4170. You consider it to be your duty to send in vouchers of a certain quantity of work having been done which would entitle the contractor to receive a certain amount of money? Yes.
4171. Suppose that amount of work has not been done, what do you do—would you in such a case refuse to sign the vouchers? Decidedly.
4172. You say you consider that the Commissioner being your superior officer could pay money in spite of you? No, I do not exactly say that.
4173. In reply to a question of Mr. Forster's you gave an answer to that effect? If the work had not been done the Commissioner could pay for it?
4174. I understood you to say that if the Commissioner chose to pay money you had nothing to do with it, he being your superior officer? I do not think I said that exactly. I think I said that he, as my superior officer, could form a better opinion of the value of the works than I; but I do not say that I would not object to it.
4175. Suppose the money were paid upon the Commissioner's order, and you did not think the work done that would warrant the payment of the money, what course would you adopt? I should write to the Commissioner, complaining of its having been done, and stating that that amount of work had not been completed.
4176. In the event of his still persisting in paying and taking no notice of your protest, what course would you take? If I had a reply from him stating that on his responsibility he would pay it, it would relieve me from any further responsibility.
4177. Would you consider it consistent with your duty as public officer to see a violation of a contract without taking any steps to prevent that violation? I would protest against it.
4178. To him? Yes.
4179. Would you consider him your final head? I fancy I am responsible to him.
4180. You would not consider it consistent with your duty to represent the facts to the Minister for Works? I do not think I would; but that would be a matter of consideration with me.
4181. *By Mr. Dangar*: You have stated that Mr. Hannington is still in town? I believe he is; I do not know.
4182. How long has he been away from his duty? I think yesterday fortnight he was to have been down here. The message I received was on the Saturday before.
4183. Do you know by whose authority he left the works? I do not; I took it for granted that he had been summoned before the Committee.
4184. Where is Mr. Hannington staying? At the Doughboy, generally; he has charge from Doughboy to Goono Goono.
4185. Do you know whether he is competent to measure works? I do not; I have had no opportunity of knowing that.
4186. Have you power to order Mr. Hannington to return to his duty? Yes.
4187. Have you done so? No, I supposed him to be still in attendance on the Committee.
4188. Do you know whether he has been summoned? I do not know that he has.
4189. Are maintenance men allowed Government tools? No.
4190. They find their own tools? They find their own tools, as a general rule.
4191. Did Mr. Hawkins, the overseer in the Tamworth District, hand you any specification when you took charge as Superintendent of the works in progress? He shewed me the copy of a specification.
4192. Is it your duty or have you instructions to inspect contracts for clearing the line by Mr. Heritage and others? Yes.
4193. What is the present regulation as to the mode of weighing the ballast carts—the quantities? I have never done anything of the kind.
4194. What is the usual way in contracts for ballasting the roads? I have always had the ballast by the cubic yard, and have measured it in heaps, and after it has been spread on the road.
4195. Can you tell the thickness? Yes.
4196. Was there not a regulation in force that the contractor's carts should be measured before carting was commenced? Never to my knowledge.
4197. In some instances it is measured in heaps, and in some instances when it is spread? In every instance I have measured it twice, first in heaps and afterwards when spread.
4198. Then you by that means certify that the contractor has put on the quantity of ballast required by the contract? Yes.
4199. You spoke of an overseer having telegraphed to you before proceeding to Sydney? Yes.
4200. Can an overseer telegraph to you on public business whenever he may think fit, at the public expense? I consider that he paid that.
4201. As a Road Superintendent, how do you distinguish public from private telegrams in your accounts? Private telegrams I pay for.
4202. Do you pay in cash, in the Office, for private telegrams? Yes; for the public ones I send in a bill at the end of the month.
4203. Are you allowed to send as many telegrams as you think fit during the month? I have never had any instructions on that point; at any time I have thought it necessary I have sent a telegram, I have never been prevented from doing so.
4204. Did Mr. Martindale, as far as you have heard, carry on his contracts in Melbourne with satisfaction to the Government, or to those who employed him? As far as I have heard, I believe there have been some complaints; I never knew any of his contracts as being finished while I was there; I knew the works in progress, but after leaving I heard there were complaints.

4205. Are you aware that the Government complained of the manner in which he had carried out his contracts? I have heard that report. Mr. William Coghlan.
4206. You were never a sub-overseer under him? No.
4207. How are these maintenance men placed—are the threes and fours you spoke of placed in one place, or separated? Each man looks after seven or eight miles; he is constantly going backwards and forwards, filling in holes. 18 Dec., 1861.
4208. How often does the overseer see that man? The overseer is supposed to go up and down the road at least once a week; and then, if there is any particular work to be done, he attends to the men engaged upon that more than to those on other parts of the road.
4209. Have overseers let works without tenders? I have never known it to be done.
4210. Can they let work without the Superintendent's permission? I should say not.
4211. The Superintendents can let work without any tender—without advertisements? I think not; they must have permission.
4212. Then they can let it without advertising—without public competition? We have done so.
4213. Was that done on the Western Road? When I was on the Parramatta Road several small works were let without tender.
4214. Up to £100? Not so much as that, I think.
4215. You say you did not report Mr. Hannington's absence to the head Office? I think I did write on that subject; I am not quite certain. I do not think I made any official report that he had left, but I think I mentioned it in one of my communications.
4216. You received no answer? I am not positive.
4217. As an overseer and Road Superintendent under the Government, are you aware that there is a regular scale of prices in the Commissioner's Office, for cutting drains and other kinds of work? I have not seen any; I fancy the prices would vary with the locality.
4218. Are you aware of contracts being taken in your district, before you were appointed to the Northern District, at less prices by tender than the estimate from the office by the contractor when put up to public competition? Contracts that were taken on the Parramatta Road varied a good deal in price, but I have known them to be taken at less than the estimate.
4219. Much less? Not much less.
4220. Have they been less? I did not see the estimates, but I fancy some of the contracts must have been less.
4221. Were they carried out to your satisfaction? They were carried out, but with great difficulty—the cheap ones.
4222. Is it usual to contract for all important works upon the Western Road? As far as I have known, it is.
4223. *By Mr. Lucas:* Can you tell the amount the contractor was to receive for the 60 feet bridge—the first bridge you spoke of? I know the timber for that bridge was supplied by a separate contract, and was done before I went up.
4224. Then it was not under your supervision? The supply of timber was not, but the building was.
4225. I am speaking of that part of the work that was under your supervision? The Uralla bridge was let for £125; and the painting and tarring, £12 10s.
4226. What other bridges were under your charge? There was another at Saumarez Creek.
4227. What price was paid for that? £130 for building, and £13 for tarring and painting.
4228. From whom did you get these amounts? From the contractor and from the overseer.
4229. Have you seen the specifications of these bridges? No.
4230. Have you seen the vouchers for the advance of money to contractors on the road? For the clearing, I have; not for the bridges.
4231. Did you see the specification of the clearing? Yes.
4232. Did you know the amount that was to be paid for the clearing? I got that from the Office.
4233. Have you been officially informed of the amounts to be paid to contractors for all the works under your charge? Not yet. I sent a voucher for clearing on account of work done, and at the same time I sent a note, asking whether the figures were correct—the total amount of the contract, and the amount already paid. I got a reply that they were correct.
4234. Is it not usual for the person in charge of work to have a copy of the specification given to him by authority? Yes.
4235. I understand you to say, then, you have seen a plan of these bridges, but not a specification? I have not seen the specification.
4236. Did you ever know an architect to give plans without furnishing specification also? No.
4237. Did you ever know a case where a contractor would tender for work unless he saw the specification? I fancy he might tender from the plan. These are very simple bridges—they are only on piles.
4238. If you were contracting for work, and you could only see one document, which would you rather see, the plan or the specification? The specification, I think, on the whole; in some cases not.
4239. I suppose the place would not shew the description of timber to be used? No; but in this case the timber was delivered; the contract was for building only.
4240. Would the plan shew you whether the flooring was to be split or sawn stuff? Sawn stuff was on the ground, delivered.
4241. Do you not know that it is impossible to shew many things on a plan? This contract was merely for building the bridge, the material being on the ground.
4242. Where are these plans now? In the hands of Mr. Hawkins, the overseer; he has a copy, and I think the man building the bridge has a copy.
4243. Did you ever receive instructions from the Commissioner, or from anyone under him to certify to any quantity of work for the contractor? No.
- 4244.

- Mr. William Coghlan. 4244. Did you ever know such a document to be sent to an overseer or Superintendent, before you went on the Northern Road? Desiring them to certify?—No, I never knew an instance.
- 18 Dec., 1861. 4245. Did you ever, as overseer or as Road Superintendent, receive a document asking you to estimate for work, the figures required for the estimate being given in that document? I do not understand you.
4246. Did you ever see a document coming from the Sydney Office, stating that a certain amount of extra work was required, and that a certain amount was to be paid; that it was to be estimated for and sent back to the Office as if it had originated with the Superintendent instead of with the officer in Sydney? I never knew an instance of the kind.
4247. You said you were Superintendent over work when Mr. Martindale was contractor in Victoria? Yes.
4248. You did not remain there? He had just commenced the contract, and shortly after he commenced I left.
4249. You did not remain till the work was finished? No.
4250. Was that the only contract you were employed upon of which Mr. Martindale was the contractor? That was the last; there was one before—a task for cutting away a hill. I was then under the engineer; I measured the work.
4251. Was there any other? No.
4252. Did you ever draw any plans or specifications, or make any estimates of works, during the time you were employed in the Victorian Government? No plans; I made sections of a new road.
4253. Have you ever done anything of that sort here, in the shape of estimating for work? Yes.
4254. What work have you estimated for? I prepared the specifications and estimates for all the contracts in the Blue Mountains, fifteen months ago.
4255. Are the works now being carried out under the plans and specifications you drew out? I think they must have been; I never heard of any change, but I left that district.
4256. Who was the contractor on the Western Road during the time you were overseer there? There was a man named Corcoran, Mr. Boland, and Mr. Smith.
4257. Then you went to the Southern Road? Yes.
4258. Who were the contractors during the time you were there? Mr. Hammond and Mr. Bocking were partners; Mr. Dooney, and Mr. Sheehan.
4259. Any one else? No one.
4260. Can you give us the date when you went to the Southern Road to superintend the work? It was the end of May twelve months.
4261. That would be in 1860? Yes, the end of May, or beginning of June, 1860.
4262. You remained there how long? I came down again in the end of June—June last; I arrived at the Parramatta Road in July.
4263. Then you were overseer about two months on the Southern Road? No, I was there between twelve and thirteen months.
4264. You were there then from May, 1860, to June or July, 1861? Yes.
4265. These were the only persons who did work on that road during the time you were there? The only persons who did work by contract; there were a few small tasks.
4266. What part of the Southern Road did you supervise? Between Yass and Gundagai, and between Yass and Gunning for a short time.
4267. Had you anything to do with any works between Goulburn and Camden? Never so far down as that.
4268. I understood you to say that you have always seen the stone measured before it was spread or after? Yes, I have measured it both before and after.
4269. The heaps are generally put on blocks of wood, one block in the centre, and one on each side? Yes.*
4270. Have you never seen it laid on the road without being measured previously? No, I never did—never any metal; pitching I have seen—large stones.
4271. What is the difference in the value of broken metal and pitching? It would generally be from about half-a-crown to three shillings a cubic yard; a cubic yard of metal would cost about that much more (2s. 6d.) than pitching.
4272. We always understand by pitching, I presume, the placing of large blocks of stone on the surface of the roadway, and throwing gravel or some similar material on the top? I understand pitching to mean stones laid upon the road and knocked into their place with a maul.
4273. What do you call ballasting? Ballasting may be anything; a road is pitched if the stones are laid and bound with gravel; if only metal is used I consider that metal is ballasting.
4274. *By the Chairman:* Is it the practice of the Superintendent of Roads to send in fortnightly vouchers? In some districts it is, in others the vouchers are sent in monthly.
4275. In what cases is the distinction made? The Superintendent is at liberty to send them in fortnightly if necessary. I send them in fortnightly if a person requires money to carry on his work.
4276. That is left to the discretion of the Superintendent? I think so; I have always found it so.
4277. In all cases they are expected to be sent in monthly? At least monthly.
4278. A longer time is not allowed to elapse? No.
4279. Have you sent in fortnightly vouchers since you undertook these works? Yes.
4280. Fortnightly or monthly? Monthly; I sent in one fortnightly for one of the clearing contracts.

4281.

* NOTE (on revision):—No. This question is not correctly reported.

4281. Was money paid upon them? Yes.
4282. You have heard no complaints then? No.
4283. With regard to the Doughboy Diversion you have not sent in any? No, I have not.
4284. Do you know whether any money has been paid upon it since you took office? I do not know whether it has or not.
4285. If any had been paid would it be regular—would it be wrong? I do not think it would. I do not consider Doughboy under my charge, under the peculiar circumstances of the case.
4286. Works have been going on there? Yes.
4287. Do you mean to say, that since you have taken office, for these five weeks past, there has been no superintendence over the Doughboy Diversion works? Mr. Hannington, the overseer, has been there.
4288. He has been by himself—there has been no superintendence over him as regards these works? No; there is no important work going on there; it is merely finishing.
4289. Then all the important part is done? I consider it is.
4290. Then it is not possible to make much alteration without going back again? Yes, they can make the road as much better as necessary.
4291. Are you aware whether any alterations of an important character have been made upon the Doughboy Diversion? I do not know.
4292. Mr. Hannington has been superintending them all the time? He is supposed to be looking after them.
4293. Then Mr. Hannington is virtually without anyone at all to look over him? With reference to this particular work.
4294. It was part of his duty? Yes; but we have thought all this time the Commissioner would come up.
4295. Then all these five weeks you have been expecting the Commissioner to visit the works? We thought he might come up.
4296. Did you report under these peculiar circumstances? Yes; my report stated that I could not give much information respecting these works.
4297. Did you state distinctly that you were not taking charge of them? No; I thought it necessary that I should get charge, and that that would bring a reply.
4298. You expected Mr. Collett to come up and settle the matter personally? I did.
4299. Then you have been virtually without instructions for five weeks? No, I received all the instructions necessary to enable me to carry on the work. If I had required anything further I would have applied to the Office and got what I wanted.
4300. *By Mr. Lucas:* How many letters have you sent to the Office since you have been appointed to your present position? A great many; I dare say a dozen; more, perhaps.
4301. Official documents? Yes, upon different subjects.
4302. *By Mr. Hoskins:* Do you consider this (*referring to the shale already produced*) a very inferior article for metalling the road? I do.

Mr. William Coghlan.
 18 Dec., 1861.

THURSDAY, 19 DECEMBER, 1861.

Present:—

MR. DALGLEISH,		MR. HOSKINS,
MR. DANGAR,		MR. MARKHAM.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

Frederick Wells, Esq., called in and examined:—

4303. *By the Chairman:* Do you hold any appointment in the public service? I hold an appointment as far as this, that I am engaged on works in the public service; not a gazetted appointment.
4304. You are a surveyor? Yes.
4305. A qualified surveyor, of course? Yes, I have served my time.
4306. Have the Government employed you for any length of time? It is over two years since I first entered the service as a draftsman, in 1859; I have been employed over twelve months as a surveyor.
4307. Are you what is termed a licensed surveyor? No; I have never had occasion to apply for a license; but the Government have employed me on various works from time to time, and I have always been paid by salary on the same footing as the junior surveyors.
4308. Are you under any officer at present—any head of a department? I consider myself under Mr. Collett, the Commissioner for Roads.
4309. In what part of the Colony are you employed? At present on the Mudgee Road.
4310. Were you ever in the Northern District? Yes.
4311. Were you long there? From April, 1860, to July, 1861.
4312. Do you know the main Northern Road from Maitland to Armidale? From Murrumbidgee I know it well, every inch of it.
4313. Were you under Mr. Collett when there? Yes, part of the time; I was primarily appointed by the late Engineer for Roads, Mr. Bennett.
4314. Are you acquainted with the works in that part of the district in their present state? Not in their present state.
4315. When was the last time you saw them? In July (southerly from Tamworth), and a week or two before that I took a trip to Armidale.
4316. Are you a thoroughly qualified judge of roads? I have had some experience upon them, having acted as Superintendent of Roads and been otherwise employed upon them.

19 Dec., 1861.

F. Wells, Esq. 4317. Are you a mineralogist? No; I have just such a knowledge of it as a man picks up in acquaintance with his business.

19 Dec., 1861. 4318. You know the difference between trap and shale? Decidedly.

4319. Do you know anything of the circumstances which led to an alteration of the road near what is called the Doughboy Diversion? No, that was determined upon before I received any appointment in that district at all. I had some slight alterations to make in the survey of it; and that was the first surveying work I undertook in the Colony, under the Government.

4320. You had some of the surveying of that road? I had some alterations to make on Mr. Debenham's first survey; but some of the deviations were not afterwards adopted; they were thrown out by Mr. Collett.

4321. Can you state what alterations you suggested which were not adopted? Suggested is scarcely a fair term; Mr. Bennett took me over the line, directing me to make a traverse and plan and send it in; it was Mr. Bennett's own suggestion.

4322. Mr. Collett was not over you at that time? No.

4323. What was it Mr. Bennett wished done? It was an alteration, by means of which a large cutting would have been avoided, but at the expense of some large bridges. But I never went into the merits of the case to know which was the best line.

4324. Has that idea of Mr. Bennett's been carried out? No.

4325. What alteration has been made upon it? They have gone into a large cutting on a heavy sidling, in lieu of the bridges, and on a much easier gradient.

4326. What is your opinion of the two, as to which is better than the other? I think myself the cutting had better have been avoided; I do not think it will stand permanently without a retaining wall.

4327. You think Mr. Bennett's plan the better one? Yes, I think so.

4328. Taking into account the expense of the bridges on the one hand, and of the cutting on the other, and the difficulty of keeping it in its position, you would have preferred Mr. Bennett's plan? Yes. There were many circumstances to counterbalance it, but I should imagine the cutting will not stand, at all events in times of flood, without a face wall or something to retain it.

4329. I suppose there is something to be said on both sides? Yes.

4330. Mr. Collett's plan was adopted after Mr. Bennett left? Yes; I know the first working drawings of the present line were got out after Mr. Bennett left.

4331. Which do you think could have been carried out at the least expense? That I cannot say, not having gone into the drawings. I think probably the cutting was the least expensive, looking at it merely as a cutting.

4332. The plan as adopted? Yes. But then I think it would be run up considerably if such a retaining wall were built as I think will be needful. There is no space between the sidling and the creek, and the sidling is very steep and necessitates an immense cutting. I think the stuff standing at its own pitch would come down into the creek.

4333. This is at what is called the Doughboy Diversion? Yes, it forms a portion of it; it is only a deviation for about half a mile from the line Mr. Debenham laid out.

4334. Do I understand that you think the cutting is too narrow—that the road is too narrow at the cutting? No, I believe it is fully up to what is specified for in the contract; but I think that the cutting, being made on a sidling with no space between the foot of the slope and the creek, will not stand without a retaining wall.

4335. Where is the creek? Immediately under where this heavy cutting goes; the creek is just beneath. I think the creek will sap it, in times of flood at any rate.

4336. Is that a fault of the contractor, or a fault of the original design? That I cannot say; it depends in a great measure on how the work is performed; but I should say the original design was not good.

4337. Could not that be avoided by making a wider cutting? I cannot perceive it, unless by throwing a deal of stuff to spoil.

4338. At all events, if the cutting were wider it would be longer before it was sapped by the creek? No, I do not think that, either; and there must be more stuff to throw at the side, or to carry away altogether.

4339. It would be more expensive, of course? Very much more expensive; every foot in the hill would entail a very heavy expense.

4340. You say, as it is now, it is not likely to last as a good road—What is your suggestion to remedy that? I did not see it after the works were complete, and therefore I could not so well form an opinion, only going over it before the ground had been touched.

4341. What do you think necessary to make the road permanent? A retaining wall.

4342. On which side? Towards the creek.

4343. Do you suppose that would be an expensive work? Yes, I should consider it so, decidedly.

4344. What do you think would be the expense, in round numbers? I cannot say; I cannot say how many yards would require facing. Mr. Bennett having selected a deviation away from there, which he directed me to survey, I never had occasion to go on this particular spot more than once, when I went with Mr. Bennett to examine some trial pits he had had sunk into the sidling where he was afraid there was rock in it, which also I believe induced him to abandon it.

4345. Can you speak at all to the way in which these works have been carried out under the present contractor? No, I have not been in that neighbourhood during the time. I have noticed in some places that some stumps had not been taken out; but that was many months ago.

4346. Before the contract was complete? Yes, in July.

4347. It was quite possible to remedy that afterwards? Yes, quite possible. The contract was

- was not complete at the time, and of course such things as these could be completed at any ^{F. Wells, Esq.} time.
4348. Can you speak at all as to Mr. Collett's competency in superintending public works? 19 Dec., 1861.
Well, I have seen works that have been carried out under Mr. Collett's superintendence that have not been done in the most creditable manner; whether it was his own fault or that of his overseer I cannot say; but I think he might have looked after it himself, so that it would have been better done. That was during the time he was a Road Superintendent himself.
4349. Can you say what works these were? Some works on the Liverpool Range.
4350. What was the fault? The metal was broken to a very large size; it lay in heaps for some time at the road side, and might have been seen; and it was also put on in very wet weather.
4351. Was it a good kind of metal? Yes, very good, but too large.
4352. Was the road not consolidated properly? The road had not been formed to receive the metal, and it was very much cut up by the traffic at the time the metal was put on, so much so that the mud reached halfway up my leg when I was chaining up it.
4353. Can you tell us the position of this place? It was on the northern descent of the Liverpool Range into Doughboy Hollow.
4354. How much of the road was there reason to find fault with? Possibly only fifty or sixty yards where the metal was put on in that manner in wet weather, though the length of metalling was considerably more. I spoke to Mr. Collett's overseer at the time, and he made the remark that now was the time to put on the metal; I made no further remark. Mr. Collett was possibly unaware at the time that this metal was going on in wet weather, because I do not think he was in that part of his district at the time; I think he was at the lower end of his district.
4355. Who was the contractor for that work? I forget the man's name.
4356. Would you know it if it was mentioned? I think I should.
4357. Was it Miller? No.
4358. Martindale? No.
4359. Greer? No; neither Clements nor Greer.
4360. Donaldson? No, I do not think that was the name.
4361. Mr. Collett was Superintendent of the road? Mr. Collett was the Superintendent of the road at that time; that portion of the road was in his charge; it was the extreme northern end of his district, he being then a Road Superintendent of the first class.
4362. Should you say this faulty construction of the road was a deviation from the specification? I cannot say how Mr. Collett would write out his specification. As Superintendent of the district he would write it out for a job like that; it was not a very large job like the Doughboy Diversion, and Mr. Collett would probably write out his own specification.
4363. Do you know whether the contract was taken by competition? Yes, I believe all works were let at that time by competition.
4364. Who was the overseer over this particular work? Mr. Clark; he was the party to whom I spoke.
4365. You mentioned it to him? Yes; the only remark he made was, now is the proper time to spread metal.
4366. Did he say that in joke or in earnest? I believe he meant it in earnest.
4367. Was he a properly qualified person? I really cannot say; I never had any conversation with him, except on one or two occasions.
4368. You would not consider that remark an evidence of his qualification? No, certainly not.
4369. Did you afterwards hear any complaints from persons travelling, of the badness of the road at that place? I did hear of a dray going down being obliged to double-bank its horses; and I myself thrust the handle of my hunting whip into a cart rut, where a wheel had gone through between eighteen and twenty inches. I cut a notch on the whip at the time, to shew it to Mr. Bayley, because he promised to report this circumstance to Mr. Bennett. People travelling were commenting on it very severely.
4370. Was this after the contract was supposed to be completed, and the road thrown open to the public? The road was open to the public, but I think there was a little more metal to go on.
4371. Do you think the metal was spread in sufficient quantity? Yes, I should say so; from what I can recollect I should think there was quite sufficient, had there been a proper sub-stratum.
4372. You are not aware whether that part of the road has been repaired since? I cannot say; it appeared very good the last time I came along it.
4373. Was it dry weather then? The last time I saw it by daylight it was dry weather, but the last time I came over it was by night, and it was wet.
4374. Did it appear hard? Yes; but I did not notice it particularly, being on horseback.
4375. Was it very rainy weather? There had been a good deal of rain previously, and there were then showers.
4376. It takes a great deal of rain to affect a made road, does it not? Yes; and if it was soft I might not perceive it on horseback so much as I should have done in a vehicle.
4377. You say you mentioned it to Mr. Bayley? Yes.
4378. What was Mr. Bayley then? He was Superintendent of some works on the range.
4379. Not over Clark, the overseer of this piece of road? No; he was Superintendent of extra works apart from Mr. Collett's jurisdiction on the road. I mentioned it to him in conversation.
4380. What steps did Mr. Bayley take when you mentioned it? He agreed with me that it was a scandalous time to put on metal.

- F. Wells, Esq. 4381. Did he go and look at it? Not in company with me, but he told me he had seen it; in fact I think he was the first to draw my attention to it.
- 19 Dec., 1861. 4382. Did he make any report of it? I wrote a report on the subject to Mr. Bennett, as he had requested me if I saw anything wrong on the roads to report it; I thought, after Clark saying what he did when I mentioned it, that it would be as well to report it to Mr. Bennett, but Mr. Bayley persuaded me not; he said he would mention it himself.
4383. You wrote a report, but did not send it? Yes, and I had Mr. Bayley's witnessing signature to it.
4384. Have you that report? I may have it where I am staying.
4385. Have you any objection to hand it to the Committee? Not the slightest.
4386. Will you send it to the Committee if you find it? Yes. It is witnessed by Mr. Bayley; but he said he thought it might create a great disturbance, and he would mention it himself if I did not send my report in.
4387. What connection had Mr. Bennett with Mr. Collett? Mr. Bennett, being Engineer for Roads, had the general inspection of all roads.
4388. Are you aware whether any further steps were taken? I think not. I left soon after that, to proceed further northerly. I was only working in patches at that time.
4389. Was Mr. Bayley put on as an extra assistant to anyone at that time? No; I do not exactly know what terms he might have been on; but to the best of my knowledge he was on the same footing as myself when Bridge Superintendent.
4390. He had nothing properly to do with this piece of road that you speak of? No; he was over the whole of the southern ascent of the Liverpool Range; that was the extra work he was doing.
4391. What was Mr. Bayley's office then? He was superintending the southern descent, known as the Murrurundi Gap Cutting.
4392. Was he associated with anybody? At that time he was in full charge of the work himself; but subsequently Mr. Collett had jurisdiction over that, in common with the rest of the roads, when he became Commissioner.
4393. At the time you speak of Mr. Bayley was not under Mr. Collett? No.
4394. But Mr. Collett was Superintendent over the portion of the Northern Road which included the faulty piece you speak of? Yes.
4395. What are the duties of the Superintendent of a road as distinguished from those of an overseer? The Superintendent of course has virtually charge of the whole district, and the overseers are his foremen, to watch for him on the various works, as he cannot be always on the spot.
4396. It is the duty of the overseer to watch the contractor at every step? Yes.
4397. And not to vouch for the work unless he thinks it properly done? Certainly not.
4398. Is it the custom with the Superintendents not to pay money till the vouchers of the overseers are received? I believe the overseer has to vouch in order to fill up the form properly, and subsequently the Superintendent vouches, and then the money is paid in, not before.
4399. These two vouchers constitute the certificate to the contractor on which he receives his money? Yes.
4400. And it is irregular to pay money to the contractor without both? I should say so; I should say the Superintendent would not sign without the overseer's voucher, unless the work came under his own immediate notice.
4401. One voucher would not be sufficient without the other? Probably the Superintendent's would be good without the overseer's, but not the overseer's without the Superintendent's.
4402. I suppose it would be quite irregular to pay money without the voucher of the Superintendent? Yes, quite, I should say.
4403. You speak from your general experience of such matters? Yes.
4404. Now, again—What is the duty of the Commissioner of Roads over a Superintendent and overseer? That I cannot define. The Commissioner of Roads, I should say, was principally to audit the accounts in the Office; that seems to me the principal part of his duty, had he a competent engineer under him.
4405. In fact, the clerical department? The clerical department properly belongs to the Commissioner.
4406. Do you think the Commissioner would be acting rightly if he authorized money to be paid without the vouchers of the Superintendent and his overseer? I do not think he would be acting correctly.
4407. Is the Commissioner a qualified person to decide on the way works are done at all? He ought to have had sufficient experience to tell that.
4408. I am not speaking of his competency, but from the sort of duties he does otherwise, which you say are principally clerical, would it be possible for him to know whether the works were done properly or not unless he had been on the spot? No; but there should be a visiting engineer, as at the time Captain Martindale and Mr. Bennett were in office.
4409. What is the duty of the Engineer? To go round and inspect all the roads in the Colony.
4410. Then according to that, there ought to be four officers concerned in seeing that road-works were done properly—the overseer, Superintendent, Engineer, and Commissioner? Yes.
4411. Supposing the Engineer differed in opinion with the Superintendent and overseer? Then I should say the Superintendent would have to give way if the Engineer was in power, as at the time that Mr. Bennett was in office; but they have not been working with an Engineer for Roads lately; the Commissioner has visited and acted also in selecting works in the same manner as Mr. Bennett used, holding the title of Commissioner.
4412. Is Mr. Collett an engineer? I do not think he has ever been qualified as an engineer.

4413. Do you think he is qualified to determine the condition or quality of works, as an engineer would be? He may possibly have acquired practical acquaintance with works, but I certainly could not call him an engineer, or say that he was able to decide on large works, though no doubt he could superintend works and see them carried out according to specification. F. Wells, Esq.
19 Dec., 1861.
4414. Would you like to take his opinion as to the theoretical construction of a bridge, for instance? No; I think that is beyond his capabilities.
4415. Do you think, when a bridge is built, he is capable of determining whether it is properly built? I should say he can determine whether the joints are close and true, and the work correctly done, but not judge of the design.
4416. You would not like to take his opinion of a bridge unless you had an engineer's with it? No, I think not; that is, a bridge of any size.
4417. Then for some time past, works on the Northern Road have been determined on, and the contracts carried out, without any engineer at all? Yes, recently.
4418. None of these three gentlemen—Commissioner, Superintendent, or overseer—have had the qualifications of an engineer. I am speaking of the Northern Road? I consider Mr. Quodling was capable of looking after a bridge, having the bridge designed for him; I consider no man better capable of turning a road out truly and thoroughly.
4419. You are acquainted with Mr. Quodling? Yes; I was up there for over twelve months.
4420. You have had frequent opportunities of observing Mr. Quodling's capabilities and mode of doing his work? Yes, frequent.
4421. And you can speak well of him? Yes, very favourably indeed.
4422. Is Mr. Quodling an engineer? I would scarcely call him an engineer; he has had great experience under a contractor; he may be called a working engineer.
4423. Whose opinion would you rather have of the merits of a bridge, Mr. Quodling's or Mr. Collett's? I would sooner take Mr. Quodling's, I think, from what little I have seen of the Commissioner; I never met Mr. Collett but once, for a day and a night, but I have understood he has not been educated as an engineer; I cannot say whether he has since qualified himself by study.
4424. You have seen Mr. Quodling at work? Yes, as Superintendent.
4425. What should you say of his mode of attending to his duties—do you think he performed them to the best of his ability? I believe he did thoroughly; he was indefatigable in his attendance at the works, and repeatedly over his road inspecting it.
4426. Have you noticed on the road under Mr. Quodling's charge any instances of faulty construction or deviation from the specification, such as you have mentioned in regard to other parts of the line? No, I do not remember any.
4427. Do you think generally that the works passed by Mr. Quodling were turned out creditably? Yes.
4428. You are not aware of Mr. Bayley and Mr. Quodling being associated in the management of the works? No.
4429. That was after you left? Yes.
4430. I may state, as a matter of fact, that Mr. Quodling states, and we have it in evidence in letters, that he declined passing certain works—that he declined certifying for them—do you think it was in the power of the Commissioner after that to pass them? I am unaware how far the Commissioner's powers extend; that is a matter for the Executive to determine; he is the superior officer, the working head of the department undoubtedly.
4431. Do you think it was a safe proceeding for the public? No, I should certainly think not; neither safe for the public nor courteous to the officer employed.
4432. You think it likely the public interest would suffer by it? Yes, I think so. I think the Superintendent should be backed up by the officer at the head of the department, in any case against the contractor, even to strictness.
4433. Do you know anything of the line from Uralla to Armidale? Yes.
4434. Is that the line you have been speaking of just now? No.
4435. Did you lay that out? Yes.
4436. Do you know anything of the way in which it was carried out? According to the Commissioner's direct instructions—on the only occasion I ever saw him.
4437. Did you act according to your own judgment or his? According to Mr. Collett's judgment.
4438. Do you think it is the best line that could have been laid out? I think some deviations might have been made at Saumarez Creek with advantage. I had fixed points given me by which I was to run the line.
4439. Did you suggest these deviations? No, I acted up to the direct instructions I got to run the line from point to point. He had selected a bridge site in company with several people from Armidale.
4440. Was it a well selected bridge site? I think a better might have been selected, as far as the approaches were concerned; the approach upward to the town was made to run straight up a steep hill, and by shifting the position of the bridge a little one way or the other, a much better approach could have been had.
4441. That, I suppose, is matter of opinion? It was a matter patent to any one as to the gradients.
4442. You think a far better line could have been obtained? Yes, much easier gradients.
4443. A more direct line? Not a more direct line, because it was perfectly straight from this point to a certain lagoon at Armidale.
4444. You think there was a better line by going slightly round? Yes, or by shifting the position of the bridge; it might have been a little lower down or a little higher up the creek.
4445. That is a matter of opinion, supposing him as well qualified to judge? He would consider

F. Wells, Esq. consider that the best site for the bridge I dare say, and it probably is as good a site for the bridge as could have been obtained.

19 Dec., 1861. 4446. Is Mr. Collet a surveyor? I should think not, judging by the instructions I receive from him.

4447. Not educated as a surveyor? No.

4448. Do you think he has picked it up? No.

4449. You do not think he knows much about surveying? No, he knows very little of surveying; I can say that from the manner in which he reads the compass; he reads it in the mariner's manner.

4450. What qualifications do you think he has to enable him to judge of works of this character? He is a man of great *vis* and energy, and he ought from experience to be pretty well acquainted with the nature of works, so as to pass them as Commissioner.

4451. Had he not a good character as a road-maker in the Northern districts? No, there was a strong animus against him.

4452. What do you mean by a strong animus? I should scarcely say animus, because that implies a personal strong feeling; but they used to accuse him of making stupid mistakes.

4453. Of your own judgment, you did not think he was a good road-maker? I did not.

4454. And you think the public judgment was also against him? Yes.

4455. Can you specify in what particulars he failed? As one instance, I may mention a piece of work that Mr. Quodling had turned out at Tamworth in a manner that was very creditable to him—a newly-formed piece of road on which Mr. Quodling had spread nine inches of gravel from the creek—and on Mr. Collett's visit to Tamworth, he pared it to the extent of four and a half inches, which was virtually rendering the whole thing useless.

4456. You mean to say that after the nine inches of gravel was spread, he thinned it again? Yes, to make it cover double the space of ground. I saw it being done, and Mr. Quodling informed me it was by the Commissioner's order.

4457. How was the operation that you call paring performed? It was being shovelled off the road to the extent of four and a half inches, and being taken away in carts, when I saw it.

4458. What could be the object of doing that? I cannot say, unless it was for the purpose of making more work appear to have been done.

4459. Would it benefit the contractor? Not in the least; it was a matter of task-work, so much per yard.

4460. It would give the appearance of double the quantity being spread? Yes.

4461. Do you think it seriously impaired the road? Yes; only four and a half inches of gravel would be useless there in anything like wet weather.

4462. You did not visit that work in any public capacity? No.

4463. Can you specify any other instances of mismanagement? No, I do not remember any just exactly at this moment; I did not notice them with a view to ever being asked about them again.

4464. Did you notice some small bridges made by Mr. Collett, when he was Superintendent, over little gullies? No, not particularly; not that I remember.

4465. Did you ever hear it remarked that there were too many of these little bridges over gullies where they were not necessary? No; I consider plenty of culvert drainage on roads rather an advantage than otherwise, even over a dry creek or watercourse; I have seen these dry creeks and runs come down fearfully with rushing water.

4466. Do you know anything of Mr. Coghlan? No; I met him two or three years ago in the Western District; he was then an overseer under Mr. Dawson.

4467. Do you know anything of his qualifications or character? I should imagine he ought to be a qualified man; he has been an overseer to my knowledge for two years and a half.

4468. Did you know anything of him at Melbourne? No.

4469. Do you know anything of Mr. Clements? Yes.

4470. Is he in the Government service now? I cannot say.

4471. Do you know anything of his qualifications or character? I believe he used to drink very hard. At the time Mr. Newcomen resigned the appointment Mr. Quodling was afterwards appointed to, I took charge of the works till Mr. Quodling's arrival, and at that time I had occasion to find fault with many works Mr. Clements had executed as contractor, and to report very strongly against him.

4472. Was he dismissed? No, he was compelled to complete the works as well as he possibly could. He was then a contractor, you will understand.

4473. His work was badly done? Yes.

4474. Do you know anything of Mr. Martindale as a contractor? I have seen him a great deal working as a contractor; but I have not had much intercourse with him, having always held myself aloof from contractors.

4475. Do you know anything of Mr. Hannington? Yes.

4476. What is his character, and what qualifications does he possess? You mean his qualifications as an overseer.

4477. Yes? I do not believe he possesses any beyond that he is a man of common sense.

4478. Would he make a good overseer with a good Superintendent over him? Yes, if he were careful to do as the Superintendent directed him.

4479. You think him an honest man? Yes, I have always considered so; I have known him for some few years.

4480. Do you know anything of Mr. Bayley? Yes.

4481. What of his qualifications? He seemed to be a very good Bridge Superintendent—the same grade I myself held when I first saw him.

4482. Is he a surveyor or engineer? I do not think he is a surveyor; he is so far an engineer that he is a Bridge Superintendent, and understands the measurement of works.

4483.

4483. Do you think he is as well qualified for those duties as Mr. Quodling? I have not had so much intimacy with him, but I should imagine that he was. F. Wells, Esq.
19 Dec., 1861.
4484. You say you are employed in the Western District? Yes.
4485. Has Mr. Martindale any contracts in the Western District? I believe he has some on the Bathurst Road—not where I am employed.
4486. You cannot speak of them? No.
4487. Do you know anything of a nephew of Mr. Collett's? Yes.
4488. Has he got a contract anywhere? No; he is employed as a sort of foreman of works by Mr. Martindale.
4489. Do you simply know that as a general — ? I know that simply as a general fact talked of.
4490. *By Mr. Dalgleish*: You spoke of a cutting as being dangerous—in what way is that cutting formed—how much is cut from the side of the mountain, and how much is formed from the spoil or *débris* from the cutting? I cannot say, but I should imagine there is sufficient taken from the cutting in the side of the hill to make up the width—that the cross section is half and half; one half the road, I should just roughly estimate, is cut from the solid and the other half tumbles out from the spoil—loose soil; but I cannot say, not having seen the drawings, how it was executed; I did not see the cross sections.
4491. You cannot speak positively? I cannot speak positively.
4492. Do you know, of your own knowledge, the formation of the road—the angle at which the stuff stands—the slope of the work, in fact? I do not know whether they have pitched an artificial slope, or whether it is allowed to remain at the slope at which the stuff itself would stand. I should say the stuff taken out there, if I recollect the soil rightly, could not stand at a less pitch than one to one; it might stand at that; of course one and a half to one would be a much safer pitch.
4493. What is the stuff? A red loam, with some shale in beds, if I recollect right.
4494. Do you think it safe, even for railway embankments, to let them stand at less than one and a half to one? Railway embankments usually stand at one and a half to one.
4495. Would not a road with heavy drays going over it, and to withstand heavy rains from the mountain side, require a pitch equal to that of a railway embankment? Yes, one and a half to one.
4496. Do I understand that, in your opinion, this work has not got that pitch? I cannot say whether it has or not.
4497. I understood you to say the creek would undermine the work? That is what I consider, that in times of flood, at least, the creek would rise sufficiently high to do so.
4498. You consider there would be danger from a slip? Yes, from a slip of the artificial surface, either by sap or leakage from the work itself.
4499. You think a retaining wall necessary to prevent that? Yes.
4500. You are not supposed to understand the expense of mason-work from your position? Not from the position I am occupying at present; I do not know at present what is paying for it; it is two or three years since I had anything to do with that kind of work.
4501. Is there any particular name for the place where you sunk half way up your leg when chaining the road—is it the pipe-clay portion of the road? No, that is on the southern ascent; this is the northern descent into Doughboy Hollow.
4502. Was there any pitching put under the metal? No, the metal was broken large and thrown on to the mud in which I sank half way up my leg in chaining.
4503. Is it usual to form roads in that manner? I should say not.
4504. The pitching being laid on the top of the mud, to anyone passing along—Superintendent, Commissioner, or Engineer—it would bear the outward appearance, in the first instance, of having been completed; there would be nothing to show it had not been properly formed? It would be covered by the metal.
4505. So that the Commissioner passing along, without having been informed of the fact by the Superintendent or overseer, would have no means of knowing that the work had not been thoroughly and properly constructed? Not if he saw it fresh a few days after it was completed. Subsequently it might show signs of settlement; through the substratum not being good the metal would settle irregularly.
4506. And this is one reason why it is necessary that the Superintendent's voucher should be received before payment was made? Undoubtedly.
4507. And one reason why the Commissioner could not by any possibility be as good an authority as the Superintendent? Certainly not on such a point as that, because he was not on the spot to witness it, or anywhere near, which the Superintendent should be; at any rate once in each month he should see every portion of his road.
4508. And this portion of road was under the direct superintendence of Mr. Collett? He was directly responsible; it was under the direct inspection of his overseer.
4509. In the same position as Mr. Quodling? And his overseer, Mr. Hannington.
4510. The present plan I think you state is, that the overseer vouches for the correct formation in the first instance to the Superintendent? Yes, and for the quantity delivered, and so forth; because he is there on the spot, if the work is large, to see that no undue advantage is taken by the contractor in spreading his heaps of metal, or anything of that sort.
4511. Can you explain to the Committee what the specific duty of the overseer is? To watch all the contractors within his district; to see that they carry out the works according to specification, and of course then to report to the Superintendent. That is my impression; but I have never been in the position of Superintendent of Roads.
4512. You are conversant with the duties? Yes.
4513. If the overseer were not careful in the performance of his duty, the contractor would have many opportunities of charging for work not actually performed? I think so, undoubtedly;

F. Wells, Esq. undoubtedly; he would have many advantages; for instance, in spreading a heap of metal over a large stone, if there was no one to watch.

19 Dec., 1861. 4514. That is a sufficient reason why the overseer should vouch to the Superintendent? Yes.

4515. The Superintendent examines the work as far as he himself can see it? Yes.

4516. And by making frequent visits, obtains a general knowledge of the formation? Yes; I believe the usual thing is, that he visits once in each month; and if his line is long, that is as much as he can well do, with the papers he has to sign and quantities to take out and vouch for.

4517. What are the duties of the Superintendent? The Superintendent is the man directly responsible to the Minister of Works, but with the supervision or check of the Commissioner, for the portion of road to which he is appointed. I cannot say whether that is an exact outline of his duties, but that is what I consider it to be.

4518. You have answered the question as to whether Mr. Collett is a surveyor? I do not consider him a surveyor, or to have any knowledge of surveying.

4519. You do not know whether he can make a survey? I do not believe he can.

4520. What do you know of Mr. Quodling? I received a letter of introduction to Mr. Quodling, from Mr. Bennett, the late Engineer, who spoke of him very highly, and we were very intimate; when I first went there we lived in the same house.

4521. I mean officially? Of course I have seen his conduct for the twelve months I was there.

4522. You had no previous knowledge of him? No.

4523. What you have stated about his experience as a contractor's agent is from hearsay? Yes, from responsible parties. I may mention Mr. Bennett; Mr. Bennett gave Mr. Quodling a high character.

4524. You mentioned that you surveyed a road from Uralla to Armidale? Yes, a portion of a general survey I made.

4525. What is the duty of a surveyor on a line of road? It depends upon what he is instructed to do. To make a perfect —

4526. Without instructions? If I had discretionary powers, I should make a preliminary traverse.

4527. In this particular case of the line of road required from Uralla to Armidale, what would be the duty of the surveyor? I should primarily, by means of such information as I could get from the Surveyor General, run a straight line roughly through the bush, in order to note that as a datum from which to go; and then I should explore on either side of that straight line for the best road, the nearest and most direct, so as to make as little deviation as possible, and at the same time to insure good soil and formation of ground.

4528. And you would lay out that in a definite manner for the instruction of the working parties? Yes.

4529. When the line of road was pointed out to you, when you were definitely instructed to pursue a certain plan, your duty as a surveyor was superseded? I should not say so, with the single exception of this, that I was required to survey the Commissioner's track instead of my own.

4530. In this instance the Commissioner —? Selected the line of road.

4531. And gave you definite instructions, and by that means usurped the functions of the surveyor, although you state he was incompetent to perform that office? He was incompetent to do the actual working portion of it; he might select a line of road, though no man could know by merely walking over it where a straight line would come. From where Mr. Quodling pointed out that the Commissioner came down, he must have been nearly a quarter of a mile out in his estimate, where he told me to run a straight line.

4532. What is the gradient Mr. Collett has selected? I cannot say; the work there was hurried; Mr. Collett was very anxious to get it done.

4533. You did not take the levels of the line? No, not after leaving Goonoo Goonoo; there were no cross sections beyond that. I made an engineering survey from Wallabadah to Goonoo Goonoo; after that merely a traverse has been run.

4534. In what way could the Commissioner obtain a correct knowledge of the work to be performed, in order that he might be a competent judge of the eligibility of the tenders for the work, if there were no sections? There should be, I consider, a section and cross sections of a very large cutting; for every small job it is not necessary; that description of work is very expensive; it took me three months to make nineteen miles of a survey of that kind; had that been the case, the survey would not have been completed in time for the clearers; the contracts for clearing were let before I had my surveys completed.

4535. Were there no cuttings on that line of road? Yes, there were cuttings that should have had sections taken.

4536. Then it was only a rough approximation? A very rough approximation indeed, unless the Superintendent could take the necessary levels, which Mr. Quodling was competent to do.

4537. In this view the services of a surveyor would not be required at all? With the single exception that the Superintendent could not possibly get on with the survey and attend to his other duties, it would require his constant attention to push that along. Besides, the traverse was another thing that Mr. Quodling could not have managed—the traverse and charting of the line. As to the levelling and necessary measurement of the work, Mr. Quodling could have set that out for himself; he was competent to do that.

4538. You say you think Mr. Collett was a bad road-maker? No, I say that is the opinion in the north.

4539. What is your own opinion, as far as you have been able to judge? I scarcely know; I should not have considered him a very good one; but I have not had much opportunity of seeing his abilities.

4540. What do you know of Mr. Collett officially? I scarcely know in what manner you mean. F. Wells, Esq.
19 Dec., 1861.
4541. In what way have you been brought in contact with him? Only once personally; but I have received instructions from him at different times, which were not very explicit, but subsequently everything was made clear. They were not such instructions as a professional man would have given, and consequently there was occasionally a little misunderstanding; but after an explanatory letter things have been made straight.
4542. You do not know much of his antecedents? Nothing further than that he was not considered a good road-maker by the late Engineer of Roads; that I know for a fact. He was not considered at all competent by the late Engineer.
4543. You spoke of Mr. Bayley, what knowledge have you of him? I met him in Murrurundi, when I was camped near there; he was then in charge of the Liverpool Range and Murrurundi Bridge.
4544. Have you been brought in official contact with him? No.
4545. You have been brought officially in contact with Mr. Quodling? Yes.
4546. So that your estimate of Mr. Quodling is from actual experience? Yes.
4547. While that of Mr. Bayley is merely assumed? Yes, and of course from conversations I have had with him privately.
4548. You state he is not a surveyor? No, I have never heard him profess to be a surveyor at all.
4549. And his knowledge of works has been obtained, in your opinion, by experience gained on the road? I think so.
4550. What is his recommendation for the position of Bridge Superintendent—is he a carpenter? I cannot say; I believe he had experience in Queensland before he came here.
4551. Is he a carpenter? I do not know; I should say not.
4552. He is not a surveyor or engineer? No; I believe he has been on works and learned by degrees. There are many men who are perfectly competent to take charge as foremen of works who have not served their time in an architect's or engineer's office.
4553. Are you acquainted with the mode of superintending works under private contractors? Yes.
4554. What are the duties of what is termed a ganger? I should consider a ganger what I should call a foreman of works or overseer, under the contractor, over the men.
4555. Do you consider that a ganger would rank as what we understand as an overseer? He is, although an overseer, a man of lower grade. Frequently amongst navvies they elect their own gangers.
4556. When on piece-work? Yes; the head man of a gang of working men to direct their operations.
4557. What is a Government overseer—is he not a superintendent of working men the same way as a ganger is? You can scarcely apply that term to a Government official; his duties are rather different, having to vouch for the works on the part of the Government; I do not know whether a ganger has to vouch in any manner for a private contractor; I should imagine not.
4558. He would have to go out of his place if he makes a mistake, very quickly? Of course he would have to answer for that; but he would not have to report in the same manner as an overseer of roads, nor stand on the same footing.
4559. But the actual duties —? The actual duties I consider pretty much the same thing.
4560. Do you know Mr. Moggridge? No.
4561. Have you seen the Bendemeer bridge abutments? Yes.
4562. Are you qualified to judge of the work in these abutments? I did not examine them as a matter of duty, but as far as I could judge of the masonry from its appearance above ground, I consider it very good work indeed—the best distributed rubble work I have seen; the stones all of good size and well distributed; it had almost the appearance of ashlar work on the face.
4563. Rubble work is usually very roughly carried out? Yes.
4564. With a large proportion of mortar, and the stones badly fitted? Yes, the stones do not usually fit well together.
4565. You state that this —? Had almost the appearance of ashlar on the face; I do not know how the stones were packed up on the inside; Mr. Hawkins would know more about that; I did not examine it very closely.
4566. You know nothing of the work below the water line? No, beyond having seen the foundation of the eastern abutments; I saw that before the stone was laid; the first course was laid.
4567. As far as you are able to judge, the work there was well and creditably carried out? Yes, I should say so. The foundation I did see seemed perfectly sufficient and good, and if proper benchings were cut in it, it would carry any abutments.
4568. This was under Mr. Collett's supervision, was it not? It was one of those works he would supervise when he went up and down.
4569. He was not the overseer over it? No, he would look at it as Commissioner; it was under the direct superintendence of Mr. Quodling.
4570. A great deal would depend upon the energy of the Superintendent in a matter of this kind? Of course; it was principally under Mr. Quodling's superintendence, but he had an overseer constantly employed on it.
4571. Was it done by task-work or contract? I forget the terms, though it was let in my presence; I believe it was at so much per yard.
4572. So that, if not carefully supervised, it would be to the interest of the contractor to slum the work? Yes, that was his interest.

- F. Wells, Esq. 4573. *By Mr. Markham:* Have you seen these abutments since they were completed? Yes, a few days before I came away I believe the work was completed; I am not certain about the coping being on.
- 19 Dec., 1861. 4574. Was that previous or subsequent to the floods? I think it was previous to the heaviest flood, but the river had been in flood.
4575. Do you know whether any damage was done to the piers at the time you saw them? I was not close enough then to examine the abutments; at the time I last examined the work closely—more than a month before that—the work was not quite finished, and the floods had not risen.
4576. You have not seen them since? No; I saw them last in June or July.
4577. Did you examine any other line of road except the one you surveyed, between Uralla and Armidale? I was over a great deal of the country, and I think the general line of road was as good as any line that could be obtained; the only deviation might have been made near Saumarez Creek bridge, as I have stated.
4578. The intended site of the bridge is eastward, southward of the present road, between the two roads? Yes, very nearly midway, about a mile east of Saumarez Station.
4579. A mile east of the present crossing-place? Yes, guessing roughly.
4580. Do you consider that the best approach to Armidale—making Uralla the starting-point? Yes. There is one portion very faulty, but I do not think it could have been obviated in any one place, unless the road should be permanently built above where the water stands.
4581. Have you examined the approach to the northward of the present road to Armidale—the upper side of the road? I have ridden over both roads, the road by Saumarez and the Kelly's Plains Road.
4582. Do you think a better line of road could be had to the north of the old line? The road runs northward.
4583. To the eastward? At any rate a shorter line can be found, and I think the soil is very nearly equal in most parts.
4584. Is the soil good for a road? Yes; there are some flats that are not first-rate, and there is a belt of black soil at the back of Saumarez, but you cross that on all the roads.
4585. You stated that some persons from Armidale had accompanied Mr. Collett when the site was chosen for the bridge—do you remember the names of any of those parties? I heard Mr. Gorman stating that he accompanied him, and I think a storekeeper named Hayes and a person called Norton were also down at the time.
4586. Then the principal objection you have to the line chosen by Mr. Collett is its taking a steep ascent from Saumarez Creek? Yes, he told me distinctly to run it straight and not to mind any little hills, for he had plenty of money to cut them down.
4587. The principal ascent is immediately after leaving the creek? Yes. It is only a short distance from a spur, and might be easily avoided; but I did not like to deviate from the instructions the Commissioner laid down; if he chose he might do so afterwards. These instructions were given to me verbally, but he read them out, and I copied them into the fly-leaf of my field-book from a memo. in his book. He gave me the bearings, something near the mark, according to the mariner's reading of the compass.
4588. Are you aware whether any alteration has taken place regarding that road—the entrance into Armidale—since you were there? Not that I am aware of. I do not consider this steep ascent a very great obstacle; I think with expenditure of money it might be made very passable, although the other would not have needed so much money.
4589. Is the site of the bridge anywhere near Saumarez cultivation paddock? It is near an old paddock which you might call a cultivation paddock; it goes through that.
4590. You spoke about the difference in the mode of reading the compass—the mariner's and surveyor's readings—in what does it consist? One reads it by the points of the compass, as north and by east, and so forth; the other reads it by degrees, 360 in the circle.
4591. This part of the Liverpool Range which you have spoken of as having been in a bad state when the metal was put on it, is that immediately at the foot of the descent into Doughboy Hollow? No, about half way down; nearer the top than that. It is where there is a little relaxation of the gradient going up; that is where the dray was bogged.
4592. You stated that you were aware of the difference between shale and trap—do you see any distinction between these (*specimens lying on the table*)? One I should call a hard shale; I do not think it would stand long on the roads; the other is similar to the metal spread on the Liverpool Range; I should almost have thought it came from there.
4593. Is it good metal? Yes, I consider it hard metal; a road formed of that should stand well.
4594. Is it more likely to stand than the other? Yes.
4595. What would be the probable result of putting shale like this on the roads? I think it would churn up like pipe-clay.
4596. What would be the result? It would work into a creamy puddle.
4597. Do you know a part of the ascent, a new cutting, called the pipe-clay portion? Yes.
4598. Would ground covered with stuff like this give that appearance? This is not quite so bad; it was a softer shale than this that was spread there; you can imagine what it would be when I saw a light American trap, drawn by a pair of powerful horses, that could scarcely make their way up, driven by Mr. Lloyd of Burburgate.

Alexander Brodie, Esq., J.P., called in and examined:—

A. Brodie,
Esq., J.P.

19 Dec., 1861.

4599. *By the Chairman*: Where do you reside? At Murrurundi.
4600. Are you a settler? I have a store there.
4601. Are you a Magistrate? Yes.
4602. How long have you lived there? Twenty years, nearly.
4603. I suppose you have travelled along the Northern Road to Armidale? Yes.
4604. You know the condition of it now, and at former periods? Yes.
4605. Do you know Mr. Collett? Yes.
4606. Do you know him well? I just see him occasionally, when he is coming up and down from Singleton.
4607. Does he stay at your house? No.
4608. You are not an intimate friend of his? No; he calls occasionally, when he is going up or down the country.
4609. Have you been acquainted with him since he became Commissioner of Roads? Yes.
4610. You knew him in the capacity of Superintendent formerly? Yes.
4611. What is your general opinion of him as a maker of roads? Well, I never took any special notice, further than that, generally speaking, we rather consider Mr. Collett very active, and very attentive to his duties.
4612. Do you think the roads have manifestly improved since Mr. Collett came into office, as compared with what they were previously? Most assuredly they have; they are decidedly better; so much so that our travelling is spoken of and praised in a very high degree by every traveller, compared with what we had to do in former years.
4613. Do you know anything of a contractor named Martindale? Yes.
4614. Do you know him well? Pretty well.
4615. Not as an intimate friend? Not more than in business matters; I see him going up and down to his works, and talk to him.
4616. Have you noticed parts of the road repaired or constructed by him as contractor? Not all his works; I have noticed some within our range; I have not been on to Doughboy Hollow.
4617. You do not know anything of the Diversion? No.
4618. Do you know any works done by Mr. Martindale as contractor? I know the main range downwards.
4619. Northward or southward? The Liverpool Range.
4620. On which side? The southern side of the range.
4621. That is new work? Yes.
4622. Is that what they call the new cutting? The new cutting.
4623. Is it open to the public now? Yes.
4624. How long has it been open? I dare say six months or more.
4625. Has it been closed again since it was open to the public, to make repairs? Not the whole of it; a small portion of it, one time I was up, I observed was under alterations or improvements.
4626. After the completion of the contract? Apparently after the completion of the work. There was some pitching put on part of the road. In the winter time at certain parts it had become very soft and bad, and it was being pitched—some particular parts of it.
4627. In winter time you say? In winter time.
4628. Was it very rainy weather? Yes.
4629. It became bad in wet weather? Yes—that particular part that they have been altering.
4630. Was there more than one part that became bad? I do not know, but I saw that particular place.
4631. What was the extent of the bad piece? It was not a very large piece.
4632. Were the public shut out from that piece? They could travel round the side. It was rather inconvenient getting up the hill, but it was only a short way; then it was closed by logs being put across.
4633. It was impassable at times? It was at that place, during its repairs.
4634. How long was this after the contract was understood to be completed? It might have been some months after that.
4635. Was it the first heavy rain that occurred? Well, during the whole winter we had a continuation of rain up in the Northern Districts.
4636. And in the end, after these heavy rains, it became impassable? It became soft and boggy, and did not answer well.
4637. Should you not consider that an unusual circumstance for a newly macadamized road? I know this part of the road was at the bottom of the fall of a hill, and very likely there was leakage and soakage of water from the hill behind, which would soften it after continued rains, if it was a level piece of ground.
4638. Was there any water lying on this road? I cannot say; I saw it after the wet weather was over, when they were repairing it.
4639. Had it the appearance of water having flowed over it? I could not say that. The piece of road I refer to was simply being pitched with stones packed together.
4640. Were they taking off the metal? No; I did not see any metal at all.
4641. What was the nature of the repairs? There were a number of large stones all packed together on the piece of bad road; it was what they call pitching, with these heavy stones; and upon that the metal was to be put.
4642. They were putting new pitching on the top of the bad road, and afterwards they were going to metal it? Yes, I should fancy they were.
4643. What was the nature of the top stuff that was so soft at the time you saw it—what kind of stuff was it? Gravel, rather light in colour.

