of books, £6 0s. 1d.; teacher's salary, £57 18s. 3d.; total, £63 18s. 4d. The teacher receives £120 as a salary from the National Board of Education. Total amount of income—fees, £63 18s. 4d.; salary, £120; total, £183 18s. 4d.
- 19.—£183 18s. 4d., the total amount by the number of children attending through the year would be £1 14s. 4d., the annual cost of each child.

20.—		Monday, Wednesday, Friday.	Tuesday, Thursday.	Saturday.

3	"	1	1	1
1	Arithmetic	1	1	1
2	"	1	1	1
3	"	1	1	1
3	Grammar	¾		
3	Geography	...	½	
3	Singing	...	½	

21.—1st class, Nos. 1 and 2, Irish Commissioners; 2nd class, No. 3, Irish Commissioners; 3rd class, No. 4, Irish Commissioners. 2nd and 3rd classes read Scripture selections. The books in use are in fair condition, except the Scripture selections, which are much worn by 3 years' services. Some other books, in addition to the above would be useful, but, perhaps, objectionable in National Schools.

22.—Map of the World, Australia, Europe, Asia, in fair condition; diagrams, pictures, and instruments, there are none, but not the less necessary.

23.—Principal correction, keeping in after school. No instructions have been given at any time.

24.—No examinations are held, and no rewards or prizes are given.

25.—No official inspection has taken place. The Local Patrons occasionally visit, but no report has been made to the teacher respecting those visits.

26.—James Page.

28.—England.

29.—44.

30.—September, 1855.

31.—Trained.

32.—The College of the British and Foreign School Society, London, usual course of 7 months; Second Class of the Committee of Council of Education in England, and 2nd Class of the Board of National Education New South Wales.

34.—Annual teacher's salary from the National Board for self and wife, £120.

35.—Fees, £57 18s. 3d. for 1858, house and garden.

36.—Total salary, £177 18s. 3d.

37.—The ordinary Scripture selections of the National Board are read and explained 3 times a week. The Revd. A. E. Selwyn, the Church of England Minister, occasionally visits the school, but does not give any religious instruction in it.

HINTON.

1.—Hinton, county of Durham.

2.—The school is constructed of brick, and is built on a brick foundation. It is at present in fair condition, but requires enlargement, not being more than half the size required for the proper accommodation and management of the children in ordinary attendance.

3.—The number of superficial square feet contained in the school building is 660.

4.—The land adjoining the school for the use of the pupils consists of four-fifths of an acre, or 3,872 square yards.

5.—A double water-closet is provided for the use of the pupils, constructed of brick, ventilated by latticed windows; its dimensions are 10 feet by 10, and the structure is in a good state of repair.

6.—The principal room contains 500 square feet, and 4,500 cubic feet; the smaller, or classroom, contains 160 square feet, and 1,140 cubic feet.

7.—Generally 60 children in the large room, and 20 in the small one.

8.—In the schoolroom there are four windows, two on the north side, and two on the south; two door-openings, one at the east end, and the other at the west; and a chimney. In the classroom there is one window and one door, each opposite to the other, namely—north and south. By these openings currents of air can be made to pass through the school, irrespective of the quarter in which the wind may be. In addition to the above provision for ventilation the roof of the schoolrooms is open or unceiled; but as the walls are only nine feet in height it is a question whether the heat from the roof is not more injurious than this mode of ventilation is beneficial.

9.—The annual average number on the books, and the average number attending the school, for the year 1858, is as follows:—On the books, males 67, females 63, total 130; average number attending the school, males 45, females 39, total 84.

10.—Maximum and minimum age of the pupils—males, maximum, 14 years, minimum, 3 years; females, maximum, 14 years, minimum, 3 years.

11.—The school is at present divided into five classes. 1st class, average number, 15; maximum age, 6 years; minimum age, 3 years. 2nd class, average number, 20; maximum age, 11 years; minimum age, 5 years. Sequel class, average number, 17; maximum age, 13 years; minimum age, 7 years. 3rd class, average number, 15; maximum age, 12 years; minimum age, 8 years. 4th class, average number, 18; maximum age, 14 years; minimum age, 9 years.

12.—The pupils attend the school five hours per day, namely—from 9 o'clock A.M., till 12 o'clock, and from 2 o'clock P.M., till 4 o'clock. The majority of the pupils reside in the township, and, consequently, occupy the mid-day cessation of two hours in going to and returning from their dinners. Those pupils who bring their dinners to the school (about 25) occupy the said cessation in playing on the adjoining ground, under the supervision of the teacher. The female pupils who dine at the school are permitted to do plain needle or fancy work in the classroom during the cessation, if they prefer it.

13.—No school is held on Saturdays. The vacations are in accordance with the Board's regulations, namely—a week at Easter, a week at Midsummer or in June, and a week at Christmas; total, 3 weeks.

14.—239.

15.—As far as I am able to judge pupils do not, on an average, attend the school after they have arrived at the age of 12 years. Making the date of their entrance at the time of their being four years old, this will give the period of eight years at school; but when the irregular attendance is deducted from the time of remaining at school, I do not think that the actual attendance will be more than three-fourths of the above-named period, that is, six years.

16.—From the knowledge I possess of this district, I believe there are at least 50 children, between the ages of 5 and 15 years, residing in it, who do not attend this or any other school.

17.—The lowest fee is 3d. per week, the highest, 6d.; giving the average weekly charge for each pupil of $4\frac{1}{4}$ d. The annual charge for books is 2s. each pupil. The total annual charge for books is 2s. each pupil. The total annual charge for each pupil is 19s. $2\frac{1}{4}$ d.

18.—The annual amount of school fees received during the specified period is £72 12s. 4d., appropriated to the teachers as part of their remuneration. Amount received from the Board of National Education, £120, being the salary allowed by the Board for the joint services of the male and female teachers. Total amount received from all sources for the support of the school, during the twelve months ending the 30th September, 1858, £192 12s. 4d.

19.—Dividing the last-mentioned total by the average number of the pupils actually attending the school during the period above-mentioned, makes the average annual total cost of the education of each pupil to be £2 6s. $11\frac{3}{4}$ d.

20.—Subjects taught, and time allotted, in each class:—1st class, each day, reading $2\frac{1}{2}$ hours; writing, $1\frac{1}{4}$ hours; arithmetic, $\frac{3}{4}$ hour; and object lessons, $\frac{1}{2}$ hour. Second class, each day, reading, $1\frac{3}{4}$ hours; writing, $1\frac{3}{4}$ hours; arithmetic, $\frac{3}{4}$ hour; geography, $\frac{3}{4}$ hour on Tuesday and Thursday; grammar, $\frac{3}{4}$ hour on Monday, Wednesday, and Friday; and object lessons $\frac{1}{2}$ hour each day. Sequel class, reading, $\frac{3}{4}$ hour; writing, $1\frac{3}{4}$ hours; arithmetic, $1\frac{1}{4}$ hours; geography, $\frac{3}{4}$ hour on Tuesday and Thursday; grammar, $\frac{3}{4}$ hour on Monday, Wednesday, and Friday; dictation, $\frac{1}{2}$ hour on Tuesday and Thursday; and object lessons, $\frac{1}{2}$ hour on Monday, Wednesday, and Friday. Third class, each day, reading, $1\frac{3}{4}$ hours; writing, $\frac{3}{4}$ hours; arithmetic, $1\frac{1}{4}$ hours; geography, $\frac{3}{4}$ hour on Tuesday and Thursday; grammar, $\frac{3}{4}$ hour on Monday, Wednesday, and Friday; dictation, $\frac{1}{2}$ hour on Tuesday and Thursday; and object lessons, $\frac{1}{2}$ hour on Monday, Wednesday, and Friday. 4th class, each day, reading, $1\frac{3}{4}$ hours; writing, $\frac{3}{4}$ hour on Monday, $1\frac{1}{2}$ hours on Tuesday, $\frac{3}{4}$ hour on Wednesday, $1\frac{1}{2}$ hours on Thursday, and $\frac{3}{4}$ hour on Friday; arithmetic, $1\frac{1}{4}$ hours on Monday, $\frac{1}{2}$ hour on Tuesday, $1\frac{1}{4}$ hours on Wednesday, $\frac{1}{2}$ hour on Thursday, and $1\frac{1}{4}$ hours on Friday; geography, $\frac{3}{4}$ hour on Tuesday and Thursday; grammar, $\frac{3}{4}$ hour on Monday, Wednesday, and Friday; dictation, $\frac{1}{2}$ hour on Tuesday and Thursday; and object lessons $\frac{1}{2}$ hour on Monday, Wednesday, and Friday.

Explanations:—In addition to the subjects specified in the above tables, plain and fancy needlework is daily taught for one hour, to all those children whose parents desire them to learn, without any extra charge. Under the head of reading more than half the time specified is occupied in reading and explanations from the Scripture lessons as published by the Board. Writing includes the time occupied in writing on slates from the various lesson books, and is therefore the principal method adopted for teaching, spelling, composition, and punctuation. Geography comprehends that portion of physical geography immediately treating on the tides, currents, winds, and atmosphere. Object lessons consist chiefly of brief lessons on common things, and of lessons in history, biography, zoology, and natural philosophy. The more advanced boys in the highest class work Arnold's first Latin book, and a few of the girls are taught music. This departure from the ordinary routine has been resorted to as an inducement to keep the cleverest pupils at school longer than they would otherwise remain.

21.—First class: Tablet lessons in spelling, reading, and arithmetic, first book of lessons. Second class: Second book of lessons. Sequel class: Sequel book of lessons, Scripture lessons (New Testament, No. 1), English grammar, first book of arithmetic. Third class: Third book of lessons, Scripture lessons (Old and New Testament No. 1 each), first book of arithmetic, English grammar, Sullivan's geography generalized, spelling-book superseded. Fourth class: Fourth book of lessons, Scripture lessons (Old and New Testament, Nos. 1 and 2 each), English grammar, spelling-book superseded, geography generalized, first book of arithmetic, arithmetic in theory and practice, mensuration, easy lessons on Christian evidence, geometry, book-keeping, Arnold's first Latin book, Patterson's zoology for schools (parts 1 and 2). The above books, except two, are published or sanctioned by the Board of National Education. They are in good condition, and under the present system of oral teaching, as pursued in National Schools,—adequate to the wants of the school.

22.—The following maps and diagrams are used in the school: World, Europe, Australia, America, Asia, Africa, Palestine, 2 zoological diagrams, 1 astronomical map, Johnston's illustrations of natural philosophy, 2 diagrams, Nos. 1 and 2. These maps are of full size and

and in good condition; although other maps would be an acquisition, I consider the above sufficient to assist in the communication of a creditable amount of geographical and other useful information; the school is supplied with a black-board and a book-press, and both rooms are well furnished with desks and seats.

23.—Moral influence is mainly relied upon for the preservation of discipline, and with the great majority of the pupils is successful, but among a small class, in every community, moral influence has but little effect in consequence of the children's moral feelings having been completely paralysed by the vitiated atmosphere of their depraved homes. With some children of this class, as well as others, with whom moral teaching has no weight, corporal punishment is resorted to as a *dernier ressort* to bring these unfortunate delinquents to a sense of duty. I have never received any written or other instructions from any Board or person on this subject; at the same time I feel myself bound to admit that I have derived much assistance and benefit in the management of a school, from the Board's head Inspector, Mr. Wilkins, both from verbal suggestions and in witnessing the great tact displayed by this gentleman during his examinations of the school.

24.—The school is occasionally visited by the Rev. Mr. Blain, one of the Local Patrons, and by others, but, as the Board does not sanction the practice of unofficial persons interfering with the duties of the teacher in conducting his school, visitors never examine the pupils, either in reference to their progress or attainments; no prizes or other rewards have ever been given.

25.—The school is officially visited by the Board's head Inspector, Mr. Wilkins, and by the Organizing Master or Sub-Inspector, resident in the district; hitherto, the Inspector has, I believe, visited the school at least once a-year, sometimes oftener; the Sub-Inspector's visits to the school have been about once in 4 months or three times per year; the length of time occupied by the Inspectors in the performance of their duty was about $4\frac{1}{2}$ hours; sometimes it has been more; I have no report on the state of the school in my possession, but such reports, I believe, have been forwarded to the central Board.

26.—George Sanders.

27.—Charlotte Sanders.

28.—George Sanders, Bedfordshire, England; Charlotte Sanders, London, England.

29.—George Sanders, 28 years; Charlotte Sanders, 23 years.

30.—September, 1852.

31.—Trained.

32.—At the Model School, Sydney, two months; second class certificate.

33.—Before attending the Model School, Sydney, 5 years' experience in tuition.

34.—Annual amount of salary for teacher and wife, £120.

35.—Fees, allowances, and emoluments, exclusive of salary, £72 12s. 4d.

36.—Total annual income, £192 12s. 4d.

37.—One hour per day is appropriated to the perusal of the Scripture lessons by the pupils of the three higher classes; on three days per week a quarter of an hour is occupied by the teacher in explaining and enforcing the doctrines and sentiments contained in the general lesson, in accordance with the Board's recommendation. The school is frequently visited by the Rev. Canon Boodle, the Church of England Clergyman at Morpeth; as the Episcopalian Church is in close proximity to the school, Mr. Boodle prefers taking the children of his denomination over to the Church,—and generally visits the school one hour before it closes in the evening, for this purpose; consequently I am unable to say what books are used, none of them being kept in the school. There are two other Clergymen, residents of the village,—a Presbyterian and a Baptist,—but each of these gentlemen has a Sunday school under his own supervision, and both appear quite satisfied with this mode of giving instruction in their own peculiar tenets, as they do not avail themselves of the facility afforded them by the National system.

GEORGE SANDERS.

IRONBARK.

1.—Ironbark, near Wellington.

2.—The schoolhouse is constructed of slabs and bark, and requires new roof.

3.—The area of the building is 540 square feet.

4.—The land adjoining the school for the use of pupils contains about 20,000 square feet.

5.—The water-closets are of bark, in good repair, and provided with cesspools 20 ft. deep.

6.—The schoolroom contains 289 square feet; classroom, 121 square feet; height of ceiling or roof, 10 feet.

7.—The number of pupils usually assembled in the large room is 30.

8.—The schoolroom is ventilated by four doors, two windows, and a large fireplace and chimney; the classroom by two doors and one window.

9.—The annual average number on the books is 60 boys and 40 girls.

10.—The maximum age of males is 16 years, minimum age of ditto 3 years; maximum age of females is 15 years, minimum age of ditto 3 years.

11.—The school is divided into three classes, viz.,—1st, 2nd, and 3rd. The average number of pupils in each class is 13. The maximum age in 1st class is 11 years, minimum ditto 3 years; maximum age in 2nd class 15 years, minimum ditto 6 years; maximum age in 3rd class 15 years, minimum ditto 11 years.

12.—The school duties occupy five hours, as follows,—instruction from 9 to 12, recreation from 12 to 2, instruction from 2 to 4.

13.—Holiday every Saturday; the vacations are 7 days at Easter and 7 days at Christmas, besides which the 26th January, Good Friday, and Queen's Birthday.

14:

- 14.—The total number of days appropriated to school duties during the year is 246.
- 15.—The average length of the period during which the pupils remain in the school is six months.
- 16.—The number of children between the ages of 5 and 15 years, in the locality where the school is situated, is 45.
- 17.—The weekly amount charged to each pupil is from 6d. to 1s. 6d. for instruction, besides which there is a charge of 6d. per quarter made for books.
- 18.—The annual amount of school fees received from the pupils of the school during the twelve months ending September, 1858, was £110 for support of master; book fees, £10; total, £120.
- 19.—The average annual cost of the education of each pupil is £3.
- 20.—During Monday, Wednesday, and Friday—1st class: 9 to 9 $\frac{3}{4}$ writing, 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$ reading, 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$ arithmetic, 11 $\frac{1}{4}$ to 12 geography, 12 to 2 recreation and dinner, 2 to 3 reading, 3 to 3 $\frac{1}{2}$ writing, 3 $\frac{1}{2}$ to 4 singing. 2nd class: 9 to 9 $\frac{3}{4}$ reading, 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$ writing, 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$ geography, 11 $\frac{1}{4}$ to 12 arithmetic, 2 to 3 writing, 3 to 3 $\frac{1}{2}$ reading, 3 $\frac{1}{2}$ to 4 singing. 3rd class: 9 to 9 $\frac{3}{4}$ writing, 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$ reading, 10 $\frac{1}{2}$ to 11 $\frac{1}{4}$ grammar, 11 $\frac{1}{4}$ to 12 arithmetic, 2 to 3 Scripture lessons, 3 to 3 $\frac{1}{2}$ geography, 3 $\frac{1}{2}$ to 4 singing. During Tuesday and Thursday the same length of time as the foregoing is allotted to each subject, but at a different period of the day. In addition to the above subjects, object lessons are given by the master, and instruction in needlework by the mistress.
- 21.—The following is a list of the titles of all books used in the several classes in the school, which is a mixed school:—1st class: First reading book. 2nd class: Second reading book, first book of arithmetic, English grammar, object lessons by Dr. Mayo, outlines of geography. 3rd class: Third reading book, arithmetic in theory and practice, English grammar, Sullivan's geography, object lessons, Hullah's manual of singing. The third class also reads the following religious books,—Old Testament, Scripture lessons No. 1; ditto ditto No. 2; New Testament, Scripture lessons No. 1; ditto ditto No. 2. All the above books are in good repair; no other kinds are needed at present; the number, also, is quite sufficient.
- 22.—The only maps in use at present are two small ones—the World and Australia; two larger ones are required; there are no prints, diagrams, or instruments; the only apparatus is a black-board and chalk; a set of descriptive natural history prints are required.
- 23.—Children are punished by being kept in school during hours of recreation, also by losing the chance of reward.
- 24.—The pupils of the school were examined in December, 1858, by the master, when pictorial Scripture pieces were given to deserving children at his own cost.
- 25.—The school is visited and inspected by the officers of the National Board of Education once a quarter, when about five hours are devoted to the inspection. The master takes this opportunity of remarking that intemperance, on the part of the parents, is almost the sole cause of the present scanty attendance of children; were the parents, generally speaking, sober in their habits, they would feel greater interest in the real welfare of their offspring, and the number of scholars might be increased to between 60 and 70. The Local Patrons are about to make an effort to augment the attendance by calling upon the parents, individually, to induce them to send their children to school.
- 26.—The head teacher's name is Robert Austin Stace.
- 27.—The name of the mistress is Maria Stace; there are no monitors.
- 28.—Master, born at Dover, Kent, England. Mistress, born at Farcham, Hants, England.
- 29.—Master, 39 years of age. Mistress, 46 years of age.
- 30.—Date of appointment, 1st December, 1858.
- 31.—Not trained as a teacher.
- 32.—Possessing certificate of competency from the Revd. Benjamin Glennie, formerly of Brisbane, Moreton Bay, but now residing at Drayton, Darling Downs.
- 33.—The head teacher's experience in teaching, before undertaking present appointment, consisted of 2 years 4 $\frac{1}{2}$ months conductor of the Church of England School at Brisbane, Moreton Bay; 1 year and 10 months carrying on private school in this locality; total, 4 years 2 $\frac{1}{2}$ months; besides which may be stated various engagements as teacher of adult classes on Hullah's and Mainzer's systems of singing, prior to 1858; also engagement as conductor of the Moreton Bay Amateur Choral Society, established in 1851. The schoolmaster's business before adopting that of teacher, was master decorative upholder.
- 34.—The annual salary of head teacher is £60.
- 35.—School fees, about £100.
- 36.—The total annual income of the master and mistress is £160.
- 37.—There is no Minister of Religion residing within 25 miles of this locality; but religious instruction, according to the contents of the Scripture lesson books, is given by the master every afternoon.

R. A. STACE.

MOUNT MACQUARIE.

- 1.—Mount Macquarie, parish of Neville, District of Carcoar.
- 2.—The school is built of slabs and covered with bark, and plastered inside, and is in good condition.
- 3.—The number of superficial square feet in the school, 312.
- 4.—The playground contains 43,560 square feet.
- 5.—The water-closets are convenient.
- 6.—The number of cubic feet in the school are 4,056 feet.
- 7.—The average number of pupils that attend the school are 22.

- 8.—The school is well ventilated with two windows that open.
- 9.—The number of children on the rolls are 8 boys and 14 girls. I cannot give the annual average as the school only commenced 1st December, 1858.
- 10.—The average age of 8 boys, $7\frac{1}{4}$ years; and 14 girls, $7\frac{2}{9}$ years.
- 11.—There are two classes in the school. The average age of the 1st class, $7\frac{2}{3}$; and of the 2nd, $8\frac{1}{3}$ years.
- 12.—There are six hours per day for teaching, Saturday and Sundays excepted. The hours of attendance are from 9 A.M. till 12 at noon, and from half-past 1 P.M. till half-past 4 P.M.; one hour per day in the playground swinging and skipping with ropes.
- 13.—The number of holidays during the week are Saturday and Sunday. The yearly vacations are one week at Christmas, one at Easter, and one at Midwinter.
- 14.—The total number of days appropriated to school studies during the year are 245.
- 15.—All the children that are entered on the register attend the school, so I have no dismissals.
- 16.—There are 28 children in the locality, between 5 and 15 years of age, who do not attend the school, because it is not in a central position.
- 17.—The weekly fee for each pupil 1s., and 1s. per quarter for books. The total amount for one year, £2 16s.
- 18 & 19.—I cannot give you a satisfactory answer to the 18th and 19th questions, as the school only commenced operation on the 1st December, 1858.
- 20.—The instructions that are given in the school are—reading Scripture lessons one hour per day; reading moral lessons, one hour per day; writing, one hour per day; arithmetic, one hour per day; grammar, one hour per day; geography, thirty minutes per day. The remaining thirty minutes for recess and calling the rolls.
- 21.—The books that are in use in the 1st class are—the first and second books of lessons, and those used in the 2nd class are the sequel and Scripture lessons, and they are all in good condition, and a sufficient quantity.
- 22.—There are 7 copy-books and 10 slates in use. There are no maps in the school.
- 23.—The system of correction in the school is an extra lesson after school-hours. The instructions that I receive are from the Inspector of National Schools.
- 24.—The pupils have not been examined yet as the school is only in its infancy.
- 25.—The school is officially visited by the Inspector of National Schools. There are no reports on the books.
- 26.—Name of male teacher, John Latimer.
- 27.—Name of assistant teacher, Elizabeth Latimer.
- 28.—Birthplace of male teacher, Langholm, Scotland; birthplace of female teacher, Manchester, England.
- 29.—Age of male teacher, 32 years; age of female teacher, 33 years.
- 30.—Appointed to the present office, 1st December, 1858.
- 31 & 32.—Not trained as teacher.
- 33.—Was teaching in the said district for three years previous to this appointment.
- 34.—Salary for both teachers, £60 per annum.
- 35.—The amount of school fees is at the rate of £57 per annum.
- 36.—The total amount of salary is at the rate of £117 per annum for both teachers.
- 37.—The religious instructions that are given are by the teachers, one hour per school-day. No Clergyman has attended as yet.

JOHN LATIMER.

MERRIWA.

- 1.—Merriwa.
- 2.—Wood; stone chimneys; condition fair; requires enlargement and improvement.
- 3.—877.
- 4.—One acre.
- 5.—One water-closet, wood; fair condition.
- 6.—Only one room; 375 square feet, 3,244 cubic feet.
- 7.—38-63.
- 8.—3 small windows and one door.
- 9.—On books, males, 26; females, 27. Average attendance, males, 20; females, 18-62.
- 10.—Males, maximum age, 17; minimum age, 5. Females, maximum age, 15; minimum age, 4.
- 11.—3 classes. Average number in 1st class, 8; maximum age, 7; minimum age, 4. 2nd class, 20; maximum age, 12; minimum age, 5. 3rd class, 15; maximum age, 17; minimum age, 9.
- 12.—Five hours, from 9 o'clock till 12 o'clock, and from 2 o'clock till 4 o'clock; the interval for dinner is from 12 till 2.
- 13.—Saturday in each week; the vacations are a week at Christmas, a week at Easter, and a week at Midwinter.
- 14.—245 school days in each year.
- 15.—Two and a half-years, as nearly as I can ascertain, from the imperfect data at my command.
- 16.—Four.
- 17.—Twelve shillings per quarter; the pupils purchase the books as they require them. Total annual charge, £2 8s.
- 18.—Fees, £110, appropriated to support of teacher; from Government, £120. Total, £230.

19.—Total average cost per child, £5 19s. 1d.

20.— FIRST CLASS.

	Reading.	Writing.	Arithmetic.	Object lesson.	Singing.	Recreation and drill.	Total Hours each day.

THIRD CLASS.

	Reading.	Writing.	Arithmetic.	Mental arithmetic.	Dictation.	English grammar.	Composition.	Geography.	Scripture lessons.	Vocal music.	Physical science.	Needlework for all girls.	Recreation and drill.	Total number of hours at school each day.
	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.	hours.
MONDAY	¾	1	5
TUESDAY	1	1	5
WEDNESDAY	1	5
THURSDAY	1	5
FRIDAY	1	5

21.—In the first class, reading book No. 1, on sheets, in glass frames; second class, reading book No. 2, sequel to ditto, arithmetic, No. 1, and Scripture lessons, New Testament, No. 1; third class, reading book, No. 3, arithmetic, No. 1, English grammar, Sullivan's geography and history, and Old and New Testaments, No. 1 (Scripture lessons).

22.—No prints, no diagrams; five large maps in good condition, master's desk, clock, belonging to teacher. Desks and forms sufficient for present requirements. Needed—3 large maps, plates of subjects in natural history, diagrams for illustrating subjects in popular astronomy, the steam engine, and practical mechanics, a set of Hullah's music lessons on sheets.

23.—These are various, according to circumstances, chiefly by the cultivation of, and appeals to, the moral feelings and principles of the pupils, causing an offender to sit or stand apart from his class, detaining him for a short time after the ordinary hours, rendering him ineligible for any office of honor or confidence in the school; if the above should fail in producing the desired effect, and it is known the parents will co-operate with the teacher, dismiss the offender with a note to his parents describing his conduct, and refuse his entrance to the school till he brings a reply from his parents. Corporal punishment is never employed but with the youngest children, and rarely in their case. I have never received any instructions from any superior officer, or governing body, on this head.

24.—Once a month by the Local Patrons; prizes of books, and for excellence in needlework, fancy goods, are given by the Local Patrons at the annual public examination.

25.—By the Inspector and Superintendent of National Schools, or an officer under his directions. Once, two days. Copy of last report:—

“ 15th December, 1858.

“ Visited this school to-day and found 42 pupils present, neat, clean, and orderly, “ and making satisfactory progress.

“ WM. M'INTYRE.”

Present condition of the school much the same as when last examined.

26.—John Henry Murray.

27.—Assistant for needlework, M. A. Murray.

28.—Ballintra, Ireland, and Richmond, England.

29.—35 and 32.

30.—19th August, 1857.

31.—Trained.

32.—Glasgow, 7 months, Section A, Second Class.

- 33.—Teaching since 1842; no previous occupation.
 34.—Teacher's annual salary, £120.
 35.—£110.
 36.—£230.
 37.—General religious instruction one hour each day, and moral training, as circumstances require, by the teacher. No Minister of Religion visits the school.

J. H. MURRAY,
 Teacher.

MURRURUNDI.

- 1.—Township and Police District of Murrurundi.
 2.—The school is built of brick, with boarded floor and shingled roof; it is somewhat out of repair—the walls having cracked in some places, apparently from the sinking of the foundation.
 3.—The superficial square feet contained in the area of the schoolhouse are 651.
 4.—The land adjoining the schoolhouse contains 2 acres 1 rood 20 perches, or 11,495 square yards.
 5.—There is one water-closet, built of slabs, with shingled roof; in good repair, but the slabs rather open.
 6.—The schoolhouse contains two rooms and a classroom. The number of superficial and cubic feet contained in each room is as under:—No. 1 contains 283 superficial square feet 6 inches, and 2,291 cubic feet 7·6 inches. No. 2 contains 254 superficial square feet 4 inches, and 2,055 cubic feet 10·4 inches; classroom contains 113 square feet 2 inches, and 914 cubic feet 9·2 inches.
 7.—The average number of children usually assembled in each of these rooms is,—in No. 1, 19 children; in No. 2, 21 children—No. 2 being appropriated to the smaller ones.
 8.—Room No. 1 has 4 windows, 1 outer door, and 1 fireplace; No. 2 has 3 windows, 1 outer door, and 1 fireplace; the classroom has 1 window and 1 outer door.
 9.—The annual average number of children on the books, for the year ending September 30th, 1858, was,—boys, 34·25; girls, 28; total, 62·25. The average daily attendance during the same period, was,—boys, 23·32; girls, 16·23; total, 39·55.
 10.—The maximum and minimum ages of the pupils are,—boys, 13 and 3 years; girls, 12 and 4 years.
 11.—The school is divided into four classes, viz.—1st, 2nd, sequel, and 3rd; the average number in each class, and the maximum and minimum ages, are as under:—

	Average Number.	Maximum Age.	Minimum Age.
1st class	33·25	11	3
2nd class...	10·75	9	7
Sequel	12·0	11	8
3rd class...	6·25	13	9

- 12.—The number of hours during each day that the pupils attend in school is five. School commences at 9 A.M.; at 10½ A.M. there is a recess for 10 minutes; at noon school is dismissed; from noon to 1½ P.M., recreation and dinner; school re-commences at 1½ P.M., and is finally dismissed at 3½ P.M.
 13.—Saturday is a half-holiday; Good Friday is a holiday; the only vacation has been from December 24th to January 2nd inclusive.
 14.—The number of days appropriated to school in the year is 252; this does not include the Saturday forenoons—the attendance on that day being always very small, and most frequently none at all.
 15.—The average length of time during which pupils, from their entrance to their finally leaving school, remain there, is 1 year and 9 months. This average has been taken from the names of 50 children at the commencement of the register book.
 16.—The number of children between the ages of 5 and 15 years in the township of Murrurundi and the adjoining village of Haydnton is estimated at 31, who do not usually attend the school.
 17.—The pupils are charged weekly a sum according to their ages, as follows:—Those under 5 years pay 3d. per week; from 5 to 8 years, 6d.; from 8 to 10 years, 9d.; above 10 years pay 1s; each pupil pays likewise ½d. per week for books; no payment is made by those who do not attend; therefore the total annual charge varies with the attendance and age of the pupil.
 18.—The annual amount of fees received from the pupils, during the 12 months ending September 30th, 1858, was £60 11s. 2d.; of this, £4 8s. 11d. was the contribution to the book fund; the remainder, viz., £56 2s. 3d., was appropriated by the teacher; the amount received from all sources towards the support of the school was as under, viz. :—

Fees received from pupils as above	£56	2	3
Do. for book fund	4	8	11
Teacher's salary per Board of National Education	108	0	0
Allowance for postage	1	0	0
TOTAL	£169	11	2

- 19.—Dividing the above sum, viz., £169 11s. 2d., by the actual number of pupils attending the school during the above-mentioned period, viz., 62·25, gives £2 14s. 5½d. as the average annual total cost of each pupil.

20.—The several subjects taught to all the classes in the school are—reading, writing, arithmetic, grammar, and geography. The portion of time allotted to each subject on each day is as under, viz. :—

Monday :—From 9 A.M. to 10½ A.M., all the pupils read and write; from 10½ A.M. to 11¼ A.M., dictation; thence to noon, grammar; from 1½ P.M. to 2½ P.M., senior classes read the Scripture lessons, junior classes read; from 2½ P.M. to 3½ P.M., senior classes arithmetic, junior classes, tables and arithmetic.

Tuesday :—From 9 A.M. to 10½ A.M., all the pupils read and write; from 10½ A.M. to 11¼ A.M., geography; thence to noon, arithmetic; from 1½ P.M. to 2½ P.M., senior classes read Scripture lessons, junior classes read; from 2½ P.M. to 3 P.M., mental arithmetic; thence to 3½ P.M., grammar.

Wednesday :—From 9 A.M. to 10½ A.M., all the pupils read and write; from 10½ A.M. to 11¼ A.M., senior classes, tables; from 11¼ A.M. to noon, senior classes, object lesson, junior classes, dictation and notation; from 1½ P.M. to 2½ P.M., senior classes read Scripture lessons, junior classes read; from 2½ P.M. to 3½ P.M., senior classes, arithmetic, junior classes, tables and arithmetic.

Thursday :—From 9 A.M. to 10½ A.M., all the pupils read and write; from 10½ A.M. to 11¼ A.M., mental arithmetic; thence to noon, arithmetic; from 1½ P.M. to 2½ P.M., senior classes read Scripture lessons, junior classes read; from 2½ to 3 P.M., notation; thence to 3½ P.M., geography.

Friday :—From 9 A.M. to 10½ A.M. all the pupils read and write; from 10½ A.M. to 11¼ A.M., dictation; thence to noon, grammar; from 1½ P.M. to 2½ P.M., senior classes read Scripture lessons, junior classes read; from 2½ P.M. to 3½ P.M., senior classes, arithmetic, junior classes, tables and arithmetic.

Saturday forenoon :—Reading, writing, and recapitulation of lessons learnt during the week.

The girls are taught needlework during the last hour of every afternoon.

21.—The titles of the books used in the school by the several classes are,—1st class :—1st book of lessons, tablets of the same, and arithmetical tables. 2nd class :—2nd book of lessons. Sequel class :—sequel to 2nd book, Nos. 1 & 2, 1st book of arithmetic, grammar, Scripture lessons. 3rd class :—3rd book of lessons, 1st book of arithmetic, grammar, Scripture lessons. The condition of the books is good, and no more are required.

22.—The maps in the school are,—the World, Europe, Australia. There are besides, a set of tablets of 1st book, a set of arithmetical tablets, 2 tablets of general lesson, and a black-board; all are in good condition.

23.—The correction made use of is corporal, and detention after school-hours. No written or other instructions have been given to the teacher on this subject.

24.—The school is not regularly visited or examined with respect to the progress of the pupils, though the Local Patrons have occasionally done so. No prizes or other rewards are given periodically.

25.—Since the present teacher has held his situation, the school has been officially visited as under, viz. :—March 16th, 1855, by three gentlemen composing a Government Commission, who remained one hour and a half; June 27th, 1856, by Mr. Wilkins, Inspector of National Schools, who remained 3½ hours; July 20th, 1857, by Mr. McIntyre, Inspector, who remained the whole day; December 9th and 10th, 1858, by Mr. McIntyre, who remained one afternoon and all the next day. No reports exist here of which to furnish copies.

26.—Name of teacher, James Harrison.

27.—Assisted by his wife, Mary Harrison.

28.—Both natives of England.

29.—Aged respectively 52 and 49.

30.—Date of present appointment, June 23rd, 1852.

31.—See No. 32.

32.—The teacher attended for two months at the Model National School in Sydney; his certificate of competency being Class 2, Section B.

33.—Had no experience in teaching previously; his former occupation being that of ship-master, and subsequently that of agent.

34.—The joint annual salary of the teacher and his wife is £108.

35.—The fees and emoluments for the year 1858 amounted to £52 0s. 6d.

36.—Making the total annual income for the year 1858, £160 0s. 6d.

37.—The moral and religious instruction is given only by the teacher, viz., the reading and explanation of the Scripture lessons daily for one hour, and three times a-week the general lesson concerning Christian duty. No Clergyman or Minister of Religion has ever visited the school for the purpose of instruction since the present teacher has held his appointment. Five or six years ago a catechist of the Roman Catholic denomination used to attend occasionally, but his last visit was in February, 1855.

JAMES HARRISON,
Teacher.

MEADOW FLAT.

1.—Meadow Flat.

2.—The foundation laid of stone-work; the building exclusively of wood, and weather-boarded; no improvements needed.

3.—The number of superficial square feet contained in the area of the schoolroom is 675.

4.—The number of superficial square yards contained in school-land is 9,680.

5.—The water-closets form one small building, constructed of weatherboards, and separated by a partition; they are not in very good repair.

6.

6.— $16 \times 14 = 224$ feet area in square feet of schoolroom; $14 \times 14 = 196$ feet area in square feet of classroom; $16 \times 14 \times 10 = 2,240$ cubic feet, schoolroom; $14 \times 14 \times 10 = 1,960$ cubic feet, classroom.

7.—Average number of pupils in schoolroom, 29; in classroom, 11.

8.—Ventilation is provided for by three windows in schoolroom; one in classroom.

9.—This school has been re-organized only on the 25th October last, a year's average cannot be accurately made out; but there are 40 on the registry, with an average of 34 pupils; males, 16; females, 24.

10.—Ages of pupils range from 16 years to 5 years; males, 16 to 5 years; females, 14 to 5 years.

11.—Number of classes in the school is three, and the average number in each is 13. The maximum age in first class, 11 years; minimum, 5. Maximum in second class, 12 years; minimum, 6 years. Maximum in third class, 15 years; minimum, 7 years.

12.—Five hours each day, with a cessation of one hour in Summer, and one hour in Winter; this one hour is for dinner and recreation, &c. The school opens at 9 o'clock A.M., and closes at 3 o'clock P.M.

13.—Saturday is given in each week as a holiday, in conformity with the general usage of the Colony. Vacation is given at Christmas and Easter, a fortnight given each time.

14.—The total number of days appropriated to school duties during the year is 233.

15.—This school having been re-opened a few months, the time pupils are allowed to remain from their first entrance cannot be accurately stated.

16.—Twenty-one pupils between the ages of 5 years and 15 years do not attend.

17.—The weekly charge for instruction is 9d.; weekly charge for books, $\frac{1}{2}$ d.

18.—The school commenced on the 25th October, so that the fees cannot be calculated for twelve months; fees go to the teacher. Since October, the fees amount to £20. £12 per annum from a post office. Annual salary from the Board of National Education £84.

19.—As the school is only re-opened a few months, it is nearly impossible to arrive at any correct figure, but from a rough calculation the annual average cost for the education of each pupil might be said to amount to £1 8s. 8d.

20.—First class, spelling and reading, $\frac{3}{4}$ of an hour; writing, $\frac{3}{4}$ of an hour; arithmetic, $\frac{3}{4}$ of an hour; tables and making figures, $\frac{3}{4}$ of an hour. Second class, reading, $\frac{3}{4}$ of an hour, together with explanation; writing from dictation, $\frac{3}{4}$ of an hour; arithmetic, $\frac{3}{4}$ of an hour; grammar and geography, $\frac{3}{4}$ of an hour. Third class, writing, $\frac{3}{4}$ of an hour; arithmetic and tables, $\frac{3}{4}$ of an hour; grammar, $\frac{3}{4}$ of an hour; geography, $\frac{3}{4}$ of an hour. Afternoon, first class, spelling and reading, $\frac{1}{2}$ an hour; arithmetic, $\frac{1}{2}$ an hour; one hour employed by the boys in intellectual questioning on general subjects, and preparing lessons, while girls are employed one hour sewing at plain and fancy needlework. Second and third classes, mental arithmetic, $\frac{1}{2}$ hour; 1 hour writing copies and from dictation; $\frac{1}{2}$ hour, reading Scripture lessons.

21.—First class use first book of lessons, together with first book of arithmetic; second class use second book of lessons, together with first book of arithmetic, grammar, and geography; third class use third book of lessons, arithmetic in theory and practice, spelling-book superseded, grammar, and geography; second and third classes also use the four volumes of Scripture. The condition of the books in use is good; no others are needed, and the number at present in use is adequate to the wants of the school.

22.—A full supply of tablet lessons, visitor's card, table of minimum attainments, general lesson; there are the Maps of the World, Europe, Asia, Africa, America, Australia, and of the Pacific Ocean.

23.—Moral influence is generally adopted, corporal punishment seldom given in order to preserve discipline. The school was organized by Mr. M'Cann, Sub-Inspector, three times in the year, who introduced an improved standard of discipline, and the general improved methods of conducting the school, which are now carried out.

24.—The Inspector visits once a-year; the Sub-Inspector three times a-year; the Local Patrons make occasional visits; all ascertain the improvement made by the children in their respective classes. I dare say that premiums will be given in future to deserving pupils.

25.—The school is officially visited by Mr. M'Cann, Sub-Inspector, and Mr. Wilkins, Inspector. Mr. M'Cann paid three visits to this school during the year, occupying a space of five days; Mr. Wilkins, one visit, which lasted a day.

26.—Michael Tuohy. Margaret Tuohy, his wife, gives instruction to the females in sewing one hour each day.

27.—Margaret Tuohy, his wife, gives daily assistance in reading and arithmetic.

28.—Michael Tuohy, born at Rathmeehan, near Ennis, County Clare, Ireland; Margaret Tuohy, born at Lulla, near Ennis, County Clare, Ireland.

29.—Michael Tuohy, aged 28 years; Margaret Tuohy, aged 21 years.

30.—Michael Tuohy and wife appointed the 15th October, 1858, to the Meadow Flat National School.

31.—Trained.

32.—Trained in the Model School of the Board of National Education, Fort-street, Sydney, for one month; holds a Certificate for £84 annual salary.

33.—A Denominational teacher, and trained as such.

34.—£84 from the Board of National Education, in Sydney, is a joint salary for man and wife.

35.—The supposed income from fees, £52, a dwelling-house, valued at £15 per annum; £12 a-year from a post office.

36.—£79, to which, if Board's annual salary be added, the total will be £163.

37.—The general lesson read on three days in the week, and its principles inculcated on the minds of the pupils. Every opportunity taken to impress upon them the duty of acting uprightly; four volumes of Scripture extracts, two of the Old Testaments, and two of the New, are read one hour daily under the direction of the teacher; visited by a Wesleyan Clergyman, whose residence is contiguous to the school. The titles of the books used in the school for giving religious instruction are No. 1 Old Testament, No. 2 Old Testament, No. 1 New Testament, No. 2 New Testament; also, the sacred poetry book, lessons on Truth of Christianity, and the several class-books, which contain numerous lessons on religion.

MICHAEL TUOHY, Teacher.

NELSON'S PLAINS.

- 1.—Nelson's Plains, Parish of Scamah.
- 2.—A slab building, in good condition.
- 3.—36 feet long by 18 feet wide, $36 \times 18 = 648$ square feet.
- 4.—No ground attached for the use of the pupils.
- 5.—None.
- 6.—648 superficial square feet \times 9 feet high = 5,832 cubic feet.
- 7.—General average of about thirty pupils.
- 8.—Being a slab building there is sufficient ventilation.
- 9.—32 boys and 28 girls on the books; 13 boys and 12 girls is the annual average.
- 10.—They are from 5 to 17 years of age.
- 11.—The school is divided into 3 classes; 17 is about the average number. In the 1st class they are from 5 to 7 years of age, in the 2nd from 7 to 14, and in the 3rd class from 14 to 17 years of age.
- 12.—They attend 5 hours each day, commencing at 9 A.M., and terminating at 4 P.M., allowing 2 hours in Summer, and 1 in Winter, at mid-day, during which time the children go to dinner, and afterwards play themselves about till they are called into school.
- 13.—No holidays given; at Christmas the vacation extended to a fortnight.
- 14.—260 days of school studies during the year.
- 15.—Between 5 and 6 years.
- 16.—There are 40 children between the ages of 5 and 15 in the District who do not attend the school.
- 17.—The annual sum charged to each pupil, together with the annual charge for books, is £1 8s.
- 18.—The annual amount received from the pupils is £18 11s. 6d.; there is nothing received from other sources. The annual cost of the education of each child is 14s. 10½d.
- 19.—Reading, writing, arithmetic, grammar, and geography, are daily taught to the children who attend the school; $\frac{3}{4}$ of an hour are allowed to each of the above subjects, excepting Scripture lessons, to which 1 hour is allowed.
- 20.—Third, sequel, second, and first books are now in use in the school, which are now in good condition; there are no books needed, and the number now in use is quite adequate to the wants of the children.
- 21.—2 of Johnson's illustrations of natural philosophy, and 2 other diagrams, with the maps of Europe, Asia, Africa, America, Australia, England and Wales, Ireland and Scotland, Palestine, and the map of the World. No instruments used in the school; the condition of the books is good.
- 22.—Keeping the children in the school, and taking their dinners from those that bring them, at mid-day, is my system of correction; never received instructions or directions from any person on this subject.
- 23.—This school was examined 4 times last year, 1858, by the Organizing Master, Mr. M'Intyre; neither prizes nor rewards were given.
- 24.—The school is officially visited by Mr. William M'Intyre four times a year, and occupies the whole of the afternoon in the examination of the children. There is no report left on the state of the school.
- 25.—Donald M. Ferguson.
- 26.—None.
- 27.—I was born in the Island of Harris, one of the Hebrides Islands. N.B. Scotland.
- 28.—My age is 28 years.
- 29.—I was appointed as a teacher on the 3rd of August, 1853.
- 30.—I was trained as a teacher.
- 31.—At the National Model, Sydney, for 3 months, possessing Class 3, Section A.
- 32.—I have been teaching under the Denominational Board previous to my present appointment.
- 33.—The amount of my salary is £96 per annum.
- 34.—The annual amount of school fees for the year 1858, was £18 11s. 6d.
- 35.—The total annual amount of the teacher's income during the year 1858, was £114 11s. 6d.
- 36.—The religious or moral instruction of the children comes within the usual routine of the school.

PARADING GROUND.

- 1.—Parading Ground, Parish of Stowel, Police District of Raymond Terrace.
- 2.—The house is constructed chiefly of wood, the fireplaces and chimneys are of brick, all in good condition, and requiring no improvement.
- 3.—The area of the school-buildings contain 1,350 square feet.
- 4.—The ground allotted for drill contains 240 square yards.
- 5.—There are not any water-closets, and they are very much wanted.
- 6.—The schoolroom contains 486 square feet, and 4,860 cubic feet; the room for religious instruction contains 108 square feet, and 1,080 cubic feet.
- 7.—The large room is occupied by the pupils only, and the average attendance is 24.05474.
- 8.—The large room is ventilated by three windows and one door; the small room by one window and one door.
- 9.—The annual average number on the register book is 13.25 males; 27.5 females. The annual average attendance, 6.7038 males; 17.3509 females.
- 10.—The maximum age of the males, 15 years; the minimum, 5 years; the maximum age of the females, 16 years; the minimum, 5 years.
- 11.—Two classes:—1st class consists of 23 pupils; 2nd class consists of 24 pupils; the eldest pupil in the 1st class is 12 years of age, the youngest 5 years; the eldest pupil in the 2nd class is 16 years of age, the youngest 7 years.
- 12.—Five hours are employed each day in teaching. School commencing at 9 A.M. and closing at 4 P.M. in Summer, and 3 P.M. in Winter; at 12 the pupils go to dinner, and return at 2 P.M. in Summer, and 1 P.M. in Winter. Pupils who come from a distance and bring their dinners with them are allowed to play in the grounds belonging to the school during the recess.
- 13.—One holiday each week (Saturday); three vacations in the year—Christmas, Easter, and Midwinter, a week at each.
- 14.—Two hundred and forty days.
- 15.—None of the pupils have been erased from the books, except those who were leaving the district.
- 16.—There are 36 children, between the ages of 5 and 15 years, who do not attend school; 24 of whom have never attended any school.
- 17.—4d. by the week; 16s. 4d. yearly; 2s. yearly for use of books. Total, 18s. 4d.
- 18.—This school opened on the 7th June, 1858, and the sums received up to the 30th September are—teacher's salary, £28; school fees, £4 14s. 8d.; book fund, 19s. 6d., the latter sum has been expended on slates, pencils, and ink, for the use of the pupils; received from all sources for the above period, £33 14s. 2d.
- 19.—The annual total cost for the education of each pupil is £4 5s. 6½d.
- 20.—First class,—1¾ hours, reading; 1¾ hours, writing; arithmetic, ¾ hour; spelling, ¾ hour. Second class,—1¾ hours, reading; 1¾ hours, writing; arithmetic, ¾ hour; geography and grammar, ¾ hour every alternate day.
- 21.—First class pupils are using the first and second book of lessons; second class pupils are using the second book of lessons, arithmetic, English grammar, Sullivan's geography, and spelling superseded. The first lesson books are worn on the backs; all the other books are in good condition, and in quantity equal to the demands of the school. The first and second books of Old and New Testament Scripture lessons are required.
- 22.—There are not any maps, prints, diagrams, or black-boards in the school, and they are all required.
- 23.—Detaining in school after business hours; punishing on the hands with a cane. No instructions received on the subject.
- 24.—Mr. McIntyre, Organizing Master, examined the pupils in the month of June, 1858. There have not been any prizes given in the school.
- 25.—Mr. McIntyre inspected the school once since it has been opened; the examination lasted three hours. There are not any reports on the state of the school.
- 26.—John Wood Johnston.
- 27.—Mary Anna Johnston.
- 28.—J. W. Johnston, Enniskillen, Ireland; M. A. Johnston, Parramatta, New South Wales.
- 29.—Teacher, 31; mistress, 33 years.
- 30.—19th May, 1858.
- 31.—Trained.
- 32.—Model School, Sydney, for two months. Class III, Sec. B.
- 33.—Midshipman, I.N.; auctioneer's clerk.
- 34.—Eighty-four pounds sterling.
- 35.—Allowance for postage, £1; average annual amount of fees, £20 8s. 4d.
- 36.—One hundred and five pounds eight shillings and four-pence sterling.
- 37.—Explaining the general lesson, and teaching the pupils their duty to their neighbour and their God. No Clergyman or Minister of any Religion has visited the school. There are not any religious works in the school.

J. W. JOHNSTON.

PENNANT HILLS.

- 1.—Pennant Hills, South Colo, District of Parramatta.
- 2.—The schoolhouse is built of wood, on stone blocks; brick chimneys. The outside weatherboard, shingled roof; the inside (except kitchen) ceilings and walls plastered; the condition of the building good; partial repairs needed to windows, ceiling of the schoolroom, the plaster on the walls, and to the roof of kitchen. The whole building is small, additional room needed.
- 3.—Total area, 914 superficial square feet, two rooms and kitchen—schoolroom and classroom.
- 4.—The pupils play on unenclosed land adjoining the school premises.
- 5.—One closet, 5 by 5 feet, built of slabs, shingle roof, not weatherproof, without a door, in sight of the public road, now full. No other closet on the premises.
- 6.—Schoolroom, 301 square feet 2' 6", superficial; 2,560 square feet 3' 3", cubic contents. Classroom,—196 square feet 2' 8", superficial; 1,667 square feet 10' 8", cubic contents.
- 7.—Average number,—24 pupils in schoolroom; 18 pupils in classroom.
- 8.—No special provision for ventilation. The schoolroom has 4 windows and fireplace; the classroom has 2 windows.
- 9.—Annual average for the year ending 30th September, 1858:—class roll, male, 26·5; female, 27·0; total, 53·5 Attendance:—male, 20·8; female, 21·33; total, 42·13. The full number of pupils attending some part of the year, 62, as per register.
- 10.—Maximum age,—males, 15½ years; females, 14¾ years. Minimum,—males, 5 years; females, 4 years.
- 11.—Four classes:—first, second, sequel to second, and third. Average number:—first class, males, 7; females, 6. Second class, males, 9; females, 9. Sequel class, males, 5; females, 6. Third class, males, 5; females, 6. Age of pupils:—first class—maximum, male, 8¼ years, female, 9 years; minimum, male, 5 years, female, 4 years. Second class—maximum, male, 10¾ years, female, 10½ years; minimum, male, 7½ years, female, 6½ years; Sequel class—maximum, male, 12 years, female, 12 years; minimum, male, 10½ years, female, 9¾ years. Third class—maximum, male, 15½ years, female, 14¾ years; minimum, male, 12½ years, female, 10½ years.
- 12.—The pupils attend six hours each day. The school duties commence at 9 A.M., and terminate at 3 P.M. A recess for 10 minutes at 10½ A.M., and for 1 hour, from 12 to 1 o'clock, at mid-day, for lunch and recreation. The amusements of the males,—cricket, marbles, leaping with poles; of the females,—singing and needlework.
- 13.—The holidays are Saturday in each week, also the Queen's Birthday, and the Anniversary of the Colony. The vacations, one week at Christmas, one week at Easter, and one week at Midwinter.
- 14.—244 days appropriated during the year to school duties.
- 15.—About 2 years is the average period during which pupils attend school. The attendance of many has been broken by intervals of an absence for one and two quarters; some have attended only for one quarter.
- 16.—The number of children in this locality, *not* attending school, is,—males, 16; females, 22; total, 38.
- 17.—No settled charge for instruction. The sum received varies from 1s. 6d. to 6s. 6d. quarterly for one pupil. A charge for book fund of 6d., and for pens, ink, and pencils, 6d., both quarterly. The book fund to each pupil, the other charge to those who write in books. Copy-books charged if furnished. Total annual charge for one pupil:—Maximum—tuition, £1 6s.; book fund, 2s.; pens, &c., 2s.; copy-books about 4s.; total, £1 14s. Minimum—tuition, 6s.; book fund, 2s.; total, 8s.
- 18.—The school fees received during the year ending the 30th September, 1858:—tuition, £28 15s., appropriated as teacher's income; book fund, 1 quarter, 14s. 6d., to the purchase of books; charge for ink, &c., 1 quarter, 12s. 6d., to the purchase of those articles; total fees, £30 2s. Salaries—Mr. Rutter, 1 quarter, £36; Mr. Matthews, 1 quarter, £36; Mr. C. Lester, 2 quarters, £42; books, £2 11s. by order of the Board of National Education; total from all sources, £146 13s.
- 19.—£146 13s. ÷ 53·5 = £2 14s. 10d., annual average cost for each pupil.
- 20.—Subjects of instruction:—First class, alphabet, reading, spelling, writing figures and letters on slates, counting and adding simple numbers. Second, sequel, and third classes—reading, spelling, writing, arithmetic, grammar, and geography. Allotment of time, commencing at 9 A.M.:—
 First class (each day),—¾ hour, letters and figures on slates; ¾ hour, reading and spelling; ¼ hour, recess; 1½ hour, reading, spelling, counting, adding simple numbers; 1 hour, lunch and recreation; 1 hour, letters and figures; 1 hour, reading, counting, &c.; total, 6 hours.
 Second class, Monday, Wednesday, Friday,—¾ hour, reading and spelling; ¾ hour, writing; ¼ hour, recess; ½ hour, arithmetic and tables; ¾ hour, grammar; 1 hour, recreation; ½ hour, writing in books; ½ hour, writing on slates from books; ½ hour, reading and spelling; ½ hour, arithmetic; total, 6 hours. Tuesday and Thursday,—¾ hour, reading and spelling; ¾ hour, writing in books; ¼ hour, recess; ½ hour, arithmetic; ¾ hour, geography; 1 hour, recreation; ½ hour, writing in books; ½ hour, writing on slates from books; ½ hour, reading and spelling; ½ hour, arithmetic; total, 6 hours.
 Sequel class, Monday, Wednesday, Friday,—½ hour, reading and spelling; ½ hour, writing; ½ hour, grammar; ¼ hour, recess; ½ hour, geography; ¾ hour, arithmetic; 1 hour, recreation;

recreation ; 1 hour, Scripture lessons ; $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, writing on slates ; total, 6 hours. Tuesday and Thursday,— $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, reading and spelling ; $\frac{1}{2}$ hour, grammar ; $\frac{1}{4}$ hour, recess ; $\frac{1}{2}$ hour, dictation and grammar ; $\frac{3}{4}$ hour, arithmetic ; 1 hour, recreation ; 1 hour, Scripture lessons ; $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, arithmetic ; total, 6 hours.

Third class, Monday, Wednesday, Friday,— $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, reading and spelling ; $\frac{1}{2}$ hour, grammar ; $\frac{1}{4}$ hour, recess ; $\frac{1}{2}$ hour, geograghy ; $\frac{3}{4}$ hour, arithmetic ; 1 hour, recreation ; 1 hour, Scripture lessons ; $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, arithmetic ; total, 6 hours. Tuesday and Thursday,— $\frac{1}{2}$ hour, reading and spelling ; $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, grammar ; $\frac{1}{4}$ hour, recess ; $\frac{1}{2}$ hour, dictation and grammar ; $\frac{3}{4}$ hour, arithmetic ; 1 hour, recreation ; 1 hour, Scripture lessons ; $\frac{1}{2}$ hour, writing ; $\frac{1}{2}$ hour, writing on slates ; total, 6 hours. The female pupils employ the last hour in needlework. The duties commence with a portion of the general lesson, addressed to all the pupils, and terminate with singing a hymn, and all the pupils repeating the portion of the general lesson.

21.—Titles of the books in use by the several classes :—First class—first book of lessons ; second class—second book of lessons ; sequel class—sequel to second book No 1, first book of arithmetic, introduction to geography, Scripture lessons, Old Testament No. 1, New Testament No. 1 ; third class—third book of lessons, first book of arithmetic, introduction to geography, Scripture lessons, the four books. The Scripture lessons are worn and soiled, the other books in good condition. Other books suitable for each class are needed. The number of the books in use is adequate.

22.—The maps are :—Australia, England and Wales, Palestine (constructed for the National Schools of Ireland), World (two Hemispheres), published by the Society for Promoting Christian Knowledge ; all in good condition. Maps of the divisions of the earth and object lessons are needed. No prints, diagrams, instruments or apparatus in the school.

23.—The chief means of correction is restricting the offender from joining the other pupils in their recreation ; a stripe on the hand or across the shoulders, the greatest punishment, is not frequent ; but it is needful that the pupils know it may be applied. No instruction on this subject.

24.—No examination nor distribution of prizes.

25.—The Inspector has visited the school once in each year ; no record of the time occupied in examination. No report on the state of the school. There is an improvement in the attention given by the pupils to instruction.

26.—Charles Lester.

27.—Mary Ann Lester, wife of teacher.

28.—Charles Lester,—Windsor, Berkshire, England. Mary Ann Lester,—Heligoland, North Sea, Europe.

29.—Charles Lester, 47 years. Mary Ann Lester, 39 years.

30.—1st July, 1858.

31.—Trained.

32.—At the Model School, Sydney. Six weeks. Certificate, Class III, B.

33.—Mercantile book-keeper.

34.—£84 annually, teacher's salary.

35.—Fees paid for tuition. No other allowance or emolument.

36.—Total annual income of teacher :—salary, £84 ; fees, $\frac{1}{2}$ year received, £16 16s. 6d. ; fees, $\frac{1}{2}$ year estimated, £20 ; total (probable), £120 16s. 6d.

37.—Religious and moral instruction is given in connection with the general lesson, and with the Scripture lessons, daily, by the teacher. The school has never been visited by a Clergyman or Minister of Religion for the purpose of instruction. Scripture lessons.

CHARLES LESTER.

Teacher.

PURFLEET.

1.—Purfleet, Manning River.

2.—The school-building is constructed of wood, the teacher's residence is in need of a little repair.

3.—663 superficial square feet are contained in the area of the schoolhouse.

4.—2,420 superficial square yards are contained in the ground for the use of the pupils.

5.—The water-closets for the use of the pupils are constructed of wood and are in good order.

6.—The classroom contains 208 square feet, and 2,288 cubic feet ; the schoolroom contains 408 square feet, and 4,488 cubic feet.

7.—The average number assembled in both rooms is 23.

8.—The windows and doors are open all day for the ventilation of the rooms.

9.—15 boys and 16 girls, are the annual average number on the books ; and 10 boys and 11 girls are the annual average number attending the school.

10.—The maximum age of boys, 13 ; minimum age of boys, 4. Maximum age of girls, 15 ; minimum age of girls, 4.

11.—The school is divided into three classes, the average number in each class, is—1st class, 10 ; 2nd class, 11 ; and 3rd class, 13. The maximum age—1st class, 7 years ; minimum, 4 years. Of the 2nd class, the maximum age is 10 years ; minimum, 6 years. Of the 3rd class, the maximum age is 15 years ; minimum, 10 years.

12.—The pupils attend school during 5 hours of the day, commencing at 9 A.M., and terminating at 12 noon ; commencing again at 1 P.M., and closing at 3 P.M. ; the interval hour allowed for dinner and recreation.

13.—The pupils have Saturday in each week as a holiday; there are three vacations during the year, one week at Easter, one week at Christmas, and one week at Midwinter.

14.—The number of days appropriated for school studies during the year is 232.

15.—As the school has only been in existence 2 years, I cannot give any accurate information on the subject.

16.—The number of children who do not attend the school in this locality is 25.

17.—The sum charged for each pupil attending the school is 6d. per week, but where there are three in one family it is reduced to 4d. per week; or four of one family, 3d. per week; and one half-penny per week is charged for books.

18.—The annual amount of school fees received for the time required is £22 6s. 9d., which fees are appropriated by the teacher; no other sums are received towards the support of the school.

19.—The average total cost for the education of each pupil is 18s. 7d.

20.—The 1st class are instructed in reading, writing on slates, and the art of computing numbers; the 2nd class are instructed in reading, writing on slates, the first simple rules of arithmetic, dictation on slates, and outlines of grammar and geography; the 3rd class are instructed in reading, writing on copies, the higher branches of arithmetic, grammar, geography, and dictation. The time allowed for such studies is as follows:—writing, $\frac{3}{4}$ of an hour daily; reading, $1\frac{1}{2}$ hours daily; arithmetic, 1 hour daily; grammar, $\frac{3}{4}$ of an hour daily; geography, $\frac{1}{2}$ an hour daily; and dictation on slates, 3 days in the week.

21.—The books used in this school are those that are published under the direction of the Commissioners of National Education; they are in fair order, and no other kind is required.

22.—The maps used here are—the World, Africa, America, Australia, Ireland, Scotland, and Johnstone's illustrations of natural philosophy; maps of Europe and Asia are required.

23.—No corporal punishments are allowed, detention after hours is employed to preserve discipline. I have no written or verbal instructions as regards correction.

24.—No set time of the year is appointed to examine the pupils, no prizes have ever been given.

25.—The school is officially visited by the Inspector General and Sub-Inspector when the pupils are examined; have no report of their visits.

26.—Richard Henry Jarman.

27.—No assistant teachers, pupil teachers, or monitors.

28.—Born at Bowness, Cumberland, England.

29.—31 years of age.

30.—Appointed to present office 15th February, 1859.

31.—Yes.

32.—Trained at Fort-street Model School for one month, and possessing certificate, Class 3, Section A.

33.—Taught a private school before being appointed; business before adopting teaching, chemist and druggist.

34.—Present salary, £96 per year.

35.—School fees for the year ending 1858, £20 19s. 6d.

36.—Total income of teacher annually, £116 19s. 6d.

37.—The pupils that can read are instructed in the Scripture lessons, appointed by the Commissioners of National Education, every day by the teacher.

TAMBAROORA.

1.—Tambaroora.

2.—The materials are altogether of wood; few repairs are needed.

3.—The schoolhouse contains about 308 superficial square feet.

4.—The enclosed ground adjoining the school contains 437 square yards.

5.—There is one water-closet, built of slabs, and in tolerable condition.

6.—In the larger room there are 196 square feet, and 1,568 cubic feet. In the smaller, 112 square feet, and 896 cubic feet.

7.—The average number of pupils usually assembled in the larger room has been about 12. The smaller has not been occupied.

8.—The rooms are ventilated by means of 2 windows, 2 doors, and 1 fireplace.

9.—The average annual number on the books has been about 12, 8.5 being males, and 3.5 females. The present average is 15, 11 males and 4 females.

10.—The maximum age of the male pupils is 12 years, the minimum, 4; of the female pupils the maximum is 13, and the minimum, 3.

11.—There is only one class, in three divisions. In the first the average number is 4; the maximum age, 13; the minimum, 8. In the second the average number is 3; the maximum age, 11; the minimum, 6. In the third the average number is 5; the maximum age, 6; the minimum, 3.

12.—The pupils attend school 5 hours each day: from 9 to 12, and from 2 to 4; the interval from 12 to 2 is occupied in going home for dinner.

13.—In each week there is one half-holiday,—Saturday afternoon; and three vacations of one week each,—one at Christmas; one at Easter; and one in Winter.

14.—The total number of days appropriated to school duties yearly is 295.

15.—The average length of the period during which pupils attend school is, perhaps, from two to three years.

- 16.—The number of children between the ages of 5 and 15 years, who do not usually attend school, must be at least 60.
- 17.—The average weekly sum charged to each pupil for instruction is 1s.; the annual charge for books is 2s.; and the average total annual charge for each pupil is £2 11s.
- 18.—The annual amount of school fees received from the pupils of the school during the twelve months ending the 30th September, 1858, might have been about £50, which was appropriated to the teacher's use. This answer and some others can only be approximations, from the impossibility of obtaining reliable information.
- 19.—Assuming the foregoing to be nearly correct, the average total annual cost of the education of each pupil must have been between 3 and 4 pounds sterling.
- 20.—The first and only class receives instruction in spelling, reading, writing, and arithmetic, in nearly equal proportions.
- 21.—The first book of lessons is the one in use. The books are new, and, consequently, in good condition, but the number is very inadequate, even for present requirements. These few books have been purchased on the spot by the present teacher at five times their real value. A general supply is urgently wanted, the more so as there is the prospect of a greatly increased attendance.
- 22.—There are no diagrams, no maps, no instruments, nor any other school apparatus but slates and pencils, pens and ink. There are the general lessons, the notice to visitors, the table of minimum attainments, and the time table.
- 23.—Moral influence is general found sufficient for the preservation of discipline; corporal punishment is rarely resorted to. No instructions.
- 24.—It does not appear that there have been any examinations or any prizes.
- 25.—The school was officially visited and inspected twice during the latter part of the year 1858, by Mr. M'Cann, Sub-Inspector of National Schools; two days were occupied in the performance of this duty. No report seems to exist except what Mr. M'Cann may have forwarded to the Board.
- 26.—William G. Cochrane is the name of the present, J. Harford that of the former teacher.
- 27.—No assistant teacher, pupil teachers, or monitors exist.
- 28.—Birthplace of present teacher, Londonderry, Ireland.
- 29.—Age, 32.
- 30.—Appointed to present office, March, 1859.
- 31.—Not trained as teacher.
- 33.—Eighteen months experience in teaching. Gold-digger previously.
- 34.—£60 per annum.
- 35.—Fees will amount to £40 or £50; no other emoluments.
- 36.—£110, total annual income of teacher derived from school.
- 37.—The moral truths and Christian precepts contained in the ordinary reading books are daily inculcated to all the children. The Scripture lessons (4 vols.) are also read every day for one hour by all the children whose parents or guardians do not object to their doing so; and the classroom will be appropriated to the use of any Clergymen or their duly appointed deputies, for the purpose of giving special religious instruction to the children of their own denomination during any day in the week.

WARATAH.

- 1.—This school is situated at Waratah, in the District of Newcastle.
- 2.—The building is constructed of wood, and is in proper condition; and large enough for the present population.
- 3.—The building contains 351 square feet in area.
- 4.—The playground attached to the building contains 4,356 square feet; and the bush is open on the other side.
- 5.—The water-closet is of wood, and requires repair.
- 6.—The building contains 351 square feet, namely— $26 \times 13\frac{1}{2}$, which, multiplied by the height of wall, ($9\frac{1}{2}$ feet) gives 3,335 cubic feet in the building, there being no partition.
- 7.—The average attendance during the quarter ending 25th December, 1858, was 32.7.
- 8.—Ventilation is provided for by the opening of the windows top and bottom.
- 9.—The average number on the books for the year 1858, was—boys, 22.3; girls, 22.3; total, 44.6; and the average number present was—boys, 13.5; girls, 16.0; total, 29.5.
- 10.—The maximum and minimum ages of the boys were 17 and 3 years; and of the girls, 13 and 3 years.
- 11.—The school is divided into two classes—the maximum and minimum ages of the 1st class are 17 and 3 years; in the 2nd class, 13 and 7 years.
- 12.—The hours of attendance are from 9 A.M. to 3 P.M., with an interval of an hour, namely—from 12 A.M. to 1 P.M., which is employed in dining and recreation.
- 13.—The whole of Saturday in each week is a holiday; the other holidays and vacations are the Anniversary of the Colony, the Queen's Birthday, Good Friday, Easter Monday, and Christmas holidays, being from the 24th December to 2nd January inclusive.
- 14.—The total number of days appropriated to school duties during the year is 249.
- 15.—The school having been in operation only 8 months, the teacher is not in a position to say how long the pupils remain before finally leaving school.

16.—The population of the district is so very scattered that the teacher can form but a vague idea of the number of children between the ages of 5 and 15 years who do not attend the school; but should estimate them between 30 and 40.

17.—The weekly fees for each pupil are from 4d. to 6d. per week, and for books $\frac{1}{2}$ d. per week, making an annual total of from 19s. $1\frac{1}{2}$ d. to 27s. $7\frac{1}{2}$ d. for each pupil.

18.—In the year 1858 the school was in operation only one month and a half previous to the 30th September, namely, from the 16th August,—during that time the amount received for school fees was £3 11s. 4d., which was appropriated to increase the teacher's income. Salary received from Government for one month and a half at £50 per annum was £6 5s.; from other sources, nothing; total amount of support for that period, £9 16s. 4d.

19.—The average cost of the education of each pupil for the above-mentioned period was 6s. $6\frac{1}{2}$ d., or £2 12s. 4d. per annum.

20.—The subjects of instruction, and the time devoted to each subject, are in each class specified in the following Time Table :—

TIME TABLE.

HOOR.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.
8 $\frac{1}{2}$ to 9 ..	Prepare school for business, and inspect pupils as to cleanliness.				
9 to 9 $\frac{1}{4}$..	(a) Reading (b) Arithmetic (a) Writing	(a) Arithmetic (b) Writingslates (a) Exd. subject	(a) Object lesson (b) Mental arith. (a) Writing	(a) Reading (b) Arithmetic (a) Writing	(a) Reading (b) Arithmetic (a) Writing

2 to 3 ..	Girls—needle-work	Girls—needle-work	Girls—needle-work	Girls—needle-work	Girls—needle-work

(a) Junior class includes pupils in the different divisions of the first class.
(b) Senior division includes pupils in the sequel and second classes.

21.—In the 1st class, 1st and 2nd reading books; in the 2nd class, sequel to 2nd book and 3rd reading books, 1st book of arithmetic and Scripture lesson books.

22.—1 map of the World (Mercator's projection); 1 map of Australasia; black-board, 4 feet by 5 feet; 1 desk, 20 feet long; 1 desk, 12 feet long; 10 seats, each 8 feet long—all in tolerable condition, but furniture rather rough.

23.—Correction—loss of rank in class—remaining in school during play-hours. Corporal punishment—no instructions on this subject.

24.—Since the establishment of the school (16th August, 1858), it has been examined once by the Revd. Mr. Chaucer, and the other members of the Local Board; no prizes awarded.

25.—The school was organized by Mr. Inspector M'Intyre, but has not since been officially examined, with the exception noted in the answer to the question No. 24.

26.—Maria Christie.

27.—None.

28.—Newburgh, Fifeshire, Scotland.

29.—21 years

30.—9th August, 1858.

31.—Not thoroughly trained as a teacher.

32.—Partly trained at the Fort-street Model School for a period of 6 weeks; possessing a letter, B Certificate, (3rd class) of competency.

33.—Two years employed as governess.

34.—Annual amount of salary of teacher, £50 per annum, exclusive of school fees.

35.—£25.

36.—£75.

37.—No religious instruction given; the school has only been visited by the Revd. Mr. Chaucer, as a member of the Local Board, and fortnightly in public; Denom. Presbyterian Clergyman; book used—Bible, without comment.

WARWICK.

The schoolhouse is constructed of timber, and is in tolerable repair; the only improvement, at present, is a detached residence for the teacher.

The area of the school contains 900 square feet, independent of a skillion, 50×10 , and verandah, 50×7 ; and the area of the playground about 2,420 yards.

The water-closets for the use of the pupils have been recently constructed at the extremity of the playground, of ironbark slabs on sleepers, over a cesspool fifteen feet in length, seven in breadth, and five in depth; they are suitably divided for the sexes.

The principal schoolroom is 30 feet long, 18 feet wide, and 9 feet high; the other room, which is also used by the teacher as a sitting-room, is 20 feet long by 18 feet wide, and 9 feet high.

The number of children in each room varies so considerably, that no correct data can be put down.

The ventilation in the larger schoolroom is provided for by three folding windows, and the other by two.

The average number on the books for the year 1858 was 78, being $36\frac{1}{2}$ boys, and $41\frac{1}{2}$ girls; the average attendance, boys, 24.9, and girls, 24.8; the maximum age of the boys was 14 years, and the minimum 3 years,—girls the same.

The school is generally divided into six classes, and one-half of the children are usually in some division of the first class.

The number of hours during each day the pupils attend the school are seven, commencing at 9 A.M., and terminating at 4 P.M., with one interval of two hours at noon, and one quarter of an hour from 10.30 to 10.45 A.M. These intervals are passed by the boys in gardening and various games, including cricket; the girls in walking about.

The whole of Saturday is appropriated as a holiday.

There are three vacations—at Christmas, about ten days; at Easter, one week; and at Midwinter, one week;—about 240 days are devoted to school studies during each year.

The average length of the period during which the pupils remain at the school cannot be determined, owing to the infant state of the district and the shifting nature of the population.

Not having a copy of the Census, I am unable to name the number of children resident in the District who do not attend the school.

The weekly fee charged for one pupil is 8d., for two pupils in the same family 6d. each, and for three in the same family, 4d. each; in addition to the above, each pupil pays 2s. per annum for printed books, and those in the third class about 3s. for writing books.

The total annual charge for each pupil during 1858, was about eighteen shillings and seven-pence three farthings.

The annual amount of fees received during the twelve months ending 30th September, 1858, was £71 17s. 4d. £66 11s. was appropriated in augmentation of the teacher's salary, and £5 6s. 4d. to the book fund. £25 7s. were received from the National Board of Education, for repairs. £12 13s. 8d. were locally provided for repairs, and the teacher's salary, £96, and an extra allowance of £18; the total amount from all sources, towards the support of the school, being £223 18s., and average annual total cost of the education of each pupil being £2 17s. 4 $\frac{1}{2}$ d.

The subjects taught in the first class are, reading, writing monosyllables on slates, to count and read numbers, and to perform simple arithmetical operations; their powers of observation are also cultivated by means of object lessons.

The second class, in addition to the above, are taught writing from dictation on slates; also to work sums in addition and subtraction; in grammar, the definitions of the nine parts of speech; geography—instruction in the use of maps, and the outlines of Australia and America. They are also made acquainted with the habits and uses of domestic animals, and the properties and uses of common substances, by means of object lessons.

Third class, in addition to the above, are taught to give synonymes, and to know the meaning of the Saxon, Latin, and Greek prefixes and affixes. They write on paper from copies, and work questions in the simple and compound rules of arithmetic; they are taught to parse words in easy sentences, and to become acquainted with the geography of the four quarters of the globe.

The precise portion of time allotted to each of these subjects per diem is—one hour for reading, one hour for writing, one hour for arithmetic, one half-hour to grammar, one half-hour to geography, one quarter-hour to recreation, one quarter-hour to object lessons. Two days in the week religious instruction is given, in the place of music and object lessons. The girls are taught plain needlework twice a week, in the afternoon.

The books used in the first class are the No. 1 National reading books; in the second class, the second National School books; English grammar, arithmetic, sacred poetry, and geography; in the third class, the third reading book, Scripture lessons, spelling-book, geography, grammar, arithmetic; all published by the National Board of Education.

The present supply of books is adequate to the wants of the school, and those now in use are in good condition.

The maps in use are—World, Ancient World, Europe, Asia, Africa, America, Australia, Palestine, England, Ireland, Scotland; also two black-boards. It is very desirable that the school should be supplied with diagrams of natural history, astronomy, and plates illustrative of objects that do not come under the observation of children residing in remote districts.

The system of correction adopted in this school to preserve discipline is such as is suggested to the teacher as suitable to the disposition of the child. No instructions or directions have ever been received on the subject.

No examination has taken place these five years. The only prizes and rewards which have been given have been from the teacher at Christmas vacations, consisting of a picnic and various little presents.

No one has officially visited or inspected the school during the year.

No report of this school exists to my knowledge. The only remark I feel disposed to make is, that this school might be made more efficient by the establishment of an infant branch.

The name of the head teacher, Mr. Jonathan Harris; birthplace, Hythe, Kent, England; age, 30 years; date of appointment, 19th July, 1855; trained at the National Model Schools, Sydney; period, six weeks; classification, III., Class A; salary, £96 per annum; allowance, £18; fees, £66 11s. Total annual income of the teacher derived from the school, £180 11s.

The only assistant is the wife of the above, who instructs the girls in needlework, and assists in the teaching of the other subjects occasionally.

Religious instruction is imparted twice a week by the teacher, from the books prescribed by the National Board of Education. The following Ministers have visited the school at various times during the year:—The Rev. B. Glennie and the Rev. W. W. Dove, Episcopalian Clergymen; the Rev. W. J. K. Piddington, Rev. Samuel Wilkinson, and the Rev. William Fidler, Wesleyan Ministers; the Rev. J. T. Waraker, Congregational Minister; and the Rev. C. Ogg, Presbyterian Minister.

No. 4.

THE SECRETARY TO THE SYDNEY GRAMMAR SCHOOL to THE COLONIAL SECRETARY.

280 Pitt-street, South,

3 May, 1859.

SIR,

Referring to your letter of the 17th December last, No. 68, I have the honor, by direction of the Trustees of the Sydney Grammar School, to transmit the enclosed Return from the Grammar School.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

W. H. CATLETT,
Secretary.

SYDNEY GRAMMAR SCHOOL.

- 1.—Hyde Park, Sydney.
- 2.—Stone; unfinished; in good repair; greatly needs enlargement.
- 3.—The total area of the building and wings is 9,018 square feet.
- 4.—The part of the land used as the playground is about 230 feet long by about 170 feet wide, and containing an area of 39,100 square feet.
- 5.—The water-closets are 10 in number, built of brick, and each has a separate door; there are also 10 stone urinals.
- 6.—The large schoolroom contains 2,730 square feet; the large classroom, 1,088; and each of the two smaller classrooms, 520.
- 7.—Sixty in the large or north classroom; thirty in each of the smaller classrooms, called east and west, respectively; and seventy in the schoolroom.
- 8.—The mode of ventilation is by the windows, which open, and also by large openings in the ceiling of the large room.
- 9.—No average is possible, the school not having been two years open; the *present* number is 190.
- 10.—From 7 to 17 years.
- 11.—The school is divided into upper, modern, and lower schools. Of these the upper school consists of three forms (VI. V. IV.), sub-divided as follows:—VI. Form—one remove. V. Form—two removes. IV. Form—two removes. The modern school consists at present of two divisions of one remove each. The lower school contains three forms (III. II. I.), and a preparatory class, sub-divided, at present, as follows:—III. Form—two removes. II. Form—two removes. I. Form—two removes. Preparation—two removes. The average number in each remove is 15.
- 12.—Five hours, beginning at 9 A.M., terminating at 4 P.M.; hours of cessation, from 12 noon to 2 P.M.
- 13.—One (Saturday) whole holiday; two vacations, Midwinter and Midsummer, each of six weeks.
- 14.—Two hundred.
- 15.—The school having been in operation less than two years, no estimate can be formed.
- 16.—
- 17.—£4 10s. per quarter. Books sold at English price.
- 18.—£3,573. All appropriated for the payment of the masters salaries. £1,500, annual endowment from Government, and 18s. 9d. bank interest from the current expenses account. Total receipts, £5,073 18s. 9d.
- 19.—£5,073 18s. 9d. ÷ 210 = £24 3s. 2¼d.
- 20.—See time tables.
- 21.—See time tables.

22.—Diagrams of the working man's educational union, Lydow's wall maps, Hollis' wall maps, Sprüner's wall maps, Kiepert's wall maps, Irish National School maps, mechanical, electrical, and pneumatic apparatus.

23.—No corporal punishment has hitherto been inflicted. Impositions and detention after hours, the usual methods of correction.

24.—Twice a year by examiners appointed by the Trustees. Prizes of books distributed half-yearly.

25.—The Trustees. An annual report of the state of the school is furnished to the Government, and laid upon the table of the House of Assembly.

26.—William John Stephens.

27.—1, Edward Pratt; 2, Edwin Whitfield; 3, John Julius Strutzer; 4, Edward Blackmore; 5, Walter Heaven; 6, Stuart Hawthorne; 7, John Kinlock; 8, John Mills; 9, P. A. Dutruc; 10, Charles Henry Fairland.

28.—

29.—

30.—William John Stephens, 25th November, 1856; Edward Pratt, 25th November, 1856; Edwin Whitfield, 25th November, 1856; John Julius Strutzer, 25th November, 1856; Edward Blackmore, 1st March, 1858; Walter Heaven, 19th October, 1857; Stuart Hawthorne, 1st April, 1858; John Kinlock, 1st August, 1858; John Mills, 3rd June, 1857; P. A. Dutruc, 16th June, 1857; Charles Henry Fairland, 10th June, 1857.

31.—

32.—

33.—

34.—See annual report to Government.

35.—See do. do.

36.—See do. do.

37.—There is no formal theological teaching.

THE SECRETARY TO THE DENOMINATIONAL SCHOOL BOARD to THE COLONIAL SECRETARY.

*Denominational School Board Office,
Sydney, 15 February, 1859.*

SIR,

I am directed by the Denominational School Board to acknowledge the receipt of your letter, dated the 11th instant, referring to your letter of the 17th December last, in which you requested that a Return might be prepared for Denominational Schools, and forwarded to your Office, for the purpose of compiling a general Return of Schools in New South Wales.

Circulars forwarding copies of the Questions which were transmitted to the Board in your former letter, have been addressed to the various local Boards throughout the Colony, with a view of obtaining the information sought; and I am instructed by the Board to say that no unnecessary delay on their part shall take place in forwarding to your Office the results of their inquiries.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

C. E. ROBINSON,
Secretary.

No. 6.

THE SECRETARY TO THE DENOMINATIONAL SCHOOL BOARD to THE COLONIAL SECRETARY.

*Denominational School Board Office,
Sydney, 9 July, 1859.*

SIR,

I have the honor, by direction of the Denominational School Board, to acknowledge the receipt of your letter dated the 25th of June, requesting me to expedite the Returns called for by the Legislative Assembly, and alluded to in my letter of the 15th of February last.

I have the honor to say, that immediately upon the receipt of your communication, further applications were made in other quarters from which the information sought had not been forwarded.

I am to inform you that the Returns in question shall be sent in as soon as possible after they shall have been received by the Board.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

C. E. ROBINSON,
Secretary.

No. 7.

THE REV. A. H. STEPHEN to THE COLONIAL SECRETARY.

Redfern, 28 February, 1859.

SIR,

In reply to your letter of the 10th instant, referring to your former letter of the 17th December, requesting that a tabulated Return might be prepared, giving certain required information with reference to the Asylum for Destitute Children, I have the honor to inform you that I find it impossible to comply with this request. The Resolution of the Assembly so manifestly applies to day schools under the Denominational and National Systems of Education, that the Asylum for Destitute Children cannot be brought within its scope. The heads of information required, except in a few instances, are so totally unconnected with such a charity, that no answers can be supplied, however anxious the Directors may be to do all in their power to forward your wishes in this matter. The Asylum is a *refuge* and not a *school*, and though it be certainly true that education is approved to the inmates, yet there is no such school within its walls, or mode of instruction adopted, or fees and other support received, as will, in any view, bring it within the aim of the Resolution moved by Mr. Plunkett.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

ALFRED H. STEPHEN,
Hon. Sec.

NO.	PAGE.
1. Secretary to the Denominational School Board to the Colonial Secretary, forwarding Returns from Denominational Schools. 14 November, 1859	5
2. Secretary to the Denominational School Board to the Colonial Secretary, forwarding additional Returns of Denominational Schools. 24 November, 1859.. .. .	115

1859.

FURTHER RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 24 November, 1858,—

“That there be laid upon the Table of this House, a
 “ (tabulated) Return from all Schools in New South Wales,
 “ wholly or partly maintained by Public Funds, of—

- “ (1.) Name of locality where the School is situate.
 “ (2.) The materials of which such School is constructed,—whether chiefly of
 “ stone, of brick, of wood, or of metal; and the present condition of the building,
 “ and whether it needs repairs, enlargement, or other improvement.
 “ (3.) The number of superficial square feet contained in the area of the school-
 “ house or building.
 “ (4.) The number of superficial square yards or of square feet contained in the
 “ ground or land adjoining the School for the use of the pupils.
 “ (5.) The description and present condition of the water-closets provided for the
 “ use of the pupils.
 “ (6.) The number of superficial square feet, and of cubic feet, contained in each
 “ room appropriated for teaching.
 “ (7.) The average number of pupils usually assembled in each of such rooms.
 “ (8.) The provision which is made for the ventilation of such rooms.
 “ (9.) The annual average number on the books, and the average number attending
 “ the School; distinguishing the males from the females where the School is
 “ attended by both sexes.
 “ (10.) The maximum and minimum age of the pupils (of males and of females)
 “ in the School.
 “ (11.) The number of classes into which the School is divided, the average number
 “ in each class, and the maximum and minimum age in each class.
 “ (12.) The number of hours during each day the pupils attend the School, stating
 “ the hour of commencing and the hour of terminating the School duties, with the
 “ times of intervening cessation of study; and how such intervals are employed.
 “ (13.) The number of holidays and half-holidays in each week, and the number of
 “ vacations, the duration of each, and the period of the year when such vacations
 “ occur.
 “ (14.) The total number of days appropriated to School studies during the year.
 “ (15.) The average length of the period during which pupils, from the time of
 “ their first entrance to the time of their finally leaving School, remain there.
 “ (16.) The number of children between the ages of 5 and 15 years in the district
 “ or locality where the School is situate, who do *not* usually attend there.
 “ (17.) The weekly, quarterly, half-yearly, or annual sum charged to each pupil
 “ for instruction; the annual charge for books; and the *total* annual charge for
 “ each pupil.
 “ (18.) The annual amount of School fees received from the pupils of the School
 “ during the twelve months ending the 30th September, 1858; the appropriation of
 “ such fees; the amount received from other (specifying from what) sources towards
 “ the support of such School; the total amount received from *all* sources towards
 “ the support of such School during the above-mentioned period.
 “ (19.) Dividing the last-mentioned total by the average number of the pupils
 “ actually attending the School during the period above-mentioned, give a state-
 “ ment of the average annual total cost of the education of each pupil.
 “ (20.) A detailed enumeration of the several subjects of instruction given to each
 “ class, and the precise portion of time allotted to each of such subjects in each day
 “ throughout the week.
 “ (21.) A list of the titles of all books used in each of the several classes in the
 “ School; the present condition of the books now in use; whether other kinds of
 “ books are needed; and whether the number of those at present in use is adequate
 “ to the wants of the School.
 “ (22.) A descriptive list of all prints, diagrams, maps, instruments, and other
 “ School apparatus used in the School, their present condition, and whether any,
 “ and if so, what others are needed.
 “ (23.) An account of the system of correction employed in the School to preserve
 “ discipline, and an account of any written or other instructions to the teachers
 “ from any Board of Education, Official Visitors, Inspectors, or Managers of the
 “ School on this subject.

“ (24.)

- “(24.) How often during the year, and by whom, are the pupils of the School examined with reference to their progress, and whether any prizes or other rewards of merit are given periodically in the School, and if any, of what description, and how often distributed.
- “(25.) By whom is the School officially visited or inspected? How often during the year, and what length of time is occupied by the Inspector or Visitor in the performance of this duty. If any report on the state of the School exists, furnish a copy of it, adding thereto any remarks on such report, and the present condition of the School, as the teacher (master or mistress) may be prepared to offer.
- “(26.) Name of Head Teacher.
- “(27.) Names of Assistant Teachers, Pupil Teachers, or Monitors attached to each School.
- “(28.) Birthplace of each of the above.
- “(29.) Age of ditto.
- “(30.) Date of appointment to present office.
- “(31.) Whether or not trained as a teacher.
- “(32.) If trained, at what institution? For how long a period? Possessing what class of certificate of competency?
- “(33.) If *not* trained as a Teacher: What experience in teaching previous to undertaking present appointment? What occupation or business before adopting that of a Teacher.
- “(34.) Annual or other periodical amount of salary of Head Teacher, of Assistant Teachers, of Pupil Teachers, and of Monitors.
- “(35.) Fees, allowances, and emoluments, *exclusive of salary*.
- “(36.) Total annual income of Teacher or Teachers derived from School.
- “(37.) What religious or moral instruction is given? How often? By whom? If visited by any Clergyman or Minister of Religion, state the name and denomination to which he belongs. Give a list of the titles of the books used in the School for such purpose.”

(*Mr. Plunkett.*)

DENOMINATIONAL SCHOOLS IN NEW SOUTH WALES.

No. 1.

SECRETARY TO DENOMINATIONAL SCHOOL BOARD to COLONIAL SECRETARY.

Denominational School Board Office,

Sydney, November 14, 1859.

SIR,

Referring to the Denominational School Board's letters of the 15th February and the 9th July, 1859, respectively, relating to returns to an order made by the Legislative Assembly, dated 24th November, 1858, I have now the honor, by direction of the Board, to forward such returns of this nature as have been received by them up to the present date.

Those teachers who have not as yet complied with the instructions of the Board upon this point have been again communicated with, and any further returns which may be received will be immediately forwarded to the Government.

I have, &c.,

C. E. ROBINSON.

CHURCH OF ENGLAND SCHOOLS.

NEWCASTLE DIOCESE.

11. Kempsey.....Mr. Pearce.	23. EcclestoneMr. Fowler.
12. LostockMr. Saunders.	24. PatersonMr. Saunders.

ARMIDALE.

- 1.—Armidale.
- 2.—Brick, in good repair, but needs enlarging.
- 3.—540 square feet.
- 4.—2,420 square yards.
- 5.—Fair, but paling between the approaches to the boys' and girls' part would be an improvement. It is a double one, built of weatherboards.
- 6.—Only one room. *Vide* No. 3.
- 7.—76 $\frac{1}{3}$.
- 8.—A brick taken out in two places in the side wall opposite to windows.
- 9.—Boys, 56 $\frac{2}{3}$; girls, 70 = 126 $\frac{2}{3}$, annual average on roll. Boys, 34 $\frac{1}{2}$; girls, 41 $\frac{1}{2}$ = 76 $\frac{1}{3}$, annual average attendance.
- 10.—Eldest boy, 14 years; girl, 14 years. Youngest boy, 5 years; girl, 5 years.
- 11.—Seven classes, mixed.
- 12.—5 $\frac{1}{2}$ hours; from 9 a.m. to 12 noon; from 2 to 4:15 p.m.; interval spent in play and dining.
- 13.—Saturday and Sunday holidays, with exception of Sunday school for those inclined to attend, from 9:30 a.m. to 10:30 a.m. Two vacations of a fortnight each in June and December.
- 14.—233.
- 15.—Unknown.
- 16.—Unknown.
- 17.—1s. per week each. No charge for books. 48s
- 18.—School fees, £183 4s., and Government salary, £87 10s. = £270 14s., paid to master of school.
- 19.—£3 10s. 10 $\frac{1}{2}$ d.

20 & 21.—1st class—Bible lesson, daily, one hour; Sinclair on the catechism, thrice a week, half an hour; English dictation, daily, half an hour; English grammar, twice a week, half an hour; English history, twice a week, half an hour; readings in 4th book, twice a week, half an hour; book-keeping, daily; geography, thrice a week, half an hour. 2nd class—Bible lesson, daily, one hour; Barter's Scripture history, twice a week, half an hour; geography, thrice a week, half an hour; English grammar, twice a week, half an hour; readings in 6th book, daily, one hour. 3rd class—readings in 3rd book, daily, one hour; Barter's Scripture history, twice a week, half an hour. 4th class—readings in sequel to second lessons, daily, one hour. 5th class—readings in second book of lessons, daily, one hour. 6th class—readings in first book of lessons, daily, one hour. The above classes write for a portion of time every day, and cipher during the intervals between lesson and lesson; they say their catechisms twice every week, and are taught to commit verses and hymns to memory. 7th class—an A B C class.

22.—Large maps of Europe, Asia, Africa, and America, map of World, and small map of Palestine, blackboard, clock.

23.—Children punished sometimes corporally, at others kept in after school-hours. Rules of Central Denominational School Board.

24.—Twice in every year examined by Rev. S. Hungerford; prizes generally given at examinations.

25.—By Rev. S. Hungerford, generally once or twice a week, for half-hour or hour each time.

26.—Mr. Edward Baker.

27.—Mr. Henry Young and Mary Ann Tysoe.

28.—Wiltshire, London, Sydney.

29.—45 years, 26 years, 20 years.

30.—1st October, 1858; 6th December, 1858; 1st May, 1859.

31.—Not trained.

32.—

33.—Mr. Baker, four years teacher Denominational School, and three years private teacher; none, a private gentleman.

34.—£27 14s., out of which assistants paid by head master, £90 and £10 per annum.

35.—None.

36.—£270 14s.

37.—Scripture read half-hour each day, and catechism quarter of an hour twice each week by the clergyman or head master. Rev. S. Hungerford, Church of England, Bible, prayer book, Sinclair's catechism, No. 7, broken catechism, Watts', and other hymns, parables, miracles, and abridgment of Bible.

NORTH BRISBANE.

1.—North Brisbane; mixed school.

2.—Brick; repair, good.

3.—1,296 square feet.

4.—3,584 square yards.

5.—Of wood, and in good order, and separate closets.

6.—The school consists of only one room.

7.—44 boys and 25 girls.

8.—Roof ventilated in six places.

9.—25 boys, 29 girls; annual average, 54.

10.—Boys, 3 and 13 years; girls, 3 and 13.

11.—In three classes, and infants; first class—average 15, age 9 to 13 years; second class—average 15, age 7 to 11 years; third class—average 15, age 6 to 9 years; infants 24, age 3 to 6 years.

12.— $5\frac{1}{2}$; from 9 to $12\frac{1}{4}$, and 2 to $4\frac{1}{4}$; infants allowed from $10\frac{1}{2}$ to $10\frac{3}{4}$ for play.

13.—One holiday, Saturday. Two, June and Christmas, fortnight each.

14.—240 days.

15.—From three to six months.

16.—

17.—6d. for infants, and 9d. for primary school, weekly; no other charges; £1 4s. and £1 16s.

18.—School fees, £43 1s. 8d.; Government stipend, £87 10s.; total, £130 11s. 8d.

19.—£2 8s. 4d.

20.—First class—reading, writing, ciphering, geography, English grammar, history, and religious instruction. Second class—reading, writing, ciphering, geography, religious instruction. Third class—reading, writing on slates, ciphering. Infants learning to read, and tables, and hymns.

21.—First class—fourth book, history (of P. C. K. Soc.), English grammar (printed in Dublin), arithmetic (book of Commissioners, Ireland), geography (ditto), Bible and catechism, and Scripture history. Second class—third book, arithmetic, as first class, geography, ditto, Scripture history and catechism. Third class—Second book, primers and catechism, slates and pencils. Books in good order, and sufficient.

22.—Maps of the world and the four quarters, and Australasia, Canaan, and Palestine; clock and blackboard; all in good order.

23.—Corporal punishment, but not of a severe kind, and keeping in school. The only instruction—to avoid severity.

- 24.—A Christmas examination, with prizes of books only.
 25.—The clergyman frequently, from one hour and upwards. The school may be considered as in a creditable condition, the gradual increase of numbers being some evidence of it.
 26.—John Stuart Beach.
 27.—Mrs. J. S. Beach.
 28.—Of Mr. Beach, Haverford West, South Wales. Of Mrs. Beach, London.
 29.—Mr. Beach, 50 years; Mrs. Beach, 28 years.
 30.—1st May, 1858.
 31.—Not trained.
 32.—
 33.—That of a merchant.
 34.—£87 10s. 0d.
 35.—£43 1s. 8d.
 36.—£130 11s. 8d.
 37.—Prayers and singing opening and closing of schools; catechism Church of England; reading the Bible and Scripture history three times a week, by the schoolmaster when clergyman is absent. By Rev. John Mosely, Church of England.

DRAYTON SWAMP.

- 1.—Toowoomba, Darling Downs, Drayton Swamp.
 2.—Slabs on sleepers, and shingles; in good condition, but not quite completed, wanting windows and some fittings.
 3.—800.
 4.—About 1,372 square yards.
 5.—Slabs on sleepers, and shingled; one only is completed, the sleepers of the other were laid before the school opened, but the builder of the one completed proved so bad a workman that he was dismissed. There are funds to complete the second, and we only wait for a good workman to finish it.
 6.—One room only; 800 square feet; 8,000 cubic feet; *plus* a roof of the usual pitch.
 7.—32.
 8.—Open windows, not yet completed.
 9.—The school has not been in operation for a year.
 10.—Males, 12 to 5; females, 12 to 4.
 11.—No. 4; average, 8; maximum and minimum age—first class, 12 and 7; second class, 10 and 7; third class, 6 and 5; fourth class, 7 and 4.
 12.—5¼; from 9 a. m. to 4 p. m.; cessation, 12½ to 2, employed with dinner and play; ¼-hour cessation, also, from 10¾ to 11 o'clock.
 13.—Saturday in each week. For remainder of question see 9.
 14 & 15.—See 9.
 16.—New families are settling at Toowoomba almost every week, so that this question as regards that town cannot be correctly answered.
 17.—1s. weekly for one pupil; 2s. 6d. for three of one family; 3s. for four of one family; and 3s. 6d. for five of one family.
 18 & 19.—See 9.
 20.—First class:—reading and spelling 30 minutes each, drill 15 minutes, writing 30 minutes, arithmetic 75 minutes, catechism 30 minutes, Scripture 60 minutes, needlework (girls) 45 minutes. Second class:—reading 75 minutes, spelling 30 minutes, drill 15 minutes, writing, arithmetic, and catechism 30 minutes each, Scripture 60 minutes, needlework (girls) 45 minutes. Third class:—reading 75 minutes, writing 60 minutes, drill 15 minutes, arithmetic 60 minutes, catechism and hymns 30 minutes each. Fourth class:—alphabet 105 minutes, writing 45 minutes, drill 15 minutes, catechism and hymns 30 minutes each. The school has been so short a time in existence that some more advanced subjects have not yet been commenced.
 21.—First class:—Bible, third book, church catechism, faith and duty, tables (arithmetical). Second class:—Bible, second book, church catechism, faith and duty, tables, Scripture history. Third class:—first book, first steps, sermon on the Mount, hymns, tables, reading cards. Fourth class:—Simpson's primer, first steps, tables, Watts' divine songs, alphabet cards. The books are those issued by the S. P. C. K., and are generally in good condition. No other kinds needed at present. The number at present in use is adequate to the wants of the school, and there is a stock of more advanced books to be used when required.
 22.—A very small globe, and a blackboard without a stand, comprise all the apparatus belonging to the school. Prints and maps are much wanted.
 23.—The schoolmaster has not any written instructions on this subject; he is directed by the clergyman to punish when necessary—(1) with a cane; (2) by putting the child in a corner, or making it stand on a form; (3) by keeping in after school-hours.
 24.—No regular examination has yet taken place, nor have any prizes been given.
 25.—By the clergyman, who resides at Drayton, four miles distant; visits have been irregular for some weeks; when at home and well he visits the school at least one day in the week—often two days.
 26.—William James Willes.
 27.—Martha Willes.
 28.—W. J. W., Chilham, Kent; M. W., Bradford, Yorkshire.
 29.—W. J. W., 29; M. W., 34.

22.—Maps—1 World; 1 British Isles; 1 Europe; 1 Asia; 1 Africa; 1 North America; 1 South America; 2 Palestine; 1 small globe; 1 set of astronomical diagrams; 1 blackboard. A map of Australia and a clock are much needed.

23.—In my system of correction I am generally guided by two things—the disposition of the child, and the nature of the offence. Breaches of discipline, being the result of accident or ignorance, are overlooked, or dismissed with a caution. Carelessness, inattention, and similar faults, are met by an extra lesson, generally bearing on the nature of the offence, but never selected from their regular lesson books; for I am of the same opinion as that celebrated educator, David Stow, viz. :—“ that we ought not to associate the idea of punishment with what we should love; our object being to stimulate from a fear of offending rather than from a fear of the rod.” Bacon gave expression to similar ideas, three hundred years ago, when he said that “ every schoolmaster ought to consider the nature of his scholars. “ Some be so gentle and corrigible that words may seem abundantly to suffice, and that “ without stripes. Some are so stubborn, stiff-necked, and almost incorrigible, that to bring “ them into the way, and to make them prosper in their studies, there is need not only of words “ but also of stripes. The children, which either are tender, or tender-witted, or fearful, or “ easy to be reclaimed, the schoolmaster ought gently to entreat with words, or at the least, “ if they offend oft, to minister unto them easy punishment. But those children which are “ negligent, froward, stubborn, and rather given to play than to studies, yea, and that of set “ purpose, the master ought not only with words sharply to reprove them, but also with “ stripes largely to chastise them. Notwithstanding in all punishments a measure is to be “ observed, lest through too much severity wits rather be dulled than quickened, studies be “ rather oppressed than excited, and learning rather hated than embraced.” Believing in these ideas, and having (from a practical acquaintance with school-keeping extending over ten years) found them to answer, when judiciously carried out, better than any other, I occasionally resort to corporal punishment, but only in such cases as those of wilful disobedience, lying, using bad language, &c. I have never received any instructions, written or otherwise, since I took charge of this school; but, I believe, they are generally supplied to the teachers in this diocese.

24.—This school has not been examined since I took charge of it; and no prizes or other rewards are given.

25.—It is not officially visited or inspected by any one, and I am not aware of the existence of any report containing the slightest reference to it.

26.—John Robinson.

27.—There are no assistants, pupil teachers, or monitors.

28.—Little Smeaton, Yorkshire, England.

29.—29 years.

30.—10th August, 1857.

31.—Trained as a teacher.

32.—At the National Society's training institution, Westminster, London, for a period of twelve months, and possessing a certificate of merit from the Committee of Council on Education of the third class, with a prize for drawing, from the department of Science and Art, Marlborough House.

33.—No answer required.

34.—£70.

35.—£34 0s. 10d.

36.—£104 0s. 10d.

37.—The religious instruction (see time table in reply to question No. 20) is given by the master. Visiting clergyman—Church of England. Titles of books used for conveying religious instruction—Old and New Testaments, parables, discourses, miracles, &c., of our Lord.

ELLALONG.

1.—Millfield, Ellalong, district of Wollombi.

2.—Wood and shingles, tolerable condition but needs repairs.

3.—36 feet by 15, or 540 square feet.

4.—9,680 square yards.

5.—Two, built of wood and shingled.

6.—The building consists of one room, dimensions as per No. 3.

7.—12 boys and 8 girls.

8.—Six glazed windows, sashes to open.

9.—Average number on roll book: 17 boys, 10 girls.

10.—Boys 3 years to 12, girls 3 years to 13.

11.—4 classes for boys, 3 for girls.

12.—5½ hours, from 9 to 12, and from 1 to half-past 3.

13.—Two holidays in each week, Saturday and Sunday, and two vacations in each year, commencing on the 17th of June and 17th December, and terminating on 1st July and 1st January, respectively.

14.—233 days.

15.—From one to four years.

16.—No manner of knowing.

17.—The average charge is 7s. 6d. to 10s. per quarter; no charge for books.

18.—The school was closed for about four months in 1858, and the present teacher can find no record of the sums received by the former one.

- 19.—Cannot be answered from the foregoing cause.
- 20.—As far as possible, in accordance with the time table in the book of Instructions to Teachers of the Church of England Schools.
- 21.—History of England, 1st, 2nd, 3rd, and 4th class reading books, as published by the Commissioners of National Education; Bibles, Testaments, 2nd, 3rd, and 4th class reading books, as published by the Society for promoting Christian Knowledge; catechisms, chief truths of religion, faith and duty of Christians, grammars, geographies, &c., &c.
- 22.—One map of Europe, one of Asia, one of the Holy Land, and one of the Land of Promise.
- 23.—The only punishment resorted to is confinement for a portion of the hour allowed at noon for recreation and dinner. The instructions to teachers is contained in the book referred to at No. 20.
- 24.—Two examinations yearly by the minister of the district, at which the parishioners attend, and books are awarded.
- 25.—By the clergyman, no official inspector.
- 26.—Christopher Bryant.
- 27.—Mary Bryant.
- 28.—Liverpool, England.
- 29.—46 and 40 years.
- 30.—August 1st, 1858.
- 31.—Not a trained teacher.
- 32.—Nil.
- 33.—Ten years' experience; former occupation—mercantile clerk.
- 34.—£52 10s. per annum is the only salary.
- 35.—Fees amount to about £6 per quarter.
- 36.—The total amount for 12 months ending 17th August, as received by me, will be about £76 10s.
- 37.—Religious and moral instruction is given every Sunday morning from 9 to 12 o'clock by the teachers of the school, at which the children regularly attend, as well as numerous boys and girls otherwise employed during the week, who also receive the benefit of the clergyman's instructions.

FORTITUDE VALLEY.

- 1.—Fortitude Valley, Brisbane.
- 2.—Stone; present state of repair good; wanting porch.
- 3.—50 feet by 24.
- 4.—Total amount of Government grant, viz., 2 acres.
- 5.—Brick; shingled roof, in good repair.
- 6, 7, & 8.—No classrooms.
- 9.—Average number on the books during the year ending December, 1858—100. Number in actual attendance 79: boys 44, girls 35.
- 10.—Maximum age of boys, 12—minimum ditto, 4; maximum age of girls, 13—minimum ditto, 5.
- 11.—Number of classes 4:—1st, 12; 2nd, 12; 3rd, 14; 4th, 12.
Age of pupils in ditto:—9 to 13; 7 to 9; 6 to 8; 4 to 6.
- 12.—5 hours, 9 to 12 a.m., 2 to 4 p.m.
- 13.—Whole holiday on Saturday. Christmas vacation two weeks; Whitsuntide one week.
- 14.—264—three weeks—241.
- 15, & 16.—
- 17.—6d. weekly.
- 18.—£49 15s. 6d. school fees; from Government £52 10s.; total amount £102 5s. 6d., which is divided equally between the mistress and assistant master.
- 19.—£1 5s. 11½d.
- 20.—First class—9 to 10 a.m., writing; on Tuesdays and Thursdays dictation; 10 to 11, reading and spelling; 11 to 12, arithmetic; 2 to 3 p.m., Monday and Friday church catechism, on other days maps and grammar; 3 to 4, mental arithmetic, tables, and geography. Second class—9 to 10 a.m., reading; 10 to 11, writing; 11 to 12, tables and spelling; 2 to 3 p.m., Monday and Friday catechism; on other days writing on slates; 3 to 4, spelling, tables, and reading. In both the first and second classes the girls occupy a great portion of the afternoon in needlework. Third class—reading, spelling, writing on slates, tables, oral religious instruction.
- 21.—Fourth books (Christian Knowledge Society), geography and grammar (Irish National Education), faith and duty (Sinclair), 1st, 2nd, and 3rd reading books (Christian Knowledge Society). Books wanted: Bibles and prayer books.
- 22.—Maps in school at present: Europe, Asia, Palestine. Wanted: the World, America (North and South), England, Australia, and Africa. Alphabets in sheets. Numeration tables. Blackboard.
- 23.—Lesson tasks. Caning when needed.
- 24.—No public examinations. No funds for prizes. Private examinations by Chairman of Local Board. Ladies occasionally attend.
- 25.—No Government inspection during 1858. Remark of Chairman of Local Board Number of scholars on the decline for want of more efficient teachers.

- 26.—Mary Hodge.
 27.—George Flack.
 28.—England (Somersetshire, Surrey).
 29.—Age of mistress, about 40; master, 27.
 30.—November 3, 1856; November 16, 1857.
 31 & 32.—The mistress had 9 months' training for a teacher in the National School of Wellington, Somerset.
 33.—Had charge of a school 21 years in England. Master—no training—a gardener in England.
 34.—Annual amount of salary for mistress and assistant master £56 to each.
 35.—Nil.
 36.—Answered in 34.
 37.—The church catechism is learned by the children on two days in the week; faith and duty, and Scripture, three days. The Chairman of the Local Board being the Clergyman of the District, examines and questions in such religious subjects as he thinks best.

GRESFORD.

- 1.—Gresford, Upper Paterson.
 2.—The school, during the year 1858, was carried on in the church, a large new wooden building, but within the last month has been removed to the new wooden schoolhouse, measuring in the clear 24 × 16 feet.
 3.—384 superficial square feet.
 4.—The schoolhouse is built in a large paddock; and the playground has not yet been fenced in, but I presume half an acre will be the space allowed.
 5.—Owing to the want of funds no water-closet has been erected, but one is badly wanted.
 6.—Only one room, measuring 24 × 16 feet, and containing 384 superficial square feet, and 4,028 cubic feet.
 7.—The average number of children for the last quarter was 14 boys, 8 girls.
 8.—4 windows, 4 × 2½ feet; one door 6 × 3; and a chimney facing the door.
 9.—Average annual number on roll, 20 boys and 11 girls; ditto in attendance, 14 boys and 8 girls.
 10.—Males: maximum, 14; minimum, 4. Girls: maximum, 13; minimum, 3.
 11.—Into 5 classes. Average number in each class, 6; and the maximum and minimum ages as follows:—1st class, 14 and 9; 2nd class, 12 and 10; 3rd class, 13 and 8; 4th class, 8 and 4; 5th class, 7 and 3.
 12.—6 hours, commencing at 10 o'clock and terminating at 4, with one hour's cessation from 1 to 2; during that interval the children take their dinners and then amuse themselves by playing.
 13.—The whole day Saturday; two vacations during the year of rather more than a fortnight each, commencing on the 18th June and 18th December, and 3 or 4 other holidays, such as Queen's Birthday, Anniversary of the Colony, &c.
 14.—217 days appropriated to school duties, and nearly 5 weeks lost by floods.
 15.—In consequence of the children being removed so often from school for periods varying from 1 to 6 months, and the frequent flooded state of the rivers, I find it quite impossible to make a correct estimate as to the average period of the children remaining at school.
 16.—Owing to the population of the district being so scattered, and also divided by the two rivers (Paterson and Alleyn), I have no means of learning the number of children residing within a few miles of the school.
 17.—6d. per week charged, but in cases of flood that payment not considered compulsory; no charge made for books; copy-books and slates found by parents; annual average charge for each child from school fees, 16s. 11d.
 18.—Total annual amount of school fees, £26 5s.; appropriated to master's private use; Government salary, £52 10s.; total salary for the year, £78 15s.
 19.—Average annual charge for each child, £3 11s. 7d.
 20.—1st class: reading, writing, ciphering, geography, grammar, catechism. 2nd class: reading, writing, ciphering, geography, catechism. 3rd class: reading, writing, ciphering, spelling, catechism. 4th class: reading, writing on slates, spelling, tables, catechistical questions. 5th class: learning letters and reading, writing on slates, spelling, tables, catechistical questions. The views of the time table carried out as far as practicable.
 21.—1st class: Bibles, 4th book, 3rd book, history, grammar, geographical series No. 1, tables, catechism, faith and duty. 2nd class: Second book, miracles, geographical series No. 1, tables, catechism, spelling. 3rd class: Discourses, reading books 1st and 2nd, spelling, tables. 4th class: reading books for beginners No. 1, lessons from the Psalms, spelling, tables. 5th class: letter cards, spelling cards.
 22.—Map of the World, Europe, Asia, Holy Land, and Land of Canaan; no prints or other apparatus of any kind ever had in the school.
 23.—Occasionally the rod, but more frequently an extra lesson, or kept in.
 24.—No examination has taken place for a considerable time owing to the want of a schoolhouse, and consequently no prizes have been given.
 25.—By the Rev. F. W. Addams, Church of England Minister at Paterson.
 26.—John Bush.
 27.—None.
 28.—Bristol, County of Somerset, England.
 29.—Age, 42.
 30.—Year 1850.
 31 & 32.—Not trained.

- 33.—None; clerk for many years in a large mercantile establishment.
 34.—£52 10s.
 35.—£26 5s.
 36.—£78 15s.
 37.—Religious instruction given from books used by the different classes.

HEXHAM.

- 1.—Hexham.
 2.—Schoolroom constructed of wood, needs improvement.
 3.—The number of superficial square feet contained in the area of school, 429.
 4.—The number of superficial square feet contained in the ground, 27,636.
 5.—One wooden water-closet, in good repair.
 6.—The number of superficial square feet, 429; cubic feet, 4,290.
 7.—The average number of pupils assembled, $25\frac{1}{2}$.
 8.—For ventilation, 4 windows.
 9.—The annual average number on the books—boys, 32; girls, 26; total, 58.
 10.—The maximum age, boys 14 years, minimum 4 years; maximum, girls 16 years, minimum 4 years.
 11.—Number of classes in the school, 4; average number in each class:—
- | | Boys. | Maximum. | Minimum. | Girls. | Maximum. | Minimum. |
|-----------|-------|----------|----------|--------|----------|----------|
| 1st class | 6 | 14 years | 9 years. | 7 | 16 years | 9 years. |
| 2nd " | 10 | 9 " | 7 " | 6 | 14 " | 8 " |
| 3rd " | 10 | 10 " | 6 " | 7 | 10 " | 7 " |
| 4th " | 6 | 8 " | 4 " | 6 | 6 " | 4 " |
- 12.—Number of school hours, 5; commences at 9 o'clock, closes at 12 o'clock; opens again at 1 o'clock, closes at 3 o'clock. The hour from 12 to 1 employed for dinner and exercise.
 13.—Number of holidays in each week 1, Saturday; Good Friday, Queen's Birthday, and the Anniversary also kept; two vacations, one in June and December, a fortnight each time.
 14.—Total number of days appropriated to school duties during the year, 230.
 15.—The average length of the period during which pupils remain in school, 5 years.
 16.—The number of children between 5 and 15 years in the locality who do not attend school, 15.
 17.—The weekly sum charged to each pupil, 6d.; no charge for books. The total annual charge for each pupil, £1 6s.
 18.—The annual amount of school fees received from the pupils to 30th September, £24 10s. 9d., appropriated to teacher's use; teacher's salary from the Board, £52 10s.; total amount received towards the support of the school, £77 0s. 9d.
 19.—The average annual total cost of each pupil, £3 0s. 5d.
 20.—A detail of the subjects of instruction to each class:—1st and 2nd class. Monday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, reading and spelling; $10\frac{1}{4}$ to $11\frac{1}{4}$, English grammar and geography; $11\frac{1}{4}$ to 12, writing; 12 to 1, dinner; 1 to 2, reading Scriptures; 2 to $2\frac{3}{4}$, arithmetic and tables; $2\frac{3}{4}$ to 3, prayer. Tuesday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, reading Scriptures; $10\frac{1}{4}$ to $11\frac{1}{4}$, catechism, faith and duty; $11\frac{1}{4}$ to 12, writing, dictation; 12 to 1, dinner; 1 to 2, tables and mental calculation; 2 to $2\frac{3}{4}$, reading and spelling; $2\frac{3}{4}$ to 3, prayer. Wednesday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, writing; $10\frac{1}{4}$ to $11\frac{1}{4}$, reading and spelling; $11\frac{1}{4}$ to 12, grammar; 12 to 1, dinner; 1 to 2, ciphering; 2 to $2\frac{3}{4}$, reading Scriptures; $2\frac{3}{4}$ to 3, prayer. Thursday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, dictation and copies; $10\frac{1}{4}$ to $11\frac{1}{4}$, Scriptures; $11\frac{1}{4}$ to 12, catechism; 12 to 1, dinner; 1 to 2, reading and spelling; 2 to $2\frac{3}{4}$, arithmetic; $2\frac{3}{4}$ to 3, prayer. Friday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, geography and English grammar; $10\frac{1}{4}$ to $11\frac{1}{4}$, writing; $11\frac{1}{4}$ to 12, reading and spelling; 12 to 1, dinner; 1 to 2, reading in religious subjects; 2 to $2\frac{3}{4}$, arithmetic; $2\frac{3}{4}$ to 3, prayer. 3rd and 4th class. Monday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, writing, dictation, and copies; $10\frac{1}{4}$ to $11\frac{1}{4}$, reading history and spelling; $11\frac{1}{4}$ to 12, geography; 12 to 1, dinner; 1 to 2, arithmetic and tables; 2 to $2\frac{3}{4}$, reading Scriptures; $2\frac{3}{4}$ to 3, prayer. Tuesday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, writing; $10\frac{1}{4}$ to $11\frac{1}{4}$, reading; $11\frac{1}{4}$ to 12, faith and duty; 12 to 1, dinner; 1 to 2, reading history and spelling; 2 to $2\frac{3}{4}$, arithmetic and mental calculation; $2\frac{3}{4}$ to 3, prayer. Wednesday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, writing, dictation, and copies; $10\frac{1}{4}$ to $11\frac{1}{4}$, reading history and spelling; $11\frac{1}{4}$ to 12, grammar; 12 to 1, dinner; 1 to 2, ciphering; 2 to $2\frac{3}{4}$, Scriptures; $2\frac{3}{4}$ to 3, prayer. Thursday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, writing from subjects; $10\frac{1}{4}$ to $11\frac{1}{4}$, reading the Scriptures; $11\frac{1}{4}$ to 12, catechism; 12 to 1, dinner; 1 to 2, reading history and spelling; 2 to $2\frac{3}{4}$, tables and mental calculation; $2\frac{3}{4}$ to 3, prayer. Friday:—9 to $9\frac{1}{4}$, prayer; $9\frac{1}{4}$ to $10\frac{1}{4}$, writing; $10\frac{1}{4}$ to $11\frac{1}{4}$, reading history and spelling; $11\frac{1}{4}$ to 12, geography; 12 to 1, dinner; 1 to 2, arithmetic; 2 to $2\frac{3}{4}$, Scriptures; $2\frac{3}{4}$ to 3, prayer.
 N.B.—The girls are taught needlework from 2 to 3 during the week.
 21.—A list of the titles of books used by 1st and 2nd class,—Bibles, English history, 3rd and 4th book, faith and duty, catechism, arithmetic, geography, and grammar. 3rd and 4th class,—History of our Saviour, catechism, miracles, parables, 2nd book, tablet lessons.
 22.—A description of the maps in the school, viz.:—The World, Europe, Asia, Africa, Holy Land, New South Wales, British Isles; condition good; blackboard required.
 23.—Correction used in the school:—the cane is occasionally resorted to, but the more general and effectual is confinement after school hours for a limited time, and employed during the confinement.
 24.—The school is visited by Rev. Mr. Wayn; no prizes given.

- 25.—The school is officially inspected by the resident clergyman twice a year; time occupied in these duties from 9 to 12; no report on the state of the school.
- 26.—Elizabeth Flynn.
- 27.—None.
- 28.—Ireland.
- 29.—24 years.
- 30.—January, 1857.
- 31.—Trained as a teacher.
- 32.—Trained at the Clare Model School for 3 months; no certificate of competency, none being then awarded.
- 33.—
- 34.—Annual salary, £70.
- 35.—School fees, £24 10s. 9d.
- 36.—Annual income, £94 10s. 9d.
- 37.—The religious and moral instruction is given by the clergyman and teacher; names of books used for religious instruction,—Bible, catechism, faith and duty, miracles, parables, and history of Our Saviour.

IPSWICH.

- 1.—Ipswich; in the centre of the town.
- 2.—A brick building, shingle-roofed. The walls require additional strength and support, and several minor repairs are needed.
- 3.—1,000 square feet.
- 4.—About 550 square yards.
- 5.—Two, double; in good condition, save as to drainage.
- 6.—But one room.
- 7.—Above 50.
- 8.—Windows opening on each side; also circular openings in the gables.
- 9.—On books at present, 45 boys, 30 girls; average attendance, above 50.
- 10.—Girls, 14 to 3 years; boys, 13 to 3.
- 11.—Four classes; age, 14 to 9, 9 to 6, 8 to 6, 7 to 3.
- 12.—From 9 to 12 a.m., and from 2 to 4 p.m. We do not know how the interval is employed, but presume the children go home to dinner. The younger children are allowed a quarter of an hour for play in the course of the morning.
- 13.—One holiday per week. A vacation of two weeks at Christmas, and the same in June.
- 14.—251 days.
- 15.—One year.
- 16.—We cannot tell. Probably a very large number.
- 17.—Weekly fees, 9d. and 6d. No charge for books. Total annual charge:—

9d.		
48		
12) 432	6d. × 48 = 24s.	36s. and 24s.
36s.		
- 18.—Fees amounted to £75 15s. 1½d., which, with a Government stipend of £87 10s., were applied to pay the teachers, and which were the sole receipts.
- 19.—
- 20.—

9.—9.20.	Class.	9.20—10.15.	10.15—11.	11—12.	2—2.45.	2.45—3.45.	3.45—4.
Assembling and Prayers.	I ..	Work done at home. Tables, grammar, and spelling.	Writing in copy-books.	Reading and church catechism.	Geography or history.	Girls—Sewing. Boys—Ciphering.	Lessons set to be learnt for the morrow. Evening Prayers. Dismissal.
	II ..	Tables or spelling.	Writing in copy-books.	Reading and first step to catechism.	Ciphering.	Girls—Sewing. Boys—Ciphering.	
	III ..	Tables or spelling.	Writing on slates.	Reading and spelling.	Ciphering.	Girls—Sewing. Boys—Ciphering.	
	IV	Reading.	Writing on slates.	Alphabet and spelling.	Tables and reading.	Hymns and tables.	

21.—1st class—New Testament, church catechism, elements of geography (C. K. S.), fourth book, and sequel (Irish National), English history (C. K. S.), Wilson's outlines of grammar; 2nd class—second and third books (C. K. S.), third book (natural), first steps to catechism; 3rd class,—second book of lessons (C. K. S.), child's first book, parts 1 and 2. Other books than these are required, and the number of copies supplied is insufficient.

22.—Maps:—World, Europe, Asia, Africa, N. America, S. America, Canaan, Palestine.

23.—The usual system; corporal punishment very rarely administered.

24.—Twice a year, by various persons; and prizes given on each occasion; books entirely.

25.—A Local Board of three members.

26.—Hugh Stowell.

27.—Wife of the above.

28.—England.

29.—Mr. Stowell's age is 28 years.

30.—January, 1857.

31.—An educated man, but no special training for his present occupation.

32.—

33.—Has been engaged in private tuition; his occupation that of a student.

34 & 35.—Head teacher receives £87 10s., and all the school fees, as before described.

36.—About £150 per annum.

37.—In accordance with the principles of the Church of England, daily, and by both teachers. The school is visited by the Rev. L. H. Rumsey, M. A., Chairman of the Church School Local Board.

JERRY'S PLAINS.

1.—Saint James', Church of England, Jerry's Plains.

2.—Built of wood; in very fair condition.

3.—318 feet.

4.—About 2,000 square yards.

5.—A small place built of wood for boys only; none for the girls.

6.—Superficial square feet, 318; cubic feet, 2,709.

7.—32.

8.—The front and back doors, and two windows.

9.—No account of the last year's attendance to be found.

10.—The oldest 14, the youngest 4.

11.—Four classes; 11; ages—1st class, 9 to 14; 2nd class, 7 to 10; 3rd class, 6 to 12; 4th class, 4 to 8.

12.—5½ hours; from 9 till 12¼, and from 2 till 4.

13.—A whole holiday on Saturday, 1 week at Christmas and Easter, and 4 weeks at harvest time.

14.—230.

15.—No means of ascertaining.

17.—6d. paid weekly. Four pay 1s. weekly.

18.—No former master has left any account of his receipts.

20.—I cannot reply to this question better than enclosing the time table of our school.

21.—A very insufficient supply. More books written for.

22.—The Map of the World, Holy Land, New South Wales, British Islands.

- 23.—Detained after school hours,—extra lessons given. No advice or instruction left on record respecting it.
- 24.—By the clergyman of the district.
- 26.—John Green. Mary Ann Green.
- 28.—Lambeth, Surrey, England.
- 29.—Forty-five. Twenty.
- 30.—Commenced on the 14th of February, 1859.
- 32.—Trained at Battersea College, London. Sixteen months. The Privy Council refused my application to sit for a certificate on account of my appointment to Oliver's school, Crondall, Hants.
- 33.—I have been teaching for twenty-five years.
- 34.—It is stated to be £70 per annum.
- 36.—Impossible to say, as I am only just appointed.
- 37.—Daily by the master in the Scripture and reading lessons, and also by the late clergyman.

KEMPSEY.

- 1.—East Kempsey, M'Leay River.
- 2.—Hired house; all of wood; present condition very bad—beyond repair.
- 3.—2,160 feet.
- 4.—2,910 yards.
- 5.—No water-closet publicly provided.
- 6.—One room, 522 feet.
- 7.—29.
- 8.—Three doors and one window.
- 9.—Average annual number on the books, $44\frac{1}{2}$; average attending the school, $29\frac{1}{2}$.
- 10.—Boys' maximum age 10 years, minimum 5 years; girls' maximum age 13 years, minimum $5\frac{1}{2}$ years.
- 11.—Four classes—1st class, 12; 2nd class, 6; 3rd class, 15; 4th class, 7. 1st class, maximum age 10 years, minimum 8 years; 2nd class, maximum age 13 years, minimum 7 years; 3rd class, maximum age 11 years, minimum 6 years; 4th class, maximum age 9 years, minimum 5 years.
- 12.— $5\frac{1}{2}$ hours; from 9 till $12\frac{1}{4}$ a.m., and from 1 till $3\frac{1}{4}$ p.m.; one hour for dinner and play—from $12\frac{1}{4}$ till 1 at noon.
- 13.—Saturday, whole holiday; no half-holidays; two vacations, two weeks each, viz.—24 June and 24 December; also holidays on 26 January and 24 May.
- 14.—238 school days during the year.
- 15.—Four years is about the average time they remain at school; this average time is taken from the duration of period during which their names remain on the school register, not deducting the time that they may be kept at home for farming and domestic purposes. Boys are generally sent to school at four and five years old, and leave at about 11 years of age; girls are sent to school at the same age as boys, and remain until about 12 years of age.
- 16.—About 17.
- 17.—No fixed sum charged; charges are made according to the parents' circumstances; no charge for books.
- 18.—Amounts received from pupils during the 12 months ending the 30th September, 1858, £30 19s. 8d.—appropriated to the support of the teacher; received from the Denominational School Board within the above-named period, £70; total amount received from all sources during the above period, £100 19s. 8d.
- 19.—The annual total cost of each pupil actually attending the school during the period above-mentioned was £3 19s. $2\frac{3}{4}$ d.
- 20.—First and second classes :—Monday, Wednesday, and Friday—Prayer and singing, 15 minutes; reading history and spelling, 1 hour; English grammar, 30 minutes; geography, 30 minutes; writing on slates from subject, 30 minutes; writing copies, 30 minutes; reading Holy Scriptures, 1 hour; arithmetic tables and mental calculation, 1 hour; prayer and singing, 15 minutes. Tuesday and Thursday—Prayer and singing, 15 minutes; reading Holy Scriptures, 1 hour; catechism, 30 minutes; faith and duty, 30 minutes; writing on slates from dictation, 30 minutes; writing copies, 30 minutes; arithmetic tables and mental calculation, 1 hour; reading history and spelling, 1 hour; prayer and singing, 15 minutes. Third and fourth classes :—Monday, Wednesday, and Friday—Prayer and singing, 15 minutes; writing on slates from dictation, 30 minutes; copies, 30 minutes; reading history and spelling 1 hour; English grammar, 30 minutes; geography, 30 minutes; arithmetic tables and mental calculation, 1 hour; reading Holy Scriptures, 1 hour; prayer and singing, 15 minutes. EVERY DAY.	Infants.	Prayer and singing.	Reading or learning letters.	Elements of geography.	Writing on slates.	Recreation.	Spelling cards.	Arithmetic.	Shewing copies and singing	Scripture instruction.	Reading or learning letters.	Writing on slates.	Catechism or hymns.	Prayer and singing.
------------	----------	---------------------	------------------------------	------------------------	--------------------	-------------	-----------------	-------------	----------------------------	------------------------	------------------------------	--------------------	---------------------	---------------------

21.—First class, 1st division: Boys, 5; girls, 5.—In hand: Bible, 31; prayer book, 19; English history, 49; outlines of sacred history, 89; prophecies of the Messiah, 65; Sinclair's catechism, 42; fourth book of S. P. C. K., 28; fifth book of lessons, none—required 12; reading book for girls, 19 N*; grammar, 10 N; etymology, by Wilson, 31; arithmetic, 6 N—required 6; geography, 5—required 24; tables, none—required 24. 2nd division: Ostervald's abridgment, 118; faith and duty, 115; catechisms, 50; fourth book of lessons, 20 N; supplement to fourth book, none—required 12; grammar, none—required, 24. Second class, 1st division: Boys, 5; girls, 9.—In hand: Testament, 34; scripture history, parts 1 and 2, 75; third book of S. P. C. K., 31; third reading book, new series, 23 N; third book of lessons, none; Wilson's grammar, none—required 12; catechisms, 45; faith and duty, included above. 2nd division: Second book, new series, 19 N; second book, sequel 1, 18 N; second book, sequel 2, 19 N; Wilson's grammar, none. Third class, 1st division: Boys, 6; girls, 5.—In hand: Scripture history, New Testament, 20; historical questions, none—required 36; second book of S. P. C. K., 31; second book of lessons, 17; history of Our Lord, &c., 6 books, 1007; chief truths, 143; broken catechism, 60. 2nd division: Primer, 66; first book of S. P. C. K., 53; first book of lessons, 71; first reading book, parts 1 and 2, 42. Fourth class, 1st division: Boys, 4; girls, 4.—In hand: Easy lesson book, 63; child's first book, parts 1 and 2, 110; first steps, 9. 2nd division, boys 9, girls 9: Alphabetical tablets, 20 dozen; spelling cards, 30 dozen. 3rd division, boys 9, girls 10: Alphabetical tablets, see above.

22.—Maps, &c.: World (2), Europe, Asia, Africa, North America, South America, Australia; Canaan, No. 1, in bad order; Holy Land, No. 2, ditto; Palestine, No. 3; British Isles; globe, in wooden box, and diagrams. Single copies of books for the use and improvement of the master; Dawes' works, Nichols' help, epitome of geography, arithmetic and key (practical only). Books not in the school but recommended for future use by the master of the school, or by the clergyman of the district: Text books, 24; arithmetical table cards, 10 dozen, or 2 dozen more table books. Apparatus: Clock, blackboard (2), slates, 11 and sundry broken, 20 large size for sale; copy-books, 4 dozen also for sale; pens, 6½ boxes. The supply of books is adequate to the wants of the school.

23.—Boys, corporal punishment; girls, detained in school after usual hours. The master has a copy of the rules published under the sanction of the Denominational Board. The exemption of girls from corporal punishment, not specified in those rules, is ordered by the Local Board.

24.—School examined twice in the year by the clergyman. Prizes of books are given once a year, and also work-boxes or similar presents for the best needlework once a year.

25.—There is no Government Inspector. The Bishop of Newcastle examines the children at his visits through the diocese. The clergyman has entered his remarks after the half-yearly examination in the printed return for the quarter sent to the Denominational Board. No copy of these remarks has been kept. [In this instance I do not attach much value to these "remarks," as I have examined no school in the Colony but this one, and it is difficult to form a trustworthy opinion without more extended observation of the standard of educational attainment in the Colony.]

26.—John B. Haskew.

27.—Mrs. Haskew, and five monitors chosen from the classes daily.

28.—Gloucestershire and Suffolk, England.

29.—37 and 36 years.

30.—October, 1856.

31.—Trained.

32.—At Model School, Morpeth, in 1850.

33.—Experience in teaching previous to present appointment 6½ years in other schools.

34.—£87 10s. per annum.

35.—£50 per annum—fees. [N.B. The discrepancy between present amount of fees and that given in answer to question 18 is explained by the circumstance of another school having been recently opened.]

36.—£137 10s.

37.—Instruction in Old and New Testaments, faith and duty, Church of England catechism, according to the enclosed time table, by the schoolmaster. The Rev. J. A. Greaves, clergyman of the Church of England, visits the school.

NEWCASTLE.

1.—Church-street, Newcastle.

2.—Chiefly of stone, in bad repair, needing a new building.

3.—363½.

4.—4,875 superficial square feet.

5.—Two ordinary water-closets, constructed of brick, needing repair.

6.—One room, containing 363½ square feet, and 4,664¾ cubic feet.

7.—60.

8.—A square aperture in the middle of the ceiling.

9.—Annual average number on the books: boys, 50; girls, 22. Average number attending school: boys, 41; girls, 19.

10.

* The books marked "N" are published by direction of the Commissioners of National Education in Ireland.

- 10.—Minimum age: boys, 5; girls, 4. Maximum age: boys, 14; girls, 12.
- 11.—Number of classes, 5. Average number, 1st class, 15; 2nd class, 14; 3rd class, 14; 4th class, 10; 5th class, 7. 1st class, maximum age, 14; minimum age, 10; 2nd class, maximum age, 12; minimum age, 9; 3rd class, maximum age, 10; minimum age, 7; 4th class, maximum age, 8; minimum age, 6; 5th class, maximum age, 7; minimum age, 4.
- 12.—5 hours per day,—from nine in the morning to twelve at noon, and from two to four in the afternoon; the intervening cessation being for dinner and recreation in the playground.
- 13.—One holiday in the week, viz., Saturday. Two vacations in the year, each consisting of two entire weeks, the twenty-fifth of June and the twenty-fifth of December, being the days which determine, respectively, the first weeks of each vacation.
- 14.—240.
- 15.—Twelve months.
- 16.—Not known.
- 17.—A weekly sum, varying from 3d. to 1s., according to the circumstances of the parents. No charge for books. Total annual charge for each pupil, from 12s. to 48s., according to the position of the parents.
- 18.—£86 10s. 6d. appropriated in part payment of the teachers' salaries; £87 10s. from Government. Total amount of school fees and Government aid, £174 0s. 6d.
- 19.—£2 18s. 2d.
- 20.—1st and 2nd classes: portion of time allotted to each subject daily,—reading, half an hour; writing, half an hour; arithmetic, an hour and three-quarters; grammar, half an hour, Tuesday and Thursday; geography, half an hour, Monday and Wednesday; Church of England catechism, half an hour, Friday; dictation and letter-writing, half an hour, Monday, Wednesday, and Friday; drawing, half an hour, Tuesday and Thursday. 3rd class: time allotted to each subject daily,—reading, one and three-quarter hours; writing, one hour; arithmetic, one hour; tables, half an hour, Monday and Wednesday; spelling, half an hour, Tuesday and Thursday; Church of England catechism, half an hour, Friday. 4th and 5th classes: time allotted to each subject daily,—reading, one hour and a half; writing, one hour; arithmetic, half an hour; tables, half an hour; spelling, half an hour; hymns, one-quarter hour.
- 21.—1st class: Bible, prayer book, English history, outlines of sacred history, prophecies of the Messiah, Sinclair's catechism, fourth book of S. P. C. K., fifth book, reading book for girls, grammar, etymology by Wilson, arithmetic, geography, tables, fourth book of lessons. 2nd class: Testament, Scripture history part 1 and 2, third book S. P. C. K., third reading book new series, third book of lessons, Wilson's grammar, catechisms. 3rd class: Scripture history, New Testament, historical questions, second book, S. P. C. K., second book of lessons, history of Our Lord, chief truths, broken catechism. 4th class: Easy lesson book, child's first book part 1 and 2, first steps, spelling cards. 5th class: Alphabetical tablets, spelling cards. The school books are in good order, and quite adequate to the wants of the school; none others required.
- 22.—A set of animal prints, with descriptive reading; no diagrams; a map of The World, of Europe, of Asia, of Africa, of North America, of South America, of England, of Australia, of Syria Old Testament, of Syria New Testament, of Palestine; a globe; a blackboard, but no easel for it; slates; clock. The above are in tolerable order. Certain diagrams might be useful for the 1st and 2nd classes, and additional prints for the lowest classes.
- 23.—Losing places in class; made to stand in place of sitting; extra lessons to commit to memory; extra work to be done during the intervening cessation of study; and the occasional use of the cane. The rules issued for the management of Church of England schools, by the Lord Bishop of Newcastle, states that—"Corporal punishment is allowed, but should be avoided as far as is compatible with the maintenance of due order and discipline; the master will endeavor to win the children by kindness, united with firmness, and will discriminate between idleness and inability. 22. Children who, after repeated correction, remain incorrigible will be reported to the Local Board, who will take such steps as appear to them necessary to meet the emergency, as severe punishment, or dismissal for a time, or final expulsion."
- 24.—Examined twice a year by Canon Wilton, and prizes of books distributed on each occasion.
- 25.—By Canon Wilton twice a year, occupying between two and three hours on each inspection. No report exists.
- 26.—Edward Walker.
- 27.—Hannah Fox.
- 28.—Edward Walker, Leeds, Yorkshire, England. Hannah Fox, Bath, Somersetshire, England.
- 29.—Edward Walker, 35. Hannah Fox, 34.
- 30.—March 1, 1859.
- 31.—Both trained as teachers.
- 32.—Edward Walker, trained at the National Society's Training Institution, Westminster, England, 12 months. Hannah Fox, trained at the National Society's Training Institution, Whitelands, Chelsea, England, 12 months.
- 33.—
- 34.—Head teacher, guaranteed salary, £120 per annum. Assistant teacher, £50 per annum, and the school residence.
- 35.—None.
- 36.—Total apparent income of teachers, £170 per annum and residence.

37.—Scripture history and the principles of the Church of England catechism by the head and assistant teachers twice a week; visited by Canon Wilton, of the Church of England; the books used—Bible, Testament, prayer book, outlines of sacred history, Sinclair's catechism, chief truths, broken chatechism, history of Our Lord.

PORT MACQUARIE.

- 1.—Town of Port Macquarie.
- 2.—Brick, shingled, requires to be re-shingled.
- 3.—714 feet, exclusive of verandah (390).
- 4.—4,840 superficial square yards.
- 5.—Double water-closet, requiring slight repairs.
- 6.—Larger room, 544 superficial square feet, 6,228 cubic feet; smaller room, 155 ft. 10 in superficial, 1,870 cubic feet.
- 7.—32, average; of these 15 are usually in smaller rooms.
- 8.—Six windows and chimney. Larger room, open roof.
- 9.—44; 23 boys, 21 girls; average, 17 boys, 15 girls.
- 10.—Maximum, 15 years; minimum, 3 years.
- 11.—Four classes: 1st, 10, from 15 to 9 years; 2nd, 14 to 6 years; 3rd, 7 to 4 years; 4th, 37 to 3.
- 12.—From 9 to 12 a.m., and from 2 to 4 p.m.
- 13.—Two weeks at Christmas, two at the end of June, one at Easter, the 24th of May, Good Friday, and Saturdays.
- 14.—234.
- 15.—7 years.
- 16.—This question not understood—there are three other schools in the township. Church School the oldest.
- 17.—The parents pay according to their circumstances, the fees vary from 2d. to 1s. per week; books not charged for.
- 18.—Fees from children, £32 19s. 2d.; from Government, £70; nothing from any other source.
- 19.—Average cost of education per child, £2 6s. 6d.
- 20.—1st and 2nd classes: Morning—9 to 9 $\frac{3}{4}$, English grammar; to 10 $\frac{3}{4}$, geography one day, reading history, &c., next; to 11 $\frac{1}{4}$, writing from dictation or copy; to 12, religious instruction. Afternoon—2 to 2 $\frac{3}{4}$, writing copies; to 4, arithmetic and mental calculation, girls. 3rd and 4th classes: Morning—9 to 10, writing on slates; to 11, reading; to 12, arithmetic tables, religious instruction. Afternoon—2 to 3, writing copies or on slates; to 4, reading, girls.
- 21.—1st class: Bible, history of England, fourth book, N. S. grammar, geography, arithmetic, chronology, Sinclair's catechism. 2nd class: third book, Testament, abridgment of Scripture history, tables, catechism, faith and duty. 3rd and 4th classes: second book, tables, historical questions, first book, sheet lessons, &c.
- 22.—Maps of The World, Europe, Asia, Africa, North and South America, England.
- 23.—Corporal punishment is avoided as much as possible. No instructions have been received.
- 24.—The Rev. T. O'Reilly visits the school regularly and examines the children.
- 25.—The Rev. T. O'Reilly visits the school twice a week, when not prevented by his distant clerical duties.
- 26.—John Lancaster.
- 27.—Eleanor Lancaster, Herefordshire, England.
- 28.—Manchester, England.
- 29.—23 years.
- 30.—January 1st, 1858.
- 31.—I have been more or less under the training of Rev. T. O'Reilly, since 1849.
- 32.—
- 33.—One year as monitor in this school, and nine years as assistant teacher in Christmas Creek School, M'Leay River; no other occupation.
- 34.—£102 19s. 2d.
- 35.—£32 19s. 2d.
- 36.—£102 19s. 2d.
- 37.—Regular daily religious instruction given by the master, and on each Tuesday and Friday by Rev. T. O'Reilly. Prayer is offered at the commencement and close of each day's proceedings. Regular Sunday-school. Teachers—Rev. T. O'Reilly, Mrs. O'Reilly, Miss Inness, and Miss Young. Books used—Bible, Church of England prayer book, hymn and other small religious books for the younger children.

SCONE.

- 1.—Scone, County of Brisbane, Diocese of Newcastle.
- 2.—School is attached to the master's residence, is constructed thus,—the foundation of stone, walls of brick plastered inside, roof ceiled and shingled, and the floors boarded; it needs a few slight repairs and enlargement.
- 3.—Area of schoolroom, 556 $\frac{1}{2}$ superficial square feet, inside measurement.

4.—Area of enclosed ground adjoining the school, and in which it stands, 3,660 square yards.

5.—One water-closet provided for the boys, with brick walls on a stone foundation, with shingled roof, and two seats; inside measurement, 6 feet high by 4 feet 2 inches by 4 feet 2 inches. One water-closet for the girls, of slab walls and shingled roof, with two seats; inside measurement, 6 feet high by 4 feet 6 inches by 4 feet 6 inches. Each water-closet is at a sufficient distance from the other, and surrounded by high palings, distant from the water-closet about 3 feet.

6.—There is only one schoolroom, containing 5,565 cubic feet, 556½ superficial square feet.

7.—Average number of pupils usually assembled in this room was, for the year ending September 30, 1858, 59.

8.—The schoolroom is ventilated by one door, 3 feet by 6 feet 6 inches, three windows, 5 feet 6 inches by 4 feet each, and one chimney, 3 feet 4 inches by 3 feet.

9.—Annual average number on the books, 42 boys, 40 girls; total, 82. Annual average number attending, 30 boys, 29 girls; total, 59.

10.—Maximum age of males and females is 14, minimum age of males and females is 4.

11.—School is divided into three classes: 1st class, with an average number of 18, maximum age 14, minimum age 9; 2nd class, with an average number of 22, maximum age 12, minimum age 9; 3rd class, formed into four divisions, with an average number of 42, maximum age 8, minimum age 4.

12.—The number of hours the pupils attend school each day is 5½; commencing at 9 a.m. to 12 noon, with an interval of five to ten minutes at half-past 10 a.m. for going out; from 12 to 2 p.m. is occupied in the dinner, &c., school commencing again at 2 p.m. until half-past 4 p.m., when the pupils are dismissed for the day.

13.—Saturday in each week is a holiday. At Easter there is a vacation of three days, at Midwinter one week, at Michaelmas three days, at Christmas one week.

14.—245 days appropriated to school studies during the year.

15.—7 years.

16.—The number of children in the immediate locality where the school is situated, who do not usually attend, is about 15.

17.—Weekly sum charged to each pupil for instruction varies from 3d. to 6d. No charge for books. Total annual charge, 13s. to 26s., for each pupil.

18.—Annual amount of school fees received from pupils for year ending September 30, 1858, was £72, which is appropriated to the support of the teacher. Annual amount received from the Denominational Board towards the support of teacher was £70. Total amount from all sources, £142.

19.—Average annual total cost of the education of each pupil during above period is £2 8s. 1½d.

20.—Subjects of daily instruction for each class:—For all the classes on each school day: a.m.—9 to 9¼ prayers, singing a psalm or hymn, and forming into classes for work; and from 11¾ to 12 examination of the copies of each child by the teacher, and calling of the roll. 1st class: on Monday, Wednesday, and Friday, from 9¼ to 10 a.m., reading books of lessons, and then answering questions thereon, repeating spelling task; 10 to 10½ a.m., lesson in English grammar; 5 to 10 minutes recreation; 10½ to 11¼, repeating lesson in geography, answering questions and referring to the maps: every day, 11¼ to 11¾, writing copies: Tuesday and Thursday, 9¼ to 10, reading the Holy Bible and answering questions thereon, repeating Collect for following Sunday or passages from the faith and duty of a Christian; 10 to 10½, questions on the catechism of the Church of England, or lessons in tables of arithmetic; 10½ to 11¼, writing from dictation: Monday, Wednesday, and Friday, 2 to 3 p.m., reading the Holy Bible and answering questions thereon put by the teachers: Tuesday and Thursday, 2 to 3, reading portions of history or books of lessons: every day, 3 to 4¼, arithmetic, *vivâ voce*, and written on slates and blackboards. Girls go to the mistress to sew. 2nd class: every day, 9¼ to 10, writing copies, repeating spelling task or Collect for following Sunday: Monday, Wednesday, and Friday, 10 to 10½, reading books of lessons and answering questions thereon: Tuesday and Thursday, 10 to 10½, reading the New Testament and answering questions thereon: Monday, Wednesday, and Friday, 10½ to 11¼, writing from dictation: Tuesday and Thursday, 10½ to 11¼, learning and repeating the catechism or lesson on tables of arithmetic: Monday, Wednesday, and Friday, 11¼ to 11¾, lesson on geography with maps: Tuesday and Thursday, 11¼ to 11¾, repeating task in English grammar and answering questions on the same: Monday, Wednesday, and Friday, 2 to 3, reading lessons on Scripture History: Tuesday and Thursday, 2 to 3, reading books of lessons and answering questions: every day, 3 to 4, arithmetic on slates and blackboards, and *vivâ voce*. Girls to sew. 3rd class: Monday, Wednesday and Friday, 9¼ to 10, lesson on geography with maps and repeating hymn: Tuesday and Thursday, 9¼ to 10, learning first steps to catechism: every day, 10 to 10½, writing in copy-books or on slates: Monday, Wednesday, and Friday, 10½ to 11¼, reading and spelling in divisions: Tuesday and Thursday, 10½ to 11¼, reading on religious subjects: Monday, Wednesday, and Friday, 11¼ to 11¾, arithmetical tables: Tuesday and Thursday, 11¼ to 11¾, questions on common things: Monday, Wednesday, and Friday, 2 to 3, reading on religious subjects in divisions: Tuesday and Thursday, 2 to 3, reading books of lessons and spelling in divisions: every day, 3 to 4¼, learning numbers and elements of arithmetic, on blackboards and slates, in divisions. All the classes every day: 4¼ to 4½, calling the roll, singing an hymn, prayers, and dismiss.

21.—1st class: The Holy Bible, book of Collects, the catechism of the Church of England, the faith and duty of a Christian, history of England, fourth book of lessons (2 series), geography, etymology, English grammar, arithmetic, and tables. 2nd class:

class: New Testament, book of Collects, the catechism of the Church of England, Scripture history, third book of lessons (2 series), English grammar, geography, arithmetic, and tables. 3rd class: 1st division—New Testament, Watts' hymns, the catechism of the Church of England, Baxter's Scripture history, second book of lessons (2 series): 2nd division—history of Our Blessed Lord, Sermon on Mount, miracles and parables, psalms in monosyllables, first steps to catechism, Watts' hymns, second book of lessons: 3rd division—Watts' hymns, first steps to catechism, easy reading lessons, spelling cards and tablets: 4th division—alphabetical tablets. None other kinds of books are needed. The number is adequate to the wants of the school.

22.—Map of the World; map of Europe (2); map of Asia (2); map of Africa; map of North America; map of South America; map of New South Wales; map of Australasia; map of Canaan (2); map of Palestine (2); map of the Ten Tribes. A terrestrial globe, 9 inches diameter, mounted; a terrestrial globe, 3 inches diameter, in a box; 3 blackboards and 3 stands for same; 4 desks; 10 forms; 2 stools; 1 table; 2 boxes for slates; 3 book shelves; a large supply of pens, penholders, inkstands, copy slips, ink powders, slate pencils, a ruler, and c.ock; the condition of these at present is good, and none others are now needed.

23.—Confinement beyond the usual school hours, and corporal punishment by the cane when necessary. The following is one of the rules of the Church of England Schools:—“Corporal punishment is allowed, but should be avoided as far as is compatible with the maintenance of due order and discipline; the master will endeavor to win the children by kindness, united with firmness, and will discriminate between idleness and inability”

24.—Two examinations during the year, at Easter and Michaelmas, by the Local Board, or by persons appointed by them. Prizes given are books of history, biography, travels, or other interesting works, given after the examination at Michaelmas to the two most deserving children in each class.

25.—There is no official inspection of the school; it is repeatedly and frequently visited by the resident clergyman of the Church of England. It is inspected by the Local Board about four times in the year, and by the Lord Bishop of Newcastle once or twice a year, according to circumstances. The only existing report on the state of the school is that made by the Commissioners on Education, who inspected the school in 1855, which is as follows:—“Scene—This school is held in a brick building, well situated and adapted for the purpose, the room is airy and clean, and there is a good supply of furniture and apparatus. The children read tolerably, understand the lesson fairly, and spell well; the writing is fair; the arithmetic is highly creditable to the teacher. In grammar they have made little progress, but have a good knowledge of geography; they exhibit but an imperfect acquaintance with the catechism. The children are irregular and unpunctual in their attendance, but clean and very orderly. The teacher is a female, and appears to be efficient.”

26.—David Scott.

27.—Maria Scott, Margaret Scott.

28.—David Scott, born at Dublin, age 47 years. Maria Scott, born at sea, age 18 years.

29.—Margaret Scott, born at Sydney, age 13 years.

30.—May 1, 1858.

31.—Not trained as a teacher.

33.—Experience of 16 years teaching. Previous occupation that of clerk.

34.—Total annual amount of salary, £70 from the Denominational Board.

35.—The fees paid by the children for schooling amounted to £72 last year. There is also a residence for the teacher, of 4 rooms, rent free.