- A. Brodie,
Esq., J.P.
19 Dec., 1861.
4644. What substance is gravel generally composed of? It is generally stony light gravel.
4645. Is a stone subject to be softened by wet—every stone? Not every stone.
4646. Will you look at these stones on the table—that black piece—what do you call that? Ironstone apparently; it is a good hard stone.
4647. Do you think any amount of wet would soften that? No, I think not.
4648. Do you think if a road were properly covered with that substance it would get into the condition you describe? I should imagine that if a road were well made with that, and raked properly, it would not; if it were properly raked up on both sides, so that the water would get away from the road, it should be a good hard road.
4649. Is not that the stuff generally put on the roads in the Northern Districts? That I cannot say. I have seen a great deal of metal on the sides of the road similar to that. As I have said, this particular piece of road was a bottom, with a rise immediately behind it, and I should suppose it possible that during such a continued state of wet weather, with the leakage from the hill, and heavily loaded drays going up and down, this piece would be more liable to give than the higher part of the road.
4650. Look at that other stone—have you ever seen any of that on the roads? I cannot say.
4651. Should you say that is proper stuff? No.
4652. What effect would the traffic have upon such stuff as that? It would crumble it up.
4653. Powder it away? Yes, with heavy drays it would not be durable.
4654. Is there any particular name you would call that? I do not know it.
4655. Can you say whether that stuff was on the road you have been describing? I cannot say, because the road I travelled over was complete. I was not on the road at all during the whole formation of this road. I was never up the hill during the whole time they were making it, but I have been on that road since it was done up and down.
4656. I think you stated Mr. Martindale was the contractor for that? He was.
4657. Can you mention any other parts of the road which attracted your attention, and which have been lately constructed? The whole of that piece of road is the only piece I know anything about.
4658. Only this particular spot that was bad? Another part of the road, nearer to my own place than this, was being made by some party that took it, and was condemned by Mr. Brown when he came up, being considered not to be correctly done.
4659. Who was the contractor? The contractor, I think, was Whiteman; it was not Martindale's contract.
4660. Did Mr. Brown condemn it in his official capacity? I understood so; I know the men were at work, and they suddenly ceased after a visit from Mr. Brown, and it was said Mr. Brown had condemned this work, for not being correctly done according to arrangement.
4661. Was it supposed to be complete? They had passed off a portion of it as being perfect and complete; but it was not sufficiently raised, and the description of gravel that was being put on was not considered to be good, and the cuttings at the sides that they had done were incorrectly done; there was not sufficient elevation to the centre of the road.
4662. This was not a completed contract? It was during the time they were working at it; a considerable amount of work was done.
4663. Was there any money paid for it, do you know? At that time the contractors had not received any money, and I do not know how they settled it. I know the Whitemans had paid a good deal of money in making what they had done; but whether they were paid or not I do not know.
4664. Do you know whether Mr. Collett visited this piece of road that you speak of? That I do not know.
4665. Do you know whether he visited the other road you spoke of—the new cutting? He has been up on the new road; but I never was with him there.
4666. You are not aware whether he approved or disapproved of it officially? No.
4667. What was the result of Mr. Brown's condemning this road—did they make a good road of it? No.
4668. In what condition is it now? It was not a bad road before, but it required to be formed and to have drains cut at the side; it was a very short piece of road.
4669. It is not finished yet? It is not finished; the work was stopped, and I think nothing more was done to it.
4670. With regard to the new cutting, are the repairs done to that? I have understood that that road is done; travelling goes on on it.
4671. It is a good road, as far as you know? I hear no complaints of it; I have not been up lately; at the time I refer to—the winter time—there were considerable complaints of this part of the road where they afterwards had it pitched.
4672. Do you know anything of Mr. Bayley? I know Mr. Bayley.
4673. Can you speak at all as to his character or qualifications? I do not know his qualifications; personally I know him as a very quiet man.
4674. Do you know whether he attended well to his duties? He was always up and down to the works, as I could see.
4675. Do you know Mr. Quodling? I do.
4676. Do you know anything against him as a public officer? I know nothing at all against him.
4677. Do you think he was a good public officer? He appeared a very active young man.
4678. Did he attend well to his duties? Yes, I understood so.
4679. Had the public generally a good opinion of him? Anything I heard about Mr. Quodling was to the effect that he was very strict and particular about the work that was going on.

4680. Was he generally attending to his duties when you passed? He was beyond our district; I have seen him on his line of road.
4681. Can you speak of his official qualifications? No.
4682. Did you ever hear anything against Mr. Quodling's character, that he was intemperate at all? I never heard of such a thing.
4683. Did you ever hear complaints about him in regard to money matters? No.
4684. Do you know Mr. Clements? I do.
4685. Is he in the Government service now, do you know? I think not.
4686. Was he dismissed? I understood he was.
4687. Do you know the circumstances that led to his dismissal? Well, I heard he had misconducted himself in some way and was suddenly dismissed.
4688. Do you know anything of his character at all? I do not know much about him, more than that he used to live about.
4689. Do you know anything of Mr. Hannington, road overseer? Yes.
4690. Is he a tolerably good officer? I do not know anything of his official abilities.
4691. Do you know anything against him? Nothing.
4692. You have not heard anything against him? Nothing.
4693. Did Mr. Collett give you any information about this Committee before you attended? No.
4694. He did not ask you to attend? No.
4695. Did Mr. Quodling ask you to attend? No; I did not see him till yesterday evening.
4696. You are not aware what led to your being called here? No.
4697. I suppose you heard of this Committee being appointed? Yes.
4698. Do you know anything of Mr. Coghlan, who has lately been appointed Superintendent? No; I saw him pass up the road.
4699. Can you recall to your recollection any circumstances connected with a testimonial, as it is called, being given to Mr. Collett some time ago? Yes, I remember something of that. It was shortly after Mr. Collett was removed from his previous appointment and appointed as Commissioner.
4700. Was it a public testimonial? Yes.
4701. Given publicly? Given publicly.
4702. There was no kind of secrecy about it? None whatever.
4703. Was it given on public grounds? It was in this way:—Upon Mr. Collett's leaving our district—where for years before, he had been in the habit of frequently coming up and down, perhaps monthly or so, overlooking the works on the roads—and being removed to another appointment in Sydney, we looked upon it as proper and right that we should notice it; and indeed we were benefited, the roads being in good condition, which we thought was attributable to Mr. Collett; such was the general feeling of persons in the district; and at a meeting held in the township it was proposed that we should invite Mr. Collett to a dinner; and afterwards, in addition to that, a small amount was collected together to be presented to him as an acknowledgment.
4704. A public acknowledgment? A public acknowledgment.
4705. Then it was an acknowledgment for his public services? Yes, it was.
4706. Did you consider that he had been underpaid? No, we did not think that at all; but we had done similar things before to parties leaving our district, without any nice distinctive views in the matter. We looked on Mr. Collett as a very worthy officer who had been doing his duty very well, and we had seen him for years coming up and down in a rough, bushman-like manner, with his stick in his hand, not in a fine stylish appearance, but as a practical man, attending to his official duties very satisfactorily. We had all, to a great extent, benefited, by the roads being in a much improved condition, from the time that Mr. Collett came into the district, and we complimented Mr. Collett on things being as they were.
4707. You were a party to the dinner, and a subscriber to the testimonial? I was.
4708. Did it occur to you as one of the first? I cannot say I was the first, but when it was named to me I joined in it.
4709. You did not think of it yourself at first? No, I did not first move in it.
4710. Do you recollect who first suggested it? There were two or three.
4711. Do you recollect who they were? Mr. Lewis Cohen was one.
4712. Who is Mr. Lewis Cohen? A storekeeper in Murrurundi.
4713. Was he the very first that spoke to you about it? I do not remember exactly whether he was the very first, or one of the first.
4714. Who were the others that mentioned it with him? Those that moved in it generally. There was casual talking of getting this up. I cannot tell you the beginning of it. Some of the Wightmans had something to do with it, and George Brodie, and two or three more.
4715. Are these the names of the persons you alluded to when you said two or three were present? Yes; it would occur in this way, that a person coming in would speak of it; the matter was talked about a little, and a meeting was held shortly after.
4716. You went to the meeting, I suppose? I do not know that I was at the first meeting.
4717. Do you remember whether Mr. Martindale was an active person in first suggesting it to you, or getting it up? Mr. Martindale was in it amongst the others.
4718. Not more prominently than others? I do not know that he was more prominent. He was at the meeting and at the dinner.
4719. Was Mr. Greer a mover in it? I do not know anything more than that I saw him at the dinner.
4720. Was Mr. Miller? No, I do not think so. He does not live in our district; he lives at Scone.
4721. Was Mr. Donaldson a mover in it? He was not a mover in it, but he was at the dinner.

- A. Brodie,
Esq., J. P.
- 19 Dec., 1861.
4722. Were any of Mr. Collett's subordinate officers concerned? Mr. Williams was at the dinner.
4723. Was Mr. Quodling in it? Mr. Quodling resides at Tamworth.
4724. Then it was confined to a small circle about Murrurundi? Yes, simply in our little town.
4725. Did Mr. Robertson, the Secretary for Lands, join in it—he is a Murrurundi man, is he not? He was not there.
4726. You did not apply to him? No, he knew nothing at all about it.
4727. Did Mr. Loder join in it? No.
4728. Would you have expected it of him to do so? At that time he was not frequently down in the town. I do not know that he was expected to join in it; no doubt he was acquainted with the circumstance. He lives sixteen miles away, and he was not there, at all events.
4729. Are you sure that Mr. Martindale and other contractors were not the originators of this affair? That I cannot say.
4730. Do you look on it as a general expression of opinion? In this way:—In a little township such as ours, perhaps anyone who had contributed to the testimonial, or been at the dinner, might have done it, not from any positive feeling, but because others were doing it. A few parties who had a disposition to recognize Mr. Collett's action amongst them, and to mark his leaving the district in an appropriate manner, got it up, by applying to their neighbours and others to join in it.
4731. It is easy enough to get these things up? Yes, there is not any very great difficulty, because in fact in some respects there is a general feeling to go to a dinner and enjoy themselves of an evening.
4732. Without much reference to the merits of the case? Not in all cases. I believe many persons would have attended that had no special views.
4733. You would not think much better or worse of a man on account of his having got a testimonial? Generally I think those who contributed did so with the view of making some little acknowledgment of the estimation in which he was held; though I admit that persons would also contribute and go to the dinner without any distinct feeling on the subject.
4734. You consider that your own feelings were shared in by a good many others? I do.
4735. You did not hear of anyone joining in it who disapproved of it? No, I did not hear anything of the sort.
4736. Did Mr. Thomas Evans join in it? I do not think he did.
4737. How was it he was not applied to? I do not know. He lives away a little bit, two miles.
4738. Did you find that many respectable people held aloof? No, I did not understand that parties who were not there held aloof; it was not thought they were opposed to it.
4739. I suppose it was rather a manifestation of friendly feeling than anything else? It might be something in that way.
4740. What was the sum of money presented? £40 I think.
4741. And it was presented expressly on that ground, as an acknowledgment of his public services? As an acknowledgment of his services as a public officer, in having satisfactorily, as we considered, discharged his duties to our advantage. We looked upon the state of the roads at the time as being decidedly very advantageous and beneficial to us, and we thought that Mr. Collett had been the chief actor in that matter.
4742. You have had no share in any contracts, I presume? None whatever.
4743. Should you not think it rather an awkward position for a public officer, who had the supervision of contracts, to receive sums of money from contractors in any shape? If contractors only did it, it certainly would be.
4744. How would you feel it yourself, if you were a public officer and had to supervise the work of contractors—would you not feel that you were doing a rather ambiguous thing if you took money at all from contractors? Some views might be held of that kind, but I do not know whether they would apply very forcibly to this case. The contractors were like other people who paid money towards this testimonial—some of them at least.
4745. You are not aware that they were more active than others? No; there were only Mr. Greer and Mr. Martindale about our neighbourhood.
4746. Were there any other Magistrates besides yourself concerned? There were no others resident in the township; the nearest resides eight or ten miles away.
4747. Has your attention been called to the construction of any of the bridges along the road? Yes, I have seen them.
4748. Do you think they are well-built bridges? The cheap bridge we have near our part is a good bridge.
4749. Was it built under Mr. Collett? Under Mr. Collett.
4750. Who was the contractor? Mr. Martindale.
4751. Is it a good bridge? Yes.
4752. It is between two towns? Between Murrurundi and Haydon Town.
4753. Is it a large bridge? It is a good width, very commodious.
4754. How long has it been built? About four months.
4755. Do you know anything of the new bridge at the Doughboy Diversion? I know nothing of the Doughboy Diversion at all.
4756. Do you think the bridges in general are made wide enough? Well, other bridges are decidedly not made wide enough, but this bridge at Murrurundi is a very suitable bridge indeed, and very unobjectionable in its width.
4757. You cannot tell the Committee whether the Doughboy Diversion works are finished or not? They were expected to be finished within a few days when I left home.
4758. You cannot speak personally of them? No.

4759. *By Mr. Markham*: Previous to the time of Mr. Collett's having left, before he was appointed Commissioner, you have spoken to his general character as a Superintendent of roads—you spoke favourably in that respect? Yes.
4760. Have you ever heard a contrary opinion entertained amongst the people in Murrurundi and the neighbourhood? No.
4761. You have not heard anything against Mr. Collett? Not until the appointment of this Committee.
4762. From your experience, you consider that the roads have improved latterly under Mr. Collett's supervision? Yes.
4763. As a general rule? In every way. The roads are very good indeed. In travelling up and down the country we get along so comfortably and so well; there is no bad road at all I should imagine; and some years ago we had shocking, miserable roads, and could not depend on travelling at all.
4764. You attribute the improvement principally to Mr. Collett's attention and supervision? I attribute it to the public outlay upon the roads, and to Mr. Collett, who was the officer having the active direction of it.
4765. Is it your opinion that the public moneys have been well or badly laid out under Mr. Collett's superintendence? I have not sufficient knowledge of the circumstances to give any distinct answer; I do not know what amount of money has been paid; I can only speak of the fact of the roads being improved to what they were some years ago.
4766. With regard to this testimonial, you state it was a public testimonial? Yes.
4767. There was no privacy whatever with regard to it? No.
4768. And you state that the first party who mentioned it to you was Mr. Lewis Cohen? Yes.
4769. And subsequently Mr. Wightman and Mr. George Brodie? Yes, it was in this way—parties coming in would speak of the circumstance having been thought of.
4770. Is it your impression that these parties mentioned it before any of these contractors—Martindale or the others? Well, I do not know; Mr. Martindale was just about like the rest; I cannot say whether he might not have named it as well as others.
4771. But your impression is that Mr. Cohen was the first? Yes; Mr. Cohen and others were talking about the matter.
4772. Did the contractors take a more prominent part than other inhabitants of Murrurundi? I know of no contractor being concerned in it but Mr. Martindale; I do not know that Mr. Greer was working about there; Mr. Martindale was engaged on his works that way, and he lived a little further down than my place; he was the only contractor I ever saw at all about it.
4773. So far as it came under your own particular notice, did Mr. Martindale take, or appear to take, a more active part than any other inhabitants of the town? Mr. Martindale was connected with it; he was talking of it and had the matter in his view as well as the others, and he and others had a meeting which I was not at; I believe Mr. Martindale was at the meeting, and moving in it, getting forward this dinner.
4774. And was at the dinner? Yes.
4775. From your own knowledge you cannot say whether he was more active than Mr. Lewis Cohen and the other parties you mentioned? No, I cannot say.
4776. You do not know whether he was so much? He was active enough; he was stirring about in it and speaking of it. I never was at the meeting and do not know what position he took there; but in coming out and in he would speak of the circumstance and about the dinner, where it was to be and things of that sort. I never met him anywhere else about it.
4777. Were you present at the presentation of the testimonial? Yes.
4778. Was it a thoroughly public affair? As public as it possibly could be.
4779. Was it presented after the dinner? After the dinner, in the evening.
4780. Was it known to be a testimonial from the inhabitants generally? Of course the persons who subscribed to the testimonial were the persons who presented it, but it was supposed to be the public action of the place. It was originated at a meeting understood to be held in our little township; and afterwards, when a dinner was arranged for, and an evening appointed, it was agreed amongst those moving in the matter to present this purse at that time.
4781. Do you know if there was any publication of it—whether it appeared in the newspapers or not? I saw it noticed in the papers, but I do not know who inserted it.
4782. A sort of report of the dinner and proceedings? No; it simply notified the fact that the dinner had been held, and the purse presented to Mr. Collett at the time.
4783. *By Mr. Hoskins*: When did you see Mr. Collett last? Not since he was up at the opening of the bridge.
4784. Has Mr. Collett ever had any conversation with you with reference to the appointment of this Committee? Never; I never met him or saw him with reference to it.
4785. You say the roads have been much improved since Mr. Collett has had the management of them—you allude to the roads near Murrurundi? In the vicinity of Murrurundi, and farther down; our own vicinity particularly.
4786. How long has Mr. Collett had charge of the roads? I imagine it might be ten years since I have seen him coming up and down upon the roads.
4787. Have there been more men employed on the roads in the last ten years than there were in the ten years antecedent? Yes; I should say many more.
4788. Therefore do you not think it reasonable that there would be an improvement in the roads, from the much larger number of persons employed? Yes, I would decidedly consider it to be owing to the labour and outlay bestowed on the roads; but Mr. Collett having been, as we knew, the chief man in our district managing the roads, to him of course we were rather disposed to give any praise for the result. Of course we expected the roads to be improved, on account of the great deal of work done and the money expended.

- A. Brodie,
Esq., J. P.
19 Dec., 1861.
4789. Do you know the amount of money appropriated for the maintenance of the roads during the last ten years? No; but it must be a large amount.
4790. Do you know the road between the foot of Morgan's Range and Murrurundi? Yes.
4791. Has that been improved in the last ten years? When we cross the river, on the upper side of the river, it has been improved.
4792. Between the river and Murrurundi the road has been improved? Decidedly.
4793. What is the distance? I dare say five miles.
4794. Do you know the amount of money expended upon it? No.
4795. You do not consider that any great merit is to be attached to Mr. Collett for improving the roads, inasmuch as there have been increased sums of money voted for that object? Properly speaking there is no reasonable cause why we should have acknowledged Mr. Collett at all. I can now remember its being spoken of to other gentlemen, who made the remark that Mr. Collett was very well paid for his duties, and that there was no necessity for any acknowledgment at all. Perhaps that might be the correct view; but, as I have said, there is a pretty general disposition to hold evening meetings, and have a dinner, and so on.
4796. Were these persons who made this remark asked to contribute to the testimonial? I do not know.
4797. Who were they? One gentleman, Mr. Wright, made that remark to me.
4798. Who is Mr. Wright? A Magistrate, living about ten miles away.
4799. Do you know whether the road alluded to, between the river and Murrurundi, was let by public tender, or performed by day-work? That piece of work had been going on for a number of years; the first way in which the work was done was by the overseer with men under him, employing the men and paying them weekly or daily wages; but afterwards I understood that pieces of that road were let by contract to parties at certain prices.
4800. Just tax your memory—did you ever hear of the gross sum of money expended on that piece of road? No.
4801. You never heard that a lump sum of £3,500 was voted for that piece of road from the River Page to Murrurundi? I cannot say I remember any amount of money that was either voted or expended.
4802. However, I suppose you know there were a considerable number of men there for a lengthened period? Yes, I know a number of men were employed by the overseers in the first instance, when the roads were being begun under Mr. Collett, and the system was not generally approved of; in fact the overseers seemed to do as they pleased, and to do very little work, so that for a very considerable time the roads were managed less properly than they are now.
4803. Will you be kind enough to state in what way Mr. Collett's management of the roads met your particular approval—something which induced you to join in the testimonial? I think I explained that, in the simple fact of the roads being improved and Mr. Collett being the acknowledged actor in the matter; it was chiefly on that account that the testimonial was given, the persons concerned in it not inquiring very nicely into the matter. I do not know that it could be looked upon as any positive acknowledgment that the thing was really well done on the part of Mr. Collett, because the persons engaged in getting up that testimonial did not enter into that, but they looked simply at the facts that Mr. Collett had been a resident for a great number of years, that he was about to leave, and that the roads had been greatly improved under his management.
4804. Were the lists kept in stores for persons to give their contributions, or were contributions solicited by persons who went round the township? There was a meeting at which there was a list brought forward and the names were put on it; I never saw a list in any store.
4805. Do you happen to know whether persons went round soliciting contributions to this testimonial? I cannot say about that.
4806. Did you ever hear it? No; I know there was a committee appointed; I could name some persons who were acting in the matter.
4807. Will you please to name the committee? I think George Munro had some business in that, and also Mr. Lewis Cohen; and at the meeting that had been held on the subject their names were mentioned, and they were active in getting subscribers; and I know that Mr. Martindale was also getting subscribers, but I do not know whether he was one of the committee.
4808. Was he taking about a list? I suppose he might have had a list; I think Mr. Martindale applied to parties, and that through him there were many put upon the list.
4809. Was he a member of the committee, can you say? I imagine he was.
4810. Was Mr. Clements a member of the committee? No, he was not residing there.
4811. Was Mr. Clements? I do not know.
4812. Can you state from your own knowledge whether Mr. Martindale was taking round a list soliciting contributions? I think Mr. Martindale was a member of the committee, and that he was acting with the others.
4813. Did the other persons you have alluded to go round the town? I do not know whether they did.
4814. Do you know whether Mr. Martindale solicited subscriptions from any of the men working on the road? I am not sure of that; I do not know.
4815. Did you ever look over the list of subscribers? Yes; I have seen some of the names of subscribers, but I do not remember any of his men on it.
4816. Was Mr. Wightman, the publican, a subscriber? Yes, and Mr. John Wightman.
4817. Had Mr. Wightman a contract at the time under Mr. Collett? Not at that time.
4818. Can you speak with any degree of accuracy? I believe he had not; it was after this that Mr. Wightman had a contract.
4819. Do you know when Mr. Collett finally expressed his approval of the work on the Liverpool Range? No.

4820. Do you know the date when it was formally opened? No.
4821. Was it a subject of rejoicing? There was no special notice of its being opened, because the first part of that work was done, and some time elapsed before it was used; they brought it down to the part where there was no road at all, and there was a second contract to join it on to the main road. The first hill-cutting was done and left in that way for some considerable time, and then this other work was contracted for, by Mr. Martindale I think, from the main road round the face of the hill to join the new road down the hill, and there was some time between the two works. I am not sure whether he had got to Doughboy Hollow before he commenced this second contract; I believe he had.
4822. Was the upper portion opened before this was formed? It could not be travelled upon, because it stopped at the foot of the hill.
4823. Can you tell me whether it was opened for the use of the public? There was no special notice of it.
4824. Was it previous to this testimonial being subscribed that the new road was opened? No, I do not think it was opened then; I am sure it was not.
4825. How long has it been opened? It is not four months I should say.
4826. How long is it since this testimonial was got up? It was in April, I think.
4827. When was Mr. Collett made Commissioner of Roads? I do not know; some short time before.
4828. Was not Mr. Collett Commissioner of Roads when this road was thrown open to the public? Yes, of course he was.
4829. It was not previous to this testimonial? No; I believe they were working on the second contract at the time; that is, the first cutting from the top of the hill to a certain place where it stopped in the bush was done, and had been so for a considerable time, and all it required was the second part to be made to connect it with the road over the hill; and this took some time to have done.
4830. Then the first portion of the contract had been finished previous to this testimonial, but the second had not? Yes.
4831. Do you know what amount of money was involved in the second contract? No.
4832. What was the extent of it—how many lineal yards, at a rough guess? Say three-quarters of a mile.
4833. The lower part? The lower part of the road.
4834. How many men were employed on it, at a rough guess? A good many Chinameh in the first instance, and other gangs of men.
4835. Do you know whether it was let by public tender? I think it was; I do not know though; I really have not paid all this attention to it.
4836. Is it not customary to make the Magistrates of the district acquainted with the fact of tenders having been invited? If I remember rightly I have seen in the Court-house the documents for the second contract as well as the first.
4837. Were tenders invited? Yes; because these papers were specially for the notice of parties tendering.
4838. Do you know who were the tenderers? I do not.
4839. Do you know whether more than one person tendered for this contract? I do not know; but I imagine the tenders are here in Sydney. We do not know anything of it; parties simply come and look at the specifications of work required to be done.
4840. Is that contract complete now? Yes.
4841. Is that the portion of the road where you complained that the road was so soon in bad order after being opened? No, it was the upper portion of the work.
4842. How soon after that contract had been completed was the road in a bad state of repair? It was during the heavy rains of last winter this bad road occurred, and that piece of road might have been done some months before, and all the men away from it.
4843. Can you say whether any portion of that had been metalled? I do not know. I never was on the road during the time of making it. I was on it once or twice after it was finished, and then it was covered up with nice gravel over it; as to the under-work I do not know what it was.
4844. What description of gravel was it—a bad description mixed with loam, or good creek gravel? It was taken from the surrounding hills.
4845. Was it a good description of gravel? I do not know how it would do in wet weather; it was a beautiful road in dry weather.
4846. Do you know whether there was any pitching underneath this ballast? No, I do not know that.
4847. Would there be any difficulty in obtaining there good trap, like that piece on the table, to metal the road? No. I do not know whether there is any on this side of the hill; but there is plenty of stone of that description lying about the hills all round about it.
4848. There would be no difficulty in obtaining plenty of good metal? No.
4849. You said that a portion of this line was in a very bad state of repair, and in holes of water? I never saw it while it was in that bad state, but the drivers of drays and others that were passing about, were making very loud complaints of some particular parts of the road that had given way, so that the drays would bog and sink through.
4850. I think, in reply to Mr. Forster, you stated that it appeared as though it had been submerged in water? I do not know that I said that. All that I saw of it was whilst they were at work pitching it, packing large stones on the road. Then it was not metalled, and travelling had to be done by going into the bush a little way.
4851. That is on the new line? Yes, on the first cutting.
4852. Do you think the bad state of the road arose from the want of efficient drainage? There were drains on the side of the road, but I fancy that if the road had been raised more it would not have become so boggy.

- A. Brodie,
Esq., J.P.
19 Dec., 1861.
4853. Then the road was too flat? It must have been, I think; I cannot say positively.
4854. Do you know much about road-making? No; and besides I was not on the road more than once or twice, and that was when it was a good road; but I afterwards heard complaints that they could not get up.
4855. Do you know whether people went the old road in preference? No.
4856. Is the road in good repair at present? Yes.
4857. Did you ever examine the bridge at Murrurundi? I have seen it often, passing and repassing, and have stopped a bit about it.
4858. Is the timber properly tarred and painted? I should say it is.
4859. Did you examine the flooring? Yes.
4860. What timber is that composed of? I do not know.
4861. Did you ever see the specifications of the bridge? Yes.
4862. Did you ever read them intently—being a Magistrate you would take some interest in these matters? Yes, I took some little interest in them. Specifying the nature of the timber, do you mean?
4863. Yes? I know on one occasion there was a dispute about the kind of timber.
4864. Between whom? The parties on whose ground the timber was being cut would not allow it to be removed, and it was stated that it was not the description required to be put in the bridge. However, that only casually came out during the inquiry. The timber they were moving away from this place was a certain description of timber, and when the specifications were looked at, it was seen that the timber required was not the sort that the person complained had been cut on his land.
4865. Do you remember what kind of timber was specified to be used as the flooring of the bridge? Not exactly; I know it to be hardwood—either gum or ironbark or some other hardwood; not white gum, which was considered objectionable.
4866. Do you know whether white gum has been used? No.
4867. Did you ever hear that white gum has been used for the flooring of the bridge? No.
4868. Do you consider white gum a durable timber? No, I understand it is inferior.
4869. Are the residents in your neighbourhood in the habit of using white gum? They do not like it; they may use it occasionally without its being known; but they always reject it.
4870. Is it customary to have a copy of the specifications of any public contract, that is being performed in any locality, kept in the Court-house, for the inspection of the Magistrates and the public during the time the work is going on? During the time the contracts are being tendered for, chiefly with a view to —
4871. Not afterwards? It is not specially necessary; the Magistrates are not to inquire into these works.
4872. Then as a Magistrate you would not have the opportunity of inspecting the specifications? I could.
4873. Where? In the Court-house.
4874. Well, I asked you if they were kept there? Yes, a copy is left there always.
4875. Do you happen to know whether there is a copy of the specifications of the Doughboy Diversion works in the Court-house at Murrurundi? Yes, I believe it is there.
4876. Do you know whether those specifications have been departed from? Altered?
4877. Yes, altered? I have heard they have been altered.
4878. Did you frequently see Mr. Quodling in Murrurundi? Yes.
4879. How frequently? Perhaps once a fortnight, or once a week sometimes.
4880. Where did he usually stay? At Wightman's Hotel.
4881. Did you ever hear that Mr. Collett had complained of Mr. Quodling being too frequently at Murrurundi? No, I never heard that he complained.
4882. Did you ever hear of any complaints having been made that Mr. Quodling had been too frequently there? No.
4883. Do you know Mr. Williams, an overseer? Yes.
4884. How long has he been there? Nine months, or more.
4885. Do you know whether he had been accustomed to road-making before he received that appointment? No.
4886. Did you ever hear? I understood he had not been accustomed to road-making.
4887. Did you ever hear Mr. Collett at any time state that he had not acquired practical experience? I have heard that Mr. Collett should say so; I should not at all say he did not say so, but I do not remember his having stated it.
4888. You did not hear him? No.
4889. Do you know Mr. Hannington? I do.
4890. Do you know whether he had ever been accustomed to road-making previous to his appointment? I should imagine not; I do not know.
4891. Can you state the number of contracts that, during your residence at Murrurundi, or of late years since Mr. Collett has superintended the road, have been allotted to persons without being subjected to public competition? I could not tell you.
4892. Has Mr. Collett been in the habit of allotting contracts without competition in the vicinity of Murrurundi? That one for the short piece of road that the Wightmans had was given I think in that way, and some others might have been.
4893. Or any extensions of contract? I do not know.
4894. What sort of contract was this of Wightman's? A short piece of road, about a quarter or half a mile, to be formed and gravelled as I understood; but it did not satisfy the Superintendent, and when he came up he disapproved of it, and the parties were stopped in their work, and they did not go on it again. I did not see any more people working on it, excepting the usual workmen that go on the road under the overseer.
4895. Do you know the amount of money? I do not.

4896. Do you know whether Mr. Wightman has been paid? . I do not. I heard they were dissatisfied that they were not paid at the time, but I have not any positive knowledge.
4897. There is a bridge opposite your house? There is.
4898. What is the length of this bridge? It is a very short one over a gully.
4899. Do you know the cost of the construction of that bridge? No.
4900. Do you know whether it was let by public tender—was it sixty feet long? No, not fifteen feet.
4901. Who was the contractor? Mr. Martindale.
4902. *By Mr. Dangar*: Are you aware that Mr. Greer made a complaint respecting Wightman getting the contract you spoke of? No.
4903. Did you hear that that contract was made by Mr. Williams at Wightman's billiard table? No.
4904. Did you ever hear that Mr. Williams let this contract to Mr. Wightman without applying to Mr. Collett—the gravelling from the part you speak of to Brodie's bridge, and then on towards Scone ten miles? No, I do not know anything of that.
4905. Did you ever hear that any party remonstrated with the Commissioner about this contract? No, I did not hear that even.
4906. Are you aware of Mr. Williams letting contracts to others without Mr. Brown's or Mr. Collett's knowledge? I am not.
4907. You spoke of Mr. Collett's superior management. Since Mr. Collett has been Commissioner and Mr. Brown Superintendent, can you observe any difference in the management of the roads—between Mr. Collett's and Mr. Brown's superintendence? I could not tell you that; I do not know sufficient to say.
4908. Does Mr. Brown give satisfaction? Yes, I imagine he does.
4909. You are aware, as an old colonist, that the weather has a great deal to do with roads? Yes.
4910. In fine weather —? They are good.
4911. But in wet weather how are they? I cannot say so much for them in wet weather; it makes a very great alteration.
4912. I believe you were speaking of the wood used in the Arnold Bridge—was there not a lawsuit respecting the wood? There was some of the wood taken down from the bridge at its commencement; there was a party complained of taking away their timber, and in that way the quality of the wood came under notice; but Mr. Martindale explained by saying he required this timber for scaffolding, and afterwards there was considerable interest to see that this timber should not be used in the bridge, and in fact the greater part of it was never taken away from the land where it was cut.
4913. You are aware that very large special grants have been allowed for the Murrurundi District, apart from the amount voted per mile? Yes.
4914. From the Gap towards Scone, large special grants? Yes, I am aware we have had our full share.
4915. From the amount of money granted by these special grants, great improvement ought to take place in the roads, no matter who was Commissioner or Superintendent? Undoubtedly so.
4916. Do you think Mr. Williams an efficient road overseer? I am not a very good judge whether he is or not.
4917. Is he a fair sample of those who preceded him? We formerly had the overseer pretty constantly amongst the men, and it is somewhat different now to what it was.
4918. Is Mr. Williams quite equal to Mr. Clements? Yes, quite equal to Mr. Clements.
4919. Are you aware that Mr. Clements has been dismissed a second time? Yes.
4920. Did you hear the cause of his dismissal in the first instance, when overseer to the Government? I could not say precisely.
4921. Was he deficient in his accounts? I understood so.
4922. Were his cheques dishonored? Yes, they were.
4923. Given for pay to the men? Yes.
4924. Since that he has been appointed again as bridge overseer? Well, I understood he held some little appointment of that kind at the foot of the range.
4925. Is he so now? No.
4926. Dismissed a second time? Dismissed again.
4927. Were you summoned to attend this Committee? Yes.

A. Brodie,
Esq., J.P.

19 Dec., 1861.

FRIDAY, 20 DECEMBER, 1861.

Present:—

MR. DALGLEISH,
MR. DANGAR,

MR. HOSKINS,
MR. MARKHAM.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

Mr. Zechariah Hawkins called in and examined:—

4928. *By the Chairman*: What are you? A road overseer.
4929. Where do you live? At Uralla.
4930. That is between Armidale and Liverpool Range? Yes.
4931. On the other side of the Moonby? Yes.
4932. Has your attention been called to this Committee at all? Yes; I have a summons to attend it.

Mr. Z.
Hawkins.

20 Dec., 1861.

- Mr. Z. Hawkins.
20 Dec., 1861.
4933. Do you know what the Committee is sitting upon? Upon the Resignation of Mr. Quodling; it is specified in the summons.
4934. And also upon matters connected with public works in the Northern Districts generally? I understand so.
4935. Who is the officer immediately over you? Mr. Coghlan.
4936. Mr. Quodling was before his resignation? Yes.
4937. What was he called? A Road Superintendent.
4938. You are an overseer of roads? Yes.
4939. Can you state what your duties are from beginning to end? My duty is to see works carried out according to the specifications.
4940. But there are some works in regard to which you have no specification—the maintaining of roads, for instance? Yes, some minor works.
4941. You have to superintend and see that the men do their work properly? Yes; to mark it out and direct them.
4942. In regard to the specifications—what parts of the works do they relate to? The building of Bendemeer bridge, and the clearing of the new line; these are the only specifications I have. There are some other specifications which Mr. Quodling gave me when he went away, for the building of Uralla bridge and the bridge at Saumarez Creek.
4943. For the rest of the works they were considered not to be required? No.
4944. In what shape are these specifications placed in your hands? They are written documents.
4945. Do they state in detail everything required to be done? Yes, it is supposed they do.
4946. Do you generally find they do—you say they are supposed to do, but do they? Not always; sometimes there is reference made to the plan in the specification.
4947. But can you get the plans sometimes? Yes.
4948. The plans and specifications together give you, in detail, everything to be done in every work? Yes.
4949. Have you always been furnished with these as much as were required, in regard to these works you speak of? Yes.
4950. In full? Yes.
4951. You say your duty was to see the work carried out according to the plan and specification by the contractor? Yes.
4952. If you found the work was not being done properly by the contractor, what was the next step? I reported it to the Superintendent.
4953. You did not exercise any influence in stopping the work? No; I reported to the Superintendent.
4954. Would you inform the contractor of it at the same time? Yes.
4955. Is it the practice of the contractor to stop when you make an adverse report? Not always, unless the Superintendent stops them; it is in the power of the Superintendent to stop the works.
4956. You have nothing to do but to report? No.
4957. In what shape would you make your report—in writing? Always in writing. If there were anything to which I considered attention should be drawn, I should report immediately.
4958. How often did you see the Superintendent? Sometimes once a fortnight, sometimes once a month.
4959. Do you think that often enough? I think it was; I had no control over him.
4960. Do you think it was sufficiently often for the public interest, to see him once a fortnight, or as often as you have? Yes.
4961. What is the nature of the work at Uralla? Building a bridge; one of the minor bridges, about sixty-three feet long.
4962. How long were you under Mr. Quodling? About ten months.
4963. Can you state what the duties of a Road Superintendent were, or are, so far as you know them? He has to point out to the overseers what is necessary to be done; he has a long length of road to go over, and to point out to the overseers what is required to be done; he has also the management of the expenditure of money.
4964. Supposing your reports against the works are not noticed—? If anything serious were going on I should stop them.
4965. I thought you said you had no power to stop them? I should take upon myself to do so if the Superintendent did not come to see them.
4966. Suppose the contractor would not stop? I would make a report again.
4967. Did you find that ever occur? No.
4968. Have you found it your duty to report against the works under your charge at all? I think I did report to Mr. Quodling at one time about the Bendemeer abutments.
4969. Will you state the nature of your report then? As far as I can recollect; it was with reference to the quality of the work not being good.
4970. Not according to the specification? It was built according to the specification.
4971. What was the particular fault then? That the stones were not sufficiently worked to come into courses properly. The specification was that it was to be rubble work, or the outsides might be in courses, and the coursing stones were improperly bedded in some places.
4972. Do you mean that they did not properly meet? They were not evenly bedded.
4973. Was this the only fault you found? That was the only fault I found.
4974. Was that the only time you had occasion to find fault? Yes.
4975. Did you report that to Mr. Quodling? Yes.
4976. What was done in the matter? Mr. Quodling said it was done according to the specification.
4977. Was there no notice taken of it at all? No.

4978. Did Mr. Quodling report your report again? I am not aware.
4979. Was your certificate necessary to the payment of the money? Not altogether.
4980. The money could be paid without it? It is usual for the overseer to make up the vouchers and state the quantities in detail, and then to sign.
4981. Have you ever known money paid without your voucher? No.
4982. Would you think it irregular if it were done? I should think so, but it never occurred.
4983. Do you think Mr. Quodling visited and inspected your works and attended to his duty as much as could be expected when he was over you? Yes.
4984. What do you think of Mr. Quodling's competency? I think he was very competent.
4985. You think he understands his duties fully? Yes.
4986. You consider yourself competent to form an opinion? Yes.
4987. Is Mr. Quodling anything of an engineer? I never saw him carry out any works. I have not been long with him. The works were marked out before I went there, but I believe him to be capable of engineering.
4988. Then how was it, when you reported in this particular case, that certain works were improperly done, that Mr. Quodling did not report again? I do not know whether he did or not.
4989. Was nothing stopped from the work? No, the work went on according to the specification.
4990. Then the objection you took was not properly an objection to the contract at all? Not properly; I had no power over that. The contractors generally work to the specification, and they do not feel bound to do more than that.
4991. Do you know whether the bridge still retains the fault to which you objected? It has been damaged by the flood.
4992. Was that in consequence of any of the defects you reported against? I think not; I think it was owing to the work being green; it had not dried before the flood came.
4993. You do not think the contractor deviated from his contract, but that he performed it faithfully? Yes, according to his agreement.
4994. Whose fault was it that the bridge was not built as you thought it ought to have been? I cannot say whose fault it was, but I should say the fault lay in the specification.
4995. Do you think the specification ought to have included what you said? It should have been stated in detail.
4996. You think it was the fault of the person who drew the specification? I do not know who drew it.
4997. Was it Mr. Collett? I do not know; I think it was before his time.
4998. Who was the contractor? Mr. Dowell, of Tamworth.
4999. How much did he gain by not doing it as you suggested? It would have made a great deal of difference if it had been done as I proposed. The stone is granite—a hard stone—and if it had been wrought and bedded properly, it would have made a good deal of difference in the cost of the work.
5000. Was Mr. Collett in the habit of visiting the works you were placed over? I saw him once.
5001. What were his duties? I do not know what his duties were.
5002. Was it in the power of the Superintendent and yourself to vouch for any work that was done? Yes.
5003. Then your voucher, and that of Mr. Quodling, were necessary to the payment of money? Yes.
5004. Do you think it would be irregular for the Commissioner, or anyone above you, to pay the money, unless these two vouchers were given? I think it would.
5005. Do you know whether that has ever been done? No.
5006. You cannot tell? No.
5007. Do you know anything of a testimonial having been given to Mr. Collett? No.
5008. You did not subscribe to the testimonial? No.
5009. You have no knowledge of Mr. Collett's qualifications? No.
5010. Either as a surveyor or as an engineer? No.
5011. Have you had any conversation with anyone, about this inquiry, before you came here? Only such as was passing about among people in general. I had no particular conversation with anyone.
5012. What is the general feeling as to Mr. Quodling's competency—is he generally looked upon as a good Road Superintendent? Yes, I think so; I think he was generally looked upon as a competent person.
5013. Who is looking after your work now that you are away? No one; Mr. Coghlan is down also.
5014. Is Mr. Coghlan over you? Yes.
5015. Has he attended to his duties in the same way as Mr. Quodling did? Yes.
5016. Do you think he is well qualified? I do.
5017. How do you know he is in town? I have seen him.
5018. This morning? Yes.
5019. What induced you to come down? The summons.
5020. Did you not ask for leave? No; Mr. Coghlan was away at Armidale, and I considered myself bound to come down; I did not know to the contrary; I shewed Mr. Coghlan the summons afterwards.
5021. *By Mr. Dalgleish*: What are you? A road overseer.
5022. Are you any trade? Not in particular.
5023. Were you brought up to any trade? I was brought up to a trade, but I have not followed it for many years.

Mr. Z.
Hawkins.
20 Dec., 1861.

- Mr. Z. Hawkins.
20 Dec., 1861.
5024. What was it? The tanning and leather-dressing business.
5025. How long have you been employed on the roads? Seven years, within a month or two.
5026. In what capacity? As an overseer.
5027. From the first? From the first.
5028. What experience had you in road-making before you got that employment? I had had a good deal of experience in building and other matters.
5029. Your particular duty, I think you said, was to see to the clearing of the line and building of a bridge? Yes.
5030. Was it a stone or a wooden bridge? A wooden bridge.
5031. Had you had much experience in wood-work? Yes.
5032. Obtained during these seven years? Principally; before that I had experience in wood-work.
5033. The plan and specification were placed in your hand when you began a work? Except in minor works; in small works the plan and specifications are not given in detail; we know how they are to be done.
5034. You accept that as your guide to see that the work is faithfully done? Yes.
5035. You have spoken of Bendemeer bridge, and stated that you reported against the abutment—what induced you to do so, if the work was carried on according to the specification? I stated to Mr. Quodling my opinion that the work would not stand.
5036. And when the work was opened it did not stand? Yes; but the work had not time to dry before the flood came.
5037. You stated that, when the work was progressing, you reported to Mr. Quodling your opinion that the work would not stand? Yes.
5038. And afterwards you stated that, in your opinion, the only fault of the work was that it was not dry? No; that was the cause of the damage by the flood, because the mortar had not dried. There is an abutment on each side; one had dried, the other had not; the one that had dried was not so much damaged as the other that was wet.
5039. Yes, but that does not explain your statement; you have said you reported that the work would not stand—I understand from that, that it would not stand under any circumstances, or do you qualify that in any way? That was my opinion, that it would not stand the pressure of heavy floods.
5040. Have you had much experience in mason-work? Yes, a good deal.
5041. Do you think it would be consistent with common sense to ask a contractor to put course work or worked stone instead of rubble stone? No, I would not do it; but as far as I recollect, there was a clause in the specification that the exterior may be coursed with courses not more than twelve inches above the surface of the ground.
5042. At whose option? At the option of the contractor I think.
5043. That is to say, the contractor had liberty, if he thought proper, to expend £400 or £500 more upon his work than he was compelled by his contract to do? The stones were pretty good stones for rubble work, but they did not work properly without hammering.
5044. Do you remember the terms of the contract—was the option of its being done by course work left with the contractor or the overseer, in the specification? It did not say.
5045. Have many specifications passed through your hands? Yes.
5046. Is it usual for specifications to be made out in that vague manner? No, it is not; that is the only one I recollect seeing made out in so vague a manner.
5047. You were asked what would the contractor gain by not making the work course or squared work? I said I thought it would be something very considerable, as the stone is very hard.
5048. You think the contractor would gain something considerable by making it rubble instead of squared work? Yes.
5049. In what way would the contractor gain, seeing that his contract was for making rubble work? I think the contractor had no particular gain, for I think he had taken it at the specification.
5050. Then the contractor had no gain whatever? No; the tender was put in according to the specification.
5051. What would be the difference in the price between rubble and hewn work? For granite?
5052. For the same material as that used in the bridge? Hewn work would be from 50s. to £3 a yard dearer than rubble.
5053. Rubble work is the stone as it is roughly hewn from the quarry, in oblong blocks? Yes.
5054. Not in any way cut by the chisel, but rough from the quarry? Yes.
5055. The other is squared work of equal thickness? Yes, and jointed properly.
5056. Hewn in straight lines—perfectly straight, so that there would not be above an eighth of an inch of mortar between the joints? More than that—half an inch.
5057. How much would there be in rubble work? An inch or more at time; the stones do not bed evenly, so that the mortar is of irregular thickness.
5058. The action of the flood would have far more effect upon the rough and irregular surface of rubble work, and also on the greater thickness of mortar between the joints, than it would upon hewn work? Yes; there is greater room between the joints for the water to get in.
5059. That, in your opinion, was the cause of the damage to the abutment? That is the wetness of the mortar.
5060. As rubble work was it faithfully executed? Yes.
5061. Were the piers protected by a coffer-dam? The foundations were kept dry while the bottoms dried; the bottoms were set in cement.
5062. Were the coffer-dams kept up while the piers were drying? Not the upper part; the specification specified the dams to be kept dry for a certain time—two days I think.
5063. If the coffer-dams had existed, would they have given any protection to the piers? Not in the least.

5064. Would the person who made out the specification be bound in any way by the sum of money at his disposal—Would he not have to make his arrangements for the work in proportion to the sum he had to build the bridge with? I think so.
5065. If he had a limited sum, it would be impossible for him to build the bridge with squared stone? Yes.
5066. Can you give some idea of what would be the gross amount a bridge built with squared work would cost over a similar bridge built in rubble work? I could not answer immediately.
5067. Do you not know how many yards are in the bridge? No.
5068. Would the cost be double? Yes, fully that.
5069. More than that? Fully that.
5070. Do you know Mr. Bayley? No.
5071. Did Mr. Collett inspect this bridge while you were overseeing the erection of it? Mr. Collett looked at it as he went by.
5072. Describe to the Committee the inspection Mr. Collett gave to this work? He went with Mr. Collett to look at it. I forget whether it was finished or not; I think it was, when he saw it.
5073. Were you present? No.
5074. How long was he engaged? He could not have been engaged half an hour, for the coach was going through at the time, and they only stopped to change horses.
5075. Can you describe how they inspected it—did they stop in one place or move about from pile to pile—or was Mr. Collett satisfied with walking across the bridge—? I was not present.
5076. Were you not at the works at all? No, the work was completed.
5077. During the time you were there Mr. Collett did not inspect it? No.
5078. Can the inspection of a bridge, or of any other piece of work of a similar kind, after it is completed, be of any value, excepting so far as the outer appearance is concerned? In some cases—not in walls.
5079. So that if it had been squared work instead of rubble, a fair facing might have been given to the work, and yet it might have been carried out in a very disgraceful way? Yes, it might have been.
5080. And the inspection of the Commissioner would have been useless—he would not have known from the outward appearance but that the work had been carried out in the most substantial manner? No.
5081. Have you been on any other work when Mr. Collett has inspected it? No.
5082. Have you been under Mr. Collett for any length of time? Since he took office at the beginning of the year. I have not been immediately under him at all. I have been in the Upper District.
5083. Is he Commissioner of the Upper District? Yes.
5084. Has he inspected the work there at all? Yes. I have seen him there only once.
5085. During the entire year? Yes.
5086. You refer to the Bendemeer bridge, after you had left the work? Yes.
5087. He never inspected any work while you were actually employed upon it? No.
5088. Are you acquainted with any other overseers or Superintendents upon the Northern Road? Only to see them; I was not acquainted with any.
5089. This bridge at Uralla, is it a single span? No, three spans of twenty feet each.
5090. In what manner is it trussed? It is not trussed; it has single beams; cills are laid down and the piles are mortised into them.
5091. The piles are not driven, but cills are laid upon the bed of the creek? Yes, and three uprights are fixed and nailed with iron spikes at the bottom.
5092. Has all the iron-work specified been attached to the bridge? Yes.
5093. Who is the contractor for that portion of the work? Mr. Heritage had the contract for building, and Mr. Mitchell supplied the hewn and sawn timber.
5094. Have you been employed upon any of Mr. Martindale's contract at all? No.
5095. Have you been employed upon any large works other than public works of the same description? No.
5096. You say you have had great experience in building—what particular line of building? House building.
5097. *By Mr. Markham:* You say when you reported to Mr. Quodling that you thought the work would not stand—what was Mr. Quodling's reply to you? I think he said he had no power over it—it was carried out according to specification.
5098. Your opinion, in regard to its not being able to stand, was entirely independent of the action of the flood? Independent of that.
5099. It was an imperfect work, without taking the flood into consideration at all? Yes, I think so.
5100. Notwithstanding that it was consistent with the specification? Yes.
5101. The fault did not lie with the contractor, but with the party who drew the specification? Yes.
5102. You are not in a position to say where the specification had its origin? No.
5103. You only know that there was a specification? Yes.
5104. You know the site of Bendemeer bridge? Yes.
5105. Do you think it the best site that could have been chosen? In my opinion it is not.
5106. Where do you suppose a better site would have been? The old crossing-place had many advantages over any other place that I know of.
5107. Do you know any reason why the present site was chosen? No; the work was partly done when I went up there.
5108. Have you seen the abutments since the flood? Yes.

Mr. Z.
Hawkins.

20 Dec., 1861.

- Mr. Z. Hawkins.
20 Dec., 1861.
5109. Has any material injury taken place? Yes, very much, especially to the one which was finished just before the flood.
5110. Has the mortar been washed away? The mortar has been entirely washed out.
5111. Is the abutment so seriously damaged as to involve its being taken down again? I should say so.
5112. That abutment in particular? Yes.
5113. Do you know anything of the foundation of the abutment? I was present when that one was laid.
5114. What foundation had it? On the shingle.
5115. Was it good sound shingle—a good sufficient foundation? Yes.
5116. Were the abutments built square, or was there any cut-water? It was built square.
5117. Is it usual to build pillars of that kind square? The abutment pillars?
5118. Where they are likely to come in contact with a flood? Yes.
5119. What would you prefer to have them, square or with a cut-water? I should say to splay them back, the abutments.
5120. You stated that you were not present when Mr. Collett inspected the works, therefore you cannot say whether his examination was a strict one or otherwise? No.
5121. Do you know anything of the bridge over Saumarez Creek? Yes.
5122. Who has the contract for that? Mr. Heritage.
5123. He also has the contract for a portion of the Uralla bridge? He had the building of the two bridges. Mr. Mitchell supplied the timber, and Mr. Davis the iron.
5124. Have you examined the new line from Uralla to Armidale? Yes.
5125. Do you consider it an improvement upon the old line? I consider it a very great improvement; it will take a good deal of making.
5126. When it is made do you consider that it will have a good foundation? Some of the ground is bad.
5127. On the whole do you think it an improvement? The road is pretty well straight from the Barley Field to Saumarez Creek.
5128. Where they descend from the top of Martin's Gully, will it be an improvement upon the present road? No; I think the road in that part, particularly, is out of place.
5129. Are you aware who laid out that road? Mr. Wells, I believe, the surveyor.
5130. Are you aware whether he had any instructions from anyone else to survey that line? I understood him that he surveyed it under Mr. Collett's instructions.
5131. You consider that approach to Armidale defective? I do.
5132. Do you know any better? Yes.
5133. Which side of the present road? The old road is better.
5134. Did you oversee the causeway that was placed across Martin's Gully some time since? The banks of the creek were cut down and filled in, that was all we could do. There was no causeway made.
5135. There was a considerable quantity of gravel laid along the gully? There has not been in my time.
5136. How often has Mr. Collett been in the district since you were overseer? I have only seen him once to my knowledge.
5137. Where were you at the time Mr. Collett visited Bendemeer Bridge? I think I was up the road; I saw him going up; I did not see him coming down. It was coming back, I think, he visited the abutments.
5138. *By Mr. Dongar*: Have you charge of Moonby Ranges? Not now; I had for the first four or five months.
5139. You were stationed at Bendemeer? I was stationed there at that time; I am at Uralla now.
5140. Is the contractor proceeding with the bridge at Bendemeer now? No, he is doing nothing to it.
5141. Is there any dispute between him and the Government? None that I am aware of.
5142. It is contracted for I believe? The wood-work was contracted for, and I do not think the contract has been cancelled; I have never heard so.
5143. Who is the contractor? A person named Chowne.
5144. The same who built the Tamworth bridge? His brother.
5145. The plan of Bendemeer bridge was drawn in Mr. Bennett's time? Yes.
5146. How many miles of road are apportioned to your district? About forty-five; I had more, but since these clearing contracts have been taken I have less.
5147. You never heard any complaints as to Mr. Quodling's general superintendence? No.
5148. Or of his attention to his duty? No.
5149. You never heard the public speak of his being absent from his duty? No.
5150. No complaints about his being at Murrurundi too often? No.
5151. Has Mr. Coghlan visited your district since he was appointed? Yes.
5152. When Mr. Quodling left, after his resignation, did he leave his papers with you? No. I got a paper from the office authorizing me to take charge of Mr. Quodling's work; but, before I left Tamworth, Mr. Quodling received a note stating that Mr. Coghlan was appointed.
5153. So Mr. Quodling handed his papers to Mr. Coghlan? I believe so.
5154. You believe Mr. Quodling is fully competent to act as a Road Superintendent? Yes.
5155. *By Mr. Dalgleish*: You stated that Mr. Quodling was, in your opinion, perfectly capable of carrying on engineering? Yes.
5156. Will you describe to the Committee what you understand engineering to be? Such as taking sections of any work, laying it out, and planning.
5157. Taking the proper levels? Yes.
5158. Designing the whole work? Yes, and laying it out.
5159. What means of information have you had upon this subject? Only from conversation with Mr. Quodling; at least principally from conversation.