36.—Total annual income £142.

37.—For the kind and quantity of religious instruction, see reply to question 20. The school is visited by the Rev. Coles Child, resident clergyman of the Church of England. The titles of the books are given in reply to question 21.

SINGLETON.

1.—Singleton.

2.—The building is constructed chiefly of brick; the master's dwelling is over the school; the building, although old, is in middling good condition.

3.—The area of the schoolhouse contains 1,050 square feet.

4.—40 lineal yards by 16, that is, $40 \times 16 = 640$ square yards.

5.—A large double-seated water-closet, which is in good condition; and although there be not separate ones for the sexes, yet the boys are not permitted to go at the same time as the girls.

6.—There are two rooms appropriated for teaching, each containing 272 square feet, and 2,244 cubic feet.

7.—About 18 children in each.

8.—There are ventilators at the top of each window, besides which the front door of each room is kept open during school hours.

9.—The annual average on the books is 23 boys, 24 girls. The average number attending the school, 19 boys, 17 girls.

10.—The maximum age of the boys is 14; the minimum, 4. The maximum age of the girls is 15; the minimum, 5.

11.—There are 3 classes in the school, viz. :—

Class.	Average No.	Maximum age.	Minimum age.
1st	12	15	9
2nd	17	9	7
3rd	7	6	4

12.—The pupils attend 5 hours each day, viz., 9 o'clock till 4 in the evening; the intervening time between 12 and 2 is spent in the playground.

13.—Saturday is a holiday in each week; there are two vacations in each year of a fortnight each, commencing in the months of June and December.

14.—227 days.

15.—Average period, 6 years.

16.—Throughout the whole of the district, which is very extensive, about 300.

17.—The weekly sum charged for one pupil is 1s., or quarterly, 13s., &c.; if there are two pupils from the same family, the charge for the two is 1s. 6d. per week; nil; nil.

18.—Total for the year ending September 30th, 1858, £74 14s.; appropriated for the salary of the teacher. From the Government, £87 10s.; from other sources, nil. The total amount from all sources, £162 4s.

19.—Annual cost of each pupil, 19s. 6d.

20.—The first hour is spent in reading the Scriptures, and other religious instruction; spelling lessons, half an hour; writing, half an hour; arithmetic and grammar, and arithmetic and geography, alternately. From 2 till 3 p.m., the first class reads in the third and fourth book; the second and third classes in the more elementary books—at times the two latter classes write during this period, write and read afterwards. Dictation is regularly practised by all who are able to write. The female children have needlework on Mondays, Tuesdays, Wednesdays, and Thursdays, from 3 till quarter to 4, when arrangements are made for closing the school.

21.—The Holy Bible, Church of England catechism for the first and second classes; first, second, third, and fourth Denominational School Books, arithmetics and grammars of the Irish National Board, the usual elementary Denominational books are used by the second and third classes. The second class reads the New Testament, and all receive instruction in the catechism. Some of the books are in good condition, others dilapidated. No others are needed—those in use adequate.

22.—Maps:—The World, Europe, Asia, Africa, The Holy Land, Travels of St. Paul. A small terrestrial globe, a blackboard: all in good condition—no others required.

23.—Corporal punishment resorted to if necessary, but seldom required, moral means being generally sufficient. The printed instructions of the Denominational Board.

24.—Twice. Prizes were formerly awarded, but have of late been discontinued.

25.—By the clergyman of the Church of England. Weekly, or about 40 times annually, each visit occupying about an hour. This is exclusive of the Sunday school. No official report of the school has been made of late, except that of the Local Board at the usual half-yearly examinations, which has been regularly sent to the Denominational Board.

26.—William John Walker.

27.—Not any assistant teachers; monitors are appointed in turn.

28.—Birthplace of the teacher, England.

29.—35 years.

30.—January, 1857.

31.—Yes.

32.—Trained in this Colony at both the National and the Denominational Model Schools in Sydney. One month at each. Not any certificate.

33.—In England, the experience of a teacher in a private boarding school of the first class; before the present appointment, as teacher of a school under the National Board. Not any previous occupation before teaching.

34.—Government salary, £87 10s., for the teacher.

35.—School fees, exclusive of salary, about £6 4s. 5d. per month.

36.—About £150.

37.—That which is in accordance with the teaching of the Church of England. Daily. By the teacher, and periodically by the clergyman. Visited by the Rev. James Blackwood, B.A., clergyman of the Church of England. The Holy Bible; catechism; questions illustrating the catechism; faith and duty of a Christian, &c.; Collects from the book of common prayer.

STROUD.

1.—Stroud, Port Stephens, County of Gloucester.

2.—Schoolroom brick-built, and shingled roof, erected in 1858, a few windows broken by hailstorm; earthwork round the building requires levelling. Schoolhouse brick-built, shingled roof; a few repairs are needed; fence round the school premises in a dilapidated state.

3.—Schoolroom, 968 superficial feet; schoolhouse, 1,584 superficial feet.

4.—16,416 superficial feet.

5.—One water-closet for the use of children, brick-built, and shingled; requires plastering and new flooring; an additional closet is much wanted.

6.—968 superficial feet; 100½ cubic feet.

7.—From 50 to 60.

8.—4 windows each side of schoolroom, open with a swivel at the top, ventilator in chimney under the ceiling.

9.—Average number on books, 67; average attendance, 50; boys and girls about equal.

10.—13 years; 3 years.

11.—4 classes:—1st class, 18 children; maximum age, 13 years; minimum age, 9 years. 2nd class, 12 children; maximum age, 12 years; minimum age, 7 years. 3rd class, 12 children; maximum age, 10 years; minimum age, 5 years. 4th class, 12 children; maximum age, 8 years; minimum age, 3 years.

12.—5½ hours; commencing at 9 a.m.; closing at 4 p.m.; from 12 to half-past 1 for dinner.

13.—The whole day on Saturday. No half-holidays except on special occasions. Vacations twice a year—December and July; 2 weeks and 2 or 3 days, according to the date of closing school. 3 days at Easter.

14.—234 days.

15.—This depends on the position of the parents; some children remain in the school for 7 or 8 years; others only a few months.

16.—Cannot answer this question; but there are a considerable number in the neighborhood not attending any school.

17.—7s. 6d. per quarter; 25s. per annum; 4s. 6d. per quarter; 18s. per annum. No charge for books, except copy-books.

18.—School fees, £66 0s. 2d., appropriated for the master; from the Australian Agricultural Company a salary of £40, and double rations equal to £42 in value. Total, £148 0s. 2d.

19.—Annual cost of the education of each pupil, £2 19s. 2¼³d.

20.—

SYDNEY.

- 1.—452, Kent-street, Sydney.
 2.—Entirely stone, in fair repair.
 3.—680 square feet, 8,500 cubic feet.
 4.—1,200 square feet; the children have, however, been prohibited from playing within the enclosure, by order of the Chairman of the School Committee; they are, therefore, compelled to make use of the street as a playground.
 5.—Small, very bad, built against the back wall of the schoolhouse, and immediately adjacent to one of the school windows, thereby emitting upon all changes of weather, and at all times, most disagreeable and pestilential effluvia.
 6.—Only one room.—(See answer No. 3.)
 7.—Boys, 76; girls, 62; total, 138—average June, 1858. Boys, 87; girls, 87; total, 174—average June, 1859.
 8.—By eight large windows, the upper sashes being movable are always let down during school hours.

9.—Annual average on roll book, for the year ended September, 1858—Boys, 71; girls, 58; total 129. Annual average of daily attendance of same year—Boys, 56; girls, 49; total, 105.

10.—Boys, from 15 to 3 years; girls, 17 to 3 years.

11.—First class—6 boys and 4 girls; age, boys 15 to 11, girls 17 to 10. Second class—11 boys and 8 girls; age, boys 14 to 9, girls 14 to 9. Third class—21 boys and 24 girls; age, boys 12 to 8, girls, 13 to 8. Fourth class—18 boys and 13 girls; age, boys 14 to 7, girls 10 to 7. Fifth class—12 boys and 10 girls; age, boys 8 to 6, girls 9 to 6. Sixth class—7 boys and 5 girls; age, boys 7 to 5, girls 6 to 5. Seventh and eighth classes—composed of remaining 18 infants; age, boys 5 to 3, girls 5 to 2½. The above is taken from the quarter ended June, 1858.

12.—See time table. The interval generally employed in executing school business for the Presbyterian teachers throughout the Colony, and in preparing and arranging lessons, &c., &c. for evening duties.

13.—Saturdays, 26th January, 24th May, 30th November (St. Andrew's Day), Easter Monday, and Good Friday; 10 school days Midsummer, and 10 school days Midwinter.

14.—236 days.

15.—Cannot reply satisfactorily; some have remained with me for seven years, others for one month, and numbers from six months to three years.

16.—Impossible for me to say, but the number must be very great.

17.—6d., 9d., and 1s. per week for instruction, and one penny extra charged, by order of the Chairman of the school, upon those pupils who do not attend the Sabbath-school, for the purpose of school repairs, prize books, &c., &c.; but previous to the year 1858, I have borne the expenses of school repairs, prizes, &c., except in 1857, when some extensive repairs and alterations were done by the School Committee; the children are not charged with books.

18.—Fees, £122 11s. 1d.; salary, £140; total, £262 11s. 1d., for the year ended September, 1858. Appropriation as follows:—Rent, £52; ferry, £20; and in the support of my mother, sister, and self; received £15 worth of books from Government grant for books; total, £277 11s. 1d.

19.—£2 12s. 10¼d. cost of each pupil per annum.

20.—

The Girls' time table is exactly the same as above, with one exception, that the hour between three and four o'clock is occupied in needle and fancy work of every day in the week, except Friday.

21.—Chambers' Educational Course Books.—First Class : Bible, catechism, biography, geometry, geography, Lennie's grammar, Valpy's latin grammar, mechanics, arithmetic, and elocution. Second Class : Bible, catechism, history of British Empire, fourth book, grammar, geography, arithmetic, drawing and sciences. Third Class : New Testament, third book, grammar, geography, rudiments of knowledge, sequel to second book No. 2. Fourth class : Second book, sequel to second book, No. 1 Scripture and secular tablets. Fifth class : Second book, Scriptural and secular tablets, and arithmetical tables. Sixth, seventh, and eighth classes : Alphabetical and monosyllabic tablets.

WANTED :—4 dozen catechisms, 2 dozen Bibles, 3 dozen Testaments, 3 dozen, each, 1st and 2nd books, 1½ dozen slates, 1 eight-day clock, 1 bookcase with lock, 1 trunk with lock, for needle and fancy work.

22.—Maps : World, Europe, Asia, Africa, America, Australia, Scripture World, United States, British Isles, Palestine. (Globe) Celestial, (Globe) Terrestrial ; blackboard for music, &c., stand. Cards : Reading disentangled, Scripture tablets, illustrated mammalian, illustrated ornithological, illustrated piscine.

23.—The cane in ordinary cases, confinement or expulsion in extraordinary cases. No written instructions further than the printed pamphlet from the Central Board, and containing rules and regulations for Denominational schools. Chairman of School Committee or Local Board.

24.—Once a year by the Chairman of School Committee, who examines the pupils for several hours as to their progress. Prize books have, until 1858, been awarded by me ; 1858 were awarded between myself and the fund derived from the extra penny (as before stated) by way of encouragement to the deserving.

25.—By Chairman of School Committee four times a year ; also by strangers throughout the year who, in every case, expressed themselves as being highly satisfied with the proficiency of the pupils. None.

26.—James Thomson.

27.—Isabella Thomson.

28.—James Thomson, Edinburgh, Scotland, aged 31.

29.—Isabella Thomson, Edinburgh, Scotland, aged 25.

30.—10th May, 1852.

31.—Educated at the most celebrated academies in Edinburgh, and High School.

32.—Nearly seven years, and obtained prizes as tokens of merit, proficiency, and excellence.

33.—Two years at Rolland's Plains, Port Macquarie, and have been in present situation seven years. None.

34, 35, & 36.—Annual, £140 ; fees, £122 11s. 1d. ; total, £262 11s. 1d.

37.—The Old and New Testaments, the Assembly's shorter catechism, truths of Christianity, Scripture lessons, Scripture tablets, five days in the week, by myself and the Rev. John Dougall, Presbyterian, in connection with the Synod of Australia.—See time table.

BATHURST.

Bathurst, 9 May, 1859.

Sir,

I have the honor to acknowledge receipt of your communication of 2nd February last, transmitting a series of questions respecting the Presbyterian School in this place. In consequence of a recent change of masters, and other circumstances, the delay which has occurred in furnishing the replies has been unavoidable, and it is hoped will be excused.

The school hitherto has been a *mixed school*, boys and girls having been taught together in the same classes. The master has, however, been always a married man, and his wife has assisted in the duties of the school. The existing premises have been for several years quite inadequate, consisting of only one room for the school, and two small apartments for the teacher's use. A very neat and substantial building, however, is now in course of erection in another part of the town, which ought to be ready in September or October. I have given the dimensions of the new schoolrooms, which provide separate accommodation for the boys and girls. The other information will be found in the subjoined replies :—

1.—Present school, William-street ; new school, George-street, Bathurst.

2.—Brick. Has been put into tenantable repair.

3 & 4.—The present building stands on one side of an acre of ground purchased in 1832 by the trustees of the Presbyterian Church. The church stands in the centre of the acre. The remainder of the land has been used as a playground, except a small plot paled off for a garden. I cannot give the exact dimensions of the present schoolhouse.

5.—Only one water-closet, in sufficient repair.

6.—Present schoolroom, 551 square feet, 5,234 cubic feet. New rooms :—boys'—512 square feet, 6,144 cubic feet ; girls'—576 square feet, 6,912 cubic feet. The new building stands on half an acre, and will be divided by a partition. There will be separate entrances for the boys and girls, separate water-closets, &c., &c.

7.—70 in the present room. The new rooms will *each* accommodate that number comfortably.

8.—No special provision for ventilation in the present room but the windows, and a door at the back of the building opening into an empty space under the gallery, in the front of which is an aperture two feet square. The new rooms will be well ventilated.

9.—Annual average on the books—boys, 45½ ; girls, 35½. Average attendance—boys, 41½ ; girls, 29½. The average attendance has been higher since the appointment of the new master.

- 10.—From 4 to 15 years, both males and females.
- 11.—Six classes, at present consisting as follows:—1st class—9 boys and 5 girls; maximum age, 6; minimum age, 4. 2nd class—7 boys and 9 girls; maximum age, 7; minimum age, 4. 3rd class—4 boys and 5 girls; maximum age, 10; minimum age, 6. 4th class—6 boys and 4 girls; maximum age, 10; minimum age, 8. 5th class—11 boys and 4 girls; maximum age, 15; minimum age, 10. 6th class—6 boys and 2 girls; maximum age, 15; minimum age, 10.
- 12.—5 hours; morning from 9 to 12; afternoon from 2 to 4. The interval from 12 to 2 for dinner and recreation.
- 13.—Saturday in each week is a whole holiday. No half-holidays. Two weeks are allowed at Christmas, and one at Easter, besides the days usually kept as public holidays, altogether amounting to about four weeks in the year.
- 14.—240.
- 15.—Can give no satisfactory reply.
- 16.—Have not the slightest idea.
- 17.—The maximum charge is 1s.; minimum, 6d. per week, paid weekly, except by special arrangement. No charge for books, which are provided by the Board, or by the teacher.
- 18.—The late master has left no record, but from private memoranda he has informed me that his receipts, in shape of fees for half-year ending December 31, 1858, amounted to £47 15s. 5d., which he says was a fair average. The annual average fees I believe to be about £90. The annual salary from Government is £96 5s. Both salary and fees are the property of the master. There is no other source of support. The total cost of supporting the school may therefore be estimated annually at £186 5s.
- 19.—Average annual cost of each pupil, taking 70 as the average attendance, £2 13s. 2½d.
- 20.—Sixth (highest) class—reading, plain and ornamental writing, arithmetic, mental arithmetic, grammar, geography, history, dictation. Fifth class—reading, writing, arithmetic, mental arithmetic, elementary grammar and geography, spelling. Fourth class—reading and spelling, writing, elementary arithmetic. Third class—reading and spelling, writing on slates. Second class—do., do. First class—alphabet. All the girls are taught needlework, plain and ornamental.
- 21.—The Irish National School Books for reading and geography, Whittaker's (Pinnock's) History of England. A new stock has just been received; they are in good condition, and quite adequate for the present wants of the school.
- 22.—A full supply of maps. No prints or diagrams, but are much needed.
- 23.—Generally an appeal to the moral feelings. There are no written instructions to the teachers, except the printed Rules of the Denominational Board.
- 24.—Hitherto only once a year at Christmas, when prizes amounting in value to about five pounds, in books, have been distributed. The Local Board has lately been re-organized, and the examinations will henceforth be monthly. The annual examinations have been conducted by the Presbyterian minister.
- 25.—By the Local Board monthly. Two to three hours. Owing to the inadequacy of the premises, the school has never been what it ought to be. At present, however, the attendance is good, the discipline rapidly improving, and, as a necessary consequence, the progress of the pupils is increasingly satisfactory.
- 26.—John Tucker.
- 27.—Hannah Tucker, his wife.
- 28.—J. T., Bideford, Devonshire. H. T., London.
- 29.—J. T., 50. H. T., 40.
- 30.—January 1st, 1859.
- 31 & 32.—Mr. Tucker was not trained as a teacher, but was for many years member of a school committee, and is thoroughly acquainted with systematic education. Mrs. Tucker was trained in the British and Foreign School, Borough Road, London. They presented certificates of competency of the highest character, which they have fully justified.
- 33.—Mr. Tucker kept a boys' school, and Mrs. Tucker a girls' school, at Newtown, Sydney, for three years previously to their present appointment. Before leaving England Mr. Tucker was in business in Bideford.
- 34, 35, & 36.—*Vide* reply 18.
- 37.—The Scriptures are read daily in the school by all the pupils who can read. The teacher also questions them on what they read. He also instructs them in the shorter catechism of the Westminster Assembly, and in Watts' catechism. Mr. Tucker is perfectly competent to impart sound religious instruction, and there is no necessity for the attendance of a minister for that purpose. At the monthly examinations, conducted by me, this most important subject is, of course, not overlooked.

I have, &c.,
JAMES B. LAUGHTON,
 Minister of the Presb. Church, Bathurst, and
 Chairman of the Local Board.

CAMPBELLTOWN.

- 1.—Campbelltown.
- 2.—Brick, and in fair repair.
- 3.—The room is 26 feet long and 15 wide, 390 feet square.
- 4.—One acre of land, used as recreation ground.
- 5.—One small one, in fair order.

- 6.—One room, containing 390 square, or 3,900 cubic feet.
 7.—64.
 8.—Well ventilated.
 9.—74; 36 males, 38 females. 32 boys, 35 girls = 67.
 10.—From 4 to 17, males; and from 3 to 18 years, females.
 11.—4 of boys and 4 of girls = 8. 1st and 2nd class:—boys, from 4 to 8 years; girls, do. 3rd and 4th class:—boys, from 8 to 17 years; girls, from 8 to 18 years.
 12.—5 hours; from 9 till 12, studies; from 12 till 2, recreation; from 2 till 4, studies.
 13.—Saturdays, and 9 days at Christmas, and 10 at Easter.
 14.—242 days.
 15.—5 years.
 16.—None belonging to this denomination.
 17.—8d. per week, 7s. per quarter, or 28s. per year, books included.
 18.—Fees, £90, which went to the support of the teachers, as well as the Government allowance of £70, making a total of £160.
 19.—Average, £2 7s. 9d., annual cost of each pupil.
 20.—Reading, writing, arithmetic, grammar and geography, and history; and taught in accordance with the time table published by the Denominational Board of Education.
 21.—Books the same as those used in the National Schools of Ireland, together with the Old and New Testament; all in good order.
 22.—Maps of The World, of Europe, of Asia, of Africa, of North and South America; all in good repair. A globe is required.
 23.—Deprived of their accustomed amusements, and to get extra lessons.
 24.—Four times a year, by the members of the Local Board and others; and every encouragement is given to the meritorious and deserving.
 25.—By the Rev. William M'Kee, once a week. "The school is in a very flourishing state, and is most efficiently conducted."
 26.—Robert Douglas Graham.
 27.—Lucindia Graham.
 28.—Robert Douglas Graham is from Banbridge, and Lucindia Graham is from Lurgan.
 29.—Robert Graham is 33 years of age, and Lucindia his wife is 28.
 30.—Appointed in August, 1856.
 31.—Yes, trained.
 32.—National School, Dublin, and in the Tullintanvally School for the period of five years. First class B and best mark.
 33.—As teacher under the National Board of Education, Sydney.
 34.—At the rate of £70 a year from Government.
 35.—At the rate of £90 per annum (school fees.)
 36.—Total annual income, £160.
 37.—Religious instruction is imparted to the children by the Rev. William M'Kee, minister of the Church of Scotland here, once a week. Old and New Testament.

CHARCOAL CREEK.

- 1.—Charcoal Creek.
 2.—The schoolroom is built entirely of wood, with brick chimney. Present condition: requires shingling.
 3.—384 square feet.
 4.—4,840 square yards.
 5.—None provided.
 6.—384 square feet, 3,072 cubic feet.
 7.—From 45 to 55.
 8.—4 windows, made to open when required.
 9.—34 boys, 37 girls; 23 boys, 24 girls.
 10.—Boys, 14 years, 5 years; girls, 13 years, 4 years.
 11.—
- | Classes. | No. Boys and Girls. | Age, Boys and Girls. |
|----------|---------------------|----------------------|
| 1 | 12 | From 10 to 14 |
| 2 | 15 | " 9 " 13 |
| 3 | 17 | " 7 " 12 |
| 4 | 13 | " 5 " 6 |
| 5 | 10 | } " 4 " 5 |
| 6 | 6 | |
- 12.—The school is opened at 9 o'clock a.m., and closed at 4 o'clock p.m.; 10 minutes recess at 11 o'clock a.m., and one hour from 1 o'clock p.m. to 2 o'clock p.m., for dinner-time, being allowed in each day.
 13.—One holiday (Saturday) in each week. One vacation at Christmas, fourteen school-days
 14.—447 days.
 15.—About 2½ years.
 16.—14 children in the neighborhood who do not usually attend the school.
 17.—The average quarterly charge for each child, 3s. 4d., or 13s. 4d. per annum. No charge is made for books.

DENOMINATIONAL SCHOOLS IN NEW SOUTH WALES.

37

18.—£30 0s. 6d. appropriated to support of teacher. Government salary, £87 10s. No pecuniary or any other support from other sources.

19.—Annual total cost of each pupil, 12s. 9½d., £2 10s.

20 & 21.—

CLASSES.	SUBJECTS.	No. OF DAYS.	TIME OCCUPIED BY EACH LESSON.	TITLES OF BOOKS USED IN EACH CLASS.	PRESENT CONDITION OF BOOKS.
1st, 2nd, 3rd..	Arithmetic	5	30 minutes	1st book arithmetic	Good.—No other books are required. Yes, quite sufficient.
1st, 2nd	Grammar	3	20 "	Lennie's	
1st, 2nd	Geography	3	20 "	Sullivan's, and Australian geography by Sir. T. L. Mitchell	
1st, 2nd	Reading	5	20 "	Bible and 4th book; sequel to ditto	
1st, 2nd, 3rd..	Writing	5	20 "	Carpenter's spelling, by Dr. Young

4th, 5th	Reading the rest of the day	5	20 "	1st book	
6th	Learning alphabet, &c.....	5	All day.		

22.—No prints, diagrams, or instruments in the school; a few of the two former are required. Maps in use: Eastern Hemisphere, Western Hemisphere, Europe, Asia, Africa, North America, South America, Australasia, New South Wales and Victoria, Palestine, British Isles, and Scripture World; also, one blackboard. The above are in good order.

23.—Insubordination is punished by confinement in schoolroom during dinner-hour. No instructions whatever on the subject given by the Board, &c.

24.—The school is examined annually, and prizes distributed at the same time according to merit. Description: Biographies, Abbott's school histories, and other works of a religious and moral tendency.

25.—By chairman and members of the Local Board twice in the year; about three hours; no report.

26.—Richard Hawkins.

27.—Mrs. Hawkins instructs the girls in plain and fancy needlework. No assistant, pupil teacher, or monitors attached to the school.

28.—Birthplace of teachers, England.

29.—Age of teachers, 34 years.

30.—April 1, 1853.

31.—Yes.

32.—St. James' Model School, Sydney; period, five weeks; possesses a certificate of competency from the above institution.

34.—Salary of teacher, £87 10s. per annum.

35.—None whatever.

36.—Total annual income of teacher, £117 0s. 6d.

37.—The Scriptures are read by the children daily, and explained by the teacher; also the shorter catechism, once a week. Visited by Rev. C. Atchison, Presbyterian minister of Wollongong; books used, the Scriptures and shorter catechism.

DAPTO.

1.—East Dapto, district of Illawarra; boys' and girls' school.

2.—The school is built of brick, with shingled roof, and in good repair, and sufficiently commodious to receive a greater number of children than at present attending.

3.—450 square feet.

4.—4,840 square yards.

5.—No water-closets, but the materials are provided for their immediate erection.

6.—The schoolroom is the only room provided for the use of the pupils, containing as before mentioned 450 square feet, and 5,400 cubic feet.

7.—The present average is about 41.

8.—The schoolroom is ventilated by means of four windows, two on each side of the building, through which the room is kept cool and free from draught.

9.—The present teacher was not twelve months in connection with the school at the date mentioned, consequently cannot give the average required.

10.—Males, 13 to 4 years of age; females, 12 to 4 years of age.

11.—6 reading and spelling classes; 2 grammar classes; 2 geography classes; 2 writing classes; 1 history class; 2 arithmetical classes.

12.—The school opens at 9 o'clock a.m. and terminates 4 o'clock p.m., with an intermission of an hour at mid-day for dinner.

13.—One holiday in each week, viz. :—Saturday; no half-holidays. Only one vacation in each year at Christmas time, the duration of which in 1858 was thirteen days.

14.—244 days.

15.—No average can be given for reason mentioned in reply to query 9.

16.—An impossibility to estimate owing to the scattered district.

17.—The charges are for the most part paid quarterly, varying in proportion to the number of branches taught, say 13s to 52s. per annum, but a number of the children are taught free, the parents being unable to pay.

18.—See reply to query 9. The fees are received by the teacher for his own benefit.

19.—See reply to query 9.

20.—Reading, spelling, &c., and in the highest classes, the meanings and derivations of words, writing, arithmetic, including mental and the tables, grammar, geography, history, religious instructions, catechism, &c., &c.; reading, $1\frac{1}{2}$ hours daily; writing, 1 hour daily; arithmetic, &c., 2 hours daily; grammar, $\frac{1}{2}$ an hour each alternate day; geography, $\frac{1}{2}$ an hour each alternate day. Religious instruction is communicated to the pupils more or less every day, but on each alternate day the Bible is read as a class-book, and any explanations or questions considered necessary are then given or asked. On Friday afternoon the usual routine of school duties is suspended, in order that the pupils may rehearse the lessons prepared during the previous part of the week.

21.—1st reading class, alphabet; 2nd do., 1st reader; 3rd do., 2nd reader; 4th do., 3rd reader and Testament; 5th do., 4th reader and Bible; 6th do., 5th reader and Bible, and Goldsmith's history of England, arithmetics (Walkinghame's and National School), table book (Fulton's), grammar (Lennie's), geography (Guy's illustrated London and Pinnock's catechism of do.), catechism of Westminster Assembly of Divines. The books are in good condition, and adequate to the present wants of the school.

22.—Maps of the World, Europe, Asia, Africa, North and South America, New South Wales, Canaan and Palestine, chronological chart of Scripture history. The school is much in need of globes and a blackboard.

23.—When correction is necessary the pupil is detained a certain time after school hours; corporal punishment is only resorted to in extreme cases.

24.—The school is publicly examined by the gentlemen composing the Local Board previous to the Christmas vacation, on which occasion prizes are awarded to the more worthy. The value of the prizes depends entirely upon the amount collected for their purchase.

25.—The school is officially inspected by the members of the Local Board as opportunity offers; the distance of the school from the residence of the members of the Local Board, and the occasionally impassable state of the roads preventing a regular visitation.

26.—Samuel Rae M'Phail.

27.—Janet M'Phail.

28.—S. R. M'Phail, born at Castle Douglas, in Kircudbrightshire, Scotland; Janet M'Phail, born at Dundee, Scotland.

29.—S. R. M'Phail, age 29 years; Janet M'Phail, age 31 years.

30.—May 31st, 1858.

31.—S. R. M'Phail was trained as a teacher—was three years in the South Corporation School of Liverpool, England, under his father, and upwards of ten years an assistant to him in Sydney in one of the Model Schools.

33.—Janet M'Phail was not trained as a teacher.

34.—Amount of gross annual receipts about £120.

35.—No emoluments, &c.

36.—£120.

37.—See reply to query 20.

DINGO CREEK.

1.—Dingo Creek, Manning River.

2.—Of slabs laid on sleepers, shingled, and nearly new.

3.—Four hundred and twenty-five (425) superficial square feet in the whole of the building.

4.—Four thousand eight hundred and forty (4,840) square yards.

5.—No water-closets erected.

6.—Three thousand three hundred and seventy-five cubic feet (3,375), and three hundred and seventy-five (375) superficial square feet.

7.—Twenty-six (26).

8.—By two spacious windows.

9.—Thirty-five (35). Twenty-nine (29). Twenty-one (21) boys and fourteen (14) girls.

10.—From fourteen (14) to four (4) boys; and from twelve (12) to four (4) girls.

11.—Four (4) Seven (7).

12.—From 9 till 12, forenoon; from 2 till 4, afternoon—2 hours allotted for dinner and recreation.

13.—One (Saturday). One, consisting of 14 days at Christmas.

14.—Two hundred and forty-six (246).

15.—Pupils who are capable of performing labor on farms seldom remain longer than 3 years; those who are not capable of working remain at school about 4 years.

16. Eleven (11).

17. Four-pence (4d.) each, weekly. No charge for books. Seventeen shillings and four-pence (17s. 4d.) each pupil, annually.

18.—Twenty-three pounds twelve shillings and eight-pence (£23 12s. 8d.) annually, appropriated to the support of the teacher. No other support except the salary from Government. Total amount of support from all sources, seventy-six pounds two shillings and eight-pence (£76 2s. 8d.)

19.—Two pounds ten shillings and eight-pence (£2 10s. 8d.) each.

20.—First class—Monday.—Spelling and reading, from 9 till half-past 10; writing till 11; arithmetic, till 12. Second class.—Reading and answering questions, from 9 till 10; writing, till half-past 10; spelling, till half-past 11; arithmetic, till 12. Third class.—Spelling and reading, from 9 till 11; writing on slates till 12. Fourth class.—Alphabet and monosyllables. First class.—Afternoon, arithmetic from 2 till 3; reading and descriptive geography till 4. Second class.—Spelling, from 2 till 3; arithmetic, till 4. Third class.—Simple rules in arithmetic, from 2 till 3; spelling and easy questions, till 4. Fourth class.—Alphabet and short words. First class—Tuesday, spelling from 9 till 10; geography till 11; arithmetic till 12. Second class.—Spelling, from 9 till half-past 10; writing, till 11; arithmetic, till 12. Third class.—Writing on slates, from 9 till 10; spelling and reading till 11; arithmetic till 12. Fourth class.—Alphabet. First class—afternoon, writing, from 2 till half-past 2; arithmetic, till half-past 3; reading in the Bible, till 4. Second class.—Reading, from 2 till half-past 2; arithmetic, till half-past 3; spelling, till 4. Third class.—Writing, from 2 till half-past 2; spelling, till half-past 3; arithmetic, till 4. Fourth class.—Alphabet and monosyllables. First class—Wednesday.—Spelling and reading, from 9 till half-past 10; writing, till 11; arithmetic, till 12. Second class.—Reading and answering questions in Scripture lesson books, from 9 till 10; writing, till half-past 10; spelling, till half-past 11; arithmetic, till 12. Third class.—Spelling and reading, from 9 till 11; writing, till 12. Fourth class. Alphabet. First class—afternoon.—Arithmetic, from 2 till 3; reading and descriptive geography, till 4. Second class.—Spelling, from 2 till 3; arithmetic, till 4. Third class.—Simple rules in arithmetic, from 2 till 3; spellings and questions, till 4. Fourth class.—Monosyllables. First class—Thursday.—Writing, from 9 till half-past 9; spelling, till half-past 10; grammar, till 12. Second class.—Reading, with questions, from 9 till 10; writing, till half-past 10; exercises on the maps till 11; arithmetic, till 12. Third class.—Simple rules in arithmetic, from 9 till 10; writing on slates, till half-past 10; spelling and reading, till half-past 11; counting, till 12. Fourth class.—Alphabet and short words. First class—afternoon.—Scripture lesson, with questions, from 2 till half-past 2; mental arithmetic, till 3; arithmetic, till 4. Second class.—Arithmetic, from 2 till 3; reading, till half-past 3; mental arithmetic, till 4. Third class.—Writing on slates, till 3; spelling, till 4. Fourth class.—Short words, and learning to count. First class—Friday.—Geography, from 9 till 10; mental arithmetic, till half-past 10; spelling and reading, till 12. Second class.—Spelling, from 9 till 10; writing, till half-past 10; arithmetic, till 12. Third class.—Writing on slates, from 9 till half-past 9; spelling and reading, till 12. Fourth class.—Monosyllables, and learning numbers. First class—afternoon.—Singing, from 2 till half-past 2; catechism and tables, till 4. Second class.—Catechism and tables, from 2 till 4. Third class.—Reading and spelling, from 2 till 4. Fourth class.—Alphabet and short words.

21.—First class.—Bibles, 3rd and 4th book of lessons; grammar and 5th book of lessons, occasionally. Second class.—Testaments. Sequel to 2nd book of lessons. Third class.—2nd book of lessons. Fourth class.—1st book of lessons, in good condition, quite adequate at present.

22.—Maps of England, Scotland, Ireland, Asia, Europe, Africa, America, and Palestine. The map of Australasia is wanted.

23.—The cane is used for any act of gross misconduct. For negligence in school duties, detention in the school during part of the time allotted for recreation. No written instructions from any Board.

24.—Quarterly, by the resident clergyman. Prizes of books are given by the teacher, assisted by the parents, at the Christmas vacation.

25.—By one or other of the Local Board, who generally visits the school every alternate month. One hour and a half. No report.

26.—William Thompson.

27.—None.

28.—London.

29.—53.

30.—July 1st, 1856.

31.—Not trained.

32.—

33.—From eight years teaching previous to present appointment, and by often visiting schools. Clerk to Collector of Excise

34.—Fifty-two pounds ten shillings (£52 10s.)

35.—Twenty-three pounds twelve shillings and eight-pence (£23 12s. 8d.) as school fees.

36.—Seventy-six pounds two shillings and eight-pence (£76 2s. 8d.)

37.—Instruction is daily given by the teacher from the Scriptures, as well as from the clergyman who visits the school. The Rev. Mr. Carter, Presbyterian. Bible, Scripture lesson books, and 4th book of lessons.

GOULBURN.

- 1.—Goulburn.
- 2.—A slab building, needs repairs.
- 3.—Schoolroom 35 by 14 feet.
- 4.—One quarter of an acre.
- 5.—Two water-closets end of the ground.
- 6.—The school is one room. I have paid £38 per year since 1852 for a house and schoolroom, also furnished ditto for its use.
- 7.—27 boys, 25 girls; total, 52.
- 8.—Two windows in front, two ditto back, a door at the end, one in street.

- 24.—Rev. Wm. Ross (Robert Waugh, Esq., J.P., Chairman), monthly. School examined June and December, 1857.
- 25.—School officially visited by Rev. Wm. Ross, Robert Waugh, Esq., J.P.
- 26.—William Harris, Presbyterian teacher, Goulburn.
- 27.—Martha Harris, teacher to the girls.
- 28.—William Harris, St. Paul, Shadwell, London; Martha Harris, Cork.
- 29.—William Harris 60, Martha Harris 30 years.
- 30.—Appointed to the present office June 1st, 1852.
- 31.—Not trained as a teacher.
- 32.—None.
- 33.—Brought up as an artist; teaching to two families for 7 years on the Hunter River.
- 34.—Annual salary £96 6s.
- 35.—Fees, allowances, £50 6s. 6d.
- 36.—Total annual income £146 12s. 6d.
- 37.—Religious instructions: Bible, Testament, Scripture lessons, daily (morning); Moral lesson, natural history (afternoon); two days in the week geographical and descriptive outlines, &c., with maps.

ST. LEONARD'S.

- 1.—St. Leonard's, North Shore.
- 2.—Stone foundation, weatherboard, needs repairs.
- 3.—264 feet.
- 4.—782 square yards.
- 5.—Four sheets of bark nailed together.
- 6.—264 square feet; 1,980 cubic feet.
- 7.—35.
- 8.—Six windows.
- 9.—46. 35. Males, 30; females, 5.
- 10.—3 to 12.
- 11.—Five; 6: 3 to 4, 4 to 6, 6 to 7, 7 to 9, 9 to 12.
- 12.—Opens at 9 a.m.; dinner hours, from 12 to 2 p.m.; duties resumed at 2 o'clock; closes at 4 p.m.
- 13.—The usual general holidays, and one week at Christmas.
- 14.—261 (less holidays as above).
- 15.—From a week to two years.
- 16.—I have no means of ascertaining.
- 17.—9d. to 1s. per week. No charge made for books.
- 18.—£55 18s. 9d., appropriated to teacher's support; fixed salary, £70; total, £125 18s. 9d.

- 19.—35. £3 11s. 11½d.
 20.—1st, 2nd, 3rd, 4th classes :—writing, from 9 to 10 ; English grammar, 10 to 11. 5th class :—reading, from 9 to 10 ; practising writing on slates, 10 to 11. 1st, 2nd, 3rd, 4th classes :—11 to 12, geography, and writing to dictation. 5th class, reading, spelling, &c., from 11 to 12 o'clock. 1st, 2nd, 3rd, 4th classes :—Bible reading, catechism, &c. ; 3 to 4¼, arithmetic. 5th class, Scripture lessons.
 21.—Books as published by the National School Board ; books well supplied.
 22.—Maps :—The World, Europe, Asia, Africa, America, and Australia. No further supply required at present.
 23.—System pursued in the Normal Schools, Scotland. Not furnished with written instructions.
 24.—Twice, by the Rev. John Dougall. Prizes distributed on examination days, by members of the Local Board. Various.
 25.—The Rev. John Dougall, very frequently ; 1½ hours each.

“ I have this day examined the school at St. Leonard's, and have to express my satisfaction with the improvement manifested, especially in the upper classes.

“ JOHN DOUGALL,

“ Chairman of Local Board.”

- 26, 28 & 29.—Gilbert Crerar, Perthshire, Scotland ; 38.
 27, 28 & 29.—Mary Crerar, Middlesex, London ; 38.
 30.—1st March, 1856.
 31.—No.
 33.—Taught in Scotland, two years, preceding 1839. From 1843 to 1854, clerk in a steam shipping company's office in London.
 34—36.—(See question 18.)
 37.—Catechism of the General Assembly of Divines at Westminster. Daily, by the teacher. Bible read daily, Scripture lessons, &c. The Rev. John Dougall, Presbyterian.

MORPETH.

- 1.—High-street, Morpeth.
 2.—Brick, with stone foundation ; in good repair ; one room.
 3.—Area, 800 square feet.
 4.—66 by 165, or 10,090 square feet less 800 for schoolhouse.
 5.—One water-closet (slab), in bad condition.
 6.—800 square feet ; 11,200 cubic feet ; the building being nearly 40 by 20, and 14 feet high from floor to ceiling.
 7.—Average for January, 1859 :—39 boys, 31 girls, total 70.
 8.—The upper sashes of six large windows are movable, and are generally let down during school hours ; there are also four circular ventilators in the ceiling, each 12 inches in diameter, and one large doorway.
 9.—On the books—40 boys, 34 girls, total 74 ; average in attendance—36 boys, 32 girls, total 68.
 10.—Boys, 14 years and 3 years ; girls, 14 years and 3 years.
 11.—Four classes for boys and four for girls, averaging, for each sex—1st class, 14 to 8 years ; 2nd class, 11 to 7 years ; 3rd class, 8 to 5 years ; 4th class, 6 to 3 years.
 12.—From 9 a.m. to 12, and from 2 p.m. to 4, or half-past 4.
 13.—One holiday in each week ; two vacations in the year, one at Christmas of two weeks, and one at Easter of one week.
 14.—245 days.
 15.—Two years, nearly.
 16.—Not informed. (I believe, not any.)
 17.—4d. to 6d. each pupil per week. There is no charge for books ; the scholars, in most cases, find spelling-books, the teacher reserving the school books for the use of the school during school hours.
 18.—£40 school fees ; from Government, £87 10s. ; total, £127 10s.
 19.—Average £1 16s. 5d.
 20.—First and second classes :—spelling, geography, reading and explanation, and grammar, three-quarters of an hour each ; afternoon—writing half an hour, arithmetic one hour, history and general information, half an hour. Third class :—reading, spelling, tables, and writing on slates, three-quarters of an hour each ; afternoon—arithmetic, and grammar, three-quarters of an hour each, and general information half an hour, joining the first and second classes. Fourth class :—letters, figures, mental arithmetic, and smaller spelling and reading.
 21.—2 dozen Carpenter's spelling assistants, and 2 dozen Mavor's ditto (belonging to the pupils) ; 1 dozen of Bibles, 1 dozen of Testaments, 1 dozen of the Presbyterian shorter catechism, and the following books published by the “ National Board ”—1 dozen of girls' reading books, No. 6 ; 1 dozen boys' reading books, No. 5 ; 1 dozen boys' and girls' reading books, No. 4 ; 1 dozen ditto ditto, No. 3 ; 1 dozen first sequel and 1 dozen second sequel ; 1 dozen

dozen second reading books, second sequel; and 1 dozen first books, for smaller pupils. 1 dozen grammars, 1 dozen arithmetics, 1 Greek history, 1 book on algebra, &c., &c., all in good condition, and fully adequate.

22.—Maps, viz.:—The World, 8 feet by 6; Europe, 6 feet by 6; Asia, 6 feet by 6; Africa, 4 feet by 6; America, 6 feet by 6; Australia, 6 feet by 6; and British Isles, 10 feet by 8. Large columns of spelling, printed on zinc; also, reading lessons, on the same material; 1 blackboard; all in good condition.

23.—The usual kind of school strap is made use of, and that only upon the hand.

24.—There are four quarterly examinations during the year, either by Rev. R. Blain or Rev. W. Purves.

25.—The Rev. William Purves, Presbyterian Minister, East Maitland, and the Rev. Robert Blain, Presbyterian Minister, Hinton. A whole forenoon is usually occupied in the inspection and examination of the school.

26.—John Keating, Mary Keating, Elijah Keating.

27.—None.

28.—John Keating, Dublin; Mary Keating, Dublin; Elijah Keating, Singleton, N. S. W.

29.—46 years; 46 years; 13 years.

30.—1st June, 1852.

31.—Yes.

32.—The National Model School, Prince-street, Sydney, for three months; first-class certificate for competency.

34.—From Government £87 10 0.

35.—School fees 40 0 0.

£127 10 0, total income of the school.

36.—As above, £127 10s.

37.—Bible Christianity, as embodied in the Westminster catechism, and taught by all Presbyterians, three times a week, by the teacher, and sometimes by the minister who may visit the school, viz.:—The Rev. W. Purves, or the Rev. R. Blain, Presbyterian Ministers in connection with the Synod of Australia. The list of books already named contain the enumeration here required, viz.:—12 Bibles, 12 Testaments, 12 catechisms, with volumes of Scripture questions by Miss Corner and Dr. Kitto, with many other smaller works.

NEWCASTLE.

1.—The school is situated in the suburbs of Newcastle, and is open for children of both sexes.

2.—The building is of wood; and is of a convenient size, and in proper repair.

3.—It is 34 feet long by 20 feet broad, having an area of 720 square feet.

5.—The school is at present unprovided with water-closets.

6.—The schoolhouse consists of one large room, containing 720 square feet and is 11 feet in height, so that it contains 7,920 cubic feet.

7.—The average attendance at the school during the year 1858 was 56.

8.—The schoolroom is amply ventilated by the windows opening from the top and from the bottom, and by openings in the floor.

9.—The annual average number on the books for the year 1858 was 50 boys and 22 girls; and the average attendance during the same year was 40 boys and 16 girls.

10.—The maximum and minimum ages of the boys is 18 and 3; and of the girls 14 and 3.

11.—The school is divided into four classes; the average number in the 1st class is 14, and the maximum and minimum ages are 9 and 3; in the 2nd class the average number is 22, and the maximum and minimum ages are 11 and 6; in the 3rd class the average number is 12, and the maximum and minimum ages are 12 and 8; and in the 4th class the average number is 8, and the maximum and minimum ages are 18 and 9.

12.—The school hours are from 9 a. m. to 3 p. m., with an interval from 12 a. m. to 1 p. m., which is employed by the pupils in dining and recreation.

13.—The holidays are Saturdays, the Anniversary of the Colony, Good Friday, and Easter Monday, the Queen's Birthday, two weeks at Midsummer, and two weeks at Midwinter.

14.—There are 237 days devoted to school studies in the course of the year.

15.—Assuming 5 years as the ordinary age at which pupils enter school, and 13 years as the ordinary age at which they quit it, and allowing $\frac{1}{3}$ of their time for absence on account of sickness, or other causes in themselves or their parents, leaves an average period of 7 years spent at school.

16.—The number of children in the locality between the ages of 5 and 15, who do not usually attend school, may be estimated at between 15 and 20.

17.—The school fees are from 0d. to 1s. weekly; and the annual charge for the use of books, writing materials, paper, and other requisites, is from 3s. to 6s.; and the total annual charge for each pupil is from 0d. to £2 14s.

18.—The amount of school fees received from the pupils during the year ending 30th September, 1858, was £103 3s., which was appropriated as a part of the teacher's income. The amount received from other sources was a salary of £70 from Government, and a gratuity

gratuity of £1 from a parent for the education of whose children the teacher had declined to charge more than the usual fees. The total amount received from all sources towards the support of the school during the above-mentioned period was £174 3s.

19.—£174 3s., divided by 57, the average attendance for the year ending 30th September, 1858, gives £3 1s. 1d. as the average annual total cost of the education of each pupil.

20.—The subjects of instruction given to each class, and the time allotted to each, is as follows:—1st class, $2\frac{1}{2}$ hours reading, 1 hour arithmetic, $1\frac{1}{4}$ hours writing, $\frac{1}{4}$ hour singing; 2nd class, 2 hours reading, $1\frac{1}{4}$ hours arithmetic, $1\frac{1}{2}$ hours writing, $\frac{1}{4}$ hour singing; 3rd class, 2 hours reading, 1 hour arithmetic, 1 hour writing, $\frac{3}{4}$ hour geography and grammar on alternate days, $\frac{1}{4}$ singing; 4th class, 2 hours reading, 1 hour arithmetic, 1 hour writing, $\frac{3}{4}$ hour geography and grammar on alternate days.

21.—The books used in the school are,—by the 1st class, No. 1 of the National School books; by the 2nd class, No. 2 and the sequels; by the 3rd class, No. 3 compendium geography, and 1st arithmetic, and Scripture lessons; by the 4th class, No. 4 Sullivan's geography, compendium geography, grammar, Alderson's orthographical exercises, Scripture lessons, lessons on the truth of Christianity, 1st book arithmetic, Ingram's arithmetic and mensuration, published by the N. S. Commissioners. The books in use are in good condition; no other kinds are at present required; the number of those in use is adequate to the wants of the school.

22.—The maps in use in the school are—maps of the Hemisphere, Asia, Europe, Africa, N. America, S. America, England, Scotland, Canaan, Australasia, N. S. Wales, and Victoria. Eight seats 10 feet long, three seats 8 feet long, one seat 6 feet long, two single desks and one double desk 8 feet. They are in good condition. The school is chiefly in want of a map of Ireland, and prints illustrative of natural history, &c.

23.—The modes of correction for the preservation of discipline are loss of rank in class, and corporal punishment. The instructions to the teacher on the subject are that corporal punishment is as much as possible to be avoided.

24.—The pupils are examined twice a year by the Chairman of the School Board, and such members of the Board as can attend. On each occasion a few prizes are given by the Chairman of the Board, in the shape of books, for general good conduct and progress in study, cleanliness, punctuality, and regular attendance.

26.—Name of teacher, Jas. Macara.

27.—None

28.—Fifeshire, Scotland.

29.—27.

30.—Date of original appointment to present office, July, 1850; with an interval from May, 1856, to October, 1857, during which the school was closed.

31.—Trained at the St. Andrew's Model School, Kent-street, Sydney, for a period of two months. Possessing no certificate of competency.

34.—Annual salary of teacher £70.

35.—Emolument, exclusive of salary, for the year ending 30th September, 1858, £104 3s.

36.—Total annual income of teacher for the above-named year £174 3s.

37.—Neither the Bible nor the General Assembly's shorter catechism is used in the school. The Scripture lessons forming part of the National School series of books are considered to be "religious instruction." In every English reading book in the school there are lessons of a decidedly religious and moral character. Though the Local Board object to the use of the Bible as a "class book," they have considered it becoming and beneficial in tendency to instruct the master before opening the school with prayer to read a few verses from the Bible in hearing of his pupils; the school is also closed with prayer. The Chairman of the Board who periodically examines the school is a clergyman, but he does not attend for the purpose of communicating religious instruction. The children of the members of his church are cared for in the matter of religious instruction in the Sunday-school attached to the church, and conducted under his superintendence.

PARRAMATTA.

1.—The school is situated in Macquarie-street, formerly known as the School of Industry.

2.—Stone and brick.

3.—1,617 square feet.

4.—2,420 square yards.

5.—Two closets in tolerable repair.

6.—Boys' schoolroom 240 square feet; girls' room 155 square feet.

7.—Boys, 39; girls, 19; total, 58 (now.)

8.—Very good.

9.—The annual average taken from the late teacher's roll book—number on book, boys, 75; girls, 35; total, 110. The average number attending—boys, 61; girls, 28; total, 89.

10.—Boys, from 3 years to 16; girls, from 4 years to 14 years.

11.—Six classes—4 in the boys' school, and 2 in the girls'. Boys, 12 in the first class, 9 in the second, 10 in the third, and 8 in the fourth; girls, 12 in the first class, and 7 in the second. Maximum and minimum ages as follows:—boys, 1st class, 16 to 10; 2nd class, 11 to 7; 3rd class, 12 to 6; 4th class, 7 to 5. Girls, 1st class, 14 to 9; 2nd class, 7 to 4.

- 12.—See time table.
 13.—Saturday in the week, and all public holidays, a fortnight at Christmas, and a fortnight at Midwinter.
 14.—230 days.
 15.—This question cannot be answered.
 16.—This question cannot be answered.
 17.—The average, weekly, 6d., 9d., and 1s.
 18.—School fees, taken from the late teacher's roll book, £220 2s. 5d.; nothing received from any other source, except salary, £96 5s.; making in all £316 7s. 5d.
 19.—£3 11s. 1d. is the cost of each pupil per annum.
 20.—

21.—The following National Education books are used:—1st class, 4th and 5th book and Bible; 2nd class, 3rd book and supplement to 3rd book, Bible; 3rd class, 2nd book and Testament; 4th class, 1st book; English grammar and 1st book of arithmetic. Chambers' Educational Course, one copy of each, viz.:—book-keeping, mensuration, geometry. 12 slates.

22.—Maps:—The World, Europe, Asia, Africa, North America, Australasia (2), British Isles, Palestine, and map-stand. Cards:—20 reading disentangled, 12 perceptive illustrations of the Bible, 5 instructive cards (Scriptural illustrated), 13 instructive cards (animals, reptiles, and insects,) 12 Testaments and Bibles, 1 blackboard for music and stand.

23.—The cane in ordinary cases, confinement in extraordinary cases, and no written account or instruction from any one.

- 24.—Twice a year by the Chairman of the Board, and prizes are given as an encouragement on examination days.
- 25.—By the Chairman of the Local Board, four times a year; no report.
- 26.—Ewebank Lough.
- 27.—Helen Lough.
- 28 & 29.—Ewebank Lough, Kendal, Westmoreland, aged 42; Helen Lough, Rothe's, Scotland, aged 37.
- 30.—1st May, 1859.
- 31, 32, & 33.—Educated at Christ's Hospital; examined by the late Bishop of Sydney, and passed. Served as teacher in this Colony 11 years, viz.:—under the Revds. John Tait, W. H. Walsh, Robert Forrest, and R. Chapman.
- 34.—Annual amount of head teacher, £96 5s.
- 35.—As taken from the late teacher's roll book, fees, £220 2s. 5d.
- 36.—As per roll book, £316 7s. 5d.
- 37.—The Bible and Testament, the Assembly's shorter catechism, perceptive illustrations of the Bible. The Rev. James Coutts, Presbyterian, in connection with the Synod of Australia. See time table.

The answers given above to the questions contained in the circular of the Denominational Board, of 2nd February, 1859, have been made out by Mr. Lough, our present teacher, with my assistance. They are not so full and complete as they might have been, had they been taken during the time that Mr. Macpherson was teacher. When he left our school was very flourishing, but as the school remained for sometime vacant, Mr. Lough had to collect the children again on his appointment. At present, you will observe, we have no school, properly speaking, of our own, but we intend to build one as soon as we can get the money, which is due from the Railway Board for the school ground which they have appropriated. I hope this paper will answer the ends for which it has been sought.

I have, &c.,
 JAMES COUTTS,
 Minister of St. Andrew's, Parramatta.

PORTLAND HEAD.

- 1.—Ebenezer, Portland Head.
- 2.—Built of stone, and about to be repaired.
- 3.—18 feet by 24. It is about to be enlarged to 18 by 36.
- 4.—Four acres.
- 5.—
- 6.—
- 7.—About 40.
- 8.—Two doors and two windows.
- 9.—49. 24 boys and 25 girls (6 months' average.)
- 10.—Boys, 14—5; girls, 14—7.
- 11.—Boys, 2 classes; girls, 3 classes.
- 12.—5 hours; from 9 to 12, and from 1 to 3.
- 13.—One whole day on Saturday. One month's holiday during the year, given at corn planting and harvesting.
- 14.—123 during the last six months.
- 15.—
- 16.—
- 17.—From 3s. to 7s. per quarter. Nothing is charged for books.
- 18.—
- 19.—
- 20 & 21.—First class.—Reading (Testaments and 4th and 6th books), writing arithmetic, book-keeping, dictation, catechism, Carpenter's spelling, Lennie's grammar, tables, geography (as used by the National Schools of Ireland). Second class.—Reading (Testaments and 3rd books), Mavor's spelling, Moore's catechism of geography, Moore's grammar for beginners, writing, arithmetic, tables, Watts' catechism. Third class.—Reading (Testament), Mavor's spelling, Watts' catechisms. The books are in good order, and there is an ample supply.
- 22.—Maps of The World, Europe, and Australia, each in good order.
- 23.—Detention in school at the dinner hour, or for an hour after school in the evening.
- 24.—Twice, by the Local Board, assisted by the Rev. Mr. Adam, of Windsor, after which prizes are presented (by the teacher) to the most deserving, and consist chiefly of Testaments, hymn books, and Chambers' library for young people.
- 25.—The school is frequently visited by the Rev. G. M'Fie.
- 26.—Edward Chatterton.
- 27.—Teacher's wife, M. A. Chatterton (no salary.)
- 28.—Rye, Sussex, England.
- 29.—Teacher's age, 45.
- 30.—October, 1858.
- 31.—Not trained.
- 32.—

- 33.—Kept a school in England, and for five years previous to this appointment, at Portland Head.
 34.—Salary of head teacher, £87 10s. per annum.
 35 & 36.—
 37.—Bible and shorter catechism.

SHOALHAVEN.

- 1.—Shoalhaven, mixed Denominational School.
 2.—Cabbage Tree.
 3.—540.
 4.—Schoolhouse erected on private property, a large paddock.
 5.—Out of repair.
 6.—540.
 7.—52.
 8.—Doors and windows.
 9.—Annual average on the books: 45 boys, 31 girls. Annual average attending school: 31 boys, 21 girls.
 10.—Boys, 15 to 4; girls, 14 to 3.
 11.—5 classes, 15 average, 14 to 3 age.
 12.—6½ hours; from 9 a.m. to 3½ p.m., one hour intervening at dinner and recreation.
 13.—Half, Saturday; one vacation at the end of the year—ten days.
 14.—244.
 15.—5 months.
 16.—The population of the locality increasing daily. It is quite impossible to answer this question.
 17.—From 2d. to 6d. weekly; no charge for books; total annual charge, from 17s. to 24s.
 18.—Amount of school fees, £58 9s. 4d., for teacher; annual salary, £70; total amount of support, £128 9s. 4d.
 19.—£2 9s. 4½d.
 20.—Geography, grammar, arithmetic, writing, reading, spelling—¾ of an hour.
 21.—1st book of lessons, 2nd book of lessons, sequel to 1st and 2nd book of lessons, 3rd book of lessons, 4th ditto, supplement to ditto, 5th book of lessons, 6th book of lessons (for females), introduction to reading, English grammar, 1st and 2nd arithmetic, book-keeping, mensuration, 4 parts Scripture lessons, shorter catechism, New Testament; in good order. Bibles and Testaments required; not adequate.
 22.—Five maps: Europe, Asia, Africa, America, and New South Wales. Globes and map of The World required.
 23.—Confinement and extra tasks.
 24.—Twice; members of Local Board and parents.
 25.—Rev. J. H. Garven, occasionally, from one to two hours. The school is in very bad repair, and erected on private property. A grant was made to the Presbytery some years since of 2½ acres of ground for a schoolhouse and teacher's dwelling. No exertion has been made to erect such buildings.
 26.—John Laird.
 27.—Mrs. Laird, assistant in female instruction, needlework, &c.
 28.—Glasgow, N. B.
 29.—42 and 45.
 30.—1st January, 1856.
 31.—No.
 32.—No.
 33.—Two years' teaching by private subscription in same locality. Clerk.
 34.—£70.
 35.—£58 9s. 4d.
 36.—£128 9s. 4d.
 37.—Three days in the week reading New Testament, catechism, psalms. Teachers. Rev. J. H. Garven, Presbyterian. New Testament, shorter catechism, psalms of David.

WINDSOR.

- 1.—Windsor.
 2.—A brick building, sufficiently large.
 3.—Length, 24 feet by 12; height, 9 feet.
 4.—Playground in rear of schoolhouse, 15 perches.
 5.—A double water-closet; brick material.
 6.—Only one schoolroom, 24 feet by 12.
 7.—Average attendance, 35.
 8.—Ventilation by front windows and back door.
 9.—Annual average number on the books,—24 boys, 15 girls. Average attendance,—21 boys, 14 girls.
 10.—Ages:—boys, from 5 to 14; girls, from 5 to 12 years.

11.—Number of classes, 4; average in each class, 6, 8, 12, 16: 1st class, from 5 to 6 years of age; 2nd class, from 6 to 7 years of age; 3rd class, from 7 to 10 years of age; and 4th class, from 10 to 14 years of age.

12.—Hours of attendance, from 9 o'clock a.m. till 4 p.m., with an interval of one hour, from 12 till 1, for dinner, &c.

13.—Saturday in each week is a holiday. The vacations are one week at Easter and two weeks at Christmas.

14.—Number of school days in the year, 260, or 48 weeks of 5 days.

15.—Some children have been on the roll for periods of three, four, and five years. The generality, however, of the children do not remain more than four, five, or six months on the roll at one time.

16.—I cannot answer this question satisfactorily. There are, I believe, a number of children in the district who go to no school at all.

17.—The weekly charge for school fees is from 3d. to 9d. One-third rank as paupers, and pay nothing. No charge is made for books. Total annual charge for each pupil, 13s., 26s., and 39s.

18.—Amount of school fees for the year ending 30 September, 1858, £29; appropriated by the teacher for his own benefit. No other sources of support but Government salary of £87 10s., making the total amount received during the year, £116 10s.

19.—£116 10s. divided by 35 (the annual average attendance) shews the total annual cost of each pupil to amount to £3 6s. 6 $\frac{1}{2}$ d.

20.—1st class,—4 lessons daily in 1st book, National series; occupies about 1 hour daily. 2nd class,—4 lessons per day in 2nd book, National series; occupies about 1 hour in the day. 3rd class,—4 lessons daily in 3rd book, National series, spelling and New Testament; occupies about 1 hour. 4th class,—2 lessons in reading, 4th and 5th books, National series, 1 lesson each in shorter catechism, Lennie's grammar, Pinnock's history, and Stewart's geography; occupies about 1 $\frac{1}{2}$ hours daily. The intervening time is occupied in writing, arithmetic, and other exercises.

21.—For books used in each class, see answer to No. 20. The books are in good condition, and the number quite adequate to the wants of the school.

22.—No prints, diagrams, or instruments supplied. The maps consist of the two Hemispheres (large), Europe, Asia, Africa, America, the British Isles, Palestine, and New South Wales; the last not in very good condition.

23.—The rod is used when occasion requires.

24.—The school is examined two times a year by the Presbyterian clergyman of the district. No prizes are given, no funds being available for this purpose.

25.—The school is frequently visited or inspected by the Rev. Mr. Adam, Chairman of the Local Board, who generally devotes two hours in examining the pupils on each visit.

26.—George Walker.

27.—No assistants.

28.—Glasgow, in Scotland.

29.—Age, 53 years.

30.—Appointed in December, 1837.

31.—Trained.

32.—Trained at the Normal Institution, Glasgow; also studied three years at the University of Glasgow; certificates of competency from both of these institutions; appointed by a select committee of the Church of Scotland, in May, 1837, as a teacher for that church in New South Wales.

33.—(See answer to No. 32)

34.—Annual salary, £87 10s. No assistants.

35.—No emoluments; annual amount of school fees, £29.

36.—Total annual income, £116 10s.; less rent of house and schoolroom, £45; net annual income, £71 10s.

37.—Religious and moral instruction is imparted to the children daily, from the Scripture lessons and the Westminster Assembly's shorter catechism, and by the Rev. Mr. Adam, on his occasional visits.

WOOLLOOMOOLOO.

1.—Palmer-street, Woolloomooloo.

2.—Wood, covered with slates; a substantial building, in good repair.

3.—24 feet by 48 feet.

4.—30 feet by 48 feet.

5.—Constructed of wood; in good condition.

6.—The schoolroom is the entire building; the measurement given above.

7.—From 90 to 105.

8.—Ten windows, 4 by 3, which open both at top and bottom.

9.—On books 80 boys, 53 girls; average attending 59 boys, 37 girls.

10.—From 3 to 14 years, boys and girls.

11.—Five mixed classes, boys and girls; first class, infants, 24, 3 to 6 years; second class, 31, from 4 to 6 years; third class, 31, from 7 to 10 years; fourth class, 28, from 7 to 10 years; fifth class, 43, from 9 to 14 years.

12.—5 $\frac{1}{2}$ hours; from 9 until half-past 12, and from 2 until 4 o'clock; recess from half-past 12 until 2 o'clock.

- 13.—One, Saturday; one vacation, Christmas, two weeks; Good Friday, Easter Monday, 26th January, 24th May, and St. Andrew's Day, each one day.
- 14.—245 days.
- 15.—From three years to one week.
- 16.—Cannot say, but the number must be considerable.
- 17.—Weekly, 3d., 6d., 9d., 1s.
- 18.—£165 3s. 10d.; appropriated £48 to assistant teacher; Government salary £87 10s.; total £252 13s. 10d.
- 19.—Total cost of each pupil, £2 12s. 8d.
- 20.—Reading, writing, arithmetic, English grammar, history, geometry, book-keeping; sewing of every kind, and vocal music; reading, twice each day; writing, once; arithmetic, twice; grammar, four times each week; history, twice each week; geometry, four times each week; book-keeping, daily; sewing, daily.
- 21.—Chambers' educational course, and books published by direction of the Commissioners of National Education of Ireland; good condition and sufficient supply.
- 22.—Maps:—The Hemispheres, Europe, Asia, Africa, Australia, British Isles, Pacific Ocean, and Palestine; Wetton's historical and geographical tablets, Johnston's diagrams, natural philosophy, and two blackboards, all in good order; none needed at present.
- 23.—Moral correction; expulsion in extreme cases. No written instructions.
- 24.—Occasionally; prizes occasionally given—books.
- 25.—Chairman of Local Board; at no stated period; according to circumstances; none.
- 26.—John McFarlane.
- 27.—Mrs. McFarlane, Miss Faddy, James McFarlane.
- 28.—Mr. and Mrs. McFarlane, Scotland; Miss Faddy, England.
- 29.—Mr. McFarlane, 34 years; Mrs. McFarlane, 30 years; Miss Faddy, 22 years.
- 30.—1st January, 1856.
- 31.—Not trained.
- 32.—None.
- 33.—Teacher of the Campbelltown Denominational School during the years 1851 and 1852; shopkeeper.
- 34.—Government salary as teacher £87 10s.
- 35.—As fees, £165 3s. 10d.; as preceptor to the church to which the school is attached, £20.
- 36.—Total of income from school, £252 13s. 10d.
- 37.—Old and New Testaments; twice a week; teacher; catechism; occasionally Presbyterian Synod of Australia; Bible, school lessons, hymns, catechism.

WESLEYAN SCHOOLS.

1. Castlereagh	Mr. McFetridge.	5. Newtown	Mr. Dunlop.
2. Chippendale	Mr. Burrowes.	6. Surry Hills	Mr. Brown.
3. Lane Cove	Mr. Goldsmith.	7. Windsor	Mr. Travis.
4. Maitland, W.....	Mr. Campbell.	8. York-street, Sydney.....	Mr. Carroll.

CASTLEREAGH.

- 1.—Castlereagh.
- 2.—It is constructed of wood; not in good condition, and requires repair.
- 3.—The area of schoolhouse is 405 square feet.
- 4.—The area of the ground adjoining the school is 3,243 square yards.
- 5.—There are no water-closets for the use of the pupils.
- 6.—There is one room only of 405 superficial square feet, and 3,645 cubic feet.
- 7.—The average number for the year 1858 was 33.
- 8.—It is ventilated by raising the window sashes.
- 9.—The average number for the year 1858 was 46, viz.:—25 males and 21 females.
- 10.—Males, maximum 12, minimum 5; females, maximum, 12, minimum 6.
- 11.—Males, five classes—1st class, 6; 2nd class, 5; 3rd class, 3; 4th class, 2; 5th class, 2. Females, five classes—1st class, 4; 2nd class, 3; 3rd class, 3; 4th class, 3; 5th class, 2. Age, males—1st class, maximum 12, minimum 9; 2nd class, maximum 10, minimum 7; 3rd class, maximum 9, minimum 7; 4th class, maximum 7, minimum 6; 5th class, maximum 7, minimum 5. Females—1st class, maximum 12, minimum 9; 2nd class, maximum, 12, minimum 8; 3rd class, maximum 9, minimum 8; 4th class, maximum 8, minimum 6; 5th class, maximum 8, minimum 6.
- 12.—School opens at 9 o'clock a.m.; intermission from 12 noon to 1 p.m., interval appropriated for dinner and play. School duties close at 4 o'clock p.m.
- 13.—Holidays—Saturday in every week throughout the year. Two vacations, one at Easter of two days, and one at Christmas of two weeks; one day in May or June for the Sunday-school examination, and one day in August for the Anniversary Missionary Meeting. In the time of heavy rain there is no attendance.
- 14.—Number of school days 247.

- 15.—The average length of time is 2 years and 8 months.
- 16.—The number is about 20.
- 17.—There are 2 pupils at 1s., 4 at 9d., 3 at 8d. per week, and the remainder at 6d. per week for each pupil. There is no charge for books annually or otherwise.
- 18.—School fees received, £46 8s 1d.; from the Denominational School Board £52 10s.; and from the same source a donation of £15 12s., appropriated to the master's use; total amount, £114 10s. 1d.
- 19.—Annual cost of each pupil, £3 9s. 4 $\frac{1}{2}$ d.
- 20.—Monday, Wednesday, and Friday before noon: 1st class—males and females—spelling, 45 minutes; English grammar, 45 minutes; writing, 30 minutes; geography and exercises on the maps, 1 hour. 2nd class—males and females—spelling, 45 minutes; rudiments of English grammar, 45 minutes; writing, 30 minutes; reading and spelling, 1 hour. 3rd class—males and females—reading and spelling, 2 hours; arithmetical tablets, 1 hour. 4th class—males and females—reading and spelling, 3 hours. 5th class—males and females—alphabet and spelling on tablets, 3 hours. Afternoon: 1st class—males and females—arithmetic, 2 hours; reading the Scriptures, 1 hour. 2nd class—males and females—arithmetic 1 $\frac{1}{2}$ hours; reading and spelling, 1 hour; arithmetical tablets, half an hour. 3rd class—males and females—simple rules in arithmetic, half an hour; reading and spelling, 2 hours; arithmetical tablets, half an hour. 4th class—males and females—reading and spelling, 3 hours. 5th class—males and females—alphabet and spelling, 3 hours. Tuesday and Thursday—ancient history is substituted for geography in the 1st class, before noon; and the fourth book of lessons for the Scriptures in the afternoon.
- 21.—1st class—Carpenter's spelling book, Lennie's English grammar, brief grammar of modern geography for the use of schools, Bible, fourth book of lessons (National), first book arithmetic (National), brief grammar of ancient history for the use of schools; 2nd class—Carpenter's spelling book, Lennie's English grammar, third book of lessons (National), first book of arithmetic (National); 3rd class—Mavor's spelling-book, sequel to book second No. 1 and 2 (National); 3th class—second book of lessons (National); 5th class—first book of lessons and tablets (National). Many of the books now in use are much worn; other books are needed; the number of books in present use is not adequate to the wants of the school.
- 22.—Two sets of tablets for beginners, 1 set of arithmetical tablets, a map of The World, 6 feet 6 inches by 3 feet 3 inches, a map of Australasia, 5 feet 3 inches by 4 feet 6 inches, map of New South Wales and Victoria, 3 feet 4 inches by 2 feet 6 inches, map of the Holy Land, 2 feet 2 inches by 1 foot 9 inches; these maps are in tolerable condition. A map of Great Britain and one of Ireland are needed.
23. Corporal punishment is inflicted on the hand by means of a strap for misconduct, and detained in school after the hour of dismissal for negligence or inattention. I have received no written or other instructions, that I am aware of, from any Board of Education, official visitors, inspectors, or managers of the school on this subject.
- 24.—No examination has been held in this school since the 25th February, 1857. No rewards or prizes of merit are given periodically in the school.
- 25.—The school is officially visited by the Rev. Mr. Davis; the length of time occupied is about half an hour. There is no report of the school hitherto. The number of pupils on the roll book for March, 1858, is 45, and for March, 1859, is 49.
- 26.—Matthew L. M'Fetridge.
- 27.—Matilda Z. M'Fetridge.
- 28.—Birthplace of the former, Coleraine, County of Londonderry, Ireland; of the latter, Portland Head, near Windsor, New South Wales.
- 29.—Age of the former, 50 years; of the latter, 37 years.
- 30.—February 2nd, 1853.
- 31.—Not trained as a teacher.
- 32.—
- 33.—Taught the Presbyterian Denominational School, at Wilberforce, from the year 1845 to the year 1851. Surveyor.
- 34.—Annual amount of salary, £52 10s., to head teacher. Assistant teachers, pupil teachers, and of monitors, nil.
- 35.—Fees, allowances, and emoluments, £46 8s. 1d.
- 36.—Total amount of income, £98 18s. 1d.
- 37.—The religious and moral instruction as set forth in the several lesson books used in school; daily; by the master; visited by the Rev. Mr. Davis, Wesleyan minister; first, second, third, and fourth book of lessons, and Bible.

CHIPPENDALE.

- 1.—Botany-street, Chippendale.
- 2.—Brick, condition good, nearly new.
- 3.—1,125
- 4.—2,346 square yards.
- 5.—Two brick closets, conjoined, brick partition, good order.
- 6.—1,125 square feet, 19,968 cubic feet.
- 7.—112.
- 8.—Two doors, 5 windows, and large ventilators at each end near the roof.
- 9.—Books, boys 92; girls 58. Attendance, boys 74; girls 40.
- 10.—Maximum, boys 14, girls 14; minimum, boys 3, girls 3.

- 11.—Classes five.—Class 1, No. 40, age max. 6, min. 3.
- | | | | | | | |
|---|---|----|---|----|---|----|
| " | 2 | 25 | " | 8 | " | 4. |
| " | 3 | 27 | " | 9 | " | 5. |
| " | 4 | 30 | " | 13 | " | 7. |
| " | 5 | 28 | " | 14 | " | 8. |
- 12.—5½ hours; commencing at 9, close at 4; cessation 10 minutes at 11 and from 12½ until 2; from 12½ one stays with those who are detained; 1 to 2, refreshment, &c.
- 13.—Saturday, Christmas 2 weeks, and the public holidays.
- 14.—245 days.
- 15.—About 12 months.
- 16.—Cannot tell.
- 17.—Paupers gratis, others 6d., 9d., 1s., weekly—25s., 37s. 6d., 50s., annual. No charge for books, a supply is kept for use; if pupils want copies for home use they buy them.
- 18.—Fees ending September 30th, 1858, £196 1s 11d.; Government, £87 10s.; bonus from ditto, £15 12s.; total, £299 3s. 11d., out of which things needful for school purposes are found, also children's feast, the remainder to the teacher's wants.
- 19.—£1 19s. 10½d.
- 20.—Monday—9 to 10, third, fourth, and fifth classes write; first and second read and spell to 11; 10 to 11, third, fourth, and fifth tables, 11·10 to 11¾, arithmetic; 11¾ to 12¼, the whole school learn to read and sing music; 12¼ to 12½, pray, call the roll, and dismiss. 2 to 3, third, fourth, and fifth read and questioned; 3 to 4, geography, drawing the map, &c.; first and second read and arithmetic from blackboard an hour. Tuesday—9 to 10, fourth and fifth draw, third write; 10 to 11, read and dictation; first and second read and spell to 11; 11·10 to 12¼, grammar; 12¼ to 12½, sing, pray, call the roll, &c.; 2 to 3¼, arithmetic to fourth and fifth; first, second, and third spell and have lessons from blackboard; fourth and fifth read and questioned from 3¼ to 4. Wednesday the same as Monday, except tables, instead of which reading and spelling. Thursday the same as Tuesday, except drawing, write instead. Friday—9 to 10, fourth and fifth draw, third write; 10 to 11, catechism; first and second the same as other days; 11·10 to 12¼, mental arithmetic; 12¼ to 12½, same as other days; 2 to 3, arithmetic; 3 to 3½, object lessons to the whole school; 3½ to 4, moral and religious instruction, questioned, &c.
- 21.—First class—read and spell from tablets; second—from second book and tablets; third—first sequel to second book, Baker's circle of knowledge first grade, Scriptures; fourth—second sequel and third book, Baker's second grade, Cornwall and National grammar, Boyce's geography, National arithmetic, and Scriptures; fifth class—fourth and fifth books, Baker's third grade, Carpenter's and Sullivan's spelling, Sullivan's and Lennie's grammar, Sullivan's and Boyce's geography, Boyce's history, Thompson's, Trotter's, and National arithmetics, National mensuration, Scripture; in fair condition; more wanted, and expected to be in hand shortly.
- 22.—Order of creation first to sixth day, parts of speech, geography, mechanics, gardening, cotton plant, manners and customs of the Chinese, whale fishing, lion, bear, rhinoceros, camel, hippopotamus, crocodile, serpent, scorpion, quail, locust, Chambers' scientific charts 1 to 3. Maps—World, Europe, Asia, Africa, America, Ancient World, Holy Land, Australia; prepared music board, blackboard, 36 tablets, 60 feet of desk, 100 feet of hat-rail with pegs; in fair order; more desk room is wanted, and another blackboard and stand; also, a globe.
- 23.—When reproof and detention fail, corporal; instructions, none received.
- 24.—Examined by the Chairman of the Local Board once last year; no prizes periodically; gifts by the teacher occasionally in books or pencil cases.
- 25.—By the Chairman of the Local Board, time (indefinite) from a few minutes to 1½ hours. The school was examined by the Local Board a week before the Commissioners' visit, the members expressed themselves as being well satisfied at the result. Commissioners' report was unfavorable and untrue. Copy of last report:—"I examined Chippendale school "on the 23rd December, 1858, and was much pleased and satisfied with the result. It was "highly creditable both to the children and to the teachers. JOSEPH ORAM."
- 26—29.—John Burrows, Mansfield Notts, age 36. Mary Ann Burrows, Burrington, Hereford, age 41.
- 30.—July, 1854.
- 31 & 32.—Not.
- 33.—Taught a private school for two years at the schoolroom, Francis-street, Glebe, in which there were upwards of 100 pupils. In the furniture business.
- 34.—£87 10s.
- 35.—£196 1s. 11d., bonus £15 12s.
- 36.—£299 3s. 11d.
- 37.—That based on Scripture. Moral daily, religious on Friday; by the teacher. Rev. Joseph Oram. Wesleyan. Bible and catechism, also Chambers' moral class-book

LANE COVE.

- 1.—Lane Cove.
- 2.—Chiefly of stone, in good repair.
- 3.—1,200.
- 4.—735 yards.
- 5.—Two, constructed of wood; in good repair.
- 6.—One room, 1,200 square, and 21,600 cubic feet.
- 7.—21 boys, 18 girls; total, 39.

- 8.—Through the roof and by windows.
- 9.—51 on the roll ; daily attendance, 21 boys, 18 girls.
- 10.—Maximum, 15 years ; minimum, 4.
- 11.—9 ; viz., 5 boys and 4 girls ; total, 9 :—

- 13.—Only Saturday. Two vacations, one at Christmas, and another at Easter, with some of the public holidays, amounting to one month in the year, the time allowed by the Central Board.
- 14.—231.
- 15.—Cannot say, the school being in existence only three years ; but I should think about seven years.
- 16.—Cannot tell.
- 17.—The average charge is nine-pence per week ; not anything for books.
- 18.—£74 14s. ; Government salary, £52 10s. ;—total amount, £127 4s.
- 19.—£3 5s. 2 $\frac{3}{4}$ d.
- 20.—Fifth class of boys : Morning—Lessons of grammar and geography, from 9 until 10 ; arithmetic, from 10 until 11 ; writing, from 11 until 11 $\frac{1}{2}$; recapitulation of geography on Monday, from 11 $\frac{1}{2}$ until 12 ; ditto of grammar, on Tuesday ; mental arithmetic, on Wednesday ; spelling, from dictation, on Thursday ; the globe, on Friday. Afternoon—Ancient and modern history, from 2 until 2 $\frac{3}{4}$; correcting and entering sums, from 2 $\frac{3}{4}$ until 3 $\frac{1}{2}$; printing or drawing, until 3 $\frac{3}{4}$; singing and prayer, from 3 $\frac{3}{4}$ until 4. Fourth class of boys and girls : Morning—Preparing lessons of grammar and geography, from 9 until 10 ; arithmetic, from 10 until 11 ; writing, from 11 until 11 $\frac{1}{2}$; from 11 $\frac{1}{2}$ until 12, gallery lesson with the 5th class boys. Afternoon—Reading and spelling, from 2 until 2 $\frac{3}{4}$; the boys then go to the desk and correct their work of the morning if not right, or printing, or drawing, as their taste leads them, until 3 $\frac{1}{2}$; then a short gallery lesson upon that subject which has been the most difficult to understand during the day, until 3 $\frac{3}{4}$; the girls under the care of Mrs. Goldsmith, from 2 $\frac{3}{4}$ until 3 $\frac{3}{4}$. Third class of boys and girls : Morning—Preparing lessons of grammar, geography, tables, &c., &c., from 9 until 10 ; examined in the same by a pupil teacher or self, from 10 until 10 $\frac{1}{2}$; arithmetic, from 10 $\frac{1}{2}$ until 11 ; writing, from 11 until 11 $\frac{1}{2}$; from 11 $\frac{1}{2}$ until 12, the same as the other classes. The other classes are under the care of Mrs. Goldsmith, and a pupil teacher, whom we are educating for that purpose after school hours. We adopt Wilderspin's Infant System, so far as is practicable in our circumstances. The infant classes receive lessons in the playground from 11 $\frac{1}{2}$ until 12. Afternoon—third class : Reading, from 2 $\frac{1}{4}$ until 3 ; arithmetic, from 3 until 3 $\frac{3}{4}$. First and second : Sequel reading, from 2 until 3 ; second book reading, from 3 until 3 $\frac{1}{2}$. The remainder of the afternoon is taken up in giving lessons in natural and sacred history.
- 21.—Fifth class : Bible, Boyce's compendium of ancient and modern history, Goldsmith's geography, Lennie's grammar, Gray's arithmetic, Sullivan's spelling-book superseded, fifth book (Commissioners of National Education in Ireland.) Fourth class : Bible, fourth book (Commissioners of National Education, Ireland) ; Lennie's grammar, Guy's geography, arithmetic (Commissioners of National Education). Third class : Bible, third book (Commissioners of National Education, Ireland), Lennie's grammar, Guy's geography, arithmetic (Commissioners of National Education, Ireland). Second class : Second sequel, Testament, first sequel second book.
- 22.—Maps of The World, Europe, Asia, Africa, America, and one of natural history or animals, in good condition ; but we are in want of maps of Holy Land, England, Scotland, Ireland, Australasia, New South Wales, &c., &c. There is a 12-inch globe, and a set of mathematical instruments in the school, in good condition.
- 23.—Left to the teacher, who adopts the system of the " man towards the boys in his " apple tree."
- 24.—
- 25.—
- 26.—Henry Goldsmith.
- 27.—Sarah Ann Goldsmith ; pupil teacher, Jane Pymble.
- 28.—H. G. in England, also S. A. G. ; Jane Pymble, New South Wales.
- 29.—H. Goldsmith, 36 ; S. A. Goldsmith, 30 ; J. Pymble, 14 years.
- 30.—April 25th, 1846.
- 31.—Yes.
- 32.—At Newtown Wesleyan School, 1 year.
- 34.—£52 10s., Government salary.
- 35.—£74 14s.
- 36.—£127 4s.
- 37.—The Bible is read every Friday, from 3 $\frac{1}{2}$ until 4 o'clock, under the direction of the teacher. No catechism taught. Visited by Rev. W. Hessell, Wesleyan minister.

WEST MAITLAND.

- 1.—High-street, West Maitland.
- 2.—Rubblestone; needs slight repairs.
- 3.—1,000 square feet.
- 4.—372 square yards.
- 5.—Weatherboard—double, with slab partition and separate entrances.
- 6.—1,000 square feet, 16,000 cubic feet.
- 7.—51.
- 8.—Lowering portion of each window.
- 9.—Average number on book, 49 boys, 14 girls; average number attending, 40 boys, 11 girls.
- 10.—Age, maximum, 13; minimum, 4—boys; maximum, 14; minimum, 4—girls.
- 11.—9 classes; average in each, 6. Boys, 1st class, maximum, 6; minimum, 4. 2nd class, maximum, 6; minimum, 5. 3rd class, maximum, 9; minimum, 6. 4th class, maximum, 9; minimum, 6. 5th class, maximum, 11; minimum, 7. 6th class, maximum, 13; minimum, 7. Girls, 1st class, maximum, 6; minimum, 4. 2nd class, maximum, 8; minimum, 5. 3rd class, maximum, 14; minimum, 8.
- 12.—5 hours; 9.30 a.m., 4 p.m.; interval 12.30 till 2 p.m., spent in dinner hour and recreation.
- 13.—1 weekly, 1 quarterly, 14 at Christmas, 7 at 1st July.
- 14.—240.
- 15.—21½ months.
- 16.—No means of ascertaining.
- 17.—6d. and 9d. a week; no charge for books; annual cost, £1 1s. 1½d.
- 18.—From pupils, £66 10s., appropriated to the teacher; Government, £87 10s.; from Wesleyan School Committee, Sydney, as a bonus, £15 12s. Total amount, £169 12s.
- 19.—Average annual cost, £3 6s. 6d.
- 20.—Subjects of instruction :—Lessons on number, and tables, classes 1, 2, and 3, boys, and 1 and 2, girls, from 9.45 to 10.15. Writing, classes 4, 5, 6, boys, and 3, girls, from 9.45 to 10.15. Reading with spelling, classes 1, 2, 3, 4, 5, boys, and 1 and 2, girls, from 10.15 to 11, and from 3 to 3.30; class 6, boys, and 3, girls, from 12 to 12.30 each day. Grammar and geography, classes 4, 5, 6, boys, and 3, girls, from 11 to 12 on alternate days. Arithmetic on slates, classes 4, 5, 6, boys, and 3, girls, from 2 to 3 each day. Mental, same classes, from 3.30 to 3.45, each day except Friday; infant class (composed of 1, 2, 3, boys', and 1, 2, girls' classes) from 2.30 to 3, each day.
- 21.—Titles of books used in infant class (composed as above) :—Irish National Schools' 1st lessons on boards, and 1st book, 1 set of easy spelling lessons, infant school manual, Pestalozzean system on number. 4th class, boys :—2nd class reading book, and sequel to ditto of Irish National Schools, New Testament, brief grammar by the Rev. W. B. Boyce, elementary principles of pure geography by James Perry, Esq. 5th class, boys :—3rd and 4th class books, grammar, and 1st book of arithmetic, of the Irish National Schools, Old Testament Scriptures, a brief grammar of modern geography printed for the Wesleyan Educational Committee. 6th class, boys, and 3rd class, girls :—4th and 5th class reading books, grammar, 1st and 2nd books of arithmetic of the Irish National Schools, geography same as in 5th class, Old Testament Scriptures. The most of the books are in good condition, and adequate to the wants of the school.
- 22.—School apparatus, &c. :—map of The World (old), map of Europe (old), map of Asia, map of Africa, maps of North and South America, map of Australasia, and map of New South Wales and Victoria, in good condition; one large blackboard in frame, two stands for lesson-boards, one large table, one set of lessons with prints on Scriptural natural history. Writing-desks are wanted, but as the school for a time had to be conducted in the present building whilst it was fitted up and used as a place of worship the writing-desks could not be put up. The pews are now removed, and the desks will be supplied with as little delay as possible.
- 23.—Correction, the rod on the palm of the hand generally; sometimes a child is put aside from the class. No written or other instructions in the school on the subject.
- 24.—Examination once a quarter by the resident Wesleyan ministers and teacher. No prizes or other rewards given.
- 25.—Visited by the Rev. B. Chapman and the Rev. W. T. Mayne, four times; half an hour.
- 26.—Walter Campbell.
- 27.—Mrs. Campbell and Amelia Campbell.
- 28.—Houston, Renfrewshire, Scotland; East Harptree, Somersetshire, England; Sydney, New South Wales.
- 29.—43; 39; 14.
- 30.—1st June, 1850.
- 31.—Not trained.
- 32.—High testimonials from the Rev. K. D. Smythe, Presbyterian, and the Rev. T. B. Harris, Wesleyan ministers.
- 33.—Eight and a half years' experience; previous occupation, a clerk.
- 34.—£87 10s.
- 35.—£82 2s.
- 36.—£169 12s.
- 37.—Religious and moral instruction communicated daily by the teachers in the classes, according to the character of the lesson read or gone over. Visited by the Rev. B. Chapman and the Rev. W. T. Mayne, Wesleyan ministers. Sacred Scriptures and Wesleyan catechism.

NEWTOWN.

- 1.—Newtown.
- 2.—Brick; stone foundation; shingled roof; glass windows; it is in good repair; requires enlarging. Improvements required—two porches to hold boys' caps and girls' bonnets; also, a gutter on the east side to preserve the wall, and keep the damp from the maps.
- 3.—880 square feet.
- 4.—For both schools, 5,836 superficial feet.
- 5.—Brick; good condition; boys' separated from the girls' by a brick wall.
- 6.—880 square feet, and 11,000 cubic feet, in large school; 362 ditto, and 2,534 ditto in infant school.
- 7.—From 90 to 100 in large school; in infant school from 40 to 50.
- 8.—By windows, and apertures in the ceilings.
- 9.—Annual average vary; last year 101 male and 81 female; average attendance, 74 male, 54 female. *Note.*—Average low compared to previous years; to be accounted for by numerous schools springing up in the neighborhood; also, one-fourth of the houses in Newtown are to let at the present.
- 10.—From $3\frac{1}{2}$ to 16 years.
- 11.—The large and infant schools are divided into eight classes, in reading, with writing, geography, grammar and arithmetic, in their several branches; the last-named four are subdivided. The number in each class varies almost weekly; the first five classes from 5 to 15 in each; the three upper from 20 to 30.
- 12.—Commencing at 9 a. m., and terminating at 4. Two hours of cessation, from 12 to 2; about three-fourths go home to dinner, and those who come from a distance take dinner in a shade in the school playground.
- 13.—Saturday is a holiday, as almost all the children attend Sabbath schools; a fortnight at Christmas, and sometimes one week at Easter; also, the Anniversary Day of the Colony, and Queen's Birthday; holidays never to exceed four weeks in the year.
- 14.—About 245.
- 15.—Children stay from one week to six years; average $2\frac{1}{2}$ years.
- 16.—Cannot say. There are upwards of twenty schools in the district, so that all have an opportunity of going to school if their parents think fit to send them.
- 17.—All paupers, gratis; from 6d. to 1s. per week; no charge for books belonging to the school; children have to purchase their own; a supply on hand; school property for the use of paupers and those who lose their books; total charge per child for last year, 21s. 2 $\frac{1}{4}$ d.
- 18.—£221 5s. 3d.; teacher receives the fees, but has to pay his assistant out of them, and applies the remainder to the requirements of his family; from Government, for both schools, £131 5s.; no other source of income, except a bonus of £15 12s., for 1858, which was laid out on fencing playground; total, £146 17s.
- 19.—£1 18s. 11d.
- 20.—Reading, writing, English grammar, geography, arithmetic, algebra, mensuration, and history. Open school with singing and prayer at 9. From $\frac{1}{4}$ past 9 to 10, lessons in spelling and meanings, grammar, and geography; from 10 to half-past, geography and grammar every alternate day for the senior classes; the junior classes write on slates and work simple sums. From $10\frac{1}{2}$ to 25 minutes past 11, reading and compound arithmetic; junior class and infants being dismissed for 10 minutes. From $11\frac{1}{2}$ to 55 minutes past, writing on paper, call the roll, and dismiss shortly after 12. Afternoon:—From 2 till $2\frac{1}{2}$, Monday, parsing and writing sentences; Tuesday, mental arithmetic; Wednesday, summing in classes; Thursday, dictation; Friday, notation and numeration. From $2\frac{1}{2}$ to 3, Monday, Tuesday, and Thursday, the Scriptures are read by the senior classes. Wednesday, roots and derivation of words. Friday, lessons on hydrostatics, globe, or solar system, &c. From 3 till dismissal, the boys sum and the girls sew, &c., except on Friday, boys draw instead of summing, and the whole school is catechised for half an hour on religious subjects. The classes and lessons are frequently changed to prevent too much sameness. The infant classes read, write, sum, and sing. These classes are frequently varied for reasons stated above.
- 21.—Three sets of tablets, Nos. 1, 2, 3, and 4; National reading books; Murray's speaker; history of England by Miss Corner; compendium of ancient history by Boyce; Mitchell's and Boyce's geographies; Carpenter's and do.; Young's spelling with meanings; Mavor's and Vyse's spelling; Sullivan's spelling superseded; Walkinghame's, Gray's, Chambers', and National arithmetic; Chambers' and Simpson's Euclid; Scott's algebra; Morrison's and Chambers' book-keeping; National mensuration; Bibles and Testaments. Most of the above are in fair condition; number in use adequate.
- 22.—Numerous prints of animals, maps of The World, continents, and principal kingdoms, Johnston's hydrostatics and mechanics, Nos. 1, 2, 3, Colton's illustrated maps of geography, Mimprisses' map of the Holy Land, globe, arithmeticon, case of mathematical instruments, compass, blackboard, &c., &c. Maps and apparatus in fair condition, but an additional supply ordered will meet the necessities of the school.
- 23.—Moral, but corporal when moral fails; no written instruction. The Local Board has not been required to interfere with the discipline of the school since the appointment of the present teacher in 1846.
- 24.—Twice in the year by the Local Board; occasionally by the chairman and other visitors; prizes given occasionally by the teacher—books generally.
- 25.—By the chairman, who is a Wesleyan minister; visits frequently from quarter of an hour to half a day; numerous reports exist. The following are from gentlemen not belonging to the Wesleyan denomination.

" Newtown, 6 September, 1853.

" Visited Mr. Dunlop's school to-day, and was highly gratified with the manner in which the several classes acquitted themselves.

" DANIEL LIDDELL,
" Late of Newcastle-on-Tyne, England."

" Newtown, 28 March, 1854.

" I have, with great interest, examined the pupils of this school in arithmetic, geography, grammar, &c., and was much impressed with the careful method of instruction which must have been adopted to produce such very good results. I cannot recall that I have anywhere witnessed an examination where the young people, in proportion to their age and period of time under tuition, manifested greater intelligence or improvement.

" THOS. BARKER, M.D."

" Newtown, 5 December, 1854.

" This day I have had the pleasure of examining the school taught by Mr. Dunlop in geography, grammar, writing, and arithmetic; and was delighted to see the pupils conversant in those branches which the numerous questions I put to them elicited.

" ROBERT BOAG, A.B.,
" Senior Fellow and one of the Founders of the
" Educational Institute, Scotland."

" Newtown, 19 November, 1856.

" I have this day paid a visit to Mr. Dunlop's school, and have much pleasure in bearing my testimony to the efficient manner in which the children are instructed. I questioned them in grammar, geography, and mental arithmetic, and felt much gratified with the readiness of their answers, and the general intelligence they displayed.

" JOHN DOW, L.R.C.P."

COMMISSIONERS' REPORT, page 51.

" Wesleyan School, Newtown.

" This school is held in a building well situated for the purpose, and is well supplied with furniture, apparatus, and books. The children read and spell fairly, but have little comprehension of the subject read. They write well, and have made fair progress in arithmetic. Their knowledge of grammar and geography is considerable. No catechism is taught. The children are tolerably regular, punctual, clean, and orderly. The master seems to be zealous and efficient.

" W. WILKINS.
" SAML. TURTON.
" THOS. W. LEVINGE."

REMARKS OF TEACHER.

" He (the teacher) considers the following words in the third line of Commissioners' report a libel on the school, *i. e.*, 'but have little comprehension of the subject read.' The Commissioners did not arrive at the school until quarter-past 3; and Mr. Turton was not present at all. Sufficient time was not taken in the examination; besides, the children were kept in till nearly 5 p. m., and were over-fatigued; also, the above certificates contradict the Commissioners' assertion."

26.—Robert Dunlop.

27.—Harriet Dunlop and Marion McAlpine; no paid pupil teachers or monitors.

28.—Robert Dunlop was born in Holehouse, parish of Dunlop, Scotland. Harriet Dunlop, born in Tenterdon, Kent, England. Marion McAlpine receives no Government aid, and is employed as needlewoman and to assist in teaching infants.

29.—Robert Dunlop, 40; Harriet Dunlop, 32.

30.—The above-named were appointed May 18th, 1846.

31, 32, & 33.—Robert Dunlop was nearly two years assistant teacher in St. Andrew's school, parish of Dunlop, but his father's death changed his purpose. He afterwards followed a trade, and pursued his studies. Had six months' instruction prior to his appointment to present office, 1846. The Wesleyan Educational Committee had a certificate of competency for present situation; no class certificate then required. Harriet Dunlop was a pupil teacher in Tenterdon, Kent, England, and has been employed in tuition nearly ever since; no class certificate.

34.—Annual salary, £87 10s. for the master, and £43 15s. for the mistress; assistant paid by the teacher.

35.—No emoluments; fees, £221 5s. 3d., deduct £60, balance to teacher £161 5s. 3d.

36.—Total income, £352 10s. 3d., for the year ending September 30th, 1858; bonus, £15 12s.; total, £368 2s. 3d.

37.—That based on Scripture only, every day, by the teacher; occasionally by the minister, Rev. W. A. Quick, Wesleyan; the Scriptures.

SURRY HILLS.

- 1.—Surry Hills.
- 2.—The building of brick, needs no repairs or enlargement, one of the schoolrooms would be improved if furnished with parallel desks.
- 3 & 6.—There are 2 rooms—one contains 1,160 superficial feet, and 17,400 cubic feet, the other 440 superficial, and 4,400 cubic, feet.
- 4.—There is no ground adjoining the school for the use of the pupils.
- 5.—There are 2 water-closets, built of brick and in good condition.
- 7.—55 in one room, 37 in the other.
- 8.—The rooms are ventilated by windows, and apertures in the walls and ceiling.
- 9.—Annual average on the books, 81 boys, 54 girls; ditto attending school, 57 boys, 35 girls.
- 10.—From 4 to 15 years of age.
- 11.—There are six classes, 1st and 2nd divisions; the number continually changing; the children are not classified according to their ages.
- 12.—5 hours each school day, commencing at 9 a.m. and terminating at 4 p.m. An interval from 12 till 2, for refreshment and recreation.
- 13.—Saturday in each week, and a fortnight vacation at Christmas.
- 14.—250 days appropriated to school duties.
- 15.—This question cannot be answered satisfactorily.
- 16.—No means of ascertaining.
- 17.—The school fees vary, viz.:—6d., 9d., or 1s. per week each pupil; reading books are supplied by the Board, other books that are required are purchased by the children. Average annual charge for each child, £1 12s. 3d.
- 18.—Annual amount of school fees, £148 17s. 11d., which is appropriated to the use of the teachers; £131 5s. salary from the Government, and £15 bonus;—total amount, £295 2s. 11d.
- 19.—Annual average total cost of each pupil is £3 4s. 1d.
- 20.—Monday, Tuesday, Wednesday, and Thursday the three first classes write an hour, reading and spelling an hour, geography and grammar every alternate half-hour, and slate exercises half an hour. The boys are engaged with arithmetic and tables every afternoon. Friday morning—write an hour, recapitulatory slate arithmetic an hour, dictation half an hour, and mental arithmetic half an hour. The girls are taught sewing four afternoons each week, and arithmetic one afternoon. The three lower classes engaged in reading, spelling, writing on slates; and the girls sewing in the afternoons. The school is opened in the morning and closed in the evening with prayer.
- 21.—Bible, Testament, National reading books are used in the classes, with Lennie's grammar, Ingram and Thompson's arithmetics. The books are in tolerable good condition. Historical reading books required as well as a few of the several kinds now in use.
- 22.—There are 11 maps, viz.:—1 of each of the following,—The World, Europe, Asia, Africa, North and South America, Australia, New South Wales, England, Scotland, and Ireland. A globe and good maps of the Australian Colonies much required.
- 23.—Moral influence as far as practicable, corporal punishment if necessary; no instructions on the subject.
- 24.—The school is examined once a year by the Chairman of the Local Board; no prizes or rewards of merit given.
- 25.—The school is not officially inspected, but has been frequently visited by the minister; no report.
- 26.—William Brown.
- 27.—Kate Brown, and Emma Hensley.
- 28.—England.
- 29.—William Brown, 42; Kate Brown, 38; Emma Hensley, 22.
- 30.—September, 1853.
- 31.—Not trained, but 14 years' practical experience.
- 32.—
- 33.—Eight years' experience as master of a Wesleyan school at Richmond. Superintendent of cattle station.
- 34.—Head teacher, £87 10; assistant teacher, £43 15s.
- 35.—Fees, £148 17s. 11d.; bonus, £15;—total, £163 17s. 11d.
- 36.—£295 2s. 11d.
- 37.—A religious and moral tone characterises the operations of the school. Frequently, by teachers; Wesleyan ministers; the Holy Scriptures.

WINDSOR.

- 1.—Windsor.
- 2.—Brick building, lately repaired, painted, &c.
- 3.—Number of superficial square feet, 398.
- 4.—Playground, 200 yards.
- 5.—Brick buildings; two, well separated; condition good.
- 6.—Superficial feet, 398; cubic feet, 3,980.
- 7.—Average number, 37.
- 8.—Four windows, open at the top; two ventilators in the ceiling, and three doors.
- 9.—Average number on the books,—25 boys, 18 girls; total, 45. Average attendance,—17 boys, 15 girls; total, 34.

- 10.—Boys:—Maximum, 14 years; minimum, 4 years. Girls:—Maximum, 12 years; minimum, 4 years.
- 11.—Three classes. 1st, boys,—14 maximum, 9 minimum; 2nd, boys,—12 maximum, 7 minimum; 3rd, boys,—6 maximum, 4 minimum.
- 12.—Open at 9, close at 4, 1½ hour for dinner.
- 13.—Saturday in each week. Christmas, 10 days; Easter, 2 days; Whitsuntide, 1 week; 1 day in each quarter.
- 14.—242 days.
- 15 & 16.—Unanswerable.
- 17.—Charge for children:—3d., 6d., 9d., and 1s. per week; no charge for books; 13s., 26s., 39s., 52s. per year.
- 18.—Annual amount received, ending September, 1858:—From pupils, £54 18s. 10d., appropriated for teaching; received from Government, £87 10s.; total received from all sources, £142 8s. 10d.
- 19.—Annual cost of the education of each pupil, £4 3s. 9¾d.
- 20.—Subjects of instruction:—1st class,—spelling, writing, reading, geography, grammar, history, and arithmetic; 2nd class,—spelling, reading, writing, and arithmetic; 3rd class,—letters and spelling. Spelling, half an hour daily; writing, half an hour daily; reading and questions, daily, 1 hour, arithmetic remainder; grammar, 1 hour, 3 days; geography, 2 days, 1 hour; history 1 hour.
- 21.—1st class:—Dr. Young's, Carpenter's spelling book, 4th and 5th reading books, Mitchell's geography and Boyce's geography, and history, maps, National arithmetic, and grammar, Bible. 2nd class:—Universal spelling book, 3rd and 4th reading books and Testament, National arithmetic. 3rd class:—Tablets, &c. The books are in good repair. Wanted, Boyce's grammar for beginners. The books at present are adequate. My maps want replacing—my last division of maps having never arrived.
- 22.—Boards, clock, animal tablets wanted; map of The World, Europe, Asia, Africa, and America, wants replacing.
- 23.—Correction,—remaining after school hours, and corporal when needed; instructions, none.
- 24.—Examined quarterly, by the Superintendent of the Circuit; prizes, none.
- 25.—The Rev. Superintendent of the Circuit for the time being visits every week; time varying. December 3rd, 1857, examined publicly by the Rev. J. Watkin. The following is a copy from the *Empire*, December 11th, 1857, forwarded by the above reverend gentleman:—
- “On Thursday, the 3rd instant, an examination of the scholars in the above school took place. The writing was very good in a great many cases; the scholars also shewed great aptitude in arithmetic, and their attainments in geography were such as would not have disgraced the pupils of more pretentious seminaries. In all points on which they were examined, they gave proof of attention on the part of their teacher, and of application and activity of their own. The examinations lasted a considerable time, and were creditable to Mr. Travis, the master, and to the young people, in a high degree. In the evening there was a large company present to witness the children's powers in recitations, when there was a most creditable display. The pieces selected in poetry and prose were of the first order of excellence, and were excellently given. This seemed to give great satisfaction, and the pleasures of the evening were wound up by the wonders of the magic lantern.”
- 26.—Teacher, Henry Travis.
- 27.—Pupil teacher, Frederic Cavanaugh.
- 28.—H. T., Sheffield, Yorkshire; F. C., Windsor.
- 29.—H. T., 48 years; F. C., 14 years.
- 30.—Appointed a Denominational teacher, 1841.
- 31.—Not trained.
- 32.—
- 33.—A merchant's office; business, iron trade.
- 34.—£87 10s.
- 35.—£54 18s. 10d.
- 36.—£142 8s. 10d.
- 37.—Friday afternoon, the study of the Bible; Rev. W. F. Davis, Wesleyan Church; Wesleyan catechisms and the Bible.

YORK STREET.

- 1.—York-street, Sydney.
- 2.—Stone; present condition, good; more light required, as the windows are sized; the rooms are under the chapel.
- 3.—1,974 square feet.
- 4.—No land; only a passage to the closets.
- 5.—Stone and brick, fitted up with patent pans and water-pipes.
- 6.—Male school, 1,134 square feet, 10,206 cubic feet; female school, 840 square feet, 7,560 cubic feet.
- 7.—Male school, 47; female school, 27.
- 8.—Ventilation through the ceiling of the rooms.
- 9.—Male school, on the books, 56; average attendance, 47. Female school, on the books, 37; average attendance, 27.
- 10.—Age of boys, 13 to 3; girls, 12 to 3.

11.—Classes, 10; average number in each, 9.

CLASS.	Boys.	GIRLS.
1	5 to 3	5 to 3
2	6 to 4	6 to 4
3	8 to 5	8 to 5
4	10 to 6	10 to 6
5	13 to 7	12 to 7

12.— $5\frac{1}{2}$ hours each day, commencing at 9 in the morning, and closing at $3\frac{1}{2}$ in the evening, except one hour, which is spent at dinner or in play.

13.—Saturday in each week, with a half-day occasionally, when the rooms are required for a public meeting or a tea meeting. 3 vacations: the first, for a fortnight, at Christmas; the second, for a week, at Easter; the third, for a week in winter, if the weather is not wet; and the Government holidays.

14.—238, but if wet in winter, 243.

15.—From 1 week to 3 or 4 years.

16.—Cannot tell.

17.—6d., 9d., and 1s. per week. The pupils provide their own requisites, except books; these at 6d., £1 4s; at 9d., £1 16s.; and at 1s., £2 8s.

18.—School fees, £113 17s. 6d., received by the master for the support of himself and family; salary, £110 5s.; and a bonus for 1857 (only) of £15 12s.; total, £239 14s. 6d.

19.—Average number, 93; total cost of each, £2 11s. 6 $\frac{1}{2}$ d.

20.—1st class, alphabet and two letters, morning and evening; 2nd class, reading 1 hour, answering $\frac{1}{2}$ hour, spelling $\frac{1}{2}$ hour; 3rd class, same as second class. 4th and 5th classes: Carpenter's spelling book 1 hour Monday, Wednesday, and Friday; grammar 1 hour Tuesday and Thursday; history 1 hour on Tuesday; reading, answering, and spelling, 1 hour Monday, Tuesday, Wednesday, Thursday, and Friday; writing on paper $\frac{1}{2}$ hour Monday, Tuesday, Wednesday, Thursday; reading Bible or Testament 1 hour Tuesday and Wednesday; geography 1 hour Thursday, either books or maps; catechism, $1\frac{1}{2}$ hours on Friday. The above in the morning; in the evening, figures, tables, and arithmetic up to practice. The girls work 1 hour each day.

Wanted: Copy-books, pens, ink, slates and pencils, with a blackboard.

22.—Maps: The World, Europe, Asia, Africa, North and South America, Australia, 12 object lessons, 38 tablet boards for spelling and reading lessons.

23.—Correction on the hands, or kept in school during the play-hour. No instructions on the above.

24.—Once, by the Chairman of the Local Board; no prizes.

25.—The Chairman of the Local Board; once; at the yearly examination; about two hours. Report:—"I have this morning examined the school in all its departments, and have found the children who have been in the school for any period well acquainted with the rudiments of ordinary education. They furnish abundant evidence of careful and intelligent instruction on the part of the teachers. The number of senior children recently introduced into the school, who are exceedingly deficient in culture, detracts somewhat from the favorable impression produced by a general examination.—WILLIAM HESSELL, Chairman. 17 December, 1857."

26.—Patrick Carroll.

27.—Elizabeth Carroll.

28.—Patrick Carroll, Dublin; E. Carroll, Luigan, County Armagh.

29.—Patrick Carroll, 52; E. Carroll, 28.

30.—January 10, 1853.

31.—Trained in Dublin.

32.—Educated for a teacher at Santry School, but trained in Dr. Bell's system, under Mr. Flinley, head master of the Foundling Hospital, from September, 1826, until the end of October, 1827. No certificate, being a paid master.

33.—Experience of 26 years before receiving present appointment.

34.—Salary for master and mistress, £110 5s.

35.—Fees, £113 17s. 6d.; bonus, for 1857 only, £15 12s.

36.—Total from school, £239 14s. 6d.

37.—Instruction out of the Scriptures twice a week, with catechism on Friday; the master; Rev. William Hessel, Wesleyan Minister; Bibles, Testaments, catechisms.

ALBURY.

- 1.—Albury.
- 2.—Brick, newly built, needs no enlargement.
- 3.—1,000 square feet.
- 4.—87,120 square feet.
- 5.—One of brick, and one of wood, newly built.
- 6.—The school being used as a church is not divided; 1,000 square, and 13,000 cubic, feet.
- 7.—56.
- 8.—Doors and windows.
- 9.—35 males and 33 females on the roll book; average attendance, 28 males and 28 females.
- 10.—Maximum, 14 years; minimum, 5 years, both sexes.
- 11.—Five classes—junior class, 13, from 6 to 4 years; second class, 8, from 7 to 5 years; third class, 9, from 7 to 6 years; fourth class, 15, from 14 to 9 years; fifth class, 11, from 14 to 7 years.
- 12.—7 hours; commencing at 9 o'clock in the morning, terminating at 4 o'clock in the afternoon; recreation, from 12 until 2 o'clock.
- 13.—Two holidays, Saturday and Sunday. Two vacations, a fortnight at Christmas, and ten days at Easter.
- 14.—250.
- 15.—It is difficult to state exactly, owing to the migratory habits of the population. I should say about three years.
- 16.—I cannot say exactly, there are perhaps 50 who do not attend at any school.
- 17.—The charge varies from 6d. to 1s., and some gratis; it depends upon the circumstances of the parents; there is no charge made for books; where the children attend regularly during the entire year the total charge is from £2 8s. to £1 4s.
- 18.—£55 9s.; the Government stipend, £70; total amount from all sources during the period specified, £125 9s., appropriated to the support of the teacher and his family.
- 19.—£3 18s. 4½d., or £3 18s. 5d., nearly.
- 20.—Junior class—first book of reading lessons, sequel, second book, and third book, 20 minutes each; grammar, geography, writing, arithmetic, Christian doctrine and prayers, 30 minutes each; spelling and meanings, 15 minutes each; inspection of copies, sums and tables, 35 minutes; and needlework, two hours on the evenings of Wednesday and Friday in each week.
- 21.—First book, sequel, second, third, and fourth books of reading lessons, grammar, geography, arithmetic (all prepared by the Christian Brothers), Carpenter's spelling book, Ingram's arithmetic, Christian doctrine (by his Grace the Archbishop of Sydney), Reeve's history of the Bible; the books are in good order, and sufficient for the present requirements of the school.
- 22.—This school is very deficient in maps, &c., a map of The World being the only one with which it is provided; a second one is required; also, maps of the Colonies, Palestine, and of England, Ireland, and Scotland.

23.—Placing idle children standing or kneeling in the centre of the school, or punishing them on the hand with a leather strap, is the only mode of correction used. I have received no instructions on this subject.

24.—There are two examinations during the year, one at Christmas, and one at Easter; there are prizes of books and pictures awarded and given to the most deserving pupils at the Christmas examination.

25.—The school is visited once a week by the Roman Catholic Pastor, unless when he is absent on the mission; one hour is generally occupied in the performance of this duty.

“The children attending this school have given me general satisfaction in their studies”
“at the examination held here at Christmas.—CORNELIUS TWOMEY, C. C., Albury.”

26.—Thomas W. Moore.

27.—Mary Moore.

28.—Dublin, Belfast, Ireland.

29.—38 and 19 years.

30.—1st March, 1858.

31.—Both trained.

32.—Model school, Sydney and Dublin, one year, first class.

33.—Clerk; five years' experience in this Colony.

34.—My salary is £70 per annum, the mistress of the female school *no salary*.

35.—£55 9s.

36.—£125 9s.

37.—Prayer, Christian doctrine, Bible history, every morning, by the teacher; visited by the Rev. Father Twomey, Roman Catholic Pastor; catechism by his Grace the Archbishop of Sydney, and Reeve's history of the Bible.

ARMIDALE.

1.—Armidale.

2.—Wood; good condition; needs enlargement.

3.—720 superficial feet.

4.—4,840 square yards.

5.—Of wood; in good condition.

6.—210 superficial feet; 1,680 cubic ditto.

7.—35.

8.—Doors, back and front windows, with fireplaces to each room.

9.—40 males, 46 females; total, 86. Average attendance, 34 males, 36 females total, 70.

10.—Males, 15 to 4; females, 17 to 4.

11.—Eight; average number in each class, 11; 1st, 2nd, and 3rd, 17 to 12; 4th, 15 to 9; 5th, 14 to 10; 6th, 13 to 8; 7th, 10 to 7; 8th, 7 to 4.

12.—6; from 9 to 4 o'clock; 1 hour at noon, for dinner and recreation.

13.—One, Saturday; two, 14 days each, at Christmas and Easter.

14.—231.

15.—About 4 years.

16.—None.

17.—6d., 9d., and 1s. weekly; approximate annual cost of books furnished by the parents of the children attending the school, £12; ditto by the Board for the past year, £5; total, £17. Annual charge for each pupil according to the above weekly payments, £1 3s., £1 14s. 3d., £2 6s.

18.—School fees, £81; Government stipend, £52 10s.; total, £133 10s., appropriated to the support of the teacher and his family.

19.—Annual average cost of the education of each pupil, £1 17s. 6d.

20.—Forenoon—Writing, $\frac{3}{4}$ hour; spelling, $\frac{1}{2}$ hour; Christian doctrine, historical catechism and prayers, $\frac{3}{4}$ hour; English grammar and geography, alternately, $\frac{3}{4}$ hour; tables and mental arithmetic, $\frac{1}{4}$ hour. Afternoon—Reading, 1st, 2nd, and 3rd division, $\frac{3}{4}$ hour; history (sacred and profane) alternately, $\frac{3}{4}$ hour; geometry, $\frac{1}{4}$ hour; arithmetic, $1\frac{1}{4}$ hour. Females' sewing class, 3 to 4 o'clock.

21.—Murray's grammar, Christian Brothers' ditto, Sullivan's geography, Christian Brothers' ditto, Chambers' geometry, Walkinghame's arithmetic, Ingram's ditto, and Christian Brothers'; Carpenter's spelling book, Mavor's ditto; expositors, by the Christian Brothers, with their progressive series of reading books, viz., 4th, 3rd, 2nd, and 1st, with sequel; Lingard's history of England, &c.

22.—2 maps of The World, and 1 of Australasia. Others very much required, namely, map of Europe, England, Ireland, Scotland, &c., with a pair of globes.

23.—Kneeling and confinement during recess.

24.—Twice; by the Revs. M'Carthy and Dunne, assisted by other gentlemen. Prizes awarded to pupils according to merit, at each examination; such as histories, biographies, travels, poems, prayer books, &c.; in general at the expense of the Rev. M'Carthy.

25.—Revs. M'Carthy and Dunne, every week, from a half-hour to an hour.

26.—John Brown, male department.

27.—Mrs. J. Brown, female department; John Monahan, J. J. Naughten, Michael Brydale, Theresa Naughten, Mary Donnallan, and Julia Ryan, monitors.

28.—John Brown and Mrs. Brown, Ireland; monitors, Armidale.

29.—John Brown, 31; Mrs. Brown, 30.

30.—4th January, 1858.

- 31.—Not trained.
- 32.—
- 33.—Six months with the Christian Brothers, in America, book-keeper, &c.
- 34.—£70 from September, 1858.
- 35.—£81 to 30th ditto, ditto.
- 36.—£133 to 30th ditto, ditto.
- 37.—Instructions in the Christian doctrine, daily; with prayers every morning and evening by the teachers; Revs. M'Carthy and Dunne, Roman Catholic clergymen. The Christian doctrine, revised and enlarged by his Grace the Archbishop of Sydney; Fleury's historical catechism of the New and Old Testament; Reeve's history of the Christian Church; ditto ditto of the New and Old Testament; ditto ditto of the New Testament, &c.

BATHURST.

- 1.—Bathurst.
- 2.—The church is used as a school.
- 3.—Number of superficial square feet in girls' school, 728; infant school, 625.
- 4.—Number of superficial square feet in ground attached to school, 5,518.
- 5.—The water-closets are in good condition.
- 6.—Number of cubic feet in girls' school, 15,288; infant school, 6,875.
- 7.—Average number assembled in girls' school, 40; infant school, 50.
- 8.—The church is well ventilated.
- 9.—The annual average number on the books in girls' school, 42; infant school, boys, 18; girls, 67; total, 85. Annual average attendance at the schools, girls, 32; infants, boys, 12; girls, 43; total, 55.
- 10.—Maximum age of pupils in the schools, 15; minimum age, 4.
- 11.—Number of classes in girls' school, four; infant school, five; average number in each class, 10; infants, 12. Maximum and minimum age in each class:—Girls' school, first class, 15 to 14; second class, 14 to 12; third class, 12 to 9; fourth class, 11 to 8. Infant school:—First class, 10 to 8; second, 8 to 6; third, fourth, and fifth, 6 to 4.
- 12.—Number of school hours, 5; in the morning from 9 to 12 o'clock; afternoon, from 2 to 4. The two intervening hours appropriated to dinner and play.
- 13.—There is one holiday a week, which is Saturday. Three weeks' vacation at Christmas, and a fortnight at Easter.
- 14.—The number of school days in the year is 226.
- 15.—The average length of the period during which the pupils remain at the school is from 3 to 5 years.
- 16.—The number of children in the neighborhood not attending the school are few.
- 17.—Weekly charge made to each pupil in girls' school, 1s. 4½d.; quarterly charge, £1 17s. 11½d. Infant school, weekly charge, 6d.; quarterly, 6s. 6d.; there is no charge made for books furnished by the Board. Total annual charge made to each pupil in girls' school, £3 11s. 10½d.; infant school, £1 4s.
- 18.—The annual amount of school fees received in the year 1858 from the pupils in girls' school, £120; amount received from the infant school in the year 1858, £55 4s. These fees are appropriated by the head mistress to keeping a house and supporting the assistant mistress. The total amount received towards the support of the school, £175 4s.
- 19.—The annual average total cost of each pupil, girls, £3 11s. 10½d.; infants, £1.
- 20.—The subjects of instruction in the school comprise grammar, geography, history, arithmetic, and writing. The time allotted to each subject in each day is a quarter of an hour.
- 21.—The Christian Brothers' books are used, also Formby's Bible stories, and Lingard's history of England. The books are in tolerable order.
- 22.—Maps, blackboards, and prints of animals, birds, natural curiosities, are also used; they are in pretty good condition.
- 23.—The system of correction employed in the school is varied; sometimes the pupils are put kneeling in the middle of the room, at others they are made to stand on a form, and occasionally they are tapped on the hands with a cane. The teachers have the instructions used by the Christian Brothers.
- 24.—The pupils are examined twice in the year—in June by the Very Rev. Dean Grant, and at Christmas, publicly, also by the Very Rev. Dean Grant, by the teachers, and by visitors.
- 25.—The school is inspected by the Very Rev. Dean Grant. Prizes, consisting of handsome books, are distributed at Christmas.
- 26.—Name of head teacher, Elizabeth Haselden.
- 27.—Assistant teacher, Bride Berry. There are no others.
- 28.—Birthplace of head teacher, London; assistant teacher, Naas, Kildare.
- 29.—Age of head teacher, 28; assistant teacher, 21.
- 30.—Both mistresses were appointed January 11th, 1858.
- 31.—Neither mistress was trained as a public teacher.
- 32.—
- 33.—Both mistresses have followed the occupation of teaching since the age of seventeen, and have never had any other employment.
- 34.—Head teacher's salary from the Board, £52 10s.; assistant teacher's, £40.
- 35.—There are no other emoluments.

36.—Total annual income of head teacher for the year 1858, £227 14s.; assistant teacher's total income, £40, with board and lodging.

37.—The Christian doctrine is taught every Sunday in the church, from 3 till 4 o'clock, by the teachers and ladies of the congregation, each class being examined by the clergymen—the Very Rev. Dean Grant, and the Rev. Patrick Donnelly. The Christian doctrine catechism is used.

BURROWA.

- 1.—Burrowa.
- 2.—The school at present is held in the Roman Catholic Church, which is built of stone; the present condition of the church good.
- 3.—1,800 feet.
- 4.—1,760 feet.
- 5.—None.
- 6.—The aisle of the church.
- 7.—
- 8.—Eight ventilators and door.
- 9.—Males, 122; females, 174, on the rolls. The average number attended: boys, 167; girls, 114.
- 10.—Males, between the ages of 13 and 4 years; females, between 16 and 5 years.
- 11.—Three classes in the school; the number in each class,—first class, 7 pupils; second class, 8 pupils; third class, 9 pupils; ages, between 14 and 8 years.
- 12.—Commencing at 9 o'clock, terminating at 1 o'clock; 1 hour intervening for recreation; commencing again at 2 o'clock, terminating at 4.
- 13.—Easter, 1 week; Christmas, 3 weeks; holidays, 6.
- 14.—165 days.
- 15.—The one-half of the pupils remained 165 days during the period of 8 months.
- 16.—I cannot tell.
- 17.—The greater number pay 13s. per quarter; some pay 10s. per quarter; I teach a few for 6s. 6d. per quarter. No books for sale.
- 18.—During the period of 8 months I received £25 10s. for school fees from the parents and guardians of the pupils attending the school, that is from 8th February to 30th of September, 1858. I took charge of the school 8th February, 1858. Received from the Board of Education, for that period, £36 16s. 4d.; total amount, £62 6s. 4d.
- 19.—
- 20.—According to classification; geography is taught 3 days of the week, Mondays, Wednesdays, Fridays; grammar on Thursdays and Tuesdays.
- 21.—First, second, and third—grammar, geography, spelling books, arithmetics; first books, sequel, and second books much wanted.
- 22.—One map of The World; the map of Europe much wanted.
- 23.—A mild discipline used; no written account from the Board concerning discipline.
- 24.—No stated times for examination; no prizes given in school.
- 25.—
- 26.—Bridget Ryan.
- 27.—Birthplace, Cashel, Ireland.
- 28.—
- 29.—30 years.
- 30.—February, 1858.
- 31.—Trained.
- 32.—Dublin Model School, Autumn, 1849, for the period of 5 months; first division of third class.
- 34.—£4 15s. 10d. periodically.
- 35.—I received £25 10s. school fees for the period of eight months.
- 36.—Total amount of salary from the Board for eight months, £36 16s. 4d.; school fees, £25 10s.; total, £62 6s. 4d.
- 37.—The Christian doctrine taught daily by the teacher, according to the rules of the Roman Catholic Church.

BRISBANE.

- 1.—North Brisbane.
- 2.—A wooden building in tolerable condition, and quite large enough.
- 3.—Area of schoolhouse, 50 by 25=1,250 superficial square feet.
- 4.—Area of girls' playground, 100 by 50=5,000 superficial square feet; boys' playground, 160 by 160 = 2,560 superficial square feet.
- 5.—Separate weatherboarded closets, in good condition.
- 6.—All one schoolroom, solid content=15,000 cubic feet.
- 7.—Average number of pupils attending, 50 to 60.
- 8.—Amplly ventilated by three doors and three windows.
- 9.—Annual average number on the roll—boys, 40; girls, 50; average attendance, 30 boys and 40 girls.
- 10.—Maximum age—boys 15 years, and girls 17 years.

- 11.—Six classes, averaging 10 pupils, varying in age from 4 to 17 years.
- 12.—6 hours each day; commencing at 9 a.m., terminating 4 p.m.; cessation of study from 12 to 1 o'clock, employed in recreation, &c.
- 13.—One holiday in each week; two vacations, at Christmas two weeks, and at Easter one week.
- 14.—Total number appropriated to school duties in the year, 237 days.
- 15.—Average length of period from first entrance of pupils to their finally leaving school, about 4 years.
- 16.—The number of children between 5 and 15 years not attending, 7.
- 17.—Weekly charge for each pupil, 6d.; no annual charge for books; total annual charge for each pupil, £1 4s. 6d.
- 18.—Total amount received from pupils during the twelve months ending the 30th September, 1858, £62 10s.; from other sources, none; total amount received within the above-mentioned period, £132 10s., for the teacher's use.
- 19.—Annual total cost of education of each pupil, £2 4s. 2d.
- 20.—First and second class, spelling and reading; third and fourth class, reading, writing, dictation; fifth and sixth class, reading, writing, arithmetic, grammar, geography; to spelling and reading 1 hour; to reading, writing, &c., 1½ hours; and the remaining to other business and subjects.
- 21.—Books used at school,—primer, first book, second book, sequel to do., third book, Carpenter's spelling book, grammar. The supply of books at present inadequate to the wants of the school.
- 22.—No maps or instruments at present in school for the wants of same.
23. Mode of correction—corporal, moderate and occasional. No written instruction regarding the manner of correction used in the school from any Board of Education, &c.
- 24.—Often visited in the year by the Very Rev. Dean Rigney; no prizes.
- 25.—Visited by the Very Rev. Dean Rigney; supply of books, maps, &c., wanted in the school.
- 26.—Head teacher, Mr. Arkins.
- 27.—None.
- 28.—Birthplace of head teacher, Ireland.
- 29.—About 40 years of age.
- 30.—Appointed to present office, March 1st, 1859.
- 31.—Trained as a teacher.
- 32.—At Sydney; cannot say for how long a period.
- 33.—Cannot say what business previous to teaching.
- 34.—Annual amount of salary, £70.
- 35.—Exclusive of salary, £62 10s.
- 36.—Total amount of income, £132 10s.
- 37.—Religious instruction, in Butler's and historical catechism; visited by the Very Rev. Dean Rigney.

BUNGENDORE.

- 1.—Bungendore.
- 2.—Wood, needs repairs.
- 3.—480 superficial square feet.
- 4.—Not enclosed.
- 5.—Good.
- 6.—480 superficial square feet, 4,800 cubic feet.
- 7.—40 in the schoolroom.
- 8.—Two glass windows on hinges.
- 9.—24 boys and 33 girls.
- 10.—From 4 to 17 years.
- 11.—Four classes—10 in each, from 4 to 17 years.
- 12.—Six hours—from 9 a.m. to 4 p.m., with an interval of one hour for dinner and recreation.
- 13.—None in each week, excepting church festivals; two vacations in the year, at Easter and Christmas, of 14 days.
- 14.—233 days.
- 15.—From 4 to 5 years.
- 16.—About 17.
- 17.—14s. for each pupil; no charge for books.
- 18.—£29 towards support of teacher; no other sources except the Government stipend, £81 10s.
- 19.—£2 0s. 9d.
- 20.—From the first rudiments to Euclid, constantly employed during the school hours.
- 21.—The necessary school books by the Christian Brothers; good; others needed.
- 22.—None; maps required.
- 23.—According to discretion of teacher; none.
- 24.—Quarterly, by the Chairman of the Local Board and others; no prizes.
- 25.—Frequently by the clergyman and others.
- 26.—George Lenehan.
- 27.—None.
- 28.—Killyon, County Meath, Ireland.

- 29.—28 years.
 30.—June, 1857.
 31.—Not trained.
 32.—
 33.—Being educated in first class schools; a solicitor's clerk for 7 years.
 34.—£52 10s. from Government.
 35.—£29.
 36.—£81 10s. per annum.
 37.—Roman Catholic once a day; by teacher from an abridgment of the Christian doctrine; Roman Catholic clergyman gives instructions.

BERRIMA.

- 1.—Berrima.
 2.—The house is constructed of wood, viz.,—slabs and shingles; is in a passable condition, requires some repairs, and is rented.
 3.—The superficial area of schoolhouse is 264 square feet, or 23 cubic feet.
 4.—There is no special ground for the use of the pupils, but they take exercise on the Market Green.
 5.—The water-closet is constructed of slabs and bark, and is divided into two compartments of six feet square each.
 6.—There is but one room, as before stated.
 7.—The average number in the room is 27.
 8.—A tolerable provision for ventilation.
 9.—The annual average number on the book is 39; average number in attendance 27, viz.:—13 males and 14 females.
 10.—The maximum and minimum age of males, 17 and 5; of females, 15 and 5 years.
 11.—Number of classes, three; average number in first class, 6; in second class, 12; in third class, 10; maximum and minimum age, in first class 17 and 9, in second 15 and 7, and in third 7 and 5 years.
 12.—The pupils attend 6 hours each day, the school opening at 9, and closing at 4, with one hour, viz., from 12 to 1 o'clock, for dinner.
 13.—One holiday, viz., Saturday in each week; two vacations in the year, viz., one at Christmas, of about a fortnight's duration, and the other at Easter, not quite a week.
 14.—Total number of school days in the year, about 235.
 15.—The average period during which pupils remain at school is about three years.
 16.—There are 12 children, between the ages of 15 and 5 years, who do not usually attend the school.
 17.—Some of the pupils pay 1s., some 6d., and some 3d., per week; there has been no charge for books as yet; total annual charge for each pupil £2 12s., and £1 6s., and 13s.: the annual amount of school fees received from the pupils during the 12 months ending the 30th September, 1858, was £36 15s. 6d., which was appropriated to the use and maintenance of the teacher; nothing received from other sources, except the Government stipend; making a total of £89 5s. 6d.
 18.—Average annual total cost of the education of each pupil, £3 6s. 1½d.
 20.—The subjects of instruction given to the first class are—spelling, reading, writing, arithmetic, grammar, geography, Christian doctrine, tables, &c.; to the second class, all the above-mentioned, except grammar and geography; to the third class, spelling, reading, tables, &c.; the precise time allotted to each of these subjects is about half an hour each day.
 21.—The books used in the first class are—the third book of reading lessons, grammar, geography, arithmetic, spelling book, historical catechism, &c.; in the second class, second book of lessons, &c.; and in the third class, first reading book, sequel. The books in use are in pretty good condition, but some first reading books and sequels are much wanted.
 22.—There are no prints, diagrams, &c., in the school, but some would be very desirable.
 23.—It is sometimes found necessary to punish the children by slapping on the hand, and otherwise, to preserve discipline; but there are no instructions from any Board, &c., on the subject.
 24.—Rev. Mr. Magennis holds a general examination of the pupils with reference to their progress every Christmas, and no prizes have been as yet given.
 25.—The school is visited by the Rev. Mr. Magennis, generally once a week, when he is at home; and he spends half an hour, and sometimes longer, as time permits, in examining the children, &c. There is no report on the state of the school.
 26.—Patrick J. Mergin.
 27.—There is no assistant teacher, or pupil teacher, &c.
 28.—Ireland.
 29.—42 years.
 30.—1st March, 1857.
 31.—Not trained as a teacher.
 32.—
 33.—Had considerable experience in teaching before present appointment, but not under any Board.
 34.—Annual amount of salary of teacher, £52 10s.
 35.—Fees and allowances, £36 15s. 6d.
 36.—Total annual income of teacher, £89 5s. 6d.

37.—Religious and moral instructions are given by the teacher every day, from the Christian doctrine, &c. The Rev. Mr. Magennis visits the school very often. The books used for the purpose of conveying religious and moral instructions are those published by the Christian Brothers—Christian doctrine, historical catechism, &c.

BALMAIN.

- 1.—Balmain.
- 2.—The school is held in the church.
- 3.—
- 4.—2,125 square yards.
- 5.—Two water-closets constructed of wood, and in good condition.
- 6.—
- 7.—34.
- 9.—24 boys, 41 girls; 14 boys, 24 girls.
- 10.—Boys, from 13 years to 4; girls, from 16 to 3 years.
- 11.—Five mixed classes; average in each, 7. First class: maximum, 16 years; minimum, 11 years. 2nd class: maximum, 11 years; minimum, 8 years. Third class: maximum, 9 years; minimum, 6 years. Fourth class: maximum, 10 years; minimum, 5 years. Fifth class: maximum, 8 years; minimum, 3 years.
- 12.—School opens at 9 a.m. and closes at 4 p.m.; dinner and recreation, from one to two o'clock.
- 13.—One holiday in each week—Saturday; two vacations each year—Christmas, a fortnight; at Easter, one week.
- 14.—239.
- 15.—18 months.
- 16.—About 20.
- 17.—Weekly charges—3d., 6d., and 1s.; annual charges—13s., £1 6s., and £2 12s.; no charge for books.
- 18.—Amount of school fees—£32 5s. 9d., appropriated to the support of teacher and her family; Government salary, £70; total amount of support, £102 5s. 9d.
- 19.—Average cost of each pupil, £3 0s. 0½d.
- 20.—Copy of time table for Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—
From 9 to 9:30, first, second, third, fourth, and fifth classes, preparing lessons; from 9:30 to 10, first, second, third, fourth, and fifth classes, catechism and prayer; from 10 to 11, first, second, third, and fourth classes, writing; fifth class, lessons; from 11 to 11:30, first, second, and third class, spelling; fourth class, lessons; fifth class, tablets; from 11:30 to 12, first class, reading; second class, preparing geography or grammar; third and fourth classes, preparing lessons; fifth class, tablets; at 12, first, second, third, fourth, and fifth classes, Angelus; 12 to 12:30, first class, grammar or geography; second class, reading; third class, spelling; fourth class, reading; fifth class, lessons; from 12:30 to 1, first, second, third, fourth, and fifth classes, singing; from 1 to 2, dinner; from 2 to 3, first, second, third, and fourth classes, arithmetic; fifth class, tablets; from 3 to 3:30, first class, reading and needlework; second class, reading; third and fourth classes, spelling; fifth class, tablets; from 3:30 to 4, first, second, third, fourth, and fifth classes, singing and prayer.
- 21.—Reeve's history of the church, Old and New Testaments, third reading book by the Christian Brothers, first book of modern geography, Murray's grammar, Carpenter's spelling. All the books used in first class are used in second, with the exception of Reeve's history of the church. Third class, second reading book by the Christian Brothers, Mavor's spelling; fourth class, first book and sequel by Christian Brothers; fifth class, tablets; condition tolerable. The number of books is inadequate to the wants of the school.
- 22.—Map of The World, others much needed.
- 23.—System of correction employed—admonition, confinement, and minor punishments; and, in cases of incorrigibility, expulsion; no instructions received on the subject.
- 24.—Twice a year, at Christmas and Midwinter by the clergyman and Mr. Wiles, the school inspector; prizes in the shape of pictures, medals, &c., have been awarded to the most deserving pupils.
- 25.—By the Very Rev. J. J. Therry, at least once a week for about half an hour; Mr. Wiles, the school inspector, three times a year.
"I have examined the children attending this school, and feel much pleasure in stating that they have acquitted themselves with credit in the several classes in which I examined them; they also displayed some very neat specimens of needlework, the number present was not so large as would be desired, in consequence of the festival of Christmas being so near; there were, however, about fifty.—JOHN H. WILES.
"December 23, 1858."
"I have this day visited this school, and found the children very orderly and attentive, the number present was fifty.—J. H. WILES.
"March 2, 1859."
- 26.—Maria Hogan.
- 27.—None.
- 28.—Golden, County Tipperary, Ireland.
- 29.—34 years.
- 30.—May, 1857.
- 31.—
- 32.—

33.—Taught a private school for twelve months, had charge of Roman Catholic Orphan School for eleven months, taught Denominational School, Petersham, for three years, and at Appin for ten months; received my education at Thurles' Conveht.

34.—Annual salary, £70.

35.—£32 5s. 9d.

36.—£102 5s. 9d.

37.—Catechism and prayer twice a day by teacher; visited by Very Rev. J. J. Therry; Christian doctrine, catechism, historical catechism, and Douay Bible.

BRAIDWOOD.

1.—Braidwood.

2.—Chiefly of wood, and needs enlargement.

3.—420.

4.—4,840.

5.—2 water-closets, built of stone, and shingled, and in good condition.

6.—Superficial feet, 420; cubical feet, 3,990.

7.—60.

8.—4 glass windows, each 2 ft. 4 in. by 2 ft. 9 in., working on pivots, and 1, 1 ft. 6 in. by 2 ft., working on hinges.

9.—Average number on the roll for the quarter ending March 31st, 1859, boys 40, girls 40, total 80; average attendance, boys 30, girls 30, daily.

10.—Boys 16 to 2, girls 16 to 2.

11.—Four; boys, first class, age 16 to 12; second class, 11 to 8; third class, 9 to 7; fourth class, 5 to 2; number in each class, 10; girls, first class, age 15 to 11; second class, 11 to 9; third class 8 to 6; fourth class, 4 to 2; number in each class, 10.

12.—Commences at 9 a.m. and terminates at 4 p.m.; intervening cessation of study from 12½ p.m. to 2 p.m.; such time employed in recreation and eating lunch or dinner.

13.—Holidays for the quarter ending March 31st, 1859, 2; vacations for the year, 1 month; usually given as follows—at Easter one portion and at Christmas the other portion.

14.—For the quarter ending March 31st, 1859, 61 days.

15.—Cannot state.

16.—Don't know of any; believe there are none.

17.—Average per week, 9d.; total for the year, whether they attend or not, £1 19s. sterling.

18.—£29 17s. 2½d., for the quarter ending March 31st, 1859; £44 17s. 2½d. ÷ 60, gives an average of 1s. 2d. per week, or £3 per annum.

20.—Boys, Christian doctrine, geometry, book-keeping, English grammar, geography, history, reading, writing, and arithmetic, first class; Christian doctrine, reading, writing, English grammar, geography, history, and arithmetic, second class; Christian doctrine, spelling, reading, writing on slates, and numeration, third class; alphabet and spelling, fourth class. Time table—from 9 to 9½ a.m.—; from 9½ to 9¾ a.m., prayer; from 9¾ to 10½ a.m. Christian doctrine; from 10½ to 11½ a.m., reading, parsing, and spelling; from 11½ a.m. to 12 noon, writing; at noon the Angelus Domini is said; from 12 noon to 12½ p.m., examined on orthography, etymology, and syntax; from 2 to 3 p.m., arithmetic and mathematics; from 3 to 3¾ p.m., geography or English grammar; from 3¾ to 4 p.m., prayer and singing. *Note.*—English grammar and geography on alternative days. Girls taught same as boys, with the exception of mathematics. *Note.*—Girls taught needlework on Tuesdays and Fridays 2 hours each day.

21.—Christian Brothers' first, second, third, and fourth books, English grammar, geography, supplied by the Board; Chambers' geometry and book-keeping, mensuration, as in N. school; Mavor's spelling purchased by the scholars; number not adequate.

22.—Prints, 1 set, diagram, a gourd, and knitting-needle, 1 map of The World, 1 of Europe, 1 of North and South America, 1 blackboard, 2 desks, 9 forms, all in good condition; wanted, two desks, a rostrum, a pair of terrestrial globes, maps of Asia, Africa, and the principal countries of Europe.

23.—For punishment, placed apart from the other scholars, sometimes on their knees; slight corporal punishment administered; instructed by the Board to avoid as much as possible corporal punishment.

24.—Rev. E. O'Brien visits and examines weekly, and distributes prizes monthly; prizes usually of a religious character.

25.—Rev. E. O'Brien, weekly; generally remains one hour, sometimes two hours. No report made as yet of this school.

26.—Mr. James Southwell.

27.—Mrs. James Southwell.

28.—Mr. James Southwell, born in Cork, Ireland; and Mrs. James Southwell, born in Tyrone, Ireland.

29.—Mr. James Southwell, 29; Mrs. James Southwell, 23 years.

30.—December, 1858.

31.—Yes.

32.—At St. Benedict's; Sydney, for two months; first-class certificate.

33.—Occupation before that of a teacher, ship and Custom House agent.

34.—£60 sterling

35.—Nil.

36.—£44 17s. 2½d., for the quarter ending March 31st, 1859.

37.—Doctrine of the Roman Catholic Church taught daily, by the teachers; visited by the Rev. E. O'Brien, Roman Catholic pastor; books, Christian doctrine, and historical catechism.

BUNGONIA.

- 1.—Bungonia, District of Goulburn.
- 2.—Of wood; in good repair. Much in want of writing desks.
- 3.—504 square feet.
- 4.—1 square acre; granted for church and school; not enclosed.
- 5.—No water-closets at present provided.
- 6.—1 room, 504 square feet, 28 cubic feet.
- 7.—24 pupils, the average number in attendance daily.
- 8.—1 door, 1 window; no ceiling—open to the roof.
- 9.—30; average number attending, 17 boys, 7 girls.
- 10.—From 5 to 16 years; boys and girls same.
- 11.—Five classes, 5 in each—from 12 to 15, from 10 to 12, from 8 to 10, from 4 to 8.
- 12.—5 hours; from 9 to 12, from 2 to 4; intervals, dinner and play.
- 13.—1 day; 2 vacations—Christmas, 10 days; Easter, 8 days.
- 14.—237 days.
- 15.—From 1, 2, or 3 years, more or less.
- 16.—About 20 children.
- 17.—No fixed charge; each family paying in proportion to circumstances. No charge for books.
- 18.—About £23; salary, £52 10s.; total, £75 10s., amount received from all sources.
- 19.—About £3 5s. each pupil.
- 20.—In proportion to ages; from first to third books in reading lessons, grammar, geography, writing, arithmetic—daily, 15 to 20 minutes.
- 21.—Rev. J. Reeve's general history church, Christian Brothers, from first second, and third book lessons, Carpenter's spelling book, &c.; new ones required.
- 22.—1 large map of The World, in good order; no other diagrams, prints, &c., furnished; some useful ones required.
- 23.—Gentle correction with a rod; no official instructions received from any other quarter on this subject.
- 24.—On the several occasional visits of the clergyman to the parish, say 6 times during the year 1858; no prizes or rewards given.
- 25.—By the Local Board; 4 times; about 1 hour; report sent to the Head Board, but no copy left.
- 26.—John Doyle.
- 27.—No assistant.
- 28.—Ireland.
- 29.—50 years.
- 30.—December 1st, 1857.
- 31.—Yes.
- 32.—Kent-street Denominational Model School; 3 months; 2nd class.
- 33.—Storekeeper.
- 34.—£52 10s.
- 35.—£23.
- 36.—£75 10s.
- 37.—Prayers and catechism; daily; by the teacher; formerly visited by the Very Rev. Dean Walsh, Catholic clergyman; and at present by the Rev. P. Magennis, Catholic clergyman, Berrima; catechism, as approved by His Grace the Archbishop, and historical catechism, by Monsieur Fleury.

CAMPBELLTOWN.

- 1.—Campbelltown—mixed school.
- 2.—Front and foundation stone, rest brick; repairs good; a separate apartment necessary to be added for the infants, who average at present 20.
- 3.—64 square yards, or 576 square feet.
- 4.—About an acre, or 4,840 square yards, or 43,560 square feet.
- 5.—In good repair.
- 6.—Only 1 apartment; 576 square feet; 8,640 cubic feet.
- 7.—About 70.
- 8.—4 pulley windows.
- 9.—For 1858 roll—annual average 49 boys, 48 girls; daily annual average 37 boys, 38 girls.
- 10.—From 3 to 14, in both sex.
- 11.—Five classes, 13—first class, from 3 to 7 years; second, and sequel to second, 7 to 9; third, 9 to 11; and fourth, 11 to 14.
- 12.—6 hours—9 till 4; recreation 1 till 2.
- 13.—1—Saturday; 2—2 weeks at Christmas, 1 at Easter.

- 14.—139 days.
 15.—Some a week, some a month, some 2, 3, 6, 9, or 12 months, and longer.
 16.—About 20.
 17.—Some 6d. per week, some 10d. per week, and some nil; none supplied for sale, one of the greatest deficiencies; £1 4s. and £2.
 18.—£44 12s. 9d.; support of teacher, nil; £132 2s. 9d.
 19.—£1 15s. 2½d.
 20.—Christian doctrine, 9 till 10; reading and spelling, 10 till 11; history and composition, 11 till 12; arithmetic, 12 till 1; recreation, 1 till 2; reading and spelling, 2 till 3; grammar and geography, every alternate day, 3 till half-past 3; half-past 3 till 4, writing.
 21.—Second, sequel, third, and fourth reading books, Carpenter's spelling, grammars, geographies, and arithmetic; very bad; yes—some geometries, mensurations, algebras, book-keepings, and a few elementary works on natural philosophy; not near so.
 22.—24 reading and spelling tablets, 6 large and 8 small geographical maps, 8 desks, 12 forms, 2 teacher's desks, 1 clock, 1 small blackboard; good repair; others much needed, viz.:—a press for books, a pair of globes, astronomical diagrams of the seasons and planets, in wood, and a map of The World, in two Hemispheres.
 23.—Punishment on the hands, detention from recreation, and kneeling and standing for a certain period; none whatever.
 24.—By none; no prizes or rewards.
 25.—By the Rev. Mr. Roche; sometimes weekly; about 10 minutes; pupils progressing.
 26.—James O'Grady.
 27.—Nil.
 28.—County Clare, Ireland.
 29.—36 years.
 30.—Sometime in July, 1852.
 31.—Yes.
 32.—Marlborough-street, Dublin; 5 months; first class.
 33.—No occupation.
 34.—£87 10s. per annum; no other teachers.
 35.—£44 12s. 9d. per annum, for the year ending 30th September, 1858—as may be seen at query 13; dwelling, rent free.
 36.—£132 2s. 9d., for the year ending 30th September, 1858—see query 18.
 37.—The Christian doctrine; daily; by the teacher; yes, by the Rev. Mr. Roche, R.C. priest; the Christian doctrine only.

CHURCH HILL.

- 1.—Church Hill, Sydney.
 2.—Of stone, and is in good condition.
 3.—3,600 square feet.
 4.—There is no land adjoining the school for the use of the pupils.
 5.—The water-closets are built of brick, and are in good condition.
 6.—3,600 square feet, and 33,200 cubic feet.
 7.—130 children.
 8.—10 windows.
 9.—The average number on the books is 130 girls, and 30 boys. The average number in daily attendance is 111 girls and 26 boys.
 10.—Maximum age of girls, 15 years; minimum, 3. Maximum age of boys, 7; minimum, 3.
 11.—The school is divided into five classes:—
- | Classes. | Girls—Maximum. | Minimum. | Boys—Maximum. | Minimum. |
|----------|----------------|----------|---------------|----------|
| 1st | 15 | 10 | None. | |
| 2nd | 11 | 8 | None. | |
| 3rd | 9 | 7 | None. | |
| 4th | 7 | 5 | 7 | 5 |
| 5th | 5 | 3 | 5 | 3 |
- 12.—5½ hours; commencing at 9 a.m. and terminating at 4 p.m. Cessation of study from half-past 12 to 2 o'clock p.m., for dinner and recreation.
 13.—One holiday in each week, Saturday; and two vacations in the year, Easter and Christmas. The children get a week at Easter, and a fortnight at Christmas.
 14.—230 days.
 15.—I have children attending this school these ten years, and there are many who may be absent for two or three months and return again, so that I cannot say when they have actually left the school.
 16.—Cannot answer.
 17.—The sum charged to each pupil for instruction is from 3d. to 1s. per week. No charge for books. Total annual charge for each pupil is from 13s. to £2 12s.
 18.—Annual amount of school fees, £27; Government salary, £140; total amount of support, £167. The school fees and Government salary go to the support of the teachers.
 19.—The annual total cost for each pupil is £1 2s. 8½d.

20.—Copy of time table for

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.
	First Class.	Second Class.	Third Class.	Fourth Class.	Fifth Class.
9 to 9½	Preparing lessons. Writing. Grammar and geography, on alternate days.	Preparing lessons. Writing. Same as first.	Preparing lessons. Writing. Same as first and second.	Preparing lessons. Writing on slates. Lessons.	Preparing lessons. Lessons.

24.—Twice a year, at Christmas and June, by Rev. J. Keating, Rev. P. Newman, the inspector (Mr. Wiles), and others, when prizes such as books or pictures are given to deserving pupils.

25.—By Rev. J. Keating, at least once a week, and by the inspector (Mr. Wiles), generally once a month.

“December 14, 1858.

“In reference to the children whom I have examined to-day—the first class, I have much pleasure in being able to state that I am much pleased by their answering in their different classes; but I am particularly pleased with the accuracy and correctness with which they read.—P. NEWMAN, C. C.”

“I assisted at the examination of the children attending this school, and was much pleased with their answering in general.—J. H. WILES.”

“I fully concur in the above remarks.—J. KEATING.”

26.—B. G. Meagher.

27.—Matilda Meagher.

28.—Cashel, Ireland.

29.—B. G. Meagher, 25 years; M. Meagher, 22 years.

30.—October 14, 1854.

31.—Not trained.

33.—Four years' experience.

34.—Salary of head teacher, £111; assistant, £56.

35.—£27.

36.—£167.

37.—Instruction on religious subjects once a day, by the teacher. Religious instruction is also given once a week by the Sisters of the Good Shepherd, Rev. J. Keating, Catholic clergyman. The Christian doctrine and historical catechisms.

CAMPERDOWN.

1.—The school is situated at Camperdown.

2.—The schoolhouse is constructed of brick, and needs repairs.

3.—The area of the schoolhouse is 672 square feet.

4.—There is half an acre for the use of the school, but the pupils have the use of two acres at the present time.

5.—The water-closets are constructed of brick, and are in tolerable condition.

6.—The schoolhouse consists of one room, which contains 672 square feet and 8,068 cubic feet.

7.—The average number of pupils in attendance is 105.

8.—The schoolhouse is ventilated by casement windows.

9.—The annual average number on the roll is 139—83 boys and 56 girls. The average number in attendance is 65 boys and 40 girls.

10.—The maximum age of boys is 14 years, and of girls 14. The minimum age of boys is 4 years, of girls 4 years.

11.—The school is divided into seven classes; the average number in each class is 15. The maximum and minimum ages are as follow:—In the first class 14 and 12, in the second 11 and 9, in the third 10 and 8, in the fourth 9 and 7, in the fifth 7 and 6, in the sixth 6 and 5, and in the seventh 5 and 4 years.

12.—The pupils attend 6 hours each school day; the hours of attendance are from 9 until 1 o'clock, and from 2 until 4. The intervening hour is allowed for dinner and play.

13.—There is one holiday allowed in each week, namely, Saturday. There are two vacations in each year—one at Christmas of a fortnight's duration, and one at Easter of three days' duration. There are also about five or six church holidays.

14.—The number of days appropriated to school studies during the year terminated 30th September, 1858, was 243.

15.—The average length of time that pupils remain at school is five or six years.

16.—There are five children in this district between the ages of 5 and 15 years, who do not usually attend school.

17.—There are several pupils who pay no school fees, others who pay 3d., others who pay 6d., others who pay 9d., and others who pay 1s. per week. There is no annual charge for books. The total annual charge for each pupil is equal to £1 4s. 1½d.

18.—The fees received from the pupils during the year ended 30th September, 1858, amounted to £126 15s. 6d. The amount received from Government was £71 3s. 4d. The total amount was £197 18s. 10d.

19.—The annual total cost of the education of each pupil was £1 17s 7½d.

20.—The several subjects of instruction are spelling, reading, writing, grammar, geography, history, arithmetic, geometry, prayers, and catechism. The girls are taught to sew about five hours every week. The school hours are allotted for instruction in the following order:—From 9 o'clock until 15 minutes to 10 is allotted to spelling and prayers; from 15 minutes to 10 until 15 minutes past 10, the first and second classes write, during which time the third and fourth classes read; from 15 minutes past 10 until 15 minutes past 11, the first and second classes read, each lesson continues half an hour; from 15 minutes past 11 until 12 o'clock is allotted to grammar and geography alternately; from 12 until half-past 12, to catechism; from half-past 12 until 10 minutes to 1, to geometry. After which the Angelus is recited, and the children dismissed until 2 o'clock. The afternoon is allotted to arithmetic by the first, second, and third classes. The fourth, fifth, sixth, and seventh classes are taught lessons as in the forenoon.

21.—English grammar, geography, history of the Bible, history of the church, history of England, historical catechism, third book of reading lessons by the Christian Brothers, and arithmetic, are used by the first class; grammar, geography, third book, and arithmetic, are used by the second class. The second book of reading lessons by the Christian Brothers is used by the third class. The sequel to the first book is used by the fourth class, and the first book and tablets are used by the fifth, sixth, and seventh classes. These books and tablet sheets are very much worn.

22.—There are 13 maps in the school, 7 of which scarcely deserve mention, they are very small and quite worn. The remainder are 2 maps of The World, 1 of Europe, 1 of Asia, 1 of New South Wales, and 1 of Palestine. There are 7 desks, 14 forms, 2 tablet stands, a blackboard, and bookpress.

23.—I use a strap to preserve discipline and enforce attention to study. I have been instructed to do so by one of the managers of the school.

24.—The school is visited by the Rev. Father Corish about five or six times a year. The principal examination with reference to the progress of the children is at Christmas, at which time only prizes are given—religious books or prints.

25.—The school is officially visited by Mr. J. H. J. Wiles once a year. The time occupied in the performance of this duty is about three hours. The following is the last report on the state of the school taken from the roll-book:—

“ 17 December, 1858.

“ I was present at the examination of the children of this school, and was much pleased with their answering in Christian doctrine, grammar, geography, and arithmetic; their writing was very creditable; they were well-conducted, orderly, and attentive. The number present was 105.”

26.—The name of the head teacher is James Maloney.

27.—The name of assistant teacher is Mrs. Maloney.

28.—Both teachers were born in Ireland.

29.—The respective ages are 37 and 32.

30.—Date of appointment to present office, December, 1856.

31 & 32.—Not trained as a teacher.

33.—I had had about ten years' experience in teaching previous to my present appointment, and no other occupation or business before adopting that of a teacher.

34.—The salary for the year ended 30th September, 1858, was £71 3s. 4d.

35.—The school fees amounted to £126 15s. 6d.

36.—The total income of master and mistress for the above year was £197 18s. 10d.

37.—Religious instruction is given once a week by the Nuns of the House of the Good Shepherd.

CHARCOAL CREEK.

- 1.—Charcoal Creek, Illawarra.
- 2.—Constructed of wood, repairs and enlargement necessary.
- 3.—442 square feet.
- 4.—680 square yards.
- 5.—No water-closets.
- 6.—One apartment only, 442 square feet, 7 feet high to rafters on wall plate, 3,094 cubic feet.
- 7.—From 64 to 78.
- 8.—No provision, but as a substitute we open back windows.
- 9.—The number on the books for the last four years, 38 boys and 55 girls; total 93; it exceeded that number in former years. The average daily attendance for the same time is 30 boys, 44 girls; total 74.
- 10.—Maximum of boys 16 years, of girls 14 years.
- 11.—Seven classes; about 10; maximum of first class 16 years, and minimum 10 years, second class 8 and 7, third class 8 and 7, fourth class 7 and 6, fifth class 6 of each, and of the sixth and seventh classes about 5 and 4.
- 12.—6 hours; commencing at 9 o'clock in the morning and terminating at 4 in the afternoon. One hour allowed at 1 o'clock for dinner and recreation.
- 13.—One holiday in each week; two vacations in the year, one at Christmas (for two weeks), and the other at Easter (for one week).
- 14.—245 days, health and weather permitting.
- 15.—Very hard to tell, as some children after spending four or five years at school are kept at home, perhaps for two or three years, return again for a year or so, but not in regular attendance.
- 16.—Cannot tell.
- 17.—Where four or five come from the same party I only charge for three, at 5s. per quarter for each, or £1 per annum. If six I charge for four when in regular attendance, if otherwise I allow for absent time.
- 18.—Received £49 5s. 8d. from the parents of the children, and £65 12s. 6d. from Government, which (after paying rent for the schoolroom and keeping the same in repair) is exclusively appropriated to the maintenance of the teacher and family, and is found insufficient for that purpose.
- 19.—The cost referred to is £1 4s. 8½d. for each child.
- 20.—The subjects of instruction are selected from the reading lessons of the day, together with half-hour's instruction on geography and grammar.
- 21.—Tablets, first books, sequels to ditto, second books, and third and fourth series of ditto, all by the Christian Brothers, and in very indifferent condition; and also grammar and geography; a fresh supply very much required; the few we have not half sufficient.
- 22.—No prints, diagrams, instruments, nor even desks, having to use tables purchased by the teacher, as a substitute for the latter. The maps are—one of Australia, one of the British Isles, one of Africa, one of America, and one of The World.
- 23.—Moderate chastisement. There has been a letter from the Board on the subject.
- 24.—Four times by the parish priest, for the time being, but no prizes.
- 25.—Not visited by any inspector lately, and no report unless the remarks left on the roll-book by visitors.
- 26.—Peter Tresnan.
- 27.—No assistant teachers nor monitors, unless chosen by the teacher when required.
- 28.—County of Leitrim, Ireland.
- 29.—50 years.
- 30.—In January, 1845.
- 31.—Not.
- 32.—
- 33.—Thirteen years practical experience as a teacher at home; no previous occupation.
- 34.—The present salary is £70, having lately the liberal increase of £4 7s. 6d. per annum.
- 35.—None.
- 36.—£120, or thereabouts.
- 37.—Christian doctrine, and historical catechism every alternate day, Reeve's history of the church and of the Bible twice each week, and Testament lessons twice each week, all given by the teacher, together with the instruction given by the Roman Catholic clergyman, whenever he calls.

CONCORD.

- 1.—Concord.
- 2.—Brick.
- 3.—1,265 superficial square feet.
- 4.—3,150 square feet.
- 5.—Brick, good.
- 6.—740 superficial square feet, or 11,100 cubic feet.
- 7.—36.
- 8.—Eight gothic windows.
- 9.—
- 10.—Males, from 13 to 3 years; females, from 12 to 3 years.

- 11.—
- 12.— $5\frac{1}{2}$ hours; commencing at 9 o'clock a.m., and terminating at 4 o'clock p.m.; dinner and recreation from half-past 12 o'clock to 2 o'clock.
13. Saturday in each week, the Anniversary of the Colony, St. Patrick's Day, and the Queen's Birth Day; vacation, two weeks at Christmas, and two weeks at Easter.
- 14.—272.
- 15.—
- 16.—
- 17.—
- 18.—
- 19.—
- 20.—Spelling, reading, writing, grammar, geography, history, Christian doctrine, arithmetic, composition, elocution, Latin, classics; half an hour allotted to each subject of instruction.
- 21.—From first to fourth series of class books, tablets, by the Christian Brothers; condition bad; inadequate to wants of the school.
- 22.—Five, viz.: one map of The World, one of Australia, one of New South Wales and Victoria, one of the Holy Land, one of the British Isles.
- 23.—In accordance with the rules issued by the Denominational School Board; corporal punishment in extreme cases.
- 24.—Chairman of the Local Board.
- 25.—Rev. P. Birch, eighty times per annum; casual visitors, His Grace Archbishop Polding, Rev. Mr. Corish, Rev. Mr. Sheridan, Messrs. Wiles, M'Grath, and Lindon.
- 26.—George Argyle Plunkett.
- 27.—
- 28.—Ireland.
- 29.—39.
- 30.—18th of October, 1858.
- 31.—1st, by the Christian Brothers, Sydney.
- 32.—2nd, Model School, Kent-street, Sydney.
- 33.—Fourteen years a teacher; previous occupation, medical student.
- 34.—£61 5s.
- 35.—The present teacher was not in charge of the school previous to the 30th of September, 1858.
- 36.—
- 37.—Christian doctrine, Scriptural history, &c., once a week; Rev. Patrick Birch, Catholic clergyman.

COLLECTOR.

- 1.—Collector.
- 2.—All stone, needs no repairs.
- 3.—46 square feet.
- 4.—4,840 square feet.
- 5.—All wood, and in good condition.
- 6.—46 square feet.
- 7.—29 pupils.
- 8.—There are six windows, which can be open at pleasure.
- 9.—29·7 boys, 25·4 girls; average number attending school, 15 boys, 14 girls.
- 10.—Males, from 5 to 11; females, from 4 to 13 years.
- 11.—Four classes of boys, four classes of girls; average age of each class, 8 years.
- 12.—The school commences at 9 o'clock a.m., and terminates at 4 o'clock p.m.; all the children return home to dinner.
- 13.—Half a holiday; two vacations, about five days each, at Christmas and Easter.
- 14.—284 days.
- 15.—From 3 to 4 years.
- 16.—About 44.
- 17.—School fees for each child, 8s. 11d.; the price of books I am not aware of.
- 18.—Fees received from pupils, £12 10s. 3d.; from Government, £52 10s.; total, £65 0s. 3d.
- 19.—£2 4s. 10d. each child, annually.
- 20.—Reading, writing, arithmetic, grammar, geography, and catechism; an hour each on an average.
- 21.—First, second, and third books of reading lessons, grammars, geographies, and arithmetics, in good condition; no other kinds are needed at present.
- 22.—There is one map of The World, which is sufficient at present.
- 23.—Should a child be incorrigible in the school, the only mode of correction I use, is to give them no dinner, and keep them in the school during dinner hour, and which I find to answer well.
- 24.—Generally once a month, when prizes are given them in the shape of books.
- 25.—By the Local Board, and about twelve times a year.
- 26.—Thomas Denis O'Sullivan.
- 27.—None.
- 28.—County Waterford, Ireland.
- 29.—48 years.

- 30.—1st of November, 1849.
 31.—Yes.
 32.—National Model School, Dublin, four months; second class certificate.
 33.—Constantly teaching.
 34.—Annual salary, including school fees, £65 0s. 3d.
 35.—£12 0s. 3d.
 36.—£65 0s. 3d.
 37.—Catechism, once a day, by the teacher; the Very Rev. Dean Walsh, Catholic pastor, catechisms, and historical catechisms.

CATTAI CREEK.

- 1.—Cattai Creek.
 2.—Constructed of wood, needs repairs.
 3.—The number of superficial square feet contained in the area of the schoolhouse is 403.
 4.—The number of square yards contained in the playground is 4,840.
 5.—There are no water-closets.
 6.—The number of square feet, 360, and 2,520 cubic feet, is contained internally in the schoolroom.
 7.—The average number of pupils usually assembled in the school was 27.
 8.—The provision for the ventilation is two windows, $2\frac{1}{2}$ by 2 feet.
 9.—The annual average number on the books was 19 boys and 15 girls; total, 34.
 10.—The maximum and minimum age of the male sex is from 6 to 14 years, and 5 to 12 for the female sex.
 11.—The school is divided into four classes; the average number in each is 6; the maximum and minimum age in each class is 9 to 14, 7 to 12, 6 to 9, and 5 to 8 years.
 12.—The number of hours during each day the pupils attend the school is 6; they commence at 9 o'clock and leave off at 12, until 1 o'clock, when they resume their studies again until 4. The cessation hour is generally occupied in partaking of their lunch, after that the boys have a game of cricket or marbles.
 13.—The number of holidays in each week is one; the number of vacations in each year is two,—the duration of each a fortnight at Christmas and a week at Easter.
 14.—The total number of days appropriated to school studies during the year was 236.
 15.—The average length which pupils remain at this school is about 4 years.
 16.—The number of children between the ages of 5 and 15 years in the district who do not usually attend the school is about 10.
 17.—The weekly charge for each pupil who is able to pay is from 3d. to 6d.; no charge for books; the annual charge 13s. 6d. for each pupil.
 18.—The annual amount of school fees received from the pupils of the school during the twelve months ending 30th September, 1858, was £14 3s. 11d., appropriated towards supporting and clothing self and family, together with £52 10s., received from the Denominational School Board, which makes a total of £66 13s. 11d.
 19.—Dividing the last-mentioned total by the average number, 27, gives £2 9s. 5d. nearly for the annual education of each pupil.
 20.—The several subjects of instruction given to each are spelling, reading, writing, arithmetic, English grammar, geography, history, and catechism; the time devoted to each is about 40 minutes.
 21.—A list of the titles of all books used in each of the several classes is as follows:—First book of reading lessons, sequel to first book, second book of reading lessons, third book of reading lessons, fourth ditto or litany class book, first book of modern geography, an introduction to the school expositor, a school grammar of the English language, a commercial arithmetic, all by the Christian Brothers; an abridgment of the Christian doctrine for the use of the faithful, by the direction of His Grace the Archbishop of Sydney. The condition of some of the books is good, others are indifferent. There are some first and second books of lessons required,—the number now is scarcely adequate to the wants of the school.
 22.—The above list, together with a number of tablets on the first series of reading lessons, some historical catechisms, containing summary of the sacred history, history of the Old and New Testaments, a map of The World, a roll-book, are all the prints apparatus in this school. The map is in good condition, but we need a map of Europe and Australia; also a blackboard.
 23.—The system of correction employed in the school to preserve discipline is the ferula. There has been rules and regulations received from the Denominational Board, and no more.
 24.—The pupils of the school are examined at least four times a year by the Rev. Dr. Hallinan, and prizes distributed at Christmas,—that is, Catholic and Protestant prayer books.
 25.—The school is officially visited by the Rev. Dr. Hallinan at least six times a year, and examined quarterly; the length of time occupied by him in the performance of this duty is about three hours. There is no report on the state of the school; the present condition of it is good.
 26.—Name of teacher, James Cusack.
 27.—There is no other.
 28.—Birthplace of teacher, Ireland.
 29.—Age of teacher, 35 years.

- 30.—Date of appointment to present office, 18th January, 1854.
 31.—Trained.
 32.—At Kent-street North Model School, for nearly two months. My certificate of capability from Mr. O'Bryan, the then model teacher, had been, I understand, sent to the Board by that worthy scholar; previous to undertaking the present appointment I followed the profession since I had left off going to school,—that is, since the year 1844 I taught in my native country, and immediately after landing in this Colony I adopted the same mode.
 33.—Is included in the above.
 34.—Annual amount of salary, £52 10s.
 35.—Fees from pupils, £14 3s. 11d.
 36.—Total amount of income of teacher, £66 13s. 11d.
 37.—The Christian doctrine is taught daily by the teacher; the school is visited frequently by the Rev. Dr. Hallinan, of the Roman Catholic religion. Names of the books for such purpose:—An abridgment of Christian doctrine for the use of the faithful, by direction of His Grace the Archbishop of Sydney; an historical catechism, containing summary of the sacred history, by Monsieur Fleury.

DARLINGHURST.—(Boys.)^①

- 1.—Darlinghurst.
 2.—Of stone; it does not need repair or enlargement.
 3.—1,620.
 4.—1,008 square yards, enclosed; without the enclosure there is a commonage.
 5.—The water-closets are of wood, and their condition is good.
 6.—1,620 square feet, and 16,200 cubic feet.
 7.—Number on the roll, 208.
 8.—5 windows.
 9.—Annual average number on the books, 176; annual average attending the school, 127.
 10.—The maximum age, 15 years; and the minimum age, 5.
 11.—The school is divided into four classes, the average number in each class, 52. The maximum and minimum ages in each class are as follows:—First class, max. 8, min. 5; second class, max. 10, min. 6; third class, max. 12, min. 6; fourth class, max. 15, min. 9.
 12.—The pupils attend school during 5½ hours each day; the school duties commence at 9 o'clock in the morning, and terminate at 4 in the afternoon; the intervening cessation of studies, from 12½ to 2 o'clock, is employed in taking luncheon and in recreation.
 13.—One holiday (Saturday) in each week, two vacations each of a fortnight's duration—they occur at Christmas and Easter.
 14.—237.
 15.—
 16.—Can't say.
 17.—The terms are 6d., 9d., or 1s. per week; and the total annual charge 26s., 39s., or 52s.; the pupils are not charged for the use of the books supplied to the school by the Board.
 18.—School fees received during the year, £157 10s.; the fees are appropriated to paying rent, water rates, &c., the residue going to the support of the teacher; and amount of support received during the year, £245. The Government salary and the school fees have been the only sources from which the school has received support during the time I have been teacher of it.
 19.—£1 18s. 6¾d.
 20.—School opens at 9 o'clock a.m. and closes at 4 o'clock p.m., on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays; from 9 to 9¼, preparation of lessons; 9¼ to 10, prayer; 10 to 10½, catechism; 10½ to 11½, reading, spelling, explanation of lessons; 11½ to 12, writing; at 12, the Angelus; 12 to 12½, reading, spelling, explanation of lessons; 12½ to 2, recreation; 2 to 3, arithmetic, geometry, mensuration, and algebra; 3 to 3¾, grammar and geography; 3¾ to 4, prayer.
 21.—The books used in the classes are—the first, second, third, and fourth books, and the grammar and arithmetic by the Christian Brothers, Reeve's history of the church, historical and Christian doctrine catechisms, Young's history of England, Kearney's compendium of history, Sullivan's geography generalised, and spelling-book superseded, Chambers' geometry, the mensuration published by the Irish National School Board, Tyson's algebra, and some others; present condition, tolerable; the number is inadequate to the wants of the school.
 22.—The maps used in the school are—a map of The World, of Europe, Asia, America, and Africa; the following were purchased by myself for the use of the school—two maps of Ireland, two of England, one of New South Wales, and several other small maps, and also a case of mathematical instruments; present condition, tolerable; prints, diagrams, maps, and instruments are needed.
 23.—Admonition, reproof, confinement, chastisement, and in cases of incorrigibility, expulsion; I have received no written instructions on the subject; the foregoing is, I believe, the nature of those I received.
 24.—Twice a year, by the Rev. Father Sheridan, the inspector and others; prizes, such as books, medals, crosses, &c., are given at the Christmas examination.

25.—By the Rev. Father Sheridan, and the inspector; the rev. gentleman visits the school at least once a week, the length of his visits is usually half an hour; the length of time occupied by the inspector in his monthly visits, is from half an hour to an hour.

“December 15, 1858.

“Having been present on the occasion while the children underwent a strict examination in the different subjects taught in this school, I am therefore much pleased in having it in my power to give a most favorable report of the school, both as regards the manner in which it is conducted, and the mode of imparting instruction, two circumstances reflecting the greatest credit on the efficient teacher, Mr. O'D. Molony.—JOHN F. SHERIDAN.”

“December 15, 1858.

“I was present at the examination of the pupils of this school, and I was very much pleased with their very prompt and accurate answering in history, grammar, geography, spelling, arithmetic, mensuration, and geometry; which fully proves there has been no pains spared by their teacher, Mr. Molony, for their improvement. Their attention, as well as their cleanliness, was also very creditable.—J. H. J. WILES, Inspector.”

26.—Patrick O'D. Molony.

27.—There are no assistant teachers, pupil teachers, or monitors, attached to the school.

28.—Tipperary, Ireland.

29.—31 or 2 years.

30.—March, 1852.

31.—Trained.

32.—At the National Model School, Dublin; six months; when trained I was only assistant teacher, soon after when appointed teacher, I was placed in the first division of the second class, and my name placed on the roll as candidate for the highest class.

33.—

34.—Annual salary, £87 10s.

35.—Fees received during the year, £157 10s.

36.—£245.

37.—Catechetical instruction; daily; by the teacher; the Sisters of Charity visit twice a week, visited by the Rev. Father Sheridan; Catholic; historical and Christian doctrine catechisms.

DARLINGHURST.—(GIRLS.)

1.—Darlinghurst.

2.—Of stone; it needs neither repair nor enlargement.

3.—836 square feet.

4.—About 1,000 square yards.

5.—Weatherboarded and in good condition.

6.—8,360 cubic feet.

7.—68.

8.—3 windows.

9.—Average on the books, 99; average attendance, 68.

10.—Maximum age, 14; minimum, 4.

11.—Four classes; the average in each is 25.

12.—Maximum age in first class, 14; minimum, 10 years. Maximum age in second class, 13; minimum, 8 years. Maximum age in third class, 11; minimum, 8 years. Maximum age in fourth class, 9; minimum, 4 years.

12.—5½ hours; commencing at 9 a.m. and terminating at 4 p.m.; cessation of studies from half-past 12 to 2; employed in taking luncheon and in recreation.

13.—One holiday in each week (Saturday); vacations, two, of a fortnight's duration each; they occur at Christmas and Easter.

14.—237.

15.—I cannot say the average length of time the pupils remain at the school as there are many attending still who were attending at my appointment.

16.—Cannot say.

17.—The terms are—6d., 9d., or 1s. per week; the pupils are not charged for the use of the books supplied by the Board.

18.—£43 5s. 6d.; appropriated to the support of the teacher; £89 10s. 6d.

19.—£1 6s. 4d.

20.—Copy of time table: School opens at 9 a.m., closes at 4 p.m., on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. Business: from 9 to 9¾, preparation of lessons; from 9¾ to 10, prayer; from 10 to 10½, catechetical instruction; from 10½ to 11½, reading classes; from 11½ to 12, writing; at 12, the Angelus; from 12 to 12½, spelling classes, &c.; from 12½ to 2, recreation; from 2 to 3, arithmetic; from 3 to 3¾, grammar, geography, &c.; from 3¾ to 4 o'clock, prayer; the afternoons of Thursdays are devoted to needlework.

21.—First, second, third, and fourth reading books, grammar, geography, and arithmetic, by the Christian Brothers, Reeve's history of the church, history of England (Young), historical and Christian doctrine, catechisms; their present condition is tolerable; other books are needed; the number at present is inadequate to the wants of the school.

22.—The maps used in the school are—The World, Asia, America, Africa, Europe, and Ireland; prints, diagrams, and maps are needed.

23.—Admonition, reproof, and correction; I have received no written or other instructions on this subject.

24.—Twice a year by the Rev. F. Sheridan, the inspector, and others; prizes are occasionally given.

25.—The Rev. F. Sheridan visits at least once a week; the inspector visits once a month; the length of each visit is usually half an hour.

“ I was present at the examination of the girls at this school, and was greatly pleased with their answering in the Christian doctrine, grammar, geography, spelling, &c.; they were attentive and neat in their attire; the number present was about seventy.

“ J. H. WILES.”

“ I fully concur with the above report.—J. F. SHERIDAN.”

26.—Johanna H. O'Callaghan.

27.—

28.—Tipperary, Ireland.

29.—28 years.

30.—June 1st., A.D. 1857.

31.—Trained.

32.—In the Dublin Model School for 5 months; certificate of competency, second class.

33.—

34.—Present salary, £50.

35.—£43 10s. 6d.

36.—£89 10s. 6d.

37.—Catechetical instruction for half an hour each day, by the teacher; also, once a week by the Sisters of Charity, for about half an hour.

FORTITUDE VALLEY.

1.—Fortitude Valley; mixed.

2.—A brick building, in good condition; not large enough.

3.—Area of schoolhouse, $38 \times 22 = 836$ superficial square feet.

4.—Area of girls' playground, $150 \times 42 = 6,300$ superficial square feet; area of boys' playground, 12,420 superficial square feet.

5.—Separate weatherboarded closets, in good condition.

6.—All one schoolroom; solid content = 7,448 cubic feet.

7.—Average number of pupils attending, 80 to 90.

8.—Amplly ventilated by two doors and three windows.

9.—This school is not yet one year established; consequently cannot give the annual average. At present on the roll:—boys, 56; girls, 49. Average attendance, 80 to 90.

10.—Maximum age:—boys, 15 years; girls, 16 years. Minimum age:—boys, 3 years; girls, 4 years.

11.—Five classes, averaging 14 pupils, varying in age from 4 to 16 years.

12.—6 hours each day; commencing at 9 a.m., terminating 4:30 p.m.; cessation of study from 12:30 to 2 o'clock, employed in recreation, &c.

13.—Half-holiday in each week. Two vacations; at Christmas two weeks, and at Easter one week.

14.—Total number appropriated to school duties in the year, 261.

15.—Cannot give a reply—this school having been only recently established.

16.—The number of children between 5 and 15 years not attending, 8.

17.—Weekly charge for each pupil, 4d. No annual charge for books. Total annual charge for each pupil, 16s. 4d.

18.—This school was not established twelve months previous to 30 September, 1858.

19.—Cannot give a reply, for above-mentioned reasons.

20.—1st and 2nd class, spelling and reading; 3rd and 4th class, reading, writing, arithmetic, grammar, and geography; 5th class, reading, writing, arithmetic, grammar, geography, dictation, and historical catechism. Time devoted to reading, 2 hours; to writing and arithmetic, 2 hours; to grammar, half an hour; remaining time to other business subjects.

21.—Books used at school:—primer, first book, second book, sequel to do., third book, Carpenter's spelling, grammar, geography. The supply of books at present inadequate to the wants of the school.

22.—No maps or instruments at present in the school; much required.

23.—Mode of correction,—corporal, moderate, and occasional. No written instructions regarding the manner of correction used in the school from any Board of Education, &c.

24.—Often visited in the year by the Very Reverend Dean Rigney. No prizes.

25.—Visited by the Very Reverend Dean Rigney. A supply of books, maps, &c., wanted in the school.

26.—Head teacher, Richard H. Cahill.

27.—Monitors,—James Hartley, Mary Ann Eaton.

28.—Birthplace of head teacher,—Dublin, Ireland; birthplace of monitors, Brisbane.

29.—Age of head teacher, 30 years; age of monitors, 15 and 16 years.

30.—Appointed to present office, September 1st, 1858.

31.—Trained as a teacher.

32.—St. Benedict's Catholic Training School. One month in Training School.

33.—Engaged in private tuition.

34.—Annual amount of salary, £52 10s.

- 35.—Exclusive of salary, £69.
 36.—Total amount of income, £121 10s.
 37.—Religious instruction in Butler's and historical catechism. Visited by the Very Reverend Dean Rigney.

GOSFORD.

- 1.—Gosford, Brisbane Water.
 2.—This school is a weatherboard building. It does not require repairs, enlargement, or improvement.
 3.—The schoolroom contains about 1,500 square feet in the area.
 4.—The land on which the school has been erected contains about 1 acre at least, enclosed by a high paling.
 5.—The condition of the water-closets is very good.
 6.—There is only one large schoolroom, which is sometimes used as a chapel, and contains about 1,440 square feet, and 17,280 cubic feet.
 7.—The average number of pupils amounts to 20 boys, and 12 girls.
 8.—Extremely good. There are 4 large glass windows, which open at the top part; and the upper half of the door is composed of glass.
 9.—The annual average number on the books is 24 males and 13 females; and the average attending the school is 20 boys and 12 girls.
 10.—The maximum age of the pupils is from 11 to 13 years, and the minimum age is from 4 to 5 years.
 11.—The number of classes is three for boys, and two for girls. Each class contains 6 or 7 for boys, and 5 for girls.
 12.—The school bell is rung every morning regularly at half-past 8 o'clock, and again at 9 o'clock, when teaching commences. At 1 o'clock the children are permitted to leave the school for dinner, or any purpose that may be desirable; at 2 o'clock the bell is rung for them to return to their studies and lessons; and at half-past 3 they are dismissed for the day.
 13.—On Saturday only there is no school. There are only two vacations in the year; one at Christmas, for one fortnight, and the other at Easter, for about ten days.
 14.—About 275 days.
 15.—I have been here since October, 1857; so I cannot say.
 16.—I know very few, but I do not know except what I may learn from other people.
 17.—I charge and am paid quarterly. The fees which I charge for the more advanced pupil, 10s. per quarter; and for the youngest, 5s.; which is paid without the slightest murmur or grumble. No charge for books.
 18.—The annual amount of school fees received during 12 months ending 30 September, 1858, was £31. I do not receive any other support except my salary, which amounts to £61 5s., so that the total support amounts to £92 5s.
 19.—About £1 for each pupil.
 20.—1st class:—Prayer, spelling class off the book, Christian doctrine, Fleury's historical catechism, reading, writing, grammar, geography, arithmetic. 2nd class:—prayer, spelling off the book, catechism, reading, writing, arithmetic. 3rd class:—reading, spelling, and religious instruction. The time allowed for each class varies from a quarter to half an hour.
 21.—The 1st, 2nd, and 3rd books of reading lessons by the Christian Brothers, Reeve's history of the Bible, commercial arithmetic, 1st and 2nd part, school grammar, and geography—all by the Christian Brothers. I have got also Carpenter's spelling. These books are in a very fair condition, and I do not want any at present, unless I can get some that may be more useful than what I possess at present.
 22.—I have one map of The World. I have applied for more, but did not get any.
 23.—I use very little correction in this school, as I find that the children require very little. I have not received any instructions from anyone, except from the Rev. M. Woolfrey or some member of our Local Board.
 24.—There was an examination held at this school on the 23rd of December, 1849, at which the Rev. M. Woolfrey presided, assisted by Mr. Dunn and Mr. Fagan, who are members of our Local Board. The children were examined, and the Rev. M. Woolfrey distributed some valuable books as prizes. (See quarterly return for December, 1858.)
 25.—The Rev. M. Woolfrey visits the school very often, and seems perfectly satisfied as to how it is conducted.
 26.—John James Conroy.
 27.—None.
 28.—Dublin.
 29.—38 years.
 30.—In October, 1858. I was appointed to this school from Jamberoo, where I had charge of the school since January, 1851.
 31 & 32.—No, except at the Model School for eight weeks.
 33.—An attorney and solicitor of the Four Courts, Dublin.
 34.—£61 5s.
 35.—£31.
 36.—£95.
 37.—Prayers are read twice each day by the teacher. The Rev. M. Woolfrey visits the school very often. History of the Bible by Reeve, Fleury's historical catechism, Christian doctrine, poor man's catechism.

GOULBURN.

- 1.—Goulburn.
- 2.—The school is built of brick, and is in excellent condition.
- 3.—900.
- 4.—For boys, 2,660 ; and for girls, 3,600 feet.
- 5.—Substantial brick houses.
- 6.—The schoolhouse is one room, containing 18,900 cubic feet, and 900 superficial square feet.
- 7.—67.
8. 4 windows $6 \times 3\frac{1}{2}$ feet, half of each opens ; also, two folding doors.
- 9.—94 average on roll ; 44 males and 50 females ; 33 males and 34 females is the average attendance.
- 10.—Females from 2 to 15, and males from 2 to 17.
- 11.—7 classes, 14 in each. The maximum and minimum age in each class runs thus :—First class, from 12 to 17 ; second, 10 to 12 ; third, 7 to 10 ; fourth, 5 to 7 ; fifth, 3 to 5 ; sixth, 3 to 4 ; and seventh, 2 to 4. The total average age of the 94 on the roll is, males 9 and females 8.1.
- 12.— $5\frac{1}{2}$ hours ; $1\frac{1}{2}$ hour dinner and recreation ; business commences at 9 and terminates at 4 p.m.
- 13.—One general holiday in each week, Saturday. We also take the Queen's Birthday, 17th March, and 27th January. The vacations are :—At Christmas 10 days ; in June 10 days ; and at Easter 3 days, making in all 79 holidays throughout the year, including vacations.
- 14.—The number of days devoted to school duties is 234.
- 15.—8 years.
- 16.—If I gave an answer to this question I would not certify this document is correct.
- 17.—£2 12s. per annum.
- 18.—£130 school fees ; salary, £84 ; total, £214.
- 19.—About £3 per annum for each pupil.
- 20.—First class—spelling, reading, writing, grammar and geography (alternately) ; arithmetic, mensuration, and geometry, as one subject, $\frac{2}{3}$ hour for each, except the last, which subject occupies $1\frac{1}{4}$ hour ; second class—spelling, reading, writing, grammar and geography (alternately), and arithmetic, one hour each subject ; third class—spelling, reading, grammar and geography (alternately), writing and arithmetic, one hour each subject ; fourth class—spelling, reading, writing, grammar and geography (alternately), and arithmetic, one hour each subject ; fifth class—spelling, reading, writing, arithmetic, and arithmetical tables, one hour each subject ; sixth class—spelling, reading, writing on slates, arithmetical tables, one hour each subject ; seventh class—spelling, reading, and singing arithmetical tables, one hour each subject. The above are the subjects taught on Mondays, Tuesdays, Wednesdays, and Thursdays. Friday is set apart for recapitulation ; and a note made in a book for that purpose of the progress of each pupil. The last Friday at the end of three months is classification day. $1\frac{1}{4}$ hour is devoted to discipline, religious instruction, and vocal music, given simultaneously.
- 21.—First class—fourth book of reading lessons, grammar, geography, arithmetic, mensuration, and geometry ; second class—third book of reading lessons, grammar, geography, arithmetic ; third class—second book of reading lessons, grammar, geography, arithmetic ; fourth class—second book of reading lessons, grammar, geography, arithmetic ; fifth class—sequel to second book of reading lessons, arithmetic on blackboard ; sixth class—first book of reading lessons ; seventh class—tablet lessons. The stock of books is not at all sufficient ; and the few we have are in a very bad condition.
- 22.—A small map of Ireland, Australia, Palestine, and The World ; also, two 12-inch globes, and two sets of mathematical instruments.
- 23.—Generally, the children are ruled by kindness ; but when reproof fails, the culprit is kept locked in the schoolroom an hour or so after the school is dismissed.
- 24.—The pupils are examined, specially, twice each year by the Very Rev. Dean Walsh, assisted by the more intelligent of the parents. No prizes given.
- 25.—The Very Rev. Dean Walsh visits weekly, in the capacity of Chairman of the Local Board.
- 26.—H. D. Carolan.
- 27.—Mrs. Carolan, and Miss Sarah Carolan.
- 28.—H. D. Carolan, 27 ; born in County Down, Ireland.
- 29.—Mrs. Carolan, 17 ; and Miss Carolan, 14 ; both born in Dundalk, Ireland.
- 30.—1st March, 1858.
- 31.—Yes.
- 32.—In Marlboro'-street, Dublin (National Model School), $4\frac{1}{2}$ months, second class.
- 33.—
- 34.—The female and assistant are not paid.
- 35.—This question has been answered. (See No. 18.)
- 36.—This question has been answered. (See No. 18.)
- 37.—The teachers give instruction from Reeve's history of the Bible, and also from Reeve's history of the church. The Very Rev. Dean Walsh, Catholic clergyman, gives weekly instruction from the books I have already mentioned, viz. : Reeve's history of the Bible and church ; also in historical catechism by Mons. Fleury.

HARTLEY.

- 1.—Hartley.
- 2.—Schoolhouse is constructed of wood, plastered and whitewashed, and in tolerably good condition.
- 3.—375 superficial square feet.
- 4.—There is no ground specially appropriated for the purpose of recreation.
- 5.—The water-closets are composed of wood and stringy-bark; are in good preservation.
- 6.—The schoolhouse is not divided into compartments, but one end is appropriated to the males and the other end to the females.
- 7.—30.
- 8.—The ventilation is quite sufficient for the size of the house, having two windows on the same side with the door and one in the rear, all contrived so as to open.
- *9.—Average number on the books, 34, viz., 18 boys and 16 girls; average number actually attending, 29, viz., 15 boys and 14 girls.
- 10.—Boys, 17—5; girls, 14—4.
- 11.—The school is divided into three classes; the average number in first class (boys) is 6; max. and min. age, 17—14; second ditto 6; age 12—9; third ditto 3; age 8—5; first class (girls) average number 7; max. and min. age 14—12; second ditto 4; age 9—7; third ditto 3; age 6—4.
- 12.—5½; that is, from 9 in the morning till 4 in the evening, with the exception of 1½ hour which is allowed for dinner and recreation.
- 13.—There is one entire holiday in each week; the number of vacations in the year is two—one at Christmas, the other at Easter; the former continues for 3 weeks and the latter a fortnight.
- 14.—The total number of school days during 9 months, 169.†
- 15.—Cannot be determined in this particular instance, as the roll-books in previous use are not at hand.
- 16.—Cannot determine exactly; between 15 and 20.
- 17.—1s. per week; no charge for books.
- 18.—The information sought cannot be afforded for reasons previously assigned; nothing received from other sources towards the support of the school.
- 19.—The average annual total cost of the education of each pupil cannot here be obtained in the manner recommended; it may be stated however that £3 may be taken as a standard.
- 20.—The subjects of instruction given are—to first class: catechism of Christian doctrine ½ hour in the morning; reading from third or fourth book, ½ hour; spelling from Young's, ½ hour; writing ½ hour; arithmetic 1 hour (from 2 to 3 p.m.); ¾ hour lessons in English grammar, geography, or history, or writing from dictation (subjects transposed) every day. Second class: catechism of Christian doctrine, ½ hour; spelling from Carpenter's, ½ hour; reading from second book, ½ hour; writing, ½ hour; arithmetic, same time as first class, with subsequent lessons in the rudiments of English grammar and geography for ½ hour. Third class called to tablets three times in the day, and continue at each lesson for ½ hour; the remaining time is spent by third class in rehearsing for tablet exercises from first book of lessons.
- 21.—The books used by first class are third and fourth books of lessons, history of England, history of the Old and New Testaments, Murray's grammar, geography, &c.; by second class, second book of lessons, Carpenter's spelling, Murray's grammar, geography, historical catechism, &c.; by third class, first books and sequels to ditto. The books are at present sufficient for the use of the school, and in good preservation; some second books and sequels, such as are used in the National Schools in Ireland, and a dozen geography generalised are required.
- 22.—There are no prints or diagrams; there are three maps, one of Australasia, by Jones, on rollers; one of The World, on Mercator's projection, also on rollers; and a map of New South Wales and Victoria, all in good condition. There are two others at least required, a map of Europe and one of Africa.
- 23.—Slapping on the palm of the hand; no instructions of any kind in relation to the manner of enforcing discipline, but the manager frequently inquires after the manner in which the teacher inflicts chastisement.
- 24.—There are two stated examinations in the year, one at Christmas and another at Easter, conducted by the Chairman and members of the Local Board. On such occasions the prizes generally distributed are books of devotions, medals, &c., prefaced by the distributor with some appropriate exhortation to the receivers, tending to encourage perseverance and emulation.
- 25.—The school is officially visited by the Chairman or other member of the Local Board. The Chairman, who is the inspector, invariably visits the school once a week, except when his ecclesiastical duties require his presence up the country, in which case the office of inspector devolves for the time being on any of the present members of the Local Board. There is no report written in the present books but one, of which this is a copy:—

"January 10, 1859.

"I have this day examined the pupils attending this school, and I express myself highly pleased with the general answering and personal appearance of the scholars; the answering of the first class, boys and girls, in particular, was very creditable.—J. PHELAN, Chairman of the Local Board."

The

* The answers sought in question No. 9 cannot be given for the period required, as the roll-book furnishes information only from January, 1853, up to the present, during which time a period of five months elapsed, viz., from the 31st March to the 1st September, during which there was no school at all. The average above given is consequently only for nine months.

† The same observations apply to this answer as those to question No. 9.

The present teacher having been recently removed to this school is not prepared to offer any remarks on the report quoted above, and as to the state of the school he must confine himself to merely stating from personal experience that the pupils attending this school, boys and girls, shew much more intelligence and intellectual improvement than the majority of those of the same class in the schools in Sydney.

26.—John Charles O'Callaghan.

27.—None.

28.—

29.—

30.—1st April, 1858; appointed to present school 1st March, 1859.

31.—Not.

32.—

33.—Three years; previous occupation, newspaper correspondent.

34.—£52 10s., annual amount of teacher's salary.

35.—May be calculated to amount to £40 annually.

36.—About £92 10s.

37.—The religious instruction given principally embraces the principal mysteries of the Catholic faith, the ten commandments, the sacraments, &c., with lessons from the Old and New Testaments; these are given on an average once a week, by the inspector and manager, the Rev. Mr. Phelan, R. C. C., Hartley.

JAMBEROO.

1.—Jamberoo, situate in the district of Mlawarra.

2.—Constructed of wood, and at present in good repair; needs no enlargement.

3.— $5\frac{1}{2}$ superficial square feet in length, by 4 superficial square feet in breadth.

4.—4,840 square yards, which were given in with the church and attached thereto, upon which the pupils can exercise.

5.—1 water-closet, and in good repair.

6.— $3\frac{1}{2}$ cubic feet in length by $2\frac{1}{2}$ cubic feet in breadth. There is another portion of the building, appropriated to Divine service, into which the children have not hitherto gone, same length and breadth as the former.

7.—49 pupils usually attend in the school.

8.—The school contains 4 windows, each 4 feet long and 3 feet wide.

9.—The number on the roll-book is 80; average number in daily attendance, boys 25, girls 24; total, 49.

10.—7 girls from 12 to 15 years old, and the remainder from 6 to 12 years; 8 boys from 12 to 16 years, and the remainder from 7 to 12 years old.

11.—The school is divided into five classes. The first class consists of 10 pupils, whose ages vary from 12 to 15 years; the second class contains 8, who are from 9 to 12 years old; the third class contains 11, whose ages are from 7 to 9 years; the fourth class contains 11, who are from 7 to 8 years old; the fifth class contains 9, whose ages are 7 years.

12.—The school opens at 9 o'clock a.m., and closes at 4 p.m. on all days throughout the week, Saturday and Sunday excluded. The children get one hour each day for dinner and exercise, from 12 until 1 o'clock.

13.—No school on Saturdays or Sundays throughout the year. There are two vacations in the year—one the week before Easter Sunday, the other two days previous to Christmas Day; the former holds one week, and the latter nine days.

14.—241 days appropriated to school during the year, all holidays and vacations excluded.

15.—Children usually, from their first entrance to their finally leaving the school, remain 7 years.

16.—About 40 children, between the ages of 5 and 15 years in this vicinity who do not attend here.

17.—The charge for each pupil quarterly is 7s.; the charge for books I cannot tell at present; the annual charge for each pupil is £1 8s.

18.—Amount received from pupils during the year ended 30th September, 1858, £48 12s. 1d.; amount received from all sources during the above-mentioned period, £108 3s. 1d.

19.—Answered in No. 17.

20.—The first, second, third, and fourth classes are employed in writing each morning for $\frac{3}{4}$ of an hour; after that the first, second, and third are engaged in spelling for $\frac{1}{2}$ an hour, and the fourth in Christian doctrine; again they are $\frac{1}{2}$ an hour engaged in English grammar, and $\frac{1}{2}$ an hour at geography; they are then, until 12 o'clock, at arithmetic; the first, second, and third classes after dinner are engaged in reading for $\frac{1}{2}$ an hour, $\frac{1}{2}$ an hour in parsing, $\frac{1}{2}$ an hour at prayers, and $\frac{1}{2}$ an-hour at arithmetic. The other classes are attended to by a monitor during this time.

21.—There are some sequels, second books, and third and fourth books in the school; they are in good condition; a few arithmetics and Christian doctrines wanted.

22.—Two maps are hung in the school; no more required.

23.—The children are quiet in this school; if occasion require, they are corrected with a small cane on the hands.

24.—This school was visited on the 4th November, 1857, by the Venerable Archdeacon M'Encroe, who was well pleased with the school—known by his remark. I cannot tell whether there was a prize given.

- 25.—I find there was an examination in this school on the 14th June, 1858; could not tell whether there was a prize given.
- 26.—William McCarthy.
- 27.—Edward Rigny.
- 28.—Master, Galway, Ireland; pupil teacher, Jamberoo.
- 29.—24 years, and 15 years.
- 30.—1st December, 1857.
- 31.—Trained.
- 32.—At St. Benedict's Roman Catholic Model School during the months of October and November, 1857; can teach arithmetic, English grammar, mensuration, book-keeping, geography, geometry, and algebra.
- 33.—Answered in No. 32.
- 34.—Annual salary, £60.
- 35.—
- 36.—Total income, £120.
- 37.—Prayers twice a day; catechism on Sunday. Visited by the Rev. Peter Young, Roman Catholic priest, monthly.

KENT-STREET SOUTH.—(Boys.)

- 1.—Kent-street South.
- 2.—Brick and wood; condition good.
- 3.—504 square feet.
- 4.—675 square feet.
- 5.—Water-closet built of brick; condition good.
- 6.—504 square feet; 7,560 cubic feet.
- 7.—108.
- 8.—2 doors and 2 windows.
- 9.—108; 70.
- 10.—Maximum, 17; minimum, 5.
- 11.—Five classes; 21. First class, maximum, 8 years; minimum, 5 years. Second class, maximum, 12 years; minimum, 8 years. Third class, maximum, 14 years; minimum, 9 years. Fourth class, maximum, 15 years; minimum, 10 years. Fifth class, maximum, 17 years; minimum, 13 years.
- 12.—5½; hour of commencing, 9 o'clock; hour of terminating, 4 o'clock; cessation of study from half-past 12 to 2 o'clock—dinner and recreation.
- 13.—One holiday in each week, Saturday; 2 vacations each year, Christmas and Easter, 2 weeks each.
- 14.—244.
- 15.—18 months.
- 16.—The number of Catholic children in this district who do not attend school is, as far as I have been able to ascertain, about 30.
- 17.—Weekly charges, 6d., 9d., and 1s.; annual charges, £1 6s., £1 19s., and £2 12s.
- 18.—£112 0s. 8d.; house-rent and teacher's support; nothing from other sources except Government salary. Total amount, including salary, £199 10s. 8d.
- 19.—Average annual cost of each pupil, £1 16s. 11d.
- 20.—First class, from 9 to 10, lessons; 10 to 11, spelling; 11 to 12, writing on slates; 12 to 12½, catechism and prayers; 12½ to 2, dinner and recreation; 2 to 3½, lessons; 3½ to 4, catechism and prayers. Second class, 9 to 9½, writing; 9½ to 10, preparing lessons; 10 to 11, examined on lessons; 11 to 12, spelling; 12 to 12½, catechism and prayers; 12½ to 2, dinner and recreation; 2 to 3½, arithmetic and tables; 3½ to 4, catechism and prayers. Third class, 9 to 9½, writing; 9½ to 10, preparing lessons; 10 to 11, examined on lessons; 11 to 12, preparing grammar, geography, and spelling; 12 to 12½, examined on the above, catechism, and prayers; 12½ to 2, dinner and recreation; 2 to 3½, arithmetic and tables; 3½ to 4, catechism and prayers. Fourth class, 9 to 9½, writing; 9½ to 10, preparing lessons; 10 to 11, examined on lessons; 11 to 12, preparing grammar, geography, and spelling; 12 to 12½, examined on the above, catechism, and prayers; 12½ to 2, dinner and recreation; 2 to 3½, arithmetic and tables; 3½ to 4, catechism and prayers. Fifth class, 9 to 9½, studying lessons; 9½ to 10, examined on lessons, parsing; 10 to 11, preparing grammar, geography, and spelling; 11 to 12, examined on grammar, geography, and spelling; 12 to 12½, catechism and prayers; 12½ to 2, dinner and recreation; 2 to 3½, arithmetic, mensuration, and writing; 3½ to 4, catechism and prayers.
- 21.—First, second, third, and fourth class reading books, by the Christian Brothers; arithmetic, grammar, and geography, by ditto; Young's history of England, Reeve's history of the church, Carpenter's spelling, mensuration, published by the Irish National Board; Thompson's geometry and algebra, Douay Bible, historical catechism, by Fleury; Christian doctrine catechism. Condition tolerable. The number of books is inadequate to the wants of the school.
- 22.—Maps of The World, Europe, Asia, Africa, and America; condition tolerable. The maps of England, Ireland, and Scotland are needed; also, prints, diagrams, and instruments.
- 23.—Admonition, confinement, and other minor punishments, such as compelling a boy to stand for some time in a conspicuous part of the schoolroom; no instructions received on the subject.

24.—Twice, by the school inspector, the Rev. Fathers Sheehy and Ford; rewards in the shape of books have been distributed to meritorious pupils once a year.

25.—By the school inspector, Mr. Wiles; about 12 times a year; from 1 to 2 hours.

“ 8 December, 1858.

“ We have attended the examination of the children of this school, and feel much satisfaction in reporting on their general proficiency.—A. J. FORD, S. J. A. SHEEHY.”

“ I feel much pleasure in testifying to the above.—J. H. WILES.—No. present, 77.”

26.—John O'Donnell.

27.—

28.—Bunbeg, County Donegal, Ireland.

29.—25 years.

30.—September, 1857.

31.—Trained.

32.—Normal establishment, Marlborough-street, Dublin, from 11th August to 18th December, 1852 ($4\frac{1}{2}$ months); certificate of competency third class (entered as probationer.)

33.—

34.—Annual salary, £87 10s.

35.—£112 0s. 8d.

36.—£199 10s. 8d.

37.—Catechism and prayers twice a day by teacher; visited by Rev. Father Sheehy; Christian doctrine catechism, historical catechism, and Douay Bible.

KENT-STREET SOUTH.—(GIRLS.)

1.—Kent-street South.

2.—Brick and wood; condition pretty good.

3.—505 square feet.

4.—486 square feet.

5.—Materials brick; condition, good.

6.—504 square feet; 7,560 cubic feet.

7.—91.

8.—Two doors and two windows.

9.—67 females, 24 males; actual average, 45 females, and 16 males.

10.—Maximum age of females, 13 years; minimum, 3 years. Males, maximum, 7 minimum, 4 years of age.

11.—Five classes; average number in each class is 18. First class, maximum, 4 years; minimum, 3 years. Second class, maximum, 6 years; minimum, 5 years. Third class, maximum, 8 years; minimum, 6 years. Fourth class, maximum, 10 years; minimum, 8 years. Fifth class, maximum, 13 years; minimum, 11 years.

12.— $5\frac{1}{2}$ hours; commencing at 9 o'clock, terminating at 4 o'clock; cessation of study from half-past 12 to 2 o'clock for dinner and recreation.

13.—One holiday in each week, Saturday; two vacations in the year, Christmas and Easter, two weeks each vacation.

14.—244.

15.—About 18 months.

16.—The number of Catholic children in this district who do not attend is about 20.

17.—Weekly, from 4d., 6d., and 1s.; no charge for books; annual charge for each pupil, 17s. 4d.; 26s.; 52s.

18.—£50, teacher's support; nothing from other sources; total amount, £90.

19.—Average annual cost of each pupil, £1 9s. 6d.

20.—From 9 to $9\frac{1}{2}$, prayer and catechism; $9\frac{1}{2}$ to 10, alphabet and spelling; 10 to 11, reading, spelling, &c.; 11 to $11\frac{1}{2}$, grammar and spelling task; $11\frac{1}{2}$ to 12, geography, exercises, &c.; 12 to $12\frac{1}{2}$, reading and parsing exercises; $12\frac{1}{2}$ to 2, dinner and recreation; 2 to 3, arithmetic for some, writing, &c.; 3 to $3\frac{1}{4}$, writing, sewing, crochet work, &c.; $3\frac{1}{4}$ to 4, prayer and vocal singing; finish.

21.—First class, first books, by the Christian Brothers; second class, second and sequel, by ditto; third class, third books, by ditto, Carpenter's spelling book, arithmetic by Christian Brothers, Christian doctrine, geography, and grammar, by ditto; fourth class, fourth book, grammar, arithmetic and geography, by ditto, Christian doctrine, history, catechism, by Monsieur Fleury, Carpenter's spelling, &c., Reeve's history of Bible; fifth class, Christian Brothers' grammar and arithmetic, geography, and lesson book, Young's history of England, Carpenter's spelling book, historical catechism by Monsieur Fleury, and Douay Bible, Testament.

22.—There are no prints, diagrams, or instruments; the map of The World; maps of Europe, Asia, America, and Australia are needed; also, map of Ireland.

23.—Admonition, confinement, and other minor corrections, kept from play during recreation or dinner.

24.—Visited by the inspector and Rev. Messrs. Ford and Sheehy; no prizes are given.

25.—By the inspector, Mr. J. H. Wiles, 12 times, from 1 to 2 hours each time.

“ 8 December, 1858.

“ I was present at the examination of the children attending this school, and was much pleased with the general good answering of the children in their various classes.—S. J. A. SHEEHY, C. C.”

“ I feel much pleasure in agreeing with the above.—A. J. FORD.”

“ I was

"I was much pleased with the answering of the children in general, &c.—JOHN
"H. WILES."

- 26.—Ellen Glissan.
- 27.—None.
- 28.—Rathkeal, County Limerick.
- 29.—45 years.
- 30.—December, 1855.
- 31.—
- 32.—
- 33.—Taught a private school in Liverpool-street, Sydney, for nearly ten years, also in America, Quebec, New York, Detroit, as public teacher, and as private governess in Quebec.
- 34.—£40.
- 35.—£50.
- 36.—£90.
- 37.—Catechism daily by teacher, and once a week by the Sisters of the Good Shepherd, Sisters of Charity. Visited by the Rev. Father Sheehy, O. S. B. History, historical catechism, Douay Bible, Christian doctrine, catechism.

KENT-STREET NORTH, SYDNEY.—(Boys.)

- 1.—Kent-street North, Sydney.
- 2.—Stone; condition good; needs no enlargement, &c.
- 3.—728 square feet.
- 4.—1,300 square feet.
- 5.—Within the space attached to the school is a water-closet, built of stone, and in a tolerable state of repair.
- 6.—728 square feet, and 12,376 cubic feet.
- 7.—112.
- 8.—5 large windows.
- 9.—The annual average number on the books, 112; attending the school, 84.
- 10.—Maximum age, 16 years; minimum, 5 years.
- 11.—The school is divided into 5 classes; average number in each class, 23; the maximum and minimum ages are—first class, 16 to 11 years; second class, 13 to 9 years; third class, 12 to 8 years; fourth class, 10 to 7 years; fifth class, 8 to 5 years.
- 12.—5½ hours; commencing at 9 o'clock, a.m., and terminating at 4 p.m.; cessation of study, from half-past 12 to 2 o'clock, p.m., for dinner and recreation.
- 13.—One holiday in each week, Saturday; two vacations in the year—at Christmas a fortnight, and at Easter a week.
- 14.—240.
- 15.—Cannot say, being only one year in present school; and, also, many children have been absent two, three, and even four months, and return again; so that I cannot say when children have left the school.
- 16.—I will not attempt to answer this question, neither do I consider it possible for the Sydney teachers to do so.
- 17.—Weekly sum, from 6d. to 1s.; for books, nothing; total, from 26s. to 52s. per year.
- 18.—Amount of school fees, £100 8s., which is appropriated to paying rent for residence, and the remainder to the support of the teacher; other sources, none; Government salary, £87 10s.; total amount of support from all sources during the year, £187 18s.
- 19.—Average annual cost of the education of each pupil, £1 13s. 7d.
- 20.—First class, from 9 to 9·15, preparing lesson; 9·15 to 9·25, prayer; 9·25 to 9·45, reading, spelling, and explanation; 9·45 to 10·5, preparing grammar, geography, and spelling tasks; 10·5 to 10·20, the same; 10·20 to 10·35, the same; 10·35 to 10·50, reciting tasks; 10·50 to 11·5, acting as monitors; 11·5 to 11·15, the same; 11·15 to 11·30, weights and measures; 10·30 to 12, writing; noon, Angelus; 12 to 12·20, grammar and geography exercises, on alternate days; 12·20 to 12·30, prayer; 12·30 to 2, dinner and recreation; 2 to 2·20, acting as monitors; 2·20 to 3·30—Monday, algebra—Tuesday, mensuration—Wednesday, geometry—Thursday and Friday, arithmetic; 3·30 to 4, catechism and prayer. Second class, from 9 to 9·15, preparing lesson; 9·15 to 9·25, prayer; 9·25 to 9·45, preparing lessons; 9·45 to 10·5, reading, spelling, and explanation; 10·5 to 10·20, preparing grammar, geography, &c., tasks; 10·20 to 10·35, the same; 10·35 to 10·50, the same; 10·50 to 11·5, reciting tasks; 11·5 to 11·15, getting tasks; 11·15 to 11·30, weights and measures; 11·30 to 12, writing; noon, Angelus; 12 to 12·20, same as first class; 12·20 to 12·30, prayer; 12·30 to 2, dinner, &c.; 2 to 2·20, arithmetic, by teacher and monitors; 2·20 to 3·30, arithmetic; 3·30 to 4, catechism and prayer. Third class, from 9 to 9·15, preparing lesson; 9·15 to 9·25, prayer; 9·25 to 9·45, preparing lessons; 9·45 to 10·5, the same; 10·5 to 10·20, reading, spelling, and explanation; 10·20 to 10·35, preparing tasks, &c.; 10·35 to 10·50, the same; 10·50 to 11·5, the same; 11·5 to 11·15, reciting tasks; 11·15 to 11·30, multiplication, tables, &c.; 11·30 to 12, writing; noon, Angelus; 12 to 12·20, arithmetic, by monitor; 12·20 to 12·30, prayer; 12·30 to 2, dinner, &c.; 2 to 2·20, lesson, by teacher or monitor; 2·20 to 3·30, arithmetic; 3·30 to 4, catechism and prayer. Fourth class, from 9 to 9·15, preparing lesson; 9·15 to 9·25, prayer; 9·25 to 9·45, preparing lessons; 9·45 to 10·5, the same; 10·5 to 10·20, the same; 10·20 to 10·35, reading, spelling, and explanation; 10·35 to 10·50, preparing table tasks; 10·50 to 11·5, reciting tasks; 11·5 to 11·15, the same; 11·15 to 11·30, preparing lesson; 11·30 to 12, writing;

writing; noon, Angelus; 12 to 12·20, arithmetic, by monitor; 12·20 to 12·30, prayer; 12·30 to 2, dinner, &c.; 2 to 2·20, lesson, by teacher or monitor; 2·20 to 3·30, arithmetic; 3·30 to 4, catechism and prayer. Fifth class, from 9 to 9·15, spelling, &c.; 9·15 to 9·25, prayer; 9·25 to 9·45, preparing lesson; 9·45 to 10·5, lesson, by monitors; 10·5 to 10·20, the same; 10·20 to 10·35, preparing lessons; 10·35 to 10·50, the same; 10·50 to 11·5, addition tables; 11·5 to 11·15, the same; 11·15 to 11·30, preparing lesson; 11·30 to 12, writing on slates; noon, Angelus; 12 to 12·20, preparing lesson; 12·20 to 12·30, prayer; 12·30 to 2, dinner, &c.; 2 to 2·20, lesson, by teacher or monitor; 2·20 to 3·30, writing on slates; 3·30 to 4, learning prayers, &c.

21.—First class:—Young's history of England; Reeve's history of the Church; Reeve's history of Bible; Old and New Testaments; Bible; lesson book, by Christian Brothers; arithmetic, first and second parts, by ditto; English grammar, by ditto; geography, by ditto; and Carpenter's spelling-book. Second class:—All those books used by the first class, except the history of England, instead of which, the lesson book by Christian Brothers. Third class:—Lesson book, English grammar, and geography, by Christian Brothers; Carpenter's spelling book, and small arithmetic by National Board. Fourth class:—Lesson book, by Christian Brothers, and arithmetic, by National Board. Fifth class:—Lesson book and tablet lessons, by Christian Brothers.

22.—The mechanical powers; diagrams representing the seasons; eclipses; effect of refraction; comparative magnitude of the planets; altitude of the sun in Summer and Winter in the latitude of London; the planetary system; phenomena of tides; and phases of the moon. Maps—of The World (in a poor condition), Europe, Asia, Africa, and America (in good condition), Australasia, Scotland, New South Wales, and South America (in tolerable condition); maps of Ireland, England, and Australia are needed; also, a pair of globes, viz., celestial and terrestrial.

23.—System of correction employed is admonition, solitary confinement, chastisement, and, in cases of incorrigibility, expulsion.

24.—Twice a year, at Christmas and Midwinter, by the Revs. J. Keating, P. Newman, the school inspector (Mr. Wiles), and others, when prizes, such as books, pictures, or crosses are awarded to deserving pupils.

25.—By Rev. P. Newman, at least once a week, when he generally spends from half an hour to an hour in examining some of the classes, and looking after the general working of the school; and also by the inspector, at least once a month. See copy of last report:—

“ 13 December, 1858.

“ In reference to the examination of the children of this school held on to-day, I have much pleasure in being able to state that I have been very much pleased with their answering, in their respective classes, and particularly with the correctness with which they read.—P. NEWMAN, Catholic Clergyman.”

“ I assisted at the above examination of this school, and have much pleasure in saying the children acquitted themselves with great credit, and satisfaction to me and to the other gentlemen who assisted at the examination.—JOHN HENRY J. WILES.”

26.—John Ryan.

27.—None.

28.—Tipperary, Ireland.

29.—27 years.

30.—June, 1855.

31.—

32.—Taught a National School in Ireland; held a second-class certificate.

33.—Experience of four years under the National Board in Ireland; taken from school to fill such appointment.

34.—Government salary, £87 10s.

35 & 36.—School fees, £100 8s.; total amount, £187 18s.

37.—Exercises in catechism every day, by teacher. Rev. P. Newman, Catholic clergyman, visits regularly. His Grace the Archbishop, also Rev. J. Keating, and other Catholic clergymen, visit occasionally. Historical and Christian doctrine catechisms are used in the school for religious instruction.

KENT-STREET NORTH, SYDNEY.—(GIRLS.)

1.—Kent-street North.

2.—Stone; state of the building good.

3.—756 square feet.

4.—2,100 square feet.

5.—One, in a tolerable state of repair.

6.—Superficial square feet, 756; cubic feet, 12,852.

7.—See No. 9.

8.—Three large windows.

9.—Average on the books: girls, 82; boys, 27; total, 81.

10.—Maximum age of girls, 13 years, minimum, 3 years; maximum age of boys, 7 years, minimum, 3 years.

11.—Number of classes, 5; average in each class, 25. First class, maximum, 13, minimum, 10 years; second class, maximum, 11, minimum, 9 years; third class, maximum, 10, minimum, 8 years; fourth class, maximum, 9, minimum, 6 years; fifth class, maximum, 7, minimum, 3 years.

12.—5½ hours; commencing at 9 a.m. and terminating at 4 p.m.; cessation of study, from half-past 12 to 2 p.m., for dinner and recreation.

13.—One holiday in the week, Saturday; two vacations, a fortnight at Christmas, and a week at Easter.

14.—257.

15.—Can't say, as many who are left are likely to return.

16.—Can't give an accurate reply, but believes there are about 20.

17.—Weekly payments, from 3d. to 1s.; annual 13s. to 52s.; no charge for books.

18.—School fees, £40 5s. 6d.; a portion towards the paying of rent for dwelling, the remainder for the support of teacher; other sources, none; from salary, £78 15s.; total amount of support, £119 0s. 6d.

19.—The average annual cost of each child, £1 1s. 10d.

20.—First class, from 9 to 9.15, preparing lessons; 9.15 to 9.25, prayer; 9.25 to 9.45, reading, spelling, and explanation; 9.45 to 10.5, preparing grammar, geography, and spelling tasks; 10.5 to 10.20, the same; 10.20 to 10.35, the same; 10.35 to 10.50, reciting tasks, &c.; 10.50 to 11.5, acting as monitresses; 11.5 to 11.15, the same; 11.15 to 11.30, weights and measures; 11.30 to 12, writing; noon, Angelus; 12 to 12.20, grammar and geography exercises, on alternate days; 12.20 to 12.30, prayer; 12.30 to 2, recreation; 2 to 2.20, acting as monitresses; 2.20 to 3.30—Monday, arithmetic—Tuesday, needlework—Wednesday, arithmetic—Thursday, needlework—Friday, arithmetic; 3.30 to 4, catechism and prayer. Second class, from 9 to 9.15, preparing lessons; 9.15 to 9.25, prayer; 9.25 to 9.45, preparing lessons; 9.45 to 10.5, reading, spelling, and explanation; 10.5 to 10.20, preparing grammar, geography, and spelling; 10.20 to 10.35, the same; 10.35 to 10.50, the same; 10.50 to 11.5, reciting tasks; 11.5 to 11.15, learning table tasks; 11.15 to 11.30, weights and measures; 11.30 to 12, writing; noon, Angelus; 12 to 12.20, same as first class; 12.20 to 12.30, prayer; 12.30 to 2, recreation; 2 to 2.20, arithmetic, by teacher; 2.20 to 3.30, same as first class; 3.30 to 4, catechism and prayer. Third class, from 9 to 9.15, preparing lessons; 9.15 to 9.25, prayer; 9.25 to 9.45, preparing lessons; 9.45 to 10.5, preparing lessons; 10.5 to 10.20, reading, spelling, and explanation; 10.20 to 10.35, the same; 10.35 to 10.50, the same; 11.5 to 11.15, reciting tasks; 11.15 to 11.30, multiplication tables, &c.; 11.30 to 12, writing; noon, Angelus; 12 to 12.20, arithmetic, by monitress; 12.20 to 12.30, prayer; 12.30 to 2, recreation; 2 to 2.20, lessons by teacher or monitress; 2.20 to 3.30, same as first and second class; 3.30 to 4, catechism and prayer. Fourth class, from 9 to 9.15, preparing lessons; 9.15 to 9.25, prayer; 9.25 to 9.45, preparing lessons; 9.45 to 10.5, the same; 10.5 to 10.20, the same; 10.20 to 10.35, reading, spelling, and explanation; 10.35 to 10.50, preparing table tasks; 11.5 to 11.15, reading and spelling by monitress; 11.15 to 11.30, multiplication tables; 11.30 to 12, writing; noon, Angelus; 12 to 12.20; arithmetic, by monitress; 12.20 to 12.30, prayer; 12.30 to 2, recreation; 2 to 2.20, lesson, by teacher or monitress; 2.20 to 3.30, multiplication tables; 3.30 to 4, catechism and prayer. Fifth class, 9 to 9.15, spelling, under teacher; 9.15 to 9.25, prayer; 9.25 to 9.45, preparing lessons; 9.45 to 10.5, the same; 10.5 to 10.20, the same; 10.50 to 11.5, at lessons, under monitress; 11.15 to 11.30, addition tables; 11.30 to 12, writing on slates; noon, Angelus; 12.20 to 12.30, prayer; 12.30 to 2, recreation; 2 to 2.20, lesson, by teacher or monitress; 2.20 to 3.30, addition tables; 3.30 to 4, catechism and prayer.

21.—First class:—Bible, Young's history of England, Reeve's history of the church, Reeve's history of the Bible, lesson book, arithmetic, grammar and geography, Carpenter's spelling book. Second class:—Reading book, grammar and geography, arithmetic and Carpenter's spelling-book. Third class:—Lesson book, Carpenter's spelling-book and geography. Fourth class:—Lesson book. Fifth class:—Lesson book and tables. The books used by the above classes are all by the Christian Brothers. Present condition tolerable; others needed; present number in use not sufficient.

22.—A number of drawings representing animals; diagrams, none; maps—The World, Palestine and Switzerland; instruments none; present condition good. Maps of Europe, Asia, Africa, America, England, Ireland, and Australia are needed. A pair of globes are also needed.

23.—Admonition, chastisement, and, if necessary, expulsion; no written or other instructions given.

24.—Twice, by Revs. J. Keating, P. Newman, Mr. Wiles (inspector), and others, when prizes, such as books, crosses, pictures, &c., are given to deserving pupils.

25.—By the Rev. P. Newman, and school inspector, Mr. Wiles. The former visits at least once a week, when he usually remains half an hour; and the latter at least once a month, when he generally spends an hour.

“The Venerable the Archdeacon remarked to me at the Midwinter examination that “he was very much pleased with the very great improvement of the girls of the Kent-street school. I fully concur in his remarks.”—P. NEWMAN.”

26.—Mary Anne Fay.

27.—None.

28.—King's County, Ireland.

29.—Age, 28 years.

30.—October, 1857.

31.—Trained.

32.—National Model School training department, Dublin, for 6 months, possessing second-class certificate.

33.—

34.—£78 15s.

35.—Fees, £40 5s. 6d.

36.—Total, £119 0s. 6d.

37.—Catechism, once a day, by teacher; visited by the Rev. P. Newman, Catholic clergyman; historical and Christian doctrine catechisms.

WEST MAITLAND.—(Boys.)

- 1.—West Maitland.
- 2.—Chiefly of bricks; the present condition of the building is good, being nearly new, and it needs no improvement or enlargement.
- 3.—1,250.
- 4.—210 square yards. There is a large paddock adjoining.
- 5.—Brick, and they are in good condition.
- 6.—1,250 square feet and 15,000 cubic feet.
- 7.—73.
- 8.—6 large windows.
- 9.—88, the annual average on the books, and 68 the annual average attendance.
- 10.—14 and 4 years.
- 11.—Five, and the average number in each class is respectively as follows:—14 and 10, 12 and 9, 11 and 7, 10 and 6, and 6 and 4 years.
- 12.—6 hours; commencing at 9 a.m. and terminating at 4 p.m.; cessation between 1 and 2 o'clock, which time is occupied by the children in recreation and taking dinner.
- 13.—One holiday, Saturday, in each week; and two vacations in each year; they occur at Christmas and Easter, and the duration of each is 11 days.
- 14.—239 days.
- 15.—3 years.
- 16.—It would be scarcely possible to answer this question with any degree of accuracy in so populous a place as West Maitland. There are several private schools, and in each Roman Catholic children are pupils.
- 17.—1s. a week to some, and 6d. per week to others; no charge for books; and the total annual charge for each pupil is £2 8s. to a few, and £1 4s. to the remainder *who pay*.
- 18.—£86 13s. 8d., which sum was appropriated by myself; from Government, £70; total amount from all sources, £156 13s. 8d.
- 19.—£2 6s. 6d.
- 20.—From 9 to 9 $\frac{3}{4}$, preparation for lessons; 9 $\frac{3}{4}$ to 10 o'clock, prayers; a prayer before study, at which the Angelus Domini is said; 10 to 10 $\frac{1}{2}$, catechism; 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$, reading classes; 11 $\frac{1}{2}$ to 12 o'clock, writing; 12 o'clock, the Angelus Domini; 12 to 1 o'clock, spelling classes, &c.; 1 to 2 o'clock, recreation; 2 to 3 o'clock, arithmetic; 3 to 3 $\frac{3}{4}$, lessons in grammar and geography; 3 $\frac{3}{4}$ to 4 o'clock, prayers. On each day (except Monday and Thursday, when one half hour of the time devoted to reading and arithmetic is employed in teaching English history and writing to dictation) this is the course of instruction.
- 21.—The literary class book, a school grammar of the English language, first book of modern geography, the school expositor, a commercial arithmetic, Christian doctrine, historical catechism, book-keeping, geometry, and a history of the church and Bible are used in the 5th class: the third book of reading lessons, grammar, geography, arithmetic, Carpenter's spelling-book, Christian doctrine, and historical catechism are used in the 4th class: second book of reading lessons, arithmetic (part the 1st), spelling-book, and Christian doctrine are used in the 3rd class: sequel to the first book of reading lessons, arithmetical tablets, and Christian doctrine are used in the 2nd class: and the first book of reading lessons and first series of ditto in the 1st class. The present condition of the books is pretty good; the number in use is not adequate to the wants of the school.
- 22.—A map of The World on Mercator's projection; a map of Europe, Asia, Africa, and America, constructed for the use of Irish National Schools; a map of Australia; and a black-board. Their present condition is very good. A map of The World in two Hemispheres and a better map of Australia are needed.
- 23.—Moral influence, corporal punishment, and marking for the notice of the parents and patron particular cases of diligence or inattention.
- 24.—In 1857 only once, in consequence of the floods; and in 1858 once, because at Easter the children were passing through a course of religious instruction. The examinations were previously held twice a year. The prizes given by the Very Rev. Dean Lynch are books and pictures.
- 25.—The Very Rev. Dean Lynch visits the school, upon an average, every three weeks, and his stay is regulated by circumstances and the report of the teacher.
- 26.—Timothy Foley.
- 27.—No assistants.
- 28.—Mahara, Ennistymon, County Clare.
- 29.—26 years.
- 30.—October, 1855.
- 31.—Trained.
- 32.—At the Roman Catholic Model School, Sydney, for 6 weeks. Archdeacon M'Encroe holds the certificate.
- 33.—Assisted to teach the school of a relation.
- 34.—£70 per annum.
- 35.—£86 13s. 8d.
- 36.—£156 13s. 8d.

37.—Each day, as already stated, the Christian doctrine and historical catechism are taught by the teacher, and frequently by the Very Rev. Dean Lynch. Within the last twelve months several weeks have been devoted by the Dean to prepare the children for the sacraments of confirmation and the holy eucharist. The school is visited by the Very Rev. Dean Lynch, Catholic pastor. The books used are a Christian doctrine, historical catechism, containing a summary of Christian morality and sacred history, and a history of the church and Bible.

WEST MAITLAND.—(GIRLS.)

- 1.—West Maitland.
- 2.—Chiefly of bricks; present condition, good; needs no repairs.
- 3.—600 square feet; 6,000 cubic feet.
- 4.—210 square yards.
- 5.—Bricks, and in good condition.
- 6.—600 square, and 6,000 cubic feet.
- 7.—62.
- 8.—4 large windows
- 9.—73 and 62, the annual average attendance.
- 10.—14 and 4 years.
- 11.—Five; the average in each class 12; and the maximum and minimum age in each class—14 & 10, 12 & 9, 11 & 10, 10 & 6, and 6 & 4.
- 12.—6 hours; commencing at 9 a.m. and terminating at 4 p.m.; cessation between 1 and 2 o'clock, which is chiefly occupied by the children in taking dinner.
- 13.—One in each week, Saturday; two vacations each year, and they occur at Christmas and Easter.
- 14.—237 days.
- 15.—Three years.
- 16.—This question cannot be answered for so populous a town as West Maitland, and where there are so many public and private schools.
- 17.—1s. in some cases, and 6d. in other instances; no charge for books; £2 8s. for a few; £1 6s. for the remainder *who pay*.
- 18.—£75 4s. 8d., and £52 10s. from Government; total £127 14s. 8d.
- 19.—£2 1s. 2d.
- 20.—From 9 to 9 $\frac{3}{4}$ o'clock, preparation for lessons; 9 $\frac{3}{4}$ to 10 o'clock, prayer, &c.; 10 to 10 $\frac{1}{2}$ o'clock, catechism; 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$ o'clock, reading classes; 11 $\frac{1}{2}$ to 12 o'clock, writing; 12 o'clock, the Angelus Domini; 12 to 1 o'clock, spelling classes, &c.; 1 to 2 o'clock, recreation; 2 to 3 o'clock, arithmetic; 3 to 3 $\frac{3}{4}$ o'clock, lessons in grammar and geography; 3 $\frac{3}{4}$ to 4 o'clock, prayer.
- 21.—The literary class book, a school grammar of the English language, first book of modern geography, the school expositor or an introduction to the spelling, meaning, and derivation of the English language, a commercial arithmetic, Carpenter's spelling book, Christian doctrine, the historical catechism, and a history of the church and Bible, are used in the third class. The third book of reading lessons, grammar, geography, arithmetic, Carpenter's spelling book, Christian doctrine, and the historical catechism, are used in the fourth class. The second book of reading lessons, arithmetic, part of the first, and the Christian doctrine, in the third class. Sequel to the first book of reading lessons, and first series of do., in the first class. There is not an adequate supply.
- 22.—A map of The World, 6 of Colton's pictorial representations of the divisions of the land and water.
- 23.—Corporal punishment, and reports to the Very Rev. Dean Lynch.
- 24.—During 1857 and 1858; once by the Very Rev. Dean Lynch, and prizes of books and pictures are given to the most deserving children.
- 25.—Once upon an average in every three weeks by the Very Rev. Dean Lynch, and his stay in the school varies according to circumstances.
- 26.—Flora M'Intyre.
- 27.—None.
- 28.—Glasgow, Scotland.
- 29.—22 years.
- 30.—1st June, 1858.
- 31.—Yes.
- 32.—At the Catholic Model School, Sydney, for six weeks; Archdeacon M'Encroe holds Miss M'Intyre's certificate.
- 33.—Governess for three years.
- 34.—£52 10s.
- 35.—£75 4s. 8d.
- 36.—£127 14s. 8d.
- 37.—The Christian doctrine and historical catechism are taught every day by the teacher, and frequently by the Very Rev. Dean Lynch, Catholic pastor. The books used are a Christian doctrine and historical catechism, containing a summary of Christian morality and sacred history, and a history of the church and Bible.

MILLER'S FOREST.

- 1.—Miller's Forest.
- 2.—A wooden building; in tolerable repair, but not large enough for the number of pupils at present attending.
- 3.—20 feet by 14.
- 4.—1 rood.
- 5.—Water-closet built of wood, and in good repair.
- 6.—20 feet by 14, and 11 feet in height.
- 7.—In the one only room appropriated for teaching the average number of pupils usually assembled is 50.
- 8.—Ventilation provided by opening of two small windows.
- 9.—Annual average number, 50; average number attending the school, the same; consisting of 23 males, 27 females.
- 10.—Males, from 4 to 14 years; females, from 4 to 13 years.
- 11.—Into four classes; the average number in the first class is 10 pupils; in the second, 13; in the third, 14; and in the fourth class 13; the ages of the first class are from 5 to 4 years; of the second, from 8 to 6; of the third, from 11 to 8; and of the fourth, from 14 to 11 years.
- 12.—6 hours; commencing at 9 o'clock a.m. and terminating at 4 o'clock p.m.; allowing from 1 to 2 o'clock for recreation.
- 13.—Saturday in each week; and 2 vacations in the year; 10 days at Christmas, and 10 days at Easter.
- 14.—241 days appropriated to school studies during the year.
- 15.—10 years, off and on.
- 16.—None.
- 17.—From 2d. to 1s. per week; or, annually, from 8s. 8d. to £2 12s.; no charge for books.
- 18.—Annual amount of school fees received from the pupils for the year ending 30th September, 1858, £42 10s., which amount was appropriated towards the teacher's support; annual amount received from Government towards the support of the school, £52 10s.; total amount received from all sources towards the support of the school for the above-mentioned period, £95.
- 19.—Total annual average of the education of each pupil, £1 18s.
- 20.—Subjects of instruction to the first class, Christian doctrine, spelling, easy reading lessons and tables; to the second, Christian doctrine, spelling, reading, writing, and simple rules in arithmetic; to the third, Christian doctrine, spelling, reading, writing on paper, compound rules in arithmetic, English grammar, and geography; and to the fourth class, historical catechism, reading, writing, sometimes from copies and sometimes from dictation, compound rules in arithmetic, spelling, history, grammar, and geography. The time allotted to each of the above subjects is as follows:—From 9 o'clock to 9½, preparation for lessons; from 9½ to 10, prayer before study; from 10 to 10½, catechism; from 10½ to 11½, reading lessons; from 11½ to 12, writing; from 12 to 1, spelling classes, &c.; from 1 to 2, recreation; from 2 to 3, arithmetic; from 3 to 3½, lessons in grammar and geography; and from 3½ to 4 o'clock, prayer.
- 21.—First class, the first book of lessons, and sequel to it, by the Christian Brothers, and Christian doctrine, by Archbishop Polding; second class, the second book of lessons, by Christian Brothers, Christian doctrine, universal spelling book, and single arithmetic, by ditto; third class, Christian doctrine, by Archbishop Polding, Carpenter's spelling book, Reeve's history of the Bible, third book of reading lessons, English grammar, geography, and arithmetic, by Christian Brothers; fourth class, Fleury's historical catechism, Carpenter's spelling book, Reeve's history of the Bible, grammar, geography, and double arithmetic, by Christian Brothers; books in middling condition; school-books by Christian Brothers much required; number of books at present in the school is not adequate to its wants.
- 22.—1 map only—a map of The World; there is no other school apparatus; the map is in good condition; school maps, diagrams, and a renewal of desks and benches are much required.
- 23.—Reprimand and slight chastisement.
- 24.—The pupils are examined twice a year by the members of the Local Board, who distribute prizes of books, prints, and pictures, periodically.
- 25.—There is no official inspector, but the school is inspected by the resident clergyman once a month.
- 26.—Timothy O'Callaghan.
- 27.—Monitor, John Casey.
- 28.—Of Timothy O'Callaghan, Co. Clare, Ireland; of John Casey, Raymond Terrace, New South Wales.
- 29.—Age of Timothy O'Callaghan, 23 years; of John Casey, 14 years.
- 30.—Latter end of March, 1857.
- 31.—Yes.
- 32.—At the Model School, St. Benedict's, Sydney, ten weeks; certificate of competency obtained therefrom.
- 33.—
- 34.—Annual amount of salary of head teacher, £52 10s.
- 35.—School fees, £42 10s.
- 36.—£95.
- 37.—Religious instruction in connection with the Catholic religion; once a day; by the teacher; the school is visited by the Rev. E. J. Luckie, resident clergyman of the Catholic Church; the Christian doctrine, by Archbishop Polding, Fleury's historical catechism, and Reeve's history of the Bible.

MORPETH.

- 1.—Morpeth.
- 2.—All wood. The walls are constructed of rough slabs, and are for the most part in a weathered and disjointed condition, and therefore require plastering and whitewashing both within and without.
- 3.—640 square feet.
- 4.—2,250 square yards.
- 5.—They are built of wood, are 12 feet high, have a double inclined roof, and are in good condition.
- 6.—No separate rooms.
- 8.—Not any ventilation specially provided for.
- 9.—40 boys and 43 girls; and 28 boys and 29 girls.
- 10.—14 and 5 years; and 15 and 4 years respectively.
- 11.—Four; the average number in each is 8, 22, 15, and 12; and the maximum and minimum age in each are 15 and 10, 14 and 7, 10 and 8, and 9 and 4 years respectively.
- 12.—5; school duties begin at 9 a.m. and end at 4 p.m.; the children are dismissed at noon for two hours, during which they eat their pieces or dinners, and sport themselves round the hills.
- 13.—One holiday, no half-holidays; a vacation at Christmas for a fortnight, and one at Easter for a week.
- 14.—240.
- 15.—About 5 years.
- 16.—Probably about 200.
- 17.—Average weekly charge, 6d. per week; no charge for books; total annual charge for each, £1 6s. per annum.
- 18.—£50, which was appropriated to the teacher's wants; Government salary, £78 15s.; total support, £128 15s.
- 19.—£2 5s. 2d.
- 20.—The first class is instructed each day in the Catholic catechism, in reading, in writing, in grammatical exercises, comprising orthography, etymology, and syntactical parsing, in geography, and in arithmetic; the time given by this class to each of the foregoing subjects is $\frac{1}{2}$ hour, $\frac{1}{2}$ hour, $\frac{1}{2}$ hour, $1\frac{1}{2}$ hour, $\frac{1}{2}$ hour, and $1\frac{1}{2}$ hour respectively. The course of instruction to the second class is almost the same as the foregoing. The third class spends $\frac{1}{2}$ hour at catechism, $\frac{3}{4}$ hour at writing, and the rest of the school day in preparing spelling and reading lessons, and reciting them. The fourth class gets four A B C and spelling lessons, which occupy twenty minutes each.
- 21.—Third and fourth books of reading lessons, grammar, geography, and arithmetic in the first class; second book of reading lessons, grammar, geography, and arithmetic in the second class; sequel to the first book of reading lessons in the third class; and first book of reading lessons in the fourth class. Historical works are needed. The number of second class reading books are not adequate; the rest are. All the books are in good condition, except the second book of reading lessons.
- 22.—Map of The World, map of Asia, map of Africa, and a map of Palestine; all decent. A good map of Australia and a map of Europe are needed, as also some contrivances to illustrate the vicissitudes of the seasons, &c.
- 23.—Detention in the school after hours is the general mode of punishing delinquents; no instructions received on this head.
- 24.—Once a year by the priest; no prizes given.
- 25.—The priest examines the school once a year, and spends two hours in doing so.
- 26.—Thomas Donnelly.
- 27.—None.
- 28.—Ireland.
- 29.—26 years.
- 30.—1st March, 1856.
- 31.—Trained.
- 32.—At the Catholic Model School, Sydney; spent a month there, and obtained a first-rate certificate of competency.
- 34.—£78 15s.
- 35.—£50.
- 36.—£128 15s.
- 37.—The children are instructed every morning by the teacher in the Catholic religion; the books used for that purpose are the Christian doctrine and the historical catechism.

MUDGEES.

- 1.—Mudgee.
- 2.—Chiefly of bark, secured to wooden frame, and lined with calico; a better building is much required, and will be erected as soon as possible.
- 3.—658 feet.
- 4.—13,200 feet.
- 5.—In good state and repair.
- 6.—There is but one room, measuring 658 feet.
- 7.—24.
- 8.—Natural openings through sheets of bark on the roof, and made openings through calico on the sides of the building.

- 9.—On the books, girls 18, boys 19; attending, girls 13, boys 11.
- 10.—14 and 3 years.
- 11.—Three classes, average number 12; 1st class, 8 and 13 years, 2nd class, 5 and 14 years, 3rd class, 3 and 6 years.
- 12.—7 hours each day; commencing at 9 o'clock a.m. and ending at 4 p.m.; cessation from study from half-past 12 to 2 p.m., which time is allowed for dinner and recreation.
- 13.—One and a half days each week; vacations at Christmas and Easter, at Christmas 14 days, at Easter 8 days; for certain feasts throughout the year, 8 days.
- 14.—258 days.
- 15.—The names of a large majority of the pupils are on the books.
- 16.—Cannot ascertain without considerable difficulty.
- 17.—Annual charge to each pupil, £1 14s. 3d.; no charge for books.
- 18.—From pupils, £43 18s. 7d., appropriated to the use and benefit of the teachers; from Government, £52 10s.; total, £96 8s. 7d.
- 19.—£4 4s. 0½d.
- 20.—Instructions to 3rd class in alphabet, 1 hour; spelling, ½ hour; multiplication tables, ½ hour; catechism and prayers, ¼ hour. Instructions to 2nd class, spelling, ¼ hour; catechism, ¼ hour; reading, 1 hour; grammar, ¼ hour; geography, ¼ hour; simple rules in arithmetic, ½ hour; tables, ¼ hour. Instructions to 1st class, catechism, ¼ hour; spelling, ¼ hour; reading, ½ hour; grammar, ¼ hour; geography, ¼ hour; compound rules in arithmetic, ½ hour; ciphering, 1 hour; and on Thursdays and Fridays, instructions during one hour each day to 1st and 2nd classes on the maps; ½ hour each day devoted to writing; and one hour each day employed by girls in learning to sew, &c.
- 21.—1st book of lessons, used in 3rd class; 2nd and 3rd books of lessons, grammars, geographies, spelling books, arithmetics, used in 2nd class; 4th book of reading lessons, grammars, geographies, spelling books, arithmetics, and Reeve's history of the Bible, used in the 1st class; a supply of each of the above books is much needed.
- 22.—Maps of The World, Europe, Asia, Africa, America, England, Ireland, Scotland.
- 23.—Moderate corporal punishment and confinement during recreation time; general instructions of the Denominational Board.
- 24.—General examination once a year, partial examination at indetermined periods; no prizes distributed.
- 25.—By Chairman of the Local Board.
- 26.—James Moloney.
- 27.—Catherine Moloney.
- 28.—County Limerick, Ireland.
- 29.—Teacher, 38 years; assistant, 22 years.
- 30.—1st of May, 1858.
- 31.—Trained as teachers.
- 32.—At Model School, Sydney; certificate of competency given to the Denominational Board. Assistant teacher's certificate of competency from National Board of Education, Ireland.
- 34.—Annual amount of teacher's salary, £52 10s.; assistant teacher receives no salary.
- 35.—Amount of fees from pupils, £43 18s. 7d.
- 36.—Total income, £96 8s. 1d.
- 37.—Instruction on the dogmas and precepts of revealed religion, taught by the Catholic Church, every day by the teachers; occasionally during week days by the Roman Catholic pastor of Mudgee; on Sundays, by the Roman Catholic pastor and teachers; the abridgment of Christian doctrine approved of by His Grace the Archbishop of Sydney.

MENANGLE.

- 1.—Menangle.
- 2.—Entirely of wood; it is large enough, and needs neither repairs nor improvement.
- 3.—660.
- 4.—5,760 square yards.
- 5.—Built of wood, and are in good condition.
- 6.—6,600 cubic feet.
- 7.—56.
- 8.—4 large windows, 2 doors.
- 9.—40 males; 41 females.
- 10.—14 and 4 of each sex.
- 11.—Four; the three lowest of these are sub-divided into 6 divisions; there are about 14 or 15 in each class; their ages are—first class, 8 to 4; second class, 9 to 6; third class, 14 to 6; fourth class, 14 to 8.
- 12.—6; school begins at 9 a.m. and ends at 4 p.m.; dinner and playground 1 to 2.
- 13.—The whole of Saturday in each week; 2 vacations of 1 and 2 weeks respectively, at Easter and Christmas.
- 14.—About 240.
- 15.—About 6 years; but the attendance is very much interrupted, this being a new agricultural district.
- 16.—About 20.
- 17.—7s. 6d. per quarter for each, with the exception of 6, who are as low as 5s. the annual charge for books, &c., &c., about 5s.; about 35s.

18.—£78 10s.; to the use of the teachers; annual salary from Board, £70; total £148 10s.

19.—Average annual total cost of the education of each pupil, £1 16s. 7½d.

20.—9 to 10, third and fourth classes write; first and second classes spell and read. 10 to 10·40, second, third, and fourth classes spell and read, &c. 10·40 to 11, first class spell; higher classes prepare grammar or geography. 11 to 11·30, grammar and geography alternate days. 11·30 to 12 tables, &c., and other tasks. 12 to 1, arithmetic; first and second classes spell, &c. 1 to 2, dinner and playground. 2 to 2·40, needle and fancy work, with arithmetic; higher classes, second class write. 2·40 to 3, higher classes get lessons; junior classes spell and read. 3 to 3·40, higher classes spell and read, &c., &c. 3·40 to 4, religious instruction.

21.—Arithmetics, Christian Brothers and National Board; English grammar, Christian Brothers and National Board; spellings, Carpenter's, Mavor's; geography, National Board and Christian Brothers; reading books, Christian Brothers, for fourth class. Third class—same as fourth, save reading books, which are National Board. Second class—Christian Brothers and Board reading books; spellings, Mavor's, &c. First class—Christian Brothers, National Board, Moore's, &c. They are in fair condition; we require more.

22.—Tablets by Christian Brothers; 1 map of The World, Mercator's; maps of Europe, Asia, and America, &c., and a blackboard are needed.

23.—That recommended by the Irish National Board of Education—kindness combined with firmness.

24.—About 12 times yearly; by the Rev. J. P. Roche, and occasionally by other clergymen; no prizes given, except by the teacher, and these, religious books and cash; the former about 8 times, and the latter 6, during the last 22 months.

25.—By none, save those mentioned in last paragraph; each visit occupied about an hour. The following copies of reports from Rev. James Martin and Rev. J. P. Roche:—

“ January 11, 1858.

“ Visited the school at Menangle. The children were examined in the various branches, and they appear to be making great proficiency.—J. MARTIN.”

“ I visited this school, and examined the children in their studies, and am glad to say they are getting on well.—J. P. ROCHE.”

“ March 16, 1858.

“ The visits of the Rev. Mr. Roche have been so regular he did not think it necessary to add other reports, although he frequently expressed himself pleased with the answering of the children.—DENNIS KELLY, Teacher.”

26.—Dennis Kelly.

27.—Mary Anne Kelly.

28.—The former, Limerick; the latter, Cork.

29.—33 and 23 years respectively.

30.—D. Kelly in May, 1853; Mary Anne in July, 1854.

31.—Trained.

32.—At the Normal Establishment, Dublin, in 1844; for 6 months; third division, first, or highest class.

33.—No other occupation before that of teacher.

34.—£70 per annum.

35.—About £80 per annum.

36.—About £150.

37.—The Christian doctrine and historical catechisms are taught on the evenings of every school day by the teachers; the clergyman who visits is a Roman Catholic.

EAST MAITLAND.

1.—East Maitland.

2.—Wood; in good condition; at present no enlargement or other improvement required.

3.—Schoolroom, 576; needleroom, 270.

4.—2,420 square yards.

5.—Of wood; one closet with two apartments, two sittings in each; fair condition.

6.—Schoolroom, 575 superficial, and 5,760 cubic, feet; needleroom, 270 superficial, and 2,655 cubic, feet.

7.—Schoolroom—morning 56, afternoon 32; girls' needleroom—afternoon 24.

8.—In the schoolroom the Gothic heads of six windows fall down, which give ample ventilation; needleroom, four windows.

9.—For the year ending 30th September, 1858, annual average on the books, 44 boys, 40 girls; annual average attendance, 32 boys, 24 girls.

10.—Males and females, from 14 to 4; one only over that, a boy, 16.

11.—Five classes; average number, 11; maximum and minimum age in 1st class, 14 and 10; 2nd class, 16 and 8; 3rd class, 9 and 6; 4th class, 8 and 5; and infant class, 6 and 4.

12.—5½ hours; commencing at 9 a.m. and terminating at 4·15 p.m.; cessation from study, 1¼ hours, viz., from 12·15 to 2 p.m.; interval employed in dinner and recreation.

13.—Every Saturday is a holiday; Christmas, 14; holidays of obligation of the Catholic Church, 4—Whit Monday, 26th January, 17th March, and 24th May; also, Easter, 3 days.

14.

- 14.—About 240 days.
- 15.—About 3 years.
- 16.—To this question no accurate reply can be given.
- 17.—Weekly, 4d. to 6d. ; quarterly, 5s. to 6s. 6d. ; many of the children are paupers ; at present no charge for books in the school.
- 18.—£40 13s. ; to the support of the teacher and family ; none from any other source ; from all sources, £128 3s.
- 19.—Annual average cost, including Government salary, on the books, £1 10s. 6½d. ; average attendance, £2 5s. 9½d.
- 20.—School opens at 9 o'clock, with the prayer "Come, Holy Ghost." Monday, Senior classes—to 9½, historical catechism or Christian doctrine ; to 9¾, mental arithmetic ; to 10¼, writing ; to 11¼, reading and spelling ; to 11¾, grammar ; to 12¼, arithmetic : Junior classes—from 9¾ to 10, Christian doctrine ; to 11½, preparing lessons ; to 12, reading and spelling ; to 12¼, infant class. Junior classes—From 2 p.m. to 2½, writing and figure copies ; to 3½, reading and spelling ; needlework, (girls) 1 hour ; from 3 to 3¼, infant class. Tuesday, Morning—Senior classes—to 9¾, historical catechism or Christian doctrine ; to 10¼, writing ; to 11, reading and spelling ; to 11¾, dictation ; to 12¼, arithmetic. Junior classes—from 9¾ to 10, Christian doctrine ; to 11½, preparing lessons ; to 12, reading and spelling ; to 12¼, infant class. Afternoon—Senior classes—from 2 to 2½, exercises blackboard ; to 4, arithmetic and writing sums in sum books with book-keeping ; needlework, (girls) two hours ; preparing lessons for next day, to be learned at home, from 4 to 4¼. Junior classes—from 2 to 2½, writing and figure copies ; to 3½, tables, mental arithmetic ; needlework (girls) 1 hour. Wednesday, Morning—Senior classes—to 9¾, mental arithmetic, to 10¼, writing ; to 11, reading and spelling ; to 11½, grammar ; to 12, geography ; to 12¼, arithmetic. Junior classes—from 9¾ to 10, Christian doctrine ; to 11½, preparing lessons ; to 12, reading and spelling ; to 12¼, infant class. Afternoon—Senior classes—from 2 to 3, geography ; to 4, religious instruction ; needlework (girls), 1 hour ; preparing lessons for next day, to be learned at home, from 4 to 4¼. Junior classes—from 2 to 3, writing and figure copies ; to 4, religious instruction. Thursday, Morning—Senior classes—to 9¾, historical catechism or Christian doctrine ; to 10¼, writing ; to 11¼, reading and spelling ; to 12, dictation ; to 12¼ arithmetic. Junior classes—from 9¾ to 10, Christian doctrine ; to 11½, preparing lessons ; to 12, reading and spelling ; to 12¼, infant class. Afternoon—Senior classes—from 2 to 2½, exercises blackboard ; to 4, arithmetic and writing sums in sum books, with book-keeping ; needlework (girls), 1½ hours ; preparing lessons for next day, to be learned at home, from 4 to 4¼. Junior classes—from 2 to 2½, writing and figure copies ; to 3½, reading and spelling ; needlework (girls), 1 hour ; from 3 to 3¼, infant class. Friday, Morning—Senior classes—to 9¾, mental arithmetic ; to 10¼, writing ; to 11, reading and spelling ; to 11½, grammar ; to 12¼, geography. Junior classes—from 9¾ to 10, Christian doctrine ; to 11½, preparing lessons ; to 12, reading and spelling ; to 12¼, infant class. Afternoon—Senior classes—from 2 to 2½, exercises blackboard ; to 4, arithmetic and writing sums in sum books, and book-keeping ; needlework (girls), 1½ hours ; preparing lessons for next day, to be learned at home, from 4 to 4¼. Junior classes—from 2 to 2½, writing and figure copies ; to 3½, tables and mental arithmetic ; needlework (girls), 1 hour. At noon, each day, the Angelus. School dismissed with prayer at 4¼ p.m.
- 21.—Christian Brothers' literary class book, third book of reading lessons, school expositor, or an introduction to the spelling, meaning, and derivation of the English language, school grammar, first book of modern geography, and commercial arithmetic ; also, Reeve's history of the Bible, first book of arithmetic for the use of National schools, historical catechism, and Christian doctrine, are used in the 1st class. In the 2nd class—Christian Brothers' second book of reading lessons, grammar, and geography, with the first book of arithmetic for the use of National schools, Carpenter's spelling assistant, and Christian doctrine. In the third class,—sequel to the 1st book of reading lessons (Christian Brothers), and Christian doctrine. Fourth class :—Christian Brothers' first book of reading lessons, and Christian doctrine. Infant class :—Christian Brothers' tablets, and Christian doctrine. Tolerable condition, with exception of the junior class books, which, from constant use, are not in good condition. Other kinds are desirable—not adequate.
- 22.—A map of The World (Johnston's) on Mercator's projection ; of Europe and America (Arrowsmith's), for the use of National schools, Ireland ; of Palestine (Knight's) in the time of Our Saviour ; and a blackboard ; all in good condition. Chambers' small Atlas maps, pasted on boards, viz. :—of Europe, Asia, Africa, North and South America, and Palestine ; with lithographed maps of the British Isles and Palestine, published in Sydney. Not in good condition. Maps of Asia, Africa, and Australia are required.
- 23.—Drill, moral influence, detention after school hours, and corporal punishment. Copy from the supplementary regulations issued by the Denominational School Board, 18th October, 1848. Rule 8—"Corporal punishment must be avoided."
- 24.—Once, at Christmas, by the Local Board, at which time prizes in the shape of books, pictures, &c., are awarded.
- 25.—By the Rev. John Kenny, from 15 to 30 minutes ; (*vide* Educational Commissioners' Report of the school.)
- 26.—Thomas Ashton.
- 27.—Emily M. Ashton, schoolmistress ; Thomas H. Ashton, jun., monitor.
- 28 & 29.—Thomas Ashton, city of Dublin, 42 ; Emily M. Ashton, Sydney, 36 ; Thomas H. Ashton, jun., 14.
- 30.—19th October, 1847.

- 31.—Not trained.
- 32.—
- 33.—By instructing children in catechism. Clerk.
- 34.—£128 3s.
- 35.—£40 13s.
- 36.—£128 3s.
- 37.—Christian doctrine and Scriptural history are taught daily by the teacher, and often by the Rev. John Kenny. By the Catholic pastor of East Maitland. Reeve's history of the Bible, historical catechism, and Christian doctrine.

PENRITH.

- 1.—Penrith.
- 2.—Of wood; requires improvement.
- 3.—900.
- 4.—About half an acre.
- 5.—There are separate water-closets, in good order.
- 6.—One room, (see query No. 3.)
- 7.—An average of about 65 daily, during the year.
- 8.—Well ventilated by doors and windows.
- 9.—Average, on the books, 100; the males and females pretty nearly divided.
- 10.—Maximum 15 years—minimum 5 years.
- 11.—Number of classes, eight. The number in each class varies, some classes number 12 and some much less.
- 12.—The hour of commencing studies, 9 a.m. The hour of terminating studies, 4½ p.m. One hour and a half is allowed for dinner and recreation, commencing at 12 a.m.
- 13.—One holiday—Saturday. A fortnight's vacation at Christmas, and one week's vacation at Easter.
- 14.—240 days devoted to studies.
- 15.—Uncertain—beyond calculation.
- 16.—Cannot say, but believe that there are not many.
- 17.—Weekly charge from 1s. to 6d.; no charge for books.
- 18.—Fees from the pupils, £62; from Government, £78 15s.; total, £140 15s.
- 19.—Average annual cost of each pupil, £2 3s.
- 20.—In English, spelling, reading, writing, arithmetic, grammar, geography, sacred and profane history, and book-keeping. The first four classes are taught every day, the others, alternately for an hour, each day.
- 21.—The series of books used in the schools conducted by the Christian Brothers; the supply is very inadequate.
- 22.—Maps of the World, Africa, America, and Palestine.
- 23.—Scarcely any corporal punishment resorted to.
- 24.—Frequent; books, prints, &c.
- 25.—Favorable reports entered in the roll-book. Visited by the Chairman of the Board very frequently.
- 26.—Luke McGuinn.
- 27.—Susan McGuinn; James Carroll, monitor.
- 28.—Ireland.
- 29.—Luke McGuinn, 37 years; Mrs. McGuinn, 28; James Carroll, 14.
- 30.—1856.
- 31.—Not formally trained.
- 32.—
- 33.—Ten years teaching in London, previous to 1856.
- 34.—£78 15s. Monitor not paid.
- 35.—£62.
- 36.—£140 15s.
- 37.—In catechism, Reeve's history of the Old and New Testament, the Douay Bible, Fleury's historical catechism. Rev. Michael Brennan, Roman Catholic. Instruction often given.

PROSPECT.

- 1.—Prospect.
- 2.—The church serves for the purpose of a school; is in good repair; constructed chiefly of brick; needs no improvement.
- 3.—Number of square feet contained in the school, 900.
- 4.—Ground adjoining the school for the use of the pupils, 222 square yards 2 feet.
- 5.—No water-closets.
- 6.—School contains 900 square feet, 10,800 cubic feet.
- 7.—Average annual number of pupils who attend school, 28.
- 8.—The school is ventilated by eight windows.
- 9.—Annual average number on the roll—20 boys, 16 girls; total, 36. Average number attending school—15 boys, 13 girls; total, 28.
- 10.—Age of pupils.—Males—maximum, 12; minimum, 5. Females—maximum, 9; minimum, 4.

- 11.—Four classes. Number in tablet, 7; age—maximum, 6; minimum, 4. Number in first class, 6; age—maximum, 8; minimum, 6. Number in second class, 12; age—maximum, 9; minimum, 6. Number in third class, 11; age—maximum, 12; minimum, 9.
- 12.—Pupils attend school 6 hours each day. School duties commence at 9 o'clock in the morning and terminate at 4 o'clock in the afternoon. The only cessation from study is from 1 to 2 o'clock, when the pupils go to dinner.
- 13.—The only holiday is Saturday. Number of vacations two—14 days at Christmas and 7 days at Easter.
- 14.—Number of school days appropriated to study during the year ending 30th September, 1858—250.
- 15.—Average period which pupils attend school, 3 years.
- 16.—Number of children who do not attend the school, 5.
- 17.—Average annual charge for each pupil, 22s.
- 18.—School fees received during the year ending the 30th September, 1858, £28, appropriated to the teacher's use; amount of salary, £52 10s.; total amount of support, £80 10s.
- 19.—Average annual cost of the education of each pupil, £2 17s. 6d.
- 20.—From 9 to 9.45, preparation for lessons; from 9.45 to 10, prayer; from 10 to 10.30, catechism; from 10.30 to 11.30, reading; from 11.30 to 12, writing; from 12 to 1, spelling lessons; from 1 to 2, recreation; from 2 to 3, arithmetic; from 3 to 3.45, lessons in geography and grammar; 3.45 to 4, prayer.
- 21.—First, second, and third book of reading lessons, grammar, geography, spelling, historical catechism and Christian doctrine. The books are in good condition; the number at present is adequate to the wants of the school.
- 22.—One map of The World; a map of Europe, Asia, Africa, and America is required.
- 23.—Corporal punishment is avoided, no written instructions on the subject of correction.
- 24.—Once a year by the Chairman of the Local Board; no prizes given.
- 25.—By the Chairman of the Local Board; one hour; school visited quarterly.
- 26.—William Langton.
- 27.—
- 28.—Kilkenny City, Ireland.
- 29.—23 years.
- 30.—1 January, 1856.
- 31.—Trained as a teacher.
- 32.—At St. Mary's National School, Kilkenny, and subsequently at the Roman Catholic Model School, Sydney, for a period of six months; second class certificate.
- 33.—
- 34.—Annual salary, £52 10s.
- 35.—Amount of school fees for the year ending 30th September, 1858, £28.
- 36.—Total income, £80 10s.
- 37.—Instruction in Christian doctrine and historical catechism every day by the teacher.

PYRMONT.—(MIXED.)

- 1.—Pyrmont.
- 2.—Stone; repairs good; rented by the teacher. A new schoolhouse much needed.
- 3.—224 square feet.
- 4.—127 square yards, or 1,143 square feet.
- 5.—In good repair.
- 6.—Only one apartment—124 square feet, 2,016 cubic feet.
- 7.—About 45.
- 8.—One large window.
- 9.—For 1858:—Annual average on the roll, 18 boys, 23 girls; daily annual average, 16 boys, 21 girls.
- 10.—From 3 to 15 in both sexes.
- 11.—Five classes; 7; First, and sequel to first, from 3 to 8 years; second, and Mavor's spelling book, from 8 to 12; third, from 12 to 15.
- 12.—6 hours, 9 till 4; recreation, 12 till 2.
- 13.—One, Saturday; two weeks at Christmas, two at Easter.
- 14.—132 days.
- 15.—Some a week, some a month, some 3, 4, 5, 9, or 12 months, and longer.
- 16.—About 12.
- 17.—Some 3d., 6d., and 9d. per week, and some nil. None supplied for sale, one of the greatest deficiencies. £1 16s., £1 4s., and 12s.
- 18.—£39 19s. 9d. Support of teacher, nil. £92 9s. 9d.
- 19.—£2 10s. 3d.
- 20.—Prayers and the Christian doctrine, 9 till 10; reading and spelling, 10 till 11½; writing, 11½ till 12; recreation, 12 till 2; arithmetic, 2 till 2½; reading, spelling, 2½ till 3½; geography and mental arithmetic, 3½ to 4.
- 21.—Tegg's first book, sequel to first, second book, Mavor's spelling book, third book, geographies, and arithmetics, all very bad. Yes; some grammars and first books badly wanted, as also some fourth reading books. No.
- 22.—Twenty-two reading and spelling tablets, one map of The World, three desks, four forms, other maps, and a teacher's desk, and more desks and forms for the accommodation of the children.

- 23.—Punishment on the hands, detention from recreation and kneeling, and standing for a certain period. None whatever.
- 24.—By none. No prizes or rewards.
- 25.—John H. Wiles, Esq., inspector, sometimes weekly and sometimes monthly; 15 minutes; pupils advancing.
- 26.—Rosabella Searson.
- 27.—Nil.
- 28.—Kent, England.
- 29.—25 years.
- 30.—1 September, 1858.
- 31.—Not.
- 32.—Nil.
- 33.—Five years conducting a National School in Ireland; going to a Model School.
- 34.—£52 10s. per annum; no other teacher.
- 35.—£39 19s. 9d. per annum for the year 1858, as may be seen at query 18; dwelling rent very high, £1 per week.
- 36.—£92 9s. 9d. for the year 1858. (See query 18.)
- 37.—The Christian doctrine once a day, by the teacher. Yes, by the Rev. Mr. Corish, Roman Catholic priest; the Christian doctrine only.

PARRAMATTA-STREET.—(Boys.)

- 1.—Parramatta-street, Sydney.
- 2.—Stone; condition tolerable; needs repairs, but no enlargement.
- 3.—1,768 square feet.
- 4.—600 square yards.
- 5.—Water-closet constructed of wood, and in good condition.
- 6.—1,768 square feet; 22,984 cubic feet; only 1 room.
- 7.—132.
- 8.—2 doors and 10 windows, all made to open.
- 9.—171; 132.
- 10.—Maximum age, 16 years; minimum, 5 years.
- 11.—The school is divided into five classes; average number in each class, 26; the maximum and minimum ages are—first class, 16 to 11; second class, 13 to 9; third class, 12 to 9; fourth class, 10 to 7; fifth class, 8 to 5.
- 12.—6 hours; school opens at 9 a.m. and closes at 4 p.m.; dinner and recreation from 1 to 2 o'clock.
- 13.—1 holiday in each week, Saturday; two vacations annually, viz.:—at Christmas and Easter, duration of the former a fortnight, of the latter a week.
- 14.—242.
- 15.—About 18 months.
- 16.—As far as I can discover, I imagine the number of Catholic children who do not attend to be about 97.
- 17.—Weekly charges, 6d., 9d., and 1s.; annual charges £1 6s., £1 19s., and £2 12s.; no charge for books.
- 18.—Amount of school fees, £111 8s. 10d., which is appropriated to paying rent of residence, and to the support of teacher; Government salary, £122 10s.; total amount of support, £233 18s. 10d.
- 19.—Average annual cost of each pupil, £1 15s. 10d.
- 20.—From 9 to 9·45, first class, geometry or Latin grammar; second, third, and fourth classes, preparing lessons; fifth class, tablets. From 9·45 to 10, prayer. From 10 to 10·30, first, second, and third classes, spelling; fourth and fifth classes, lessons. From 10·30 to 11·30, first class, arithmetic and mensuration; second class, preparing grammar or geography; third and fourth classes, reading; fifth class, spelling. From 11·30 to 11·40, roll. From 11·40 to 12, catechism and Angelus. From 12 to 12·20, first class, preparing lessons; second class, reading; third and fourth classes, lessons on map; fifth class, tables. From 12·20 to 12·45, first class, geography or grammar; second and third classes, spelling on slates; fourth class, spelling; fifth class, tablets. From 12·45 to 1, singing. From 1 to 2, dinner. From 2 to 2·45, first, second, and third classes, writing; fourth and fifth classes, writing on slates. From 2·45 to 3·15, first class, mental arithmetic; second class, mental arithmetic, also on slates; third and fourth classes, arithmetic; fifth class, tables. From 3·15 to 3·45, first class, history; second and third classes, reading; fourth class, tables; fifth class, tablets. From 3·45 to 4, singing and prayer.
- 21.—First class, Young's history of England; Reeve's history of the church; Reeve's history of the Bible; Old and New Testaments; third and fourth class reading books, by Christian Brothers; mensuration, by ditto; Chamber's geometry; Bonycastle's algebra; Eton Latin grammar; arithmetic, first and second parts, by Christian Brothers; English grammar and Sullivan's geography, by National Board; Carpenter's spelling. Second class, third class reading book, by Christian Brothers; Carpenter's spelling; Murray's grammar; National Board geography; arithmetic, first part, by Christian Brothers; Australian geography, by Sir T. Mitchell. Third class, second reading book, by Christian Brothers; Mavor's spelling; arithmetic, by National Board; first book of modern geography. Fourth class, first reading book and sequel, by Christian Brothers; Mavor's spelling. Fifth class, first book and tablet lessons, by Christian Brothers, condition tolerable; the number quite inadequate to the wants of the school.

22.—Mechanical powers, planetary system, maps of The World, Europe, Asia, Africa, America, Australia, Palestine, Ireland, England, and Scotland—in poor condition; Globes much needed.

23.—System of correction—admonition, confinement, and other minor punishments; in some cases corporal punishment is resorted to; incorrigibleness is visited with expulsion; no instructions received on this subject.

24.—Twice a year, at Christmas and Midwinter, by the Rev. Fathers Corish, O'Connell, Sheehy, Sheridan, Mr. Wiles the inspector, Mr. Makinson, and others. Prizes in the shape of books, medals, &c., are awarded to the most deserving pupils on each occasion.

25.—By the Rev. M. A. Corish, weekly, for half an hour, and by the school inspector at least once a fortnight.

“ 8 December, 1857.

“ Having been present at the examination in Mr. Dwyer's school, I feel happy in being able to certify that the pupils in attendance answered in such a manner in their several classes as to give entire satisfaction to the gentlemen present, viz. :—Dean O'Connell, Rev. S. J. A. Sheehy, Rev. — Sheridan, &c., and to reflect great credit on this very efficient teacher.—M. A. CORISH.”

“ I attended the examinations of the children of this school; the boys answered the several questions proposed to them with quickness and accuracy; they were both orderly and attentive; their answering in arithmetic, grammar, and geography, was very good. The senior classes evinced a good knowledge of geometry and mensuration.—J. H. WILES.”

26.—John Dwyer.

27.—John Clifton.

28.—Golden, County Tipperary, Ireland; Sydney, New South Wales.

29.—Respective ages, 27 years, and 17 years.

30.—1st January, 1852.

31.—Not trained.

32.—

33.—Taught a Denominational school 14 months; always receiving instruction. The 4½ years almost immediately previous to my departure from Ireland for this Colony were spent at a first class boarding-school, where I went through a thorough classical course, and acquired a good knowledge of mathematics; no occupation previous to that of teaching.

34.—£122 10s., Government salary.

35.—£111 8s. 10d., school fees.

36.—£233 18s. 10d., total amount.

37.—Catechism and prayer twice a day by teacher. Visited by Rev. M. A. Corish, regularly; by Archbishop Polding, at stated periods. Christian doctrine and historical catechisms, Douay Bible, Old and New Testament.

PARRAMATTA-STREET.—(GIRLS.)

1.—Parramatta-street, Sydney.

2.—Of brick, and needs some little repairs.

3.—The area of the schoolhouse is 1,620 square feet.

4.—600 square yards.

5.—The water-closets are of weatherboards, and in good condition.

6.—One room, containing 1,620 square feet, and 24,300 cubic feet.

7.—The average number is 243.

8.—Ventilated by 2 doors and 7 windows.

9.—The annual average number on the books is 279—44 infant boys and 235 girls.

10.—The maximum age 14 years, and the minimum 3 years.

11.—The school is divided into twelve classes; the average number in each class is 20. The maximum and minimum ages are as follows:—In the 1st class, 14 and 11; in the 2nd, 11 and 9; in the 3rd, 9 and 8; in the 4th, 9 and 7; in the 5th, 7 and 6; in the 6th, 6 and 5; in the other 6 classes the maximum is 6 years and the minimum 3.

12.—The pupils attend school 6 hours each school day; the hours of attendance are from 9 until 1 o'clock, and from 2 until 4 o'clock; the intervening hour is allowed for dinner and recreation.

13.—There is one holiday in the week, viz., Saturday; there are two vacations in the year, one at Christmas of a fortnight, and one at Easter of three days.

14.—The number of days appropriated to studies during the year ending 30th September, 1858, was 249.

15.—The average length of the period that pupils remain at the school is about 5 years.

16.—There may be 15 or 20.

17.—There are some gratis, others pay 3d., 6d., 9d., and 1s. per week; the total annual charge is 13s., 26s., 39s., and 52s.; there is no charge for books.

18.—The fees received from the pupils during the year ending 30th September, 1858, amounted to £218 15s. 2d.; they were appropriated to support of teachers and salary of assistant teacher; the amount received from Government during the same period was £120; the total amount received from all sources during the year was £338 15s. 2d.

19.—The average annual total cost of the education of each pupil was £1 7s. 10½d.

20.—The several subjects of instruction are spelling, reading, writing, grammar, geography, history, historical catechism, Christian doctrine, arithmetic, and needlework. Copy of time table:—School opens at 9 o'clock a.m., and closes at 4 o'clock p.m., on Mondays,

days, Tuesdays, Wednesdays, Thursdays, and Fridays: from 9 to 9 $\frac{3}{4}$, preparation of lessons; 9 $\frac{3}{4}$ to 10, prayer; 10 to 10 $\frac{1}{2}$, catechism; 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$, reading, spelling, and explanation of lessons; 11 $\frac{1}{2}$ to 12, writing; 12 to 12 $\frac{3}{4}$, reading, spelling, and explanation of lessons; 12 $\frac{3}{4}$ to 1, singing; 1 to 2, dinner and recreation; 2 to 3, arithmetic; 3 to 3 $\frac{3}{4}$, grammar and geography; 3 $\frac{3}{4}$ to 4, singing and prayer. Every alternate afternoon, needlework for the senior classes.

21.—The books used in the several classes are—the first, second, third, and fourth books, and the grammar and arithmetic by the Christian Brothers, Young's history of England, Reeve's history of the Bible, geography (published by Duffy, of Dublin, for the use of the Catholic schools), Carpenter's spelling, historical catechism, and the Christian doctrine; the condition is tolerable; the number is inadequate to the wants of the school.

22.—There are 5 maps in the school; two of The World, one of Europe, one of Asia, and one of Australia; their present condition is fair; prints, diagrams, maps of Africa, America, England, Ireland, Scotland, and Palestine, and instruments, are needed. There are 12 desks, 20 forms, 2 tablet stands, 2 blackboards, and a book press; also, a gallery for the infants, capable of seating 100.

23.—Admonition, reproof, and sometimes the cane slightly. I have received no written instructions on the subject.

24.—The pupils of the school are examined twice a year, viz., in June and December, by the Most Rev. the Archbishop, the Venerable the Archdeacon, the Rev. M. A. Corish, and one or two other clergymen, and by the inspector; prizes, such as books and prints, are distributed at the Christmas examination.

25.—By the Rev. M. A. Corish and Mr. J. H. Wiles, at least once a week, usually occupying from 20 minutes to half an hour.

“8 December, 1859.

“I attended the examination, when the children evinced a laudable spirit of emulation and a fair improvement in the several classes. They were both very clean and orderly.—
“J. M'ENCROE, Archdeacon.”

“The children were very clean and orderly, and in the classes which I examined answered very well.—D. M. O'CONNELL, Dean.”

“I attended the examination of this school, and was much pleased with the general good answering of the children.—S. J. A. SHEEHY.”

“I assisted at the examination of this school, and was much pleased at the good order of the children and the manner in which they answered the questions proposed to them.—J. H. WILES.”

26.—Name of head teacher, Bridget Lucy Wiles.

27.—Names of assistant teachers, Mary Lillis and Ann Purcill; pupil teacher, Margaret Kelly.

28 & 29.—Mrs. Wiles, aged 32, Ireland; Miss Lillis, 17, Ireland; Miss Purcill, 18, Rio Janeiro; and Miss Kelly, 16, Yass, N.S.W.

30.—1st February, 1847.

31 & 32.—Not trained.

33.—Private teacher for about two years; no other occupation or business previous.

34.—Annual salary of head teacher, £87 10s.; assistant teacher, £31 10s.; second assistant teacher (paid by head teacher), £36; pupil teacher, £15.

35.—Fees received during the year, £218 15s. 2d.

36.—Total annual income, £338 15s. 2d.

37.—Religious instruction given once a week, by the Nuns of the House of the Good Shepherd, and visited by the Rev. M. A. Corish, the Roman Catholic clergyman of St. Benedict's Church. The books used for the purpose are the Christian doctrine and historical catechism.

PETERSHAM.

1.—Petersham.

2.—A stone building, with shingled roof. At present it is large enough, and is in good repair.

3.—The school contains 375 square feet.

4.—Two acres of church lands, being a gift of his Grace the Archbishop.

5.—A stone building, with slated roof, and in good condition.

6.—There being only one schoolroom: it contains 375 square feet, and 3,375 cubic feet.

7.—For the year ending the 30th September, 1858, the average number of children attending has been 47.

8.—The provision made for ventilation being two windows, one on the front and the other on the rear of the school, in each of which is a part that opens; together with two doors and a chimney.

9.—The average number of children on the books for the year ending the 30th of September, 1858, being 71—40 of which are males, and 31 females.

10.—The maximum and minimum age of the male children being 15 and 3 years, and of the female children the same.

11.—There are three classes in the school, having an average of 16 children to each; the maximum and minimum age of the children in the first book of lessons being 8 and 3 years;

years; of the children reading the second book of lessons, 14 and 9; and of the children reading the third book of lessons, 15 and 10 years respectively.

12.—The duration of school duties each day is 5 hours, viz.,—from 9 o'clock in the morning until 12; recreation from 12 until 2 o'clock. School operations commence at 2 o'clock and end at 4 o'clock.

13.—One holiday in each week, viz.,—Saturday; and there are two recesses during the year, one at Easter, for 10 days, and one at Christmas for two weeks' duration—the other occurring holidays being the 6th and 26th of January, the 17th and 25th of March, the 24th of May, and the 1st of November.

14.—There have been 239 school days during the year.

15.—The average duration of time that the children that have finally left, being eighteen months, but such children being of roving parents.

16.—The number of children who do not attend school being about 30.

17.—In accordance with the rules of the Denominational Board, the weekly sum charged for each child whose parents are able to pay being from 3d. to 1s., and no charge is made for books.

18.—Received, as school fees, £65 12s.; and Government salary, £61 19s. 7d., making a total of £127 11s. 7d., which has been the only support of the teacher.

19.—The annual average cost of each pupil that actually attended the school is £2 14s. 3½d.

20.—Children learning the first book of lessons are taught their prayers and catechism, and the outlines of geography; children reading the second book of lessons are taught writing, the rudiments of arithmetic, grammar, geography, easy sentences for dictation, prayers and catechism; children reading the third book of lessons are taught grammar, geography, arithmetic, sketch of sacred history, dictation, and the Christian doctrine. Half an hour each day for prayer, leaving an hour and a half to each class each day during the week.

21.—The books used in the school are the Christian Brothers' first, second, and third book of lessons, their grammar, geography, and arithmetic, and Gannon's spelling book. The first book of lessons not being in good condition, nor in number sufficient for the requirements of the school. The second book of lessons are in good condition, but not in sufficient quantity. All the other books are in good condition, and in sufficient quantity.

22.—The only map in the school being a map of The World, which is nearly worn out, and a blackboard (iron); other maps wanted, such as that of Europe, Asia, Australia, the British Isles, &c.

23.—Very little punishment has ever been used, an admonition being sufficient to maintain order. No written or other instructions regarding school discipline has been given.

24.—The school has been visited twice by the inspector of the Catholic denomination, and prizes of an historical and religious nature are awarded to the children twice each year.

25.—By the inspector of the Catholic denomination three times during the year, and by the clergyman of the district, weekly, the time occupied by each in the discharge of the duty being two hours.

“ 22 December, 1857.

“ I assisted at the examination of this school, the number present being 39. Their “ answering in the Christian doctrines was very good. Some five of his girls, and three “ boys, read very well; but they had a very slight knowledge of grammar or geography. “ The present master has only had charge since the 1st instant.—JOHN H. J. WILES.”

“ 22 September, 1858.

“ I visited this school to-day, and examined a class in reading and grammar, and “ was pleased with the manner the children acquitted themselves. The children were very “ orderly and attentive.—JOHN H. J. WILES.”

26.—Patrick McGuirk.

27.—There are no salaried assistants in this school.

28.—Rathdrum, County Wicklow, Ireland.

29.—27 years.

30.—December, 1857.

31.—Yes, at the Catholic Model School, Sydney.

32.—I attended the Sydney Catholic Model School for two months. Don't know what certificate of competency entitled to.

33.—No other occupation since my arrival to the Colony.

34.—From the 1st September, 1858, annual salary, £70; but previous to the above date, £61 5s.

35.—The total amount of school fees, £65 12s.

36.—The amount of salary received, £61 19s. 7d., making a total annual income of £127 11s. 7d.

37.—The school is visited by the resident clergyman, and by the Sisters of Charity, weekly, for the purpose of imparting catechetical instruction, and explaining the short form of catechism used in the school, and for the purpose of preparing the children for the reception of the sacraments. The principal books on religious instructions being Butler's catechism, Hornihold on the commandments, and Hornihold's real principles.

QUEANBEYAN.

- 1.—Queanbeyan.
- 2.—Built of brick, and in good condition.
- 3.—Contains 848 superficial square feet.
- 4.—1,200 square yards.
- 5.—Water-closets in good condition.
- 6.—848 superficial square feet, and 8,480 cubic feet in schoolhouse.
- 7.—56, average number in attendance.
- 8.—Glass windows.
- 9.—60 on the books, and 56 in attendance—27 males and 25 females.
- 10.—From 16 to 4 years.
- 11.—Into four classes; average number in each 14.
- 12.—From 9 a.m. to 4 p.m.; from 1 to 2 for recreation.
- 13.—No holidays, except certain festivals of the church, two vacations of 14 days each at Christmas and Easter.
- 14.—233 days, less the holidays of obligation.
- 15.—3 years, generally.
- 16.—8, Catholic children.
- 17.—6d. weekly for each pupil; no charge for books.
- 18.—£41 13s. received from pupils during the twelve months ending 30th September, 1858, appropriated to the best advantage, in supporting the teacher; no fees received from any other source, except the Government stipend of £52 10s.; total support, £94 3s.
- 19.—£1 11s. 4³d. cost of each pupil during the above-mentioned period.
- 20.—From A B C to fifth proposition of the first book of Euclid, &c.; constantly employed during school hours.
- 21.—The requisite school books by the Christian Brothers; the books in use are in the state of mediocrity, the number is inadequate to the wants of the pupils—others are needed.
- 22.—A map of The World, and British Islands, in the state of mediocrity—others are needed.
- 23.—As the teacher thinks proper.
- 24.—Examined quarterly by the Chairman of Local Board, and others, when prizes are distributed to each pupil according to merit.
- 25.—Inspected by the clergyman, frequently.
- 26.—John Beston.
- 27.—None.
- 28.—Dungarvan.
- 29.—Cannot exactly tell, about 30 years.
- 30.—October 20th, 1856.
- 31.—Yes.
- 32.—At National Model School, Dublin, 6 months; a first class certificate.
- 33.—
- 34.—£52 10s., at the above-mentioned period.
- 35.—None, but what is mentioned in answer to question number 18.
- 36.—Already given in answer to question number 18.
- 37.—The Christian doctrine, taught by the teacher at a certain time each day, from a book of that name.

RICHMOND.

- 1.—Richmond.
- 2.—The building is composed of stone and brick, condition good.
- 3.—882 superficial square feet.
- 4.—586²/₃ square yards, and 5,280 square feet.
- 5.—The building is composed of wood, and in good repair.
- 6.—882 square feet, and 10,584 cubic feet.
- 7.—The average number is 38 and a fraction of $\frac{320661}{2233237620}$.
- 8.—The building is ventilated by 8 windows, each 4 feet 6 inches by 1 foot 6 inches.
- 9.—The annual average on the books 55¹/₂; average for males, 24 and a fraction of $\frac{433223040}{1816475070}$; average for females 14 and a fraction of $\frac{320661}{1816475070}$.
- 10.—The maximum for males 14, for females 13; the maximum for males 5, for females 6.
- 11.—Three classes: average number for the 1st class, 9 boys and 10 girls; the maximum for males 14, for females 13; the minimum for males 9, for females 10; average number for the 2nd class, 16 boys and 6 girls; the maximum for boys 14, for girls 12; the minimum for boys 7, for girls 9; average number for the 3rd class, 22 males, 23 females; the maximum 12 for males, for females 12; the minimum for males 5, for females 4.
- 12.—6 hours for study each day. School duties commence at 9 o'clock a.m., and close at 4 p.m.; from 1 o'clock until 2 o'clock at dinner.
- 13.—One holiday in each week (Saturday); vacations, two—one at Easter, and two weeks at Christmas.
- 14.—240 days for school studies during the year.
- 15.—I cannot answer this question.
- 16.—Number of boys not attending school 20, number of girls not attending school 23, between the age of five and fifteen years.
- 17.—The weekly payments are as follows:—From 9d. to 6d., and 4d. and 3d.

18.—The annual amount of school fees, £32 12s. 4d.; from the Government, £52 10s.; total amount, £85 2s. 4d., ending September 30th, A.D. 1858.

19.—£2 4s. 8d., and a fraction of $\frac{1}{16}$, the annual cost of each pupil.

20.—The business of the school commences at 9 o'clock a.m., and closes at 4 o'clock p.m.: from 9 until $9\frac{1}{4}$, at prayers; from $9\frac{1}{4}$ to 10, hearing tasks; from 10 to $10\frac{1}{2}$, at the 1st class reading lesson; from $10\frac{1}{2}$ to 11, hearing the 2nd class reading lesson; from 11 to 12, at the 3rd or infant class; from 12 to $12\frac{1}{2}$, at grammar; from $12\frac{1}{2}$ to 1, at geography; from 1 to 2 at dinner; from 2 to $2\frac{1}{2}$, at writing; from $2\frac{1}{2}$ to $3\frac{1}{4}$, at arithmetic; from $3\frac{1}{4}$ to $3\frac{3}{4}$, at history; from $3\frac{3}{4}$ to 4, at the Christian doctrine: every Monday and Thursday, from $3\frac{1}{4}$ to $3\frac{3}{4}$, at dictation and mental arithmetic, instead of history.

21.—10 third books, 8 seconds, 9 sequels, 7 firsts, six histories of the Old and New Testament, 8 arithmetics, 10 geographies, 12 spelling books, 6 historical catechisms, 10 books of the Christian doctrine. The present condition of the books is bad; more books are needed; the number of books at the present time is not sufficient for the use of the pupils attending the school; the books most needed are seconds, sequels, firsts, and arithmetics, one or two mensurations, one or two book-keeping, one author on algebra.

22.—No prints, no diagrams, no instruments, one old map of The World, one small map of the Holy Land, one small map of England, Ireland, and Scotland; their present condition is very bad. A map of The World, and maps of Europe, Asia, America, Africa, and Australia, are needed for the use of this school.

23.—The system of correction used to preserve discipline is to punish any boy or girl with the ruler, by giving them one or two or more slaps on the hand, according to the crime they commit: no written or other instructions to the teacher from inspectors or any other visitors on this subject. The manager of the school once told me to chastise boys or girls that were not good, to keep them in during play time and give them a task to get, or to give them some writing or other thing to do during play time.

24.—To the best of my opinion, about forty-seven times during the year by the Rev. Pat. Hallinan, D.D., pastor of the district. The pupils are examined by the Catholic pastor. Prizes are given to the children according to merit. The description of prizes given are histories of England, pictures of the different Saints in neat frames, historical catechisms, and other useful books, distributed once a year.

25.—The school is visited by the Rev. Pat. Hallinan, D.D., about forty-seven times a year. The time occupied by the Rev. Pat. Hallinan, D.D., varies from 1 to 2 hours, and sometimes $2\frac{1}{2}$ hours. The present condition of the building is very good.

26.—John Dowling.

27.—No assistant teacher; the teacher's wife attends the school one-half of the day to instruct the girls at needlework; she also helps the master to teach the minor classes.

28.—Birthplace, Kilkenny.

29.—Born December 25th, 1830; age 28 years 6 days the 25th of December next.

30.—March 27th, 1857.

31.—Not trained as a teacher.

32.—

33.—I was brought up to teaching from my infancy. In 1845 I was appointed assistant teacher to the National School of Scoughrosteen, County Kilkenny, by Mr. Darcy, the school inspector for the district; I remained there for two years, when I was appointed assistant schoolmaster to the National School at Dunmore, under my own father's jurisdiction, he being the head schoolmaster of the Dunmore National School; I remained there for two years and four months. I underwent an examination, with ten other young men, for the assistant mastership to the school at Kilkenny; I was the successful candidate, and filled the situation for 12 months as assistant teacher to the Union Workhouse School, Kilkenny, when I left, in consequence of my father's illness, to take charge of the school that he was teacher of, namely, the Dunmore National School; I was two months teaching, until my father recovered from his illness. I then stood an examination for the National School at Foulkstown, and received the situation from the Rev. John Kelly, parish priest of St. Patrick's, Kilkenny. I remained there for 14 months, when I was appointed teacher of St. James' National School, Kilkenny City, in the place of Mr. Michael Dowling, who was called up to Dublin to be trained. I remained teaching under the head teacher, Mr. Joseph Dowling, for 9 months, when I resigned and emigrated to this Colony. I had no situation for a few weeks after coming, when I went to see the Very Rev. Archdeacon; when I produced some letters of character from the Mother Country he sent me to teach the school at North Kent-street, under the head teacher, Mr. John O'Brien: I remained there for a few months, when I was appointed to a school. Mr. O'Brien gave me a certificate of competency; this I gave to Francis Flannigan, jun., Esq., one of the members of the Local Board for the school at Broulee, and this gentleman gave it to the Rev. Father Johnston, and I never got it since; but I hold a copy of it.

34.—The annual amount of £52 10s.

35.—£32 12s. 4d.

36.—£85 2s. 4d.

37.—The religious instruction given each day is the Lord's Prayer, the Creed and general confession, with acts of contrition, faith, hope, and charity, and the Christian doctrine; two hundred and forty times in the year; the religious instruction is given by the teacher; the school is visited by the Rev. P. Hallinan, D.D., Catholic pastor of the district. The books used for religious purposes are the New and Old Testament, Christian doctrine, historical catechism, and the Holy Bible.

RAYMOND TERRACE.

- 1.—Raymond Terrace.
- 2.—Schoolhouse, a wooden building, in good condition ; large enough for the number of pupils at present attending.
- 3.—40 feet by 20.
- 4.—2 acres.
- 5.—Water-closet built of wood, and in good repair.
- 6.—40 feet by 20, and 12 in height.
- 7.—There is only one room, in which the average number usually assembled is 35.
- 8.—Ventilation provided by opening of sashes.
- 9.—Annual average number 35—the same number attending the school—consisting of 22 males and 13 females.
- 10.—Males, from 4 to 13 years ; females, from 4 to 13 years.
- 11.—Four classes—10 pupils in the first class ; 9 in the second ; 10 in the third ; and 6 in the 4th. The ages of first class are from 5 to 4 years ; of the second, from 8 to 6 ; of the third, from 10 to 8 ; and of the 4th, from 13 to 10 years.
- 12.—Six hours—commencing at 9 a.m. and terminating at 4 p.m. ; from 1 to 2 o'clock for recreation.
- 13.—Saturday in each week ; and two vacations in the year, ten days in each.
- 14.—241 days.
- 15.—From 4 to 15 years.
- 16.—None.
- 17.—From 2d. to 1s. per week ; no charge for books.
- 18.—Annual amount of school fees received from the pupils for the year ending 30th September, 1858, £39 12s., which amount was appropriated towards the teacher's support ; annual amount received from Government towards the support of the school, £52 10s. ; total amount received from all sources towards the support of the school for the above-mentioned period, £92 2s.
- 19.—Total annual average cost of each pupil for education, £2 12s. 7d.
- 20.—Subjects of instruction for the first class,—Christian doctrine, spelling, easy reading lessons, and tables ; for the second, Christian doctrine, spelling, reading, writing on slates, and simple rules in arithmetic ; for the third, Christian doctrine, spelling, reading, writing on paper, compound rules in arithmetic, history, grammar, and geography ; and for the fourth class, historical catechism, reading, writing, arithmetic, history, grammar, and geography. The time allotted to each of the above subjects is as follows:—From 9 o'clock to 9 $\frac{3}{4}$, preparation for lessons ; from 9 $\frac{3}{4}$ to 10, prayer before study ; from 10 to 10 $\frac{1}{2}$, catechism ; from 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$, reading classes ; from 11 $\frac{1}{2}$ to 12, writing ; from 12 to 1, spelling classes, &c. ; from 1 to 2, recreation ; from 2 to 3, arithmetic ; from 3 to 3 $\frac{3}{4}$, lessons in grammar and geography ; and from 3 $\frac{3}{4}$ to 4 o'clock, prayer.
- 21.—In first class,—first book and sequel to do. by the Christian Brothers, and Christian doctrine by Archbishop Polding ; in the second—the second book of reading lessons by Christian Brothers, Christian doctrine, and Carpenter's spelling book ; in the third class—third book by Christian Brothers, Christian doctrine, Reeve's history of the Bible, grammar and geography by the Christian Brothers, and arithmetic by do. ; and in the fourth class—Fleury's historical catechism, fourth book by Christian Brothers, history of England (by a member of the Ursuline community, St. Mary's, Waterford), grammar, geography, and arithmetic by Christian Brothers. Books in bad condition ; school books by the Christian Brothers much required ; number of books at present in the school not adequate to its wants.
- 22.—Two maps only, one of The World and another of Australia ; there is no other school apparatus ; the maps are in bad condition ; school maps, diagrams, and a renewal of desks and benches are required.
- 23.—Reprimand and slight chastisement.
- 24.—The pupils are examined twice a year by the Members of the Local Board, who distribute periodically prizes of books, prints, and pictures.
- 25.—There is no official inspector ; the school is inspected by the resident clergyman once a month.
- 26.—Henry Harding.
- 27.—Mrs. Harding.
- 28.—Birthplace of each, Tipperary, Ireland.
- 29.—40 years and 38 years.
- 30.—1st March, 1859.
- 31.—Not trained.
- 32.—
- 33.—Teaching for five years in the Roman Catholic Orphan School, Parramatta ; employed previously at a newspaper office.
- 34.—£92 2s.
- 35.—None.
- 36.—£92 2s.
- 37.—Religious instruction in connection with the Catholic Church, once each day by the teacher. The school is visited by the Rev. E. J. Luckie, resident clergyman of the Catholic Church ; the books used for religious instruction are,—the Christian doctrine, catechism by Archbishop Polding ; Fleury's historical catechism, and Reeve's history of the Bible.

REDFERN.—(MIXED.)

- 1.—Redfern.
- 2.—Brick ; needs repairs.
- 3.—338 square feet.
- 4.—7,200 square feet.
- 5.—Pretty good.
- 6.—338 square feet ; 4,056 cubic feet.
- 7.—105.
- 8.—5 windows.
- 9.—Annual average number on the books, 69 females and 47 males ; annual average attending the school, 62 females and 43 males.
- 10.—Maximum age of boys, 14 years ; minimum, 3 years. Maximum age of girls, 16 years ; minimum, 3 years.
- 11.—5 classes ; average number in each class, 23. First class, maximum, 16 years ; minimum, 10 years. Second class, maximum, 12 years ; minimum, 8 years. Third class, maximum, 10 years ; minimum, 6 years. Fourth class, maximum, 7 years ; minimum, 5 years. Fifth class, maximum, 6 years ; minimum, 3 years.
- 12.—5½ hours ; commencing at 9 o'clock, forenoon ; and terminating at 4 o'clock, afternoon ; cessation of study from half-past 12 to 2 o'clock, afternoon, for dinner and recreation.
- 13.—One holiday in each week, Saturday ; two vacations of a fortnight's duration each, Christmas and Easter.
- 14.—235 days.
- 15.—Cannot say.
- 16.—Cannot say.
- 17.—Weekly payments, 6d., 9d., and 1s. ; no charge for books. Total annual charge for each pupil, £1 6s., £1 19s., and £2 12s.
- 18.—£80 14s 7d. ; school fees towards the support of the teacher ; other sources none ; Government salary, £87 10s. Total amount of support, £168 4s. 7d.
- 19.—Average annual cost of each pupil, £1 12s. 1d.
- 20.—From 9 to 9¾, preparation for classes ; 9¾ to 10, prayer ; 10 to 10½, catechism ; 10½ to 11½, reading and spelling ; 11½ to 12, writing ; 12, the Angelus ; 12 to 12½, monitor classes ; 12½ to 2, recreation ; 2 to 3, arithmetic ; 3 to 3¾, grammar, geography ; 3¾ to 4, prayer, and sometimes hymn singing.
- 21.—The first, second, third, and fourth class books, by the Christian Brothers ; geography, grammar, and arithmetic, by the Christian Brothers ; Carpenter's spelling book, Young's history of England, Reeve's history of the church, and history of the Bible ; present condition not good, others are needed ; the number of those in use are not adequate to the wants of the school.
- 22.—Maps of The World, Asia, America, and Australia ; no prints or diagrams ; maps, prints, and diagrams are needed.
- 23.—Admonition, reproof, confinement ; no written instructions received on the subject.
- 24.—Twice a year ; at Christmas and Midwinter by the inspector, the Rev. Father Corish, and others ; rewards of merit, such as books, crosses, medals, &c., given by the teacher at the Christmas examination.
- 25.—By the Rev. Father Corish and the inspector ; at least 6 times a year by the inspector, the length of whose visits vary.

" 21 December, 1858.

" I have assisted at the examination of the children attending this school, and they have answered very creditably in the Christian doctrine, historical catechism, reading, grammar, spelling, and geography. There was also a very good display of needlework executed by the young ladies attending the school. Number of children present, 90.—
" J. H. WILES, Inspector."

- 26.—Mrs. P. M. Ryan.
- 27.—None.
- 28.—Eyrecourt, County Galway, Ireland.
- 29.—47.
- 30.—June, 1844.
- 31.—Trained as governess.
- 32.—
- 33.—Governess.
- 34.—Government salary, £87 10s.
- 35.—School fees, £80 14s. 7d.
- 36.—Total annual income, £168 4s. 7d.
- 37.—Catechetical instruction, daily, by the teacher ; by Rev. Father Corish, Catholic clergyman ; historical and Christian doctrine, catechisms.

ROSEBROOK.—(MIXED.)

- 1.—Rosebrook.
- 2.—Composed of wood, in good condition, needs no repairs or other improvement.
- 3.—308 square feet in schoolroom.
- 4.—9,680 square yards.
- 5.—Water-closets built of ironbark slabs on sleepers, in good condition.
- 6.—308 square feet, and 2,464 cubic feet.
- 7.—About 40 pupils.

- 8.—Three glass windows containing 12 panes each, lower sashes raised when necessary.
- 9.—64; about 37 average number attending school; 14 boys and 23 girls.
- 10.—14 and 4 years.
- 11.—Four classes; average in each class, 10; and the following is the maximum and minimum age in each class—14 and 10, 12 and 9, 11 and 6, and 6 and 4 years.
- 12.—6 hours the pupils attend each day; the school opens at 9 o'clock and terminates at 4 o'clock; one hour's cessation, during which the pupils take dinner and recreation.
- 13.—The school is open five days in each week, no school on Saturdays; two vacations in each year, first vacation continues four days, and the second eight days; vacations occur at Easter and Christmas.
- 14.—245 days appropriated to study.
- 15.—About 3 years.
- 16.—About 12 children.
- 17.—5s. charged per quarter for each pupil; no charge for books.
- 18.—Amount of school fees received for the twelve months ending the 30th of September, 1858, £25 2s. 10d., appropriated to the support of myself and family; £52 10s. from Government; from all sources, £77 12s. 10d.
- 19.—£2 1s. 11½d.
- 20.—From 9 to 9¾, preparation for lessons; from 9¾ to 10, prayer; a prayer before study, at which the Angelus Domini is said; from 10 to 10½, catechism; from 10½ to 11½, reading classes; from 11½ to 12, writing; at 12, the Angelus Domini; from 12 to 1, spelling classes, &c.; from 1 to 2, dinner and recreation; from 2 to 3, arithmetic; from 3 to 3¾, lessons in grammar and geography; from 3¾ to 4, prayer; the girls are instructed in sewing, &c.
- 21.—The literary class book, a school grammar of the English language, first book of modern geography, the school expositor, a commercial arithmetic, Christian doctrine, an historical catechism, and a history of the church and Bible are used in the fourth class; the third book of reading lessons, grammar, geography, arithmetic, Carpenter's spelling book, Christian doctrine, and historical catechism are used in the third class; the second book of reading lessons, arithmetic (part first) and Christian doctrine are used in the second class; the sequel to the first book of reading lessons, arithmetical tablets, first book of reading lessons, and first series of ditto are used in the first class. Books are in fair condition; I don't think other kinds are needed, the present number is not sufficient.
- 22.—A map of The World on Mercator's projection in fair condition, other maps are needed.
- 23.—Moral influence, and detained after school hours.
- 24.—The pupils are examined once a year by the Very Rev. Dean Lynch; prizes are given at each examination, and they consist of books and pictures.
- 25.—By the Very Rev. Dean Lynch six times a year; he remains sufficiently long to ascertain the state of the school, and act upon my report.
- 26.—Andrew Tierney.
- 27.—Mary Tierney.
- 28.—County Tipperary, Ireland.
- 29.—43 and 19 years are the respective ages.
- 30.—1st February, 1852.
- 31.—Trained.
- 32.—Catholic Model School, Sydney, for one month; also, for three months, at Toomavara, Ireland; certificate from Catholic Model School not specified; certificate from the other school, second division of the second class.
- 33.—Teaching since 1836; taught a National School for 12 years.
- 34.—£52 10s.; assistant teacher has no salary.
- 35.—£25 2s. 10d.
- 36.—£77 12s. 10d.
- 37.—Christian doctrine, historical catechism, and a history of the church and Bible are taught every day by the teacher, and often by the Very Rev. Dean Lynch; the school is visited by the Very Rev. Dean Lynch, Catholic pastor. The books used for the above purpose are,—a Christian doctrine, historical catechism and a history of the church and Bible. The Very Rev. Dean Lynch has given instructions during the year to the children preparing for confirmation and first communion.

SINGLETON.—(MIXED.)

- 1.—Singleton, Patrick's Plains.
- 2.—Wood; used presently as a chapel, a new one being built, which is not in immediate need of repairs.
- 3.—1,200.
- 4.—9,608.
- 5.—1 brick; 126 cubic feet; and 1 wood, 144 cubic feet; both neat and good.
- 6.—1 room; 1,200 square, and 12,000 cubic, feet.
- 7.—45.
- 8.—4 large windows which admit of being opened, and 2 doors.
- 9.—29 boys, and 27 girls.
- 10.—Boys, 15 and 5; girls, 14 and 4.
- 11.—Six; the average number in each 7; the maximum and minimum ages in each—first, 15 and 9; second, 12 and 8; third, 10 and 6; fourth, 10 and 6; fifth, 7 and 5; sixth, 9 and 4.

- 12.—5 hours; commencing at 9 o'clock a.m. and terminating at 4 p.m.; two hours cessation, from 12 to 2 o'clock, during which the pupils dine, play cricket, marbles, &c.
- 13.—1 holiday per week; and 2 vacations per annum—the first at Easter, and the second at Christmas; duration of the former 6 days, and that of the latter 9.
- 14.—246.
- 15.—Six months.
- 16.—Not in a position to ascertain.
- 17.—6d. per week for those who do pay, except 6 who pay 1s. each; nothing for books.
- 18.—£59 9s. 9d., which is received by the teachers as an addition to their Government salary of £84; total £143 9s. 9d.
- 19.—£3 3s. 9½d.
- 20.—From 9 o'clock a. m. to 9½, writing; at 9½, prayer; from 9½ to 10, preparation for lessons for the first and second classes, and reading, with explanation, for the other 4 classes; from 10 to 10½, examination of first and second classes in orthography, oral and written, and arithmetical tables (by monitors) for those of the other classes who are commencing that subject; from 10½ to 11, reading lessons for the first and second classes; from 11 to 12, arithmetic for all classes; at 12 the Angelus Domini is said; from 12 to 2, recreation; from 2 to 2½, catechism; from 2½ to 3, study of grammar for the first and second classes, and reading and geographical instruction for the other classes; from 3 to 3½, grammatical analysis for the first and second classes, and plain and fancy needlework for the females of the other classes; from 3½ to 4, geography for all classes; at 4, prayer.
- 21.—First class, the Christian Brothers' third reading book, school expositor, grammar, first book of modern geography, first and second books of arithmetic, Sullivan's spelling book superseded, and Abbot Fleury's summary of sacred history; second, the Brothers' second reading book, grammar, geography, arithmetic, Murray's edition of Carpenter's spelling assistant; third, the Brothers' sequel to the first book; fourth, the Brothers' first book of reading lessons; fifth and sixth, the Brothers' tablet sheet; these are nearly new, except the first reading book and the expositors, which will soon be unfit for use; but the number is inadequate to the present wants of the school; besides, the Brothers' fourth reading book and second book of geography are needed.
- 22.—A map of The World on Mercator's projection, Hughes' map of Palestine in the time of our Saviour, ditto of Canaan, Allen's map of the British Isles, Bett's family Atlas—9 maps, Chamber's Atlas—9 maps, a map of New England and the Clarence District, all good; a large blackboard, an old flat table, and plenty of good cedar seats; 6 proper school-desks, and modern maps on a large scale of the five Continents are needed.
- 23.—Admonition, prudent correction, and in case of incorrigibility expulsion.
- 24.—Partially almost every month, and thoroughly at Christmas, when prizes of Bibles and prayer books, &c., are given by the Rev. Mr. Hanly.
- 25.—The patron, Rev. Mr. Hanly, who resides on the spot, almost every week, and some weeks twice, who remains whole days; and John Brown, Esq., J.P., member of the Local Board, often; they have forgotten to make a report.
- 26.—Cornelius Coghlan.
- 27.—Mary Teresa Coghlan.
- 28.—Mr. Coghlan, Parsons Town, King's Co., and Mrs. Coghlan, Listowel, Co. Kerry, Ireland.
- 29.—The former 28, and the latter 27.
- 30.—The former March, 1858, and the latter (then Miss Collins) in June, 1853.
- 31.—Both trained.
- 32.—Mr. Coghlan (who had considerable experience in teaching under the Irish National Board) spent three months in the Catholic Model School, North Kent-street, Sydney; and Mrs. Coghlan in the seminary of the Listowel Convent, where she assisted for two years.
- 33.—Both maintained themselves by tuition since they ceased to be pupils.
- 34.—£84 sterling for both, the salary not separate.
- 35.—£59 9s. 9d.
- 36.—£143 9s. 9d.
- 37.—Instruction in the catechism of the Christian doctrine, daily by the teachers, and weekly by the Rev. Mr. Hanly, Roman Catholic, who use the Old and New Testaments, and Fleury's sacred history.