5160. Do you consider yourself perfectly capable of giving an opinion as to the competency of a gentleman to perform the duties of a civil engineer, from conversations you have had with him? I should not give it as an opinion that he was perfectly competent.
5161. What do you give it as then? I have never seen him at work.
5162. You have given it as your opinion that he is perfectly competent? I have said so, and I believe yet that he is able to carry out his work.
5163. Give us the foundation of that opinion? From conversations on the works—from his understanding the general terms of the works.
5164. What term was it you applied to the shape of the abutment which you said should have been used? Splay back.
5165. The abutment is the mason-work built at the edge of the river? Yes.
5166. So that the double form, or V form of the cutwater, could not be given—it would be folly to give it in that way, as it would afford a projection for the water to cut away the work? It would be a means of warding off the logs; in case of logs coming down it would ward them off where a right angle would take them.
5167. Could this have been effectually carried out with rubble-work? Yes.
5168. At what additional expense? None at all.
5169. Would not the square of the work have to be carried as far as it is at the present time, and afterwards a half V or splay back carried in addition? It would have made a better job of it.
5170. Would that have to be the case? It must have been, on account of the footing.
5171. Would not that have been an addition to the work? Yes.
5172. Would not that have been an addition to the expense? Yes.
5173. How then do you say that it would not be an additional expense? I did not understand you rightly.
5174. When you do not understand, endeavour to understand the question, because it puts the matter in a wrong light. In order to give stability to the splay back, would it have been necessary to cut back the natural bank, and to make a support of mason-work? Yes.
5175. How many yards? From fifteen to twenty yards on each side.
5176. That would have been frontage only? The front and side.
5177. How many cubic yards would that be? I am speaking of cubic yards.
5178. What additional expense would that have been? More than £50 on each side.
5179. What would have been the expense of excavating and laying the foundation of this masonry? I include that; the excavation was easy.
5180. Would not the foundation for this splay back have required to be carried as deep as the foundation for the abutment? Yes.
5181. The coffer-dam must have been extended? Yes.
5182. Would the coffer-dam not have been an additional expense? A little.
5183. How much? £5; a few more slabs would have been all that would have been required.
5184. Does your fifteen or twenty yards of masonry include the foundation? Yes; I consider about one yard or four feet would have been sufficient for the splay, with what might have been subtracted from the present angle.
5185. What is the face of the square you talk of at the present moment? The whole face?
5186. The square face of the masonry, right angles to the masonry. These questions have arisen from your stating that a splay back would have been far better than the square abutment, which forms the abutment now? Yes, I have stated my opinion that it would have been better, but it was not in the plan.
5187. How much of this square face is now exhibited—what depth is it into the bank? It is stepped up from the base to the top; at the top it is five feet, at the next seven, at the next nine, and so on.
5188. What is the depth at the base, from the face of the pier to the river at the embankment? 27 feet of base.
5189. What length of line would have been necessary in order to give this the splay back form? The same length back would have done; it would have had to be wider in the face.
5190. One yard of masonry could not do that? The same distance back—it would depend upon whether you had a long splay back or a short one.
5191. At what angle would you call it a short splay back? About one in three; I should think that sufficient.
5192. How many feet of face would you give under those circumstances? About four feet; the present angle might have been cut a little.
5193. That is a very little from square? But it would have saved the right angles that have been knocked by logs coming against them.
5194. I cannot see that—of what form is the river there—a great deal will depend upon that—is it a straight stream? A straight stream.
5195. This one in three is little other than square, and the logs must come with their whole force upon the splay back? Still there would have been a body of work at the back of the splay; there is nothing now at the right angle of the work if it only splays back one in three—there is the great body at the back of three.
5196. The injury is done principally at the angle itself—one foot in three would be only four inches in one foot—seeing that the whole damage, or the greater part of the damage, must come at the first foot, at the corner, that is only four inches, and in rubble-work it would be almost imperceptible—additional strength would be of no moment. In order to obtain an angle of 45° for the splay back, what would have been the necessary length of face of extra rubble work to be carried out? I do not know.
5197. It would have been considerably more than you have stated? It must have been from six to seven feet.

Mr. Z.
Hawkins.

20 Dec., 1861.

- Mr. Z. 5198. That would have doubled your calculation? Yes; but I thought the present acute
Hawkins. angle might have been cut away to form an obtuse angle.
5199. It is an obtuse angle, is it not—square? No; a right angle.
20 Dec., 1861. 5200. What is that, an obtuse angle or an acute? An acute angle is sharp.

Stephen George Shairp, Esq., called in and examined:—

- S. G. Shairp, Esq. 5201. *By the Chairman*: State what your office is under Government? Chief Clerk of the
Road Branch in the Public Works Department.
5202. Immediately under the Commissioner for Roads? Yes.
20 Dec., 1861. 5203. Did you take your orders from him? I take all my orders from the Commissioner.
5204. How long have you held your office? Since the 15th of January I have been Chief
Clerk.
5205. Have you been long in the public service? About three years.
5206. Will you state to the Committee concisely what your duties are? In the first place I
countersign all cheques signed by the Commissioner.
5207. Cheques for money? Yes, all cheques for payment; the Commissioner signs them,
and I countersign them.
5208. Is no money paid without your counter-signature? No.
5209. Both these signatures are necessary to all payments of money? Both.
5210. Are there any other signatures? No.
5211. These two signatures constitute an order for payment? Yes, if the credit at the
bank is sufficient they will pay a cheque if signed by the Commissioner and myself.
5212. They would not pay otherwise? No.
5213. Is that the way contractors are paid? They are paid by these cheques.
5214. In no other way? In no other way.
5215. Has your attention been called to the investigation going on before this Committee?
In which way, my attention?
5216. Have you noticed from the papers? Yes, I have been aware of it from the com-
mencement.
5217. No one has spoken to you then? I have spoken to two or three about it.
5218. You have not received any instructions or communications from Mr. Collett with
regard to this inquiry? I have received no instructions certainly; I have heard from Mr.
Collett about the proceedings.
5219. You have heard from him? He has told me many things which have occurred, when
he has been up here.
5220. Did he tell you you were likely to be examined? Never; he told me it was not
likely; I said I thought I should be.
5221. Why did you consider it likely? I considered that being the Chief Clerk, and all
the payments and correspondence having gone through my hands, it was most likely I should
be examined.
5222. You state that contractors are always paid by cheques signed by you and counter-
signed by the Commissioner? Always.
5223. There was no other way? No other way of getting money. There is a certain
credit opened every month for the Commissioner for Roads; up to that amount he can draw,
but he signs the cheque and I countersign it.
5224. Was there any other preliminary—was it entirely left to the Commissioner to give
cheques to pay the contractor, without any further check upon himself than your signature?
The usual mode of payment is on vouchers which are sent in by the Superintendents for the
quantity of work done on the different roads; we check them in the Office, and if the calcula-
tions are correct we enter the amounts in the cheque-book and draw cheques.
5225. That is the usual way in which contractors are paid? Yes.
5226. Has that practice been always pursued? There have been cases where the
money has been paid without vouchers. In some cases we paid on a recom-
mendation from the Superintendent that money should be paid, without having any vouchers;
but in those cases the vouchers have been sent afterwards. The money has been paid
because the Superintendents might not have been long in the service, and have been unaware
of the practice; and we have not wished to keep the contractor out of his money.
5227. Do you consider this an irregular practice on the part of a Superintendent, to recom-
mend payment without forwarding a voucher? It is a decidedly irregular practice.
5228. You allowed it to pass only in certain cases where you had no reason to suppose there
was anything wrong, because you did not wish to keep the contractor out of his money?
Yes.
5229. Did this happen often? Not often; I was a Road Superintendent before I received
my present appointment.
5230. Then you know exactly what are the duties of a Road Superintendent? Yes;
I was then up at Gundagai, and owing to the delay in the mail in sending down my
vouchers, Captain Martindale authorized me to send a telegram stating the amount due to
the contractor, and paid on my responsibility.
5231. You were held responsible? I was held responsible. I would send a telegram—
“Please pay the contractor £500 on account.”
5232. Did you exercise this power on many occasions when you were Road Superintendent?
I might have done it in a dozen cases.
5233. You always sent proper vouchers? The same day I made out the vouchers, and sent
them down by post.

5234. In your case you never heard the practice questioned? No.
5235. You were able to satisfy the authorities that all was done right? Yes.
5236. There were no complaints made about it? I never heard of any.
5237. Does this practice still prevail with regard to the Road Superintendents—that they are allowed to send recommendations in, and furnish vouchers afterwards? Not generally.
5238. You say it has been allowed in certain cases which you consider exceptional? Yes; we have paid money on the recommendation of the Road Superintendent at Albury, without any voucher.
5239. Will you describe this voucher—what this voucher consists of? It is merely a statement of a certain amount of work done, with the value of it specified at the bottom by the Superintendent and overseer, as being a fair payment for the work performed.
5240. Is this the kind of document you refer to (*handing a paper, Appendix D, page 9, to the witness*)? Yes, this is the form of voucher upon which we pay, excepting the foot note.
5241. That is the proper form? Yes.
5242. Is it necessary in all cases to the correctness of a voucher that it should be signed by the Superintendent and also by the road overseer? The road overseer usually signs in the first instance, and then the Superintendent certifies to it.
5243. Are those two signatures necessary to the validity of the voucher? We usually have the two signatures before we send the receipted vouchers to the Audit Office.
5244. It would not pass the Audit Office without the two? It might pass without the overseer's, because in some cases there is no overseer under a Superintendent.
5245. Then the overseer's signature is not absolutely necessary? No, the Superintendent's, the Engineer's, or the Commissioner for Road's.
5246. Would the signature of the Commissioner for Roads or the Engineer's be equivalent to that of the Superintendent's? Yes.
5247. Then the signature of the Superintendent is not necessary where you have that of the Commissioner or Engineer for Roads? If the Commissioner or Engineer were to certify to any amount it would not be disputed at the Audit Office—it would be considered sufficient.
5248. Has it been usual for the Commissioner for Roads to sign vouchers? The Commissioner for Roads has certified for vouchers where there has been only an overseer. It is a usual thing where there is only an overseer, as in the first districts of the Southern and Western Road. In addition to the overseer's certificate, the Commissioner has always signed the vouchers.
5249. That was in cases where there was no Superintendent? Yes.
5250. Has it been usual for the Commissioner, where there has been a Superintendent, to sign vouchers? It has not been usual.
5251. Do you know any cases where it has been done—that the Commissioner has signed without the Superintendent's name where there has been a Superintendent? I do not know of any cases that have come within my own experience.
5252. Do you know any cases where Mr. Collett has signed vouchers or has passed vouchers where there was a Superintendent? He has passed vouchers, but has not signed them.
5253. What is the meaning of passing them? He has drawn a cheque for the money and paid it to the contractor, but he has not signed the voucher—he has initialed the cheque—book.
5254. In cases where the Superintendent has not signed the voucher? Yes, I have known three, four, five, or six cases.
5255. Can you state some of the dates? I am not positive as to the exact dates.
5256. Within the last six months? Within the last two months.
5257. Mr. Collett has given cheques without the vouchers being signed by the Superintendent? Yes, he has given them in Mr. Quodling's case—the present case.
5258. In any other cases? I think in one other case, on the recommendation of the Superintendent.
5259. In these cases you mention—in Mr. Quodling's case—was there a recommendation from the Superintendent at all? Not that I am aware of; it did not come into the Office.
5260. You say that this has never been done in any other case that you are aware of? In one case only that I am aware of since I have been in the Office.
5261. Will you mention that case? The only one case that I recollect is that of Mr. White.
5262. In that case you say there was a recommendation? Some half-dozen payments were made on the recommendation of the Superintendent.
5263. This recommendation of the Superintendent was equal to a voucher? Yes.
5264. In the case of Mr. Quodling there was neither recommendation nor voucher? Not at the time of payment.
5265. Did you consider it an irregular procedure on the part of the Commissioner? The first payments that were made were when the Commissioner was away at the north. I had instructions from the Commissioner by telegram, and I was not then aware whether he had had communication with Mr. Quodling or not, but having his instructions to send up a cheque to be signed by him, I acted according to his instructions.
5266. But after further inquiry you found these cheques had been signed without any vouchers having been signed by the Superintendent? I knew there were no vouchers at the time, because I always checked the amount due upon the vouchers before I entered them in the book, but I did not know whether Mr. Quodling had seen the Commissioner, and recommended the payment.
5267. You found afterwards that he had not? I found afterwards that there were no vouchers and no recommendations.
5268. And you heard afterwards that Mr. Quodling refused to give either? Not till latterly.
5269. Do you now think that is the case? Yes; because Mr. Quodling was requested to furnish them, and he has not done so.

S. G. Shairp,

Esq.

20 Dec., 1861.

S. G. Shairp, Esq. 5270. Did you know such a case to occur in any other instance, or with any other Superintendent? I do not; such a case may have occurred, but not during the time I have been in the Office.

20 Dec., 1861. 5271. Where was Mr. Collett at the time this practice occurred? On two or three occasions he has been at the north, or west, travelling, and I have had either a telegram or letter from him.

5272. A telegram signed by himself? Yes. At least I presume the original of the telegram we received from the Office, signed by the clerk, was signed by himself.

5273. You considered that a sufficient authority for yourself? Yes. I act under instructions either by letter or telegram.

5274. You had no alternative but to obey them? I had that, and nothing else.

5275. Did you mention this circumstance to any other officer of the department—this circumstance of cheques having been given without vouchers? No, I did not mention it to any one, for the next clerk who is under me was aware of it at the time.

5276. Who is he? Mr. Chisholm.

5277. There was no report made of it from you or the department? No.

5278. No further notice was taken of it officially? No further notice was taken of it, except this—as we required a voucher for every payment made, we made one out ourselves in the Office, and sent it to obtain a certificate; at the same time we notified the amount as having been paid.

5279. Have you since had vouchers for this work from Mr. Quodling? No, we have never applied to him.

5280. Who was the contractor? Mr. Martindale.

5281. Can you state in round numbers, approximately, the amount that was paid away in this way? About £3,000.

5282. Can you state the duties of the Commissioner of Roads—what your idea of them is? His duty is to appropriate the different amounts voted, to sign all the documents, and pay the money.

5283. Are his duties, then, principally clerical, as attached to a Central Office in Sydney? I imagine so.

5284. Is it his duty at all to act as Inspector of Works? According to the "General Conditions," it is necessary that the Commissioner or Engineer for Roads should satisfy himself that a contract is properly completed before the final payment is made.

5285. Would it be possible for the Commissioner for Roads to judge of the completion of a contract which he had not watched from time to time? I should imagine not.

5286. I suppose he must depend a good deal, in forming his final judgment, upon the judgment of the Superintendent and of the Engineer? Decidedly.

5287. Is it the duty of the Commissioner of Roads to take the place of the Superintendent at all, or of the Engineer for Roads, or do you consider that his duty is rather merely nominal? I consider that the Commissioner's supervision is more nominal than otherwise.

5288. It is not properly a scientific supervision? I think not; what is carried out by the Engineer for Roads is the scientific supervision.

5289. The Engineer for Roads and the Commissioner are the persons upon whom the public have to rely for the proper performance of these works? The Engineer for Roads and the Superintendent, but principally the Superintendent.

5290. Is it the Superintendent's duty to be constantly watching the works while they are being done? Unless he has an overseer.

5291. What do you consider to be the duty of a Superintendent of Roads such as Mr. Quodling? To lay out any works that are to be carried out on his road, and to see that they are carried out according to the specification, and to recommend advances to be paid on account of these different works.

5292. If he sees that work is being improperly performed, what is his duty with regard to that work? In the first instance to speak to the contractor, and if the contractor refuses to remedy it, to write to the Commissioner.

5293. To make a report? Yes.

5294. He should do that in writing? Yes.

5295. Would it be competent to report personally to the Commissioner on circuit—would that answer the purpose? I think so.

5296. When the Superintendent is placed in his office how does he acquire any knowledge of his duties—how is he made to understand them—does he get instructions? When any particular contract is being carried out he has a copy of the specification sent to him, and the contractor is not supposed to commence work until the Superintendent has set out the work and marked where the drains are to be cut.

5297. The Superintendent is bound to see the works carried out according to the specification placed in his hands? He is bound to do so.

5298. Are plans also given to him? Not in every instance; where there are plans he is bound to see them carried out.

5299. Whenever he saw the contractor was deviating from the plans and specifications, together or alone, it would be his duty to stop the work, or to report if he did not stop? Or to refuse payment, unless the contractor had some authority for departing from the specification. Occasionally the Engineer for Roads might be on the spot himself, and see that some deviation was advisable, and he might in such case direct the contractor to depart from the specification; the Commissioner might do the same.

5300. Would it not be their duty to communicate the deviation to the Superintendent for Roads? It is the usual way to do so, but if the contractor had a written authority, it would be sufficient if he were to show that to the Superintendent.

5301. If the Superintendent were not in any way informed of it, how would it be possible for

for him to do his duty? He could only inquire of the contractor, or write down to the department to inquire whether any alteration had been made.

5302. With regard to these cases in which you say money was paid without the voucher of Mr. Quodling, do you know why Mr. Quodling refused to vouch—have you ever been officially informed of that, or informed in any way? I do not think we have any communication in the Office.

S. G. Shairp,
Esq.
20 Dec., 1861.

5303. Was his refusal to vouch founded upon any previous report or remonstrance of his? I have seen a letter of Mr. Quodling's, in which he stated that the works were not being carried out according to specification.

5304. In how many cases did this occur? I recollect one instance in which he makes specific complaints, and another in which he states that the works are not being carried out satisfactorily.

5305. Was this somewhere about the time he refused to vouch? We had received no signed vouchers from Mr. Quodling at that time. We received no letter stating his objection to sign.

5306. You say he was making remonstrances and reports—I ask whether that was about the time that you had not received vouchers from him? There might have been payments made within ten days or a fortnight.

5307. Do you think the two circumstances were connected in any way? There was no official notice sent to me.

5308. Was there any connection in time between the circumstance of Mr. Quodling's reporting that the works were improperly performed and the failure of sending the vouchers—was not it about the same time? Occasionally we did not get the receipts on the vouchers for five or six weeks after the money had been paid.

5309. Was there no notice taken of these remonstrances of Mr. Quodling? One particular instance, in which Mr. Quodling made specific complaints. The contractor called at the Office, and in my presence explained to the Commissioner, and the Commissioner considered his explanation satisfactory, and I wrote a letter to Mr. Quodling to that effect.

5310. You wrote a letter setting aside his remonstrances—what was your communication? I forget the exact wording, but I told him that I was directed by the Commissioner to state that the contractor had explained all the points to the Commissioner's satisfaction.

5311. Then the Commissioner, upon the personal *ex parte* communication of the contractor, without looking at the works, set aside or acted in opposition to Mr. Quodling's report? He considered the explanation of the contractor sufficient.

5312. Did you consider it sufficient? I would not like to offer an opinion, unless I were compelled.

5313. Did you ever, in the course of your duties, see a case of the kind before, or does it often occur with Mr. Collett? No, it does not.

5314. Did you ever know it before with anyone else? Such a thing might have occurred, but I do not recollect any case.

5315. Would you not consider it rather irregular? I should feel inclined to object, if I were Superintendent, under such circumstances.

5316. You yourself having been a Superintendent of works—how would you have felt if such a course had been pursued in your case? I would have written to the Commissioner and objected.

5317. Would you feel that you could perform your duties at all if such a practice were carried on? I could not perform them to my satisfaction if they were persisted in, as they would have the effect of vitiating any directions I gave.

5318. Have you reason to know whether Mr. Martindale and the Commissioner are on friendly terms? I have seen him in the Office—in the Commissioner's room. I know nothing of them out of the Office.

5319. Is it a common practice for Mr. Martindale to visit the Commissioner in his Office? I have seen him there on some ten or twelve occasions.

5320. Have these ten or twelve occasions been when reports have been coming up about his work? At the time to which I have referred he came to explain.

5321. I suppose explanations might have occurred when you were not present? They might have occurred.

5322. Can you state whether they did? Mr. Martindale has been with the Commissioner in his room, and unless I have had occasion to take in a cheque for the signature of the Commissioner, or to see him about some other official business, I have not gone into his room.

5323. Do you know whether Mr. Quodling received instructions, in regard to his duties, in the way you have described you got yours as Superintendent? I believe Mr. Quodling did; it was before I came down from the country.

5324. Has Mr. Coghlan been instructed by letter from your Office? I sent no instructions to Mr. Coghlan; I understood the work was completed, or nearly so.

5325. How long has Mr. Coghlan been in office? He had no specific instructions.

5326. How is he to find out his duties there? He is aware, from having been road overseer some four or five years. The only instructions sent him were, as to the amount of money he could expend by day-work.

5327. Was that by letter? By letter.

5328. Are you aware that Mr. Coghlan was directed to receive his instructions from Mr. Quodling? I am not aware of it.

5329. Do you know whether Mr. Coghlan has declined to take charge of a certain part of the works that were under Mr. Quodling? I do not know it; I have seen no communication of that kind.

5330. What becomes of the contract when it is signed by the contractor—in whose hands is it placed, and with whom does it remain? The bond is returned to the Office; we register it and take charge of it.

5331.

- S. G. Shairp, Esq.
20 Dec., 1861.
5331. You keep the bond in the Office? Always.
5332. Do you know whether these cases, where vouchers were not signed or were not furnished by Mr. Quodling, refer to the Doughboy Diversion contract? To the Doughboy Diversion works.
5333. They relate to them principally? Only to them.
5334. Was it with regard to the same works you got remonstrances and reports from him? It was.
5335. Do you know whether that work is finished? I know nothing personally; all I know is from the Commissioner.
5336. Did he tell you it was finished? That it was almost completed.
5337. Can you state how much money is due upon it, how much is paid, and what was the original amount? The original amount of the contract was £7,300.
5338. Was it not £6,300? Yes, £6,300; it was afterwards supplemented to £7,000.
5339. By what authority was it supplemented? On the recommendation of Mr. Bayley. There were some extra works to be carried out, and Mr. Bayley wrote a letter to the Commissioner, saying that Mr. Martindale would carry out the extra works and make the contract a lump sum, and the Commissioner approved of it.
5340. Did Mr. Bayley write this letter spontaneously? That I know nothing of; I only know that I received that letter signed by Mr. Bayley.
5341. You took that as a production coming from Mr. Bayley? Decidedly I did.
5342. You are not aware that the Commissioner instructed him to write that letter? No.
5343. What would you have thought if you had known that to be the case—would that be a regular proceeding? It would be rather an unusual proceeding; but there might be cases where the Commissioner might, for the sake of the Superintendent's having authority for an alteration, direct him to write to the Office.
5344. Would you, as a Road Superintendent, have written a letter of that kind, such as you have seen was furnished by Mr. Bayley, on the orders of the Commissioner, without acquainting yourself with the circumstances in any way? I should write no letters of that description from merely verbal orders.
5345. Unless you held yourself responsible for the letter itself? If I had done so I should be responsible for the letter.
5346. You say this contract was supplemented in consequence of this letter? In consequence of this letter.
5347. It was increased to £7,000? Yes.
5348. Can you state the amount that was actually paid upon the contract before the letter was written; also, state what is actually paid now? There is a balance of about £1,200 still unpaid.
5349. I suppose you acknowledge having written that letter (*handing the same to witness. Vide Appendix B, page 8*)? I wrote that letter.
5350. Was that an official letter you were ordered to write? I was ordered to write that by the Commissioner.
5351. You are not responsible for the statements contained in it? In no way; being directed by the Commissioner I wrote the letter, laid it before him, and he initialed it.
5352. Did you ever see a letter of that kind before under the circumstances? No, I have not myself seen a letter of the kind. I think it is usual, when anyone resigns, to accept the resignation without making any remarks upon it.
5353. Was Mr. Collett called upon to make these explanations to an officer who had resigned? I presume that was optional with him; he might if he thought it necessary.
5354. Do you know anything of the facts that are referred to in this letter; did you consider it as extraordinary that Mr. Quodling should have resigned—were you surprised at his resigning? I was not particularly surprised.
5355. Would you have been inclined to resign under the circumstances? I might have been inclined to do so, without being in a position in a pecuniary point of view.
5356. What is the meaning of this "pitching, after mature consideration, was substituted for a portion of the broken metal, at the same price"? I believe it was at the same price—but that is the Commissioner's letter.
5357. You do not know anything of the facts? I know, but I do not consider myself in any way responsible for the statements in that letter.
5358. Do you know by what authority the Commissioner stated "pitching, after mature consideration, was substituted"? I wrote as the Commissioner directed.
5359. *By Mr. Dalgleish*: Did the Commissioner draft the letter? Yes.
5360. And you copied his draft? Yes.
5361. And he signed it? I signed it and took it to the Commissioner, for him to initial it; he has initialed it, and I consider him as responsible. I think it is almost word for word as the Commissioner drafted the letter.
5362. *By the Chairman*: You do not know anything about this circumstance of pitching having been substituted for a portion of the broken metal? That was some agreement made by the Commissioner with Mr. Martindale.
5363. The letter says, "from your inability to measure accurately"—did you ever hear before that, that Mr. Quodling was unable to measure accurately? I never heard it before.
5364. Are you at all qualified to state what are Mr. Quodling's capabilities for measuring? I have always heard Mr. Quodling spoken of as being thoroughly competent.
5365. Have you heard a good character given by Mr. Bennett of Mr. Quodling? I have always heard such in the Office.
5366. This was the first time you heard of his inability to measure? It was the first time.
5367. What is the meaning of this statement:—"The big cuttings were paid for by the Commissioner

- Commissioner as a lump sum under your estimate"? That was some arrangement I believe made on the spot with the Commissioner. S. G. Shairp, Esq.
5368. Do you know whether the cuttings were paid for under Mr. Quodling's estimate in this way? I do not know it myself. 20 Dec., 1861.
5369. I find the statement here that "the Commissioner requested that fortnightly vouchers should be sent in"—do you know whether the Commissioner did request that they should be sent in? Yes.
5370. Was that done in writing? I believe so.
5371. Did you write the letter requesting that fortnightly vouchers should be sent in? I am not certain whether I wrote the letter to Mr. Quodling—I know I wrote one to Mr. Bayley.
5372. Is it the usual duty of the Superintendent to send in vouchers fortnightly or monthly? It used to be under the old system fortnightly they were always sent in.
5373. Do you not think that better than sending them in monthly? Yes.
5374. Were you in the habit of sending them in fortnightly when you were Superintendent? I always sent them in. The system of sending them in fortnightly is better in so far as it saves work in the Office; there are not so many vouchers coming in at the end of the month in a lump.
5375. Is it true that Mr. Quodling neglected to do so? We did not receive vouchers every fortnight from Mr. Quodling.
5376. Was this at the time Mr. Quodling was remonstrating about the works being badly done, that you did not receive these vouchers? I think we did not receive any vouchers from Mr. Quodling for some three months.
5377. Do you know the reason? I presume it was on account of payments having been made by the Commissioner in Sydney.
5378. It is stated here "after a personal examination of the work"—do you understand that to mean a personal inspection by the Commissioner? I imagine so.
5379. "The fact of your remissness"—what does that mean? It means, I suppose, remissness, and not having sent in the vouchers.
5380. "For which vouchers have been duly signed by the contractor"—did you see vouchers duly signed by the contractor? Signed by the contractor, in the Office.
5381. Do you think the signature of a contractor gives any validity to a voucher? Only so far as giving a receipt for the money. The contractors often come to us and sign vouchers in the Office; that is not unusual, although if the contractor did not sign, the signature of the bank teller at the bank where we pay the money to the credit of the contractor would be sufficient.
5382. There is a statement here that no more than eighty per cent. has been paid to the contractor—is that true? There has been more than eighty per cent. paid.
5383. Then this is not true? Not exactly.
5384. Is it pretty nearly true? It might be—it might have been eighty-five per cent.
5385. Rather more than less? More I fancy, rather than less.
5386. You were aware of that at the time of signing this letter? Yes, I was aware of it at the time I signed it. The Commissioner directed me to write it, and gave me the draft. I did not consider that I was entitled to remonstrate with him, but at the time I pointed out one or two things which I did not know as actual facts, and the Commissioner said, "Write the letter," and told me to sign it myself. When it was written I took it in to him to initial it, and he did sign his initials.
5387. Then you wrote it reluctantly? Having known Mr. Quodling some time, I did not like to write it.
5388. Did you think it was likely to do Mr. Quodling any harm? Not any that I could see.
5389. Why then did you feel any reluctance? Because Mr. Quodling might imagine as I had signed the letter that I composed it, and that it contained my sentiments.
5390. You admitted that there were certain things in it that you were not quite aware of—Do you consider it to be your duty as clerk to put your name to absolutely false statements because you are told? There are several points here of which I could not judge whether they were correct or not; I could have my own opinion about them.
5391. Do you not see the difference between giving your authority to something about which you are not quite certain, and giving your authority to something which you are quite certain is not true? I do not know that I could make any great objection if I knew the whole was incorrect, because I say "I am directed by the Commissioner to inform you," and under his instructions he is responsible for the letter.
5392. With regard to the eighty per cent., you were directed by the Commissioner to state what was not true? I wrote this letter from a draft which the Commissioner gave me. (*The witness produced a draft.*)
5393. You state that that draft is the draft he gave you? Yes, the substance is precisely the same—I do not know that the words are.
5394. I presume that when you get a draft of a letter it is sometimes your duty to make alterations in its phraseology? Yes.
5395. All you are bound by is the substance, and you state that the substance of the letter is the same as the draft? You will find this is nearly an exact draft of the letter I wrote. [*The draft was read by the Clerk, and compared by the Chairman with the letter, Appendix B, page 8.*]
5396. Are you aware whether Mr. Arnold, the head of the department, was aware of this letter having been written? Unless the Commissioner told him himself—I am not aware; I know nothing of it.
5397. Do you often see Mr. Arnold at your Office? I myself very seldom see Mr. Arnold unless he sends for me. The work goes through the Under Secretary or the Commissioner.
- 5398.

- S. G. Shairp, Esq.
20 Dec., 1861.
5398. You are not aware whether these circumstances you have detailed were communicated to Mr. Arnold? I am not.
5399. You are not in any way closely connected with Mr. Arnold's department? No, the work goes through the Chief Clerk of Public Works and the Under Secretary.
5400. Do you know anything of Mr. Hannington, the road overseer? I have never seen him until within about a fortnight.
5401. You cannot speak to his reputation for ability? No; I have never heard anything either for or against him.
5402. Did you ever hear any complaints against Mr. Quodling's competency till this matter occurred about his resignation? I never did.
5403. Did you ever hear Mr. Collett speak as to his character for competency before? No, I do not think I ever did.
5404. What character does Mr. Bayley bear, as regards his qualifications? I have always heard him spoken of as a very good officer.
5405. As to Mr. Coghlan's qualification—what has been his reputation? I believe he is a very good officer.
5406. Should you say that the plan of a bridge being placed in the hands of a road overseer or Superintendent was a sufficient guide for him in overseeing a work without specifications? No, I should consider not; he should have a specification as well as a plan.
5407. Do you think it would be impossible for him without it to see whether the work was well done? I think he might certainly see whether the work was carried out correctly from the plan, but it would be necessary to have the specification, in case of any dispute with the contractor. He could not ascertain how deep the piles were to be driven, or of what timber the work was to be constructed, what part was to be tarred or charred, and how many coats of paint were to be put on, unless he had the specification.
5408. Have you heard any complaints with reference to the Doughboy works, from other sources than Mr. Quodling? No.
5409. Is this transaction you referred to, of Mr. Bayley supplementing a contract, a common occurrence on public works? Not uncommon.
5410. It has happened in other cases? In a great many cases; it is a very common thing.
5411. In the cases to which you refer, was the supplementary contract furnished generally by the Superintendent of Roads and Bridges? Generally the Superintendent would recommend; perhaps there might be a contract for 800 lineal yards of metalling, and he might recommend that it should be continued another hundred yards.
5412. I suppose the concurrence of the Engineer or the Commissioner would be required to give that validity? Yes, the Superintendent has not power of himself.
5413. If the contractor agreed too, would it become a binding contract? The contractor is bound by the original agreement to carry out any work at the schedule of prices.
5414. Was the schedule of prices observed in this work you refer to—the supplementary one? Yes.
5415. Is it usual for the Commissioner for Roads to furnish a Superintendent with written memoranda, which constitute instructions in themselves? I think it is not usual.
5416. In general the Superintendent is bound by the specification; then do you think it would be his duty to pay any regard to written memoranda to depart from the specification? Yes, if he had them from the Commissioner, as his superior officer.
5417. The Commissioner's authority would be his guarantee? Yes.
5418. Have you any information to give the Committee with regard to the piece of road called the new cutting—any official information? I know nothing of it myself.
5419. You are not aware whether Mr. Bayley condemned a piece of work of that sort at any time? Not in my time.
5420. Has any report been made to the department, as to iron spiking having been taken out of a bridge at the Doughboy Diversion, after it was supposed to have been finished? There was a letter sent, I think, from Mr. Loder, or some one at the north, to the Commissioner, in which it is stated that the iron-work had been removed from one of the bridges. That letter was sent to one of the overseers, with directions to report upon it; and he reported that there was the amount of work upon the bridge required by the specification; that some extra iron-work had been put on, but being surplus, it had been removed by the contractor, to some other bridge.
5421. That was duly inquired into? Yes.
5422. Do you know anything of a road overseer called Clements? I do not know him personally; I know there was an overseer of that name.
5423. Has he been dismissed lately? He has not been a road overseer in the department for I think two years. Latterly he has been acting I believe as a ganger, looking after some timber for one of the bridges.
5424. Under the Government? Yes, under the Superintendent. He has been getting pay at the rate of ten shillings a day.
5425. Is he not properly an officer of the department? He is not considered an officer; he is not responsible.
5426. Still he is continued in the service? No, he was dismissed I think a month ago.
5427. What was he dismissed for? Mr. Brown dismissed him. He reported that Mr. Clements had been conducting himself in an improper manner. I do not think he specified in what way.
5428. With regard to most of the works on the northern road, have they been done by contract? A great many of the works have been thus carried out, excepting small works and task-works.
5429. It is unusual, in regard to such matters, to submit them to competition? Yes; it is done in large works.

5430. In small works, in whose hands is the authority placed to get the work done by task-work? The Road Superintendent is authorized by the Commissioner, with the approval of the Minister. S. G. Shairp,
Esq.
20 Dec., 1861.
5431. Is not Mr. Martindale one of the large contractors at present in the Northern District? He is the largest contractor on the road.
5432. Have you heard any opinion given as to the general character of the works done by Mr. Martindale? No, I have never heard any complaints made of them, except in this particular instance.
5433. Are you aware whether Mr. Martindale had contracts at Victoria? I have heard so.
5434. Do you know whether he gave satisfaction in Melbourne? I do not; I never heard.
5435. *By Mr. Dalgleish:* In defining your duties, you stated that you had to countersign all the cheques for payments to contractors? Yes.
5436. You signed jointly with the Commissioner? The Commissioner signs in the first instance, and then I sign them previous to paying them into the bank.
5437. Will you explain the reason why you thought it necessary that you and the Commissioner should sign the cheques jointly? It is the usual thing in the public service; I presume, as a kind of check on the Commissioner, that he might not be able to draw cheques without their being countersigned.
5438. You stated that the Commissioner sent you a letter or telegram from the works asking you to send him up a cheque? I have received letters and telegrams when he has been in the country.
5439. I am asking you about the letter you received from Mr. Collett when he was on the works, asking you to send him up a cheque, and which you say you did send? I have sent him cheques.
5440. Did you sign that cheque prior to sending it? No, I filled in the amount and sent it up; after it came back to the Office I signed it. If I signed cheques in the first instance, and they were lost after they had been signed by the Commissioner, they would be cashed; whereas by sending them without my signature, they cannot be cashed until they come back to the Office.
5441. In such a case, is the object gained for which it is required that you and the Commissioner should sign jointly? I imagine so.
5442. You have no responsibility whatever in the payment? I have no responsibility.
5443. Is it part of your duty to calculate the work performed as vouched for, and to compare it with the amount asked for? We check the vouchers that are sent in.
5444. Prior to payment being made? Yes.
5445. If that is necessary, your calculations are your portion of the check? That is my portion of the check.
5446. The Commissioner's signature is confined to his own portion of the duty; the object of requiring two officers to sign a cheque is to provide a double safeguard to the public in the expenditure of the public money—is this effected by the mode you have referred to? My signing the cheque is merely a matter of form; I have no control over the Commissioner.
5447. Could you not refuse to sign a cheque if you thought it was not properly submitted to you for signature? If I saw there were no vouchers for payment I could refuse to sign, but if the Commissioner told me that a certain amount of work had been done, and that he wished to make an advance of £500, I should consider his statement sufficient.
5448. You would take the Commissioner's word for it? Yes.
5449. In that case, your check in behalf of the public safety would be done away with? My check is valuable, inasmuch as if my name were not upon it, and the cheque were mislaid, the bank would not pay it, but my signing it is no check upon the Commissioner.
5450. I thought the object of these checks was that there might be a security that the work had been actually performed for which the money was paid. You, in describing the duties of the Superintendent, said that they sent in vouchers which were calculated and checked in your Office; and if they were found correct, a check was signed by yourself and the Commissioner? Yes.
5451. If these vouchers have not been received, and the Commissioner's word alone is taken for the amount to be paid for work done, in what way is the public safety secured by your signing the cheque—have you no power to oppose? In a case of that kind I should not consider there was any necessity. The Commissioner is competent to know whether the amount of work has been done, and I countersign the check on his authority.
5452. You speak of telegrams being received in the Office, with requests from Superintendents that payments may be made for certain amounts to the credit of certain contractors, and that these requests are complied with? It has been the case.
5453. Could I not, if I were up there, send down a telegram to the Office, requesting payment to be made to a certain contractor—have you any means of identifying a telegram? The Superintendent is tolerably well known in his district, and if any one went to the Telegraph Office and represented himself to be the Superintendent, the telegraph officer would, I presume, not send down the message without he knew the party.
5454. Is it not possible—are not frauds much more likely to be perpetrated, committed every day? I think not. In this instance the Superintendent was well known to the telegraph officer, and it could not have occurred.
5455. You state this has occurred some ten or a dozen times lately? Four or five times that I have paid upon the Commissioner's instructions, or have made out the cheque, but the Commissioner is well known on the road.
5456. Vouchers are received after the money is paid? Yes.
5457. So that if the voucher was found to be incorrect, the evil would already have been committed—

- S. G. Shairp, Esq.
20 Dec., 1861.
- committed—the money would have been paid and could not be recovered? No, I do not see how it could be recovered, but the amount of contract would not be exceeded.
5458. You consider it perfectly regular to pay this money to a telegraphic order? I do not pay money to the contractors; I send a cheque to the Commissioner if he is away. He sends a telegram to me to pay £500 to a contractor. On receipt of this telegram I send a cheque to him for signature, and when it is returned I pay it into the bank to the credit of the contractor.
5459. I allude to that part of your evidence where you say—"When I was a Superintendent I sent telegrams, and payments were made to the credit of contractors. I have done this to the amount of £500. I have done this a dozen times"? I believe I have. They were generally paid to my own credit, sometimes to that of a contractor.
5460. In those particular instances these safe-guards could not have been regarded? The only safeguard would have been in the telegraph clerk knowing the party who came was not the Superintendent of the Road.
5461. The telegraph clerk is bound to take any communication that is paid for? I should imagine so.
5462. Is that a matter of fact, without the imagination—if I go into the Telegraph Office can I not send any communication I think proper? I am not aware what the telegraph regulations are, but I suppose so; providing you misrepresent yourself you stand the consequence.
5463. So that if I send a telegram for a certain amount of money, it depends upon the person receiving it whether he will forward it or not—do you consider that that is consistent with the public interest? I cannot see any particular danger in it myself; that is not done now.
5464. The Committee have had some difficulty in obtaining a definition of the duties of a Superintendent; you having been a Superintendent, I imagine will be able to afford us some light upon the subject? I have never had any written instructions.
5465. Did you describe the duties of a Superintendent previously? I believe so.
5466. Did you describe the duties of the Commissioner, so far as you are aware of them? I think so.
5467. Do they consist simply in appropriating the different amounts voted, in signing cheques, and signing vouchers? Not signing vouchers.
5468. Signing documents? In signing documents, and in the general management of the department.
5469. I thought the appropriation of the different amounts depended upon the different lengths of the road? For a certain district an amount is voted, and the Commissioner, with the advice of the different Superintendents, apportion this amount; so much to be laid out in contract; so much in day work; so much in maintenance men.
5470. Speaking of a memo. that was appended to one of the vouchers, you stated that the matter was explained by the contractor's seeing Mr. Collett and making a personal explanation? It was not on a memo. on the voucher; it was on a letter complaining of the way in which the work was being carried out.
5471. Was this explanation made in your presence? Yes.
5472. Was the interview in your presence altogether? The contractor might have been with the Commissioner before, and he was with him afterwards.
5473. You state that Mr. Collett has a private room? The contractor was in Mr. Collett's room, and the Commissioner called me in and pointed out the different things Mr. Quodling complained of; the contractor answered him upon those points, and Mr. Collett then wrote upon the letter, and instructed me to tell Mr. Quodling that the contractor had personally explained, and I did so.
5474. You stated that, at times, personal instructions or written instructions are given to the contractor, that a certain portion of his work can be conducted or performed in a certain way, and that the Superintendent should obtain the knowledge of this from the contractor, and act upon it? No; I said the proper way would be for the Commissioner to communicate to the Superintendent; but if the Superintendent were not there at the time, it would be sufficient if the contractor shewed him the order from the Commissioner. The proper way would be to acquaint the Superintendent at the same time as the contractor.
5475. Would it be a proper way to give the contractor written instructions, and not to leave written instructions for the Superintendent? I am not aware that that is the usual way of doing it; but such a thing might be done, and I believe it has been done by the Engineer for Roads, when he has been in a hurry, coming down in the coach. I know an instance where he left orders in that way.
5476. From your knowledge of road-making, do you think it is possible for a contractor to make a personal explanation with regard to the manner in which a particular portion of work has been performed in the Office of the Commissioner, which should be considered superior to the written report of the overseer who is on the spot? If both parties were acquainted with the locality, and had been there recently, I imagine they could.
5477. This report is with regard to the quality of the work—could any personal explanation of the contractor override the written report of the Superintendent? Yes, there might be circumstances—
5478. This was a matter of quality? There were other points.
5479. Was quantity at all at issue? There might be other points. The Superintendent might object to stumps being left in cuttings, and the contractor might explain to the Commissioner that if they were taken out they would loosen the cutting—points of that sort might be explained.
5480. Would it not tend to destroy the authority of a specification if the personal explanation of a contractor were allowed to override the overseer's written report? Certainly it would.
- 5481.

5481. Would it not be the proper way to write to the overseer to tell him he might relax the strictness of the specification in some respects? I believe it would be more satisfactory to the Superintendent or overseer. S. G. Shairp, Esq.
5482. Did you point out any inconsistencies to Mr. Collett in his draft letter of the 30th October—did you point out to him that certain statements were not strictly correct? I did. 20 Dec., 1861.
5483. And he still persisted in having that letter sent? Yes, he told me to send it.
5484. Although he was perfectly aware—you made him aware—that it was not correct? I pointed out one instance as to Mr. Quodling's inability to measure; I said I never thought Mr. Quodling was unable to measure; he said—"Oh! yes, he is."
5485. Did you point out that it was not correct about only eighty per cent. of the money having been paid—did you shew him that the eighty per cent. had been exceeded? I am not certain whether I did or not.
5486. What did you point out as being incorrect? I have just mentioned; Mr. Quodling's ability to measure cuttings, and I think I suggested to the Commissioner that it was advisable not to send any letter at all; but as I was ordered to do it I had no alternative but to write the letter.
5487. You are the Chief Clerk? Yes.
5488. And would know at all times the state of the money account between the contractor and the Government? Yes.
5489. Were you aware at that time as to whether eighty per cent. was more or less than was paid—that was your particular duty to know? I am not aware that it is very much over eighty per cent. now, but that is of no great importance, particularly as I am no way responsible.
5490. Is the Commissioner for Roads expected to be as well aware as you of the exact state of the accounts? If the Commissioner had asked me what per-centage had been paid, I should have given him the exact amount; but as he puts it down at eighty per cent., I do not see why I should object.
5491. Are you personally acquainted with Mr. Quodling? Yes; I have been two or three years, ever since I have been in the department.
5492. Have you known him in the performance of his duty—could you speak of his qualifications from your actual knowledge? No.
5493. Are you aware of your own knowledge of his ability to measure cuttings? I am not aware.
5494. Was it as much your duty to state that Mr. Quodling was able to measure cuttings, as it was to say that eighty per cent. was exceeded? I do not know whether it was my duty to make remarks upon that or any subject.
5495. You are the Chief Clerk of the department, the money and books were under your immediate control more so than under that of the Commissioner, therefore if an error were made in the rough draft of the letter as to the amount paid to the contractor, would it not be your duty to set that right? By this eighty per cent. the Commissioner may mean that the contract is almost completed, in which case there would not be more than this eighty per cent. paid.
5496. Is there not to be a certain per-centage kept in hand after the works have been completed, and thoroughly and sufficiently completed? Yes.
5497. What is that? Ten per cent. usually.
5498. How much is it in this instance? I am not prepared to say; I have the bond; some are filled in with eighty per cent., some with ninety.
5499. When paying money to this contractor, was it no part of your duty to examine the bonds at that time, to make yourself conversant with the amount to be paid? The per-centage to be deducted can be paid at any time when certified by the Commissioner; therefore if the Commissioner had told me the work was done, and to pay the full amount of that contract, I should be fully justified in doing so.
5500. You do not state that the Commissioner has done so? The Commissioner tells me to make a payment, he says—"Pay so and so £500."
5501. So that virtually you have no check upon the Commissioner? I have no check upon the Commissioner; if the Commissioner writes to me and says—"Pay £1,000 to so and so," I have no check upon the Commissioner as to whether the work is really done.
5502. The Superintendent has no check upon the Commissioner, for you say the Commissioner's report over-rides the Superintendent's, and that the Superintendent's over-rides the overseer? Yes.
5503. So that there is no check in reality upon the Commissioner? No; if the Commissioner chooses to pay any amount of money, he has the power to do so.
5504. The responsibility rests upon him alone? Upon him alone.
5505. Has the Audit Office any check upon the Commissioner at that time? Not as to whether the amount of work charged has actually been done.
5506. Is there any other mode of auditing the accounts, by which any defalcation of the Commissioner might be detected? I am not aware of any mode of detecting anything of the kind in the Audit Office.
5507. Is there any check in your Office? No farther than this, that we know the amount for which the contract has been taken, and we see that the amount is not exceeded; but whether the work has actually been done we cannot say.
5508. Your department is a separate establishment, as separate as one mercantile establishment is from another—are the accounts of your Office audited? They are at first audited by us, and afterwards at the Audit Office; but we have no check upon the Commissioner if he orders a certain amount of money to be paid. We pay either on his recommendation or on the recommendation of the Superintendent.
5509. There is no examination into the accounts of the different Offices by any officer independently

S. G. Shairp, Esq., independently of that Office? The Audit Office—they see that the contract is taken for a certain price, and that no more is paid on account of it—they see that the amount agrees with the books and cheques.

20 Dec., 1861.

5510. You have already informed us that the Commissioner has no check upon himself; that he has the power of over-riding every one; that he over-rides you, that he over-rides the Superintendent, and that he over-rides the overseer; and that the Audit Office has no check if the vouchers correspond with the amount to be paid? If the vouchers correspond with the amount they have no way of judging at the Audit Office whether the work for which this money is paid has actually been performed; they pay it merely on the voucher of the Commissioner or Superintendent. None of the officers of our department go to the works except the Engineers and Commissioner.

5511. You say a plan is sufficient to guide you in building a bridge without a specification? I said it was necessary to have a plan and specification, but that you could build a bridge with a plan only.

5512. Are plans of bridges made to scale? Yes, all the plans sent from our Office are made to scale and figured as well.

5513. Are the minute details, iron-work and everything, shown upon the plan? Yes, everything.

5514. Then of course it is perfectly easy to work from it without a specification? Yes, but a specification is useful in case of a dispute as to the depth to which the piles should be driven.

5515. You have stated that Mr. Bayley supplemented a contract—it would be necessary to have a schedule of prices before that could be done? He had a schedule of prices.

5516. I thought you said £7,000 odd was a lump sum? His contract was accepted as a lump sum.

5517. That was setting the schedule of prices aside? Yes; it was not accepted as a schedule of prices—it was accepted as a lump sum which was worked out from the schedule of prices.

5518. So that not only was there a supplementary payment, but it did away with the contract, as far as the schedule of prices was concerned? No; the contractor sent in a schedule of prices, and the Engineer for Roads took out the quantities for the different work, and from his quantities he arrived at a lump sum on which the tender was accepted, but the extra work was still to be paid for on the schedule of prices.

5519. You say Mr. Clements is a ganger? Yes.

5520. What is a ganger? A man who has charge of a gang of men—a kind of sub-overseer.

5521. What is an overseer? He usually has charge of 30, 40, or 50 miles of road under the Superintendent.

5522. How many men would he have under him in this district? That would depend upon the quantity of work going on; he might have perhaps a dozen contractors, and perhaps fourteen or fifteen day men—maintenance men—on different parts of the road, and other men working at the bridges. His duties are the same or nearly the same as those of a Superintendent.

5523. A ganger is a sort of sub-overseer? Yes.

5524. Employed to get timber for bridges? He might be to see that the timber was according to the specification.

5525. Did he require a body of men to assist him to see that the timber was according to specification? You might call him a ganger although he had no men under him.

5526. Then a ganger is, in your opinion, a person who is a judge of timber? We call a man a ganger who is not acknowledged as an overseer—who does not hold an appointment made by the Government.

5527. Is any other person appointed to perform this same duty? We have several gangers in different parts of the road; they are generally under the Superintendent, and look after the work in his absence—for instance, any day-work that may be going on when he is at some other part of the road.

5528. How long were you in the Road Department? Nearly twelve months as a Road Superintendent.

5529. Were you any trade before? I have been brought up as an engineer.

5530. Are you a civil engineer? I have served all my time as a mechanical engineer.

5531. But not as a civil engineer? I have been in a civil engineer's office since serving my apprenticeship as a mechanical engineer.

5532. Is a mechanical engineer considered to be a good judge of road-making, or to have the necessary experience? Not necessarily; but a man might obtain such knowledge after he had served his time as a mechanical engineer; and it is usual, if a young man is to be brought up as a civil engineer, to apprentice him at first to a mechanical engineer, and then to put him into a civil engineer's office afterwards.

5533. *By Mr. Hoskins:* Do you know Mr. Halligan? Yes, he is the Chief Clerk in the Office of Public Works.

5534. Has any part of his duties any connection with your department? Our papers, when submitted to the Minister for Works, go through Mr. Halligan.

5535. What papers? Applications for the expenditure of money to be approved of by the Minister for Works. In the appropriation of the different sums voted, the Superintendent reports various works as being necessary, and all these works are submitted to the Commissioner for Roads, who draws out a statement of the whole, and submits it to the Minister for Works; that statement goes through Mr. Halligan.

5536. Do any accounts with reference to Mr. Martindale go through Mr. Halligan's hands? Only in the first instance; the letter accepting the contract passed through his hands.

5537. What did Mr. Collett tell you, when he spoke to you with reference to this inquiry—have you any objection to state? He said very little, and I did not wish to ask him any questions

- questions about it; I merely asked him how it was going on, how long it was likely to last, and questions of that sort.
5538. Did you receive any written instructions, when you acted as Road Superintendent, with reference to your duties? No; I was aware what they were, from having been in the Office before.
5539. Do you know whether Mr. Coghlan has been provided with copies of specification of the contract he has charge of? We have not sent any copies from the Office to him.
5540. Do you know whether any copies of the specification are in the hands of any Government officer? I presume Mr. Quodling handed it over to Mr. Coghlan.
5541. Did you direct him to do so? He was requested to; I did not direct him, because he had sent in his resignation, and was no longer a Government officer.
5542. Do you know as a matter of fact whether he has done so? No.
5543. Do you know whether any officer in the district from Doughboy to Armidale had copies of specifications? No, I do not.
5544. Do you know how many contracts are being performed there? Not the amount of every contract; they are all entered in the Office.
5545. There are two bridges under the contractors' hands, are there not? I do not myself know where those bridges are situated; whether in Mr. Quodling's or in Mr. Brown's district.
5546. They are under Mr. Coghlan's supervision, I believe? There is a bridge at Saumarez Creek, and one at Uralla.
5547. Did I not understand you to say, in reply to a question from Mr. Dalgleish, that it is impossible for a Superintendent to know whether a work is properly performed unless he has a copy of the specification? Or a plan.
5548. Did you not say that it was impossible for him to see whether a work was properly performed unless he had a copy of the specification? I say he should be provided with a copy of the specification.
5549. Do you know whether Mr. Coghlan has specifications of these bridges? No, unless Mr. Quodling handed over his to him.
5550. Do you know whether Mr. Quodling had them? I cannot say.
5551. Who provides the Road Superintendent with copies of the specifications? They usually make out the specifications themselves in the first instance, except such bridges as are advertised (and plans prepared) direct from the Office.
5552. Specifications of quantities? Specifications of quantities. When the work is to be done for a lump sum the quantities are not worked out.
5553. It is usual for the Superintendent to make them out? To take out the quantities; if the bridges are to be built according to a schedule of prices they are checked in the Office.
5554. Does not the Commissioner for Roads see whether these specifications are accurate? The Commissioner for Roads approves them; the Engineer for Roads makes any alterations which may be necessary.
5555. Does not the Commissioner for Roads consider it necessary to see that the Superintendents have specifications of the works they have in charge? I should consider so.
5556. If Mr. Coghlan stated in evidence that he had not a specification, do you not consider it your duty to see whether he had a specification or not? I should imagine it was the Commissioner's duty.
5557. Do you think he can properly overlook the manner in which the work is conducted unless he has a specification? Not properly.
5558. Have you ever known an instance in which the Commissioner for Roads has arranged the terms of extending a contract with the contractor, and directed the Road Superintendent in charge to send in a letter with an estimate of this extension of the contract, without receiving the concurrence of the Road Superintendent? No, I do not. If a letter comes signed by the Superintendent, of course we presume it is written by him.
5559. Without being requested or instigated to do so by the Commissioner for Roads? It is a question I should never think of.
5560. Do you know whether it has ever been departed from? I do not know.
5561. Did you ever hear that it had been departed from? There might be cases where it has been departed from.
5562. Do you know whether it has ever been in any contract of Mr. Martindale's? I do not of my own knowledge. I know a letter was received from Mr. Bayley—the only instance I am aware of—in which he states that Mr. Martindale will do certain extra work for a certain addition to his contract. That letter being sent by Mr. Bayley, I presume was written by him.
5563. You say you saw Mr. Hannington a few days ago? Yes.
5564. Where? I saw him at the Office.
5565. What was he doing in Sydney? The Commissioner sent a telegram for him to come down.
5566. What for—in connection with the duties of his office? He wanted to see him; he sent a telegram himself.
5567. What Government officer is there to take charge between Doughboy and Armidale? I believe no one; Mr. Coghlan and Mr. Hawkins are down here.
5568. Is it usual to leave a district of that extent without a Government officer to look after the contractors? Very unusual.
5569. Do you know whether Mr. Hannington was sent for to give evidence in this inquiry? I never asked what the object was; I know he sent for Mr. Hannington.
5570. Do you know whether Mr. Martindale has had any contracts on the Northern Road, without those contracts having been previously submitted to public competition? He may have had some small task-works—I am not aware of any contracts.

- S. G. Shairp, Esq.
20 Dec., 1861.
5571. Do you know whether he has had any clearing contract? No clearing contract that I am aware of.
5572. Do you know whether he has done any clearing—been paid for any clearing? That I could find out.
5573. Do you know whether he has ever had any clearing contract between Doughboy and Goonoo Goonoo? He may have done some clearing there—he has had no contract; there has been no contract advertised.
5574. Did you ever hear of his having a contract for clearing the road between Doughboy and Apple-tree Flat? He has had some work there; whether for clearing only I do not know.
5575. You do not know the amount of money involved in that contract? No.
5576. Have you any maximum amount involved in a contract which a Government officer is allowed to allot without the contract being subjected to competition? I have never seen any regulation; it depends upon the Commissioner for Roads, with the approval of the Minister. I have had as much as £1,100 or £1,200 to expend on work for which I could get no tender, and I have had the money given to me to let the work myself—to divide it into sub-contracts.
5577. How long is that ago? When I was Road Superintendent—about eighteen months ago.
5578. Do you know the maximum amount of the contracts allotted to Mr. Martindale by the Chief Commissioner, without public competition? I do not know; I could find out the maximum amount of work done by Mr. Martindale, whether by contract or private arrangement, but there are so many small works that I cannot remember them.
5579. Do you know whether Mr. Martindale has had a contract recently on the Southern Road? Yes.
5580. At Camden Flats? Yes.
5581. What extent was that contract? About £360, thereabout.
5582. Was that let by tender? Yes.
5583. Who was the successful tenderer? Mr. Martindale was a tenderer, and I know his tender was accepted for the Southern and also for the Western Road.
5584. Do you know of his undertaking to perform a contract which a contractor of the name of Frazer had failed to carry out? Yes.
5585. What was the amount of money involved in that contract? I do not recollect the exact amount.
5586. Was that submitted to public competition? No, it was not; I know the instance alluded to.
5587. Was it a contract involving a large amount of money? Not a very large amount.
5588. Do you know whether any relative or connection of Mr. Collett had anything to do with that contract? I believe his nephew was there; I do not know what position he held with Mr. Frazer; I know he was there, and I believe he was looked upon as Mr. Frazer's agent.
5589. Why was Mr. Martindale sent for to perform the contract? I am not aware that Mr. Martindale was sent for; he might have been there at the time. I know there was some agreement made with him.
5590. Why did he perform this contract when it had been previously allotted to Mr. Frazer? Because Mr. Frazer did not carry it out.
5591. Did Mr. Frazer receive the money? He received part of it. £200 odd was paid to him.
5592. Why did you tell the Commissioner it was advisable not to write that letter to Mr. Quodling? Because I considered it was not advisable myself.
5593. Why did you think it was not advisable? If a man sent in his resignation, I thought there was no necessity for the Commissioner to take notice of his objection, he might either accept it or not.
5594. Was that the only reason that induced you to make the remark? Another was that I did not like to write the letter myself.
5595. But it came within the category of your duties? I did not like to write it because Mr. Quodling being a friend of mine.
5596. Had you no other reason? No.
5597. Did you object to write it because you considered the statement in the letter was untruthful? Yes; one statement as to Mr. Quodling's inability to measure. As I have already stated, I remarked that I was not before aware that Mr. Quodling could not measure. The Commissioner said, "No, he cannot," or something of that kind. I will not vouch for the precise words of the conversation.
5598. You consider that an untruthful statement? As far as I am concerned, I have no reason to believe that it is the fact.
5599. With reference to the amount of money retained in hand, you know that to be incorrect? It is not exactly correct.
5600. Is it a fact that you frequently wrote to Mr. Quodling requesting fortnightly vouchers? No, I did not repeatedly write to him. I believe I wrote once.
5601. In the third paragraph you say—"I am directed to inform you that the Commissioner requested that fortnightly vouchers should be sent in, which you neglected to do; and "it was only after a personal inspection of the work, and the fact of your remissness, that "moneys were paid on account"—did you frequently write to him complaining of his remissness? No.
5602. How many fortnightly vouchers did he omit to send? I think about half a dozen.
5603. When he was written to, complaining of remissness in this particular, what reasons did he assign for not sending? I do not recollect any explanation on the subject from Mr. Quodling.

5604. Do you recollect any letter being sent to him commenting upon his remissness? I S. G. Shairp, Esq.
am not certain that any letter was sent to him about it.
5605. You do not know whether the Commissioner requested him to send fortnightly vouchers? I know he was written to, to send in fortnightly vouchers in the first instance, but I do not know whether he was written to for not acting up to this instruction. 20 Dec., 1861.
5606. You do not know whether there was any complaint made to him of his remissness? It might have been made on the works.
5607. No official complaint was made to him by letter? I do not remember writing a letter complaining of it.
5608. You think the reasons why it should not have been sent were, that it was an unusual course of proceeding, and that it contained an untruthful statement? I considered it unusual, and I did not consider the statement correct.
5609. Do you know whether a contractor ever had a contract at Bargo to the amount of £500 which was never let by tender? I think not to such an amount as that.
5610. Just refresh your memory—can you tell us the maximum amount of any work allotted to any contractor which was not let by tender? The largest one is that you are alluding to now at Bargo; it was given to Mr. White; but I do not recollect the amount.
5611. When was that? At the beginning of the present year.
5612. Who let it? The Commissioner.

MONDAY, 30 DECEMBER, 1861.

Present:—

MR. DALGLEISH,		MR. T. GARRETT,
MR. DANGAR,		MR. HOSKINS,
MR. MARKHAM.		

WILLIAM FORSTER, Esq., IN THE CHAIR.

William Rickford Collett, Esq., Commissioner of Roads, called in and further examined:—

5613. *By the Chairman:* Do you wish to make any statement in reference to the matter now before the Committee? I wish to hand in a short statement, which I think may save the Committee a good deal of trouble. (*Statement handed in and read. Vide Appendix A.*) W. R. Collett, Esq.
20 Dec., 1861.
5614. You say, in this statement, that you take the whole responsibility upon yourself—do you mean that you owe no responsibility to any superior officer over you? That is my view of the case.
5615. That you owe none? I owe none; not when the general conditions are signed by the Minister.
5616. Are you responsible to no one at all? I am responsible to the Executive Council and the Governor.
5617. Not to the Minister of Works? Not to the Minister of Works.
5618. Then if the Minister of Works gave you an order you would consider yourself bound to decide on the propriety of obeying the order—you do not consider that you would be bound to obey the order? The initiative belongs to me; I suggest things to the Minister, not the Minister to me.
5619. You have stated that you owe no responsibility to the Minister? Under the Act of Parliament my powers as Commissioner of Roads are defined; I am not responsible to the Minister.
5620. You are responsible to somebody—the Governor and Executive Council I think you say? I imagine so; the same as Commissioners in England are to the Privy Council and the Queen—not to a Minister.
5621. Then if the Minister for Works gives you an order, do you consider you have a right to decide whether you will obey it or not—on the merits of the order in fact? That is a question that never can occur. The Minister does not give orders to Commissioners.
5622. Supposing he did give an order, are you not bound to obey it? I must decline answering that question. Whether I am right or wrong, I am only giving my own view. Being a Commissioner under the Great Seal, and by Act of Parliament, I conceive that I am only responsible to the Governor and Executive Council. I may be wrong, and the system may be wrong, but I have acted on that view.
5623. If you decline to answer a question so simple, it seems to me you do not give your own view? I beg your pardon. The question would not arise. The Minister gives no orders—the Minister gives no orders that I should not carry out—therefore the refusal could not take place.
5624. Is it not possible that the Minister for Works and yourself might differ in your views of your duties? My duties are not defined; I have no duties either written or otherwise.
5625. What are the duties of the Commissioner of Roads? To manage and maintain the Main Roads, by Act of Parliament—the Main Roads Act—on his own responsibility.
5626. To do as he pleases? As he pleases.
5627. Then in fact, your own opinion of the way in which the roads are to be maintained is to bind you and nothing else. You are not bound by the opinion of any one but yourself in carrying out your duty? I think not. I base my reasons on every Commissionership in England, Ireland, or Scotland. There is a sum of money voted, and Commissioners are appointed who have the sole and whole control of the way in which it is to be spent; and I imagine a Commissionership is the same in Australia as in Great Britain.
5628. You are appointed by the Governor and Executive Council? Yes.

5629.

- W. R. Collett, Esq.
30 Dec., 1861.
5629. Supposing the Governor and Executive Council give you certain orders through the Minister for Works, are you not bound to obey them? Certainly.
5630. If the Minister for Works gives you an order, is it not to be presumed that he does so by the authority of the Executive Council? It is presumed he does nothing of the kind. He would not take an order to me up to the Executive Council, unless he should say, he is a gentleman I wish to have removed from his office.
5631. You say you would obey the order of the Governor and Executive Council, but you would not obey the order of the Minister for Works? I did not say I would not—I said I did not see that my position obliged me to do so.
5632. You do not consider it your duty? I beg pardon; I might consider it my duty, but I am not obliged to do so.
5633. You said just now that the Commissioner of Roads had no duties? No defined duties, except as they are defined by Act of Parliament—to maintain and manage the Main Roads.
5634. Then if I ask what your duties are you refer me to the Act of Parliament? I refer you to the Act of Parliament. I beg to call your attention to the third clause of the Main Roads Act, and also to the general conditions.
5635. Then you do not consider that the Governor and Executive Council have power to further define these powers—to make regulations, for instance? Certainly they have.
5636. If they make regulations you are bound to obey them? I presume so, by Act of Parliament.
5637. But if the Minister of Works issues an order you are not obliged to obey him? My impression is, that under this Act of Parliament I am not forced to do so.
5638. And you have always acted on these principles? Yes, subject to these general conditions being approved by the Minister. When I entered office these powers were not defined, and these general conditions were submitted to the Minister as a matter of courtesy, and perhaps as a matter of right, and the Minister approved of them.
5639. Then these conditions define your duties? They define my duties, sanctioned by the Minister, and in conjunction with the Act of Parliament.
5640. From what Office do they emanate? The Road Department and the Minister for Works.
5641. Have they been laid before the Assembly? I should imagine not.
5642. They are entirely confined to the Department? To the Road Branch.
5643. By whom are they approved? By Mr. Arnold, the Minister for Works.
5644. In that case you take the definition of your duties from the Minister for Works, so far as these regulations are concerned? Yes.
5645. But you would not consider yourself obliged to deviate from these upon any other order of the Minister for Works? Not unless that was repealed and put in a different form.
5646. Then, if I understand you rightly, you consider yourself only bound by regulations in a certain form? Yes.
5647. It is the form you look to—the Minister for Works might give his orders in this mode and you would obey them then? He could not lay down orders without consulting the head of the department.
5648. Who is the head of the department? I, as Commissioner of Roads.
5649. But supposing new conditions were issued, you would not consider yourself bound by them unless you assented to them yourself? I cannot carry them out unless they are assented to by myself.
5650. Then your assent you consider necessary to any regulations that may be made? Of course; I am responsible for the payment of the money and the execution of the works.
5651. Supposing any fault is found with any work done under you, by complaint to the Minister, would you not consider yourself bound to make explanations? Merely to report.
5652. And your report is conclusive? My report is conclusive. Whatever document reaches the Minister relating to the Road Branch is minuted "Commissioner of Roads, for report."
5653. And so I conclude, with regard to complaints against public servants under you, is your report conclusive? It is conclusive if it gives satisfaction to the Minister, which it has never failed to do.
5654. Then you admit that the Minister has some discretionary power in dealing with the officers under you—he can dismiss them without your sanction? Yes, they are appointed by him, not by me.
5655. You have nothing to do with their appointment? Nothing whatever.
5656. You are not consulted? I am always consulted.
5657. And is your recommendation generally taken? About as much one way as the other—about half.
5658. You do not consider you have any reason to complain on that score? I consider the Minister is most impartial in his distribution of office.
5659. You do not think the public service has been injured by your recommendations not being attended to? No, I have no reason to say so; the appointments have been very fair.
5660. Then if I understand you rightly, in regard to your duties you consider your opinion conclusive, but not in regard to appointments? I have nothing to do with appointments; they are made by the Governor and Executive Council.
5661. With regard to yourself—if complaints are made against yourself. I do not wish to make any special allusion; but suppose charges are made against the Commissioner of Roads, in what form ought they to be dealt with? Charges by the public, do you mean?
5662. Charges by any one—such charges as these of Mr. Quodling? These charges were made by Mr. Quodling—now that they are admitted to be charges—to the Minister for Works, which, I presume, was the proper way, and the Minister would have called for an explanation, which the Minister would have got.

5663. Would you consider your report in that case conclusive? I consider that if the report were a true one, and convincing to the mind of the Minister, it would be conclusive. W. R. Collett,
Esq.
5664. Without reference to its truth, would you consider your report conclusive, if you were called upon for an explanation? As far as my report went; I cannot argue whether it would be conclusive to another man's mind. 30 Dec., 1861.
5665. You admit the right of the Minister to hold an inquiry into your conduct? Certainly.
5666. In that case, may he not also define your duties, because if he has a right to inquire into your conduct he of course must form an opinion as to your duties? A man may inquire into any person's conduct, but he cannot alter an Act of Parliament.
5667. But he may interpret an Act of Parliament in a different way from what you do? He may, and very likely he does, but that does not alter my opinion.
5668. In that case you must be responsible to the Minister for Works? That may be your opinion; I do not conceive so. During the present year I have acted on my own responsibility alone.
5669. It is in the Minister's power to inquire into your conduct? Yes. Any honest man would like his conduct inquired into.
5670. And in that case it would be in his power to come to an adverse decision? No doubt, and to report to the Executive, upon which I would get my dismissal. I am perfectly aware of that.
5671. So far, then, you are responsible to the Minister? So far as my personal honesty and competency are concerned, but not as to my duties.
5672. You do not admit that the Minister has any discretion in determining on the quality of the work done under you? None whatever.
5673. *By Mr. Hoskins*: Do you consider that the Minister is empowered to dismiss you? Certainly not; I have not the least idea of it.
5674. *By the Chairman*: Then of course you do not consider yourself responsible to Parliament at all? To what Parliament may do, certainly not—to what Parliament has done I do consider myself responsible—to that Act of Parliament which is my guide.
5675. You are not responsible for your conduct, to either House, in any way? I do not know. I am sure I do not know what the duties and powers of the House may be; but I should not in England consider myself so. It may be different here.
5676. You say your reports are conclusive, as regards the quality of work done under you; supposing the Minister of Works were of a different opinion, and got the opinions of persons he considered as well qualified to decide against your opinion, what would be the result then? The result, if adverse to me, would be, that he would report to the Governor and Executive Council that I was incompetent, and I must take the consequences.
5677. As Commissioner for Roads, I suppose you have full power over your subordinate officers—Superintendents and road overseers—with the exception of dismissing them; full power to order them to do anything? Of course I have.
5678. They are entirely under your orders? They are entirely under my orders.
5679. Is the Engineer of Roads under your orders? He is. Every officer of the department is under my orders.
5680. Do you consider yourself qualified to decide on the competency of the Engineer for Roads, and the correctness of his opinions? Most certainly. I would be unfit for my office if I could not do so.
5681. Was there any complaint made against you when Mr. Eagar was in office? Yes.
5682. Will you state the circumstances? The complaint was, that I exceeded my duty as Superintendent.
5683. That was when you were Superintendent? Yes.
5684. Was there an inquiry made then? I am aware of no inquiry except what Captain Martindale instituted.
5685. By whom was the complaint made against you? I believe a letter was written by Mr. Dangar. I am not aware of any other person.
5686. Was any inquiry made? I was called upon to refute certain charges, such as having gone 80 miles in one day over my road.
5687. You were called upon to report? Yes.
5688. And you did report? I did.
5689. Is the letter you wrote then in the Office now? I presume it is.
5690. Did you get any reply? I got a reply to the effect that I must be more careful in future, or something of that sort.
5691. You were reprimanded then? I might have been reprimanded, if reprimand is the word. I was found fault with and told to be more careful in future. I did not myself consider it a reprimand, rather the contrary.
5692. What was the particular thing you were told to be careful about? About carrying on the works; to spend the money more equally. My object has always been to make an improvement at once, because the quicker it is done the more it is for the benefit of the public. The old system was to spend so much a week, or so much a month.
5693. Was it not for allowing money to be spent without authority—I do not mean to say anything implying criminality—was it not for spending money without proper vouchers? For allowing contractors to exceed their contracts, and then certifying for the work done.
5694. Paying more than was due? No, I had nothing to do with the payment.
5695. Certifying for more than was due? No, for more work than was in the contract. I beg here to remark that for many years previously I was perfectly irresponsible as Surveyor of the Northern Road; I had no one to guide me in the slightest degree.
5696. As Surveyor? We were called Surveyors of Roads until Captain Martindale came into office, and had been so from the time the system was first originated under Mr. Deas Thomson and Sir Charles Fitz Roy. For about five years I was responsible to no one,

- W. R. Collett, Esq., though nominally under the direction of the Colonial Architect, and not the slightest notice was taken of my proceedings for many years, nor did a single officer come to visit the works.
5697. Were you Surveyor of Roads when this complaint of Mr. Dangar's occurred? Yes.
5698. You held the same rank as you do now? No, I held the same rank as Mr. Brown holds at present under me.
5699. Was there a Commissioner over you? Yes, Captain Martindale.
5700. In that case there has been an additional officer appointed since? I am not aware of it.
5701. Is there not now a Superintendent of Roads? Yes, that is the position which I held.
5702. With overseers under him in different places? The same as I held.
5703. Who is the next officer to you at present? In the department?
5704. Yes, above you? There is no officer above me in the department; I am head of the department.
5705. You held the same office as Captain Martindale did? Exactly.
5706. You say, in this statement, that you have power to authorize the payment of money on your own responsibility, without reference to subordinate officers? Or the Minister.
5707. Or without reference to the Minister? Yes.
5708. And responsible only to the Executive Council? After the accounts have passed. The Auditor General is a check upon me, because he can refuse to pass the accounts.
5709. *By Mr. Hoskins:* Will you explain the nature of the check? Any account he does not choose to pass is returned, and he is in the constant habit of sending back accounts if they are not satisfactorily vouched for. For instance, if I were to pay an overseer a day's salary, or any salary whatever, without the authority of the Minister, the voucher would be sent back; and it is the same thing with respect to any other voucher I have not got the proper certificates for; but the Auditor General has always considered the certificate of the head of the Office as the best he can get.
5710. *By the Chairman:* It is not your practice to depend on your own supervision of works? It is impossible for me to do so.
5711. But in particular cases, where you think it right to do so, you do do so? Yes; in three cases during the last year.
5712. Was the Doughboy Diversion one of them? It was.
5713. That was one of the cases in which you thought it right to authorize the payment of money without reference to the Superintendent? I did so.
5714. Will you state the duties of a Superintendent? I am not aware that he has any duties.
5715. When an officer is appointed is it not usual to tell him what to do? I should imagine so. With reference to the late Superintendent, he was no appointment of mine, and probably if he had any instructions he can produce them.
5716. When an officer is appointed he must have some duties which he is told to perform—you do not leave it to his imagination? I am not aware of any written instructions in existence in the Office with reference to the duties of a Superintendent.
5717. I do not ask about written instructions—I merely wish to know what duties a Superintendent of Roads has to do—he is not to do nothing—what is he to do? He has to see that the money is expended according to the directions of the Commissioner for Roads; that is his duty; he is only an instrument in the hands of the Commissioner.
5718. Is he not to see that the works are done properly? That is his business; he would be dismissed if he did not see them done properly.
5719. In fact his duty is to see that money is spent according to the instructions of the Commissioner? Yes.
5720. And to see that the works are done properly? Yes, and to control his overseers.
5721. The overseers are only instruments in his hands? Exactly.
5722. These being the duties of the Superintendent, I suppose if he sees anything going wrong, it is his duty to inform the Commissioner? He is instructed to report every fortnight.
5723. Then he does get instructions to report? That is part of his instructions. They were first given when I came into office, and did not exist previously.
5724. Did you ever instruct them what their duties were—any of them? There are certain office duties which every person is aware of—to send in vouchers, and so on.
5725. Does a man appointed from a lower office to a higher know his duties by instinct, or from observation—how does he know them? Really I cannot say. It is no appointment of mine.
5726. Have you ever had any Superintendents of Roads appointed? I have had; when I was made Commissioner Mr. Brown was made Superintendent.
5727. Surely it is part of your duty to see that a Superintendent does his duty? Undoubtedly it is.
5728. *By Mr. Hoskins:* You said the Superintendents were expected to send in reports every fortnight—who instructs them? It is part of the detailed orders of the Office.
5729. How do they actually get these instructions? I order a circular to be sent them.
5730. *By the Chairman:* When a Superintendent is appointed, is he not told his duties? I am not aware that he is.
5731. That has not been your practice? I can only speak of things as I find them. When I was Superintendent I got no instructions; as Commissioner I have given no instructions defining duties.
5732. *By Mr. Hoskins:* You have seen this circular you speak of? Yes.
5733. Do you know any Superintendent that has got no circular? No.
5734. *By Mr. Dalglish:* Who is the Superintendent that you spoke of that was not of your appointment? No Superintendent is an appointment of mine; I have not the appointment of Superintendents.

5735. *By the Chairman*: Was Mr. Quodling appointed when you were in office? No, he was in office as Superintendent when I was made Commissioner; when I was Superintendent of the first division he was Superintendent of the second division. W. R. Collett, Esq.
5736. Mr. Coghlan has been appointed since you came to office? Yes. 30 Dec., 1861.
5737. Was not that your recommendation? No, I recommended another gentleman.
5738. Has Mr. Coghlan never been made acquainted with what his duties are? He has had a few instructions from me when I met him the other day. Those were the only instructions he has had.
5739. They were given personally? Yes.
5740. Can you speak to his competency? Certainly.
5741. Do you think him very competent? Perfectly.
5742. How can you tell whether he is competent or not? By the works he has carried out on the Southern Road; by the character he had on the Western Road for five years previously; and by his sections of roads, bridges, &c. I consider him a very excellent surveyor of works, but he was no recommendation of mine.
5743. As to his particular duties as Superintendent, how do you know that he is even acquainted with what they are—does he know them by experience? Mr. Coghlan acted as head overseer between Sydney and Penrith, over whom there was no Superintendent. He was a first-class overseer, who communicates directly with the Commissioner for Roads without a Superintendent; and therefore he was, to all intents and purposes, a Superintendent before he was appointed to this work in the Northern District.
5744. If a Superintendent makes certain reports regarding works, you in general act upon them, I presume, as you cannot possibly superintend everything yourself? It is very seldom I ignore the suggestions of a Superintendent if I call upon him to give suggestions; but I invariably do not take advice which is not asked for.
5745. If an inferior officer saw anything going on wrong, and made a suggestion to you, would you think it consistent with your duty to take no notice of it unless you had called for his report? Not if it were put in the light of an unasked for suggestion.
5746. If an inferior officer reports without your having asked him, do you mean to say you take no notice of it? Not if in the shape of a remonstrance.
5747. Do you always take care to give the Superintendents a knowledge of the form in which their suggestions or reports are to be made, in order that the public service may not suffer by their making suggestions in an improper form, and their not being attended to? I presume that a gentleman in any capacity is supposed to have gentlemanly feelings, which should prevent him from writing letters to me in a manner that an inferior officer ought not to do. If he does do so I take no notice of him.
5748. Where is this rule about gentlemanly feelings to be found—is there anything of the kind in the Main Roads Act, which you say is your guide? There is an Act very superior to the Main Roads Act, by which business is conducted between gentlemen.
5749. You have stated that you are guided by the Main Roads Act? My powers are derived from the Main Roads Act, but the mode of conducting business is different.
5750. If an officer does his duty, even though it is not done in the most gentlemanly way, does it not answer the purpose? I presume not. I presume no officer is obliged to use any vulgarity or to put his superior officer in an unfair position.
5751. Is it not possible that an officer may have practical experience and scientific knowledge fully equal to the duties of his office, and yet not have quite that refinement of manner and feeling that those above him may have—are not allowances to be made? Allowances have been made, and I regret that they were.
5752. If the public interest is served by an officer in an honest way it is no very great matter as to his gentlemanly feelings? I beg to state that no inferior officer who, publicly and before workmen, condemns and endeavours to lower in the estimation of the public his superior officer, is doing his duty.
5753. That is another question. That may be an act of insubordination, which it seems to me is an intelligible word, but as to the gentlemanly feelings of subordinate officers, no doubt it is very pleasant to have these things, but I ask how these things are to be defined, and you do not state how? If you ask me a question I look you in the face—I do not turn my back upon you; that is gentlemanly conduct; but if I speak to an inferior officer, and he turns his back upon me and sneers at me, it is not gentlemanly conduct.
5754. I presume you infer that these occurrences have taken place with you and an inferior officer? Ever since I have been in office.
5755. And with Mr. Quodling? Yes.
5756. You complain that Mr. Quodling has not treated you in a gentlemanly manner? He has treated me not only in an ungentlemanly manner, but in a manner that my conduct to him was quite undeserving of; and it is not my complaint only, but every contractor and every officer along the whole district make the same complaint, saying that his manner is such that nobody can work under him.
5757. With regard to the duties of a Superintendent, if a Superintendent sees that work is being badly done is it not his duty to report it to you? Yes, to report; I have stated that.
5758. But the report must be in a particular form? Certainly; he reports that such and such is the case.
5759. But if he personally remonstrates or informs you of it you take no notice? I do not acknowledge the word remonstrance.
5760. If he reports personally? I am not in the habit of taking personal reports; I have everything in writing, and give everything in writing.
5761. Then if a Superintendent, in ignorance of forms, and of what you call gentlemanly conduct, were to tell you that certain things were going on wrong, would you not take notice of it? I presume, being on the spot, I would not require his information as to whether things

W. B. Collett, Esq. things were going on wrong. If I am competent for my office I am able to see whether they are going on wrong or not. The information would be superfluous on his part.

5762. I merely want to find out what the duties of a Superintendent are? Probably the best way will be for me to state how the present system arose. In January, 1854, Surveyors or Superintendents of Roads were appointed, whose duties were to spend a certain amount of money to the best of their ability, exactly the same as it is now in the Lands Department. In the Lands Department there is a large sum of money voted, which is handed over to the Superintendents, Magistrates, or Wardens of Districts, to be expended.

5763. That is for subordinate roads? Yes. There is no check whatever. The money voted is placed to their credit and spent entirely under their direction.

5764. Is that the case with Superintendents of Roads? It was till 1858, and during that time I was Surveyor of the Northern Road. When Captain Martindale came into office, he endeavoured to the best of his ability to carry out a new system. That new system was to have the Road Engineer, Mr. Bennett, occasionally visiting the works, perhaps once or twice a year, and pointing out to the Superintendents how the money was to be spent. The Superintendents, I for one, occasionally objected to this, and the matter was then referred to Captain Martindale. I objected to a subordinate to the Commissioner directing me how to spend the money. I was a subordinate officer then, but I was not exactly obliged to agree with Mr. Bennett; and, for instance, whenever Mr. Bennett suggested that a bridge should be built twelve feet broad, I invariably stated that that was a great error in construction, and that it ought to be sixteen or eighteen feet broad. That was one point on which we disagreed. Mr. Bennett said twelve feet was large enough for this Colony, and I said it was not. Another point was the concentration of money at particular spots, so as merely to make a mile or two of good road, and leave all the rest in the district untouched. I objected to that system. If I got any credit for my management of the Northern Road, it was because I expended the money, so that though the road was never quite good, it was never very bad. These matters were referred to Captain Martindale, and I must state that Captain Martindale coincided with me except on the question of bridges, and on that he decided against me, because he considered Mr. Bennett a more competent judge of the construction of a bridge. The bridge question was therefore given against me, for which I have since suffered, for these narrow bridges and narrow roads have been supposed to be my work, whereas I have never made a bridge only twelve feet wide in my life, and I never made a road narrower than thirty feet. When I came to office as Commissioner, I did not consider myself called upon exactly to follow this system, and as it was the only precedent I had, I established, with the consent of the Minister, other rules and regulations, which were that the money should first be spent to make the roads passable, and then if any were left that that should be spent on particular works in the shape of contracts. My first object was to spend the £50 a-mile voted for the Main Roads in maintaining and keeping the roads in repair, and to do that, I assumed a power of disposing of the money; but of course, if certain sums of money are voted for certain works to be done by contract, then I am bound to see it spent in that way. For instance, if money is voted for such a contract as this Doughboy Hollow Diversion, or for a bridge, I am bound to see it spent as directed; but my system has been diametrically opposite to that pursued by Captain Martindale, with reference to keeping the roads in passable order at all times of the year.

5765. The Superintendents of Roads, then, are to see that money is spent under the instructions of the Commissioner in regard to those parts of the roads which require maintaining; but with regard to contracts, surely their duty is to see that the contractor keeps up to the conditions of his contract? Subject to alterations made by the Commissioner.

5766. If a contractor were suffered to go on with his work without objections being taken to any faults of construction, might it not be possible that the Commissioner coming afterwards could not tell what the errors were of which the Superintendent complained? Then the Commissioner is not fit for his office.

5767. Is it not possible that the consolidation of the road might not be sufficient? I do not believe in consolidation; it is a word I have entirely erased. When I came into office I scratched out the word consolidation from every contract; I do not believe in consolidation.

5768. Was it in your power to alter contracts? If it is substituted in the contract before it is signed.

5769. This is the case I want to put—supposing the Commissioner has not been able to visit the works at all, through the whole performance of the contract, is it possible for him, at the end, to know whether it has been done throughout correctly, without reference to the Superintendent at all? When I was appointed to the office of Commissioner, I was informed that I was not to step in Sydney, but to visit all the works periodically, which I have done; and in doing so I have travelled about seven thousand miles this year.

5770. I want to know whether the Commissioner for Roads can possibly determine the mode in which a contract is performed, if he has not seen anything of it throughout, and if he does not in some way rely on the report of his Superintendent—we will say the Doughboy Diversion or any contract you like? He can, simply because the contracts are drawn out by himself. I can see whether my own orders are carried out; I generally write out the contracts.

5771. Can you tell as to the making of the road—the whole construction—whether every particular has been complied with? I must take the fortnightly reports and vouchers to prove to me that the heaps of stone, for instance, have been properly measured.

5772. In that case you must rely on the report of the Superintendent? Yes, for the previous thing; but I have always got ten per cent. in my hands, and if the work passed by the Superintendent does not come up to my ideas I can make the contractor finish it differently.

5773. Supposing there are parts of the road to which, before the metal is put on, the Superintendent objects, because he does not think they are in a fit state to receive the metal? That system is entirely done away with. We tie the contractor down to time now, and we cannot do both. The Superintendent cannot object to the contractor carrying on his work, if the contractor is liable to a penalty of £300 or £400 for not completing it in time. W. R. Collett,
Esq.
30 Dec., 1861.
5774. What do the Superintendents do more than the overseers? Very little more, except that they are over a more extensive district.
5775. Do not the Superintendents check the overseers at all? They cannot do it in many instances, for they cannot be an effectual check over task-work carried on at Armidale, for instance, when the Superintendent is resident at Tamworth.
5776. According to you, whether the Superintendent is competent or not, you can tell whether the work is done properly? Of course I can.
5777. Then it does not matter whether the Superintendent is competent or not? He must be able to do certain things—write a report, measure cuttings or heaps of stone, set out bridges, take levels, and so on.
5778. Is it not his duty to refuse vouchers for the payment of money if he thinks the work is not properly done? He has nothing to do with refusing payment.
5779. Your say he furnishes vouchers? He is ordered to furnish vouchers for work done.
5780. Supposing he thinks it is not his duty to furnish these vouchers? It is his duty.
5781. Supposing he thinks the money has not been earned? It is impossible, if the works are going on at all, but that some money must be earned. No contractor waits a whole fortnight without having done some work; and it is the duty of the Superintendent to send in his returns of work done every fortnight. If, for instance, he has sent in his returns up to the end of April, it is impossible that further work is not executed between the 1st of May and the 14th of May, otherwise he would report that there was not a single man at work, but if there has been a single man at work he must have done certain work, and it is the duty of the Superintendent to report the quantity of work done. Therefore he must send in some voucher.
5782. Supposing the quantity of work and the quality together do not, in the opinion of the Superintendent, amount to the sum he is required to vouch for? He is not required to vouch for anything except the work done. He vouches on the 30th of April for all the work that has been done during the previous fortnight, and on the 14th May he has again to report and say what work has been done in that interval. It is impossible that no work has been done. Something must have been done, if it is only a pound's worth.
5783. Supposing he was required to vouch for a larger sum of money than the pound's worth? I am not aware that he is required to vouch for any sum of money at all, but if he does not choose to vouch for the work done he neglects his duty, and I vouch for him.
5784. Supposing there is no work done? Then I should not give the contractor a farthing; and I should never think of giving a contractor a sum of money for any work without a voucher from the Superintendent, unless I had visited the work myself.
5785. If the Superintendent does not think any work has been done? Then he reports that there are no men at work.
5786. It is quite possible to keep men at work and do very little? That very little must be returned.
5787. If he thinks the work done falls very short of the money that would otherwise be due to the contractor? He has nothing to do with the money due to the contractor; he has only to report the work done, and send in a voucher.
5788. He has nothing to do with payments of money at all? Nothing whatever.
5789. You said just now that it was his duty to see that the money was spent under the orders of the Commissioner? That is with respect to the maintenance of the roads.
5790. He has nothing to do with the money voted for contracts? Nothing whatever.
5791. He simply makes a report of what has been done, and how it has been done? Yes.
5792. If that report is not furnished? Then the contractor comes to the Office, and under the tenth clause he can claim it. I have no choice, I must pay him.
5793. Are you bound to pay him on his own statement, without any examination of the works? That is a difficult question. I think I am bound to pay him, but I should not pay him. I think I am bound under that clause; I think it is part of the contract.
5794. I am supposing a case in which the Superintendent, say, neglects his duty, and does not furnish reports—are you bound to pay the contractor then on his own mere statement; I grant he may in law have a right to recover, if his work is done; but surely the Government must examine whether it is done or not, and in what way it is done? The Superintendent is supposed to do his duty; but if he neglects it I should hesitate in giving money without any voucher at all. I would rather go to the trouble and expense of seeing the particular work.
5795. Have you in any case authorized the payment of money without a report from the Superintendent, and without examination yourself? Never without examining it myself.
5796. Then, in all cases where reports have not been furnished by the Superintendent, you have examined the work yourself? Yes.
5797. How many cases of that sort have occurred? Three, or I may say two.
5798. Will you state the cases? When I say two I am not aware of any real case except one. The other cases have been conducted, as far as I am aware, in a perfectly legitimate manner; and if one case was not legitimate it was owing to a little error that Mr. Quodling, senior, led me into.
5799. Will you state the cases, and the circumstances connected with them, in which the reports of the Superintendent have either not been furnished, or have not been satisfactory, and in which you found it your duty to authorize the payment of money without a report? I have corrected myself about the three cases, and will abide by the one.

W. R. Collett, Esq. 5800. Do you state positively that there has only been one case of the kind? Only one contract; I am not aware of any other.

30 Dec., 1861. 5801. In which you have authorized the payment of money without the necessary vouchers from the Superintendent? Yes.

5802. Will you state the case? I have paid money for the Doughboy Diversion without having vouchers from the Superintendent.

5803. In only one instance? In only one contract. My impression is, that I have done it repeatedly in regard to that contract.

5804. Did you not consider it an unusual occurrence? Not under the circumstances.

5805. In all these cases did you look to the works yourself before you authorized money to be paid? Invariably. I beg to hand in a letter which will perhaps throw a new light on the subject. It is dated the 7th February, and addressed by Mr. Martindale to Mr. Bayley. (*The witness handed in the same. Vide Appendix B.*) I should also like very much, if it does not interfere with the mode of examination, to hand in the bond, and specifications, and contract with Mr. Martindale, which precedes this, dated the 28th January, for I am very particular about these dates, as a great deal depends on the dates, to shew that this payment was not made without very good reason for it, or with any wilful disregard of precedents.

5806. Will you state the whole circumstances that led to these cases where you were obliged to pay money repeatedly without the report of the Superintendent? I must first state that I originally surveyed this particular contract and laid it out; and this being the only engineering contract, if I may so call it, which has taken place on the roads in New South Wales—for I consider the Moonbies and Warland's Range, which were also in my district, comparatively easy, while this is extremely difficult—I must say I felt some little pride in being able to carry it out. As a proof, I beg to call attention to two paragraphs in Captain Martindale's report on the Great Northern Road, for 1858. The first runs thus:—"I must, however, observe that great credit is due to the Surveyor of the Northern Road, for the manner in which he has availed himself of the materials at hand to form the road, and by which he has effected great improvements with small means." The other passage is in these words:—"During the delay thus occasioned"—by an accident to Mr. Bennett who was travelling with the Commissioner—"the Surveyor of the Northern Road examined Chilcott's Creek, and verbally reported to me that he had formed a favourable opinion of the proposed deviation." Subsequent to that report of mine, for which I sent in a detailed estimate and plans, Mr. Debenham was appointed by the Government to lay out the whole road from Doughboy Hollow northwards, and Mr. Debenham adopted my line in its integrity, viz., the present line of road as carried out at Doughboy Hollow. Subsequently Mr. Debenham was removed and Mr. Wells was appointed by Mr. Bennett to re-survey the line, and he made no alteration whatever, except when it came to the crossing of Doughboy Creek, where there was a choice whether the line should cross the creek twice, or whether it should take a sidling involving a large expense in rock, and also in earth excavation. This question not having been decided, and Mr. Bennett having left the Colony, I went up as early as possible and compared the two lines; and I considered that on a mountain range it was far more desirable to carry out the one with good gradients, which is the line at present adopted, than to cross the creek twice with very bad gradients; and no engineer can for a moment doubt that, as far as the gradients are concerned, which is a material element in heavy traffic on a mountain range, the gradients in the present line are infinitely superior to those on the other line. Having determined to carry this out, I of course experienced some little difficulty, in the first instance, in doing so, having for Superintendent in that district Mr. Robert Quodling, a strong advocate of Messrs. Bennett and Wells, and a person who shewed the most perfect contempt for my ability, and everything else connected with me. Therefore I, in the first instance, told Mr. Quodling that I should dispense with his services so far as that one contract was concerned, but afterwards I told him he was to superintend the earth-work, and Mr. Bayley was to superintend the bridge-work and masonry. During the progress of the works I made repeated visits. I visited them on the 11th and again on the 18th April, on the 26th June, on the 12th September, and finally, on the 19th December. This was during the time I was Commissioner; and I had inspected the works very frequently previously to that, while I was Superintendent. I then told the contractor—I said, you must sign this bond, subject to any alterations I may make hereafter; there will be sundry alterations made, and you will agree to those alterations, and your sureties will agree to those alterations; and he said he would have no objection, as I was going to take the management of that contract, and any alterations I made he would accede to. I think I will now hand in this bond for the Doughboy Diversion Works, as signed by Mr. Martindale and his sureties, the specifications, and general conditions, the schedule of prices, and the advertisement calling for tenders. [*The witness handed in the same. Vide Appendix C.*] You will see that this is a contract for a schedule of prices which was accepted by the Government as a lump sum. There is this great peculiarity about this contract. What the object was in accepting this as a lump sum, when the contractor says nothing about a lump sum, I am not aware of; but I believe the contractor has full power to refuse the lump sum, and to go back on his own schedule of prices. There is no document to prove to me that the contractor ever accepted this contract, except by going on to the work. The matter stood thus: He did not exactly know his position, and he left it pretty much to me, which I do not in the least deny. I was very anxious to engage him, as I believed he was almost the only contractor in Australia who could carry out the works so well. He had at the time 200 men employed. Under these circumstances, the contractor repeatedly communicated with me, through Mr. Bayley and through Mr. Quodling, and forwarded to me copies of the letters, which will shew that there was nothing done except in a business-like way between Mr. Martindale and myself.

myself. The first letter I will hand in will shew the terms on which he took the contract. *(The witness read and handed in the same. Vide Appendix D.)* The next is a letter from Mr. Martindale to Mr. Quodling, dated 7th March. *(The witness read and handed in the same. Vide Appendix E.)*

W. R. Collett,
Esq.
30 Dec., 1861.

5807. These payments were made by your authority, on the report of the Superintendents? They were to send in reports and vouchers, and I paid the money.

5808. A voucher means a certificate that the work is done according to contract? It means that the work is done, not that it is according to contract.

5809. A certificate and a voucher mean the same thing—do they not? There are two vouchers, one what is called an H form, and the other, an I form. The one is merely for an advance on a contract, and the I form is for my guidance as to how that advance is made up.

5810. They were ordered to send in these vouchers fortnightly? Yes.

5811. And on receiving these, in general, you used to authorize payments? I authorized payments of course.

5812. I want you to state the circumstances in which you authorized payments without vouchers? You will find, probably, that I never authorized payments without vouchers, although apparently I did. I beg to hand in a third letter, from Mr. Martindale to Mr. Quodling, dated 11th May, with my minute thereupon. *(The witness read and handed in the same. Vide Appendix F.)*

5813. That was one of the cases? That was one of the cases, but the voucher Mr. Quodling subsequently furnished, so that it hardly comes under the category of having paid money without vouchers, because on Mr. Quodling's return he furnishes the voucher. I may state that with that solitary exception of Mr. Quodling's absence, that from the 7th of February to the 12th of August—and I beg you to bear this in mind—everything proceeded with the works exactly as I directed. With the exception of his absence all the vouchers and reports came in regularly.

5814. With regard to this particular case, you authorized the payment without his voucher in the first instance, but he gave it afterwards? Yes.*

5815. Did you examine the works yourself, or did anyone do so, to enable you to judge whether they were done at all, or how they were done? The report of the 7th of March from Mr. Quodling would be sufficient to authorize it, in which he states the quantity of work that has been done.

5816. A previous report? Yes.

5817. Then, in fact, his voucher was not necessary? I had a report in this instance though not a voucher. Mr. Quodling here states in his report of February 28th:—"I have taken charge of the Doughboy Diversion works, and made a measurement with Mr. Bayley. The following is a list of work done during the month:—3,339 cubic yards earth excavation, 634½ cubic yards, rock excavation, 1 mile clearing, and 51½ cubic yards rubble masonry. The contractor is cutting timber for Nos. 1 and 10 bridges." Upon this I made a minute:—"No. 10 bridge does not exist. Inform Messrs. Quodling and Bayley to see revised sections. W. R. C. 19-3-61." I beg to hand in this report. *(The witness handed in the same. Vide Appendix G.)*

5818. Then it was on this report, without a voucher, that you authorized the money to be paid? This and his subsequent report. This is his report for February, and here is another for March; and I think you will see the letter I handed in from Mr. Martindale is dated 7th March.

5819. Then you authorized money to be paid without a voucher on the strength of these reports, because you judged by them that the work was properly done? You will bear in mind that I was there on the 11th and 18th April, and I was therefore perfectly competent to judge of the work being done without any voucher whatever.

5820. Then these vouchers were a mere form? Except for the Auditor General.

5821. As far as you were concerned you did not require them? No, but I must have them for the Auditor General to pass the accounts. It has been stated that repeated remonstrances were made to me as to the way in which this contract was carried on, but I can only say I am not aware of anything of the kind having come to hand, and there is certainly no such remonstrance in any of these reports of Mr. Quodling's. As to the payment of the money I think I was perfectly justified in that, having personally visited the works, and having also these reports to prove to me that the work had been done. But I also beg to assert that I should have done it without these reports, having personally visited the works. The report of 31 March says:—"Doughboy Diversion—The following work has been done since last report—4,836 cubic yards earth excavation, 260 cubic yards rock excavation, ¾ mile of clearing. 47 men are employed on the earth-works, and 10 at the clearing. The works are progressing slow but satisfactorily." That is the only word about the Doughboy Diversion. I will hand in this report. *(The witness handed in the same. Vide Appendix H.)* Mr. Quodling's report of the 3rd May is to this effect:—"Doughboy Diversion—The contractor is progressing favourably with this contract. The earth-work will be ready in a month for final measurement. I have returned voucher for 1,200 cubic yards metal; 88 men are employed on the earth-work, and 8 stone-breaking. I am carrying out the slopes of the big cutting as directed." There is not a word of remonstrance in that letter. *(The witness handed in the same. Vide Appendix I.)*

5822. Then all that was necessary to complete this, as a business transaction, was a few vouchers, which were not furnished on the 11th May, at the time Mr. Martindale wrote to ask you to pay the money? Yes.

5823. You did not consider them necessary yourself—you were quite satisfied? Yes; I was at Bowenfels at the time, on the Western Road, and I made that memorandum because it was the first time I had ever advanced any money in that way, not that I at all doubted my power

- W. R. Collett, Esq.
30 Dec., 1861.
- power to do so, but because I did not wish it to be taken as a precedent. I now come to a very material point in the evidence —
5824. Before you go on, allow me to ask, is this the only instance in which you have authorized the payment of money without vouchers? Up to a certain date; and we will come to the reasons for that afterwards. I beg now to hand in a paper, shewing that up to the 16th of August, Mr. Bayley and Mr. Quodling have furnished certificates for work completed, to the amount of £5,415 9s. 11d, and subsequently for work to the amount of £1,624 15s. 3d., shewing that work had been completed, according to their own certificates and reports, to the extent of £7,040 5s. 2d., whereas the amount advanced to the contractor up to that time was only £6,000. All the documents on which this statement is based can be furnished from the Office—the vouchers with their signatures. (*The witness handed in the paper referred to. Vide Appendix K.*) I will take this opportunity of stating, as we are upon the voucher question, that all the vouchers furnished by Mr. Quodling gave dissatisfaction in the Office, on account of the great inaccuracies they contained. There was not a single voucher but gave the clerks in the Office, trouble to correct. Frequently the amounts of the calculations were wrong, and they were obliged to be checked by the Office. The vouchers will speak for themselves. I will hand in these. (*The witness handed in certain vouchers.*)
5825. You said there were other cases in which money was paid without vouchers, by your authority? What money has been paid in consequence of Mr. Quodling refusing to send vouchers has been paid since that time. But on reference to the Office I find, as stated in the paper I have handed in, that up to the time of Mr. Quodling's resignation of office, there were vouchers and reports for work to the amount of £7,040 5s. 2d., at the lowest estimate.
5826. *By Mr. Hoskins*: Then I understand that vouchers were sent in for work in excess of the gross amount of the contract? Yes; and Mr. Quodling stated that there was work to be done to the amount of £2,000 besides this. Of course it requires that figures should be gone into to prove this, and I only hope some honorable gentleman will go into the figures.
5827. *By the Chairman*: All these vouchers are to be got in the Office? Yes; that is, a list or analysis of the vouchers in the Office. It was prepared by one of the clerks in the Office.
5828. Do the vouchers require to be signed by the overseer as well as the Superintendent? I cannot tell exactly the requirements; it is a new system; I think there is a great deal too much paper and forms.
5829. Has it been considered necessary, under you, that you should have the signatures both of the overseer and Superintendent? No, none of these have been signed by Mr. Hannington. You see the word overseer has been scratched out by Mr. Quodling himself, and he has written his name above it.
5830. Do you state positively that at no time, with regard to this contract, was more money paid than was certified for? No more than I considered was due.
5831. Was there always twenty per cent. withheld? Only ten per cent.
5832. Was that always withheld—did you pay beyond that? I imagine not. There was £1,000 held back, which is, as nearly as possible, the amount.
5833. Are the overseers and Superintendents of the works always provided with the specifications of the works they had to superintend? Of the contracts, do you mean?
5834. Copies of the contracts, plans, and specifications? They are not furnished with them from Sydney.
5835. How could they know whether the work was being done properly? It has generally been the case that the contractor has got the specifications sent from Sydney; but they are also invariably deposited in the nearest Police Office. It is a matter of arrangement between the contractor and the Superintendent to whom these belong. I am rather in favour of giving them to the Superintendent; but the contractor generally gets hold of them, leaving the other party to make a copy of them.
5836. The Office does not furnish them to the Superintendent? No.
5837. How then is the Superintendent to know whether the contractor is working up to his contract? He is presumed to make a copy from the Police Office; and in many instances he has already prepared and sent up the original of the specification for revision, so that he is already acquainted with it.
5838. What is the distinction between the duties of an overseer and a Superintendent? An overseer has probably one-third of the ground to go over.
5839. The Superintendent has a larger extent? The Superintendent has a whole district; the overseer only a portion of the same.
5840. The overseer is expected to be there continually? Never to leave it without leave of absence. It is the understanding that overseers are stationed at certain intervals along the road, but the Superintendent is without an overseer, in the central district; but up to the present year, no works of any magnitude have been carried out in the second district, on the Northern Road.
5841. In regard to the Doughboy Diversion you have made some alterations yourself? I have put in the contract, which shews that it was subject to alterations made by the Commissioner.
5842. You have exercised that authority? I have.
5843. To any large extent? To the extent of substituting the big cutting for two bridgcs.
5844. A letter has been placed before the Committee, signed by Mr. Bayley—of course you are aware of that letter? I am not aware of any letter. I am aware there was a misunderstanding in the Committee about Mr. Bayley not getting leave of absence.
5845. *By Mr. Dalgleish*: How do you know that? I believe Mr. Bayley said that.

5846. How could Mr. Bayley know what takes place in this Committee? I can only state I heard it up at Singleton. W. R. Collett, Esq.
5847. You heard at Singleton that there was a misunderstanding in the Committee? I heard that there was a misunderstanding with reference to Mr. Bayley's attendance here—that Mr. Bayley had been summoned and that I had told him not to come—and in fact, that my private letter had been sent to the Committee. 30 Dec., 1861.
5848. *By the Chairman*: The letter I refer to is one signed by Mr. Bayley, which I think it has been stated to the Committee you had ordered him to sign—that you had furnished him with the draft of it? I dare say I have got the letter—the letter about the £7,000; I wrote it out for Mr. Bayley.
5849. Will you explain the circumstances about that letter—it was an alteration of the contract, was it not? A good deal more than an alteration of the contract. Mr. Bayley was a person who always wished to have things in writing, and it was not always my wish that he should have them in writing. It was my wish that the contractor should take the contract for £7,000, and I used Mr. Bayley as a means to induce the contractor to consent to do it for £7,000. Mr. Bayley said, you must tell me what to write, and I will get Mr. Martindale to agree to it if I can, and it was upon that I gave him a rough draft of the letter. If Mr. Martindale had agreed to it, I should have saved the Government £600.*
5850. Then it is simply an alteration of the contract which Mr. Bayley, under your instructions, got the contractor to agree to? My object was to benefit the Government, or rather to get the best of the contractor; I do not deny it; and I can prove to you by written documents how I endeavoured to bring that about, because you will understand the original contract was for £6,379, and after it was accepted, the bridges were widened from twelve to eighteen feet, which alone would bring it up to £7,000. Then how was I to get the big cutting, containing a very large number of cubic yards, done for the £7,000, the big cutting not being specified in the slightest degree in the original contract? The contractor might have come to me and said I have got 12,000 cubic yards of earth to do—how are you going to pay me? and so my object was to get him to sign a letter, agreeing to do the whole, with the alterations, for £7,000. I therefore wrote that letter for Mr. Bayley to go and see how far Mr. Martindale would consider it his interest to do it. It will be a saving of at least £500 to the Government, provided Mr. Martindale carries out the £7,000 contract. I will prove also that, according to the schedule of prices, the cost of the work would greatly exceed £7,000.
5851. Has Mr. Martindale agreed to this, or declined it? I have nothing to shew whether he declined it or agreed to it.
5852. *By Mr. Hoskins*: According to your own view, Mr. Martindale has done work exceeding, by the schedule of prices, the contract, by £500 or £600? Yes.
5853. Will he be satisfied with the money he has to receive? It is a question this Committee has opened. Mr. Martindale is in Melbourne, and I cannot be answerable for him. The Committee has opened the question whether Mr. Martindale cannot now, since his character has been assailed, say that he never signed that letter, and that he will stand upon the original contract, claim to be paid by the schedule of prices, and have the work measured by competent officers. If Mr. Martindale claims that, he might get paid possibly £7,790.
5854. *By the Chairman*: Will he be entitled to it? I shall be a long time before I give it him, because I consider a verbal agreement as good as a written one to me. I do not think Mr. Martindale would go back from his bargain if he has made one, and the only reason why I make this statement is to prove that I could have had no sinister object in making the bargain.
5855. *By Mr. Hoskins*: As you have power to extend contracts, and you directed him to perform these extended works, an action would lie against you, would it not? If I can get Mr. Bayley to say he saw Mr. Martindale, and that Mr. Martindale agreed to do the work for £7,000, that is all I want to know. I have not seen Mr. Bayley, and I cannot say whether Mr. Martindale did agree to it or not; but I consider Mr. Martindale a very honourable person, and I do not mean to say he would take advantage of the Government, though this investigation puts it in his power, because he has measured the work. I have seen the amounts he has paid to his sub-contractors, and have gone over them carefully with my own measurements, and I find by the statement handed in, if you look, that he has done more work on that contract by £792 10s. than is in the original contract.
5856. *By Mr. Dalgleish*: Provided a contractor has a contract for a certain quantity of work at a certain price, so much per cubic yard, and he sublets it at so much the cubic yard, would he not receive as much benefit from a false statement as the sub-contractor? That is always supposing I have not got the exact measurements; but if the measurements of my own overseers tally with his I conclude they are exactly right.
5857. *By the Chairman*: Are you aware that Mr. Coghlan has written up to the department, declining to take charge of the Doughboy Works at all? No.
5858. He makes that statement? That has not come to me.
5859. Under what supervision have these works been since Mr. Quodling resigned—have they been under Mr. Coghlan? No.
5860. Under whom have they been? There was no necessity for there being under anybody; they are finished.
5861. When were they finished? There may be £50 remaining. If it will be any satisfaction to the Committee I will hand in my report to the Secretary for Public Works.
5862. When were they finished, or in such a state as to require no further supervision? I consider that the moment the mail went down the road they would require no supervision.

* On revision:—Omit this sentence.

- W. R. Collett, Esq.
30 Dec., 1861.
5863. Was that before Mr. Quodling resigned or after? After Mr. Quodling resigned of course, if one can tell when he did resign, for Mr. Quodling resigns on the 24th October, and then sends in certificates for work to the 15th November.
5864. Can you state the date when the works were finished, so far as you describe them, at this Doughboy Diversion? The works I should imagine were finished —
5865. About the time? The first week in December.
5866. Then Mr. Coghlan would not be required to look after them at all? Mr. Coghlan is a new Superintendent, and he has 135 miles of road to attend to. He was directed by me to go to Tamworth and to Armidale, in order to become acquainted with the requirements of his district for the year 1862. I was not going to put a new Superintendent over works he knew nothing about. My directions were that he should go over the works of the district, and leave the Doughboy Diversion until I visited it myself. I have since directed him to measure up the works.
5867. I presume you have examined these works? I have carefully.
5868. Do you think they are completed in a creditable way? Yes, most creditable.
5869. You have no fault to find with them? No.
5870. Is there sufficient metalling? There is more than is in the specification.
5871. What is the quality of the metal? There are a thousand yards, in round numbers, of the very best metal.
5872. Trap, I presume? Yes, basalt.
5873. Will you look at that stone before you—is that the quality of metal? Yes.
5874. Do you know anything of the other? Yes.
5875. Is there any of that on the road? Yes.
5876. What do you call that? It is an indurated stratified rock—igneous—that is, it has gone through fire.
5877. It is not what is usually called an igneous rock, is it? No, because the stratification still exists in it.
5878. It is simply a stratified rock fused by its proximity to trap? No, but which has been upheaved at the same time as the Dividing Range.
5879. You say there is some of that on the road? Yes.
5880. Is it fit to put on the road? Yes.
5881. Is it as good as trap? It is equally good on trap pitching—when there is a foundation of nine inches of trap. Hard metal on hard metal does not make so good a road as this put over a trap foundation. This has not been put on the road except where they have cut through rock, and have rock or pitching as a bottom, and there you do not want very hard stone. This has only been put where the ground has been previously paved or pitched to fill up the interstices, for which purpose it is better suited than hard metal.
5882. Did not the contractor undertake to furnish basalt? Yes.
5883. Is there anything in the contract about shale? No shale exists—the thing cannot exist in the Dividing Range. A person shews a total ignorance of Geology who speaks of shale in the Dividing Range.
5884. What name would you give this material? I would call it stratified rock that had gone through the action of fire.
5885. Would you not call it a metamorphic rock? You might call it metamorphic rock, but that means anything—a rock which has changed its previous character.
5886. You would not give the name of shale to that? Certainly not; there is not the slightest appearance of fossils or plants. It is infinitely older than shale.
5887. If the contractor is bound to furnish basalt, do you think he fulfils his contract when he supplies that in its place? He provided all his basalt before he used that.
5888. Then this is supplementary? Supplementary entirely.
5889. The contract has been fulfilled in regard to basalt? I say the quantity has been put on the road; he has done more, by a thousand yards, than he was bound to do. This is metal which is passed over a great many roads. It is infinitely superior to the white quartzose sandstone used in the neighbourhood of Sydney. If this is pounded up in a mortar it is all stone; whereas the characteristic of shale is that it is earth—it muddies the water.
5890. It is a stratified rock? Yes; the other might have been a stratified rock with a greater action of fire over it. I repeat that the quantity of blue metal is there, and a quantity in excess of the contract. All this inferior metal and blinding was a subsequent alteration of mine.
5891. Do you consider it a perfectly good road? I think that perhaps I might be allowed to hand in my report to the Minister. I am sure I do not wish to conceal it, although it may be injudicious to put in a report meant for the Government; but it is my wish to give all information; I do not wish to withhold a single statement.
5892. Do you consider it a good road? I consider it a very good and very cheap road.
5893. Is there any truth in the statement that the clearing has not been properly done? The original of that letter of Mr. Hannington's, on which that charge is made, is not in evidence, and is denied by the writer.
5894. Do you know whether the clearing has been properly carried out? The clearing has been carried out according to my direction, which was not to remove the stumps from the embankments, and a sum of £40 has been deducted for leaving these stumps.
5895. It was an alteration of the contract then which you authorized? I think not; I think the contract provides that the stumps are not to be taken from the embankments.
5896. Do you think it injures the road in any way? No, the road is perfectly clear.
5897. Are you of opinion that the contract was carried out fully in all respects? The contract has been carried out in all respects since my visit.