SUSSEX-STREET.—(Boys.)

- 1.—Sussex-street, Sydney.
- 2.—Of wood; its present condition is tolerable.
- 3.—414.
- 4.—There is no enclosed ground.
- 5.—The water-closets are in fair condition.
- 6.—There is only one room; the number of superficial feet is 414, of cubic feet 6,210.
- 7.—42.
- 8.—Four windows, and one door.
- 9.—50; 42.
- 10.—The maximum age is 15 years, the minimum 5.
- 11.—There are three classes; the average number is 14. The maximum and minimum ages are as follows:—First class 7 and 5, second class 10 and 7, third class 14 and 10.

12.— $5\frac{1}{2}$ hours; the school duties commence at 9, and terminate at 4; cessation of study, from half-past 12 to 2—this time is spent at dinner and recreation.

13.—One holiday every week; and two vacations, of a fortnight each, at Christmas and Easter.

14.—248.

15.—About 18 months.

16.—15.

17.—6d., 9d., and 1s. per week; there is no charge for books.

18.—£47, teacher's support; £61 5s. from the Denominational Board; there is nothing received from other sources; the total amount received was £108 5s.

19.—£2 11s. 7d.

20.—9 to $9\frac{3}{4}$, preparation of lessons; $9\frac{3}{4}$ to 10, prayer; 10 to $10\frac{1}{2}$, catechism; $10\frac{1}{2}$ to $11\frac{1}{2}$, reading, spelling, &c.; $11\frac{1}{2}$ to $12\frac{1}{2}$, writing, and the Angelus; $12\frac{1}{2}$ to 2, dinner; 2 to 3, arithmetic; 3 to $3\frac{3}{4}$, lessons in geography or grammar; $3\frac{3}{4}$ to 4, prayer.

21.—The first, second, and third lesson books (the Christian Brothers'); the Christian Brothers' grammar and arithmetic; the first book of geography, published by Duffy, Dublin; Carpenter's spelling book. No other kinds of books are needed; and there is a sufficient supply at present; their condition is tolerable.

22.—There are three large maps,—The World, America, and Africa. There is also a small blackboard; a large blackboard is required, and maps of Europe, the British Isles, and Australia.

23.—Admonition, reproof, and sometimes slight punishment, such as a tap on the hand.

24.—They are examined twice a year by the Rev. Mr. Sheehy, and the inspector.

25.—By the inspector, twelve times a year, from half an hour to an hour.

“ 9 December, 1858.

“ I have this day held examination in this school, and have been much pleased with the answering of the boys.—D. O. M. O'CONNELL, Dean of St. Mary's.”

“ I have also assisted at the examination of this school, and the answering of the boys in general was very creditable.—J. H. WILES.”

26.—Thomas Rooney.

27.—There is no other teacher or monitor.

28.—Dundalk, Ireland.

29.—26 years.

30.—1st March, 1859.

31.—Trained.

32.—At the Normal Institution of the Irish National Board of Education for 5 months. First division of third class.

33.—

34.—£61 5s.

35.—£47 school fees—no other emoluments.

36.—£108 5s.

37.—The teacher devotes an hour every day in teaching catechism, and in prayer. The Rev. Mr. Sheehy, Roman Catholic, the abridgment of the Christian doctrine, and Fleury's catechism.

SUSSEX-STREET.—(GIRLS.)

1.—Sussex-street, Sydney.

2.—Of wood; its present condition is tolerable.

3.—414.

4.—There is no enclosed ground.

5.—The water-closets are in fair condition.

6.—There is only one room; the number of superficial feet is 414; of cubic feet, 6,210.

7.—46.

8.—Two windows and one door.

9.—Annual average on the books, 11 boys and 70 girls; average number attending school, 8 boys and 38 girls.

10.—The maximum age is 14 years, the minimum, 4.

11.—There are five classes, average number is 9. First class, max. 13, min. 8; second class, max. 10, min. 7; third class, max. 7, min. 5; fourth class, max. 6, min. 5; fifth class, max. 5, min. 4.

12.— $5\frac{1}{2}$ hours; the school duties commence at 9, and terminate at four; cessation from study from $12\frac{1}{2}$ to 2, this time is spent at dinner and recreation.

13.—One holiday every week; two weeks' vacation at Christmas, and one week at Easter.

14.—246.

15.—From eighteen months to two years.

16.—14.

17.—From 2d. to 1s. There is no charge for books.

18.—£38; teacher's support, £61 5s., from the Denominational Board, there is nothing received from other sources.

19.—£2 3s.

20.—9 to 9 $\frac{3}{4}$, preparation of lessons; 9 $\frac{3}{4}$ to 10, prayer; 10 to 10 $\frac{1}{2}$, catechism; 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$, reading, spelling, &c.; 11 $\frac{1}{2}$ to 12 $\frac{1}{2}$, writing and the Angelus; 12 $\frac{1}{2}$ to 2, dinner; 2 to 3, lessons in geography or grammar; 3 $\frac{3}{4}$ to 4, prayer.

21.—The first, second, and third lesson books, by the Christian Brothers, grammar, and arithmetic, the first book of geography, published by Duffy, Dublin; Carpenter's spelling book, history of Old and New Testaments. No other kinds are needed; there is a sufficient supply at present.

22.—There is one large map of Europe, one of Asia, and a small map of The World; there is also a small blackboard and tablet stand.

23.—Admonition, reproof, and sometimes slight punishment, such as a slap on the hand.

24.—They are examined twice a year by the visiting clergyman, Rev. Mr. Sheehy, and the inspector. There are none given unless by the teacher; such as books and pictures, after examinations.

25.—By the visitor, once a fortnight, for half an hour; by the inspector, once a month, same time.

“9 December, 1857.

“I have been present at an examination held to-day. I have been much pleased with the answering of the children, and their very neat appearance.—D. O. M. O'CONNELL.”

“I assisted at the examination of this school, and was much pleased with the general good answering of the children.—S. J. A. SHEEHY.”

“I assisted at the examination of this school, and was much pleased with the answering of the children in the Christian doctrine, grammar and geography. They read very well indeed, and they were also very neat and attentive.—JOHN H. J. WILES.”

26.—Ellen Rice.

27.—There is no other teacher.

28.—City of Limerick, Ireland.

29.—40 years.

30.—1851.

31.—Untrained.

32.—

33.—Teaching for eight years; kept a draper's shop previous.

34.—£61 5s.

35.—£38 7s. 6d. school fees; no other emoluments. £99 12s. 6d.

37.—The teacher, a half-hour every day in teaching catechism and prayer; the Sisters of the Good Shepherd give instructions generally once a week; Rev. Mr. Sheehy, Roman Catholic; the abridgment of the Christian doctrine, and Fleury's catechism.

SOFALA.—(MIXED.)

1.—Sofala, District of the Turon River, in the County of Roxburgh.

2.—Size of the schoolroom, 478 superficial feet.

3.—Building entirely composed of wood; in good repair, with the exception of the roof.

4.—Size of the playground for the use of the pupils is 1,069 superficial feet.

5.—Water-closets are built of wood; and in good and healthy condition; size of each—1 for the boys and 1 for the girls—is 5 $\frac{1}{2}$ by 5 $\frac{1}{2}$ superficial feet.

6.—The measurement of the general schoolroom, which is the only room appropriated to teaching, in consequence of there being no other, 478 superficial and 4,138 cubic feet.

7.—The average number of pupils attending the school during the year ending the 30th September, 1858, was, on each day, 26, being all congregated in one room.

8.—The schoolroom is ventilated by 4 windows, measuring—No. 1, 20 by 30 inches; No. 2, 18 by 24 inches; No. 3, 16 by 21 inches; No. 4, 10 by 10 inches; and by 2 doors always left open—1 being 5 feet 6 inches in height, and 1 foot 10 inches in width; the other door being 5 feet 11 inches in height and 2 feet 3 inches in width; it is also ventilated by a large fireplace, measuring 6 feet 4 inches in length, 4 feet in height, and being of the depth of 3 feet 4 inches.

9.—The annual average number on the books during the year ending September 30th, 1858, was 20 males, and 23 females; and the average number attending the school during that period was 12 males, and 14 females.

10.—The maximum age of the boys 14 years, and the girls 15 years; the minimum age of the girls 4 years, and the boys 3 years.

11.—The school is divided into 8 classes, 4 being boys and 4 being girls:—Boys—first class, maximum age, 14 years; minimum, 8 years. Second class, maximum age, 12 years; minimum, 6 years. Third class, maximum age, 6 years; minimum, 5 years. Fourth class, maximum age, 5 years; minimum, 3 years. Girls—first class, maximum age, 15 years; minimum, 10 years. Second class, maximum age, 12 years; minimum, 7 years. Third class, maximum age, 6 years; minimum, 5 years. Fourth class, maximum age, 5 years; minimum, 4 years. The average number in each class being 5.

12.—The number of hours in each day during which the pupils attend school are 6, namely, from 9 to 12 a.m. and from 1 to 4 p.m.; the intervening time is occupied by the children getting dinner. Many of them living at a distance do not return until half-past 1 o'clock.

13.—Saturday in each week is a holiday, in consequence of the parents keeping their children at home to cut wood, carry water, &c.; during the week of the races none of the children attend

attend school; the other holidays are at Christmas, a fortnight, 1 week at Easter, and 1 week at Whitsuntide.

14.—The total number of days appropriated to school duties during the year are 255; this is after allowing for 6 days required by the Roman Catholic Church to be kept as holidays, and the usual holiday of Saturday.

15.—The average length of time during which the pupils attend school, from the period of their first entering until their finally leaving, is about 9 years.

16.—The number of children in the locality between the ages of 5 and 15 who do not usually attend school is very difficult to ascertain, owing to the migratory character of the population; but as far as can be relied on, the number is stated to be about 60. The census returns would give the number correctly.

17.—The charge for instruction is made weekly at 1s. per week, but when parents plead poverty, 6d. only is charged; but in two-thirds of cases only is the money received, as some parents never pay, and when asked for the money, will withdraw their children from the school; although these bad debts appear amongst the teacher's receipt of fees, he rarely receives them; there is no charge made for books.

18.—The annual amount of school fees which should have been received from the pupils in the year ending September 30th, 1858, amounted to £63 7s. 6d.; the whole of these fees, as far as they were really paid, were appropriated by the teacher for his own support; no other sums were received by the teacher towards the support of the school, nor by or from any person, saving and excepting his salary of £52 10s. received from the Denominational Board.

19.—Dividing the last-mentioned total by the average number of pupils attending the school, at the period named, will give an annual average cost of £4 9s. 1½d. for the education of each pupil.

20.—The first class is instructed in writing, reading, spelling, arithmetic, grammar, and geography; boys and girls receive the same instruction. The second class, in writing, reading, spelling, and arithmetic; boys and girls receive the same instruction. The third class, in spelling and learning to write; boys and girls receive the same instruction. The fourth class, in the alphabet and monosyllables; boys and girls receive the same instruction. There are separate classes of boys and girls, and the time allotted to each subject amongst them collectively is—1 hour for writing, 1 hour for spelling, 1 hour for reading, half an hour for geography, half an hour for English grammar, and 2 hours for arithmetic.

21.—Books used in the school, in the boys' and girls' first classes, are Carpenter's spelling, Christian Brothers' third reading book, Christian Brothers' arithmetic, Christian Brothers' English grammar, National School geography, Roman Catholic catechism; boys' and girls' second classes, Christian Brothers' sequel to first book, Christian Brothers' second book, Roman Catholic catechism; boys' and girls' third classes, Christian Brothers' first book; boys' and girls' fourth classes, placards containing the alphabet, monosyllables, &c. The present number of any of the books does not exceed six, and they are in a very much worn condition, and quite inadequate to the wants of the school; other books are much needed, such as histories, elocutionists, parsing lessons, books of poetry, &c.

22.—The school is destitute of prints, diagrams, maps, instruments, and other school apparatus; it only possesses 6 two-penny maps of the four portions of the globe; a supply of large maps is much wanted, as well as globes, and blank tablets made of cedar wood or sheet iron to describe to children the different subjects.

23.—The mode adopted to preserve discipline is twofold, consisting of corporal punishment and confinement after school hours; no instructions on this subject have been received by the teacher from any official authority.

24.—The pupils have been examined twice a year, Easter and Christmas, by the Rev. Chairman of the Local Board, who distributes prizes, chiefly of a religious character, according to his judgment and discretion.

25.—The school is weekly visited by the Rev. Chairman of the Local Board, who interrogates the children at his discretion; no report of an official character has been made by the Rev. Chairman as to the state of the school.

26.—The name of the teacher is Edward Hart.

27.—There are no assistant teachers, pupil teachers, or monitors employed in the school.

28.—The birthplace of the teacher is Kilkenny City, Ireland.

29.—The age of the teacher is 55.

30.—Date of appointment to present office, 1st October, 1858.

31.—Not trained as a teacher.

32.—Answered by answer to question 31.

33.—Had no previous occupation as a teacher; was employed in London in the printing and bookselling business, and as a book-keeper for upwards of 25 years, before undertaking the office of teacher in this Colony.

34.—The annual amount of the salary of the teacher is £52 10s.

35.—The fees derived from pupils, if paid, would amount to £63 7s. 6d.; no other emoluments or allowances received.

36.—Total amount of income, derived from school salary, £52 10s.; fees, if all paid, £63 7s. 6d.; together would amount to £115 17s. 6d.

37.—Religious instruction consists of catechising children daily, and on Sundays for half an hour each day in the Roman Catholic catechism; no other books are used. The school is only visited by the Rev. Chairman of the Local Board, Rev. Dennis M'Guinn, clergyman in the Roman Catholic Church.

SOUTH CREEK.—(MIXED.)

- 1.—At St. Mary's, South Creek.
- 2.—Chiefly of wood.
- 3.—360 square feet.
- 4.—2,420 square yards.
- 5.—The water-closets are in good repair.
- 6.—180 square feet, and 2,700 cubic feet in each room.
- 7.—An average of about 13 in each room.
- 8.—Annual average on roll, 40 (26 boys, 14 girls); the average attending is 31 (19 boys, 12 girls).
- 9.—The school is well ventilated.
- 10.—Males, maximum 14 years, minimum 4 years; females, maximum 13 years, minimum, 4 years.
- 11.—Into five classes, the average in each class is 6: first class, maximum 14 years, minimum 11 years; second class, maximum 12 years, minimum 10 years; third class, maximum 10 years, minimum 8 years; fourth class, maximum 7 years, minimum 6 years; fifth class, maximum 5 years, minimum 4 years.
- 12.—They attend 6 hours during the day, commence at 9 o'clock, closes at 12; commences at 1, and closes at 4.
- 13.—No holidays allowed; the vacations are twice a year, a fortnight at Christmas, and a week at Easter.
- 14.—254 days set apart for study.
- 15.—1 year, 6 months.
- 16.—10 children.
- 17.—1s. is the maximum, and 6d. the minimum; no charge made for books.
- 18.—£22 10s. 6d. are the fees; none received from any other source.
- 19.—£22 10s. 6d. ÷ 31 = 14s. 6d., which is the average annual cost of the education of each pupil.
- 20.—To the first class is given grammar and parsing for half an hour; first and second catechism for an hour; writing for half an hour; arithmetic for an hour; writing from dictation, half an hour; spelling, half an hour; geography for half an hour. The third, fourth, and fifth classes, 1½ hour for reading lessons, &c.
- 21.—For the first class, arithmetic, grammar, geography, reading book, by the Christian Brothers; Carpenter's spelling book, Christian doctrine, Reeve's history of the Bible. For second class: arithmetic, grammar, geography, reading book, by the Christian Brothers; Carpenter's spelling book, Christian doctrine, &c. For third class: arithmetic, reading book, by Christian Brothers; Christian doctrine, &c. For fourth and fifth class: first book of lessons. There are some first books of lessons wanted.
- 23.—A boy at a time is appointed with a slate in his hand to write down the names of those he will see disorderly and making a noise; no instructions received.
- 24.—The pupils of the school are examined once a year, by the Rev. M. Brennan; and he visits the school about twice a month, and examines a class or two in reading, &c.; no prizes are given.
- 25.—The school is visited or inspected by no other than Rev. M. Brennan, about thirty times during the year, and remains about twenty minutes.
- 26.—Michael Hudson.
- 27.—None.
- 28.—Thomastown, County Kilkenny, Ireland.
- 29.—19 years.
- 30.—1st September, 1858.
- 31.—I was trained as a teacher.
- 32.—At the National Model School, Kilkenny, for one year and four months; possessing certificate of second division of third class.
- 33.—Included in the above.
- 34.—£52 10s.
- 35.—£22 10s. 6d.
- 36.—£75 0s. 6d.
- 37.—The Christian doctrine, once a day, for one hour, and a lesson is read every day out of Reeve's history of the Bible, by first and second class, and explained by teacher; visited by the Rev. M. Brennan, Roman Catholic pastor; the books used for religious instruction are the Christian doctrine, Reeve's history of the Bible, the historical catechism by Monsieur Fleury.

SHOALHAVEN.—(MIXED.)

- 1.—Shoalhaven.
- 2.—Constructed of wood, and requiring only repairs.
- 3.—320 square feet.
- 4.—2,420 square yards.
- 5.—Constructed of wood, and in very bad repair.
- 6.—320 square feet, and 3,200 cubic feet.
- 7.—38.
- 8.—2 doors and 2 windows.

- 9.—27 boys, 16 girls; 23 boys, 15 girls.
 10.—16 boys, 11 girls; 11 boys, 5 girls.
 11.—Four classes; 22 in first class, 13 boys, 9 girls; 5 in second class, 2 boys, 3 girls; 5 in third class, 3 boys, 2 girls; 11 in fourth class, 9 boys, 2 girls.
 12.—7 hours, commencing at 9 o'clock, terminating at 4 o'clock, 1 hour of which is given for recreation and dinner.
 13.—17th and 25th of March, 13th of May, 20th and 25th of October, with a vacation from 24th of December to 4th of January, and one from 1st to 6th of April; this school has also been closed from 1st to 7th June, on account of a change of teachers.
 14.—241.
 15.—3 years.
 16.—103.
 17.—6s. 9d. per quarter for education; books, &c., are not charged for, as they are not allowed out of the school.
 18.—£42 7s. 3d., for the teacher's benefit.
 19.—£1 2s. 6d.
 20.—First class, from 9 to 10, catechism; 10 to 11, alphabet; 11 to 12, multiplication, tables, and alphabet; 12 to 1, dinner and recreation; 1 to 3, alphabet; 3 to 4, tables and historical catechism. Second class, from 9 to 10, catechism; 10 to 11, spelling; 11 to 12, reading; 12 to 1, dinner and recreation; 1 to 1½, spelling; 1½ to 2½, reading; 2½ to 3, writing; 3 to 4, tables and historical catechism. Third class, from 9 to 10, catechism; 10 to 11, spelling; 11 to 11½, reading; 11½ to 12, writing; 12 to 1, dinner and recreation; 1 to 1½, spelling; 1½ to 2½, reading; 2½ to 3½, writing and arithmetic; 3½ to 4, historical catechism and tables. Fourth class, from 9 to 10, repetition of lessons; 10 to 10¾, writing; 10¾ to 11½, arithmetic; 11½ to 12, reading; 12 to 1, dinner and recreation; 1 to 1½, writing; 1½ to 2½, arithmetic; 2½ to 3, spelling; 3 to 3½, reading; 3½ to 4, historical catechism and tables.
 21.—First class use first book; second class, the sequel to first book; third class, the second book; fourth class, the third book, and Reeve's history of the Bible; they are all in good order. There are some first books required, also a couple of Euclid's elements.
 22.—There are no prints, diagrams, or maps, in the school, but are all required.
 23.—Admonition, and when it fails, the rod; this is the advice of the Chairman of the Local Board (Rev. P. Young); this is the only instruction given.
 24. & 25.—The Rev. P. Young, and the Members of the Board, 3 times, about 3 hours. "I have examined the school this day, 27th of January, 1858, the children were very clever and orderly; with a few exceptions the children of Mr Doherty's school do give great satisfaction; they have this quarter to improve a little in the reading, with regard to the stops and cadence in order to avoid any kind of singing—REV. P. YOUNG." The present state of the school is very bad as to attendance and state of repair.
 26.—Thomas d'Aran.
 27.—Monitors are taken in succession from the roll-book.
 28.—Ireland.
 29.—25 years.
 30.—1st June, 1858.
 31.—Trained.
 32.—At St. Benedict's, four or five months.
 33.—
 34.—£52 10s.
 35.—£42 7s. 3d.
 36.—£94 17s. 3d.
 37.—Roman Catholic, twice a day by the teacher; Rev. P. Young, Roman Catholic catechism, Bible catechism, Reeve's history of the Bible.

TUMUT.—(MIXED.)

- 1.—Tumut.
 2.—The building is constructed of brick, its present condition is good, needing no improvement or repairs.
 3.—Number of superficial square yards contained in the area of the building—80, or 720 square feet.
 4.—The number of superficial square yards of land in the ground adjoining the school for the use of the pupils—24,200, or 5 acres.
 5.—The water-closets provided for the use of the pupils are built of bark, and are fitted up internally in the ordinary manner.
 6.—That portion of the church wherein the school is taught is not subdivided into rooms. For its superficial area, see No. 3.
 7.—Average number of pupils on the books during eight months ending the 30th of September, 1858—47 males, 11 females; and the average number of pupils attending the school during the same period (8 months)—43 males, 9 females.
 10.—Maximum age of pupils—males 16, females 14; minimum, males, 5; females, 6.
 11.—The school is divided into four classes, average number in each class—13 pupils. Maximum age—first class, 7; second class, 10; third class, 12; fourth class, 16; minimum age—first class, 5; second class, 8; third class, 8; fourth class, 12.

12.—The pupils attend the school 6 hours daily; the school opens at 9 o'clock a.m., ditto closes at 4 p.m. Hour of intermission, 1 to 2.

13.—On Saturdays the school closes at 1 o'clock p. m., constituting half-holiday weekly.

14.—285 days are annually appropriated to school duties.

15.—Average length of period during which the pupils remain at the school from the date of their first entrance to the date of their finally leaving— $6\frac{1}{2}$ months.

16.—The number of children in the district, between the ages of 5 and 15 years, who do not usually attend this school, is estimated at 25.

17.—The quarterly sum charged to the pupils for instruction varies with their respective proficiencies, from 7s. 6d. to 13s. per quarter. No charge is made to the pupils for books; those in use being the property of the Denominational School Board, supplied as a free and fixed stock. The highest annual sum charged to any pupil, exclusive of books, as above, £2 12s.

18.—The total amount of school fees received from the pupils attending the school during eight months, ending the 30th September, 1858, was £31; and the salary received from the Denominational School Board during the same period, £38 6s. 8d. Total amount derived from both sources towards the support of the school, £69 6s. 8d.

19.—The last-mentioned sum, £69 6s. 8d., divided by 52—the average number of pupils attending during eight months, ending September, 1858—the average total cost of the education of each pupil is £1 6s. 8d during that period.

20.—First class: first division, alphabet. Second division: combining and spelling. The pupils of this class are instructed by the teacher or monitor at regular intervals during school hours.

Second class :

	HOURS.	SUBJECTS TAUGHT.	HOURS.	SUBJECTS TAUGHT.
M.	9 to 10	Writing copies on slate.	2 to $2\frac{1}{2}$	Carpenter's spelling.
	10 „ 11	Preparing lessons.	$2\frac{1}{2}$ „ $3\frac{1}{2}$	Arithmetic, simple rules.
	12 „ 1	Second book reading and spelling.	$3\frac{1}{2}$ „ 4	Descriptive geography.

	$12\frac{1}{2}$ „ 1	Spelling from dictation.	$3\frac{1}{2}$ „ 4	Descriptive geography.
S.	9 „ 10	Writing select pieces.		
	10 „ 12	Christian doctrine, reading and explanation.		(The school closes at 1 o'clock to-day.)
	12 „ 1	Scripture history.		

Fourth class: the pupils of this class read, and are lectured with those of the 3rd class, except in extra branches.

21.—Titles of books used in the school: First book, by the Christian Brothers, second book, do., third book, do., arithmetic, do., grammar, do., geography, do., Christian doctrine, sacred history, school expositor spelling, Carpenter's spelling, Murray's English reader. The present condition of the books is very good; a supply of first class books and grammars is much required.

22.—There are no prints, diagrams, or instruments in the school; geography is taught from Chambers' School Atlas; a supply of maps is needed, a map of The World more particularly.

23.—With a view to promote order, and due attention to studies in the school, recourse is made to kindness and civility, rather than harshness and severity; if, however, such means are found unsuited, notice of the fact is given to the members of the Local School Board, who will, if they see such a course advisable, adopt measures to expel any insubordinate pupils from the school.

24.—The pupils are examined by the Rev. M. M'Alroy, Roman Catholic clergyman, Yass, with reference to their progress, at least four times a year; no prizes are distributed at such examinations.

25.—The school is officially visited by the Rev. P. Bermingham, Roman Catholic pastor, Yass, not fewer than four times a year; three hours at least are employed at such visits in the examination of the pupils; no report exists on the state of the school.

26.—Name of the teacher, Denis Finnegan.

27.—No paid monitors, pupil or assistant teachers are attached to the school.

28.—Birthplace of teacher, Cullyhanna, County Armagh, Ireland.

29.—Age of teacher, 23 years.

30.—Date of appointment to the present office, 13th August, 1857.

31.—Yes; trained as a teacher.

32.—Trained in the Irish National Model Schools, Marlboro'-street, Dublin, during a period of $4\frac{1}{2}$ months, and there classed in the second division of second class.

33.—

34.—Annual salary derived by the teacher from the Denominational School Board, £57 10s.

35.—Exclusive of school fees, no other allowances or emoluments are received in aid of the school.

36.—The total average income derived by the teacher from the school, during eight months ending the 30th September, 1858, was £69 6s. 8d.

37.—Religious instruction is given once daily by the teacher; the school is visited frequently, as stated in Nos. 24 and 25, by the Rev. P. Bermingham, and the Rev. M. M'Alroy, Roman Catholic clergyman, Yass; the following are the titles of books at present used in the school, for the purpose of imparting religious instruction: 1. Christian doctrine, 2. Sacred history.

WOLLONGONG.—(MIXED.)

1.—Wollongong.

2.—The above is built entirely of wood, and requires to be newly shingled.

3.—The number of superficial square feet in the schoolhouse is 640.

4.—There are 500 square yards in the land adjoining for the use of the pupils.

5.—The water-closets are built of wood; there is one for each sex; they are kept clean.

6.—The schoolhouse contains but one room, which contains 640 square, and 6,400 cubic, feet.

7.—The average number of pupils assembled had been 42.

8.—The school is ventilated by four windows which slide up and down.

9.—The annual average on the books had been—males, 28; females, 27; the average number in daily attendance had been—males, 20; females, 22.

10.—The maximum age of males is 14; minimum, 4; the maximum of females, 15; and the minimum, 4 years.

11.—The number of classes is five; the average number in each class is 8; the maximum and minimum age in each class is—in the first class, 15 and 10; in the second, 11 and 9; in the third, 8 and 7; in the fourth, 7 and 6; and in the fifth class, 7 and 4 years respectively.

12.—The pupils attend school each day for 6 hours; there is cessation of study for one hour. School commences at 9 and terminates at 4 o'clock; such of the pupils as do not go home to dinner engage in play.

13.—There is one holiday in each week; there are two vacations in the year, one at Christmas, the other at Easter, the duration of the former is 3 weeks, of the latter 4 days.

14.—The total number of days appropriated to school studies during the year had been 235.

- 15.—I cannot reply to this question.
- 16.—I do not know how many children there are in this district who do not attend this school.
- 17.—The weekly charge for each pupil is 6d. ; there is no charge for books ; and the total annual charge is £1 1s. 9d. for each pupil.
- 18.—The amount of school fees from pupils for the year ending the 30th September, 1858, was £45 14s. 9d., which was appropriated by the teacher to his own use ; the only other source of support was £87 10s. from Government ; and the total amount from these two sources was £133 4s. 9d.
- 19.—The total annual average cost of each pupil was £3 3s. 9d., for the year ending the 30th September, 1858.
- 20.—The subjects of instruction given to each class are—to the first class, reading, writing, spelling, grammar, geography, arithmetic, Christian doctrine, history ; the time given to each of these subjects, arithmetic excepted, is 20 minutes ; the time devoted to arithmetic is 1½ hour ; to the second class the same as the first, history excepted ; to the third class, reading, writing, arithmetic, Christian doctrine ; to the fourth class, reading and writing ; and to the fifth class, reading and spelling ; the time given to the various classes is about 20 minutes.
- 21.—The books in the first class are the Christian Brothers' third book of reading lessons, grammar, geography, arithmetic, Reeve's history of the Bible, Fleury's historical catechism, Christian doctrine ; the books in the second class are, Christian Brothers' second book of reading lessons, grammar, geography, arithmetic, and Christian doctrine ; in the third class, the books are the Christian Brothers' second book of reading, Christian doctrine ; the books in the fourth class are, Christian Brothers' sequel to first book of reading and Christian doctrine ; and in the fifth class, first book of reading. Most of the above books are in a bad condition, and there is an insufficiency of them, especially for the junior classes.
- 22.—There are in the school maps of Europe, Asia, The World, and Australasia—the last is an old one and of little use—maps of America, Africa, and Australia are required
- 23.—To preserve discipline moral means are principally used, physical ones, sometimes ; there are no written or oral instructions that I am aware of from any person or body of persons.
- 24.—The pupils are examined twice a year by the clergyman of the district ; prizes, consisting of religious books, are awarded once a year.
- 25.—The school is officially visited by the clergyman of the district only, the average of whose visits may be once a week.
- 26.—The name of the head teacher is John Baker.
- 27.—There are no assistant teachers of any kind.
- 28.—The birthplace of the head teacher is Cork, Ireland.
- 29.—Age of the above, 36 years.
- 30.—Date of appointment to present office, October, 1856.
- 31.—The teacher was trained as such.
- 32.—The teacher was trained at Cork by Presentation Brothers ; the time occupied in training was six months ; the institution issued no certificates of competency.
- 33.—
- 34.—The annual salary of the head and only teacher is £87 10s.
- 35.—The fees of the teacher are £45 14s. 9d.
- 36.—The total annual income of the teacher is £133 4s. 9d.
- 37.—The religious instruction given is that contained in the Christian doctrine, historical catechism, and is given once a day by the teacher. The school is visited by a Catholic clergyman, whose name is Rev. W. H. Johnson ; the Christian doctrine, historical catechism, and Reeve's history of the Bible are the books used in the school for religious purposes.

WINDSOR.—(MIXED.)

- 1.—Church-street, Windsor.
- 2.—The schoolhouse is constructed of wood. The present condition is good, if the plastering only were repaired.
- 3.—The area is 640 square feet.
- 4.—The ground for the use of the pupils is 9,120 square yards.
- 5.—The water-closets are of wood, and by no means in a good condition at present. They are about erecting new ones in their place.
- 6.—The school contains 640 square feet, and 5,760 cubic feet.
- 7.—The average number assembled there during the last year is 44.
- 8.—The schoolroom is ventilated by opening 3 doors and 6 windows.
- 9.—The average on the roll-book during last year was 35 boys and 30 girls ; and the average daily attendance, 24 boys and 20 girls.
- 10.—The maximum age of boys is 13 years, and the minimum 4 years. The maximum age of girls is 13 years, and minimum 4 years.

11.—The number of classes is four. In the first class there are, on an average, 4 boys and 5 girls. Maximum age of boys, 13 years; and of girls, 13 years. Minimum age of boys is 9 years; and of girls, 10 years. In the second class there are, on an average, 12 boys and 6 girls. Maximum age of boys is 12 years; and of girls, 10 years. Minimum age of boys is 7 years; and of girls, 8 years. In the third class there are, on an average, 5 boys and 4 girls. Maximum age of boys 9 years; and of girls, 9 years. Minimum age of boys is 6 years; and of girls, 6 years. In the fourth class there are, on an average, 4 boys and 6 girls. Maximum age of boys in this class is 6 years; and of girls, 7 years. And the minimum age of boys is 4 years; and of girls, 4 years.

12.—The pupils attend the school for 6 hours each day; commencing at 9 o'clock a.m., and terminating at 4 o'clock p.m. There is a cessation of studies from 12 to 1 o'clock, when they go to dinner and play. The attendance on Saturdays is from 9 to 12 o'clock.

13.—There are no more than 6 or 7 holidays throughout the year occurring on week days; these are religiously observed. There are 2 vacations in the year—one of a fortnight at Christmas, and the other of one week at Easter.

14.—The total number of days appropriated to school studies during the year is 243 days, exclusive of half of Saturdays.

15.—The pupils remain in the school on an average;—boys 2 years, and girls $1\frac{1}{2}$ years, from their entrance to their leaving it.

16.—The number of children from 5 to 15 years of age in the town, that do not usually attend the school, is about 6 boys and 8 girls.

17.—The weekly charge for instruction is from 3d. to 1s. each.

18.—The annual amount of school fees received from the pupils during the twelve months ending the 30th September, 1858, was £48 2s. 1d., appropriated to the support of the teacher; the Government salary for the same period was £78 15s. The total amount was £126 17s. 1d.

19.—The average annual cost of the education of each pupil was £2 4s. 6d., in the period above-mentioned.

20.—The subjects of instruction given are:—To the first class: spelling and meaning task, reading, writing, arithmetic, book-keeping, Christian doctrine, historical catechism, history of England, English grammar, and geography. To the second class: spelling and meaning tasks, reading, writing, arithmetic, Christian doctrine, English history, English grammar, and geography. To the third class: spelling task, Christian doctrine, reading, writing, arithmetic tables. To the fourth class: spelling. The time allotted to spelling and Christian doctrine is one hour each day; to reading, an hour and a half; to writing and book-keeping, half an hour; to arithmetic, an hour and a half; to English grammar, half an hour; to geography, half an hour; and to history, half an hour.

21.—The titles of the books used in the first class are:—Christian doctrine, Carpenter's spelling, Christian Brothers' third book of reading lessons, school grammar of the English language, first book of modern geography, commercial arithmetic, Fleury's historical catechism Dolman's catechism of English history, Reeve's history of the Holy Bible, and Reeve's history of the church. In the second class:—Christian doctrine, Carpenter's spelling, Christian Brothers' second book of reading lessons, grammar, geography, arithmetic, and history as in first class. In the third class:—First book of reading lessons, and sequel to the first book. In the fourth class:—Christian Brothers' spelling and reading tablet lessons. The present condition of them is, in general, good, and their number adequate.

22.—National School maps of Europe, Asia, Africa, and America; Mercator's map of The World, a map of New Holland, map of New South Wales and Victoria, map of the British Isles, and a map of Palestine.

23.—Pupils are punished for disorderly behaviour and neglect of study by placing them on their knees, and giving them from 3 to 6 slaps on the hand with a rod, and making them write an exercise in the hour of cessation from study.

24.—The pupils are examined previous to vacation at Christmas, and books are then given as prizes to the most deserving.

25.—The school is visited very frequently by the Rev. Dr. Hallinan, the pastor. He spends half an hour in general in each visit.

26.—The teacher's name is Patrick Hynes.

27.—Mrs. Hynes assists in the school.

28.—Ireland is the birthplace of both.

29.—The teacher's age is about 45 years.

30.—Appointed 1st June, 1854.

31.—

32.—Not trained as a teacher.

33.—Has been employed in teaching since his leaving school.

34.—The annual amount of salary of teacher is £78 15s.

35.—Fees exclusive of salary, £48 2s. 1d.

36.—Total annual income derived from the school, £126 17s. 1d.

37.—The Rev. Dr. Hallinan, the pastor, generally gives religious instruction whenever he visits the school. The book he uses on such occasions is the Christian doctrine.

WAVERLEY.—(MIXED.)

- 1.—Waverley.
- 2.—Wood; present condition tolerable.
- 3.—512 square feet.
- 4.—140 square yards.
- 5.—Two closets, in good condition.
- 6.—One room, 512 square feet, 6,144 cubic feet.
- 7.—About 26.
- 8.—Three windows on one side, and two on opposite side.
- 9.—On the books, 18 boys, 20 girls; attendance, 13 boys, 13 girls.
- 10.—Boys, from 10½ to 4½; girls, from 12 to 3 (at the present time.)
- 11.—Five mixed classes, and one only girls; average in each class, from 4 to 5; first reading class from 12 to 7; second, from 10 to 7; third, from 8 to 6; fourth, from 8 to 5; fifth, from 5 to 4½; sixth, 3.
- 12.—5½ hours; from 9 a.m. to 12:30 p.m., and from 2 to 4 p.m.; from 12:30 to 2 scholars go home to dine.
- 13.—Saturday only in each week; and two vacations, three or four days at Easter and a fortnight at Christmas.
- 14.—About 236 days.
- 15.—From a few weeks to four and five years.
- 16.—Cannot answer this.
- 17.—Weekly, from 3d. to 1s.; no charge for books.
- 18.—£42 1s. 7d. to support of teacher; from Government, £52 10s.; total amount, £94 11s. 7d.
- 19.—Annual cost of each child, £3 15s. 8d.
- 20.—First, second, and third classes, geography and grammar, about 45 minutes two days in the week; fourth and fifth, 20 minutes two days per week; first, second, third, and sixth classes, reading and spelling 30 minutes each day; fourth and fifth, 1 hour each day; first class, arithmetic 45 minutes four days each week; second and third, 45 minutes every day; first class, dictation or letter writing, 45 minutes one day per week; all classes, Christian doctrine, 30 minutes each day; first, second, and third classes learn historical catechism, 15 minutes two days a week. All who are able write in copy books, and on slates, 20 minutes each day. English grammar, by the Christian Brothers; first book of modern geography; spelling assistant, by Thos. Carpenter; commercial arithmetic, the first, second, and third books of reading lessons, sequel to first book of reading lessons, all by the Christian Brothers; Reeve's history of the Bible, an abridgment of Christian doctrine, historical catechism, by the Abbé Fleury.
- 21.—First class—third book of reading lessons, and English grammar, by Christian Brothers, Carpenter's spelling, modern geography, arithmetic, sometimes Reeve's history of the Bible, Christian doctrine, and historical catechism. Second class—second book of reading lessons, and all the rest as above. Third class—sequel to first book of reading lessons; other lessons as above, only in smaller quantity. Most of the books in bad condition; require a fresh supply of nearly all the kinds named, and histories of England needed.
- 22.—One map of The World (Mercator's) and two Hemispheres; prints, and other maps, much wanted.
- 23.—Chiefly moral suasion; physical punishment occasionally resorted to.
- 24.—Once, yearly, by the Catholic inspector of schools; no prizes or rewards of merit.
- 25.—By the Catholic Inspector; once a year, and for about three hours, and by the clergyman of the district occasionally. Copy of inspector's report, under date 22nd December, 1858:—"I have examined the children of this school in Christian doctrine, reading, spelling, grammar, and geography, and have been much pleased with their answering. They acquitted themselves very creditably; they were very orderly and attentive. Their writing was very good."
- 26.—Ann Mary Oddie.
- 27.—As monitors, Mary Ann Hooper and Catherine Walsh; no assistant teachers.
- 28.—Both in the neighborhood of Waverley.
- 29.—12 and 10, respectively.
- 30.—Appointment of mistress, January, 1855.
- 31.—No.
- 32.—
- 33.—14 years' experience in teaching in private families, and schools.
- 34, 35, & 36.—See answer No. 18; no paid assistants.
- 37.—From Christian doctrine every day in the week, Saturday excepted, by the mistress. Christian doctrine. Visiting clergyman Roman Catholic.

YASS.

- 1.—Yass.
- 2.—Material, brick ; condition, good ; needs ceiling and enlargement.
- 3.—329 square feet.
- 4.—8,470 square yards.
- 5.—Material, brick ; condition, good.
- 6.—329 square feet, 3,948 cubic feet.
- 7.—From 40 to 52.
- 8.—Two windows and a door, open.
- 9.—Average, during 6 months, ended 31st December, 1858, on the books, 53 ; attending, 42.
- 10.—Maximum, 17 years, minimum, 5 years.
- 11.—Four classes : in first, 12, age 14 years and 5 years ; in second, 10, age 13 years and 8 years ; in third, 13, age 15 years and 9 years ; in fourth, 7, age 17 years and 12 years.
- 12.—6 hours ; commences at 9 o'clock a.m., and closes at 4 o'clock p.m. ; 9 to 9:10, prayer ; 12 to 12:15, prayer, and roll called ; 1 to 2, dinner and recreation ; 3 to 3:45, catechism ; 3:45 to 4, prayer.
- 13.—From 1 o'clock on Saturday ; two vacations, one at Easter, during 2 weeks, 1 at Christmas, during 3 weeks.
- 14.—About 240 days.
- 15.—Some have continued three years, others only one month.
- 16.—Cannot say the number.
- 17.—From 6d. to 1s. per week ; none for books ; from £1 4s. to £2 8s. per annum.
- 18.—Amount received during the three months ending 30th Sept., 1858, £20 15s. 6d. ; received from Government, £16 10s. ; total amount, £37 5s. 6d.
- 19.—Total cost of each pupil during the same, 6s. 0½d.
- 20.—To first class—reading and spelling, 3 hours ; prayers, 30 minutes ; writing, 50 minutes ; counting, 45 ; catechism, 45 minutes. Second class—writing, 50 minutes ; reading, 1 hour ; arithmetic, 1 hour ; spelling, 45 minutes ; grammar, 30 minutes ; tables, 30 minutes ; praying, 30 minutes ; catechism, 45 minutes. Third class—writing, 50 minutes ; reading and spelling, 45 minutes ; grammar, 1 hour ; arithmetic, 1 hour ; geography, 1 hour ; praying, 30 minutes ; catechism, 45 minutes. Fourth class—arithmetic, &c., 50 minutes ; grammar, 30 minutes ; writing, 30 minutes ; geometry, 1 hour ; reading, 30 minutes ; dictation, 15 minutes ; geography, 30 minutes ; history, 30 minutes ; praying, 30 minutes ; catechism, 45 minutes.
- 21.—First reading book, in tablet form, condition good ; second, third, and fourth reading books, condition bad ; school grammar, first book of modern geography, condition very bad ; arithmetic, part 1, commercial arithmetic, in two parts, condition very bad (the forementioned works are by the Christian Brothers ; spelling book, by Dr. Young ; plain geometry, by Chambers ; mensuration, by the Commissioners, Ireland ; history (modern) by Peter Fredet ; book-keeping, by Morrison. The number is inadequate to the wants of the school.
- 22.—Large Map of The World, small map of British Isles, small map of Holy Land, a blackboard, 4 flat desks, 10 forms ; condition good ; needed—a large map of Europe, a large map of Asia, of Africa, of America, and of Australia.
- 23.—Confinement after-hours, kneeling, and slap with a switch on the hands ; no instruction received on the subject.
- 24.—Twice a year, examined by the Roman Catholic clergyman ; prizes are given once a year, books.
- 25.—By none, officially ; no report exists.
- 26.—John Jacob.
- 27.—None.
- 28.—Ireland.
- 29.—31 years.
- 30.—1st of June, 1858.
- 31.—Trained.
- 32.—At the Model School, Parramatta, Sydney, during two months ; have no certificate.
- 33.—Had nine years' experience as teacher under the Board of National Education, Ireland.
- 34.—£60.
- 35.—About £80.
- 36.—About £140.
- 37.—Catechism, daily, by teacher ; the Rev. Mr. Bermingham and the Rev. Mr. M'Alroy, Roman Catholics. An abridgment of Christian doctrine, by His Grace the Archbishop of Sydney, and the catechism of perseverance.

No. 2.

ST. ANDREW'S.—(PRIMARY—MIXED.)

- 1.—Old Burial Ground.
- 2.—Constructed of stone ; present condition, very good ; needs no enlargement.
- 3.—Schoolroom, 45 feet long, 17 feet wide ; $45 \times 17 = 765$ square feet.
- 4.—A very small space.
- 5.—Very good.
- 6.—Length, 45 feet ; width, 17 feet ; height to top of the side wall, 12 feet ; $45 \times 17 \times 12 = 9,180$ cubic feet.
- 7.—Annual average, 63.
- 8.—Hinged windows, and ventilators in the roof.
- 9.—Annual average on roll, 46 boys and 54 girls = 100 ; annual average attendance, 27 boys and 36 girls = 63.
- 10.—Age, from 6 to 14.
- 11.—Three classes ; present average in each class, 31 ; in 1st class—age, from 9 to 14 ; 2nd class, from 8 to 11 ; third class, from 6 to 9.
- 12.—School duties, 5 hours each day, from 9 to 12 a.m. and from 2 to 4 p.m.
- 13.—Every Saturday, with public holidays ; vacations—a fortnight at Christmas, a week at Easter, and a week in June.

- 14.—No. of school days in the year, 234.
- 15.—The population is very fluctuating, and consequently the length of time which some children attend is very short.
- 16.—Most of the Protestant children in the parish attend school.
- 17.—Weekly charge, from 9d. to 1s.; those unable to pay receive gratuitous instruction. The children provide their own copy-books; other books, &c., are supplied by the Denominational Board. Total annual charge for each pupil, £1 14s. 4d.
- 18.—Annual amount of school fees, £108 5s. 3d., appropriated to the benefit of the teacher. £195 15s. 3d., total amount.
- 19.—£195 15s. 3d. ÷ 63 = £3 2s. 1 $\frac{3}{4}$ d., average annual total cost of the education of each pupil.
- 20.—Assembling, singing and prayer, quarter of an hour each morning. Subjects—1st class: Scripture, three-quarters of an hour every day, except Friday; catechism, three-quarters of an hour every Friday; geography, half an hour every Monday, Wednesday and Friday; grammar, half an hour every Tuesday and Thursday; writing, half an hour every day; dictation, half an hour every Tuesday and Thursday; mental arithmetic, half an hour every Tuesday and Thursday; mapping, half an hour every Wednesday and Friday; reading and spelling, 1 hour every Monday, Wednesday, and Friday; Latin and Greek roots, half an hour every Monday and Wednesday; history, 1 hour every Tuesday and Thursday; arithmetic, 1 hour every day. 2nd class: Scripture, catechism, geography, grammar, writing, and arithmetic, the same as 1st class; reading and spelling, 1 hour every day; dictation, half an hour every Monday, Wednesday, and Friday; arithmetical tables, half an hour every Tuesday and Thursday; mapping, half an hour every Tuesday and Thursday. 3rd class: Scripture, catechism, and arithmetic, the same as 1st class; reading and spelling, 1 $\frac{1}{2}$ hours every day; arithmetical table, half an hour every day; writing on slates, half an hour every day; writing on paper, half an hour every day.
- 21.—1st class—Bibles and Testament, English grammar, published by the Irish National Board; first arithmetic, ditto ditto; spelling, taught by dictation, by Richard Bithell, C.T.; fourth book, by the Society for Promoting Christian Knowledge; English history, ditto ditto; geography, ditto ditto. 2nd class—Bible and Testament, grammar, geography, and dictation, the same as 1st class; third book, by the Society for Promoting Christian Knowledge; first arithmetic, by the Irish National Board. 3rd class—Bible and Testament; second book, by the Society for Promoting Christian Knowledge; arithmetic, on blackboard.
- 22.—Maps, &c.:—The World, Europe, Asia, Africa, America, England, The British Isles, Australia, Palestine, countries of the Old Testament, and countries of the New Testament; three sheets Johnston's illustrations of natural philosophy, and blackboard.
- 23.—Confinement and extra lessons after school hours, and the "cane" under aggravated circumstances.
- 24.—Examined by the Rev. G. King, M.A.; books, as prizes of merit, distributed yearly.
- 25.—Visited frequently by the Rev. G. King, M.A.; and inspected twice a year by Mr. Cuthbert, inspector of Church of England schools.
- 26.—Alexander Adams.
- 27.—No paid monitors.
- 28.—Near Enniskillen, county Fermanagh, Ireland.
- 29.—23 years.
- 30.—1st October, 1858.
- 31 & 32.—Not trained at any institution.
- 33.—Was an assistant teacher for a year and nine months, and taught a public school three years and eight months, previous to the present appointment.
- 34.—£87 10s. per annum from the Denominational Board.
- 35.—£108 5s. 3d., school fees received during the year.
- 36.—£195 15s. 3d., total annual income of the teacher.
- 37.—Religious instruction given weekly by the Rev. G. King, M.A., the incumbent. Subjects—Bible and catechism.

• ST. ANDREW'S.—(INFANT.)

- 1.—Old Burial Ground.
- 2.—Constructed of stone; present condition very good, needs no enlargement.
- 3.—Schoolroom, 27 $\frac{1}{2}$ feet long and 17 feet wide; 27 $\frac{1}{2}$ by 17 = 467 $\frac{1}{2}$ square feet.
- 4.—A very small space.
- 5.—Very good.
- 6.—Length, 27 $\frac{1}{2}$ feet; width, 17 feet; height to the top of the side wall, 12 feet: 27 $\frac{1}{2}$ by 17 by 12 = 5,610 cubic feet.
- 7.—Annual average, 79.
- 8.—Hinged windows and ventilators in the roof.
- 9.—Annual average on roll, 50 boys, 65 girls = 115. Do. attendance, 39 boys, 40 girls = 79.
- 10.—Age, from 3 to 8.
- 11.—Four classes; present average in each class, 26. In 1st class, age from 6 to 8; 2nd class, from 5 to 7; 3rd class, from 4 to 5; 4th class, from 3 to 5.
- 12.—School duties, 5 hours each day, from 9 to 12 a.m. and from 2 to 4 p.m., except half an hour relaxation from 10 $\frac{1}{4}$ to 11 a.m.

- 13.—Every Saturday, with public holidays. Vacations—a fortnight at Christmas, a week at Easter, and a week in June.
- 14.—Number of school days in the year, 234.
- 15.—The population is very fluctuating, and, consequently, the length of time which some children attend is very short.
- 16.—Most of the Protestant children in the parish attend school.
- 17.—Weekly charge, 6d. Those unable to pay receive gratuitous instruction. Books, tablets, &c., are supplied by the Denominational Board. Total annual charge for each pupil, 14s. 8d.
- 18.—Annual amount of school fees, £58 13s. 6d., appropriated to the benefit of the teacher; £119 18s. 6d., total amount.
- 19.—£119 18s. 6d. ÷ 79 = £1 10s. 4½d., average annual total cost of the education of each pupil.
- 20.—Assembling, singing, and prayer, quarter of an hour every morning. Subjects, 1st and 2nd class: arithmetical tables, half an hour every Monday, Tuesday, and Thursday; catechism, half an hour every Wednesday and Friday; scripture, half an hour every day; infant school songs quarter of an hour every day; reading and spelling, 2 hours every day; natural history, half an hour every Monday, Wednesday, and Friday; object lesson and singing, half an hour every Tuesday and Thursday; writing on slates, half an hour every day; relaxation, half an hour every day, from 10½ to 11 a.m. 3rd class: arithmetical tables, catechism, Scripture, infant school songs, natural history, object lesson and singing, writing on slates, and recess the same as 1st class; spelling, 2 hours every day. 4th class: arithmetical tables, catechism, Scripture, infant school songs, natural history, object lesson and singing, and recess the same as 1st class; learning hymns, &c., half an hour every day; letters and spelling, 2 hours every day.
- 21.—Books used in the school: lesson book, No. 1, published by the Society for Promoting Christian Knowledge; primer, ditto; tablet lessons; catechism, taught orally.
- 22.—24 sheets, &c., illustrations of natural history; blackboard.
- 23.—Confinement and extra lessons after school hours, and “the cane” under aggravated circumstances.
- 24.—Examined by the Rev. G. King, M.A. Books, as prizes of merit, distributed yearly.
- 25.—Visited frequently by the Rev. G. King, M.A., and inspected twice a year by Mr. Cuthbert, inspector of Church of England schools. State of the school, very fair.
- 26.—Jane Mellor.
- 27.—No paid monitors.
- 28.—Uttoxeter, Staffordshire, England.
- 29.—
- 30.—17th February, 1855.
- 31.—St. James’ Model School.
- 32.—A short period.
- 33.—
- 34.—£61 5s. per annum from the Denominational Board.
- 35.—£58 13s. 6d., school fees received during the year.
- 36.—£119 18s. 6d., total annual income of the teacher.
- 37.—Religious instruction given weekly by the Rev. G. King, M.A., the incumbent.
- Subjects—Bible and catechism.

APPIN.—(MIXED.)

- 1.—Appin.
- 2.—Schoolhouse private property, rented by teacher.
- 3.—Length of schoolroom, 22 feet; breadth, 17 feet; height, 9 feet.
- 8.—Three windows, two doors, and one chimney.
- 9.—Daily average during the year, 3 boys and 10 girls.
- 10.—Eldest boy 16, youngest 7; eldest girl 12, youngest 5.
- 11.—First class from 10 to 5, second class from 8 to 12, third class from 8 to 16.
- 12.—5 hours; from 9 till 12, and from 1 till 3—intermediate hour for dinner.
- 13.—One day (Saturday); a week at Easter and Whitsun., and a fortnight at Christmas.
- 14.—226 days
- 17.—6d. and 9d. per week.
- 18.—£20 from parents; annual stipend, £52 10s.; total, £72 10s.
- 19.—56s. per head.
- 20.—History, grammar, geography, reading and spelling, catechism, arithmetic, writing.
- 21.—Titles of books used in the school:—First, second, and third reading books, history of England, Mitchell’s Australia, elements of geography, English school grammar, arithmetical tables, National school book No. 3. A fourth reading book is greatly needed for the elder scholars.
- 22.—1 map of The World, 1 ditto of Australasia, 1 ditto of Europe, 1 ditto of England and Wales, 2 of the Holy Land; all in good condition. No others required.
- 23.—Standing on the form, and detention during the dinner hour.
- 24.—Inspected by the Rev. Mr. Sparling, 16 times during the year; no prizes given.
- 25.—By the Diocesan Inspector.
- 26.—Mary Jane Simons.
- 28.—Born in the Old Kent Road, London.
- 29.—In the year 1830.

- 30.—March 12, 1857.
 32.—Monitor for two years at the British and Foreign Schools, Borough Road, London.
 33.—10 years' experience.
 36.—£72 10s.
 37.—Religious instruction, once a day, by the teacher. List of books for such instruction:—Bibles, Testaments, common prayer, primers, Sunday religious tracts, church catechism. The church catechism, broken into short sentences, is a book much required.

ASHFIELD.—(MIXED.)

- 1.—Ashfield.
 2.—A slab building, in bad condition, and not in any respect adapted for a school.
 3.—211.
 4.—2,663 square yards.
 5.—Weatherboard; one seat; out of repair, and quite full.
 6.—One room only. 211 superficial square feet, and 1,508 cubic feet.
 7.—29.
 8.—Two windows to open, and apertures between each slab.
 9.—On the books, 23 boys; 18 girls. In attendance, 17 boys; 12 girls.
 10.—Boys—maximum, 15; minimum, 5. Girls—maximum, 14; minimum, 4.
 11.—Four each, boys and girls.
 12.—5, viz.,—morning, 9 to 12; afternoon, 2 to 4. Interval—dinner, &c.
 13.—The Saturday in each week. Three weeks at Christmas; Good Friday; Easter week; 26th January (anniversary of the Colony), and Queen's Birthday.
 14.—238.
 15.—The attendance so irregular it is impossible to say.
 16.—Not known. There is another public school in the village.
 17.—6d., 9d., and 1s. per week. Total annual charge, 13s. 11¼d. No charge for books (See question 19.)
 18.—Fees from children, £28 12s., appropriated to the teacher to enable him to exist. Government salary, £70. Total amount from all sources toward the support of the school, £98 12s.
 19.—Divided by the number actually attending the school, £2 8s. 1¼d.; and by the average number, £3 8s.
 20.—First and second class:—Monday—Old Testament, grammar, arithmetic, geography, reading; Tuesday—New Testament, geography, arithmetic, history, church catechism; Wednesday—Old Testament, dictation, &c., history, grammar, exercises; Thursday—New Testament, grammar, geography, reading, church catechism; Friday—Old Testament, geography, reading, grammar exercises, dictation. Writing in copy-books, and written arithmetic, every day. Third class:—Writing, arithmetic, reading, dictation, and spelling, every day, varied according to circumstances, and church catechism on Tuesday and Thursday. Fourth class:—Reading, spelling, catechism, &c. Time allotted to each subject from half an hour to three-quarters of an hour.
 21.—First class:—Bible, class reading book, fourth book of lessons, history of England, English grammar, geography, and church catechism. Second class:—New Testament, third book, fourth book of lessons, grammar, geography, and church catechism. Third class:—New Testament, second book, sequel No. 1 to second book of lessons, and church catechism. Fourth class:—First reading book, first book of lessons, reading series, and lesson cards.
 22.—In the school:—Maps—The World, Asia, Australasia, Palestine, Syria (Old Testament), Syria (New Testament), and St. Paul's travels. Maps required:—Europe, Africa, and England and Wales.
 23.—As mild as possible to be effective. Corporal punishment avoided except in extreme cases; generally additional lessons after school hours. No written or other instructions on this subject ever received by the teacher.
 24.—Four times by the Rev. T. H. Wilkinson. No rewards given since Christmas, 1857.
 25.—W. J. Cuthbert, Esq., Diocesan inspector, twice, and the greater part of the day on each occasion.
 26.—William Henry Maybury.
 27.—Mistress, Agnes Eliza Maybury.
 28.—Worcester, England; both.
 29.—Teacher, 44; mistress, 14.
 30.—First of March, 1856.
 31.—Not.
 32.—See No. 31 question.
 33.—Three years teacher of the school at Canterbury, and a few weeks at St. James' Model School. Before adopting the occupation of a teacher was a commercial agent in England.
 34.—Teacher, £70.
 35.—£28 12s.
 36.—£98 12s.
 37.—Principally by the teacher, when opportunities offer. Sometimes visited by the Rev. T. H. Wilkinson, of the Church of England.

BATHURST.—(MIXED.)

- 1.—Bathurst.
(Nos. 2 to 6.)—The schoolhouse belonging to the Church of England is in course of erection on the ground allotted for the purpose, contiguous to All Saints' Church. It is in an unfinished state; upwards of £800 has been subscribed and expended, and the building is now standing still for want of funds to complete it.
- 2.—The school is held, and has been since 1849, in a room or rooms belonging to the teacher, for which he pays the rent; at present there is but one room so occupied; built of brick; a separate building from the dwelling-house; with fireplace, brick floor, and an open shingled roof; the room is in a tolerable state of repair.
- 3.— $33\frac{1}{2}$ superficial yards, or 300 superficial feet.
- 4.—The master allows the pupils, during the dinner recess, the use of the yard in which the schoolroom is situated.
- 5.—2 detached water-closets, both at present in bad repair, and in need of cleansing and repairing.
- 6.—1 room of 300 superficial feet; the cubic measure I cannot state; the walls of the room being $7\frac{1}{2}$ feet high, surmounted by an open roof, which I have no means of measuring.
- 7.—At present 34 boys and 29 girls are assembled in this one room; the numbers vary in a trifling degree, from illness, occasional absences, &c.
- 8.—None, but what is afforded by the chimney and the open roof.
- 9.—Last year the average numbers on the books were 102, but who were assembled in two rooms.
- 10.—15 years and 5 years.
- 11.—Five classes. First class, 1 boy, maximum age 13 years; 1 girl, ditto 15 years. Second class, 7 boys, maximum age 13, minimum age 10 years; 2 girls, maximum age 10, minimum age 9 years. Third class, 9 boys, maximum age 10, minimum age 8 years; 11 girls, maximum age 15, minimum age 8 years. Fourth class, 11 boys, maximum age 11, minimum age 7 years; 13 girls, maximum age 11, minimum age 6 years. Fifth class, 9 boys, maximum age 6, minimum age 5 years; 5 girls, maximum age 6, minimum age 5 years.
- 12.—5 hours 20 minutes; commencing at 9 a. m. till 12-10 noon, and from 2 p. m. till 4-10 p. m.; from 12-10 noon till 2 p. m. for refreshment and recreation.
- 13.—Saturday in each week, holiday; 3 vacations, 6 days at Easter, 8 days at Mid-winter, and 14 days at Christmas.
- 14.—233 days; viz., 365 — 132.
- 15.—The average length of the period from the time of the pupils, first entrance to the time of their leaving school has been about 5 years.
- 16.—I have no means of ascertaining.
- 17.—A weekly sum not exceeding 1s.; in many cases not one-half that amount, and in some cases no payment at all is received; some parents pay monthly or quarterly at the same rate.
- 18.—During the 12 months ending September 30, 1858, the money received from the pupils was £163 14s. 2d., from the Government, £87 10s.; total, £251 4s. 2d. from all sources towards the support of the school during that period; appropriated to the master's use, out of which he had to pay rent, and the expenses of keeping school, firing, stationery, and incidental expenses.
- 19.— $£251\ 4s.\ 2d. \div 102 = £2\ 9s.\ 3d.$, total cost of education of each pupil.
- 20.—9 till $9\frac{1}{2}$, each day, opening prayer and Scripture reading, a collective lesson. Monday:—First class, $9\frac{1}{2}$ till 12—the time nearly equally divided—geography, catechism of history, dictation, and arithmetic; 2 till 4 p. m., writing, reading, and arithmetic—girls, needlework. Second class, $9\frac{1}{2}$ till 12, geography, spelling, dictation, and arithmetic; 2 till 4 p. m., writing, and reading history—girls, needlework. Third and fourth classes, $9\frac{1}{2}$ till 12, writing, grammar, spelling, and arithmetic—girls, needlework; 2 till 4 p. m., arithmetic and reading. Fifth class, $9\frac{1}{2}$ till 12, and 2 till 4 p. m., each day, alphabet and syllables, learning to read in first and second books of lessons, writing on slates, and exercises in numbers. Tuesday:—First class, $9\frac{1}{2}$ till 12, writing, grammar, grammatical exercises, and catechism of astronomy; 2 till 4 p. m., arithmetic, and reading. Second class, $9\frac{1}{2}$ till 12, writing, grammar, spelling, and grammatical exercises; 2 till 4 p. m., reading and arithmetic. Third and fourth classes, $9\frac{1}{2}$ till 12, elements of geography, spelling, and dictation; 2 till 4 p. m., writing, and reading. Wednesday:—First class, $9\frac{1}{2}$ till 12, geography, catechism of history, dictation, and arithmetic; 2 till 4 p. m., writing, reading, and arithmetic. Second class, $9\frac{1}{2}$ till 12, geography, spelling, dictation, and arithmetic; 2 till 4 p. m., writing, and reading history. Third and fourth classes, $9\frac{1}{2}$ till 12, writing, grammar, spelling, and arithmetic; 2 till 4 p. m., arithmetic, and reading. Thursday:—First class, $9\frac{1}{2}$ till 12, writing, grammar, grammatical exercises in writing, and catechism of astronomy; 2 till 4 p. m., arithmetic, and reading—girls, needlework. Second class, $9\frac{1}{2}$ till 12, writing, grammar, spelling, and grammatical exercises; 2 till 4 p. m., reading and arithmetic—girls, needlework. Third and fourth classes, $9\frac{1}{2}$ till 12, elements of geography, spelling, and dictation—girls, needlework; 2 till 4 p. m., writing and reading. Friday:—First class, $9\frac{1}{2}$ till 12, repetition of geography, grammar, history, and astronomy, and mental arithmetic; 2 till 4 p. m., tables and arithmetic in class, and scriptural instruction. Second class, $9\frac{1}{2}$ till 12, repetition of geography, grammar, and spelling, and mental arithmetic; 2 till 4 p. m., tables and arithmetic, scriptural instruction and catechism. Third and fourth classes, $9\frac{1}{2}$ till 12, repetition of lessons, spelling, geography, and grammar; 2 till 4 p. m., tables and arithmetic, scriptural instruction and catechism. 12 till 10m. past, closing school; 4 till 10m. past, prayer and closing school.

21.—First and second classes, compendium of geography, in good condition; English grammar, ditto; Bonsworth's geography for young Australians, ditto, 12 required; Ludlow's class book, ditto; sixth reading book, ditto; fourth reading book, ditto, 6 required. Third and fourth classes, elements of geography, in a dilapidated condition, 24 required; English grammars, in good condition; third reading book, ditto, 6 required; sequel to second book, requiring renewal, 12 required. Fifth class, first book, requiring renewal, 24 required; sequel to second reading book, ditto, 12 required. All the classes, Bibles, requiring renewal, 12 required; Testaments, ditto, 12 required; church catechisms, ditto, 50 required. In use in the school, not supplied by the Board,—Catechisms of history of England and astronomy, arithmetics, and Carpenter's spelling-book. Books required: fifth reading books, second reading books, and second sequel to ditto, alphabet and syllables in tablets, figures and writing characters, elements of geometry, treatise on mensuration, treatise on arithmetic, first book of arithmetic, book-keeping and key to ditto, arithmetical tablet.

22.—Maps of The World, Africa, Palestine during the time of Our Saviour, Europe, and Australasia; required, maps of Palestine divided into tribes, of Asia, America, Great Britain, and Ireland, diagrams, &c., for elementary instruction, blackboard and easel, and school clock, &c.

23.—Principally confinement after school hours, with lessons; corporal punishment with the cane as little resorted to as possible, in conformity with instructions received some years since from the Central Denominational School Board.

24.—An annual examination at Christmas in each year by the Rev. Chairman, assisted by the members of the Local Board; prizes of books were distributed at Christmas, 1857. Examined by W. J. Cuthbert, Esq., 24 August, 1857; time occupied, one day.

25.—The school is weekly visited by one or both of the clergyman at Bathurst, members of the Local Board.

26.—J. L. Darney.

27.—No paid assistant teachers; the master is assisted in the duties of the school by one of his daughters, and some of the elder scholars as monitors; and the girls are taught needlework by Mrs. Darney.

28.—Master born at Surrey, England.

29.—50 years.

30.—January 1st, 1849.

31.—Not trained as a teacher.

32.—

33.—5 years a private tutor; master of Church of England school, Kelso, from January, 1840, to May, 1841; master of a private school in Bathurst, from May, 1841, till appointment to present school, in 1849; 14 years of experience in teaching previous to undertaking present employment.

34.—£87 10s. per annum, Government salary.

35.—Fees from parents of pupils.

36.—At present not more than £183 10s. from all sources.

37.—Scriptural reading and explanation each morning from 9 till 9½; the school visited every week by one or both of the Church of England clergymen at Bathurst, viz., the Rev. T. Sharpe, M.A., and the Rev. G. M. Fox; the books used for religious instruction are the Holy Scriptures and church catechisms, &c.

BURWOOD.—(MIXED.)

1.—Burwood, Longbottom, Parramatta Road.

2.—The schoolhouse is a brick building on a stone foundation, a shingle roof; in good repair.

3.—The area of the schoolhouse contains 800 superficial square feet.

4.—There is no land adjoining the schoolhouse for the use of the pupils.

5.—There is one water-closet for the use of the pupils, built with bricks, and in good repair.

6.—There is only one room, which contains 800 superficial square feet, and 9,600 cubic feet.

7.—The average number of pupils usually assembled is 46.

8.—The room is well ventilated, having 6 windows that can be raised and a chimney.

9.—The annual average number on the books is 46, and the average number attending the school is 46—31 boys, 15 girls.

10.—The maximum and minimum age of the pupils is—males, 15 and 4; females, 12 and 3 years.

11.—The school is divided into four classes; average number in each class, 12; maximum and minimum age of each class is—1st class, 15 and 17; 2nd class, 10 and 4; 3rd class, 7 and 4; 4th class, 5 and 3 years.

12.—The pupils attend the school 5 hours each day; commencing at 9 a.m. and ending at 4 p.m.; there is a cessation of 2 hours, from 12 to 2, which is occupied in dining and recreation.

13.—There is a holiday on Saturday in each week; and three vacations during the year—1 week at Easter, 1 week in June, and 2 weeks at Christmas.

14.—There are about 236 school days in the year.

15.—This question I cannot answer accurately.

- 16.—I cannot answer this question.
- 17.—The fee charged at this school is 1s. per week to those who can afford to pay it, and 6d. to others.
- 18.—The amount of school fees received from the pupils during the year ending 30th September, 1858, is £39 14s.; this amount is part of the teacher's income; amount received from the Denominational School Board, £70; total amount received, £109 14s.
- 19.—The average annual cost of the education of each pupil is £2 7s. 8½d.
- 20.—Reading and spelling, writing, arithmetic, grammar, and geography, church catechism; there is about $\frac{3}{4}$ of an hour allotted to each of these subjects.
- 21.—The books used in this school are the Bible, history of England, the Roman empire, first, second, third, and fourth books, the primer, faith and duty of a Christian, chief truths, &c., &c.; most of the books are in a bad condition; the school is in want of a supply of new books.
- 22.—The furniture of the school consists of 5 desks, 17 benches, 1 table, 1 chair, 1 desk-stool, a clock, and 7 maps in good condition; a blackboard is wanted.
- 23.—The cane is used when required.
- 24.—The Diocesan Inspector of Church of England Schools, occasionally; there are no prizes or rewards given to the children.
- 25.—The school is visited by the Rev. M. D. Meares, Mrs. Meares, and other ladies residing at Burwood. The Rev. M. D. Meares visited the school 31 times during the year 1858.
- 26.—John Watts.
- 27.—Ada Moffat.
- 28.—England.
- 29.—John Watts, 58; Ada Moffat, 31.
- 30.—September 1, 1850.
- 31.—Not trained as a teacher.
- 32.—Nil.
- 33.—One week at St. James' School; commercial agent.
- 34.—Annual salary of head teacher, £70.
- 35.—Amount of school fees, £39 14s.
- 36.—Total amount of income, £109 14s.
- 37.—The children receive religious instruction from the Rev. M. D. Meares, minister of the Church of England at Burwood; the books used are the Bible and church catechism.

CAMDEN.—(MIXED AND INFANTS.)

- 1.—St. John's School, Camden.
- 2.—The primary school is constructed of bricks, and is in good repair. In consequence of its inefficient size, and an increase in the number of pupils, a slab building has been erected for an infant school, but this is far too small, in very bad repair, and quite unfit for the purpose.
- 3.—Primary school, 32 feet by 16 feet = 512 square feet. Infant school, 14 feet 6 inches by 11 feet 6 inches = 166·75 square feet.
- 4.—None.
- 5.—A very unsuitable slab building in bad repair, and the only one for the use of both boys and girls.
- 6.—Primary school, superficial area 512, No. of cubic feet, 6,144; infant school, superficial area 166·75, No. of cubic feet, 1,667·5.
- 7.—Primary school, boys, 26; girls, 25: total 51. Infant school, boys, 27; girls, 21: total, 48.
- 8.—Trap-door in the roof, and by the windows.
- 9.—Boys, 68; girls, 58: total, 126; boys, 53; girls, 46: total, 99.
- 10.—Boys, from 3 to 14 years; girls, from 3 to 12 years.
- 11.—Primary school, three classes—First class, 26; ages from 8 to 14 years; average age, boys, 11; girls, 10; second class, 21; ages from 7 to 12 years; average age, boys, 9; girls, 9½; third class, 19; ages from 7 to 10 years; average age, boys, 8; girls, 8½. Infant school, 3 classes—First class, 22; ages from 6 to 10 years; average age, boys, 7½; girls, 8; second class, 19; ages from 4 to 8 years; average age, boys, 6; girls, 6; third class, 19; ages from 3 to 7 years; average age, boys, 5; girls, 5.
- 12.—5 hours; from 9 to 12½ a.m., and from 2 to 4 p.m.; the interval from 12½ a.m. to 2 p.m. is the children's dinner time.
- 13.—Every Saturday is a holiday; three vacations in each year, viz.:—2 weeks at Christmas, 1 week at Easter, and 1 in July.
- 14.—About 238 days.
- 15.—About 3 years.
- 16.—Cannot obtain any reliable information.
- 17.—6d. per week, or 6s. 6d. per quarter; £1 6s. per annum.
- 18.—Fees from pupils during the twelve months ending 30th September, 1858, £135 14s. 6d.; Government salary, £87 10s.: total amount received, £223 4s. 6d.
- 19.—Annual average total cost of each pupil, £2 5s. 1·15d.
- 20.—Monday and Wednesday, Tuesday and Thursday, and Friday, first, second, and third classes, from 9 to 9¼, opening school, singing, and prayers; Monday and Wednesday, Tuesday and Thursday, first, second, and third classes, 9¼ to 10, Scripture lessons; Friday, first,

first, second, and third class, catechism. Monday and Wednesday—from 10 to 10½ o'clock, first class, writing in copies; second class, arithmetic; third class, reading; 10½ to 11, first, second, and third classes, home lessons and recreation; 11 to 11½, first class, reading and geography; second class, writing in copies; third class, arithmetic; 11½ to 12, first class, arithmetic; second class, reading; third class, writing in copies; 12 to 12½, first, second, and third classes, singing; 2 to 2½, first class, reading; second class, arithmetic; third class, reading; 2½ to 3, first class, grammar; second class, reading; third class, writing on slates; 3 to 3½, first class, arithmetic; second class, writing from dictation; third class, arithmetic; 3½ to 4, first class, writing from dictation; second and third class, mental arithmetic and tables. Tuesday and Thursday—from 10 to 10½, first class, writing in copies; second and third classes, grammar; 10½ to 11, first, second, and third classes, home lessons; 11 to 11½, first class, reading; second class, writing in copies; third class, arithmetic; 11½ to 12, first class, grammar; second class, arithmetic; third class, writing in copies; 12 to 12½, first class, arithmetic; second and third classes, reading; 2 to 2½, first class, reading; second class, arithmetic; third class, reading; 2½ to 3, first class, history and grammar; second class, reading; third class, arithmetic; 3 to 3½, first class, writing from dictation; second and third classes, geography; 3½ to 4, first, second, and third classes, object lessons. Friday—from 10 to 10½, first class, writing in copies; second class, mental arithmetic; third class, reading; 10½ to 11, first, second, and third classes, home lessons; 11 to 11½, first class, reading; second class, writing in copies; third class, mental arithmetic; 11½ to 12, first class, mental arithmetic; second class, reading; third class, writing in copies; 12 to 12½, first class, map drawing, second and third classes, slate arithmetic; 2 to 2½, first class, reading; second class, arithmetic; third class, reading; 2½ to 3, first class, grammar; second class, reading; third class, writing on slates; 3 to 3½, first class, arithmetic; second class, writing from dictation; third class, arithmetic; 3½ to 4, first class, writing from dictation; second and third classes, tables. Monday, Tuesday, Wednesday, Thursday, and Friday—from 4 to 4:10, closing the school, singing, and prayer. The girls are taught sewing on Monday, Wednesday, and Friday afternoon, from 2 to 4 o'clock.

CAMPBELLTOWN.—(MIXED.)

- 1.—Campbelltown.
- 2.—Built of brick, and in good condition.
- 3.—765 superficial square feet.
- 4.—3 acres 10 perches, attached to the schoolhouse.
- 5.—1 small weatherboard closet in bad condition—not sufficient.
- 6.—1 room containing 765 superficial square feet, and 9,180 cubic feet.
- 7.—65.
- 8.—4 small ventilators fixed in the ceiling.
- 9.—Average number on roll—boys, 34; girls, 46. Average number in attendance—boys, 29; girls, 34.
- 10.—Maximum and minimum ages—boys, 3 to 15; girls, 5 to 15.
- 11.—Eight classes; four boys and four girls. Average number in each class, 10; maximum and minimum age in each class—first class, boys 10 to 15, girls 10 to 15; second class, boys 9 to 12, girls 9 to 13; third class, boys 7 to 12, girls 5 to 10; fourth class, boys 3 to 6, girls 5 to 7.
- 12.—5 hours; commencing at 9 a.m., and closing at $\frac{1}{4}$ past 4 p.m.; an interval of $\frac{1}{4}$ of an hour allowed between 11 and 12 o'clock (to save constant interruption of school), and two hours, from 12 to 2, for dinner and recreation.
- 13.—1 holiday (Saturday) in each week; and 3 vacations during the year, viz., 1 week at Easter, 1 ditto at Midsummer, and 2 ditto at Christmas.
- 14.—239.
- 15.—Average length of stay, $3\frac{1}{2}$ years.
- 16.—A considerable number of children in the district do not attend the school; but it is impossible to say the exact number or age.
- 17.—Weekly charges—4d., 6d., 9d., and 1s.; quarterly, 5s., 7s. 6., and 10s.; annual charges range as follows—16s., 24s., 36s., and 40s.; no charge for books.
- 18.—Annual amount of fees received during the year ending 30th September, 1858, £63 10s. 8d.; appropriated by the teacher towards his support; the amount of salary received from Government, £87 10s.; total amount in support of school, £151 0s. 8d.
- 19.—Total annual average cost of each pupil, £2 7s. $11\frac{1}{4}$ d.
- 20.—Monday, Tuesday, Wednesday, Thursday, and Friday—first, second, and third classes: 9 to $9\frac{1}{4}$, inspecting cleanliness, opening school, prayer and singing, drill. Monday—first class: $9\frac{1}{4}$ to 10 Old Testament, 10 to 11 written arithmetic, 11 to $11\frac{1}{2}$ general geography, $11\frac{1}{2}$ to 12 reading; second class: $9\frac{1}{4}$ to 10 Old Testament, 10 to 11 written arithmetic, 11 to $11\frac{1}{2}$ general geography, $11\frac{1}{2}$ to 12 reading; third class: $9\frac{1}{4}$ to 10 writing on slates, 10 to $10\frac{1}{2}$ tables, $10\frac{1}{2}$ to 11 dictation and spelling, 11 to $11\frac{1}{2}$ reading, $11\frac{1}{2}$ to 12 Scripture lesson. Tuesday—first class: $9\frac{1}{4}$ to 10 New Testament, 10 to 11 written arithmetic, 11 to 12 grammar and etymology; second class: $9\frac{1}{4}$ to 10 New Testament, 10 to 11 written arithmetic, 11 to 12 grammar and etymology; third class: $9\frac{1}{4}$ to 10 writing on slates, 10 to 11 Scripture lesson, 11 to $11\frac{1}{2}$ reading, $11\frac{1}{2}$ to 12 dictation and spelling. Wednesday—first class: $9\frac{1}{4}$ to 10 Old Testament, 10 to 11 Australian geography, 11 to $11\frac{1}{2}$ reading, $11\frac{1}{2}$ to 12 dictation and spelling; second class: $9\frac{1}{4}$ to 10 Old Testament, 10 to 11 reading, 11 to $11\frac{1}{2}$ tables, $11\frac{1}{2}$ to 12 Church catechism; third class: $9\frac{1}{4}$ to 10 writing on slates, 10 to 11 reading, 11 to $11\frac{1}{2}$ Church catechism, $11\frac{1}{2}$ to 12 dictation and spelling. Thursday—first class: $9\frac{1}{4}$ to 10 New Testament, 10 to 11 grammar and etymology, 11 to 12 history; second class: $9\frac{1}{4}$ to 10 New Testament, 10 to 11 grammar and etymology, 11 to 12 history; third class: $9\frac{1}{4}$ to 10 writing on slates, 10 to 11 Scripture lesson, 11 to $11\frac{1}{2}$ reading, $11\frac{1}{2}$ to 12 dictation and spelling. Friday—first class: $9\frac{1}{4}$ to 10 familiar lecture, 10 to $10\frac{1}{2}$ dictation and spelling, $10\frac{1}{2}$ to 11 Church catechism, 11 to 12 written arithmetic; second class: $9\frac{1}{4}$ to 10 familiar lecture, 10 to $10\frac{1}{2}$ dictation and spelling, $10\frac{1}{2}$ to 11 Church catechism, 11 to 12 written arithmetic; third class: $9\frac{1}{4}$ to 10 writing on slates, 10 to $10\frac{1}{2}$ Scripture lesson, $10\frac{1}{2}$ to 11 Church catechism, 11 to $11\frac{1}{2}$ reading, $11\frac{1}{2}$ to 12 written arithmetic. Monday, Tuesday, Wednesday, Thursday, and Friday—first, second, and third classes: 12 to 12-10 closing school, saying grace. Monday—first class: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ dictation and spelling; second class: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ dictation and spelling; third class: 2 to 3 writing on slates, 3 to $3\frac{1}{2}$ reading. Tuesday—first class: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ mapping, &c.; second class: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ mapping, &c.; third class: 2 to 3 writing on slates, 3 to $3\frac{1}{2}$ reading. Wednesday—first class: 2 to 3 vocal music, 3 to $3\frac{1}{2}$ dictation and spelling; second class: 2 to 3 vocal music, 3 to $3\frac{1}{2}$ dictation and spelling; third class: 2 to 3 writing on slates, 3 to $3\frac{1}{2}$ tables. Thursday—first class: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ geometry; second class: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ geometry; third class: 2 to 3 writing on slates, 3 to $3\frac{1}{2}$ dictation and spelling. Friday—first and second classes: 2 to 3 writing in copy books, 3 to $3\frac{1}{2}$ extra drill; third class: 2 to 3 writing on slates, 3 to $3\frac{1}{2}$ extra drill. Monday, Tuesday, Wednesday, Thursday, and Friday—first, second, and third classes: $3\frac{1}{2}$ to 4 general instruction, 4 to 4-10 closing school, prayer, and singing. The girls are taught needlework on Monday, Wednesday, and Friday afternoons; the fourth class consists of infants learning the alphabet.
- 21.—Bible, Testament, prayer book, Church catechism, Scripture history, English ditto, Roman ditto, reading book for female schools, Australian geography, general ditto, arithmetic, grammar, table books, first class reading book, second ditto, third ditto, fourth ditto. The books now in use are in good condition, and quite adequate for the purpose to which they are adapted; the school is not supplied with easy reading books (fit for the third class children) which are much required.

22.—Map of The World (2), Europe, British Isles, Asia, North America, South America, Australia, Holy Land, Asia Minor; blackboard, geometryboard. The above are in good condition. A pair of globes would be a great acquisition.

23.—Punishments used in the school for the elder children consist of loss of position in class, caning, detention after school hours, and disgrace class; for the infants, fool's cap.

24.—Twice during the year by the Chairman and Local Board, and occasionally by inspector of Church of England schools; prizes will be given this year in the school for the first time at Midsummer, consisting of books.

25.—By the inspector of Church of England schools and the Local Board; the school was inspected three months since by the inspector—one day was taken up in the examination; the clergyman, as Chairman of the Local Board, visits the school once a week—no report exists. *Remarks*—When the present teacher took charge of the school it had fallen off considerably, owing to the unsettled state of the master; but since the permanent appointment of the present teacher it has increased, and is now in a flourishing condition.

26.—George R. Evans.

27.—No assistants except wife.

28.—25 years.

29.—Scotland, Ayrshire.

30.—16th October, 1858.

31.—Trained.

32.—At St. James' Model School; 4 months' training.

33.—Merchant's clerk.

34.—£87 10s.

35.—£63 10s.

36.—£151.

37.—See time table, No. 20. The school is visited by the Rev. E. Smith, Church of England minister. List of books—See No. 21.

CANBERRA.—(MIXED.)

1.—Canberra, in the district of Queanbeyan.

2.—Stone, with boarded floor and shingled roof.

3.—324.

4.—The school is situated on an open plain.

5.—2; stone; condition good.

6.—There is only one room; 324 superficial feet, 2,916 cubic feet.

7.—11.

8.—The room is unceiled, and sufficiently ventilated through the shingles.

9.—The average number on the roll:—boys, 9; girls, 14. Average attendance:—boys, 5; girls, 6.

10.—Maximum age of boys, 15; minimum, 6. Maximum age of girls, 15; minimum, 4.

11.—Number of classes, four; average in each, 6. Ages:—1st class:—maximum, 15; minimum, 10. 2nd class:—maximum, 13; minimum, 6. 3rd class:—maximum, 12; minimum, 8. 4th class:—maximum, 7; minimum, 4.

12.—School commences at 9. An interval of five minutes is allowed to each sex, for necessary purposes, at 11. They then resume studies till 12; from that hour till 1 p.m. for dinner and play; school recommences at 1 p.m. and closes at 3 p.m.

13.—A whole holiday on Saturday; a vacation of three weeks at Christmas and two days at Easter.

14.—236.

15.—The school having been open about eighteen months only, no fair average can be given.

16.—About 30, principally Roman Catholics.

17.—The weekly charge is 9d., or 9s. 9d. per quarter. No charge is made for books.

18.—£32; appropriated towards the support of teacher and family; salary from Denominational Board, £52 10s. Total, £84 10s.

19.—Dividing the above amount by the average number actually attending, viz., 23, will give the average cost for each pupil,—£3 13s. 5½d.

20.—Instruction is given in the following subjects:—1st class,—reading, writing, arithmetic, Bible history, catechism, spelling by dictation, grammar, geography, and history; 2nd class,—reading, writing, arithmetic, Bible history, catechism, spelling, grammar, and geography; 3rd class,—reading, writing, spelling, multiplication tables, and numeration; 4th class,—alphabet and 1st reading book, the formation of letters and figures, and the multiplication tables. To the girls needlework is taught by Mrs. Line. Owing to the very irregular attendance, it is impossible to teach the above subjects at any stated times. The time devoted to each subject is usually about half an hour.

21.—1st class:—Bible, 3rd and 4th book, English history, Scripture history, elements of geography, 1st book of arithmetic, &c. 2nd class:—2nd book, history of Our Saviour, miracles of Our Saviour, &c., 1st book of arithmetic. 3rd class:—reading series No. 1, lesson book No. 1, sheet lessons on Scripture and natural history. 4th class:—easy lesson book No. 1. The books at present in use are in good condition. Grammar books are needed. The other books are adequate in point of numbers.

22.—A map of The World, ditto of Europe, Asia, Africa, America, and of England and Wales.

- 23.—Very little correction is needed ; when it is, a small switch is employed across the hands or shoulders.
- 24.—Only one public examination has taken place. The school is frequently visited by the Chairman of the Local Board. Prizes were given at Easter, 1858 (books).
- 25.—The only visitor (officially) is the Chairman of Local Board ; generally once a week.
- 26.—Thomas Line.
- 27.—Mrs. Thomas Line (needlework.)
- 28.—England.
- 29.—30.
- 30.—July 1st, 1857.
- 31.—Not trained.
- 32.—
- 33.—Attended St. James' Model School for three months ; previous occupation, traveller.
- 34.—£52 10s.
- 35.—The office of clerk to St. John's, at a salary of £10 per annum.
- 36.—£94 10s.
- 37.—Religious and moral instruction is blended with the reading lessons ; every day ; by the teacher. Visited by Rev. Pierre Galliard Smith, Church of England. The Bible, catechism and reading books.

CASTLEREAGH.—(MIXED.)

- 1.—Castlereagh.
- 2.—Chiefly of brick, present condition very indifferent and needs repairs.
- 3.—42 feet long, 18 feet broad.
- 4.—9,680 yards.
- 5.—None.
- 6.—
- 7.—
- 8.—
- 9.—No books have been received in this school as yet ; the average number attending the school, 9 boys, 10 girls.
- 10.—Boys, from 13 to 5 ; girls, from 13 to 6.
- 11.—Average number in each class, 6 ; first class, from 13 to 9 ; second class, from 14 to 9 ; third class, from 10 to 8 ; fourth class, from 10 to 7 ; fifth class, from 8 to 5.
- 12.—School commences at 9 o'clock and terminates at 4 o'clock ; one hour for recreation from 12 o'clock until 1 o'clock.
- 13.—One holiday in each week ; and two vacations during the year—one commencing at Easter, other at Christmas.
- 14.—252 days.
- 15.—Six years.
- 16.—
- 17.—Each pupil pays from 3s. to 2s. per month ; the total annual charge from £1 16s. to £1 4s.
- 18.—£30.
- 19.—£1 11s.
- 20.—First class : reading, writing, arithmetic, geography, and grammar taught orally, writing from dictation and memory ; second class : reading, writing, and arithmetic, geography and grammar taught orally ; third class : reading, writing, and arithmetic ; fourth class : reading ; fifth class : reading.
- 21.—First class, M'Culloch's course of reading, history of England, the scholar's spelling assistant, tutor's assistant ; second class, the scholar's companion, spelling book, introduction to arithmetic ; third class, reading lesson book ; fourth class, reading lesson book ; fifth class, child's first book. The books in present use are nearly worn out, and we are very much in want of books for every class.
- 22.—Two maps of Australia, and a small globe ; we want a map of The World and Palestine.
- 23.—When the pupils talk during school hours, they stand on a stool ; if they are careless and do not know their lessons, they are deprived of the hour of recreation, and confined in a room ; no written instructions have been received.
- 24.—The pupils are examined twice a year by the Rev. T. Unwin ; no prizes given.
- 25.—By Rev. T. Unwin and the diocesan inspector every half-year.
- 26.—Maria Theresa Fulton.
- 27.—Clara Fulton.
- 28.—Australia.
- 29.—Ages, 34 and 15.
- 30.—1st January, 1859.
- 31.—No.
- 32.—
- 33.—4 years a governess in a private family, 12 years keeping a school.

21.—Primary school books:—First class:—Bible, New Testament, faith and duty, Church catechisms, prayer book, history of England, fourth book (Irish National), Lennie's grammar, Goodache's arithmetic, Nesbit's mensuration, arithmetical questions (on cards, principally from Thompson and Colenso), arithmetical tables. Second class:—Same books as first, with the exception of history of England and Nesbit's mensuration, and in addition, third book (Irish National). Third class:—New Testament, faith and duty, Church catechism, prayer book, second sequel second book (Irish National), Lennie's grammar, arithmetical questions, and tables. Fourth class:—Church catechism, second book (Irish National), and arithmetical tables. Condition of books indifferent; Bibles and Testaments are needed. It would be well if an edition of the I. N. S. books, adapted to the Colony, could be published.—Infant school books:—Simpson's primer, parables, Sermon on the Mount, miracles, history of Our Saviour, reading series No. 1 and No. 2, first reading book, second book, New Testament, second sequel to second lesson book. Books in good condition. Easy reading books wanted.

22.—Primary school maps, &c.:—Maps of Europe, Asia, Africa, America, 2 of The World, 2 of England and Wales, North America, South America, 2 of Palestine (Old Testament) and 2 of Palestine (New Testament), of travels of St. Paul, of Australasia, and of New South Wales; 1 musicboard, 1 blackboard, 1 harmonium, 2 desks for teachers, two presses and shelves, 1 school-bell, 2 tables, 18 desks. Condition good; another blackboard required.—Infant school maps, &c.:—1 map of The World, 12 country scenes, 56 prints of animals, &c., 12 natural history cards, 2 alphabets, 1 set Scripture lessons, 1 sheet proportionate sizes of animals, 12 small lesson posts, 1 large ditto, 1 large slate, 1 arithmeticon.

23.—Discipline is maintained by corporal punishment, and by impositions according to age, sex, or disposition. No written instructions have been received on this subject.

24.—No examination of pupils, except in reading, during the year, the actual proficiency of each pupil being determined by a system of daily marks. Marks for punctuality, regularity, and application, are daily registered, and books selected by the teachers, and approved by the clergyman, are once a year distributed to the most deserving.

25.—The school is visited by the Rev. W. H. Walsh, on an average, two or three times during the week. No account has been kept of the length of his visits, and the teachers know of no existing report on the state of the school.

26.—Primary school—head teacher, Samuel Turton. Infant school—G. R. Wood.

27.—Primary school—assistants, S. F. Ward, Ann Turton, John Turton. Infant school—assistant, Sarah Wood.

28.—Samuel Turton,	Battacolo,	29,	30,	31.
George Wood,	London,	30,	1849,	Not trained.
Seth Ward,	Crockerton,	33,	1854,	ditto.
Anne Turton,	Fenton,	50,	1847,	ditto.
John Turton,	Narellan,	16,	1857,	ditto.
Sarah Wood,	Paris,	26,	1854,	ditto.

32.—

33.—Samuel Turton; school at Narellan 7½ years, Sunday-school in England 5 years; educated at the Grammar-school, Newark-on-Trent, Nottingham; grocer.—George Wood, assistant teacher, in this school 4 years; no previous occupation. Seth Ward, assistant teacher, St. James' Grammar-school 1 year; private schools 6 years. Educated at King Edward VI. Grammar-school, Bruton, Somerset.

34.—Salary, Samuel Turton £87 10s.; G. Wood, £61 5s.; S. Ward, £50..

35.—Primary school—Fees, &c., £486 12s. 6d.—Infant school, £190 19s. 9d.

36.—Samuel Turton, £454; S. F. Ward, £136 15s. 10d.; G. R. Wood, £252 4s. 9d. Three assistants, nil.

37.—Instruction in the principles of religion is given every day by the teachers.* The books used are—the Bible, church catechism, and faith and duty of a Christian.

COBBIDEE.—(MIXED.)

1.—Cobbidee, County of Cumberland.

2.—Of brick, and in good condition.

3.—1,630 square feet; 35 feet by 18 feet.

5.—Two water-closets, in good condition.

6.—A second room; 168; 14 feet by 12 feet.

7.—From 38 to 44 pupils.

8.—By opening the windows and doors.

9.—Average on the books—boys, 328; girls, 368. Average attendance, 40 to 50.

10.—From 4 to 12 years; girls from 3 to 12 years.

11.—Six classes. First class, No. 10, age 7 to 13; second class, No. 2, age 6 to 11; third class, No. 8, age 6 to 13; fourth class, No. 9, age 4 to 10; fifth class, No. 7, age 4 to 9; sixth class, No. 5, age 3 to 5.

12.—5 hours; commencing at 9 o'clock a.m., and closing at 4 o'clock p.m. Cessations—10-50 till 11, and from 12 till 1-15 o'clock, intervening time at dinner and play.

13.—One holiday in each week, Saturday; vacation as stated in rules.

14.—About 280 days.

15.—Unknown.

16.—Unknown.

17.—From 3s. to 6s. per quarter for instruction; no charge for books, pens, ink, slates, or pencils.

18.—Annual fees from pupils, £38; appropriated to the teacher; no other emolument. Received from the Denominational School Board, £70 annually.

19.—About £1 13s. yearly for each pupil.

20.—First and second classes, half an hour for spelling, &c.; half an hour for writing, half an hour for reading; 1 hour for arithmetic; half an hour for some kind of exercise. In the afternoon, half an hour for dictation, 1 hour for grammar or geography, half an hour for mental arithmetic, and half an hour for singing and prayer. The other classes are employed in reading, writing, spelling, and various other little or simple exercise.

21.—The Holy Bible; history of England and Greece; the class reading book; the third book, the second book, and first series; a small supply.

22.—Map of The World, Europe, Asia, Africa, America, England and Wales, Australia and Australasia, with maps of the Holy Land.

23.—Kindness.

24.—Annually, Easter Tuesday; rewards of merit by the clergyman at his own cost.

25.—By the diocesan inspector of schools, and the Rev. T. Hassall, minister, who visits it frequently and instructs them.

26.—Simeon King.

27.—No assistant except myself, A. C. King, wife of the above.

28.—England.

29.—S. King, 39 years; A. C. King, 28 years of age.

30.—September, 1856; A. C. King, 1 January, 1859. Present assistant teacher, Thos. Fiddian; age, 16; birthplace, Sydney; paid by myself.

31.—A trained teacher for private schools.

32.—Conducted a school of my own in England.

33.—See No. 32.

34.—£70 per annum; teacher's assistants not paid.

35.—About £38.

36.—About £108 per annum.

37.—I trust the Christian's religion taught daily. We have a good Sabbath school, superintended by the Rev. T. Hassall.

COLO.—

* The second master of the primary school holds office as a parochial visitor, or Scripture reader, and conducts the more systematic portion of the religious instruction on behalf of the superintending parochial clergyman.

COLO.—(MIXED.)

First book	12	24	36	
Sermon on the Mount	37	37	
Fifth class.				
Reading cards	122	

22.—Maps in good condition:—Palestine, countries mentioned in the Old Testament, countries mentioned in the New Testament, St. Paul's travels. Maps in bad condition:—The World, Europe, Asia, Africa, America, Australia. Fresh maps are required in place of the bad ones. One blackboard—one required; one clock, 4 desks—6 required; 20 forms, 122 cards, 2 sheets Johnson's diagrams of natural philosophy.

- 23.—By striking the hand with a cane; no instructions received.
 24.—Once every half year by the clergyman, who distributes books as prizes.
 25.—By the inspector of Church of England Schools, once every year; time occupied in inspecting the school, 6 hours.
 26.—Samuel Jackson Hardy.
 27.—
 28.—Templemore, Ireland.
 29.—26 years.
 30.—1st February, 1858.
 31.—
 32.—
 33.—Two years and a half experience previous to undertaking present appointment; occupation before adopting that of a teacher, clerk.
 34.—Government salary, £87 10s.
 35.—Pupils' fees, about £52 10s.
 36.—£140.
 37.—The children are instructed by the teacher every morning in accordance with the doctrines of the Church of England. The school is visited by the Rev. W. R. Croxton, Church of England minister. Books:—Faith and duty of a Christian, parables, lessons from the Bible, Messiahs, Sermon on the Mount, Church of England catechism.

DENHAM COURT.—(MIXED.)

- 1.—Denham Court.
- 2.—Very much out of repair; shingles and slabs rotten.
- 3.—Area of school, 325 feet.
- 4.—Playground, 1 acre, or 4,840 yards.
- 5.—Water-closets, none.
- 7.—Average daily attendance, 34.
- 9.—Number on the roll-book, 42; sexes nearly equal.
- 10.—Ages of pupils, from 4 to 14 years.
- 11.—Number of classes, four.
- 12.—Hours of tuition, from 9 a.m. to $\frac{1}{2}$ past 4 p.m.
- 13.—Holidays every Saturday, and 10 days at Christmas.
- 14.—School days during the year, 240.
- 15.—Average attendance before leaving school, 2 years.
- 17.—Weekly payments of 6d. each.
- 18.—Fees from scholars in 1858, £37.
- 20.—1st and 2nd classes: reading, writing, arithmetic, grammar, geography (orally), and miscellaneous questions, Scripture history; different branches taught according to attendance of children.
- 21.—Bibles, Testaments, third books, second books, chief truths, catechisms; sufficient at present.
- 22.—Maps of New South Wales, Syria, travels of St. Paul, Palestine; a map of The World very much wanted.
- 23.—Slight corporal punishment and confinement.
- 24.—By the diocesan inspector of schools.
- 25.—Visited daily by the clergyman unless from home.
- 26.—Annie Millar; age, 23; birthplace, Hunter's River.
- 31.—Trained at Narellan school for 4 years; appointed to present 1st July, 1858; total income fees and salary per annum, £87; religious instruction given daily; singing and prayer at opening and closing.

List of books issued from St. James' Model School to Denham Court, September, 1859:—12 primers, 12 catechisms, 6 second book, I.N.B., 12 first, do., 6 geography, do., 12 arithmetics, do., 24 slates, 1 set reading lessons on sheets, 1 map of The World.—
 J. COBURN.

EMU PLAINS.—(MIXED.)

- 1.—Emu Plains.
- 2.—School constructed of stone, and in good condition.
- 3.—Length, 36 feet; breadth, 18 feet; height, 12 feet.
- 4.—13,920 square yards.
- 5.—Constructed of wood, and not in good condition.
- 6, 7, 8, & 9.—There is only one room, which is well ventilated by means of the windows which are made to open for that purpose. The average number of pupils usually assembled is—boys, 19; girls, 14: total, 34. The average number on the books, 46.
- 10.—Boys, from 3 to 14; girls, from 4 to 14 years of age.
- 11.—Number of classes, three. Average number—1st class, 1; 2nd class, 9; 3rd class, 15.
15. Age—1st class, from 6 to 14 years of age; 2nd class—from 8 to 12; 3rd class—from 3 to 9.
- 12.—Number of hours, 5. Morning, from 9 o'clock till 12; afternoon, from 2 till 4; dinner recess, from 12 till 2.

13.—One day in each week (Saturday); two vacations in the year—duration of each, two weeks.

14.—240.

15.—6 years.

16.—There are in the district some 15, between the ages of 5 and 15, who do not attend any school.

17.—The annual sum charged to each pupil, £1 19s.; for books, 4s: total, £2 3s.

18.—School fees, £50, appropriated by the master for his own benefit; salary, £70; Diocesan Society, Penrith, £6: total, £126.

19.—£2 10s.

20, 21, & 22.—

23.—The system adopted at St. James' Model School.

24.—There are two public examinations in the year, at Christmas and Midwinter; are conducted by the clergyman, members of Local Board, and the master of the school. Prizes given at Christmas, and consist of books, selected mainly from the works of the Religious Tract Society.

25.—By the diocesan inspector of schools twice in the year. On one of the last two occasions the examination lasted two days.

26.—Thomas Parkes.

27.—None.

28.—England.

29.—30.

30.—1 May, 1859.

31.—Yes.

32 & 33.—St. James' Model School, for one month.

34.—Government salary, £70.

35.—£56.

36.—£126.

37.—The school is visited twice a week by the clergyman of the district. The books used by him for the purpose of giving religious instruction are the Bible and church catechism.

ENFIELD, LIVERPOOL ROAD.—(MIXED.)

1.—Enfield.

2.—The schoolhouse is a stone building.

3.—The area of the schoolhouse contains 702 superficial square feet.

4.—The playground is 44 square yards.

5.—There is one water-closet for the use of the pupils built of bricks, and in good repair.

6.—There is only one room, which contains 702 superficial square feet, and 10,530 cubic feet.

7.—The average number of pupils usually assembled is 31.

8.—The room is well ventilated, having 4 large windows and 3 doors one-third of each opening.

9.—The annual average number on the books is 45, and the average number attending the school is 31; boys 14, girls 17.

10.—The maximum and minimum age of the pupils is—males, 10 and 4; females, 13 and 4.

11.—The school is divided into 3 classes; average number in each class, 15. Maximum and minimum age of each class is—first class, 10 and 8; second class, 10 and 9; third class, 7 and 4 years.

12.

12.—The pupils attend the school $5\frac{1}{2}$ hours each day, commencing at 9 a.m. and ending at 4 p.m.; there is a cessation of $1\frac{1}{2}$ hours—12 $\frac{1}{2}$ till 2—which is occupied in dining and recreation.

13.—There is a holiday on Saturday in each week, and 3 vacations during the year—1 week at Easter, 1 week in June, and 2 weeks at Christmas.

14.—There are about 236 school days in the year.

15.—This question I cannot accurately answer.

16.—I cannot answer this question.

17.—The fee charged at this school is 1s. per week to those who can afford to pay it, and 6d. to others.

18.—The amount of school fees received from the pupils, during the year ending 28th February, 1859, was £36; this amount is part of the teacher's income; the amount received from the Denominational School Board was, up to the above period, £39. Total amount received, £75.

19.—The average annual cost of each pupil in educating is £1 13s. 4d.

20.—Reading and spelling, writing, arithmetic, grammar and geography, church catechism. There is about $\frac{2}{3}$ of an hour allotted to each of those subjects.

21.—The books used in this school are the Bible, Testament, first book, second book, third book, fourth book, the primer, faith and duty of a Christian, chief truths, &c., &c. The books are in good condition; the school is in want of a supply of more books.

22.—The furniture of the school consists of 6 desks, 18 stools, 1 table, 1 book-shelf, and 7 maps in good condition; a blackboard is wanted.

23.—The cane is used when required.

24.—The diocesan inspector of Church of England schools occasionally; there are no prizes or rewards given to the children.

25.—The school is visited by the Rev. M. D. Meares; the Rev. M. D. Meares visited the school 25 times during the year.

26.—George Body.

27.—Mary Body.

28.—Callington, Cornwall, England.

29.—George Body 56, and Mary Body 54.

30.—30 March, 1856, but previously taught the same school for 7 years.

31.—A trained teacher.

32.—At the National Central School, Baldwin's Gardens, Gray's Inn Lane, London, under the superintendence of the Rev. Dr. Bell, in the year 1827; was in training 7 months; a first class certificate was given me when I left the institution.

33.—Have been a teacher from 26 years of age.

34.—Annual salary of head teacher, £39.

35.—Amount of school fees, £36.

36.—Total amount of income, £75.

37.—The children receive religious instruction from the Rev. M. D. Meares, minister of the Church of England residing at Burwood; the books used are the Bible and the church catechism.

EAST BARGO.—(MIXED.)

1.—Wilton, East Bargo.

2.—Of wood, and in need of repair.

3.—576.

5.—Made of wood, and in bad repair.

6.—273.

7.—12.

8.—1 door, 2 windows.

9.—26; 12; 7 males, 5 females.

10.—13 and 5.

11.—4; 3.

12.— $5\frac{1}{2}$ hours; 9 a.m. to 4 p.m.; interval dinner and play.

13.—1 day in 1 week, 2 weeks at Christmas, 1 week at Easter.

14.—234.

15.—7 years.

16.—16 of other denominations.

17.—Children of the 1st and 2nd class, 24s.; the rest, 16s.

18.—£39 10s. 6d.

20.—History, grammar, geography, arithmetic, Scriptures, catechism; the whole time is allotted to these studies with reading, writing, and spelling, *i. e.* five hours a day, 5 times per week.

21.—12 Bibles, 9 Testaments, 12 grammars, 12 geographies, 6 English histories, 9 sequels, 12 catechisms, 6 arithmetics, 12 Scripture explanations, &c.

22.—12 prints, 1 map of World, 1 England, 1 Australia, 1 St. Paul's travels, 1 N. Syria, 1 S. Syria.

23.—Detention, and standing up on forms.

24.—Once a month, usually by the Rev. H. Sparling; no prizes.

26.—William Henry Stansmore.

28.—Margate, England.

29.—37 years.

30.—August, 1855.

31.—No.

32, 34, 35, 36, & 37.—See Answers to Nos. 18, 24, and 21.

GLEBE.—(MIXED.)

- 1.—Parish of St. John, Bishopthorpe, Glebe.
- 2.—Constructed of brick and stone, with shingled roof; requires no enlargement, no repairs, excepting lime whitening and painting internally.
- 3.—Contains 1,368 square feet internally.
- 4.—1,313 square yards.
- 5.—Constructed of brick, and in good repair, with accommodation for ten, exclusive of master's and mistress's closets.
- 6.—Boys' school contains 648 square feet, and 10,386 cubic feet; girls' school contains 720 square feet, and 11,520 cubic feet.
- 7.—74 boys and 30 girls.
- 8.—Open about 4 inches on sides, between top of wall and roof, also same along top of roof.
- 9.—103 boys and 38 girls.
- 10.—15 and $3\frac{1}{2}$ years, boys; $14\frac{1}{2}$ and 4 years, girls.
- 11.—3 classes of boys, and 3 of girls. Boys:—First class, average number 23; age, 15 to 12. Second class, 29; 12 to 7. Third class, 21; 8 to $3\frac{1}{2}$. Girls:—First class, average number, 7; age, $14\frac{1}{2}$ to 7. Second class, 9; $12\frac{1}{2}$ to 8. Third class, 14; 9 to 4.
- 12.—9 to 12 a.m. 2 to 4 p.m.; play, 11 to 11:15—12 to 2 dinner time.
- 13.—Holidays:—Saturday each week; vacation, 2 weeks, Midsummer and Midwinter; Christmas day, Good Friday, Anniversary of Colony.
- 14.—286 days.
- 15.—Not being established long enough to know.
- 16.—A great many in girls. On account of love of change, or desire to obtain employment as servants, are not easily induced to attend.
- 17.—The highest 1s., the lowest 6d.; no annual charge for books; depends on number of weeks in attendance.
- 18.—£160 16s. 2d., master keeps it; £87 10s. from Denominational Board; total, £248 7s.
- 19.—£2 7s. 6 $\frac{3}{4}$ d.
- 20.—Religious instruction, 5 hours; reading, depends on class, average 6 hours; writing, 5 hours; arithmetic, $7\frac{1}{2}$ hours; spelling, $1\frac{1}{2}$ hours. English history, $1\frac{1}{2}$ hours; English grammar, 2 hours; geography, 2 hours; taught only to the upper half, partly during the period the other subjects are being taught.
- 21.—The Holy Bible, book of common prayer, Ludlow's class reading book, 1 and 2 reading books (Irish National Board), lesson book, part 1 (S.P.C.K.), abridgment of Scriptures, Nos. 1, 2, 3 (Baxter), parables, miracles, Sermon on Mount. A number of books required on history, geography, and grammar, as there are none belonging to the school, and no means to procure them.
- 22.—12 desks, 36 ink-stands, 1 table, 1 clock, 2 blackboards; maps of The World, Europe, England and Wales, Australia (2), Palestine, St. Paul's travels.
- 23.—Corporal punishment, extra lessons, detention after school hours.
- 24.—From September, 1857, to September, 1858, twice; December 18th, by Rev. W. M. Cowper; March 17th, 1858, by Mr. Cuthbert, diocesan inspector. After examination, December, 1857, 16 books were given as prizes; on 22nd December, 1858, by Rev. W. Drake, when a few presents were given.
- 25.—Mr. J. C. Cuthbert, $2\frac{1}{2}$ hours.
- 26, 28, & 29.—John Fletcher, Lancaster, 33.
- 27, 28 & 29.—Mary Fletcher, Scarborough, Yorkshire, 27.
- 30.—Master, December, 1856; mistress, August, 1858.
- 31.—Yes.
- 32.—Apprenticed for 5 years, at 11 years of age, to Mr. C. S. Sidgwick, Skipton, Yorkshire, and in 1850 was 6 months in training at the National Society's Training Institution, Westminster; gained Government certificate, 1849—3 of third class.
- 33.—Mrs. Fletcher taught sewing in Conbury National School, Yorkshire.
- 34.—The school fees, and £87 10s. from Denominational Board; Mrs. Fletcher has nothing. P.S.—Mrs. Fletcher has resigned, and it is a source of anxiety how to obtain a schoolmistress, as the fees from girls are so precarious, and as no settled sum could be possibly promised. Girls there are in numbers, as before mentioned, attending seldom any school; provided, therefore, we could obtain a grant from Government to enable the Local Board to support her, during the period of establishing herself, the girls' school might prove equally efficient as that of the boys.
- 35.—None.
- 36.—Depends on school fees.
- 37.—Christianity, according to the doctrines of the United Church of England and Ireland; 1 hour every day; by master, occasionally by Rev. W. Drake; Bible, and prayer book. Visited by Rev. W. Drake, Minister of St. John's, Bishopthorpe.

GOULBURN.—(MIXED.)

- 1.—Goulburn.
- 2.—Brick, out of repair, requires to be considerably enlarged.
- 3.—1,855 superficial square feet.
- 4.—2,018 superficial square feet.
- 5.—Two, each containing four seats, all in good condition.
- 6.—Two rooms, 338 and 425 superficial square feet, 4,238 and 4,947 cubical feet.
- 7.—46 and 40.
- 8.—The windows formed to open from the bottom and the top pane from each of the eastern, gothic, gable windows removed.
- 9.—Number on the books, boys, 59; girls, 48; total, 107. Attendance, boys, 46; girls, 40; total, 86.
- 10.—Boys, maximum, 15; minimum, 4; girls, maximum, 16; minimum, 4.
- 11.—Seven classes: First class, 4 to 8; second class, 5 to 10; third class, 6 to 10; fourth class, 7 to 10; fifth class, 8 to 12; sixth class, 8 to 16; seventh class, 9 to 14.
- 12.—5 hours, viz., from 9 to 12 a.m.; 2 to 4 p.m. The noon cessation is employed by the children in getting their dinners, playing and preparing for their afternoon lessons.
- 13.—One, every Saturday; during the year, 25 days, viz., 10 at Christmas, 3 at Easter, 5 at Midwinter, and 7 on casual occasions, such as Queen's Birthday, &c.
- 14.—236 days actually in school, exclusive of Sundays.
- 15.—10 months; one-fourth of those who enter the school remain less than three months; one-fourth less than six months; one-fourth less than twelve months; one-seventh less than two years; and three twenty-eighths have been in the school from the time the present teacher took it.
- 16.—Not known.
- 17.—1s. weekly, or 21s. quarterly if not paid in advance. The books are purchased by the pupils, average about 2s. per annum.
- 18.—£151 9s. 6d. appropriated to the master's use, and £87 10s. received from Government; total, £238 19s. 6d.
- 19.—£238 19s. 6d. ÷ 108 = £2 2s. 4 $\frac{3}{4}$ d.; including books, £2 4s. 4 $\frac{3}{4}$ d.
- 20.—First class, the alphabet and counting; second class, reading, spelling, and simple rules, tables, and writing on slates; third class, the same as second class, reading from the second book of the Irish National series, Holy Scripture and Church of England catechism; fourth class, the same as second class, reading from the third book of the same series, Holy Scripture and Church of England catechism; fifth class, the same as fourth class, writing in copy-books, grammar taught orally from the lessons, mental arithmetic, and dictation; sixth class, history, reading and spelling with derivation from fourth book of same series, grammar from text book, dictation, slate and mental arithmetic, Scripture lessons with Scriptural proofs of Christian doctrine according to Church of England catechism; seventh class, ancient history, spelling, &c., from fifth book of same series, grammar and derivation from text book, analytical parsing, geography, mental arithmetic, arithmetic in theory and practice, dictation, and letter writing.
- Monday, Tuesday, Wednesday, and Thursday, 9 to 9.30, prayer and reading Holy Scripture, and conversation thereon; Mondays and Wednesdays, 9.30 to 10.20, first and third class, reading and spelling; second and fourth class, writing; fifth and seventh class, reading, spelling, and parsing; sixth class, writing; Tuesdays and Thursdays, first and third class, writing on slates; second and fourth class, reading, &c.; fifth and seventh class, writing; sixth class, reading and derivation; ten minutes recess. Monday and Wednesday, 10.30 to 11.15, first and third class, writing; second and fourth class, reading, &c.; fifth and seventh class, writing; sixth class, reading, spelling, and derivation; Tuesday and Thursday, first and third class, reading and spelling; second and fourth class, writing copy-books; fifth and seventh class, reading, spelling, and parsing; sixth class, writing. Monday and Wednesday, 11.15 to 12, first and third class, tables; second and fourth class, arithmetic; fifth and seventh class, arithmetic; sixth class, grammar; Tuesday and Thursday, first and third class, tables; second and fourth class, arithmetic; fifth and seventh class, arithmetic; sixth class, grammar; two hours recess. Monday, Tuesday, Wednesday, and Thursday, 2 to 3, girls sewing. Monday and Wednesday, 2 to 3, first, second, third, and fourth classes, tables and arithmetic; fifth, sixth, and seventh classes, arithmetic on blackboard; Tuesday and Thursday, 2 to 3, first and third class, tables; second and fourth class, arithmetic and tables; fifth, sixth, and seventh classes, arithmetic on blackboard; Monday and Wednesday, 3 to 4, first and third class, reading; second and fourth class, arithmetic; fifth and seventh class, geography; sixth class, arithmetic; Tuesday and Thursday, first and third class, reading; second and fourth class, slate arithmetic; fifth and seventh class, grammar; sixth class, arithmetic; 4 *et seq.*, singing, prayer, and dismissing school. Friday, 9.10 to 10.30, first and third class, reading and spelling; second, fourth, and fifth class, writing; sixth and seventh class, repeating Scripture lessons and explanation; 10.40 to 11.30, first and third class, writing on slates; second and fourth class, reading and Church catechism; fifth class, Church catechism; sixth and seventh class, writing; 11.30 to 12, first, second, third, and fourth class, conversation on the Bible; fifth, sixth, and seventh class, arithmetical tables; 1 to 2, first, second, third, and fourth classes, Church catechism; fifth, sixth, and seventh class, dictation; 2 to 4, first and third class, dictation; second and fourth class, lesson on common things and dictation; fifth, sixth, and seventh class, mental arithmetic.
- 21.—Irish National series of reading books from 1 to 5, Irish National grammar, geography, and arithmetic, spelling superseded by Sullivan, Bible, Testament, and Church of England catechism, copy-books; the teacher always keeps a stock on hand from which the pupils purchase; considered adequate.

22.—Maps of The World, Europe, Asia, North America, England, Australia (faint outline), Palestine (faint outline), Old and New Testaments, travels of St. Paul; all in useable condition; 1 blackboard, 4 desks and 1 table, and 14 benches. Wanted—a clock for each room, a blackboard, 2 tables, 2 desks, and map of Australia in bold outline.

23.—Moral force, such as standing on a form, keeping in school during playtime; when these fail, the cane; about five per cent. require corporal punishment; no instructions or observations on the subject in the school.

24.—Twice, viz., at Christmas and Midwinter by the master, in the presence of the Chairman and other members of the Local Board, and as many of the parents and friends of education as are disposed to come. Reward books for merit have been given once a year by the present master at his own option and expense, principally religious and historical books.

25.—By the Chairman and members of the Local Board four times during the year 1858, exclusive of the examination; such visits generally occupy half an hour.

26.—Theophilus Kirke.

27.—Maria Kirke and Eliza Wilson.

28.—Mrs. Kirke, at York; E. Wilson, at Bury.

29.—T. Kirke, 44; M. Kirke, 42; E. Wilson, 16.

30.—October 1st, 1857.

31.—Not.

32.—

33.—Nine years; draper and accountant.

34.—£87 10s.; pupil teacher paid out of the private funds of the teacher.

35 & 36.—See No. 18.

37.—The Bible every day for twenty minutes by the master, and once a week for two hours the Church of England catechism with Scripture illustrations, and by the resident clergyman of the Church of England at irregular intervals. Books used—the Bible and Church catechism.

HOLSWORTHY.—(MIXED.)

1.—Holsworthy, Liverpool.

2.—Wood; needs a little plastering.

3.—384 square feet.

4.—1,289 square yards.

5.—Wooden, containing two seats, one out of repair.

6.—384 superficial square feet; 5,760 cubic feet.

7.—17.

8.—1 ventilator at the top.

9.—Annual average on books, boys, 14; girls, 14; total, 28. Average attendance, boys, 9; girls, 8; total 17.

10.—No means of ascertaining, the people are so ignorant that they don't know the ages of their own children.

11.—Three classes; 9; 12; 7. (*Vide* reply No. 10.)

12.—5 hours per day; from 9 a.m. to 3.30 p.m.; recess for lunch and recreation 1 hour 30 minutes.

13.—1 holiday per week; 2 vacations, fortnight each, 1 at Christmas, 1 at Midwinter.

14.—237 days.

15.—New school, therefore not ascertainable.

16.—*Vide* No. 10.

17.—9d. and 6d. per week, no other charge; £1 16s. and £1 4s. per annum.

18.—Paid to teacher, £20 4s.; voluntary contributions, £14 6s. 3d.; Government, £27 10s.; total amount of support, £62 0s. 3d.

19.—Divided by 28, annual average actually attending, cost each child, £2 4s. 3d.

20.—Spelling, 1½ hours each day; reading, 1 hour ditto; writing, ¾ of an hour ditto; arithmetic, 1 hour ditto; religious, ½ an hour ditto; singing, ¼ of an hour ditto; tables, ¼ of an hour ditto. Same subjects and time for each class.

21.—Bible, Testament; two kinds of primer, S.P.C.K.; Watts' Hymns; second, third, and fourth books of Irish Board; third book, S.P.C.K.; tables and tablet lessons. Condition, fair; supply, enough; want history of England.

22.—1 blackboard, 4 feet by 4 feet; 1 iron tablet frame; maps needed.

23.—Punishments—reproof, tasks, corporal punishment, and expulsion.

24.—Twice by a student of Moore College; no periodical prizes.

25.—W. J. Cuthbert, Esq., and Rev. W. Hodgson, M.A., &c.; twice; 30 minutes.

26.—Elizabeth Stevenson Taylor.

27.—None.

28.—England.

29.—29.

30.—September, 1857.

31.—Not trained.

33.—Assistant teacher 18 months; none.

- 34.—Variable, at present £50.
 35.—£34 10s. 3d.
 36.—£62 0s. 3d.
 37.—Scriptural instruction, 30 minutes daily; teacher or Moore College student, Rev. W. Hodgson, Church of England; Bible, New Testament, religious primer, Watts' Hymns.

JAMBEROO.—(MIXED AND INFANTS.)

- 1.—Jamberoo, Illawarra.
 2.—Constructed of wood; in good repair; greatly needs the addition of a classroom.
 3.—800 square feet.
 4.—10,500 square yards.
 5.—1 weatherboard closet for sole use of pupils, enclosed with high paling fence; in thorough repair.
 6.—1 room only appropriated for teaching; superficial area, 800 square feet; contains 11,500 cubic feet.
 7.—Average assemblage of pupils, 70.
 8.—Four windows, opening 36 feet superficial; and two doors, opening 46 feet superficial. Escape for bad air through the roof.
 9.—Annual average on the books: boys, 45; girls, 35. Annual average attendance: boys, 40; girls, 30.
 10.—Boys, 15 years to 4 years; girls, 16 years to 4 years.
 11.—Six classes—1st, 5; 2nd, 9; 3rd, 17; 4th, 20; 5th, 17; 6th, 4. Maximum and minimum age in the 1st class, 16 years to 12 years; 2nd, 16 to 11; 3rd, 9 to 12; 4th, 13 to 8; 5th, 8 to 6; 6th, 6 to 4 years.
 12.—School hours, from 9 a.m. to 3 p.m. Cessation of study, from 12.30 to 1.30, allowed for dinner.
 13.—No holidays or half-holidays allowed; two vacations of two weeks each, one in Christmas and one in June.
 14.—233.
 15.—4 years.
 16.—No means of ascertaining.
 17.—Average charge per head for each pupil, 2s. 7d. per quarter; no charge for books; total annual charge, 11s. 6d.
 18.—£39 7s. 6d.; appropriated to the teacher's salary; £70 per annum from the Government; total amount from all sources, £109 7s. 6d.
 19.—£1 13s. 7½d.
 20.—Reading English—1st class, 30 minutes on 4 days of the week; 2nd ditto, ditto; 3rd ditto, ditto; 4th ditto, 30 minutes every day; 5th ditto, 1 hour every day; 6th ditto, ditto. Writing—1st class, 30 minutes every day; 2nd ditto, ditto; 3rd ditto, ditto; 4th ditto, 1 hour every day; 5th and 6th, ditto, ditto. English grammar—1st class, 30 minutes on 4 days of the week; 2nd ditto, ditto; 3rd ditto, ditto. Geography—1st class, 30 minutes every day; 2nd ditto, ditto; 3rd ditto, ditto; 4th ditto, ditto. Dictation—1st class, 30 minutes every day; 2nd ditto, ditto; 3rd ditto, 30 minutes on 4 days of the week. English history—1st class, 30 minutes on 4 days of the week; 2nd ditto, ditto; 3rd ditto, ditto. Music—1st, 2nd, and 3rd classes, for 30 minutes on 4 days of the week. Arithmetic—1st and 2nd classes 1½ hours on 4 days; 3rd ditto, 1 hour on 4 days a week; 4th ditto, 1½ hours every day. Scripture lessons—1st, 2nd, 3rd, and 4th classes, 30 minutes each day. Church catechism—1st, 2nd, 3rd, 4th, 5th, and 6th classes, 30 minutes on Fridays. Drill—1st, 2nd, 3rd; 4th, 5th, and 6th classes, 30 minutes on Fridays. Spelling—3rd and 4th classes, 30 minutes each day.
 21.—Books used in the 1st class: History of England (S.P.C.K.); fourth book (ditto), history of Rome, English grammar (Irish National), geography (Stewart's), arithmetic (Irish National), Sullivan's spelling book superseded. Books used in the 2nd class, same as above. Books used in the 3rd class: fourth book (Irish National), third book (ditto), English grammar (ditto), Stewart's geography, Bithell's dictation. Books used in the 4th class: second book (Irish National), second book (S.P.C.K.), arithmetic (Irish National), Stewart's geography, Mavor's spelling, tables (Irish National). Books used in the 5th and 6th classes: Simpson's primers. The books in present use are much worn; other kinds of books are needed; number of those in use are quite inadequate to the wants of the school.
 22.—Maps of The World, Asia, Africa, North and South America, Europe, England and Wales, Palestine, Canaan, Holy Land, travels of St Paul; blackboard; 12 prints, illustrative of Scripture history; 12 ditto ditto natural history; 12 ditto ditto the book and its story. The majority are nearly worn out; a new blackboard and easel are needed, a clock, musical diagrams, and globes.
 23.—System of discipline, mild and firm; corporal punishment seldom resorted to, and never excessive. The teacher has received written instructions on the subject in the "Rules for the management of Church of England schools in the middle district, 1853."
 24.—Two examinations in the year, by the chairman of the Local Board; prizes distributed once a year; they consist of books, toys, &c.
 25.—The school is visited by the diocesan inspector of schools, once a year; inspection, 5 hours.

- 26.—William Saunders.
 27.—Monitors : John Young, William Davis, John Saunders, Jeremiah Davis, John Davis, Mary Anne Young, Jessie Cole, James Barnes.
 28.—Head teacher, born in England; monitors, in Jamberoo, New South Wales.
 29.—Age of the head teacher, 34 years.
 30.—Appointed in January, 1849.
 31.—Trained.
 32.—Trained in the British Training Schools, for three years.
 34.—Salary, £70 per annum.
 35.—School fees, £39 7s. 6d.
 36.—£109 7s. 6d.
 37.—The religious instruction of the children attending the school embraces Scripture lessons, learning the Church catechism with explanations; every day; once a week, by the clergyman of the parish, on the other days by the teacher; visited frequently by the Rev. Percy J. Smith, of the Church of England; the books used for the purpose are—the Bible, Church catechism, Watts' hymns.

ST. JAMES' MODEL SCHOOLS.

PRIMARY SCHOOL (MIXED.) INFANT SCHOOL (MIXED.)

- 1.—St. James', Sydney.
 2.—Brick; in a fair state of repair.
 3.—67 × 42 = 2,814 square feet.
 4.—Boys' playground—34 yards × 18 yards = 612 square yards; girls' and infants' playground—58 yards × 12 yards = 696 square yards.
 5.—A stone building, divided into two parts; greatly in need of repairs.
 6.—The primary school has three rooms, viz., a large room and two classrooms; the infant school one room only:—

	ft.	ft.	sq. ft.	ft.	ft.	ft.	cub. ft.
Large room ...	42	× 37	= 1,554	and	42	× 37	× 15 = 23,310
Classroom (a)...	30	„ 21	„ 630	„	30	„ 21	„ 15 „ 9,450
„ (b)...	30	„ 21	„ 630	„	30	„ 21	„ 15 „ 9,450
Infant room ...	67	„ 42	„ 2,814	„	67	„ 42	„ 20 „ 56,280

- 7.—Primary school:—average number in each room, 40; sometimes all are in “large room.” Infant school:—average number in each room, 75.
 8.—By large windows in each side of the building, which are constructed so as to open and shut when required.
 9.—Primary school:—annual average on the books,—90 boys, 65 girls; average attendance,—68 boys, 52 girls. Infant school:—annual average on the books—50 boys, 55 girls; average attendance—36 boys, 39 girls.
 10.—Primary school:—maximum age, 14 years; minimum age, 7 years. Infant school:—maximum age, 8 years; minimum age, 3 years.
 11.—Primary school, six classes; average of 19 in each; and an advanced class, 7. 1st class:—boys—maximum age, 14 years; minimum age, 10 years: girls—maximum age, 14 years; minimum age, 10 years. 2nd class:—boys—maximum age, 12 years; minimum age, 10 years: girls—maximum age, 12 years; minimum age, 10 years. 3rd class:—boys—maximum age, 12 years; minimum age, 8 years: girls—maximum age, 13 years; minimum age, 9 years. 4th class:—boys—maximum age, 12 years; minimum age, 8 years: girls—maximum age, 10 years; minimum age, 8 years. 5th class:—boys—maximum age, 11 years; minimum age, 7 years: girls—maximum age, 10 years; minimum age, 8 years. 6th class:—boys—maximum age, 9 years; minimum age, 7 years: girls—maximum age, 8 years; minimum age, 7 years. Infant school, six classes; average of 12 in each. 1st class:—maximum age, 8 years; minimum age, 5 years. 2nd class:—maximum age, 7 years; minimum age, 4 years. 3rd class:—maximum age, 6 years; minimum age, 5 years. 4th class:—maximum age, 8 years; minimum age, 5 years. 5th class:—maximum age, 7 years; minimum age, 3 years. 6th class:—maximum age, 5 years; minimum age, 3 years.
 12.—5 hours; commencing at 9 a.m., terminating at 4 p.m.; from 12 a.m. to 2 p.m., a recess, during which the pupils eat their dinner and have recreation.
 13.—One holiday in each week (Saturday); two vacations in the year, of two weeks each, Midwinter and Christmas.
 14.—236.
 15.—
 16.—
 17.—Three weekly charges—6d., 9d., or 1s., as the parents can afford it.
 18.—Primary school amount of fees, £180; infant school amount of fees, £53; appropriated to form a part of the teacher's salary. Amount of salaries received from the Denominational Board, £112 10s. Total amount of support, £180 + £87 10s. + £25 + £53 = £345 10s.
 19.—£345 10s. ÷ 260 = about £1 6s. to each child.

N. B.—The girls have needlework from 2 to 3 p.m. each day.

21.—Primary school:—The class reading book, the third and fourth books (S.P.C.K.), the third book (I.N.B.), first reading book, 2nd lesson book, elements of geography, arithmetic (I.N.B.), history (S.P.C.K.), grammar (I.N.B.), Bithell's spelling book, table books, the Old and New Testaments, Scripture questions, abridgment of Scripture history, church catechism, primers; all in fair condition; required—2nd book (S.P.C.K.), and grammars (I.N.B.). Infant school:—Scripture plates, Scripture tablets, reading tablets, tablets of alphabet, tablet of Scripture alphabet, pence and multiplication tables, spelling tablet, sheet of animals, ball frame, box of bricks, numeral letters.

22.—Maps of The World, Europe, Asia, Africa, America (N. & S.), Australia, England, Palestine, St. Paul's travels, Johnston's illustration sheets, sheet of animals, patent abacus, blackboards, &c.

23.—The system of correction employed is as follows:—loss of place, bad marks, tasks; and when other means fail, corporal punishment is resorted to.

24.—Once in a year, Christmas, by the Local Board and diocesan inspector. Books are given as prizes; and to the boy and girl who have the greatest number of good marks for the year, Sir W. T. Denison, K.C.B., and Lady Denison, present a silver medal with the name of the boy or girl engraved thereon.

25.—Almost daily by some of the Local Board, or by the clergyman—the Rev. Canon Allwood, B.A., incumbent of St. James', and very often by the diocesan inspector, W. J. Cuthbert, Esq.

26.—Isaac Coburn, organizing master, &c.

27.—John Huffer, acting master of the school; female teacher, Fanny Maria Vaile; candidate teachers in training. Infant school—mistress, Jane Cameron.

28.—I. Coburn, England; J. Huffer, England; F. M. Vaile, England; J. Cameron, Scotland.

29.—26 years; 28 years; 29 years; 21 years of age.

30.—I. Coburn appointed master of the model school, September, 1855; and to present appointment (head teacher and organizing master), September, 1858; J. Huffer, September, 1858; F. M. Vaile, July, 1857; J. Cameron, infant mistress, February, 1858.

31.—I. Coburn and J. Huffer, trained as teachers.

32.—At the Metropolitan Training College, Highbury, near London. I. Coburn, as a pupil teacher, and two years at the Training College; certificate of competency, a second class of the second year. J. Huffer, a Queen's scholar; a year and a half at the Training College; certificate of competency, a third of the first year.

33.—

34.—£250 annual salary of head teacher from Denominational Board. J. Huffer, £50 annual salary from the Board, which he pays over to the female teacher as a part of her salary. Female teacher, £50 annual salary; total, £100. Candidate teachers, £4 6s. 8d. per month.

35.—I. Coburn, none; J. Huffer, school fees from the primary school, £180, and a residence; F. M. Vaile, none.

36.—(See answers Nos. 34 & 35.)

37.—(See answers Nos. 20, 21, & 25.)

KELSO.—(MIXED)

- 1.—Kelso, County of Roxburgh.
- 2.—Brick, shingled roof which is being renewed; master's residence requires enlargement.
- 3.—1,023 square feet.
- 4.—6,134 square yards.
- 5.—There are two water-closets under one roof, but divided by a brick wall, and each closet is 4 feet 6 inches square.
- 6.—540 superficial feet, 6,480 cubic feet.
- 7.—46, the average number during the last 12 months.
- 8.—The only ventilation is by the lower sashes of the windows, which are far from sufficient.
- 9.—Average number on the books, 62; attending, 46.
- 10.—Maximum 12 years, minimum 5 years, of both sexes.
- 11.—Five classes, average 9 in each class—first class, maximum 12, minimum 9 years; second class, maximum 12, minimum 7 years; third class, maximum 9, minimum 7 years; fourth class, maximum 7, minimum 6 years; fifth class, maximum 6, minimum 5 years.
- 12.—School commences at 9 a.m., closes at 10 minutes past 12; commences at 2 p.m., closes at 10 minutes past 4; time of cessation spent in eating meals and in play.
- 13.—Holiday on Saturdays; vacations take place in June and December, and continue 14 days in each month.
- 14.—256.
- 15.—Only 11 of the children who now attend have done so since the appointment of the present teacher, viz., March, 1857; population migratory.
- 16.—About 20.
- 17.—Children pay from 6d. to 1s. weekly; copy-books and slates are all which the pupils provide; annual average charge, £1 13s.
- 18.—Fees received by the master from the parents during 12 months, £85 11s. 10d.; stipend from Government, £87 10s.; total, £173 1s. 10d.
- 19.—Dividing the above by 46 gives the average, £3 15s. 2½d.
- 20.—According to instructions given by the diocesan school inspector.
- 21.—First class—Bible and church catechism; history of England, published under the direction of the Committee of Education; third book, published by same authority—both are used as reading books; English grammar, published by the National Board of Education in Ireland; geography, by the same authority as the history of England; arithmetic—first book, by the National Board of Education. Second and third classes—book of dictation, by Richard Bithell, C.T.—this book is also used by the first class; second reading book, published by the Committee of General Education; arithmetic, geography, and grammar—the same as the first class. Fourth and fifth classes—reading book; sequel No. 1 to the second book of lessons, as published for Her Majesty's Stationery Office; first reading book, published by the Committee of Education; several new books are required.
- 22.—Maps—Europe, 1; The World, 1; Palestine, 2; Australia, 1; New South Wales and Victoria, 1; skeleton map of the British Isles, 1. 1 case and 2 blackboards, a dozen sheets of alphabetical and simple reading, sheets with metal frames; all the above are in good repair.
- 23.—Discipline is generally enforced by confinement during mid-day recess; corporal punishment is discouraged.
- 24.—The pupils are examined by members of the Local Board once in 6 months; rewards are distributed at Christmas, consisting of books which treat of history, natural history, biography, and travels.
- 25.—By the diocesan inspector, 25th August, 1859, but principally by the Chairman of the Local Board, and generally once a week.
- 26.—Edward Robert Hinder.
- 27.—The children attending the school are placed alternately as monitors over the classes.
- 28.—Calcutta, birthplace of the master.
- 29.—30 years.
- 30.—February, 1857.
- 31.—Yes.
- 32.—St. James' Model School, Sydney; 6 weeks; no certificates were issued at that time; the master underwent an examination.
- 33.—Previous to present appointment the teacher had charge of the Denominational School, Pitt Town, and before that was clerk and draftsman.
- 34.—£87 10s. annual salary of teacher.
- 35.—Fees from children 6d. to 1s. weekly from each child.
- 36.—Total annual income, £173 1s. 10d.
- 37.—The Rev. William Lisle, clergyman of the Church of England in this parish, visits the school generally once a week, and uses the Bible and Church of England catechism in instructing the children.

KIAMA.—(MIXED.)

- 1.—Township of Kiama.
- 2.—Wood; very bad, even dangerous in stormy weather; thorough repair, if not a new building altogether.
- 3.—800.
- 4.— $\frac{1}{2}$ acre; the schoolhouse (until recently used as a church) and the master's residence built upon an acre of land originally granted by Government for a place of worship, afterwards exchanged for the site upon which the present church is built; the Government have reserved a site for a school, but in a very unsuitable situation.
- 5.—Quite sufficient; of wood.
- 6.—800 square feet; about 20,000 cubic feet.
- 7.—30.
- 8.—Very deficient; 2 small windows to open, and they badly situated for the purpose.
- 9.—Males, about 30; females, about 20. Males, about 18; females, about 12.
- 10.—Males, 12 and 4 years; females, 13 and 4 years.
- 11.—Five, 9: 1st class, 13, 10; 2nd class, 12, 8; 3rd class, 10, 6; 4th class, 9, 5; 5th class, 6, 4.
- 12.—9:30 a.m. to 4 p.m.; one hour's interval occupied by healthy games.
- 13.—1 holiday; 2 weeks at Christmas and 2 weeks in Midwinter.
- 14.—240.
- 15 & 16.—
- 17.—5s. a quarter the average, all within prescribed limits; nil; £1.
- 18.—Not known; about £20; master's support.
- 19.—
- 20.—

21.—1st class: Fourth reading book (National), compendium geography (ditto), English grammar (ditto), arithmetic (ditto), history of England (S. P. C. K.), prophecies of Messiah (ditto). 2nd class: Third reading book (National), elements geography (S.P.C.K.), grammar (National), arithmetic (ditto), prophecies of the Messiah (S. P. C. K.) 3rd class: Second reading book (S. P. C. K.) 4th class: First reading book (S. P. C. K.)

22.—Maps: The World, Europe, Asia, Africa, North America, South America, Australia, Palestine (Old Testament), ditto (New Testament), and England; 1 blackboard.

23.—Bad marks; occasional use of cane. Since 1 September, 1858, the managers have not found it necessary to give instructions on this subject.

24.—Since September, 1858, four times—once by Church of England inspector, once by organizing master, twice by the clergyman; prizes distributed once a year of small books.

25.—In addition to the visits of the inspector and organizing master, the school is visited by eight visitors, viz.,—T. S. Kendall, Esq., J.P., and Mrs. Kendall; R. J. Perrott, Esq., J.P., and Miss Perrott; T. Chapman, Esq., J.P., and Mrs. Chapman; W. D. Meares, Esq., and Mrs. Meares—a gentleman and lady taking it in turn weekly; also twice or three times a week by the clergyman.

27.—William Thompson.

28.—London.

29.—32 years.

30.—September 1, 1858.

31.—Not.

32.—

33.—St. James' Model School; 5 months; draper's assistant.

34.—From Local Board, £70 per annum, with promise or confident expectation of £2 additional.

35.—£30 hitherto, expectation of £54, children's fees.

36.—Expecting £72 + £54 = £126.

37.—See time table; also once or twice a week by Rev. F. Ashwin, United Church of England and Ireland; the Bible, book of common prayer. (See answer to No. 21).

GERRINGONG.—(MIXED.)

- 1.—Township of Gerringong.
- 2.—Wood; good; no.
- 3.—800.
- 4.—1,350 square yards.
- 5.—Not any.
- 6.—800 square feet; 11,200 cubic feet.
- 7.—28.
- 8.—7 windows to open.
- 9.—Males, 26; females, 17. Males, 16; females, 12.
- 10.—Males, 12 years, 5 years; females, 16 years, 4 years.
- 11.—Three. 1st class, 13; 2nd class, 12; 3rd class, 18. 1st class, 16, 8; 2nd class, 9, 6; 3rd class, 7, 4.
- 12.—9:30 a.m. to 3:30 p.m.; 1 hour interval; healthy games.
- 13.—One holiday; 2 weeks at Christmas and 2 weeks in Midwinter.
- 14.—240.
- 15.—
- 16.—About 8.
- 17.—Very various, but all within the limits prescribed by the Denominational School Board. None. Particulars very various; average, £46 10s. 6d. by 43.
- 18.—£46 10s. 6d; teacher's support. *Nil*. The master has been living in the confident expectation of receiving from the Denominational School Board an annual salary of £50, to date from June, 1858;—a sad disappointment. Total amount, £46 10s. 6d.
- 19.—£1 1s. 7d.

11 Geography.															
12 Geography (Australian).															
13 Geography (Scripture).															
14 History.															
15 Singing.															
16 Drill.															
17 Drawing, mapping.															
18 Needlework.															
19 Familiar lectures.															
20 Home Lessons.															

21.—List of books in use:—1st class: Bibles, 3rd reading books, 2nd reading books, history of England, English grammar, 1st geography, 1st arithmetic, church catechism. 2nd class: Bibles, church catechisms, 2nd reading books, English grammars, 1st geography, 1st arithmetic. 3rd class: easy reading and spelling, tablet lessons.

22.—Maps: The World, England and Wales, Australia, Palestine, Syria. Wanted papers containing sums in four simple rules, and papers containing lessons in reading and spelling.

23.—Very little correction needed—that administered of the gentlest kind;—bad marks; keeping in school during playtime, and a slight use of the cane. The managers have not seen it necessary to give instructions on the subject.

24.—Since August, 1858, the school has been examined three times, viz.,—by the Church of England inspector, the organizing master, and the clergyman; also, partially by the Lord Bishop of Sydney.

- 25.—Since August, 1858, once by the Church of England inspector, a day; once by the organizing master, a week; from time to time by members of the Local Board.
- 26.—Francis Banks Reed.
- 27.—None.
- 28.—Ipswich, Suffolk, England.
- 29.—37 years.
- 30.—May, 1857.
- 31.—Not.
- 32.—
- 33.—5 years a teacher in a private school in England, and 2 years master of the Church of England school at Mount Pleasant, near Kiama. Commercial clerk.
- 34.—Head master, £46 10s. 6d.
- 35.—*Nil*, if expectation stated, No. 18, be disappointed.
- 36.—£46 10s. 6d.
- 37.—See Time Table; also, from time to time, by Rev. F. Ashwin, United Church of England and Ireland. The Bible, the book of common prayer.

KURRAJONG (NORTH).—(MIXED.)

- 1.—North Kurrajong.
- 2.—Stone building; needs repairs.
- 3.—35 feet 6 inches long, 20 feet 6 inches broad, 17 feet high.
- 4.—2 acres; fence very bad.
- 5.—1 water-closet needs repairs.
- 6.—1 room 35 feet 6 inches long, 20 feet 6 inches broad, 17 feet high.
- 7.—34 pupils.
- 8.—4 large windows.
- 9.—Number on the book: males, 21·8; females, 32·5. Number attending school: males, 30·84; females, 52·01.
- 10.—Males, 4 to 14 years; females, 4 to 14 years.
- 11.—Three classes; first class: 2 males and 11 females, ages from 10 to 14 years; Second class: 4 males and 9 females, ages from 7 to 10 years; third class: 4 males and 4 females, ages from 4 to 8 years.
- 12.—7 hours per day, from 9 a.m. to 4 p.m.; from noon to 1 p.m. cessation of study, exercise in the open air.
- 13.—1 holiday in each week; vacations, 2 weeks at Christmas and 1 week at Easter.
- 14.—243 school days in the year.
- 15.—4 years.
- 16.—
- 17.—5d. per week; nothing for books; £1 1s. 8d. yearly.
- 18.—School fees, £25; towards the support of the teacher; Government salary, £70; yearly; support from all sources, £95 yearly.
- 19.—Cost of each pupil yearly, £2 15s. 11½d.
- 20.—First class:—Monday: Bible and spelling, from 9·15 to 10; writing, 10 to 11; arithmetic, 11 to 12; catechism, 1 to 2; sewing, 2 to 3; writing from dictation, 3 to 3·45. Tuesday: third book and spelling, 9·15 to 10; writing, 10 to 11; arithmetic, 11 to 12; grammar, 1 to 2; sewing, 2 to 3; writing from dictation, 3 to 3·45. Wednesday: religion and spelling, 9·15 to 10; writing, 10 to 11; arithmetic, 11 to 12; faith and duty, 1 to 2; sewing, 2 to 3; mental arithmetic, 3 to 3·45. Thursday: geography, 9·15 to 10; writing and spelling, 10 to 11; arithmetic, 11 to 12; geography, 1 to 2; sewing, 2 to 3; maps, 3 to 3·45. Friday: history of England, 9·15 to 10; writing and spelling, 10 to 11; arithmetic, 11 to 12; arithmetical tables, 1 to 2; sewing, 2 to 3; mental arithmetic, 3 to 3·45. Second class:—Monday: writing and spelling, 9·15 to 10; Holy Bible, 10 to 11; arithmetic, 11 to 12; catechism, 1 to 2; sewing, 2 to 3; writing from dictation, 3 to 3·45. Tuesday: writing and spelling, 9·15 to 10; reading 2nd books, 10 to 11; arithmetic, 11 to 12; grammar, 1 to 2; sewing, 2 to 3; writing from dictation, 3 to 3·45. Wednesday, writing and spelling, 9·15 to 10; Holy Bible, 10 to 11; arithmetic, 11 to 12; faith and duty, 1 to 2; sewing, 2 to 3; mental arithmetic, 3 to 3·45. Thursday: Writing and spelling, 9·15 to 10; geography, 10 to 11; arithmetic, 11 to 12; geography, 1 to 2; sewing, 2 to 3; maps, 3 to 3·45. Friday: writing and spelling, 9·15 to 10; reading 2nd books, 10 to 11; arithmetic, 11 to 12; arithmetical tables, 1 to 2; sewing, 2 to 3; mental arithmetic, 3 to 3·45. Third class:—Monday: reading 1st book, 9·15 to 10; writing on slates, 10 to 11; reading 1st books, 11 to 12; arithmetic, 1 to 2; catechism, 2 to 3; slates, 3 to 3·45. Tuesday: reading 1st book, 9·15 to 10; writing on slates, 10 to 11; reading 1st book, 11 to 12; arithmetic, 1 to 2; reading 1st book, 2 to 3; slates, 3 to 3·45. Wednesday and Thursday: reading 1st book, 9·15 to 10; writing on slates, 10 to 11; reading, 11 to 12; arithmetic, 1 to 2; reading, 2 to 3; slates, 3 to 3·45. Friday: reading 1st book, 9·15 to 10; writing on slates, 10 to 11; reading, 11 to 12; arithmetic, 1 to 2; reading, 2 to 3; mental arithmetic, 3 to 3·45. While the girls are sewing the boys are doing sums in arithmetic; the school is opened and closed with singing and prayer.
- 21.—First class: Bible, history of England, third book, English grammar, elements of geography, faith and duty of a Christian, arithmetical tables, Church of England catechism. Second class: Bible, second book, English grammar, elements of geography, faith and duty of a Christian, arithmetical tables, Church of England catechism. Third class: first book, arithmetical

arithmetical tables, Church of England catechism. The books are good and no more are needed.

22.—Maps in the school: 1 of Europe, 1 of British Isles, 2 of America, 2 Old and New Testament names, 1 Australasia; a number of old placards, much soiled; worn, 1 black-board, 1 map Asia, 1 Africa, 1 Palestine, 1 British Islands, 1 Australasia, and 1 map of The World.

23.—Rod seldom used; usual correction put by themselves; instructions from the Denominational Central Board of Education.

24.—4 times in the year; Rev. Mr. Elder, Richmond.

25.—Rev. Mr. Elder, Richmond; 4 times in the year; 2 hours each time; by the diocesan inspector of schools.

26.—George Anderson.

27.—Ann Jane Anderson; Mary Ann Anderson.

28.—George Anderson, Scotland, age 50 years.

29.—A. J. Anderson, Ireland, 39 years; M. A. Anderson, Bombay, 15 years.

30.—August, 1850.

31.—Yes.

32.—St. James', Sydney; two months.

33.—

34.—£70.

35.—£25.

36.—£95.

37.—Protestant religion; twice a week; teacher; Rev. Mr. Elder, Church of England Holy Bible and Church of England catechism.

ST. LEONARD'S.

1.—St. Leonard's.

2.—Stone; good; the master complains of insufficient accommodation, and very justly; for he has no kitchen, and only 1 bedroom, 1 sitting-room, and another in which is the staircase, and which is a mere closet.

3.—750 feet.

4.—9,870 feet.

5.—As respectable as such nasty places generally are in this Colony; I am unable to describe more particularly.

6.—1 schoolroom, 450 feet in area; up to the top of the wall, 4,500 cubic feet.

7.—About 25 at this time.

8.—Door and two windows.

9.—March, 1859; number on the roll, 32; number in attendance, 25.

10.—Maximum, 13; minimum, 4.

11.—Three classes:—First class, 6 boys; maximum age, 13 years; minimum, 9 years. Second class, 10 boys; maximum age, 10 years; minimum, 6 years. Third class, 11 boys; maximum age, 7 years; minimum, 4 years. The remainder detached.

12.—5½ hours; from 9 a.m. to 12.5, and from 2 p.m. to 4.10.

13.—All Saturday; fortnight vacations at Midsummer and Midwinter.

14.—235 days, exclusive of vacations, Saturdays, and Sundays.

15.—Data insufficient; perhaps 6 years may be assumed; such an instance is now to be found in the school.

16.—This can be learned by inspecting the Census, a copy of which has not been forwarded by the Denominational Board.

17.—The master receives from 6d. to 1s. per week, according to circumstances; no charge made for books; the total annual charge for each pupil of course varies, according to the time he is in the school, at so much per week; for a year the charge would be 48s., 36s., and 24s., at 6d., 9d., and 1s. per week.

18.—£37 7s. 9d., paid to the master by the parents; the only other emolument is the Government monthly pay, amounting to £61 5s.; in all, £98 12s. 9d.

19.—£3 18s. 10½d.

20.—From 9 to 9½, each day, opening school. From 9½ to 10, Monday—first and second classes, Old Testament; third class, writing. Tuesday—first and second classes, New Testament; third class, writing. Wednesday—first and second classes, Old Testament; third class, writing. Thursday—first and second classes, New Testament; third class, writing. Friday—first and second classes, Old and New Testament; third class, writing. From 10 to 10.40, Monday—first class, arithmetic; second class, writing; third class, reading; Tuesday—first class, writing; second class, arithmetic; third class, reading. Wednesday—first class, arithmetic; second class, writing; third class, reading. Thursday—first class, writing; second class, arithmetic; third class, reading. Friday—first and second classes, arithmetic; third class, reading. From 10.40 to 11.20, Monday—first class, dictation; second class, arithmetic; third class, writing. Tuesday—first class, arithmetic; second class, dictation; third class, writing. Wednesday—first class, dictation; second class, arithmetic; third class, writing. Thursday—first class, arithmetic; second class, dictation; third class, writing. Friday—first and second classes, lessons; third class, writing. From 11.20 to 11.50, Monday—first and second classes, lessons; third class, catechism and hymns. Tuesday—first and second classes, lessons; third class, tables. Wednesday—first and second classes, lessons; third

third class, catechism and hymns. Thursday—first and second classes, lessons; third class, tables. Friday—first and second classes, general instruction; third class, catechism and hymns—From 11:50 to 12:5, each day, closing school.—From 12:5 to 2, recreation.—From 2 to 2:10, each day, opening school. From 2:10 to 2:50, Monday—first and third classes, writing; second class, dictation. Tuesday—first class, dictation; second and third classes, writing. Wednesday—first and third classes, writing; second class, dictation. Thursday—first class, dictation; second and third classes, writing. Friday—first, second, and third classes, writing. From 2:50 to 3:30, Monday—first class, grammar; second class, arithmetic; third class, reading. Tuesday—first class, geography; second and third classes, reading. Wednesday—first class, grammar; second class, arithmetic; third class, reading. Thursday—first class, geography; second and third classes, reading. Friday—first and second classes, mental arithmetic; third class, reading. From 3:30 to 3:55, Monday—first class, arithmetic; second class, reading; third class, writing. Tuesday—first class, arithmetic; second class, geography; third class, writing. Wednesday—first class, arithmetic; second class, reading; third class, writing. Thursday—first class, arithmetic; second class, geography; third class, writing. Friday—first and second classes, general instruction; third class, catechism and hymns. From 3:55 to 4:10, each day, closing school.

21.—First class—Bible, fourth book, evidences of Christianity, history of England, first book, arithmetic, English grammar, and geography; second class—Bible, third book, first book, arithmetic, tables, geography, and catechism; third class—first book, and primer. Some of the books in good order; more wanted.

22.—Maps of England, The World, Asia, Africa, Palestine (a valuable map presented by Rev. W. B. Clarke), Asia, Africa, and America; 3 Scripture maps; terrestrial globe, (given by Rev. W. B. Clarke, broken during the late master's residence, but in part useful); map of Europe wanted, and applied for several times.

23.—No instructions received; the master sometimes uses a cane, which is sometimes also complained of, but, I think, undeservedly.

24.—An examination on the part of inspector; examined by clergyman and master; books have been given by each as rewards.

25.—Since the time of the last master an official inspection has been had, on 9th June and 27th October, 1859; the master considers the state of the school satisfactory.

26.—John Gard Hussey.

27.—None.

28.—Hayes, County of Kent.

29.—28 years.

30.—1 February, 1858.

31.—Trained.

32.—By a fortnight's training at St. James' Model School; the time shortened at the request of the Rev. W. B. Clarke, as the school had no teacher, owing to the ill-health, retirement, and death of the late master.

33.—No certificate produced to Local Board; 2 years teaching in families.

34, 35, & 36.—Answered under No. 17.

37.—Instruction daily in the Scriptures, and in the church catechism twice a week; the school frequently visited by the Rev. W. B. Clarke, M. A.

LIVERPOOL.—(MIXED.)

1.—Liverpool, in the County of Cumberland.

2.—Wooden building, inconvenient shape; requiring repairs, and an additional room suited to the wants of the infant classes.

3.—800.

4.—About 17,000 square yards.

5.—Built of brick, and sufficient for present wants.

6.—800 square feet; 8,000 cubic feet.

7.—From 90 to 100.

8.—Ample provision by means of 9 windows, 1 door, a fireplace, and sundry openings in the weatherboards.

9.—On the books: 80 boys, 60 girls; in attendance: 65 boys, 40 girls.

10.—Maximum: boys, 14 years, girls, 15 years; minimum: boys, 3 years, girls, 3 years.

11.—Five classes, each having an average of 18 to 20 scholars; 1st class, maximum 15, minimum 10; 2nd class: maximum 14, minimum 8; 3rd class: maximum 12, minimum 7; 4th class: maximum 10, minimum 6; 5th class: maximum 9, minimum 3.

12.—The pupils attend at 9 a.m. and leave at noon, when those who bring refreshment, partake of it, and have recreation on the playground till 2 p.m., at which time studies are resumed till 4 p.m., when the school closes.

13. Holiday on Saturday; 3 vacations, viz.: Easter 1 week, Midwinter 10 days, and Midsummer 10 days.

14.—231 days.

15.—From 3 to 4 years.

16.—Unknown.

17.—Weekly sum varying from 2d. to 1s.; average annual charge for each pupil (exclusive of free scholars admitted according to rules), £1 12s.

18.—Amount of fees unknown; Government support, £87 10s.

19.—As the reply to this depends on the completion of information sought in the previous question, it does not admit of an answer.

20.—Reading, writing, and arithmetic, $\frac{1}{2}$ to $\frac{3}{4}$ of an hour daily; Monday, Wednesday, and Friday: spelling $\frac{1}{4}$ an hour; mental arithmetic, $\frac{1}{2}$ an hour; English grammar, $\frac{1}{2}$ an hour. Tuesday and Thursday: English composition, $\frac{1}{2}$ an hour; geography, $\frac{1}{2}$ an hour; vocal music, $\frac{3}{4}$ of an hour; English history, $\frac{1}{2}$ an hour; church catechism, 20 minutes. Dictation and mutual examination each $\frac{1}{2}$ an hour; needlework $1\frac{1}{4}$ hour, Monday, Wednesday, and Friday.

21.—Such books as are supplied by the Denominational School Board; the number at present in use is not adequate to the wants of the school; books in use are in good condition.

22.—24 natural history prints, in bad condition; 4 natural history prints, in good condition; tolerable supply of maps; map of England and Wales required; required—teacher's desk, blackboard, and abacus; also, geographical and geometrical diagrams.

23.—Various modes of correction, viz.: detention in school, corporal punishment, dismissal from the school; for written instructions, *vide* "Rules and Regulations for Denominational Schools."

24.—Twice a year, the teacher and Local Board; prizes given at the Christmas examination.

25.—By the clergyman of the parish, regularly every week, during morning school; and the diocesan inspector of schools.

26.—John Whitehead.

27.—Rebecca Waterman.

28.—Sydney, New South Wales.

29.—28 years; 15 years.

30.—1st January, 1859.

31.—Trained.

32.—St. James' Schools, Sydney; 4 years.

33.—13 years.

34.—Teacher's salary, £87 10s. per annum.

35.—£100 more or less.

36.—£187 10s. more or less.

37.—The usual instruction in church schools.

LORD'S FOREST.—(MIXED.)

1.—Lord's Forest, parish of St. George.

2.—Constructed of wood; the building needs painting and other improvements.

3.—648 square feet.

4.—2,508 square yards.

5.—None.

6.—

7.—27 pupils.

8.—

9.—54 on the books; 24 boys and 30 girls.

11.—Four classes; from 5 to 7 pupils in each; first class, age, from 9 to 16; second, from 8 to 9; third, from 6 to 7; fourth, from 4 to 6.

12.—From 10 until 3; 15 minutes cessation from study for the purpose of taking refreshment.

13.—Saturdays, public holidays, and a fortnight at Christmas.

14.—243 days.

15.—From 1 to 2 years.

16.—

17.—From 8s. to £1 annually; no charge for books.

18.—Fees, £27 19s. 3d; salary, £39 10s.; total, £67 9s. 3d.

19.—Annual cost of each pupil, £2 9s. 11 $\frac{1}{2}$ d.

20.—Reading, writing, arithmetic, geography, and needlework; 1 hour, reading; $\frac{3}{4}$ of an hour, geography, &c.; 1 hour, writing; 1 hour, arithmetic; 1 hour, needlework.

21.—First class—Bible, Church catechism, third reading book, geography, first book of arithmetic; second class—Testament, Church catechism, second book, reading series No. 2, first book of arithmetic; third class—primer for Sunday schools, reading series No. 1, easy lesson book No. 2, arithmetical tables; fourth class—easy lesson book No. 1; first book in good condition; the number not adequate to the wants of the school.

22.—A map of The World, in good condition; required, the maps of Europe, Asia, Africa, America, and the Holy Land, blackboard, slates, clock.

23.—

24.—By the Rev. Mr. Nixon; no prizes have ever been given.

25.—By the diocesan inspector of schools.

26.—Elizabeth Crew.

27.—Sarah Swaine, Charles Swaine.

28.—Sydney.

29.—40 years; 14 and 11.

30.—1st January, 1856.

31.—Not trained.

- 32.—
 33.—20 years' experience.
 34.—£50.
 35.—None.
 36.—£67 19s. 3d.
 37.—

MACQUARIE RIVER.—(MIXED AND INFANTS'.)

- 1.—Macquarie River, Illawarra.
- 2.—Schoolroom constructed of wood, quite new, needs neither repairs nor enlargement.
- 3.—Area of schoolroom, 510 square feet.
- 4.—Ground for the use of children, one acre = 4,840 square yards.
- 5.—Water-closets not built yet.
- 6.—Only one room appropriated for teaching; contains 510 square square feet superficial, and 7,140 cubic feet.
- 7.—School temporarily closed; average attendance used to be 17.
- 8.—5 sash windows and a door, all of ample size.
- 9.—The school has never been carried on with such regularity as to admit of a correct annual average being made out.
- 10.—No record of ages.
- 11.—No record.
- 12.—School hours from 9-30 a.m. to 12-30, and 1-30 to 3-30 p.m. The hour's interval allowed for dinner.
- 13.—Holiday every Saturday; no half-holidays; two vacations—one at Christmas of three weeks' duration; and one in June of one week.
- 14.—233.
- 15.—No record.
- 16.—No means of ascertaining.
- 17.—Weekly charge of 6d. per head for each child. No charge for books.
- 18.—No record left by the late master of the school; all school fees are appropriated to the teacher; he received £36 per annum from the Denominational School Board.
- 19.—Cannot be ascertained for want of correct accounts.
- 20.—Cannot be answered in the absence of a teacher.
- 21.—Same answer as above. Very few books.
- 22.—No school apparatus except books.
- 23.—Corporal punishment allowed, but seldom resorted to. The teacher has written instructions not to employ punishments excessive in kind or degree.
- 24.—Examinations held twice a year by the Chairman of the Local Board. No prizes distributed.
- 25.—The Chairman of the Local Board visited the school every week while it was in operation.
- 26.—W. Crawford.
- 27.—None.
- 28.—
- 29.—
- 30.—
- 31.—
- 32.—
- 33.—
- 34.—
- 35.—
- 36.—
- 37.—Religious instruction imparted by the teacher on Fridays, and a religious lesson every day. Sometimes instruction given by the clergyman of the parish; the Rev. Percy Jennings Smith, of the Church of England. The Bible, Church catechism and hymn books are used for the purpose.

MARSFIELD.—(MIXED.)

- 1.—Parramatta, North.
- 2.—Stone foundation and basecourse; brick wall 14 inches thick, slated roof—a new building.
- 3.—1,200 square feet.
- 4.—Boys' side 618 square yards; girls' side 618 square yards.
- 5.—Boys' side, 3 closets and urinal; girls' side, 3 closets; new and in good condition.
- 6.—Boys' room 600 square feet, 14,700 cubic feet; girls' room 600 square feet, 14,700 cubic feet.
- 7.—Boys' room 36; girls' room 40—girls and little boys.
- 8.—Large ventilating grates below the floors; a hollow skirting pierced with holes all round the rooms, thus admitting fresh air from the lowest point, while the ridge being raised the whole length of the roof allows the escape of heated and foul air at the highest point; the plan answers excellently.

9.—On the books—boys, 60 ; girls, 50. Attending—boys, 44 ; girls, 32.

10.—13 and 3 years.

11.—Boys, five classes ; girls and infants, six classes :—

	Boys.	Maximum.	Minimum.		Girls.	Maximum.	Minimum.
1st class	7	13 years	12 years	1st class	8	13 years	9 years
2nd "	9	13 "	11 "	2nd "	10	9 "	7 "
3rd "	6	12 "	11 "	3rd "	7	7 "	6 "
4th "	21	12 "	8 "	4th "	14	6 "	5 "
5th "	6	8 "	6 "	5th "	9	6 "	5 "
				6th "	13	5 "	3 "

12.—5 hours ; commencing at 9 a.m., ending at 4 p.m., with an interval (for dinner) from 12 noon to 2 p.m.

13.—Whole holiday on Saturday, 2 weeks at Christmas, 1 at Easter, 1 at Midwinter.

14.—238 days.

15.—12 months.

16.—Not having a copy of the Census, I have no means of answering this question.

17.—50 children at 1s. per week, 23 at 9d., 22 at 6d., 9 at 3d., and 6 free.

18.—From pupils, £134 10s. 6d. ; from Government, £87 10s. ; total, £222 0s. 6d.

19.—£2 18s. 5d.

20.—

21.—Bibles, Testaments, class reading books, fourth book, third and second book (Society for Promoting Christian Knowledge), third and fourth book (National Society of Ireland), sequel to reading series, 1st and 2nd book, abridgment of Scripture history, 1, 2, and 3, English, Roman, and Grecian history, English grammar, geography, parables of Our Lord, miracles, &c., history of Our Lord ; condition indifferent ; if good, sufficient for requirements.

22.—Map of World (bad), England (fair), Australia (fair), 2 Holy Land (bad), 2 Asia Minor (bad), St. Paul's travels (bad), blackboard (fair), prints, animal creation ; clock new.

23.—The cane when necessary ; no written instructions on the subject.

24.—Twice by the Local Board, and others interested ; prizes are given at Midwinter ; a school feast at Christmas.

25.—The diocesan inspector of schools ; the late Mr. Goodman inspected once, but left no report ; Mr. Cuthbert has inspected once, but given no report as yet.

26.—James Breathour, boys' school ; Mrs. J. Breathour, girls' school (without salary).

27.—Monitors are chosen from the classes ; there are no pupil teachers.

28.—Mr. and Mrs. Breathour born in County Limerick, Ireland.

29.—Master's age 59 ; mistress, 47.

30.—September, 1838.

31.—Yes.

32.—Kildare-place Society, Dublin. Master 3 months ; mistress 4 months ; first class certificates.

33.—

34.—Master, £87 10s. ; mistress, nil.

35.—£134 10s. 6d.

36.—£222 0s. 6d.

37.—The faith and duty of a Christian, as taught by the Church of England ; daily, by the master and mistress ; the Rev. William F. Gore, B.A., minister of the Church of England ; Bibles, catechetical series, history of Our Lord, parables, miracles, and discourses, Beaven's help to catechising.

MENANGLE.—(MIXED.)

1.—Menangle.

2.—Wood ; general repairs are much required.

3.—372 feet, exclusive of master's apartments.

4.—15,070 feet.

5.—One closet only for males and females.

6.—372 superficial feet, 2,976 cubic feet.

- 7.—25 pupils.
 8.—5 windows, 2 doors, 1 fireplace; none of the windows open.
 9.—37; boys 10, girls 15.
 10.—Boys, 5 to 11; girls, 5 to 13.
 11.—Three classes; 8 attending; 10 to 13, 8 to 12, 5 to 9.
 12.—7 hours; open at 9 a.m., close at 4 p.m., recess 12:30 to 2 p.m., luncheon and recreation.
 13.—Easter 10 days; Christmas 21 days.
 14.—230.
 15.—Impossible to ascertain.
 16.— Ditto.
 17.—Annual charge £1 6s.; no charge for books.
 18.—£21, master's use, £70 salary; total amount £91.
 19.—£3 12s. 10d.

20.—First class, Monday, Wednesday, and Friday, 9 to 9 $\frac{1}{4}$ opening school, 9 $\frac{1}{4}$ to 10 reading Holy Scriptures, 10 to 10 $\frac{1}{2}$ writing, 10 $\frac{1}{2}$ to 11 mental arithmetic, 11 to 11 $\frac{1}{2}$ spelling, 11 $\frac{1}{2}$ to 12 geography, 12 to 12 $\frac{1}{2}$ singing, 12 $\frac{1}{2}$ to 2 recess, 2 to 3 $\frac{3}{4}$ girls sew; boys, 2 to 2 $\frac{1}{2}$ oral arithmetic, 2 $\frac{1}{2}$ to 3 commercial arithmetic, 3 to 3 $\frac{1}{2}$ reading, 3 $\frac{1}{2}$ to 3 $\frac{3}{4}$ writing on slates, 3 $\frac{3}{4}$ to 4 closing school; Tuesday and Thursday, 9 to 9 $\frac{1}{4}$ opening school, 9 $\frac{1}{4}$ to 9 $\frac{3}{4}$ reading Holy Scriptures, 9 $\frac{3}{4}$ to 10 church catechism, 10 to 10 $\frac{1}{2}$ writing, 10 $\frac{1}{2}$ to 11 grammar, 11 to 11 $\frac{1}{2}$ history, 11 $\frac{1}{2}$ to 12 arithmetic, 12 to 12 $\frac{1}{2}$ object lesson, 12 $\frac{1}{2}$ to 2 recess, 2 to 2 $\frac{1}{2}$ dictation, 2 $\frac{1}{2}$ to 3 reading, 3 to 3 $\frac{1}{2}$ spelling, 3 $\frac{1}{2}$ to 3 $\frac{3}{4}$ general geography; Tuesday, general grammar; Thursday, 3 $\frac{3}{4}$ to 4 closing school. Second class, Monday, Wednesday, and Friday, same as first class to 10 a.m., 10 to 10 $\frac{1}{2}$ spelling, 10 $\frac{1}{2}$ to 11 geography, 11 to 11 $\frac{1}{2}$ arithmetic, 11 $\frac{1}{2}$ to 12 reading, 12 to 12 $\frac{1}{2}$ singing, 12 $\frac{1}{2}$ to 2 recess, 2 to 3 $\frac{3}{4}$ girls sew, boys same as first class; Tuesday and Thursday, same as first class to 10 a.m., 10 to 10 $\frac{1}{2}$ spelling, 10 $\frac{1}{2}$ to 11 writing, 11 to 11 $\frac{1}{2}$ grammar, 11 $\frac{1}{2}$ to 12 oral arithmetic, 12 to 12 $\frac{1}{2}$ object lesson, 12 $\frac{1}{2}$ to 2 recess, 2 to 2 $\frac{1}{2}$ reading, 2 $\frac{1}{2}$ to 3 dictation, 3 to 3 $\frac{1}{2}$ mental arithmetic, 3 $\frac{1}{2}$ to 3 $\frac{3}{4}$ general geography Tuesday, general grammar Thursday, 3 $\frac{3}{4}$ to 4 closing school. Third class, Monday, Wednesday, and Friday, same as first class to 10 a.m., 10 to 10 $\frac{1}{2}$ oral arithmetic, 10 $\frac{1}{2}$ to 11 spelling, 11 to 11 $\frac{1}{2}$ reading, 11 $\frac{1}{2}$ to 12 writing, 12 to 12 $\frac{1}{2}$ singing, 12 $\frac{1}{2}$ to 2 recess; girls, same as first class; boys, 2 to 2 $\frac{1}{2}$ writing on slates, 2 $\frac{1}{2}$ to 3 mental arithmetic, 3 to 3 $\frac{1}{2}$ slate arithmetic, 3 $\frac{1}{2}$ to 3 $\frac{3}{4}$ reading, 3 $\frac{3}{4}$ to 4 closing school; Tuesday and Thursday, same as first class to 10 a.m., 10 to 10 $\frac{1}{2}$ spelling, 10 $\frac{1}{2}$ to 11 grammar, 11 to 11 $\frac{1}{2}$ writing, 11 $\frac{1}{2}$ to 12 reading, 12 to 12 $\frac{1}{2}$ object lesson, 12 $\frac{1}{2}$ to 2 recess, 2 to 2 $\frac{1}{2}$ geography, 2 $\frac{1}{2}$ to 3 dictation, 3 to 3 $\frac{1}{2}$ arithmetic, 3 $\frac{1}{2}$ to 3 $\frac{3}{4}$ mental arithmetic, 3 $\frac{3}{4}$ to 4 closing school.

21.—First class, third book N. S., good; grammar, ditto, good; arithmetic, ditto, good; third book, S.P.C.K., middling; history, ditto, good; geography, ditto, bad. Second class, second book, N. S., bad; geography, bad. Third class, first book, N. S., good; Holy Bibles and Testaments are used in each class—Bibles good, Testaments middling. *Not.*—N.S., National Society; S.P.C.K., Society for Promoting Christian Knowledge. Required—fourth book, N. S.; sequel second book, ditto; geographies; not sufficient second books and geographies.

22.—Maps: The World good, Europe middling, Africa good, America good, England good, Australasia middling, Australia good, Palestine good, slates very bad, blackboard good, stools good, table good, desk bad: required—an easel, map of Asia, pasteboard for mounting prints, slates; a writing desk and school-bell are very much required, and that the desk in use be altered and fitted with ink wells; 3 chairs.

23.—Detaining after school hours; if refractory, corporal punishment; no instructions whatever.

24.—7 times by the Local Board; yes, books, yearly.

25.—The diocesan inspector of schools and Local Board; Local Board 7 times, 1 $\frac{1}{2}$ hours:

“18 February.

“Examined third class; read second book and answered questions tolerably well, “spelling good, dictation bad; the discipline of the school not as good as it might be; the “children especially talk too much one to another; but on the whole the school is in a satisfactory state under existing circumstances.—E.R.”

“18 March.

“Examined first class; read and spelt well; answered indifferently arithmetic; “weights and measures, correctly and quickly; grammar, only commenced; geography, map “of Europe, imperfect; Scripture history, very deficient.—EDWARD ROGERS, THOMAS “HAINES.”

“16 April.

“Examined second and third classes in arithmetic, practical and mental.—EDWARD “ROGERS.”

“13 May.

“First class answered well in grammar as far as pronouns; slow in multiplication of “money; with one or two exceptions, the writing bad and carelessly done, and the books “soiled; tables, well said; object lesson, sheep very good. Second and third classes, “arithmetic, addition, and subtraction, simple.—EDWARD ROGERS, THOMAS HAINES.”

“15 July.

“Examined first class—4 girls; Europe, well; arithmetic, in compound multiplica- “tion, reduction, and proportion, well; reading, very good. Second class, second book—5 “girls; compound division, imperfect; Europe, outlines good; reading third book and “spelling, good. The school, as a whole, satisfactory.—EDWARD ROGERS, THOMAS HAINES.”

"5 November, 1858.

"Examined in grammar, arithmetic, and geography. All the first class, except one, absent at harvest. The questions on arithmetic not well answered, and the habit of copying from each other objected to; but in the main the school is satisfactory.—HENRY TINGCOMBE."

Reports for 1859.

"W. J. Cuthbert, Esquire, Inspector, 25th March, 1859, 20 present."

"12 April.

"Examined the first, second, and third classes, in Scripture reading and geography; answers generally satisfactory.—HENRY TINGCOMBE."

26.—Sydney Charles Drewe.

27.—Sarah Elizabeth Drewe.

28.—Sydney.

29.—24; 20.

30.—February 1st, 1858.

31.—Yes.

32.—At St. Michael's school, about 12 months.

33.—

34.—£70.

35.—£21.

36.—£91.

37.—Scripture illustration daily, master; Chairman of Local Board, Church of England. Bible, Testament, church catechism; Sunday school.

MULGOA.—(MIXED.)

1.—Littlefields, Mulgoa.

2.—Stone and brick, no repairs required.

4.—About 150 square yards.

5.—Good.

10.—Males, maximum 14, minimum 6; females, maximum 11, minimum 5.

11.—Four classes; first class, average 6, maximum age 13, minimum 9; second class, 7, maximum 10, minimum 7; third class, 5, maximum 7, minimum 6; fourth class, 2, maximum 6, minimum 5.

12.—Hours from 10 a.m. to 4 p.m., play from 1 to 2 p.m.

13.—Saturday is a holiday, 2 weeks at Christmas and 2 weeks at Midwinter.

14.—232 days.

15.—From 3 to 4 years.

17.—3d., 6d., and 9d. a week; no charge for books.

18.—£33 3s. 3d.; £6 gratuity from Penrith Diocesan Society's Treasurer; £52 10s.; total, £91 13s. 3d.

19.—£2 13s. 11d.

20.—Reading, writing, arithmetic, grammar, geography, mental arithmetic, and letter writing.

21.—A list of books required for 12 months has been sent, but no books have been received.

22.—10 maps only, in good order.

24.—Twice a year, by the incumbent of Mulgoa; prizes are given.

26, 28 & 29.—Malcolm J. Colquhoun, Scotland, about 48.

27, 28 & 29.—Mrs. Colquhoun, England, 38.

30.—18th September, 1857.

31 & 32.—Trained, at Glasgow.

34, 35 & 36.—£52 10s.; £39 3s. 3d.; £91 13s. 3d.

37.—Daily religious instruction, and occasionally by the clergyman.

MUDGEES.—(MIXED.)

1.—St. John's, Mudgee.

2.—Slabs and shingled; greatly needs enlargement and heightening, also ventilation and repairs; the floor is of bricks.

3.—360 feet.

4.—None exclusively for the purpose; the children are allowed to play about the church enclosure, which consists of about 1 acre.

5.—Two small closets, very low; the cesspools are not sufficiently deep, and are so near the school premises (11 yards only) as to cause a nuisance, and become injurious to health during the heat of summer; they are built of brick, with floors of the same material.

6.—One room only; contains 360 square feet and 3,240 cubic feet; the present master having a large family the old schoolroom is required for its use.

7.—At the present, 55 to 63 children.

8.—None, beyond a low chimney and the lower part of one window; the refraction of the sun's rays on the shingles and slabs during the latter portion of the day makes the room insufferably hot and close.

9.—At present 38 boys and 33 girls; maximum age of boys 14, girls 13; minimum age of boys 3, girls 4; the average annual number as appears by roll book for 1858 is—boys 58, girls 43, total 101. Average number attending the school, as per same, boys 42, girls 33, total 75.

10.—Answered in the 9th.

11.—At present five; viz., first class: 8 boys, 5 girls; maximum age of boys 14, girls 13; second class: 7 boys, 8 girls; maximum age of boys 10, girls 12; minimum age of boys 7, girls 7; third class: 6 boys, 3 girls; maximum age of boys 9, girls 12; minimum age of boys 6, girls 7; fourth class: 6 boys, 10 girls; maximum age of boys 6, girls 7; minimum age of boys 4, girls 5; fifth class: 9 boys, 5 girls; maximum age of boys 6, girls 5; minimum age—boys 3, girls 4.

12.— $5\frac{1}{2}$ to 6 hours; commence duties at 9 a.m. till noon, or later, according to circumstances, with a cessation from study until 2 o'clock p.m., at which time duties are resumed until $4\frac{1}{2}$ or 5 o'clock p.m.; the time of cessation from study is supposed to be employed in going to and from dinner; some few from a distance sit in the shade or play about the place.

13.—One holiday in each week, Saturday. There are two vacations each year, 1 week at Midsummer, and a fortnight or thereabouts at Christmas.

14.—About 240.

15.—The time is uncertain and variable; some few from 5 to 7 years; some only 2 or 3.

16.—Since there are other schools, and a constant influx of people to this town, it is impossible to say, or give an estimate; there are very few who attend no school.

17.—At present from 6d. to 1s. per week; I am not prepared to state the annual sum, which is very fluctuating, in consequence of the children being kept from school from trifling causes the whole week; at such times the parents withhold the weekly payment; there are no other charges.

18.—The exact amount of fees cannot be stated; the master and mistress upon leaving never rendered a full account; it is supposed that the fees may have amounted to about £150; about £10 from private contributions, and £12 from the General Denominational School Board towards repairs and furniture.

19.—£2 annual average cost of each pupil.

20.—First and second classes: Monday, Wednesday, and Friday mornings $\frac{1}{2}$ an hour to $\frac{3}{4}$ of an hour Scripture reading; Tuesday and Thursday evenings $\frac{3}{4}$ of an hour reading didactic, historical, and narrative; Monday and Friday grammar with etymological parsing $\frac{1}{2}$ an hour to 1 hour; Tuesday and Thursday morning, geography with maps $\frac{1}{2}$ an hour to 1 hour; writing every morning, Wednesday excepted, $\frac{1}{2}$ an hour; Monday, Wednesday, and Thursday afternoons arithmetic and tables $1\frac{1}{2}$ hours; Tuesday, Wednesday, and Friday evenings dictation, letters, and bills of parcels, 1 hour; Wednesday morning Church catechism, 1 hour. Third class: the routine of this class is simply reading, writing, arithmetic, spelling, and catechism first steps. Fourth class: reading, spelling, and catechism first steps; fifth class, learning the alphabet at intervals, $\frac{1}{4}$ of an hour each, during the day, with catechism first steps, in conjunction with the third and fourth classes.

21.—11 elements of geography, 21 Bibles, 16 Testaments, 11 third books, 11 history of England, 18 first book of arithmetic, 20 compendium of geography, 20 English grammar (National School edition), 12 sequel No. 1 to the second book of lessons, 8 fourth book; these books, of their kind, are sufficient for the number attending the school, with the exception of elements of geography.

22.—About 24 unmounted tablets of spelling and reading—some illustrated, 1 map of The World, 1 New South Wales, 1 Palestine, 1 Syria (Old Testament), 1 Syria (New Testament), 1 Australasia, 1 Tasmania; no diagrams, blackboard, or apparatus of any kind; the school is ill supplied with suitable forms or desks; some of the children sit upon logs.

23.—Corporal punishment is occasionally administered for the purpose of enforcing discipline, together with standing out or on a form, and confinement after school hours, and an extra task as an imposition.

24.—Twice a year; occasionally a few books have been distributed as prizes.

25.—There has been hitherto no one visiting or inspecting the school excepting the clergyman about once a fortnight, and occasionally a member of the Board usually only for about a $\frac{1}{4}$ of an hour; there is no report of the school in existence.

26.—James Thomas Taylor.

27.—None at present.

28.—St. Mary at Axe, London.

31 & 32.—Was not placed at any school with the design of following the profession of a teacher; was placed at boarding-schools in Middlesex and Northampton from his third until his tenth year, and after, until his seventeenth year, was on a public foundation.

33 & 34.—4 years assistant master at two highly respectable academies in Worcestershire and Beds, from whence he obtained high testimonials which were placed in the hands of the late Bishop of Sydney; and 12 years master of the Church of England Denominational School at Liverpool, New South Wales; no occupation or business before adopting that of teacher; £70.

35.—From 1 January to 18 March, 1859, the fees amount to £8 11s. 2d.; ditto ditto salary received £11 12s. 4d.; no other emoluments during the above time.

36.—The total amount received by the present teacher for the above period, or since his appointment, is £20 1s. 6d.

37.—Visited by the incumbent of St. John's, Mudgee, to give religious instruction, about once a month; no other books used but the Bible and Church of England catechism; in former years religious instruction was given more frequently and more regularly by the clergymen.

Mudgee, 29 March, 1859.

In explanation of the several defective answers as given above, and the somewhat unsatisfactory state of the school, I beg to observe that the school has suffered much in public estimation, and the number of scholars considerably decreased, in consequence of much disagreement and unpleasantness existing between the late master and mistress appointed in July, 1857, the latter leaving somewhat abruptly in July last, and the former rendering himself rather disagreeable to various parents of children, and even to the members of the Local Board, who were at last disheartened to take much interest in the school. The utter want of co-operation thus intimated had the effect of even preventing certain accounts and statements in reference to the school to be kept more regularly. There is, however, a fair prospect, since the appointment of the new master, that the school will soon resume a more satisfactory character.—JAMES GUNTHER, Chairman.

NARELLAN.—(MIXED.)

- 1.—Narellan Township, County of Cumberland.
- 2.—Of brick, and in good condition.
- 3.—720 square feet; 40 feet by 18 feet.
- 4.—About two acres.
- 5.—Two water-closets, in good condition.
- 6.—One room; contains 112 superficial feet and 784 cubic feet—the teacher's room.
- 7.—From 8 to 12 pupils.
- 8.—Opening the windows and doors.
- 9.—Average on the books, 40 to 50 males, and 30 to 40 females; average attendance, 50 to 60.
- 10.—From 4 to 14 years of age.
- 11.—Six classes of boys, and six of girls. First class, age, from 10 to 14; second class, 8 to 10; third class, 7 to 8; fourth class, 6 to 7; fifth class, 5 years; sixth class, 4 years. From 6 to 8 in each class.
- 12.—5 hours; commence at 9 o'clock, break up at 12; recommence at half-past 1, break up at 4; intervening time at dinner and play.
- 13.—One holiday in each week, Saturday. Vacation never exceeds a month in the year; principally given at Christmas.
- 14.—About 280 days.
- 15.—From 2 to 4 years.
- 16.—Some few, number unknown.
- 17.—From 3s. to 6s. 6d. per quarter for schooling; no charge for books; 6d. per quarter for pens, ink, and slate pencils.
- 18.—Annual fees from pupils, £65; appropriated to teacher; received from Denominational School Board, £70. No other emoluments.
- 19.—About £1 15s. yearly for each pupil.
- 20.—The first and second classes—half an hour for writing, an hour for reading and spelling, an hour for grammar or geography, an hour and a half for arithmetic, half an hour for dictation, and half an hour for singing and prayer; the third, fourth, fifth, and sixth classes are employed at reading, writing, spelling, &c.
- 21.—The Scriptures, history of England, the class reading book, the third book, the second book. A good supply.
- 22.—Maps of The World, Europe, Asia, Africa, America, &c. A sufficient supply. There are no diagrams or instruments.
- 23.—What is requisite from a parent to a child, with mildness and love.
- 24.—A general examination once a year by the Local Board and parents of the children, when prizes are awarded of historical, moral, and religious books.
- 25.—The diocesan inspector of schools; the Rev. Thomas Hassall visits the school frequently—examines and instructs the children—reports favorably.
- 26.—John Hartley.
- 27.—Jane Hartley, daughter of the above-mentioned.
- 28.—John Hartley, Oldcastle, County Meath, Ireland; Jane Hartley, Swords, County Dublin, Ireland.
- 29.—John Hartley, 50; Jane Hartley, 15 years.
- 30.—1st October, 1854.
- 31.—A trained teacher.
- 32.—Trained at Oldcastle Lancasterian School until 20 years of age. Obtained a certificate in this Colony.
- 33.—Farming for two years before accepting the appointment.
- 34.—£70 per annum for teacher; assistant not paid.
- 35.—From £55 to £65 per annum.
- 36.—About £130 per annum.
- 37.—The Christian religion and morals are taught daily, by the teacher; the Rev. Thomas Hassall, Church of England clergyman. The Scriptures, Sinclair's catechism. There is a good and efficient Sabbath school.

NEWTOWN.—(MIXED.)

- 1.—Newtown.
- 2.—Brick; in good condition.
- 3.—1,320 feet, as per contractor's statement.
- 4.—There is a playground.
- 5.—Brick, and in good condition.
- 6.—Schoolroom, 60 feet by 22 feet; height, 14 feet.
- 7.—76 in all.
- 8.—Well ventilated.
- 9.—About 95; about 70; about 50 males and 20 females.
- 10.—From 14 to 4 years.
- 11.—Six classes; about 12 in a class; variable.
- 12.—From 9 to 12; from 2 to 4 o'clock; intervals the children go to dinner.
- 13.—Saturday, holiday; a week at Christmas and Midsummer.
- 14.—249 days.
- 15.—This question is too variable to admit of an answer definitive.
- 16.—This question is beyond the knowledge of the master.
- 17.—The charge varies from 9d. to 1s. per week.
- 18.—£120 4s 3d; from Government, £70; total, £190 4s. 3d.
- 19.—Annual cost, £2 14s. a head nearly.
- 20.—The children are instructed in reading, writing, spelling, arithmetic, geography, and the Scriptures, according to ages, &c.
- 21.—The Bible, Testament, 2nd, 3rd, and 4th book, history of Greece, England, Rome, and geography; other books are sent for.
- 22.—Map of World, Palestine, Africa, Australia; desks and stools new; no more needed.
- 23.—Punishment by cane when necessary, but seldom resorted to.
- 24.—Mr. Outhbert visits the school and examines the scholars; no rewards.
- 25.—Visited by the inspector as often and as long as he finds it convenient.
- 26.—Charles Alfred Newman.
- 27.—Rebecca Laurie.
- 28.—England; Sydney.
- 29.—41 years; 23 years.
- 30.—1st April, 1848.
- 31.—Educated for the law.
- 32.—None.
- 33.—Experience, none; lawyer's clerk.
- 34.—£190 4s. 3d.; assistant teacher, nothing.
- 35.—£120 4s. 3d.
- 36.—£190 4s. 3d.
- 37.—Scriptural and catechetical thrice a week; by the master; visited by the Rev. Charles Kemp, Church of England; Bible, catechism, faith and duty.

PADDINGTON.—(MIXED.)

- 1.—Paddington.
- 2.—Stone; in good condition; the addition of an infant school would be a great improvement.
- 3.—1,100 feet.
- 4.—4,840 square yards.
- 5.—Wood, in tolerably good condition.
- 6.—One room (sec. 3).
- 7.—88, during the month of March, 1859.
- 8.—Windows which will open, and a hole in the wall near the roof.
- 9.—60 boys, 50 girls; 50, 38.
- 10.—Males, 14, 3; females, 15, 3.
- 11.—Eight, 12, 14: 1st class, 14, 11; 2nd, 12, 10; 3rd, 14, 9; 4th, 11, 8; 5th, 10, 7; 6th, 9, 6; 7th, 7, 4; 8th, 6, 3, respectively.
- 12.—From 9 to 12 a.m., and from 1½ to 3½ p.m.; the intermediate hour and a half is spent in getting dinner and play.
- 13.—One, two, three; a fortnight at Christmas, a week at Easter, and a week at Midwinter.
- 14.—241.
- 15.—12 months.
- 16.—From 300 to 400.
- 17.—From 6d. to 1s. weekly; no charge for books.
- 18.—£106 2s. 3d., towards paying the master's salary; £87 10s. from Government; amounting to £193 12s. 3d. from all sources.
- 19.—Nearly £2 13s.
- 20.—Scripture lessons to the whole school, 4 hours per week; examination in ditto, ½ hour per week; commandments to whole school, ½ hour ditto; object lessons, &c., to whole school, 1 hour ditto; total, 6 hours. To the first division, consisting of 3 classes: Reading, 2½ hours; writing, 2½ hours; arithmetic (slate and mental), 5 hours; dictation, 2 hours; drawing and mapping, 1½ hours; geography, 1 hour; grammar, 2 hours; reproducing lessons,

1 hour; history, 1 hour; total, $18\frac{1}{2}$ hours. To the second division, consisting of three classes: Reading, 3 hours; writing, $3\frac{1}{2}$ hours; arithmetic (slate and mental), $5\frac{1}{2}$ hours; dictation, 3 hours; drawing, $1\frac{1}{2}$ hours; reproducing lessons, $1\frac{1}{2}$ hours; geography, 1 hour; total, $18\frac{1}{2}$ hours. To the third division: Reading, 5 hours; writing, $3\frac{1}{2}$ hours; arithmetic (tables and ball frame), 6 hours; repeating hymns, 1 hour; repeating commandments, $\frac{1}{2}$ hour. The girls are taught needlework 7 hours per week.

21.—Grammars (I. B.), historic (S. P. C. K.), geographies, (I. B. and S. P. C. K.), arithmetics (I. B.), third, fourth, and sixth books (ditto), Bithell's spelling by dictation, sequel No. 2, second book (I. B.), second book (S. P. C. K.), Parker's reading series No. 2, reading series No. 2 (S. P. C. K.), easy lessons No. 1 (ditto), arithmetical tables (ditto), reading lessons mounted (ditto), case of Scripture subjects (illustrated), ball frame. The books are in good condition; more are needed, viz., arithmetics, Bithell's spelling books, and arithmetical tables. It would be well if all the lesson books were reduced one-half as to matter, as children get tired of them before they are half way through them.

22.—1 blackboard, 1 musicboard and broken easel, work table, master's desk and broken table to stand it on, clock in good condition, 9 desks in good condition; 15 slates, 12 by 9; 15 ditto, 9 by 6, and 18 ditto without frames. Required—a globe, to suspend in the school; at least 2 dozen slates, 2 blackboards and easels, Johnson's illustrations of the mechanical powers. The maps in the school are the following:—Europe, Australia, Asia, Africa, North America, South America, Palestine, Syria (Old Testament), Syria (New Testament), The World, England.

23.—The system of correction is the cane, when absolutely necessary, which is seldom. There are no instructions except from the Denominational Board.

24.—Once by the clergyman and the diocesan inspector; the prizes consist of books, distributed annually.

25.—By the diocesan inspector and clergyman—the former twice; the first time he remained all day examining, the second 15 minutes; the latter visits two or three times a week; there is no report of which I am aware; the school is in a flourishing condition.

26.—James Green, born in Oxfordshire, England.

27.—Mary Ann Gregory, born in Sydney.

28.—Head teacher, 25 years.

29.—Assistant teacher, 42 years.

30.—September, 1857; assistant teacher, January, 1858.

31.—The head teacher has been trained.

32.—Head teacher trained in the Metropolitan Training College, for one year and seven months, and possesses a third class certificate.

33.—

34.—The fees in addition to the Government salary, £60.

35.—Nil.

36.—£19 12s. 3d.

37.—Such as is found in the Bible; four times a week, by the head teacher; the school is visited by the Church of England minister; the Bible.

PARRAMATTA.—(MIXED.)

1.—St. John's Parish, Parramatta.

2.—The master's house and old schoolroom of brick; past repair; a new schoolroom of stone lately erected; in perfect repair. The details of the new schoolroom will be given, although it has only been occupied since May, 1859.

3.—Schoolroom, $25 \times 50 = 1,250$ feet.

4.—135 feet by 139 feet.

5.—Of wood; in working order.

6.—1,250 square feet; 20,000 feet cubic.

7.—About 60.

8.—4 doors and 6 windows, and an open belfry.

9.—Boys, 50; girls, 18. Average—boys, 36; girls, 13.

10.—Ages, from 3 to 14 years, for both sexes.

11.—Six classes—boys and girls:—

1st class	12 to 14 years	9 children.
2nd "	10 " 12 "	8 "
3rd "	8 " 10 "	10 "
4th "	7 " 8 "	12 "
5th "	6 " 7 "	10 "
6th "	3 " 6 "	8 "

12.—5 hours; from 9 a.m. to noon; and from 2 p.m. to 4 p.m.; interval from noon to 2 p.m., dinner.

13.—Saturday, a whole holiday; vacations, two; 2 weeks at Christmas, and 2 at Mid-winter.

14.—237 days.

15.—15 months.

16.—Unknown; many attend private schools.

17.—30 at 1s. per week, 16 at 9d., 10 at 6d., 10 at 3d., 2 gratis.

18.—From pupils, £86 2s. 9d.; from Government, £87 10s.; total, £173 12s. 9d.

19.—£3 10s. 10 $\frac{1}{2}$ d.

20.—In answer to the question, I subjoin the time table :—

MORNING.						AFTERNOON.			
	Classes.	9 to 9.30	9.30 to 10.	10 to 11.	11.10 to 12.	2 to 3.	3 to 4.		
Monday. Thursday.	1 and 2.	Opening school with prayer and singing.	Writing.	Arithmetic.	Reading the Holy Scriptures. Reading, spelling, grammar, &c., or dictation. Reading, &c.	Arithmetic. mental or rule. Dictation.	General lesson in geography, history, &c. The girls spend this hour in the sewing class. Close with prayer and singing.		
	3 and 4.							Reading, spelling, grammar, &c., or dictation. Reading-Holy Scriptures. Reading, &c.	Reading, &c.
	5 and 6.								
Tuesday. Friday.	1 and 2.				Geography.	Catechism, faith & duty, &c.			
	3 and 4.							Dictation.	Ditto, Reading.
	5 and 6.								
Wednesday.	1 and 2.	Geography.	Catechism, faith & duty, &c.						
	3 and 4.			Dictation.	Ditto, Reading.				
	5 and 6.								

21.—The Bible, the New Testament, class reading books (2nd, 3rd, and 4th), sequels to reading series, first and second books (1st, 2nd, and 3rd); abridgment of Scripture history, grammar, geography, arithmetic, English, Roman, and Grecian history, parables, miracles, history of Our Lord, Sermon on the Mount, chief truths; condition of many indifferent; supply not adequate.

22.—World, fair; England, fair; Australia, Europe, Holy Land, Asia Minor, good; one large slate; prints, globes, and mechanical models much needed.

23.—The cane, when necessary; by written instructions given several years since from the Board.

24.—No examination this year; no prizes given.

25.—The diocesan inspector, once only; no report exists, to my knowledge, of his visit. The visit was made when the children were still in the old room, and under every disadvantage.

26.—Mr. Thomas Hole.

27.—

28.—Mr. Hole was born in England.

29.—45 years.

30.—January, 1841.

31.—Not trained.

32.—

33.—From Duncombe and Crispin Foundation Grammar School; obtained a scholarship of £50 for four years to the University; was an undergraduate at Catherine Hall, Cambridge.

34.—

35.—

36.—

37.—The church catechism is taught, the Scriptures and other books above-named are read daily, and the children are instructed in them by the master; the minister of St. John's, Rev. R. L. King, visits the school and takes an occasional part in the instruction of the children. The names of the books are given above in answer to question 21.

I beg to add a remark with reference to the room hitherto used for school purposes, —that is, until May, 1859,—that for many years it has been past repair, the walls very dirty from decay, the floor damp and on a level with the ground, and therefore necessarily unhealthy as well as dirty; the room itself low, ill-ventilated, re-echoing the least noise, and too narrow for the separation of classes, too low for the formation of a gallery. Under these circumstances (now happily removed by the liberal exertions of a parish already in debt), it is not to be wondered at if the school and the teaching in it have been at a low ebb. The number of children given in the preceding answers, describe the state of things as it existed in the time referred to in the question, the year ending 30 September, 1858.—R. L. K.

PENNANT HILLS.—(MIXED.)

1.—Pennant Hills.

2.—Chiefly of stone; the floor is in a very bad state.

3.—798 square feet.

4.—2,420 square yards.

5.—There are no water-closets.

6.—798 square feet; 9,576 cubic feet.

7.—The average number during the year 1858 was 56.

- 8.—Six of the windows are provided with ventilators.
- 9.—The annual average number on the books during 1858, 36 boys, 47 girls; average daily attendance, 25 boys, 31 girls.
- 10.—Boys, 14 years and 3 years; girls, 12 years and 3 years.
- 11.—Four classes; average in each class, 14.
- 12.—The school duties commence at 9 o'clock a. m., and terminate at 3 p. m. There is a recess from 12 till 1 o'clock, for dinner.
- 13.—One holiday each week. There are two vacations of one week each—the last week of June, and Christmas week.
- 14.—246.
- 15.—About 8 months.
- 16.—Cannot say.
- 17.—The maximum is 1s., the minimum 2d.
- 18.—£59 13s. 2d., partly appropriated by the teacher to making his residence habitable. Government salary, £78 15s. Total amount for 1858, £138 8s. 2d.
- 19.—£2 9s. 5d.
- 20.—The duties of the school commence at 9 o'clock, by inspecting cleanliness, drill, singing, and prayer.—Monday, 9 $\frac{1}{4}$ to 10, first, second, and third classes, church catechism. 10 to 10 $\frac{3}{4}$ —first class, dictation; second class, writing in copy-books; third class, writing on slates. 11 to 11 $\frac{1}{2}$ —first class, writing in copy-books; second class, New Testament; third class, reading and spelling. 11 $\frac{1}{2}$ to 12—first class, arithmetic (written); second and third classes, spelling. 1.5 to 2—first class, arithmetic (written); second class, dictation; third class, reading and spelling. 2 to 2 $\frac{1}{2}$ —first class, grammar; second class, arithmetic (written); third class, writing on slates. 2 $\frac{1}{2}$ to 3—first, second, and third classes, geography.—Tuesday, 9 $\frac{1}{4}$ to 10—first, second, and third classes, Old Testament. 10 to 10 $\frac{3}{4}$ —first class, grammar; second class, writing in copy-books; third class, writing on slates. 11 to 11 $\frac{1}{2}$ —first class, writing in copy-books; second and third classes, reading and spelling. 11 $\frac{1}{2}$ to 12—first class, arithmetic (written); second and third classes, spelling. 1.5 to 2—first class, arithmetic (written); second class, grammar; third class, writing on slates. 2 to 2 $\frac{1}{2}$ —first class, geography; second class, arithmetic (written); third class, reading and spelling. 2 $\frac{1}{2}$ to 3—first, second, and third classes, arithmetic (oral)—Wednesday, 9 $\frac{1}{4}$ to 10, first, second, and third classes, New Testament. 10 to 10 $\frac{3}{4}$ —first class, dictation; second class, writing in copy-books; third class, writing on slates. 11 to 11 $\frac{1}{2}$ —first class, writing in copy-books; second class, dictation; third class, reading and spelling. 11 $\frac{1}{2}$ to 12—first class, arithmetic (written); second class, writing on slates; third class, spelling. 1.5 to 2—first and second classes, arithmetic (written); third class, reading and spelling. 2 to 2 $\frac{1}{2}$ —first class, grammar; second class, reading and spelling; third class, writing on slates. 2 $\frac{1}{2}$ to 3—first, second, and third classes, geography.—Thursday, 9 $\frac{1}{4}$ to 10, first, second, and third classes, Old Testament. 10 to 10 $\frac{3}{4}$ —first class, grammar; second class, writing on copy-books; third class, writing on slates. 11 to 11 $\frac{1}{2}$ —first class, writing in copy-books; second and third classes, reading and spelling. 11 $\frac{1}{2}$ to 12—first class, arithmetic (written); second and third classes, spelling. 1.5 to 2—first class, arithmetic (written); second class, grammar; third class, writing on slates. 2 to 2 $\frac{1}{2}$ —first class, geography; second class, arithmetic (written); third class, reading and spelling. 2 $\frac{1}{2}$ to 3—first, second, and third classes, arithmetic (oral)—Friday, 9 $\frac{1}{4}$ to 10, first, second, and third classes, church catechism. 10 to 10 $\frac{3}{4}$ —first and second classes, arithmetic (mental); third class, writing on slates. 11 to 11 $\frac{1}{2}$ —first class, writing in copy-books; second class, dictation; third class, reading and spelling. 11 $\frac{1}{2}$ to 12—first class, arithmetic (written); second class, writing in copy-books; third class, spelling. 1.5 to 2—first class, history of England; second class, arithmetic (written); third class, writing on slates. 2 to 2 $\frac{1}{2}$ —first class, arithmetic (written); second and third classes, reading and spelling. 2 $\frac{1}{2}$ to 3—first, second, and third classes, object lesson. From 10 $\frac{3}{4}$ to 11 there is a recess of 15 minutes, and from 12 to 1 is the recess for dinner, the children saying Grace before and after meat; the school closing at 3.10, with roll, drill, singing, and prayers. Each afternoon the girls are instructed in needlework by Mrs. Thomas.
- 21.—First division—Old and New Testament, history of England, third reading book, Bithell's spelling by dictation, grammar, geography, and arithmetic books, church catechism. Second division—New Testament, second reading book, grammars and arithmetics, church catechism. Third division—Church catechisms, first reading books, tablets; alphabet class, tablets. The first and second books are much worn, having been in use upwards of two years; the number in fair condition is inadequate to the requirements of the school.
- 22.—Maps—World, Australia, St. Paul's travels, Syria (Old Testament), Syria (New Testament). Apparatus—blackboard, six desks, six stools; the whole in good condition.
- 23.—Chiefly moral influence; corporal punishment if considered necessary.
- 24.—The children are examined half-yearly by the Chairman of the Local Board. Books have been given (as rewards of merit) at the Christmas examinations.
- 25.—The school has been annually visited and examined by the diocesan inspector, W. J. Cuthbert, Esq.; about four hours each examination.
- Extract from inspector's report:—"The general aspect of the school is very pleasing, and highly creditable to the teacher."
- Remarks by Chairman of Local Board:—"Examination of children held January 3, 1859, and the progress they have made I consider highly satisfactory. Their writing does Mr. and Mrs. Thomas infinite credit."
- 26.—David Arthur Thomas.
- 27.—
- 28.—Sydney, New South Wales.

- 29.—27 years.
- 30.—September, 1856.
- 31.—Trained as a teacher.
- 32.—At the St. James' Model School.
- 33.—
- 34.—£78 15s.
- 35.—£59 13s. 2d.
- 36.—
- 37.—Shewn in time-table. By the teacher. Visited by Rev. A. Douglass, clergyman of the Church of England. Bibles and catechisms.

PENRITH.—(MIXED.)

- 1.—Penrith.
- 2.—Constructed entirely of wood; in tolerably good repair, and sufficiently commodious.
- 3.—960 square feet are contained in the area of the schoolhouse.
- 4.—4,866 square yards of land adjoining the school.
- 5.—The water-closet is a wooden building, containing 2 compartments (each 8 by 6 feet); situate about 87 feet from the back of the school.
- 6.—The schoolroom (there is only one apartment) contains 960 square feet, and 9,160 cubic feet.
- 7.—The average number of pupils lately assembled is about 33.
- 8.—Sufficiently commodious; no artificial provision made for ventilation.
- 9.—There is no data from which an annual average number on the books can be given.
- 10.—The maximum and minimum ages of the male pupils are 17 and 6 years; of the female pupils, 16 and 7 years.
- 11.—The school is divided into three classes; in the first there are 14 pupils, whose ages are from 10 to 17 years; in the second there are 16 pupils, whose ages are from 7 to 12 years; and in the third there are 9 pupils, whose ages are from 6 to 10 years.
- 12.—The pupils attend school from 9 to 12 $\frac{1}{4}$ a.m., and from 2 to 4 $\frac{1}{4}$ p.m., making 5 $\frac{1}{2}$ hours each day.
- 13.—No holiday or half-holiday during the week, excepting Saturday; there has been no vacation since the re-opening of the school.
- 14, 15, & 16.—There is no data from which an answer can be given to these questions.
- 17.—Each pupil pays 1s. or 6d. weekly, as decided upon by the Local Board at Penrith.
- 18 & 19.—The school was closed during a portion of 1858.
- 20.—The subjects of instruction, and the time allotted to each, are according to the following scale:—From 9 to 9 $\frac{1}{2}$, prayer and Scripture reading every day. Monday, Wednesday, and Friday—Morning: from 9 $\frac{1}{2}$ to 10 $\frac{1}{2}$ —first class, writing; second class, reading and spelling; third class, ditto. From 10 $\frac{1}{2}$ to 11 $\frac{3}{4}$ —first class, arithmetic (mental); second class, arithmetic (tables); third class, ditto. From 11 $\frac{3}{4}$ to 12 $\frac{1}{4}$ —examining copies, &c., and drill. Afternoon: from 2 to 3—first class, dictation (history); second class, arithmetic; third class, reading and spelling. From 3 to 3 $\frac{3}{4}$ —first class, reading; second class, writing; third class, ditto. From 3 $\frac{3}{4}$ to 4 $\frac{1}{4}$ —singing, prayer, and drill. Tuesday and Thursday—Morning: from 9 $\frac{1}{2}$ to 10 $\frac{1}{2}$ —first class, book-keeping; second class, writing; third class, writing (slates). From 10 $\frac{1}{2}$ to 11 $\frac{3}{4}$ —first class, arithmetic (by rule); second class, ditto; third class, reading and spelling. From 11 $\frac{3}{4}$ to 12 $\frac{1}{4}$ —examining copies, &c., and drill. Afternoon: from 2 to 3—first class, dictation (geography); second class, English grammar; third class, writing. From 3 to 3 $\frac{3}{4}$ —first, second, and third classes, catechism and Scripture reading. Every day, from 3 $\frac{3}{4}$ to 4 $\frac{1}{4}$ —singing, prayer, and drill.
- 21.—The titles of the books used in the first class are the Bible, class reading book (by Ludlow), history of Greece (series No. 3), history of England (No. 1), Roman Empire (No. 2); second class—New Testament, third book (S.P.C.K.), history of England (No. 1), and reading book for use of female schools; third class—New Testament, parables, the primer, and discourses for children. A fresh supply of books is particularly needed; the present number quite inadequate to the wants of the school.
- 22.—The maps, &c., in the school are, 7 large maps—2 of Europe, 1 each of Asia, Africa, Australia, The World, and England and Wales.
- 23.—The usual system of correction in giving lessons to be learnt after school hours.
- 24.—No instructions have been given to the present teacher.
- 25.—The school is visited once or twice every week by ladies residing at Penrith, and by the clergyman of the Church of England; the duration of the visits is usually from 1 to 2 hours; no report on the state of the school exists.
- 26.—Name of the head teacher, William Bass.
- 27.—Assistant teacher, Mrs William Bass.
- 28.—The birthplaces of the above are Olney and London.
- 29.—Ages 27 and 24 years.
- 30.—Appointed to present office, 20th January, 1859.
- 31.—Trained as a teacher.
- 32.—Horsemarket Academy, Northampton, several years.
- 33.—
- 34.—Salary of head teacher, £87 10s per annum; no other salaries.
- 35.—Amount of fees, &c., not known, the school so recently re-opened.
- 36.—Total income, &c., not known.

37.—Religious instruction is given to the pupils daily; by the teacher; also, by the clergyman of the Church of England, the Rev. Elijah Smith, who visits the school generally twice during the week, and usually catechises the pupils upon religious matters. The titles of the books used for religious purposes are—the Bible, faith and duty, abridgments of Scripture history, catechetical instruction, and parables and discourses for children.

ST. PHILIP'S.—(MIXED, AND INFANTS')

- 1.—Harrington-street.
- 2.—Foundation, stone—walls, brick; the building is in good condition.
- 3.—Superficial area, 2,432 square feet.
- 4.—Area of boys' yard, 566 square feet; girls' yard, 1,443 square feet.
- 5.—Water-closets—boys' 10 feet 10 inches by 7 feet 4 inches, girls' 9 feet by 7 feet 4 inches; both built of brick, shingled, and in good condition.
- 6.—Boys' school is on the ground floor—measurement 1,053 square feet, 14,283 cubic feet; girls' school on the upper story—950 square feet, 15,675 cubic feet; infants' on the same floor as the girls'—250 square feet, 4,126 cubic feet.
- 7.—Boys, 76; girls, 74; infants, 52.
- 8.—The ventilation is through the windows, of which there are four on each side of the schools, opening at the top.
- 9.—The annual average for the year 1858:—boys, on the books, 76, attendance, 61; girls and infants, on the books, 76, attendance, 52.
- 10.—Boys, maximum age 13 years, minimum 6 years; girls, 12 to 6; infants, 6 to 4.
- 11.—Boys' school, three classes: First class, average 23, maximum 13, minimum 8; second class 27, 12 to 8; third class 24, 11 to 6. Girls' school, four classes: First class 15, 12 to 8; second class 12, 11 to 8; third class 17, 10 to 7; fourth class 16, 10 to 6. Infant, three classes:—First class 17, 7 to 5; second class 17, 7 to 4; third class 18, 6 to 4.
- 12.—The children are in school 5 hours each day, from 9 a.m. to 12 o'clock at noon, and from 2 to 4 p.m. They are sometimes, in the morning, allowed ten minutes recreation in the yard; from 12 to 2 o'clock is occupied at home in various ways.
- 13.—Saturday is always a holiday; we have the usual public holidays, and two weeks vacation at Christmas, and one week in June.
- 14.—240 days, for the year ended September 30th, 1858.
- 15.—Cannot answer this question correctly, perhaps about 2 years.
- 16.—No means of knowing how many.
- 17.—15 boys at 1s. per week, 34 at 9d. per week, 25 at 6d. per week, 18 free: girls and infants, 11 at 1s. per week, 108 at 6d., 2 at 9d., 3 at 8d., 11 at 3d., 12 free. There are no other charges; books and other school requisites being found by the Board.
- 18.—Boys' fees, £98 6s. 10d., given to the master, who also received £87 10s. from the Denominational School Board, £10 from St. Philip's Parochial Association, and afterwards a bonus of £25 from the Denominational School Board; total, £220 16s. 10d. Infants' fees, £52, given to the mistress, who also received £61 5s. from the Denominational School Board, and £5 from St. Philip's Parochial Association; total, £118 5s.
- 19.—The annual cost of each pupil in the boys' school, £2 18s. 1¼d., infants', £1 11s 1½d.
- 20.—Boys':—9 to 9½, each day, opening school with singing and prayer: *Monday*, first class, 9½ to 10 arithmetic, 10 to 10½ general geography, 10½ to 11 dictation, 11 to 12 Scripture lesson, 2 to 2½ reading English history, 2½ to 3 writing in copy-books, 3 to 3½ grammar, 3½ to 4 home lessons; second class, 9½ to 10 grammar, 10 to 10½ dictation, 10½ to 11 reading, 11 to 12 Scripture lesson, 2 to 2½ reading, 2½ to 3 writing in copy-books, 3 to 3½ reading, 3½ to 4 home lessons; third class, 9½ to 10 reading, 10 to 10½ writing on slates, 10½ to 11 geography, 11 to 12 Scripture lessons, 2 to 2½ arithmetic, 2½ to 3 writing on slates, 3 to 3½ reading, 3½ to 4 repetition: *Tuesday*, first class, 9½ to 10 dictation, 10 to 10½ grammar, 10½ to 11 arithmetic, 11 to 12 Scripture lesson, 2 to 2½ reading third book, 2½ to 3 singing, 3 to 3½ geography of Europe, 3½ to 4 object lesson; second class, 9½ to 10 geography, 10 to 10½ reading, 10½ to 11 dictation, 11 to 12 Scripture lesson, 2 to 2½ reading, 2½ to 3 singing, 3 to 3½ reading, 3½ to 4 object lesson; third class, 9½ to 10 reading, 10 to 10½ geography, 10½ to 11 writing on slates, 11 to 12 Scripture lesson, 2 to 2½ reading, 2½ to 3 singing, 3 to 3½ arithmetic, 3½ to 4 object lesson: *Wednesday*, first class, 9½ to 10 arithmetic, 10 to 10½ geography of Palestine, 10½ to 11 dictation, 11 to 12 Scripture lesson, 2 to 2½ reading English history, 2½ to 3 writing in copy-books, 3 to 3½ grammar, 3½ to 4 catechism; second class, 9½ to 10 oral arithmetic, 10 to 10½ dictation, 10½ to 11 reading, 11 to 12 Scripture lesson, 2 to 2½ reading, 2½ to 3 writing in copy-books, 3 to 3½ reading, 3½ to 4 catechism; third class, 9½ to 10 reading, 10 to 10½ writing on slates, 10½ to 11 repetition, 11 to 12 Scripture lesson, 2 to 2½ arithmetic, 2½ to 3 writing on slates, 3 to 3½ reading, 3½ to 4 catechism: *Thursday*, first class, 9½ to 10 dictation, 10 to 10½ arithmetic, 10½ to 11 grammar, 11 to 12 Scripture lesson, 2 to 2½ reading class reading book, 2½ to 3 drill, 3 to 3½ drawing, 3½ to 4 object lesson; second class, 9½ to 10 grammar, 10 to 10½ reading, 10½ to 11 drawing, 11 to 12 Scripture lesson; 2 to 2½ reading, 2½ to 3 drill, 3 to 3½ reading, 3½ to 4 object lesson; third class, 9½ to 10 reading, 10 to 10½ writing on slates, 10½ to 11 writing on slates, 11 to 12 Scripture lesson, 2 to 2½ reading, 2½ to 3 drill, 3 to 3½ geography, 3½ to 4 object lesson: *Friday*, first class, 9½ to 10 arithmetic, 10 to 10½ geography of Australia, 10½ to 11 dictation, 11 to 12 Scripture lesson, 2 to 2½ reading poetry, 2½ to 3 writing in copy-books, 3 to 3½ mental arithmetic, 3½ to 4 catechism; second class, 9½ to 10 geography, 10 to 10½ dictation, 10½ to 11 reading, 11 to 12

12 Scripture lesson, 2 to 2½ reading, 2½ to 3 writing in copy-books, 3 to 3½ mental arithmetic, 3½ to 4 catechism; third class, 9½ to 10 reading, 10 to 10½ repeating hymn; 10½ to 11 writing on slates, 11 to 12 Scripture lesson, 2 to 2½ reading, 2½ to 3 writing on slates, 3 to 3½ repetition, 3½ to 4 catechism; 12 to 2 dinner, each day. Girls':—9 to 9½, each day, opening school with singing and prayer: *Monday*, first class, 9½ to 10 dictation, 10 to 10½ writing in copy-books, 10½ to 11 reading, 11 to 12 Scripture, 2 to 2½ arithmetic, 2½ to 3 mental arithmetic; second class, 9½ to 10 reading, 10 to 10½ dictation, 10½ to 11 grammar, 11 to 12 Scripture, 2 to 2½ writing on slates, 2½ to 3 reading; third and fourth classes, 9½ to 10 writing on slates, 10 to 10½ reading, 10½ to 11 catechism, 11 to 12 Scripture, 2 to 2½ reading, 2½ to 3 writing on slates: *Tuesday*, first class, 9½ to 10 geography, 10 to 10½ arithmetic, 10½ to 11 reading, 11 to 12 Scripture, 2 to 2½ arithmetic, 2½ to 3 dictation; second class, 9½ to 10 reading, 10 to 10½ geography, 10½ to 11 writing in copy-books, 11 to 12 Scripture, 2 to 2½ arithmetic, 2½ to 3 reading; third and fourth classes, 9½ to 10 writing on slates, 10 to 10½ reading, 10½ to 11 general questions, 11 to 12 Scripture, 2 to 2½ reading, 2½ to 3 writing on slates: *Wednesday*, first class, 9½ to 10 grammar, 10 to 10½ arithmetic, 10½ to 11 reading, 11 to 12 Scripture, 2 to 2½ sacred geography, 2½ to 3 reading; second class, 9½ to 10 writing in copy-books, 10 to 10½ reading, 10½ to 11 arithmetic, 11 to 12 Scripture, 2 to 2½ reading, 2½ to 3 dictation; third and fourth classes, 9½ to 10 writing on slates, 10 to 10½ catechism, 10½ to 11 reading, 11 to 12 Scripture, 2 to 2½ arithmetic, 2½ to 3 reading. *Thursday*, first class, 9½ to 10 reading, 10 to 10½ geography, 10½ to 11 writing in copy-books, 11 to 12 Scripture, 2 to 2½ grammar, 2½ to 3 singing; second class, 9½ to 10 grammar, 10 to 10½ reading, 10½ to 11 arithmetic, 11 to 12 Scripture, 2 to 2½ dictation, 2½ to 3 singing; third and fourth classes, 9½ to 10 writing on slates, 10 to 10½ object lesson, 10½ to 11 reading, 11 to 12 Scripture, 2 to 2½ reading, 2½ to 3 singing. *Friday*, 9½ to 10 dictation, 10 to 10½ reading, 10½ to 11 grammar, 11 to 12 Scripture, 2 to 2½ reading, 2½ to 3 writing in copy-books; second class, 9½ to 10 reading, 10 to 10½ geography, 10½ to 11 dictation, 11 to 12 Scripture, 2 to 2½ mental arithmetic, 2½ to 3 reading; third and fourth classes, 9½ to 10 writing on slates, 10 to 10½ general questions, 10½ to 11 reading, 11 to 12 Scripture, 2 to 2½ reading, 2½ to 3 writing on slates; 12 to 2 dinner, 3 to 4 needlework, each day.

21.—First class, boys,—the Bible, Ludlow's class reading book, third book of the S. P. C. K. series; English history, do.; faith and duty, do. Second class, New Testament, second book, S. P. C. K. series; second book, No. 2, do. Third class, Simpson's primer, easy lesson book, and lesson book, No. 1, S. P. C. K. series. First class, girls,—Bible, and third book, S. P. C. K. series. Second class, do., New Testament; second book, S. P. C. K. series. Third class, do., lesson book, No. 1, S. P. C. K. series. Fourth class, do., Simpson's primers. The infants are taught from lesson sheets; we are in want of more Bibles; the rest of the books are in a fair condition.

22.—Maps in the boys school,—The World, Australia, England, and Wales, North and South America, Palestine, St. Paul's travels, Asia, Africa, Australasia, natural philosophy; girls' school,—The World, Australia, England and Wales, Europe; infants' school,—twelve prints, natural history, four Scripture history, and thirteen other lesson sheets.

23.—The cane is sometimes used, and the children are often kept in school, as a punishment, after school hours.

24.—The Local Board visit the schools on the first Tuesday in each month for the purpose of examining the children; prizes of a religious and moral character are awarded to the children once a year.

25.—The diocesan inspector, Mr. W. J. Cuthbert, visited the schools five times during the twelve months ended 30th September, 1858; these visits occupied half an hour each; Mr. Cuthbert also spent the whole day of 17th June, 1857, examining the children in the boys' school.

26.—James Bardsley.

27.—Alice Bardsley, Martha Earl, Mary Johnson.

28.—Master, Oldham, Lancashire, England; mistress, Liverpool, do.; Martha Earl, Sheffield, Yorkshire, England; Mary Johnson, Sydney, New South Wales.

29.—James Bardsley, 28 years; Alice Bardsley, 24 years; Martha Earl, 64 years; Mary Johnson, 16 years.

30.—Master, 1st October, 1856; mistress, 1st April, 1859; Martha Earl, 1825; Mary Johnson, 1st March, 1859.

31.—Not trained.

32.—Both master and mistress possess third class certificates from the Committee of Council in England.

33.—The master has been teaching for 10 years; left his last situation in England to come out to Sydney under his present engagement.

34.—Master's salary from Government, £87 10s.; mistress', do., £61 5s.; Mrs. Earl and Mary Johnson are paid from the girls' school fees; the former receiving 16s. per week, and the latter 6s. per week.

35.—Boys' fees for 1858, £98 6s. 10d., besides which the master received £10 from St. Philip's Parochial Association, and a bonus from the Denominational School Board of £25; the school mistress received for the same year (1858), fees, £52; St. Philip's Parochial Association, £5.

36.—Total income of master for 1858, £220 16s. 10d.; total income of mistress for 1858, £118 5s.

37.—The teachers give a Scripture lesson for 1 hour every day; the Very Rev. the Dean of Sydney and his curate, the Rev. J. Steele, frequently give the children religious instruction; the books used for this purpose are the Bible, church catechism, and the faith and duty of a Christian.

PICTON.—(MIXED.)

- 1.—The district of Picton, in the County of Camden.
- 2.—The house in which the school is held is composed of a kind of loam (generally called a mud house). It is in a very bad condition. The sides are kept from falling out by stays made of bricks. It greatly needs enlargement: it contains four rooms, for which the master has to pay rent, and at the same time to use three out of the four rooms for the school.
- 3.—There are in the four rooms known as the schoolhouse about 500 square feet.
- 4.—The master allows out of the land rented by him with the schoolhouse, 308 square yards.
- 5.—There are two water-closets built of slabs, and they are in very good condition.
- 6.—In the room appropriated to teaching there are 154 square feet, and 1,386 cubic feet.
- 7.—In each of the three rooms there are about 13 pupils averagely assembled.
- 8.—There is no provision made for the ventilation of either of the three rooms.
- 9.—The annual average number on the books of boys, is 30; of girls, 36; and the average number attending the school is, of boys, 18; and of girls, 20.
- 10.—The oldest boy in the school is 15, and the oldest girl is 15: the youngest boy is 4, and the youngest girl, 3 years of age.
- 11.—The school is divided into three classes: in the first the average number is 13; in the second, 15; in the third, 10. The maximum age in the 1st class is 15; in the 2nd class, 14; in the 3rd class, 8. The minimum age in the 1st class, 8; in the 2nd class, 7; in the 3rd class, 3.
- 12.—The pupils attend the school 5 hours daily: from 9 till 12 a.m., and from 2 till 4 p.m. The hours of cessation from study are from 12 till 2, when their time is spent in eating their dinners and in recreation.
- 13.—Saturday is the holiday in the week; there are no half-holidays given. There are two vacations in the year—a fortnight at Christmas and a fortnight at Midwinter.
- 14.—There are about 218 days in the year appropriated to school studies.
- 15.—As far as I can judge, not being in the school any length of time, about seven years is the average length of time pupils remain at school here from first entrance; but if the time is deducted from that that pupils are kept away to assist parents in home pursuits, I should say that they are not more than three years at school from their first entrance.
- 16.—There are about ten in the district known, who do not attend the school.
- 17.—The annual sum charged to each pupil for instruction is £1 9s., nothing further being charged: this is, therefore, the sum total.
- 18.—I cannot answer this question positively, as I was not in the school till February, 1858; but as near as I can judge the amount of school fees received from pupils from September, 1857, till September, 1858, amounts to about £35. These fees are appropriated by the master for his sustenance. The Denominational Board pay the master for this period the sum of £70. The total amount, therefore, received for this period towards the support of this school, is £105.
- 19.—The average annual total cost of the education of each pupil is about £2 15s.
- 20.—Reading, spelling, writing, arithmetic, geography, grammar, and dictation. 1 hour is devoted to reading, 1 hour to spelling, 1 hour to writing, 1 hour to arithmetic, half an hour on each day to geography or grammar, and half an hour to dictation. This is the time allotted for such subjects in each day throughout the week.
- 21.—The class reading book, the society's 4th book, the society's 2nd book, the Testament, and the society's 1st book. The books now in use are in bad condition; other kinds of books are needed, and the number at present in use is inadequate to the wants of the school.
- 22.—A map of The World, a map of the countries mentioned in the Old Testament, and one of countries mentioned in the New Testament. A map of South America, a map of Europe, and a map of Australia; also a blackboard. Their present condition is good, and for the present no others are needed.
- 23.—The system of correction used in the school is as follows:—Any misdemeanour committed, the pupil has to stay in after school hours and prepare some lesson or perform some school duty in expiation of such offence. No written or other instruction has been received by the master from any person on this subject.
- 24.—About twelve times during the year the pupils have been examined with reference to their progress—principally by the Rev. J. Carter, Chairman of the Board. No prizes or other rewards of merit are given in the school.
- 25.—By the Rev. J. Carter; by him the school is visited weekly, different times being spent by him in the school, sometimes half an hour, at other times an hour or two, and sometimes longer. No report of the state of the school exists.
- 26.—William Webb.
- 27.—None are engaged in the school.
- 28.—Head teacher's birthplace is Hornsey, Middlesex.
- 29.—Ditto ditto age, 28.
- 30.—The 1st of February, 1858.
- 31.—Yes.
- 32.—At St. John's College, Battersea, for the period of fourteen months; possessed of no certificate, not undergoing any examination for certificate.
- 33.—None; master has been teaching from the age of 15 years.
- 34.—Head teacher's salary is £70 per year.
- 35.—Head teacher is in receipt of fees from pupils amounting to about £40 a year.
- 36.—Head teacher's total annual income amounts to about £110; deducting rent, £12 yearly, which he pays for the school, it would be £98 yearly.

37.—The Bible or Testament is read in the school nearly every day. Moral instruction is blended with nearly every lesson by the master. The school is visited by the clergyman of the district. He belongs to the Church of England. The Bible, Testament, the Church of England catechism, Scripture history, parts 1, 2, and 3, the Messiah, the primer, &c.

PITT TOWN.—(MIXED.)

- 1.—Pitt Town, County of Cumberland.
- 2.—Bricks and wood; needs repairs.
- 3.—1,376 superficial square feet.
- 4.—None allowed.
- 5.—A brick closet, in good repair.
- 6.—720 square feet; 10,800 cubic feet.
- 7.—50.
- 8.—2 doors, 6 windows, 1 chimney.
- 9.—The annual average number on the books, boys, 38; girls, 43; total, 81. Average number attending the school, from 1st October, 1857, to 30th September, 1858, were—boys, 25; girls, 30; total, 55.
- 10.—Maximum age, 15 years; minimum, 4 years, of both sexes.
- 11.—Number of classes, four. Average number in each class—first class, 8; second class, 11; third class, 14; fourth or infant class, 17. Maximum age—first class, 15 years; second class, 12 years; third class, 10 years; fourth class, 7 years. Minimum age—first class, 11 years; second class, 9 years; third class, 7 years; fourth class, 4 years.
- 12.—5 hours, commencing at 9, and terminating at 3 o'clock; from 12 to 1 o'clock, the interval is employed in taking refreshment and exercise.
- 13.—Saturday in each week; two vacations of 2 weeks each, about 21st June, and 24th December.
- 14.—Number of school days from 1st October, 1857, to 30th September, 1858, was 231.
- 15.—About 4 years.
- 16.—40 to 50.
- 17.—The weekly charge from 6d. to 3d.; no charge for books; the annual charge for each, total, £1.
- 18.—The amount of school fees from the pupils, for the twelvemonth ending 30th ending 30th September, 1858, was, £55, appropriated by the teacher towards the support of himself and family; amount of Government salary, £70; total amount from all sources during the abovementioned period, £125.
- 19.—Average annual total cost for education of each pupil, £2 5s. 5½d.
- 20.—Monday and Wednesday—From 9 to 9¾, first and third classes, reading; second class, writing; fourth class, alphabet. 9¾ to 10½, first and third classes, writing; second class, reading; fourth class, spelling small words. Recess for 5 minutes. Thence to 11¼, first and third classes, arithmetic; second class, grammar; fourth class, alphabet. 11¼ to 12, first class, grammar; second class, arithmetic; third class, spelling; fourth class, small words. 12 to 1, recreation. 1 to 2, first and second classes, reading Scripture; third class, writing; fourth class, alphabet. 2 to 2¾, mental calculation, tables, &c., simultaneously. 2¾ to 3, singing, prayers, &c., on closing school. Tuesday and Thursday—From 9 to 9¾, first and third classes, writing; second class, reading; fourth class, small words. 9¾ to 10½, first and third classes, reading; second class, writing; fourth class, alphabet. Recess for 5 minutes. Thence to 11¼, first class, geography; second class, arithmetic; third class, spelling; fourth class, small words. 11¼ to 12, first and third classes, arithmetic; second class, geography; fourth class, alphabet. 12 to 1, recreation. 1 to 2, first and second classes, reading Scripture; third class, reading; fourth class, spelling small words. 2 to 2¾, mental calculation, tables, &c., simultaneously. 2¾ to 3, singing, prayers, &c., on closing school. On Friday, the whole school learning collects, catechism, and reading Scripture lesson, religious instruction, &c.
- 21.—The first and second classes use the Bible, English history, fourth, third, and class books, Scripture history, catechetical series, catechism, collects, grammar, and geography; third class use Mavor's spelling book; fourth or infant class, first book and alphabet sheet. The books principally used, such as grammars, geographies, table books, catechisms, &c., are in bad condition; no other kind needed, and if in good condition sufficient.
- 22.—A map of Europe, Asia, Africa, North and South America, of the countries mentioned in the Bible, Palestine, England, Australasia, British Isles, and The World, and a blackboard; the map of The World is very much worn, a new one required.
- 23.—Very little punishment of any sort used. Discipline and energy on the part of the teacher is all that is needed; no written or other instruction respecting it.
- 24.—Twice a year, by the clergyman, Chairman of Local Board; no prizes awarded.
- 25.—By W. J. Cuthbert, Esq., diocesan inspector, on the 19th and 20th November, 1857, and by the Rev. T. Wilson, once a week; the time he occupies is about 1 hour and a half. (*Vide* Supplement to the Denominational School Board Report.)
- 26.—Henry Wylie.
- 27.—None attached.
- 28.—Ireland.
- 29.—50 years.
- 30.—21st February, 1859.

- 31.—Trained as a teacher.
 32.—At Santry, near Dublin, 4 years; at St. James' Model School, Sydney, a month; received a general certificate of qualification from St. James' Model School, in October, 1849. No class certificate was granted at that time.
 33.—No other occupation or business, always a teacher.
 34.—Annual salary of head teacher, £70.
 35.—Only the fees received from the pupils.
 36.—The total annual income of head teacher, derived from the school, including the Government salary, from 1st October, 1857, to 30th September, 1858, was £125.
 37.—Biblical and catechetical once a week; by the teacher, and by the Rev. Thomas Wilson, minister of the Church of England, and Chairman of the Local Board. The Bible, chief truths, church catechism, catechetical series and collects.

PYRMONT.—(MIXED.)

- 1.—Mount-street, Pyrmont.
 2.—The boys' school is constructed of wood on stone foundation, and needs repairing; the girls' school is a private house, constructed of stone, at present rented by the teacher.
 3.—The area of the boys' schoolhouse is 830 feet; of the girls', 518 feet.
 4.—The number of feet in the ground adjoining the boys' school is 3,550 feet; in the girls', 450 feet.
 5.—There is no closet to the boys' school; there is one to the girls', built of stone, but too small, being only intended for a private dwelling.
 6.—The boys' room contains 740 square and 8,840 cubic feet, and the girls' room 208 square and 2,080 cubic feet.
 7.—From 90 to 100 in the male school, and from 40 to 50 in the female school.
 8.—The upper sashes of the windows can be lowered, and the spaces between the shingles also serve the purpose of ventilation; this latter provision only applies to the boys' school.
 9.—The average number on the books is 63 boys and 28 girls; total, 91.
 10.—The maximum age of boys, 15 years, and of the girls, 16; the minimum of boys, 4 years; of girls, the same.
 11.—The boys are divided into five classes; the average number in each class is 20; first class, age, from 10 to 15; second class, from 8 to 12; third class, from 7 to 9; fourth class, from 6 to 8; fifth class, from 4 to 7. The girls are divided into four classes; the average number in each is 10; first class, age, from 12 to 16; second class, from 9 to 13; third class, from 6 to 11; fourth class, 4 to 6.
 12.—The number of hours the pupils attend each day is 5, commencing in the morning at 9, and terminating at 12; in the afternoon at 2, and closing at 4.
 13.—No stated weekly holidays; two vacations during the year; each a fortnight; at Christmas and Easter.
 14.—Deducting vacations and general holidays leaves 235 school days.
 15.—About three years is the average length of time the pupils remain at school.
 16.—About 300 that do not usually attend this school.
 17.—The weekly fees are 6d., 9d., and 1s.; the pupils furnish their own books, except stated reading lesson books, inadequately supplied by the Board of Education; the present teacher, Mr. Gale, has provided the books now in use.
 18.—The amount of school fees received during the year ending 30th September, 1858, is £162 13s. 3d.; appropriated to teacher's salary, together with Government allowance of £70, making a total of £232 13s. 3d., out of which the teacher pays rent for two school-rooms (exclusive of residence) to the amount of £49 8s. per annum.
 19.—Total cost of each pupil for the year is £2 11s. 1½d.
 20.—First class: the first class pupils are taught in the morning of each school day—spelling and tables, $\frac{3}{4}$ of an hour; reading, $\frac{1}{4}$; writing, $\frac{1}{2}$; grammar, $\frac{1}{2}$; arithmetic, $\frac{3}{4}$; geography, $\frac{1}{4}$. In the afternoon—reading, $\frac{1}{2}$ an hour; dictation and arithmetic, 1½ hours. Second class: the same routine is observed in the second class, with the exception of grammar, which is taught orally from their reading lesson books. Third class: the third class pupils are taught in the morning of each day—spelling and tables, $\frac{3}{4}$ of an hour; reading, $\frac{1}{4}$; writing, $\frac{3}{4}$; and arithmetic, 1¼. In the afternoon—reading, $\frac{3}{4}$ of an hour; writing on slates and arithmetic, 1¼. Fourth class: the fourth class pupils are taught same as third. Fifth class: the fifth class pupils are taught to read only $\frac{1}{4}$ of an hour in morning and same in afternoon.
 21.—The reading books used are the first, second, third, fourth, and fifth (with supplement to fourth) of the National series, Chambers' arithmetic, National arithmetic, Morell's and Lennie's grammars, and geography; the present condition of the books is good, having been lately supplied out of the teacher's income.
 22.—A map of England and Wales, of Australia, Palestine, Syria (Old Testament), Syria (New Testament), St. Paul's travels, and the two hemispheres; all in good condition except the last-named.
 23.—A system of correction, by the use of the cane or other punishment, does not appear necessary to secure good order, but constant employment in school duties seem best calculated to effect that object; the cane, therefore, is only used when extreme necessity requires. Constant employment, however, cannot be kept up in sufficient variety, without a more ample supply of books, slates, and apparatus than is usually apportioned to each school under the present system.

24.—A system of prize-giving is adopted by the teacher every quarter, to the first and second classes, to the extent of 20s. in the year; each prize, 1s.; the plan is found to answer very well.

25.—By the diocesan inspector of schools; last official inspection, 9 July, 1859; time, 1 day; I am unable to state whether the present condition of the school is better or worse than previous to my accepting office, but, as far as I am able to judge, the condition of the school is good.

26.—Robert Vining Gale is the name of the head teacher of the boys' school; and Louisa Gale, of the girls' school.

27.—No assistants or pupil teachers employed.

28.—The male teacher was born in London; the female teacher in British America, but brought up in Scotland.

29.—The male teacher, 41; and the female teacher, 33 years.

30.—Date of present appointment, November 1st, 1858.

31.—The female teacher is a trained teacher; the male teacher is not trained.

32.—The female teacher was trained at a private institution for 3 years, where no certificates were given.

33.—The male teacher has had 13 years' experience; the female teacher has been 16 years employed in teaching previous to present appointment.

34.—The salary of the male teacher is £70 a year; the female teacher has no salary.

35.—The fees derived from the school amount to £162 13s. 3d.

36.—The total income of the teacher, £232 13s. 3d.

37.—Religious instruction is given with church catechism on each Friday afternoon; the titles of the books used, Bible and Testament.

QUEANBEYAN.—(MIXED.)

1.—Trincula-place, Queanbeyan.

2.—Stone walls; shingled roof; lately underwent partial repair, the expense of which has not yet been paid for want of funds; needs further repairs.

3.—Length 25 feet, breadth 15 feet, equal to 375 feet area.

4.—Two roods, not enclosed.

5.—Apartments for male and female children in good repair.

6.—375 square feet, 3,750 cubic feet, in one room.

7.—30.

8.—Door and windows, and fireplace.

9.—48; 30—16 boys and 14 girls.

10.—Males, 14 to 4; females, 13 to 4.

11.—Three. First class—average attendance, 12; 14 to 7 years of age. Second class—average attendance, 10; 10 to 5 years of age. Third class—average attendance, 8; 7 to 4 years of age.

12.—5½ hours; from 9 to 12½, and from 2 to 4; intervening cessation of study from 12½ to 2 for dinner and play.

13.—Saturday, in every week; Good Friday, Easter Monday, January 26th, May 24th, and a fortnight at Christmas.

14.—246.

15.—Two-thirds remain nearly 2 years; one-third uncertain.

16.—Probably 20.

17.—Average, 7d. per week; average total annual charge, £1 10s. 4d.

18.—£65 4s., to the master's benefit; Government salary, £52 10s.;—total, £117 14s.

19.—£3 18s. 6d.

20.—First class—Holy Scriptures, spelling, writing, and arithmetic, every day; dictation, history, geography, and grammar, twice a week; faith and duty, and church catechism, once a week. Second class—subjects the same; distribution of time rather different. Third class—reading, spelling, writing, and arithmetic, every day.

21.—Bible, New Testament, class reading book (compiled by Geo. Ludlow), third and fourth reading books, history of England (historical series, No. 1, by S. P. C. K.), geography (epitome of geographical knowledge, ancient and modern, compiled for the use of the teachers and classes of the National Schools in Ireland), grammar (published by direction of the Commissioners of National Education in Ireland), faith and duty, are used in the first class; in the second class the second and third books are used, instead of the third and fourth books, in other respects the books are the same in both classes; in the third class, primer and first book are the books used; all the books are in good condition, except the New Testaments.

22.—Maps in the school—The World, Europe, England and Wales, New South Wales and Victoria, Palestine, countries mentioned in Old Testament, countries mentioned in New Testament, St. Paul's travels; maps required of Asia, Africa, and America; a small globe would be found useful; prints—the Ten Commandments.

23.—Gentle corporal punishment, or confinement during play hours; no written instructions.

24.—One general examination at Christmas, with prizes of books, and occasional examinations of the various classes, by the Chairman of the School Board, with one or other of the members of the Board.

25.—Frequently by the Chairman, and occasionally by members of the Board; the master frequently complains of the difficulty he experiences in collecting the school fees from the parents.

26.—John Ford.

27.—One or other pupil of the first class.

28.—East Hothly, County Sussex, England.

29.—37 years.

30.—1 April, 1855.

31.—Not trained.

32.—

33.—Frequently taught small classes of children and adults without remuneration; merchant's clerk.

34.—£117 14s.

35.—House rent.

36.—£117 14s.

37.—This question is best answered by directing attention to the reply to questions of a similar nature.

RANDWICK.—(MIXED.)

1.—Randwick.

2.—New; of stone, and in complete repair.

3.—1,683 square feet.

4.—About 16,000 square feet.

5.—Two, in useful and clean condition.

6.—

7.—20.

8.—Abundant.

9.—24; 20 average; 13 girls, 7 boys.

10.—11 to 4 years.

11.—Three classes; 6, 6, 8 children.

12.—5 hours; commencing at 9, and terminating at 4; from 12 till 2, recreation and dinner.

13.—Saturday in each week; one week at each quarter.

14.—241.

15 & 16 —No data for ascertaining.

17.—From 1s. to 6d. per week; the total annual charge, from £2 8s. to £1 4s.

18 & 19 —As the school only opened in September, 1858, these questions cannot be answered.

20.—Reading, spelling, grammar, geography, writing, arithmetic, catechism, Scripture history.

21.—The reading books of the Irish Society, Sullivan's geography, Cornwall's grammar for beginners, books published by the Christian Knowledge Society; an adequate supply at present for the school.

22.—A set of maps, in fair condition.

23.—No corporal punishment employed.

24.—Twice in each year; rewards, chiefly in books, given at Christmas.

25.—Clergyman of the parish, and the inspector of Church of England schools.

26.—Eliza Edson.

34.—£50, Government salary.

36.—About £75

37.—Visited by the clergyman of the parish.

(As the Randwick school has only been open about nine months, some of the questions are necessarily unanswered.)

RICHMOND.—(MIXED.)

1.—Richmond.

2.—Built of brick and shingled, requires some repairs; a larger schoolroom would be desirable.

3.—450 superficial square feet.

4.—Upwards of 4 acres.

5.—One for each of the sexes; built of bricks and shingled, and in good order.

6.—One room for teaching 450 square feet, 6,720 cubic feet.

7.—Average number of pupils in attendance last month (March), 93.

8.—4 windows on front, 1 on each end, and 3 ventilators on the rear; the windows open.

9.—The average number on class roll for the year 1858, boys, 40; girls, 53; total, 93.

The numbers at present are, boys, 62; girls, 53; total, 120.

10.—Maximum age of girls, 13; minimum age of girls, 3; maximum age of boys, 12; minimum age of boys, 4.

11.—Six classes, including infant class; average in each class, 20. First class, maximum age, 13; minimum age, 9. Second class, maximum age, 13; minimum age, 8. Third class, maximum age, 13; minimum age, 8. Fourth class, maximum age, 12; minimum age, 6. Fifth class, maximum age, 10; minimum age, 5. Sixth class, maximum age, 7; minimum age, 3.

12.—6½ hours; from 9 o'clock, a.m., to 3:30 p.m., with an intermission of one hour (from 12:30 to 1:30) for dinner and play.

13.—School closed on Saturdays. Three vacations in the year; one week at Easter, one week in June, and a fortnight at Christmas.

14.—285 days.

15.—About two years.

16.—Cannot say.

17.—From 3d. to 1s. per week. Children, whose parents are certified by a member of the Local Board to be unable to pay, are taught without any fee; no charge made for books.

18.—Fees from pupils, £60 0s. 4d., appropriated to teacher's use. Salary from Denominational School Board, £87 10s.; total, £147 10s. 4d.

19.—£2 7s. 7d.

20.—First, second, and third classes: 9 to 9 $\frac{1}{4}$, singing and prayer each day. Monday, Wednesday, and Friday, 9 $\frac{1}{4}$ to 10, geography: Tuesday and Thursday, English grammar. 10 to 10 $\frac{1}{2}$, writing from dictation each day. 10 $\frac{1}{2}$ to 11, arithmetic each day. 11 to 11 $\frac{1}{4}$, reading and spelling. 11 $\frac{1}{4}$ to 12 $\frac{1}{4}$, writing on paper each day. 12 $\frac{1}{4}$ to 12 $\frac{1}{2}$, examining copies, calling class roll, and singing each day. 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$, arithmetic by rule and entering each day. Monday, Wednesday, and Friday, 2 $\frac{1}{2}$ to 3, mental calculations; Tuesday, arithmetical tables; Thursday, church catechism. 3 to 3 $\frac{1}{4}$, spelling from dictation each day. 3 $\frac{1}{4}$ to 3 $\frac{1}{2}$, singing and prayer each day. From 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$, girls learning plain needlework. Fourth and fifth classes: 9 to 9 $\frac{1}{4}$, singing and prayer each day. 9 $\frac{1}{4}$ to 10, Monday, Wednesday, and Friday, reading and spelling; Tuesday and Thursday, arithmetic. 10 to 11, Monday, Wednesday, and Friday, arithmetic; Tuesday and Thursday, writing easy words from dictation. 11 to 11 $\frac{1}{2}$, Monday, Wednesday, and Friday, writing easy words from dictation; Tuesday and Thursday, reading and spelling. 11 $\frac{1}{2}$ to 12 $\frac{1}{4}$, writing on paper each day. 12 $\frac{1}{4}$ to 12 $\frac{1}{2}$, examining copies, calling class roll, and singing each day. 1 $\frac{1}{2}$ to 2, Monday, Wednesday, and Friday, arithmetic; Tuesday and Thursday, reading and spelling. 2 to 2 $\frac{1}{2}$, Monday, Wednesday, and Friday, reading and spelling; Tuesday and Thursday, writing on slates. 2 $\frac{1}{2}$ to 3, Monday, Wednesday, and Friday, writing on slates; Tuesday, spelling from dictation; Thursday, church catechism. 3 to 3 $\frac{1}{4}$ Monday, Wednesday, and Friday, arithmetical tables; Tuesday and Thursday, hymns. 3 $\frac{1}{4}$ to 3 $\frac{1}{2}$, singing and prayers each day. Girls learning plain needlework from 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$. Sixth or infant class: 9 to 9 $\frac{1}{4}$, singing and prayer each day. 9 $\frac{1}{4}$ to 10, alphabet, spelling, and learning to read each day. 10 to 10 $\frac{1}{2}$, learning to write on slates each day. 10 $\frac{1}{2}$ to 11, Monday, Wednesday, and Friday, hymns; Tuesday and Thursday, first steps to catechism. 11 to 11 $\frac{1}{2}$, spelling and learning to read each day. 11 $\frac{1}{2}$ to 12, singing each day. 12 to 12 $\frac{1}{4}$, Monday, Wednesday, and Friday, tables; Tuesday and Thursday, numeration. 12 $\frac{1}{4}$ to 12 $\frac{1}{2}$, singing each day. 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$, alphabet, spelling, and reading each day. 2 $\frac{1}{2}$ to 3, Monday, Wednesday, and Friday, first steps to catechism; Tuesday and Thursday, hymns. 3 to 3 $\frac{1}{4}$, spelling easy words from dictation each day. 3 $\frac{1}{4}$ to 3 $\frac{1}{2}$, singing and prayer each day.

21.—First class, Bibles, Testaments, history of England, Ludlow's reader, fourth book, published by The Society for promoting Christian Knowledge, geographies (English grammars and arithmetic books are provided by the pupils); second class, Bibles, Testaments, third book; third class, history of Our Lord, Sermon on the Mount, parables, miracles, second book; fourth class, first book; fifth class, first reading book, first and second parts, monosyllables, and dissyllables; sixth class, easy lessons on tablets or sheets; books in fair condition, except those used by the lower classes, of which a supply is at present required.

22.—Maps of The World, Europe, Asia, Africa, America (North and South), Australasia, England and Wales, Holy Land, St. Paul's travels, and Syria.

23.—Confinement in schoolroom during dinner and play hours, or after the school is dismissed, or to place the defaulter standing on a form in the centre of the schoolroom; corporal punishment is not resorted to except in extreme cases; this being the written instructions of the Local Board.

24.—The school has not been examined by the Local Board since August last. It is usual to have an examination half-yearly, provided the members of the Board can be brought together; no prizes are given.

25.—By the diocesan inspector of schools and the Rev. Mr. Elder, generally once a week, frequently twice, from an hour to an hour and a half.

“15 October, 1857.

“Visited the school and examined the children, who acquitted themselves in a satisfactory manner; there were 93 present.—JOHN ELDER, A. CORNWELL, W. SMITH.”

“31 August, 1858.

“Visited and examined the school; 81 children present.—JOHN ELDER.”

“Accompanied Mr. Elder, and found the school very satisfactory, making allowance for the want of room for the number of children.—WM. BOWMAN.”

26.—Richard Griffiths, 47 years, Ireland

27.—Eliza Griffiths, 46 years, Ireland; Rachael Griffiths, 24 years, Ireland.

30.—1st April, 1847.

31.—Not trained as a teacher.

33.—By being educated at a large school under the management of the Kildare-place Society; licentiate apothecary.

34.—Annual salary of head teacher, £87 10s.

35.—Fees received from pupils for 12 months to 30th September, £60 0s. 4d.

36.—Total annual income, £147 10s. 4d.

37.—Reading Holy Scriptures, and questioned on the same, church catechism. The children are taught to love and fear God, to honour and obey their parents, and to love their neighbors as themselves; to honour the Queen and all constituted authorities. Holy Bible, Testament, faith and duty of a Christian, catechetical series, church catechism.

RYDE.—(MIXED.)

- 1.—Ryde.
- 2.—Brick; needs repairs and enlargement.
- 3.—480.
- 4.—4,840.
- 5.—All right.
- 6.—Cubic feet, 5,280.
- 7.—83.
- 8.—Good.
- 9.—Average number, 83; girls, 50; boys, 33.
- 10.—Girls, 3 to 14; boys, 4 to 13.
- 11.—Four; average, 18.
- 12.—School from 9 to 12, and from 1 to 3.
- 13.—No school on Saturday; the usual holidays as per rules
- 14.—231.
- 15.—
- 16.—
- 17.—Annual charge from 2d. to 1s. per week.
- 18.—Fees, £86 18s. 9d.; salary, £70; total £136 18s. 9d.
- 19.—Average, 5d.
- 20.—
- 21.—Many things are wanted.
- 22.—Maps of The World, Europe, Asia, and Palestine.
- 23.—Gentle castigation with a stick.
- 24.—Examined publicly 4 times a year; prizes (books) once a year.
- 25.—Examined occasionally by minister and Local Board, and the diocesan inspector of schools.
- 26.—Anne Kendall.
- 27.—Isabella Kendall.
- 28.—London.
- 29.—Anne Kendall, aged 39; Isabella Kendall, aged 21.
- 30.—1st March, 1856.
- 31.—Yes; at the Model School, Sydney.
- 32.—For 7 weeks.
- 33.—
- 34.—
- 35.—
- 37.—Visited occasionally, but not at stated periods, by the Rev. George E. Turner, Church of England; and the children are taught from the Bible, history, class reading books, &c.

SEVEN HILLS.—(MIXED.)

- 1.—Seven Hills, Parramatta.
- 2.—Weatherboard and brick-nogged, in great need of repair. The building is sufficiently large to contain the number of children at present attending the school, or who are likely to attend.
- 3.—525 superficial square feet.
- 4.—A field of 4 acres, in which the school stands, and to which the children have free access.
- 5.—In a very bad condition.
- 6.—One room only.
- 7.—
- 8.—The open windows and the dilapidated condition of the building afford sufficient ventilation.
- 9.—Average number on the rolls, 22 boys, 21 girls; average number actually attending, 13 boys, 12 girls.
- 10.—Oldest boys, 14 years; oldest girls, 11 years: youngest boys, 5 years; youngest girls, 4 years.
- 11.—Three classes: 1st class, 11; maximum age, 14 years; minimum age, 8 years: 2nd class, 7; maximum age, 9 years; minimum age, 4 years: 3rd class, 7; maximum age, 7 years; minimum age, 4 years.
- 12.—From 9 to 12 a.m.; From 2 to 4 p.m.
- 13.—The whole of Saturday, and a fortnight at Christmas and Midwinter.
- 14.—Number of days in the year devoted to school duties, 240.
- 15.—About 5 years.
- 16.—This question cannot be answered with any degree of accuracy; there is, however, a considerable number of children who never attend any school: no amount of persuasion will induce some parents to send their children to school.
- 17.—The weekly charge is from 1s. to 3d. per week, according to the class the pupil is in. Most of the books are supplied by the Central Board, but spelling, copy, ciphering books, &c., are supplied by the master, and charged to the children, as he states, at town prices.
- 18.—The amount of school fees for year ending September 28th, 1858, is £15 3s. 9d.; salary from Denominational Board, £61 5s.; total amount of salary, £76 8s. 9d. (This statement I have received from the master: my impression is, however, that the receipt from pupils is considerably more than stated.—THOMAS DONKIN, Chairman of Local Board.)

19.—Average total cost to parents, 12s. 1^sd., to Government, £2 9s.; total for each, £3 1s. 1^sd.

20.—Series of reading books, geography (general and Australian), exercises on maps and on slates from memory on the foregoing; spelling and home lessons on the same; written, oral, and mental arithmetic and tables; needlework for girls; singing, drill, and prayers. The time allotted to each subject, as follows:—Monday, Wednesday, and Thursday: 1st class,—arithmetic, 1¹/₂ hours; reading, 1¹/₄ hours; writing, ¹/₂ hour; spelling, ¹/₄ hour; geography, ¹/₂ hour; exercises from memory or dictation, ¹/₄ hour; singing, ¹/₂ hour; tables, ¹/₄ hour: 2nd class,—same as 1st, less advanced: 3rd and junior,—reading, 1 hour; writing on slates, 1 hour; spelling, ¹/₂ hour; tables, ¹/₂ hour; ciphering, 1 hour; church catechism, ¹/₂ hour; singing, prayers, and drilling, ¹/₂ hour,—5 hours: history and chronology on alternate Wednesdays: girls needlework on Thursday afternoon. Tuesday and Friday: 1st class,—reading Old or New Testament, or Scripture history, 1¹/₄ hours; arithmetic, 1¹/₄ hours; church catechism, ³/₄ hour; spelling, ¹/₄ hour; writing, ¹/₂ hour; exercises from memory, ¹/₂ hour; singing, &c., ¹/₂ hour,—5 hours: 2nd class,—same as 1st: 3rd class,—reading, 1 hour; writing on slates, 1 hour; church catechism, 1 hour; ciphering, 1 hour; spelling, ¹/₂ hour; singing, drilling, &c., ¹/₂ hour,—5 hours.

21.—List of books:—Secular,—18 histories of England, entire; 12 histories of Greece, entire; 19 fourth reading books, entire; 19 third ditto; 14 class ditto; 9 English grammars, entire; 7 Australian geographies, all imperfect; 1 Bonwick's geography, ditto; 24 elements of geography, ditto; 12 arithmetics, in fair condition; 12 second reading books, 6 in ditto; 10 tables; 4 first lesson books: religious,—30 Bibles; 28 Testaments; 48 church catechisms; 13 questions, Sinclair's; 10 ditto on the writers; 14 prophecies concerning the Messiah; 24 Scripture histories; 9 Christian truths; 4 faith and duty; 19 Watts's hymns; 12 Collects; 12 Sermon on Mount.

22.—List of maps:—1 Hemispheres; 1 Australasia; 1 Europe; 1 Asia; 1 Africa; 1 North America; 1 South America; 1 Palestine; 1 countries mentioned in New Testament.

23.—System of correction usually by tasks in playtime; corporal correction as light as possible to be effectual.

24.—The school is regularly visited by the clergyman,—generally once a week; no prizes are distributed, and the only reward bestowed on the children is a school-feast once a year, which the clergyman gives at his expense.

25.—The school has never been visited by any inspector to the writer's knowledge.

26.—Alexander Anderson.

27.—None.

30.—August, 1857.

31.—Trained 4 months in St. James' Model School.

32.—Answered in the former.

33.—A short time a private teacher.

34.—See answer to 18.

35.—None.

36.—See 18.

37.—Religious instruction is given by the Episcopalian clergyman generally once a week; the books used are the church catechism, Sinclair's questions, &c.

SHOALHAVEN.—(MIXED.)

1.—Shoalhaven, St. Vincent.

2.—Bark. A new school is contracted for.

3.—240 feet.

4.—Half an acre.

5.—One closet; wants repairs.

6.—240 feet x 8 = 1,920 cubic feet. One room.

7.—31 pupils.

8.—Removing three windows when required.

9.—Average number on books, 40 boys, 39 girls = 79; average attendance, 14 boys, 17 girls = 31.

10.—Males, 13 years, 2 years; females, 13 years, 2 years.

11.—Five classes. 1st class—maximum age, 13, minimum, 8 years; 2nd class—maximum age, 8, minimum, 5 years; 3rd class—maximum age, 10, minimum, 4 years; 4th class—maximum age, 5, minimum, 4 years; 5th class—maximum age, 8, minimum, 2 years. Average number in each class, 6.

12.—5¹/₂ hours; commencing at 9 a.m. and closing at 12-15 p.m.; re-assembling at 2 p.m. and closing at 4-15. One and three-quarter hours cessation for dinner.

13.—One day holiday each week. Two vacations:—Christmas, 10 days; Midsummer, 10 days.

14.—241 days.

15.—About eight months.

16.—The fact of their being three or four other schools in the district makes it almost impossible to answer this query.

17.—1s. per week, some; 6d. per week, others.

18.—£54 18s. 3d. school mistress; £106 other 786 gratuities from various sources, excepting £52 10s. per year from the Denominational Board.

19.—£3 9s. 3¹/₂d. each per year.

20.—Home lessons, $\frac{1}{2}$ hour; writing, $\frac{1}{2}$ hour; sewing, 1 hour; arithmetic, $\frac{1}{2}$ hour; reading, $\frac{1}{2}$ hour; singing and closing, $\frac{1}{4}$ hour each day. Recess. Monday, geography; Tuesday, grammar; Wednesday, familiar subjects; Thursday, grammar; Friday, church catechism. Object lessons, 1 hour; mental arithmetic, 1 hour; closing, $\frac{1}{4}$ hour, each day. The 1st, 2nd, and 3rd classes are taught by the mistress, the other two classes by the assistants

21.—1st class—Bible, 3rd book (C. K. S.), geography (National Education, Ireland), grammar (National Education, Ireland), arithmetic (National Education, Ireland), Watts's hymns; 2nd class—Testament, 2nd book (C. K. S.), tables, Watts's hymns; 3rd class—1st reading book (C. K. S., new series), tables, Watts's hymns; 4th class—Primer, table card; 5th class—Alphabets. The school has been very scantily supplied with the books that have been sent. Bibles, 1st, 2nd, and 3rd books, primers, grammars, geographies, arithmetics, church catechisms. They are all in moderate repair; but an extended quantity is required. History, spelling, slates, &c., &c., have never been supplied by the Board.

22.—Maps:—The World, Europe, Asia, Africa, North and South America, Palestine, the Old Testament, England and Wales.

23.—Moderate corporal punishment. Standing on form, and threats of expulsion for bad language. No written or any instructions from any Board on the subject.

24.—The Local Board examines the school twice every year, and prizes of books are then distributed to the most proficient, and to the most regular in attendance at the school.

25.—Mr. Coburn inspected the school for the first time in October, 1858, and remained some days organizing the school. No report.

26.—Eleanor Mottram Thistleton.

27.—William Sowerby Thistleton, assistant; Sowerby G. Thistleton, 2nd assistant; Eleanor L. Thistleton, sewing assistant.

28.—Lancashire, England.

29.—Eleanor M. Thistleton, 41 years; W. S. Thistleton, 55 years; S. G. Thistleton, 12 years; E. L. Thistleton, 10 years.

30.—January, 1856.

31.—Not trained.

32.—None.

33.—Private governess. None.

34.—£52 10s. from the Denominational Board for head teacher. No remuneration for the assistants.

35.—None.

36.—£107 8s. 3d.

37.—Scripture lessons, church catechisms, hymns every day; Bible and church catechism. The Church of England minister, the Rev. Abram. Smyth King, instructs the children regularly in Scripture.

ST. MARY'S, SOUTH CREEK.—(MIXED.)

1.—St. Mary's, South Creek.

2.—Brick building; shingled roof and boarded floor; needing slight repairs in the roof.

3.—36 feet by 18.

4.—Half an acre.

5.—Two distinct and separate closets, both recently repaired and cleansed, but will shortly need further repairs; brick, with shingled roof.

6.—One room (see No. 3).

7.—Average 45 to 50 in the one room.

8.—4 windows, 2 at each side, all opening; one door, chimney, and no ceiling.

9.—During the last eight years the average number on the books has been 70, viz.,—boys, 40; girls, 30; with an average daily attendance of boys, 28; girls, 23; total, 51.

10.—Ages: Boys, 14 to 5; girls, 14 to 4.

11.—Classes, mixed, six; average in each, 8.

12.—Time: $5\frac{1}{2}$ hours daily; 9 to 12, 1 to $3\frac{1}{2}$; one hour for dinner, viz., from 12 to 1.

13.—Every Saturday a whole holiday; the last two weeks in June and the like in December; Easter Monday and Tuesday; no half-holidays, except an occasional one by permission of the clergyman.

14.—261.

15.—The period depends much upon the location of the parents—say 3 years.

16.—Not known.

17.—6d. per week; charged only when they attend; rules 2 and 7 Denominational School Rules, p. 11, and which should be read together, have never been put in force in this school; no charge for books.

18.—From 1st September, 1857, to 30th September, 1858: Fees, £43 9s. 6d.; Government salary, £61; gratuity, Penrith Diocesan Society, £6; total, £110 9s. 6d.; the whole received by the master for his own use.

- 19.—Cost to the country, 12s. 5½d.
- 20.—Reading and spelling, writing by dictation, writing in copy-books and on slates, grammar, geography, history, arithmetic (mental and otherwise). Geography and history, every Tuesday and Thursday; writing by dictation and grammar, every Monday and Wednesday; reading, writing, spelling, arithmetic, every day. The precise time given to each subject is guided by circumstances, attendance, &c.. The girls are carefully taught both plain and fancy needlework, marking, worsted work, and crochet, every Monday, Tuesday, Wednesday, and Thursday afternoons.
- 21.—The usual books supplied by the Denominational School Board; condition fair; number generally adequate; more catechisms, with short questions, needed, and more arithmetical tables needed.
- 22.—7 maps, viz., The World, Europe, Australia, England, the British Isles, Old Testament, and Holy Land; 9 short reading boards; nothing at all fit for infant classes, and such are much wanted and have been repeatedly applied for.
- 23.—No instructions as to correction, except the 21st rule, p. 6, Denominational School Rules, which has been closely adhered to. If I consider the cane necessary, I use it without reference to any one.
- 24.—Examination every six months (June and December) by the clergyman, and generally some members of the Local Board; prizes awarded at Christmas only; useful and entertaining books, selected by the clergyman.
- 25.—The diocesan inspector; once, 10th November, 1857; period of visit, 20 minutes past 3 p.m. till 10 minutes to 6 p.m., accompanied by the Rev. T. W. Unwin. I am not aware what his report was. There is a report signed by Messrs. Turton, Levinge, and , but I have never seen it, and consequently cannot furnish a copy. It is in substance, I have been informed—"That the children know nothing; the master incompetent." How these gentlemen arrived at this conclusion I am at a loss to imagine, as from the following statement it must be evident that they did not pursue the course calculated to discover either the efficient working of the school or the competency of the master:—
- I have not cared to enter into controversy upon the subject as some of the school-masters have done, and should not now have alluded to it had I not been invited to do so by the question.
- Mr. Turton and Mr. Levinge spent some twenty minutes (certainly not more) in the school. Mr. Turton heard some half dozen boys read, and asked not more than two or three set questions from a memorandum book he carried with him, and left as soon as Mr. Levinge had obtained from me what statistical information he required. I had no conversation with either of them. The third gentleman signing the report did not visit the school at all, and I have never had the honor of seeing him in my life.
- I have for upwards of eight years given my undivided attention to the interests of the school, and my wife has during the whole period assisted with the junior classes and taught needlework without pay or reward of any kind.
- I do not hesitate to assert that the children attending this school are as morally and properly educated as at any similar institution in the Colony, and while possessing an equal amount of perception and useful information, are far more orderly and well-conducted than at most of the schools I have seen, and I have seen many.
- As regards my own incompetency, it is refuted by the testimony of three successive clergymen who have held this incumbency, and I may perhaps be allowed to add that having been carefully educated for one of the learned professions, I passed most satisfactorily a very rigid examination conducted by some of the most talented men in England. It is not pleasant to be slandered—and the report I consider a deliberate slander on the part of Mr. Turton and Mr. Levinge, but as to the third gentleman it must be something worse, as he could only have signed it to receive his pay—he never saw either the school or myself.
- 26.—Edward Lincoln.
- 27.—Anne Lincoln (unpaid).
- 28.—Edward Lincoln, London; Anne Lincoln, Lee, Kent.
- 29.—Edward Lincoln, 43; Anne Lincoln, 45.
- 30.—April 1, 1851.
- 31.—Yes.
- 32.—Sydney Model School; nearly 3 months; no certificates granted at that period; appointment sanctioned by the Rev. Robert Allwood, and the late Right Reverend the Lord Bishop of Sydney, after an examination by the Rev. B. L. Watson.
- 33.—None; eight years since; clerk.
- 34.—£5 2s. 1d. per month.
- 35.—£6; £43 9s. 6d. (No. 18.)
- 36.—£110 9s. 6d.
- 37.—Religious instruction given, and the Church of England catechism taught every Friday by the master, and as often as practicable by the Rev. Elijah Smith, incumbent of St. Stephen's, Penrith, and St. Mary's, South Creek; the Scriptures and Church of England catechism.

SURREY HILLS.—(MIXED AND INFANTS'.)

- 1.—Fitzroy-street, Surry Hills.
- 2.—Materials, brick ; condition good ; needs nothing.
- 3.—1,820 superficial square feet.
- 4.—4,902 superficial square feet.
- 5.—As good as circumstances will admit.
- 6.—1,024 superficial square feet, and 14,942 cubic feet, in primary school ; and 330 superficial square feet, and 4,488 cubic feet, in infant school.
- 7.—Average number in primary school, 95 ; and average number in infant school, 26.
- 8.—All the windows open, and there are two ventilators in the roof.
- 9.—Annual average number on the books, males, 90 ; females, 82 ; and the average number attending school, males, 64 ; females, 57.
- 10.—Maximum and minimum age of males, 14 and 3 ; and of girls, 14 and 3.
- 11.—Number of classes, three ; the average number of each class cannot be ascertained from the roll kept by the late master.
- 12.—5 hours ; from 9 to 12, forenoon, and from 2 to 4, afternoon ; the children go home to dinner during the interval.
- 13.—Saturday a whole holiday ; a fortnight at Christmas, and a fortnight at Mid-winter.
- 14.—240 days.
- 15.—Not open long enough to decide upon the time children remain in school.
- 16.—Cannot be ascertained.
- 17.—1s. per week is charged for the first child in a family, and 6d. for every additional one ; no charge ; see first part of this answer for the total annual charge for each pupil.
- 18.—School fees, £157 16s. 9d.
- 19.—Average annual total cost of the education of each pupil, ———.
- 20.—First class, Monday :—Religious instruction, 35 minutes ; reading, 1 hour and 10 minutes ; arithmetic, 1 hour ; mental arithmetic, 15 minutes ; writing, 35 minutes ; dictation, 35 minutes ; letter-writing or gallery lesson, 35 minutes. Tuesday :—Religious instruction, 35 minutes ; grammar, 40 minutes ; dictation, 30 minutes ; arithmetic, 1 hour and 35 minutes ; singing, 15 minutes ; writing, 35 minutes ; reading, 35 minutes. Wednesday :—Religious instruction, 35 minutes ; geography, 40 minutes ; reading, 1 hour and 5 minutes ; arithmetic, 1 hour ; mental arithmetic, 15 minutes ; writing, 35 minutes, writing bills, 30 minutes. Thursday :—Religious instruction, 35 minutes ; grammar, 40 minutes ; dictation, 30 minutes ; arithmetic, 1 hour ; singing, 15 minutes ; writing, 35 minutes ; parsing, 35 minutes ; gallery lesson, 30 minutes. Friday :—Catechism, 35 minutes ; reading, 1 hour and 10 minutes ; arithmetic, 1 hour ; mental arithmetic, 15 minutes ; geography, 35 minutes ; writing a report, 35 minutes ; drawing, 30 minutes. Second class, Monday :—Religious instruction, 35 minutes ; reading, 40 minutes ; dictation, 30 minutes ; arithmetic, 1 hour ; mental arithmetic, 15 minutes ; writing, 35 minutes ; dictation or gallery lesson, 35 minutes. Tuesday :—Religious instruction, 35 minutes ; reading, 1 hour and 10 minutes ; dictation, 30 minutes ; arithmetic, 1 hour and 40 minutes ; singing, 15 minutes ; writing, 35 minutes. Wednesday :—Religious instruction, 35 minutes ; geography, 40 minutes ; reading, 1 hour ; dictation, 30 minutes ; arithmetic, 1 hour and 5 minutes ; mental arithmetic, 15 minutes ; writing, 35 minutes. Thursday :—Religious instruction, 35 minutes ; reading, 1 hour and 10 minutes ; arithmetic, 30 minutes ; grammar, 30 minutes ; singing, 15 minutes ; writing, 35 minutes ; dictation, 35 minutes ; gallery lesson, 35 minutes. Friday :—Catechism, 35 minutes ; reading, 40 minutes ; dictation, 30 minutes ; arithmetic, 1 hour ; mental arithmetic, 15 minutes ; writing, 35 minutes ; geography, 1 hour and 10 minutes ; drawing, 35 minutes. Third class, Monday :—Religious instruction, 35 minutes ; writing, — minutes ; arithmetic, 1 hour ; reading, 1 hour and 5 minutes ; mental arithmetic, 15 minutes ; grammar, 35 minutes ; arithmetic or gallery lesson, 35 minutes. Tuesday :—Religious instruction, 35 minutes ; writing, 1 hour and 15 minutes ; reading, 1 hour and 5 minutes ; spelling, 30 minutes ; arithmetic, 1 hour and 5 minutes ; singing, 15 minutes. Wednesday :—Religious instruction, 35 minutes ; arithmetic, 1 hour and 45 minutes ; reading, 1 hour and 5 minutes ; spelling, 30 minutes ; mental arithmetic, 15 minutes ; dictation, 35 minutes. Thursday :—Religious instruction, 35 minutes ; writing, 1 hour and 15 minutes ; arithmetic, 30 minutes ; reading, 1 hour and 5 minutes ; grammar, 30 minutes ; singing, 15 minutes ; gallery lesson, 35 minutes. Friday :—Catechism, 35 minutes ; writing, 40 minutes ; arithmetic, 30 minutes ; reading, 1 hour and 5 minutes ; spelling, 30 minutes ; mental arithmetic, 15 minutes ; geography, 35 minutes ; drawing, 35 minutes.
- 21.—First class :—The Bible, English history, S.P.C.K., the class reading book compiled by G. Ludlow, arithmetic, by Irish Board. Second class :—The Bible, the third book, by Irish Board. Third class :—The New Testament, sequel No. 1 to the second book, by the Irish Board. In infant school :—The first reading book, S.P.C.K., and step by step. All in good condition ; other books are needed ; and the number of those at present in use is not adequate to the wants of the school.
- 22.—Maps :—Europe, Asia, Africa, North America, South America, The World, Palestine, Journeys of the Israelites, travels of St. Paul, countries mentioned in the Old Testament, S.P.C.K., New South Wales and Australasia, by Jones, Eastern and Western Hemispheres, by Bidwell. In the infant school :—14 Scripture prints, and 24 prints of animals, 3 imitation blackboards on the wall. All in good condition. 4 blackboards, 4 easels, 1 map of England, 1 map of Scotland, 1 map of Ireland.
- 23.—Detention after school hours, and corporal punishment in extreme cases.

- 24.—Twice a year by the diocesan inspector, the clergyman of the district, and the master.
- 25.—By the diocesan inspector of schools; time, one day. (*Vide* Supplement to Denominational School Board's Report.)
- 26.—A. Holliday.
- 27.—D. Holliday, infant mistress.
- 28.—Carlisle, Cumberland; Bishopwearmouth, Durham.
- 29.—45 years; 38 years.
- 30.—March 1st, 1859.
- 31.—Trained.
- 32.—National Society's Training Institution, Battersea; one year; third class certificate.
- 33.—See No. 32.
- 34.—Annual salary of the late master, £200; and of the late infant mistress, £40, with house rent free.
- 35.—None.
- 36.—
- 37.—Religious and catechetical instruction twice a week by the clergyman, and three times a week by the master. The Bible and church catechism.

SUTTON FOREST.—(MIXED.)

- 1.—Sutton Forest.
- 2.—Brick; out of repair; roof needs fresh shingling, being very leaky; ceilings require fresh plastering; and the floor in many places is in want of repairs. The room in which the school is held is very inadequate to the number of scholars assembled in it for instruction, and needs enlargement.
- 3.—836 square feet.
- 4.—14,400 square feet, or 1,600 square yards.
- 5.—None provided.
- 6.—240 superficial feet; 2,040 cubic feet.
- 7.—40 pupils; average greatest number, 56.
- 8.—None; 1 window in the room 3 feet 9 inches by 2 feet 3 inches.
- 9.—36 average on book for 8 months—boys 16, girls 20, total 36; the former master left no records of the school prior to July, 1858.
- 10.—Boys—maximum age 14 years, minimum 4 years; girls—maximum age 13 years, minimum 3 years.
- 11.—Divisions I, II, and III—first class, maximum age 13 years, minimum 9 years; second class, maximum age 13 years, minimum 6 years; third class, maximum age 12 years, minimum 5 years; fourth class, maximum age 13 years, minimum 5 years; fifth class, maximum age 9 years, minimum 3 years.
- 12.—5 school hours per day, viz.:—morning, 10 o'clock to 1; 5 minutes recess at 12 o'clock; 1 o'clock to 2, dine and play. Afternoon, 2 o'clock to 4.
- 13.—1 day per week, viz.:—Saturday; 2 vacations at Christmas and Midwinter, each of a fortnight's duration.
- 14.—240 days.
- 15.—Cannot say, for want of former register books.
- 16.—No means of ascertaining.
- 17.—Children below 6 years of age 6d. per week, 6s. per quarter, £1 4s. per year; over 6 years of age 9d. per week, 9s. per quarter, £1 16s. per year. The above refers to parents sending only one child to school, as every additional child after the first is only charged according to the scale for children below 6 years of age.
- 18.— } Cannot say, for the same reason as mentioned in answer to No. 15—no
19.— } records.
- 20.—From 10 to 10½, each day, inspecting cleanliness, opening school, singing, prayer, and collecting home lessons. Monday, Division I:—10½ to 11 Old Testament; 11 to 11½ arithmetic, oral, or tables; 11½ to 12 mapping or drawing; 12 to 12½ dictation and spelling, and writing on slates; 12½ to 1 geography, general; 2 to 2½ writing on copy-books. 2½ to 3 grammar and etymology; 3 to 3½ arithmetic, mental. Division II:—10½ to 11 Old Testament; 11 to 11½ writing on slates; 11½ to 12 reading; 12 to 12½ arithmetic, written on slate or blackboard; 12½ to 1 geography, general; 2 to 2½ writing on copy-books; 2½ to 3 grammar and etymology; 3 to 3½ arithmetic, mental. Division III:—10½ to 11 writing on slates; 11 to 11½ reading; 11½ to 12 arithmetic, oral, or tables; 12 to 12½ New Testament; 12½ to 1 geography, general; 2 to 2½ reading; 2½ to 3 New Testament; 3 to 3½ arithmetic, mental. Tuesday, Division I:—10½ to 11 Old Testament; 11 to 11½ arithmetic, written on slate or blackboard; 11½ to 12 grammar and etymology; 12 to 12½ geography, Australian; 12½ to 1 vocal music; 2 to 2½ writing on copy-books; 2½ to 3 reading; 3 to 3½ writing on slates. Division II:—10½ to 11 Old Testament; 11 to 11½ arithmetic, oral, or tables; 11½ to 12 grammar and etymology; 12 to 12½ arithmetic, written on slates or blackboard; 12½ to 1 geography, Australian; 2 to 2½ writing on copy-books; 2½ to 3 reading; 3 to 3½ arithmetic, oral, or tables. Division III:—10½ to 11 writing on slates; 11 to 11½ reading; 11½ to 12 arithmetic, oral, or tables;

12 to 12½ church catechism; 12½ to 1 geography, Australian; 2 to 2½ reading; 2½ to 3 writing on slates; 3 to 3½ arithmetic, oral, or tables. Wednesday, Division I:—10½ to 11 New Testament; 11 to 11½ geography of Palestine and reading; 11½ to 12 grammar, etymology, and writing on slates; 12 to 12½ arithmetic, written on slate or blackboard; 12½ to 1 geography of Palestine; 2 to 2½ writing on copy-books; 2½ to 3 reading; 3 to 3½ arithmetic, written on slate or blackboard. Division II:—10½ to 11 New Testament; 11 to 11½ writing on slates; 11½ to 12 reading; 12 to 12½ arithmetic, written on slate or blackboard; 12½ to 1 geography of Palestine; 2 to 2½ writing on copy-books; 2½ to 3 reading; 3 to 3½ arithmetic, written on slate or blackboard. Division III:—10½ to 11 writing on slates; 11 to 11½ arithmetic, oral, or tables; 11½ to 12 church catechism; 12 to 12½ reading; 12½ to 1 geography of Palestine; 2 to 2½ reading; 2½ to 3 New Testament; 3 to 3½ arithmetic, written on slate or blackboard. Thursday, Division I:—10½ to 11 New Testament; 11 to 11½ reading; 11½ to 12 geography, general, and writing on slates; 12 to 12½ arithmetic, written on slate or blackboard; 12½ to 1 geography, Australian; 2 to 2½ writing on copy-books; 2½ to 3 geography, Australian; 3 to 3½ reading. Division II:—10½ to 11 New Testament; 11 to 11½ writing on slates; 11½ to 12 reading; 12 to 12½ arithmetic, written on slate or blackboard; 12½ to 1 geography, Australian; 2 to 2½ writing on copy-books; 2½ to 3 geography, Australian; 3 to 3½ reading. Division III:—10½ to 11 writing on slates; 11 to 11½ arithmetic, oral, or tables; 11½ to 12 church catechism; 12 to 12½ reading; 12½ to 1 geography, Australian; 2 to 2½ reading; 2½ to 3 New Testament; 3 to 3½ reading. Friday, Division I:—10½ to 11 church catechism; 11 to 11½ arithmetic, mental; 11½ to 12 arithmetic, written on slate or blackboard; 12 to 12½ arithmetic, oral, or tables; 12½ to 1 history; 2 to 2½ poetry; 2½ to 3 geography of Palestine; 3 to 3½ extra drill. Division II:—10½ to 11 church catechism; 11 to 11½ arithmetic, oral, or tables; 11½ to 12 reading; 12 to 12½ grammar and etymology and writing on slates; 12½ to 1 mapping or drawing; 2 to 2½ poetry; 2½ to 3 geography of Palestine; 3 to 3½ extra drill. Division III:—10½ to 11 church catechism; 11 to 11½ reading; 11½ to 12 arithmetic, oral, or tables; 12 to 12½ reading; 12½ to 1 writing on slates; 2 to 2½ poetry; 2½ to 3 reading; 3 to 3½ extra drill. From 1 to 2 is the dinner recess; and from 3½ to 4 is for general instruction, as lecture, object lesson, &c., &c.

21.—Books used by first division: Bibles, S.P.C.K., one-half good, not a supply; elements of geography, geographical series No. 1, ditto, good, not a supply, not a good treatise; an English grammar for the use of schools, I.N.S.S., good, not a supply; fourth reading book, S.P.C.K., good, not a supply; first book of arithmetic, for the use of schools, I.N.S.S., good, not a supply; history of England, historical series No. 1, S.P.C.K., good, not a supply. Books needed for first division: 6 fourth reading books, as above; 1 dozen orthographical exercises—Sullivan's spelling book superseded, a very good one for the purpose; 1 dozen Australian geographical treatises; 1 dozen elementary geographies; 1 dozen English grammars, same as above; 1 dozen fifth book of lessons, S.P.C.K.; 1 dozen Bibles; 1 dozen arithmetics, as above; ½ dozen history of England, as above; 2 or 3 dozen table books. Second division, classes second and third: second class, third reading book, S.P.C.K., good, a supply; reading series, No. 2, part 1st, ditto, good, not nearly a supply. Third class, second reading book, ditto, bad, not a supply. Books, &c., wanted for second division: 1 dozen second reading books, as above; 1 dozen reading series, No. 2, part 1st, as above; sets of cards, containing sums in the elementary rules of arithmetic. Third division, classes fourth and fifth: lesson book, No. 1, S.P.C.K., and reading series, No. 1, ditto, good, a supply. Wanted for third division: arithmetical tables, viz., addition and multiplication, on sheets.

22.—Maps: The World, old, 6 feet 6 inches by 3 feet 4 inches, published by S.P.C.K., worn and indistinct; Australasia, 1849, 5 feet 8 inches by 5 feet, published by Piddington, Sydney, good condition—names too small to be of use in a school; Asia, 5 feet 4 inches by 4 feet 6 inches, published by S.P.C.K., good condition; Africa, recent, 5 feet 6 inches by 4 feet 6 inches, ditto, ditto; N. America, 1840, 4 feet by 3 feet 2 inches, ditto, ditto; S. America, 4 feet by 3 feet 2 inches, ditto, ditto; Palestine in time of Our Saviour, 2 feet 4 inches by 1 foot 10½ inches, ditto, worn but not defaced. Maps required: The World, Europe, and Canaan in tribes. Prints and diagrams, none. Wanted: a print of the comparative sizes of animals; also, geometrical figures for drawing. 2 school desks, 6 feet 2 inches long, 2 feet 4 inches broad, and 3 feet high; gradients of surface for writing,—one 25 degrees the other 21 degrees; they are parallel, double-sided, and cumbersome; 1 is good, the other needs repairing—rather old; desk room insufficient. 6 forms for sitting, 6 feet 6 inches long, 11 inches broad, 1 foot 6 inches high, in good condition. Master's desk—1 foot 11 inches long, 1 foot 3 inches broad, 10 inches high—resting on a set of shelves, 1 foot 3½ inches long, 1 foot 3½ inches broad, 1 foot 11 inches high; made roughly, by the master, out of an old deal case. Wanted, urgently, easel and blackboard; also, a more suitable desk for the master, as well as an additional desk for the pupils.

23.—By working on the moral susceptibilities of the elder children, and striving to awaken self-interest, with a sense of the value of honorable behaviour; by losing their position in class; by writing and learning lessons after school hours; sometimes, in cases of idleness, by sending them to a lower class for a time; by striking off their names from monotorial lists; and, in cases of necessity, by corporal punishment, by means of a stick, on the hand; no instructions.

24.—At the end of every half-year by the clergyman of the parish; no rewards given.

25.—None since appointment of present master; no report known of.

26.—Henry Dicker.

27.—None attached.

28.—Plymouth.

- 29.—31 years.
 30.—1st July, 1858.
 31.—No.
 32.—
 33.—5 years, 1845 to 1850, Church of England Sunday-school teacher; 4 years, 1850 to 1854, teacher in English parochial schools; in 1855 schoolmaster on board "South Sea," immigrant vessel, Plymouth to Adelaide; 1855 to 1858, teacher in South Australia under the Adelaide Board of Education, $2\frac{1}{2}$ years; an artizan previous to being occupied as a teacher.
 34.—Teacher's salary, Government, £70 per annum.
 35.—School fees, half-year ending December 31, 1858, £17 9s. 3d. = £34 18s. 6d. per annum; total £104 18s. 6d. per annum.
 36.—No records previous to July, 1858.
 37.—According to Church of England, by the minister of the parish, Rev. Thomas Horton, from time to time. Books: Bibles, Testaments (New), and church catechism.

TRINITY.—(MIXED AND INFANT.)

- 1.—Lower Fort-street, Sydney.
 2.—Stone.
 3.—No residence.
 4.—Primary school, 2,016 square feet; infant school, 3,360 square feet.
 5.—Stone, and recently erected.
 6.—Primary school, 840 square feet; 13,440 cubic feet; infant school, 600 square feet; 9,600 cubic feet.
 7.—Average in primary school, 75 children; do. in infant school, 78 children.
 8.—In primary school, 3 large traps in the roof; 2 openings in south end; 2 in the western wall; 4 windows in the eastern side; in infant school, 2 traps in the roof; 2 openings in south side, and 2 windows in the north side.

 10.—Maximum age, boys, 15; girls, 13; minimum, boys, 8; girls, 7.
 11.—Four classes, from 10 to 14; first class, age, 10 to 15; second, 10 to 12; third, 8 to 9; fourth, 7 to 8.
 12.—Number of hours, $5\frac{1}{2}$; commencing at 9 a.m., closing at $4\frac{1}{4}$ p.m.; cessation, $1\frac{3}{4}$ hours, dining.
 13.—Holiday on Saturdays; on public occasions; a fortnight twice in each year, viz.:—June and December.
 14.—School days, 235.
 15.—Unable to tell; change of residence; change to other schools; and children as soon as they are able to earn at all being removed from school altogether.
 16.—This question I am also unable to answer.
 17.—The weekly payments vary from 6d. to 1s.; no annual charge for books; I have no annual charge, the children attending always pay weekly.
 18.—The amount of school fees received to 30th September, 1858, was £109 17s. 10d., appropriated to my own use; annual salary, £87 10s.; total amount received, £197 7s. 10d.
 19.—Cost of each pupil per annum, £2 10s. 7 $\frac{1}{2}$ d.
 20.—Every day, all the classes:—From 9 to $9\frac{1}{4}$, inspecting cleanliness, opening school, prayers and singing, calling the roll; $9\frac{1}{4}$ to a quarter to 10, reading the Scriptures, Old and New Testament alternately; quarter to 10 to $10\frac{1}{4}$, writing; 10 to $10\frac{1}{4}$, closing school, singing grace, dismissing; $10\frac{1}{4}$ to 2, dinner recess; 2 to $2\frac{1}{4}$, inspecting cleanliness, opening school, singing grace, calling roll; 4 to $4\frac{1}{4}$, closing school, prayers and singing, dismissing. Monday, first class—from $10\frac{1}{4}$ to 11, geography; 11 to $11\frac{1}{2}$, dictation; $11\frac{1}{2}$ to 12, mental arithmetic; $2\frac{1}{4}$ to $3\frac{1}{4}$, sums; $3\frac{1}{4}$ to 4, reading history; second class—from $10\frac{1}{4}$ to 11, dictation; 11 to $11\frac{1}{2}$, geography; $11\frac{1}{2}$ to 12, tables; $2\frac{1}{4}$ to $3\frac{1}{4}$, reading; $3\frac{1}{4}$ to 4, sums; third class—from $10\frac{1}{4}$ to 11, spelling; 11 to $11\frac{1}{2}$, Scripture; $11\frac{1}{2}$ to 12, tables; $2\frac{1}{4}$ to $3\frac{1}{4}$, sums; $3\frac{1}{4}$ to 4, reading. Tuesday, first class—from $10\frac{1}{4}$ to 11, dictation; 11 to $11\frac{1}{2}$, English grammar; $11\frac{1}{2}$ to 12, tables; $2\frac{1}{4}$ to $3\frac{1}{4}$, reading class book; $3\frac{1}{4}$ to 4, sums; second class—from $10\frac{1}{4}$ to 11, English grammar; 11 to $11\frac{1}{2}$, dictation; $11\frac{1}{2}$ to 12, mental arithmetic; $2\frac{1}{4}$ to $3\frac{1}{4}$, sums; $3\frac{1}{4}$ to 4, reading fourth book; third class—from $10\frac{1}{4}$ to 11, reading; 11 to $11\frac{1}{2}$, spelling; $11\frac{1}{2}$ to 12, sums; $2\frac{1}{4}$ to $3\frac{1}{4}$, reading; $3\frac{1}{4}$ to 4, sums. Wednesday, 1st class—from $10\frac{1}{4}$ to 11, geography; 11 to $11\frac{1}{2}$, dictation; $11\frac{1}{2}$ to 12, mental arithmetic; $2\frac{1}{4}$ to $3\frac{1}{4}$, sums; $3\frac{1}{4}$ to 4, reading; second class—from $10\frac{1}{4}$ to 11, dictation; 11 to $11\frac{1}{2}$, geography; $11\frac{1}{2}$ to 12, tables; $2\frac{1}{4}$ to $3\frac{1}{4}$, reading; $3\frac{1}{4}$ to 4, sums; third class—from $10\frac{1}{4}$ to 11, spelling; 11 to $11\frac{1}{2}$, geography; $11\frac{1}{2}$ to 12, Scripture; $2\frac{1}{4}$ to $3\frac{1}{4}$, sums; $3\frac{1}{4}$ to 4, reading. Thursday, first class—from $10\frac{1}{4}$ to 11, collects; 11 to $11\frac{1}{2}$, church catechism; $11\frac{1}{2}$ to 12, bills, receipts, or letters; $2\frac{1}{4}$ to $3\frac{1}{4}$, reading; $3\frac{1}{4}$ to 4, sums; second class—from $10\frac{1}{4}$ to 11, collects; 11 to $11\frac{1}{2}$, Church catechism; $11\frac{1}{2}$ to 12, bills, receipts, or letters; $2\frac{1}{4}$ to $3\frac{1}{4}$, sums; $3\frac{1}{4}$ to 4, reading; third class—from $10\frac{1}{4}$ to 11, Church catechism; 11 to $11\frac{1}{2}$, Scripture; $11\frac{1}{2}$ to 12, reading; 2 to $3\frac{1}{4}$, reading; $3\frac{1}{4}$ to 4, sums. Friday, first class—from $10\frac{1}{4}$ to 11, dictation; 11 to $11\frac{1}{2}$, English grammar; $11\frac{1}{2}$ to 12,

12, tables; second class—from $10\frac{1}{4}$ to 11, English grammar; 11 to $11\frac{1}{2}$, dictation; $11\frac{1}{2}$ to 12, mental arithmetic; third class—from $10\frac{1}{4}$ to 11, reading; 11 to $11\frac{1}{2}$, spelling; $11\frac{1}{2}$ to 12, tables; $2\frac{1}{4}$ to 4, first, second, and third classes, reading the Psalms for the ensuing Sunday, church catechism simultaneously, familiar lecture, hymns.

21.—First class, Bible and Testament, class book, history of England, geography, English grammar, dictation, ciphering; second class, Bible and Testament, fourth book, second book (National), geography, English grammar, dictation, ciphering; third class, Bible and Testament, second book, parables, &c., geography, English grammar, spelling, ciphering; fourth class, first book, geography, spelling, ciphering; very bad condition; other books required; inadequate.

22.—Maps of Europe, Asia, Africa, North and South America, The World, Australia, Palestine, Old and New Testament, 3 Johnson's diagrams of mechanics; no key to them; maps in good condition; required,—map of England and Wales, British Islands, journeys of the children of Israel.

23.—Corporal when requisite; keeping in occasionally. For instructions to teachers, see rules and regulations issued by the Denominational School Board.

24.—Until very lately the examination of pupils and the distribution of prizes have been very irregular; at present the school is visited regularly every Tuesday by the Rev. E. Rogers, and a member of the Local Board; rewards or prizes have not been given for some time.

25.—Visited officially by the Church of England school inspector, Mr. Cuthbert; during the year 1858, as per roll book; Mr. Cuthbert visited the school 30th March and 11th of August. Other visitors,—Revs. Thomas Hassall, Samuel Fox, F. Ashwin, and Edward Rogers, members of Local Board, Messrs. Webb and Flavelle; not less than one hour, sometimes more; I have no regular report on the roll, either quarterly, half-yearly, or yearly; I should say from remarks made occasionally, favorable.

26.—George Henry Bode.

27.—Not any.

28.—Bath, Somersetshire, England.

29.—57 years.

30.—Easter, 1854.

31.—Not trained.

32.—

33.—23 years in England and Ireland; 13 years at Penrith, New South Wales; 6 months at St. Peter's, Cook's River; 5 years in Trinity; total, 41 years 6 months as a teacher. No other occupation but that of a teacher.

34.—Salary, £87 10s.

35.—Fees, &c., £109 17s. 10d.

36.—£197 7s. 10d.

37.—According to tenets of the Church of England; the Old and New Testaments are read alternately day by day, and questioned by the teacher on what has been read, and explanations made when requisite. Yes, by the incumbent of the parish, Rev. Edward Rogers, Church of England. Bible, Testament, church catechism, and various others published by the Society for Promoting Christian Knowledge. The Church of England catechism is heard every Friday.

ULLADULLA.—(MIXED SCHOOL.)

1.—Ulladulla.

2.—Wood; in good repair.

3.—525.

4.—1 acre.

5.—None whatever.

6.—1 room only, containing 525 square, 4,200 cubic, feet.

7.—20.

8.—4 windows.

9.—36 on the roll, 18 boys, and 18 girls; 20 in attendance, 13 boys, 7 girls.

10.—Boys, 14 to 5; girls, 11 to 4.

11.—Three classes: 1st, 14 to 9; 2nd, 12 to 6; 3rd, 8 to 4.

12.—From 9 till 12; recess for dinner and play, 12 till 2. Afternoon, 2 till 4.

13.—Saturday only; 2 weeks at Midsummer, 2 weeks at Midwinter.

14.—232.

15.—Very uncertain; about 18 months.

16.—The settlement of Ulladulla includes an area of about 120 square miles, over which a small population is so thinly scattered, that it is very difficult to ascertain the exact number of children. The district registrar's account is the only source from which an approximate statement can be made. From this it appears there are about 130 children under 5 years of age, and about 70 between 5 and 15; of whom 34 are on the school roll, the remainder are either at too great a distance to attend, or are so badly wanted on the farms, that their services cannot be dispensed with. These causes operate very injuriously on the attendance of those children whose names are on the roll. The average attendance during the last two years, has been about '55 of their time.

17.—Nominal charge, 1s. per week; parents pay what sum they please; no charge for books.

18.—£40 18s., appropriated to the teacher's use ; Denominational Board, £52 10s.
Total amount, £92 10s.

19.—£2 11s. 4½d.

20.—

TIME TABLE.

No.	Subjects.	FIRST CLASS.					
		Time.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.
1	Scripture lessons.	9—9½	1	1	1	1	1
		9½—10	2	7	14	14	9
2	Catechism.	10—10½	7	9	7	9	7
		10½—11	8	6	8	5	6

		3½—4	7	6	6	17	Collects, Psalms, &c.
6	Arithmetic, oral.						
7	Ditto slate.						
8	Ditto mental.						
SECOND CLASS.							
9	Reading.	9—9½	1	1	1	1	1
		9½—10	2	7	14	13	7
10	Grammar.	10—10½	9	5	7	5	9
		10½—11	8	9	8	9	5
11	Geography, general.	11—11½	5	12	5	6	10
		11½—12	11	17	10	7	13
12	Ditto scriptural.	2—3	3	3	3	3	16 & 18
		3—3½	7	6	9	11	Collects, Psalms, &c.
13	Ditto Australian.	3½—4	6	7	7	17	
14	History.						
15	Needlework.						
THIRD CLASS.							
16	Drill.	9—9½	1	1	1	1	1
		9½—10	4	9	4	13	4
17	Mapping.	10—10½	7	4	9	4	9
		10½—11	9	7	7	7	13
18	Familiar lecture.	11—11½	8	12	13	9	10
		11½—12	11	8	10	8	12
19	French.	2—3	3	3	3	3	16 & 14.
		3—3½	4	4	4	11	18
20	Latin.	3½—4	9	9	8	8	Collects, Psalms, &c.

No. of Lessons Weekly—5 Scripture, 1 catechism, 4 writing copy, 8 ditto slates, 4 dictation, 4 oral arithmetic, 8 written arithmetic, 4 mental ditto, 5 reading, 2 grammar, 2 general geography, 1 Australian ditto, 2 history, 4 needlework, 1 drill, 2 mapping, 1 familiar lecture, 3 French, 2 Latin.

21.—

BOOKS.

By what Class used.	Title of Book.	Condition.
Monitor's only	Hall's French Course, 1 and 2	Good ; property of teacher.
" "	Smith's inductive Latin	" " "
" "	Colenso's arithmetic	" " "
" "	" " algebra	" " "
" "	Tate's mechanics	" " "
1st, 2nd, 3rd class	Bibles	" " school
2nd class	Testaments	" " "
1st "	Fourth reading book, (National.)	" " "
2nd "	Third " " "	Much worn.
3rd "	Second " " "	" " "
3rd "	Primers	" " "
1st "	History of England, (C.K.S.)	" " "
1st "	Geography, Irish	Good.
1st "	School grammar, (C.K.S.)	Much worn.
1st "	Chronology, (C.K.S.)	" " "
1st, 2nd, 3rd class	Irish arithmetic	Worn out.
1st and 2nd "	Small geography, (Denominational Board)	" " "
1st, 2nd, 3rd "	Arithmetical tables	" " "

These books, if kept up in number and condition, are sufficient for the present state of the school. A more simple grammar and geography for young children, and the Scholar's Atlas, published by the English National Society, would be valuable additions ; as also a pair of globes.

22.—The World, Australia, Asia, North America, South America, Africa, Syria, Palestine illustrating the patriarchal ages ; Palestine divided into tribes ; Palestine (2) illustrating

illustrating the New Testament ; 30 plates, natural history ; 6 plates, moral lessons, ; 12 plates, Scriptural illustrations. All in excellent condition. No Europe, much wanted ; blackboards and chalk, much needed.

23.—Discipline and order are maintained, as far as possible, by moral influence alone. An uniform course of drill accustoms the children to a prompt obedience to the word of command, and renders coercive measures almost needless. Should a child manifest wilful insubordination or vice, its own conscience convicts it of the evil ; therefore, to multiply words would be injurious, chastisement must follow. No written instructions have been given by any visitor upon this subject.

24.—Monthly ; by the different members of the Local Board ; no prizes are distributed.

25.—At the monthly examinations, the examiner usually spends about six or seven hours in the performance of this duty. The school was inspected by the diocesan inspector on the 25th and 26th October, 1858 ; he expended the whole of the first and a large portion of the second day in the inspection. The following notes are taken from the roll book, which were made by the Local Board after the examinations.

1857 :—

“ I feel quite satisfied with the children’s progress since they were last examined.—
“ EDWARD KENDALL.”

“ September 23.

“ I have examined the school this day, and consider the scholars are progressing very favorably, especially in writing ; and considering the state of the weather, which has prevented the children from attending as often as they otherwise would, the school is in a very satisfactory state. I would recommend a little more attention to arithmetic, in which I consider the children are rather backward.—W. H. WASON, Chairman.”

“ November 11.

“ The children were examined this day in reading, writing, drawing, dictation, geography, arithmetic (slate and mental), Scripture, and English history. It is much to be desired that the parents would send the children more regularly, as the roll book shows a great deficiency in this respect. The children who have been examined have progressed in every branch, in a most satisfactory manner.—DAVID WARDEN.”

“ January 29.

“ Having examined the school this day, I think generally it is going on very favorably, in dictation especially ; the first class have much improved, and I have great pleasure in remarking the very orderly and cleanly appearance of the children. Mrs. Wason, having examined the sewing, is pleased with the progress the girls have made, considering the short time and irregular lessons, on account of wet weather keeping the children from school. In mental arithmetic and geography (Europe), their answers were very satisfactory.—
“ W. H. WASON, Chairman.”

“ February 26.

“ I have examined the school this day in dictation, arithmetic (slate and mental), geography (Asia), history, and writing, and feel quite satisfied with the progress they have made generally, and especially with their clean and orderly appearance.—W. SECCOMBE.”

“ March 29.

“ I have examined the children of the Ulladulla school, under the instruction of Mr. Done, and was very much pleased with the general answering, and the cleanly appearance of the children.—A. S. KING, Clergyman.”

“ April 23.

“ I examined the children of this school, and am satisfied with the progress they have made since my last visit.—JOHN KENDALL.”

“ August 12.

“ On resigning my office of Chairman, everything was working favorably, and the school in a progressive state.—W. H. WASON, Chairman.”

“ September 24.

“ The school was examined this day, and I am satisfied with the children’s progress.—
“ W. SECCOMBE.”

“ November 21, 1858.

“ I have this day examined some of the children ; their writing was generally good. The second class read well, and the children generally seem to understand Bible history tolerably.—P. H. SHEAFFE.”

“ SCHOLASTIC.—Mr. Done’s school was examined yesterday by David Warden, Esq., J.P., and Percy Sheaffe, Esq., J.P., and found to be in a very efficient and flourishing state.”

26.—John Done.

27.—No paid teachers or monitors ; monitors—John Done, Frances Done, David Buchan.

28.—City of Worcester ; Island of Guernsey ; Hertfordshire ; Ulladulla.

29.—42, 12, 10, 10.

30.—1st January, 1857.

31.—Not in any institution ; many years principal of a boarding-school near London, in union with the Royal College of Preceptors, where the pupils were examined half-yearly, and received diplomas.

32.—Licentiate’s diploma of the Royal College of Preceptors.

33.—Vide 31.

34.—£52 10s. Vide 27.