5898. Is the fencing completed? The fencing is very bad, and my alteration of the contract will shew that I disapproved of the fencing, and intended to substitute small parapet walls. W. R. Collett, Esq.
5899. At whose expense? Whenever we had the money.
5900. Will not the contractor be in any way at a loss for his bad fencing? Not at all; he is paid 8s. a rod. 30 Dec., 1861.
5901. Was he not bound to put up good fencing? He is putting it up as good as can be done with the timber to be obtained there, which is very bad.
5902. Are the bridges completed in a workmanlike manner? Yes.
5903. Is the flooring tarred and spiked as specified? They were not at first tarred as specified, but it is a question whether the substitution of slabs for sawn timber inferred the tarring of the slabs. Sawn timber is usually tarred, but it is very unusual to tar rough timber.
5904. Did you authorize the substitution of slabs for sawn timber? The original specification provides either for slabs or sawn timber. There is sawn timber in the largest bridge; the others are slabs.
5905. Which is the better of the two? That is a very difficult question; it depends so much upon the wood in the neighbourhood. It is a very badly wooded country.
5906. Was this a deviation from the contract? Both were provided for in the schedule of prices; I might have which I liked.
5907. You authorized slabs, and you did not think tarring was necessary? I cannot say I authorized slabs particularly. The original schedule will shew that Mr. Bennett made provision for slabs; Mr. Bennett made an allowance for 5,986 feet of slabbing. Seven out of the eight bridges are slabbed; and the contractor thought they were not to be tarred, but in order to cut the matter short I said they were to be tarred, and he sent for the tar and got it done.
5908. What led to your ordering this? Mr. Martindale said that anything I thought desirable should be done, and that he would rather lose £1,000 than have it said he had not fulfilled his contract.
5909. When was this order given? The first tarring—I cannot say when the order for that was given; but when I came to him the other day and said I did not think they were tarred sufficiently, he said he would send for more tar and get it done again, although it is not at all settled whether the tarring was meant to be done or not originally. I only know that all Mr. Bennett's bridges of slabs are not tarred.
5910. Mr. Martindale was bound to do it by his contract? Yes; but I think it inferred sawn timber though, when tarring was spoken of.
5911. He has been ordered to tar them, and has tarred them, since this Committee began this inquiry? He could not tar them before the floor was put down; the flooring is the last thing done to the bridge, and the tarring the last of all.
5912. Was not that the subject of one of Mr. Quodling's remonstrances? I never heard a word about the tarring from Mr. Quodling; I am not aware that in any report tarring is mentioned.
5913. Is the spiking specified? The quantity of iron is in the bridges, and probably in excess; but the slabs are not so broad as they ought to have been, owing to the want of timber in the neighbourhood; and consequently, though there is the full amount of spikes in the bridge, there are not two spikes to each slab.
5914. Do you not think that narrow slabs are stronger? I think there is a mean. There is no doubt the slabs are not so good as I could wish them to be, but what can you do when the timber is not to be had within miles.
5915. You disapproved of the slabs? I said to the contractor that he must try and do better; but he said that I must allow them, because he could not get better. After all it makes little difference whether you put two spikes into one eight-inch slab, or one spike into a four-inch slab.
5916. Is it true that the creek has been blocked up from the earth, from the cutting having been tipped into it? I believe the creek has run once this year, but I have never seen it running myself. I have not the slightest doubt but that the cutting would be undermined by a fresh, but that was provided for by cutting a straight course for it. When I went there last I gave directions to cut a fresh channel, and it was not my fault that it was not done; but it will be done this week, and the creek will take another turn, and leave the bank.
5917. Was that instruction given to the contractor? That instruction was given to Mr. Quodling on the 12th September.
5918. To have this cutting made? Yes. It was a matter I intended to have arranged when I saw the big cutting, and when I went there I at once saw that there was some possibility of its being undermined; but it would be a long time before that could be done—not in our life-time.
5919. Is the contract fairly carried out in that respect? It was not part of the original contract.
5920. Was he not bound to open the creek so as not to allow the possibility of the works being undermined? No.
5921. Then, if necessary, the Government must have it done, and not the contractor—you say you have had it done? I have ordered it to be done.
5922. Will it be done by the Government or by the contractor? It is to be done as task-work by the contractor. It is one of those things which would not be foreseen, but which one sees the necessity of, as a precautionary measure, when the contract is finished.
5923. Are you sure the pitching of the road was good in all respects? No, it was not.
5924. When was your attention called to that? The very first time I introduced pitching in lieu of metalling, being a new system, there was great difficulty in getting it carried out.

W. R. Collett, Esq. I saw that there were great errors on the Murrurundi side, of which Mr. White and Mr. Loder have been speaking.

5925. When was your attention called to the bad work in pitching? I called my own attention to it. I saw that I had not persons to carry it out. The work was quite new to them. The Superintendent was perfectly ignorant of it, and Mr. Bayley also. In fact, it had never been carried out in the Colony at all; but I was determined it should be carried out, and I made sundry experiments in different parts of the Colony this year, and most of them were very satisfactory.

30 Dec., 1861.

5926. It was not done satisfactorily in this case? No.

5927. Is it now? It is done as satisfactorily as the nature of the case will admit. The stones used are round trap boulders, seemingly waterworn; and it is not the fault of the contractor that they do not set firmly. In order to make the pitching good, I suggested the use of a softer material, in order to bind it tight. We want something that will jam between the large stones; the hard blue metal has a tendency to throw the stones on one side, whereas this softer material will crush in and squeeze in between the interstices of the stone.

5928. Having noticed all these objections, do you still adhere to what you have said, that the contract is well carried out? Yes, extremely well. The width has been most rigorously carried out; 30 feet wide for the first 50 chains, and the remaining 149, with the exception of the big cutting, is 24 feet wide. In fact, the road has an average width of 27 feet from end to end.

5929. Was your attention not called to the bad pitching at any time? No.

5930. You noticed it yourself? I noticed it, and told Mr. Quodling to do his work better. I noticed that he neglected his duty; in fact, he was ignorant of it; he did not know how to pitch.

5931. Was he not qualified for the duty of Superintendent? As far as common measurements were concerned, I consider he was qualified. He was not qualified for his duties as an overseer over men.

5932. Why? Because his manner was such that men would not work under him. His manner was repulsive.

5933. And you complain that it was the same to yourself? Decidedly, except that I took so little notice of it that it did not vex me very much.

5934. What course did you take when you found Mr. Quodling did not send in his vouchers? My visit would have taken place in the middle of October, except for the dreadful accident to my family and myself; and my intention then was to send in a recommendation for the dismissal of Mr. Quodling, which Mr. Quodling has anticipated by bringing these charges.

5935. Will you state on what grounds you intended recommending his dismissal? The first charge was, constant absence from his district. He was invariably absent whenever I went up there. I never went up there without finding him absent from his district without leave.

5936. You speak to that personally? Yes; he was in Murrurundi for days together.

5937. How long had this been going on? Both previous to my appointment and subsequently.

5938. How was it that you did not report it before this time? I reported it to his father, which I thought was the kindest thing I could do.

5939. Did you speak to Mr. Quodling about it? I spoke as little as possible to Mr. Quodling, because, if I made any observation to him, he would turn upon his heel and treat me with perfect contempt.

5940. You did not report to the department against him? I did not, because my facts were not quite clear; but except for the burning of my house and child, I should have been there, and have got the evidence which I have since got, on which I should have recommended his dismissal.

5941. I thought you said you could speak personally to his absence? I could speak to finding him continually in Murrurundi.

5942. How long did this go on? The whole of the year.

5943. Why did you not report it? I told him if I found him absent again I would report him.

5944. You said it had been going on for a year? Yes.

5945. That is a long time to overlook an irregularity of this kind? There was always some excuse. The first time, Mr. Quodling said he had been to Glen Innes to carry out some work for the Magistrates; and at other times there were other excuses.

5946. Will you state what other reasons you had for intending to recommend his removal? (*The witness apparently reading from a paper in his hand.*) An irascible and contemptuous demeanour on most occasions, and an unwillingness to look one in the face when addressed by the Commissioner, and setting thereby a very bad example to all the contractors and workmen along the line.

5947. Would you have made that a ground of complaint? I do not think I should, because I treat these things with a great deal of contempt, where I am personally concerned.

5948. *By Mr. Hoskins:* When did you pen these charges? I have not dated this; somewhere about the commencement of this Committee. I did not know what charges would be brought against me by Mr. Quodling, so I thought I would make the charges against him, which I would have done before, in recommending his dismissal, only that I was prevented from doing so by the accident I have spoken of. If I had gone up then I should have known then what I know now, how far these charges could be substantiated; but as I did not wish to make charges which I could not support at the time, I did not forward them until I should have had an opportunity of procuring evidence of their truth. However, as the tables have been turned now, to a certain extent, by suggestions about my incompetency and his competency, I think I shall be able to prove that he was incompetent, and also a constant neglect.

- neglect (more so than an incompetency) of doing his duty in measuring up work, and allowing certain buoys or benches to be cut away, so that he could not do it afterwards.
5949. *By the Chairman*: Do you speak of your own personal knowledge? Yes, I do.
5950. How long had that been going on? Ever since the 16th August—ever since he had charge of the works. He never furnished the measurements as he ought to have done.
5951. How was it you never reported that before? There was not much time to report it.
5952. *By Mr. Hoskins*: Did you pen these charges with the view of giving them to the Committee? No. I do not bring these charges to strengthen my case. One of the most particular ones was that on which depends the letter I wrote through Mr. Shairp, charging Mr. Quodling with being incompetent to measure the big cutting, namely,—his overestimate of the most important cutting in the contract, making the same 14,300 cubic yards instead of 12,386, which is far nearer the real quantity.
5953. *By the Chairman*: That is a defect of measurement? It shews incompetency to measure accurately. I could never get the facts from him, but he stated before the Committee that the big cutting contained 14,300 cubic yards.
5954. Do you think that arises from his incompetency to measure? I have no other proof of his incompetency to measure than the mistakes he makes.
5955. Was your attention called to his incompetency before—during the time of his holding office did you consider him incompetent? No, I considered him good enough, as far as young overseers go, to measure a few heaps of stone. He knew nothing of masonry, as the building of the bridge at Bendemeer shews. It has been stated a tailor could have done it better. He put three stones one on the top of the other without any joint at all.
5956. Do you think Mr. Quodling was qualified as a Superintendent, apart from his insubordinate conduct? Certainly not.
5957. How long is it since you have been of that opinion? Ever since I came to office—from January to September.
5958. How comes it that you never made any report to that effect? Because I was very loth indeed to upset Captain Martindale's and Mr. Bennett's appointments.
5959. Then you gave him a trial, and afterwards determined —? I was not determined at all. I wished the young man well, as well as anybody else. I did not wish any change in the department at all unless there was a clear necessity for it.
5960. Did you reprimand him yourself? Repeatedly. He was not only insubordinate, but he shewed a positive want of knowledge of his work. In laying out the line he made a mistake of five feet in the gradient; the cutting was wrong, and the approach to the last bridge might have involved a considerable loss to the Government.
5961. Have any complaints been made to you from the men under him? I cannot say there have been any, except what has come before me officially, from the contractors of the bridge at Kangaroo Flat.
5962. The contractors have complained, but the men under him did not complain? It is not very likely that the men on the works would stop me to complain of Mr. Quodling. But as far as the contractors were concerned, those who built the bridge at Kangaroo Flat made a formal complaint; and Mr. Fox, another contractor, made a formal complaint.
5963. What was the nature of this complaint? Contemptuous behaviour, and drunkenness—drunkenness in the streets of Tamworth.
5964. How long ago was that? I did not want any complaints; I saw that myself.
5965. When? When he was travelling with me he was always drinking brandy.
5966. Did you complain of that? I spoke to his father about it. I have since got letters stating that he was an habitual drunkard.
5967. You have seen him drink yourself? Yes.
5968. How often? If a gentleman travelling takes brandy at every stage he comes to, it shews he must have had long habitual intercourse with ardent spirits.
5969. Have you seen him drunk? When travelling with me he was not likely to get drunk, but he had the character of being a drunkard, and since that I have had plenty of evidence of it.
5970. You have made a statement that you saw him drunk? I beg your pardon; I said I had seen him indulge the habit of taking ardent spirits to a great extent.
5971. That is not a fair answer to the question? That is all I have said.
5972. To what did this drunken habit of his extend? I consider it a very improper thing for a young man of 23 years of age to have recourse to the brandy bottle at all.
5973. I want to know to what extent this drunkenness went in your presence,—was he unfit to attend to business? He was merely travelling with me.
5974. Was he unfit to travel? He sat in the mail. It is nearly an impossibility to prove what drunkenness is. Since I have been there I have had several letters on the subject, from individuals—Mr. Wener, the surveyor, for one.
5975. *By Mr. Dalgleish*: Have you got the letters? I have.
5976. *By Mr. Hoskins*: Have you seen Mr. Quodling incapacitated from performing his duties, and that unfitness arising from drunkenness? I have not had any opportunity.
5977. *By the Chairman*: You say he was travelling with you, and that he took brandy too often? Yes, he drank a great deal. I have a particular objection to drunkenness myself, and I spoke to his father on the subject, and by so doing I thought I was acting kindly to the young man. What I saw myself I did not consider shewed sufficient cause to have him dismissed. Then I consider this another point—his collusion—which I can prove—with the foreman of the contractor.
5978. What is the meaning of that? That the foreman of the contractor should not do his work properly, in order to make out a case against the contractor, and another against the Commissioner,—collusion with the foreman of the contractor, in order that the foreman should

W. R. Collett,
Esq.
30 Dec., 1861.

W. R. Collett, should see that the work was neglected, and to cast a slur thereby on the neglected work. This is more with reference to the pitching.

Esq. 5979. Do you know this of your personal knowledge, or from the statements of others? I
30 Dec., 1861. have some personal knowledge of it, and there is the fact of the foreman having been dismissed in consequence.

5980. Do you know positively yourself of this instance of collusive agreement having been made between Mr. Quodling and the foreman of the contractor, or if you know it from other persons—state whether you can prove it by evidence? I can state facts. I told both Mr. Quodling and Mr. Donaldson to give me a return of masonry, and they both gave me a false one.

5981. Might it not have been a mistake? It might have been, but it was curious that they should both give a wrong one.

5982. Did these false returns correspond with each other? No, they did not correspond.

5983. Both were false returns? Yes.

5984. Mr. Quodling's measurement of the masonry was wrong? Yes; I consider that no measurement of his, whenever he did measure, was done without Mr. Donaldson. Now, I entirely object to the foreman of the contractor measuring with my Superintendent.

5985. How do you know that was the case? He admitted that in his evidence.

5986. Is Mr. Donaldson well qualified to measure? He was recommended to me, but I did not pay any attention to the recommendation.

5987. *By Mr. Hoskins*: Do you consider Mr. Quodling competent to measure masonry? Yes, I presume he can measure masonry.

5988. *By the Chairman*: You came to the conclusion that this false return was designedly false? I think from Mr. Donaldson's behaviour —

5989. I am speaking of Mr. Quodling? It was in the course of conversation I asked them both to measure a certain wall, and each gave me a different return, and both of them were wrong.

5990. You said they were false returns? I call them false.

5991. Then you do not think it was merely a mistake? They were wrong.

5992. On this ground you came to the conclusion that there was collusion between them? That was one ground, and another ground was the stones that have been sent here by post.

5993. What do you know of any stones being sent here? From parties in Murrurundi; I heard that the stones Mr. Quodling produced against me were furnished by Mr. Donaldson, the contractor's foreman.

5994. Have you any proof of that? I have the proof of the Postmaster of Murrurundi, who received them. The last charge I shall make, but I do not wish to go into that, is embezzlement of the public funds, which is a most serious charge.

5995. As you have stated it, you may just as well go into it? I cannot go into it without the bank returns.

5996. You charge Mr. Quodling with embezzlement? Yes.

5997. And you will be able to prove it from the bank returns? I think I shall.

5998. When did you first discover it? When Mr. Hawkins presented a cheque of Mr. Quodling's to me, which there were no funds in the bank to meet.

5999. You had no reason to suspect any embezzlement before? Excepting in the affair of Kangaroo Bridge, when I took his part.

6000. Did you take his part because you thought he was wrong? I thought I could trust to his statement being correct, and I had no reason to suppose then that he had done anything irregular.

6001. How long ago was that? It may be as far back as the month of August.

6002. You had a good opinion of him then as regarded honesty? I had no opinion at all; I did not trouble myself particularly about him; it was always a painful task to come in contact with him.

6003. Yet you say you took his part when he was accused? I did, believing the report that he furnished. I did not think he had retained the £50, and also another £15, without some reason. I believe there are legal proceedings threatened now.

6004. What was the affair of the Kangaroo Flat Bridge? Merely that the contractor wrote to the Minister, of Mr. Quodling's having kept back money sent by the Government.

6005. Who was the contractor? I think his name was Chappell. The letters are all at the Office. As I said before, I did not desire to go into this evidence; I should have preferred to put my own case straight; but, as you seem to think it more desirable, I will state the facts. The matter will of course be undertaken by the Minister of Works, as a matter of duty—this appropriation of the public funds. The simple facts are, that a letter and cheque were put into my hands by the overseer, who states that he presented the cheque at the bank, and it was returned for want of funds, and when I referred to the bank book I found the money had been paid to Mr. Quodling's account on the 30th October.

6006. *By Mr. Hoskins*: Had he not resigned them? It does not appear so when he makes a demand for his own salary to the 13th November.

6007. *By Mr. Garrett*: What was the date of the cheque? The 20th November. It was presented on the 14th December. The money was paid in for the salaries of his officers, and when the cheques were presented the money was not there.

6008. *By Mr. Hoskins*: Do you know that Mr. Hawkins has been examined before this Committee? I heard so; he did not call upon me.

6009. *By the Chairman*: Are you aware that the Committee have had before them a letter signed by Mr. Shairp, the Chief Clerk? Yes; I wrote that letter.

6010. It was written by your authority? I wrote the letter, from beginning to end.

6011. Is it usual to write letters of this kind to officers when they resign? As Mr. Quodling's letter had been made public, or I supposed it would have been, and I thought it probable

- probable and desirable that my letter also would be made public, I wrote it with a view to its being made public. I have been told it was injudicious, and I believe it was now. W. R. Collett, Esq.
6012. *By Mr. Garrett:* You wrote it as an answer to the charges in Mr. Quodling's letter of resignation? Yes. 30 Dec., 1861.
6013. *By the Chairman:* I suppose you adhere to that letter? Yes, every portion of it.
6014. You say in it that "pitching, after mature consideration, was substituted for a portion of the broken metal." This is one of the cases where you have authorized some alteration of the contract? Yes.
6015. Was that a benefit to the contractor or to the public? To the public; not any to the contractor.
6016. The contractor agreed to do it? He had no choice; I told him to do it.
6017. You say also that Mr. Quodling cannot measure accurately? I refer to the big cuttings, if you will read the sentence. However, if additional proof was necessary, all the vouchers I have handed in to-day shew that he was inaccurate.
6018. *By Mr. Dalgleish:* With regard to these vouchers, are these figures in red ink your corrections? No, the Chief Clerk's.
6019. *By the Chairman:* What is the meaning of the big cuttings being paid for in a lump? They were paid for in a lump; they were included in the £7,000 for the whole.
6020. What was the total amount paid for these big cuttings? The whole contract was for a bulk sum, and this was included in it.
6021. You say the big cuttings were paid for in a lump sum? Yes.
6022. What was the amount of this lump sum to which the big cuttings came? My measurements make it 12,386, against Mr. Quodling's 14,300; but I only allowed Mr. Martindale 12,000.
6023. That is paid in a lump? That is paid so as to bring the figures under the £7,000.
6024. And you gave as your reason, that Mr. Quodling could not measure accurately? Mr. Quodling was not the only person who could not measure accurately.
6025. You state here, that from Mr. Quodling's inability to measure accurately the big cuttings were paid for in a lump? So they were. If he had performed his duty, and measured before the marks were removed, there would have been a different result. Since then I have had the cuttings measured, and I find Mr. Quodling is wrong. I will shew, by a detailed engineering statement, that they cannot amount to 14,300 cubic yards.

APPENDIX.

A.

1. In the present investigation I wish to take the whole responsibility as Commissioner for Roads upon myself.
2. The question must then be decided, whether every detail of management should necessarily be submitted to the Minister,—or whether the powers of the Main Roads' Act, and the special authority in the General Conditions sanctioned by the Minister, do not enable the Commissioner for Roads to carry out the works as he may think fit.
3. At any rate, I have acted during my tenure of office on the latter assumption, and have carried out sundry alterations and extensions without soliciting the Minister for a formal approval.
4. With respect to the financial part, it is quite clear that the Minister exercises no control or jurisdiction whatever,—for when the Appropriation Act is passed, the whole amount is placed at the disposal of the Road Commissioner, to expend as specified by the several votes.
5. In every case the certificate of a superior officer renders the certificate of an inferior officer unnecessary, and the certificate of the former is invariably passed by the Auditor General.
6. The Chief Commissioner gives or withholds the certificate (or money) on his own responsibility. It is only in exceptional cases, like Camden Flats, Bargo, or the Doughboy Diversion, that he would undertake, by means of personal supervision, the combined duties of Commissioner, Superintendent, overseer, and paymaster. *Still he has the power to do so,* and until his position as regards those above him and those below him is more accurately defined by law, or by written official documents (of which there is no trace), he is not justly amenable to censure.
7. Of course, if the works for which he chooses to make himself personally responsible are badly executed, they will bear witness of his incompetency, but not of the inutility of the office.
8. I never consider it necessary to follow the advice of a subordinate officer, unless at my own solicitation, and certainly not at his uncalled-for suggestions.
9. I beg to hand in these remarks, in order to save the time which would be spent in eliciting, by questions, my own views respecting my exact position, and also to assist the Committee in arriving at the real points at issue, viz.:—The mismanagement, want of engineering skill, and corrupt practices, which have been alleged against me, from 1854 to 1861 in general, and during 1861 in particular.

30 December, 1861.

WILLIAM R. COLLETT.

B.

Murrurundi, 7 February, 1861.

Sir,

As I have made a good start at the Doughboy Hollow contract, will you ask the Commissioner of Roads to allow you to make me a return for the work done every fortnight, the same as you have done for the Gap contract? It will allow me to get on much faster.

A. C. Bayley, Esq.,
Superintendent of Bridges.

I have, &c.,

JOSEPH MARTINDALE.

C.

C.

Doughboy Diversion.

Dated the 28th day of January, 1861.—Joseph Martindale and his sureties to Her Majesty the Queen. Bond for £500.—WILLIAMS, Crown Solicitor.

KNOW ALL MEN by these presents, that I, Joseph Martindale, of Murrurundi, in the Colony of New South Wales, contractor; F. Williams, of Singleton, in the Colony aforesaid, and William Wightman, of Murrurundi, in the Colony aforesaid, are held and firmly bound unto Our Sovereign Lady Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, in the sum of Five hundred pounds of good and lawful money of Great Britain, to be paid to Our said Lady the Queen, Her Heirs or Successors, to which payment, well and truly to be made, we bind ourselves, and each and every of Us, jointly and severally, for and in the whole, Our and each of Our Heirs, Executors, and Administrators, and every of them, firmly by these presents:

Sealed with Our Seals, dated the twenty-eighth day of January, in the year of Our Lord one thousand eight hundred and sixty-one.

WHEREAS the above bounden Joseph Martindale made the tender hereunto annexed, under the terms and conditions of a notice dated the 19th day of September, 1860, now last past, and published in the *New South Wales Government Gazette*, of the 20th September, 1860 (of which notice a copy signed by the said Joseph Martindale, F. Williams, and William Wightman, is also hereunto annexed), and at the prices and under the stipulations in the said Tender mentioned or referred, and in strict accordance with the plans or revised plans, sections, detailed drawings, specifications, and general conditions, marked with the letters hereunto attached, and to the satisfaction of the Commissioner for Roads, or whom he may appoint, for the prices named in the aforesaid Tender: And whereas the above bounden Joseph Martindale, F. Williams, and William Wightman, have severally agreed to become and be bound to Her Majesty, Her Heirs and Successors, for the due performance and fulfilment of the said Tender, within the time mentioned in that behalf, according to the terms and conditions of the said notice: And whereas the said Tender has been duly accepted by His Excellency the Governor General of the said Colony, on condition that this bond should be entered into by them the said Joseph Martindale, F. Williams, and William Wightman: Now the condition of the above written bond and obligation is such, that if the said Joseph Martindale shall and do well and truly perform and fulfil the said Tender, and the contract arising out of such Tender, and the acceptance thereof as aforesaid, and all and every the terms, conditions, and stipulation thereof, within the time hereinbefore in that behalf mentioned, then this obligation to be void and of none effect, otherwise to remain in full force and virtue.

ROAD BRANCH—DEPARTMENT OF INTERNAL COMMUNICATION.

Specification of work required for the construction of the Doughboy Diversion of the Great Northern Road between Doughboy Village and the Willow Tree.

GENERAL CONDITIONS.

- | | |
|---|--|
| Works. | 1. The work for which tenders are to be made, and to which this specification refers, comprises the providing of all materials, tools, labor, scaffolding, implements, workmanship, and every other thing requisite for the full and proper completion of all the earth-work, rock-work, stone-breaking, cartage, clearing, carpenters', smiths', pile drivers', and painters' works, and all other work required in the construction of a new road, 10 bridges, and numerous culverts, between Doughboy and the Willow Tree, on the Great Northern Road, in accordance with the plans and this specification, and to the entire satisfaction of the Engineer for Roads. |
| Tenders. | 2. The tenders to state the gross amount for which the contractors will be prepared to complete all the clearing and stumping, with a schedule of prices for the valuation of all other work. |
| Schedule of prices. | 3. Prices for each description of work named in tender must be filled in. |
| Tender to contain time and sureties. | 4. At the foot of every tender there must be a memorandum signed by the person tendering, and two other responsible persons as sureties, agreeing to be answerable for the due performance of contract, in the event of the tender being accepted, and undertaking in that event that they will execute a bond, at the Office of the Crown Solicitor in Sydney, or at the Police Offices, Murrurundi or Singleton, within ten days from notification of acceptance, in the penal sum of Five hundred pounds, for securing such performance; any tender not complying with these requirements will be rejected. |
| Extras. | 5. No extra work to be paid for without the sanction of the Commissioner for Roads, and the production of an order, in writing, for its execution, signed by the officer in charge of the works; and an account must be forwarded to the Commissioner each fortnight, until the completion of the work, stating the quantity and cost of extra works done; in default thereof, the claim for such extra work shall be null and void. The price for any work not included in schedule is to be determined on previous to its execution, and set forth in the order for such work. |
| Measurements. | 6. The measurements to be made according to the actual dimensions, notwithstanding any general or local custom to the contrary. |
| Time. | 7. The work to be completed, and the road ready to be opened to the public, by the 1st August, 1861. |
| Non-fulfilment of contract. | 8. Should the Commissioner or Engineer for Roads be at any time dissatisfied with the mode of proceeding, or at the rate of progress of the works, or any part thereof, the Commissioner shall have full power to make use of all labor or materials which he may deem necessary, the costs of such labor and materials to be deducted from any money that may be then due, or may hereinafter become due, to the contractor; and should the contractor fail to proceed in the execution of and to complete the works, in the manner and at the rate of progress required by the Engineer, the Commissioner shall have full power to cancel the contract, so far as relates to the works remaining to be done; and all sums of money that may be due to the contractor, together with all implements in his possession, and all sums of money named as penalties for the non-fulfilment of the contract, shall be forfeited to the Commissioner, and the amount shall be considered as ascertained damages for breach of contract. |
| Power to dismiss men. | 9. The Engineer or other authorized officer to have the power of immediately dismissing any agent or workman employed by the contractor, and of having removed off the works, even if fixed, any timber, materials, plant, or implements, he may consider unfit or insufficient for the purposes intended, or at variance with the meaning and intention of this specification, the costs of such removal to be paid by the contractor. |
| Contractor to have materials under Road Acts. | 10. Any advantages conferred by the clauses of the Road Acts for obtaining materials for the Roads will be enjoyed by the contractor, as the Commissioner's agent, but the contractor will be liable to the Commissioner for the amount of all damages to be paid under said Acts; and he is not to allow such materials to be used for other purposes, on pain of invalidating the contract, and having the reasonable |

reasonable costs of such materials or damage deducted from any moneys due, or that may become due to him.

11. The work will be set out for the contractor, but he must satisfy himself of its accuracy. Works to be set out.
 12. The forms and dimensions of the different portions of the work are shewn generally in the drawings; but where any discrepancy exists between the dimensions as indicated by scale and those marked in figures, the figures are to be considered as correct, and are to be taken, in all cases, in preference to the measurement by the scale attached; and if there should likewise be any discrepancy between the figures or dimensions, or the form of construction, or the material, as indicated in the drawings, and the dimensions and material given in the specification, the directions of the specification shall be adopted; and in all cases of defective description, or of any ambiguity, the explanation given by the Engineer shall be binding on the contractor; also, anything contained in the drawings or in the specification shall be equally binding as if it were contained in both. Discrepancies.

13. The contractor to be liable to all risk from floods or other accident during the construction of the works, which are to be delivered up perfect and in good order. Risks.

14. Payments to be made once a month as the work proceeds, on the certificate of the Superintending Officer, countersigned by the Engineer for Roads, in the proportion of 80 per cent. of the work actually executed, and the remaining 20 per cent. will be paid after the Engineer shall have certified that the whole of the works have been completed to his satisfaction. All moneys due on account of contracts will be paid to the credit of contractor in the Bank of New South Wales, or such other bank in Sydney as contractor may request. Payments.

15. To secure the proper quantity of metal being spread on the road, it will be measured in heaps before being spread, as well as on the road when spread; and the contractor is to give notice to the Road Superintendent when a heap of metal is ready.

16. In all payments on account of contract, the money due will be paid into the Bank of New South Wales, or such other bank in Sydney as contractor may request.

Witness to two }
 Signatures, } A. C. BAYLEY.

JOSEPH MARTINDALE.
 WILLIAM WIGHTMAN.

SPECIFICATION FOR ROAD WORKS.

Contract commences.—This contract commences at centre of intersection of High-street with Longfellow-street, in the Village of Doughboy Hollow, and extends 199 chains 26 links down Doughboy Creek.

Plans and Sections.—The plan, which is drawn to a scale of two chains to the inch, shews the course of the line; the centre red line represents the line of the stakes, which are driven down at intervals of one chain (with a few exceptions on plan). The section, which is drawn to the same horizontal scale as the plan, and a vertical scale of 20 feet to the inch, represents the surface of the ground in black, and is taken along the centre line.

The other sections and drawings represent generally the forms and dimensions of the several works, and are as follows:—

- Nos. 1 and 2—Plans.
- „ 3 and 4—Longitudinal sections.
- „ 5 and 6—Cross sections.
- „ 7, 9, 10—Drawings and details of bridges.
- „ 8—General drawings of bridges.
- „ 11—Drawing of culvert.

Subject to any alterations, according to schedule of prices, as directed by the Commissioner—
 W. R. C. J. M.
 W. W. A. C. D.

Clearing.—The first step to be taken will be the clearing. The entire contract is to be cleared 1½ chain wide, and the stumps removed, except on the site of the higher embankments, where the stumps may remain in the ground. Tenders to state a bulk sum for the clearing.

Ditches.—Ditches averaging 4 feet wide at top, 1½ feet deep, and 1 foot wide at bottom, to be cut on the upper side for the entire length, with proper outlets, &c., to the culverts and bridges.

Stones to be piled.—Previous to making any of the side cuttings or embankments, or to forming the road surface where there is no cutting, if required, all the loose stones are to be removed and piled where directed, to be ultimately used as metal. Where there are embankments in earth exceeding 3 feet in height, benches 3½ feet wide and 2 deep, are to be cut on the site of bank, as will be directed; this to be done and inspected by the Road Superintendent before any material is filled in to them.

Embankments.—The material from the cuttings is then to be deposited where pointed out by the Road Superintendent or overseer. Should the quantities of bank be found in excess of cutting, the deficiency is to be supplied from side cutting, to be made where directed, if possible to be taken from side of bank, so as to widen road. Where the cutting is in excess, after all banks within six chains either way are made up, it may be applied to widening banks near cutting. Care is to be taken to provide sufficient material for shrinkage of banks, and to keep the hardest and most suitable material on the top.

Dimensions of Excavations.—The excavations to be made of the depths shown on longitudinal section, to be 30 feet wide at that level from commencement of work to chain 50, and thence to end to be 24 feet wide, to be formed with a convexity of 8 inches to 1 foot in the entire width, leaving a corresponding water table at foot of slopes.

Slopes.—The slopes of cuttings to be, in rock, ½ to 1, and in earth, 1½ to 1; banks to be as shewn on cross sections, and where no cross sections are shewn to be 1½ to 1; where slopes of embankments are shewn steeper than 1 to 1, the best rubble from the cutting is to be selected for the outside and carefully hand-packed as directed. All the batters to be neatly trimmed off with proper battering-rules, to be provided by the contractor for this purpose.

Punning.—The earth-work must be well punned round the abutments of all bridges, culverts, and retaining walls; where the road is merely formed without any cutting, it is to be 30 feet wide; water tables, 9 inches deep; stumps and roots to be thoroughly eradicated, and holes filled with gravel or broken metal.

Masonry.—The masonry of retaining walls where required, to be of well bedded rubble, laid with as little mortar as may be, with the largest face downwards; the upper surface brought to a uniform level at the height of every course of the face work, and thoroughly filled with mortar at such level; the faces to have a batter of two inches to the foot; the footings to be carefully laid well below surface and to be the largest stones to be procured within reasonable distance; each perch of work to have 2 thro. bonds; the walls to be coped with a heavy course, not less than 2 feet in width; the back of wall to be built plumb with sills off as in drawing.

Fencing.—The fencing to be sound ironbark, box, or red gum; two-rail fence, with posts not less than 9 feet long, 8 in. X 4 in., or round posts, 9 in. in diameter at the small end; each to be charred for 3½ feet in height, well rammed, securely and firmly fixed; the rails to be 9 feet long, 6 in. X 2 in., fitted accurately into the posts, the ends of the rails to lap. Fencing: or stone walls, as hereafter specified by Commissioner.—W. R. C.

Formation.—When the formation, fences, and bridges are completed, the traffic is to be turned on to the road during fine weather until formation is thoroughly consolidated: the maintaining convexity with fresh approved material, and filling up ruts, must be carefully attended to by contractor.

Metal.—All portions of the road directed to be metalled, to be metalled as follows:—The metal to be of the best and hardest available stone—the blue columnar basalt, broken to a 2½ inch gauge, free from earth, sand, chips, and other impurities; to be spread to a width of 18 feet, 9 inches deep at the centre and 6 inches at the sides, in two layers of equal thickness, the first to be consolidated before the 3,520 yards.

second is put on; all the stone for the first layer may be broken at whatever time suits the contractor, and when the entire is ready to be spread, will be measured in heaps, by the Superintendent or other authorized officer; it must then be all-spread before the metal for the second layer is broken.

Ballast.—The other portions of road are, if required, to be ballasted with the best approved clean river or ridge gravel, free from all earth; to be put on 18 feet wide, 9 inches thick at the centre and 7 inches at the sides; both metal and ballast to be maintained until thoroughly consolidated, and if necessary, fresh material put on to keep up convexity.

BRIDGES.

The Bridges to be as follows:—

Subject to decision of Commissioner, either more or less.
W. R. C. W. W.
J. M. A. C. B.

- Bridges.*—No. 1. A simple beam bridge, of 2 spans of 20 feet each, and one span 15 feet.
No. 2. A simple beam bridge, of one 20 feet span.
No. 3. A simple beam bridge, of two 21 feet spans.
No. 4. A simple beam bridge, of three 21 feet spans.
No. 5. A simple beam bridge, of one 25 and four 21 feet spans.
No. 6. A bridge of three 50 feet spans, undertrussed, and one 21 feet span, beam with corbels.
No. 7. Three 25 feet spans, beams with corbels.
No. 8. A simple beam bridge, in two spans of 20 feet.
No. 9. One queen-truss, 50 feet span, with three 21 feet spans, girders and corbels.
No. 10. One undertruss of 50 feet span, with two 21 feet and two 18 feet beams with corbels.

Timber.—The timber for all the bridges to be of approved red gum or ironbark; the floors to be of stringybark, to be of the full dimensions shewn on drawings, perfectly straight, free from waney, shakes, gum veins, cores, with perfectly clean sharp arrisses, whether sawn or hewn.

Iron-work.—The iron-work for all the bridges and culverts to be of the best English iron, the nuts to be truly fitted on strong clean cut threads, all bolts to have washers, and the iron-work to be heated and dipped three times in linseed oil before fixing.

Tarring, &c.—The entire of the timber-work, except handrails, to get three coats of Stockholm tar, the first to be laid on hot, the handrails to be painted three times white, and joints and butting surfaces over ground to be twice coated with Stockholm tar when fixing, and all timber under or in contact with the ground to be charred.

Piles.—All piles to be round, not less than 12 inches in diameter at the small end, pointed, and if required, shod with 20 lb. shoes; the portions overground to be hewn 10 or 12 inches square, all the portions driven in ground to be charred; where rock does not occur piles must be driven at least twelve feet, and tested as may be directed by the Engineer; the piles to have a ring $4 \times 1\frac{1}{2}$ on the head when driving; the capsill to be mortised on piles.

Sills.—When the nature of the ground, rock bottom, or other cause, will not admit of piles being driven, the contractor to excavate and lay down 12 sills, and tenon the uprights in same, securing them with straps 2 feet long, $2\frac{1}{2} \times \frac{1}{2}$ and $\frac{3}{4}$ bolts; the remainder of framing to be as in drawing; the sill to be at least 4 feet below the surface of the ground, and packed in with heavy rubble.

Beam Bridges.—For the bridges 1, 2, 3, 4, 5, 7, and 8, the girders to be 11×14 for all spans over 21 feet, 11×13 for all over 16 feet, and 11×12 for all less than that span; the girders to be five in number; the external girders to be scarfed on capsills and secured to piers by holding down strap bolts, with straps $3 \times \frac{1}{2}$ and $1\frac{1}{2}$ inch tangs, and bolted to piers by $\frac{3}{4}$ inch and 1 inch bolts, as in detailed drawing No. 7; the remainder of the girders to be lap-jointed as in drawing, and secured to capsills with $\frac{3}{4}$ bolts, one bolt in each girder.

Beam with Corbels.—Bridge No. 7 to have corbels under the beams 12×12 , secured as shewn in detailed drawing No. 10.

Floors.—The floors of 1, 2, 3, 4, 5, 7, and 8, to be 12 feet wide between handrails, to consist of stringybark ironbark, box, or red gum slabs, 4 inches thick, and not less than 7 or more than 10 inches wide, to be long enough to span two of the openings between girders, the joints to be broken, to be secured to girders by $\frac{1}{2}$ inch jagged spikes 7 inches long, one spike at each intersection of girders, and two at each end of each slab. The slabs to be lined and laid close, adzed, and firmly seated on girders; a marginal log 9×5 to be spiked to external girder with $\frac{1}{2}$ inch spikes 18 inches long.

Understrutted Bridges.—Bridges Nos. 6 and 10 to be understrutted, as in detailed drawing No. 10.

Understrutting.—Each of the wide bays to have two stringers 12×12 resting on corbels 12×12 with a straining piece 9×10 and 2 understruts 10×10 , all properly fitted and fastened as in drawing.

Girders or Corbels.—The smaller bays to have 3 girders 13×10 on corbels, secured as in drawing.

Floors.—The floors to be carried by joists; in the larger spans where there is no intermediate girder, to be $10 \times 3\frac{1}{2}$, caulked 1 inch, and in the smaller spans 9×3 , all skewspiked to the girders; the floor to be 4 inch diagonal planking, laid close and spiked to the joists with $\frac{1}{2}$ inch wrought iron spikes, 7 inches long, bearded 3 inches, one spike and two spikes alternately in each plank; flooring to be adzed off fair when laid.

Queen-truss.—No. 9 to have one 50 feet queen-truss span as in detailed drawing; the stringer to be 14×10 ; the straining beam 12×9 ; braces 12×9 ; minor braces 10×9 ; and posts 6×9 ; corbels 12×10 ; $1\frac{1}{2}$ suspension rods; joists to be 3×10 in large opening and floor, and remainder of superstructure same as for Nos. 6 and 10.

Handrail.—The handrail for all the bridges to be as in detailed drawing. Posts, with the exception of in No. 9, are to be secured to stringer with $\frac{3}{4}$ bolt, and to floor with iron collar strap $1\frac{1}{2} \times \frac{1}{2}$, spiked through floor to girder. In No. 9 the posts to be bolted to joists as in drawing; all posts to be 6×4 . Top rail to be 6×4 , with chamfered arrisse, mortised on and spiked to posts as in drawing; the intermediate rail to be 4×3 , halved into and secured to posts by treenails, and with outside struts 6×4 over each pier; heel of strut to be tenoned into capsill and spiked to it; head to be let into and bolted to post with $\frac{1}{2}$ inch bolts.

Slabbing Abutments.—The landward side of all abutments to be slabbed in the same manner as floor; four round posts and small piles are to be driven and slabbed to retain foot of embankments at bridges where ground is steep.

Culverts.—Culverts to be as in drawing, to be erected where pointed out by Road Superintendent, and in accordance with drawing No. 11.

The timber framing to be all round timber; piles to be driven as for bridges, except in rock, when holes 2 to 3 feet deep are to be cut to receive the ends of uprights, which are to be firmly wedged in with timber or stone wedges; the capsills to be tenoned on and spiked with $\frac{1}{2}$ inch jagged spikes 20 inches long to uprights.

The girders, 6 in number, to be firmly seated and spiked on capsills; the face girder to be hewn with under arrisse square, and to extend back on each side as in drawing; the ends to be supported by piles; the floor to be of slabs, as specified for some of the bridges.

The landward side of abutment and the space between angle and wing piles or uprights, to be sheeted with 4 inch slabs, in the same manner as floor.

The handrail to be as in drawing, of the same general character as in bridges, but no handrail on upper side, nor no struts to posts, which are to be spiked instead of bolted to girders and capsills.

The box drains to be formed of 3-inch planks, well fastened together with 4-inch nails and elects 3×4 , and continued in every instance to the foot of the slopes, to be placed where directed by the officer in charge of the works.

Tenders to contain a price for each culvert and box drain respectively, as the quantities of work in them will not be measured with quantities in bridges.

These

having been accepted, I am directed to refer you to the Commissioner for Internal Communication, for further information, and also for the purpose of signing the necessary bond for the due observance of your contract.

Mr. J. Martindale,
Murrurundi.

I am, &c.,
B. H. MARTINDALE,
Under Secretary.

E.

Murrurundi, 7 March, 1861.

Sir,

As the Commissioner of Roads promised me fortnightly pay at the Doughboy Hollow Contract, will you be so kind as to inform me if you can make it convenient?

R. Quodling, Esq.,
Superintendent of Roads.

I have, &c.,
JOSEPH MARTINDALE.

Referred to the Commissioner for Roads, for his sanction.—R. QUODLING. 7/3/61.
Ordered by official letter, dated 6 March, 1861.—W. R. C. 8/3/61.
Remarks noted, and forwarded to Office.—R. QUODLING. 13/3/61.

F.

Sydney, 11 May, 1861.

Sir,

Mr. R. Quodling having obtained leave of absence, and my not being at Doughboy to see him before he left, I am at a loss to know what to do, unless he made a return, which was due this week. I have over 200 men at work, which I pay fortnightly, and can assure you I have over £1,000 due. Will you be so kind as lodge me, say £500, so that I can meet my men?

W. R. Collett, Esq.,
Commissioner of Roads,
Sydney.

I have, &c.,
JOSEPH MARTINDALE.

In consequence of Mr. Quodling's absence, and no vouchers having arrived, let Mr. Martindale have £400; but this must not be taken as a precedent.—W. R. C. 11/5/61.

G.

Doughboy Hollow,
28 February, 1861.

Sir,

I have the honor to report on the progress of Works in the 2nd District, Northern Road.

1st Division.—I have taken charge of the Doughboy Diversion Works and made a measurement with Mr. Bayley. The following is a list of work done during the month:—3,339 cubic yards earth excavation, 63½ rock do., 1 mile clearing, and 51½ cubic yards rubble masonry.* The contractor is cutting timber for Nos. 1 and 10 bridges.† The late heavy rains have made the road very bad; I have had a maintenance man employed repairing the bad places. The new road at Kangaroo Flat is progressing favourably; 20 chains of clearing and nearly all the excavation is completed. The remaining portion of the road to Goonoo Goonoo requires two maintenance men to repair the very bad places.

2nd Division.—From Goonoo Goonoo to Tamworth the road is in very good order; there are one or two bad places that would keep a maintenance man employed. The new formed road near Tamworth is in very good order; 270 cubic yards have been ballasted, and forming and draining done at the corner of White-street. There has been a maintenance man employed preparing formation for ballast, and attending to ballasted portions. The road on to the Moonbics is in pretty good order; there are a few bad places that require repairs; if a maintenance man was employed on it for a few months it would much improve this portion of the road. The Moonby Ranges are in very good order; there has been a maintenance man employed during the month. The following works have also been executed:—Sidling cut down near Moonbi Hut, repairs to Poison Swamp Crossings, clearing timber that was blown into road by late storm from Moonbi to Mr. Penny's fence, Bendemeer.

3rd Division.—This portion of the road has been slightly repaired since last report, but is still in a very bad state. I don't think it would be advisable to expend much on this portion till it is defined.

Tamworth Bridge.—This is nearly completed, two strikes of bow planks on 2nd bows, and 10 feet of flooring will complete the timber work. We have had a very severe flood in the river; the water was up within 1' 6" of the under side of the corbel; it did not cause the least vibration.

Bendemeer Bridge.—The abutment on Tamworth side of river is completed, and coffer-dam ready for up stream wing on Armidale bank of river. It will take about five days to finish when cement arrives. The contractor for superstructure has got nearly all the timber delivered on the ground.

Visited Armidale on the 10th instant.

„ Bendemeer „ 20th „
„ Doughboy Hollow 27th „

The Commissioner for Roads,
&c., &c., &c.,
Sydney.

I have, &c.,
R. QUODLING,
Superintendent.

* Mr. Sharp obliged to correct these vouchers. W. R. C. 26/11/61.

† Number 10 bridge does not exist. Inform Messrs. Quodling and Bayley to see revised sections.
W. R. C. 14/3/61.

H.

Doughboy Hollow,
31 March, 1861.

Sir,

I have the honor to report on the progress made in the works of the 2nd District, Northern Road, during the month of March, 1861.

Doughboy Diversion.—The following work has been done since last report:—4,836 cubic yards earth excavation; 260 do. rock do.; ¾ mile of clearing. 47 men are employed on the earth-works, and 10 at the clearing. The works are progressing slow but satisfactorily.

1st Division.—Three maintenance men have been employed repairing the bad portions.

The road opposite Willow Tree was cut up a good deal by the traffic. I have made arrangements to get this done, it being very urgent.—Task No. 1 in estimate.

The contractor for Kangaroo Creek Bridge has got the timber nearly all cut. The new road south of the creek is progressing favourably.

2nd Division.—Two maintenance men have been employed on this portion of the road; and 183 cubic yards of ballasting on new road near Tamworth, finished.

3rd Division.—Two maintenance men have been employed repairing the worst places, and some small tasks—clearing, forming, &c.

Tamworth Bridge.—The whole of the timber-work is completed, and the bridge would be ready for final measurement if the painting was finished; the teams with the contractor's paint have been delayed on the road. In my January report I made a suggestion about extra cramp-bolts, to bring edges of planks close together. The present plan of bolting is bad; the washes are not strong enough to bear the strain.

Bendemeer Bridge.—There has not been anything done to masonry since last report, through the non-arrival of the cement. I was informed by Mr. Jacques, the agent at Morpeth, that it left on the 25th ultimo.

The contractor for the timber-work has got nearly all the timber delivered on the ground, and will shortly commence the work.

The old bridge at Uralla is in a very dangerous state; I think it would be better to pull it down and cut away the banks of the creek. If this is not done I am afraid some accident will occur.

Inspected Doughboy, 15th inst.—Kangaroo Flat, 17th,—Bendemeer, 21st,—Armidale, 22nd,—Doughboy, 29th.

I accompanied Mr. Wells, the Road Surveyor, to examine the country between Bendemeer and Armidale, and to fix site of Saumarez Creek Bridge.

I have, &c.,

ROBERT QUODLING.

The Commissioner for Roads,
&c., &c. &c.

I.

Doughboy Hollow,
3 May, 1861.

Sir,

I have the honor to report on the present state of road and progress of works in 2nd district, Great Northern Road—Doughboy Diversion.

The contractor is progressing favourably with this contract. The earth-work will be ready in a month for final measurement.

I have returned voucher for 1,200 cubic yards metal. 88 men are employed on the earth-work and 8 stone-breaking. I am carrying out the slopes of the big cutting as directed. The whole of the timber is delivered for the bridge over Kangaroo Creek; and the road works on south side of creek completed. I have had three maintenance men employed between Doughboy and Goonoo Goonoo; the road is in very good order. I have commenced the approaches to Tamworth Bridge, and will complete earth-work in six weeks. The foot bridge over the Peel is repaired. I have commenced the forming of Peel-street, Tamworth, leaving 14 feet foot-paths on each side. I could not let it by task. I have let the street ballasting and culverts; the timber for same is nearly all delivered.

I have had White-street formed with foot-paths on each side, 10 feet wide. 97 cubic yards new road ballasted, and 217 cubic yards ballast shifted, so as to reduce the quantity to 5", as directed. Task No. 13, Moonbi Creek culvert and road, is nearly completed.

The blinding of Moonbi metal is nearly finished. I have had three maintenance men employed between Tamworth and Bendemeer. The road is in very good order. The only hoggly part is Poison Swamp near Bendemeer. Three maintenance men have been employed between Bendemeer and Armidale. The road is in passable condition.

Tamworth Bridge.—The painting and tarring is being proceeded with, and the bridge will be ready for final measurement in a few days. The timber is nearly all delivered for the foot-path on down stream side of river.

Bendemeer Bridge.—The abutment on Armidale bank will be finished early this month. I have forwarded voucher for 341½ cubic yards masonry.

The superstructure of bridge is progressing very slowly; the contractor has only two men employed. I have to request that you will make the contractor carry out this work himself.

J. W. Chowne, the contractor for Tamworth Bridge, is only an agent for the contractor.

Visited Doughboy on the 1st; ditto Kangaroo Flat, 6th; ditto Armidale, 14th; ditto Moonbys, 22nd; ditto Doughboy, 29th.

I have, &c.,

ROBT. QUODLING.

The Commissioner for Roads,
&c., &c. &c.

TUESDAY,

TUESDAY, 31 DECEMBER, 1861.

Present:—

Mr. DALGLEISH,
Mr. DANGAR,
Mr. T. GARRETT,

Mr. HOSKINS,
Mr. LUCAS,
Mr. MARKHAM.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

W. R. Collett, Esq., Commissioner for Roads, again called in and further examined:—

- W. R. Collett, Esq.
31 Dec., 1861.
6026. *By the Chairman:* Of course you are aware that there is a good deal of discrepancy in regard to the statements made by yourself and by Mr. Quodling; that of course you must be aware of already that you make certain statements contradictory of what he says in regard to these works? I have attended the Committee during several days when Mr. Quodling has been examined, and I presume all my statements differ from Mr. Quodling's. If the Committee will allow me, I will hand in three reports, which I should wish to be read—one from the contractor, which is usual according to the regulations; the second from the person who, I may say, was in charge after the resignation of Mr. Quodling; and the third from myself.
6027. This is the report on the Doughboy Diversion? Yes; I believe my evidence has been confined to that.
6028. What are the dates of those reports? The 18th November, the 4th December, and the third the report referring to my visit of the 19th December. I see the copy has not been dated, but it was written on the 24th, and refers to my visit of the 19th.
6029. What is the object of the contractor's report? The contractor is bound under the specification to send in a report. I have not insisted upon that, but in this case I called for a report from the contractor, and he furnished this on the 18th November, which was about the day the Committee met.
6030. In these cases, which you say are so numerous, where your statement and Mr. Quodling's are at total variance—what evidence, as regards the public, is there to determine the points at issue between you two? The works themselves I presume.
6031. Is it possible in all cases to ascertain whether the work is properly completed after it is finished—whether everything has been done in the meantime properly in regard to both roads and bridges? When the work has been visited and certified too in the meantime. Probably if I looked at the building of a house I could not say whether the foundation was right; but if I saw the foundation laid, the building in progress, and the roof put on, I could judge of the building. This was the case with me and the Doughboy Diversion; I watched its progress from the commencement.
6032. With regard to a road, you could not prove that it was in a bad state at the time the pitching was put on, supposing you saw it only after the pitching was covered over? I could, by the traffic having been subsequently over the road with all the timber for the bridges; if the work had been bad, the heavy carriage would have proved it to be so.
6033. Suppose a great hole in the road had been filled with logs, and covered over—how could you tell that by simply going over it? I never allowed timber to be used on the Northern Road.
6034. Suppose it were put there without your knowledge? I presume that where stone was more plentiful than wood, wood would never be used.
6035. I may state that I received a letter from some one who signed his name Howard—I could never find out who he was—but he states that to his knowledge logs have been put in — ? In heaps of stone before they were laid upon the road, in order to cheat in the measurement of the stones, not with reference to the road itself.
6036. Suppose it were intended to cheat the overseer — ? That was in the heap of stones before the stone was put on the road—to cheat in the measurement.
6037. Could not the same thing be done with the road itself? It would be impossible with the pitching underneath, and the road under it; besides, there would be no gain to the contractor—wood is not cheaper than earth or stone. I beg to state, if you refer to the case of Howard, that the charge was completely investigated, and there was strong evidence that Howard had put the wood in himself.
6038. Are you able to refer to the evidence of anyone who could corroborate your own, as to the state of these works at the time of their construction and completion? I could do so, but it is a most unusual course for the head of a department to refer to anyone. The works can now be examined by any person who may be competent, portions of the work may be taken up or looked over, and the bridges and pitching can be examined.
6039. I suppose Mr. Whitton would be a good authority if he could go up? I am not aware, in the first place, that Mr. Whitton would undertake the trouble of merely looking at a portion of the road metal or the bridge-work. His authority would be very good.
6040. You are not able to mention any person who would be competent to give evidence? I may be able, but I wish to depend upon my own evidence. I can bring a competent engineer, who is in Sydney at the present moment.
6041. Will you mention who he is? Mr. Peter Brown; in any case of difficulty, as a civil engineer, he ranks very high.
6042. Is he one of the Road Superintendents? He supplies my place. I would beg to state that he would feel a certain delicacy unless he were authorized to do so. As an engineer he would not undertake on his own authority to give a detailed statement, but at the same time he would not have the slightest hesitation if he were authorized to do so.
6043. If I understand you rightly, there is no check upon the Commissioner for Roads in regard

regard to his opinion of certain works? I am aware of none. He is placed at the head of a department in order that his decision may be final. W. R. Collett, Esq.

6044. He has the entire responsibility—it rests entirely upon his character for integrity and competency? Precisely. 31 Dec., 1861.

6045. There is no check at all as respects the public, in cases of neglect or violation of duty? Except the check which is upon all public officers. There are the works to speak for themselves; if things are wrong the public are sure to find them out.

6046. Has any objection been made by the Auditor General, or other officer whose duty it was to inspect the accounts, to any accounts that have been passed for works under your charge? Not otherwise than what I may term the usual objection of the Auditor General.

6047. What are the usual objections? The usual objections are as to the want of a proper witness to the payment of money—and this will sometimes occur when money is being paid to these poor people—the want of witness to the receipt of an individual, or of an authority for one person to sign for another; small things of that kind.

6048. These objections have been made? They are always made in every office.

6049. Are they made whether they are necessary or not? I presume not; they are the check of the Auditor General upon the accounts.

6050. Have these objections been made with reference to these particular works? I am not aware of any vouchers having been returned.

6051. What objections were you then referring to? In a vast quantity amounting to several thousand vouchers, where it is required first for a person to sign his name, and then to have a witness to the payment of the money, in the case of these poor labourers and others, it very often occurs that the signature is illegible, or witnessed on behalf of such and such a person. No doubt these minor objections may be occasionally made to papers which pass through our Office.

6052. The papers are then returned to your Office for correction? They are returned for correction.

6053. Was there no objection made to a voucher of Mr. Quodling, or to several vouchers, because he wrote on them more than was necessary? One objection was made by me—"The Auditor General will not allow any remarks to be made in ink;" that I wrote myself.

6054. Then the objection did not come from the Auditor General? The paper never got to the Auditor General.

6055. You felt certain that the Auditor General would have objected? Yes, to a Superintendent writing on a voucher.

6056. What did he write? He wrote that he would not certify—that the work was not done.

6057. Well, surely if he thought it was his duty not to certify, he was bound to refuse? He might refuse, but it would make no difference; I should certify that the work was done.

6058. You did certify? I am not aware whether I did in this particular instance, but I should do so.

6059. In that case what check is there upon the Commissioner for Roads? Merely the check which is furnished by position, by respectability, and ability.

6060. You have felt no difficulty in taking any responsibility in a case of that kind? In the case of the Doughboy Diversion, certainly not.

6061. What is the use of these vouchers then—for the satisfaction of the Commissioner? Certainly not, for the Office generally; to know how the works are going on we must have some vouchers; we cannot have the mere *ipse dixit* of the Superintendent.

6062. If an *ipse dixit* may be taken in one case, why not in all? In the case of a person in a high position his word may be taken, where the word of an officer in an inferior position would not be taken by the Auditor General.

6063. Then you think the credit due to the word of a man depends upon his position? That does not naturally follow, but it does follow in respect to the roads in this case.

6064. Does it occur to you that some subordinate officers might be dispensed with altogether? Certainly, if there is not more money to be voted for roads than has been this year. It depends entirely upon the amount of work to be done.

6065. Do you not think the office of Superintendent of Roads might be done away with altogether? If it is the intention of the Government or of the Parliament not to make roads it might be; but if roads are to be made, they must have some one to superintend them.

6066. Does not the Commissioner superintend them? He lays out the first directions of how they are to be carried out.

6067. And if there is no voucher he supplies it? When he takes the personal supervision, when he usurps—that is hardly the proper word—when he takes upon himself the position of Superintendent, which I did in the Doughboy Diversion.

6068. Have you stated your reason why you took that position—was it not Mr. Quodling's incompetency? I had no confidence in Mr. Quodling's competency; I could not judge of his competency in the first instance.