- 35.—None.
 36.—£32 10 ; £40 18s. from school fees.
 37.—Scripture lesson daily, by master. Rev. A. S. King, Church of England, Shoalhaven ; Holy Scriptures, church catechism, chief truths, miracles and parables of Christ.

WATERLOO ESTATE, REDFERN.—(MIXED.)

- 1.—Waterloo Estate.
- 2.—It is built of wood, and quite new.
- 3.—The area of the building contains 990 superficial square feet.
- 4.—The playground contains 11,810 superficial square feet, or 1,312 square yards 2 square feet.
- 5.—There are two closets, and convenience for three children in each of them.
- 6.—The area of the schoolroom is 990 superficial square feet ; the room contains 10,890 cubic feet, without the open roof ; from the floor to the principals is 11 feet, and from the lower edge of the principals to the ridge of the roof 7 feet 6 inches, which contains 3,712·5 cubic feet ; therefore the room contains, in all, $10,890 + 3,712·5 = 14,602·5$ cubic ft.
- 7.—The average number of children assembled in the school, 70 children.
- 8.—The provisions for ventilating the school are twelve windows and two doors.
- 9.—The school has not been open twelve months.
- 10.—The maximum and minimum age of the boys, from 2 to 13 years, and of the girls from 2 to 14 years.
- 11.—The school is divided into six classes. The number of pupils, and maximum and minimum ages, in each class are as follows : Boys—first class, 9, 7 to 13 years ; second class, 15, 6 to 12 years ; third class, 13, 2 to 6 years. Girls—first class, 8, 12 to 14 years ; second class, 12, 8 to 10 years ; third class, 13, 2 to 6 years.
- 12.—The pupils attend the school $5\frac{3}{4}$ hours each school day, viz.,—from 9 in the morning till half-past 12 at noon ; and from 2 o'clock in the afternoon till a quarter past 4.
- 13.—One day in each week (Saturday) is always a holiday ; the school is then cleaned, and arrangements made for the Sunday-school ; one week is given at Christmas, Good Friday, the Queen's Birthday, Easter Monday, 26th of January, and the school feast, which occurs one day in April, are holidays.
- 14.—Without reckoning Sundays, there are 249 school days.
- 15.—I have not had the school long enough to give a satisfactory answer to that question.
- 16.—The district is too large and populous for me to tell how many children there are between the ages of 5 and 15 that do not come to the school.
- 17.—9d. is my average weekly charge to each pupil for instruction ; the annual sum will be £1 18s. 3d.
- 18 & 19.—The school has not been open twelve months.
- 20.—The pupils are taught reading, writing, arithmetic, grammar, geography, spelling, dictation, and history. The school opens and closes with singing and prayer. First class, boys and girls (in separate classes), Monday, Tuesday, and Thursday mornings :—Writing in copy-books, half an hour ; writing grammar exercises, 20 minutes ; examining exercises, quarter of an hour ; repeating hymns and poetry, quarter of an hour ; spelling exercises, quarter of an hour ; tables ditto, quarter of an hour ; church catechism, 10 minutes ; writing exercises in geography, half an hour ; exercises in arithmetic, half an hour. Afternoon, first class, boys :—Reading fourth book and class reading books, 1 hour ; arithmetic, 1 hour. Wednesday and Friday mornings :—Writing in copy-books, half an hour ; exercises in geography, half an hour ; arithmetic, half an hour ; examining exercises, quarter of an hour ; repeating hymns and poetry, quarter of an hour ; spelling exercises, quarter of an hour ; tables ditto, quarter of an hour ; exercises in arithmetic, half an hour. Afternoon, Monday, Wednesday, and Thursday, first class, girls, reading sixth class book, 1 hour ; needlework, 1 hour. Wednesday afternoon :—Boys, reading the Holy Scriptures, 1 hour ; arithmetic, 1 hour—girls, reading the Holy Scriptures, 1 hour ; needlework, 1 hour. Second class boys and second class girls.—The same arrangement as above, with this exception—that the days have to be reversed. Afternoon—Monday, Tuesday, and Thursday, boys :—arithmetic, 1 hour ; reading third class book, 1 hour. Wednesday—reading the Holy Scriptures, 1 hour ; arithmetic, 1 hour. Monday, Tuesday, and Thursday, girls :—reading third class books, 1 hour ; needlework, 1 hour. Friday, first and second classes, boys and girls—reading the Holy Scriptures, chief truths, religious primers, hymns, and prayer. Third, or Infant classes, begin school with prayer and singing ; writing, half an hour ; reading, half an hour ; spelling, half an hour ; tables, half an hour ; catechism, half an hour ; writing, three-quarters of an hour ; afternoon, writing 1 hour, and reading 1 hour, concluding with prayer and singing.
- 21.—The books used in each of the several classes in the school are as follows :—First class, boys—Bibles and Testaments, fourth class books, grammars, geographies, class reading books, table books, books of arithmetic, collects, church catechism, chief truths, hymn books, religious primers. Girls—Bibles and Testaments, sixth class books, grammars, geographies, class reading books, table books, books of arithmetic, collects, church catechisms, chief truths, hymn books, religious primers. Second class boys and second class girls—Bibles and Testaments, third class books, grammars, geographies, table books, first books of arithmetic, collects, church catechisms, chief truths, hymn books, religious primers. Third, or Infant classes—religious

religious primers, sequel No. 1 to the second book of lessons, a primer for the use of Sunday-schools, parables of Our Blessed Saviour, miracles of Our Blessed Saviour, and multiplication cards. The condition of the books is as follows:— $3\frac{1}{2}$ dozen Bibles, 4 dozen Testaments, most of them in good condition; 1 dozen sixth class books, much worn; 1 dozen class reading books, good condition; 2 dozen third class reading books, very much worn; $1\frac{1}{2}$ dozen fourth class books, much worn; 17 second class reading books, nearly worn out; 2 dozen first books of arithmetic, in very bad condition; 1 dozen English grammars, in good condition; 1 dozen geography, in good condition. Very small slight paper-covered books—2 dozen parables of Our Blessed Saviour, in good condition; 2 dozen miracles of Our Blessed Saviour, in good condition; 40 collects, in very bad condition; about 1 dozen arithmetical table books, in very bad condition; Watts's Divine songs—very few—I am much in want of them; 8 church catechisms, nearly worn out; 2 dozen chief truths, in very middling condition; 2 dozen religious primers, very much worn. I am very much in want of books.

22.—Maps, &c.:—Map of The World, of Europe, of Australia, of countries mentioned in the Old Testament; of countries mentioned in the New Testament; of Palestine; map illustrating the travels of St. Paul; 2 dozen illustrated lesson papers; 12 dozen plain ditto; 3 large cards—the Lord's Prayer, Commandments, and the Creed, all in good condition. I require a map of Asia, Africa, and North and South America.

23.—The instructions to the teachers from the Board of Education on punishment is as follows:—"Corporal punishment is allowed, but should be avoided as far as is compatible with the maintenance of due order and discipline; the master will endeavor to win the children by kindness, united with firmness, and will discriminate between idleness and inability." I endeavor to follow the above advice.

24.—The pupils are examined by the Rev. A. H. Stephen; and by Dr. Hansard, who visits the school once or twice a week, and who also has the management of the Sunday-school. Prizes are given for good behaviour and regular attendance once every year, consisting of instructive books, toys, &c. Prizes are also given in the Sunday-school for good conduct and regular attendance.

25.—The school is officially inspected by Mr. W. J. Cuthbert; I cannot say how often during the year, as I have not had the school a year yet.

26.—William Arthur Loftus.

27.—My wife teaches the children needlework. The pupil teachers or monitors of the school are as follows:—Jane Burns, aged 14, Sydney; Hannah Bunting, aged 14, Sydney; Phoebe Hayes, aged 13, Sydney; Margaret Miller, aged 13, Dunholm, Roxburgh shire, Scotland; Jane Weight, aged 13, Camberwell, near London; Elizabeth Montgomery, aged 12, Botany; William Turner, aged 13, Staffordshire, England; Henry Malone, aged 12, Botany; Walter O'Reily, aged 12, New York, America.

30.—I was appointed to present office 1st June, 1858.

31.—I am not a trained teacher.

32.—

33.—I kept a private school for four years; I had 72 pupils previous to accepting the present appointment. I am by profession an historical engraver—pupil to H. T. Ryall, historical engraver to Her Majesty. I was educated at the London University.

34.—I am to receive annually £50.

35 & 36.—I have not had the school a year; therefore I cannot satisfactorily answer those questions.

37.—The religious instruction is given by the Rev. A. H. Stephen, clergyman of the Church of England, and by Dr. Hansard, and also by myself, as before-mentioned, twice during the week. The Bible is the only book in the school, but many other instructive and religious books are brought to the school and read to the pupils by Dr. Hansard.

WAVERLEY.—(MIXED.)

1.—Waverley.

2.—Of stone, and in good condition.

3.—960 superficial feet.

4.—40 feet \times 130.

5.—Two, in good condition.

6.—960 superficial feet, 15,360 cubic feet.

7.—40 pupils.

8.—Ventilators in roof, windows, and doors.

9.—32 boys, 34 girls, annual average on books; 20 boys, 20 girls, annual average attendance.

10.—From 4 to 13 years of age.

11.—Six classes:—1st class, 11 to 13; 2nd class, 9 to 11; 3rd class, 8; 4th class, 7; 5th class, 6; 6th class, 4 and 5; from 8 to 12 in each class.

12.—5 hours; 9 till 12; 2 till 4 o'clock; intervening hours, dinner, recess, and play.

13.—One holiday in each week, a fortnight at Christmas, one week at Easter, one week at Midwinter.

14.—240 days.

15.—Cannot judge; school opened only seventeen months.

16.—(Too absurd to be answered.)

17.—From 6d. to 1s. per week; 28s., annual average charge for each pupil; books supplied.

- 18.—£37 10s.; appropriated to teacher; £22 10s. received from Denominational School Board; total, £60. For 7 months, from 1st March to 30th September, 1858.
- 19.—£1 9s.; from 1st March to 30th September, 1858.
- 20.—Scripture, writing, arithmetic (mental and written), dictation, reading, spelling, history, grammar, and geography, alternately; girls, needlework, half an hour to each lesson.
- 21.—The Holy Scriptures, 1st, 2nd, 3rd, and 4th reading books, Sullivan's geography, grammars, &c.; a good supply.
- 22.—Map of The World, Australia, England, Palestine; blackboard.
- 23.—With firmness and kindness.
- 24.—Once a year, by Local Board, when prizes are awarded of religious and moral books.
- 25.—Diocesan inspector, Church of England schools; and frequently by the clergyman.
- 26.—Isabella Hartley.
- 27.—None; (monitors taken from amongst the pupils.)
- 28.—Dublin.
- 29.—Twenty-two.
- 30.—1st March, 1858.
- 31.—Not trained.
- 32.—Obtained a registered teacher's certificate, at voluntary examination of Church of England teachers, held Christmas, 1857.
- 33.—Assistant at Narellan school.
- 34.—£50.
- 35.—£56.
- 36.—£106.
- 37.—Christian religion daily; teacher, Rev. S. Mitchell; the Holy Scriptures, catechism.

WILBERFORCE.—(MIXED.)

- 1.—Wilberforce.
- 2.—Bricks and wood; needs repairs.
- 3.—672 square feet.
- 4.—Not enclosed; lies open to the common.
- 5.—A wooden closet, in good repair.
- 6.—672 square feet, 6,720 cubic feet.
- 7.—48.
- 8.—1 door, 8 windows, and 1 chimney.
- 9.—57; the annual average number attending the school are—males, 23; females, 25;—total, 48; from 1 October, 1857, to 30 September, 1858.
- 10.—Maximum age, 15 years; minimum, 5 years, of both sexes.
- 11.—Number of classes, four; average number in each class—first class, 8; second, 9; third, 6; fourth, 5. First class—maximum age, 15; minimum, 10 years. Second class—maximum, 13; minimum, 7 years. Third class—maximum, 10; minimum, 6 years. Fourth class—maximum, 9; minimum, 5 years.
- 12.—5 hours; commencing at 9 and terminating at 3 o'clock; the interval, from 12 to 1 o'clock is employed in taking refreshments and exercise.
- 13.—Saturday in each week; 2 vacations, of 2 weeks each, at Midwinter and Christmas.
- 14.—The number of school days, from 1st October, 1857, to 30th September, 1858, were 246.
- 15.—About 4 years.
- 16.—About 50.
- 17.—The weekly charge from 6d. to 3d. each; no charge for books; total annual charge for each, 17s.
- 18.—The amount of school fees from the pupils for the twelve months ending 30th September, 1858, were £47 18s. 2d., appropriated by the teacher towards the support of himself and family; amount of Government salary, £70;—total amount from all sources during the above-mentioned period, £117 18s. 2d.
- 19.—Average annual total cost for each pupil, £2 1s. 4d.
- 20.—From 9 to 9 $\frac{3}{4}$ —first class, spelling and reading; second, third, and fourth classes, learning lessons. From 9 $\frac{3}{4}$ to 10 $\frac{1}{2}$ —first class, learning lesson; second class, spelling and reading; third class, learning lesson; fourth class, spelling to one of first class. From 10 $\frac{1}{2}$ to 11—first and second classes, learning lesson; third class, spelling and reading; fourth class, learning lesson. From 11 to 11 $\frac{1}{2}$ —first, second, and third classes, arithmetic; fourth class, spelling and question. From 11 $\frac{1}{2}$ to 12—first, second, and third classes, arithmetic; fourth class, learning lesson. From 12 to 1—recreation, &c. From 1 to 1 $\frac{1}{2}$ —tables or questions for the whole school. From 1 $\frac{1}{2}$ to 2 $\frac{3}{4}$ —the whole either writing or ciphering. On the Friday morning all say the collect, catechism, and questions on the maps. On the Friday evening all, except the girls, write and cipher. The girls do needlework on Monday, Wednesday, and Friday evening. From 2 $\frac{3}{4}$ to 3—prayers, &c., on closing school.
- 21.—The first and second classes use the Bible, English history, fourth and third class books, Scripture history, catechetical series, catechisms, grammars, and geographies; third class use Dr. Young's spelling book; fourth class use first book and primer. Books required in the collects, catechisms, primers, and first books.
- 22.—A map of Europe, North America, of the countries mentioned in the Bible, a map of England and Wales, and a map of The World; a new map of The World is much needed.

- 23.—Corporal correction is employed as directed by the Board of Education.
 24.—Twice a year by the clergyman, Chairman of the Local Board; no prizes awarded.
 25.—By W. J. Cuthbert, Esq., diocesan inspector, on the 19th November, 1857, and by the Rev. T. Wilson, once a week; the time occupied is about an hour and a half.
 26.—John Wenban.
 27.—None employed.
 28.—England.
 29.—55 years.
 30.—4 November, 1842.
 31.—Not trained as a teacher.
 32.—No training institution established at that time.
 33.—Examined by the Rev. C. Kemp, then minister at Wilberforce; my previous occupation, a wheelwright.
 34.—Annual salary of head teacher, £70.
 35.—Only the fees received from the pupils.
 36.—The total annual income of head teacher derived from the school (including the Government salary), from 1st October, 1857, to 30th September, 1858, was £117 18s. 2d.
 37.—Biblical and catechetical, once a week, by the teacher, and by the Rev. T. Wilson, minister of the Church of England, and Chairman of the Local Board; the Bible, chief truths, church catechism, collect, and catechetical series.

WINDSOR.—(MIXED.)

- 1.—Bridge-street, Windsor.
 2.—Brick; some repairs are required.
 3.—1,652 superficial square feet.
 4.—24,052 square feet, or 2,672 $\frac{1}{2}$ square yards.
 5.—Their condition is tolerable; but, as to description, I am at a loss to describe them dimensions seem to be not required.
 6.—One room for teaching, 40 feet in length, 20 in breadth, 14 in height; $40 \times 20 = 800$ square feet (ground floor); and $40 \times 20 \times 14 = 11,200$ cubic feet.
 7.—29 average during 1858.
 8.—There are six windows, which can be opened when required.
 9.—Average number on the books, 40; average number attending, 16 boys, 13 girls.
 10.—Maximum, 13 boys; minimum, 7 boys: maximum, 12 girls; minimum, 6 girls.
 11.—Six classes: 1st, 6; 2nd, 4; 3rd, 5; 4th, 8; 5th, 12; 6th, 5. Ages: 1st,—maximum 13, minimum 9: 2nd,—maximum 13, minimum 11: 3rd,—maximum 12, minimum 9: 4th,—maximum 10, minimum 8: 5th,—maximum 10, minimum 7: 6th,—maximum 6, minimum 5.
 12.—5 $\frac{1}{2}$ hours; morning commencing at 9 a.m. to 12:30; afternoon commencing at 1:30 p.m. to 3:30; the interval of 1 hour at noon is employed in getting their dinners and play.
 13.—1 day in each week, *i.e.* Saturday; annual vacations, a week at Easter and a week at Christmas.
 14.—231: not necessarily every year alike.
 15.—Some have staid a few years, and some only a few weeks or a few days; how can I find an average in this case that will be near the truth?—perhaps 2 years.
 16.—That I know nothing whatever about.
 17.—No quarterly, half-yearly, or annual charges: by the week charges of 3d., 4d., 6d., &c., to 1s.,—none greater.
 18.—£24 2s. 9d.: the appropriation,—who has to do with that but myself? it might have been expended in the purchase of tea and sugar, pens, paper, or any, or all of those articles; no amount from any other source; total from all sources, £111 12s. 9d.
 19.—£111 12s. 9d. \div 29 = £3 16s. 11 $\frac{3}{4}$ d., annual cost of each.
 20.—1st class,—reading, writing, arithmetic, grammar, geography, English history: 2nd class,—same as 1st: 3rd class,—reading, writing, arithmetic, geography: 4th class,—reading, and writing on slates: 5th,—spelling and easy reading: 6th,—learning alphabet.
Note.—Spelling exercises in 1st 5 classes; Scripture reading and church catechism throughout, except 6th class.
 1st class,—Monday, Wednesday, and Friday morning,—history, $\frac{1}{2}$ hour; grammar, $\frac{1}{4}$ hour; geography, $\frac{1}{2}$ hour; Scripture reading, $\frac{1}{2}$ hour; writing, $\frac{3}{4}$ hour; remaining time, arithmetical exercises, arithmetical tables, &c.: Monday, Wednesday, and Friday afternoon,—reading various books, $\frac{1}{2}$ hour; remainder of time principally arithmetic; girls, needlework.
 2nd class,—Monday, Wednesday, and Friday morning,—spelling and writing from dictation, $\frac{1}{2}$ hour; writing copies, $\frac{1}{2}$ hour; reading New Testament, $\frac{1}{2}$ hour; geography, $\frac{1}{2}$ hour; exercises in other books, and with slates, remainder of time, history and grammar: Monday, Wednesday, and Friday afternoon,—arithmetic, 1 $\frac{1}{2}$ hours; spelling and reading, $\frac{1}{4}$ hour; arithmetic remainder of time, with arithmetical tables; girls, needlework.
 3rd class,—Monday, Wednesday, and Friday morning,—writing from dictation, $\frac{1}{4}$ hour; in copy-books, $\frac{3}{4}$ hour; New Testament and geography, 1 hour; use of the maps, reading lessons in various books, with arithmetic and tables, remainder of the time: Monday, Wednesday, and Friday afternoon,—arithmetic, 1 $\frac{1}{2}$ hours; spelling and reading, arithmetic and tables, remainder of the time.
 4th class,—Monday, Wednesday, and Friday morning,—writing on slates, $\frac{1}{2}$ hour; spelling and reading, $\frac{1}{2}$ hour; writing in copy-books, $\frac{1}{2}$ hour; reading at intervals, in various books, remainder of time: Monday, Wednesday, and Friday afternoon,—reading at intervals, with

with writing on slates, $\frac{1}{2}$ hour; arithmetical tables, girls, needlework, &c. 5th class,—Monday, Wednesday, and Friday morning,—spelling, $\frac{1}{2}$ hour; afterwards reading at intervals: Monday, Wednesday, and Friday afternoon,—spelling and reading at intervals; girls, needlework. 1st class,—Tuesday and Thursday morning,—instead of history—grammar and geography; Scripture reading and church catechism occupies about the same time: Tuesday and Thursday afternoon,—the same as other days; and so of all the classes, with but slight variations.

21.—List of books:—1st and 2nd class,—the Bible, New Testament, 2nd book, 3rd book, 4th book, English school grammar, elements of geography, history of England, outlines of chronology: 3rd class,—New Testament, 2nd book, 3rd book, elements of geography, faith and duty of a Christian, miracles, parables: 4th class,—2nd book, 1st book, Simpson's primers, miracles, parables, Sermon on the Mount: 5th class,—1st book, ditto (new series), Simpson's primer, large cards and cartoons: 6th class,—alphabets, large and small. The condition of those in use are tolerable, and are adequate to the use of the school.

22.—List of maps in the school:—The World, Europe, Asia, Africa, America (in 2 parts), New Testament, Old Testament, England and Wales,* British Islands, travels of St. Paul, Palestine.* Those marked * are not in good condition.

23.—No written instructions upon this subject.

24.—The school is examined about once a week, by the clergyman, with reference, of course, to the progress of the children. Prizes have not lately been given, there being no funds to provide them.

25.—By the clergyman weekly. The diocesan inspector has also paid one or two visits to the school. The length of time so occupied is limited by the discretion of the inspector. A Board of three examiners, appointed under an Act of Council, also visited, and reported on the school, some two or three years ago. I have never been furnished with a copy of their report.

26.—Edward Quaife.

27.—None.

28.—England.

29.—50.

30.—1840.

31.—Not trained.

32.—At the time of Mr. Quaife's appointment trained teachers were not to be had. He had no certificate of competency.

33.—Another Church of England school during 2 years before the present appointment. These two comprise my experience in teaching, except visiting for a short time a school, for instruction in the method of teaching, previous to my first appointment, in 1838. Respecting things before, I think they are points without the circumference.

34.—£87 10s.

35.—Fees paid by the parents of a few of the children.

36.—The aforesaid salary and the aforesaid fees.

37.—Religious and moral instruction by the clergyman weekly,—the Rev. Henry J. Stiles, M.A., priest of the Church of England. The books used for this purpose are the Holy Scriptures, and the various contents of the book of common prayer. Beyond these it is not found necessary to travel. But the instruction is chiefly by oral catechising, adapted to the requirements of children.

WOLLONGONG.—(MIXED.)

- 1.—Wollongong.
- 2.—Brick; good; requires shingling.
- 3.—600 square feet.
- 4.—2,000 square yards.
- 5.—1 door wanting; requires shingling.
- 6.—1 room; 600 square feet.
- 7.—About 50 pupils.
- 8.—Windows that open at the top.
- 9.—60, viz., 34 boys and 24 girls.
- 10.—Boys from 13 to 3 years; girls the same.
- 11.—3 divisions of 20 children each.
- 12.—5 hours; beginning at 10 o'clock a.m., and leaving off at 4 p.m.
- 13.—1, Saturday; 2 vacations of a fortnight each, occurring at Midsummer and Christmas.
- 14.—238.
- 15.—Cannot answer this question, not having been long enough in my present position to form an opinion.
- 16.—Cannot answer this question.
- 17.—6d. per week; no charge for books.
- 18.—£65 5s. 6d., which goes to augment the master's stipend.
- 19.—£1 6s.
- 20.—The school is divided into 3 divisions of 20 children each; the subjects of instruction are—Bible lesson, catechism, writing in copy-books, writing on slates, dictation, spelling, oral arithmetic, writing ditto, mental ditto, reading, grammar, geography (general), Scriptural geography, Australian ditto, history, vocal music, mapping, needlework, familiar lecture, home lessons, drill, and so varied as to bring each subject a certain number of times every week.

21.—First division: class reading books, third books, history of England, history of Rome; second division: third books, history of England; third division: first and second books, geographies, grammars, and arithmetics; these books are published by direction of the Committee of General Literature and Education, appointed by the Society for Promoting Christian Knowledge—except the grammars and arithmetics, which are the same as those issued by the National Board.

22.—Map of The World, Asia, Europe, England and Wales, Australia, Palestine; 2 blackboards, 1 clock, 2 desks for master's use, 4 desks for the use of the pupils, 2 cap stands, 14 forms, 1 stool; required 1 large press for keeping school books in.

23.—Keeping in after school hours and extra lessons are the usual modes of punishment; corporal punishment is allowed, but is only resorted to in extreme cases; printed rules furnished by the Central Board.

24.—Twice, by the Chairman of the Local Board.

25.—By the inspector of Church of England Schools, once; time occupied—4 hours.

26.—James Carson Browne.

27.—No special assistant; a monitor chosen daily from first division.

28.—Longford, Ireland.

29.—32 years.

30.—January, 1857.

31.—Yes.

32.—At St. James' Model School, Sydney; five months.

33.—Clerk.

34.—£70.

35.—£65 5s. 6d.

36.—£135 5s. 6d.

37.—Bible lesson and catechism 4 times a week by the teacher—Rev. Thomas Campbell Ewing, Church of England clergyman.

WOONONA.—(MIXED.)

1.—Woonona, near Wollongong.

2.—Built wholly of wood (weatherboarded); present condition good; needs no repairs, but requires enlargement.

3.—Schoolhouse, 720 feet superficial.

4.—Land adjoining the school about half-an-acre.

5.—Two separate water-closets, in good condition.

6.—There is only one schoolroom, and no classrooms (see answer 3.)

7.—About 30.

8.—Three glazed sashes, which can be opened.

9.—Annual average number on books, 31; average daily attendance, 29, viz., 10 boys, and 9 girls.

10.—Maximum age:—males, 13; females, 14. Minimum age:—males, 4; females, 5.

11.—The school is divided into four classes:—

	No. in each class.	Maximum age.	Minimum age.
1st class	3	13	12
2nd class	10	13	8
3rd class	8	14	5
4th class	6	8	4

12.—The number of school hours is $5\frac{1}{2}$; hour of commencement, 9, to $12\frac{1}{2}$; from $12\frac{1}{2}$ to $1\frac{1}{2}$, dinner and recreation; and from $1\frac{1}{2}$ to $3\frac{1}{2}$, school duties.

13.—A whole holiday every Saturday, and a week's vacation in June and December.

14.—250.

15.—The school has been opened only four years.

16.—The number cannot be ascertained, but there is a large population.

17.—Some pupils pay 1s., and some 6d. per week, according to proficiency. The pupils find their own spelling books; but there is a good stock of reading and other books belonging to the school. The total annual charge for each pupil is £2 12s. and £1 6s. respectively, according to proficiency.

18.—School fees received during the year 1858, £39 8s. 6d.; stipend from Denominational Board, £52; total, £91 8s. 6d., which was paid to the teacher for his support.

19.—Average annual cost of education of each child, £3 3s. 0 $\frac{1}{2}$ d.

20.—The school is opened by reading Bible and prayers from 9 to 9 $\frac{1}{2}$ each day: Monday, Wednesday, and Friday, first and second classes, 9 $\frac{1}{2}$ to 10 $\frac{1}{2}$ writing, 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$ arithmetic, 11 $\frac{1}{2}$ to 12 $\frac{1}{2}$ reading and spelling, 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$ geography and grammar, 2 $\frac{1}{2}$ to 3 mental arithmetic; third and fourth classes, 9 $\frac{1}{2}$ to 10 $\frac{1}{2}$ writing, reading, and spelling, 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$ reading and spelling, 11 $\frac{1}{2}$ to 12 $\frac{1}{2}$ arithmetic, 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$ arithmetic, reading and spelling, 2 $\frac{1}{2}$ to 3 tables and numeration; and on Fridays, each class, church catechism: Tuesday and Thursday, first and second classes, 9 $\frac{1}{2}$ to 10 $\frac{1}{2}$ writing bills and receipts, 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$ mental arithmetic, 11 $\frac{1}{2}$ to 12 $\frac{1}{2}$ reading Bible, learning collects, &c., 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$ practical arithmetic, 2 $\frac{1}{2}$ to 3 reading Scripture history; third and fourth classes, 9 $\frac{1}{2}$ to 10 $\frac{1}{2}$ writing, reading and spelling, 10 $\frac{1}{2}$ to 11 $\frac{1}{2}$ tables and numeration, 11 $\frac{1}{2}$ to 12 $\frac{1}{2}$ learning divine songs, 1 $\frac{1}{2}$ to 2 $\frac{1}{2}$ reading

reading chief duties, Scripture history, $2\frac{1}{2}$ to 3 arithmetic. Dinner and recreation from $12\frac{1}{2}$ to $1\frac{1}{2}$ each day. 3 to $3\frac{1}{2}$ the school closes with prayers and singing each day; the girls are instructed every afternoon in needlework.

21.—The number of books in use in the school are sufficient, and consist of the following, viz.:—Mavor's spelling books, Carpenter's spelling books, 2nd book of lessons, sequel to 2nd book of lessons (National), 3rd book of lessons (National), 3rd book of lessons (Denominational), class reading books National, 4th book of lessons (National), 6th book of lessons (National), 1st book of arithmetic (National), grammar (National), compendium of geography (National), history of England.

22.—15 tablets on natural history; maps:—World, Travels of St. Paul, Palestine, countries mentioned in Old Testament, countries mentioned in New Testament, 1 teacher's desk, 2 flap desks, 13 forms. The whole are in good condition, but the writing desks are totally insufficient.

23.—Learning extra lessons during recreation. There are no instructions issued by anyone on this subject.

24.—The school is regularly visited by Mr. Thomas Hale and the Rev. C. T. Ewing. No prizes are given.

25.—By the diocesan inspector of schools, and the organizing master; I do not know how often; there is no report in the schoolhouse.

26.—David Robert Eden.

27.—Harriet Eden.

28.—London.

29.—38 and 36 respectively.

30.—February 25, 1859.

31.—Yes.

32.—National Model School, Sydney.

33.—

34.—£52 per annum.

35.—School fees about £40 per annum.

36.—About £92 per annum.

37.—Moral and religious instruction is given every day,—by reading the Scriptures and having the same expounded by the teacher, by instruction in catechism of Church of England, by learning hymns and portions of church service, and by the periodical examination of the clergyman of the Church of England. The Old and New Testament, church prayer book, hymn books, are in use in the school.

Facts not asked for, but given by the Local Patron, Mr. Thomas Hale:—

The schoolhouse and master's residence were built entirely by private subscription; and the same, together with the land, given and conveyed free of expense to the Denominational School Board by Mr. Hale.

The teacher's salary was paid by private funds for the first two years; the Denominational Board have never expended one shilling on the schoolhouse or residence; therefore, there are good grounds for the Board enlarging the master's residence, which is *very much required*, and increasing the miserable salary of the teacher.

Woonona, 24 March, 1859.

THOS. HALE.

YASS.—(MIXED.)

1.—Yass.

2.—Wood: it both needs repair and enlargement.

3.—396 feet.

4.—The ground is open all round.

5.—A single closet with two seats, but without a door.

6.—396 superficial, and 2,772 cubic, feet.

7.—44.

8.—Three windows to open.

9.—Average number on the roll:—Boys, 43; girls, 21. Averaging number attending school—boys, 31; girls, 13.

10.—Boys, 14 and 3; girls, 9 and 3 years.

11.—1st class, 14 and 8—attendance, 11; 2nd class, 14 and 7—attendance, 12; 3rd class, 13 and 5—attendance, 12; 4th class, 7 and 3—attendance, 9.

12.—5 hours daily: school opens at 9 a.m., closes at 4 p.m. 2 hours for dinner time.

13.—One day in each week (Saturday); 2 vacations in the year of a fortnight each, June and December.

14.—239.

15.—

16.—

17.—The weekly charge of 1s. is made for the elder pupils, and 6d. for the younger ones; no charge for books.

18.—School fees, £86 18s. 6d., appropriated to the support of the master; amount received from the Denominational School Board, £78 15s.: total amount of support, £165 13s. 6d.

19.—Average cost of each child's education, £3 15s. $3\frac{1}{2}$ d.

20.—

	Third book of lessons (Irish)	7	12
	Scripture history (abridgment), No. 1	12	12
	Ditto ditto No. 2	22	
	Ditto ditto No. 3	7	12
	Church of England catechisms	36	
Third class: Boys, 10; girls, 4; total, 14..	Descriptive reading cards	12	
	Other reading cards	24	
	Lord's Prayer	1	
	Belief	1	
Fourth class: Boys, 4; girls, 10; total, 14	Ten Commandments	1	
	Reading cards	12	

Books not in the school, but wanted: Fifth book of lessons (Irish), 20; table books, sheets of tables, 20; catechisms, broken into short questions, 20; ditto, with Scripture proofs, 20; first book of lessons, 20; Ingram's arithmetic, 20.

22.—Prints, none; diagrams, none. Maps: a map of The World and of Palestine, lent by the Rev. C. F. Brigstocke; a small blackboard, not very good. Needed: Maps of The World, Europe, Asia, Africa, America, and Australia, blackboard and easel, sheet of natural history, sheet of natural philosophy.

23.—Corporal punishment, and confinement after school hours; no instructions have been given to me.

24.—They were examined last Christmas when prizes were distributed, consisting of books.

25.—Since I have been master the school has never been officially visited or inspected. The school is progressing as favorably as I could wish, but there are a great number of Protestant children who are either sent to the Roman Catholic school, or allowed to run the street.

26.—Charles Paul.

27.—

28.—Greenwich, Kent.

29.—27 years.

30.—July, 1858.

31.—Trained.

32.—St. James' Model School, Sydney; six months.

33.—Carpenter.

34.—£78 15s.

35.—School fees, £86 18s. 6d.

36.—Annual income, £165 13s. 6d. for the year ending July, 1859.

37.—Religious instruction is given every morning by the master from either the Old or New Testament; visited by the Rev. T. Kemmis, Church of England; the Holy Bible, Church of England catechism.

BALMAIN.—(MIXED.)

- 1.—Balmain.
- 2.—Stone; good; has been lately enlarged.
- 3.—1,200.
- 4.—About 4,000 feet.
- 5.—Brick; good, but need cleansing.
- 6.—Superficial feet, above 1,200; cubic feet, above 18,000; there is but one room.
- 7.—95 during the first three-quarters of the year 1859.
- 8.—Windows which open, and ventilators.
- 9.—Boys, 85; girls, 40 = 125 during the first three-quarters of the year 1859.
- 10.—13 and 4.
- 11.—Five of boys, and five of girls.
- 12.—5 hours of attendance; from 9 to 12 a.m., and from 2 to 4 p.m.
- 13.—Saturday in each week; at Christmas, 14 days; at Midwinter, 14 days.
- 14.—233.
- 15.—
- 16.—I have no means of ascertaining.
- 17.—From 6d. to 1s. per week; no charge for books.
- 18.—Unknown, the master was changed at the beginning of the year 1859. In payment of master, Government salary, £87 10s.
- 19.—I am not in possession of sufficient information to enable me to answer this correctly.
- 20.—Grammar, geography, arithmetic, history, biography, chronology, reading, writing, and religious instruction, half an hour each day.

- 37.—Instruction in Bible history, and the principles of religion, almost every day, by the master; twice a week by the clergyman; and occasionally by a member of the Local Board.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

CHURCH OF ENGLAND SCHOOLS.
(PARISH OF ST. LAWRENCE, SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 28 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of Members of the United Church of England and Ireland, and other Residents, in and connected with the Parish of St. Lawrence, Sydney, New South Wales,—

HUMBLY SHEWETH :—

That your Petitioners are deeply interested in the cause of general Education.

That in the Parish of St. Lawrence, with which your Petitioners are connected, there are flourishing Church of England Schools, in which more than 300 children are under daily instruction.

That your Petitioners are most anxious to see these Schools made as efficient as possible; that to this end more spacious and commodious buildings for the primary schools and additional teachers are required.

That your Petitioners have already raised from private sources, and are prepared to expend, upwards of twelve hundred pounds for the erection of new buildings, and have for some time paid, also from private sources, fifty pounds a year towards the salary of an Assistant Master, besides providing for expenses of repairs and improvements of the existing School Buildings.

That your Petitioners are unable to obtain aid, either for building purposes, or for additional Teachers, from the Denominational School Board, whose funds are inadequate to the claims upon them.

That your Petitioners, finding it impossible to do more towards the improvement of the said schools from private sources, and at the same time desiring to see them raised to full efficiency, subject to rigid Government inspection, pray your Honorable House to sanction such a distribution of the funds set apart for Educational purposes as may allow an adequate and equitable measure of aid being granted for the support and improvement of the said Schools.

And your Petitioners will ever pray.

Legislative Assembly.

NEW SOUTH WALES.

SPECIAL ROMAN CATHOLIC EDUCATION.

(PETITION FROM WEST MAITLAND.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholics of the District of West Maitland,—

HUMBLY SHEWETH:—

That your Petitioners respectfully address your Honorable House upon the present partial and restrictive mode of distributing the funds allotted for public education, and they trust that their appeal will be interpreted as an indication of their zeal for the welfare of the community, of which the Roman Catholics form so considerable and influential a portion.

That your Petitioners, whilst impressed with a deep sense of the importance of education, and a sincere desire to impart it to their children, are unable on conscientious and insuperable grounds to avail themselves of the presumed benefits of the National Schools.

That your Petitioners' objection to these schools arises from the lauded and prescribed absence of that doctrinal and symbolical teaching which Roman Catholic children can only receive in schools conducted by approved Roman Catholic teachers, and on principles strictly Catholic.

Your Petitioners firmly believe that the exclusion from the schools of all Catholic symbols and devotional habits is calculated to engender an indifference in the youthful mind towards religion, for which no worldly advantages could adequately compensate.

That your Petitioners, therefore, pray your Honorable House to take the foregoing premises into favorable consideration, and appropriate from the sum proposed to be assigned to the National Schools such a share thereof as the Roman Catholics of the Colony are entitled to, and thus enable them without a sacrifice of principle to impart such an education to their children as will prepare them to compete with their fellow citizens upon the battle-field of life, and shew forth in their conduct the benign and salutary influence of learning and science when guided and sustained by religion.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 528 Signatures.]

Sydney: Thomas Richards, Government Printer.—1860.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

SPECIAL ROMAN CATHOLIC EDUCATION.

(PETITION FROM RAYMOND TERRACE AND NEWCASTLE.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Roman Catholics, resident in the Districts of Raymond Terrace and Newcastle,—

HUMBLY SHEWETH:—

1. That your Petitioners have learned, with profound regret and apprehension, that a Bill has been introduced to your Honorable House, having for its object the discontinuance of the Denominational System of Education as at present supported by the State, and the establishment in its stead of what is known as the "National System."

2. That your Petitioners cannot accept any system of public education that fails to provide for the effectual religious instruction of their children in the public schools, as the National System notoriously does.

Your Petitioners, being fully persuaded that the great aim of all practical primary education should be to develop the religious instincts of the children and to discipline their youthful hearts to virtue and righteousness, at the same time that their intellects are cultivated and trained to reason, would respectfully urge it upon the consideration of your Honorable Body that the Denominational System alone, if effectively organised, is capable of accomplishing those desirable objects.

3. That whilst your Petitioners are as willing as any of their fellow colonists to yield any matters purely indifferent or practically separate, they are in duty bound to state that in this most important affair of education the abandoning of their own integral system would be a bartering of religious duty and privilege, for which no secular advantages could be an adequate compensation.

Your Petitioners would beg to further add that they are firmly convinced that Roman Catholic children cannot be properly educated except in Roman Catholic schools and amidst the symbols and practices of Catholic devotion.

4. That your Petitioners would most respectfully assure your Honorable House that their objections to the so-called National Schools are not such as might be removed by modifications in matters of detail. Their objections are urged against the vital defects of the system, which have been so often prominently brought before the general public by both writers and speakers, and which, in the opinion of your Petitioners, have been incontrovertibly proved to exist, and whose injurious tendencies they are bound to deprecate, but especially against that fundamental principle of indifference with respect to denominational religious teaching and practice that eminently but unhappily characterises those schools; and they are, therefore, insuperable.

5.

5. That your Petitioners, not being able to participate in the presumed benefits of the so-called National Schools, as other denominations may, are in fact suffering an injustice to the extent of their rateable share of the funds allocated to these schools from the common purse.

6. That your Petitioners, therefore, pray your Honorable House to redress this injustice by causing the sum appropriated to the Roman Catholic schools to be set apart, in the ratio of the Roman Catholic to the whole population, from the gross amount expended upon public education, before deduction of the sum allocated to the said National Schools.

7. That your Petitioners, finally, earnestly entreat your Honorable House to reject any measure having for its object the repeal of the present Denominational System of Education, until an efficient system of education, in which religious instruction holds a prominent place, shall have been determined upon by the Legislature.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

[Here follow 200 Signatures.]

1859-60.

Legislative Assembly.
NEW SOUTH WALES.

SPECIAL ROMAN CATHOLIC EDUCATION.
(PETITION FROM ARMIDALE.)

Ordered by the Legislative Assembly to be Printed, 25 January, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholics of Armidale, New England,—

HUMBLY SHEWETH:—

1. That the Roman Catholics of the Colony cannot avail themselves of the National Schools.
2. That their objection to those schools is not one which might be removed by any modification in matter of detail, but that it is against the fundamental principle of indifference in respect of denominational religious teaching and practice, and is therefore insufferable.
3. That your Petitioners are firmly convinced that Roman Catholic children cannot be properly educated except in Roman Catholic schools, taught by Roman Catholics, and amidst the symbols and practices of Roman Catholic devotion.
4. That the practically compulsory forbearance from Catholic devotional habits and destitution of Catholic symbols imposed on Catholic children in the National Schools, although, in theoretical statement, they may be represented as simply negative, are, in reality, a most subtle and positive persecution.
5. That Catholics are as willing as any of their fellow Australians to yield any matters purely indifferent, or even practically separate, for the sake of mutual accommodation and comprehension; but that, in this most important affair of education, the abandoning of their own integral system would be a barter of religious duty and privilege, for which no secular advantages could be an adequate compensation.
6. That your Petitioners, therefore, not being able to participate, as other denominations may, in the presumed benefits of the National Schools, are, in fact, suffering an injustice to the extent of their rateable share in the sum devoted out of the common purse to the so-called National Education System.
7. That your Petitioners therefore pray your Honorable House to redress this injustice by causing the sum appropriated for Roman Catholic Schools to be set apart, in the ratio of the Roman Catholic to the whole population, from the gross amount expended on public education before deduction of the sum assigned to the said National Schools.

Legislative Assembly.

NEW SOUTH WALES.

SPECIAL ROMAN CATHOLIC EDUCATION.

(PETITION FROM BERRIMA, SUTTON FOREST, AND MITTAGONG.)

Ordered by the Legislative Assembly to be Printed, 2 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholic Inhabitants of Berrima, Sutton Forest, and Mittagong,—

HUMBLY SHEWETH:—

1st. That the Roman Catholics of this Colony cannot avail themselves of the National Schools.

2nd. That their objection to these schools is not one which might be removed by any modification in matters of detail, but that it lies against the fundamental principle of indifference in respect of denominational religious teaching and practice, and is therefore insuperable.

3rd. That your Petitioners are firmly convinced that Roman Catholic children cannot be properly educated except in Roman Catholic schools, taught by Roman Catholics, and amidst the symbols and practice of Roman Catholic devotion.

4th. That the practically compulsory forbearance from Catholic devotional habits and destitution of Catholic symbols imposed on Catholic children in National Schools, although in theoretical statement they may be represented as simply negative, are, in reality, a most positive and subtle persecution.

5th. That Catholics are as willing as any of their fellow Australians to yield any matter purely indifferent, or even practically separate, for the sake of mutual accommodation; but that, in this most important affair of education, the abandoning of their own integral system would be a barter of religious duty and privilege, for which no secular advantage could be an adequate compensation.

6th. That your Petitioners, therefore, not being able to participate, as other denominations may, in the presumed benefits of the National Schools, are, in fact, suffering an injustice to the amount of their rateable share in the sum devoted out of the common purse to the so-called National Education System.

7th. That your Petitioners therefore pray your Honorable House to redress this injustice by causing the sum appropriated for Roman Catholic Schools to be set apart, in the ratio of the Roman Catholics to the whole population, from the gross amount expended on public education before deduction of the sum assigned to the said National Schools.

8th. That to give practical effect to the claims herein set forth by your Petitioners, it is necessary that the Roman Catholic Schools be vested in Roman Catholic Trustees.

And your Petitioners will ever pray, &c.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

SPECIAL ROMAN CATHOLIC EDUCATION.
(PETITION FROM BRAIDWOOD.)

Ordered by the Legislative Assembly to be Printed, 13 April, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholics of the District of Braidwood,—

HUMBLY SHEWETH:—

That your Petitioners, expecting the Education question to be shortly settled, beg respectfully to impress upon your Honorable House that, upon firm conviction, they cannot accept the National System under any modification.

That your Petitioners are firmly convinced that Roman Catholic children cannot be properly educated unless they be taught by teachers of their own denomination, and be trained to devotional habits by the use of religious books and symbols; at the same time, that they receive a safe secular education.

That your Petitioners, not being able as other denominations may to avail themselves of the National System, are thereby suffering an injustice, to the extent of their rateable share, in being taxed for schools in which they cannot participate; and this is more grievously felt by the fact, that had Roman Catholics a fair proportion of the sums voted for educational purposes, they might now have many more schools in this district, among which would be those of Lower Araluen and Major's Creek, where they have gone to considerable expense in erecting suitable buildings for Roman Catholic Schools.

That your Petitioners, therefore, pray your Honorable House may be pleased to redress this injustice, by causing the sum appropriated for Roman Catholic Schools to be set apart, in the ratio of Roman Catholics to the whole population, from the gross amount voted for Public Education, before deduction of the sum assigned to the said National Schools.

That your Petitioners humbly beg your Honorable House to take the premises into your favorable consideration.

And your Petitioners will ever pray.

—
Legislative Assembly.
NEW SOUTH WALES.

—
SPECIAL ROMAN CATHOLIC EDUCATION.
 (PETITION FROM ALBURY IN FAVOR OF.)

—
Ordered by the Legislative Assembly to be Printed, 10 April, 1860.
 —

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of the District of Albury,—

HUMBLY SHEWETH :—

That Petitioners look upon the allotment of a large annual sum to the National Education System, in which Catholics can have no share, as an act of injustice to said Catholics.

Petitioners wish to convince Honorable Members that neither the National System of Education nor any modification thereof can satisfy the Catholics of this important district.

Furthermore, the Catholics here, in general, consider it unreasonable to have taxes imposed on them by the State, unless the said State would vote an adequate sum of money for a system of education approved of by the Archbishop of Sydney and the Catholic Clergy of the Colony.

That your Honorable House would, in a special manner, have all the Catholic Schools of the Colony vested in Catholic Trustees, as a strict right due to them.

Petitioners trust, therefore, that your Honorable and Learned Assembly will take the Draft of this Petition into kind consideration.

And Petitioners will, as in duty bound, ever pray.

NEW SOUTH WALES.

PUBLIC EDUCATION BILL.

(PETITION OF THE HON. JAMES MACARTHUR AND SIR WILLIAM MACARTHUR.)

Ordered by the Legislative Assembly to be Printed, 7 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the undersigned,—

SHEWETH:—

That, believing the National, or Lord Stanley's System of Education, to be especially adapted to the circumstances and wants of this Colony, your Petitioners (besides pecuniary and other contributions) made over to the Commissioners of National Education, incorporated under the Acts of the Colonial Legislature, 11th Victoria, No. 48, and 16th Victoria, No. 16, one acre of land in the Town of Camden, and about three acres at Westbrook, in the District of Camden, as sites for School-houses, and the appurtenances thereto; the said land, without the buildings, being worth between five and six hundred pounds.

That your Petitioners perceive that a Bill is now before your Honorable House, intituled, "A Bill to promote Public Education," by which it is proposed to dissolve the Board of National Education, and to vest all lands and other property held by that Board in the Executive Council for the time being, which your Petitioners fear would subject the course of Public Education to sectarian and other influences, varying according to the changes and fluctuations of party politics, and preventing the steady and consistent working of any system whatever.

That the abovementioned lands having been made over in fee to the National Board, to be applied to the carrying out of Lord Stanley's System of National Education, cannot, as your Petitioners submit, be withheld from that object, or applied in promotion of any other, without the infringement of vested rights, if not the direct violation of a trust.

Your Petitioners pray, therefore, that your Honorable House will cause such provisions to be inserted in "the Bill to promote Public Education," as shall effectually prevent any such infringement or violation, and secure the National System of Education from the injurious operation of political or sectarian influences.

And your Petitioners will ever pray.

JAMES MACARTHUR.

NEW SOUTH WALES.

PUBLIC EDUCATION BILL.

(PETITION FROM RAYMOND TERRACE.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of the Colony of New South Wales, assembled.

The Petition of the undersigned Landed Proprietors, Residents, and Others, in
the District of Raymond Terrace,—

HUMBLY SHEWETH :—

That your Petitioners see that liberal provision has been made by the State for the higher branches of Education, in grants and endowments to the University and Affiliated Colleges of the Colony, they therefore pray that in any system of Public Education about to be introduced to your Honorable House, Industrial Institutions, as well as a Reformatory Institutions for Juvenile Offenders, may form a part of the said system of Education, so as to provide, on the one hand, for a large number of neglected and destitute children—affording them such a method of Education as may enable them to support themselves at trades and occupations as they grow up into life ; and on the other hand providing for youthful delinquents a place of security, where they may be disciplined and trained so as to correct their evil habits, and so be restored to society ; saving them thereby from the contamination of prisons and associations which must render them dangerous members of society.

And, as in duty bound, your Petitioners will ever pray.

NEW SOUTH WALES.

PUBLIC EDUCATION BILL.

(PETITION FROM WOLLOMBI.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Inhabitants of the Electorate of Wollombi,—

SH EWETH :—

That your Petitioners most emphatically, but respectfully, object to the Public Education Bill now before your Honorable House, as we believe its substitution in place of the existing system of public teaching will be fraught with many and serious disadvantages to the progress of education.

That we feel assured the proposed system of education will, if placed on trial, be found faulty in the extreme, as its management in such case will be placed on an uncertain basis, subject to change at the caprice of every succeeding Ministry.

That we are constrained to regard the intended perversion of the National School property from its present use and purpose, if carried into effect, to be a direct violation of public faith, inasmuch as your Petitioners, confiding in official promises, have contributed one-third of the sum expended on the erection of the school and its fittings belonging to that establishment in this district.

That from our experience of the salutary effect produced by the means of the existing system of teaching, we cannot but view any innovation or change in their present management otherwise than with feelings of unfeigned apprehension.

That your Petitioners entreat your Honorable House to take the foregoing particulars under serious regard, and not allow, therefore, the Educational Bill now under your consideration to pass into law.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 65 Signatures.]

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both manual and automated processes, as well as the use of specialized software tools. The goal is to ensure that the data is both reliable and easy to interpret.

The third part of the document provides a detailed breakdown of the results. It shows that there is a clear trend in the data, which is consistent with the initial hypothesis. The author also discusses the limitations of the study and suggests areas for future research.

Finally, the document concludes with a summary of the key findings and a list of references. The author expresses their appreciation for the support and assistance provided by the research team and funding agencies.

NEW SOUTH WALES.

PUBLIC EDUCATION BILL.

(PETITION FROM KIAMA.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the inhabitants of Kiama, in the said Colony, passed at a Public Meeting on the eleventh day of October instant,—

SHEWETH :—

That your Petitioners believe that the measure proposed by Government for the Education of the Country will not only continue but vastly increase the evils of the present Denominational System.

That it is the opinion of your Petitioners that the State should support but one System of Education, such system being carried out through management responsible to the Country, and under efficient inspection.

That your Petitioners feel convinced that the present National System in its general aspects is the best adapted for the state of the population of this Country.

Your Petitioners, therefore, humbly pray your Honorable House not to carry the proposed Bill into effect, but to let the present National System of Education remain with such amendments as your Honorable House might in its wisdom provide.

And your Petitioners will ever pray, &c.

Signed, for and on behalf of the said Meeting,

11 October, 1859.

JAMES COLLEY,
Mayor of Kiama, Chairman.

PUBLIC EDUCATION BILL.

(CERTAIN INHABITANTS OF BALMAIN.)

Ordered by the Legislative Assembly to be Printed, 29 November, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned inhabitants of Balmain,—

SH EWETH :—

That your Petitioners regard the existing arrangements for the promotion of Primary Education in this colony as very unsatisfactory.

That the Bill which has been introduced into your Honorable House by the Government, for the advancement of Public Education, is, in the opinion of your Petitioners, well calculated to effect this object, and is especially worthy of support, inasmuch as it secures direct responsibility to Parliament in the administration of the public funds.

Your Petitioners therefore pray that your Honorable House will be pleased to assent to this measure, and thereby confer a great boon upon the community.

And your Petitioners, as in duty bound, will ever pray.

Legislative Assembly.
NEW SOUTH WALES.

PUBLIC EDUCATION BILL.

(PETITION OF ROMAN CATHOLIC ARCHBISHOP, CLERGY, AND LAITY OF SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 29 November, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Roman Catholic Archbishop, Clergy, and Laity of the City of Sydney,—

SHEWETH :—

That the Education Bill which is now before the House is to them an object of alarm and aversion, because of its indefiniteness and its proposal to intrust so important and sacred a matter, as is that of Public Education, to a fluctuating body.

That, whilst your Petitioners have no wish to indulge any doubt as to the sincere impartiality of intention that may have guided the promoters of the said Bill, nor to deny the salutary operation of the Privy Council System as it is actually administered in England, they cannot but be sensible of the very wide difference which exists between the relative position of political, and more especially of religious bodies, as they are found in England, and the position which, by force of circumstances as well as by constitutional enactment, they reciprocally occupy in this colony.

Your Petitioners, therefore, in view of this very different condition of things relative to Public Education, as they exist in England and as they exist in this country, desire most of all, that whatever sum may be set apart for Public Education should be divided ratably according to population, amongst the several Denominations that are now found here.

And then, for themselves, your Petitioners, the Catholics, would undertake that their teachers shall, upon examination, be found to have communicated the degree of secular instruction which the Government may require, if the pecuniary inducements offered to teachers be generally considered adequate to attract the talent necessary for such standard of teaching.

But if this division of funds be not deemed practicable, your Petitioners still entreat that no Bill may be passed which shall not secure perfect freedom with respect to religious training, the only sound basis of any education; and, as a necessary condition of this freedom, the right of all heads of Denominations, or of their Courts, to present for Government sanction all candidates for appointments as teachers of their schools; to dismiss, after trial by themselves or their Courts, all such teachers, their capacity for secular instruction notwithstanding; and, further, to present for appointment their Denominational Inspectors.

In its present state, then, your Petitioners beg that the said Bill may not pass.

And they will ever pray, &c.

[Here follow 2,266 Signatures.]

Legislative Assembly.

NEW SOUTH WALES.

PUBLIC EDUCATION.

(PETITION OF TEACHERS.)

Ordered by the Legislative Assembly to be Printed, 6 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Teachers of Public Schools in the said Colony,—

HUMBLY SHEWETH :—

That, whereas a Bill to promote Public Education has been introduced into Parliament by the Honorable the Colonial Secretary, your Petitioners would beg respectfully to submit for the consideration of your Honorable House the following matters affecting them as Public Instructors :—

1st. That, as by the principles of the Privy Council scheme the Teacher is not regarded as a public servant, but is chiefly responsible to the local authorities of the School, your Petitioners therefore pray that all Public Teachers may be held directly responsible to the Board of Public Education for the efficient discharge of their duties.

2nd. That, whereas the Executive Council is liable to frequent change arising out of political circumstances, and cannot, therefore, be regarded as the most suitable body to administer the Educational affairs of the Colony, your Petitioners pray that the interests of Education may be intrusted to a Board of a more permanent character.

3rd. That your Petitioners regret to find that although the proposed Board of Public Education and their Inspectors are very properly prohibited, by the third Clause of this Bill, from interfering with any religious instruction which may be given in Public Schools, yet the position of the Teacher in this, and indeed in every other respect, is wholly undefined ; your Petitioners therefore pray that the position and duties of Teachers in the public service may be specifically defined.

4th. That your Petitioners, recognizing the great importance of securing efficient inspection of Schools, therefore pray that your Honorable House will affirm the principle that it is expedient and just that no persons should be appointed to the office of Inspector, but such as have acquired practical experience in conducting Primary Schools,

Your Petitioners therefore pray that in the settlement of this important question your Honorable House will be pleased favorably to consider the various points herein set forth.

And your Petitioners, as in duty bound, will ever pray, &c.

1 October, 1859.

1859.

Legislative Assembly.

NEW SOUTH WALES.

NATIONAL SYSTEM OF EDUCATION.

(PETITION FOR ITS CONTINUANCE.)

Ordered by the Legislative Assembly to be Printed, 14 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned,—

SH EWETH :—

That your Petitioners are of opinion that the National System of Education, as administered by the Board, incorporated under the Acts of Council, 11 Victoria, No. 48, and 16 Victoria, No. 16, is the best suited to the social state and requirements of this Colony :—

- 1st. Because, without infringing civil or religious equality, it teaches, in a simple and practical mode, the great principles and moral truths of Christianity.
- 2nd. Because it imparts sound elementary knowledge on those subjects which belong to a comprehensive system of popular instruction, and are requisite for the ordinary business of life.
- 3rd. Because, by uniting in one School children of various Religious Denominations, instead of dividing them into separate Schools, it provides for the better remuneration of the Teacher, and is, therefore, the most economical and efficacious.
- 4th. Because by such union at School Christian charity and neighborly feeling are encouraged, and children grow up in that kindly spirit towards each other which becomes fellow citizens, although holding diverse religious opinions.

On the foregoing grounds your Petitioners are strongly impressed with the superior advantages of the National System, and desire to see it generally adopted, not, however, by means of undue influence or interference with the opinions, or even prejudices of others, but as the legitimate result of sound principles, untrammelled in their operation by unwise legislation.

Your Petitioners respectfully submit that, although obvious advantage would arise from entrusting the administrative duties of the Government, in reference to Education, to a single Board, or Department, that Department ought to be free from the influences and vicissitudes of general politics; and that the Minister at its head should not be subject to displacement, except by the express vote of both Houses of Parliament. On these points the provisions of the Education Bill, now before your Honorable House, appear to your Petitioners to be open to grave objection, and in their operation, it is feared, would be found most prejudicial to the advancement of Education,—subjecting it to fluctuating or antagonistic action, and to influences from which it ought to be scrupulously guarded.

Your Petitioners further submit that the clause of that Bill for dissolving the National Board, and transferring the land and other property now vested in that Board—as

well as its administration, functions, and patronage—to the Executive Council for the time being, appears to them impolitic, and to trench upon principles which it should be the object of sound legislation rigidly to uphold.

Your Petitioners rely on the right feeling, and practical intelligence of your Honorable House for the settlement of the important question of Public Education, in a manner to elevate the Educational Institutions of this Colony, and to render them as widely beneficial as the sparse population and circumstances of the Country will allow.

In conclusion, your Petitioners earnestly pray your Honorable House to maintain the National System unimpaired as the best system of popular Education that has been devised for this Colony; securing it against open aggression, or the yet greater danger of concealed but systematic encroachment.

And your Petitioners will ever pray, &c.

[Here follow 12 Signatures.]

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

PUBLIC EDUCATION.

(PROMOTION OF, BY MEANS OF DUTIES ON TEA AND SUGAR.)

Ordered by the Legislative Assembly to be Printed, 27 January, 1860.

To the Honorable Legislative Assembly, New South Wales.

The Petition of the undersigned Female Inhabitants of New South Wales, residing at Sydney,—

HUMBLY SHEWETH :—

1. That your Petitioners are made acquainted, by recent public discussions, with the lamentable fact that thousands of their fellow colonists of both sexes are in a state of deplorable ignorance ; and it appears to them that, unless urgent and prompt measures are taken to provide more extended means of education for the rising generation than is now afforded by the Colony, the fearful amount of ignorance which already exists will be largely increased.

2. That your Petitioners are aware it is unusual for females to interfere in any matters at all partaking of a political character, but satisfied as they are of the great advantages which would accrue to the Colony if all its inhabitants were properly educated, and knowing that the want of education is the cause of most of the crime and intemperance, and consequent misery, to which so many of the less fortunate of their sex are the unhappy victims, they (your Petitioners) feel themselves not only justified, but that they would be guilty of great want of sympathy if they failed, in urging upon your Honorable House the great necessity which exists for taking active measures to secure, as far as it may be possible, the efficient training of every child in the community.

3. That, to bring about so great a blessing as that which would be conferred upon the Colony by universal education, it will, in the opinion of your Petitioners, amongst other steps, be absolutely necessary to abolish all fees in the elementary schools, as they feel assured—many of them by practical experience and observation—that this first main step must be taken in order to meet the cases of poor or indifferent parents.

4. That your Petitioners believe that the proposal, which has recently been made, to raise a large educational fund by retaining for that purpose the tea and sugar duties would be a most appropriate and admirable method, as, by means of a fund so raised, to which all would contribute, the poorest equally with the richest parents would be placed in a position to get their children educated in the public schools, without entertaining any sense of dependence or the slightest feeling that they were receiving pauper instruction.

5. That your Petitioners further believe, that if the above duties were exclusively devoted to defray the cost of public education, they would be cheerfully paid by all classes of the community.

6. That your Petitioners, aware of the defective condition of female education in this Colony, desire to impress upon your Honorable House the extreme desirability of providing in any scheme of general education for a more extended course of instruction for females, than that usually given in primary schools ; and therefore pray that, wherever Grammar Schools may be hereafter established, institutions of a corresponding description may be founded for the better education of females.

7. Your Petitioners therefore pray your Honorable House to take the premises into your earnest consideration, and to adopt such measures with reference thereto as shall tend to the advancement of the intellectual, moral, and religious welfare of the Colony.

And your Petitioners, as in duty bound, will ever pray.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

PUBLIC EDUCATION.

(PROMOTION OF, BY MEANS OF DUTIES ON TEA AND SUGAR.)

Ordered by the Legislative Assembly to be Printed, 27 January, 1860.

To the Honorable the Legislative Assembly, New South Wales.

The Petition of the undersigned Judges, Professors of the University, Clergymen,
Professional men, Bankers, Merchants, and other Citizens of Sydney, &c.,—

HUMBLY SHEWETH :—

1. That your Petitioners are deeply impressed with the importance of the education of the children of the Colony, and are earnestly desirous of seeing it so extended and improved as to bring within its action the 17,582 educable boys, and the 16,532 ditto girls, which the last Census shews are growing up in total ignorance.

2. That your Petitioners, believing the happiness and social prosperity of every country to be dependent on the educational state of its inhabitants, are of opinion that it is the imperative duty of this community to take such measures as may be found necessary to secure the moral and intellectual training of each one of its members.

3. That your Petitioners entertain a strong conviction that whatever may be decided upon as the system or systems of instruction, or mode of distribution of educational funds, large means will be required to place the Government in a position to offer education to every child in the Colony.

4. That, before the community can hope to secure for itself the blessings of universal education, your Petitioners consider that it will be essential that means be provided—for extending the benefit of Primary Schools, in which no fees are charged, to all parts of the Colony; for Industrial Schools in convenient localities; for a large number of additional teachers, as well as for increasing the stipends of some of the present school-masters; for additional inspectors of schools in order to secure proper supervision. And your Petitioners believe it will be very desirable that means be provided:—1. For one or more Normal Colleges to secure the proper education and framing of the teachers. 2. For the adoption of a prize system; and especially for the institution of scholarships, in order to open the University Colleges and Grammar Schools to the most promising of the pupils of the lower schools. 3. For a Nautical and a Reformatory School. 4. For aiding Mechanics' Institutes and establishing Free Libraries, as well as for carrying out any other object in connection with education your Honorable House in its wisdom may see fit.

5. That, from recent proceedings, your Petitioners are aware that the tea and sugar duties will shortly cease to be sources of the general revenue; but they believe your Honorable House would be best consulting the interests of the poorer classes, as well as of society generally, by providing that the Government should continue to collect those duties, but should set them apart as a distinct fund for the promotion of public education.

6. That whatever differences of opinion your Petitioners may hold as to whether the duties are or are not felt by the community, they are all agreed that the advantages from a fund so raised would weigh down all objections.

7. That by such an appropriation of these duties the general revenue might be relieved from the burden of educational grants, and means provided to carry out most of the measures before alluded to.

8. That your Petitioners are most anxious to draw the attention of your Honorable House to the following very great advantages which would result from the raising of a school fund in the manner proposed. That, as the parents themselves would be contributors, although perhaps to no greater extent than twopence for each member of his family, schools supported by such a fund would be divested of a pauper character. The poorest equally with the richest parent would, by virtue of the tea and sugar he consumed, be in a position to demand entrance into them for his children, not as an act of charity—not as a political concession—but as a right.

9. Your Petitioners wish further to observe, that a fund so supported will increase just in proportion to the population, and consequently in proportion to the probable educational requirements of the Colony; and that, although the total amount is large, it is collected at a trifling cost.

10. That large expenditure in the education of the people is consistent with the soundest principles of political economy, inasmuch as the records of nations shew that just in proportion as the people become enlightened so will crime, the concomitant of ignorance, disappear. Whatever is given to education is more than saved in police expenditure.

Your Petitioners therefore pray your Honorable House to take the premises into your earnest consideration, and to adopt such measures with reference thereto as shall tend to the advancement of the intellectual, moral, and religious welfare of the Colony.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

[Here follow 1,069 Signatures.]

Whatever is given to education is more than saved in police expenditure.

11. Your Petitioners, therefore, pray your Honorable House to take the premises into your earnest consideration, and to adopt such measures with reference thereto as shall tend to the advancement of the intellectual, moral, and religious welfare of the Colony.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 136 Signatures.]

1859.

NEW SOUTH WALES.

HEALTH OFFICER, SYDNEY.

(REPORT FOR 1858.)

Presented to both Houses of Parliament, by Command.

REPORT FROM THE HEALTH OFFICER OF PORT JACKSON FOR THE
YEAR 1858.

Sydney, 1 May, 1859.

SIR,

I have the honor to forward to you the following Returns:—

1. A nominal List of the Ships visited during the year 1858.
2. A nominal List of the Government Emigrant Ships which have arrived in the Colony during the same year.
3. A nominal List of Ships conveying German Immigrants to the Colony in 1858.
4. A nominal List of Ships bringing Chinese Immigrants during 1858.

These Returns shew the tonnage of ships carrying Immigrants; the ports from which they sailed; the number of days occupied in making the voyage; the number of births and deaths on the voyage; and the number of Immigrants, British and Foreign, which have arrived during the year.

5. A List of the Ships which have been placed in Quarantine,—shewing the ports from which they sailed; the number of deaths that occurred among the passengers of each ship during its detention in Quarantine; the duration of the Quarantine in each case, and the nature of the disease which occasioned it.

The number of vessels visited during the year was 432, and, with the exception of three, the sanitary state of all of them was good.

Of the five vessels placed in Quarantine, two of them were free from disease at the time of their arrival in Port; but as cases of small-pox had occurred on board of them during the voyage it was thought advisable to detain them in Spring Cove for observation, and that the clothing and bedding of the Immigrants and crew might be washed and cleaned. The other three were vessels conveying Government Immigrants, and were placed in Quarantine under the following circumstances, viz:—

Measles had prevailed on board the "Northern Light," during the whole of the voyage, and there were several cases on board on the day of her arrival.

The same disease was prevalent on board the "Forest Monarch," and she also brought some cases into Port.

As soon as these ships were brought to anchor in Spring Cove the sick were separated from the healthy, and put on board the Hospital Ship, and the other passengers were landed, and accommodated in the houses on shore.

The ships, with the healthy portion of the Immigrants, were released after ten days detention,—no new cases having occurred, and all the means of purification considered necessary having been completed. The sick from the “Northern Light” remained in Quarantine for 21 days, and those from the “Forest Monarch” for 38 days.

On the arrival of the “Admiral Lyons” there were four cases of fever on board, and although the disease was not of a contagious character, the sick, with several other of the Immigrants, who were in a delicate state of health, and not sufficiently strong to take employment, or to undertake a journey into the interior to join their friends, were landed at Spring Cove, there being no accommodation at the Depôt for the reception of such cases. The ship, with the healthy portion of the passengers, proceeded to Sydney after five days detention. This being a salted ship, there had been, as is usual in such vessels, a great deal of sickness during the voyage.

The German Immigration was limited to three vessels, bringing 739 passengers.

The health of the people on arrival was good, and, with the exception of one case of small-pox, which occurred on board the “Armin,” the sickness during the voyage was, in each case, of a very trifling character, and the rate of mortality low.

Although the passengers by these vessels were better provisioned, and suffered less from sickness than the German Immigrants which arrived in previous years, there is still much room for improvement in the arrangements under which German Immigration is conducted. The most striking defects on board these ships being want of space, deficiency of ventilation, and a total absence of any system for ensuring order and cleanliness among the passengers. In reference to the Chinese Immigrants it has been asserted that leprosy, and other loathsome skin diseases, are prevalent among them. Such is not the case on their arrival in Port Jackson; and no class of Immigrants suffer so little from sickness during the voyage, or present a more healthy and cleanly appearance on entering the Port.

Of the 11,827 Chinese who embarked at Hongkong, 31 only died during the voyage, and 10 of the deaths occurred among the people of the “Agamemnon.” The unusual rate of mortality on board of this ship being attributable to her long detention at Sourabaya, where the people became affected with acute dysentery. The causes of death were chronic dysentery, and *delirium tremens*, induced by want of the accustomed quantity of opium. The ships were well provisioned, and in most instances clean, and although the Act of Parliament regulating the Chinese Emigration from Hongkong does not provide for the effectual ventilation of the 'tween decks, and is in other respects faulty, it cannot be said that the ships were over-crowded, or that the health of the people suffered in any way from the effects of the voyage.

I have, &c.,

HAYNES GIBBES ALLEYNE, M.D.,

Health Officer, Port Jackson.

THE PRINCIPAL SECRETARY
TO THE GOVERNMENT.

1859.

NEW SOUTH WALES

VACCINATION.

(REPORT FROM MEDICAL ADVISER TO GOVERNMENT.)

Presented to both Houses of Parliament, by Command.

THE MEDICAL ADVISER TO THE GOVERNMENT to THE HONORABLE THE COLONIAL SECRETARY.

Parramatta, 19 April, 1859.

SIR,

I have the honor to forward, for the information of the Government, the Report of the Superintendent of the Vaccine Institution, Sydney, of the transactions of the year 1858, which has been delayed by that gentleman's illness.

2. In addition to the Report and Table of Vaccinations performed by himself, Dr. Rutter has drawn up a list of the numbers vaccinated by those to whom he has furnished supplies of lymph.

I have, &c.,

R. GREENUP,

Medical Adviser to the Government.

THE HONORABLE

THE COLONIAL SECRETARY.

*Vaccine Institution,
Sydney, April, 1859.*

SIR,

I do myself the honor to report, for the information of His Excellency the Governor General, my progress during the year 1858.

I regret to state that the excitement caused by the existence of small-pox in the Sister Colony was of a very temporary character, and that the past year has exhibited a return of the general apathy which has marked the preceding years.

The medical practitioners of this City have been extremely active, and judging from the constant demand for vaccine lymph, upwards of six hundred charges having been supplied by me, I infer that Vaccination has been more extensively practised than formerly, but there can be no doubt upon reference to the number of births that a vast number remains unvaccinated.

The demand from the Country for lymph was also very active, and medical practitioners having kindly furnished me with returns of the numbers vaccinated by them during the year, I am in a position to render a list of their names, and their respective returns.

The total number amounts to two thousand and ninety-two; these returns are independent of the annual returns sent to you by the Government Vaccinators, and afford a satisfactory proof that Vaccination is by no means neglected by gentlemen practising in the Country.

The number of individuals vaccinated at the Institution was six hundred and thirty-seven.

The usual supplies of vaccine lymph have been forwarded, upon requisition, to New Zealand, the Islands of the Pacific, &c.

I have, &c.,

JOHN YATES RUTTER,

Superintendent, Vaccine Institution.

DR. GREENUP,

Medical Adviser to the Government.

REPORT ON VACCINATION.

1859-60.

NEW SOUTH WALES.

VACCINATION.

(REPORT OF MEDICAL ADVISER FOR 1859.)

Presented to both Houses of Parliament, by Command.

MEDICAL ADVISER TO THE GOVERNMENT to COLONIAL SECRETARY.

Parramatta, 26 March, 1860.

SIR,

I do myself the honor to furnish, for the information of the Government, the general return of persons vaccinated at the different Government vaccine institutions—during the year 1859, distinguishing the age and sex; also, the report of the Superintendent of the Vaccine Institution in Sydney, with the return of the persons vaccinated in Sydney during the year 1859, distinguishing the age and sex; and also the different quarters of the year.

Three Enclosures:—
1.—General Return.
2.—Mr. Rutter's Report.
3.—Sydney Quarterly Returns.

2. The total number of vaccinations is 1,580; of which 1,520 were successful, 16 unsuccessful, and 44 unascertained.

3. I annex, in the margin, the number of persons vaccinated in each year since 1853 inclusive, shewing an annual average of less than 2,000.

1853.....	2,885
1854.....	1,842
1855.....	964
1856.....	1,523
1857.....	3,640
1858.....	1,174
1859.....	1,580

4. As the annual average of births is now over 12,000, the number of young children unprotected by vaccination is obvious.

7) 13,608

5. Unless some legislative enactment enforces vaccination, I know no better plan than the one indicated in my last year's report, which I need not here repeat—not utter Cassandra-like prophecies on the neglect of so easy and safe a precaution.

1,944—
annual average
for 7 years.

6. Notwithstanding the increase in the number of vaccinators the result is not above the usual average, and the remark from almost all is, that the public, especially the laboring class, is very apathetic.

7. With reference to the appointment of additional vaccinators, recommended in Mr. Rutter's report, I can see no objection to such increase; on the contrary, so long as only one vaccinator is appointed to one district, I think an increase desirable.

8. The reason for appointing only one in a district is, that the greater the number of vaccinations performed by any one individual the better they will be, almost necessarily; for he who vaccinates 500 will have ten times the number of cases to choose from which he has who only vaccinates fifty, and the difference of a few hours in the age of the vesicle from which lymph is taken will often make the difference of good and bad results.

9. The vaccinator at Windsor having reported that the applicants were too few to make it worth while to have a public vaccinator for that district, the institution was then closed and transferred to Yass in November; at the end of the year there had been no vaccinations there.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

R. GREENUP,
Medical Adviser to the Government.

REPORT ON VACCINATION.

R. GREENUP, M.D.,
Medical Adviser to the Government.

Parramatta, 20 March, 1860.

[Enclosure No. 2.]

Vaccine Institution,
27 February, 1860.

Sir,

I do myself the honor to transmit, for the information of His Excellency the Governor General, a Report of my proceedings during the year 1859.

I have again to notice the continuance of the same apathy shewn by the public to avail themselves of the benefits placed at their disposal by the Government, and by my daily attendance at the Institution in Macquarie-street and the Benevolent Asylum.

I am much indebted to the valuable assistance afforded by the Press, in its frequent allusion to the subject of Vaccination, and by pointing out the serious ravages which small pox has and is making, in the mother country and other parts of the world.

I regret to notice that my return of children vaccinated does not embrace the *laboring class*, but is chiefly composed of the *middle class*. My endeavors to obtain the attendance of the first-named class are fruitless—personal solicitations, by visits, &c., are treated with indifference.

The demand for vaccine lymph, by the medical men of this city and suburbs, continues active, as also from the country, New Zealand, the Islands—especially from the missionaries, who are zealous vaccinators, and whose assistance is more eagerly sought and gratefully appreciated by the natives of the Islands than by the lower classes of our cities.

I am frequently written to by medical men in the country, soliciting the appointment of district vaccinators; and I would respectfully suggest your attention, as to the propriety of asserting their wishes to the Government; as the benefits of vaccination cannot be too widely diffused, especially in such places as Albury, &c.

I have vaccinated, during the year, six hundred and eighty-three individuals, and have transmitted by post six hundred and thirty-three charges of lymph.

I have, &c.,

JOHN YATES RUTTER,
Superintendent, V. I.

R. Greenup, Esquire, M.D.,
Medical Adviser to the Government.

[Enclosure

1859.

NEW SOUTH WALES.

HEALTH OFFICER, MORETON BAY.

(REPORT FOR 1858.)

Presented to both Houses of Parliament, by Command.

THE GOVERNMENT RESIDENT, MORETON BAY, to THE HONORABLE THE COLONIAL
SECRETARY.

(No. 59-59.)

*Government Resident's Office,
Brisbane, 22 March, 1859.*

SIR,

In compliance with the request contained in your letter of the 15th ultimo, I do myself the honor to transmit the Annual Report of the Health Officer at Brisbane, for 1858.

2. Dr. Hobbs' absence on leave has caused some delay in obtaining the enclosed document.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.J. C. WICKHAM,
Government Resident.*Brisbane, 16 March, 1859.*

SIR,

I have the honor to enclose you my Annual Report, as Health Officer of Moreton Bay, for the year 1858.

The number of vessels arriving in this Port during the past year has been unusually small.

The condition of the Immigrants, both English and Foreign, has been remarkably good; it being scarcely possible to conceive a smaller amount of mortality than that shewn by this Report.

I have, &c.,

THE GOVERNMENT RESIDENT,
Brisbane.

W. HOBBS.

No. 1.

NOMINAL List of Ships visited by the Health Officer of Moreton Bay during the year 1858.

Legislative Assembly.

NEW SOUTH WALES.

LATE GOVERNMENT SURGEON AT GLADSTONE.

(CORRESPONDENCE IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 29 November, 1859.

RETURN to an *Address* from the Honorable the Legislative Assembly of New South Wales, to the Governor General, dated 27 September, 1859, praying that His Excellency would be pleased to cause to be laid upon the Table,—

“ All Correspondence which has taken place between the late
 “ Government Surgeon of Gladstone and the Government,
 “ relative to the payment of his salary, the appointment he
 “ held; and of any other correspondence which they have
 “ bearing upon the subject.”

(Mr. Walsh.)

SCHEDULE.

NO.		PAGE.
1.	Captain O'Connell, Commissioner of Crown Lands, recommending the removal of Dr. Robertson, the Resident Surgeon at Port Curtis, from his situation. 13 December, 1856	2
2.	Medical Adviser to the Government to the Colonial Secretary, submitting the Salary Abstracts for the salary of Dr. Robertson for approval in the absence of the Certificate of the Government Resident, whose office had been abolished. 14 January, 1857	2
3.	Under Secretary to Medical Adviser to the Government, in reply. 28 February, 1857	3
4.	Under Secretary to Auditor General, conveying authority for the payment of Dr. Robertson's salary. 7 March, 1857	3
5.	Dr. Robertson to Colonial Secretary, applying for continuance of salary and allowances, and for compensation for loss of office. 13 August, 1857	3
6.	Under Secretary to Captain O'Connell, apprising him of the discontinuance of the office of Resident Surgeon, and of the authority given for the issue of his salary. 21 August, 1857	4
7.	Under Secretary to Dr. Robertson, apprising him that his letter of 13th August, 1857, No. 5, has been referred for the report of Captain O'Connell. 5 September, 1857	4
8.	Under Secretary to Captain O'Connell, forwarding for his report a copy of Dr. Robertson's letter of 13th August, 1857, No. 5. 5 September, 1857	4
9.	Captain O'Connell to the Colonial Secretary, in reply. 25 November, 1857	5
10.	Under Secretary to Captain O'Connell, in continuation. 6 July, 1858	5
11.	Under Secretary to Dr. Robertson, in reply to his letter of 5th September, 1857. 17 July, 1858	5
12.	Captain O'Connell to the Colonial Secretary, submitting an account furnished by Dr. Robertson for medical attendance, &c., for the first seven months of 1857. 11 September, 1858	6
13.	Under Secretary to Captain O'Connell, in reply. 29 September, 1858	7
14.	Government Resident, Port Curtis, to the Colonial Secretary, further on the subject of the claim of Dr. Robertson. 26 March, 1859	7
15.	Under Secretary to Government Resident, in reply, and intimating that the Government will not object to entertain any moderate claim Dr. Robertson may submit. 31 May, 1859	8
16.	Dr. Robertson's Petition to the Governor General, soliciting payment of his salary for the first seven months of 1857. 16 August, 1859	8
17.	Under Secretary to Dr. Robertson, in reply. 8 September, 1859	9

LATE GOVERNMENT SURGEON AT GLADSTONE.

No. 1.

CAPTAIN O'CONNELL to COLONIAL SECRETARY.

Gladstone,
13 December, 1856.

SIR,

It is my unpleasant duty to report to you that I have had several times brought under my notice the constant inebriety of Dr. Robertson, the Resident Surgeon at Port Curtis.

2. I have twice had to place persons in observation over him, when suffering from *delirium tremens*; and on the day of the Government land sale of the 14th of last month, I had publicly to request him to withdraw from the room, owing to his drunken interference with persons desirous of examining the tracings of the allotments about to be put up.

3. Before I learnt the abolition of my office of Government Resident, I had, in consequence of some similar misconduct on Dr. Robertson's part, only refrained from taking immediate notice of it on his placing his resignation in my hands, and now, although not connected officially with Dr. Robertson, I deem it my duty to bring the subject under the notice of Government, as a sequence of my former responsibilities, and as the principal Government official at this place.

4. I may take this opportunity of mentioning that I believe the District of Port Curtis to be now capable of maintaining a Medical Practitioner from the resources of private practice, and I do not see why Government need any longer continue a Resident Surgeon for the small amount of duty he has to perform.

5. It would, perhaps, be but fair, that Government should contribute some portion towards the retaining fee, which the public will necessarily have to raise to induce an eligible Medical Practitioner to locate himself in Gladstone; and as there are duties, such as attendance on the Native Police, the Aborigines, and prisoners confined in the lock-up, which Government must provide for, it would be as well to allow—say £150 a-year for this purpose, to be given, however, only after a competent medical man had located himself and commenced practice.

6. I regret to be compelled to state (as far as Dr. Robertson is concerned—for when capable he was always zealous in the performance of his duties) that there is not the smallest prospect of his being of any utility to the settlement, and I think, both for his own sake and that of the public, his removal from hence is much to be desired.

I have, &c.,

M. C. O'CONNELL,

Commissioner of Crown Lands.

THE HONORABLE
THE COLONIAL SECRETARY.

No. 2.

MEDICAL ADVISER TO THE GOVERNMENT to COLONIAL SECRETARY.

Medical Adviser's Office,
Parramatta, 14 January, 1857.

SIR,

I do myself the honor to enclose the Pay Abstract of the Resident Surgeon of Port Curtis, with a note from him stating that Captain O'Connell has declined to sign it being no longer the Government Resident.

2.

2. As I know nothing of the circumstances beyond my belief that Mr. Robertson is still the Surgeon at Port Curtis, I have thought it better to sign the Pay Abstract, and to send it to you that it may be stopped if there be anything irregular.

I have, &c.,

R. GREENUP,

Medical Adviser to the Government.

THE HONORABLE
THE COLONIAL SECRETARY.

[Enclosure in No. 2.]

Gladstone, Port Curtis,
31 December, 1856.

Sir,

I have the honor to forward the enclosed Pay Abstracts for your signature, as head of the Medical Department, Captain O'Connell having declined doing so in consequence of his being no longer Government Resident. I would beg you to have the goodness, after signing them, to forward the same to the Auditor General.

I have, &c.,

A. C. ROBERTSON.

R. Greenup, Esq., M.D.,
Medical Adviser to the Government,
Parramatta.

No. 3.

UNDER SECRETARY to MEDICAL ADVISER TO THE GOVERNMENT.

Colonial Secretary's Office,
Sydney, 28 February, 1857.

SIR,

In acknowledging the receipt of your letter of the 14th instant, submitting the Pay Abstract of the Resident Surgeon of Port Curtis, which Captain O'Connell has not signed in consequence of his being no longer Government Resident,

I am directed to inform you that, under the circumstances, authority has been given to the Auditor General for payment of the amount, viz., £118 ls. 1d.

I have, &c.,

W. ELYARD.

THE MEDICAL ADVISER
TO THE GOVERNMENT.

No. 4.

UNDER SECRETARY to AUDITOR GENERAL.

Colonial Secretary's Office,
Sydney, 7 March, 1857.

SIR,

In transmitting to you the enclosed Pay Abstract of the Resident Surgeon of Port Curtis, which Captain O'Connell has declined to sign, I am directed to inform you that, under the circumstances of the office of Government Resident having been discontinued, payment of the salary due may be made on the certificate of Dr. Greenup.

2. The letter which accompanied your report on this claim is returned herewith.

I have, &c.,

W. ELYARD.

THE AUDITOR GENERAL.

No. 5.

DR. ROBERTSON to COLONIAL SECRETARY.

Gladstone, Port Curtis,
13 August, 1857.

SIR,

Having received an official communication from Dr. Greenup, Medical Adviser to the Government, informing me that no money had been voted in the Estimates for the appointment of Resident Surgeon, Port Curtis, which communication is dated July 8th, 1857, and received by me per brig "Burnett," 5th August, 1857, up to which time I have been doing the duties of Resident Surgeon,

I shall feel obliged by your placing my present application before His Excellency the Governor General and Executive Council, to my being allowed the allowances up to the date I received the intimation that no such appointment with allowances now exists, which I beg most respectfully to say I had not any official intimation of. I will also feel obliged by your requesting I may be allowed the usual three months' compensation for the loss of my appointment.

THE HONORABLE
THE COLONIAL SECRETARY.

I have, &c.,
A. C. ROBERTSON.

No. 6.

UNDER SECRETARY to CAPTAIN O'CONNELL.

*Colonial Secretary's Office,
Sydney, 21 August, 1857.*

SIR,

I am directed to inform you, that in consequence of the representation contained in your letter of the 13th of December last, the office of Resident Surgeon at Port Curtis has been discontinued. The pay of Dr. Robertson (who resigned that office) up to the 31st December, was authorised in March last to be issued on the certificate of the Medical Adviser, as the former reported to him that you had declined to sign them, as being no longer Government Resident.

CAPTAIN O'CONNELL, J. P.,
Port Curtis.

I have, &c.,
W. ELYARD.

No. 7.

UNDER SECRETARY to DR. ROBERTSON.

*Colonial Secretary's Office,
Sydney, 5 September, 1857.*

SIR,

I beg to inform you that it has been found necessary to refer to Captain O'Connell your letter of the 13th ultimo, respecting the continuance of salary to you as Resident Surgeon, Port Curtis, beyond the time to which it has been paid, and applying for compensation for the loss of the appointment.

2. When the required report shall have been received, and a decision given upon the case, a further communication will be made to you without delay.

A. C. ROBERTSON, ESQ.,
Gladstone, Port Curtis.

I have, &c.,
W. ELYARD.

No. 8.

UNDER SECRETARY to CAPTAIN O'CONNELL.

*Colonial Secretary's Office,
Sydney, 5 September, 1857.*

SIR,

With reference to your letter of the 13th December last, transmitting the resignation of the Resident Surgeon at Port Curtis, and to my communication of the 21st ^{13 August, 1857.} ultimo, No. 13, I am directed to forward the copy of a letter from Dr. Robertson applying for payment of his salary to be continued up to the 5th August, 1857, and to request that you will have the goodness to report on the subject of the duties performed by him.

CAPTAIN O'CONNELL, J. P.,
Port Curtis.

I have, &c.,
W. ELYARD.

No. 9.

No. 9.

CAPTAIN O'CONNELL to COLONIAL SECRETARY.

Gladstone,
25 November, 1857.

SIR,

I have the honor to acknowledge the receipt of your communication of the 5th September last, No. 15, which reached this on the 14th October, during my absence on duty at the Fitzroy, and, in reply, I beg to report in compliance with your desire,—

2. That Dr. Robertson has been in the performance of the duties of Resident Surgeon, as he states, up to the date of his receiving the notification he mentions from Dr. Greenup, that no salary had been voted in the Estimates of the current year for the appointment he held.

3. In my letter to the Honorable the Colonial Secretary of the 13th December, 1856, I did not transmit any resignation of Dr. Robertson's; I only brought under the notice of the Government certain irregularities in his conduct, which seemed to me to render his retention of his appointment undesirable, and I suggested, as I told him I should do, as the least painful mode of removing him, that the appointment of Resident Surgeon should cease altogether, and not appear in the Estimates of the ensuing year.

4. Owing to arrangements connected with the change of Government at that time, all appointments of 1856 were carried on without alteration for the first quarter of 1857, and I received no intimation of the intentions of the Government with reference to this matter until I got your communication of the 21st August, No. 13, on the 3rd October, by the overland mail, and since then the one I am now replying to.

5. It seems to me, therefore, Dr. Robertson is entitled to his salary up to the date of his receiving the official notification from Dr. Greenup of its discontinuance. He could not, and indeed was not, inclined to abdicate his duties,—I being no longer Government Resident had no power to deal with him of my own authority, and he continued to perform those duties, and I must say, in a much more satisfactory manner than he had previously done up to the 5th August last.

I have, &c.,

M. C. O'CONNELL, J.P.

THE HONORABLE

THE COLONIAL SECRETARY.

No. 10.

UNDER SECRETARY to CAPTAIN O'CONNELL.

Colonial Secretary's Office,
Sydney, 6 July, 1858.

SIR,

In reply to your letter of the 27th November last, stating that it appears to you that Dr. Robertson is entitled to salary, up to the date of his receiving notification of the discontinuance of the office of Resident Surgeon at Port Curtis, I am directed to inform you, that the Colonial Secretary having read your communication of the 13th December, 1856, must decline to ask the Parliament for salary for Dr. Robertson, during any portion of 1857.

I have, &c.,

W. ELYARD.

M. C. O'CONNELL, ESQ.,

COMMISSIONER OF CROWN LANDS,

Port Curtis.

No. 11.

UNDER SECRETARY to DR. ROBERTSON.

Colonial Secretary's Office,
Sydney, 17 July, 1858.

SIR,

Referring to my letter of the 5th September last, respecting your application to be allowed salary as Resident Surgeon, Port Curtis, beyond the 31st December, 1856, I am now directed to inform you, that a report on your claim has been received, but that
the

the Colonial Secretary having perused the communication made to the Government by Captain O'Connell, on the 13th December, 1856, of the circumstance under which your resignation was placed in that officer's hands, must decline to ask Parliament for salary for you, during any portion of 1857.

ARCHIBALD ROBERTSON, ESQ.,
Gladstone.

I have, &c.,
W. ELYARD.

No. 12.

CAPTAIN O'CONNELL to COLONIAL SECRETARY.

Gladstone,
11 September, 1858.

SIR,

I have the honor to enclose an account furnished by Dr. A. C. Robertson, lately Resident Surgeon to the Settlement of Port Curtis, for medical attendance on prisoners in the lock-up, and also on the various Government Departments in this place, during the first seven months of the year 1857.

2. It was during this period of time that Dr. Robertson was carrying on his duties under the impression that he still held the appointment of Resident Surgeon—the discontinuance of that office not having been notified to him.

3. It appears, however, that no salary was voted for a Resident Surgeon for Port Curtis, for the year 1857; and yet, from his carrying on the duties under his official appointment, there can be no doubt he is entitled to remuneration.

4. I beg therefore strongly to recommend that his claim be allowed.

THE HONORABLE
THE COLONIAL SECRETARY.

I have, &c.,
M. C. O'CONNELL, J. P.

[Enclosure in No. 12.]

A. 13.—No. 1.

No. of Abstract No. }
to Warrant No. of 185 . } Voucher No.

The Department of the GOVERNMENT RESIDENT, Port Curtis,

Dr. to DR. A. C. ROBERTSON, Gladstone.

For the undermentioned Services performed for the Department, viz. :—

8 August, 1857.—To Medical Attendance, from the 1st January to the
8th August, 1857, at the Lock-up and on the Govern-
ment Departments, including 275 visits £182 13 4

I certify that the Services charged in the above Account were satisfactorily performed, according to agreement, by the above-named individual. I further certify that they were necessarily required for the Public Service, and that the rates charged were the most reasonable for which the same could be procured at the time they were stipulated for.

M. C. O'CONNELL, J. P.

Received on the day of 185 , from the Sum of
Pounds Shillings and Pence, Sterling, in full payment of the above
Account, for which have signed Duplicate Receipts of the same Tenor and Date, pursuant
to Warrant of Government, No. , dated the day of 185 .

A. C. ROBERTSON.

Witness

N. B.—The number of visits are as stated by Dr. Robertson; no account having been kept, as it was presumed he was in receipt of a Government salary at the time.

UNDER SECRETARY to CAPTAIN O'CONNELL.

*Colonial Secretary's Office,
Sydney, 29 September, 1858.*

SIR,

I am directed to acknowledge the receipt of your letter of the 11th instant, forwarding and recommending the payment of an account from Dr. A. C. Robertson, late resident Surgeon to the Settlement of Port Curtis, for medical attendance on prisoners in the lock-up, and also at the various Government Departments at Gladstone, from 1st January to 8th August, 1857, amounting to £182 13s. 4d., and in reply, to inform you, that the Colonial Secretary is quite willing to propose a fair remuneration for any services which Dr. Robertson may have performed, but that, as that gentleman was dismissed for irregular conduct, in consequence of your letter of 13th December, 1856, he cannot be recommended for any higher rate than he would have received had he remained a Public Officer.

2. I am further directed to state that the charge per visit is high, and that Mr. Cowper cannot understand what Government Departments there are at Gladstone for Dr. Robertson to visit, who, it is also understood, lived in Government Quarters.

I have, &c.,

THE POLICE MAGISTRATE,
Gladstone.

W. ELYARD.

No. 14.

CAPTAIN O'CONNELL to COLONIAL SECRETARY.

*Gladstone,
26 March, 1859.*

SIR,

I have the honor again to address you with reference to previous correspondence on the subject of a claim made by Dr. A. C. Robertson, formerly Resident Surgeon at this place, for his pay and allowances during the first seven months of the year 1857, when he was, without any notice of the discontinuance of his appointment, in the performance of his duties here.

2. I have been unable to communicate with Dr. Robertson until lately, owing to his absence at the Canoona diggings, but he has now returned to Gladstone, and I have acquainted him with the decision of the Colonial Secretary, that the charge made in the accompanying voucher appears larger in amount than the sum the Colonial Secretary is disposed to submit to the vote of the Legislative Assembly, as a remuneration for Dr. Robertson's services; and I have, at Dr. Robertson's request, again to bring this matter before you for consideration.

3. The strong points in Dr. Robertson's favor seem to me to be these:—That he received no notification of dismissal; that after being regularly appointed he continued, without interference, in the performance of his duties up to the date to which he claims pay; and that under such appointment he was bound to remain here and could not absent himself without leave.

4. It appears to me these facts, if established, as doubtless they can be, would enable Dr. Robertson to obtain compensation for his services against any private individual with whom he had entered into a similar compact, and I think, even for this reason alone, the Government should admit his claim.

5. It is quite true I had great reason to be dissatisfied with his conduct towards the latter end of 1856, and had I the power at the time, should have suspended him, but as it was I was enabled only to report his misconduct, and no action was taken in the matter (so far as any notification to Dr. Robertson of the decision of the Government was concerned) until August, 1857, during all which time he was ostensibly, and in practice, the Resident Surgeon.

6. Dr. Robertson's salary was at the rate of £300 per annum (£200 fixed salary and £100 temporary increase) or £25 per month, that is—£181 9s. for seven months and eight days, the period for which he claims pay, but I believe he would be glad to get any amount Government may think fit to award him, being in great distress.

7. As there can be no doubt this complication of a continuance of services, for which no provision was made, arose from the frequent changes of the Government at the time, and also from the difficulties of communication with this place, causes over which no human power could exercise control, I would again very respectfully urge Dr. Robertson's claim upon the favorable consideration of the Government.

I have, &c.,

M. C. O'CONNELL,

Government Resident.

THE UNDER SECRETARY,
Sydney.

No. 15.

UNDER SECRETARY to CAPTAIN O'CONNELL.

Colonial Secretary's Office,

Sydney, 31 May, 1859.

SIR,

In acknowledging the receipt of your letter of the 26th March last, on the subject of the claims made by Dr. A. C. Robertson, formerly Resident Surgeon at Gladstone, for pay and allowances during the first seven months of the year 1857, I am directed to inform you, that the Government having considered the claim in question, as well as the grounds upon which it has been recommended by you, they are unable to recognize any right on the part of Dr. Robertson to receive the salary attached to his office subsequently to the period of its abolition.

But while on these grounds the claim cannot be admitted, if Dr. Robertson will submit one moderate in amount, and afford the particulars of the services rendered by him, the Government will not object to entertain it.

2. I am directed to request that you will have the goodness to apprise Dr. Robertson accordingly.

I have, &c.,

W. ELYARD.

THE GOVERNMENT RESIDENT,
Port Curtis.

No. 16.

To His Excellency SIR WILLIAM THOMAS DENISON, Governor General and Commander-in-Chief for the Australian Colonies.

The humble Memorial of the undersigned,—

Respectfully Sheweth,—

That your Memorialist was appointed Resident Surgeon, at Port Curtis, on the 8th of March, 1855.

That your Memorialist continued in the performance of his duties, as such Resident Surgeon, up to the 5th day of August, 1857.

That your Memorialist, on the 5th day of August, received notification that his salary had been discontinued from the 1st day of January, 1857.

That, during this period of seven months, your Memorialist was in the performance of his duties without any idea that his appointment had been done away with.

That your Memorialist was the more confirmed in this belief, because after the period from which he eventually learnt his pay had been discontinued he received supplies of Medicines on requisitions sent in by him to the Medical Adviser to the Government in Sydney.

That

That your Memorialist is under severe pecuniary loss by the withholding of his salary during the period from the 1st day of January to the 5th day of August, 1857, inasmuch as he was attending many people against whom he kept no account—supposing it was in the performance of his Government duties—whereas otherwise these visits would have been charged for in his private medical practice.

That your Memorialist trusts your Excellency will be good enough to take his case into your favorable consideration, and authorize the issue of his salary for the period he claims it.

A. C. ROBERTSON.

Gladstone, 16 August, 1859.

*Medical Adviser's Office,
Parramatta, 8 July, 1857.*

Sir,

With reference to your letter of the 5th May, enclosing Pay Abstract, I regret to inform you, that, on sending them to the Audit Office, I learn that there is no vote for a Resident Surgeon at Port Curtis, and, consequently, no available funds.

You are, I believe, entitled to compensation; I am not quite certain as to the rate, but I think it will amount to three months' pay.

A. C. Robertson, Esq.,
Surgeon, Port Curtis.

I have, &c.,
R. GREENUP,
Medical Adviser to the Government.

No. 17.

UNDER SECRETARY to DR. ROBERTSON.

*Colonial Secretary's Office,
Sydney 8 September, 1859.*

SIR,

In reply to your Petition of the 16th instant, claiming pay and allowances as Resident Surgeon at Gladstone for the first seven months of the year 1857, I am directed by the Colonial Secretary to inform you, that the Government cannot recognize any right on your part to receive the salary attached to the above office, subsequently to the period of its abolition; but that if you submit a claim moderate in amount, and afford the particulars of the services rendered by you, the Government will not object to entertain it.

A. C. ROBERTSON, ESQ.,
Gladstone.

I have, &c.,
W. ELYARD.

1859.

Legislative Assembly.

NEW SOUTH WALES.

MR. ALEXANDER BERRY.

(PETITION IN REFERENCE TO PROPOSED MUNICIPALITY AT SHOALHAVEN.)

Ordered by the Legislative Assembly to be Printed, 21 September, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Alexander Berry, of the North Shore, near Sydney, in the Colony of New South Wales, Esquire,—

SH EWETH :—

That your Petitioner is, and has for many years, been the owner of a large quantity of land in the County of Camden, in the said Colony, on the Shoalhaven River.

That sometime ago a letter written by the Reverend John Dunmore Lang, Doctor in Divinity, was published in a certain newspaper, called *The Illawarra Mercury*, in which the writer thereof among other things stated, that the possession by your Petitioner of the aforesaid lands, and the manner in which your Petitioner acted as the owner thereof, were prejudicial to the interests of the Public at large; and also stated what he called two remedies, one of which—namely, the removal of your Petitioner from this World—he therein called a remedy in the hand of God, and the other of which he therein alluded to as a remedy in the hands of man, which he also therein stated he would more fully explain in a subsequent letter.

That accordingly the said Reverend John Dunmore Lang wrote and published in the said newspaper, on the twenty-seventh day of December last, another letter, headed “The Shoalhaven Incubus, and its Remedy,” in which, among other things, is the following passage :—“To take a single case in point, how greatly would it promote the advancement of the Shoalhaven District generally, and how much would it add to the comfort of the Inhabitants of the upper part of the river, if the north arm of the Crookhaven River were cleared, so that the Sydney Steamers could go up the main river as high as the small Steamers go at present, without encountering the delays and the cost of transhipment, or haying to wait for the high water to cross the flats, as at present? That single improvement—which, I am told by those who know, could be effected for a few thousand pounds—would add immensely to the comfort of the general population of the District, and would enhance the value of every acre of land, and every town allotment along the river. No doubt the cost of such an improvement would fall upon the Inhabitants, or rather upon the owners of property generally,—but in what proportion? Why, supposing the rate for such a purpose to be only sixpence a pound on the yearly rental—which I do not suppose it would exceed, at the very utmost—‘I, John Jones, the owner of a half-acre allotment in the Government Township, which, at Mr. Berry’s standard of value for such property, would be worth five pounds a year, saying nothing about the slab hut I have built upon it,—would be rated at half-a-crown per annum,—no great amount, surely, for a good workman like myself.’ ‘I, Simon Frazer, the proprietor of a thirty-acre farm, valued at a pound an acre of yearly rent, would be rated at fifteen shillings,—a mere nothing

“ ‘ compared

“ compared with the additional cost to which I am subjected at present, by having to send
 “ my kegs of butter—my potatoes and grain—by a small Steamboat, to be transhipped
 “ into the large one at Greenwell Point.’ But what would Mr. Berry’s quota be for this
 “ public improvement—which, to tell you the plain truth, he does not want, and detests the
 “ very idea of? Why, sixpence an acre on 90,000 acres would be exactly £2,250—a mere
 “ nothing, of course, to Mr. Berry, or rather no more (if half as much) to him, than the
 “ fifteen shillings to Simon Frazer, or the half-crown to John Jones; and if Mr. Berry
 “ refused to pay that mere nothing, the Sheriff, or other authority in the case, would
 “ immediately attack the Island in the Crookhaven River,—which he bought the other
 “ day over the heads of the two industrious young men, who would otherwise have very
 “ soon transformed it into a perfect paradise—and sell it for the rates; and supposing
 “ another sixpence (making a shilling in all) were to be imposed by the vote of the
 “ Municipality for the roads and bridges of the District, thereby subjecting John Jones to
 “ the payment of five shillings in all, and Simon Frazer to thirty, the rate would amount
 “ to other £2,250, or £5,000 in all, for Mr. Berry! In short the Berry Domain is the veri-
 “ table Shoalhaven Diggings, under the Municipal Corporations Act; and the best of it is, it is
 “ all ‘surfacing’ for any Municipality that chooses to pick up the loose gold of the mammoth
 “ monopolist. There are no deep sinkings necessary in the case; it is all the simplest pro-
 “ cess imaginable,—‘cut and come again’ being the word; and as to quartz crushing, which
 “ is necessary on the Adelong and other diggings, and which requires rather expensive
 “ machinery, there will be nothing of the kind needed at the Berry Diggings,—the only
 “ thing to be crushed there being a miserable earthworm, which can be done by the simplest
 “ possible process—the mere vote of the Shoalhaven Municipality.”

That in order to carry out the plan so pointed out by the said writer of the said letters, and to verify his prediction that your Petitioner would become “the doomed victim of Municipal taxation,” certain persons residing at the Town of Nowra and at Nowra Hill, and Greenhills, in the county of St. Vincent, on the opposite side of the said Shoalhaven River to your Petitioner’s said land, and a few persons residing at a place called Good Dog, in the said County of Camden, recently presented a Petition to His Excellency the Governor, stating that they were desirous of availing themselves of the powers of Municipal self-government, and of the endowment connected therewith under the Municipalities Act, 22nd Victoria, No. 13, and suggested that the following should be the boundaries of the said Municipality, namely,—“commencing at the point where Cabbagetree Creek enters the Shoalhaven River; thence by said creek as far as where it meets the Braidwood Road, and by said road, south, four miles beyond the Yellow Water Hole; then by a line east to meet the Jervis Bay or Southern Road, where it intersects Currambene Creek at the Upper Falls, and by the said Southern Road to meet Mr. K. Mackay’s boundary line; thence continued said line direct along Messrs. Graham and De Mestre’s boundary, to Shoalhaven River, then by a line north and south from Berry’s Wharf, Greenhills, across the Shoalhaven River to Bumaderry Creek; then by a line bearing east two chains; then by a line about north-east to the edge of the swamp at the back of William Kennedy’s, and by said margin of swamp as far as Shean’s corner of paddock, then by a direct line north-east to Jaram Creek, and by said creek to its confluence with the Broughton Creek, and by said Broughton Creek, upwards, as far as its junction with Broughton Mill Creek; then by Broughton Mill Creek to the coast range, and by said range, being a line bearing about south-west to meet Kennedy’s Road, and by said road to the Shoalhaven River; and by said river, to point of commencement,” and in which said Petition the said Petitioners state that they desire that the Town of Nowra and Suburbs should be divided into two wards—that the Shoalhaven River be the boundary of each ward, and that the said wards be incorporated by the designation of the Nowra and Good Dog Wards, and pray as follows:—“That your Excellency and the Honorable the Executive Council may be pleased to take the premises into consideration, and that the said Town of Nowra, Nowra Hill, Greenhills, and Good Dog, may be divided into two wards and proclaimed with the boundaries aforesaid a Municipality under the Municipalities Act of 1858.”

That the substance of the said Petition was published in a Supplement to the *New South Wales Government Gazette* on the seventeenth day of March last, by which it appears that the same purports to have been signed by one hundred and three householders residing at Nowra, Nowra Hill, Greenhills, and Good Dog.

That

That Nowra is a duly proclaimed Township, and is situated entirely in the said County of St. Vincent, on the opposite side of the said Shoalhaven River to your Petitioner's said lands.

That neither Nowra Hill, Greenhills, nor Good Dog, are Cities, Townships, Hamlets, or Rural Districts, nor do they collectively or individually constitute a City, Township, Hamlet, or Rural District, having any legal existence as such, or any defined boundaries.

That the greater part of the area of land so as aforesaid sought to be formed into a Municipality, belongs to your Petitioner, and is situate in the said County of Camden, and is known by the name of Meeroo, and the place known as Good Dog is comparatively a small place, yet the said name of Good Dog is used in the said Petition as comprising all the said lands on the Camden side of the said river.

That many of the names purporting to be signed to the said Petition are not genuine—that many of them are those of persons who have signed a Petition against the formation of the said proposed Municipality, and that many others of the said signatures are equally open to valid objections which would appear if a scrutiny was allowed respecting them.

That the Petitioners by selecting the particular area they desire the Government to form into a Municipality, have disfranchised the bulk of the householders of the District, and seek to include all those portions of your Petitioner's lands, on which there are no inhabitants, and to exclude all those parts thereof which are inhabited, the Petitioners well knowing that if a fair selection of lands on either side the river had been made, the majority of the householders would have petitioned against the locality being made a Municipality, as in fact they have done, but the Petitioners endeavour to evade this difficulty by drawing a line with all sorts of defections, so as to include all those parts of your Petitioner's lands which are unoccupied, (and are indeed only fit for pastoral purposes, having been originally a large swamp,) and to exclude all those parts thereof which are populous, the principle of selection not having been any natural fitness or connection of the respective localities for being formed into one Municipality, but simply that of including all lands on which there are no persons who can oppose their Petition, and of excluding all those which are occupied by householders who are desirous that a Municipality shall not be created.

That this is obvious, your Petitioner submits, appears from the following facts:—The Petitioners propose an eastern boundary on the southern side of the river, coterminous with land granted to Prosper De Mestre, not because there are any natural limits there, but because if the locality were extended more to the eastward, there would be included a large number of householders opposed to the Municipality, there being just to the eastward of that boundary a large population, all of whom are desirous of not having a Municipality. The proposed line then crosses the Shoalhaven River, and instead of following the banks of the river immediately diverges in a direction so as to exclude a comparatively small quantity of land, possessing, however, the embarrassing feature of being inhabited by two hundred and ninety-six individuals, the whole of whom are also opposed to the views of the Petitioners, and the same plan is pursued throughout, the general result being, that the proposed area on the north side of the river includes not more than one hundred and fifty-three persons, and excludes upwards of four hundred and sixty persons residing immediately to the eastward of the proposed boundary line on the north side of the river.

That your Petitioner respectfully submits in the first place, that the provisions of the Municipalities Act do not warrant the householders of Nowra, in including in a Municipality of that Town any lands lying on the opposite side of the river, such river being a large navigable one of great width, and the land on the opposite side being in a different county, and altogether unconnected with Nowra, and your Petitioner submits, that it is absurd to call the large District on the north side of the river a suburb of Nowra.

That three hundred and sixty-two householders residing in the said proposed Municipality, and its immediate vicinity, duly petitioned against the creation of such Municipality.

That shortly after the aforesaid Petition was so published in the said *Government Gazette*, the following paragraph appeared in the said *Illawarra Mercury*:—

“MUNICIPALITY OF NOWRA.—In our last page will be found the contents of the “Petition from the inhabitants of Nowra, and the neighbourhood, praying to be incorporated. Go a-head Shoalhaven Diggings.”

That

That on the eighth day of April last, your Petitioner addressed a letter or memorial to His Excellency the Governor General, setting forth your Petitioner's objections to the creation of the said Municipality, and submitting that the creation thereof would be contrary to the spirit as well as the letter of the said Municipalities Act.

That your Petitioner received a reply to the said letter or memorial, stating that the same had been referred to the Secretary of Lands and Public Works, by whom it was forwarded to the Office of the Colonial Secretary.

That on the fifth day of May last, your Petitioner forwarded the said Petition of the said three hundred and sixty-two householders, against the creation of the said proposed Municipality, to the said Colonial Secretary, together with a letter, in substance as follows:—

The Honorable The Colonial Secretary, &c., &c., &c.

Sydney, 5 May, 1859.

Sir,

I did myself the honor, on the 8th ultimo, of addressing a letter to His Excellency the Governor General, on the subject of a Petition of certain inhabitants of Greenhills, the Town of Nowra, and a few people of Good Dog, to erect a large portion of my property at Shoalhaven into a Municipality, with which letter I also sent a copy of a Petition of Inhabitants opposed to any Municipality in the District in question, also a sketch of their proposed Municipality, and a copy of the second letter, headed "Shoalhaven Incubus," published in the *Illawarra Mercury*, by the Reverend Dr. Lang.

My letter and the above-mentioned documents were transmitted by Mr. Alfred Denison, on the 11th ultimo, to the Secretary of Lands and Public Works; and from a communication from that Department, I learn that they were sent to your Office on the 18th ultimo.

I therefore now do myself the honor of transmitting to you the original Petition against a Municipality, signed by 326 individuals.

My former letter to his Excellency was so full and explicit, that it requires only a few additions.

1st. I may call your attention to the fact, that in a large portion of my property on the north side of the Shoalhaven River and west of Broughton's Creek, containing upwards of 20,000 acres, the Nowra Petition contains only four names at a place called Jasper Creek, and only about twenty-six at another place, more to the westward, called Good Dog.

2nd. That many of the names attached to the Petition in favor of the Municipality will be found to be apocryphal, as appears from a memorandum which I have received and now attach. These are only given by way of example of the manner in which the Petition has been got up; but I am satisfied I shall be able, and I undertake, to prove that many of the alleged signatures to the Petition for the Municipality are not genuine; that many of those alleged to have signed it have signed the Petition now enclosed against it; and that equally valid objections exist against others of the alleged signatures to the Petition in favor of the Municipality, if a scrutiny be allowed, as I presume it will be if the application for constituting the proposed Municipality be not refused upon the higher grounds of objection set forth in my letter to His Excellency. In fact, I attach comparatively little weight to the irregularities to which I have adverted (although I believe them to be, and insist upon them as being, fatal to the application). What I emphatically protest against is the attempt of a minority to overrule a majority, under any sham or trickery, and extending the Municipality of the embryo village of Nowra across the Shoalhaven River, in the County of Camden.

I have, &c.,

ALEXANDER BERRY.

That having received no official communication on the subject, your Petitioner instructed his Solicitors, Messieurs Johnson and Johnson, to communicate with the Government on the subject, and that the following correspondence has taken place between them and the said Colonial Secretary thereon:—

The Honorable the Colonial Secretary, &c., &c., &c.

181, Pitt-street, Sydney,
30 August, 1859.

In the application to erect Nowra, Nowra Hill, Greenhills, and Good Dog, into a Municipality.

Sir,

We have been instructed by Mr. Alexander Berry, to address you on the subject of a Memorial from him to His Excellency the Governor General, presented on the 8th of April last, respecting a Petition of certain Inhabitants of Greenhills, Nowra, Nowra Hill, and Good Dog, praying for the erection of a Municipality in that locality, to which Memorial he has not received any reply beyond being informed shortly after its presentation, that it had been referred to your Department.

From the facts stated in that Memorial and the Petitions accompanying it, and the time which has since elapsed, we are induced to believe that the Executive Government has arrived at the conclusion that the application of the individuals who petitioned for the formation of the Municipality in question is one which cannot be granted; but, as it is a matter of great importance to Mr. Berry, we shall feel obliged by being informed on his behalf how the matter at present stands.

We have, &c.,

JOHNSON & JOHNSON.

The Honorable the Colonial Secretary, &c., &c., &c.

181, Pitt-street, Sydney,
1 September, 1859.

In the application to erect Nowra, Nowra Hill, Greenhills, and Good Dog, into a Municipality.

Sir,

Since writing our letter herein to you dated the 30th ultimo, we have been informed by Mr. Berry, that he has heard that the Government has decided upon granting the prayer of the individuals who petitioned for the creation of the Municipality in question.

Not

Not having received any official communication on the subject, he is of course not in a position to assume that what he has heard is true—but in order to prevent as far as in his power so great an act of injustice to him, he has instructed us formally to protest, as we hereby do, against the Government pursuing such a course, and respectfully to request that if the proposed Municipality has not already been actually created, he may be afforded an opportunity of being heard before the Executive Council against it.

We have, &c.,
JOHNSON & JOHNSON.

Messrs. Johnson and Johnson, 181, Pitt-street.

*Colonial Secretary's Office, Sydney,
2 September, 1859.*

Gentlemen,

In reply to your letter of the 30th ultimo, I am directed to inform you that the Petition for a Municipality at Shoalhaven, and the Petitions which have been received against the establishment of such Municipality, together with communications received from the Honorable Alexander Berry, have been duly laid before the Executive Council, and that the necessary Proclamation constituting the Municipality, will be published as soon as a survey of a portion of the boundaries—which the Surveyor General considers necessary, to prepare a reliable description—is received, and which he states may be expected to be furnished to him by Mr. Licensed Surveyor Parkinson, in the course of the next week.

I have, &c.,
W. ELYARD.

The Honorable The Colonial Secretary, &c., &c., &c.

*181, Pitt-street, Sydney,
2 September, 1859.*

In the application to erect Nowra, Nowra Hill, Greenhills and Good Dog into a Municipality.

Sir,

In reply to your communication of this date, in answer to ours of the 30th ultimo, we beg most respectfully to call your attention to our letter of yesterday, and earnestly to request that Mr. Berry may be allowed to be fully heard on the subject of his rights, before any decision adverse to them is acted upon.

We have, &c.,
JOHNSON & JOHNSON.

That in answer to a communication made by your Petitioner to the Surveyor General's Office, on the subject of the proposed boundaries of the said Municipality, your Petitioner received the following reply :—

Alexander Berry Esq.,

*Surveyor General's Office,
Sydney, 8 September, 1859.*

Sir,

In acknowledging the receipt of your application for a copy of the Chart of the Nowra Municipality, I beg to inform you that the correct Chart of this Municipality has not been prepared, and that until the boundaries suggested shall have been approved of by the Government, they are of course merely suggestions.

2. There is not, that I am aware of, any intention to depart to any material extent from the boundaries prayed for in the Petition, excepting at the head of Broughton Mill Creek, where the Kiama Municipality takes in a portion of what the Nowra Petition asked for.

3. When the boundaries shall have been approved of, any respectable Surveyor, whom you may employ, or Mr. Langley who now works privately in this Office, will be permitted to make a tracing for you.

I have, &c.,
A. G. M'LEAN,
Acting Surveyor General.

That on the nineteenth day of September instant, your Petitioner's said Solicitors received a letter from the said Colonial Secretary's Office, of which the following is a copy :—

*Colonial Secretary's Office,
Sydney, 17 September, 1859.*

Messrs. Johnson & Johnson, 181, Pitt-street, Sydney.

Gentlemen,

Your letters of the 1st and 2nd instant, on the subject of the erection of Nowra, Nowra Hill, Greenhills and Good Dog into a Municipality, having been laid before the Executive Council, I am directed by the Colonial Secretary to inform you that the formation of the Municipality, having already been decided upon, as intimated to you in my letter of the 2nd instant, in pursuance of the Act of the Local Parliament, 22nd Vict., No. 13., and after a full consideration of all the representations addressed to the Government, in favor of, and in opposition to such measure, it is the opinion of the Council, that it is now quite beyond their power, to reopen the matter, or to advise that the request of Mr. Berry which you have submitted, that he may be heard before the Council on the subject, should be entertained.

I have, &c.,
W. ELYARD.

That

That your Petitioner having, as appears by the foregoing correspondence, applied in vain to His Excellency the Governor, and the said Executive Council, for a hearing in support of his objections to the creation of the said proposed Municipality, now appeals for justice to your Honorable House.

And your Petitioner humbly prays that your Honorable House will take the premises into your consideration, and adopt such measures in relation thereto, in order to ensure justice and right to your Petitioner, as to your Honorable House in its wisdom shall seem meet.

And your Petitioner will ever pray, &c.

ALEXR. BERRY.

Sydney, 20 September, 1859.

1859.

Legislative Assembly.

NEW SOUTH WALES.

SHOALHAVEN MUNICIPALITY.
(PETITION OF LANDHOLDERS AND OTHERS AT SHOALHAVEN.)

Ordered by the Legislative Assembly to be Printed, 7 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned Landed Proprietors in the District of Shoalhaven.

HUMBLY SHEWETH :—

That your Petitioners have heard with surprise that their names have been fraudulently made use of to a certain Petition against the incorporation of the Nowra and Good Dog Municipality.

That your Petitioners signed the Petition for the incorporation of Nowra and Good Dog Wards, and never signed any Petition against the incorporation of said places.

That your Petitioners, therefore, earnestly hope that their names alluded to in the counter Petition against Nowra will not be looked upon as genuine.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 6 Signatures.]

1859.

Legislative Assembly.

NEW SOUTH WALES.

SHOALHAVEN MUNICIPALITY.

(PETITION OF JAMES GRAHAM.)

Ordered by the Legislative Assembly to be Printed, 7 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned, landowner, in the District of Shoalhaven,—

HUMBLY SHEWETH:—

That your Petitioner signed a counter Petition a few months since against one Municipality for the whole District, and collected several signatures to the said counter Petition.

That your Petitioner finds that his name, and the other names so collected by him, have been fraudulently used against the Nowra Municipality, which your Petitioner had no intention of opposing.

Your Petitioner, therefore, feels bound, in honesty, to make this fact known to your Honorable House, so that should an investigation take place this will account for the same names appearing on both Petitions.

Your Petitioner is also desirous of clearing himself of all suspicion in this matter, and of shewing those whose names he collected that he was quite ignorant of the fraud practised against the incorporation of Nowra, by said names being so used to suit a purpose contrary to the wishes of said parties.

Your Petitioner, therefore, earnestly, yet most respectfully, hopes that his name, and the other names collected by him, namely,—James Waddington, Barrangella, farmer; William Ringland, Green Hills, landholder; James Cumberland, Rock Hills, landholder; K. Murray, Nowra, householder; John Wallice, Nowra, householder—will not be looked upon as opposed to the Nowra Municipality, such names, his own, and the others collected by him, having been signed against “one Municipality for the whole District,” and were never intended against Nowra, as the Petition to incorporate Nowra was not in existence at that time.

And your Petitioner, as in duty bound, will ever pray.

JAMES GRAHAM,
Landholder, Green Hills.

1860.

Legislative Assembly.
NEW SOUTH WALES.

SHOALHAVEN MUNICIPALITY.

(CORRESPONDENCE RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 25 January, 1860.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 27 September, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ All Correspondence relating to the establishment of a Municipality of Nowra, also the description of the approved boundaries of such Municipality, accompanied by a plan shewing the same, and, as nearly as may be, the boundaries specified in the “ Petition.”

(Mr. Hay.)

SHOALHAVEN MUNICIPALITY.

No. 1.

To His Excellency Sir William Thomas Denison, K.C.B., Governor General,
&c. &c., and to the Honorable the Executive Council in and for the Colony
of New South Wales.

The Petition of the undersigned Inhabitants, being resident householders of the Government
Township of Nowra, Nowra Hill, Greenhills, and Good Dog, in the District of
Shoalhaven,—

HUMBLY SHEWETH:—

That your Petitioners are desirous of availing themselves of the powers of
Municipal self-government, and of the endowment connected therewith, under the Muni-
cipalities Act.

That the population of the said Town of Nowra and suburbs, proposed to constitute a
Municipality, amounts at the present time to not fewer than six hundred.

That your Petitioners respectfully suggest, that the following be the boundaries of
the said Municipality:—Commencing at the point where Cabbagetree Creek enters the
Shoalhaven River; thence by said creek as far as where it meets the Braidwood Road, and
by said road south four miles beyond the Yellow Water Hole; then by a line east, to meet
the Jervis Bay or Southern Road, where it intersects Currambene Creek at the Upper Falls,
and by the said Southern Road to meet Mr. K. Mackay's boundary line; thence continue
said line direct along Messrs. Graham and De Mestre's boundary to Shoalhaven River; then
by a line north and south from Berry's Wharf, Greenhills, across the Shoalhaven River,
to Bumaderry Creek; then by a line bearing east two chains; then by a line about north-
east to the edge of the swamp, at the back of William Kennedy's, and by said margin of
swamp as far as Shean's corner of paddock; then by a direct line north-east to Jaram Creek,
and by said creek to its confluence with Broughton Creek, and by said Broughton Creek
upwards as far as its junction with Broughton Mill Creek; then by Broughton Mill Creek to
the coast range, and by the said range, being a line bearing about south-west to meet
Kennedy's road, and by said road to the Shoalhaven River, and by said river to the point
of commencement.

Your Petitioners deem it advisable that the said Town of Nowra and suburbs,
proposed to constitute a Municipality, should be divided into two Wards, and that the
Shoalhaven River be the boundary of each Ward, and that the said Wards be incorporated
by the designation of the "Nowra" and "Good Dog" Wards.

Your Petitioners therefore pray that your Excellency, and the Honorable the
Executive Council may be pleased to take the premises into consideration, and that the said
Town of Nowra, Nowra Hill, Greenhills, and Good Dog, may be divided into two Wards,
and proclaimed, with the boundaries aforesaid, a Municipality, under the Municipalities
Act of 1858.

And your Petitioners as in duty bound will ever pray.

No. 2.

*Colonial Secretary's Office,
Sydney, 15 March, 1859.*

MUNICIPAL INSTITUTIONS.

NOWRA, NOWRA HILL, GREENHILLS, AND GOOD DOG PETITION.

IN pursuance of the Act of the Colonial Parliament, 22 Victoria, No. 13, His Excellency the Governor General, with the advice of the Executive Council, has directed the publication of the substance and prayer of a Petition addressed to His Excellency, as hereinafter set forth, signed by one hundred and three householders residing at Nowra, Nowra Hill, Green Hills and Good Dog, praying for the erection of their locality into a Municipality.

CHARLES COWPER.

THE Petitioners state that they are desirous of availing themselves of the powers of Municipal self-government, and of the endowment connected therewith, under the Municipalities Act.

That the population of the town of Nowra and Suburbs, amount at the present time to not fewer than six hundred.

The Petitioners suggest that the following be the boundaries of the said Municipality:—Commencing at the point where Cabbagetree Creek enters the Shoalhaven River, thence by said creek as far as where it meets the Braidwood Road, and by said road south four miles beyond the Yellow Water Hole; then by a line east to meet the Jervis Bay or Southern Road, where it intersects Currambene Creek at the Upper Falls, and by the said Southern Road to meet Mr. K. Mackay's boundary line; thence continued said line direct along Messrs. Graham and De Mestre's boundary to Shoalhaven River; then by a line north and south from Berry's Wharf, Green Hills, across the Shoalhaven River to Bumaderry Creek

Creek; then by a line bearing east 2 chains; then by a line about north-east to the edge of the swamp at the back of William Kennedy's; and by said margin of swamp as far as Shean's corner of paddock; then by a direct line north-east to Jaram Creek; and by said creek to its confluence with Broughton Creek; and by said Broughton Creek upwards as far as its junction with Broughton Mill Creek; then by Broughton Mill Creek to the coast range; and by said range, being a line bearing about south-west to meet Kennedy's Road; and by said road to the Shoalhaven River; and by said river to point of commencement.

The Petitioners desire that the Town of Nowra and Suburbs should be divided into two Wards; that the Shoalhaven River be the boundary of each Ward; and that the said Wards be incorporated by the designation of the "Nowra" and "Good Dog" Wards.

And the Petitioners pray as follows:—"That your Excellency and the Honorable the Executive Council may be pleased to take the premises into consideration, and that the said Town of Nowra, Nowra Hill, Green Hills, and Good Dog, may be divided into two Wards, and proclaimed, with the boundaries aforesaid, a Municipality under the Municipalities' Act of 1858."

[Here follow the signatures which are the same as in No. 1.]

No. 3.

MR. H. MOSS to THE COLONIAL SECRETARY, respecting certain Signatures attached to Petition from Nowra for Municipality. 4 April, 1859.

(This letter cannot at present be traced)

No. 4.

ALEXANDER BERRY, ESQ., to THE GOVERNOR GENERAL.

Sydney, 8 April, 1859.

To His Excellency SIR WILLIAM THOMAS DENISON, Knight, Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, &c., &c., &c.

I have the honor to call the attention of your Excellency to a Petition addressed to you, in alleged pursuance of the Act of the Colonial Parliament, 22 Victoria, No. 13, stated to be signed by one hundred and three householders residing at Nowra, Nowra Hill, Green Hills, and Good Dog, praying for the erection of their locality into a Municipality, the substance and prayer of which are set forth in the second Supplement to the *New South Government Gazette* of the 15th March last.

I beg respectfully to apprise your Excellency that the said Petition is the result of a scheme concocted by the Rev. Dr. Lang, for the purpose of extorting from me, under color of the provisions of the Act in question, an enormous amount of taxation, in order to carry out an object which is not only opposed to the wishes of myself but also to the interests and desires of a large majority of the householders of the district sought to be affected by the Petition referred to. It is, in fact, an attempt to effectuate, under color of law, a most enormous fraud and injustice.

I am persuaded I shall thoroughly satisfy your Excellency that the terms I have used are fully warranted by the facts which I am about to bring under your Excellency's notice, and that, when the true state of the case is known, it will be manifest that the persons who have got up the Petition are attempting to effect an object which is directly opposed to the real meaning and intent of the law which they profess to act upon, in order to carry out their own purposes to my prejudice.

It is notorious that I have been libelled in the most scandalous manner by the above-named Reverend individual, in two letters written by him and published in the *Illawarra Mercury*, and that, in consequence of the unusual course pursued by the late Attorney General

General (Mr. Lutwyche), justice has been denied to me in respect of those libels. I should not now refer to this subject if it were not necessary, in order to make your Excellency aware of the real circumstances under which the Petition has been got up.

It is not necessary for me now to trouble your Excellency with any reference to the first of the two libels referred to, beyond stating, that the writer mentions therein what he calls "a remedy in the hands of God," to effect the object he professes to desire, namely,—the making my lands available for the public at large, which object, he is pleased to say, might be effected by my removal from this world; and that, he goes on to say, that there is another remedy, in the hands of man, which he promises to make apparent in his following letter, the second of the libels in question.

I send herewith, for your Excellency's perusal, a copy of that second letter. It appeared in the *Illawarra Mercury* of the 27th of December last, and is headed, "The Shoalhaven Incubus, and its Remedy." I will not trouble your Excellency with any lengthened reference to its contents; but, to shew the animus of the writer, which led him to devise the plan now attempted to be carried out, I beg your Excellency's particular attention to the two following paragraphs:—

"To take a single case in point—how greatly would it promote the advancement of the Shoalhaven District generally, and how much would it add to the comfort of the inhabitants of the upper part of the river, if the north arm of the Crookhaven River were cleared, so that the Sydney steamers could go up the main river as high as the small steamers go at present, without encountering the delays and the cost of transshipment, or having to wait for the high-water to cross the flats, as at present? That single improvement—which I am told by those who know, could be effected for a few thousand pounds—would add immensely to the comfort of the general population of the district, and would enhance the value of every acre of land, and every town allotment along the river. No doubt the cost of such an improvement would fall upon the inhabitants, or, rather, upon the owners of property generally—but in what proportion? Why, supposing the rate for such a purpose to be only sixpence a pound on the yearly rental, (which I do not suppose it would exceed, at the very utmost),—I, John Jones, the owner of a half-acre allotment in the Government Township, which at Mr. Berry's standard of value for such property, would be worth five pounds a-year, saying nothing about the slab-hut I have built upon it, would be rated at half-a-crown per annum—no great amount, surely, for a good workman like myself.—I, Simon Frazer, the proprietor of a thirty-acre farm, valued at a pound an acre of yearly rent, would be rated at fifteen shillings—a mere nothing, compared with the additional cost to which I am subjected at present, by having to send my keg of butter, my potatoes, and grain, by a small steamboat, to be transhipped into the large one at Greenwell Point.' But what would Mr. Berry's quota be for this public improvement, which, to tell the plain truth, he does not want, and detests the very idea of? Why, sixpence an acre on 90,000 acres would be exactly £2,250—a mere nothing, of course, to Mr. Berry, or, rather, no more (if half as much) to him than the fifteen shilling^s to Simon Frazer, or the half-crown to John Jones; and if Mr. Berry refused to pay that mere nothing, the Sheriff, or other authority in the case, would immediately attach the island in the Crookhaven River, which he bought the other day over the heads of the two industrious young men who would otherwise have very soon transformed it into a perfect paradise, and sell it for the rates. And supposing another sixpence (making a shilling in all) were to be imposed by the vote of the Municipality for the roads and bridges of the district, thereby subjecting John Jones to the payment of five shillings in all, and Simon Frazer to thirty, the rate would amount to other £2,250, or £5,000 in all, for Mr. Berry!

"In short, the Berry domain is the veritable Shoalhaven diggings, under the Municipal Corporation's Act; and the best of it is, it is all 'surfacing' for any Municipality that chooses to pick up the loose gold of the mammoth monopolist. There are no deep sinkings necessary in the case. It is all the simplest process imaginable—'cut and come again' being the word. And as to quartz-crushing, which is necessary in the Adelong and other diggings, and which requires rather expensive machinery, there will be
" nothing

“ nothing of the kind needed at the Berry diggings; the only thing to be crushed there
 “ being a miserable earth-worm, which can be done by the simplest possible process—the mere
 “ vote of the Shoalhaven Municipality.”

In pursuance of the suggestions thus thrown out, and to endeavour to verify Dr. Lang's prediction, that I shall become “ the doomed victim of Municipal taxation,” the promoters of the Petition have framed their proceedings in a way well calculated to effect that object, but which I respectfully, but with the utmost confidence, submit to your Excellency, are utterly unwarranted by law.

In order to enable your Excellency to understand the exact nature of the case, I send herewith a plan, an inspection of which will shew how the Petitioners, by selecting the particular area they desire the Government to form into a Municipality, have disfranchised the bulk of the householders of the district; and seek to include all those portions of my lands on which there are no inhabitants, and to exclude all those parts thereof which are inhabited,—the Petitioners well knowing, that if a fair selection of lands on either side the river had been made, the majority of the householders would have petitioned against the locality being made a Municipality—as, in fact, they have done—but the Petitioners endeavour to evade this difficulty by artfully drawing a line, with all sorts of deflections, so as to include all those parts of my lands which are unoccupied (and are indeed only fit for pastoral purposes, having been originally a large swamp) and to exclude all those parts thereof which are populous, the principle of selection not being any natural fitness or connexion of the respective localities for being formed into one Municipality, but simply that of including all lands on which there are no persons who can oppose their scheme, and of excluding all those which are occupied by householders who are desirous that a Municipality shall not be created. This is obvious from the following facts:—The Petitioners propose an eastern boundary, on the southern side of the river, conterminous with land granted to Prosper De Mestre, not because there are any natural limits there, but because if the locality were extended more to the eastward there would be included a large number of householders opposed to the Municipality, there being just to the eastward of that boundary a large population, all of whom are desirous of not having a Municipality. The proposed line then crosses the Shoalhaven River, and, instead of following the banks of the river, immediately diverges in a direction so as to exclude a comparatively small quantity of land, possessing, however, the embarrassing feature of being inhabited by 296 individuals, the whole of whom are also opposed to the views of the Petitioners, and the same plan is pursued throughout—the general result being, that the proposed area on the north side of the river includes not more than 153 persons, and excludes upwards of 460 persons residing immediately to the eastward of the proposed boundary line on the north side of the river, as shewn in the accompanying plan, the general direction of the boundaries as proposed by the Petitioners being shewn by the red line, and the population on the excluded portions being marked thereon.

Now, I respectfully submit, in the first place, that the provisions of the Municipalities Act do not warrant the householders of Nowra in including in a Municipality of that town lands lying on the opposite side of the river, such river being a large navigable one, of great width, and the land on the opposite side being in a different county, and altogether unconnected with Nowra. It is, I submit, absurd to call the large district on the north side of the river a suburb of Nowra—it would be not more unreasonable, indeed not so unreasonable, to include Balmain and the North Shore in one Municipality.

In the second place I submit, if the proposed locality is to include any land on the north side of the river, it should be formed on a just principle, so as to include as well those parts which are, comparatively speaking, populous, as those portions which are only susceptible of being used for grazing purposes, and are, therefore, uninhabited, and, for that reason only, are proposed by the Petitioners to be included in the projected Municipality.

I beg to send herewith copies of Petitions from 362 householders residing in the proposed Municipality, and its immediate vicinity, and who are clearly entitled to participate in deciding upon the question whether a Municipality shall at present be introduced. These, with those who have signed the Petition for a Municipality, comprise nearly every householder in the district. Your Excellency will, therefore, perceive that there is a majority of those

those entitled to decide the question, of nearly four to one against having a Municipality. I do not now send the originals of these Petitions (which are in my possession) as it may be requisite, in point of form, to place them in the hands of the Colonial Secretary.

It is manifestly the true meaning of the Municipal Corporations' Act, that the majority of the householders of any town, &c., shall decide whether its provisions shall be adopted or not, but the course pursued on this occasion is in direct conflict with that principle, and I submit, therefore, clearly contrary to law.

However erroneous that Act may be in some of its principles, and however difficult it may be found in working, yet I am warranted in supposing that it was really intended for the public good, and that it was not the intention of the promoters of the measure that it should be made a handle to oppress individuals like myself by their unprincipled neighbours. I have no objection to the people of Nowra and Greenhills managing their affairs by a Municipality, but I am quite capable of managing mine without one, and without any Government endowment, which I repudiate in toto. I have reared up my establishment without any assistance from the Government, and my property (very nearly the whole of which has been *purchased*) has rather been a *tributary* appendage to New South Wales than a part of it, and I am desirous that it should continue so as long as I am interested in it; but I am very unwilling to be rendered tributary to the people of Greenhills and Nowra, who have long been a great annoyance to me, as a source of drunkenness and dissipation.

I beg to remind your Excellency that there has never been any Government expenditure on my estate, even for roads. My brother declined to accept of any money voted by the Council for that purpose,—indeed until lately there has never been a main road laid out to Shoalhaven, and even now it has been only done as far as the boundary of the Police District of Kiama, and this, contrary to the spirit of the Parish Road Act, has been proclaimed as a parish road.

To shew your Excellency how the suggestions of Dr. Lang have been acted upon in this matter, I beg to call your Excellency's attention to the following paragraph, which appeared in the *Illawarra Mercury*, of the 24th March last, under the heading

“ MUNICIPALITY OF NOWRA.

“ In our last page will be found the contents of the Petition from the inhabitants of “ Nowra and the neighbourhood, praying to be incorporated.—Go ahead ‘ Shoalhaven “ Diggings.’ ”

I appeal with confidence to your Excellency for protection from the injustice thus threatened to be perpetrated towards me. To you and your Executive Council alone can I look for such protection. The Act in question having provided no other means of averting the grievous wrong attempted.

I, therefore, respectfully and earnestly pray, that for the reasons herein stated, your Excellency will decline to comply with the prayer of the Petition.

There are objections of a technical nature to the Petition, to which I do not now advert, as I cannot believe it to be possible that this appeal will be made in vain.

I have, &c.,

ALEXR. BERRY.

[Enclosure in No. 4.]

Illawarra Mercury, Monday, December 27th, 1858.

THE SHOALHAVEN INCUBUS—AND ITS REMEDY.

To the Editor of the *Illawarra Mercury*.

LETTER No. II.

Sir,—The Municipal Corporations Act of the last Session of Parliament is destined to effect a salutary revolution in this Colony, second only in importance to that which will be effected by the famous Electoral Act for the reformed Parliament. The principle of the Act in question is, that all real property shall be subject to taxation for local purposes, and objects within the municipal district in which it is situated.

It was to this Act, and to its future and salutary operation, that I referred when I stated in my former letter on this subject, that in addition to the remedy in the hands of God for the enormous social and political grievance of the Shoalhaven District, there was also a remedy in the hands of man. In the ordinary course of nature Mr. Alexander Berry must, ere long, be summoned to answer before a higher tribunal than any upon earth for the use and abuse of the immense property with which he was entrusted, in the providence of God, and through his own insatiable cupidity, in the Shoalhaven District of New South Wales. That property was entrusted to Mr. Berry as one of his stewards in this lower world by the

the great proprietor of Heaven and Earth, and he was unquestionably bound to make use of it for the welfare and advancement of society, for the benefit of his fellowmen in the land he lived in. How he has discharged this, his bounden duty—how he has acquitted himself of this sacred trust in times past, my former letter on this subject will sufficiently shew. Leaving the Great Creator, therefore, to apply His own sovereign and effectual remedy for the Shoalhaven grievance when He pleases in His own time and way, let us now see what is practicable for the redress of this enormous grievance in the hands of men, under the Municipal Corporations Act passed in the last Session of the present Parliament.

The principle of the Act in question is, that it enables the inhabitants of any particular municipal district to tax themselves for all local purposes and improvements, for roads, bridges, wharves, the improvement of river navigation, &c; and the beauty of it is, that while the people under this Act are left to tax themselves, and while all tax-payers in the municipality are on precisely the same footing (the rich and the poor meeting together on perfectly equal terms, and the smallest proprietor's vote being equally influential with that of the largest,) all property, however acquired, and by whomsoever possessed, is subject to the same just measure under the same equitable law in proportion to its value. It is the want of such a measure for the last thirty years that has served to create and preserve those vast solitudes that are observable in other parts of the Colony as well as in the district of Shoalhaven, although it may be to a lesser extent the great land shark, the determined monopolist, like Mr. Berry, being permitted from time to time under the existing system to add to his domain, whether by grant or purchase, thousands and tens of thousands of acres, and leave it all as nearly as possible in a state of nature, till it should acquire an enormously increased value by the mere lapse of time and the progress of settlement in the adjoining localities, without ever contributing on account of his immense property either to the district or to the State.

There is no such folly or madness as this permitted to exist in any other civilized country under the sun. In other countries similarly situated, as in Canada and the United States, there is a local tax for local purposes and improvements imposed upon the land whenever it passes either by grant or purchase out of the hands of the Crown or the Public into those of any private proprietor, and although that tax is comparatively small in its amount, it is large enough to be felt pretty keenly, and lands acquired in either of the ways I have just mentioned, and left to lie waste by their proprietors, like ninety-nine out of every hundred acres of the Berry domain, are ever and anon sold by the Sheriff for the local rates. Now this process is productive of a highly salutary effect in two different ways—on the one hand, by subjecting all the property of any particular district to an equal and equitable amount of taxation, it stimulates and provides for all necessary public improvements, and thereby enabling the industrious man to obtain many advantages for his family of which he would otherwise be deprived, at a comparatively small cost, and to bring them up, in some degree at least, in the enjoyment of the blessings and comforts of civilization; on the other hand, it places a salutary check or restraint upon the would-be monopolist, as he knows right well that if he purchases more land than he already possesses, whether he allow it to lie waste or not, every acre of it will be subject to the local rates, which, although a mere trifle to the proprietor of a few acres, will amount to something very serious indeed to the proprietor of eighty or ninety thousand.

To take a single case in point, how greatly would it promote the advancement of the Shoalhaven District generally, and how much would it add to the comfort of the inhabitants of the upper part of the river, if the north arm of the Crookhaven River were cleared, so that the Sydney steamers could go up the main river as high as the small steamers go at present, without encountering the delays and the cost of transhipment, or having to wait for the high water to cross the flats, as at present? That single improvement—which I am told by those who know could be effected for a few thousand pounds—would add immensely to the comfort of the general population of the district, and would enhance the value of every acre of land and every town allotment along the river. No doubt the cost of such an improvement would fall upon the inhabitants, or rather upon the owners of property generally, but in what proportion? Why, supposing the rate for such a purpose to be only sixpence a pound on the yearly rental, which I do not suppose it would exceed to the very utmost—"I, John Jones, the owner of a half-acre allotment in the Government township, which, at Mr. Berry's standard of value for such property, would be worth five pounds a-year, saying nothing about the slab-hut I have built upon it, would be rated at half-a-crown per annum—no great amount, surely, for a good workman like myself." "I, Simon Frazer, the proprietor of a thirty-acre farm, valued at a pound an acre of yearly rent, would be rated at fifteen shillings—a mere nothing, compared with the additional cost to which I am subjected at present, by having to send my kegs of butter, my potatoes, and grain, by a small steamboat, to be transhipped into the large one at Greenwell Point." But what would Mr. Berry's quota be for this public improvement, which, to tell the plain truth, he does not want, and detests the very idea of? Why, sixpence an acre on 90,000 acres, would be exactly £2,250—a mere nothing, of course, to Mr. Berry; or, rather, no more (if half as much) to him than the fifteen shillings to Simon Frazer, or the half-crown to John Jones; and if Mr. Berry refused to pay that mere nothing, the Sheriff, or other authority in the case, would immediately attach the island in the Crookhaven River, which he bought the other day over the heads of the two industrious young men, who would otherwise have very soon transformed it into a perfect paradise, and sell it for the rates. And supposing another sixpence (making a shilling in all) were to be imposed by the vote of the Municipality for the roads and bridges of the district, thereby subjecting John Jones to the payment of five shillings in all, and Simon Frazer to thirty, the rate would amount to other £2,250, or £5,000 in all, to Mr. Berry. In short, the Berry domain is the veritable Shoalhaven Diggings, under the Municipal Corporations Act. And the best of it is, it is all "surfacing," for any Municipality that chooses to pick up the loose gold of the mammoth monopolist. There are no "deep sinkings" necessary in the case. It is all the simplest process imaginable, "cut and come again," being the word. And as to the quartz-crushing, which is necessary on the Adelong, and other diggings, and which requires rather expensive machinery, there will be nothing of the kind needed at the Berry diggings—the only thing to be crushed there being a miserable earth-worm, which can be done by the simplest possible process, the mere vote of the Shoalhaven Municipality.

No wonder, therefore, that Mr. Berry should be dead against a Municipality for the Shoalhaven District! No wonder that he should have sent out one of his rural police, or *gens d'armes*, in plain clothes, with a Petition against it, for all his serfs to sign! It is quite natural that he should do all this, considering his antecedents as a veritable land-shark for the last thirty five years. It is quite natural that he should indulge in all sorts of semi-maniacal ravings on this subject, giving the said policeman a semi-official memorandum of his own, although without his name, to accompany the Petition, in which he condescends to designate the much-respected and patriotic Member for the district, that "old canting fool," because, forsooth, he is in favor of a Municipality for Shoalhaven, which he, himself, the said Mr. Alexander thinks quite unnecessary for fifty years to come! All this, I say, is perfectly natural, and to be regarded as a matter of course on the part of the venerable land monopolist.

But how any of the smaller proprietors of Shoalhaven—for they are all small in the extent of their possessions, in comparison with Mr. Berry—how any of them can object to a Municipality for that district, surpasses my comprehension. But so it is, I am sorry to say. They can surely have no idea—these Shoalhaven people—how rich the Berry diggings are; otherwise there would be a perfect *rush* in the district for a Municipality. How small an amount, even at the rate of a shilling in the pound on their valued rental, would any of these proprietors have to pay, in comparison with the immense amount that would be payable from the Berry domain! And, considering that that whole amount, together with an equal amount for so many years from the General Revenue, would be available for

public

public improvements of all kinds in the district, the value of property throughout the Shoalhaven district would be exceedingly enhanced, and the material comfort of all classes of the inhabitants indefinitely increased, at a mere trifle of cost to the smaller proprietors.

One of the arguments commonly made use of against Municipal Corporations, for particular localities—and such an argument, I understand, has not been unheard of even at Shoalhaven—is, that if we should once set a-going a taxing machine, it would go on, in spite of us, like the Dutchman's cork leg, that went by machinery, and there would be no saying where it would carry us. This, I reply, would be all very true, if the taxation were to be imposed by other people: but the Act provides that it shall be imposed, in every instance, by the tax-payers themselves; and these tax-payers are surely the best parties to decide how far they can or will go in that particular direction.

Again. It is urged that the same property will be taxed twice over, both in the case of the landlord and of the tenant; but this is quite a mistake, or, rather, it is a mere chance allegation, put forth to frighten simple-minded people. No property can, in any case, be taxed twice over. Either the landlord or the tenant must pay the rate, but not both. Sworn valuers of all property in the district will, of course, be appointed by the Municipality, but any item of that property will only be subjected to taxation once.

But the future Shoalhaven Municipality will have it in its power to render good service both to the State and to the district. It is alleged there that Mr. Berry's grants and purchases amount only to about 8,000 acres, but that he is actually in possession of at least 10 or 15,000 acres, to which he has no right or title whatsoever. The Municipality will, therefore, have to petition the Government, and get the Member for the district to move, in the Reformed Parliament, for a copy of all grants to Mr. Berry, and those he holds from, with an account of all his purchases; that a survey and measurement of his domain, together with that of all the other land in the district, should be effected, and the public get their own again, if any portion of the domain should have been unjustly annexed, either by Mr. Berry or others.

Although I have written exclusively of the Shoalhaven District in this letter, there are many other Municipal Districts throughout this Colony to which the same remarks as those I have made in reference to that district will apply in a greater or lesser degree, although there is no such flagrant case of monopoly as Mr. Berry's to be found or dealt with in any other part of the Colony, there will be something for example for the Wollongong District Municipality to deal with of a similar kind, and Mr. Berry himself is, unfortunately, likely to be as much a marked man for taxation at the North Shore in this harbour as he is at Shoalhaven—Horror of Horrors! They are talking of a Municipal Corporation at St. Leonard's, also, where Mr. Berry is lord of the manor, and, doubtless, as fair a mark for municipal taxation as he is even at Shoalhaven. They tell of an old West India merchant, in my native town of Greenock, who had been taught to repeat the "Psalms of David in metre" by his pious father, a worthy Presbyterian Minister, when he was a hopeful and promising boy; on one occasion when returning home from a convivial party at two o'clock in the morning, and when, to use the common expression, he found the breadth of the street more distressing than its length, he was heard singing as best he could to one of our old Scotch psalm tunes—

"The troubles that afflict the just,
"In number many be."

I suspect when both the St. Leonard's and the Shoalhaven Municipalities come into being, and lay hold at once on the doomed victim of municipal taxation, Mr. Berry will be more than half inclined to take up the same dismal lament. In the country to the northward, the Australian Agricultural Company have diggings for several Corporations to get hold of, and if the united claims of such Municipalities should accelerate the breaking up of that worthless concern, which, with such high pretensions at its outset, has hitherto done so little for the Colony, there will be no loss to the State.

In conclusion, the District Municipalities Act is destined to work out a social revolution of the most salutary description for this whole Colony; and, as the Shoalhaven District is the one in which such an institution will have the most enormous abuse to deal with, and will well deserve the utmost credit from the community, if it does so fearlessly and honestly, I trust there will be liberal and energetic men enough in that noble district to bring it into immediate and effective operation, and thereby to set a bright example to all the Colony. With the Electoral Act on the one hand, and the Municipal Corporations Act on the other, we have much to thank the Cowper Ministry for, in taking two such steps at once in the right direction. Let us avail ourselves, therefore, of our privileges in both respects, and do all that in us lies to elevate our noble country to the high position it is destined to attain among the nations of the earth.

I am, &c.,
JOHN DUNMORE LANG.

No. 5.

ALEXANDER BERRY, ESQ., to THE COLONIAL SECRETARY.

Sydney, 5 May, 1859.

SIR,

I did myself the honor, on the 8th ultimo, of addressing a letter to His Excellency the Governor General, on the subject of a Petition of certain inhabitants of Greenhills, the Town of Nowra, and a few people of Good Dog, to erect a large portion of my property at Shoalhaven into a Municipality, with which letter I also sent a copy of a Petition of inhabitants opposed to any Municipality in the district in question; also a sketch of their proposed Municipality, and a copy of the second letter, headed "Shoalhaven Incubus," published in the *Illawarra Mercury* by the Revd. Dr. Lang.

My letter and the abovementioned documents were transmitted by Mr. Alfred Denison on the 11th ultimo to the Secretary of Lands and Public Works, and, from a communication received from that department, I learn that they were sent to your office on the 18th ultimo.

I, therefore, now do myself the honor of transmitting to you the original Petition against a Municipality, signed by 362 individuals, all householders, and residing within the district.

My former letter to His Excellency was so full and explicit that it requires only a few additions.

1st. I may call your attention to the fact that in a large portion of my property on the north side of the Shoalhaven River, and west of Broughton's Creek, containing upwards of 20,000 acres, the Nowra Petition contains only four names, at a place called Jasper's Creek, and only about twenty-six at another place more to the westward, called Good Dog.

2nd. That many of the names attached to the Petition in favor of the Municipality will be found to be apocryphal, as appears from a memorandum which I have received and now attach. These are only given by way of example of the manner in which the Petition has been got up, but I am satisfied I shall be able, and I undertake to prove that many of the alleged signatures to the Petition for the Municipality are not genuine, that many of those alleged to have signed it, have signed the Petition now enclosed against it, and that equally valid objections exist against others of the alleged signatures to the Petition in favor of the Municipality if a scrutiny be allowed, as I presume it will be if the application for constituting the proposed Municipality be not refused upon the higher grounds of objection set forth in my letter to His Excellency. In fact, I attach comparatively little weight to the irregularities to which I have adverted, (although I believe them to be, and insist upon them as being fatal to the application); what I emphatically protest against is the attempt of an unprincipled minority to overrule a majority under any sham or trickery, and extending the Municipality of the *embryo* village of Nowra across the Shoalhaven River into the County of Camden.

I have, &c.,

ALEXR. BERRY.

THE HONORABLE

THE COLONIAL SECRETARY.

[Enclosure 1 in No. 5.]

To His Excellency SIR WILLIAM THOMAS DENISON, Knight, Commander of the Most Honorable Order of the Bath, Governor General in and over Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, and Captain-General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, &c., &c., &c.

We, the undersigned Petitioners, householders of the Police District of Shoalhaven, respectfully state to your Excellency, that it has come to our knowledge that certain individuals, residing in said District, are desirous of establishing a Municipality in terms of the Colonial Act of Parliament, 22 Victoria, No. 13.

Therefore we, the undersigned householders, respectfully Petition that your Excellency will not sanction the establishment of any Municipality in the District of Shoalhaven in terms of said Act, such a Municipality being altogether premature, unsuited to our circumstances, and would prove highly prejudicial to our interests.

And your Petitioners will ever pray.

(Enclosure 2 in No. 5.)

LIST of the names of some of the Persons who have signed the Nowra Municipality Petition, who are open to objection.

<i>Name.</i>	<i>Residence.</i>	<i>Objection.</i>
John Robertson	Greenhills...	{ Mr. Berry's tenant at Broughton Creek, does not reside at Greenhills, and has signed contra Petition.
Mrs. Halerow	Greenhills...	No female entitled to vote.
John Sheidel	Nowra	Unnaturalized foreigner.
M. A. Hyam	Nowra Hill..	Infant, under 21 years of age.
Owen Newett	Nowra	No right, squatting on Government land.
William Rose	Nowra	Does not reside in the district.
Oswald Hitchcock	Greenhills...	Signed the counter Petition.
John Moses Murphy ...	Greenhills...	Signed the counter Petition.
John Rowen.....	Greenhills...	Signed the counter Petition.
John Riordon	Good Dog ...	{ No such person known at Good Dog, except John Riordon, who signed counter Petition.
John Riordon	Good Dog ...	{ No such person known at Good Dog, except John Riordon, who signed counter Petition.
James Coffey	Bolang	No such person known at Bolang.
William Roach	Bolang	No such person known at Bolang.
Henry Kruansturiver ...	Kaddabister	Unnaturalized foreigner.
Joseph Watts	Nowra	Name inserted without leave.
John Sullivan	Depôt	Signed the counter Petition.

No. 6.

*Colonial Secretary's Office,
Sydney, 28th May, 1859.*

MUNICIPAL INSTITUTIONS.

NOWRA, NOWRA HILL, GREENHILLS, AND GOOD DOG COUNTER PETITION.

HIS EXCELLENCY THE GOVERNOR GENERAL, with the advice of the Executive Council, has directed the publication of the substance and prayer of a counter Petition, to His Excellency as hereinafter set forth, presented on the 7th instant, and signed by three hundred and sixty-two householders of the Police District of Shoalhaven—such counter Petition being in opposition to a Petition previously presented from the same locality, and gazetted on the 17th March last.

CHARLES COWPER.

The counter Petitioners state that it has come to their knowledge, that certain individuals residing in the Shoalhaven District are desirous of establishing a Municipality in terms of the Colonial Act of Parliament, 22 Victoria, No. 13; and they petition as follows, viz., "That your Excellency will not sanction the establishment of any Municipality in the District of Shoalhaven, in terms of said Act, such a Municipality being altogether premature, unsuited to our circumstances, and would prove highly prejudicial to our interests."

[Here follow the Signatures as in Petition.—See Enclosure 1 in No 5.]

No. 7.

ALEXANDER BERRY, ESQ. to THE COLONIAL SECRETARY.

*Lyons' Buildings, George-street,
Sydney, 26 May, 1859.*

SIR,

I do myself the honor, in reference to the Nowra and Good Dog Petition for a Municipality at Shoalhaven published in the Supplementary *Government Gazette* of the 15th March last, to transmit for your consideration, three additional Petitions containing twenty names against such Municipality.

George Miller, one of the Nowra petitioners was yesterday convicted of stealing my cattle.

THE HONORABLE

THE CHIEF SECRETARY.

&c., &c., &c.

I have, &c.,

ALEXR. BERRY.

[Enclosure in No. 7.]

To His Excellency Sir William Thomas Denison, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, &c., &c., &c.

We, the undersigned Petitioners, householders of the Police District of Shoalhaven, respectfully state to your Excellency that it has come to our knowledge that certain individuals residing in the said district are desirous of establishing a Municipality in terms of the Colonial Act of Parliament 22 Victoria, No. 13.

Therefore, we, the undersigned householders respectfully petition that your Excellency will not sanction the establishment of any Municipality in the District of Shoalhaven in

terms

terms of the said Act, such a Municipality being altogether premature, unsuited to our circumstances, and would prove highly prejudicial to our interests.

And your Petitioners will ever pray.

William Ringland, Greenhills, innkeeper.
John Windon, Broughton Creek, settler.
James Waddington, Borangily, farmer.
James Kidd Murray, Nowra, baker.
James Cumberland, Rock Hill, farmer.
James Graham, Greenhills, farmer.

George Lee, Greenhills, householder.
Witness to signature, J. M'Donald.
George Gray, Hadabester, farmer.
Henry Cranstiver, Hadabester, farmer.
Michael Daley, Good Dog, farmer.
Patrick Dwyer, Good Dog, farmer.
Joseph Smith, Good Dog, farmer.

Joseph Goodwin, Barnnelly, householder.
Daniel M'Graw, Greenwell Point, householder.
Witness to signature, J. M'Donald.
Henry Thumbey, Greenwell Point, householder.
Duncan M'Lean, Broughton Creek, farmer.
Andrew Mowat, Broughton Creek, farmer.
William Belsham, Lower Numba, householder.
Samuel Breett, Lower Numba, farmer.
Witness to signature, Henry G. Morton.
David M'Kee, Black Forest, householder.

*Colonial Secretary's Office,
Sydney, 13 June, 1859.*

MUNICIPAL INSTITUTIONS.

NOWRA, NOWRA HILL, GREENHILLS, AND GOOD DOG ADDITIONAL COUNTER PETITIONS.

HIS EXCELLENCY THE GOVERNOR GENERAL, with the advice of the EXECUTIVE COUNCIL, has directed the publication of the substance and prayer of three additional counter Petitions to His Excellency as hereinafter set forth, presented on the 28th ultimo, and signed by twenty householders of the Police District of Shoalhaven—such counter Petitions being in opposition to a Petition previously presented from the same locality, and gazetted on the 17th March last.

CHARLES COWPER.

The counter Petitioners state that it has come to their knowledge, that certain individuals residing in the Shoalhaven District are desirous of establishing a Municipality, in terms of the Colonial Act of Parliament 22 Victoria, No. 13; and they petition as follows, viz., "That your Excellency will not sanction the establishment of any Municipality in the District of Shoalhaven in terms of said Act, such a Municipality being altogether premature, unsuited to our circumstances, and would prove highly prejudicial to our interests."

[Here follow the Signatures as in the foregoing Petitions. See Enclosure in No. 7.]

No. 9.

To His Excellency Sir William Thomas Denison, Knight, Governor General of the Australasian Colonies, Vice-Admiral of the same, and Governor-in-Chief of New South Wales and its dependencies;

And to the Honorable the Executive Council.

The Petition of the Nowra Municipal Committee

MOST HUMBLY SHEWETH:—

That your Petitioners having read the Nowra counter Petition, gazetted on 2nd June, beg that it will not have the effect intended, on the following grounds.

That

That the said counter Petition is quite informal, most of the signatures appended thereto being of parties *not within* the area of the proposed Municipality.

That said counter Petition only contains the names of 45 householders living within the boundaries of the proposed Municipality of Nowra and Suburbs, consequently there is a great majority in favor of the original Petition, gazetted on 17th March last.

That Petitioners most respectfully beg to append a statement signed by the District Constable—the Collector of the Electoral Roll, in reference to the true number of householders on the counter Petition residing within the proposed Municipality.

Therefore your Petitioners, in submitting the above protest against the Counter Petition, hope that your Excellency and the Honorable the Executive Council will be pleased to sanction the prayer of the original Petition for a Municipality for Nowra and Suburbs.

And your Petitioners, as in duty bound, will ever pray.

Michl. Ryan,
Henry Moss,
James Graham,
James M'Guire,
Thomas Dillon,
Z. Bice,
George Tong.

[*Enclosure 1 in No. 9.*]

I certify there are only forty-five persons' names in the counter Petition against the Municipality of Nowra, Nowra Hill, and Good Dog, that are within the limits of the Petition gazetted on the 17th March last.

Shoalhaven 24 June, 1859.

BERNARD BROWN,
Collector of the Electoral Roll.

[*Enclosure 2 in No. 9.*]

Shoalhaven, 25 June, 1859.

Dear Sir,

Enclosed I beg to forward a Petition from the Nowra Municipal Committee, relative to the counter Petition against the original one.

We hope you will be good enough to present this to Mr. Cowper, with a request that Nowra be proclaimed as soon as possible, as the big men here are doing all they can to thwart Nowra.

I mentioned to Mr. Garrett that we intended to write you, and he appeared very pleased at your interesting yourself in this matter, which as we first placed it in your hands, hope you will be good enough to interest yourself to the end.

Rev. J. D. Lang,
Sydney.

I am, &c.,
H. MOSS,
Hon. Secretary.

No. 10.

UNDER SECRETARY to UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

*Colonial Secretary's Office,
Sydney, 9 July, 1859.*

SIR,

With reference to my letter of the 18th April, No. 63, I am directed to transmit to you the accompanying Petition from the inhabitants of Nowra, Nowra Hill, Greenhills, and Good Dog, praying to be incorporated under the Municipalities Act of 1858, together with other papers relating thereto, and to request that you will move the Secretary for Lands and Public Works to cause a report to be obtained from the Surveyor General, whether the boundaries proposed for the Municipality, as described in the Petition, interfere with those of other Municipalities in the same district, or whether there appears to be otherwise any objection to the adoption by the Government of the proposed boundaries.

THE UNDER SECRETARY FOR
LANDS AND PUBLIC WORKS.

I have, &c.,
W. ELYARD.

No. 11.

MR. J. GRAHAM to COLONIAL SECRETARY.

Greenhills, Shoalhaven, 9 July, 1859.

SIR,

I do myself the honor to bring under your notice the following circumstances, to which I respectfully request your attention, viz.:—

In the Supplement to the *Government Gazette* of Friday, 24th June, is published a counter Petition to that in favor of the Nowra Municipality to which my name is attached.

I beg to assure you that I never signed such or any counter Petition, nor did I authorize any person to affix my name to it.

I would beg to add that I and others did sign a Petition against forming the whole district into one Municipality, and I have reason to believe that mine and other names so signed have been, without our privity or consent, attached to the counter Petition alluded to.

I would also respectfully draw your attention to the fact that, of the 20 names published, seven (named at foot) reside several miles beyond the stated boundaries of the proposed Nowra Municipality, and have no property whatever within said boundaries.

I have, &c.,

JAMES GRAHAM.

THE HONORABLE

Henry Thumbey, Greenhill Point.

No. 12.

SURVEYOR GENERAL'S REPORT.

*Surveyor General's Office,**Sydney, 2 August, 1859.*

The only portion of the boundary herein applied for which interferes with any other boundary proposed for a municipality, is where that herein proposed embraces a small portion of the south-western corner of the Police District of Kiama, as explained in my B. C. Report of 3rd August, 1859, No. 557, by which it was suggested that this boundary should be adopted.

The boundaries proposed do not appear to be open to material objection, although it will be desirable to make some small amount of survey, for record of position of boundaries and security to the Government, in proclamation, before preparing the description for proclamation.

Whether such survey should be made before it is finally decided whether the Municipality shall be proclaimed or not is a matter for decision.

In the portion of the proposed boundary which is described as "the said (coast) range to meet Kennedy's road," the range in question is represented by surveys to be a table land of considerable breadth, and as this land is still unalienated, it will be well to make the south-eastern extreme of the table land the boundary, as was probably intended by the Petitioners.

Again on the west and east, where roads are proposed as the boundaries, probably because they are known and comparatively definite, it does not seem that better boundaries

could well be found in the immediate vicinity, but it does seem to be very desirable that a principle should be laid down to govern the description of road boundaries.

Where a Municipality is bounded by a road, that road which should form one of the cares of the Municipal Council is obviously excluded from the Municipality, and therefore, perhaps, the best course would, in such cases, be to describe the boundary as the centre of the road, thus throwing half of the maintenance of the line on the land on each side.

GEO. BARNEY,
S. G.

THE UNDER SECRETARY
FOR LANDS AND PUBLIC WORKS.

MESSRS. JOHNSON & JOHNSON to THE COLONIAL SECRETARY.
181, Pitt-street, Sydney,
30 August, 1859.

SIR,

In the application to erect "Nowra, Nowra Hill, Greenhills and Good Dog" into a Municipality, we have been instructed by Mr. Alexander Berry to address you on the subject of a Memorial from him to His Excellency the Governor General, presented on the 8th of April last, respecting a Petition of certain Inhabitants of Greenhills, Nowra, Nowra Hill, and Good Dog, praying for the erection of a Municipality in that locality, to which Memorial he has not received any reply, beyond being informed, shortly after its presentation, that it had been referred to your department.

From the facts stated in that Memorial and the Petitions accompanying it, and the time which has since elapsed, we are induced to believe that the Executive Government has arrived at the conclusion that the application of the individuals who petitioned for the formation of the Municipality in question is one which cannot be granted; but as it is a matter of great importance to Mr. Berry, we shall feel obliged by being informed on his behalf how the matter at present stands.

We have, &c.,
JOHNSON & JOHNSON.

THE HONORABLE
THE COLONIAL SECRETARY,
&c., &c.

No. 15.

UNDER SECRETARY to MESSRS. RATNELL, HYAM, AND OTHERS.

*Colonial Secretary's Office,
Sydney, 31 August, 1859.*

GENTLEMEN,

With reference to the Petition for the establishment of a Municipality at Shoalhaven, to be divided into two Wards, I am directed by the Colonial Secretary to inform you that the application has been duly laid before the Executive Council, and that the necessary Proclamation constituting the Municipality will be published as soon as a survey of a portion of the boundaries, which the Surveyor General considers necessary to enable him to prepare a reliable description, is received, and which he states may be expected to be furnished to him by Mr. Licensed Surveyor Parkinson, in the course of the next week.

I have, &c.,

W. ELYARD.

MESSRS. WM. RATNELL, MICHAEL HYAM,
and others signing the Petition.

No. 16.

UNDER SECRETARY to MESSRS. JOHNSON AND JOHNSON.

*Colonial Secretary's Office,
Sydney, 2 September, 1859.*

GENTLEMEN,

In reply to your letter of the 30th ultimo, I am directed to inform you that the Petition for a Municipality at Shoalhaven, and the Petitions which have been received against the establishment of such Municipality, together with communications received from the Honorable Alexander Berry, on the subject, have been duly laid before the Executive Council, and that the necessary Proclamation constituting the Municipality will be published as soon as a survey of a portion of the boundaries, which the Surveyor General considers necessary to enable him to prepare a reliable description, is received, and which he states may be expected to be furnished to him by Mr. Licensed Surveyor Parkinson in the course of the next week.

I have, &c.,

W. ELYARD.

MESSRS. JOHNSON AND JOHNSON,

No. 17.

MESSRS. JOHNSON AND JOHNSON to COLONIAL SECRETARY.

*181, Pitt-street,
Sydney, 1 September, 1859.*

In the application to erect "Nowra," "Nowra Hill," "Greenhills," and "Good Dog," into a Municipality.

SIR,

Since writing our letter herein to you, dated the 30th ultimo, we have been informed by Mr. Berry that he has heard that the Government has decided upon granting the prayer of the individuals who petitioned for the erection of the Municipality in question.

Not having received any official communication on the subject he is of course not in a position to assume that what he has heard is true, but in order to prevent, as far as is in his power, the consummation of what he considers so great an act of injustice to him, he has instructed us formally to protest, as we hereby do, against the Government pursuing such a course, and respectfully to request that if the proposed Municipality has not already been actually created, he may be afforded an opportunity of being heard before the Executive Council, against it.

We have, &c.,

JOHNSON & JOHNSON.

UNDER SECRETARY to MESSRS. JOHNSON & JOHNSON.

Colonial Secretary's Office,

Sydney, 17 September, 1859.

GENTLEMEN,

Your letters of the 1st and 2nd instant, on the subject of the erection of Nowra, Nowra Hills, and Good Dog, into a Municipality, having been laid before the Executive Council, I am directed by the Colonial Secretary to inform you, that the formation of the Municipality having already been decided upon, as intimated to you in my letter of the 2nd instant, in pursuance of the Act of the local Parliament, 22 Vict., No. 13, and after a full consideration of all the representations addressed to the Government in favor of, and in opposition to such measure, it is the opinion of the Council that it is now quite beyond their power to re-open the matter, or to advise that the request of Mr. Berry, which you have submitted, that he may be heard before the Council on the subject, should be entertained.

I have, &c.,

W. ELYARD.

MESSRS. JOHNSON & JOHNSON,

No. 20.

MR. G. U. ALLEY to COLONIAL SECRETARY.

Shoalhaven, 12 September, 1859.

SIR,

I do myself the honor to submit to your grave consideration, the annexed extracts from a letter, which I considered it necessary to address to Mr. Surveyor Parkinson, relative to the boundaries of the "Nowra and Good Dog Municipality," especially the north-east line, to which I solicit your earnest attention.

The purpose of the *individual* who proposed a line so greatly at variance with the established rule of direct or due lines, was to enclose as much untenanted land of Mr. Berry as possible, to gratify personal feeling. If this course be permitted, it will be inferred that you have sanctioned it because Mr. Berry is opposed to your Government; well knowing that such is neither your wish nor purpose, I have considered it due to you to address the Surveyor on the subject.

The lines at foot represent the Wards of the proposed Municipality set forth in the Petition.

I have, &c.,

G. U. ALLEY.

THE HONORABLE

THE COLONIAL SECRETARY.

Extract.

“ The line running N.E. from Bummadaree to Jorams and Broughton Creek is, upon public grounds, most objectionable; upon private grounds unjust and unfair; and is, officially, an unnecessary and marked departure from the established simple rule which governs the survey and determining of boundary lines.

“ It is objectionable on public grounds, because in the event of Broughton Creek and Numba Lands being formed into a Municipality—a possibility not to be lost sight of—the proposed N.E. line would enclose a very large portion of property belonging to the Broughton Creek part of any Municipality that may be formed there.

2. “ It is unfair and unjust on private grounds, because the N.E. course runs wholly through a large part of property belonging to one person, unoccupied by tenants, without giving him any corresponding advantage for the heavy acreable cess he would have to pay; and thus wantonly taking the line out of its more legitimate course would appear to be more for the purpose of taking in a quantity of land, than necessary for the public good.

3. “ It is a marked departure from the officially established rule of marking boundaries; because, in the absence of natural features affording the means of defining boundaries, it has ever been the rule (more simple and better) to run the lines north, south, east, and west, without any variation; therefore, to depart in *this particular* instance from that rule, would lead to the impression that to gratify the sinister purposes of a few, the Government had sanctioned it, or were entrapped into acquiescence; against this I protest, both on behalf of the Government, and of the many fair dealing persons who agree with me.

“ I therefore recommend that the boundary lines of the Municipality be run due north, south, east, and west; that is, that the sea form the eastern, and the mountain ridge the north and portion of the west boundaries.

“ I have omitted to mention the very strange fact, that in order to accomplish the purpose of diverging N.E. instead of pursuing due north (that is, running the east line due north) the starting point of the eastern boundary of the Good Dog Ward starts one mile west of the east boundary of the Nowra Ward.

“ I would also remark, that if the natural and more correct boundary of the sea be relinquished, a large portion of land will lie between the proposed line and the sea, which will derive every advantage from the operation of the Municipality, without contributing a farthing; this is as unjust as it is unreasonable.

“ The limited and one-sided view of a few individuals should not be allowed to fetter the future operations of a well organized Municipal body, by excluding lands which, by running due lines, properly belong to the institution, nor cause them to act unjustly, by including lands within an improperly extended line, which official practice and justice forbid.

“ I trust you have sufficient authority to run the lines as I have suggested; if not, I request you will forward this letter to head quarters.

G. U. ALLEY.

Mr. Surveyor Parkinson,
&c., &c.,
Shoalhaven.

No. 21.

MEMO. on Mr. G. U. Alley's Letter in respect to the Nowra Municipality boundaries.

The north-east line, to which Mr. Alley objects so strongly, was applied for in the Memorial on which the Municipality is being established.

In the description prepared for Proclamation, however, this line has been omitted, and lines directed to the cardinal points, and which form the boundaries of lands alienated by the Crown, have been substituted.

The inclusion of the land between the Municipality, as proposed, and the sea, would have been contrary to the prayer of the Memorial, and I fail to perceive any grounds on which that inclusion could have been made, while it would probably have resulted in the presentation of a counter Petition, signed by a very large number of persons residing on the lower portion of the Shoalhaven, and who do not desire to be included in the Nowra Municipality.

A. G. M'LEAN.

ACTING SURVEYOR GENERAL to THE SECRETARY FOR LANDS AND WORKS.

*Surveyor General's Office,**Sydney, 15 September, 1859.*

SIR,

Referring to my blank cover report of the 25th ultimo, No. 612, I have now the honor to forward a description of the boundaries of the Nowra Municipality, as acceded to generally by the parties interested.

2. The name has been printed "Nowra" merely, but it may be altered or amended.

I have, &c.,

THE HONORABLE

A. G. M'LEAN,

THE SECRETARY FOR LANDS AND WORKS,

A. S. G.

&c., &c., &c.

[Enclosure in No. 22.]

In the Counties of St. Vincent and Camden; commencing at the confluence of Cabbagetree Creek with the Shoalhaven River; and bounded on part of the west by Cabbagetree Creek, upwards, to a marked tree on the Muddy Spring Branch, thence by a line forming partly the east boundary of Thomas Campbell's 1,280 acres, bearing south, to the Braidwood Road, thence by a line along the centre of that road, south-westerly, to a marked tree 4 miles in a direct line from the Yellow Waterhole; on the south by a line, bearing east, 381 chains; on the east by a line, bearing north, 65 chains to the south-west corner of A. Berry's 960 acres; again on the south and east by the south and east boundaries of that land, easterly, and northerly, to the south-west corner of the village reserve at the Falls, Currambene Creek; thence again on the south, east, and again south by the boundaries of that reserve, easterly, northerly, and again easterly, crossing Currambene Creek, to its intersection with the southerly prolongation of the boundary dividing Jas. Layton's 640 acres, James Graham's 85 acres 2 roods, and 101 acres 2 roods, Alex. K. M'Kay's 307 acres 2 roods, Bernard Brown's 303 acres 28 perches, and a measured portion of 303 acres 2 roods and 32 perches, from Prospere De Mestre's 1,300 acres, "Terrara," a measured portion of 293 acres, John Alex. Irving's 299 acres, and a measured portion of 300 acres; thence on the east by that line, bearing north, to the Shoalhaven River, thence by that river, upwards, to the Bomaderry Ferry, thence crossing the river at that ferry to the landing place, thence by the left bank of the Shoalhaven River, downwards, to the south-east corner of John Berry's 1,082 acres, thence by the east boundary of that land, northerly, and the south and east boundaries of John Berry's 640 acres, easterly, and northerly, to Jaram Creek, by that creek, downwards, to its confluence with Broughton Creek, by that creek upwards, to the confluence of Broughton Mill Creek, and by Broughton Mill Creek, upwards, to the south boundary of the Municipality of Kiama; on the north by part of that boundary, being a line bearing west from the head of the Crooked River, and its westerly prolongation to the summit of the mountain, thence by the south-east fall of the mountain, excluding the table land, to the northerly prolongation of the west boundary of Patrick M'Grath's 100 acres; on the remainder of the west by that prolongation, the west boundary of Patrick M'Grath's 100 acres, aforesaid, and its southerly prolongation to the north boundary of Robert Owen's 310 acres by the north boundary of that land and R. Owen's 48 acres, bearing west, to the north-west corner of that 48 acres, thence by the west boundary of that land, and west and south boundaries of Isaac Barday's 30 acres, southerly, and easterly, to the north-west corner of Thomas M'Kenzie's 55 acres, thence by the west boundary of that land and a line, southerly, to the north-west corner of Alex. Berry's 732 acres, and by the west boundary of that land, southerly, to the Shoalhaven River; and again on the south by that river, downwards, to a point opposite to the confluence of Cabbagetree Creek with that river, and thence by a line to that confluence.

No. 23.

MUNICIPALITY OF SHOALHAVEN.

PROCLAMATION.

By His Excellency SIR WILLIAM THOMAS DENISON, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, &c., &c., &c.

WHEREAS by an Act of the Parliament of New South Wales, passed in the twenty-second year of the reign of Her present Majesty, intituled, "*An Act for establishing Municipal Institutions,*"

"*Institutions*," and commonly styled and cited as "*The Municipalities Act of 1858*," it was amongst other things enacted, that any City, Town, or Hamlet, then or thereafter established, or any Rural District, might, as therein provided, be constituted a Municipality; and it was by the said Act enacted, that the Governor, with the advice of the Executive Council, might, on the receipt of a Petition signed by not fewer than fifty householders resident within any such City, Town, Hamlet, or Rural District, praying that the same might be declared a Municipality under the said Act, and stating the number of the inhabitants thereof, cause the substance and prayer of such Petition to be published in the *Government Gazette*; and unless a Counter Petition, signed by a greater number of householders, resident as aforesaid, should be received by the Colonial Secretary within three months from the date of such publication, the Governor, with the advice aforesaid, might, by Proclamation published in like manner, declare such City, Town, or Hamlet, or such Rural District, to be a Municipality, by a name to be mentioned in such Proclamation, and might also, by the same or any other Proclamation, define the limits and boundaries thereof, and that upon such publication the Municipality should be constituted accordingly: And it was further enacted that, if any such Petition should contain a request that the desired Municipality should be divided into Wards, the Governor, with the advice aforesaid, might, by the same or any other Proclamation, declare such Municipality to be divided if the population thereof exceed one thousand, into three Wards, and if below that number into two Wards: And whereas a Petition, signed by one hundred and three householders residing at Nowra, Nowra Hill, Green Hills, and Good Dog, in the Counties of St. Vincent and Camden, in the Colony of New South Wales, praying that the same might be declared a Municipality, and divided into two Wards under the provisions of the said Act, and stating that the number of the inhabitants thereof was not less than six hundred, was presented to the Governor, the substance and prayer of which Petition were duly published in the *Government Gazette*, in accordance with the provisions of the said Act: And whereas no Counter Petition signed by a greater number of householders resident within the said Rural District of Nowra, Nowra Hill, Green Hills, and Good Dog, was received by the Colonial Secretary within three months from the date of such publication: And whereas the Governor, with the advice of the Executive Council, has in exercise of the powers conferred by the said Act, determined to declare by Proclamation such Rural District to be a Municipality by the name hereinafter mentioned, and to divide the said Municipality into two Wards with the limits and boundaries hereinafter defined: Now, therefore, I, Sir William Thomas Denison, the Governor General and Governor-in-Chief aforesaid, in pursuance of the provisions of the said Act, and with the advice of the Executive Council, do by this my Proclamation declare that the District to be divided into two Wards hereinafter described and named, shall be a Municipality within the meaning of the said Act, and that the limits and boundaries of the said Municipality, and limits and boundaries of the said Wards forming the said Municipality shall be as follows, that is to say:—

MUNICIPALITY OF SHOALHAVEN.

In the Counties of St. Vincent and Camden; commencing at the confluence of Cabbagetree Creek with the Shoalhaven River; and bounded on part of the west by Cabbagetree Creek, upwards, to a marked tree on the Muddy Spring Branch, thence by a line forming partly the east boundary of Thomas Campbell's 1,280 acres, bearing south, to the Braidwood Road, thence by a line along the centre of that road, south-westerly, to a marked tree 4 miles in a direct line from the Yellow Waterhole; on the south by a line, bearing east, 381 chains; on the east by a line, bearing north, 65 chains to the south-west corner of A. Berry's 960 acres; again on the south and east by the south and east boundaries of that land, easterly and northerly, to the south-west corner of the village reserve at the Falls, Currambene Creek; thence again on the south, east, and again south, by the boundaries of that reserve, easterly, northerly, and again easterly, crossing Currambene Creek, to its intersection with the southerly prolongation of the boundary dividing Jas. Layton's 640 acres, James Graham's 85 acres 2 roods, and 101 acres 2 roods, Alex. K. McKay's 307 acres 2 roods, Bernard Brown's 303 acres 28 perches, and a measured portion of 303 acres 2 roods and 32 perches, from Prospre De Mestre's 1,300 acres, "Terrara," a measured portion of 293 acres, John Alex. Irving's 299 acres, and a measured portion of 300 acres; thence on the east by that line, bearing north, to the Shoalhaven River, thence by that river, upwards,
to

to the Bomaderry Ferry, thence crossing the river at that ferry to the landing place, thence by the left bank of the Shoalhaven River, downwards, to the south-east corner of John Berry's 1,082 acres, thence by the east boundary of that land, northerly, and the south and east boundaries of John Berry's 640 acres, easterly, and northerly, to Jaram Creek, by that creek, downwards, to its confluence with Broughton Creek, by that creek, upwards, to the confluence of Broughton Mill Creek, and by Broughton Mill Creek, upwards, to the south boundary of the Municipality of Kiama; on the north by part of that boundary, being a line, bearing west from the head of the Crooked River, and its westerly prolongation to the summit of the mountain, thence by the south-east fall of the mountain, excluding the table land, to the northerly prolongation of the west boundary of Patrick M'Grath's 100 acres; on the remainder of the west by that prolongation, the west boundary of Patrick M'Grath's 100 acres, aforesaid, and its southerly prolongation to the north boundary of Robert Owen's 310 acres, by the north boundary of that land and R. Owen's 48 acres, bearing west, to the north-west corner of that 48 acres, thence by the west boundary of that land, and west and south boundaries of Isaac Barday's 30 acres, southerly, and easterly, to the north-west corner of Thomas M'Kenzie's 55 acres, thence by the west boundary of that land and a line, southerly, to the north-west corner of Alex. Berry's 732 acres, and by the west boundary of that land, southerly, to the Shoalhaven River; and again on the south by that river, downwards, to a point opposite to the confluence of Cabbagetree Creek with that river, and thence by a line to that confluence.

WARDS.

Nowra Ward:—Commencing at the confluence of Cabbagetree Creek with the Shoalhaven River; and bounded on the west, south, and east by the Municipality boundary, southerly, easterly, and northerly, to the Shoalhaven River; and on the north by that river, upwards to Cabbagetree Creek aforesaid.

Good Dog Ward:—Commencing on the Shoalhaven River, at the south-west corner of Alexander Berry's 732 acres, and bounded on the west, north, and east, by the Municipality boundary, northerly, easterly, and southerly, to the Shoalhaven River; and on the south by that river, upwards, to the south-west corner of Alexander Berry's 732 acres aforesaid.

And I do hereby, with the advice aforesaid, declare and direct that such Municipality shall be called by the name of "The Municipality of Shoalhaven."

Given under my Hand and the Seal of the Colony, at Government House, Sydney, this twenty-first day of September, in the year of our Lord one thousand eight hundred and fifty-nine, and in the twenty-third year of Her Majesty's Reign.

(L.S.) W. DENISON.

By His Excellency's Command,
CHARLES COWPER.

GOD SAVE THE QUEEN!

No. 24.

MUNICIPALITY OF SHOALHAVEN.

PROCLAMATION.

By His Excellency SIR WILLIAM THOMAS DENISON, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia and Western Australia, and Captain-General and Governor-in-Chief of the Territory of New South Wales, and its Dependencies, and Vice-Admiral of the same, &c., &c., &c.

WHEREAS by a certain Proclamation dated the twenty-first day of September, one thousand eight hundred and fifty-nine, and duly made and published under the provisions contained in the "*Municipalities Act of 1858*" in a Supplement to the *Government Gazette* of the twentieth day of September, one thousand eight hundred and fifty-nine, a certain District in the

the said Proclamation described and named, and the limits and boundaries whereof were thereby defined, was by the said Proclamation declared to be "a Municipality," within the intent and meaning of the said Act, by the name and style of the "Municipality of Shoalhaven," and the electors for the time being of the said Municipality, immediately upon such publication as aforesaid, became and were a Body Corporate, under such name and style: And whereas it is by the said Act provided and declared, that on a day to be notified by the Governor with the advice of the Executive Council, within three months after the incorporation of such Municipality,—and twice published in the *Government Gazette* and once in some local newspaper nearest to such municipality, not being less than twenty days or more than forty days from the date of such first publication,—the Returning Officer who, at the first election shall be named in such notice, shall preside at such meeting of Electors as in the said Act is authorized to be holden; and such elections and further proceedings shall be taken as are in the said Act authorized to be taken after such notice as aforesaid: Now, therefore, I, SIR WILLIAM THOMAS DENISON, in pursuance of the provisions of the said Act and with the advice of the Executive Council do, by this my Proclamation, nominate and notify that MR. JOHN M'ARTHUR, of Shoalhaven, shall be the first Returning Officer of the said Municipality, and that the first Meeting of the said Electors shall be held at noon, at such place at Shoalhaven as may be fixed for the purpose by public notice, on Wednesday, the nineteenth day of October, one thousand eight hundred and fifty-nine, for the purposes of the said Act.

Given under my Hand and the Seal of the Colony, at Government House, Sydney, this twenty-seventh day of September, in the year of our Lord one thousand eight hundred and fifty-nine, and in the twenty-third year of Her Majesty's Reign.

(L.S.) W. DENISON.

By His Excellency's Command,
CHARLES COWPER.

GOD SAVE THE QUEEN!

No. 25.

THE UNDER SECRETARY to MR. J. M'ARTHUR.

Colonial Secretary's Office,
Sydney, 27 September, 1859.

SIR,

His Excellency the Governor General, with the advice of the Executive Council, having by a Proclamation dated the 21st instant, and duly published in the *Government Gazette*, declared the District of Shoalhaven to be a Municipality, within the meaning of the Act, 22 Victoria, No. 13, to be called the Municipality of Shoalhaven, I am directed to inform you that His Excellency, with the advice of the Executive Council, has been pleased to appoint you to be the first Returning Officer of the Municipality.

2. A copy of the Proclamation in which your appointment is notified is transmitted herewith, and you will observe that the first meeting of Electors is to be held at noon, at such place at Shoalhaven as may be fixed for the purpose, on Wednesday, the 19th proximo, and I am to request that you will have the goodness to cause the proclamation to be once published in the nearest local newspaper, as required by the 12th clause of the Act, and to give the necessary notice of the place where the meeting of Electors will be held.

3. I am at the same time desired to enclose for your information, a copy of the Municipalities Act, the 12th and following clauses of which prescribe the duties devolving on Returning Officers, and the steps to be taken for the election of Councillors, and subsequently of the Chairman of the Council, who, as provided for in the 35th clause, will be the future Returning Officer.

4. You will observe, on reference to the 37th clause of the Municipalities Act, that the election of Auditors must also take place on the day fixed for the election of Councillors.

I have, &c.,

MR. JOHN M'ARTHUR,
Returning Officer for the
Municipality of Shoalhaven.

W. ELYARD.

No. 26.

ALEXANDER BERRY, ESQ., to SECRETARY FOR LANDS AND PUBLIC WORKS.

*Lyons' Buildings, George-street,
Sydney, 19 April, 1859.*

SIR,

I did myself the honor of addressing a letter to His Excellency the Governor General on the 8th instant, in opposition to the Petition of certain inhabitants of the village of Nowra, Greenhills, and Good Dog, accompanied with sundry explanatory documents, which Petition, with one hundred and three names, was published in the *Government Gazette* of the 15th ultimo.

Since then, I have been informed by Mr. Alfred Denison, the Private Secretary, that my letter and documents had been sent, on the 11th instant, to the Secretary for Lands and Public Works, for the consideration of the Government, since which I have received no communication on the subject.

Therefore, as this is a matter of great consequence to myself, I request to draw your attention to the subject, and to ask the favor of being informed what steps the Government intend to take in the matter.

I have, &c.,

THE HONORABLE

THE SECRETARY FOR

LANDS AND PUBLIC WORKS.

ALEXANDER BERRY.

No. 27.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to ALEXANDER BERRY, ESQ.

*Department of Land and Public Works,
Sydney, 29 April, 1859.*

SIR,

Alluding to your letter of the 19th instant, drawing attention to a former communication in which you protested against the establishment of a Municipality in the District of Shoalhaven; I am directed to refer you to my letter of the 18th instant on this subject, apprising you that the case was referred to the Surveyor General.

I have, &c.,

THE HONORABLE A. BERRY, ESQ., M.L.C.,
North Shore.

MICHL. FITZPATRICK.

No. 28.

ALEXR. BERRY, ESQ., to UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

*Lyons' Buildings, George-street,
Sydney, 3 May, 1859.*

SIR,

I beg to acknowledge the receipt of your letter of the 29th ultimo, informing me that the case of the Nowra Municipality had been submitted to the Surveyor General.

In consequence I called this morning at his office, when I ascertained that the original Nowra Petition only had been submitted to him, without any reference whatever to my protest.

I have, &c.,

M. FITZPATRICK, ESQ.,
Department of Land and Public Works.

ALEXR. BERRY.

No. 29.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to ALEXR. BERRY, ESQ.

*Department of Land and Public Works,
Sydney, 9 May, 1859*

SIR,

I am directed to inform you that your letter of the 3rd instant, on the subject of the proposed Municipality at Nowra, has been forwarded to the Honorable the Chief Secretary, to whom, as stated in my communication of the 18th ultimo, your protest in the matter was referred, and not to the Surveyor General, as was erroneously stated in my letter of the 29th ultimo.

I have, &c.,

THE HONORABLE A. BERRY, ESQ., M.L.C.,
Lyons' Buildings, George-street.

MICHL. FITZPATRICK.

No. 30.

SURVEYOR GENERAL to MR. LICENSED SURVEYOR PARKINSON.

*Surveyor General's Office,
Sydney, 5 August, 1859.*

SIR,

I beg to enclose a tracing and description of the proposed Municipality of Nowra, Nowra Hill, &c., and request that, for accuracy in the preparation of the description to be proclaimed in the *Government Gazette*, you will survey the wall from Currambene Creek to the south boundary of the measured portion south of M'Kays, and the line described from Bunbera Creek to Broughton Creek, including Joram's Creek.

2. You will likewise ascertain and report which is Kennedy's Road, and which Cabbagetree Creek, also the Yellow Waterhole.

I am, &c.,

MR. LICENSED SURVEYOR PARKINSON.

GEO. BARNEY, S.G.

[*Enclosure in No. 30.*]

BOUNDARIES OF NOWRA, NOWRA HILL, &c.

Commencing at the point where Cabbagetree Creek enters the Shoalhaven River; thence by said creek as far as where it meets the Braidwood Road, and by said road south four miles beyond the Yellow Waterhole; then by a line east to meet the Jervis Bay or southern road, where it intersects Currambene Creek at the Upper Falls, and by the said southern road to meet Mr. K. Mackay's boundary line; thence continued said line direct along Messrs. Graham and De Mestre's boundary to Shoalhaven River; then by a line north and south from Berry's Wharf, Greenhills, across the Shoalhaven River to Bumaderry Creek; then by a line bearing east two chains; then by a line about north-east to the edge of the swamp at the back of William Kennedy's; and by said margin of swamp as far as Shean's corner of paddock; then by a direct line north-east to Jaram Creek; and by said creek to its confluence with Broughton Creek; and by said Broughton Creek upwards as far as its junction with Broughton Mill Creek; then by Broughton Mill Creek to the Coast Range; and by said range, being a line bearing about south-west to meet Kennedy's Road; and by said road to the Shoalhaven River; and by said river to point of commencement.

No. 31.

ACTING SURVEYOR GENERAL to MR. LICENSED SURVEYOR PARKINSON.

*Surveyor General's Office,
Sydney, 30 August, 1859.*

SIR,

With reference to the instructions, written and verbal, which you have received for the performance of surveys, and preparation of a report in relation to the proposed boundaries of the Municipality of Nowra, &c., I have now to inform you that it is not proposed to adopt Kennedy's road as a boundary, and that consequently the only survey which will be required at your hands is that between the Shoalhaven River and Broughton's Creek.

This

SHOALHAVEN MUNICIPALITY.

This survey, together with a sketch shewing the boundary which you would propose, between Cabbagetree Creek and Currambene Creek, are most urgently required, and I trust that I shall receive them before the end of the current week.

I have, &c.

A. G. M'LEAN, A.S.G.

MR. LICENSED SURVEYOR PARKINSON.

No. 32.

MR. LICENSED SURVEYOR PARKINSON to THE SURVEYOR GENERAL.

*Camp, Braidwood Road,
Shoalhaven, 7 September, 1859.*

SIR,

With reference to your letters dated 5th and 30th ultimo, respectively, instructing me to measure and define certain points according to a description forwarded to me, and which I now return, I have the honor to state that this urgent matter has been delayed up to the present time by incessant rains for 5 days, and my distance from the Post Office (15 miles.)

I herewith return the tracing (received by me on the 20th ultimo,) with the proposed boundaries of the Municipality defined by a green line, which I think will embrace all that is required on the south side of the river, and in submitting the arrangement as proposed on the north side of the Shoalhaven, I believe it will not be objected to. In the description enclosed I have not described the boundaries in full, but I apprehend that can be done in the office, provided my design is approved.

I have, &c.,

SIR,

In compliance with the request contained in your letter of the 28th September last, I am directed to forward to you a Plan of the Shoalhaven Municipality, required for the purpose of being laid before the Legislative Assembly.

I have, &c.,

MICL. FITZPATRICK.

THE PRINCIPAL

UNDER SECRETARY.

1859.

Legislative Assembly.

NEW SOUTH WALES.

SYDNEY MUNICIPAL COUNCIL.

(PETITION OF MAYOR AND ALDERMEN.)

Ordered by the Legislative Assembly to be Printed, 6 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Memorial of the Mayor and Aldermen of the City of Sydney, in Council assembled,—

HUMBLY SHEWETH:—

That your Memorialists would beg respectfully to submit to your Honorable House the following matters, seriously affecting the present and future position of the Municipal Council of Sydney, with the hope that the same may receive favorable consideration.

Your Memorialists desire to represent to your Honorable House, that at the time they entered upon their duties the streets of the City were in a deplorable condition, and that to keep the public thoroughfares in repair during the past two and a half years it has cost, to the thirtieth of June last, the sum of one hundred and forty thousand pounds, of which amount eighty thousand pounds has been raised by direct taxation, twenty-five thousand pounds as fees, fines, licenses, and rent, and a further sum of seventeen thousand pounds received from Government, being a portion only of the Parliamentary vote towards the City Fund.

That, as the sum of seven thousand seven hundred and forty pounds had been voted by the Legislature at different periods, towards the formation of the streets opened through Crown Lands in the City, your Memorialists were induced by Government to undertake these works, and have completed them, at the cost of the City.

That during the last Session of Parliament the sum of ten thousand pounds was appropriated in aid of the City for the current year.

That these sums, amounting to seventeen thousand seven hundred and forty pounds, are now withheld, as interest due upon Water and Sewerage Debentures.

That, in consequence of this Act of the Government, and their refusal to pay the amounts due for land resumed for Water purposes, your Memorialists have, for the past four months, discharged the staff usually employed upon the streets, and have been constrained from entering upon any new contracts, and, with the utmost economy, it will require twenty thousand pounds in addition to the ordinary revenue to defray the expenses of the current year.

Your Memorialists beg to represent to your Honorable House that the City of Sydney is now encumbered with a debt of two hundred and thirteen thousand three hundred pounds for Sewerage purposes, and upon this debt the sum of twenty-two thousand nine hundred and

seventy-seven pounds has been paid or retained by way of interest. That the rates received up to the present time under the Sewerage Act amount to the small sum of one thousand two hundred and thirty-nine pounds, leaving a loss upon this item of twenty thousand eight hundred and thirty-eight pounds, and that the total amount of rates derivable under the Sewerage Act is inadequate to pay the interest annually due upon the Sewerage Debt.

That a considerable portion of this sewerage passes along public property in the possession of the Crown, from which no rates are derivable, and that, as only a sixth part of the City is provided with underground sewerage, it is manifestly unjust to constrain those citizens who desire no advantage from the present sewerage to contribute to this impost.

Your Memorialists desire to represent to your Honorable House, that to provide a permanent supply of water to Sydney, the Legislature empowered the Government to borrow two hundred thousand pounds for the construction of the necessary works. That these works, when completed, will cost, irrespective of the purchase of land, the sum of about three hundred and five thousand pounds, of which sum there has been already obtained from Government two hundred and thirteen thousand three hundred and thirty seven pounds, from the Water Fund fifty-two thousand two hundred and sixty pounds, and by way of credit twenty-two thousand two hundred and eight pounds, making a total expenditure of two hundred and eighty-seven thousand eight hundred and five pounds, including the sums of twenty-one thousand eight hundred and forty pounds paid for interest, and eight thousand and thirty-eight pounds for lands in Sydney occupied for the low level Reservoir and for damage done to private property.

That the purchase of land resumed by the Government for the the Water Reserve has already cost the sum of twenty-five thousand eight hundred pounds, and there still remains to be paid very considerable amounts upon claims recently submitted.

That the revenue has not yet been increased by the expenditure of this large outlay, and that the funds derivable from water will be required, for years to come, to defray the expense of laying piping to other parts of the City.

Your Memorialists beg to state that the cost for resumption of Water Rights, for Water Supply, and for the land, was not comprised in the estimate of two hundred thousand pounds submitted by the City Commissioners to the Government. That it never was contemplated that the Citizens of Sydney should, by direct taxation, pay for the land resumed; in proof of which statement it may be remarked, that the late Premier, Mr. Donaldson, submitted for consideration of Parliament the payment for the land so resumed out of the Consolidated Revenue, and a vote for twenty-five thousand eight hundred pounds was obtained, and that sum paid by the Government, over and above the original vote of two hundred thousand pounds. Your Memorialists therefore submit that no portion of the cost for land so resumed should form a charge upon the revenues of the City.

Your Memorialists would respectfully remind your Honorable House, that the Citizens of Sydney have contributed, by direct taxation, during the past two and a-half years, the sum of eighty thousand pounds, and there will be paid twenty thousand pounds more by the close of the year, making one hundred thousand pounds in three years, whilst no other part of the Colony has been subject to direct taxation; and, in addition to the above amount, the sum of forty-three thousand nine hundred and seventeen pounds has been paid or withheld as interest upon an expenditure, which has only produced the small sum of one thousand two hundred and thirty-nine pounds as revenue.

That the present condition of the Corporation finances renders it utterly impossible for your Memorialists to conduct the business of the City with credit to themselves or with satisfaction to their constituents.

Your Memorialists would respectfully solicit the favorable consideration of your Honorable House to the several matters herein set forth, and that such measures may be adopted as the merits of the case demand.

And your Memorialists, as in duty bound, will ever pray, &c.

GEORGE SMITH,
Mayor, City of Sydney.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES, No. 12. TUESDAY, 20 SEPTEMBER, 1859.

12. Working of Sydney Municipal Council :—Mr. Broughton moved, pursuant to *amended* notice,—
- (1.) That a Select Committee be appointed to inquire into and report upon the working of the Municipal Council of the City of Sydney, with special reference to the present position of the Sewerage and Water Debt, and the claim of the Corporation for additional endowment,—with power to send for persons and papers.
- (2.) That such Committee consist of the following Members :—Dr. Lang, Mr. Robertson, Mr. Plunkett, Mr. Dalley, Mr. Martin, Mr. Parkes, Mr. Flood, Mr. Black, and Mr. Rotton.
- Debate ensued,—
- And Mr. Jenkins requiring that the proposed Committee be appointed by Ballot,—
- Debate continued.
- Question,—That a Select Committee be appointed to inquire into and report upon the working of the Municipal Council of the City of Sydney, with special reference to the present position of the Sewerage and Water Debt, and the claim of the Corporation for additional endowment,—with power to send for persons and papers,—put and passed,—
- Whereupon the House proceeded to the Ballot, and the Speaker declared the following Members to be, with the Mover, the Committee duly appointed, viz :—Mr. Black, Mr. Rotton, Mr. Flood, Mr. Arnold, Mr. Dalley, Mr. Parkes, Mr. Jenkins, Mr. Jones, and Mr. Forster.

VOTES, No. 22. THURSDAY, 6 OCTOBER, 1859.

14. Working of the Sydney Municipal Council :—Mr. Broughton moved, pursuant to notice, That the Petition of the Mayor and Aldermen of the Municipal Council of the City of Sydney be printed, and referred to the Select Committee appointed to inquire into the working of the Sydney Municipal Council.
- Question put and passed.
- Ordered to be printed, and referred accordingly.

VOTES, No. 37. TUESDAY, 6 DECEMBER, 1859.

22. Sydney Municipal Council :—Mr. Broughton moved, pursuant to notice, That the following Members be added to the Committee upon the Sydney Municipal Council, viz. :—Messrs. Hawkins, Gordon, and Plunkett.
- Question put and passed.

VOTES, No. 77. TUESDAY, 10 APRIL, 1860.

4. Working of Sydney Municipal Council :—Mr. Broughton, as Chairman, brought up a Progress Report from, and laid upon the Table the Minutes of Evidence taken before, the Select Committee on the working of the Sydney Municipal Council, in reference to payment for Land resumed for Water purposes.
- Ordered to be printed.

WORKING OF THE SYDNEY MUNICIPAL COUNCIL.

(PAYMENT FOR LAND RESUMED FOR WATER PURPOSES.)

PROGRESS REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 20th September, 1859, "*to inquire into and report upon the Working of the Municipal Council of the City of Sydney, with special reference to the present position of the Sewerage and Water Debt, and the claim of the Corporation for additional endowment;*" and to whom, on the 6th October following, was referred, "*the Petition of the Mayor and Aldermen of the Municipal Council of the City of Sydney*"—have agreed to the following Progress Report:—

Your Committee, in the first instance, resolved to direct their inquiry to the subject of Land resumed by the Crown for Water purposes.

Your Committee find,—

That, during the administration of Mr. Parker's Ministry, a Vote of the House was taken in Committee of Supply, on the 26th February, 1857, for the sum of £25,843 5s. 8d., and adopted by the House on 5th March, 1857; but the sum so voted was not contained in the Act of Appropriation for that or any subsequent year.

2. That the sum so voted was applied to the payment of Land resumed under the "Sydney Water Act, 17th Victoria, "No. 35, section 4, and vested in Her Majesty, for the "uses of the Government of this Colony."

When payment was made of said sum a contingent claim was pending for a further sum of £12,000 on account of Water rights, and judgment since given against the Commissioners for that amount, which sum remains unsatisfied.

3. That during the tenure of office by the Commissioners, they had no funds available for the payment of Land resumed for Water purposes. That they looked upon the Government as the parties to pay for the land; and, as the sum of £200,000 borrowed under the provision of the "Water Act"

was

was for the construction of works, and not for payment of land, the Commissioners resisted the attempt of Mr. Parker's Ministry to charge them with the above sum paid for said land.

4. A reference being made to the then Attorney and Solicitor Generals of the whole subject, they advised their colleagues in the Government that the views taken by the Commissioners were correct. (*Vide Mr. Lane's evidence — question 45.*)

Your Committee, having given the evidence and all the circumstances of the case their best consideration, are of opinion that the Votes and Proceedings of the previous Legislature warrant them in arriving at the conclusion that it was the intention of the Government and the Legislature to provide funds for the payment of Land and Water resumed; and that the cause of not carrying that intention into effect was the omission of the Vote of the House of the 5th March from the Appropriation Act of 1857.

Your Committee therefore report to your Honorable House, that it appears to them to follow from this state of facts, that the Corporation of the City of Sydney should be relieved from the payment of any moneys for Land and Water resumed under the provisions of the Water Act, 17 Victoria, No. 35, "and vested in Her Majesty for the uses of the "Government of this Colony."

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

SYDNEY MUNICIPAL COUNCIL.

THURSDAY, 20 OCTOBER, 1859.

Present:—

MR. BROUGHTON,
MR. JENKINS,
MR. PARKES,

MR. ROTTON.

MR. ARNOLD,
MR. BLACK,
MR. FORSTER,

THOMAS BROUGHTON, ESQ., IN THE CHAIR.

Richard O'Connor, Esq., Clerk of the Legislative Assembly, called in and examined:—

1. *By the Chairman:* You are Clerk of the Legislative Assembly? I am.
2. Can you favor the Committee with any information in reference to a Vote of £25,800 obtained during the Administration of Mr. Donaldson? I have here a memorandum in reference to such a vote. The vote amounted to £25,843 5s. 8d. It was submitted to the House in the Supplementary Estimate for 1856, with the Governor General's Message No. 5, and it is to be found in the Votes and Proceedings for 1856-7, No. 35. It was voted in Committee of Supply on the 26th February, 1857, but taken for the service of the year 1857 by consent in the Committee. It was reported to and adopted by the House on the 5th March, 1857, as will be found on reference to Votes No. 99 of 1856-7. This covers the action of the Committee of Supply, and of the House, in regard to the vote. There was no vote taken to cover the amount in the Committee of Ways and Means; but this vote did not stand alone in that respect, for very many other votes were not covered by votes in Committee of Ways and Means, which were afterwards incorporated in the Appropriation Bill or in separate Bills. At that time the action of the Committee of Ways and Means was not so well understood as it is at the present time. So much for the action of the House and of the Committee of Supply on that vote. Now, all I know after that is this;—Mr. Donaldson put a question to me—whether, having obtained the vote, it was incumbent on him to introduce a Bill for its appropriation. He said he did not want the money, and he desired to know whether, in that case, it was compulsory on him to introduce a Bill for its appropriation.
3. *By Mr. Jenkins:* He did not want the vote? He did not want the vote.—I answered "No;" I told him there were two courses open to him: the usual course, to rescind the vote if he did not want the money; or, as the vote could not have legal effect without the concurrence of the two Houses of Legislature and the Governor-General, to abstain from incorporating it in the Appropriation Bill or in a separate Bill, and it would lapse. He seemed satisfied with this, and neither incorporated the vote in the Appropriation Bill nor brought in a separate Bill for its appropriation. Beyond this I know nothing of the vote. Mr. Donaldson's reasons for this course were part of the policy of the Government—of which, of course, I knew nothing. He merely asked me to point out what was the usual course when a vote was taken for money that was afterwards found not to be required.

R. O'Connor,
Esq.
20 Oct., 1859.

- R. O'Connor, Esq.
26 Oct., 1859.
4. *By Mr. Jenkins*: Mr. Donaldson being at that time Colonial Treasurer? He was at that time Colonial Treasurer. The vote was in compensation for land resumed for the supply of water to the City of Sydney.
 5. *By the Chairman*: Land resumed by the Crown? Yes, for the supply of water to the City of Sydney.
 6. *By Mr. Jenkins*: Do you know whether this sum was placed on the Estimates by His Excellency the Governor General? Yes, by the Governor General's Message No. 5.
 7. In reply to an Address agreed to by the House, or by the action of the Government in the first instance? It was not in reply to an Address, but was submitted in the original Supplementary Estimates.
 8. Do you know the reason which guided Mr. Donaldson in not wanting the vote? No; it was part of the policy of the Government, of which I knew nothing.
 9. *By Mr. Rotton*: Is it a fact that the money never was appropriated? The item passed through all those forms of the House which are frequently held to warrant the expenditure of money before the passing of the Appropriation Bill. We have often had expended money upon no greater authority than was given to this vote; that is to say it was submitted by the Government itself on its own action in the Supplementary Estimates for 1856, the Estimate was referred to the Committee of Supply, the Committee of Supply voted the amount, and the resolution was reported to and adopted by the House; beyond that there was no action taken; but we know that in practice many sums have been actually expended by the Government on no greater authority than was given to that vote.
 10. *By Mr. Jenkins*: Spent without being included in the Appropriation Act? They have been subsequently included in the Appropriation Act, though spent before the passing of that Act.
 11. *By the Chairman*: Is this the particular vote you refer to, No. 213—"Resolved that there be granted to Her Majesty, for the year 1857, a sum not exceeding £28,843 5s. 8d. to defray the amount due to the City Commissioners, as compensation for land resumed for the supply of water to the City of Sydney?" Yes, that is exactly the amount proposed in the Supplementary Estimate for 1856, but as I have said in a previous part of my evidence, with the consent of the Committee the item was transferred to the service of the year 1857, so that it corresponds with that resolution, which is for the service of the year 1857, though appearing on the Supplementary Estimate for 1856.
 12. *By Mr. Arnold*: I understood you to say—? That the vote was taken in Committee of Supply on the 26th February, 1857. Which will sufficiently account for its being transferred from the Supplementary Estimate for 1856? Yes.
 13. I understood you to say that this vote, after it had been passed in Committee of Supply, was adopted by the House? Yes.
 14. How was it adopted by the House? On the 5th March, 1857, in Votes and Proceedings No. 99, I find the first entry to be under the head of "Supply," and to run thus: "On motion of Mr. Donaldson the Speaker left the Chair, and the House resolved itself into a Committee of the whole, further to consider the Supply to be granted to Her Majesty for the service of the year 1856-7." Subsequently the Chairman reported to the House that the Committee had agreed to the following resolutions:—Then follow the resolutions agreed to up to that time in the Committee of Supply, one after another. And when those resolutions were read (or rather, supposed to be read) and the Chairman had obtained leave to sit again at a later hour of the evening, Mr. Donaldson moved, "That this House do now adopt these resolutions"—including that one, and the motion being put and passed—that included the adoption of this particular vote, among others, by the House.
 15. That was on the 5th March? Yes, the 5th March;—therefore I say that the House adopted the resolution. It is the usual course by which the House adopts such resolutions.
 16. Are you aware of any other vote passed during that session in Committee of Supply—that was expended, but which was not included either in the Appropriation Act or covered by the Ways and Means? That is a question involving a matter of fact, which would render it necessary for me to go through the items passed in Committees of Supply and Ways and Means, and then to compare them with the items in the Appropriation Act. I could not speak from memory. I have an impression simply that many items were voted in Committee of Supply, which were not covered by votes in Committee of Ways and Means.
 17. In that session? In that session; but, that they were subsequently incorporated in a Bill—either the Appropriation Bill or a separate Bill, I have no doubt.
 18. Can you shew, by referring to the amounts, what was the deficiency voted in Ways and Means? I should have to make a calculation.
 19. Are you aware that there was a deficiency? No, I cannot say that I am aware; I speak simply of my impression.
 20. Is there any record that would shew it? Yes; we have a record of every vote taken both in Committee of Supply and in Committee of Ways and Means, and if the Committee particularly desire it I can have prepared a statement shewing exactly the amounts voted in Ways and Means, and the one set opposite to the other will of course shew the deficiency. But it will be seen that I cannot venture to speak positively on the subject without such a statement before me.
 21. *By Mr. Rotton*: Are you aware of anything which transpired at the time beyond what is actually expressed in the resolutions, as to the intention of the House in voting this sum of money? I mean whether it was to be chargeable to the Corporation as a loan, or whether it was intended that the Government should pay for this land without charging it again to the Corporation? So far as my recollection of the vote goes, it amounts to this: that the money

money was to be raised, in fact, by a Loan Bill, of similar character to the Loan Bills at the time current; that is, on the security of the revenues, not of the Corporation, but of the Government. B. O'Connor,
Esq.

22. All these resolutions from 110 down to the end, 115, are headed in that way—"to be provided by loan?" Exactly. 20 Oct., 1859.

23. That would be a loan obtained by Government? A loan obtained by Government

24. But there have been some sums of money provided by the Government for the Corporation, which have been secured as it were to the Government on the city revenues. I want to know whether this was intended to be so included, because I see that several other resolutions were passed afterwards—one for the Sewerage, and another for the Sydney Water Act (there are three altogether) and we know well that the expenditure for the sewerage was secured to the Government on the city funds? I could not answer that question. The vote was taken to be provided for by loan, and that loan was to be raised by the Government as loans usually were raised at the time.

25. *By Mr. Arnold:* It was so expressed in the vote? Yes; in the usual way. The heading of the series of resolutions is, "to be provided by loan."

26. *By Mr. Jenkins:* There ought to be a Bill shewing that? This was not included in any Bill.

27. There should be some record to shew on what conditions this money was handed over? The record ought to be contained in the resolution. I do not think you can travel beyond the resolution. The resolutions form the basis of the Appropriation Act, or any separate act for the appropriation of money; the Act, in fact, is invariably a mere echo of the resolutions.

28. Are you aware with regard to the other loans of the Corporation—for the waterworks and the sewerage—that they are distinct Acts empowering the Government to lend £200,000 for each of these purposes on certain conditions, and that the loan is to be repaid by the Corporation to the Consolidated Revenue? The conditions are clearly expressed in those Acts?

29. You are not aware of any Act in existence having reference to this particular item? There is no Act in existence having reference to this item.

30. *By Mr. Arnold:* We have no evidence then, I understand, Mr. O'Connor, from any parliamentary record as to the intention of the Government in regard to this item, making it a charge upon the city securities or in any other way? No record whatever. The parliamentary record would be found in the Supplementary Estimate on which the item is proposed; or in the resolution of the House, which, as I have said before, would be the basis of the Act for appropriating the amount.

31. But according to proper constitutional practice, this vote would not be available without further proceedings? No doubt, according to strict constitutional principles, it would not be available without the concurrence of the two Houses of Legislature and the Governor General.

32. And you are aware that these further proceedings were not taken in consequence of the desire of the Minister to abandon his intention of granting this money? Exactly so. The amount would have been included in the Appropriation Act, or would have been put into a separate Act had it not been for the desire of the Treasurer at the time to allow the vote to drop. He said he did not require the money.

33. I understand you to say, however, with regard to some other votes, that they were not voted in Ways and Means, in consequence of a looser way of doing business than that which at present exists? Just so. My recollection is, that many votes were not covered as they now are by votes corresponding in amount taken in Committee of Ways and Means.

34. In those cases it was purely from the loose way of doing business—from oversight? Yes.

35. But in this case you believe it was intentional? Yes; but in the other cases I have alluded to the votes were incorporated at a subsequent period in the Appropriation Act, or in a separate Act to cover the amount.

36. In the other cases? Yes.

37. Then you think there was no money actually expended, not covered by the Appropriation or other money Act? None whatever, if we except the case now under inquiry.

38. You are not aware when the money was paid, I suppose? No. The payment must have been previously to the vote.

39. The money was paid before it was voted? Yes; that is my opinion.

Henry Lane, Esq., called in and examined:—

40. *By the Chairman:* You are Under Secretary to the Treasury? I am.

41. Can you afford the Committee any information with respect to a vote £25,800 for the reservation of land at Botany for the water supply, voted in 1857? In the year 1856 the following sums were paid from the Treasury for compensation for land resumed:—On the 18th June, £3,322 11s. 4d.; on the 26th June, £11,269 12s. 7d.; on the 11th July, £8,733 11s. 5d.; and on the 1st August, £2,517 10s. 4d., making a total of £25,843 5s. 8d. This amount was charged by the Treasury against the £200,000 that had been appropriated under the Act 17 Vic. No. 35. On the 6th October of the same year, the Secretary to the Commissioners applied for a sum of £33,576 on account of the works, and I find on reference that I reported that instead of £33,576 being available, there was a balance of £7,640 18s. 9d. only, in consequence of the charge against the appropriation of this £25,843 5s. 8d. I reported accordingly, and the Secretary to the Commissioners wrote to the Colonial Secretary to the following effect. Henry Lane,
Esq.
20 Oct., 1859.

- Henry Lane, Esq. 42. On what date? On the 29th October, 1856,—That in the opinion of the Commissioners the amount available for water purposes was £33,484, instead of the sum mentioned by me.
- 20 Oct., 1859. 43. *By Mr. Jenkins*: It is not included in this return—that letter which you are reading? It is dated the 29th October, 1856.
44. What is the number of the letter? 56,820—a letter from the City Commissioners, addressed to the Honorable the Colonial Secretary, It does not belong to the Treasury. I got it merely for the purpose of affording information. It should, I think, have been in that return. That return was prepared in this way: I furnished to the Principal Under Secretary the letters that had reference to the Treasury, and the Under Secretary blended them with those from his department.* The letter 56,820 must have been overlooked.
45. *By the Chairman*: Proceed? I was stating that in the Commissioners' opinion the amount available in 1854 for water purposes was £33,484, instead of £7,640 18s. 9d.—that the difference arose from the sum of £25,843 5s. 8d. paid in 1856 as compensation for land resumed for the water-works having been deducted from the amount appropriated. But as the sum voted was in exact accordance with the estimate of the Commissioners, specifying the particular works to which it was to be applied, they submitted that no part of the vote could be applied to the payment of claims for compensation, which were not and could not be included in the Estimates. Then they proceeded to point out that the second clause of the Sydney Water Act specially excluded from the control of the Legislature the expenditure of all sums awarded as compensation for lands resumed for water purposes. This letter 56,820 was referred to Mr. Donaldson, who directed me to refer it to the Law Officers of the Crown. I did so on the 17th November, and on the 21st of that month the following opinion was received from the Crown Law Officers:—"With reference to the (within) "correspondence on the subject of the balance due on account of the City Water-works, "received under blank cover on the 17th instant, we have the honor to state that we concur "in the opinion that the £25,843 5s. 8d. paid during the present year as compensation for "land resumed should not be deducted from the amount appropriated by the late Legislative "Council for the City Water-works. (Signed) W. M. Manning, Attorney-General; J. B. "Darvall, Solicitor-General." On that letter Mr. Donaldson wrote this Minute—"Authority appears to me to be necessary to pay the £25,843 5s. 8d. for compensation for "land, separate and distinct from that for sewerage and water, but the money will be at the "disposal of the Government so soon as the supplementary estimate for water purposes is "sanctioned." On the 29th December, 1856, the Secretary to the Commissioners requested the Colonial Secretary to issue the necessary instructions for the payment to the Commissioners of the £25,843 5s. 8d., being the balance still due on account of the sums appropriated for water purposes. Mr. Donaldson on that minuted, "The money must be "voted by the Assembly." On the 26th February, 1857, the £25,843 5s. 8d. was voted for the service of the year 1856, and the sum of £93,413 for water purposes for the year 1857. These sums were duly reported to the House,—one sum, £93,413, for the year 1857, was included in the Appropriation Act, and Mr. Donaldson gave notice of motion for leave to bring in a Bill to appropriate the sum of £25,843 5s. 8d. for the year 1856, but when the day arrived he withdrew the notice. That is all I know of the matter.
46. *By Mr. Rotton*: How comes it that the money was spent, if the Appropriation Bill was withdrawn? The money was not expended until November, 1858.
47. What authority was there for expending this money if Mr. Donaldson did not think it necessary to apply for any authority at the time?—What authority was there afterwards? It occurred in this way: there was in November, 1858, a balance of £3,413 on the £200,000 appropriated for water-works. On application being made this balance was stated to be the only amount remaining.
48. Was that included in the £25,843 5s. 8d. as a charge? Not included.
49. *By the Chairman*: But the fact is this, that having funds in your hands from the £200,000, you appropriated those funds to the payment for land resumed? Yes.
50. And you sought to make that a charge upon the £200,000? Yes.
51. To which the Corporation demurred and insisted upon you paying to them or refunding to them the £25,843 5s. 8d.? Yes.
52. *By Mr. Arnold*: And then you did so under the advice of the Law Officers? Yes.
53. *By the Chairman*: Acting under the advice of the Law Officers of the Crown you handed the money over? Yes.
54. *By Mr. Arnold*: You now find that in the first instance it was paid in error? It was disallowed by the Auditor General. It stands in the public accounts as an over-payment. We did not pay the whole £25,843. We deducted £12,505 on account of claims against them, and paid the balance merely—£13,337 19s. 3d.
55. *By the Chairman*: And I believe now you seek to set off against that, £25,800 votes of this House in aid of the city fund, or other moneys which should come into the hands of the Corporation? That is the course we are pursuing.
56. That you are now pursuing—all moneys coming into your hands by votes of the Legislature you are appropriating in liquidation of this £25,000? Just so. In the statement furnished by the Auditor General to the Assembly, the £13,337 appears as an over-payment, and he states—"in course of adjustment," implying that the moneys are withheld.
57. That is, that you have withheld now £12,000? We are withholding moneys now.
58. *By Mr. Rotton*: Those moneys are also withheld—are they not withheld to pay the interest due from the Corporation to the Government? Yes.
59. *By Mr. Jenkins*: Are you aware on what understanding this money was lent? Was this

- this £25,000 intended to be a loan to the Corporation, or was the land to be considered as belonging to the Crown? I suppose it belonged to the Corporation. Henry Lane,
Esq.
60. The land belongs to the Corporation? I suppose so. 20 Oct., 1859.
61. It would not be intended to make this a loan to the Corporation? I do not think so.
62. *By the Chairman*: Do you know anything of the intentions of the Government in the matter? No.
63. Do you know of your own knowledge whether this land was resumed by the Crown? I do not.
64. Can you inform the Committee what sum of money was expended on the water-works of Parramatta, to supply the inhabitants of that town with water? £16,366 0s. 11d.
65. That sum of money was expended from the general revenue of the colony? There is a proportion of £13,000 raised by loan.
66. *By Mr. Arnold*: On whom was the interest chargeable? Upon the Consolidated Revenue.
67. *By the Chairman*: What do you say the amount is altogether? £16,366 0s. 11d.
68. Do the inhabitants of Parramatta contribute directly towards the payment of the interest on that sum of money? Not directly.
69. *By Mr. Parkes*: Do they contribute at all except as a part of the community. No.
70. They make no special contribution? No.
71. All the money voted for the water-works at Parramatta was voted before the advent of responsible government, was it not? Yes, before responsible government.
72. *By the Chairman*: Can you inform the Committee what sum of money was expended for the supply of water to the inhabitants of Liverpool? I have been able to trace only the cost of repairing the dam at Liverpool. I have been unable to trace the original cost. It must have been an old work; but the cost of repairing, since the year 1841, is £2,471 7s. 8d.
73. For the repairs of the dam? For the repairs of the dam.
74. Is that a grant by the Legislature, or is it upon loan? It is chargeable upon the consolidated revenue.
75. Has there been anything expended at Campbelltown for the supply of water? Yes; a sum of £412 9s. 4d. for the construction and repairs of a reservoir.
76. *By Mr. Rotton*: Can you tell us how much has been expended for the supply of water to Sydney by the Government before the Corporation was established? I could obtain a statement of the cost of the tunnel.
77. *By Mr. Arnold*: That could be obtained? I could readily obtain it. (*Since obtained. Appendix A, £32,221 1s. 9d.*)
78. *By the Chairman*: Have you any other estimate of the cost of supplying towns with water? At Gladstone there was an expense of £3,101 19s. 6d. for the supply of fresh water to the inhabitants, and of £231 15s. 4d. for constructing a dam across the River Bremer at Ipswich.
79. *By Mr. Rotton*: In all those places to which you have referred there are, I believe, no Corporations yet established? There were none at the time of these expenses having been incurred.

STATEMENT of the Amount of Expenses on the Tunnel for conducting Water into Sydney, from 1827 to 1842, inclusively of the cost of Iron Pipes.

W. C. MAYNE,

A. G.

*Audit Office,
Sydney, New South Wales,
26 October, 1859.*

THURSDAY,

THURSDAY, 15 DECEMBER, 1859.

Present :—

MR. PARKES,
MR. PLUNKETT,MR. ROTTON,
MR. HAWKINS.

THOMAS BROUGHTON, ESQ., IN THE CHAIR.

G. Elliott, Esq., called in and examined :—

- G. Elliott,
Esq.
15 Dec., 1859.
80. *By the Chairman* : You were Chief Commissioner of the City of Sydney? I had that misfortune, certainly. But, before proceeding, I should like to premise that it is now nearly three years since I went out of office, and my recollection of everything connected with the City Commission is very imperfect. I have not thought proper to refresh my memory upon the matter.
81. Were the Water-works commenced during the time you held office? They were.
82. At the instance of the Commissioners? At the instance of the Commissioners.
83. Did you form an estimate of the probable cost of conveying water to Sydney before commencing the works? Yes, it was done.
84. Was that estimate submitted to the Government? That I cannot say; I do not recollect. But a reference to the documents of the office will shew.
85. *By Mr. Plunkett* : Perhaps by refreshing your memory by your own reports you would be able to recollect? All the correspondence is in the Corporation Office, and may be easily obtained from the Town Clerk.
86. *By the Chairman* : Can you, from memory, say what was the estimated cost of conveying the water to Sydney? I have not the slightest recollection of that.
87. Do you know whether the cost of the land resumed by the Government for water purposes was made an item in that estimate? No. I think I am pretty sure upon that point.
88. Then the estimate would only give the probable cost of conveying water to Sydney? Just so; that is my belief at present.
89. Do you know that land was resumed by the Government for water purposes? Oh! yes.
90. Do you know who were the owners of the land? I think there were several owners. I think Sir Daniel Cooper was one, Mrs. Lord and the Lord family, and Mr. Darvall.
91. During the time that you held office were there any actions instituted against the Commissioners for compensation for the land so resumed? I think there were. I think Mrs. Lord commenced one before I went out of office.
92. Was judgment given here in any of the actions relative to the resumption of the land before you left office? It strikes me that, in the case of Mr. Darvall's land, there was. But I am really speaking without book, and these things can be ascertained from the Corporation Office.
93. Are you satisfied that there was any provision made in your estimate for the payment for the land resumed by the Crown? I think not in that estimate. That estimate only included the cost of bringing the water into the City.
94. Had you any means at your disposal for the payment of the land resumed by the Government, or any funds from which it could be paid? No; it could not be included in the £200,000 for which the Act provides.
95. Was the £200,000 expended before you left office? I think not.
96. Were contracts in existence for the works? Yes.
97. Which would absorb the £200,000? I think they would not absorb all. I am not quite sure.
98. Would the £200,000 be sufficient to convey the water to Sydney? We imagined so.
99. From the progress made in the works when you went out of office, did you think the £200,000 would have been sufficient to complete the works? We apprehended it would have been sufficient for bringing the water into the City.
100. Was that estimate formed by Mr. Ryder? Yes; and afterwards revised by Mr. Bell.
101. Do you know how the money was paid for the land resumed by the Crown, or who paid the money? I remember the sum of £25,000, or thereabouts, being applied for by the City Commissioners to the Government; and that sum was paid over to us.
102. You obtained from the Government the sum of £25,000 for the purpose of paying for the land resumed, and did pay that amount? Exactly.
103. Were there then any judgments outstanding on account of that land at the time of paying the £25,000? I cannot say.
104. Was there an appeal to the Privy Council by Mrs. Mary Lord for her rights to the water? I think there was an appeal of that kind before I left office.
105. You are satisfied you had no funds at your disposal for the payment of the land? Certainly not, except what we got from the Government.
106. You could not pay for the land in any other way than by obtaining the money from the Crown? No.
107. You had no power to borrow money for that purpose? No.
108. Nor power or authority, under the Acts in Council, to raise money for that purpose I think not.
109. *By Mr. Hawkins* : Who was Mr. Ryder? The first engineer.
110. Who was Mr. Bell? The present engineer.
111. Why was the first estimate revised by Mr. Bell? Alterations were made, I think, in the arrangements.

112. Was there not a great difference in the estimated amount of expenditure in the two estimates? I do not remember; indeed I do not well recollect whether the estimate was revised, or whether it was only the alteration.
113. *By Mr. Plunkett*: I believe the plans of these gentlemen were different, one choosing the Botany Road, and the other a nearer line, for laying down the water tunnel? Yes, the line was altered; but that was after my leaving office.
114. There was some expense on account of the alterations? Yes, in conveying the pipes from one place to another; they were first laid down for Botany Road.
115. *By the Chairman*: It cost £20,000 for removing the pipes? I never heard.
116. *By Mr. Hawkins*: Which plan was adopted? I see that Mr. Bell's plan was adopted. I think it was adopted before we left the office.
117. *By Mr. Plunkett*: What is the amount of the damages given in this case against the Corporation? I have not the slightest recollection.
118. How is it that you left out of that calculation of the expenses of conveying the water the payment for the ground on the resumption of the land? We only estimated according to what the Act authorised us to do, that was to bring the water in, without reference to payment for the land at all. We knew there would be that expense, but we had no right to estimate it.
119. *By Mr. Hawkins*: You had power to estimate the value of the land? That power was not conferred by the Act; we might have made a rough estimate.
120. *By Mr. Plunkett*: You did not take it into consideration? We had no means of providing for the expenses, and did not take the amount into consideration.
121. *By Mr. Rotton*: It was the Government who resumed the land? Yes.
122. Was it done at the instance of the Commissioners? Yes. We pointed out where we were to get the water, and requested such land to be resumed by the Government.
123. Did the Commissioners expect, or have reason to believe, that the Government would resume the land and pay for it without charge upon the City Fund? We knew the Government must resume the land, and, as a natural consequence, must pay for it.
124. Did you expect it would be chargeable upon the City Revenue? I did not; at all events not upon the £200,000 which the Act shewed.
125. *By the Chairman*: Whilst you were in office did you expect that the £200,000 would be divided between this and the works? No.
126. You obtained the £25,000 expressly for the payment of the land? Expressly for payment for the land.
127. At the time you obtained that amount you had not exceeded the £200,000 for the construction of the works? Certainly not.
128. Still there was a considerable balance of that amount to your credit? There was still a considerable balance of the £200,000.
129. *By Mr. Rotton*: Then, from the question you have now answered, I understand that you have received the money from the Government for the payment of the land? Yes; whatever it was, £20,000 or £25,000, was received and appropriated to that purpose.
130. But you did not expect that you would be charged for it? The question never was raised by the Government; they made no objection; they resumed the land, and the price charged was paid by them.
131. Was there any understanding at the time between the Government and the Commissioners, with reference to the land, as to who was to be responsible for the payment? I think not. As I said before, it was done by correspondence, and all that is forthcoming.
132. *By Mr. Plunkett*: How were the receipts taken when paying for the land—was there a reservation by the proprietors of the land, that it should be still considered that they had a further claim? No; I do not remember that.
133. *By the Chairman*: Do you remember the particulars of the judgment taken in the Supreme Court in Mrs. Mary Lord's case—as to the form of the judgment, was it taken in this way:—That an award was given for the land and the damages, to be assessed on the value of the water, provided the Court below should sustain such judgment? I really do not recollect the particulars of it.
134. At the time you paid the £25,000 were there not other claims still pending against the Commissioner for land? I think there were.
135. Had not Mrs. Mary Lord, or some members of the Lord family, some claims for contingent damages? There were so many claims made by the Lord family that I do not recollect what they were; as soon as one was settled another came on.
136. *By Mr. Hawkins*: You have a distinct recollection that the £25,000 was paid by the Government? I have some recollection of it; I think the amount was £25,000.
137. For that express purpose—payment for the land? For that express purpose.
138. *By Mr. Plunkett*: Was it after the verdict was given that the Commissioners applied for the money? The Lords' case went home; but when settled in the Court here, we were not in a position to ascertain what we required.
139. When the verdict was given against you, you could not help yourselves? We must have got some one to pay the money.

G. Elliott,
Esq.

15 Dec., 1859.

Mr. Charles H. Woolcott called in and examined :—

- Mr. C. H. Woolcott.
15 Dec., 1859.
140. *By the Chairman* : Your name is Charles Henry Woolcott, and you are Town Clerk ? I am.
141. How long have you been connected with the Corporation of the City of Sydney ? About seventeen years.
142. Were you Secretary under the City Commissioners ? For a portion of their time only.
143. Were you Secretary when the Water-works were commenced ? Not when the first proceedings were taken.
144. *By Mr. Parkes* : Who was your predecessor ? Mr. Stewart, who was in office eight or nine months.
145. Then his tenure of office and your own goes over the whole period of the existence of the Commission ? Yes.
146. *By the Chairman* : Mr. Stewart is not in the Colony now ? I think not.
147. Did you prepare, or see prepared, the estimate for conveying the water into the City ? The original estimate was made in May, 1854, and I did not return to office until November, 1854.
148. Can you favor the Committee with a copy of that estimate ? I can.
149. Does the cost for the resumption of land form any item in that estimate ? No ; not in any of the estimates.
150. Did the Commissioners pay any sum of money for the resumption of the land ? Yes ; upwards of £25,000.
151. Do you know whence the amount was derived ? It was received from the Government.
152. And paid to the different individual claimants ? To the Messrs. Lord and Mr. Darvall.
153. Can you favor the Committee with the particulars of the items and the gross amount paid ? The gross amount was £25,840.
154. What was the gross amount to each individual ? The amount paid to Mr. Darvall was £3,300, and to Mr. Lord the balance, £22,800, which amounts include costs of Court.
155. How was this specific amount arrived at ? By verdict from Court.
156. In each case ? In each case.
157. Given by the jury ? Yes.
158. At the time the verdict was obtained were there not contingent claims by these parties ? Yes, and they were referred to the Privy Council.
159. Can you explain to the Committee the nature of those contingent claims ? It was on a point reserved as to the grant originally made to the Lords, and as to their right to the use of the water.
160. Have any of those claims been decided upon since ? Yes ; to the amount of £12,000.
161. Has judgment been given by the Privy Council in any one case or more ? In one case only.
162. What was the amount ? It was £7,400.
163. How does that amount stand at the present time ? The Council have given a guarantee to pay it at the termination of six months from the passing of the resolution, with eight per cent. interest.
164. Upon what conditions ? Pending the decision of the Legislative Assembly upon the present inquiry.
165. Then there is absolutely a judgment issued against the Corporation ; that they have levied upon you for the amount ; and that this guarantee is merely a stave off by them until the decision of the Legislative Assembly is arrived at ? Yes ; this course was agreed to by the Council.
166. That is one case ? Yes ; the one referred to the Privy Council.
167. Are there are other claims of a like nature outstanding ? Yes ; there are additional claims for £5,000.
168. *By Mr. Plunkett* : By what parties ? By the Lords.
169. *By the Chairman* : By Edward and George Lord ? Yes.
170. And their claim is in every respect similar to the other ? Such is the opinion of Counsel.
171. And that payment should be made to them without running the risks of other costs ? Precisely so.
172. Are you aware of any other claims for land so resumed, besides those already mentioned ? Yes ; there is a still further claim from Mrs. Mary Lord for £1,760.
173. Have the Corporation paid anything by way of damages beyond these sums for land ? Yes.
174. Can you say how much they have paid or are liable for ? They have paid £1,100, and are liable for about £2,000.
175. Does that include the price you paid for the land for the reservoir ? No ; that was a positive purchase.
176. Part of the positive charges on the Corporation ? Yes ; they absolutely paid £9,200.
177. For the land upon which the reservoir is erected ? Yes.
178. And these sums were paid either from direct taxation, or from the revenue derivable from the Corporation funds ? The £9,200 was paid from the revenue, and from money borrowed from the Bank, and does not form any part of the amount received from the Government.
179. Nor any of these latter payments ? Those of course are paid from the revenue.
180. Do you know of any fund within the control of the Commissioners by which they could have paid for this land so resumed ? No ; not any.
181. They had no means of paying for it ? No means at all, except a credit from the Bank ; the vote of £200,000 having been absorbed on the works.

182. They must have resorted to direct taxation to pay for the land? Except that it was always understood that there was a special provision in the Act to meet this expense.

Mr. C. H. Woolcott.

183. A special provision in the Act to meet the expense for conveying the water into the City? And, independently of that, a special provision for payment of lands.

15 Dec., 1859

184. Can you inform the Committee what amount is raised annually by way of direct taxation from the citizens, for all purposes upon all rates—what do they pay in the pound? A shilling in the pound.

185. A shilling in the pound for the City Rate? Yes; you can scarcely consider the water rate direct taxation.

186. What rate do they pay for watering the streets? It varies from a penny in the pound to five-pence in the pound.

187. *By Mr. Parkes*: Are there any cases you can point out where the smaller amount is paid? A penny was levied in Pitt-street for the year 1858.

188. *By the Chairman*: They pay a shilling in the pound for the City Rate, and for watering the streets from one penny to about five-pence? Yes.

189. *By Mr. Plunkett*: Do I understand you that the City Rate is left at a shilling in the pound? Yes; the City Rate for the general purpose of repairing the streets is limited by the Corporation Act to one shilling in the pound.

190. Can you state what is the total taxation of the City? The amount to be received this year is £38,000.

191. *By Mr. Hawkins*: That is the special provision in the Act to which you have alluded? The second section of the Water Act, which expressly states that the Legislature should have no control over the amount of compensation for lands. The vote of £200,000 was an independent one.

192. What you refer to is that the Legislative Council have no control over the compensation to be paid for land resumed by the Government? Yes, land resumed by proclamation.

193. It gave them power of interference with all other expenditure? Yes.

194. *By Mr. Parkes*: At what range of rentals do the rates stop? Every house in the City is assessed and pays rates.

195. Are there many at £50 a year? Yes, and many at £5.

196. Can you state what number of distress warrants have issued during the last quarter? There have been none for the last half-year.

197. *By the Chairman*: The elections were too near to issue warrants? I cannot answer that inquiry.

198. *By Mr. Parkes*: During the first half of the year the elections would not affect the issue of warrants? During the first half of the year some hundreds were issued, but not all put in force. Warrants are issued in this manner:—After a certain period and due notice, it is customary to extract from the City Rate Books the names of all parties in arrear, and put them into warrant, because the law requires that the warrants should be issued indiscriminately; but it is not necessary that these warrants should be put into force. The parties frequently pay before we can put the warrants into the hands of the bailiff.

199. *By Mr. Plunkett*: What is the present revenue from the Water Works? About £12,000 per annum.

200. *By Mr. Parkes*: Do you think any increase of taxation would be submitted to by the citizens? I do not think it would be advisable to increase the present City Rate.

201. From your experience and knowledge of the City, do you think additional taxation would be resisted? I think it would be much complained of.

202. *By the Chairman*: Do you not know that it is with great difficulty the rates are recovered now? I cannot say I do.

203. At this time—the close of the year—can you inform the Committee of the amount of the outstanding rate for the year? The amount for the past year was entirely collected, not one shilling being outstanding. For the present year about £6,000 of the City Rate is uncollected.

204. *By Mr. Plunkett*: You do not consider the water rate a direct tax? Not at all. It is optional with the citizens whether they pay it or procure water from other sources.

205. If the Corporation had the means of extending the benefit of the water supply to districts such as the Riley Estate and Woolloomooloo itself, would not the residents there consider it a great boon? I have no doubt of it. But these districts are already partially supplied.

206. Is it merely the want of means that prevents the Corporation from making these extensions of the water supply? No; the scarcity of water has something to do with it.

207. *By Mr. Hawkins*: There are many applicants for water which the Corporation have been unable to supply for want of means? Not that entirely, but from the precarious supply we have received from the old sources.

208. *By the Chairman*: What bank interest do you pay? Eight per cent.

209. Are you borrowing at an advantage or at a disadvantage? At a great disadvantage.

210. How much are you overdrawn at your banker's? On the water account, £20,000; on the City Rate account, £27,000; and on the sewerage account, £6,000.

211. Is it not for want of funds that you cannot accommodate the parties with water? Yes. Now that the water is received from Botany, there can be nothing but want of means to prevent the whole of the City being supplied.

212. You are aware that the late Government have been stopping money due to the Corporation on account of the £25,000 paid for the land resumed? I am not aware, officially, that they have been doing so; but I am aware that they have been stopping it for other purposes.

213. Have the Corporation formed any streets which should have been formed at the expense of the General Revenue by sums voted by the Legislature? They have.

- Mr. C. H. Woolcott.
- 15 Dec., 1859.
214. Have these sums been stopped by the Government? They have.
215. Were the sums so stopped exclusively for interest, or as against this fund of £25,000? Expressly for interest.
216. During the last twelve months has not a sum of £10,000 voted by the Legislative Assembly been stopped by the Government as interest? Yes.
217. Would the interest amount to more than that sum? It would.
218. You have always paid up the interest due upon Debentures to the end of last year? Yes, up to the end of last year.
219. Can you say in round numbers the amount due to the Corporation for moneys expended in the formation of streets running through Government property, and which should have been paid for by the Government? The whole amount, including that originally expended by the old Corporation, is about £8,700.
220. Would the interest due by the Corporation absorb these two amounts of money? No.
221. Do you know that the Auditor General takes credit for £13,000 as against the £25,000? I do not; this amount having been debited against the Corporation without their knowledge or any official intimation.
222. You have no means of knowing anything of these accounts, or what the amounts are stopped for? No.
223. You know, as a fact, that during the last twelve months any votes of the Legislative Assembly have been given in aid of the City Fund, or for any other purposes that should bring it into the coffers of the Corporation, and which the late Government refused to pay? Yes.
224. Although all the interest was not due? Although the interest was not due.
225. *By Mr. Plunkett*: Were any explanations given by the Government specifying all the claims that were made for stopping the sums? Yes; they make their claims for interest as it becomes due.
226. Did the Government explain to the Corporation the particular items upon which they stopped the payments? No; they did not.
227. Was the explanation applied for? Yes.
228. What reason was given for withholding that information? Their reply referred merely to the vote of £10,000, which by the advice of the Law Officers had been appropriated for interest on water and sewerage account.
229. *By the Chairman*: This is a special appropriation under one of the Acts for the formation of streets running through Crown property? Yes; £6,200 was voted for that purpose by the Legislature, and a further sum of about £2,000 authorised by the Government to be expended.
230. *By Mr. Plunkett*: Is the correspondence with the Government lengthy? Yes; there is a great deal of it.
231. *By Mr. Rotton*: The Corporation suppose that they are not justly liable for the £25,000 for the resumption of the land—what grounds have they for expecting this? Merely from the provisions of the second section of the Water Act, that this money should be provided by the Government.
232. They have taken no legal advice upon the matter? The Government themselves took legal advice upon it.
233. What was the result? The Attorney General's (Mr. Manning) opinion was, that the amount was entirely separate from the original amount authorised by the House to be raised for water purposes.
234. As to the liability of the Corporation? That question has never been raised.
235. You stated that the Corporation believed that they were not justly liable for the money? No; I beg pardon.
236. Then, by your last answer, I am to infer that they do consider themselves liable? It is included with the general expenditure on the water account, and is, in point of fact, a part of the cost of introducing the water into the City.
237. *By the Chairman*: Do you know, as a fact, that hitherto the Government have considered it their duty to make provision for water reserves for all towns which they form? I believe there are such provisions.
238. Do you not know that it is the practice of Government to give reserves of land and reservation of water for towns? No doubt this is the case, though not in the present instance, of the Botany lands.
239. Do you consider that the citizens of Sydney have a clear right to such reservations? Certainly, and the Lachlan Swamp, covering an area of 340 acres, has been so reserved to this City.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

SEWERAGE AND WATER SUPPLY.

(THIRD YEARLY REPORT OF MUNICIPAL COUNCIL.)

*Ordered by the Legislative Assembly to be Printed, 4 May, 1860.**THIRD YEARLY REPORT of the Municipal Council of the City of Sydney, of their Proceedings in connection with the Sewerage and Water Works.*

In accordance with the provisions of the 75th section of the Sydney Corporation Act of 1857, the Municipal Council have the honor to submit, for the information of the Parliament of New South Wales, the following Report of their Proceedings, and Statements of the Receipts and Expenditure, under the Sewerage Act, 17 Victoria, No. 34, and Water Act, 17 Victoria, No. 35, to the 31st December, 1859:—

SEWERAGE.

The Municipal Council have not undertaken any works in connection with the Sewerage of the City during the past year. The number of house drains connected with the main sewers during the year 1858 was 234, and in 1859, 320—making a total of 554.

A statement, shewing the localities in which these connections are made is appended Appendix A. hereto.

WATER.

The Municipal Council have the satisfaction of reporting that the works commenced in the year 1854, for securing a permanent supply of water to this city, have been so far completed as to provide a constant supply to the lower, and an almost sufficient supply to the higher, levels of the town.

The contract entered into by Mr. William Randle on the 7th May, 1855, for three seventy-five horse-power steam engines, and the erection of them at Botany, has, after considerable modification of the details of the specification, been satisfactorily completed. The engines are now in perfect order, may be worked without intermission, and each engine is capable of sending into Sydney 3,000,000 (three millions) of gallons every twenty-four hours, or in the aggregate nine millions of gallons per day.

In the Report of the City Engineer to the City Commissioners of the 28th March, 1856, it was recommended that the plans for the stand pipe originally contemplated should be laid aside, and in a subsequent report, of date the 25th February, 1857, the engineer states that, "By aid of the air vessels and air pumps which I received permission to order from England, I shall be able to dispense with the stand pipe whilst pumping six millions of gallons per day through the 30-inch mains, and I have no doubt the stand pipe may be dispensed with entirely, should the engines be required to send in double that quantity."

The truth of this opinion has been fully demonstrated. The air vessels ordered in lieu of the stand pipe have been subjected to the severest trials which they can under any circumstances encounter, and have proved themselves fully equal to the duty required of them. The three engines have frequently been worked simultaneously, when their duty collectively exceeded the rate of nine millions of gallons of water pumped into Sydney per day. On other occasions the two coupled engines have been started after the whole of the machinery had been standing for fifteen hours, and by the elasticity of the air contained in the air vessels the entire column of water in the mains between Botany and the summit of the sand hill near the Military Barracks at Paddington, four miles in length, and 210 feet in perpendicular height, was put in motion and the water discharged on to the sand hill at the rate of nine millions of gallons per day, without detriment to the mains or machinery. At the same time the column of mercury in the pressure guage, erected near the air vessels, and which is operated upon by the column of water in the mains, registered, after four revolutions of the engines, a pressure equal to that of a column of water 298 feet in perpendicular height, or 88 feet in excess of the height of the column of water between Botany and Sydney. This was the most severe trial which the machinery could under ordinary circumstances possibly undergo, and it proved most conclusively that the power of the engines is fully equal to the duty they have to perform; that their stability is unquestionable; that the air vessels are strong and efficient; and that the strength of the 30-inch mains is fully equal to the strain they have to bear in conducting the column of water to the highest parts of Sydney.

The single engine has likewise been submitted to a similar test, and started against the pressure of the whole column of water with perfect ease and success. The machinery and mains have been in operation since the 6th December last, without exhibiting the slightest symptom of weakness or probable derangement in any of their parts.

The contract "No. 33, Botany Water Works," entered into by Mr. John Poole, for the removal of sand and earth for the formation of the sea embankment, was abandoned by him before completion, and the work remains unfinished to this day. The work will, however, be re-commenced shortly.

The contract "No. 34, Botany Water Works," entered into by Mr. John Poole, for the formation of a sand bank across the upper mill pond was completed by him satisfactorily.

The contracts entered into by Messrs. P. N. Russell and Co. for the supply of general castings, water locks, &c., during the year 1859, were satisfactorily completed.

The contract of Messrs. Staggs and Honner, for the construction of a sea wall at Botany; that of Mr. Benjamin James for clearing out the engine pond, making canal, and turfing embankments at Botany; that of Messrs. Matthews and Jennings for the construction of sluices, weir bridge, puddled bank, &c., at Botany; that of Messrs. Bishop and Spencer for pile driving, planking, &c., at Botany; that of Messrs. W. Jolly and Co. for the supply of hardwood timber, &c., to the Botany Works; that of Mr. Thomas Hale for the supply of Bellambi coals to the Botany engines during the year 1859; and that of Mr. H. R. Whittell for the supply of coals to the Lachlan Swamp engine during the year 1859, have all been satisfactorily completed.

The contract for the building of the low level reservoir, situate between Crown, Riley, Campbell, and Gipps Streets, entered into by Messrs. Donohoe and Vaughan, has been executed very satisfactorily. This work, which covers more than an acre of ground, and containing three and a half ($3\frac{1}{2}$) millions of gallons of water, has been in operation during the last two months, and tested in every way as to its tightness and stability, and has proved itself perfect in every respect.

The contract entered into by Messrs. Rabone, Feez, and Co., on the 5th May, 1858, to supply upon a wharf in Sydney, within nine months from that date, the iron girders, &c., for the covering of the low level reservoir, was satisfactorily performed in every respect, excepting their delivery to the stipulated time.

The contract undertaken by Messrs. Hawkins and Gleeson, for covering the arches of the low level reservoir with puddle and earth, is being carried out and approaching completion.

The

The contract entered into by Mr. Allan A. Marshall, for the erection of twenty drinking fountains in the streets of Sydney, has been completed in a most satisfactory manner, and the following is a list of the localities in which they have been erected:—

- 1 King-street, near Supreme Court.
- 1 King-street, near north-west angle of George-street.
- 1 George-street, near Queen's Wharf.
- 1 George-street, near Central Police Office.
- 1 George-street, at Haymarket.
- 1 Circular Quay, near Custom House.
- 1 Market-street, near corner of York-street.
- 1 Market-street, between Pitt and George Streets.
- 1 Sussex-street, at Pymont Bridge approach.
- 1 Fort-street, at junction with George-street.
- 1 Pitt-street, opposite *Herald* Office.
- 1 Bridge-street, near George-street.
- 1 Bridge-street, near Macquarie-place.
- 1 Erskine-street, near Lime-street Wharf.
- 1 Park-street, near angle of Castlereagh-street.
- 1 Sussex-street, near corner of Bathurst-street.
- 1 Liverpool-street, near Hyde Park.
- 1 South Head Road, near Darlinghurst Gaol.
- 1 William-street, near Burdekin Paddock.
- 1 Abercrombie-street, near Parramatta-street.

20 Fountains.

An ornamental fountain, with a basin ten feet in diameter, has been erected in the northern portion of the George-street Markets, and two hydrants, or water posts, have been erected there for the purpose of washing the interior of the markets, and acting as fire-plugs in cases of fire.

All that portion of the city north of Liverpool-street, excepting the lowest levels in Woolloomooloo, is now abundantly supplied with water from the new reservoir in Riley-street, and as the water is never shut off from the town this service is constant.

The lowest levels of Woolloomooloo, and the neighborhood of the Haymarket south of Liverpool-street, continue as heretofore to be supplied from Lachlan Swamp. This service is also constant.

The highest levels of the city, comprising Darlinghurst Road, Bourke and Campbell Streets, Surry Hills, are now being supplied, to the extent of about 200 houses, with water from Botany; but as the high level reservoir has not yet been constructed, the service to these houses is necessarily intermittent, because when the 30-inch main is full and overflowing the engines are stopped to avoid swamping the houses on the Sand Hill, and as the filling of the main seldom occupies more than 25 to 30 minutes the supply to the houses at the summit level of the city, or nearest to the head of the main, must necessarily be very limited; and as the number of house service pipes in connection with the high level mains increases so the time of service will decrease, and the inconvenience of short and uncertain supply will be felt by all in the high level district. This can only be remedied by the construction of suitable high level reservoirs.

The works which have been executed in connection with the new water supply comprise only those which were actually necessary to demonstrate the practicability of sending in the water from Botany to the highest levels of the city by the machinery and works constructed for the purpose. So far the public mind has been satisfied, and the only works necessary to insure an abundant and constant supply of pure water to all parts of the city and to the suburban municipalities are the high level reservoirs adjacent to the Military Barracks, and the completion of the embankments at Botany.

A statement, shewing the quantity of new mains laid during the past year is appended Appendix B. hereto.

FINANCIAL.

Appendix C.

Abstracts of the Receipts and Expenditure of the Municipal Council, on account of the Sewerage and Water Funds, from the 1st January to 31st December, 1859, duly certified by the City Auditors, are hereto appended.

JAMES MURPHY,

Mayor.

Adopted by the Municipal Council of the City of Sydney, this thirtieth day of April, A.D. 1860.

CHA. H. WOOLCOTT,

Town Clerk.

STATEMENT

1859-60.

Legislative Assembly.
NEW SOUTH WALES.

MUNICIPALITY OF BALMAIN.

(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 20 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Householders of the Hamlet of Balmain,—

SHEWETH:—

That, on the presentation by a number of the Householders of Balmain of a petition to the Executive Council, praying the incorporation of Balmain under the provisions of the Rural Municipalities Act, your Petitioners forthwith laid before the said Executive Council a counter-petition, in terms of the Act, signed by 416 persons, being a majority of 43 beyond the number signing the original petition.

That the said counter-petition was duly gazetted according to law.

That, notwithstanding such petition, and the wishes of a majority of the inhabitants of Balmain, Her Majesty's Government did make and proclaim Balmain a Rural Municipality by virtue of the said Act.

That the Township of Balmain is not yet sufficiently matured to bear a burthen of taxation.

Your Petitioners, therefore, humbly pray that, on the grounds of the illegality of the said incorporation of Balmain against the desires, as expressed by petition, of a majority of the inhabitants thereof, your Honorable House will cause to be granted to your Petitioners such relief in the premises as to your Honorable House shall seem meet.

ALBURY MUNICIPALITY AND COMMON.

No. 1.

MESSRS. ROPER AND MILLER to COLONIAL SECRETARY.

Albury, 16 December, 1858.

SIR,

I do myself the honor to transmit herewith a Petition, signed by eighty-six householders, praying that His Excellency the Governor General will declare Albury a Municipality, under the Act for establishing Municipal Institutions, assented to 27th October, 1858.

We have, &c.,

JOHN ROPER.

WALTER M. MILLER.

(On behalf of the Committee.)

[*Enclosure in No. 1.*]

To His Excellency SIR WILLIAM THOMAS DENISON, Knight Commander of the Most Honorable Order of the Bath, Governor-in-Chief of the Territory of New South Wales and its Dependencies, Captain General and Vice Admiral of the same, &c., &c., &c.

The Petition of the undersigned Householders of the Town of Albury,—

HUMBLY SHEWETH:—

That your Petitioners consider it desirable that the Town and District of Albury, containing a population of two thousand and fifteen souls, should be declared and constituted a Municipality, under the provisions of the Act 22 Victoria, No. 13.

That your Petitioners propose the following as the boundary of the said Municipality:—Commencing at a point at the eastern extremity of Hawdon's Lagoon on the right bank of the Murray River; bounded on the east by the extended boundary of Albury Reserve; on the north by the northern boundary of that reserve, being a line bearing west eleven miles; on the west by a line bearing south about three miles four furlongs to the Murray River; and on the south by that river upwards to the point of commencement.

Your Petitioners therefore humbly pray that your Excellency will be pleased to proclaim the said premises as a Municipality, under the provisions of the said Act.

And your Petitioners will ever pray.

(*Here follow 86 Signatures.*)

No. 2.

MINUTE of Executive Council.

THE Executive Council advise, in terms of the 2nd Clause of the Municipalities Act of 1858, that His Excellency the Governor General should now cause the substance of the enclosed Petition to be published in the *New South Wales Government Gazette*.

The Council further advise, in terms of the same Clause, that unless a Counter-Petition, signed by a greater number of householders, residents in the Town of Albury, be received by the Colonial Secretary within three months from the date of such publication, His Excellency the Governor General should cause to be published in the *Government Gazette* a Proclamation declaring the said Town a Municipality, and should also define the limits and boundaries thereof.

A. ORPEN MORIARTY,

Clerk of the Council.

24 December, 1858.—No. 58-808.

No. 3.

No. 3.

*NOTICE in Government Gazette.**Colonial Secretary's Office,
Sydney, 14 January, 1859.*

MUNICIPAL INSTITUTIONS.—ALBURY PETITION.

IN pursuance of the Act of the Colonial Parliament, 22 Victoria, No. 13, His Excellency the Governor General, with the advice of the Executive Council, has directed the publication of the substance and prayer of a Petition addressed to His Excellency, as herein set forth, signed by eighty-seven Inhabitants, Householders of the Town of Albury, praying for the erection of their locality into a Municipality.

CHARLES COWPER.

THE Petitioners state that they consider it desirable that the Town and District of Albury, containing a population of two thousand and fifteen souls, should be declared and constituted a Municipality under the provisions of the Act 22 Victoria, No. 13.

The Petitioners propose the following as the boundary of the Municipality:—Commencing at a point at the eastern extremity of Hawdon's Lagoon, on the right bank of the Murray River; bounded on the east by the extended boundary of Albury Reserve; on the north by the northern boundary of that reserve, being a line bearing west eleven miles; on the west by a line bearing south about three miles four furlongs to the Murray River; and on the south by that river upwards to the point of commencement.

And the Petitioners pray as follows:—"That your Excellency will be pleased to proclaim the said premises as a Municipality, under the provisions of the said Act."

(Here follow 87 Signatures.)

No. 4.

THE UNDER SECRETARY to UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

*Colonial Secretary's Office,
Sydney, 13 April, 1859.*

SIR,

I am directed to transmit to you the accompanying Petition, from the Inhabitants of Albury, praying to be incorporated under the Municipalities Act of 1858, and to request that you will move the Secretary for Lands and Public Works to cause a report to be obtained from the Surveyor General, whether there appears to be any objection to the adoption by the Government of the proposed boundaries as described in the Petition.

I have, &c.,

W. ELYARD.

The Surveyor General is requested to report.

B. C.—20 April, 1859.

M. F.

No. 5.

REPORT of Surveyor General.

THE object of the Petitioners is the inclusion in the Municipality of the Albury Reserve, embracing the extension; and to this there does not appear to exist any objection, although there is little doubt that, as settlement progresses, an addition to the Municipality will be desirable.

An amended description is herewith enclosed.

*Surveyor General's Office,
14 May, 1859.*GEO. BARNEY,
Surveyor General.

Forwarded to the Principal Under Secretary.

B. C.—16 May, 1859.

M. F.

[Enclosure

[Enclosure in No 5.]

Description of the Municipality of Albury, in the County of Goulburn.

Commencing on the River Murray or Hume, near the eastern end of Hawdon's Lagoon, at the south-east corner of J. F. H. Mitchell's 502 acres, and bounded thence on the east, north, and west by the boundary of the Albury Reserve, being lines bearing north 3 miles and 50 chains, west 4 miles, south about 1 mile and 20 chains, west 4 miles and 72 chains, and south 1 mile and 72 chains to the River Murray or Hume; and on the south by that river upwards to the point of commencement.

Albury Petition for a Municipality.

Memo :—

See No. 2 in
Schedule.

Against this proposed Municipality there has been no Counter-Petition. The Municipality may, therefore, be proclaimed under the Minute of the Executive Council of 24th December last, on 58-4943.

Before this can be done, the name of the Municipality has to be decided, and the boundaries defined. The latter are proposed in a paper from the Surveyor General.

As the number of inhabitants exceed 4,000, the number of Councillors will be nine. A Mayor is not asked for.

For the Executive Council.

18 May.

C. C.

No. 6.

MINUTE of Executive Council.

ALBURY MUNICIPALITY.

THE Executive Council advise, in terms of the 2nd Clause of the Act of the Local Parliament, that His Excellency the Governor General should cause to be published in the *Government Gazette* a Proclamation, declaring the Town and District of Albury a Municipality under the name and with the limits and boundaries stated and defined in the papers herewith.

No. 7.

MUNICIPALITY OF ALBURY.

PROCLAMATION.

By His Excellency SIR WILLIAM THOMAS DENISON, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice Admiral of the same, &c., &c., &c.

WHEREAS by an Act of the Parliament of New South Wales, passed in the twenty-second year of the reign of Her present Majesty, intituled, "*An Act for establishing Municipal Institutions,*" and commonly styled and cited as "*The Municipalities Act of 1858,*" it was amongst other things enacted, that any City, Town, or Hamlet then or thereafter established, or any Rural District, might, as therein provided, be constituted a Municipality; and it was by the said Act enacted, that the Governor, with the advice of the Executive Council, might, on the receipt of a Petition, signed by not fewer than fifty householders resident within any such City, Town, Hamlet, or Rural District, praying that the same might be declared a Municipality under the said Act, and stating the number of the inhabitants thereof, cause the substance and prayer of such Petition to be published in the *Government Gazette*; and unless a Counter-Petition, signed by a greater number of householders, resident as aforesaid, should be received by the Colonial Secretary within three months from the date of such publication, the Governor, with the advice aforesaid, might by Proclamation published in like manner declare such City, Town, or Hamlet, or such Rural District, to be a Municipality, by a name to be mentioned in such Proclamation, and might also, by the same or any other Proclamation,

Proclamation, define the limits and boundaries thereof; and that upon such publication the Municipality should be constituted accordingly: And whereas a Petition, signed by eighty-seven householders resident within the Town of Albury, in the County of Goulburn, in the Colony of New South Wales, praying that the Town and District of Albury might be declared a Municipality under the provisions of the said Act, and stating that the number of the inhabitants of the said Town and District was two thousand and fifteen, was presented to the Governor, the substance and prayer of which Petition were duly published in the *Government Gazette*, in accordance with the provisions of the said Act: And whereas no Counter-Petition signed by a greater number of householders resident within the said Town and District of Albury was received by the Colonial Secretary within three months from the date of such publication: And whereas the Governor, with the advice of the Executive Council, has, in exercise of the powers conferred by the said Act, determined to declare by Proclamation such Town and District of Albury to be a Municipality by the name hereinafter mentioned, and to define the limits and boundaries thereof in the manner hereinafter defined: Now, therefore, I, SIR WILLIAM THOMAS DENISON, the Governor General and Governor-in-Chief aforesaid, in pursuance of the provisions of the said Act, and with the advice of the Executive Council, do by this my Proclamation declare that the District hereinafter described and named shall be a Municipality within the meaning of the said Act, and that the limits and boundaries thereof shall be as follows, that is to say:—

THE MUNICIPALITY OF ALBURY.

In the County of Goulburn, commencing on the River Murray or Hume, near the eastern end of Hawdon's Lagoon, at the south-east corner of J. F. H. Mitchell's 502 acres, and bounded thence on the east, north, and west by the boundary of the Albury Reserve, being lines bearing north 3 miles and 50 chains west 4 miles, south about 1 mile and 20 chains, west 4 miles and 72 chains, and south 1 mile and 72 chains to the River Murray or Hume; and on the south by that river upwards to the point of commencement.

And I do hereby, with the advice aforesaid, declare and direct that such Municipality shall be called by the name of "The Municipality of Albury."

Given under my Hand and the Seal of the Colony, at Government House, Sydney, this fourth day of June, in the year of our Lord one thousand eight hundred and fifty-nine, and in the twenty-second year of Her Majesty's Reign.

(L.S.) W. DENISON.

By His Excellency's Command,

CHARLES COWPER.

GOD SAVE THE QUEEN!

Municipality of Albury.

Memo:—

The next step to be taken is for the Governor, with the advice of the Executive Council, to appoint the first Returning Officer, and to name a day for the election of Councillors. The appointment of Returning Officer must be made within three months from the date of the proclamation of the Municipality, viz., 4th June, 1859; and the meeting of the electors to be not less than 20 days, nor more than 40 days, from the date of the proclamation for the election of Councillors. (22 Vic., No. 13, s. 12.)

By the 33rd clause the Governor, with the advice of the Executive Council, may declare that the Council of any Municipality shall consist of a Mayor and Aldermen; otherwise the number of Councillors is fixed by the Act.

13 June.

TELEGRAM.

Received the following Message from Albury Station, at 11h. 45m., July 8th, 1859:—
From JAMES MCLAURIN to THE HONORABLE CHIEF SECRETARY, Sydney,—

At a public meeting held in Albury, yesterday, it was resolved that the Chairman be requested to forward a telegram to the Government, expressing the dissatisfaction of the public of Albury at the contracted extent of the Municipal boundary proclaimed, and their refusal to nominate candidates unless the boundary petitioned for be conceded. A reply, stating the course Government will pursue in this case, is requested.

ALBURY MUNICIPALITY AND COMMON.

No. 13.

THE UNDER SECRETARY to SURVEYOR GENERAL.

MY DEAR SIR,

Perhaps you will look at the enclosed papers, and tell me how the boundaries proposed by the residents at Albury for their Municipality have been altered so as to contract it as stated.

Yours, &c.,

W. ELYARD.

9th July.

No. 14.

MEMO. of Surveyor General.

The extent of the land embraced in the description to which the telegram refers is all that can be given for the purpose until the reserve has been extended, as shewn by a blue line on sketch. To such extension probably there will be no objection. (See sketch annexed—A.)

G. B.

No. 15.

TOWN CLERK, ALBURY, to COLONIAL SECRETARY.

*Town Clerk's Office,**Albury, 25 August, 1859.*

SIR,

The Municipal Council instruct me to communicate with you as to the present boundaries of the Municipality of Albury.

I have the honor to call your attention to the very large curtailment of the boundaries of the Municipality as proposed in the original petition of the inhabitants.

The Council are unaware of the reasons which induced the Government so to limit the boundaries, and they would respectfully request that the boundaries may be extended, so that the Municipality may include the area originally applied for.

I have, &c.,

S. F. BLACKMORE.

Referred to Secretary for Lands. B. C.—29 August, 1859.

Acting Surveyor General. B. C.—1 September, 1859.

M. F.

No. 16.

REPORT of Acting Surveyor General.

Same as that
with Surveyor
General's Memo.,
No. 14.

THE curtailment complained of is shewn on the within tracing, on which the red line indicates the boundary proclaimed, and the blue that intended to be applied for.

It might have been considered undesirable to embrace in the Municipality land held under pastoral occupation, as would have been the case had the blue line in the tracing been adopted; but this point was not brought under consideration, as the Petition described the north boundary applied for as "the northern boundary of that (the Albury) Reserve," and, although the length stated was greater than that of the reserve boundary, it was supposed that this was merely an error resulting from imperfect information as to what was the boundary of the reserve.—See B. C. Memo., of 14 May, 1859, of the late Surveyor General.

A. G. M'LEAN,

Acting Surveyor General.

No. 17.

No. 17.

TOWN CLERK, ALBURY, to COLONIAL SECRETARY.

*Town Clerk's Office,**Albury, 29 September, 1859.*

SIR,

With reference to my letter of the 25th August, relative to the curtailment of the boundaries of the Municipality of Albury, I am instructed by the Council to apply for an extension of the Town Common, and to state, that the daily increasing population of this place makes it necessary for this matter to receive immediate attention.

For years past a constant war has been waging between the townspeople and the squatters occupying the runs named Bungowannah Station, and Thurgona Station, the former occupied by Mr. John Dight, the latter by Mrs. Mitchell. The cattle owned by the townspeople cannot be kept from straying upon the squattages, and the squatters, in the exercise of their rights, have no alternative but to impound the stock so trespassing, thus keeping alive the ill-feeling that is certain to be engendered by such a state of things, or submit to be over-run by the cattle of the townspeople, and their runs rendered of little value.

All purchasers of Crown Lands conceive they have a right of depasturage on all adjacent unalienated Crown Lands, and their being confined to lands within their own fences tends most seriously to injure them individually; and when its effects, as felt collectively, are considered, it must be admitted that the progress of the township is retarded, and those residents particularly who combine farming their small holdings with carrying and conveying goods to the different places on the roads, are either driven away altogether, compelled to absent themselves from their families, or live in a state of comparative destitution. In consequence of having their labor restricted, and their teams of horses or bullocks deprived of pasturage, they are compelled to sell.

The Council are informed that Mrs. Mitchell, of Thurgona Station, has already proposed to surrender her run entirely to the Government, seeing plainly that in a few years it will pass from her hands if the public requirements are to be satisfied. During the last three years large portions of the lands comprising that station have been purchased from the Crown.

The Bungowannah Station has not had so much taken from its original proportions, owing merely to the surveyors not having surveyed so much for sale; but it is found impossible to prevent the town cattle from straying upon the portion of that station known as Splinter's Creek and Lester's Forest; all of which is suited to agricultural purposes, and will be readily purchased if put up to sale.

Knowing the importance of this subject, and how much benefit would be conferred upon this community by the Government consenting to extend the Town Common, the Council beg to represent that it is most desirable the boundaries of the Town Common should be the boundaries of the Thurgona and Bungowannah Stations. The consent of the Government to this proposal would confer a boon on this community that could not be too highly estimated; and although the two holders of the stations might deem their interests to some degree injured, the thousands who reside within the area and this Municipal District would be benefited to such an extent that could but be duly appreciated.

Feeling assured that the Government would not arrive at a decision upon a subject of such general interest here, and of such importance in itself, without the fullest information, the Council beg most respectfully to suggest, that the question be referred to Mr. Commissioner Lockhart, of the Tumut, for his report, whose large experience as a colonist and as a Government officer qualifies him more than anyone with whom the Council are acquainted to offer such suggestions and opinions as will enable a correct conclusion to be arrived at.

I have, &c.,

11 October.

- 1.—Can the land asked for be taken from the run of the present lessee?
- 2.—If it can, does the Secretary for Public Lands see any reason why it should not?
- 3.—Ought it then to be included within the boundary of the Municipality?

C. C.

Acting Surveyor General.—12 October.

M. F.

No. 19.

REPORT of Acting Surveyor General.

Mr. Dight's Bungowannah Run and Mrs. Mitchell's Mungabarina Run (called herein "Thurgona") contained, exclusively of the original Albury Reserve, which was taken out of them, nearly 100,000 acres.

Of this about 20,000 acres has been added to the Albury Reserve, and to a large extent alienated; thus leaving about 80,000 acres, as now applied for, for a Town Common for Albury.

Mr. District Surveyor Adams is about proposing an extension of the Albury Reserve, which will probably embrace all or nearly all of the Mungabarina Run, and a large portion of the Bungowannah Run; but how far it may be expedient to devote the extension, after its approval, to the purposes of a Town Common is a matter of consideration.

There are at present about four square miles (upwards of 2,500 acres) reserved temporarily for town pasturage for Albury, and the ordinary size of Town Commons is about 1,000 acres.

A. G. McLEAN,

A. S. G.

B.C.—17 October, 1859.

No. 20.

ACTING SURVEYOR GENERAL to UNDER SECRETARY FOR LANDS.

(59-9970.)

*Surveyor General's Office,**Sydney, 12 December, 1859.*

SIR,

I have the honor to forward, for submission to the Honorable the Secretary for Lands, a communication which I have received from Mr. District Surveyor Adams, and which has resulted directly from the recommendation of the Municipal Council of Albury,—the subject of which, however, has long been under consideration.

2. The original reserve of Albury and the first extension embraced about 28 square miles, of which all the best land has already been alienated. The proposed extensions, 1, 2, and 3, contain respectively 51 square miles, 15 square miles, and $7\frac{1}{2}$ square miles; but out of No. 1 a considerable extent of land has already been measured and sold within leased runs; and authority was given by your B. C. letter of the 11th day of March, 1858, for further sale measurements within the same runs.

3. The formation of reserve No. 1 I recommend as necessary to meet the growing demand for land in the vicinity; and of No. 3 as required, or likely shortly to be required, for commonage for Albury. It does not appear to be necessary at present to proclaim the No. 2 reserve as proposed; but, on account of its proximity to Albury, it appears to be desirable that no pre-emptive right purchases within it should be permitted, excepting where valuable improvements exist.

ALBURY MUNICIPALITY AND COMMONS

11

4. With reference to the last paragraph of Mr. Adams's letter, I may remark that the extent of the watershed of Bowna Creek, beyond the proposed reserves, is about 180 square miles, and that Mr. Adams made the recommendation in compliance with a direction from this office.

5. The suggestion was made, as in the recent case of Warwick, with the view of obviating the withdrawal of land from pastoral occupation until actually required for settlement, and, at the same time, preventing a monopoly of the best land under pre-emptive right. The Government has, no doubt, power, under the Orders in Council, to reserve land from pre-emptive sale by refusing to comply with applications for such purchases; and what is herein proposed is, to make a decision, applicable to certain lands, whether applications may have been made or otherwise, and thus to ensure equality of treatment to the licensees or lessees, instead of deciding on each application as it arises, and probably refusing in one case, under the influence of public petitions or otherwise, what may have been immediately previously conceded in another.

6. As it is not proposed to reserve from such sale, as part of the general measured lands containing valuable improvements, some discretion will still be left to the Government in the determination of the area to be sold with improvements.

7. The proceeding is beneficial, because protective of pastoral interest, and at the same time protective of the future interests of agricultural settlement.

8. I may add, that though the area proposed to be embraced in the reservation is a large one, it must be remembered that the decision could only apply practically to the comparatively small area forming the choicest portion of the whole, and which might, probably, be sought to be purchased under pre-emptive right.

I have, &c.,

A. G. McLEAN,

A. S. G.

[Enclosure in No. 20.]

Albury, 11 October, 1859

Sir,

In compliance with instructions conveyed to me in your letters of the 23rd March, 1858, No. 431, and 15th ultimo, No. 2,351, I have the honor to transmit a sketch shewing three proposed extensions to the Albury, Mullingandra, and Bowna Reserves. (See *Sketch annexed, B.*) These letters are of a general character and not given.

2. I find it impossible to suggest a reservation which would embrace land entirely of an agricultural character, or which would all be immediately saleable.

3. The reserve No 1 contains the greatest part of the land required for sale in the neighborhood of Albury, and I consider that half of it would be sold within twelve or eighteen months.

4. No. 2 is nearly all of it enclosed within the large paddocks of Mrs. E. Mitchell and Mr. John Hore—about half of this reserve would be saleable; but, from its being enclosed, &c., I have submitted it in this form for your consideration.

5. No. 3 contains but little land that could be at present offered for sale, as a large portion of it is supposed to be auriferous. I have suggested it principally at the wish of the inhabitants of the town to which the present pasturage reserve is of very little use in its present form, and the continual tax in impounding will be severely felt until natural boundaries are substituted.

6. Before sub-dividing the western portion of extension No. 1, I would obtain the report of the Gold Commissioner who has pointed out to me the limits to which he would confine the measures.

7. With reference to the limits to which the exercise of the pre-emptive right should be allowed, I would suggest none should be permitted within reserves 1 or 3, or within the watershed of Bowna Creek or its tributaries.

I have, &c.,

P. F. ADAMS,

District Surveyor.

The Surveyor General.

No. 1.

POLICE MAGISTRATE, ALBURY, to SECRETARY FOR LANDS AND PUBLIC WORKS.

*Police Office, Albury,**3 February, 1857.*

SIR,

Sketch. N.E.—
Returned to
Bench.

I have the honor to draw attention to the sale of the undermentioned portions of land, as shewn in the accompanying tracings, advertised to take place at this office on the 12th proximo, viz. :—137, 138, 139, 140, 141, 142, 143, 144, 145.

At present there is no reserve *adapted* for grazing the milking cattle belonging to the townspeople, or for teams carrying on the roads. A piece of ground has been reserved adjoining the township for such purpose, but being *mountainous* and *scrubby* is entirely worthless; and the part now under notice is situated at the rear of it, and has always been used for town pasturage. It is the *only* land now available for that object, and is, in my opinion, indispensably requisite for the same. I, therefore, most respectfully request that the piece of land indicated in the tracing may be withdrawn from sale and reserved for town pasturage.

The inhabitants have a special claim for consideration in this application, as a large block of ground known as the Pound Paddock, situated in a bend of the river adjoining the town, has recently been sold, although marked in the old charts as a reserve.

I have, &c.,

HEYWARD ATKINS,

Police Magistrate.

No. 2.

(57-439.)

REPORT of Surveyor General.

THE existing Town Pasturage Reserve at Albury contains somewhat more than 640 acres, and was selected by the Bench of Magistrates in June, 1852, instead of two portions previously selected, containing respectively 1,022 and 480 acres, which it was explained to the Bench were either too large or too small (Colonial Secretary's letter of the 8th November, 1851, No. 565, authorizing 640 acres only), and one of which is the reserve alluded to in the within letter as having "recently been sold, although marked on the old maps as a reserve." This last-mentioned portion, it may be remarked, had long previously been marked on the maps as "reserved for town pasturage and extension." This reservation was, of course, set aside by the selection of a definite pasturage reserve; and, had that not been the case, its requirement for extension of the town obviously superseded the further reservation.

The portions of land now under reference were measured for sale some months since by Mr. Licensed Surveyor Parkinson, and as they did not interfere with any existing reservation they were proclaimed.

It seems from the enclosed letter that the existing pasturage reserve, although selected as before stated by the Bench, is unsuited to the purpose, and office plans lead to the conclusion that this is to a great extent the case.

Under the circumstances it appears to be expedient that the lands referred to should be withdrawn and withheld from sale until some general decision shall have been arrived at relative to town pasturage reserves, and some permanent appropriation of a suitable character made under that decision for Albury.

GEO. BARNEY,

S. G.

Legislative Assembly.

NEW SOUTH WALES.

PROPOSED COMMON AT ALBURY.

(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 18 May, 1860.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The Petition of the Mayor and Aldermen of the Municipality of Albury,—

HUMBLY SHEWETH :—

That the inhabitants of the town of Albury petitioned under the Municipalities Act of 1858 that the town might be proclaimed a Municipality, with the boundaries as follows :—Commencing at a point of the eastern extremity of Hawdon's Lagoon, on the right bank of the Murray River ; bounded on the east by the extended boundary of Albury Reserve ; on the north by the northern boundary of that reserve, being a line bearing west eleven miles ; on the west by a line bearing south about three miles from Furlong's to the Murray River ; and on the south by that river upwards to the point of commencement.

That the Municipality was proclaimed with the following boundaries :—Commencing on the River Murray or Hume, near the eastern end of Hawdon's Lagoon, at the south-east corner of J. F. H. Mitchell's 502 acres ; and bounded thence on the east, north, and west, by the boundary of the Albury Reserve, being lines bearing north three miles and fifty chains, west four miles seventy-two chains to the River Murray or Hume, and on the south by that river upwards to the point of commencement.

That, by this great curtailment of the boundaries of the Municipality, the inhabitants are deprived of extensive reserved land which might be used by them as a Common.

That the want of a Town Common has for a long time past been a great inconvenience to the inhabitants of Albury, and greatly retards the progress of the town.

That the town is immediately surrounded by the runs of Bungawannah and Thurgona ; and, there being no commonage for the town, the cattle of the townspeople are continually trespassing on these squattages to the great annoyance and inconvenience of all parties, and keeping alive ill feeling, which must be engendered by such a state of things.

That the number of the cattle possessed by the townspeople may be estimated at from 2,000 to 3,000.

Your Petitioners would humbly pray your Honorable House that a Common adequate to the requirements of the daily increasing population of the Municipality of Albury may be speedily granted to them.

And your Petitioners will ever pray.

JAMES J. FALLON, Mayor.

TOWN HALL SITE EXCHANGE BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on the 4th instant, the "*Town Hall Site Exchange Bill*," beg leave to report to your Honorable House,—

That they have examined the Solicitor to the Municipal Council of Sydney* (whose evidence will be found appended hereto), and that the Preamble having been satisfactorily proved by the evidence of that gentleman, they proceeded with the several Clauses and Schedules of the Bill, in the consideration whereof they found it necessary to make *certain verbal amendments*.†

* Mr. R. Driver, jun.

† Vide "Schedule of Amendments."

And your Committee now beg to lay before your Honorable House the Bill, as amended by them.

P. FAUCETT,

Chairman.

Legislative Assembly Chamber,

Sydney, 11 May, 1860.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 11 MAY, 1860.

MEMBERS PRESENT:—

Mr. Clements,		Mr. Kemp,
Mr. Faucett,		Mr. Lyons.

P. Faucett, Esquire, called to the Chair.

Solicitor for the Bill, Mr. R. Driver, junr., *City Solicitor*.

Mr. R. Driver examined.

Committee considered the Preamble of the Bill.

Motion made (*Chairman*) and *Question*,—That this Preamble stand part of the Bill—*agreed to*.

Committee then proceeded with the several Clauses and Schedules.

Clauses 1 and 2 read, and agreed to without amendment.

Clauses 3 and 4 read, *verbally* amended (*Vide Schedule of Amendments*), and agreed to.

Clause 5 read, and agreed to without amendment.

First Schedule read, *verbally* amended (*Vide Schedule of Amendments*), and agreed to.

Second and Third Schedules read, and agreed to without amendment.

Chairman requested to report the Bill, as *verbally* amended and agreed to, to the House.

SCHEDULE OF AMENDMENTS.

Legislative Assembly.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

TOWN HALL SITE EXCHANGE BILL.

FRIDAY, 11 MAY, 1860.

Present:—

MR. CLEMENTS,
MR. KEMP,

MR. FAUCETT,
MR. LYONS.

PETER FAUCETT, ESQ., IN THE CHAIR.

R. Driver, Esq., appeared as the promoter of the Bill.

Richard Driver Esq., examined:—

1. *By the Chairman:* You are Solicitor for "a Bill to enable the Municipal Council of Sydney to substitute for their present site a more convenient site for a Town Hall?" I am. R. Driver,
Esq.
2. Are there certain lands vested absolutely in the Municipal Council of Sydney and their Successors as a site for a Town Hall? There are; I produce a grant from the Crown, dated 30th September, 1851. *(The witness produced the same. Vide Appendix A.)* 11 May, 1860.
3. Does that Grant contain the description given in the first Schedule to this Bill? It does.
4. Will you be kind enough to read it? *(The witness read the same.)*
5. That is the deed poll? Yes.
6. *By Mr. Kemp:* Does that bear date 30th December, 1851, as stated in the Bill? No, it is the 30th September. The date in the printed Bill is an error.
7. Who are the grantees of that? "The Mayor, Aldermen, and Councillors of the City of Sydney and their Successors."
8. *By the Chairman:* Is that issued in favor of the Mayor, Aldermen, and Councillors of the City of Sydney? It is.
9. Under the hand of the then Governor, Sir Charles Augustus Fitz Roy, and sealed with the Seal of the Territory? Yes, duly entered on record in the Colonial Secretary's Office.
10. Will you read the purpose for which the land was granted? "Which said piece or parcel of land is intended for and is hereby by Us granted as the site for a Town Hall and to the use of the said Mayor Aldermen and Councillors of the said City and their Successors for the purposes and in manner aforesaid." The recital to the Grant is—"in order to promote a site for a Town Hall in the said City for the use and convenience of Our said subjects inhabitants aforesaid."
11. Are the lands so situated, as not to afford a suitable site for such purpose? They are.
12. Can you say why it is inconvenient? It is at the extreme end of the town I may say.
13. Is there any power given in that deed to alienate the land? No.
14. Are the Council prevented from doing so? Yes—"the said piece or parcel of land hereby granted and every part thereof shall be at all times hereafter set apart maintained and used by the said Mayor Aldermen and Councillors and their successors for the use and convenience of the inhabitants of the said City for the time being as and for a Town Hall as aforesaid and for no other purpose whatever."
15. You are aware that the Mayor, Aldermen, and Councillors of that date have been superseded by another body? Yes.
16. What is that other body? The City Commissioners.
17. And that the City Commissioners have been superseded by another body? Yes, by the present Mayor, Aldermen, and Councillors.

SELECT COMMITTEE ON THE TOWN HALL SITE EXCHANGE BILL.

- R. Driver, Esq. 18. And the rights of the preceding bodies have been transferred? By Act of Council to the present body.
- 11 May, 1860. 19. Is it desirable or expedient that the present Municipal body should have power and authority to sell or exchange this land to obtain a more convenient site? It is both desirable and expedient.
20. Do the Corporation, in fact, require a Town Hall? They do.
21. And it is consequently desirable to exchange or to sell this land, and obtain other land for the site? Quite so.

APPENDIX.

A.

VICTORIA by the Grace of God of the United Kingdom of Great Britain and Ireland
Queen Defender of the Faith and so forth.

To all to whom these presents shall come,—

GREETING:—

KNOW YE that in order to promote the public convenience of Our Loyal Subjects the inhabitants of the City of Sydney in Our Territory of New South Wales and their successors inhabitants of the said City and in order to promote a site for a Town Hall in the said City for the use and convenience of Our said Subjects inhabitants aforesaid and in consideration of the quit rent hereafter reserved WE of Our Special Grace have granted and for Us Our Heirs and Successors Do hereby grant unto the Mayor Alderman and Councillors of the City of Sydney and their Successors for ever for the purpose aforesaid and subject to the conditions reservations and provisos hereinafter mentioned All that piece or parcel of land in Our said Territory containing by admeasurement one acre three roods and thirty-nine perches be the same more or less situated in the City of Sydney Parish of Saint James and County of Cumberland commencing at the south-east intersection of Bridge and Elizabeth streets and bounded on the north by Bridge-street bearing easterly two chains and ninety-two and a-half links to Phillip-street on the east by Phillip-street bearing southerly five chains and eighty-two links on the south by the segment of a circle (to which Phillip, Bent, and Elizabeth streets are tangents) to Elizabeth-street and on the west by Elizabeth-street bearing northerly five chains and nine links to the point of commencement (Advertised as number fifty-nine in the Government notice dated 23rd May, 1851): Together with all the rights members privileges and appurtenances whatsoever to the same belonging or in any wise appertaining which said piece or parcel of land is intended for and is hereby by Us granted as the site for a Town Hall: To Have and To Hold the same and every part thereof unto and to the use of the said Mayor Alderman and Councillors of the said City and their Successors for the purposes and in manner aforesaid: Yielding and paying therefore yearly unto Us Our Heirs and Successors the Quit Rent or sum of one farthing for ever if demanded: Reserving and excepting nevertheless unto Us Our Heirs and Successors all Mines of Gold of Silver and of Coal: PROVIDED NEVERTHELESS and We do hereby expressly declare that this Our Royal Grant is and shall be subject to the conditions hereinafter mentioned that is to say that the said piece or parcel of land hereby granted and every part thereof shall be at all times hereafter set apart maintained and used by the said Mayor Aldermen and Councillors and their Successors for the use and convenience of the inhabitants of the said City for the time being as and for a Town Hall as aforesaid and for no other purpose whatsoever: PROVIDED ALWAYS and We do hereby further declare that if the Corporation of the said City of Sydney shall be dissolved or by any means become extinct and be no longer existent or if the said piece or parcel of land hereby granted or any part or parts thereof shall at any time hereafter have ceased for the space of three years to be maintained or used as and for a Town Hall as aforesaid or in connection therewith or have been for and during such space used or applied to ANY OTHER PURPOSE WHATSOEVER than as a Town Hall as aforesaid or in connection therewith or shall be alienated or attempted to be alienated in fee simple or for any less estate or interest to any person or persons whatsoever by the said Mayor Aldermen and Councillors (save and except in pursuance of the powers and authorities now vested or hereafter to be vested in the said Mayor Aldermen and Councillors under and by virtue or in pursuance of any Act or Acts of the Governor and Legislative Council of the said Territory of New South Wales now in force or hereafter to be in force within the said Territory) it shall be lawful for Us Our Heirs and Successors by any person or persons duly authorized in that behalf by our Governor for the time being of Our said Territory to re-enter upon the said Land or such part or parts thereafter as shall so as aforesaid have ceased to be maintained or used as and for or in connection with such Town Hall as aforesaid or shall have been so as aforesaid used and applied to other purposes or shall have been so alienated or attempted to be alienated by the said Mayor Aldermen and Councillors as aforesaid and to hold possess and enjoy the same as fully and effectually to all intents and purposes as if this Grant had not been made: IN TESTIMONY WHEREOF We have caused this Our Grant to be sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR CHARLES AUGUSTUS FITZ ROY Knight Companion of the Royal Hanoverian Guelphic Order Governor General of all Our Australian Possessions and Captain-General and Governor-in-Chief of the Territory of New South Wales and its Dependencies at Government House Sydney in New South Wales aforesaid this Thirtieth day of September in the Fifteenth year of Our Reign and in the year of Our Lord One thousand eight hundred and fifty-one.

Legislative Assembly.
NEW SOUTH WALES.

SYDNEY BRANCH OF ROYAL MINT.
(DESPATCHES AND REPORTS RELATIVE TO COINAGE AT.)

Ordered by the Legislative Assembly to be Printed, 2 September, 1859.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR W. DENISON.
(No. 40.) *Downing-street,*
5 May, 1859.

SIR,

In compliance with the request of the Lords Commissioners of the Treasury, I transmit to you copies of a letter from the Master of the Mint, with its enclosures, containing a Report on the weight and fineness of the Gold Coins struck at the Sydney Mint during the Quarter, to the 30th June, 1858; and a Summary of the Monthly Returns of Gold Coined at the same Mint during that year.

I have, &c.,

GOVERNOR

SIR W. DENISON, K. C. B.

CARNARVON,

(in the absence of Sir E. B. Lytton.)

Royal Mint,
16 April, 1859.

Sir,

I have the honour to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the following Returns have been duly received from the Deputy Master of the Sydney Branch of the Royal Mint, in conformity with the Order in Council of the 19th August, 1853.

Six Monthly Returns shewing the transactions in Bullion of the Sydney Branch of the Royal Mint from July to December, 1853, inclusive.

The Coin produced during these months is as follows:—

	SOVEREIGNS.	HALF-SOVEREIGNS.	TOTAL.
	OZS.		OZS.
In July	20,182.75	20,182.75
„ August	23,171.66	23,171.66
„ September ...	27,229.20	27,229.20
„ October ...	25,686.74	25,686.74
„ November	25,681.27	25,681.27
„ December	28,193.60	28,193.60

Amount charged for Coinage—Nil.

Two Returns of waste in coinage of Gold at the Sydney Branch of the Royal Mint, for the quarters ending 30th September, and 31st December, 1858.

Two duplicate Returns made by the Board of Verification to the Colonial Secretary, at Sydney, reporting the state of Bullion in the Mint on the 1st July, and 1st October, 1858.

I have also to request you to submit to their Lordships my Report, enclosed, (being the twelfth) of the Weight and Fineness of the Coins produced at the Sydney Branch of the Royal Mint during the six months July to December, inclusive, and transmitted by the Deputy Master for examination, in accordance with the provisions of Her Majesty's Order in Council above referred to,—also a summary of the Monthly Returns for the year 1858.

A copy of the aforesaid Report will be forwarded to the Deputy Master at Sydney, for his information.

I have, &c.,

THOMAS GRAHAM.

G. A. Hamilton, Esq.,
&c., &c., &c.

SUMMARY

SUMMARY of the Monthly Returns of Gold Coined at Sydney Branch of the Royal Mint, during the year 1858.

Sovereigns	101	25·945	0·25688	917·1668

The standard weight of the Sovereign being 0·25682 ozs. Troy, and the standard fineness 916·67 in 1,000 parts.

THOMAS GRAHAM.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR W. DENISON.

Downing-street,
10 June, 1859.

SIR,

I have to communicate to you, for your information, the annexed copy of a Report which has been received through the Lords Commissioners of the Treasury from the Master of the Mint, furnishing an Account of the Weight and Fineness of the Coins struck at the Sydney Branch of the Royal Mint, and sent Home by you during the year 1858.

I have, &c.,

GOVERNOR
SIR W. DENISON, K. C. B.

E. B. LYTTON.

Royal

SYDNEY BRANCH OF ROYAL MINT.

3

Royal Mint, 30 May, 1859.

Sir,

I have now to submit an Account of the Weight and Fineness, as ascertained here, of Coins struck at the Sydney Branch of the Royal Mint, and sent home by the Governor of New South Wales, during the year 1858, in conformity with instructions from the Lords Commissioners of Her Majesty's Treasury, communicated to me in Sir Charles Trevelyan's letter of 9th November, 1855. These Coins were conveyed from Australia in closed packets bearing the Seal of the Colonial Treasurer, and were received by me with letters from the Assistant Secretary of the Treasury of 21st April, 1858, and later dates.

My last Report on the Governor's pieces was dated 23th June, 1858.

COINS of the Sydney Mint taken from Colonial Circulation from January to December, 1858, by order of the Governor of New South Wales.

NEW SOUTH WALES.

SYDNEY BRANCH OF ROYAL MINT.

(DESPATCH, &c., RELATIVE TO COINAGE.)

Presented to both Houses of Parliament, by Command.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 41.)

Downing-street,

4 December, 1859.

SIR,

I transmit to you the copy of a letter from the Treasury, enclosing one from 29 Nov., 1859, the Master of the Mint, with a Report on the weight and fineness of Gold Coins struck at the Branch of the Royal Mint at Sydney.

I have, &c.,

GOVERNOR SIR WILLIAM DENISON, K.C.B.,

NEWCASTLE.

&c., &c., &c.,

New South Wales.

[Enclosure.]

Treasury Chambers,

29 November, 1859.

Sir,

I am commanded by the Lords Commissioners of Her Majesty's Treasury to transmit herewith, for the information of the Duke of Newcastle, copy of a letter from the Master of the Mint, dated the 12th instant, relating to the transaction of the Sydney Mint from January to June last; and of a Report from the same, dated the 11th instant, on the weight and fineness of Gold Coins struck at that Branch of the Royal Mint; and I am to request that you will suggest to his Grace that they should be forwarded to the Governor of New South Wales.

I am, &c.,

Herman Merivale, Esq.,

GEO. A. HAMILTON.

&c., &c., &c.

[Sub-Enclosure 1.]

Royal Mint,

12 November, 1859.

Sir,

I have the honor to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the following Returns have been duly received from the Deputy Master of the Sydney Branch of the Royal Mint, in conformity with the Order in Council of the 19th August, 1853.

SYDNEY BRANCH OF ROYAL MINT.

Six monthly returns, shewing the the transactions in Bullion of the Sydney Branch of the Royal Mint, for January to June, 1859, inclusive.

The coin issued during these months is as follows:—

	SOVEREIGNS.	HALF-SOVEREIGNS.	TOTAL.
	OZ.	OZ.	OZ.
In January	21,830·61	21,830·61
„ February	16,691·32	16,691·32
„ March	28,250·75	28,250·75
„ April	17,982·10	17,982·10
„ May	20,554·44	20,554·44
„ June	20,673·66	5,264·00	25,937·66

Amount charged for Coinage—Nil.

Two Returns of Waste in Coinage of Gold at the Sydney Branch of the Royal Mint, for the quarters ending 31st March and 30th June, 1859.

Two duplicate Returns made by the Board of Verification to the Colonial Secretary, reporting the state of the Bullion in the Mint on the 1st April and 1st July, 1859.

I have also to request you to submit to their Lordships my Report, enclosed (being the Thirteenth), of the weight and fineness of the Coins produced at the Sydney Branch of the Royal Mint, during the six months, March to June, inclusive, and transmitted by the Deputy Master for examination, in accordance with the provisions of Her Majesty's Order in Council above referred to.

A copy of the aforesaid Report has been forwarded to the Deputy Master at Sydney for his information.

I have, &c.,

THOS. GRAHAM.

Legislative Assembly.

NEW SOUTH WALES.

SYDNEY BRANCH OF ROYAL MINT.

(DOCUMENTS IN REFERENCE TO OFFICERS' SALARIES.)

Ordered by the Legislative Assembly to be Printed, 21 December, 1859.

THE PRINCIPAL UNDER SECRETARY to THE SECRETARY TO THE CROWN LAW OFFICERS.

*Colonial Secretary's Office,
Sydney, 23 November, 1859.*

SIR,

I am directed by the Colonial Secretary to request that you will state to the Crown Law Officers his desire to obtain their opinion whether the Executive Government of this Colony has any control over the salaries of the Officers of the Branch of the Royal Mint, established in Sydney, or any power of appointing such Officers.

A copy of the Order in Council for establishing the Branch Mint is enclosed for the information of the Crown Law Officers.

I have, &c.,

W. ELYARD.

THE SECRETARY
TO THE CROWN LAW OFFICERS.

Order in Council defining the Constitution of the Sydney Mint, and prescribing the conditions required to secure the integrity of the Coin.—*Dated the 19th August, 1853.*

At the Court at Osborne House, Isle of Wight, the 19th day of August, 1853.

PRESENT:—

The Queen's Most Excellent Majesty.

His Royal Highness Prince Albert.

Lord President,
Lord Privy Seal,
Duke of Newcastle,
Duke of Wellington,

Lord Chamberlain,
Marquis of Lansdowne,
Earl of Aberdeen,
Sir James Graham, Bart.

WHEREAS there was this day read at the Board a representation from the Commissioners for executing the Office of our Lord High Treasurer, in the words following, that is to say:—

“The Commissioners of your Majesty's Treasury beg leave to represent to your Majesty that it appears to your Majesty's said Commissioners to be expedient—

“That a branch of the Royal Mint be established at or near Sydney, in New South Wales, on such site as the Governor or officer administering the Government of the Colony for the time being, may approve; that the chief officer thereof, who shall be considered as a Deputy-Master of the Royal Mint, on being appointed by Her Majesty, be authorized and empowered to coin gold and other coin, in accordance with the standards of weight and fineness of the currency of this realm, and of such designs as may, from time to time, be approved by Her Majesty; and that the Master of the Royal Mint be authorized to prepare and transmit dies for such coins, so long as the Lords Commissioners of Her Majesty's Treasury may think necessary, and subject to such regulations as they may prescribe.

300—

“That

“ That it may be lawful for the Governor or Officer administering the Government of the Colony, for the time being, with the advice of his Executive Council, to frame regulations under which the Mint shall receive gold bullion and coin the same; and unless other provision shall be made for the expenses of the Mint, to authorize the retention (without reference to any charge which may be imposed for the expense of refining such bullion) of such a proportion thereof, or of the coin struck therefrom, by way of a mint-charge or seignorage, as shall be sufficient to raise a fund for defraying the expenses attending the coinage, and to apply the same to such purpose.

“ That the Deputy-Master be empowered, subject to the approval of the Governor or officer administering the Government of the Colony for the time being, to enter into such contracts, and to establish such regulations for the orderly and convenient performance of the duties of the Mint, as may be found necessary; and that he do hold his office during Her Majesty's pleasure; the Governor, or officer administering the Government of the Colony, being empowered to appoint a person to perform his duties, in the case of his death or incapacity from any other cause, until the pleasure of Her Majesty is made known.

“ That four other principal officers of the Mint be appointed from time to time, by the Commissioners of Her Majesty's Treasury; and that the Governor, or officer administering the Government of the Colony, be empowered, on the application of the Deputy-Master, to suspend either of them in case of misconduct, and, on the recommendation of the Deputy-Master, to appoint a person to perform the duties of either of them, in case of death, sickness, infirmity, resignation, or suspension, subject to the orders of the Commissioners of Her Majesty's Treasury.

“ And that the four officers so to be appointed shall be,—

“ 1st.—The Superintendent of the Bullion Office, who shall be responsible to the Deputy-Master for the receipt of bullion and the delivery of coin by the Mint; the safe custody of the same while in charge of his department; the faithful conduct and accurate record of all transactions with the public, and the coining department of the Mint; the general precision of the arrangements and integrity of the operations of the refinery and melting-house; and for the faithful and zealous discharge of any other duties which the Deputy-Master may direct him to perform.

“ 2nd.—The Superintendent of the Coining Department, who will be responsible to the Deputy-Master for the bullion delivered into his charge by the Superintendent of the Bullion Office; for its conversion into coin of the legal weight, properly stamped with the authorized dies; for the safe custody and legitimate use of the dies; for the operations of his department being properly and economically conducted; for the records thereof being kept with care and precision, and for the faithful and zealous discharge of any other duties which the Deputy-Master or his representative may direct him to perform.

“ 3rd.—The First Clerk of the Bullion Office, who under the immediate supervision of the Superintendent of the Bullion Office, will be responsible to the Deputy-Master for the skilful and economical direction of the operations of melting and refining; for the records thereof being kept with care and precision; and for the faithful and zealous discharge of any other duties which the Deputy-Master or his representative may direct him to perform.

“ 4th.—The Registrar and Accountant, who will be responsible to the Deputy-Master for the proper registering and safe custody of the documents delivered to his charge, for the store, cash, bullion, and other accounts of the Mint being kept with care and precision, in such form as may from time to time be directed, and for the faithful and zealous discharge of any other duties which the Deputy-Master or his representative may direct him to perform.

“ And that all such other officers and servants of the Mint as may be necessary, shall be appointed and discharged from time to time by the Deputy-Master, on the approval of the Governor or officer administering the Government of the Colony.

“ And the Deputy-Master shall faithfully, and without unnecessary delay, after the expiration of each calendar month, transmit to the Master of the Royal Mint the following returns:—

“ Weight of rough gold and weight of gold bullion received from the public by the Bullion Office;

“ Weight melted previous to assay;

“ Weight assayed and valued, and value thereof;

“ Weight refined;

“ Weight and value of bullion re-issued, and amount charged for melting, assaying, and refining;

“ Weight of bars delivered for coinage, distinguishing those from scissel and ingot pots.

“ Weight of each description of coin produced;

“ Weight of each description of coin delivered to the public and the amount, if any, charged for coining;

“ Number and average of assay reports on which ingot pots have been passed into work, and the highest and lowest assay reports of such pots;

“ The same for scissel pots;

“ The same for the assay of coin;

“ Number and description of dies received or completed during the month—of dies worn out—of dies effectually defaced—and of serviceable dies in hand.

“ And that the Deputy-Master shall faithfully, and without unnecessary delay, forward to the Master of the Royal Mint, at the end of every quarter, a return, shewing the waste during the quarter, distinguishing the waste arising in melting, in refining, in coining, and in assaying.