6069. You said in your former evidence that your opinion was formed from the first? It was.

6070. You had always a bad opinion of him? I had no opinion of him.

6071. Why then did you allow him to remain in the department? Delicacy towards those who appointed him.

6072. Who appointed him? Mr. Bennett and Captain Martindale.

6073. Did Mr. Arnold ever object at the time you took upon yourself what you have admitted to be unusual? I beg pardon—I have not admitted anything to be unusual.

6074. You said you usurped the office of Superintendent? I qualified, or rather withdrew that expression.

- W. R. Collett, Esq.
31 Dec., 1861.
6075. That implied something out of the way? I stated before, and I repeat now, that a young man of Mr. Quodling's age and experience—although I am willing to give him credit for some knowledge—was not the man to superintend a road which, according to his account, was 135 miles in length.
6076. Your objection was to his age? One of my objections.
6077. At what age do you think a man is qualified to superintend roads? I should be sorry to see Superintendents over roads who were not thirty years of age.
6078. How old is Mr. Shairp? The Chief Clerk?—Really I do not know; I should imagine eight or nine and twenty.
6079. Did you acquaint Mr. Arnold with your objections to Mr. Quodling? Officially I did not.
6080. In these cases, where you thought it your duty to take an unusual course, or whatever you choose to call it, did you not think it right —? I beg pardon—I am not aware that I made use of the word.
6081. What word? "Unusual course."
6082. The course that is not generally taken? Because it is impossible for me to superintend every work.
6083. All I want to know is, whether in these cases where something is done by you which is not common, you make any report of it to Mr. Arnold or to the Government? I am not aware that I made any report to Mr. Arnold, not any official report. Mr. Arnold and myself have many conversations upon the qualifications of every overseer and Superintendent.
6084. You do not think it necessary to report to Mr. Arnold? When he asks me for any information I afford it.
6085. Do you do that as a matter of obligation to Mr. Arnold, or in the course of your official duty? I stated before that there are no instructions whatever for the Commissioner.
6086. You only report when you wish to oblige Mr. Arnold? I would not say "oblige." When Mr. Arnold wanted information I gave it him.
6087. When an unusual course was taken would you not consider it your duty to make some record of it? I am not aware of the course being unusual. I know that in one case Mr. Bennett superintended a contract which he took out of my hands, though he was the Road Engineer in Sydney.
6088. When you were Superintendent? Yes; Mr. Bennett acting for the Commissioner as the person laying out the road.
6089. When you were Superintendent of the road were your certificates or vouchers always considered necessary? I am not aware that they were; but if Mr. Bennett chose to certify for any work I did not wish to write a certificate.
6090. As Road Superintendent did you not furnish a certificate? For certain work. I may explain the case to which I refer. I was engaged in superintending the road upon one side of the Gap, and Mr. Bennett and Mr. Bayley were superintending the other; and Mr. Bennett, who was acting for the Commissioner, said he would relieve me of the work on this side the Gap, and took a part of my work under his supervision. When I came to be Commissioner I took Mr. Bennett's side under my supervision as well as the other. During the time this part of the road was under Mr. Bennett's supervision I never gave a voucher for it, although I was Superintendent of the district within which this portion of the road lay.
6091. While you were Superintendent was there none of the road under you in the same way that the road was under Mr. Quodling? The whole of the road, from Morpeth to the foot of the Gap, was under me, and half-way over the top of the Gap was still under me, though Mr. Bennett thought fit, and to which, as he was my superior officer, I did not object, to relieve me of the superintendence on this part of the road.
6092. When you were relieved you gave no vouchers or certificates? None whatever.
6093. What was your duty? I rode over the road, and looked at the road.
6094. And kept the men at work? No, I did not.
6095. What were you doing? I was doing nothing over these particular two miles. I was obliged to go over this road, because the portion of the road under my superintendence lay on each side of it.
6096. You had another portion of the road under you? Yes; both one side and the other were under me.
6097. With reference to this work, were you not relieved from responsibility—did you not furnish vouchers? In the same way that Mr. Quodling furnished vouchers and certificates for every other part.
6098. Were not all vouchers and certificates considered necessary? They were part of the Office work; whether I considered them necessary is another question.
6099. Would you have considered it regular that payment should have been made for these works without your vouchers? I consider that during the three or four years when we were without these forms, the works were done as well as they have been since with these forms; for, although they are an apparent check they are no real check, as the Superintendent signs vouchers for works without seeing them.
6100. You mean to say that no amount of machinery can prevent people from cheating the Government? That is according to circumstances.
6101. It must depend upon the character of the men employed? Yes, the value of their situations, their positions, and characters.
6102. *By Mr. Dalgleish*: In what way were you relieved from the supervision by Mr. Bennett—had you any communication by letter or verbally? Neither verbally nor by letter.
6103. How then did you know that you were relieved? Merely by another person being put in the place.
6104. I thought you said that Mr. Bennett said he would relieve you of all the work in a certain place? Probably he did say so.

6105. I thought you said he did say so? I cannot recall to my mind exactly Mr. Bennett saying to me, "I will relieve you." W. R. Collect,
Esq.
6106. I understood you to say that Mr. Bennett said he would relieve you? Mr. Bennett was the mouth-piece of the Commissioner. I did not take orders from anyone between the Commissioner and myself, but I was given to understand that I was relieved. 31 Dec., 1861.
6107. By letter, or verbally? I have been looking over my official documents, to find when Mr. Bayley was appointed to relieve me from my duties on the Gap Road, but I have been unable to find any documents; the only documents I can find are a letter from Mr. Bayley to the road overseer, and also the whole of the certificates respecting that work signed by Mr. Bayley, and the objections that have been made by Mr. White and Mr. Loder do not in the least apply to me, because that portion of the work was never under my supervision at all.
6108. What I wish to know is how this took place? Mr. Bennett chose to superintend that part of the Gap, just as I chose to superintend the work on the other side.
6109. *By the Chairman:* I want to know whether all your proceedings in regard to the Doughboy Diversion works, when you were taking the course you have described with reference to Mr. Quodling, were known to Mr. Arnold? I should imagine they were not.
6110. You have never thought it your duty to make any report to him? About my doing my duty?—None whatever.
6111. Did you not consider it your duty to acquaint him when you were departing from the general practice in regard to the Superintendent? I was not departing from the practice—there was only one Commissioner before me, and he departed from it; I do not see how you can depart from what has never existed.
6112. I ask you whether Mr. Arnold was acquainted with this? With what?
6113. With what you chose to do with Mr. Quodling—to dispense with his certificate in a certain instance? Mr. Arnold has nothing whatever to do with the financial department.
6114. Will you answer my question whether Mr. Arnold was not acquainted with this? With what?
6115. With this? Mr. Arnold was not acquainted with the financial part of the business.
6116. You have stated to us a certain course of proceeding with regard to the Doughboy Diversion, and with regard to Mr. Quodling—whether it was regular or not I am not asking you. Was Mr. Arnold acquainted with this? Not officially.
6117. Did he know anything about it in any way? He knew so far as this, that on my return I informed him that the works were being conducted in a very satisfactory manner.
6118. Did you say that Mr. Quodling's conduct was not satisfactory? I hinted it.
6119. Did you make any charge against him? If I make a charge I do so without any mistake.
6120. Then no objection was made by Mr. Arnold to anything you told him? I am not aware that Mr. Arnold ever objected to anything; I enjoyed his confidence, and I trust I deserved it.
6121. I think you stated that you ascertained that in all cases in which Mr. Quodling reported in an irregular manner, you found that the work had been done properly by the contractor? I am not aware of any report of Mr. Quodling; I deny the reports.
6122. I do not want to enter into that question—I perhaps use an improper term—you know what I mean—I want to know whether you satisfied yourself that the work was properly done by the contractor? I am satisfied the work was properly done by the contractor; that is in my report.
6123. In one place, you say that the rock you call basalt was in sufficient quantity to fulfil the contract, and that all the other, which you will not admit to be shale, was extra? It is not shale.
6124. All but that was basalt, and that was put on extra? The stipulated quantity of blue metal or basalt was put on.
6125. How did you ascertain that after it was spread? I had to begin with 1,200 yards of broken metal, certified by Mr. Quodling, and then 2,800 lineal yards of pitching, 18 feet average $7\frac{1}{2}$ inches, that is 3,500 yards more, and the whole specification is only 3,520 yards. The pitching alone —
6126. I do not ask you any question about the pitching now; I want to know whether after metal is spread you can measure it? Yes, I can measure; so many inches thick and so many feet broad will give so many cubic yards.
6127. Can you ascertain all that when the metal is spread? With the greatest possible case, if traffic has not been on the road.
6128. What was the object of the contractor in putting this quantity of extra stuff on the road—was it done to do more than he agreed to do? The object of putting this stuff on the road is to blind the metal; this is called blinding.
6129. Perhaps it was put as a blind? It was put on with the metal, and that with the pitching forms the road.
6130. Then is a contractor not bound to put that other stuff on at all? He is bound to give satisfaction to me, for I should not have passed it unless he had done so.
6131. You would not have passed the contract although he had put the proper quantity of basalt on the road? He is bound by the contract to perform the work to my satisfaction.
6132. And you would not have been satisfied if he had put the stipulated quantity of basalt upon it? The road would not have been in the state I should have wished to see it in for the money; the contractor might have objected.
6133. Is it a common thing to put inferior stuff upon a macadamized road? The specification states broken metal 6s. 6d., gravel or inferior metal 3s. 6d.
6134. Do you call that gravel? It answers the purpose of gravel as blinding; it is stone picked up there. In the Sydney streets a marly substance which is called gravel is used to make it bind.

- W. R. Collett, Esq.
31 Dec., 1861.
6135. How could you ascertain at that time whether the pitching was put on when the road was in a proper condition? My orders were to do the pitching when the road was soft; that is my principle.
6136. That differs from the usual course? There is no usual course; it has not been adopted in this Colony, but it was adopted by Mr. Telford and by me.
6137. Has it not been the usual course in contracts to insist that the pitching should be put on when the road is hard? There never was any pitching before I was Commissioner; there was simply a layer of metal without any foundation.
6138. What was underneath it? The earth.
6139. Nothing but soft earth? Which was presumed to have become consolidated, which was an impossibility.
6140. You have adopted an improved system? According to my own view, and I believe that of the public generally.
6141. Have you tested it? I have tested it in every part of the Colony.
6142. A certain degree of preparation is necessary, is it not, before the metalling is put on? I think not. My plan is, the very same day—and I have proved it on the Northern Road—to pitch it; I put the pitching on the soft ground, the whole sinks together, and subsequently I put on the metal and blinding.
6143. Will you describe what you mean by pitching? Pitching is paving by hand, ballasting is throwing stones large or small out of a cart, and shovelling them about, as is generally done in the streets of Sydney.
6144. *By Mr. Lucas:* They are knocked into their places by a large hammer? Yes; pitching may be stones of any shape—they are angular generally—and their height must be nine inches in the centre and six at the side. The object is to have them perfectly straight.
6145. *By the Chairman:* Upon that you put the metal? Yes; this pitching being sandstone the metal grinds itself into the interstices; on the top of this metal the gravel or blinding is thrown, and the road is then open for traffic.
6146. Had the contractor been bound by his contract to put this blinding stone on the metal? No, I object to it in principle; but I must accommodate the public, and I find that if I do not put on the blinding, the bullocks will turn off a new road and run into the water tables, so that although I do not approve of blinding I am obliged to use it.
6147. You do not suppose it does any great injury to the road? It cannot do any injury; but of course the dirt will come soon enough without this being laid upon it.
6148. Then this blinding is intended to grind up to a powder? Yes; this is used not only as a blinding, but it is put on a portion of the road that is solid rock, because I consider it injurious to put basalt on the solid rock where it will grind up.
6149. I think you said yesterday that basalt will not grind up? I said it will grind up into these interstices.
6150. You have always had the authority which, I presume, every Commissioner of the Road has had, to strike out clauses from a contract, or to alter a contract? I have not had the authority, because I presume it is not specified by law what the duties of the Commissioner are.
6151. I do not ask that; I ask you whether the Commissioner of Roads possesses this specific power—to alter a contract at his discretion; by arrangement with the contractor? It has been done, and I have done it.
6152. Is that done with the knowledge and cognizance of the Government? It is not necessary to state an individual case, as it is not applicable to this case, because the contract was signed subject to my alterations.
6153. I am asking you the question, as Commissioner of Roads, whether you have the power to alter contracts, either with or without the consent of the contractor? Yes; circumstances oblige me to do so.
6154. You have exercised that authority in certain cases? Allow me to give an example: The specification for the Hume bridge at Yass is for a pile bridge; we found that the rock interposed a difficulty, and we substituted sills instead of piles; the contractor perforce must comply, although it entails more trouble and labour for the construction of coffer-dams, and so forth; but as we cannot drive piles through rock, we must put sills down.
6155. What is a sill? A bed for a pile.
6156. In these cases where this authority is exercised, I presume compensation is made to the contractor, if it involves any extra labour? Nearly all our contracts are by a schedule of prices; they are not for a given amount, but so much per foot or per yard, therefore it makes no difference.
6157. In cases where you thought it your duty to make these alterations, did you not also consider it your duty to communicate with the department, in order that it might be placed on record that the alterations had been made? It would entirely depend upon whether I was in Sydney or on the circuit; if I were in Sydney the communication might be even written by myself, but merely as an official record that, by my directions, such an alteration was made. If I were on the spot I might not consider it necessary—I might hand in a written paper that such was my wish.
6158. Was there always a record in some shape of the alteration? It was my wish that there should be a record.
6159. Was there always? It is a very difficult question to answer where the number of all sorts of tasks amount to a thousand.
6160. Do you not think it necessary, in order that the Commissioner might be justified in the event of any charges being made against him, or any doubts being expressed with reference to him, that there should be some record? I think it very desirable.
6161. You cannot be certain that it has been done in all cases? I am not aware of any contract having been actually carried out according to the specification.
- 6162.

6162. If it were the rule to place alterations on record in some shape or other —? W. R. Collett, Esq.
Looking to other departments:—If in an original plan a railway cutting is to be taken through a rock perpendicularly, and it is found on working that it will not stand, the contractor is ordered or directed to take away the additional earth, but I am not aware that Mr. Whitton or Mr. Rae refers the question to the Minister. I think Mr. Whitton takes it as a matter of course that the public require it to be done, and it is done. In the same way, if necessary, a wooden viaduct may be substituted for a brick culvert. 31 Dec., 1861.

6163. Was there a clause in the Doughboy contract providing that the formation of the road should be hard in order to receive the macadamizing? There was a clause of the kind, but that gives way to my written alteration.

6164. You did alter that? Yes, I altered it in every instance; I gave directions in every instance.

6165. Did you give any verbal alterations to Mr. Quodling in reference to that? Yes.

6166. Did you give him written orders also? If one of Mr. Quodling's reports is referred to, you will see that he says he is carrying out the works according to the directions given to the contractor.

6167. Did you give him any written orders? I am not aware that I gave him any written order, except an official written order.

6168. I do not see any difference between written official orders and others? I refer to these slips of paper not signed by the clerk.

6169. They were authentic as far as they went? They were to be obeyed.

6170. Mr. Quodling in his evidence, in answer to 281, says—"I was told by the Commissioner to take not the slightest notice of the consolidation clause in the specification"—is that true? Perfectly true.

6171. In answer to 285, he says,—“I received a reprimand from Mr. Collett about the stoppage of Martindale with his pitching. I was told by Mr. Collett to put on the pitching on the embankments just as they were, and I stated they were not in a fit state to receive the pitching; he said he did not care about the embankments sinking; if one coat of pitching did not do he would give it another, and if that did not do he would supplement it with a third”—is that true? Perfectly true; and I as a professional man abide by that. You will bear in mind that the contractor was obliged to do this at his own expense; he was obliged to give the road to me of a certain convexity.

6172. Was it ever the practice to make these alterations in contracts after the work had been done? It is impossible to make an alteration after the work has been done.

6173. Supposing the work to be done in such a way as not to be consonant with the contract, was the contract ever altered to suit the work, even supposing it might be the case where the public interest might require it? Yes; wooden viaducts have been substituted for brick culverts, in the railway.

6174. I mean with regard to works under your charge? If I thought a bridge required a longer or shorter span I should alter it immediately, even after the contract had been made, and I have the full power practically to do so. It would be impossible to carry out works without it.

6175. Did you ever give Mr. Quodling orders not to measure the metalling on the road;—In answer to a question from me, 121, “You say you were not allowed to measure it—had you positive orders not to measure it?” he says, “Yes.”—Is that true? Certainly not true.

6176. He is asked, “From whom? From the Commissioner of Roads, and from Mr. Bayley, when he was leaving the works.”? I do not wish that answer, although a direct denial, to go unqualified—I never positively ordered one thing or another. Mr. Quodling had sent in a certificate for all the metal required, and the conversation that took place between me and Mr. Quodling was after the 1,200 cubic yards of metalling had been measured and paid for.

6177. You gave no order about it at all? The order I gave was, that we must have a final measurement of the work, in order that it might be seen that the contractor had done his work.

6178. I ask Mr. Quodling, 2,125, “Did Mr. Bayley leave you written orders? Yes, he left me a written slip.”—“What was the purport of this written slip? Stating that the metal was to be put on without measurement, half a cubic yard to the lineal yard.”—Are you aware of ever having given a written slip to that effect? That is not without measurement, for half a cubic yard to the lineal yard implies so many feet of metal to the lineal yard.

6179. That is your idea of measurement? It is the fact, 13½ feet to the lineal yard being measurement.

6180. In answer to 2133, he says,—“In fact, I received orders from Mr. Collett not to measure anything, that it was a lump sum and required no measurement.”—Is that true? I must know the date of that first, which has a very great deal to do with the matter. I think I can elucidate the matter. Up to a certain date no orders were given at all; things went on very regularly, and I had a report from Mr. Quodling that in a few weeks from that time the earth-work would be completed; and I might have said that he need not trouble himself with the measurement of the work then, but must make a final measurement. I am not to be taken in by him to make admissions that I had given orders to him not to do his duty, without reference to the state of the case. He states that he had measured certain work, amounting to £5,000, and I say,—“You need not trouble yourself; one measurement will do for the whole.”

6181. You gave him that written memorandum that he was not to do anything? I am not aware that I gave him a written memorandum at all.

6182. Did you give it to Mr. Bayley? Mr. Bayley was a very scrupulous gentleman in receiving orders; he has said, “Excuse me, but will you give me that order in writing?” It has been difficult sometimes to do so; perhaps it has been a wet day, and I have taken out

W. R. Collett, Esq.
 31 Dec., 1861. out my pocket-book, which is a very small one, written in it my instructions, torn out the leaf, and given it to Mr. Bayley for his guidance, not believing that it would be handed over to any other person—not that I objected, but I never intended it to meet any other eye than his.

6183. These were confidential communications? Hardly confidential communications; but what is taken out of a Commissioner's pocket-book I think should hardly be brought as evidence against him.

6184. You wrote these notes hurriedly? To please Mr. Bayley. I would say, "I wish such and such a thing done," and I would then give him one of these little slips.

6185. You never did this with Mr. Quodling? Mr. Quodling was never sufficiently in my confidence for me to do such a thing with him.

6186. Would you not think it more incumbent upon you if he were not in your confidence? Mr. Quodling had no contract except the clearing; I did not think him sufficiently acquainted with engineering to carry out this work. The other contract was simply one of clearing, which required a great deal of personal attention; about £5,000 have been spent upon it, and I wished him to attend to it and to a few tasks at Tamworth, Armidale, Moonby's, and Kangaroo Flat. I am perfectly aware that Mr. Quodling could measure work, and I am also perfectly aware that I could teach a boy to do the same in the course of a week, as far as was required of him, because all the sections and quantities were given him, and he had only to see that the sections and quantities were carried out.

6187. If I do not misunderstand you, you seem to imply that Mr. Quodling was of very little use at all with regard to the works? He was no use whatever, if I superintended him.

6188. But did you superintend him? I did.

6189. Then he was of no use at all? Of no use at all—not in these works.

6190. Then could you not dispense with the Superintendent? If I had let these 135 miles of road, as he calls them, take care of themselves.

6191. Was he doing any good with this 135 miles of road? He was having it cleared.

6192. Was he doing that part satisfactorily? I am not aware; I take it for granted that it has been done satisfactorily.

6193. You heard no complaints? I should have no opportunity.

6194. Had he not men under him? It was done by contract.

6195. Did you make any report against Mr. Quodling before he complained against you? Several; I have never seen him without reprimanding him.

6196. You reprimanded him—was that verbally? Verbally, or by letter; all my letters nearly are reprimands.

6197. Are you aware that at any time white gum has been used where it ought not to have been? No.

6198. Do you consider white gum good wood for bridges for public works? No, I do not.

6199. You are not aware that it has been used by the contractor? I am aware it has not been used; it is now lying alongside the bridge at Murrurundi, but the timber that has been used has been either red gum, stringy, or ironbark. If white gum has been used it has been taken out, that is all I can say. I believe it was attempted to be used, but Mr. Bayley saw it and of course he had it taken out, and it is now lying at the blacksmith's.

6200. I suppose you recollect that (*handing Appendix C, p. 8, to the witness*)? Yes, that is the only remonstrance I admit.

6201. Have you stated that you received no remonstrances? Except this one.

6202. Was anything done upon it? Yes, I saw the contractor.

6203. Personally? Yes, the contractor came down to Sydney.

6204. You saw him personally? Yes.

6205. What course of action did you take? He asked me whether he should remove the stumps? I told him not.

6206. Did you ascertain in regard to all the complaints made whether they were correct or not? Allow me to see what the complaints are. (*The witness referred to the paper.*) The first is as to the stumping, which was according to my directions.

6207. How according to your directions? I said the stumps were to remain there, but that a reduction was to be made in the contract prices.

6208. Did you do that before or after the letter? As far as I recollect, the contractor came down in consequence of this letter.

6209. Will you be kind enough to answer the question whether the directions you gave were before or after the letter? My directions at the commencement were not to remove the stumps.

6210. Before the letter was written? Yes.

6211. Was the Superintendent informed of that? Yes, on the ground.

6212. Then he had no business to make these complaints about the stumps? He had no business to write this letter at all; it is a very improper letter.

6213. With regard to this letter you say you authorized the contractor to deviate from the contract? I beg pardon—there is no deviation from the contract, the contract authorizes it.

6214. Then he had nothing to complain of? He had nothing to complain of; it states in the specification that the stumps are to be left.

6215. In what respect is this letter improper? This is not a report; he is instructed to make a report; he does not make a report.

6216. You object to the style? Entirely.

6217. He is not quite up to the official style—do you object to the substance? He knew what the official style was up to the 15th of August.

6218. You think this was intentionally disrespectful? I am certain of it. Up to that period he had reported that the works were proceeding most satisfactorily.

6219. If these statements were true was he not bound to make them in some shape or other?

I see nothing in the letter—the stumping was according to my orders—the pitching was put on the embankment before consolidation, which I particularly told Mr. Quodling was to be done, and I reprimanded him strongly for stopping the contractor, that he was exceeding his duty in doing so, as the responsibility of the experiment rested upon my shoulders and not upon his, Mr. Quodling's, who of course must have been ignorant of pitching, for it never existed in any road in the Colony before. I was making experiments which I wished to have done in the previous year if I could have carried them out. It has now been done for short distances in various parts of the Colony, and after another six months the traffic will shew whether this system is the best and most economical.

W. R. Collett,
Esq.
31 Dec., 1861.

6220. Did Mr. Bennett never carry on any pitching? He attempted it on one side of the Gap, but it was not laid with regularity; in fact, he encountered the same difficulty that I had at first—the overseer did not understand it, and the consequence was that the pitching was very badly done. He saw the necessity of it and deviated from the specification on the other side of the Gap the same as I did, but the error of Mr. Bayley was that he had not the men to pitch or a Superintendent who understood pitching, and it is only by gradually getting men who understand pitching that the work can be satisfactorily performed. The pitching is according to my orders, of which Mr. Quodling was perfectly aware.

6221. That was a deviation from the contract by your authority? Yes, I saw the error of the original specification. This letter says—"Nearly all the excavation is completed; the water tables and embankments are not dressed." Of course they were not dressed, no embankment or water table would be dressed until the contract were handed over by the contractor. "The late rains have caused the roadway of big cutting to slip slightly. I am afraid the road will have to be taken five feet more into the solid for a distance of fifty feet." Now to the best of my knowledge the original specification was fifteen feet in the solid, and I have since measured the road and found it twenty feet in the solid, so that this suggestion was merely anticipating what I proposed to be done. "The bridges are not progressing very rapidly." That is no remonstrance. I see nothing in this letter, except that the stumps were not removed, and that the pitching was put on when the road was not in a hard state, and in both of these instances the contractor acted according to my instructions.

6222. Then if you had not seen the contractor you would have thought nothing of this letter? Nothing at all; I should have taken no notice of it. I should take no notice of the letter of a subordinate if it were not called for.

6223. Not even if it disclosed what you thought to be the facts? I do not answer that question.

6224. You decline answering that question? I decline what you say—if I thought them to be the facts.

6225. What I mean is this:—If a subordinate wrote a letter of this kind, supposing it did disclose what you thought were facts, would you take no notice of it because the style was bad or not in accordance with official routine? There is an official routine, and that routine must be kept up. That letter had another object; it was not for the public service it was written.

6226. You judge that from the style? I judged because I knew what was going on.

6227. What was going on? There was collusion with the contractor's foreman to get up a charge.

6228. What was the reason you did not take steps to remove Mr. Quodling, if you thought he was guilty of this improper conduct? I told Mr. Quodling if I found him absent from his work, I should feel it to be my duty to report him and to recommend his removal. I stated that to him.

6229. You did not make these statements in writing? No; I stated before, that I did not threaten without performing.

6230. You have already stated that you would not take any personal statement or remonstrance from Mr. Quodling; could you suppose that he would take any personal communication from you? I expected he would.

6231. Would it not have been better to have communicated it to Mr. Quodling in writing? I did not choose to write to Mr. Quodling.

6232. You allowed Mr. Quodling, whom you suspected of this most improper and fraudulent conduct, to remain in office without taking any measures to remove him? I proceeded, as soon as possible after I received this letter, to the works. This letter is dated 16th August; and early in September I was on the works, where Mr. Quodling behaved with the greatest possible rudeness, so much so that, as a gentleman, I could not condescend to speak to Mr. Quodling. I should have gone in October, and should then have communicated with the Minister, but a serious accident prevented, and Mr. Quodling then took the other side of the question, and thought he would upset me.

6233. I see in this letter something you did not notice; he says, "Nearly all the pitching put on Doughboy embankments was put on before the banks were consolidated." You say that is of no importance; but the letter proceeds—"and a considerable quantity of metal not broken to gauge." Supposing that to be a true statement, was it right? It is contradictory to Mr. Quodling's certificate upon the metal; if a Superintendent sends in a certificate—"I certify, upon honor, that this is broken to gauge," and three months afterwards chooses to contradict himself, I cannot attach much importance to his statement. I believed that the metal was broken to a particular gauge, and I think so still.

6234. Do you think if he told a lie in this matter he was fit to hold office? I consider that he was unfit to hold office; and the very fact of no notice having been taken of this letter must have been overwhelming evidence that his superior officer had no confidence in him.

6235. Is it not a rule for a superior officer, if he has no confidence in a subordinate, to get rid of him at once? I would have got rid of him at once, but for this circumstance:—

In

W. R. Collett, Esq.,
31 Dec., 1861.

In the first instance, I had not wished Mr. Quodling to manage this contract, and I could not make his non-observance of that contract the ground of his dismissal; if I could have shewn insubordination or drunkenness I should have done so, but the proofs were not sufficient at the time to allow me to do so. Having relieved him from a responsibility, I felt that it would not be just to come upon him for any error in the discharge of it.

6236. There is another statement here with regard to culverts that you have not adverted to—"Culverts, three 2nd class completed, and one 1st, but this I cannot pass, the timber used being small and the workmanship very bad"—was that a true or false statement? One of the culverts was pointed out to me, but that was passed by Mr. Bayley.

6237. One—but there are three? I think not—only one; I had very great hesitation in passing it.

6238. You have seen it? I have seen every bridge, culvert, and piece of metal, on the road. I said to Mr. Martindale—"What is to be done—this is a bad piece of work." He said, "I will take it down if you wish it—but what is to be done?—Mr. Bayley has passed the culvert." I said, "Mr. Bayley has done wrong." He then said, "The specification does not require sawn timber for the railing; if you will allow this to pass upon Mr. Bayley's certificate, I will put up this fencing without any charge for the wood-work." I replied that I was very sorry to have to find fault, but that as Mr. Bayley was not there to give any explanation, I would allow it to pass with that understanding. The culvert was not good, but not so bad as to render it necessary to have it taken down.

6239. Then in this case Mr. Quodling made a correct report? Mr. Quodling made a report that he had no business to make, because Mr. Bayley having had charge of the wood-work, it was no part of Mr. Quodling's duty.

6240. No matter how bad the culvert might have been, he ought to take no notice? It was not actually bad—it was not according to the specification. If the timber of a district will not allow you to get slabs of a certain dimension, it is but just to a contractor that some allowance should be made.

6241. After a contractor has entered into a contract with a knowledge of all the circumstances? It takes place this very day. The Tumut Bridge is taken for iron-bark, and the contractor writes me—"I am sorry to inform you I am unable to carry out the contract, as there is no iron-bark in the neighbourhood; will you allow me to use box or stringy-bark?" That is referred to the Engineer, who will no doubt report that, under the circumstances, the contractor may use timber of a secondary nature, or else a contract must be re-issued, and then we shall be obliged to use timber of a secondary nature. This is exactly the case in the Doughboy works,—if timber of a certain scantling cannot be procured, after the contractor has used every endeavour to procure it, he is allowed to use the best he can get. In the same way, if the specification says Stockholm tar is to be used, and it is not in the Colony, then we allow him to use coal tar, and make a reduction in the price. This occurs constantly. Of these eighteen bridges and culverts, only one small culvert of five feet open way is complained of.

6242. What is your opinion of Mr. Bayley's competency—you put him in charge with Mr. Quodling? I consider Mr. Bayley a very good inferior officer.

6243. Is he fit for the position he holds now as Superintendent of Bridges? He is perfectly well qualified.

6244. You considered him superior to Mr. Quodling when you put him in charge of works which Mr. Quodling could not carry out? I have had opportunities of observing Mr. Bayley for years; I had had none of observing Mr. Quodling. I would beg to state here, to shew the feeling, that when I was Superintendent of the Northern Road I spoke to Mr. Quodling about some matter and he said, "Mind your own business." I was speaking to him as a gentleman on some matter of detail at the time I was Superintendent of the Northern Road, and he also was a Superintendent on another part of the road. Of course after that there was no intercourse of any kind.

6245. As we are on Mr. Bayley's matter I would refer to a letter written lately, in which you suggest to him not to attend and give evidence before the Committee? Is it a private letter?

6246. It is marked "private"—here is the letter—you say, "You can please yourself about coming, as they have no power to enforce the summons, and you may be kept a week in town and have nothing for expenses either for stopping or travelling, as you are not a Government witness." Do you consider it was consistent with your duty to write such a letter? Under the circumstances, I do. Mr. Bayley was at a very important trust—the substitution of these sills for piles—there had been freshes in the river, and at this moment he was levelling the rock foundations; and as this might have been covered by water before his return, the contractor might have neglected his work, and there would have been no one to see that it was properly done. But as there is one letter before the Committee I would wish to put in the answer of Mr. Bayley to that letter; that letter was written before he was summoned.

6247. You were aware that he would be summoned? I was not aware; you did not inform me what witnesses were to be summoned.

6248. You make this statement—"You are to be summoned upon Mr. Quodling's Committee"? Probably I might require him to substantiate something on my own account, as my witness.

6249. Had you made up your mind to have him summoned—to ask me to summon him? I am not aware that private letters written *currente calamo* should be brought forward as evidence.

6250. That is a matter for us to decide; we have the letter before us, and you have said that you did not know that Mr. Bayley was to be summoned at all, and yet in this letter you say, "You are to be summoned"—how do you reconcile this discrepancy? I believed

he

- he would be summoned either by me or by Mr. Quodling. I had no particular reason to suppose so any more than I had to suppose that others would be summoned. I might have written to others in the same way; for instance, I might have written to Mr. Gill, "You are to be summoned"; but I did not know whether Mr. Gill would be summoned. When I asked the question who was going to be summoned, in order that I might meet the evidence, I was not then told who the persons were, but one or two names were mentioned.
6251. You say here, "You are to be summoned"—I suppose "You are to be summoned" means that he was to be summoned? I might have intended to summon him.
6252. If you intended to summon him how could you afterwards tell him, "You can please yourself about coming, as they have no power to enforce the summons"? Because I considered that the public interest would be better served by his remaining at his post.
6253. Do you not think it would have been more candid on your part if you had informed the Committee that you did not wish him to come? Certainly not, as the head of a department.
6254. You think it more consistent with your duty to suppress his evidence than candidly to tell the Committee you did not wish him to be summoned? I beg to state that this was merely at the commencement; a great deal has passed between Mr. Bayley and myself since, and you must see the whole to judge of that letter.
6255. I do not see how Mr. Bayley's answer can affect this letter—you have made a suggestion to this witness? I beg pardon; I did not regard him in the light of a witness.
6256. What is the meaning of the words, "You are to be summoned upon Mr. Quodling's Committee"—was he to be summoned to sit upon the Committee? I might have made a mistake.
6257. Is the letter a mistake? It is a mistake to have it in evidence here.
6258. That is a matter we have to determine, not you; we may be doing wrong—violating confidence? It is not a matter of confidence; but there are certain terms, as "Dear Sir," which are not official, just as Mr. Bayley would not address me "Dear Sir," in my official capacity.
6259. You think it was improper of Mr. Bayley to give this letter to us? I cannot judge Mr. Bayley's conduct—that is for him to determine; but I think any private letter is not usually brought in as evidence. However, I do not mind.
6260. Do you wish to withdraw from this letter, or do you consider it consistent with your duty? I considered it my duty, under the circumstances, to retain Mr. Bayley at that service.
6261. By indirect suggestion? I do not know whether it is by indirect suggestion.
6262. My opinion is, that it is by indirect suggestion. You did not tell the Committee that you were going to take this step, but you tell Mr. Bayley that the Committee have no power to enforce their summons? I do not know that they have, but I know that the public interests have suffered very much by this Committee.
6263. I did not ask your opinion upon that subject, and I beg you will confine yourself to answering my questions? I believe Mr. Bayley will be a favourable witness to me, and I did not wish to leave the public works without proper supervision.
6264. On that ground you say, "No doubt you can give me important assistance"—do you mean that the public would get important assistance? That his statement would be of importance.
6265. Will you explain this—"The treachery of the late Superintendent is now so glaring"? The whole proceeding has been one of conspiracy.
6266. Against you or against the public interests? Against me individually—the plot has been publicly boasted of at dinner.
6267. You do not wish to retract this letter? I do not wish to retract anything; I consider it extremely unusual to bring a private letter in evidence against a person, and to ask him the reason of his writing it; and I say that I have a right to bring the official letter which guides it. I hand in the telegram to Mr. Bayley, upon which he acted, and beg to have it read. (*The witness handed in a telegram, dated 12th December, 1861. Vide Appendix A.*)
6268. The letter containing the instructions how to act preceded the telegram—the letter is dated the 7th? I must disabuse your mind—instructions to act are not given in private letters.
6269. What is the meaning of the heading of the letter—"Department of Public Works, Road Branch?" That is a mere accident; it was the first piece of paper I laid my hand upon.
6270. There is one other collateral matter on which I would ask you a few questions. You have spoken very highly of Mr. Martindale as a contractor? I have.
6271. He is one of the most extensive contractors in the Northern District? In New South Wales.
6272. You have a very high opinion of him? I have a very high opinion of him.
6273. Did you ever hear that he had been employed in Victoria? Yes.
6274. Did you ever hear what his character was there? He had a very high character up to a certain time, when his partner failed.
6275. That was until he was found out? No, till his partner failed; he was in partnership.
6276. How did the failure of his partner affect his character? He took the benefit of the Act—became insolvent.
6277. Was that the only objection to him? There was another objection with the Victorian Government, which they have since remedied by paying him £700.
6278. Have you heard of Mr. Steavenson? The Commissioner for Roads—I am in communication with him.

- W. R. Collett, Esq.
31 Dec., 1861.
6279. Do you think he is a good authority upon Mr. Martindale's character? I should doubt whether he was; I question whether he has been long enough in the office; Mr. Martindale was employed many years ago; I imagine Mr. Steavenson was not then in office.
6280. Do you think if Mr. Martindale were in Melbourne he would be allowed to enter into any contract with the Government? He is at present in Melbourne for that very purpose.
6281. Has Mr. Martindale to your knowledge been favoured as a contractor—I do not mean to say on his own account, but for the public interest—by having contracts at higher rates than other contractors? With the letting of contracts I have nothing to do; the Minister does that entirely, and he makes it an invariable rule to give it to the lowest tenderer—he never makes a deviation. He does not inquire so much into the respectability of the contractor or of his surety as perhaps might be desirable.
6282. Would no recommendation of yours be taken for or against a contractor? None whatever.
6283. Supposing he had performed his contracts in a manner notoriously bad, or had failed to fulfil his contract—would it not be your duty to represent that to the Minister? There is a rule that, if a contractor fails to complete a contract, he is not entitled to have any subsequent tender taken into consideration. In such a case we should not take the tender at all.
6284. In cases of that kind the tenders are always excluded? Yes. Suppose for a certain work twenty tenders are sent in; these are assorted and numbered. We first see whether the tenders are in form according to the advertisement—as sometimes persons omit or insert something contrary to the regulations—if they are not they are omitted, as the tender must be as specified in the *Gazette*. These are then submitted to the Minister who, without reference to the parties, takes the lowest tender. Perhaps it may not be justifiable in me to say so, but I think this principle is sometimes carried to too great an extent.
6285. Was that rule observed in regard to the contract of Mr. Heritage for clearing? Yes, certainly.
6286. Was Mr. Heritage's tender in fact the lowest? Yes, in fact his was the lowest tender.
6287. Was there not some peculiar circumstance connected with Mr. Heritage's tender? Yes.
6288. Will you state that circumstance? It was a tender for clearing between Doughboy and Goonoo Goonoo. Tenders were called for, and I am inclined to think six or eight were sent in. The one signed by Dunbar might have been the lowest,—he was a brickmaker and bore an indifferent character, and his contract was informal—it did not state where the work was to be carried out—in fact, it was not taken into consideration. Mr. Heritage's tender was very much the lowest, and he was informed that his contract was accepted, but from some oversight —
6289. By whom? It is difficult for me to state where the oversight was, but I believed it occurred up-stairs in the Office—that is, in the Chief Clerk of Works Department.
6290. Will you state the name of the Chief Clerk? All the tenders coming from the Minister do not come to me—they go up-stairs, and I lose sight of them till they come to me to carry them out.
6291. They go to another department? To another room; they are registered by the Chief Clerk as Minister's work, and not by mine as Commissioner's work.
6292. Is that in Mr. Rae's department? Yes, Mr. Rae is the Under Secretary, Mr. Halligan is the Chief Clerk.
6293. Either Mr. Rae or the Chief Clerk committed an oversight? Yes, which was subsequently corrected. The oversight was in accepting the tender for a chain and a half wide when the tender was only for a chain. That tender having been accepted, it became a nice point how we could enforce the chain and a half.
6294. What did Mr. Heritage intend by his tender? He intended to tender according to the specification, otherwise his tender would have been put on one side and would never have been accepted, the specification being for a chain and a half.
6295. Are you sure you did not specify only for one chain—was there no correspondence? The correspondence was subsequent.
6296. After the tender was accepted there was some correspondence? Yes; when we discovered we had made a mistake and it was referred to the Crown Solicitor to ascertain whether we were bound to give Mr. Heritage the benefit of the mistake, we endeavoured to get another tender from Mr. Heritage which would be lower than the other tenders for a chain and a half, and he put in a second tender. As he had possession of the first —
6297. Was it thrown open to competition? No, he was allowed to amend his tender.
6298. Then in fact it was not a tender—it was an arrangement between you and Mr. Heritage? Not between me—I had nothing to do with it—I think “an arrangement” is an improper word.
6299. The word “tender” implies that the work is thrown open to competition? It need not be open to competition. A contractor may tender to do work at a certain price and under general rules. We had power to alter or to extend the contract, but we wanted to put ourselves right with the public, and to have the work done for the lowest tender. Mr. Heritage's tender was for £53, and that was lower than any other tender—his amended tender.
6300. Are you sure of that? Yes. A great deal depends upon that, and that is not only my impression but my firm belief.
6301. Any that were lower were from men who could not be relied upon? There was only one lower tender, and that was quite informal.
6302. Was there not one equal? I think not.
6303. How did this arrangement take place—was it in consequence of a remonstrance of Mr. Heritage? Mr. Heritage consulted with his friends, and it may be with his legal adviser.

6304. Why should he consult—had he not commenced the contract? No, nor had he signed the bond; we had that advantage, although we had sent him an official letter accepting his tender. W. R. Collett,
Esq.
6305. In other words, you were morally but not legally bound? It was a very nice point, and would bear argument on both sides. No doubt Mr. Heritage might shew the letter in Court. 31 Dec., 1861.
6306. Was Mr. Heritage ordered not to go on with the work? He could not proceed with the work till the bond was signed.
6307. Did not Mr. Heritage come to the Office once or twice; did not an altercation take place, and was he not ordered out of the Office? I cannot say; I was not present.
6308. Are you not aware of any note having been brought from the *Herald* Office, asking for a reconsideration of the case? Not at the time—some rumours came to me—it took place up-stairs, not in my room.
6309. You were not present when any arrangement was made? Not when there was any altercation.
6310. Mr. Heritage did not threaten the Government with Law or anything of that kind? I did not hear Mr. Heritage use any threats.
6311. Did he not come to you to remonstrate with you personally? He came once to me, and I stated it had better be amicably arranged; I believe that is all I stated. I had known Mr. Heritage before and thought him a very respectable person, a person I would have been very glad to give a contract to, but I had no action in contracts.
6312. You consider that public interests were benefited by the arrangement—that no injury was done? No injury was done; and I think it was a matter of justice to him.
6313. You think the public were not injured? I think it was very cheap at £53 a mile, a chain and a half wide, and filling up the holes.
6314. Is this the original tender of Mr. Heritage (*handing a paper to the witness*)? Yes, it is exactly as I stated.
6315. Are not some lower (*handing several papers to the witness*)? Not one, excepting that of Dunbar, which is informal; Heritage (No. 1.) £45, Vaughan £120, Abbott £56 13s., Greer £56 15s., Greer £55, Fisher £70, Odell £64 13s., Dunbar £47 10s.; that was informal, it did not state where the work was to be done; he is a brick-maker, and known to be of indifferent character—we could not take that. Cook £67 10s., Martindale £78, Martindale £77, Asser £77, Asser £90. I think the revised contract of Mr. Heritage is £53 a mile.
6316. Was not this £53 to be rateable, and to be added to for the extra half chain? No; to be carried out at that.
6317. There is another matter to which I would now refer:—Allusions have been made to a testimonial, have you any statement to make with reference to that? Yes; I was not aware that I had the document, but I presume that will speak for itself. This is the original document, with the names of the parties who subscribed to the testimonial; it has seventy-two signatures attached to it, and the Committee will be able to judge from it the manner in which it was obtained, and the parties who subscribed to it. I now beg to hand it in. (*The witness handed in the same. Vide Appendix B.*) I beg to call your attention to the date of the testimonial, the 29th of January, which was previous to the contract. It was asserted in evidence that I got this testimonial in consequence of their getting the contract.
6318. *By Mr. Hoskins*: I think the statement was that the testimonial was presented before you passed the contracts? I beg to state that this bears the signatures of some of the most respectable J.P.'s and residents in Murrurundi, and it does not bear upon the face of it that it was obtained by any contractor. The only contractor's name upon it is that of Mr. Martindale.
6319. Is not the name of Greer upon it? He was not a contractor at the time.
6320. *By the Chairman*: This does not state what each contributed? No; the sum was about £40.
6321. Do you not think it would be well in the case of contractors that they should not be parties to a thing of that kind? I could have no control in that matter; perhaps there might be some feeling of delicacy as to whether a contractor should be, but I do not consider contractors different from other people, and it is to be presumed that I am not to be influenced in the performance of my duty by a testimonial of £40. That testimonial was given to me, I presume, on account of my conduct and integrity in the performance of my duties. On a previous occasion I was presented with one of £190; to which I am not aware that any contractor contributed. It was given by about 200 gentlemen in the district.
6322. I have now to ask you with reference to a part of the road called the new cutting? (*The witness produced a plan.*) It might have saved a great deal of trouble if this plan, which I have had made for the use of the Committee, had been before them, because there has been considerable confusion, both in Mr. White's and Mr. Loder's evidence, as to the places referred to. I have had this drawn to scale, from Murrurundi to the end of the Doughboy contract, and it shews the length of the several contracts, the parties who contracted, and also the parties under whose superintendence these contracts were carried out.
6323. I should like you to give any explanation you may have to offer with reference to this work? I had nothing whatever to do with it. This is the contract on this side the range, which was laid out by Mr. Bennett very narrow, with twelve-foot bridges, against which I protested; but it led to the understanding that I was to have nothing to do with that contract; it was between Mr. Bayley and Mr. Bennett; and where these accidents occurred to Mr. Loder and Mr. White, it was in consequence of the bad arrangement, or bad metalling, or pitching, upon that portion of the road for which I am not in the slightest degree responsible. When I came into office I found that portions of that road, although passed by Mr.

W. R. Collett, Esq.
31 Dec., 1861.

Bayley, were imperfectly done; and the alterations of which you have heard, that have been going on this year, have been done according to my directions, in order to repair the bad places that existed at the time referred to by Mr. Loder and Mr. White—where they got into this bog.

6324. It was really a bad piece of work? It was one of those pieces which exist in every mountain district, where, owing to a spring, or to something in the nature of the ground, it will not harden. There was a piece at Warland's Flat, where any quantity of metal would disappear in it. Pitching was attempted in that neighbourhood, and the pitching had also disappeared when I came to it, though in fine weather it bears the traffic.

6325. It was a bad road? It was a bad piece of road.

6326. You think owing to natural causes? Owing to natural causes.

6327. You think the contractor was not much in fault? The contractor was not in fault, because the contract was passed; but he was bound to maintain it, and it has never been out of the hands of the contractor, and will not be till to-morrow.

6328. Is it now in order? Yes, very good order.

6329. Then the contractor has overcome the natural difficulty? During the dry weather.

6330. Would logs laid across be any good? No; I would have nothing to do with logs.

6331. *By Mr. Hoskins*: What part of the contract is it? Exactly halfway up the range; it is a very short piece—only three or four chains.

6332. *By the Chairman*: Who was the contractor? Mr. Martindale; he is bound to keep this road in repair.

6333. I suppose the loss is to the contractor? The loss to the contractor is so much that he contracted to keep the road in repair, and of course if he has extra work to do on that road it costs him extra metal.

6334. Was the work done as it ought to have been by a contractor—was there a sufficient quantity of metal, or was the pitching good? I hand you a letter from Mr. Bayley to the Engineer for Roads, which will shew you how this was conducted. It is written to the Engineer of Roads, and although it is not signed, there can be no doubt about the authenticity of the document, for it bears all the official marks; that was written three days before I was appointed Commissioner. (*The witness handed in the same. Vide Appendix C.*) In this case, the very principle which seems not to have met the approval of the Committee was carried out by him on the other side of the range as by me on this.

6335. What principle? The principle of arrangements having been made between the contractor and engineer with reference to certain works, without any reference to the Minister. He admits that he made alterations, that he made arrangements, and that he substituted some things that were not in the specification for others that were.

6336. Then Mr. Bayley had condemned this work before, it seems? I beg pardon; I am not aware that he has condemned anything; I had no communication of any kind with reference to that contract.

6337. You had nothing to do with that part of the road at all? It intervenes between two portions of my road. It was intimated to me in the same manner as I might intimate to Mr. Quodling, that I need not take notice of that particular contract, as other parties were in charge.

6338. You are not aware that Mr. Bayley or Mr. Bennett condemned that piece of road? If they condemned it they condemned their own specification and work.

6339. *By Mr. Dalgleish*: You have stated that, as Commissioner, your duties are defined only by Act of Parliament? And in the general conditions.

6340. Which are contained in the printed document you have handed in? It was handed in, but has been returned to me. It is material that these conditions should be appended to my evidence. (*The witness handed in the same. Vide Appendix D.*)

6341. You hold that these are the only regulations under which you are bound to act? The Main Roads Act, and the general conditions.

6342. You stated that you do not hold yourself responsible to the Minister for Works, but to the Executive Council only? That is my view of the case.

6343. How do you account then for the fact of the Secretary for Works letting these contracts without any reference to you in any way whatever; is not that an interference with your duties as Commissioner? The tenders are first submitted to me for a report, and they then go to the Minister for him to act upon. When the whole table of tenders is sent up for him to assign the contract, my report would probably be to this effect:—A certain number of the tenders are informal; such or such a person's tender is the lowest, or any memorandum of that description. This memorandum is put upon the papers when they come from up-stairs; they then go to the Minister's room, and as I stated before, the invariable practice is to give the contract to the lowest tender.

6344. Of which you are the judge in the first instance? The figures are all produced. I could not falsify them.

6345. The mistake in Mr. Heritage's contract was not a mistake up-stairs, but of your own, seeing that yours were the first hands through which it passed? It depends upon whether I was present when the tender was opened.

6346. You have stated that the manner of dealing with these tenders is that the tenders are submitted to you? As a rule.

6347. Was Mr. Heritage's tender an exception? I must refer to my notes to see whether I was in Sydney. The tenders are not kept back because the Commissioner is not in Sydney, but there must be three persons present.

6348. *By Mr. Hoskins*: You say the tenders are previously sent to you to report upon? The tender is addressed to the Minister for Works, that tender is put into a box, that box is opened when three responsible persons in the Government service are present, generally the

the Colonial Architect, the Under Secretary, and myself. Occasionally some other person may attend, but that is the general rule. We take out these tenders without reading them, merely initialing and numbering them. The clerk puts down—"for Under Secretary," such a number of tenders; "for the Commissioner of Roads," so many; "for the Colonial Architect," so many; "for the Engineer for Harbours," so many. The tenders are then separated and sent to the different departments. I immediately hand the tenders for me over to the Chief Clerk, and to the Engineer for Roads and Bridges, to make an analysis of the different prices, and they are then entered on a large sheet of paper so that at a glance they may be seen. That analysis, to the best of my belief, was made out in this instance of Mr. Heritage's contract; but as in the last year I believe we had upwards of a hundred contracts, I should be very sorry to say for certain whether I was present when this tender was opened, although by referring to the dates I could ascertain. I have not been able to trace where the oversight occurred; if I thought it occurred when the papers were sent to me to have them revised I would of course at once acknowledge it, but I think the mistake occurred in the hurry of business in the upper part of the house.

W. R. Collett,
Esq.

31 Dec., 1861.

6349. You said, in reply to a question from Mr. Dalgleish, that after having opened the tenders, you report to the Minister those that are informal and also the lowest? Yes.

6350. Could he not himself see which was the lowest tender? We draw out a statement in a tabulated form, in order that the Minister may see at a glance, but he can see whether this is correct by reference to the original papers.

6351. Did you not tell us previously that contracts were let by a lump sum? That is a matter of previous specification; in some specifications it may be stated, "This tender to be for a schedule of prices, or for a lump sum," giving us the option of saying it is to be done for so much, or for a schedule of prices. In the instance under consideration, however, the acceptance of the tender was not by myself, or when I was in office.

6352. Is it understood that you are to represent to the Minister which you consider the lowest tender? Not what I consider, but which is the lowest tender.

6353. Would it be difficult for the Minister to find it out? It forms a record; it is done in a tabular form, and the Minister judges for himself whether the statement is correct; he has the whole of the papers before him. There is no recommendation, but simply the statement that such or such is the lowest tender. I have no objection whatever, if the Committee desire it, to submit the whole of the proceedings with reference to any one contract, which will shew how the business has been conducted; but I am certain of this, that during my tenure of office, the Minister for Works has not let any contract to any but the lowest tender.

6354. *By Mr. Dalgleish:* With regard to this tender of Mr. Heritage, in what way does any doubt arise as to the price at which Mr. Heritage originally tendered, namely, £45—would not the words of the tender bind him to make it in conformity with the specification, the general conditions, and to the satisfaction of the Engineer for Roads—what reason is there to suppose that Mr. Heritage did not mean £45 a mile, a chain and a half wide, considering that he had the specification to guide him—is the mere fact that there is a figure 1 before the words "chain wide" to be taken as evidence against that? I do not know what Mr. Heritage thought about it. I take the document as I find it, or as it was found.

6355. It was Mr. Heritage's own mistake? Yes; and if the letter had not been written accepting the tender, it might not have been difficult to have rejected it.

6356. Yes, but you accepted the tender in conformity with your own conditions, and not with his? That is a legal question.

6357. I understand you are the Commissioner for Roads? Yes.

6358. And the Main Roads Act says you have everything to do with the roads? Not with letting contracts.

6359. Can you find any other authority who has any power to do anything with the Main Roads other than yourself. I take you upon your own grounds? What is the question?

6360. The question is whether it is not your business to see that these tenders are properly drawn up, and that proper arrangements are made with respect to them? I found matters in that state, and I did not disturb them.

6361. Then you do not act exactly by this Main Roads Act? When a gentleman takes office it is impossible—however much he may wish to be a reformer—it is impossible for him in a few months to upset the whole previous arrangement, and to reorganize everything. I mentioned to Mr. Arnold that I was convinced that some different mode of procedure—something more defined—should be adopted for the public benefit. Both Mr. Arnold and myself have been of that opinion, but owing to the great delay, and the uncertainty of the means at our command, we could not make any alterations till the commencement of the next year. That certain alterations were necessary in order to define the relative positions of the Minister, the Commissioner, and the Road Superintendent, no one could be more aware of than myself when I first went into office.

6362. You have stated that you acted entirely by the Main Roads Act? I stated that my powers were given by the Main Roads Act.

6363. You have stated that you did not recognize Mr. Arnold as the head of your department, or as the person who is to give you orders—that the Executive Council alone have the power of interfering with or of deposing you? I do not say that I do not recognize him as the head of the department.

6364. As the head of your department? He is the Secretary for Works, and must be the head of the department.

6365. Am I wrong in my assumption that Mr. Arnold has not the power to depose you? I imagine not.

6366. How then can he be the head of the department if he has not that power over his subordinates?

W. R. Collett, subordinates? My friend Lord John Manners was the First Commissioner of Works, Palaces, and Public Buildings, and the other Commissioners were three Cabinet Ministers, but I do not imagine a Sub-Commissioner, even though a Cabinet Minister, can depose the Head Commissioner—it may be a matter of opinion.

Esq.
31 Dec., 1861.

6367. I do not wish to argue with you what Lord John Manners does? I argue from my experience in the Mother Country.

6368. The fact of Lord John Manners being your friend is nothing to do with me, nor I presume, with the Committee. What I want to know is—how it is if Mr. Arnold is the head of your department, that he has not the power, or that you suppose he has not the power, to depose his subordinates? I assume from the Act of Parliament—

6369. Who makes the appointment? The Governor with the advice of the Executive Council.

6370. Who appoints the subordinate officers? The Governor, with the advice of the Executive Council.

6371. So that you, as Commissioner of Roads, have not the appointment of your own subordinates? I have not.

6372. How long have you been in the service? In this Colony?

6373. In this Colony? Eight years the 18th of next month.

6374. Have you filled a similar capacity elsewhere? The capacity of Commissioner?

6375. Either of Commissioner or of road-maker in any way? I am not a road-maker; I am not aware of such a capacity; I am not a road-maker now.

6376. What were you previously, if not a road-maker—a Superintendent? I was Managing Director and Engineer.

6377. Of what? Of twenty-one railways, sundry harbours, roads in South America, Spain, and several other undertakings I can mention.

6378. Then this description of work or superintendence is quite familiar to you? Quite familiar; I have always been accustomed to have engineers and contractors under me.

6379. When did you make the acquaintance or come to the knowledge in any way of Mr. Quodling? I met him once last year, when a short conversation ensued, when he said that I was to mind my own business.

6380. What led to that result? Merely wishing to be on terms with a person of the same capacity as myself—to have a friendly understanding with him.

6381. It was merely an attempt to have a friendly understanding with a brother officer? Yes; our districts meeting; he being at one end and I at the other.

6382. He would not tell you to mind your own business unless something had preceded it? I must beg to inform you that the whole of the Northern Road was under my charge, including his district. I was the Surveyor from Maitland to Armidale for four years, therefore when it was thought fit to appoint two Superintendents, I was naturally inquisitive to know how the engineering works such as those over the Moonby Range would be carried on, and it was no unnatural question to ask him, as he had been appointed Superintendent, how far the improvements had been made.

6383. What led to him telling you to mind your own business? Nothing whatever; it was merely the young gentleman's manner.

6384. He certainly would not have told you to mind your own business without any previous remark from you—were you not telling him how to conduct his own work? I am not aware.

6385. Were you not interfering with the manner in which he was conducting his own work? Certainly not, for the interview took place on my own ground.

6386. You were perhaps on neutral ground—you say you were placed at two extremities of the road? I was at Murrurundi.

6387. This circumstance left an unfavourable impression on your mind with regard to Mr. Quodling? With regard to his manner.

6388. This unfavourable impression must have been left on your mind? I did not consider it worth my notice.

6389. Still, for a matter of trifling moment, you seem to have remembered it a long time? It took place only last year. You asked me when I first became acquainted with Mr. Quodling, and I have stated the circumstances of my first acquaintance.

6390. I asked you in consequence of what you had stated previously—you stated that Mr. Quodling told you to mind your own business—I simply wanted to know what led to that? Nothing led to it that I am aware of.

6391. Had you met with Mr. Quodling since that, before you were placed in power over him as Commissioner? On my first visit to the works I went up to give Mr. Quodling directions.

6392. That was the next interview? The interview did not take place, for Mr. Quodling was absent without leave, and I could not give him directions—he was not to be found.

6393. How long a line of road had Mr. Quodling under his care at this time? I am not aware that he was on his line.

6394. How long was his line? What he called 135 miles.

6395. What do you call it? I call it 121 miles.

6396. Is it in Mr. Quodling's power to call it anything more than it is—is he not told to take charge of a number of miles when he gets instructions? No, he gets no instructions. Previous to the new road being made it was much longer than at present; at present the road is 121 miles 62 chains.

6397. At what part of the road was it you appointed to meet Mr. Quodling? Doughboy Diversion.

6398. How long is Doughboy Diversion? Two miles and a half.

6399. He was not on that two miles and a half—had you sent him a letter to say that you intended to meet him there? I think not.

6400.

6400. He had no idea you would be there to have an interview with him;—are you sure that he was not at the other end of the road, 121 miles away? I was informed that he was at Glen Innes, which he admitted himself. W. R. Collett,
Esq.
6401. At that time were you aware that he was not on some other portion of his road? 31 Dec., 1861.
I presume if he were not there he was somewhere else.
6402. My question is a very simple one:—You state that this gentleman had 121 miles of road under his charge, and that you did not find him on two miles and a half of it; did you presume because he was not on that two miles and a half that he was not on any portion of the road? I do not presume at all—I say Glen Innes is 60 or 70 miles north of his district.
6403. What was he doing at Glen Innes? I am not aware.
6404. Had you any communication with regard to Glen Innes? I spoke to him and said I would not allow it.
6405. Had you any correspondence with him with regard to this visit to Glen Innes, or any letter from him? I said I would not allow him to leave his district.
6406. Was there any correspondence? I had no correspondence with him.
6407. Did he correspond—my question is simple enough? The question is, did I correspond with Mr. Quodling; my answer is, I never corresponded with Mr. Quodling. You do not seem to be aware of our relative positions; there is a certain routine in these matters. Mr. Quodling was reprimanded for being absent.
6408. Had Mr. Quodling any correspondence or directions from the Office, or from any person, officially or semi-officially, with regard to Glen Innes? I am not sure whether the word "Glen Innes" was ever mentioned. He had the reprimand which is before the Committee. When I returned to Sydney I directed a letter to be written to Mr. Quodling, stating that he had no right to be absent from his district. That letter is in evidence, or if not I will produce it.
6409. I am asking you about the time when you missed him from his beat, and when you state he was at Glen Innes—I ask you whether there was any communication made to him that would take him to Glen Innes? I know nothing about Glen Innes except that he told me himself that he was there. I do not know whether that is evidence.
6410. Was there anything in the shape of duty to call him there? Certainly not; as Second Superintendent of the Northern Road it is impossible for a person to do his duty out of his district; he is appointed to a certain district and is to keep there.
6411. Are there any letters in your Office from Capt. Martindale, directing Mr. Quodling to take charge of the Glen Innes Road? No.
6412. Are you certain? I am not.
6413. If there were any directions from Capt. Martindale to that effect, would not that be a reason for his going to Glen Innes? During Capt. Martindale's commissionership—not during mine.
6414. If you had taken no steps to countermand that order would not that be sufficient? If an order had been given it would have some limit, for ———
6415. Give a straightforward answer, and then explain after—that is the usual way? What is the question? (*The Short-hand Writer read the preceding question.*) My answer is, that if an order were given by the previous Commissioner, it would be for a particular time, and for a particular duty. Mr. Quodling was appointed Superintendent of the second district of the Northern Road, and if an order had been given by Captain Martindale that he was always to go to Glen Innes, I should, when I was appointed Commissioner, have given a counter order, that he was not to go; but if this order is in existence, it will be found, I have no doubt, that it refers to a single visit to Glen Innes, at the request of the Magistrates of the place. At all events, he never applied to me for an order, and the moment the affair came to my knowledge he was reprimanded for having been absent without leave.
6416. If leave had been obtained from the former Commissioner, and not cancelled or recalled by you, would Mr. Quodling be doing his duty, or exceeding his duty, by going to Glen Innes? He would be exceeding; for knowing Captain Martindale very well, I feel assured that his leave was only for a specific visit, and not a general leave of absence; so that he would not have been doing his duty.
6417. You reprimanded Mr. Quodling without taking any steps to inform him that he was to discontinue his visits to Glen Innes, or that the leave which had been granted previously, if granted, was withdrawn? I know nothing about the leave. I will make inquiries by the next meeting whether there was anything of the kind. It is very unusual; but I should imagine Mr. Quodling was the person to have produced that letter, if he has it. This order from Captain Martindale could not have existed in 1861.
6418. If the leave had been obtained from Captain Martindale previously, would it not have existed until it had been recalled? I cannot understand leave to a Superintendent to last for ever; it would be necessary for him to be on his own road to send in his fortnightly lists, and he could not have leave for ever and a day.
6419. If he had leave to superintend a certain road I presume that would last till the road was finished? If that were the case; I am not aware of any certain road; besides the road could not be in Glen Innes; it must be from Glen Innes to some other place. I do not know where the money comes from—where it was found; all these things have to be proved. I am quite ignorant of the matter. A great deal will depend upon the dates.
6420. So that the first communication made to Mr. Quodling was to censure him for being absent from Doughboy Hollow? I do not say it was the first; it was one of the earliest.
6421. I understood you it was at your first visit to Doughboy Hollow? At my first visit he was absent.
6422. Immediately on your return you wrote to censure him for being absent? I did.

- W. R. Collett, Esq.
31 Dec., 1861.
6423. Did you go through the entire length of the road Mr. Quodling should have been on at that time? Yes, I suspect I did; I met Mr. Quodling.
6424. Are you sure you did? I met Mr. Quodling at Tamworth, if I recollect right, on his way back from Glen Innes.
6425. Is Tamworth in Mr. Quodling's district? Yes; where he lived.
6426. How far from his work? In the centre of his work.
6427. How long was this after he said he had been at Doughboy Hollow? I do not understand that question.
6428. What day were you at Doughboy Hollow when you found Mr. Quodling absent, to the best of your recollection? The 6th April.
6429. On what day did you meet Mr. Quodling at Tamworth? Probably the 9th or 10th April.
6430. Then you found him in the middle of his line of road? I found him at this place in the middle of his work.
6431. At what time of the day was it—was it in the evening? No.
6432. The morning? The morning.
6433. At what time? There seems to be some discrepancy in the time. I dare say it might be 12 o'clock, if he left Goonoo Goonoo in the morning.
6434. Might it not be possible, if the Superintendent were travelling upon his work, and arrived at Tamworth about that time, that he might stop to dine? It would be very possible for him to dine at any hour.
6435. He has no given hour? I made no rules as to the hour of the Superintendents' dinner; they have to get them when they can.
6436. Seeing that to be the case, he might be requiring necessary refreshment. You seem to lay some stress upon his being in Tamworth? Not the slightest; I simply said he was at Tamworth.
6437. He was then on the line of road? He says he was on his way from Glen Innes. I state that he was not on the works when I went to give him orders.
6438. What date was that? I believe the 6th April.
6439. Did Mr. Quodling accompany you from Doughboy Hollow in April? I am thinking whether he accompanied me to Doughboy Hollow from Tamworth; we went to Armidale together.
6440. This absence was not very important. Did you find fault with Mr. Quodling at that time? Undoubtedly I wrote to him reprimanding him.
6441. When you met him? Yes, in strong language; that is, as strong language as I use to an officer.

APPENDIX.

A.

Telegram from Commissioner for Roads to A. C. Bayley, Fass. 12 December, 1861.

You must entirely use your own discretion. If you come bring all your papers and all my scraps of instructions. Mr. Faunce can take charge on your responsibility.

WILLIAM R. COLLETT.

B.

To W. R. Collett, Esq.,
Commissioner of Roads, &c.

Murrurundi, 29 January, 1861.

Sir,

We the undersigned, inhabitants of Murrurundi and the surrounding district, beg to offer you our congratulations on your appointment to the office of Commissioner of Roads.

We also wish to bear testimony to the able manner in which you have conducted the duties (during a long period) of Superintendent of the Main Northern Road.

While acknowledging your services, we cannot but express our approval of the improvements on the roads and other public works, which have very much tended to the progress of the northern part of the Colony.

In presenting you with this small tribute of our respect, we cannot but regret the temporary loss of your services, and only hope that your successor may be able to perform the many duties incumbent upon him with the same zeal and efficiency.

In taking leave of you (let us hope for a short time only) we respectfully and sincerely wish you and your family health and happiness.

We have, &c.,

Alexander Brodie,
H. Wheeler,

C.

Sir,

Murrurundi, 12 January, 1861.

W. R. Collett,
Esq.

I forward by this day's mail an account of the extra works done on the Murrurundi Gap. In another fortnight the work will be completed and ready for inspection. The gravel I condemned has set very hard, and the traffic does not seem to have any bad effect on it; but of course I cannot say how it will be affected in wet weather. In every other respect he has carried out well, and has always altered everything I have found fault with at once, and if the money that I have already returned for could be paid to him, I do not think it would do any harm. We shall begin pile driving next week at the Murrurundi Bridge; he has a great deal of timber ready on the ground.

31 Dec., 1861.

I have, &c.,

Engineer for Roads,
Sydney.

Enclosed I send you a letter I have received from Mr. Martindale.

D.

THESE Conditions were submitted to the Minister for Works, and approved of by him officially, and independently of the general powers of the Commissioner for Roads, the clauses Nos. 5 and 10 give him the authority to define, alter, and extend contracts as he may think fit.—W. R. C.—24/12/61.

DEPARTMENT OF PUBLIC WORKS.

ROAD BRANCH.

General Conditions of Road Contracts and Taskwork.

1. The works to which these conditions refer, include the supply of all tools, materials, and labor, and everything else requisite to complete the works specified, to the entire satisfaction of the Commissioner and Road Superintendent.
2. The Contractor is on no account to commence any contract without an order in writing, signed by the Road Superintendent; and no claim for work executed without an order will be admitted.
3. Should the Road Superintendent be dissatisfied with the quantity or quality of the work done, or metal delivered by the Contractor, the Commissioner shall have power to annul the Contract, and the Contractor shall forfeit all claim to payment for work done, or material delivered, with which the said Superintendent may be dissatisfied.
4. The Contractor is to afford every facility for the passing of the traffic during the execution of the work, and if necessary, to provide new or keep the existing out-turns in repair, and also to provide proper guards for the drains and water-tables.
5. In case of any defective description or ambiguity in the specification, or in memoranda of Contracts, the explanation given by the Commissioner shall be final and binding on the Contractor.
6. To secure the proper quantity of metal or gravel, it will be measured in heaps before being spread, but it shall be competent for the Road Superintendent to re-measure such metal on the road when spread, should any suspicious of fraud on the part of the Contractor arise.
7. The advantages conferred by the Road Acts for obtaining materials for the Roads will be enjoyed by the Contractor, as the Commissioner's Agent, but the Contractor will be liable for all damages to be paid under said Acts, and he is not to use or to permit such materials to be used for any other purposes than the execution of the work for which he contracts with the Commissioner.
8. The Contractor to be liable to all risks from floods or other accidents during the execution of the works.
9. Payments to be made at least once a month, at the rate of 90 per cent.; the remainder to be paid after the Road Superintendent and overseer shall have certified that the whole of the works have been completed to their satisfaction.
10. In every case the Commissioner reserves the right of executing any greater or less quantity of the work than that mentioned in the specifications, at the Schedule prices, and where the Contract is for a bulk sum, an increase or decrease of the price will be made in proportion.
11. All moneys due on account of Contract will be paid to the credit of Contractor, in Bank of New South Wales, or such other Bank as Contractor may request.
12. All water-tables and side-drains to have a proper fall to outlets and culverts, and new outlet-drains made where directed by the Superintendent.
13. The sides of all cuttings, side-drains, water-tables, &c., to have a slope of at least 1 to 1, except when in rock, or otherwise specified; the sides of embankments to have a slope of $1\frac{1}{2}$ to 1.
14. All measurements will be made by the cubic yard of 27 cubic feet, unless an equivalent in lineal measurements in forming is assented to by the Commissioner and Road Superintendent.
15. The penalty for non-completion of Contract or task within the time mentioned will be strictly enforced by the Commissioner, unless sufficient and satisfactory reasons are shown to the contrary, and an extension of time obtained from him on application through the Road Superintendent.

THURSDAY, 2 JANUARY, 1862.

Present:—

MR. DALGLEISH,		MR. HOSKINS,
MR. GARRETT,		MR. LUCAS,

MR. MARKHAM.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

William Rickford Collett, Esq., Commissioner for Roads, called in and further examined:—

6442. *By Mr. Dalgleish*: Did I understand that you have been Engineer for Railways in Spain and other countries? I stated that I laid out engineering works in Spain and other countries, as managing Director of the Companies.

6443. Not as Engineer? I worked with the Engineers.

6444. I asked you a question, in the beginning of this examination, as to whether you were an Engineer? I say yes; that is what I answered.

W. R. Collett,
Esq.

2 Jan., 1862.

6445.

W. R. Collett, Esq.
2 Jan., 1862.

6445. I think you stated you had been employed on some lines of Railway in Spain and South America—will you mention what lines of Railway you were Engineer for? I was Engineer for no lines of Railway. Before this examination is pursued further, I wish to refer to a statement which has been made, that I am giving my evidence with reluctance.

6446. *By the Chairman:* Where has it been made? In the House of Assembly. It has been stated that I am giving my evidence with reluctance, and that on that account certain facts and deductions cannot be arrived at. I beg leave to deny that statement, and to say that up to the present time, at least, I have been anxious to afford every information in my power; but if I am to be considered as a reluctant witness, the probability is that I shall become a very reluctant one; and before proceeding further, I should wish the Committee to say whether they think there are any grounds for the assertion of which I complain. (*Several members of the Committee individually expressed their dissent from the statement referred to.*) When I was here the last time, I did not press the production or reading of certain papers which I then offered to lay before the Committee; they are, however, papers which I consider bear most particularly on the subject, being reports up to certain dates, which relate not only to the previous state of the contract, but also to its present position; and I would rather abide by written statements than by any oral ones. They are not so long but that they might be read in a few minutes by the Clerk. I was asked whether I had any person to corroborate some statements of mine on certain points, with respect to which you stated that there was a great discrepancy between my evidence and Mr. Quodling's, on which I answered that I had certain reports from certain officers with respect to the contract which were corroborative of my statements. These reports I now wish to hand in, and you may of course afterwards examine these individuals.

6447. I think we put off taking these reports because they were not produced at the time? They were produced at the time, and the question was whether they should be read. I laid them on the table, and it was remarked that they could not be admitted as evidence until they were read, and I deferred the reading of them till your examination was concluded.

6448. We will take them all in by and by—there is no necessity at present? I beg to state that the Committee requested me to produce certain papers to-day. I was told to bring papers which bear on my previous evidence, and I wish to hand them in. Are these to be taken in?

6449. Certainly. We will certainly receive them before you go to-day? Mr. Dalgleish asked me the other day, whether there was any official statement regarding Mr. Quodling going to Glen Innes. In answer to that question I beg to hand in copy of a letter from the Department of Internal Communication, dated 13th December, 1860, and signed "R. Cooper Walker, Chief Clerk." (*The witness handed in the same. Vide Appendix A.*) There was another question also asked, whether there was any official communication from the Office requesting Mr. Bayley to superintend the works at the Gap. I wish now to hand in copy of letter, dated 8th August, 1860, signed by Mr. Bennett, and addressed to Mr. Bayley, and I beg to state that this is the only official document I have in the Office respecting that. (*The witness handed in the same. Vide Appendix B.*) I understand that I am to have an opportunity of putting in the reports and statements before the investigation is concluded.

6450. *By Mr. Dalgleish:* How many officers are there under your supervision? Seven Superintendents—

6451. First or second class? Four first and three second class. Thirteen Overseers, one Chief Clerk, one Engineer for Roads and Bridges, one Assistant Engineer for Bridges, one Draftsman, one Clerk and Accountant, and one Register Clerk.

6452. Which of these officers is next in authority to yourself? On the roads the first class Superintendents are the next, and in the Office the Engineer is the next; but the Engineer, I presume, takes precedence of the Superintendents.

6453. *By Mr. Lucas:* What is the salary of the Engineer? £500.

6454. And he takes precedence of those who are getting £600? There is an allowance to the Engineer for travelling expenses, but the £600 includes all travelling expenses.

6455. *By Mr. Dalgleish:* What are the duties of the Chief Clerk? His duties are to communicate in the name of the Commissioner to the officers generally, to check all the Commissioner's cheques—

6456. In what way does he check the Commissioner's cheques? They are not valid at the bank without his initials.

6457. What is the intention of this initialing by the Chief Clerk? I presume as a double check, and also as a means of registry. It would not be a valid document without it.

6458. Is it a mere matter of form? Certainly not.

6459. Have you any power to compel the Chief Clerk to sign his initials if he should refuse? The Chief Clerk initiates the business—he hands me in the cheques to sign.

6460. In all instances? In all instances, and the check is that if I am in the country and it goes by post, if the cheque were lost with my signature alone, it would not be paid.

6461. But there is no check whatever on the payment itself—We understood him to say, when before the Committee, that you had written certain letters authorizing him to send a cheque for a certain amount without a voucher? Without a certificate from myself.

6462. Without a voucher at all? My letter is the voucher; it is for work done.

6463. Would your letter contain the particulars in order that the Chief Clerk might check it? It would direct a payment in advance when the contract is for a bulk sum; but certainly it would not require in that instance the particulars.

6464. A bulk sum has always reference to a schedule of prices? Tenders are sent in for a bulk sum and for a schedule of prices.

6465. And you can take which you like? I can take which I like, and fall back on the schedule of prices.

6466. Can the contractor fall back on the schedule of prices? Not unless there is extra work done.

6467. And then he can only fall back on the schedule of prices for the extra work? I W. R. Collett, should hesitate in allowing him to do otherwise; I am not quite certain on the legal point; Esq.
I should be sorry to give a very decided opinion; it has never occurred.
6468. Have you ever paid money by telegram to the contractors—by a telegraphic order? 2 Jan., 1862.
I have repeatedly ordered that a cheque should be sent to me to sign; a telegram will not pay a contractor.
6469. Have you never received telegrams from the Superintendents, asking for a remittance, or authorizing a remittance to the contractor? I should imagine not. They would, in the course of office, go to the Chief Clerk; they would hardly come to me; I do not state that I have not received that, but I am not aware of any particular instance. It would be very unusual for a Superintendent to telegraph to me to pay money to a contractor; he would telegraph to the Chief Clerk.
6470. I will admit when I say "you," I mean the department—Would the department attend to a telegram from a Superintendent—purporting to be from a Superintendent—by placing a cheque to the credit of a contractor? Would he be authorized, do you mean?
6471. I say would you do so—If you received a telegram from a Superintendent requesting that a sum of money might be placed to the credit of a contractor, would that telegram be attended to in the Office? Almost invariably. For instance, nearly the whole of the Albury Bridge money was paid in that manner.
6472. What guarantee have you that this telegram is authentic? I have no reason to doubt its authenticity.
6473. How would you know it was authentic? On the same ground as you would say a letter was authentic.
6474. Could not any individual send such a telegram—there would be no initials—nothing to verify it? The telegram in such a case would be from the Superintendent of Roads.
6475. If I knew the name of your Superintendent on the Border, for instance, could I not send a message to the Telegraph Office, requesting that a certain sum should be placed to the credit of a certain person—could not the contractor send this telegram himself? I am perfectly aware it is in the power of everybody to commit felony. Of course it is in the power of any person to send a false telegram, the same as it is to kill a man or burn down a house.
6476. I am simply asking whether you have any means of verifying these telegrams? It would make no difference even if the money were paid into the bank; it could only be paid out on the cheque of the contractor to whose credit it was paid; it would be of no earthly use to any other party. In every case there is an account opened in some bank to the credit of the contractor, and the bank has the contractor's signature, upon which alone the money would be paid out, so that if any person did send a false telegram he would have to commit a double felony, by forging the contractor's signature, before he could gain anything by it. The money is not sent to the contractor; it is paid into the bank, to be drawn on his signature; we send no complete cheques by post.
6477. If a contractor thinks proper he can send down a telegram himself, as if from the Superintendent of Roads, receive £500 to his credit, draw the money out of the bank himself, and decamp, and you might whistle for him? That could not be the case when we receive these fortnightly reports from the Superintendents.
6478. Mr. Shairp says that £500 has frequently been paid by telegraphic order? Frequently.
6479. In this case does it matter whether there are fortnightly or monthly returns—Could not this £500 be appropriated by any person who chose to be dishonest? Mr. Shairp could not have said telegraphic messages from the contractors ever came.
6480. From the Superintendents? From the Superintendents, yes.
6481. In what way would you verify these? By the Superintendent's report that the work is in progress, and so much done. A man cannot send for £500 if he has done no work.
6482. Do you get fortnightly returns from all the Superintendents? It is one of the rules.
6483. I know it is one of the rules, but it seems to me there are a certain number of them you do not put in operation? There may be a flood, or some other cause to delay the Superintendent's report; but it is a rule I very strictly enforce.
6484. So that if you received a telegram, you would think you were perfectly right in transmitting this cheque to the contractor? Paying the cheque to the credit of the contractor at the bank, if the telegram came from the Superintendent.
6485. And you have no means of verifying that this telegram does come from the Superintendent? I am not aware of any.
6486. That is what I wish to know—you might have a private cypher or some precaution? The precaution is this, that if I signed a cheque to an improper person I presume I should be liable for that cheque; I should not foolishly pay away £500 of the public money. If I did I very much question whether I could get it back again.
6487. I understood you to say that the duty of the Chief Clerk was to check the accounts before these accounts were paid, and that is the reason why I have asked about payments by telegram—if there is any possibility of checking vouchers for work done if they are not received, but merely a telegram authorizing the payment of money? On account.
6488. All payments are on account until the work is finished, are they not? No, most of the payments are on "I" form—vouchers for work done and actually measured; it is the exception to pay on account.
6489. Are not all these sums on account of the entire work—although there are vouchers that certain work is performed, the payment is on the whole contract? No, on that particular portion.
6490. And if another portion of the work is not done—say you have paid for metalling, but two or three bridges are not erected—then how would you provide for the construction of these bridges if it should be found there were not sufficient funds in hand to finish, seeing
that

W. B. Collett,
Esq.
2 Jan., 1862.

that they were the most difficult portion of the work? We always keep sufficient money in hand to finish the contract and ten per cent. besides.

6491. I understood you to say these payments were on account? When the contract is for a bulk sum. When it is for a schedule of prices payments are only made for the work done in respect to those prices.

6492. There is a document here in the Appendix to the evidence, marked H—it states, "Specification of work required for Doughboy Diversion"—"General Conditions" it is termed—are these the general conditions of the contract? I do not admit that to be the specification; I must see it first before I admit that. (*Document referred to handed to witness.*) This is not a true copy of the specification.

6493. What part of this is wrong? You have the original specification.

6494. These are the general conditions? They are not the general conditions under which I act. The general conditions I handed in the other day.

6495. Are these the general conditions Mr. Quodling was supplied with? No, I beg to state that Mr. Quodling was not supplied with any conditions except a copy of those I put in yesterday.

6496. There is a letter or communication marked F—"Metal to be put on road half cubic yard to the lineal yard without being measured in heaps, as directed by Mr. Collett. A. C. BAYLEY"—did you direct this to be done in this way? I gave a memorandum to Mr. Bayley to that effect.

6497. That the metal was not to be measured in heaps? Will you tell me the date you refer to, if you please?

6498. The 12th August? I beg to state that the metal had previously been all measured in heaps and certified by Mr. Quodling. If you will have the goodness to refer to that part in the valid document, you will see I have the power to alter the general specifications and conditions.

6499. We will come to that, I have no doubt—what thickness of metal would half a cubic yard to the lineal yard spread over a road 18 feet wide? That depends entirely on whether it is spread uniformly, or whether more is spread in the middle and less at the sides.

6500. Spread either uniformly or with a rise. Give us it uniform, and then we can allow for the rise. Tell us what thickness we should have at the sides and what at the centre, giving the convexity required for the road? That is an impossible question; you assume two things.

6501. I will not assume any? You wish to know how many cubic feet there are in half a cubic yard; $13\frac{1}{2}$ feet.

6502. No, I want to know what thickness of metal it would spread to on one lineal yard 18 feet wide? Three and three-quarters according to specification.

6503. I make out a different result? I understood it was the thickness of metal you required. If the metal is to be spread 9 by 6, I must take the average of $7\frac{1}{2}$.

6504. I am not giving 9 by 6—I simply want to know what thickness of layer the metal would present spread on a level road—spread anywhere—18 feet wide—what thickness of metal should we have—what thickness of a layer? I do not exactly understand the question.

6505. What thickness of metal would half a cubic yard spread over a lineal yard of road 18 feet wide? One lineal yard 18 feet wide.

6506. That is the width of the road—and to spread half a cubic yard on every yard? Does it state 18 feet wide?

6507. Yes, it states 18 feet wide on every description of the road I have seen? If I understood you rightly—the original specification is 9 in the centre and 6 at the sides, giving a mean of $7\frac{1}{2}$; but I am not aware of 18 feet wide—I have only spread it 15 feet wide. If it is 18 feet wide, there are $33\frac{3}{4}$ cubic feet per lineal yard, and half the quantity would be half $33\frac{3}{4}$, or 16 feet $10\frac{1}{2}$ inches.

6508. If I am wrong with respect to the width, perhaps you will state what the width should be. This is what it says:—"The metal to be of the best and hardest available stone—blue columnar basalt—to be broken, &c.,—to be spread to the width of 18 feet, 9 inches deep—in the centre and 6 at the sides?" Well, the average depth of that will be half $7\frac{1}{2}$ — $3\frac{3}{4}$.

6509. Will half a cubic yard to the lineal yard spread metal of that thickness? Undoubtedly; not over 18 feet but over 15 feet, which were my directions; an average only of 3—the same average as the other—half of 9, which is $4\frac{1}{2}$, and half of 6, which is 3, viz., $3\frac{3}{4}$, would give 3 inches, which is the half of 6 inches, which would be the *uniform* depth of metal spread over a road 18 feet by 3 feet from a cubic yard of metal containing 27 cubic feet; whereas a road $18' \times 3' \times 7\frac{1}{2}''$ as per specification, $33\frac{3}{4}$ cubic feet, or $\frac{1}{6}$ more than a cubic yard of 27 feet.

6510. Then you are only going to put it on half the thickness mentioned here? Only half the thickness.

6511. Why reduce it? Because I put 9 inches of pitching underneath it; I increase it instead of reducing it.

6512. 2,800—is that the entire length of road that has to be metalled? No.

6513. What length of road has to be metalled? Any length I specified.

6514. Do you know what length you have specified to be metalled? I know the length I specified to be pitched, and I know the quantity of metal broken, which I directed to be put on as I thought best. It has been half a cubic yard, 15 feet wide, generally speaking, on pitching 18 feet wide. In other places, where it is on rock, there is perhaps less. I cannot say there is any of the best metal placed on rock, for a reason which I gave the other day, for I thought this hard metal on rock would not form a good road. I conceive the 2,800 lineal yards of pitching to be equal to 3,500 cubic yards of metal, and in the original specification the whole quantity of metal was only 3,520 yards. I have in addition made the contractor supply me with 1,000 yards—I might safely say 1,200 yards—of the best broken

broken blue metal, and 1,300 yards of inferior metal, in order to set the pitching, and besides a very large quantity of blinding—in opposition to the original specification of 3,520 cubic yards of metal. W. R. Collett, Esq.

6515. How much do you state Mr. Quodling has certified for? For 1,200 cubic yards of the best metal, which was all that was required. 2 Jan., 1862.

6516. And what was this 1,200 cubic yards to go on? As directed.

6517. I find a letter here, marked D—"Mr. Martindale is to break 1,600 cubic yards of metal, and to pitch 2,800 lineal yards of road, 18 by 9 by 6."—Now this is evidently both to pitch and to metal? Yes.

6518. And to metal at this depth? What depth?

6519. 9 by 6? No; the pitching is 9 by 6, not the metal. The pitching was substituted by me for the original metalling, an equivalent 3,500 yards of pitching to 3,520 yards of metalling in the original contract.

6520. Is it usual to state the size of stone for pitching? The stone is not stated there. It is stated to be 9 inches in the centre and 6 at the sides. That does not imply that the stone is not to be buried that distance in the ground; that is to be the form of road.

6521. That is to say, 3 inches of convexity on the road? Yes, in 18 feet.

6522. And then the metal is to be laid on, half a cubic yard to the lineal yard? Yes. You must be perfectly aware that those are most unofficial documents. They were only given to the person in charge of the works as the only way I could give written orders on the works, because he did not like to take verbal ones; and they really are not documents to bring before any Committee at all. It is very hard for me to be cross-questioned about things which I consider most unofficial—not that I deny the truth of them, although I have never seen them here; they have never been submitted to me to know whether they are my writing; I am perfectly ignorant of them—the same as the letter of Mr. Hannington, which I pronounce to be a most incorrect document. I have not had an opportunity of seeing one of these papers. It would be quite as easy for these papers to be forged as telegrams. However, as I said before, my wish is to give all information.

6523. These 1,600 cubic yards have not been supplied? Yes.

6524. I thought you said 1,200? I say 1,200 were certified by Mr. Quodling, and there have been at least 1,000 cubic yards since—although I do not say there have been 1,000 yards best blue metal.

6525. With regard to 1,600, there is another letter dated 27 June—"The original contract of Mr. Martindale for Doughboy Diversion was signed for £6,379. 1,000 cubic yards of blue metal will be required, cost £235."—Is that an extra? I must call attention to that letter. That is a letter which I wrote for Mr. Bayley to send to me, in order to induce the contractor to accept it, and which the contractor has not accepted.

6526. Would these be extras—these 1,000 yards—would this £235 be in addition to the £6,379? I do not admit that letter to be anything binding on myself or the contractor.

6527. I am not asking about its being binding—Supposing the letter to be acted upon, I wish to know whether the £235 for blue metal would be in addition to the first contract of £6,379? That is a very difficult question. I do not wish to evade it, but the £6,379 being for a bulk sum, it is very difficult for me to answer for any part which is a schedule of price. It is a much more difficult question to answer than you imagine.

6528. Perhaps you will answer it to the best of your ability, and qualify your answer in any way you like? I will answer in so far as what the intention of that letter may be; but you will understand that that letter is no document at all—it is not evidence.

6529. We have it here in evidence? It has been put in for evidence.

6530. It is not for me to judge whether this letter is evidence or not—seeing that it is from the Commissioner of Roads I thought perhaps you would be able to explain as to whether —? I beg your pardon, it is not from me; the letter is signed—"A. C. Bayley."

6531. "I hold Mr. Collett's original letter, which this is a fair copy—A. C. Bayley?" Mr. Bayley had better produce that letter. It cannot be in evidence till you have my letter; it is not my letter at present; besides if it were, it is only with reference to an endeavour to induce the contractor to consent to it.

6532. You spoke of this letter several times when Mr. Forster was asking you questions, and you have already admitted the letter? I admit the letter to a certain point; but when the whole sense may depend upon a single word surely you will not take it and judge.

6533. I do not judge you at all? Or argue —

6534. Nor yet argue. I simply ask whether you will answer the question? Let us have the question; I dare say I shall.

6535. Is the £235 for 1,000 cubic yards blue metal extra to the contract price of £6,379? Do you ask as to the extra quantity or the extra price?—You are mixing up the metal and the price together.

6536. The metal and the price are here together. "1,000 cubic yards of blue metal will be required, cost £235"—? You can ask whether that is in excess of the original contract.

6537. "The original contract of Mr. Martindale for the Doughboy Diversion was signed for £6,379"—Now here is the statement—"1,000 cubic yards of blue metal will be required, cost £235." I ask is that £235 in addition to the contract—is it supplementary to the contract? Of course it is supplementary to the contract.

6538. It is extra? No, it is supplementary to the contract; that is a very different word to being extra to the contract. The previous contract was altered from metal to pitching. The original contract is altered; 3,500 cubic yards of pitching are substituted for 3,520 cubic yards of metal. You ask whether it is supplementary; I say it is supplementary, not extra. 6539. Will you define what you mean by supplementary? It means that so much metal is so much added to the contract, the previous metal having been substituted by the pitching.

- W. R. Collett, Esq.
2 Jan., 1862.
6540. The consequence is that there is no metal to put on the top of the pitching—£6,379 is expended and no blue metal is provided? Not under the altered contract, I conceive.
6541. £6,379 is expended, and the length of road that should have been metalled has been pitched? The quantity of pitching is equivalent to the length of metalling. The former metal did not supply the whole length of road. The former metalling of 3,520 yards is not the whole length of this contract; the length of the contract is 199 chains; that will be 4,378 yards—199 chains multiplied by 22.
6542. Was the whole length of the road originally to have had a coating of broken metal 9 inches in the centre and 6 inches at each side? No.
6543. Then how was the road to be formed originally? A great portion of it was through solid rock, which certainly does not require a coating of metal.
6544. Does the solid rock require a coating of anything? I think it does, of what we call blinding or inferior metal.
6545. In this city, and other places I am acquainted with, we are in the habit of serving the solid rock the same as other parts of the road. That has nothing to do with your practice? Not with my practice.
6546. How much solid rock is there in the cutting for a floor? What length?
6547. Yes, what length? I cannot tell the length. I can tell the quantity of solid rock taken out if that will be any guide.
6548. It will be no guide for this purpose. Is it information you can obtain? We should still have to fall back on the question what solid rock is.
6549. What I want is to know how much floor of solid rock there is? We must decide, the same as in a railway cutting, what solid rock is, before I can answer the question. Some kinds of shale are called solid rock, others are not.
6550. I am perfectly willing to call that vitrified shale solid rock? I do not call it vitrified shale.
6551. What do you call it? Stratified sandstone which has been under fire. This question of yours revives the old question of the Sydney sewerage, where the dispute was what was rock and what was not rock. The question involves geological discussion. The quantity of rock excavated is 3,289 cubic yards.
6552. Do you remember what quantity of metal would have been required to have given a coating to such portions of the road as it was necessary to cut, and which I presume we have a clue to here, namely, 2,800 lineal yards—would that have been the quantity that would have originally —? That is the quantity of ground which required pitching.
6553. So this is the quantity of ground that was pitched? That is the quantity of ground that was pitched.
6554. And I find this is put down as an extra afterwards—for instance, pitching at 6s. 6d. a yard? Per lineal yard.
6555. And you have stated previously that the pitching was paid for by the substitution of pitching for broken metal—how was that? Because the prices were the same.
6556. Here is an extra—2,800 lineal yards—on which pitching is charged extra? I am not aware of any extras.
6557. "And to pitch 2,800 lineal yards of road" —? Instead of metalling in the original contract.
6558. It does not say instead of metalling? I do not know what document you have got. It was instead of metalling.
6559. Here is on the same paper 1,600 cubic yards of metal? Granted—which we have got; it has all been delivered and laid down.
6560. How is it it is put down here as an extra, when you have stated previously that pitching was substituted for the metal. If it was substituted for metal I presume the price for metal was paid for pitching? Assuredly.
6561. And at this particular time, on the 27th June, the pitching was completed? Oh! no.
6562. The original contract of Mr. Martindale for the Doughboy Diversion was £6,379? Granted.
6563. Here is an extra, or as you call it, supplementary 1,000 yards of metal, provided for as extra? Because we wanted some metal; we were left without any metal before.
6564. There are some portions of the road now where there is only pitching? No, 1,300 yards of inferior metal have been used as blinding, and besides we have actually put on 1,000 cubic yards—I believe it is really 1,200 cubic yards—of blue metal.

APPENDIX.

A.

Department of Internal Communication,
Road Branch,

Sydney, 13 December, 1860.

(No. 60/1345.)

Sir,

In reference to your letter of the 1st instant, enclosing a communication from the Bench of Magistrates, Armidale, requesting you to inspect and report on the Road from Armidale to Teunterfield,— I am directed by the Commissioner for Roads to state there is no objection to your complying with their request, provided it does not interfere with your proper duties; and you will not be entitled to any remuneration beyond the allowance for expenses actually incurred, to be defrayed by the Bench of Magistrates.

R. Quodling, Esq.,
Tamworth.

I have, &c.,

R. COOPER WALKER,
Chief Clerk.

B.

B.

Road Engineer's Office,
Sydney, 8 August, 1860.

W. R. Collett,
Esq.

2 Jan., 1862.

My dear Sir,

I have received your note of the 6th. I have already instructed as to Murrurundi Gap and Bridge. You had better alter figures in section sent yesterday, at 75 chains; I omitted to do so; they were changed on old tracing; if you have any difficulty as to disposal you had better at once acquaint me with it. Pray push bridge works as rapidly as possible.

If you cannot get Miller to give you an answer about Sandy Creek, and Martindale gives a fair tender, let him do it.

You will not have to go to Fallbrook to get vouchers signed; I will arrange that with Walker.

Faithfully yours,

WILLIAM C. BENNETT.

A. C. Bayley, Esq.,
Murrurundi.

Mr. Alexander Charles Bayley called in and examined:—

6565. *By the Chairman*: You are aware what this Committee is inquiring into? I believe so—the carrying on of the works on the Northern Road. Mr. Alex. C. Bayley.
6566. Where are you employed now? At Yass, superintending a bridge.
6567. What do you call yourself—a Superintendent of Roads? A Superintendent of Bridges. 2 Jan., 1862.
6568. Have you nothing to do with roads? No.
6569. You were at one time employed in the Northern District? Yes, nearly two years and a half; from the 17th March, 1859, up to the 20th August, 1861.
6570. What was your office then? I was a Superintendent of Bridges, and carrying out the new diversions—the roads.
6571. That implied the superintendence of the roads personally too? Yes.
6572. What was the special work you were employed upon? I was on the Murrurundi Gap, the Doughboy Diversion, and at Fallbrook Bridge.
6573. What was the whole length of road placed under you? From Fallbrook to the end of the Doughboy—about sixty-seven miles.
6574. You had the bridges and part of the road? Yes.
6575. You were then Superintendent of Roads and Bridges? I had not the title of Superintendent of Roads, only Superintendent of Bridges.
6576. Who was your superior officer? At first Mr. Bennett, and then the present Commissioner for Roads, Mr. Collett.
6577. Was that the first time of your appointment as Superintendent? I was Superintendent at Moreton Bay before.
6578. You were acquainted with the duties of Superintendent? Yes.
6579. Can you state succinctly what are the duties of a Superintendent? To see works carried out according to the specifications.
6580. Then in all cases the duties of a Superintendent are referable to the specifications—are his duties defined by the specifications? They are.
6581. He could not perform his duties without the specifications? No.
6582. In all cases, then, the specifications are placed in his hands? Yes.
6583. And sometimes plans too? Sometimes plans too.
6584. The plans and specifications together constitute his instructions? Yes.
6585. Does he get any other instructions? Yes, from time to time, if any alteration is requisite.
6586. Were you instructed in what your general duties were? Yes, to carry out the specifications; and if there were any particular alterations a memorandum was made.
6587. It was in writing always? Yes.
6588. You have been generally very particular in having your instructions in writing? Yes, I always had them in writing.
6589. What were your instructions in regard to the Doughboy Diversion—was there anything special? Nothing special; I was to carry it out according to contract.
6590. Were you not joined with Mr. Quodling there? Yes, for a time; but first of all I had it for one month before Mr. Quodling had it.
6591. Had you the whole work under you? Yes.
6592. When Mr. Quodling came —? We made the measurements, and I gave up the whole of the works to him.
6593. Who ordered you to give up the whole diversion to him? I only took them as a special favor to Mr. Collett, the Commissioner, for that month, because Mr. Quodling was not there.
6594. Then they were properly Mr. Quodling's duty? Yes.
6595. Not properly yours? Not mine.
6596. You had the charge for a month before Mr. Quodling came? Yes.
6597. In fact you were acting for him? Yes.
6598. And after he came you were acting with him? No, not with him; then I received instructions to take the bridges in the Doughboy Diversion.
6599. What was properly under his charge? The earth-works.
6600. Only? Only.
6601. That included the making of the roads? Yes, metalling and pitching.
6602. And the construction of the roads? Yes.
6603. All except the bridges? All except the bridges.

- Mr. Alex. C. Bayley.
 2 Jan., 1862.
6604. He had nothing to do with the bridges? No.
6605. In that case your duties were not joined with his—they were separate, I presume? Quite separate.
6606. He was not over you, nor were you over him? No.
6607. You were both equal rank, and in charge of different portions of the work? Yes.
6608. Were you always on good terms with Mr. Quodling? Yes.
6609. You had no complaint to make of him? No.
6610. Had you any opportunity of seeing in what way his work was performed? Yes.
6611. Do you consider yourself qualified to speak on the subject? Yes. So far as I could judge it was carried out properly.
6612. Do you think he was a qualified person? Yes.
6613. Was he educated up to his duties? Yes.
6614. You think he had a thorough knowledge of his work theoretically? Yes.
6615. And that he was a practical and good officer? Yes.
6616. Do you know of any complaints being made against him? No.
6617. Did no man under him complain? No.
6618. What should you say as to his qualifications for managing men? I should think he could manage men very well, from the time he was on railways with Mr. Gibbons.
6619. He could make his men work and keep them in good humour all the time? I think so.
6620. Do you think the works were carried on well under him by the contractor? They were only for a very short time under him on the Doughboy; I then resumed again the whole of the works.
6621. How was that? I received instructions to take the whole of the works.
6622. How long was it that Mr. Quodling had the separate charge till you got them again? About a week; and then I had the bridges for I think two months alone, and then I had to resume the whole of it.
6623. After Mr. Quodling had been there a week you got the entire charge of the Doughboy works again? Not after one week; after Mr. Quodling had been about two months in charge of the earth-works, then I had instructions to take the whole line again.
6624. Earth-works and all? Yes.
6625. And you carried them out then? Up to the 12th August.
6626. Did you hear any reason for this? No, only that Mr. Quodling had so much work to the north that he could not attend to this, being at the end of his line.
6627. Had you any reason to believe it was on account of his incompetency? No, not at all.
6628. Simply because he had too much other work? Yes.
6629. Then all that Mr. Quodling had to do with it was that for two months he had charge of the earth-works? Yes.
6630. When you took charge of the earth-works, what was your opinion of the way in which they were being carried out by the contractor? I thought they were being carried out properly.
6631. Had you any reason to complain of the contractor, either as to the earth-works or the bridges? He was delaying the work a good deal; it was not going on as quickly as it ought.
6632. Was it otherwise well done? Yes.
6633. Were the bridges being done well, according to specification? Yes; there was hardly any done when I gave it up; all that has been done since.
6634. But the earth-work — ? The earth-work was in course of completion, but the embankments were not consolidated when I left.
6635. Had you anything to do with consolidation? The contractor was bound to make them up to a certain height after they had sunk.
6636. Was not that struck out of the contract? No, there was nothing struck out that I am aware of.
6637. You were ordered to see that the road was consolidated before the metal was put on? Yes.
6638. Was there any pitching put on? Yes.
6639. Was that an alteration? Yes.
6640. Was it supplementary to the contract? No; instead of having the full quantity of metal broken, it was to be half pitched.
6641. That was done by the authority of the Commissioner? Yes.
6642. He has full authority to make such an alteration? Yes.
6643. Have you known such things done before? Yes.
6644. Did you consider this an improvement? Yes.
6645. Was it done properly by the contractor? It was not finished when I left.
6646. You saw nothing to induce you to believe that the contractor was performing the work badly? No, not that it could not be finished properly; it was in an unfinished state.
6647. Who was overseer under you? I had no overseer; I never had one.
6648. Where was Mr. Hannington then? Mr. Hannington was not there.
6649. You were doing the work of Superintendent and overseer? Everything—I always do.
6650. Can you do without overseers? Yes.
6651. They are unnecessary then? They were unnecessary to me, because I never had so much work that I could not look after it myself.
6652. Could other Superintendents do the same? No, not where they have 120 miles of road.
6653. It depends on the extent of road? Yes.
6654. In some cases they can do without, where the line is short? Yes.
6655. Did Mr. Collett visit you much while you were at these works? Three or four times.
6656. Did he pay great attention to the way the works were being done? Yes, he came over and examined them.

6657. Did you hear from Mr. Collett any complaints against Mr. Quodling? No.
6658. Did he complain against you in any way? Not that I know of; I never heard it.
6659. Did Mr. Collett give you, from time to time, any instructions to vary the work? Yes, a few instructions of no importance.
6660. In what shape? Written authorities. I can show you them. There is nothing particular in them. (*The witness produced a memorandum book and pointed to certain entries therein.*)
6661. *By Mr. Dalgleish:* Whose writing is this (*referring to a particular memorandum*)? That is Mr. Collett's writing.
6662. Do you wish to hand them in? There is nothing of consequence in them. Only, three piles to be substituted instead of four, sawn planking to be substituted for slabs in one of the bridges, and so on.
6663. *By the Chairman:* I think we have copies of these already. Direct your attention to the Appendix to the printed evidence of Mr. Quodling, given on the 4th December, beginning with the first document that bears any reference to what we are talking about, marked C, I think,—is that an authentic document? Yes, this is correct.
6664. *By Mr. Dalgleish:* Have you the original of that letter? Yes.
6665. Can you hand it in? Yes. (*The witness handed in the same.*)
6666. *By the Chairman:* That was the letter you wrote according to Mr. Collett's instructions? Yes.
6667. There are two or three documents following that—are those also true copies? I sent in the section as directed in this marked D. I received instructions to make the section, but not the estimate; I never made the estimate for that line to join Doughboy Rise Bridge.
6668. Then it is not correct? It is not correct as regards the estimate; I never made any estimate as regards that; I made the sections in the Office, but I never made any estimate.
6669. *By Mr. Dalgleish:* Did you send a letter to the Office? Yes, I sent a letter to the Office with the section.
6670. *By the Chairman:* There are some others there? I do not see any other letter in this.
6671. At all events these exemplify sufficiently the sort of instructions you got from Mr. Collett at different times? Yes.
6672. This is, I suppose, the greatest approach to regularity it is possible to make in visiting works in that way? Yes, I think this is right.
6673. You were satisfied with these instructions? I was satisfied.
6674. Have you any reason to complain of Mr. Collett's conduct to you in any way? No.
6675. Were you aware that he was on bad terms with Mr. Quodling? No; the last time I saw Mr. Collett and Mr. Quodling together I saw them shake hands when they met.
6676. Was Mr. Quodling's conduct at any time disrespectful or improper towards Mr. Collett? Not to my knowledge.
6677. Do you know whether Mr. Quodling had any ill will against Mr. Collett? No, I do not know that he had any.
6678. Did you ever hear whether Mr. Quodling was charged with intemperate habits? No, I never saw Mr. Quodling the worse for liquor.
6679. Did you never hear that he was charged at all with it? No.
6680. Did you ever hear Mr. Collett complain of him in that respect? Never.
6681. I think you said Mr. Collett made no complaints to you about Mr. Quodling? Not to me.
6682. What is your opinion of Mr. Martindale as a contractor—did he carry out the works fairly? He required a good deal of looking after.
6683. Do you think that if not looked after he was inclined to slur over the work? I think so.
6684. I suppose you gave him no chance? No.
6685. Then the works were well done as far as you could judge? Yes.
6686. Were there any particular defects in the Doughboy Diversion works? No, I do not know that I could point out any.
6687. Was the fencing good? There was no fencing done. There is an order here (*referring to memorandum book*) about the fencing—"Let no more fencing be put up until further orders." There was none at the time put up.
6688. It was not unusual to give this sort of instructions to Superintendents? No. Of course there were certain places on the diversion that required fencing, but I do not know whether there was enough split to do that.
6689. Do you know anything of the character of the slabs in the bridges? They are stringy-bark.
6690. Sawn or split? Split.
6691. Was not that an alteration of the contract? No, they were to be split.
6692. Were they to be tarred and spiked? Yes.
6693. Were they tarred and spiked according to specification? They were where I was.
6694. In fact, you saw the specification carried out? As far as I was concerned it was.
6695. What about the Murrurundi Gap—were those works carried out correctly? No.
6696. Who was the contractor? Mr. Martindale.
6697. What was the objection there? The gravel.
6698. In what respect? I condemned it.
6699. Was he bound to furnish gravel? Yes.
6700. And he furnished a bad kind? Yes.
6701. In what respect was it bad? I did not consider it gravel at all.
6702. What was it? A kind of loam; burnt stuff, white.
6703. A kind of ironstone? No, what gravel was in it was quartz—quartz pebbles.

Mr. Alex. C.
Bayley.

2 Jan., 1862.

- Mr. Alex. C. Bayley.
2 Jan., 1862.
6704. What was the result of your condemning it? Mr. Bennett approved of my condemning it, and wrote a letter to Mr. Martindale to say it was to be removed.
6705. Was it removed? No.
6706. Does it remain there still? It is there now, I believe.
6707. By whose authority was your condemnation of it set aside? The present Commissioner for Roads.
6708. The Commissioner for Roads, after you and Mr. Bennett had condemned it, allowed it to remain? Yes.
6709. Did you think that was right? I did not.
6710. Did you make any report about it? There was no one to report to; the Commissioner himself is the head of the department.
6711. What has been the effect upon the road? It has been impassable in wet weather.
6712. Was the report of your condemnation of it made to Mr. Collett? No, to Mr. Bennett, the Engineer for Roads.
6713. How came it that Mr. Collett allowed it to remain—did he inspect it himself? Yes.
6714. And he passed it, notwithstanding your condemnation? Yes.
6715. Was Mr. Martindale a great friend of Mr. Collett's? I have seen them a good deal together.
6716. What was your opinion of the passing of this—did you think it a great error of judgment in Mr. Collett? Yes, I did.
6717. Are you aware whether that piece of road has been repaired since? I am not aware whether it has been taken up or not.
6718. Can you state what was the loss to the public, or the profit to the contractor, on the substitution of this improper material for the gravel he was bound to furnish—in round numbers? I can hardly tell. It would not have paid him to put on the proper gravel; it would have cost him more than he was getting—I suppose about 1s. 6d. a-yard beyond his contract price.
6719. What did he save himself—£300 or £400? Oh! no; it was only a short distance.
6720. What amount then? I do not know what amount—about 2s. a-yard.
6721. What would that be in round numbers? I never calculated it.
6722. *By Mr. Dalgleish*: How many yards was it? There were about 10 chains in the piece.
6723. 220 yards? Yes.
6724. *By the Chairman*: Is that the only instance in which you had to condemn works in the Northern District? I have condemned them, and had them carried out according to my orders.
6725. Have you often had to condemn Mr. Martindale's work? Not very often, only trifling things.
6726. You know a place called the new cutting? That is the place we have just been speaking of at Murrurundi Gap.
6727. Then I suppose you would not be at all surprised to hear that gentlemen riding over this road, after some rain, had sunk down to their horses' knees? No, I should not, in this place.
6728. And that bullock drays had found it impossible to go up? They went round it.
6729. Do you think this was directly in consequence of the error you have pointed out? Directly.
6730. You went away soon after this? No, I was there all the time it was bad. I condemned this in December, 1860.
6731. Did you ever hear Mr. Collett explain how he came to adopt a different opinion? He said he thought there was a good deal of lime in it, and that it would bind.
6732. But experience proved that he was wrong? Yes.
6733. Have you known Mr. Collett often to make mistakes of that kind? I have seen a good deal of bad road.
6734. What is your opinion of the way in which contracts were generally carried out in the Northern District—do you think the roads were as much improved as they ought to have been, looking to the money spent on them? No, I think not.
6735. You think more might have been done with the money? I do.
6736. Can you point out any other cases where there was a glaring failure of contract on the part of the contractor? No; I know several contracts where the gravel has been very bad.
6737. Do you know in regard to the Doughboy Diversion, whether a sufficient quantity of metal was put on? I could not tell; I was not there long enough for that.
6738. Do you know any instance where, when the metal contracted for was the best blue metal, an inferior kind was substituted? No.
6739. Will you look at those two stones on the table—what do you call that (*a piece of stone taken in hand by the witness*)? That is shale.
6740. You call that shale? Yes.
6741. It is not common shale? No, not common shale, but still it is not good stone.
6742. What is there peculiar about it? I think it would exfoliate so much.
6743. Has it been burned? I do not know.
6744. You would not call it sandstone? No, I do not think it is sandstone.
6745. What would be the effect if that were put upon a road? I think it would pound up and go into earth again.
6746. It would be useless altogether then? I should say it would, to be worked upon; it might do for footing.
6747. Do you think these would be useful stones, mixed with hard metal, to go into the interstices? No.

6748. You understand the term "blinding," I presume? Yes.
6749. Is that good metal for blinding? I would sooner put clay for blinding than this—a small quantity.
6750. Do you think rain would have any effect upon that? I think so.
6751. Do you think if that were put into water it would soak up the moisture and become soft? It must have air too.
6752. Under water it would remain as it is? Yes.
6753. Exposed to air and moisture it would moulder away? Yes.
6754. Is not that the effect on most rocks—does not trap itself become disintegrated by exposure in that way? To a certain extent it does, but not so quickly.
6755. Is the other piece of stone before you the best metal? Not the best.
6756. Is it good? I think it very good stone.
6757. Is that the kind on the Liverpool Range? No, on the Liverpool Range it is bluer than that.
6758. Do you know whether that stone is like that on the Doughboy Diversion? Some of it is like this.
6759. Should you say it came from the Doughboy Diversion? I have seen stone like it there.
6760. You sent to me, as Chairman of this Committee, a letter from Mr. Collett suggesting to you that we had no power to make you attend here? I did.
6761. What was the object of that letter, do you think—did you judge from that, that it was not wished you should attend? I did not think anything about it at the time; I answered it, and thought I should get permission to come down.
6762. You did not consider it a private letter? Not after my telegrams were not answered; I considered I was justified in making it a public matter.
6763. Did you observe the use of the word "treachery" in that letter? Yes.
6764. What is the meaning of that, do you know? A person that has betrayed a secret, or something like that.
6765. Are you aware of any secrets in the department that it would not be expedient to divulge to the public? No, I have no secrets.
6766. Have you ever heard of there being secrets in the department that ought not to be mentioned? No.
6767. Did you get leave to come to this Committee? I considered that so far I had leave, as Mr. Arnold, the Minister for Works, was one of the Committee, and therefore that I received the summons through him.
6768. You have not had any conversation with Mr. Quodling about what you were likely to be asked before this Committee? No, nothing at all.
6769. You have had no suggestions from him? No.
6770. Nor from Mr. Collett either? No, I have not seen Mr. Collett till I came to this room.
6771. Have you not been to Murrurundi since you left Yass? Yes.
6772. Was that on public business? Yes.
6773. Did you report to the department when you came down? Yes, to the Engineer for Roads, Mr. Beazley.
6774. What duties does the Engineer for Roads perform, as regards roads placed under his superintendence? I have never seen the present Engineer for Roads on the works, except when I went to Yass.
6775. Do you think he is of any use at all then? I think he is the principal person.
6776. Did he ever visit you when you were Superintendent? Mr. Bennett did.
6777. Since Mr. Bennett resigned, Mr. Beazley did not? No, Mr. Collett always came upon the Northern Road.
6778. Do you think there is an absolute necessity for all these different officers—Commissioner, Engineer, Superintendents, and overseers—do you think them all necessary? I do.
6779. In what gradations are they placed—the overseers under the Superintendents? Yes.
6780. And the Superintendents under the Engineer? Yes.
6781. And the Engineer under the Commissioner? Yes.
6782. Would you take orders from the Engineer—would you feel bound to obey him? I should.
6783. Supposing they differed from those of the Commissioner, which would you obey? I should obey the Commissioner.
6784. Did you ever get any orders from the Minister of Works? Never.
6785. Do you know whether he interferes at all in your department? I do not; I never received any instructions from him.
6786. In regard to vouching for the payment of money, has it been your practice, as Superintendent of Roads, to give certificates for certain work done before payment of money was made? I measured, and sent in returns to the Office.
6787. What are called vouchers? What are called vouchers.
6788. Is it usual to make payments to a contractor without the vouchers of the Superintendent? No, it is not.
6789. Have you ever known it in your case? I have heard it.
6790. Did you ever know, in your own case, of any payments being made without your vouchers? I have only heard such was the case.
6791. Would you consider it irregular to do so? Certainly.
6792. You think your vouchers were necessary to make the payments regular? I think so.
6793. Has not the Commissioner for Roads a power to authorize payments without vouchers? I do not think he has.

Mr. Alex. C.
Bayley.
2 Jan., 1862.