“ And

SYDNEY BRANCH OF ROYAL MINT.

3

“ And he shall forward any other returns which the Master of the Royal Mint, with the consent of the Lords Commissioners of Her Majesty’s Treasury, may require.

“ And that to ensure the careful observance of the standard in the coin, the Deputy-Master shall only permit coin to be delivered to the public between such hours, on such days, as shall from time to time be ordered by the Governor or officer administering the Government of the Colony, during which time an officer appointed by the Governor or officer administering the Government of the Colony shall attend and take, without preference in the selection, a number of pieces, in proportion to the quantity delivered, not being more than one piece out of every five hundred coins, nor less than one piece in five thousand. That the piece or pieces so taken be sealed up by the officer appointed as aforesaid, and the envelope dated and signed by him, and be forwarded by the Deputy-Master to the Master of the Royal Mint in London for such examination as the Lords Commissioners of Her Majesty’s Treasury may direct.

“ And that the Governor or officer administering the Government of the Colony shall obtain once every month from the general circulation two pieces in good condition of each description of coin issued from the Mint, and shall cause the same to be transmitted to England in such manner as he shall think fit, in order that they may be subjected to the like examination.

“ And that the Governor or officer administering the Government of the Colony shall also direct a Board of Government Officers, not less than three in number, to assemble at the Mint at the expiration of each quarter, for the inspection of the store of bullion and coin in the Mint, and report on the same to him, stating the exact amounts of the balance of each description verified by them, and shall transmit a copy of the report to the Deputy Master, to be transmitted by him to the Master of the Royal Mint.

“ That the Lords Commissioners of Her Majesty’s Treasury and Her Majesty’s Principal Secretary of State for the Colonies, may have authority to issue and give such instructions as to them may respectively appertain for effecting the several matters and things hereby ordered to be carried into effect.

“ Your Majesty’s Commissioners, therefore, beg leave to lay before your Majesty the before-mentioned circumstances, and humbly pray that your Majesty will be graciously pleased to take the premises into your Royal consideration, and to make such order in respect thereto as to your Majesty in your Royal wisdom shall seem meet.”

Her Majesty having taken the said representation into consideration was pleased, by and with the advice of Her Majesty’s Privy Council, to approve thereof, and to order, and it is hereby ordered, that the same and every part thereof be acted upon and carried into effect; and the Commissioners of Her Majesty’s Treasury, and the Duke of Newcastle, one of Her Majesty’s Principal Secretaries of State, and the Master and Worker of Her Majesty’s Mint, are to issue and give such rules and directions as to them may respectively appertain for effecting the several matters and things hereby ordered to be carried into effect.

(Signed) C. C. GREVILLE.

SECRETARY TO CROWN LAW OFFICERS to PRINCIPAL UNDER SECRETARY.

Crown Law Offices,

Sydney, 28 November, 1859.

SIR,

I am directed to state in reply to your letter of the 23rd instant, requesting opinion as to whether the Executive Government of this Colony has any control over the salaries of the officers of the Branch of the Royal Mint, established in Sydney, or any power of appointing such officers, that the Attorney General thinks the Executive Government of this Colony has no power to interfere in the appointment or removal of the officers of the Mint, who hold their appointments under the provisions of the within Order in Council. The powers of appointment and removal thereby given to the Governor may be exercised by him without the Executive Council. They are not appointments under the Government of the Colony within the 18th and 19th Vict., cap. 54, section 37.

I have, &c.,

W. E. PLUNKETT.

THE PRINCIPAL
UNDER SECRETARY.

1860.

NEW SOUTH WALES.

ROYAL MINT.

(REPORT FROM DEPUTY MASTER.)

Presented to both Houses of Parliament, by Command.

REPORT from the Deputy Master of the Royal Mint, for the consideration of the Lords Commissioners of Her Majesty's Treasury, and the Government of New South Wales, on the operations of the Mint in Sydney, and the general subject of Mints for the Australian Colonies; with reference to the establishing of a Branch Mint at Melbourne, as sought for by the Government of Victoria.

Royal Mint, Sydney,
14 January, 1860.

It appearing by the public journals that application by address to Her Majesty has been made by the Legislature of Victoria, for the establishment of a Mint at Melbourne, on the footing of the Treasury Minute of 22nd March, 1853,* I deem it my duty to submit, for the information of the Imperial Government, and that of this Colony, a Report of the influence and operations of the Branch of the Royal Mint, which has been in operation in Sydney from the 14th May, 1855, in order that they may be in a position to take into consideration the general question of Mints for the Australian Colonies, with a view to its final settlement.

The advantages anticipated from a Mint in the Australias, and the objections which have been urged against it, may be severally stated as follows:—

The discovery of gold in these Colonies, in 1851, had added greatly to their exports, and depressed the rate of exchange with Great Britain. A sudden and excessive production of exports had depressed their value. Producers were immediately affected by this depression, and a Mint was considered the only means by which relief could be obtained. It was also urged to be advantageous to have means of coinage near the source from which the material was obtained; and the example of Spain, in old times, when Royal Mints were established in its dependencies, Mexico and Peru, was quoted in support of a similar step in regard to Australia. It was expected that a Mint in Australia would tend to a transmission of sovereigns throughout the East without the intervention of Great Britain, and as aiding in the diffusion of gold immediately from the source of supply, would have the effect of expanding the resources of the Colony, and of mitigating the disturbance of commercial transactions, rendered possible from the great accumulation of the precious metals in the

Advantages anticipated by a Mint in Australia, and objections urged against it.

United

* The *Argus* paper of 14th December last says "22nd April, 1853"; but as I know of no Minute of that date, I presume it means the one I have mentioned.

United Kingdom. A Mint in Australia would also partially relieve the Royal Mint in London of the expense of coining for other purposes than internal circulation; and if its coins were identical with those issued from the London Mint, the coinage of the latter for local use might be reduced by the transmission of gold from the Colony in a coined state. It was further urged, that as Australia was rapidly advancing into a nation, its internal industry, independent of its gold, would open up new sources of investment, and would produce fluctuations in the currency, which ought not to be dependent for equalization on a country at the antipodes, between which and it the cost of transmission of bullion for coinage was £50,000 for every million in time of peace, and in time of war much greater. Thus viewed, a Mint in Australia was deemed imperatively necessary. On the other hand it was argued, that though a Mint in these Colonies might afford the relief sought for by producers and exporters, as well as be attended by many of the advantages enumerated, the ordinary operations of trade would, without its aid, bring about an adjustment of exports and imports, and with these, of the exchange; that the Mint would be expensive to maintain, and would not confer a benefit commensurate with its cost. It was urged that a Mint, in all respects a branch of the Royal Mint of Great Britain—that is, issuing a currency to pass as legal tender throughout the British dominions—could not be established without the consent of the Imperial Parliament; whereas, a Mint limited in its functions to the production of a local currency would soon make good any deficiency of coin, and then become useless. Under these circumstances it appeared more desirable to supply the existing want of coin by importations from England. It was pointed out that these importations had already commenced, and probably before the Mint came into operation the deficiency would have ceased to exist.

Advantages of the discussion.

The discussion elicited by the proposition of a Mint for the Australias was sufficient to point out the immediate want to be satisfied, and the danger to be avoided. The problem was, to limit the fluctuations in the exchange with the Mother Country, and that, if possible, without cost to the Colony. A Mint was therefore granted, with permission to impose a charge for coinage, to be applied to its maintenance. As there were difficulties attending the passing of an Imperial Act to declare the coinage of the Colonial Mint legal tender throughout the British dominions, its legal currency was limited to Australia, and a few adjacent Colonies.

The necessity for a Mint to sustain value of bills drawn against exports.

The fluctuation in the rate of exchange between the Australian Colonies and Great Britain, and the depression of it at a time when the staple product of the Colonies was being exported, were grievances of annual occurrence. Previous to the discovery of gold, the only important export of the Colony was wool; this was usually offered for export between the months of November and February following. The demand to export being accompanied by an offer for sale of bills drawn against exports naturally occasioned a fall in the value of the bills, or in the rate of exchange with Great Britain. A Return, attached to the Report, shews the annual variations in the buying rates of bills on London during the ten years immediately preceding the gold discovery, and the mean of the fluctuations during this period. A loss in the sale of a bill drawn against produce is of course equivalent to a loss on the sale of the produce itself, and as the mean annual fall of the rate was five per cent., and occurred during the exporting season, a mean loss of five per cent. was annually incurred by the producer, equal to at least one penny on every pound weight of wool drawn against. This was a loss for which, under the circumstances of those times, there was no remedy. The fluctuation was the direct and necessary result of the nature of the Australian trade with Great Britain. During four months of the year, that trade consisted almost entirely of exports; while during the remaining eight months, imports greatly preponderated. An excess of exports caused, for the time of its duration, a depression of their value and a fall in the rate of exchange; and an excess of imports over exports, at another period of the year, a rise in the rate. It is therefore manifest, that so long as particular times of the year were of necessity allotted to each class of business, a considerable annual fluctuation in the rate of exchange would ensue.

Appendix, No. 11

The loss from depression of exchange absolute.

There is no doubt that the depression of the exchange, at a time when the wool-grower was offering his produce for export or for sale, was regarded a grievance, and that the loss he incurred was looked upon as absolute. It has, however, been argued by writers upon political economy, that the loss in such cases is made good to the exporter in the diminished

diminished price he has to pay for imports; inasmuch as the depressed state of exchange encourages importation, and thus overstocks the market and lowers the price of imports. This reasoning, applicable to countries in close geographical position and in constant communication, is not so to those so distant from Great Britain as the Australian Colonies. A depressed exchange in France on England may induce an English merchant to export to France, because, in addition to the profit which he expects on the sale of his venture, he will realize a profit on the bill on London, which his French correspondent will purchase for him with the proceeds of the venture; and a number of English merchants, acting under this inducement, would so stock the French market as to lower the price of imports. I doubt, however, if a merchant in England would ever be influenced by the rate of exchange in Australia to export for these Colonies. From the great distance between these countries, he could not hope that the rate reported by the latest intelligence would continue until his consignments reached their destination.* I feel confident in assuming that the loss shewn to have been annually incurred by the wool-producer was rightly considered as absolute; and it will be admitted to have been of sufficient importance to demand a remedy, if such could be procured. That remedy was provided (as will be presently shewn) when gold was discovered in these Colonies.

The first effect of the discovery of gold was to aggravate the evil complained of. A new export of considerable value was thrown on the market, and for the time caused a considerable fall in the exchange. The fall, however, could not be permanent. The export of gold produced, as might be expected, a corresponding import of commodities; and as the production of the precious metal, and consequently its export, was not necessarily like wool confined to a particular portion of the year, there could be no additional preponderance given by its discovery to exports over imports during any portion of the year. But the same preponderance of exports, as before, occurred during the wool season, and led now to a fall, not only in the value of wool, but also in that of gold. The gold producer, during the four months of the wool season, had to submit to a loss on the sale of his produce, because the supply of exports at that period of the year was in excess of the demand. The gold interest now suffered equally with the wool interest, through the peculiarity of the Australian trade, and had to bear, as will be seen by the Return attached, a loss, averaging five and one-half per cent., or four shillings and three-pence on every ounce of gold produced. Appendix No. 2

Under ordinary circumstances it would, perhaps, have been impossible to provide a remedy for the evil complained of, the result of the isolated position of the Australian Colonies, and of the nature of their produce. As the state of the exchange between two countries is influenced by the balance of trade between them, the former can only be corrected by a measure which would affect the latter, whilst an interference with the operations of commerce is seldom attended with beneficial results. It was, therefore, fortunate that one of the products of the Colony was of a kind for which an advantageous local market could be provided by the Government, and which could therefore be disposed of at a commercial advantage without being exported. By this simple means exports could be restrained at a time when the demand to export became excessive, and so the exchange be preserved from depression. The nature of the remedy required.

The manner in which a Mint operates in limiting the fluctuation of the exchange between the Australias and Great Britain is easily explained. The fluctuation of the exchange between any two countries is the result of the fluctuation in the trade between them. When the sum due from Great Britain to Australia for exports exceeds that due by the latter for imports, the exchange in Australia with Great Britain falls to a discount; on the other hand, as a balance becomes due from Australia to Great Britain, the exchange in Australia with the Mother Country rises to a premium. Now, as the value of the exports of the Australian Colonies, irrespective of gold, is far below that of their imports, it is possible, by establishing an advantageous local market for this product, to restrain from export such a portion of it as shall keep Australia always indebted to Great Britain, and the exchange at a premium. Such a market a local Mint can be made, and it is thus the Mint in Sydney has acted. The manner in which a Mint can provide the remedy.

This

* That cheapness of imports is not always the result of a depressed exchange was clearly demonstrated during the first year of the gold discovery, when the exchange was at a considerable discount, and yet the price of import articles extravagantly high.

This action of the Mint may be thus illustrated in figures. Assuming that, in the absence of a Mint, the trade of Great Britain with the Australian Colonies, at a particular period of the year, would have stood thus:—

Debt due to Australia, for Exports—Sundries	1,000,000
Gold.....	4,000,000
	Total
	5,000,000
Debt due from Australia, for Imports	4,500,000
	Balance due to Australia
	500,000

The balance due to Australia would have caused the exchange with Great Britain to fall to a discount.* If, however, a Mint had during this time existed in Australia, which, by offering a sufficient price, had purchased £1,000,000 of gold, and so saved it, for the time, from export, the commercial statistics would have stood thus:—

Due to Australia, for Exports—Sundries	£1,000,000
Gold.....	3,000,000
	4,000,000
Due from Australia, for Imports, as before	4,500,000
	Balance due from Australia
	500,000

And then the balance due from Australia would have maintained the exchange at a premium. It will be seen that the action of the Mint would, under the circumstances supposed, have prevented £500,000 of gold being sent to England, for no other purpose but to be coined and returned. It would, for the time, have prevented being sent another £500,000, which was actually due; that is, so long as the Mint might require to coin it. This would then have been transmitted in the shape of coin, instead of bullion, to settle the balance due to England.†

Mint cannot
limit the rise of
the exchange.

The tendency of a Mint, therefore, is to limit the fluctuations of the exchange, and, according to the price it may offer for bullion, to prevent the exchange falling below a certain rate of discount, or below par, or to preserve it at a premium. It has, however, no power to prevent the rise of the exchange to a premium. This is only limited by the cost of transmitting specie to England, which, in times of peace, is a little above 2 per cent. And as, through the peculiarity of the trade of the Australian Colonies, it is a matter of periodical occurrence for the exchange to rise during the Australian winter to the highest premium (the wool season having terminated), it became evident that, if an endeavour were made to preserve this rate throughout the year, the exchange would be as limited in fluctuation as possible. To secure this result, it was necessary to offer such advantages at the Mint as to induce the entire gold produce of the Colony to pass through it. By this means, the value exported annually has been preserved to the utmost extent advantageous for commerce in rear of imports, and the exchange sustained at the highest premium. No other inducement to export than that of settling balances due to other countries for imports has been allowed to prevail, and the balance of trade between Australia and other countries has been preserved permanently in one direction.

Besides the advantages which have thus been secured to the producer, the limit set to the fluctuation of the exchange has been a benefit, in that an uncertain item in the calculation of every commercial venture has been considerably diminished. It was not unusual, previous to the introduction of the Mint, for a fluctuation from two and a-half per cent. premium to five per cent. discount, or of seven and a-half per cent., to take place in the exchange between Australia and Great Britain in the course of six months. A merchant in one country ordering goods from the other, and directing his correspondent to draw against him, was thus liable to a loss of seven and one-half per cent. through

* In reality, the discount or premium of a bill of exchange represents the cost of transmitting the balance due from the country in debt to the country in credit, which is shared as it were among all persons drawing or selling bills at the time. A bill drawn on the country in debt sells at a premium, as the cost of transmitting that much of the debt is saved. One drawn on the country in credit sells at a discount, as the cost of transmitting the sum necessary to meet the bill has to be provided for.

† Fears were at one time expressed that the Mint at Sydney would cause an excess of currency to be retained in the Colony, and so disturb commercial relations. These fears have proved unfounded, as might have been expected. How could the mere act of stamping a piece of gold, equivalent to a certificate of its weight and fineness, destroy its value as an export?

through this cause. This uncertain item is now reduced, as will be presently shewn, to an insignificant amount.

In order to carry out the principles stated, and at the same time to raise as large a revenue as possible for the maintenance of the establishment, the Mint price for gold was fixed at the highest usually offered for it at that time of the year when exports are most in demand. This was found to be sufficiently low to allow of a retention of from three quarters to one and one quarter per cent. of the amount imported, according to the time at which payment was required, and the quantity brought by one importer.*

I propose, now, shortly to examine how far the advantages which the Mint was expected to secure have been realized. The action of a Mint in restraining exportation at periods when exportation is excessive, and thus preventing a depression of the exchange, was clearly exhibited in the first year of its operations. Practical results of the operations of the Mint.

In 1855, up to the 30th September, or during the first four and a-half months of the Mint's existence, the quantity of gold imported for coinage amounted to but 41,086 ounces. This period was comprised in that portion of the year during which, the Colony having no other produce for export, gold is in demand for this purpose, and commands a correspondingly high price. The market price of gold having been, during this period, on a par with the Mint price, a large portion of this produce was disposed of without the Mint. During the next quarter of the year, the wool season having set in, an additional product was offered for export in large quantities. The supply being now in excess of the demand, the result was, a fall in the price of exports. The commercial price of gold having then fallen below the Mint price, the Mint became the better market, and during the next quarter received 176,503 ounces for coinage. By this means produce to the value of £700,000 was withheld from export, and the depression of the exchange checked. Appendix 3.

While the wool season lasted, the Mint continued to receive large quantities of gold from Victoria, as well as from New South Wales. At its close, about the end of January, the market and the Mint again came into competition, and the extraordinary demands on the Mint ceased. Since that period the Mint has operated in a similar manner in maintaining the value of gold, and of wool, as well as that of drafts against exports to the Mother Country. Appendix 3.

The extent to which the exchange with Great Britain has been influenced by the action of the Mint will be apparent, on comparing the fluctuation which took place in the four years immediately preceding the Mint's existence with those which have occurred in the four years immediately subsequent.

The fluctuations which took place during these years may be fairly judged by taking from the statistical returns of the Colony the fluctuations in the purchasing rate of any one bank. The purchasing rates of the Bank of New South Wales during the years 1851 to 1854 were as follows :—

1851	From	$1\frac{1}{2}$ per cent. premium	to	$5\frac{1}{2}$ per cent. discount.
1852	„	8	„	12
1853	„	par	„	8
1854	„	3 per cent premium	„	$\frac{1}{2}$

It will from this be seen that the fluctuation in the

First year was	7 per cent.
Second	4 „
Third	8 „
Fourth	$3\frac{1}{2}$ „
First two years	$13\frac{1}{2}$ „
Second „	$11\frac{1}{2}$ „
Four years	15 „

It is also remarkable, that throughout the whole of the year 1852, though the fluctuation was comparatively small, the rate of exchange did not arise above 8 per cent. discount, and at one time it was as low as 12 per cent. discount. As every per centage

* The charges established are as follows :—On importations of gold received for coinage under 1,000 ounces, a Mint charge of one per cent. ; on importations of 1,000 ounces and upwards, a charge of three-quarters per cent. An extra charge of one quarter per cent. being made on importations for which prompt payment may be required. Upon this scale a reduction of three-eighths per cent. is allowed to importers of gold, from any of the adjacent colonies.

centage of depression indicates a corresponding fall in the price of produce for export, it follows that, throughout the year 1852, the loss on wool drawn against must have been from 2d. to 3½d. the pound weight, and that of gold from 7s. 6d. to 11s. the ounce standard.

In examining the price current of gold during that year, we shall find, as regards gold, this was undoubtedly the fact, as that which now realizes 75s. to 76s. the ounce, was then sold at 65s. The comparison of the price of wool at that time with its present price cannot be readily made; but it is evident that all export produce must have suffered a depression corresponding with that which has been shewn to have taken place in respect to gold. Throughout the whole of this period imported goods were extravagantly high.

The Sydney Mint was opened for business on the 14th May, 1855. The fluctuation in the purchasing rate of bills drawn against exports, in that and the three subsequent years, is stated, in the statistical return of the Colony, to have been as follows:—

1855	From 3	per cent. premium	to 1	per cent. discount.
1856	„ 1½	„	„ 1½	„
1857	„ 2	„	„ par.	„
1858	„ ½	„	„ ½	per cent. discount.

The extreme fluctuations in these years were,—

In the first year	4	per cent.
„ second year	3	„
„ third year	2	„
„ fourth year	1	„
„ first two years	4½	„
„ second two years	2½	„
In four years	4½	„

and the lowest depression of the exchange has been 1½ per cent. discount. Thus the influence of the Mint has been to reduce these fluctuations, year by year, until they have become insignificant. I have not sufficient data to estimate with accuracy the gain secured to the producing interests of the Colony, by the limit thus put to the fluctuation of the exchange. Assuming that the depression of the rate during the wool season has been reduced 4 per cent., and that but one-half of the exports are drawn against as soon as shipped, the saving to the producing class on the single article wool, of which about £1,200,000 is annually exported, amounts to £24,000 per annum.

The Mint has also been of service in the raising of public loans by Government debentures. The power of the Government to raise money in the Colony on this class of securities is limited by the amount of Colonial capital seeking secure investment at moderate rates of interest. This has always been so small as to cause a large amount of debentures to be transmitted to England. Their issue or purchase for this object being equivalent to the production of a fresh article of export, has, in the manner already shewn, a tendency to depress for the time the local value of exports *generally, including that of the debentures themselves*. The Mint has therefore been beneficial, in sustaining their value, and in obtaining loans on terms that would not otherwise have been possible.* The amount of debentures issued, the proceeds of which have been rendered available in this Colony, is stated approximately at £2,039,680. The price which might have been obtained for these securities, without the aid of a Mint, depends on the time of the year at which they were issued. It may however be confidently assumed, that on an average, the whole have been sustained in value two per cent., through the operations of the Mint.

Appendix 14.

Appendix 7.

The immediate and direct effects of the Mint have been, the sustenance of the price of gold at one unvarying rate, and the encouragement of an important class of producers. It is fair to assume that these have caused an increase in the production. A Return attached shews the yield of 1859 to be nearly double that of 1855, and 15 per cent. in excess of that of 1858.

The

* The action of the Mint has been to retain in the Colony, and to coin, as much gold as is equivalent in value to the security issued, the debentures being exported *in place* of the gold. Without the Mint, the debentures would have gone to England to be sold as well as the gold; and then gold coin in exchange for the debentures would have been returned. A double journey for specie equal in value to the debentures, and the attendant expenses, have been prevented through the presence of a Mint in Sydney.

The increase in the receipts of gold at the Mint during the years 1858-9 has not been altogether due to increase of production. Previous to the 24th July, 1857, a charge was made of 8d. per ounce for the conveyance of gold under the Government Escort from the several diggings to the Mint, and of 1 per cent. for the return of the proceeds in the same manner. At this period the Government were pleased to approve of my proposal to abolish all charges for the conveyance of gold, sent for coinage or returned in coin, and thus practically to bring the Mint home to every Gold field. This step almost immediately increased the amount transmitted to the Mint from 72 to 95 per cent. of the entire produce of the Colony.

Appendix 4, 7.

As a financial measure this step has also been successful. The surrender of the Escort charges, which might have been expected to cause a loss of Revenue, was at once followed by an increase of receipts under the head of "Gold Duty" more than sufficient to balance the loss. During the five months immediately preceding the abolition of the Escort charges, the receipts under the two heads were as follows:—

MONTHS OF 1857.	GOLD DUTY.	ESCORT FEES.	TOTAL.
	£	£	£
March	1,232	379	1,611
April	1,416	344	1,760
May	1,348	385	1,733
June	1,419	382	1,801
July	1,797	392	2,189
TOTALS	7,212	1,882	9,094

During the five months immediately following they were as follows:—

MONTHS OF 1857.	GOLD DUTY.	ESCORT FEES.	TOTAL.
	£	£	£
August	922	201	1,123
September	2,035	163	2,198
October	1,572	180	1,752
November	1,680	141	1,821
December	2,536	89	2,625
TOTALS	8,745	774	9,519

Total Revenue for five months ending July	£9,094
" " ending December	9,519
Excess in last five months	£425

In addition to this, the Revenue under the head of Mint Charges during the same period was augmented 23 per cent. through the introduction of this change.

The operations connected with the Sydney Mint may be shortly stated to have been as follows:—

During the years 1858 and 1859, it received and levied Mint charges on 95 per cent. of the gold produce of this Colony, the greater part of the remainder having been taken away by Chinese to Hong Kong. It coined the greater portion of its receipts, and issued the remainder in bullion of 22 to 23 carats fine for export. Coin has left the Colony as fast as the Mint has issued it, yet coin has been preferred for export to bullion. The average weight of an importation to the Mint, during 1859, was 84 ounces; the number, 4,272. The expenditure of the Mint, during the two years 1858 and 1859, was £24,168 0s. 7d.; the collections as Mint charges, £37,111 6s. 6d. Of this latter amount, £27,844 2s 1d. was collected from gold the produce of New South Wales.

The Mint is now an establishment financially profitable. At first its receipts were somewhat checked by the refusal of the Government of Victoria to proclaim the Sydney coin a legal tender in their territory. When through the urgent want of a metallic currency that step became a necessity, and was taken, the Mint proved of service to the Australian Colonies generally. It has since collected annually, in addition to its working expenses, a sum equivalent to 10 per cent. on the capital expended in bringing it into operation.

Appendices 9
and 11.

A portion of the Mint receipts has, however, been due to gold sent for coinage from Victoria; if a Mint be established at Melbourne, this will cease. At the same time the contributions due to the gold of New South Wales are more than sufficient to maintain the establishment and to justify its retention, whatever steps the Imperial Government may take in regard to the petition of the Legislature of Victoria.

The general
question of
Mints in Aus-
tralia considered.

The application of the Legislature of Victoria for a Mint at Melbourne will bring again before the Commissioners of Her Majesty's Treasury the question of Mints for the Australias. This I propose now to consider by the light of the experience gained by the experiment of a Mint at Sydney.

The Treasury Minute of the 22nd March, 1853, which I assume as the basis on which this Mint is demanded, after asserting that Her Majesty's Government are not at present in a position to decide on the conflicting claims of the several Colonies which had applied for Mints, declares that, until further experience may afford the Colonies the opportunity of coming to such a mutual understanding on the subject as may enable the Government to assert the prerogative of the Crown with greater certainty for their common benefit, the Commissioners of the Treasury will be prepared to grant a Mint under certain specified restrictions to any Colony which may shew a reasonable ground for its establishment, and may, by a remittance in advance, give a distinct earnest of its intention to meet preliminary expenses and the demands of the Treasury for an indemnity from charge on account of the British public. This remittance, if not already, will doubtless soon be, made, and I assume will entitle the Government of Victoria to a fulfilment of the pledge which has been given. I, therefore, only desire now to place before the Government of this Colony, and the Commissioners of the Treasury, such facts and opinions, the result of my experience in the conduct of the Mint in Sydney, as will permit of a consideration of the Mint question as a whole, and of its final settlement on a substantial basis.

It may be admitted without argument that, as the Mint in Sydney has proved profitable to this Colony, a Mint in Victoria, of which the produce of gold is eight times as great, and the exports and imports are correspondingly more extensive, will be found profitable in a still greater degree. The questions, however, which require consideration are:—Should a Mint in Sydney exist cotemporaneously with one at Victoria; and, should the constitution of these Mints, and the legal currency given to their coins, be the same as those now enjoyed by the Mint at Sydney?

It will also be admitted that the best position in these Colonies for one central Mint is that to which flows in the ordinary course of trade the largest amount of gold. That place in Australia is the port of Melbourne. It does not, however, follow that Mints may not exist simultaneously, and with advantage, at other centres of trade. The natural direction of the gold produce of New South Wales is not the port of Melbourne, but that of Sydney, and so long as the gold which actually flows to Sydney is sufficient, as the returns attached to this Report shew it to be, to support a Mint, there appears no reason to disturb existing arrangements. If, however, by the establishing of one central Mint at Melbourne, the same advantages can be secured to this Colony which it now enjoys, and more extensive privileges to the Colonies generally, it may be desirable for the Colonies to agree to adopt this course, instead of requiring each a separate establishment.

Considering in the first place, the application of the Government of Victoria for a Mint at Melbourne apart from the question of one general Mint, my views are as follows:—

To be worked successfully, and for the general benefit of the Colony, the tariff of charges should be such as to induce the greater portion of the produce of the Colony, or some £8,000,000 per annum, to pass through it, not necessarily for coinage, but with a view of sustaining the price of gold and encouraging the most important class of producers in the Colony. By this means, fluctuation in the rate of exchange would be prevented, or rendered harmless, both to producers and exporters as well as to the Government. The Mint at Melbourne should, as the Mint at Sydney has done, discharge the same duties with regard to the purchase and coinage of gold as the Royal Mint of London and the Bank of England now do. The Bank of England is compelled by law to support the price of gold, by
purchasing

purchasing at a uniformly high rate that which the Royal Mint afterwards coins without charge. The Mint at Melbourne should also purchase at a rate that is equivalent to the highest market rate at any time of the year, and repay itself by issues of coin, or of bullion (with certificate accompanying), at the price of coin, as may be required. By this practice, whilst nearly the whole produce of the Colony would pass through the Mint, sufficient could be retained as the Mint charge to support the establishment, as the following figures will shew.

The highest price given at Melbourne for gold may be stated at £3 17s. 6d. the standard ounce. The Mint, by offering £3 17s. 7½d., would then be above competition, and yet secure 3d. on every ounce, coined or issued; assuming the receipts to be £8,000,000 per annum, the revenue from coinage would be £25,000 for the same period.

That the Mint might act as I have stated, with the greatest effect, it should be connected with a note circulation, either of some existing bank, to which, for privileges conceded, the privilege of a legal circulation for their notes might be granted, or of a Government Bank of Issue, based on Bullion, on the principles set forth in the paper accompanying my letter of the 26th August, 1859, recommending a similar project for New South Wales. By this means* a circulation of £500,000 could be maintained, the interest on which—£25,000 per annum—would be another source of Mint revenue. From these two sources the sum of £50,000 would be obtainable—or far more than sufficient to defray the expense of the bank, as well as of the Mint.

The charge of 3d. per ounce on all gold sent from Sydney, assuming the Sydney Mint to have been abolished, would entail on the consignor, or producer, a charge of $\frac{3}{10}$ per cent. for freight and insurance to Melbourne, and the same for the return of the proceeds in coin, or equivalent, in all to 8d. per ounce, making a total charge of 11d. the ounce on gold consigned from Sydney to the Mint at Melbourne, the proceeds of which could be returned in ten days after transmission of the gold. The present charges at the Mint at Sydney are 11¾d. per ounce (1¼ per cent.), on importations, payable in two days, unless, which seldom happens, they are above 1,000 ounces, when the charge is 9¼d. the ounce (1 per cent.). The loss, then, to this Colony by the surrender of the Mint in Sydney, and by the establishment in its place of one central Mint, at Melbourne, would, under these circumstances, be trifling. If, however, an allowance, say of 2d. an ounce, towards the expenses of freight and insurance were made on gold sent from Sydney, such as is now granted at the Sydney Mint† in respect to gold from Victoria and other Colonies, it would be as advantageous to this Colony to dispose of its produce at Melbourne as at Sydney, and the necessity for a Mint at Sydney would be removed.

The question as to two Mints existing simultaneously appears to me to stand thus:— It is possible, by a liberal adjustment of the charges for coinage, to render a Mint at Melbourne self-supporting, and at the same time to provide for the wants of New South Wales, as effectually as a Mint in Sydney can do. If a Mint be granted to Melbourne on the basis of the Treasury Minute before referred to—that is, with the power of regulating charges entrusted to the Government of Victoria, and with the currency of the coin limited as at present—it would be better for this Colony to retain the Mint in Sydney, since, as has been shewn, it can be maintained without burden to the revenue. On the other hand, if the surrender of the privilege of a Mint in Sydney would induce the Imperial Government from the experience gained by the working of that establishment, to make the Mint at Melbourne in all respects a branch of the Royal Mint of England—that is, a Mint under absolute Imperial control, issuing a coin of which the currency shall be co-extensive with the currency of the coinage of England—it becomes a consideration for the Government of this Colony if the advantages obtainable are a sufficient equivalent for the sacrifice required; and on this point an expression of opinion by the Government is desirable.

I come now to consider the Imperial interests involved in the question of a Mint at Melbourne, and of Australian Mints generally.

The question of a Mint at Melbourne is intimately connected with that of the currency of India. The following remarks on that currency I have collected from a letter in the

318—B

Times

Imperial interests involved in the question of Australian Mints.

* I have assumed that the average circulation of each note issued would be six weeks.

† See note, page 5 and Appendix.

Times newspaper, of 26 February, 1858, under the well-known signature of "Indophilus," one well acquainted with the exigences of India :—

"The sole legal tender of India is the Company's rupee, containing 165 grains of silver, the most bulky of the precious metals, and, therefore, the most inconvenient. Sir Charles Napier calculated that from 20,000 to 30,000 men of the Bengal army were annually employed as 'treasure parties,' often for long periods and to great distances. The coin in circulation in India may be taken at £160,000,000 sterling, or 1,600 millions of rupees, the wear and tear of which must be very great. The persons employed by bankers and native merchants to make their remittances form a numerous class, and have always been the special prey of thugs and highwaymen. It requires ten men to convey £1,000 sterling. If the currency were gold, the same number of men could convey £16,000. When the cost of conveyance, protection, and insurance, the time spent in counting, examining, and weighing, the wear and tear of such a mass of coin are considered in connection with the present state of knowledge, it may reasonably be maintained that the silver money of India is a greater barbarism than the iron money of Sparta. During 1856-7, India received from Great Britain and the Mediterranean ports £9,340,664 in specie, of which all but £37,148 was in silver. In 1857, these shipments amounted to £226,750 in gold, and to the enormous sum of £13,246,684 in silver, a sum exceeding by $4\frac{1}{2}$ millions, the estimated produce of the American silver mines in the same year. If both the precious metals had been allowed to perform the functions of money in India, the demand would have been supplied by gold and silver in due proportion, but owing to the interposition of Anglo-Indian legislation, by declaring silver to be the only legal tender, the supply is almost entirely confined to that metal. The existing supply of silver is not sufficient to satisfy the demand for India, which together with China, over the currency of which we have no control, absorbed, in 1857, upwards of £20,000,000 sterling. By deferring the change, we only increase the difficulty and the magnitude of it. It could not be undertaken at a better period than the present."

The change then proposed is the introduction of a double currency, on the principle of that of Great Britain, in which silver is subsidiary to gold. The seignorage on the coinage of gold to be one per cent., and the dies to be supplied to all the Mints of India as well as of Australia, from the Royal Mint in London.

I think it may be confidently assumed from these remarks, that the introduction of a gold currency into British India is but a question of time. A little consideration will make it evident that when this change takes place, the greater part, if not the whole of the gold currency will be supplied by the Mints at Melbourne and Sydney. I believe I am understating the fact when I assert that Great Britain sends annually to India £8,000,000 of specie. The Australias, we know, send to Great Britain about £11,000,000 annually. The remittance from Great Britain to India has hitherto been (from the necessity of complying with Indian legislation) in silver, the whole of which has been obtained from America. On the introduction of the gold currency into India, the remittance, the greater part of which will be in gold, will, to that extent, be made by Australia, on account of England to India direct. Gold, of course, will not travel from Australia to England, and thence to India, but payments due to India by England will be settled on account of the latter by direct remittance from Australia.

Again, if the coinage of the Mints of Australia be admitted as legal tender in India, the greater part of the payment will be made in coin. India has no gold or silver mines of her own; she must then import for coinage. It will, however, be evidently more profitable to import gold coined at Melbourne at 3d. an ounce seignorage charge than to import bullion from Australia, and pay 1 per cent. or 9d. per ounce for its coinage in India. Even on the supposition that the seignorage charge in India is fixed at $\frac{1}{4}$ —that proposed by "Indophilus"—or less, I believe the coinage of her currency would be executed at Melbourne and Sydney; that is, it would be found more profitable to manufacture the coin at the place where the material is produced than at the place for which it is destined.

If this reasoning be sound, it will be unnecessary when gold is admitted into the Indian currency to make provision for coinage in India, should a Mint be in existence at the time in Melbourne.

I have endeavored to shew that very important interests beyond the jurisdiction of these Colonies, and partaking of an Imperial character, are involved in the question of Mints for

for Australia. I have shewn that the Mint in Sydney has proved an establishment capable of supporting itself, and that from analogy it may be considered that a Mint at Melbourne will prove yet more profitable. I have shewn that with the question of Mints for Australia is associated that of the currency of India. It may also be inferred that a direct connection of Australia with the East will have the effect of expanding the resources of these Colonies. I conceive, then, that the time has arrived when Her Majesty's Government can, in the terms of the Treasury Minute of 22nd March, 1853, assert the prerogative of the Crown with greater certainty for the common benefit of the Colonies immediately interested, and for Imperial interests generally, and can assume a more decided control of the Mints in Australia, without burdening the Imperial funds with any charge present or prospective.

The present constitution of the Sydney Mint is such, that either the Local or the Imperial Government can suspend its operations. The principle involved in the arrangement is correct so long as the Mint is designed for local benefit, and the currency supplied from it is limited in circulation. But if this currency is to be legal throughout British territory, and if, as I have endeavored to shew, a Mint at Melbourne will render unnecessary any provision in India for the coinage of gold, it then appears desirable that the Imperial Government should be in a position to keep the Australian Mints in operation so long as they may find it necessary, that is, until—in case of local objection to the continuance of the Mint, (which, for the sake of argument, I imagine possible)—adequate provision could be made for the gold coinage of India.

I suggest, therefore, that a Mint endowed with the same privileges should be maintained in each Colony, so long as the Government of each may desire; that sums sufficient for their maintenance should be made, by Act of the local Parliaments, a charge on the Consolidated Revenues of the respective Colonies, and surrendered for expenditure to the Home Government, on the condition that all moneys collected as seignorage, or Mint charge, shall be paid into the credit of the Colony. A limit to the seignorage should be fixed, as well as to the price at which bullion might be issued from the Mints, but in other respects these charges should be left to the regulation of the Colonies. The appointment of the Staff of the Establishments should be reserved, as those in the Sydney Mint are, to the Imperial Government. For these concessions, the coinage of the Mints of Sydney and Melbourne should be made a legal tender throughout the British dominions.

The sums thus set apart might be applied under the control of the Imperial Government, and the Governors of the Colonies, and accounts of expenditure periodically furnished to the local Legislature, and the Commissioners of Her Majesty's Treasury.

This arrangement would be advantageous both to the Colonies and to the Imperial Government. The Colonies would be more than reimbursed the sums appropriated for the maintenance of their respective Mints by the revenue drawn from Mint charges, and would enjoy an extensive circulation for their coinage. The Imperial Government would possess sufficient control over the operations of the Mints to justify the introduction of their coinage as a legal tender throughout India, and the rest of the British dominions.

Another arrangement for the same object is open for adoption, viz. :—The Imperial Government to take upon themselves the charge of maintaining the Mints, in consideration for receiving the seignorage and all other Mint charges. This however, would require the surrender, by the Colonies, of all control over the Mint charges to be imposed, as the Home Government would be directly interested in the amount so collected. It is, on that account, objectionable. For, as the immediate object of these Mints is to benefit the Colonies, the charges for coinage, which must greatly effect their utility, should, as far as possible, be left to Colonial control.

I have thus endeavoured to put together, in a report, the several questions which may now be advantageously considered. In laying it before the Government of this Colony, I would suggest the expression of their opinion through the Governor General to the Home Government on the questions raised. I would also recommend that the Government of Victoria be urged to a similar course. By this means the Imperial Government will be in possession of all the facts and opinions available for a speedy and substantial settlement of the question of Mints for the Australian Colonies.

E. W. WARD,
Deputy Master.

APPENDIX

APPENDIX No. 1.

RETURN shewing the ANNUAL fluctuations on the rate of Exchange in England
PREVIOUS to the Discovery of Gold.

YEAR.	BUYING RATE.	ANNUAL VARIATION.
1841	5 per cent. discount to par	5 per cent.
1842	5 " " to 2½ per cent. premium	7½ "
1843	5 " " to 3½ " "	8½ "
1844	7½ " " to par	7½ "
1845	7½ " " to 1½ per cent. discount	6 "

APPENDIX TO THE FOREGOING REPORT.

APPENDIX No. 14.

REGULATIONS for the Receipt and Issue of Gold, at the Sydney Branch of the Royal Mint.

*Colonial Secretary's Office,
Sydney, 22 September, 1855.*

WITH reference to the notices from this Office of the 10th May and 28th June last, His Excellency the Governor General is pleased to direct the publication, for general information, of the following Regulations for the Receipt and Issue of Gold at the Sydney Branch of the Royal Mint, which will take effect from the 1st proximo, and supersede the arrangements notified on the above dates:—

I. Importations of Gold Dust or Gold Bullion for Coinage, from 12 ounces upwards, will be receivable at this Mint daily (Saturdays and Holidays excepted) between the hours of 11 A.M., and 3 P.M., on the following terms:—

1. Importations from One thousand ounces standard upwards, subject to a charge of three-quarters per cent. for converting the same into coin.
2. Importations below this amount will be coined at a charge of 1 per cent.
3. The value of the Bullion will be determined on the reports of the Mint Assayers.
4. Importations will be melted, if preferred, in the presence of the importer. The importer will also be furnished, on demand, with a clip, for assay, from his own ingot, as a check on the reports of the Mint Assayers.
5. The Mint will issue, if preferred, Gold Bullion in bars or ingots, at £3 17s. 10½d. the standard ounce.
6. The Mint will be prepared to afford accomodation, to a limited extent, to parties requiring early payment for their Bullion at an advance of one-fourth per cent. on the above charges. Payment in such cases will be made within two days of delivery at the Mint.

II. The following descriptions of Bullion are not admissible within the Mint, viz.:— Articles of Plate, Jewellery, or wrought Gold (coins excepted); Bullion containing Mercury or metals foreign to the Gold-producing districts of Australasia, and destructive to the malleability of the Bullion; Bullion that has been tampered with in any way.

III. Bullion which can be recognised before melting as objectionable on the above grounds will not be received; but should any, after melting, prove unfit for coinage for the reasons enumerated, it will be returned to the importer, subject to a charge of sixpence per ounce, on the gross weight of the importation.

*By His Excellency's Command,
C. D. RIDDELL.*

MINT CHARGES.

*The Treasury, New South Wales,
24 October, 1859.*

A Reduction of the present "Mint Charges," equivalent to three-eighths per cent. of the standard value of the importation, will be made in respect to Gold—the produce of any portion of the British Territory of Australasia not included in New South Wales—imported to the Mint on and after the first day of November next, under the conditions prescribed in the fourth Clause of the Act of Council, 20 Vict., No. 17, granting a Duty on Gold.

E. C. WEEKES.

APPENDIX No. 15.

MEMORANDUM for the Deputy Master of the Sydney Branch of the Royal Mint.

Amount made available in the Colony to the Treasury of New South Wales, from 1855 to 1859, inclusive, by the sale of Debentures, say (approximately) * £2,039,680

Amount of Debentures issued in the Colony in each year, from 1855 to 1859, inclusive:—

In 1855	£421,300
1856	480,100
1857	241,650
1858	180
	<hr/>
	£1,143,230

Amount

* A portion of the proceeds of Debentures sold in London was made available in the Colony, and is therefore included in this amount.

£544,500 of this amount remained in the hands of the Oriental Bank, London, to be disposed of, on the 15th October, 1859.

APPENDIX TO THE FOREGOING REPORT.

Amount of Debentures transmitted in each year, from 1855 to 1859, to England, to be sold there on account of the Colony:—

In 1855	£250,000
1856	433,300
1857	100,000
1858	500,000
1859	893,000
	<hr/>
	£2,176,300

APPENDIX No. 16.

NEW SOUTH WALES.

ANNO VICESIMO

VICTORIÆ REGINÆ.

* * * * * No. XVII. * * * * *

An Act for granting a Duty upon Gold. [Assented to, 12th February, 1857.]

WHEREAS it is expedient to levy a Duty upon Gold in New South Wales: Be it therefore enacted, by the Queen's Most Excellent Majesty, by and with the advice of the Legislative Council and Legislative Assembly of New South Wales, in Parliament assembled, and by the authority of the same, as follows:—

1. For the purposes of this Act the term "Gold" shall mean and include Gold in its natural state, whether mixed with any other substance or not, Gold Dust and all other Gold, whether wrought or unwrought, except coined Gold issued from the Royal Mint at London, or of the Branch thereof at Sydney, or of any Foreign State, articles of plate, jewellery, or ornament actually worn upon the person, or made elsewhere than in the Colony.

Interpretation of terms.

The verb "export" shall mean and include transmission or removal from New South Wales, whether by sea or land.

2. From and after the fifteenth day of February now next, there shall be levied, collected, and paid to Her Majesty, Her Heirs, and Successors, for the public uses of this Colony, and in support of the Government thereof, the following Duties upon Gold, that is to say:—

Duty upon Gold.

At the Customs, previous to exportation from New South Wales, the sum of Two Shillings and Sixpence upon every ounce troy weight of such Gold.

At Customs 2s. 6d. per ounce.

At the Royal Mint at Sydney, on Gold imported thereto on and after the fifteenth day of February aforesaid, the sum of Two Shillings and Three-pence for every ounce troy weight of standard fineness as declared after the said Gold shall have been assayed and brought to the standard of twenty-two carats fine at the said Mint.

At Mint 2s. 3d. per ounce standard.

3. Provided always, that at the Customs no Gold entered for exportation shall be liable to duty which shall be accompanied by a Certificate from the Deputy-Master, or one of the Principal Officers of the Royal Mint at Sydney, declaring that such Gold has been assayed and brought to standard, and that the Duty thereon has been paid, and the same has been issued from the said Mint in conformity with the Rules and Regulations thereof.

Customs Duty not leviable on assayed duty-paid Gold issued from the Mint.

4. Provided also that such Duty shall not be payable at the said Royal Mint at Sydney upon Gold, the produce of any other of Her Majesty's Australasian Colonies, which shall be duly imported to the said Mint under the Seal of the Customs of such other Australasian Colony, and under the Certificate of one of the Principal Officers of the Customs thereat signifying that such Gold was exported therefrom in conformity with the Laws and Regulations thereof.

Not to apply to Gold of other Colonies brought for coinage to the Mint through the Customs.

1859.

Legislative Assembly.
NEW SOUTH WALES.

EXPORT DUTY ON GOLD.

(SOFALA DISTRICT OF WESTERN GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned Gold Miners, Traders, and others residing in the Sofala District of the Western Gold Fields,—

SHEWETH :—

That the export duty of two shillings and sixpence on the ounce of gold is a great burthen and severe loss to those who are entirely dependent on gold mining for support, and whose energies are devoted to the development of one of the great resources of the Colony.

That the life of a gold miner is one of hardships and privations, as it is only by great industry and perseverance that gold can be obtained in payable quantities, and the difficulties to be surmounted by the miner are continually increasing, as in most cases a large amount of preparatory work has to be performed before he can hope to be remunerated.

Your Petitioners beg most respectfully to inform your Honorable House that many of the operations undertaken on the Gold Fields have occupied long periods of time for completion, in some instances two or three years; and that they were projected and executed by amalgamated parties of working men, who, during the time of this necessary outlay of labor, had to subsist on the savings of previous years; and it frequently happens the returns resulting from their enterprise are not commensurate to the amount of labor and capital expended. Your Petitioners submit that a body of men who, by their industry and toil, contribute so materially to the wealth and prosperity of this Colony, are deserving of your consideration.

We also cannot overlook the fact that we are extensive consumers of articles which yield a large return to the General Revenue, and thus pay an equal share (with the rest of the community) of the public expenditure; we therefore the more acutely feel this tax upon our income. This tax presses the more heavily upon the working man, as it decreases the value of the article he produces, and which, but for his energy and enterprise, would have remained idle and unproductive.

That for these reasons your Petitioners earnestly hope that your Honorable House will take this Petition into favorable consideration, and abolish, at your earliest opportunity, this tax on the income of the working man.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 815 Signatures.]

Sydney: Thomas Richards, Government Printer.—1859.

1859.

Legislative Assembly.
NEW SOUTH WALES.

EXPORT DUTY ON GOLD.
(WESTERN GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

1859.

Legislative Assembly.
NEW SOUTH WALES.

EXPORT DUTY ON GOLD.

(PETITION FROM ARALUEN GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 2 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The Memorial of the Gold Miners, Traders, and Others, resident on the Araluen Gold Fields,—

RESPECTFULLY SHEWETH :—

That the export duty of two shillings and sixpence on the ounce of gold is a great hardship and severe loss to those who are depending on gold mining for support, and whose energies are devoted to one of the great resources of the colony.

That the life of a gold miner is one of hardship and privation, for it is only by great industry and perseverance that gold can be obtained in payable quantities; the difficulties to be surmounted by the miner are continually increasing, as in most cases a large amount of work has to be performed before he can hope to be remunerated.

Your Memorialists submit, that a body of men who, by their industry and toil, contribute so materially to the wealth and prosperity of this colony, are deserving of your consideration; we also cannot overlook the fact, that we are extensive consumers of articles which yield a large return to the General Revenue. We thus pay, with the rest of the community, an equal or greater share of the public expenditure, and therefore the more acutely feel this tax on their labor.

This tax presses the more heavily on the working man, as it decreases the value of the articles he produces.

And your Memorialists pray for the abolition of the gold tax, and, as in duty bound, will ever pray, &c.

1859.

Legislative Assembly.
NEW SOUTH WALES.

EXPORT DUTY ON GOLD.

(PETITION FROM THE SOUTHERN GOLD FIELDS, AT ADELONG.)

Ordered by the Legislative Assembly to be Printed, 2 December, 1859.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Gold Miners, Storekeepers, and others residing on the Southern Gold Fields, at Adelong, in the Colony of New South Wales,—

HUMBLY SHEWETH:—

That the present Export Duty of two shillings and sixpence per ounce on Gold as charged at the present time is a great hardship upon, and most severely felt by, those who are entirely dependent on the success of gold mining for a livelihood, and whose every energy is devoted to the development of those auriferous resources which has placed the Colony in that noble and exalted position in which she now stands as a British Possession.

Your Petitioners would further beg to acquaint your Honorable House, that the life of a gold miner is at all times one of privation, hardship, and speculation, together with many difficulties to surmount which are continually increasing, and in most cases a very large amount of preparatory work has to be performed before gold can be obtained in any payable quantity. Further, that many of the operations undertaken of late years on the Gold Fields have occupied long periods of time, and in some instances two and three years have elapsed prior to their yielding any remuneration to the miner.

That the works during that period are carried on by amalgamated parties or shareholders formed of the working class, who, during the progress of sinking down to the quartz reef or vein, have to subsist on their savings of previous years. The result of many of these undertakings have been that the returns, after paying all expenses incurred, have not recompensed the minor for the amount of labor and capital expended thereon.

Your Petitioners submit most respectfully, that as a body of men who by their industry and toil contribute so largely to the wealth and advancement of the Colony, independently of being large consumers of articles which yield a large return to the public revenue, they are entitled to the consideration of your Honorable House.

Your Petitioners, therefore, most humbly trust that, as the present tax presses more heavily on the working man than any other class, and depreciates the value of his labor, your Honorable House will take this Petition into your favorable consideration at the earliest opportunity, and pass a law abolishing the present duty of two shillings and sixpence on the ounce of gold, which is raised out of the income of the working man.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 97 Signatures.]

NEW SOUTH WALES.

EXPORT DUTY ON GOLD.
(PETITION FROM THE SOUTHERN GOLD FIELDS, AT ADELONG.)

Ordered by the Legislative Assembly to be Printed, 2 December, 1859.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Gold Miners, Storekeepers, and others residing on the Southern Gold Fields, at Adelong, in the Colony of New South Wales,—

HUMBLY SHEWETH:—

That the present Export Duty of two shillings and sixpence per ounce on Gold as charged at the present time is a great hardship upon, and most severely felt by, those who are entirely dependent on the success of gold mining for a livelihood, and whose every energy is devoted to the development of those auriferous resources which has placed the Colony in that noble and exalted position in which she now stands as a British Possession.

Your Petitioners would further beg to acquaint your Honorable House, that the life of a gold miner is at all times one of privation, hardship, and speculation, together with many difficulties to surmount which are continually increasing, and in most cases a very large amount of preparatory work has to be performed before gold can be obtained in any payable quantity. Further, that many of the operations undertaken of late years on the Gold Fields have occupied long periods of time, and in some instances two and three years have elapsed prior to their yielding any remuneration to the miner.

That the works during that period are carried on by amalgamated parties or shareholders formed of the working class, who, during the progress of sinking down to the quartz reef or vein, have to subsist on their savings of previous years. The result of many of these undertakings have been that the returns, after paying all expenses incurred, have not recompensed the miner for the amount of labor and capital expended thereon.

Your Petitioners submit most respectfully, that as a body of men who by their industry and toil contribute so largely to the wealth and advancement of the Colony, independently of being large consumers of articles which yield a large return to the public revenue, they are entitled to the consideration of your Honorable House.

Your Petitioners, therefore, most humbly trust that, as the present tax presses more heavily on the working man than any other class, and depreciates the value of his labor, your Honorable House will take this Petition into your favorable consideration at the earliest opportunity, and pass a law abolishing the present duty of two shillings and sixpence on the ounce of gold, which is raised out of the income of the working man.

And your Petitioners, as in duty bound, will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

EXPORT DUTY ON GOLD.

Ordered by the Legislative Assembly to be Printed, 17 May, 1860.

W. DENISON,
Governor General.

Message No. 39.

In reply to the Address from the Legislative Assembly, communicating the Resolution adopted by the House, on the 1st instant, namely:—"That in the opinion of this House the Export Duty on Gold should not be levied after the 31st December, 1860,"—

The Governor General is advised to state, that the necessary steps will be taken by the Government to carry into effect the wishes of the Assembly.

Government House,
17th May, 1860.

Sydney: Thomas Richards, Government Printer.—1860.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be clearly documented and supported by appropriate evidence. This includes receipts, invoices, and other relevant documents that can be used to verify the accuracy of the records.

The second part of the document outlines the various methods used to collect and analyze data. It describes how data is gathered from different sources and how it is processed to identify trends and patterns. This involves using statistical techniques and other analytical tools to interpret the data and draw meaningful conclusions.

The final part of the document provides a summary of the findings and offers recommendations for future research. It highlights the key insights gained from the study and suggests areas where further investigation is needed. This includes identifying potential limitations of the current study and proposing ways to address them in future work.

DISPUTED BOUNDARY—ARALUEN DIGGINGS.
(RETURN RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 20 December, 1859.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 6 December, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ All Correspondence and Papers relative to a Disputed Boundary between Mundy’s Grant, situate at Braidwood, now the property of Messrs. Roberts and Hassall, and the Araluen Diggings.”

(Mr. Cooper.)

SCHEDULE.

NO.	PAGE.
1. Assistant Commissioner Griffin to Secretary for Lands and Public Works, drawing attention to difference between creek frontage of Mundy’s 870 acres (now Roberts and Hassall’s) as marked on original plan, and that shewn by recent survey of Licensed Surveyor Larmer. 29 July, 1859	2
2. Under Secretary, in reply, and enclosing copy of Surveyor General’s Report in the matter (with tracings). 16 August, 1859	2
3. Assistant Commissioner Griffin to Secretary for Lands and Public Works, further on same subject. 26 September, 1859	3
4. Under Secretary for Lands, in reply. 21 October, 1859	3
5. Same to Crown Solicitor, requesting opinion of Crown Law Officers in the matter. 21 October, 1859	4
6. Crown Solicitor to Under Secretary for Lands, in reply. 25 October, 1859	4
7. Same to the same, in reply to further reference made to him on the subject. 8 November, 1859	4
8. Petition from Gold Diggers, &c., at Araluen Valley, praying settlement of the question. (Without date)	5
9. Report of Acting Surveyor General (with decision of Secretary for Lands thereon). 9 December, 1859	6

DISPUTED BOUNDARY—ARALUEN DIGGINGS.

No. 1.

ASSISTANT COMMISSIONER GRIFFIN to THE SECRETARY FOR LANDS AND WORKS.

Braidwood,

29 July, 1859.

SIR,

Mr. Surveyor Larmer forwards by this post to the Survey Office a tracing of 870 acres in Araluen Valley, marked on the map "F. M. Mundy"; and I have the honor to call your attention to the very extraordinary difference existing in the creek frontage of this section as marked on the chart, and the result of the present survey.

2. You will perceive that the creek, as charted, is made to pass over a steep range; and provided the original bearings are to be adhered to, so as to give the computed area of 870 acres, an imaginary stream must be adopted as the boundary.

3. I do not think the original bed of the creek can now be laid down; and to add to the difficulty, at the point chiefly in dispute the stream is divided into two parts by an island, one part being the present watercourse, and the other running only during floods.

4. Mr. Larmer's measurement of the water boundary of Mundy's land having, therefore, as it seems to me, rather added than not to the difficulty surrounding this complicated boundary question, I would, provided that the Surveyor General is of opinion that the original survey was loose, and cannot now be verified, suggest prompt arbitration between the Government and the present proprietors, so as to establish an equitable line.

5. As much confusion exists, and persons digging near this portion of the Araluen Creek are anxious to have the matter settled, for many reasons which I need not allude to, I shall be glad to have definite instructions as soon as possible.

6. It may facilitate matters to add, that the present holders of Mundy's section, 870 acres, are not averse to arbitration as a final settlement of this vexed question.

I have, &c.,

J. H. GRIFFIN,

A. G. C.

THE SECRETARY

FOR LANDS AND PUBLIC WORKS,
Sydney.

No. 2.

UNDER SECRETARY FOR LANDS to ASSISTANT COMMISSIONER GRIFFIN.

*Department of Land and Public Works,**Sydney, 16 August, 1859.*

SIR,

With reference to your letter of the 29th ultimo, and previous correspondence relative to the proper definition of the creek boundaries of the private lands at Araluen Valley, I am now directed by the Secretary for Lands and Public Works to transmit to you the accompanying copy of a Report received from the Surveyor General on the subject, and to request that you will point out to the parties interested the state of the matter as shewn by that officer; and, also, the very small difference which appears to exist between Mr. Surveyor Huddle's field-book and Mr. Larmer's survey; and that you will, after consultation with them, suggest any course which you may think practicable for the final settlement of this question.

I have, &c.,

MICL. FITZPATRICK.

J. H. GRIFFIN, Esq.,

Assistant Gold Commissioner, Braidwood.

Letter from Mr. Griffin not traceable.

Tracings enclosed to be returned.

[Enclosure

[Enclosure in No. 2.]

R E P O R T.

The enclosed tracings, marked A and B, which I have received from Mr. Licensed Surveyor Larmer, shew respectively the present course of the creek, forming the frontage of 870 acres sold to F. M. Mundy, and the course of the creek as represented in the original plan, dated July, 1835, of that land, and which is by Mr. Surveyor Hoddle, and is plotted to a scale of 40 chains to one inch—one-fourth of that used in the tracings.

On this original plan no traverse lines of survey are shewn; but in a general survey of the creek by Mr. Hoddle, dated March, 1828, and from which the creek, in the small original survey, is evidently copied, traverse lines of survey across the creek, and which bear out the representation of that feature on the last mentioned plan, are shewn.

As the existence, shewn by Mr. Larmer, of a hill on the south boundary of Lundy's 640 acres rendered it impossible that the creek could ever have flowed as represented by Mr. Hoddle, a reference has been made to his field-book of February, 1828, from which it has become apparent that the erroneous representation results from an error in plotting; and a re-plotting from the field-book, on the same scale as tracings A and B, and which has been marked C, has been made.

From this tracing (C) it will be seen that since 1828 the creek has changed its direction in what was in that year a "reedy flat," and breaking out from the waterhole near the north boundary of the 870 acres, by a channel, the formation of which had commenced in 1828, has again joined its old course, at what was then the next waterhole.

The true original boundary of Mundy's 870 acres is, therefore, the creek shewn in a black line on the tracing marked C, but whether this should now be re-marked and adopted by the Crown, or whether a boundary should, with this information, be determined by arbitration, is a question on which it may be desirable to take legal opinion.

GEO. BARNEY,
S. G.

4 August, 1859.

No. 3.

ASSISTANT COMMISSIONER GRIFFIN to THE SECRETARY FOR LANDS AND WORKS.

Braidwood,
26 September, 1859.

SIR,

In returning the within tracings and reports, I have the honor to inform you that I have, as requested, communicated with Messrs. Roberts and Hassall, the present holders of Mundy's 870 acres, and explained Mr. Hoddle's error in plotting.

2. Whether the creek, as shewn in a black line on the tracing marked C, be re-marked, or whether a new line be determined upon by some kind of arbitration, I must earnestly call your attention to the serious confusion that exists, and is daily increasing, from the non-settlement of the question, and impress on you the necessity for *prompt* measures.

3. Should a re-marking of the line be determined on, I would suggest that instructions be given to some one connected with the Survey Office to proceed to the spot without delay to render every assistance to Mr. Surveyor Larmer; and in the event of arbitration being adopted as a final settlement of the dispute, the Member for the Southern Gold Fields, Mr. Wilson, is thoroughly conversant with the difficulties that surround the matter, and would, no doubt, render valuable assistance.

I have, &c.,

THE SECRETARY
FOR LANDS AND PUBLIC WORKS,
Sydney.

J. H. GRIFFIN,
A. G. C.

No. 4.

UNDER SECRETARY FOR LANDS to ASSISTANT COMMISSIONER GRIFFIN.

Department of Lands,
Sydney, 21 October, 1859.

SIR,

Adverting to your letter of the 26th ultimo, on the subject of the definition of the boundaries between private and Crown Lands at Araluen Creek, and urging an early settlement of this question, I am directed to state that, assuming even that arbitration should eventually be resorted to as suggested by you for the purpose of determining what shall be the boundaries for gold mining purposes between Mundy's 870 acres (now Messrs. Roberts and Hassall) and the Crown Lands on the opposite side of Araluen Creek, it appears to the Secretary for Lands to be desirable to mark the position which the creek occupied at the date of Mr. Hoddle's original survey of 870 acres on the ground.

2.

2. The Acting Surveyor General has accordingly, he states, issued instructions to Mr. Licensed Surveyor Larmer so to mark the position of the creek, with all the precision which Mr. Huddle's very carefully kept field-book renders practicable.

3. At the same time I have to add, that the opinion of the Crown Law Officers has been requested as to what course should be pursued by the Government in the event of the present owners of Mundy's 870 acres refusing to recognize the boundary which it is proposed to mark as representing the old course of the creek.

J. H. GRIFFIN, ESQ.,
ASSISTANT GOLD COMMISSIONER,
Braidwood.

I have, &c.,
MICL. FITZPATRICK.

No. 5.

UNDER SECRETARY FOR LANDS to THE CROWN SOLICITOR.

*Department of Lands,
Sydney, 21 October, 1859.*

SIR,

In transmitting to you the accompanying papers respecting the definition, for gold mining purposes, of the boundaries between certain private and Crown land at Araluen Creek, I am directed by the Secretary for Lands to request that you will, as early as practicable, obtain the opinion of the Crown Law Officers as to the course which should be pursued by the Government in the event of the owners of the private lands refusing to recognize as a boundary the line which it is proposed to mark as representing the old course of the creek.

THE CROWN SOLICITOR.

I have, &c.,
MICL. FITZPATRICK.

No. 6.

CROWN SOLICITOR to THE UNDER SECRETARY FOR LANDS.

*Crown Solicitor's Office,
Sydney, 25 October, 1859.*

SIR,

In returning the accompanying papers to you, I have the honor to inform you that Mr. Solicitor General Hargrave is of opinion, that the Gold Fields Management Act gives no jurisdiction whatever over private lands, but only "the waste lands" of the Colony, and consequently that the boundaries of the private lands cannot be ascertained by the surveyor or other person, except by arbitration and *consent* of the private owners.

THE UNDER SECRETARY FOR LANDS.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

No. 7.

CROWN SOLICITOR to THE UNDER SECRETARY FOR LANDS.

*Crown Solicitor's Office,
Sydney, 8 November, 1859.*

SIR,

I have the honor to inform you that I have laid the accompanying papers before Mr. Solicitor General Hargrave, and that he has written a further opinion, of which the following is a copy:—

"The Government can compel the grantee of the land adjoining the boundary, more correctly set out, to respect that boundary only by the like means as any other owner; namely,—by forcibly maintaining the Government's own lawful possession.

"But if the grant has issued with boundaries *different from those now set out*, then the grantee has a *prima facie* good title to the encroachment, which can only be set aside "by *scire facias*, or other due course of law, or by consent of the grantee."

THE UNDER SECRETARY FOR LANDS.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

No. 8.

PETITION OF GOLD DIGGERS to THE GOVERNOR GENERAL.

To His Excellency Sir William Thomas Denison, K.C.B., Governor General of the Australian Colonies, &c., &c., &c.

May it please your Excellency,—

The Petition of the undersigned Gold Miners in the Araluen Valley,—

HUMBLY SHEWETH :—

Existing circumstances obstructive to the full development of the mineral resources of this District, viz. :—

That the mining operations of the said District, including not only the Araluen Valley, but also Jembaicumbene and Major's Creek, are so greatly impeded as to be nearly brought to a stand still by the assumed claims of certain neighboring landowners, by force of whose said claims your Petitioners are prohibited working land which they believe to be the property of the Crown.

That Messrs. Roberts and Hassall hold certain lands under a grant to one F. M. Mundy, the registry of which grant your Petitioners believe, and distinctly states, its boundary to be the Araluen Creek.

That the said Messrs. Roberts and Hassall, under the said grant, by a survey lately made by Mr. Larmer, the Government Surveyor, do now claim certain lands on the eastern side of the said creek hitherto held by them under the said grant, thereby claiming possession of the creek which your Petitioners supposed to constitute a boundary line, but which, contrary to the survey of Mr. Ardill, is now encompassed within the survey of Mr. Larmer, the Government Surveyor. Your Petitioners would also beg to inform your Excellency that our Gold Commissioner cannot recognise any survey made by a private surveyor.

That when Mr. Ardill, a private surveyor, made a survey of the ground now in dispute, the said ground he (Mr. Ardill) declared, and still declares, to be the property of the Crown.

That Mr. Ardill is willing to stand an examination as to his capabilities of making an efficient survey, and that he is in a position to prove that Mr. Larmer has deviated from the correct survey according to the registry of the original grants, and that of the various grants made in this District this alone is held to cross the creek.

That your Petitioners seek at the hands of your Excellency permission to obtain freedom of access to the said creek, thereby to continue the development of the auriferous resources of this District, and respectfully beg to submit to your Excellency the following particulars :—

That believing the said ground to be unalienated from the Crown, your Petitioners have already expended upon it upwards of £3,000.

That your Petitioners are further prepared to more than quadruple this expenditure in the extension of their mining enterprise by the introduction of the requisite machinery ; but that they have now to encounter the vexatious probability of suffering the entire loss of their present heavy outlay of labor and capital, by the ground which they have held being handed over to other occupants.

That your petitioners were encouraged in the aforesaid occupation and expenditure by the survey of Mr. Ardill, the tracings of whose survey, as also the tracings the present Government survey, your Petitioners would humbly submit to your Excellency's consideration.

Trusting, therefore, that by the particulars embodied in, and the explanations afforded by, this petition, we have fully proven the urgent need of immediate steps being taken by your Excellency's Government to enable us, your Petitioners, at once to resume our vocations.

We humbly beg your Excellency's favorable consideration of this our prayer.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 567 Signatures.]

No. 9.

ACTING SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

REPORT.

1. Having reference to your blank cover letter of the 15th ultimo, I have the honor to state, for the information of the Honorable the Secretary for Lands, that I have hitherto delayed reporting on this Petition in order that my Report might contain a statement of the final steps taken in the matter, as well as a full statement of all proceedings from the commencement; but as the subject has excited such considerable interest I hesitate to defer longer the Report which I annex.

2. The circumstances of the case are as follows:—In the year 1835 F. M. Mundy obtained by purchase a grant of 870 acres on Araluen Creek, in the County of St. Vincent, which is described in the Deed, as per enclosure, marked A.

3. The plan and description of this land were furnished by Mr. Hoddle, an old officer of this Department, and some years since Surveyor General of Victoria, in July, 1835.

4. It appears, however, from the records of this office that Mr. Hoddle, having surveyed the Araluen Creek in February, 1828, as part of his general survey of features in the County of St. Vincent, adopted the portion of that general survey on which the 870 acres fronted for his measurement of the land, and merely measured and marked in 1835 the right line North, West, and South boundaries.

5. Difficulties having recently arisen between the owners of Mundy's grant and the Araluen Gold Miners as to the true boundaries of the grant, the latter being desirous to work as much of the auriferous flat as possible without paying license, and the former being of course anxious to receive license fees for as much of the land as they could fairly claim, it was considered expedient that, as the only means at the disposal of Government for facilitating the settlement of the dispute, the position of the creek boundary at the date of Mr. Hoddle's survey should be ascertained, and marked by a Government Surveyor.

6. In pursuance of this object, it became apparent that the representation of the creek on Mr. Hoddle's plan was in some part erroneous, as to follow the course indicated it would have passed over a considerable elevation, but on referring to Mr. H.'s field-book, which is carefully and clearly kept, it was discovered that this misrepresentation resulted from the erroneous plotting by Mr. Hoddle of one of his survey lines, and that a plotting from the field-book, while making a divergence in one portion of the creek from the course now existing, brought a considerable part of the creek to a position almost identical with its present course. This field-book and plan further shewed, that where the creek course has apparently changed it flowed through what was then "a reedy flat," and that at the spot where the divergence commenced an outbreak from a waterhole was then commencing in the position which the creek now occupies.

7. Here then it must appear to any disinterested person that there is satisfactory evidence that the creek has changed its course since the date of Mr. Hoddle's survey, and that by a careful re-plotting of that survey the course of the creek at that date can be determined with a very near approximation to the truth; and on this evidence, uncontroverted by any worthy of consideration, Mr. Licensed Surveyor Larmer was instructed to mark the original position on the ground, and did so accordingly.

8. On representations by the owners of Mundy's grant, subsequently to this marking, that the creek, as so marked, passed near the south-east corner of that grant, over the termination of a ridge which it obviously never could have passed over, Mr. Larmer was called on to report, and has reported, shewing that the representation is a correct one, and that the creek in this portion now has the same course that it had at the date of Mr. Hoddle's survey.

9. Pending the return of a plotting forwarded to Mr. Larmer for his guidance, I am not prepared to say whether the error in the position of this portion of the creek is due to Mr. Larmer's misplacing of the plotting or to Mr. Hoddle's survey, but as the greatest difference amounts only to 50 yards it is very possible that in a general survey made at so remote a period, and when there seemed to be no probability of the precise position of the creek being a matter of such importance as it has now assumed, the error may be attributed to Mr. Hoddle.

10. The portion of the creek in which this discrepancy arises, I may remark, has been nearly or quite worked out, and, therefore, the question has no great practical importance.

11. It is possible that evidence may be adduced of a character which may outweigh the evidence afforded by Mr. Hoddle's survey of the old position of the creek, but to me it appears highly improbable that any such can exist, and having made exertion to arrive at a correct conclusion on the question, I now feel satisfied that the only course open to Government has been followed, and that no nearer approximation to the original boundary could well be marked.

12. It is a matter of regret that the services of the District Surveyor of the Southern Districts, in which Araluen is situated, were not available on this occasion—that officer not having as yet been removed from Wellington, where he was employed previously to his promotion—as I should have anticipated from his presence an earlier arrival at the result now attained. Believing, however, that it is, and will be, open to the Government, on sufficient evidence being brought forward, to alter at any time the boundary as now marked, I shall, should the Secretary for Lands approve, furnish Mr. Surveyor Rowland, who is now at Araluen, with the necessary information, and instruct him to make a further investigation of, and report on the case.

13. With reference to the petition, I beg to remark that the miners appear to rely on information afforded by Mr. Ardill, whose tracings are not however with the petition as is stated, and to state that Mr. Ardill was not in possession of the reliable information above referred to, and was not therefore in a position to arrive at a correct conclusion in the matter.

14. I feel bound also to observe, with reference to the paragraph of the petition which states that Mr. Ardill is willing to stand an examination, &c., that he did some months since submit to an examination for the position of Licensed Surveyor, and was not recommended for a license.

A. G. McLEAN,
Acting Surveyor General.

THE UNDER SECRETARY FOR LANDS.

B. C.
9 December, 1859.

With reference to paragraph 12, the Acting Surveyor General will have the goodness to give Mr. Surveyor Rowland the necessary information and instructions for making the further investigation and Report suggested.

J. B.
17 Dec., 1859.

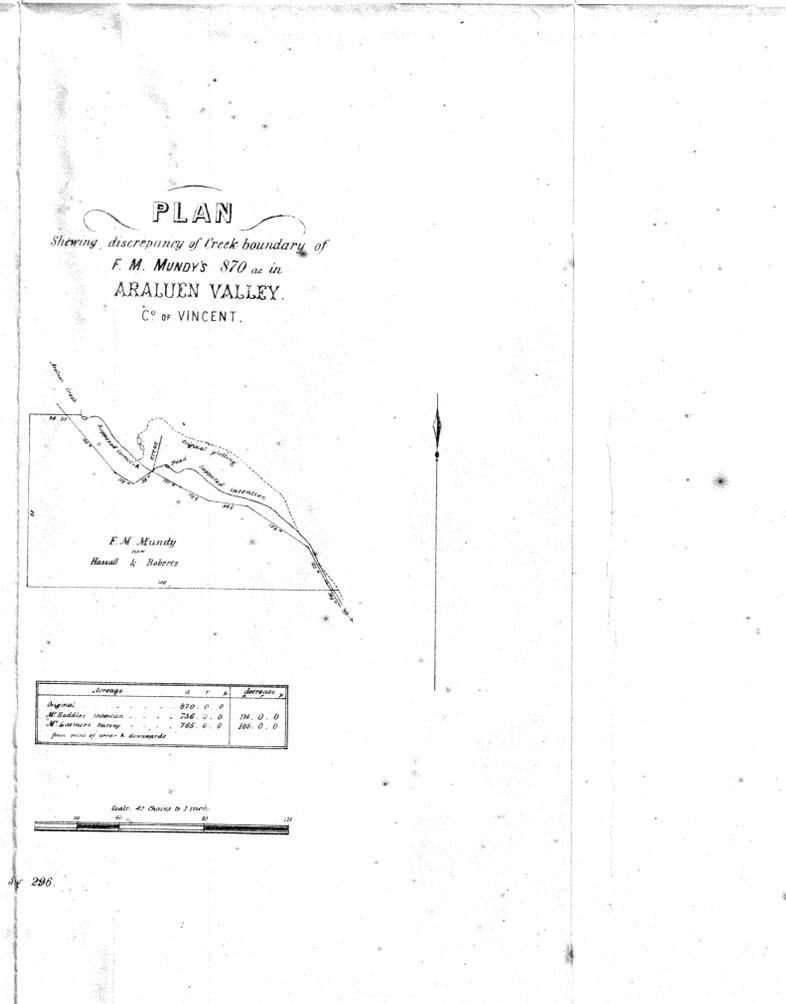

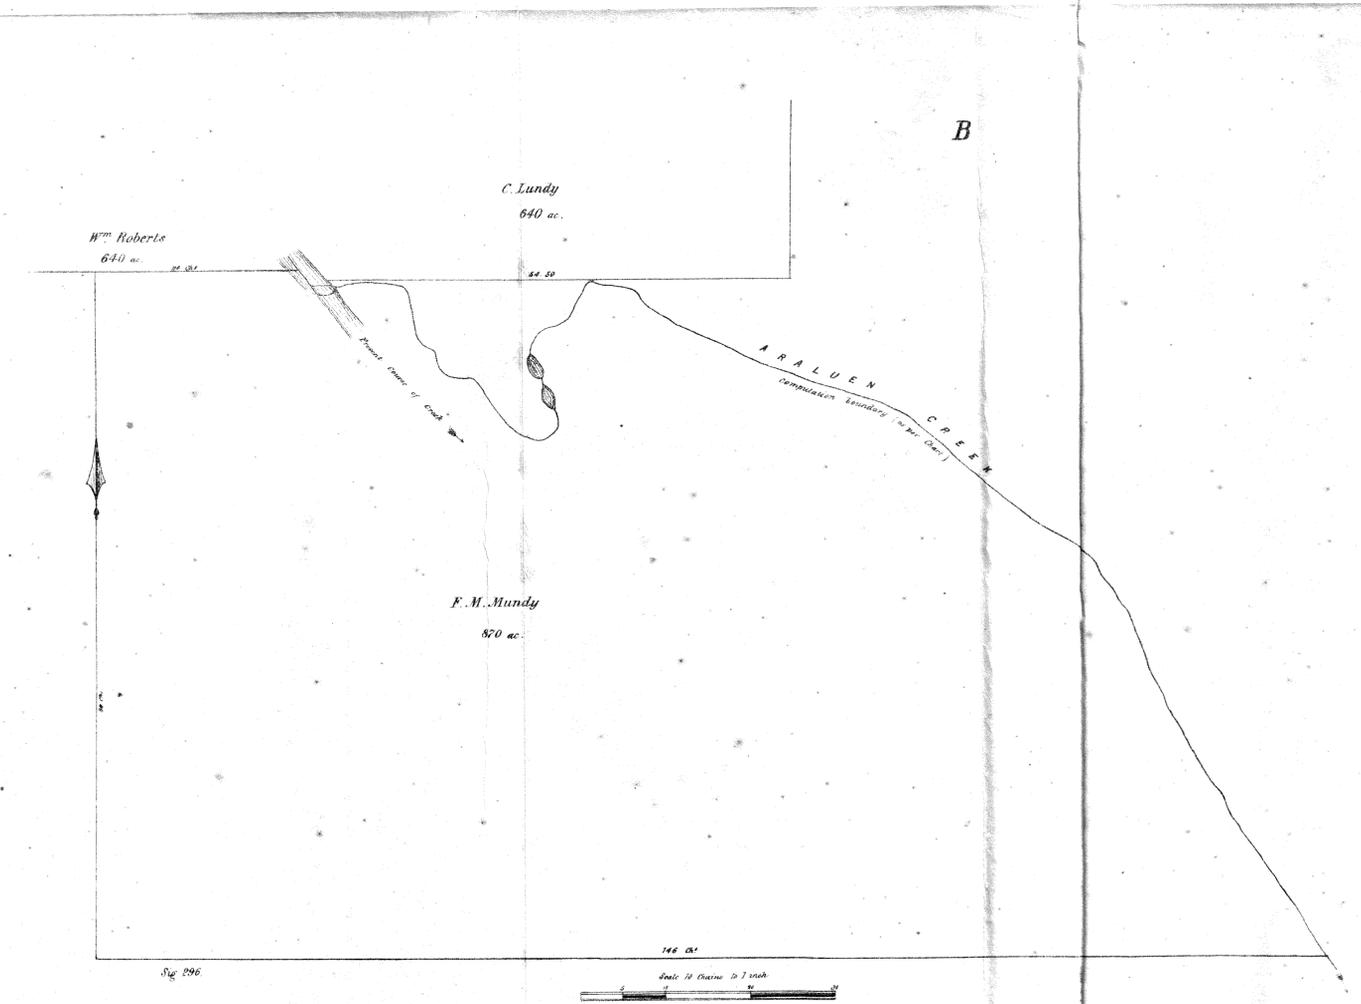

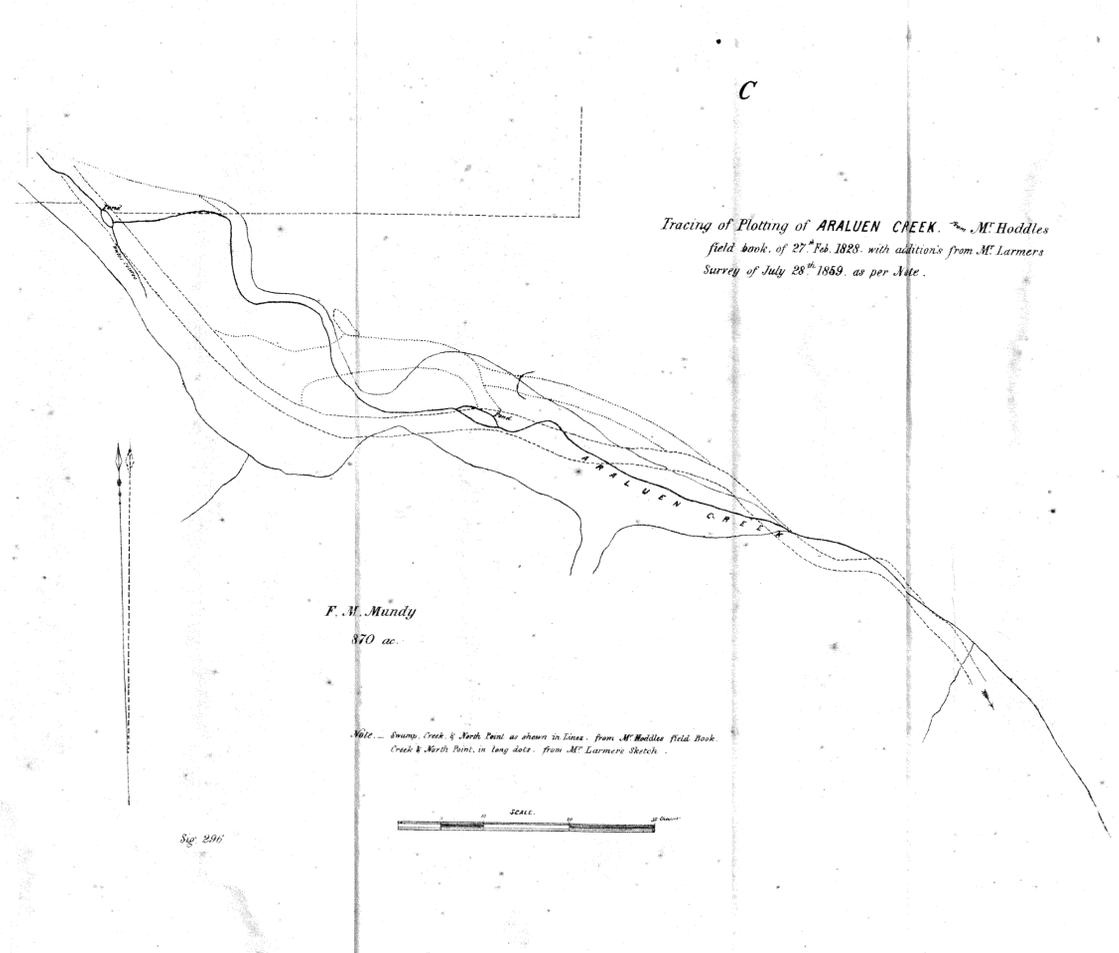

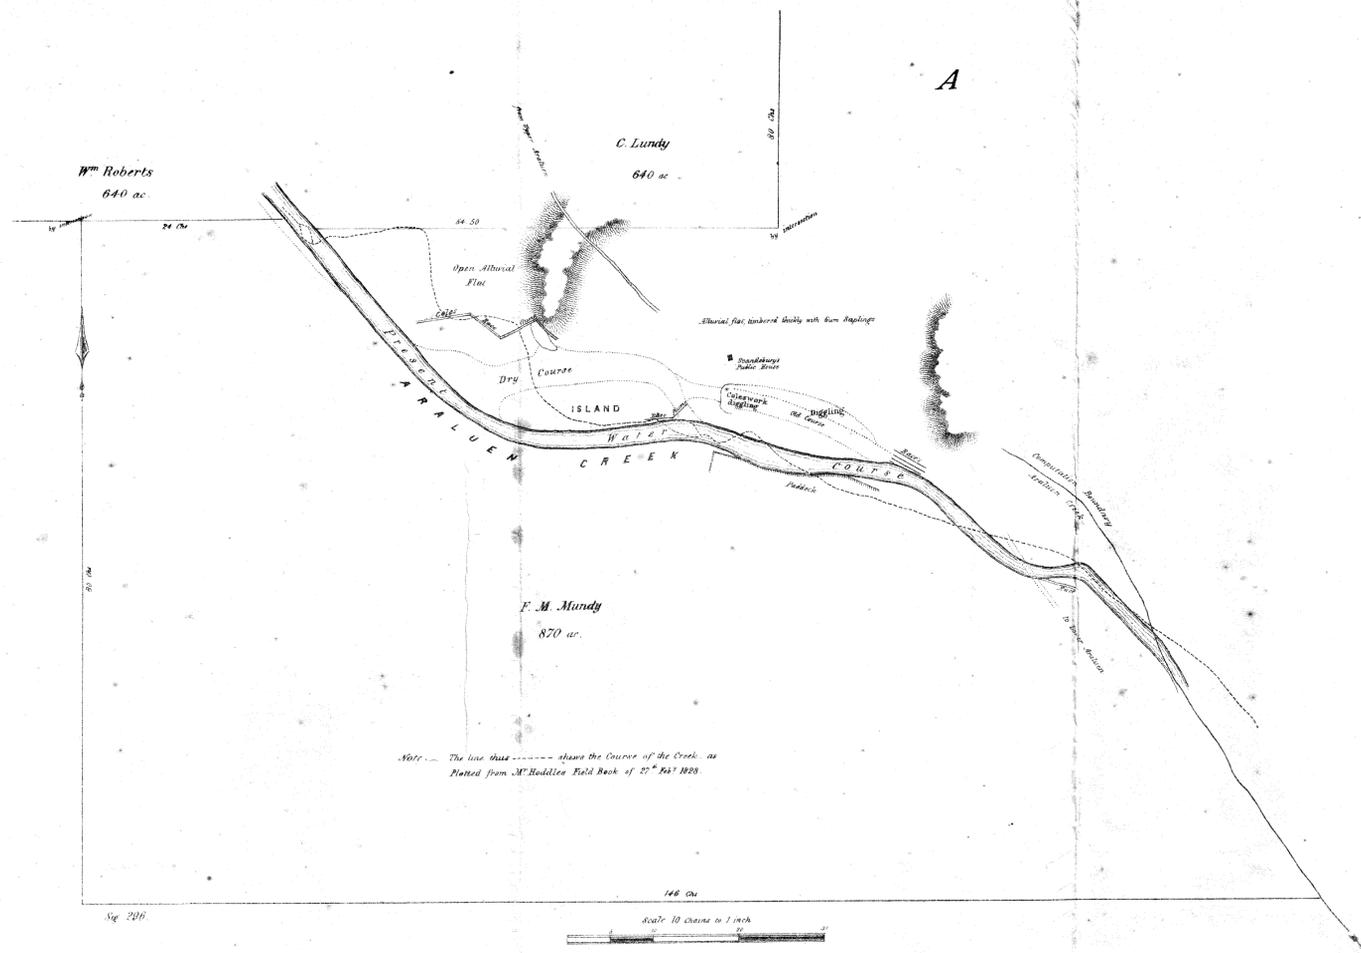

[Enclosure in No. 9.]

(A.)

ST. VINCENT—870 acres.

Bounded on the west by a section line south eighty chains, commencing one mile south of the south boundary of H. C. Burnell's grant; on the south by a line east one hundred and forty-six chains; on the east by Araluen Creek; and on the north by that creek and a section line west twenty-four chains; being the land sold as lot 31, in pursuance of advertisement of 19 May, 1835.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

ALLEGED INTERFERENCE WITH QUARTZ-
CRUSHING ENTERPRISE.

(PETITION FROM ADELONG GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 2 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned, Miners, Quartz-crushers, and Traders, residing on the Adelong Gold Fields,—

HUMBLY SHEWETH:—

That Messrs. Edwards Brothers and Channon, having been some considerable time engaged as Quartz-crushers on these diggings, were induced by the patronage they had received from your Petitioners to erect a much larger and more powerful machine (embodying all the recent improvements) on the Adelong Creek, to be driven by the water flowing over the dam (and not required for the uses) of a smaller one erected a few hundred yards higher up on the banks of the said creek.

That, on the machine being ready to start, a protest was entered by the proprietors of the other, stating that its operations would be prejudicial to their interests (a statement your Petitioners believe to be utterly untrue), upon which our Gold Commissioner ordered its dam to be cut away, and the consequences are the machine is now idle and your Petitioners deprived of the advantages it would afford.

That your Petitioners would respectfully inform your Honorable House the expenditure by Messrs. Edwards Brothers and Channon in the erection of the above machine was upwards of three thousand pounds sterling, which sum, from the cause above-named, is now lying dormant, and the fruits of their labor cast away.

That whereas our Gold Commissioner refused to allow the truth of the above protest to be examined into by the newly elected Local Court, composed of practical miners, and also rejected an offer on the part of Messrs. Edwards Brothers and Channon to guarantee the proprietors of the other machine against any loss resulting from their operations, and, for reasons best known to himself, chose rather to decide upon it in a summary manner, departing even from his usual practice of calling in assessors.

That your Petitioners humbly believe that such decision is both unjust and without precedent, and highly detrimental to the future prosperity of this Gold Field, beside inflicting undeserved loss upon three individuals amongst our oldest and most enterprising inhabitants.

2 ALLEGED INTERFERENCE WITH QUARTZ-CRUSHING ENTERPRISE.

Your Petitioners would humbly inform your Honorable House that water every day increases in value with them as a motive power, and it is consequently more than ever necessary to guard against such water becoming a monopoly of the few; yet this decision has rendered it so; by it the waste water that would have been instrumental in driving one of the largest machines on the creek has been, and is now, flowing uselessly down its channel, because the proprietors of another, one-sixth its power, though guaranteed against any loss, chose to persist in an unfounded protest, and because our Commissioner in this instance chose to act in direct opposition to the spirit evinced by your Honorable House in granting us the boon of a Local Court whose province it is to decide all such cases.

Your Petitioners would, therefore, humbly pray that your Honorable House will cause such inquiries to be made as would ascertain the truth of the statements contained herein, and will order to your Petitioners such relief as your Honorable House may deem fit.

And your Petitioners, as in duty bound, will ever pray, &c.

(Here follow 409 Signatures.)

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

EXPERIMENTAL QUARTZ-CRUSHING MACHINE.

(CORRESPONDENCE RESPECTING ESTABLISHMENT OF.)

Ordered by the Legislative Assembly to be Printed, 7 February, 1860.

RETURN to an *Address* from the Honorable the Legislative Assembly of New South Wales, to the Governor General, dated 2 February, 1860, praying that His Excellency would be pleased to cause to be laid upon the Table of this House,—

“ A Copy of all Correspondence held with the Government,
“ concerning the Establishment of an Experimental Quartz-
“ Crushing Machine at the Royal Mint.”

(*Mr. Wilson.*)

EXPERIMENTAL QUARTZ-CRUSHING MACHINE.

J. B. WILSON, ESQ., M.L.A., to THE SECRETARY FOR PUBLIC WORKS.

183, Macquarie street, Sydney,

7 November, 1859.

SIR,

I beg most respectfully to suggest to the Government the propriety of adopting measures to enable miners to have the auriferous quality of quartz tested at the Royal Mint. Owing to the facilities they already have at that establishment, I think it could be done at little trouble and expense; and it would tend greatly to promote the development of quartz reefs in the Colony, as reefs are being daily discovered, the value of which the gold miner has no means of determining. From half a ton to a ton of quartz might be tested at the Mint, the miner paying a small sum to cover the actual outlay.

Trusting that you will take the subject into your serious consideration,

I have, &c.,

J. BOWIE WILSON, M.L.A.,

Gold Fields South.

THE HONORABLE

THE SECRETARY FOR WORKS,
Sydney.

Minute.—The Master of the Mint will please report.

B. C. H. L.
7 Nov.

DEPUTY MASTER OF THE MINT to THE HONORABLE THE TREASURER.

Royal Mint, Sydney,

18 November, 1859.

SIR,

Referring to the suggestion contained in Mr. Wilson's letter of the 7th instant, on which I have been requested to report, I have the honor to make the following remarks:—

The operation of testing quartz is of a character so distinct from the usual operations of a Mint that the two cannot be performed in connection.

The crushing and washing of auriferous quartz must, if undertaken by the Government, be performed on separate premises, and with distinct machinery. The whole might, however, if adjacent to the Mint, receive the general superintendence of the department.

There is also reason to suppose, that quartz-crushing by the Government will be viewed by some as an interference with private enterprise. This objection may be met, without abandoning the idea, by limiting the amount of quartz receivable from any one individual, by charging a fee sufficiently above the market or remunerative rate, and so placing private enterprise out of reach of Government competition; while the work performed by the Government might be of a superior character, such as is not procurable out of doors, partaking more of the nature of an approximate assay of the quantity submitted to operation.

Arrangements for this purpose would, I am confident, have the effect of solving many of the difficulties which are now experienced in extracting gold from quartz, and would result in the more scientific application of labor to this description of enterprise.

The estimate enclosed has been prepared with this object in view.

The cost of erecting the necessary buildings and machinery being stated at £850, and the labor or working expenses at £5 15s. per ton.

I have, &c.,

E. W. WARD,

Deputy Master.

THE HONORABLE

THE COLONIAL TREASURER.

[Enclosure

[Enclosure to foregoing.]

Royal Mint,
15 November, 1859.

ESTIMATE for erecting a Room, and fitting up Machinery for crushing and testing Auriferous Quartz.

1. To erect a room, 24 feet × 20 feet, with brick walls, slate roof, and stone-flagged floor, including drains and water supply.....	£220	0	0
2. To a 3-horse high-pressure steam engine and boiler, with drawing gear, &c., complete	180	0	0
3. To a four-head stamping machine, with duplicate dies and stamps complete, and fixing.....	200	0	0
4. To an amalgamator, complete	100	0	0
5. To a reverbaratory furnace, complete.....	60	0	0
6. To a melting furnace, retort, and receiver... ..	16	0	0
7. Benches, shelves, tools, &c.	20	0	0
	796	0	0
Add for contingencies, say.....	54	0	0
	£850	0	0

ESTIMATE of the Expense for crushing two tons of Quartz, and extracting and assaying the Gold from the same, viz. :—

Six days for two men, at 10s.....	£6	0	0
Six days for lad	1	1	0
Two tons of coal for engine and furnace	2	9	0
Coke, charcoal, fluxes, &c.	0	10	0
Mercury	1	0	0
Sundries	0	10	0
Total £5 15s. per ton.	£11	10	0

J. T.

The Secretary for Public Lands will oblige the Colonial Treasurer by forwarding to the Commissioners on the various Gold Fields, a Circular, of which this is a copy.

S. S.

29 November, 1859.

The Under Secretary for Lands.

Urgent.—29. H. L.

Proceed accordingly. 7 December.

CIRCULAR addressed to the various Gold Commissioners, dated 5 December, 1860.

SIR,

It has been suggested to the Government that it is advisable to erect Quartz-Crushing Machinery, in connexion with the Branch of the Royal Mint, for the purpose of testing the value of auriferous Quartz, and devising the best method of extracting the precious metal from the matrix.

2. You will, at your earliest convenience, favor me with your opinion as to the advisability of adopting the suggestions referred to, and whether a supply of Quartz for any lengthened period can be expected from your district. The proposed establishment is intended entirely for experimental purposes, to aid in the development of the mineral resources of the country.

I have, &c.,

M. FITZPATRICK.

J.

EXPERIMENTAL QUARTZ-CRUSHING MACHINE.

J. BUCHANAN, ESQ., to THE UNDER SECRETARY OF LANDS.

*Gold Commissioner's Camp, Rocky River,
10 December, 1859.*

SIR,

With reference to your letter of the 5th instant, requesting my opinion on the advisability of erecting quartz-crushing machinery on the Gold Fields in connection with the Royal Mint, for the purpose of testing the quartz and extracting the precious metal from the matrix, I do myself the honor to inform you that so far as my district is concerned (the Northern Gold Fields generally, with the exception of the Nundle Diggings, over which I have no control) the proposed establishment appears to me to be unnecessary, as the whole of these Gold Fields are of a granite formation, and the quartz veins at present discovered are few in number and very limited in extent.

THE UNDER SECRETARY FOR LANDS,
Sydney.

I have, &c.,
J. BUCHANAN,
Gold Commissioner.

THE COMMISSIONER FOR THE WESTERN GOLD FIELDS to THE UNDER
SECRETARY FOR LANDS.

*Western Gold Fields' Office, Sofala,
13 December, 1859.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 5th instant, asking for my report on a suggestion for the erection of quartz-crushing machinery at the Royal Mint.

2. It seems to me that, by the skill and information which will be at the command of the Mint, a method of extracting gold from quartz far preferable to any at present, or likely to be, in operation in this district may in all probability be devised. So prominently would, in such case, the improved system come under the public notice, that it would generally be readily adopted, and thus the object in view, the development of the Gold Fields, would be most materially promoted.

3. With respect, however, to the probability of a supply of quartz from this district, there would, without doubt, be an ample supply for all experimental purposes were the machinery to be erected in one of several localities which I could suggest. But, I conclude that it is proposed to erect the machinery at the Mint in Sydney.

In this case, although I believe that quartz would be sent from different localities, to test rather the extracting process than the value of the quartz itself, I cannot undertake to say that a supply for any lengthened period could be counted on.

Those interested are indisposed to accept as a result, either as regards the material or process, an experiment on any quantity less than a ton. The expense of conveying this weight to Sydney is considerable, and that expense would only, I conceive, be incurred from a few general localities, and not from each particular reef or vein.

M. FITZPATRICK, ESQ.,
UNDER SECRETARY FOR LANDS.

I have, &c.,
HAROLD MACLEAN.

G. DOUGLASS, ESQ., to UNDER SECRETARY FOR LANDS.

*Nundle,
24 December, 1859.*

SIR,

In acknowledging your communication of the 15th instant, which requests me to forward to you my opinion as to the advisability of adopting certain suggestions offered to the Government on the subject of erecting quartz-crushing machinery, in connection with the Branch of the Royal Mint, in Sydney, for experimental purposes, "to aid in the development of the Mineral resources of the country."

I have the honor to state, that from the vast extent of auriferous quartz in various districts of New South Wales, the many imperial attempts at separating it without great loss
of

of the precious metal, and great and unnecessary outlay to the miner or miners possessing claims of it; the only partial success which attends the labor of parties using the best machinery at command on the diggings; the wholly undeveloped condition of the gold resources of this Colony, on account of the absence of all scientific media, which should infallibly obtain the wished for results; the very reasonable disinclination, of otherwise practical miners, to resolve themselves into small companies, for the purpose of extracting it, knowing that they must be losing the precious metal from ignorance—which has, thus far, been *the* incubus to our mineral prosperity, and, as a consequence, the utter refraining of capitalists, both in New South Wales and elsewhere, from investing money in quartz-crushing undertakings.

It is my opinion, that an establishment formed under authority, particularly in connection with the Branch of the Royal Mint, and solely for the purposes above referred to, is most advisable; would be regarded by the public at large in a light the most salutary in the interests of the gold fields; would be the means of adding greatly to the wealth of the country; possibly—with universal consent—to the augmentation of the revenue; and without a doubt would be the primary cause of imparting an impetus to other undertakings where machinery and scientific treatment would be found to be indispensable for the better discovery and preparing for the uses of commerce of the mineral ones known to exist in this great country.

I would also beg to add as my belief, that from the District of Nundle, a supply of auriferous quartz may be depended upon for years on years to come.

TO THE UNDER SECRETARY FOR LANDS,
&c., &c., &c.,
Sydney.

I have, &c.,
G. DOUGLAS,
A. C. C. L.

THE COMMISSIONER IN CHARGE OF THE SOUTHERN GOLD FIELDS *to* THE HONORABLE
THE SECRETARY FOR LANDS.

*Gold Commissioner's Office,
Goulburn, 2 January, 1860.*

SIR,

With reference to your letter of the 5th of December last, requiring an opinion as to the advisability of erecting quartz-crushing machinery, for experimental purposes, in Sydney, I do myself the honor to inform you that, on the Southern Gold Fields generally, where quartz veins have been developed, machinery of a superior description is already erected; and, as new discoveries will chiefly be made in the vicinity of the existing reefs, the means of testing quartz would be more easily available. The expense of carriage to Sydney would also much militate against the proposed establishment being made use of, even if there should be a supply of quartz, which I do not think at all probable.

THE HONORABLE THE
SECRETARY FOR LANDS,
Sydney.

I have, &c.,
P. L. CLOETE,
Commissioner in charge Southern Gold Fields.

1859-60.

Legislative Assembly.
NEW SOUTH WALES.

GOLD FIELDS.

(LETTER FROM COMMISSIONER CLOETE, RELATIVE TO KIANDRA.)

Ordered by the Legislative Assembly to be Printed, 9 May, 1860.

COMMISSIONER IN CHARGE OF SOUTHERN GOLD FIELDS to SECRETARY FOR LANDS.

Cooma, 1 May, 1860.

SIR,

Just previous to the receipt of your letter of the 18th of April last, I had written informing you on the subject of the Kiandra Gold Fields; the *entire* responsibility of their management having now, however, been placed upon me, I have the honor to state the steps that I intend to take, subject to your approval, in order that to the best of my ability the requirements of the service may be properly carried out.

2. From all the communications received from the Commissioners at Kiandra, from the most authentic information obtainable by myself, and from the opinion I had formed consequent on such information, I did not think at that time that any persons would determine on wintering at this Gold Field; and therefore did not provide the accommodation necessary for the stationing of an officer until the next spring, when more permanent and efficient arrangements could be made. The uncertainty consequent on the lateness of the season made me also cautious in advising the expenditure of money for this purpose. Under these circumstances, therefore, I think it would be hardly fair for me now to order any Commissioner to remain there. Finding now, however, that many persons, probably from five to 500 six hundred, intend remaining at Kiandra and its immediate vicinity during the winter, and 600 feeling also anxious, rather, *personally* to undertake every responsible duty devolving on me, I have determined on *myself* remaining at Kiandra for the winter. With this intention I have left instructions for the laying in of sufficient supplies, and I am now on my way to Goulburn to complete official arrangements. I intend also to inform the Commissioners at Adelong, Braidwood, and Tuena, that they are until further orders to report to you, and to forward their accounts, &c., direct to Sydney.

3. Mr. Lockhart and Mr. Clarke remain at Kiandra until my return there, which I informed them would be in three weeks; Mr. Lockhart will then return to Tumut, and Mr. Clarke to "Russell's." My presence at Kiandra will perhaps give an additional security to the storekeepers and others remaining there; and I can, as far as the weather will permit, attend to any winter diggings that may be found; at the same time having the advantage of being on the spot at the earliest "rush" next spring. I expect then a very large population, probably 20,000 persons.

0,000.

4. On the "Table Top," or "Nine Mile Rush," about 200 diggers will, I think, 200 remain, or rather attempt to remain. On the "Eucumbene," near Chalker's, about 20 miles south from Kiandra, some parties have already commenced to work, and are making from

15s. to £1 per day each, though with most imperfect arrangements. At the Umaralla, about 18 miles from Cooma, in the direction of Braidwood, many of the diggers returned from Kiandra are, I am informed, working. This field I shall visit to-morrow, on my way.

5. With reference to roads, and other means of communications, I have made the following arrangements:—

On the Tumut side, bridging the principal creek near the diggings, and works necessary to render the worst swamps passable, are now in progress; the money allowed, however, will not admit of sufficient being done for the whole road, nor would I advise any more being spent on it until next summer. For the Cooma Road, I had requested the Bench of Magistrates at Cooma to commence the required repairs, on receiving the intimation from you that a sum for that purpose had been granted; finding on my arrival that nothing had been done, I at once contracted for a bridge over the main river near Kiandra, which will be finished in a fortnight; and the draining and bridging of the swamps between Russell's and Kiandra, as far as the money will allow, are also in progress. The Telegraph and Guide Posts are being erected; and on one crossing of the river near "Russell's," I have allowed a punt to be built by a private individual. On the other crossing, on the Cooma side, a substantial bridge is being built, to be finished in three weeks. On this the builder is to charge a certain toll, the scale of which has been fixed by myself; I have allowed this right for thirteen months. I was not aware that I had authority to do this; but my object was to provide immediate and secure communication. The line of road will, I think, be much altered next summer. I have also offered twenty pounds for the complete marking of a track from the "Table Top" to "Chalker's," on the main road to Cooma, having been informed that such a track could be found, which by taking a leading range will avoid all swamps and creeks, and be also practicable during any but the most severe snow storms.

6. I would recommend the appointment of Mr. Dawson, the Police Magistrate of Cooma, as Gold Receiver; for although the Escort during the winter may be abolished, gold may yet be required to be forwarded by the Patrol from hence to Goulburn.

7. I should feel obliged by your replying to this to me at Goulburn, at your earliest convenience, as, should you approve of my intended arrangements, I should wish to be in Sydney for two days, in order to make such provision in money and other matters as my probable long absence will require.

I have, &c.

P. L. CLOETE,

Commissioner in Charge,

Southern Gold Fields.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

GOLD FIELDS.

(LETTER FROM CAPTAIN ZOUCH RESPECTING POLICE ARRANGEMENTS FOR KIANDRA.)

Ordered by the Legislative Assembly to be Printed, 10 May, 1860.

Cooma, 4 May, 1860.

SIR,

I have the honor to communicate to you that I have made the following arrangements for the stationing and maintaining of Detachments of Patrol at the under-mentioned places, namely:—

2. At Kiandra, procured good quarters in the town, and laid in provisions for five months, commencing 1st May, for number of men specified in margin. One Inspector, one Sergeant, six men of foot patrol.

At Russell's, got accommodation, provisions, and forage for men and horses, as per margin. Three mounted, and three dismounted men.

At Cooma, rented stabling and quarters, and procured forage, and the use of a paddock. Three mounted men.

At Queanbeyan, rented small cottage, and got the use of the stable attached to the present Court House there. Three mounted men.

At all these places quarters are in course of erection, to be finished within eight weeks.

3. Finding that Bombala was some miles out of any direct line of thoroughfare, from the coast to the diggings, I have withdrawn the men from there, and would recommend their being stationed at or near Bibbinduke, the junction of the Eden and Merimbula roads. A detachment, however, need not be placed there before the Spring, the traffic being now but small, and will soon cease. In the meantime this detachment will be, and are at present, employed in escorting gold and patrol duty between Russell's, Kiandra, and Cooma.

4. I consider it absolutely necessary, for the security of the escort, owing to the distance and badness of the road from hence to Russell's, that a station be formed midway; and suggest that instructions be given to that effect to Mr. Moore, Clerk of Works. A tender, to erect suitable buildings of slabs, has been sent me, for £120. 42 miles. On Frying-pan Creek, at the Stockyard.

5. At Micalago and Bibbinduke I propose making arrangements with the proprietors to get the detachments quartered on the stations, with the use of a paddock, thereby saving the expense of buildings. It will be necessary to form another patrol station at a point between Bibbinduke and Russell's, but will not be occupied before Spring; the most eligible place I will find out and report to you.

6. On the Tumut side, at Yarrangobilly, 25 miles from Kiandra and 35 from Tumut, I have two men building quarters, to be finished in six weeks from this time. I purpose occupying this place early in Spring by a party of three mounted and one dismounted man, being the most direct and principle approach to Kiandra from the Murrumbidgee Districts. Three mounted and one dismounted man.

7. I will further report as to the requirements for police protection on the road from Albury to Tumberumba and Lob's Hole.

8. From all I can glean and have heard, and I have lost no opportunity of acquiring reliable information from the best sources, I am satisfied that the rush in the Spring, especially from Victoria, will far exceed anything we have hitherto had in New South Wales. Fifty thousand. I believe at the very lowest we shall have fifty thousand (50,000) diggers by Christmas.

9. There is a very remarkable feature connected with Kiandra as a gold field; every returning digger on his way home, no matter how many hundreds you ask, whether fortunate or otherwise, the same invariable answer comes, "I'll be back in the Spring; its a fine place, "and there's plenty of gold." This is an unusual thing amongst diggers, even when speaking of some of the richest fields there are numerous grumblers. I am not the only person that has noticed this, though I believe I was one of the first to mention it.

10. When I left Kiandra, on Sunday evening last, all was as it should be, and the same at Russell's, and on the road; no reports or *rumours* whatever. The number of diggers I estimated at about 1,000, and few fresh arrivals.

I have, &c.,

HY. ZOUCH,
Supt. Mounted Patrol and Gold Escorts,
Southern Road.

THE INSPECTOR GENERAL OF POLICE.

Legislative Assembly.
NEW SOUTH WALES.

SEPARATION OF MORETON BAY.
(DESPATCH IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 11 October, 1859.

W. DENISON,
Governor General.

Message No. 4.

The Governor General lays before the Legislative Assembly a copy of a Despatch with which he has been honored by the Secretary of State, enclosing copies of the Order in Council for carrying into effect the Separation of Moreton Bay from New South Wales. The originals of these documents are entrusted to Sir George Bowen, who has been appointed Governor of the Colony of Queensland.

Under the circumstances disclosed in this Despatch, the Governor General concludes that it will not now be considered necessary that the Resolutions passed by the Legislative Assembly on the 4th instant should be forwarded to the Secretary of State.

Government House,
11 October, 1859.

THE SECRETARY OF STATE FOR THE COLONIES, to GOVERNOR SIR W. DENISON.

(No. 11.)

Downing-street,
18 August, 1859.

SIR,

With reference to former correspondence on the subject of the projected Separation of Moreton Bay from the Colony of New South Wales, I have to inform you that Her Majesty's late Government having determined on effecting that measure, Instruments were passed for the purpose, of which I now annex printed copies, namely, a Warrant for passing Letters Patent to create the Colony of Queensland, and appointing Sir G. Ferguson Bowen Governor thereof; Instructions to accompany these Letters Patent; and an Order in Council to constitute a Legislature, and provide for the Administration of Justice.

The boundary of the New Colony, as defined by the Letters Patent, is the same which was finally proposed by yourself, after much discussion, in your Despatch No. 2, of the 2nd January, 1858.

Any further alteration of the boundary can only, as I apprehend, be effected by consent of the two separate Colonies, which would apparently require the authority of Parliament to confirm it.

The delimitation of boundary thus made leaves some questions unsettled, and in particular that regarding the district immediately to the west of South Australia, which is thought to be at present within the geographical limits of New South Wales.

But these may perhaps await, without inconvenience, the decision which may be suggested in the proper progress of colonization.

The Political Constitution which is given by these Instruments to the New Colony of Queensland resembles, as nearly as may be, that already existing in New South Wales.

This is rendered necessary by the terms of the Act of Parliament confirming the New South Wales Constitution Act.

It has, however, not been deemed necessary to insert those provisions which are contained in the latter Act for the establishment of Responsible Government. This omission was sanctioned by the Law Advisers of the Crown. It was thought that these provisions, if not strictly necessary, would probably in practice be found inconvenient. Responsible Government in the North American Colonies rests on usage, and not on positive law. But you will fully understand that it is no part of the policy of Her Majesty's Government to withhold, or to delay, its establishment. Whenever the Legislature of the New Colony wish for its inauguration the necessary measures can be taken without waiting for any further approval from Home. With this view, I shall take care to inform those gentlemen who may be selected for the Offices of Colonial Secretary and Colonial Treasurer, which are placed on the Civil List, that they hold their offices subject to dismissal on an adverse vote of the Legislature, and without any right to pension.

The only permanent officers on the Civil List will be the Governor and the Judge. As to the latter functionary, I am placed in some difficulty, by not fully understanding the position in which the gentleman who now occupies the Bench in Moreton Bay is legally placed with reference to the contingent separation of the Colony. The Order in Council contains a provision specially directed to this subject—maintaining in force the existing Judge's Commission, if such a Commission exists.

Any further measures must be taken by the future Legislature.

The sum devoted in the Civil List to Public Worship has been calculated, as well as Her Majesty's Government were able to do so from the materials before them, to cover the existing appropriation for this purpose in the District of Moreton Bay.

You will observe that the Order in Council casts on yourself the very important duty of inaugurating the new Colony, by appointing the Legislative Council, and summoning the first Legislative Assembly. When these functions have been for the first time performed by yourself they will afterwards devolve on the Governor of the New Colony. The Instruments—copies of which are now sent you for information only—are to take effect only when the Letters Patent have been received, and published, both in New South Wales and in Queensland itself. No separation takes place until that solemn act is performed.

The Instruments will be taken out by Sir George Bowen, the Governor of Queensland, who will (according to his present intentions) leave England in the course of September. You will advise with him, as soon as he shall arrive, as to the proper time and circumstances of their publication.

It remains that I should inform you of what has passed, and of the intentions of Her Majesty's Government respecting the division of the Public Debt between the two Colonies.

In your Despatch No. 6, of the 7th of January, 1858, you enclosed a Bill for effecting this division, which had been introduced into the Legislature, but not proceeded with; and you informed my predecessor, at the same time, that you were "of opinion that it would be in every way better that Her Majesty's Government should at once take upon itself the decision of the question."

This proposal, on your part, has undergone much consideration. But, on the whole, Her Majesty's Government have judged it better to decline acting on it—at least for the present. They have felt that the business of dividing the Debt was one of a strictly domestic nature—belonging at least in the first instance to the New South Wales Legislature, conjointly with that about to be established in Queensland—and they were of opinion that it could not justly be inferred that the New South Wales Legislature would absolutely refuse to execute it, merely from the circumstance that a Bill introduced for the purpose had fallen through—perhaps from temporary political circumstances only. At all events they considered it their
duty

duty to appeal more distinctly and more fully to that Legislature, inviting it to co-operate in a task which, when the separation of the Colonies is legally accomplished, will become unavoidable. Should the Colonial Legislatures after all decline, there will then be a strong reason made out for Parliamentary interference.

I have to instruct you, therefore, to call the attention of the Legislature to this subject as early as possible. The Bill introduced by Mr. Cowper will furnish materials. It appears to me, that the measure might be made more practically convenient, by giving the Commissioners somewhat greater latitude as to the mode of estimating the liabilities. The plan of appointing a Commission from each Colony, with power to name an arbitrator, seems to me reasonable.

But these are details on which the Legislatures of the two Colonies are best fitted to decide.

In the meantime—(as, according to this project, the separation must take place by publication of the Instruments, and the Legislature of the New Colony must be convoked before the division of the debt can be effected)—there can be no serious difficulty in a temporary arrangement for the repartition of the interest of the Debt, during the short period which may elapse between that separation and the passing of the necessary law, whether that be ultimately done by the Colonial Legislature or by Parliament. It is to be desired that the separation should take place, with no further delay than may be actually requisite for the completion of necessary preliminaries. It will be desirable that the Crown should possess the power of subdividing further the Territory now erected into the Colony of Queensland, by detaching from it such northern portions as may hereafter be found fit to be erected into separate Colonies.

I presume, (but without having, as yet, taken legal opinions on the subject,) that the Crown having now exercised the power of division conferred on it by the New South Wales Constitutional Act, any such further division can only be effected under further authority from Parliament. But there will be time enough to take the necessary steps for this purpose whenever I shall have received intelligence of the publication of the Instruments, and of the measures taken in regard to the Debt.

You will receive a further Despatch accompanying the Instruments, when transmitted as usual in such cases. But it has appeared to me that some advantage might be gained in this instance through a departure from the ordinary course, by informing you beforehand of the nature of their contents.

I have, &c.,
NEWCASTLE.

GOVERNOR

SIR W. DENISON, K. C. B.,
&c., &c., &c.

1859.

Legislative Assembly.
NEW SOUTH WALES.

SEPARATION OF MORETON BAY.

(LETTERS PATENT, &c., IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 29 November, 1859.

W. DENISON,
Governor General.

Message No. 8.

The Governor General lays before the Legislative Assembly a copy of the Letters Patent erecting Moreton Bay into a Colony, under the name of Queensland, and for appointing Sir George Ferguson Bowen, K.C.M.G., to be Captain-General and Governor-in-Chief of the same. Also, a copy of the Order in Council empowering the Governor of Queensland to make Laws and provide for the Administration of Justice in the said Colony.

Under the provisions of this latter document certain duties have been imposed upon the Governor of New South Wales.

In accordance with the directions contained in a Despatch from the Secretary of State, a copy of which was laid before the Legislative Assembly on 11th October last, no separation is to take place until these Letters Patent have been published both in New South Wales and Queensland. The Governor General has, therefore, given directions for the publication of these Letters Patent, and for notifying the fact that from and after the 1st December now next ensuing the Legislative authority of Governor and Legislature of New South Wales, and the power of such Governor over the Territories comprised in the said Colony of Queensland, and over the Revenue thereof, will cease.

Government House,
29 November, 1859.

QUEENSLAND.

LETTERS PATENT erecting Moreton Bay into a Colony, under the name of QUEENSLAND, and appointing SIR GEORGE FERGUSON BOWEN, K.C.M.G., to be Captain General and Governor-in-Chief of the same.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, to Our trusty and well-beloved SIR GEORGE FERGUSON BOWEN, Knight, Commander of Our most distinguished Order of St. Michael and St. George,—greeting.

WHEREAS, by a reserved Bill of the Legislature of New South Wales, passed in the seventeenth year of Our reign, as amended by an Act passed in the Session of Parliament holden in the eighteenth and nineteenth years of Our reign, entitled, "*An Act to enable Her Majesty to assent to a Bill, as amended, of the Legislature of New South Wales, to confer*

“ a Constitution on New South Wales, and to grant a Civil List to Her Majesty,” it was enacted that nothing therein contained should be deemed to prevent Us from altering the boundary of the Colony of New South Wales on the north, in such manner as to Us might seem fit ; and it was further enacted by the said last recited Act, that if We should at any time exercise the power given to Us by the said reserved Bill of altering the northern boundary of Our said Colony, it should be lawful for Us, by any Letters Patent, to be from time to time issued under the Great Seal of Our United Kingdom of Great Britain and Ireland, to erect into a separate Colony or Colonies any territories which might be separated from Our said Colony of New South Wales by such alteration as aforesaid of the northern boundary thereof, and in and by such Letters Patent, or by Order in Council, to make provision for the Government of any such separate Colony, and for the establishment of a Legislature therein, in manner as nearly resembling the form of Government and Legislature which should be at such time established in New South Wales as the circumstances of each separate Colony would allow, and that full power should be given by such Letters Patent or Order in Council to the Legislature of such separate Colony to make further provision in that behalf : Now know you, that We have, in pursuance of the powers vested in Us by the said Bill and Act, and of all other powers and authorities in Us in that behalf vested, separated from Our Colony of New South Wales, and erected into a separate Colony, so much of the said Colony of New South Wales as lies northward of a line commencing on the sea coast at Point Danger, in latitude about 28° 8' south, and following the range thence which divides the waters of the Tweed, Richmond, and Clarence Rivers from those of the Logan and Brisbane Rivers, westerly, to the great dividing range, between the waters falling to the east coast and those of the River Murray ; following the great dividing range southerly to the range dividing the waters of Tenterfield Creek from those of the main head of the Dumaresq River ; following that range westerly to the Dumaresq River ; and following that river (which is locally known as the Severn) downward to its confluence with the Macintyre River ; thence following the Macintyre River, which, lower down, becomes the Barwan, downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all and every the adjacent Islands, their members and appurtenances, in the Pacific Ocean : And do by these presents separate from Our said Colony of New South Wales and erect the said Territory so described into a separate Colony, to be called the Colony of Queensland.

And whereas We have by an Order made by Us in Our Privy Council, bearing even date herewith, made provision for the government of Our said Colony of Queensland, and We deem it expedient to make more particular provision for the government of Our said Colony : Now know you, that We, reposing especial trust and confidence in the prudence, courage, and loyalty of you, the said Sir George Ferguson Bowen, of Our especial grace, certain knowledge, and mere motion, have thought fit to constitute and appoint, and do by these presents constitute and appoint you, the said Sir George Ferguson Bowen, to be, during Our will and pleasure, Our Captain General and Governor-in-Chief in and over Our said Colony of Queensland, and of all forts and garrisons erected and established, or which shall be erected and established within Our said Colony, or in its members and appurtenances : And We do hereby authorise, empower, require, and command you, the said Sir George Ferguson Bowen, in due manner to do and execute all things that shall belong to your said command, and the trust We have reposed in you, according to the several powers, provisions, and directions granted or appointed you by virtue of Our present Commission, and of the said recited Bill, as amended by the said recited Act ; and according to Our Order in Our Privy Council, bearing even date herewith, and to such Instructions as are herewith given to you, or which may from time to time hereafter be given to you, under Our Sign Manual and Signet, or by Our Order in Our Privy Council, or by Us, through one of Our Principal Secretaries of State ; and according to such laws and ordinances as are now in force in Our said Colony of New South Wales and its dependencies, and as shall hereafter be in force in Our said Colony of Queensland.

2. And whereas it is ordered by Our said Order, made by Us in Our Privy Council, bearing even date herewith, that there shall be within Our said Colony of Queensland a Legislative Council and a Legislative Assembly, to be severally constituted and composed in
the

the manner in the said Order prescribed ; and that We shall have power, by and with the advice and consent of the said Council and Assembly, to make laws for the peace, welfare, and good government of Our said Colony in all cases whatever : And it is provided by the above recited Act, that the provisions of the Act of the fourteenth year of Her Majesty, chapter fifty-nine, and of the Act of the sixth year of Her Majesty, chapter seventy-six, intituled, "*An Act for the Government of New South Wales and Van Diemen's Land,*" which relate to the giving and withholding of Her Majesty's assent to Bills, and the reservation of Bills for the signification of Her Majesty's pleasure thereon, and the instructions to be conveyed to Governors for their guidance in relation to the matters aforesaid, and the disallowance of Bills by Her Majesty, shall apply to Bills to be passed by the Legislative Council and Assembly, constituted under the said Reserved Bill and Act, and by any other Legislative body or bodies which may at any time hereafter be substituted for the present Council and Assembly : Now We do, by virtue of the powers in Us vested, hereby require and command, that you do take especial care that in making and passing such laws, with the advice and consent of the said Legislative Council, and Legislative Assembly, the provisions, regulations, restrictions, and directions contained in the said Acts of Parliament, and in Our said Order made in Our Privy Council, bearing even date herewith, and in Our Instructions under Our Sign Manual, accompanying this Our Commission, or in such future Orders as may be made by Us in Our Privy Council, or in such further Instructions under Our Sign Manual and Signet as shall at any time hereafter be issued to you in that behalf, be strictly complied with.

3. And whereas it is expedient that an Executive Council should be appointed to advise and assist you, the said Sir George Ferguson Bowen, in the Administration of the Government of Our said Colony : Now We do declare Our pleasure to be, that there shall be an Executive Council for Our said Colony, and that the said Council shall consist of such persons as you shall, by instruments to be passed under the Great Seal of Our said Colony in Our name and on Our behalf, from time to time, nominate and appoint to be Members of the said Executive Council, all which persons shall hold their places in the said Council during Our pleasure : But we do expressly enjoin and require that you do transmit to Us, through one of Our Principal Secretaries of State, exemplifications of all such instruments as shall be by you so issued for appointing the Members of the said Council.

4. And we do hereby authorize and empower you, the said Sir George Ferguson Bowen, to keep and use the Great Seal of Our said Colony for sealing all things whatsoever that shall pass the Great Seal of Our said Colony.

5. And we do hereby give and grant to you, the said Sir George Ferguson Bowen, full power and authority, by and with the advice of the Executive Council, to grant, in Our name and on Our behalf, any waste or unsettled lands in Us vested within Our said Colony, which said grants are to be passed and sealed with the Great Seal of Our said Colony, and being entered upon record by such public officer or officers as shall be appointed thereunto, shall be effectual in law against Us, Our Heirs or Successors : Provided nevertheless, that in granting and disposing of such lands you do conform to and observe the provisions in that behalf contained in any law which is or shall be in force within Our said Colony, or within any part of Our said Colony, for regulating the sale and disposal of such lands.

6. And We do hereby give and grant unto you, the said Sir George Ferguson Bowen, full power and authority, as you shall see occasion, in Our name and on Our behalf, to grant to any offender convicted of any crime in any Court, or before any Judge, Justice, or Magistrate within Our said Colony, a pardon, either free, or subject to lawful conditions, or any respite of the execution of the sentence of any such offender, for such period as you may seem fit, and to remit any fines, penalties, or forfeitures which may become due and payable to Us, but subject to the regulations and directions contained in the Instructions under Our Royal Sign Manual and Signet accompanying this Our Commission, or in any future Instructions as aforesaid.

7. And We do hereby give and grant unto you, the said Sir George Ferguson Bowen, full power and authority, upon sufficient cause to you appearing, to suspend from the exercise of his office, within Our said Colony, any person exercising any office or place under, or by virtue of, any Commission or Warrant granted, or which may be granted by
Us,

Us, or in Our name, or under Our authority, which suspension shall continue and have effect only until Our pleasure therein shall be made known and signified to you: And We do hereby strictly require and enjoin you, in proceeding to any such suspension, to observe the directions in that behalf given to you by Our present or any future Instructions as aforesaid.

8. And in the event of the death or absence of you, the said Sir George Ferguson Bowen, out of Our said Colony of Queensland and its Dependencies, We do hereby provide and declare Our pleasure to be, that all and every the powers and authorities herein granted to you shall be, and the same are hereby vested in such person as may be appointed by Us, by Warrant under Our Sign Manual and Signet, to be our Lieutenant Governor of Our said Colony, or in such person or persons as may be appointed by Us, in like manner, to administer the Government in such contingency; or, in the event of there being no person or persons within Our said Colony so commissioned and appointed by Us as aforesaid, then Our pleasure is, and We do hereby provide and declare, that in any such contingency the powers and authorities herein granted to you shall be, and the same are hereby granted to the Colonial Secretary of Our said Colony for the time being, and such Lieutenant-Governor, or such person or persons as aforesaid, or such Colonial Secretary, as the case may be, shall exercise all and every the powers and authorities herein granted, until Our further pleasure shall be signified therein.

9. And we do hereby require and command all Our Officers and Ministers, Civil and Military, and all other the inhabitants of Our said Colony of Queensland, to be obedient, aiding, and assisting unto you, the said Sir George Ferguson Bowen, or, in the event of your death or absence, to such person or persons as may, under the provisions of this Our Commission, assume and exercise the functions of Captain General and Governor-in-Chief of Our said Colony.

10. And We do declare that these presents shall take effect so soon as the same shall be received and published in the said Colonies.

(L. S.)

ORDER IN COUNCIL empowering the Governor of Queensland to make Laws, and to provide for the Administration of Justice in the said Colony.

At the Court at Buckingham Palace, the 6th day of June, 1859,—

Present:—

THE QUEEN'S MOST EXCELLENT MAJESTY, in Council.

WHEREAS by an Act passed in the Session of Parliament holden in the eighteenth and nineteenth years of the reign of Her Majesty, entitled "*An Act to enable Her Majesty to assent to a Bill, as amended, of the Legislature of New South Wales, to confer a Constitution on New South Wales, and to grant a Civil List to Her Majesty,*" it was, amongst other things, enacted, that it should be lawful for Her Majesty, by Letters Patent, to be from time to time issued under the Great Seal of the United Kingdom of Great Britain and Ireland, to erect into a separate Colony or Colonies any territories which might be separated from New South Wales by such alteration as therein was mentioned, of the northern boundary thereof; and in and by such Letters Patent or by Order in Council to make provision for the Government of any such Colony, and for the establishment of a Legislature therein, in manner as nearly resembling the form of Government and Legislature which should be at such time established in New South Wales as the circumstances of such Colony will allow, and that full power should be given in and by such Letters Patent or Order in Council to the Legislature of the said Colony to make further provision in that behalf: And whereas Her Majesty hath, by an Order in Council bearing date the thirteenth day of May, one thousand eight hundred and fifty-nine, approved the draft of certain Letters Patent for separating, in exercise of the powers thus vested in Her Majesty, certain territories from New South Wales, and for erecting the said territories into a new Colony, by the name of the Colony of Queensland; Her Majesty by virtue of the powers vested in Her
by

by the said recited Act, and by and with the advice of Her Privy Council, is pleased to order, and doth hereby order, that there shall be within the said Colony of Queensland a Legislative Council and Legislative Assembly.

2. And it is hereby declared and ordered, that within the said Colony of Queensland Her Majesty shall have power, by and with the advice and consent of the said Council and Assembly, to make Laws for the peace, welfare, and good government of the Colony, in all cases whatsoever : Provided that all Bills for appropriating any part of the Public Revenue, for imposing any new rate, tax, or impost, subject always to the limitations hereinafter provided, shall originate in the Legislative Assembly of the said Colony. Legislative Council and Assembly constituted.

3. For the purpose of composing the Legislative Council of Queensland, the Governor of New South Wales is hereby authorized to summon, in Her Majesty's name, by an instrument or instruments under the Great Seal of the said Colony, such persons, not being fewer than five, as the said Governor shall think fit; and the Governor of Queensland is hereby authorized in like manner, after the first meeting of the Council and Assembly as hereinafter provided, to summon from time to time to the said Legislative Council such other person or persons as he shall think fit; and every person who shall be so summoned shall thereby become a Member of the Legislative Council of the said Colony: Provided always, that no person shall be summoned to the said Legislative Council who shall not be of the full age of twenty-one years, and a natural born subject of Her Majesty, or naturalized by an Act of the Imperial Parliament, or by an Act of the Legislature of New South Wales, before the separation, or by an Act of the said Colony: Provided also, that not less than four-fifths of the Members so summoned to the Legislative Council shall consist of persons not holding any office of emolument under the Crown, except officers of Her Majesty's sea and land forces on full or half pay, or retired officers on pensions. Legislative Council how to be summoned.

4. The Members of the first Legislative Council of the said Colony who shall be so summoned by the Governor of New South Wales, shall hold their respective Seats therein for five years, from the date of the first summonses to the said Legislative Council; but all future Members of the said Legislative Council who shall be summoned thereto by the Governor of Queensland, shall hold their Seats therein for the term of their natural lives, subject, nevertheless, to the provisions hereinafter contained for vacating the same, and for altering and amending the future constitution of the said Colony, as established by this Act. Duration of office of Legislative Councillors.

5. For the purpose of constituting the Legislative Assembly of the said Colony of Queensland, it shall be lawful, in the first instance, for the Governor of New South Wales, within the time hereinafter mentioned, and thereafter for the Governor of Queensland, from time to time, as occasion shall require, in Her Majesty's name, by an instrument or instruments under the Great Seal of the Colony, to summon and call together a Legislative Assembly in and for the said Colony. Legislative Assembly.

6. The Governor of New South Wales is hereby authorised, by Proclamation, to fix the number of Members of which the said Assembly shall be composed; and also, by such Proclamation as aforesaid to make all necessary provisions for dividing the said Colony into convenient electoral districts, and for the compilation and revision of lists of all persons qualified to vote, according, as nearly as may be, to the laws which are now or shall be at the date of such Proclamation in force in the Colony of New South Wales at the elections to be holden within the several districts of the said Colony; and for the appointing of returning officers, and for the issuing, executing, and returning of the necessary writs for such elections; and for taking the poll thereat, and for determining the validity of all disputed returns, and otherwise for ensuring the orderly, effective, and impartial conduct of such elections: Provided, that the Writs to be issued for the first election of Members of the Legislative Assembly of the Colony of Queensland shall be issued by the Governor of New South Wales. How to be constituted.

7. Every Legislative Assembly of the said Colony hereafter to be summoned and chosen, shall continue for five years from the day of the return of the Writs for choosing the same, and no longer; subject, nevertheless, to be sooner prorogued or dissolved by the Governor of the said Colony. Duration of Legislative Assembly.

Constitution, functions, and mode of proceeding of Legislative Council and Assembly.

8. And it is hereby declared and ordered, that all the provisions contained in a certain Act of the Legislature of New South Wales, passed in the seventeenth year of Her Majesty, and entitled, "*An Act to confer a Constitution on New South Wales, and to grant a Civil List to Her Majesty,*" as assented to, with amendments, by Her Majesty, under the authority of the said first recited Act of Parliament, which relate to the constitution, functions, and mode of proceeding of the Legislative Council and of the Assembly respectively, and to the qualification and disqualification of electors and Members of the Assembly, shall be of force within the said Colony of Queensland, unless and until altered in manner hereinafter specified, and shall be deemed to be incorporated in this present Order in Council.

One Session of Parliament to be held in each year.

9. There shall be a Session of the Legislative Council and Assembly once at least in every year, so that a period of twelve calendar months shall not intervene between the last sitting of the Legislative Council and Assembly in one Session and the first sitting of the Legislative Council and Assembly in the next Session.

First calling together of Parliament.

10. The Legislative Council and Assembly shall be called together for the first time at some period not later than six calendar months next after the Proclamation of this Order by the Governor of the said Colony.

No Member to sit or vote until he has taken the following Oath of Allegiance.

11. No Member either of the Legislative Council or of the Legislative Assembly shall be permitted to sit or vote therein, until he shall have taken and subscribed the following oath, before the Governor of the Colony, or before some person or persons authorised by such Governor to administer such oath:—

"I, A.B., do sincerely promise and swear, that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, as lawful Sovereign of the United Kingdom of Great Britain and Ireland, and of this Colony of New South Wales, dependent on and belonging to the said United Kingdom. So help me God."

And whensoever the demise of Her present Majesty, or of any of Her Successors to the Crown of the said United Kingdom, shall be notified by the Governor of the Colony to the said Council and Assembly respectively, the Members of the said Council and Assembly shall, before they shall be permitted to sit and vote therein, take and subscribe the like Oath of Allegiance to the Successor for the time being to the said Crown.

Affirmation may be made instead of Oath.

12. Provided that every person authorised by law to make an affirmation instead of taking an oath, may make such affirmation in every case in which an oath is hereinbefore required to be taken.

Standing Rules and Orders to be made.

13. The said Legislative Council and Assembly in the first Session of each respectively, and from time to time afterwards as there may be occasion, shall prepare and adopt such Standing Rules and Orders as shall appear to the said Council and Assembly respectively best adapted for the orderly conduct of such Council and Assembly respectively, and for the manner in which such Council and Assembly shall be presided over in case of the absence of the President or the Speaker, and for the mode in which such Council and Assembly shall confer, correspond, and communicate with each other, relative to votes or Bills passed by or pending in such Council and Assembly respectively, and for the manner in which notices of Bills, Resolutions, and other business intended to be submitted to such Council and Assembly respectively, at any session thereof, may be published for general information, and for the proper passing, entitling, and numbering of the Bills to be introduced into and passed by the said Council and Assembly, and for the proper presentation of the same to the Governor for the time being, for Her Majesty's assent; all of which rules and orders shall by such Council and Assembly respectively be laid before the Governor, and being by him approved, shall become binding and of force.

Provisions of former Acts respecting the allowance and disallowance of Bills preserved.

14. The provisions of the before-mentioned Act of the fourteenth year of Her Majesty, chapter fifty-nine, and of the Act of the sixth year of Her Majesty, chapter seventy-six, intituled, "*An Act for the Government of New South Wales and Van Diemen's Land,*" which relate to the giving and withholding of Her Majesty's assent to Bills, and the reservation of Bills for the signification of Her Majesty's pleasure thereon, and the instructions to be conveyed to Governors for their guidance in relation to the matters aforesaid, and the disallowance of Bills by Her Majesty, shall apply to Bills to be passed by the

Legislative

Legislative Council and Assembly constituted under the said Act of the Legislature of New South Wales, and this Order, and by any other Legislative body or bodies which may at any time hereafter be substituted for the present Legislative Council and Assembly.

15. The provisions of the said last mentioned Act respecting the Commissions, removal, and salaries of the Judges of the Supreme Court of New South Wales, shall apply and be in force in the Colony of Queensland so soon as a Supreme Court shall be established therein.

Judges continued in the enjoyment of their offices during their good behaviour, notwithstanding any demise in the Crown.

16. Such salaries as are settled upon the Judges for the time being by law, and also such salaries as shall or may be in future granted to Her Majesty, Her Heirs and Successors, or otherwise, to any future Judge or Judges of the said Supreme Court, shall in all time coming be paid and payable to every such Judge and Judges for the time being, so long as the patents or commissions of them, or any of them respectively, shall continue and remain in force.

Their salaries secured during the continuance of their Commissions.

17. Subject to the provisions contained in the said first recited Act of Parliament, and of an Act of the eighteenth and nineteenth years of Her Majesty, entitled "*An Act to repeal the Acts of Parliament now in force respecting the disposal of the Waste Lands of the Crown in Her Majesty's Australian Colonies, and to make other provisions in lieu thereof*," which concern the maintenance of existing contracts, it shall be lawful for the Legislature of this Colony to make laws for regulating the sale, letting, disposal, and occupation of the Waste Lands of the Crown within the said Colony.

Legislature empowered to make laws regulating sale and other disposal of Waste Lands.

18. It shall not be lawful for the Legislature of the Colony to levy any duty upon articles imported *bonâ fide* for the supply of Her Majesty's Land or Sea Forces, nor to levy any duty, impose any prohibition or restriction, or grant any exemption from any drawback or other privilege upon the importation or exportation of any articles, nor to enforce any dues or charges upon shipping contrary to or at variance with any treaty or treaties concluded by Her Majesty with any Foreign Power.

Duties not to be levied on supplies for troops nor any duties inconsistent with treaties.

19. Subject to the provisions of this Order, and notwithstanding any Act or Acts of the Imperial Parliament now in force to the contrary, it shall be lawful for the Legislature of the Colony to impose and levy such duties of Customs as to them may seem fit on the importation into the Colony of any goods, wares, and merchandize whatsoever, whether the produce of or exported from the United Kingdom, or any of the Colonies or Dependencies of the United Kingdom, or any Foreign Country: Provided always, that no new duty shall be so imposed upon the importation into the said Colony of any article the produce or manufacture of or imported from any particular country or place which shall not be equally imposed on the importation into the said Colony of the like article the produce or manufacture of or exported from all other countries and places whatsoever.

Customs duties may be imposed, not differential, though contrary to existing Acts of Parliament.

20. All Laws, Statutes, and Ordinances, which at the time when this Order in Council shall come into operation shall be in force within the said Colony, shall remain and continue to be of the same authority as if this Order in Council had not been made, except in so far as the same are repealed and varied hereby; and all the Courts of Civil and Criminal Jurisdiction within the said Colony, and all charters, legal commissions, powers and authorities, and all offices, judicial, administrative, or ministerial, within the said Colony respectively, except so far as the same may be abolished, altered, or varied by, or may be inconsistent with, the provisions of this Order, shall continue to subsist as if this Order had not been made, unless and until other provision shall be made, as to any of the matters aforesaid by Act of the Legislature of Queensland; but so that the power of the Governor of New South Wales in relation to the matters aforesaid shall (except as hereinbefore provided) be vested in the Governor of Queensland.

Force of Laws and authority of Courts preserved.

21. The provisions of the said recited Act of the Legislature of New South Wales respecting the disposal of taxes, imposts, rates, and duties, the Consolidated Revenue Fund, the Civil List, the appropriation of the surplus consolidated revenue, the origination and passing of money votes, and the issue of portions of the Public Revenue, in pursuance of warrants under the hand of the Governor, shall be in force within the Colony of Queensland, unless and until altered in manner hereinafter specified, and shall be deemed to be incorporated with this present Order in Council; and the sum payable in every year to Her Majesty,

Civil List.

Majesty, by way of Civil Lists, shall not exceed in all Six thousand four hundred pounds, and be applied towards defraying the expense of the several services specified in the Schedule to this Order, annexed.

Power of alteration of Constitution.

22. The Legislature of the Colony of Queensland shall have full power and authority, from time to time, to make laws altering or repealing all or any of the provisions of this Order in Council, in the same manner as any other laws for the good Government of the Colony, except so much of the same as incorporates the enactments of the fourteenth year of Her Majesty, chapter fifty-nine, and of the sixth year of Her Majesty, chapter seventy-six, relating to the giving and withholding of Her Majesty's assent to Bills, and the reservation of Bills for the signification of Her Majesty's pleasure, and the instructions to be conveyed to Governors for their guidance in relation to the matters aforesaid, and the disallowance of Bills by Her Majesty: Provided that every Bill by which any alteration shall be made in the Constitution of the Legislative Council, so as to render the whole or any portion thereof elective, shall be reserved for the signification of Her Majesty's pleasure thereon, and a copy of such Bill shall be laid before both Houses of the Imperial Parliament for the period of thirty days, at least, before Her Majesty's pleasure thereon shall be signified.

Interpretation.

23. In the construction of this Order, the word "Governor" shall mean the person for the time being lawfully administering the Government of Queensland.

24. This Order shall take effect, except as therein otherwise provided, so soon as Her Majesty's Letters Patent erecting Queensland into a separate Colony shall be received and published in the said Colonies; and the Right Honorable Sir Edward Bulwer Lytton, Bart., one of Her Majesty's Principal Secretaries of State, is to give the necessary directions herein accordingly.

Legislative Assembly.

NEW SOUTH WALES.

DIVISION OF PUBLIC DEBT BETWEEN QUEENSLAND AND NEW SOUTH WALES.

Ordered by the Legislative Assembly to be Printed, 11 May, 1860.

W. DENISON,
Governor General.

Message No. 37.

The Governor General calls the attention of the Legislative Assembly to the following paragraphs in the Despatch of the Secretary of State, No. 11, dated 18th August, 1859, a copy of which was laid on the Table of the House on the 11th October, 1859:—

“ It remains that I should inform you of what has passed, and of the intentions of Her Majesty’s Government respecting the division of the Public Debt between the two Colonies.

“ In your Despatch, No. 6, of the 7th January, 1858, you enclosed a Bill for effecting this division which had been introduced into the Legislature, but not proceeded with, and you informed my predecessor at the same time that you were of opinion that it would be in every way better that Her Majesty’s Government should at once take upon itself the decision of the question.

“ This proposal on your part has undergone much consideration, but on the whole Her Majesty’s Government have judged it better to decline acting upon it, at least for the present; they have felt that the business of dividing the debt was one of a strictly domestic nature, belonging, at least, in the first instance, to the New South Wales Legislature, conjointly with that about to be established in Queensland, and they were of opinion that it could not justly be inferred that the New South Wales Legislature would absolutely refuse to execute it, merely from the circumstance that a Bill introduced for the purpose had fallen through, perhaps from temporary political circumstances only. At all events, they consider it their duty to appeal more distinctly and more fully to that Legislature, inviting it to co-operate in a task which, when the separation of the Colonies is legally accomplished, will become unavoidable. Should the Colonial Legislatures after all decline, there will then be a strong reason made out for Parliamentary interference.

“ I have to instruct you, therefore, to call the attention of the Legislature to the subject as early as possible. The Bill introduced by Mr. Cowper will furnish materials. It appears to me the measure might be made more practically convenient by giving the Commissioners somewhat greater latitude as to the mode of estimating the liabilities. The plan of appointing a Commission from each Colony, with power to name an Arbitrator, seems to me reasonable; but these are details on which the Legislatures of the two Colonies are best fitted to decide.

“ In the meantime (as according to this project the separation must take place by publication of the instruments, and the Legislature of the new Colony must be convoked before the division of the debt can be effected) there can be no serious difficulty in a temporary arrangement for the repartition of the interest of the debt, during the short period which may elapse between that separation and the passing of the necessary Law, whether that be ultimately done by the Colonial Legislature or by Parliament.”

In this Despatch, the Governor General was directed to call the attention of the Legislature to the subject of the division of the debt as early as possible, but, as the Legislative Council and Legislative Assembly of Queensland must necessarily sanction by enactment all the conditions of any agreement which may be entered into between the Government of the two Colonies, His Excellency did not consider it necessary to make this reference until all the arrangements for summoning the Legislature of Queensland had been completed.

These, however, having now been perfected, and the Legislature of the new Colony having been summoned to meet on the 22nd of the present month, the Governor General invites the Legislative Assembly to consider the question with a view to the determination of the principles upon which the measure for the division of the debt should be based.

The Governor General has received from the Governor of Queensland an assurance that the assent of the Government of that Colony will be given to any measure based upon the principles affirmed by former Governments of New South Wales, and as these appear to have received the approval generally of Her Majesty's Government, it seems to the Governor General that they would, if adopted by the Legislature, lead to a speedy settlement of the question.

Government House,
11th May, 1860.

1859.

NEW SOUTH WALES.

PORT CURTIS.

(REPORT ON PRESENT CONDITION OF SETTLEMENT.)

Presented to both Houses of Parliament, by Command.

THE GOVERNMENT RESIDENT, PORT CURTIS, to THE PRINCIPAL UNDER SECRETARY.

Gladstone,

July 11, 1859.

SIR,

On sitting down to fulfil the duty imposed upon me in your letter of the 20th December last (received by me on the 21st January), viz. :—That of reporting on the present condition of this Settlement the inducements which it offers to colonization, the public works that are most likely to tend to its advancement, and more particularly those called for at the present moment, I deem it incumbent on me in the first instance to offer an explanation of the motives which have led me to delay this Report to the latest possible period, consistent with the necessity of laying it before the Executive Government previous to the assembling of Parliament.

2. The course of events in this District since the month of September, 1858, has displayed such extraordinary fluctuation in the apparent requirements of even one month with another that it has been impossible to form any sound opinion on the probable issue of the passing time.

3. The first blaze of excitement, consequent on the discovery of gold, with its attendant inrush of population, having died away, there succeeded to it a slumbering fire of expectation which has alternately threatened once more to burst out into flame, and then with a greater or less interval of time has again sunk into almost total extinction, so that it has only been within the last four weeks I have been enabled to arrive at any satisfactory conclusion as to the probable development to the colonization of this portion of New South Wales which the events I have alluded to above are likely to give rise to.

4. There are, however, at the present time, symptoms making themselves apparent which indicate a great impulse given to the permanent pastoral occupation of the country; and there are, lately, discoveries of gold in fresh localities which promise to be equally attractive to mining operations.

5. I can, therefore, with much greater confidence in the stability of events than I have felt during the few past months, now address myself to the duty of bringing under the consideration of the Government my views on the subjects which have been referred to me for Report.

6. I will take these in the order in which your letter presents them, and will report first on the present condition of this Settlement.

7. To arrive at any just appreciation of the present condition of this Settlement, it is necessary to cast a retrospective glance on what has been its progress during the preceding years of its growth, and I think, when the Tables I append, shewing the progressive increase of its population, stock, and coasting trade, are considered, it will be apparent that the

Vide Appendix
No. 1.

present condition of this Settlement is indicative of greater prosperity than has at any time characterised its previous history; the impulse given to its growth by the events of last year having fostered and increased all species of industrial occupation in a much more remarkable degree than had been done before.

8. Nor is the prospect of continued increase in the pastoral occupation of the country without great encouragement at the present moment. For five years this foundation stone of all Australian progress and prosperity had seemed to linger in its laying; there has during that time been apparently little desire to push out to the northward, and stock had arrived but slowly to occupy the country, much being left vacant to the westward, were within forty or fifty miles of Port Curtis; but, during the present year, a great and beneficial change has come over the progress of this important interest. Unoccupied runs to the northward have suddenly acquired a high value, many settlers from Port Philip—having been convinced either by their own observation or from the reports of those who had visited it last year, of the value of the country for pastoral purposes—have acquired properties in it, and, altogether, there is said to be, at the present moment, at least one hundred thousand sheep arrived, or arriving, to occupy country to the northward of the Fitz Roy. The Counties of Pelham and Raglan also to the westward of Port Curtis have this year for the first time been taken up, and this occupation will fill a gap which has hitherto very injuriously existed between the coast and the stations of the western and south-western interior.

9. At the same time that this extension of pastoral occupation has begun to make itself apparent, there has likewise been a discovery of further deposits gold in a locality hitherto untried, about fifty miles to the westward of Port Curtis.

10. This latter discovery is only now in progress of development, some twenty or thirty diggers having but within the last few days resorted to the site of it; however, the samples of gold brought in have created considerable excitement, and I purpose, next week, visiting the spot, and shall then be enabled, if it be necessary so to do, to make a further Report to the Government in relation to it.

11. On the whole, therefore, I feel justified in laying before the Government my opinion that the present condition of this Settlement, as compared with its state even one twelvemonth back, indicates highly increased prosperity, and a growth which gives every promise of being permanent.

12. I now turn to the inducements which this Settlement offers to colonization; and, in framing my Report on this portion of my subject I am fully alive to the importance of placing the Government in possession of a just and full knowledge, so far as I am enabled to impart it, of the capabilities of this portion of the Colony, inasmuch as without such knowledge it is impossible the Government can satisfactorily decide on the measures which now call for adoption; and yet the subject is a large one, and, in the undeveloped state of most of the resources of this District, much relating to it must rest without other support than that of opinion.

13. I believe that no portion of the Colony of New South Wales holds out greater inducements to the colonist than that portion of it upon which I am now reporting; all the advantages given by a fertile soil and luxuriant pasturage which, in many other parts, are somewhat abated by an expensive and irksome land carriage for supplies and produce, are here brought to the very verge of the coast, and a coast moreover so indented with creeks and rivers as to scatter facilities for water carriage along the whole extent of it from its southern extreme to the river Fitz Roy.

14. Throughout this country, and generally within some very moderate distance from water carriage, there are in many localities considerable tracts of rich soil, capable of growing every product that a nearly tropical climate will allow the agriculturist to cultivate.

15. As yet experience has done little to determine the description of cultivation which is likely to be most profitable, but one experiment on a small scale has shewn, with reference to cotton, an article, the production of which is of high national importance, that the yield, so far at least as one year's trial may be depended on, is here more than double that of the average of the same crop in America, and the quality of some samples sent Home as been pronounced equal to any imported into England.

16. Beyond this the cultivation of the soil has not, up to the present time, been attempted otherwise than by garden culture, but that has proceeded far enough to enable me to report both soil and climate favorable to the production of everything in this respect required for the sustenance or luxury of man; besides vegetables of all descriptions, each produced in its season with remarkable luxuriance of growth, there are now growing in the Government Garden here—oranges, lemons, limes, pine apples, guavas, bananas, dates, cocoanuts, tamarinds, grapes, cherimolias, peaches, and some other varieties of fruits. The orange and lemon have come into bearing in three years from the seed, and those trees of all kinds which have produced their fruit have yielded it of unusual size and flavour.