- Mr. Alex. C. Bayley.
2 Jan., 1862.
6794. If he has, do you think he ought to do it? I do not.
6795. Is the overseer's voucher also necessary with the Superintendent's? Yes.
6796. You think no payments should be made without the two? Yes, where there are a Superintendent and overseer.
6797. Did you ever hear of any irregularity of this kind with regard to other Superintendents? No, I never heard any.
6798. Were there any payments made, with regard to the works under your charge in the Northern District, in excess of the sum properly due for work done, including the per-centage withheld? I do not know.
6799. Have you any reason to believe it? I had to make a payment once that I did not know anything about.
6800. You had to make a payment? I had to send in a voucher.
6801. You sent in a voucher —? On the authority of Mr. Collett.
6802. You were ordered to send in a voucher? Yes, here is the authority. (*The witness handed in a memorandum on a slip of paper. Vide Appendix.*)
6803. Then, in fact, you vouched for something you did not know anything of at all? I received directions to vouch for £600, of which I knew nothing at all.
6804. What is the meaning of this, that you were to vouch that £600 was due? I never vouched for anything.
6805. What sort of a voucher did you send? I sent in an advance on account of contract, for £600.
6806. Did you make any reference to the works at all? I did not make any reference to the work—I had nothing to do with it; the contract was under Mr. Quodling, who was not there then.
6807. This is made contingent on Mr. Quodling not sending in returns—do you know whether Mr. Quodling did send in returns? I did not get the information at the time, but I believe Mr. Quodling did send in for £200 at the same time as that.
6808. Was it your duty as Superintendent to order money to be paid without any knowledge of what it was being paid for? No, that was not my duty, and that was the reason why I would not do it without that memo. from Mr. Collett.
6809. Even with this:—Supposing Mr. Collett had ordered you to pay away money belonging to somebody else, would you have done it? No. I thought there was a good deal of work done that had not been paid for.
6810. If you did not know anything about the work, was it not ordering —? I was on the same work as that was paid on.
6811. You did not know it was done? I believed there was a sufficient quantity of work done.
6812. What grounds had you for believing that? From seeing the work, and knowing when the last payment was made.
6813. *By Mr. Hoskins*: What made you refuse to sign the voucher without that memorandum? Because I was not in charge.
6814. *By the Chairman*: What was the use of your voucher at all? It was so far of use that the money was paid upon it.
6815. Did you not think it looked like a fictitious document—you say you were not in charge? I was in charge of part of the works.
6816. You were not in charge of the work you certified for? I did not certify for any work; I certified for money on account.
6817. Was it your duty to certify for these works? No. I thought it was helping the contractor, when the proper Superintendent was not there to make the measurements.
6818. Now did you think this was a fair transaction? No, I did not; I would not have asked for that paper if I had thought so.
6819. In fact you thought you were giving your authority to a fictitious document, on the authority of the Commissioner? No; I did not think it was a fictitious document, because I thought the work was done.
6820. I do not mean to say that the Commissioner was not cognizant of the work being done —? As it was necessary that some one should sign it, I did so, believing sufficient work to be done, but I wanted an authority from the Commissioner, as that particular part of the work was not in my charge.
6821. If you were not in charge of the works, I want to know how your signature was of any value? I was not in charge of the Doughboy Diversion, but I was authorized to come in charge by that document; I had been on the work before that document.
6822. *By Mr. Hoskins*: You were not authorized to take charge of the work or sign vouchers previous to receiving that? I always signed the vouchers for the bridge works.
6823. *By the Chairman*: Was this the last voucher you forwarded? No; I forwarded vouchers afterwards.
6824. What was the amount of the last voucher that you forwarded, and the date of it? I will not be quite certain from this book (*referring to a memorandum book*), but I think £98 4s.
6825. And what was the date? August 9, 1861.
6826. Were you aware when you vouched for this, that a sum of £500 had been paid previously, or was it the case? Not that I knew of; I knew nothing about that.
6827. Do you know whether the amount of money that you vouched for in these different ways was in excess of the work done? No; I know all that I vouched for was actually done.
6828. With the exception of this? That I do not know positively.
6829. You signed the voucher that you signed in consequence of this, as ordered by the Commissioner? Yes.
- 6830.

6830. And I suppose if it had been for ever so large an amount, and you in still greater ignorance of the facts, you would have signed anything under these orders? No, I should not. Mr. Alex. C. Bayley.
6831. How came you to do it? Because I thought there was that amount of work done. 2 Jan., 1862.
6832. In fact, you took the Commissioner's authority as your guarantee? Yes; knowing at the same time that sufficient work was done.
6833. Was it properly done—was it done in a way that was unobjectionable? I believe so.
6834. *By Mr. Hoskins*: How did you know it was done—did you measure it? No.
6835. *By the Chairman*: If you had got a document of this kind to sign in regard to the work at Murrurundi Gap, which you condemned, would you have signed it then? No; I would not have signed the voucher for my own work without I had measured it, if I had got any authority.
6836. Was the money paid on Murrurundi Gap after you condemned it? I believe it was.
6837. Who vouched then for that? I suppose I did afterwards, in a lump sum.
6838. After condemning it you vouched for it? I vouched for the completion of the contract.
6839. In so vouching, did you not imply that it was properly done? There was my letter to shew I had condemned it, in the Office.
6840. Was it not your duty to deduct for this part of the work that was not done properly? It was not my duty to go in the teeth of the person considered more competent to be at the head of the department than I am.
6841. You considered that Mr. Collett having passed this work, you had nothing more to do with it—that you were bound to vouch? Yes.
6842. Did you ever vouch under protest? No, I never did.
6843. *By Mr. Hoskins*: Did you ever actually see that the amount of work for which that voucher was signed had been performed? I could see that sufficient work had been done.
6844. I thought you never signed a voucher without you measured the work? My own work.
6845. *By the Chairman*: You did not measure in that case? I did not.
6846. Do you know whether any one measured? No.
6847. Do you know whether Mr. Collett measured? No.
6848. Do you think Mr. Quodling measured it? I do not know.
6849. Were you not aware at the time that Mr. Quodling had objected? I was not aware.
6850. Supposing you had been aware that he had objected, would you have vouched? I would not have vouched if I had known Mr. Quodling had refused.
6851. Would you not say this money was improperly paid now, knowing the circumstances? I think it was irregular.
6852. *By Mr. Hoskins*: Do you not think it was a deviation from the original contract for you to sign without being aware of the work performed? I think it was.
6853. You did not actually know whether one-fourth of it had been performed? I knew there had been.
6854. How did you know? I could tell by looking at the work.
6855. You said you were not in charge? I was on the work every day, although I was not in charge of that.
6856. Did you consider it your duty to certify for work of which you had not charge? I did not certify for any work being done, only for £600 on account of the contract.
6857. Was it not for work performed? I suppose that was it; I did not send in any certificate for so many yards being done.
6858. Have you ever certified that money should be paid to the contractor unless you felt convinced the work had been performed? No.
6859. Except that once? This is the only case.
6860. *By Mr. Dalgleish*: Have you any knowledge of what these papers are (*referring to the bond, specification, &c. of the Doughboy Diversion*)? That is the specification for the Doughboy Diversion. These are the ones that were signed, and that is my signature.
6861. You have read this? Yes.
6862. Were you furnished with a copy? Yes.
6863. Is this the copy you were furnished with (*referring to copy handed in by Mr. Quodling on a previous day*)? Yes, this is it.
6864. Everything contained in that contract you would consider yourself bound by in carrying out the works? I should.
6865. And you would take it for granted that this was a correct copy, an official copy, of the original? Yes. There were some alterations made in this.
6866. The original? Yes.
6867. Were these alterations made before or after this copy was given to you? After I received that copy.
6868. Were you notified of the changes in the contract? No, I only saw these signed, and these were taken away at the time.
6869. You are aware that changes were made in the original document? Yes. The only changes that were put in at the time this was signed was about the Commissioner instead of the Engineer for Roads.
6870. Was that carried out in this? No, that was not carried out.
6871. With that exception is this correct? Yes.
6872. Have you anything to state about this? I do not know anything about that (*pointing to one amongst the papers.*)
6873. Do you know anything about the other? The schedule of prices—this is correct.
6874. Were you furnished with a copy of the schedule of prices? Yes.

- Mr. Alex. C. Bayley.
2 Jan., 1862.
6875. What do you mean by saying you know nothing about this copy; your name is signed to it? I know nothing about this (*pointing to a portion of the specification.*)
6876. You mean an alteration that appears on the specification? It was not there when it was signed.
6877. Under the head of fencing—"fencing or stone walls as hereinafter specified"? Yes, that was not there when I signed.
6878. Just state the alteration that has been made in it? These words—"or stone walls, as hereinafter specified by the Commissioner;" that was not in it.
6879. Were you ever notified that that alteration was made? Excepting that it is in my book; it was made afterwards; it was not down in the specification when it was signed; it was an after alteration.
6880. You were not informed of this alteration? Yes, I was informed of it, but I did not know it had been put down in the specification I had witnessed.
6881. Being informed of it, you accepted it as part of your instructions? Yes.
6882. Did you make any memoranda or other notification on the copy of the specification you had? No, I only had this—here is the same thing in my book (*showing a memorandum in the book before referred to.*)
6883. Did you give a copy of that to Mr. Quodling? Yes.
6884. So that Mr. Quodling was aware of the alteration? At least, not to Mr. Quodling, but Mr. Hannington copied it out of this book; he copied out all these instructions.
6885. *By Mr. Hoskins:* Where did Mr. Hannington copy these instructions? At Murrurundi.
6886. When? Before I left.
6887. *By Mr. Dalgleish:* Are you aware if Mr. Quodling had any copy of these instructions? I suppose Mr. Hannington gave them to him, as Mr. Hannington was his overseer.
6888. Are these general conditions for the instruction of the Superintendent? Yes, they are.
6889. Do they not define his duties to some extent and limit his power? His power is limited by the authority of the Engineer for Roads.
6890. It is for his general guidance in the absence of the Engineer or other superior officer? Yes.
6891. So that these would form part of the description of the duties of the Superintendent? Yes.
6892. With reference to that clause, clause 8, which relates to the non-fulfilment of the contract—"Should the Engineer for Roads at any time be dissatisfied with the mode of proceeding, &c."—If the Engineer or Commissioner were notified by the Superintendent that certain works were not going forward—were not being carried out in the spirit of the contract—his duty would then be performed? Yes, his duty would then be performed.
6893. He would have no power in himself to stop the work? No.
6894. Having performed this duty of notifying his superior officer, that would be all that would be expected of him? Yes.
6895. The 9th clause states that "the Engineer or authorized officer shall have the power of immediately dismissing any agent or workman employed by the contractor, and of having removed off the works, even if fixed, any timber, materials, plant, or implements, that he may think improper"—would you have that power? Yes.
6896. Or Mr. Quodling? Yes.
6897. So that any officer would have not only the power of preventing him carrying on the work, but of ordering him from it? Yes.
6898. What do you consider the formation of a road? Convexity.
6899. The formation is spoken of as something separate—"When the formation, fences, bridges, &c., are completed"—in this instance it must mean more than convexity? Does it state something afterwards?
6900. I will read the clause—"When the formation, fences, and bridges, are completed, the traffic is to be turned on to the road during fine weather, until the formation is thoroughly consolidated. The maintaining convexity with fresh approved material and filling up ruts must be carefully attended to by contractor." What do you consider the formation to be—Suppose an embankment has to be made and the road has to go over it, what would you consider the formation in that instance? Earth.
6901. Nothing but the earth? Nothing but the earth.
6902. No stone on top of the earth? No, nothing at all.
6903. About the consolidation—what would be the saving to the contractor if he neglected to have the road consolidated according to this clause? About £300 a mile.
6904. What would be your opinion if you were told that this clause should be struck out—that £300 a mile should be taken from the contractor? I think so.
6905. Provided that the road were in this condition, newly formed, and had one coating of pitching placed over the earth, and then a coat of metal on the top of that, what would be the effect? It would sink in places if the earth was not consolidated.
6906. Some parts of it would go down in holes? Yes, according to the time it was made; if it was made in dry weather, directly heavy rain came on it would sink.
6907. Is there any peculiarity in the road itself, this diversion—is it partly cut from the face of the mountain and partly formed artificially by embankment? Yes.
6908. Where the road is half in the solid cutting and half artificially formed, what would be the effect, on this description of work, of the want of consolidation? The part that was made would sink and be lower than the solid ground it was cut from.
6909. Would it partially slip? Yes.
6910. To prevent this slipping, benches are cut, are they not? Yes.
6911. Benches are flat seats cut on the mountain lower down, to prevent the earth from slipping? Yes.

6912. What portion of the Doughboy cutting is solid rock—what length of the road? Only about six or seven chains; I am not quite sure whether there is as much as that. Mr. Alex. C. Bayley.
6913. There is not at all likely to be twenty-two chains of rock? No.
6914. You think six or seven chains? Seven chains at the very outside; not more than that. 2 Jan., 1862.
6915. What is the usual practice where the bed of a road is solid rock—is it to metal above the rock—to put broken metal above the rock—or to allow the face of the rock to remain as the face of the road? To put metal.
6916. What thickness of metal is it usual to place over such portions of the road? The usual thickness, about 9 inches in the centre and 6 at the sides.
6917. Are you aware whether that has been done with regard to this particular work? No, it was not finished when I was there.
6918. Do you think that stone you have designated as shale is proper stone to place on such portions of road? No.
6919. Should any difference be made in the stone—is it equally important to have hard stone as on other portions of the road? Equally.
6920. Are you aware of what slope the earth-works on the side cuttings are—is the slope carried out to the specification not less than one and a half to one? One to one was specified I think; as far as I know, it was carried out to that; it was not all finished.
6921. In this case it is stated as to be hand-packed with stone? To the creek. You are speaking of the embankments.
6922. It is to the embankments? Nothing of that was done when I came away.
6923. What is the proper term for the metal, as used in this specification? Good rock, the best to be procured within a reasonable distance.
6924. What would be the difference in price between pitching—you understand the term? Yes.
6925. Between pitching and forming a road of this broken metal, 9 inches in the centre by 6 at the sides—what would be the difference in expense between pitching and metalling, and putting on a coat of metal that thickness—If a mile of road were to be pitched instead of being metalled, what would be the difference in cost? That would all depend upon the thickness of the pitching.
6926. The thickness of the pitching to be 9 by 6? I do not think there would be much difference—very little difference.
6927. Do you think pitching would be equally as expensive as broken metal? Not quite so expensive—about a shilling a yard less.
6928. Would the work be as good? Pitching would be no use at all without metal.
6929. What is meant by ballasting in this contract? That is gravel.
6930. Ballast is the term used for gravel? Yes.
6931. Would that shale be a proper substitute for gravel? No.
6932. Would it be as expensive? That shale was got out of a cutting, and was paid for as getting out of earth. There was a quantity of shale cut out and left on the road heaped up.
6933. *By Mr. Hoskins*: What cutting? The Doughboy cutting—one of the cuttings at the Doughboy. It was heaped up in the centre of it exactly the same as that.
6934. *By Mr. Dalgleish*: What would be the difference in the expense of quarrying and breaking a cubic yard of this basalt and this shale? This was paid for as earth-work, at 1s. 3d. a yard, I think the price was.
6935. And was put on the road? I do not know; I did not see it put on the road.
6936. If broken up and put on the road you would consider it equivalent only to blinding—to clay? That is all.
6937. It should not be charged as metal at all? No.
6938. What is punning? Ramming down.
6939. The clause with regard to punning, would that signify that the earth should be closely rammed down? Yes.
6940. If this was departed from what would be the saving effected per yard? Something very trifling, not a great deal; I could not exactly say what it would be.
6941. The clause with regard to fencing, in the specification, states that the fencing must be of the best material—would you consider it your duty to see the fencing erected in accordance with the specification? Yes.
6942. And composed of the best material? Yes.
6943. And if the best material were not put up, would you consider that a sufficient reason not to have the fencing put up, or would you compel the contractor to complete his contract? I should think he ought to complete his contract.
6944. Should the material of the fencing or its construction be bad in itself, that would be no reason why the fencing should not be erected? No.
6945. The contractor should be made to find good material and put up the fence as specified? Yes.
6946. Are you aware whether that has been carried out? I am not.

APPENDIX.

Should Mr. Quodling not send in any returns on Saturday next, Mr. Bayley is authorized to send in £600 on account.

W. R. C.
18/7/61.

FRIDAY,

FRIDAY, 3 JANUARY, 1862.

Present:—

MR. DALGLEISH,
MR. DANGAR,MR. GARRETT,
MR. HOSKINS,

MR. LUCAS.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

Mr. Alexander Charles Bayley called in and further examined:—

Mr. Alex. C.
Bayley.
3 Jan., 1862.

6947. *By the Chairman:* You have said that the original contract for the Doughboy Hollow work was £6,379,—Can you inform the Committee whether the widening of the bridges on that piece of work, from 12 feet to 18 feet, would be sufficient to increase the expense of the work to £7,000? Yes, it would increase the expense, as a matter of course.

6948. Then the increase from £6,379 to £7,000 was, I presume, merely a fair amount for covering the increased work—the increased expenditure would be only a fair sum to cover the increased work? I think so.

6949. Do you consider that the alterations then made were an improvement—such an improvement as would warrant the increased expenditure? I think the alteration was a just one.

6950. And you think that it was such a one as for the benefit of the public should be made? Yes, I think so.

6951. I think you have already stated that you did not consider the improvements as commensurate with the outlay generally throughout the Northern Roads? No, I do not think it is.

6952. Why do you think this? I do not think that the gravel that has been used will last.

6953. Will you state what part of the road is more particularly open to the objection you refer to? That by the "Highland Home;" that is a piece of road that is always going; a quantity of gravel has been put upon it time after time, but with the first rain it becomes as bad as ever.

6954. That is not at the Murrurundi Gap? No; it is part of the Warland's Range Road.

6955. Was that under your charge? It was.

6956. Who was the contractor for the work? I do not know; it was done before I went up.

6957. What is the extent of the piece you refer to? Somewhere about three miles.

6958. A good deal of public money has however been spent there? Yes, a good deal.

6959. How long ago is it since the line was opened to the public? That I cannot say. It was open as a public road when I went up there.

6960. And it has always been a bad piece of road? Yes, always bad in wet weather.

6961. How do you happen to know that a great deal of money has been spent on this road? I know that it must have cost a good deal to make, and during the two years that I was up there a very large quantity of gravel was placed on it, but with the first wet it was always giving.

6962. Do you know the outlay that has been incurred in regard to that piece of road? I do not.

6963. However, it is a bad piece of road? It may be good enough now, but it is always bad in wet weather.

6964. Do you think that it is a piece of road that might be made good if the proper principles of construction were applied to it? I do.

6965. Then, although it is bad, you think that it is so on account of the work not having been properly done? I do.

6966. Do you know if this piece of road was constructed by Mr. Collett? It was done by him, through the road overseer.

6967. You mean to say that it was a piece of work done by him, through an overseer, and for which he is responsible? Yes.

6968. Was it made by contract? I do not know how it was done in the first instance. It was completed and opened, and had been in use some time when I went up there. But it was always the same, and was always sure to give with the first wet weather.

6969. Can you mention any other parts of the road to which this same objection applies? Yes; there is the Murrurundi Gap.

6970. You include that in your remarks with reference to the use of gravel? I do.

6971. What length of road is objectionable on this account? It is only a small piece of the road. Some white gravel, as they call it, has been laid down on it, and it is always giving.

6972. Is there any other part of the road that you can specify? I remember no other at present.

6973. Are you aware whether Mr. Collett, when he inspects works on the line, does so on foot—whether he merely rides round them, or whether he goes on foot and takes pains to examine into what is done? I have always seen him inspecting the works on foot.

6974. Then he takes all possible pains to look carefully after all the work that is being done? Yes.

6975. Have you seen him engaged in this inspection at all hours of the day? Yes.

6976. At different hours? Yes; sometimes morning, sometimes evening, according to the time he came up.

6977. Then you think he took all the pains in his power to see to the proper performance of the work? Yes, I think he did.

6978. Was there anything particular in the works on the Doughboy Diversion requiring any special

- special instruction or supervision from Mr. Collett? Not that I am aware of. Nothing beyond what the Superintendents could carry out.
6979. But should you not say that the circumstance of the Superintendent having reported against part of the works, or having refused to give a voucher for part of the work, would be a good reason why the Commissioner himself should look more closely than usual after it? Yes, that would no doubt alter the case.
6980. There was, however, nothing in the character of the works themselves requiring particular attention from the Commissioner? No.
6981. Do you think the office of Commissioner of Roads is absolutely necessary? I think so.
6982. Certain matters could not be carried out without this office existed? No.
6983. Supposing it to be retained, then, could any of the inferior offices be dispensed with? Which offices?
6984. Either the Engineer of Roads, or the Superintendents? The Engineer is required—the department could not get on without him; he is the officer who should inspect the works.
6985. You think that the Engineer ought to do the work that is now done by the Commissioner? Yes.
6986. In that case would it not be better that the offices of Commissioner and Engineer should be amalgamated? I think it would be.
6987. There is no absolute necessity for the two offices? No, I think not.
6988. So that it is rather throwing away the public money to have the two officers when one person might fill the two offices? In that light no doubt it is. It would, at all events, be an advantage to have the works inspected by an engineer.
6989. Then if the Commissioner were also the Engineer, the work would actually be better done by one person than it now is by two? Yes, in the way I have said.
6990. Are you aware whether Mr. Collett would be capable of undertaking the duties of Engineer? I am not aware.
6991. You do not know whether Mr. Collett is an engineer? I do not.
6992. And you think that a person could not undertake the duties of Engineer without being technically acquainted with the various works he would have to superintend—without, in fact, having undergone a technical training for the office? No.
6993. He must be a person fully qualified, by training and study, for his profession? I think so.
6994. Are you an engineer? I am not.
6995. Is Mr. Quodling one? I do not know.
6996. Then the present Commissioner of Roads not being a civil engineer, it is necessary to maintain the present office of Engineer of Roads? It is.
6997. But if Mr. Collett had been an engineer a saving could have been effected by joining the two offices of Commissioner and Engineer? Yes, I think so.
6998. Do you know anything of a testimonial that was given to Mr. Collett at Murrurundi? I heard of it, but had nothing to do with it.
6999. You did not put your name down for anything on it? No.
7000. What did you think of it—what was the view you took of it that made you refuse to join? I was asked to join in it, but refused to do so because I did not think that any Government officer had a right to take money for the performance of his duty.
7001. Who asked you to join? Mr. Cohen.
7002. He was not a contractor? No.
7003. Can you specify the date or about the date when you were asked by Mr. Cohen to join in this testimonial? I forget the exact time.
7004. Can you not say about what time it was? It must have been last April or some time in the beginning of May.
7005. Do you know who the persons were who were most active in getting up this testimonial? I do not. I took no interest whatever in the matter, because I did not think it was a thing that a Government officer ought to do, and I objected to the principle of an official receiving money in this way.
7006. You did not think it proper? No.
7007. If a testimonial with a sum of money had been presented to you would you have received it? I would not.
7008. Were you present in Murrurundi at the presentation of the testimonial? Yes, I was present at the dinner. I paid my share for a ticket on the occasion.
7009. You went there because it was a dinner, and for the fun of the thing, rather than as joining in the testimonial? Yes, exactly.
7010. You did not sign the testimonial? I mean to say that my name is not to the testimonial for the money; I may have put down my name to the paper testifying to Mr. Collett's management during the time he had been serving on this road.
7011. Then you put your name to the paper, but not to the subscription list? Yes.
7012. And what did you testify to, when as you say, you testified to Mr. Collett's management? I forget now what the testimonial said, it is so long ago; besides I have never thought about it since.
7013. Who did you say asked you to sign? Mr. Cohen, I think was the person; I may have been asked by some others; the thing was very commonly spoken of.
7014. It was offered to persons to sign in an open manner—not at all secretly? No, quite openly.
7015. There was nothing underhand in the way in which it was got up? Nothing at all.
7016. During the last three years have you yourself seen, or have you heard, in an unmistakable manner, of any corrupt practices on the part of Mr. Collett, in regard to his management

Mr. Alex. C.
Bayley.

3 Jan., 1862.

Mr. Alex. C.
Bayley.

3 Jan., 1862.

management of the roads? No, I cannot say that I have; I can say nothing about rumours, because they are not to be believed.

7017. Has anything ever occurred within your experience, to make you fancy that Mr. Collett received a per-centage from the contractors on the amounts paid to them? Nothing.

7018. And in regard to this testimonial your only impression is that Mr. Collett's conduct in receiving it was injudicious? Yes; I think that no good public officer ought to receive money from any person in any way, not even as a testimonial.

7019. Is there any harm in a public officer receiving a testimonial from persons with whom he is in no way connected in business? I think there is.

7020. I suppose you regard this as being particularly wrong on account of part of the money coming from contractors working under him? I think it is wrong in any case; because in a case of this kind everyone gives something, contractors amongst the rest.

7021. Do you know if persons who held contracts under Mr. Collett joined in this testimonial? Mr. Martindale was one, and he was a contractor; I saw him asking Mr. Weaver to give something.

7022. Was it in the power of Mr. Bennett, or of the Engineer for Roads, to make alterations in the specifications for works for which contracts had been taken? It was.

7023. Then I suppose it was equally in the power of Captain Martindale, or of the present Commissioner, to do the same thing? Yes; there is a clause in the general conditions to that effect, giving them power to make such alterations as they may consider necessary in the specifications.

7024. But was it intended that this power should be exercised in a desultory manner, or only in cases of emergency? Only in the latter cases, I should imagine.

7025. Then before this power is exercised ought not an authorization for it to be obtained? Yes, I think so.

7026. And that authorization should come from whom? The head of the department.

7027. Whom do you regard as the head of the department? The Minister for Works.

7028. Then you think that Mr. Arnold has some control over the Roads Branch? Yes, of course, as Minister for Works.

7029. Now, supposing the present Engineer for Roads tells you to carry out, in the building of the Yass bridge, on which you are now engaged, any particular alteration from the original plan, would you do so at once, or would you hesitate about obeying him? I should not do it if I thought there was anything very wrong about the alteration.

7030. What would you do? I would suggest what I considered to be right.

7031. But if he insisted—if he considered himself right and you wrong, would you conceive yourself bound to obey him? Yes, without it was something that was manifestly wrong—something that I was convinced would not stand.

7032. And what would you do in that case? I should make a special report on the subject.

7033. Then if you and the Engineer differed beyond all hope of reconciling your opinions, you would be obliged either to obey him or to make a special report of the circumstances? Yes.

7034. To whom would you report? To the Commissioner.

7035. Not to the head of the department—to the Secretary for Works? No; I never report to any one else than the Commissioner.

7036. Then suppose you differed from the Commissioner, to whom would you report? I should be obliged to give way in that case, because he is considered to be a person of more standing in the service than I am, and his opinion would of course have more weight than mine.

7037. Because he is your superior officer? Yes.

7038. So that if the offices of Engineer and Commissioner were combined you would have no appeal? No.

7039. Can you say whether, as a general thing, the alterations made as you have described have been, as far as they have come under your notice, for the public benefit? Yes, I think so.

7040. You have concurred with the alterations made in works under your charge, as a general rule? Yes.

7041. Did you send in a letter condemning the work, and then a voucher for the final payment of the work done on the Murrurundi Gap contract, previous to the Commissioner's visit to the work in April? Yes, I sent in a voucher, but it was for the extra work, and not for the completion of the original contract.

7042. You did not certify for the work you had condemned? No; not until after Mr. Collett had passed it, and by his orders.

7043. Then it was on his authority, and in opposition to your own judgment, that you gave the voucher? Yes.

7044. Was the white gravel you have alluded to, part of the original contract? It was.

7045. And though it was condemned by you it was authorized by Mr. Collett? Yes.

7046. Did not Mr. Bennett, before he left the Colony, authorize certain alterations in the Gap contract? The only alteration he authorized was the pitching on the banks.

7047. He agreed in condemning the work that you refused to sign a voucher for? Yes.

7048. Did Mr. Bennett ever write to you, directing you to let Mr. Martindale have certain work without tender? No; the only work that was done without tender was the pitching; and that was given to Mr. Martindale without tenders being called for publicly.

7049. How was Mr. Martindale authorized to do it? It was in this way:—I wrote to Mr. Bennett to say that I did not think the banks would stand without pitching, and that Mr. Martindale would do it for a certain price. He then authorized the work to be done at that price.

7050. Then the alteration was made at your suggestion? Yes.

7051. Were you written to by Mr. Bennett, to say that you need not go to Falbrook to sign the voucher, for that he would arrange it with Walker—did you receive such a letter? No; I did not. I do not recollect it. Mr. Alex. C. Bayley.
7052. How could £300 a mile be saved by the consolidation of the roads before letting the traffic over them, if the bridges were not built? I suppose them to be built when I say that this will be the amount of saving. 3 Jan., 1862.
7053. In making your statement you assume that they are built? Yes.
7054. Did you state positively that a lineal yard of pitching was worth the same within a shilling of a cubic yard of broken metal? Yes, with a road-way 24 feet wide it is.
7055. But the road-way alluded to was only 18 feet wide? Yes, I think it was.
7056. Did you pay 6s. more, that is 7s. for it? For what?
7057. For the pitching? The reason that was higher was that the carriage was all up-hill instead of level; this of course made it more expensive to draw the stone for the pitching.
7058. When the official instructions were given you by the Commissioner, did he direct you then, or at any other time, to hand over the documents in your possession to Mr. _____ or to Mr. Hannington, to copy? I delivered and handed over everything to Mr. Quodling, when he took charge.
7059. Were the documents specified in the instructions? No, there was nothing specified. I was instructed to hand over everything, and I delivered up everything—these amongst the rest.
7060. Without reference to any particular orders? Yes.
7061. When did they leave your possession? At the time Mr. Hannington copied them in my presence.
7062. Did ever the Commissioner point out to you an error of 5 feet in the approaches to one of the bridges constructed under your supervision? He tried to do so.
7063. Will you explain how he tried to do so? I say tried to, because it was proved before I left the ground that I was correct.
7064. Will you explain how it was proved? It was proved by the plans that I was correct; and then he said it was a mistake on his part—that he had thought there was a fall from the bridge to the Willow Tree, but by the plans he saw there was a rise.
7065. Did he admit that he was wrong? Yes; he was obliged to admit it on the ground.
7066. And that you were right? Yes; and the bridge is there now to prove that it was erected according to the plan.
7067. Did he censure you or Mr. Quodling for this presumed error? Yes, he censured me at first. Mr. Brown was there at the time, and he knew that the bridge was correctly constructed.
7068. But I am speaking of the approaches to the bridge? I am speaking of the bridge itself; there were no approaches done at that time.
7069. At one of the bridges, however, he found fault with you for the construction being on a wrong level? Yes.
7070. But afterwards admitted that you were right? Yes.
7071. Did he also censure Mr. Quodling? I had nothing whatever to do with that.
7072. Did he call your attention to an objectionable curve that occurred in another bridge? Yes, at the Fun Chin bridge.
7073. At the Doughboy Diversion? Yes.
7074. Who was in error there? I suppose it must have been the surveyor—I forget his name—who laid out the line. He put a rather sharp curve on the line when it might have been avoided.
7075. Then it was not your fault or the fault of the contractor? No.
7076. What did you do when your attention was called to it? I altered it in accordance with the Commissioner's instructions.
7077. He was right then in that instance? Yes, he was certainly right to take off that curve.
7078. And the alteration was an improvement on the original plan? It was; and I must say of the deviation altogether that it was one that Mr. Bennett disapproved of entirely.
7079. Of what you considered to be an improvement? No, of the whole plan. The original plan was to follow down the creek, by which means we should have got rid of the cutting. The plan adopted was laid out from Mr. Debenham's survey, without an engineer being employed.
7080. And which do you regard as the better plan of the two? The old plan was a good one, as it avoided the cutting; but I certainly prefer the new one. I do not know precisely what was Mr. Bennett's objection to it, but I think it was the cutting.
7081. Then, in your opinion, the new plan is the better of the two? Yes; the one which Mr. Collett adopted.
7082. The line adopted was that of Collett and Debenham, as distinguished from the line of Bennett and Wells? Yes.
7083. And it is the better of the two? Yes.
7084. Are the gradients or back cuttings easier on this than on the old line? I decline to give an opinion on that point.
7085. Did the Commissioner direct Mr. Quodling to measure the big cutting on the new line? Yes; he and I were ordered to measure it.
7086. Both of you? Yes; we were to measure it together.
7087. What was the object in directing the two of you to do it? It was that we might check each other. We had each to take different measurements.
7088. Did he do as he was ordered? No; because the arrangements for doing the work for a lump sum of £700 was made, and so the measurement was unnecessary.
- 7089.

- Mr. Alex. C. Bayley. 7089. Then Mr. Quodling did not obey his orders because those orders were superseded by other arrangements? Yes.
- 3 Jan., 1862. 7090. *By Mr. Hoskins*: But why were they superseded? Because a contract was taken for a lump sum.
7091. Was not the work done on a schedule of prices? No; at a fixed sum for the work.
7092. *By the Chairman*: Have you seen Mr. Quodling at Murrurundi? I have.
7093. Is that in his district? It is on the border of it.
7094. When you have seen him there was he on public business? He might have been; I cannot say.
7095. Did you ever know him to neglect his duty by going to Murrurundi? That I can say nothing about.
7096. Can you state the kind of timber that is employed in the construction of the Murrurundi Bridge? It is principally stringy-bark.
7097. Is that a good durable wood? Yes.
7098. Is it a wood that lasts in the ground? Yes, for a time.
7099. Is it as good timber as blue gum or ironbark? No, it is not.
7100. Nor likely to last so long in the ground? No; but there is no stringy-bark in the ground there.
7101. Have you heard Mr. Collett say that this bridge was too narrow? Yes, I have heard him say so.
7102. And do you agree with him in that? I do.
7103. Do you know if there is any white gum used in this bridge? There is not.
7104. Not in the planking of the roadway or anywhere else? The planking was not done when I left.
7105. You know the white gum? Yes.
7106. It is generally considered to be a bad wood? It is.
7107. It is not ordinarily used? I know that it is never specified for.
7108. What is the objection to it? After a short time it rots away and goes to powder.
7109. Is that the case with the heart of the wood, or is it confined to the sap only? It is the case with both the heart and the sap.
7110. Is it not the case with stringy-bark also, especially as regards the sap—does not that also rot away to powder? I do not know that it does. Certainly not to the same extent. I have seen stringy-bark last a long time.
7111. Does this white gum have the heart of the wood of a white colour? Yes; white, with a tinge of brown through it.
7112. Not so red as mahogany, as it is generally called, or so dark as ironbark? No. Ironbark is a very dark wood.
7113. But do you not know that there is a white ironbark? Yes; but it is a totally different wood to the white gum.
7114. Is it darker than the white gum? Yes, much darker.
7115. Stringy-bark is a light white wood? It is a light wood, but that is darker than the white gum.
7116. Is the stringy-bark that grows about Murrurundi the same kind of wood as is called stringy-bark in the Southern District? Yes. It is exactly the same as the stringy-bark we use at Yass.
7117. Do they consider the stringy-bark at Yass to be a good durable wood? It is very generally used.
7118. *By Mr. Dalgleish*: Allow me to ask you if you have been brought up to any trade? No, I have not.
7119. How long have you been employed in the Department of Works? About five years.
7120. What were you previously—what occupation did you follow? I was at the sugar; I was brought up in the West Indies.
7121. You were employed in the sugar planting? Yes.
7122. In what way were you first employed upon the roads here? I was engaged upon the construction of bridges at Moreton Bay.
7123. What experience had you previously had in this kind of work? I had put up some bridges in Jamaica.
7124. As a workman? No; as superintendent of the estate. I overlooked their construction.
7125. Was that your whole experience of works of this kind? Yes, that and buildings; I put up some in Barbadoes.
7126. How many bridges were there put up on this contract? Eight or nine.
7127. And how many were there according to the original contract? I cannot recollect now.
7128. Is this a correct list of the bridges, as contracted for to be put upon the line (*General Conditions in regard to Bridges handed to witness*)? Yes, this is correct.
7129. You see the bridges Nos. 9 and 10 there? Yes.
7130. Were they built? No.
7131. Was the cost of constructing these two bridges included in the £6,000 odd that have been alluded to, and for which the contract was taken? It was.
7132. What would be the value of these bridges that have been omitted to be constructed? I could not say.
7133. Would the amount saved by their non-construction be sufficient of itself to pay the expense of widening all the remaining bridges? Yes, I think so.
7134. Then no deviation from the original contract price would be warranted for the widening of the remaining eight bridges, seeing that two were not required to be built, and that the money then saved would be equal to the increased cost? That is a mere matter of opinion.
7135. To me it appears more a matter of fact? It is a question of calculation.
- 7136.

7136. If you look at the list, you will see that No. 1 is a simple beam bridge of two 20 feet spans, and one 15 feet span; that No. 2 is also a simple beam bridge of one 20 feet span; No. 3 is a simple beam bridge of two 21 feet spans; No. 4 is the same with three 21 feet spans; No. 5 is a simple beam bridge of one 25 feet and four 21 feet spans? Yes, that is quite correct.
7137. These are bridges entirely of a simple construction? Yes.
7138. The next bridge, No. 6, is one of three 50 feet spans undertrussed, and one 21 feet span, with beam corbels—this is one of a more expensive construction? Yes. That was not put up; at least it was not put up whilst I was there.
7139. It is a more complicated and consequently a more expensive bridge than the others? Yes, it would be much more expensive than any of the others you have mentioned.
7140. In what proportion? I can hardly say.
7141. Would it be as expensive as the first three bridges put together? Yes, it would.
7142. Would it be equally as expensive as the aggregate cost of the first four bridges? Well, it may be.
7143. Would the expense of erecting this one bridge, No. 6, be sufficient to cover the cost of constructing the first four bridges I have enumerated? I think it would. I think the four might be put up for what would be required for this one, or very nearly. However, it is just a matter of calculation.
7144. Then the expense of No. 6 bridge would be equal to the whole cost of the first four bridges? I do not think it would quite cover it.
7145. Would there be much deficiency? No, not a very great deal.
7146. Will you look at the plan of these bridges (*Plan of D bridge produced*)—Are these the plans you had to work by? They are.
7147. Do you recognize here the plan of No. 6 bridge? Yes.
7148. What would be the aggregate cost of the bridges 1, 2, 3, and 4, as compared with the cost of the single bridge No. 6? The difference in length would be the only difference.
7149. Would not the difference in span increase the expense; for instance, the first bridge has two 20 feet spans, whilst No. 6 has three 50 feet spans—would not the 50 feet spans be proportionately more expensive than the 20 feet spans? Yes, certainly.
7150. And would not each span of 50 feet be proportionately more expensive than the whole of No. 1 bridge? Yes.
7151. This No. 6 bridge has to be erected also with beam corbels; that again is a more expensive mode of construction than is adopted in either of the other four bridges? It is.
7152. So that if No. 6 bridge has not been made, there would be an immense proportionate saving on the whole of the work? There would.
7153. And more than a proportionate saving if the work of No. 6 bridge is of a more expensive character than that of Nos. 1, 2, 3, or 4 bridge? Yes; the expense would of course be greater for the large bridge.
7154. Then, supposing this one bridge, No. 6, to be left out from being made, would not the amount saved be sufficient to widen the remaining bridges? Yes.
7155. Then again, No. 7 is a simple beam bridge of three 25 feet spans, with beam corbels; is that as expensive a bridge as No. 9, which was to be a queen-trussed bridge of one 50 feet span, with three 21 feet spans, with girders and corbels? No.
7156. And would not the expense thus saved go a great way towards widening the other bridges? No doubt it would.
7157. Would not the saving from these bridges being omitted, not merely pay for the widening, but also leave a balance to the Government, after widening the others? Yes, I think it would.
7158. So that the contract need not to have been exceeded by reason of the widening of the bridges? No.
7159. Are the D bridges built in accordance with the drawings you have verified? No, No. 1 is not, nor anything like it; it is built with only one span of 25 feet.
7160. Is No. 3 built in accordance with the plan? Yes, it is.
7161. Is No. 2 built in accordance with this plan? I cannot say; I was not there when it was erected.
7162. Then, from what you now say, it would appear that you had not thought sufficiently over your answer when you said that £700 was not too large an increase of the original contract, considering the widening of the bridges? I did not say that it was on account of the widening of the bridges, but for the whole of the extra work that had to be done; I said that, everything included, it was not too much. A good deal of extra metalling was included, and I meant that everything being completed, and the road opened, the £700 extra was not too much.
7163. Have you seen the bridges since they have been completed? No.
7164. Are those that have been omitted the most expensive bridges to make? Yes.
7165. Could you say in what proportion—in round numbers? I could hardly say.
7166. As compared with one of the other bridges—say with No. 1? I should think it would be about a fourth more.
7167. But there are three 50 feet spans in No. 6 bridge, whilst there are only two 25 feet spans in No. 1 bridge? When I say that it would cost a fourth more, I mean that it would cost a fourth more per foot run.
7168. Can you state the quantities of work to be performed under the original contract taken for £6,379? I cannot.
7169. Did it include the ten bridges? Yes.
7170. Of which only eight were erected? Yes.
7171. Were there any other heavy amounts of work to be done that you remember? Well, I do not remember.

Mr. Alex. G.
Bayley.
3 Jan., 1862.

- Mr. Alex. C. Bayley.
3 Jan., 1862.
7172. Have you any knowledge of the quantity of work to be performed under the original contract, as compared with what had to be done under the new arrangements—in which do you think was there the greatest amount of work to be done? I think there was more work in the new agreement than in the first contract.
7173. Will you state in what way, seeing that, to begin with, there are fewer bridges, and that those omitted are the most expensive? Yes, but then the cuttings became more heavy; then there were 1,200 more yards of metal to be broken and laid down; that is an expensive item.
7174. That was paid for extra? Yes, but it was included in the £700 given beyond the contract.
7175. You could not give us any nearer idea than this of the difference of work between the two? No, I could not.
7176. *By Mr. Hoskins:* In estimating a contract at a lump sum, is not a calculation made in the first instance based upon a schedule of prices? Yes.
7177. But you say there was no calculation made in this instance? Yes, there was a calculation made of the amount that would be saved on the sums estimated for the bridges, and of the cost of the extra work that would be required.
7178. And upon what schedule of prices was that calculation based? Upon the one that I saw here yesterday.
7179. Have you made any calculation to see if the lump sum given was in excess of what the amount would have been had it been executed upon a schedule of prices? No, I have not, because I have not seen the work.
7180. But you can surely say from the state of the works when you left them? No, they were only in progress then.
7181. As a matter of fact, can you say whether the money received by the contractor was in excess of what it would have been had the work been performed under a schedule of prices? I cannot say what was paid him, because I made no measurement of the earth-work.
7182. You never measured the cuttings at all? No, the calculation was made by Mr. Quodling.
7183. You never ascertained whether the contractor received more than he would have done under a schedule of prices? No. When I left he had not received more than the usual amounts paid on the value of work actually done.
7184. Then whilst you were there he never received anything more than the value of the work warranted, a certain per-centage being withheld, according to custom, to be paid on completion of the contract? No, he never received more, with the exception of the £600 which I was authorized to send in a voucher for.
7185. Did you refuse to give the voucher because he had not done work to the value of £600? I could not say whether he had done it or not, because I had not measured it. I believe the work was there, but I could not give a voucher for it until I had measured it.
7186. Then you were authorized to give a voucher for work that you had not measured? Yes; I did it under orders.
7187. Were you ever asked to do the same thing in other cases? No, never.
7188. Do you consider it to be your duty as a Superintendent, not to sign a voucher for a contractor to receive money, during the time his contract is being performed, until you have assured yourself that work has been performed to the value of the amount vouched for? I should not be justified in giving a voucher, until I was sure, by measurement and examination, that the work was done.
7189. Have you ever done so in any case? Only in this one case, when I was directed to do so.
7190. And who directed you to do it—the Commissioner, Mr. Collett? Yes.
7191. Did you remonstrate with him when he gave you this order? I said that I would not do it; that I had nothing at all to do with the earth-work; and then afterwards I said that if he gave me authority I would do it.
7192. Are you sure that there was a sufficient quantity of work done to warrant the payment of the sum for which you gave the voucher? I could not say positively, but I think there was.
7193. Did you ever hear anything of Mr. Martindale's character as a contractor—anything not very complimentary to him? I know that Mr. Bennett had not a very high opinion of him.
7194. In what way? On account of the character that Mr. Martindale brought up from Melbourne with him.
7195. What was it? Mr. Bennett knew very well that Mr. Martindale had not behaved very well in Melbourne, in a contract he was carrying out at the Yan Yean Water Works. Mr. Bennett told him that he must be more careful here in carrying out his contracts than he had been in Melbourne.
7196. And was he more careful here? He did everything at the Doughboy contract, except the gravel, very well.
7197. Do you know how he obtained that contract—was it put up to public competition? It was.
7198. And was his tender the lowest? I never saw the tenders, and therefore I cannot say whether his was the lowest or not.
7199. He had a bad reputation as a contractor in Melbourne? So I have heard, but I do not know it of my own knowledge.
7200. How many contracts have you seen him perform during your time? He has had three under my own eye.
7201. Did he perform them well? Yes.

7202. Were they all submitted to public competition before he obtained them? Yes, the whole of them. Mr. Alex. C. Bayley.
7203. Who was the particular officer who had charge of the Roads Branch, at the time these tenders were allotted to Mr. Martindale? Captain Martindale. 3 Jan., 1862.
7204. That must have been some time ago? No, it was in 1860.
7205. You do not know of any contracts having been allotted to Mr. Martindale since the accession of Mr. Collett to the office of Commissioner? Yes; he has obtained the extension of the Murrurundi Gap line.
7206. And was that submitted to public competition? Yes.
7207. You mean the extension of the Doughboy Diversion? No; the extension of the Murrurundi Gap line. It was an extension of the Gap deviation.
7208. What was the character of the work? Principally side cuttings.
7209. And that you say was submitted to public competition? Yes.
7210. Tenders were publicly called for? Yes, I believe so.
7211. Are you quite sure that this was the case? Yes; I believe that notices were published in the *Government Gazette*. I know that the plans were sent up and lodged at the Murrurundi Police Office, and I should imagine therefore that the tenders were called for in the *Gazette*.
7212. And was this the second contract that Mr. Martindale had on the Liverpool Range? Yes, the second.
7213. What was the amount of this extension contract—what was it taken for? I had nothing to do with it, and therefore I do not know.
7214. You did not supervise the work? No.
7215. Then you do not know positively whether he obtained that contract by tender? I believe he did.
7216. By public tender? Yes, I think so.
7217. And this extension of the Doughboy contract, was that submitted to public competition? Which extension?
7218. The increase from £6,000 odd to £7,000? No, that was not obtained by public tender.
7219. Is the Commissioner frequently in the habit of allotting contracts to different persons without submitting them to public competition, within your own experience? Not within my experience. I do not know of any instance of the kind.
7220. Your services, I believe, were more particularly required in looking after the construction of the bridge at Murrurundi? Yes.
7221. Are you sure there is no white gum used in that construction? As far as I went I know there was none.
7222. What was there to be done when you left? There was the flooring and planking to be done, and a cross-girder or two to put in.
7223. Was there much flooring to be done? No; only about thirty or forty feet.
7224. Now with reference to the Highland Home contract, you stated, I believe, that the money spent there had been wasted, or at all events, that it had not been judiciously expended? I did.
7225. That the road had not been properly consolidated or formed before the metal or gravel was put on? Yes.
7226. What fault have you to find with it besides this? I think it is too narrow.
7227. Would its being too narrow affect it in such a way as to prevent its standing the traffic so well as if it was wider? Yes. On a narrow road the weights passing over it bulge it out and so cause it to give. This will always be the case where there is not sufficient width of road to keep it solid.
7228. Is it your opinion that the roads generally throughout the Northern District are too wide? No; on the contrary, they are not wide enough as a general rule.
7229. Is it not the fact that in many places the road is so narrow that two drays cannot pass each other without turning off on to the water tables? In some places.
7230. Is there any other reason why this Highland Home Road is not in a good condition? Yes; I object to the gravel used.
7231. Why? Because I do not consider that this gravel will ever make a good road, especially put on rough, in the way they have done here.
7232. Is it not the fact that the greater portion of the road between Maitland and Murrurundi is laid with gravel? Yes, such is the case.
7233. And that being the case, do you consider the roads to be made on a good system? No, I do not.
7234. What would you prefer? Metal, on pitching.
7235. Would not that be more expensive? Not in the long run; it would be found to be cheaper in the end.
7236. In what way? Because there would not be so much necessity for repairs.
7237. It would however involve an increased expense in the first instance, when the road is laid down? Yes; it is more expensive at first, but in the long run it will be found to be a saving.
7238. So then it is your opinion, that if a layer of metal on a layer of pitching was laid down at the Highland Home it would in reality diminish the cost of the road? Yes; if that had been done at first, that road would not have cost so much as it has done since.
7239. How long have men been employed on that road repairing it, and how many have been so engaged? That I do not know; it was completed before I went up.
7240. During the time you were there, how many men were at work on it? That I cannot say. It was not above once in a month, or once in two months, that I passed by that road.
- 7241.

- Mr. Alex. C. Bayley.
 3 Jan., 1862.
7241. There were men, however, continually employed on it? There was a maintenance man there, I know.
7242. There have been several contracts for the repair of this piece of road? Yes.
7243. And then there was a maintenance man put on it to keep it in order? Yes; but it always goes with the wet.
7244. Then it is not a good piece of road in wet weather? No. It is very good just now, but it will be as bad as ever when the rain comes on.
7245. Do you know the amount per mile that Parliament votes annually for the maintenance of the roads of the Colony? Yes; £50 per mile is voted for the Main Roads.
7246. Has that amount been judiciously expended? Yes, as far as it goes. It could not be spent better than in having men to fill up the ruts made in the road by the heavy loaded drays.
7247. Would that employ two men for every mile? No.
7248. But £50 a mile is a very considerable sum to lay out upon new roads? It is not much for a road; £50 a mile will not keep a road in proper repair.
7249. You are aware that contracts involving very large sums of money have been taken for portions of road over Warland's Range and the Murrurrundi Gap—can you say if good roads have been made in these places? Yes, it is a very fair road now, but there has been a good deal of gravel put on it.
7250. Is it gravel of a good quality? No, it is very often bad.
7251. Would it not be possible to obtain good stone for metalling anywhere near the Highland Home? There is some very fair stone to be had, but it is not the best.
7252. You say you may have attached your name to the testimonial to Mr. Collett, though you do not appear to be very sure about it; if you did so, what was your reason for so doing? The reason why I put my name to the writing was because of Mr. Collett being so long on the Northern Road, and the people knowing him got up this paper expressing regret at his leaving them, and that sort of thing.
7253. Do you consider mere length of service, or the proper performance of duties, that which most entitles an officer to praise? I did not venture into any question of the sort. There was nothing about the performance of his duties in the paper I signed.
7254. Did you attach your signature to it because of the length of Mr. Collett's services, without any reference to other reasons? Yes.
7255. It was not then because you considered his management of the roads to have been commendable? That was a matter that I did not take into consideration; I only signed as a friend; he was going away, and it was a kind of compliment to him; that was the only way in which I signed.
7256. Do you think that the general system of making and maintaining the Great Northern Road, or any portion of it, that has been pursued by Mr. Collett, has been commendable? The roads to the north are much better now than they were; of that there can be no doubt. In the valley of the Page, for instance, they are very much better than they have ever been.
7257. Do you approve of Mr. Collett's general management of the road? Well, I do not approve of the gravel at all.
7258. Is there anything else in the system of management that you disapprove of? I disapprove of the plan that is pursued in selecting pieces of road to make. I think there ought to be a system followed of making one piece of road permanently good before going to another. This running about from one piece of road to another only causes a deal of unnecessary expense. The plan I would pursue would be to begin at one end of the line, and go regularly through with it, making one portion completely before I went on to the next. This would be much better than going about from place to place, doing a little here and a little there.
7259. Then you think it would be better to consolidate the money, men, and labour, upon the worst parts of the road, and make them permanently good? Yes, and leave the other parts alone altogether. Even now, with all the money that is spent upon the Northern Road, the greater part of the traffic does not go upon the road at all. The bullock-drivers go through the bush from one part of the road to another, coming on to the road in the bad places.
7260. And the consequence of this mode of construction now pursued is that the road is not solidly made anywhere? No.
7261. Do you consider the road to be wide enough? No, I do not.
7262. Or the bridges? Those that are being built now are wide enough.
7263. Was not the Liverpool Range Road within the district of which Mr. Collett had charge as Road Superintendent? Yes.
7264. How long have you been employed on the northern line of road? From the 17th March, 1859, to the 20th August last.
7265. Where were you employed? I was at the Wollombi first; and then I went to the Falbrook Bridge, on the 1st August, 1859.
7266. Had the Liverpool Range contract been commenced when you first went on to the Main Northern Road? No, it had not.
7267. Were you asked by the Commissioner to take charge of that contract? I was directed to take charge of it.
7268. Is it usual in the Roads Department to place one person in charge of a contract that is being performed in a district of which another person has charge? Yes, where the work requires constant supervision it is.
7269. What other contracts had you charge of? I had charge of the Sandy Creek Bridge, of the Murrurrundi Bridge, and of the Falbrook Bridge.

Mr. Alex. C. Bayley.
3 Jan., 1862.

- 7270. What is the distance from Sandy Creek to the Gap? Forty miles.
- 7271. Then if you had to overlook the Sandy Creek Bridge, it would be impossible for you to be at the Gap to look after the works every day? When I took charge of the Sandy Creek Bridge all the most important work on it was done. All the piles had been driven, and there was only the superstructure to be done.
- 7272. How often did you visit the works on that bridge? I think I went there about four times.
- 7273. What was the extent of Mr. Collett's district when he was Road Superintendent? It extended from Morpeth to the Doughboy Hollow.
- 7274. What reasons were given you, or what instructions did you get for being placed on this work, in Mr. Collett's district? There were no reasons given to me. I was only told to go there and look after the work.
- 7275. Did Mr. Bennett, when he sent you there, say that you were to have the whole and sole control of the work? He did.
- 7276. And that Mr. Collett was to have nothing to do with it? Yes; I was to communicate directly with him on any matter that might arise.
- 7277. And not with Mr. Collett? No.
- 7278. Did Mr. Collett order you to make any alteration in that contract? No.
- 7279. Did you or Mr. Bennett condemn the gravel that was used on this contract? Yes; I did.
- 7280. What for? Because I did not think it good; I knew it would not stand.
- 7281. Was a moiety of the amount claimed by the contractor for this work withheld because of your having condemned this gravel? Yes; it was kept back until Mr. Collett passed it afterwards.
- 7282. When did he pass it? I could not say the day.
- 7283. But do you not keep an account of all these matters? I do; but that is in an old book that is full, and I have not got it with me. I can however give you the dates of the letters I wrote condemning the work.
- 7284. What are they? The first was the ——— 1860, and the other the 7th January, 1861.
- 7285. How long was it after this second letter that Mr. Collett came up and visited the works, and passed that which you had condemned? I think it was about the latter end of January that he came up.
- 7286. He had then assumed the position of Commissioner of Roads? Yes.
- 7287. Between the time of your writing the letter, and that of his visit of inspection, had any gravel been removed, and any fresh been substituted? No.
- 7288. What quantity of gravel had been laid down, what was the length of roadway on which it had been laid, and at what thickness was it laid? I think it was laid down upon about 7 to 10 chains of the roadway, but I am not quite certain.
- 7289. How was it paid for—by the load, or by the yard? By the cubic yard.
- 7290. And was it proper kind of gravel for the purpose? The specification says that it was to be good angular ridge gravel.
- 7291. Was it so? No it was not; instead of being good ridge gravel it was a kind of conglomerate of burnt stuff, all white.
- 7292. What was the difference in cost to the contractor between laying down this kind of gravel and furnishing such as had been specified for? It would have cost about 1s. 6d. per yard more to have got proper gravel.
- 7293. And what amount of money was involved in this alteration—at a rough guess? I could not say how many yards of it were used.
- 7294. But you can say, within a little, what amount of money was involved between the use of the good and the bad material? It is hard to say without knowing the number of yards.
- 7295. Did it make a difference of £500? No, not so much as that.
- 7296. When was this gravel spread, and who superintended the works at the time? Some of it had been spread when this first letter of mine was written; I was superintending the work at the time.
- 7297. Did you remonstrate with the contractor on the impropriety of his putting down such stuff upon the road? I did, and I also wrote to Mr. Bennett on the subject.
- 7298. And did he direct the suspension of the work? Yes; he ordered me to stop the spreading of any more of this gravel; and I believe that there is now in the department a letter from Mr. Bennett to Mr. Martindale, recommending that no payment should be made on account of this part of the contract until this stuff was removed.
- 7299. Did you intimate to Mr. Collett when he came up, that you had remonstrated with the contractor on his using this stuff? Yes; I told him that I had condemned it, and that Mr. Bennett had agreed with me. He said, however, that he thought it would stand; that there was a good deal of lime in it, and that it would bind well; on that account he passed it.
- 7300. Was the contractor a gainer to any large extent by having this gravel laid down in preference to that specified for? Not to a very great amount.
- 7301. But he was a gainer? Yes.
- 7302. What time elapsed between the time of Mr. Collett expressing his approval of the work and the proposal to further improve the road? It was improved in May I think.
- 7303. And this circumstance that you are speaking of took place in January? Yes.
- 7304. Was the contractor bound to keep the roadway in order after he had completed it? No, he was not.
- 7305. Was he not bound to keep any part of it in repair for a certain time after completion? Not by the original contract, but there was a subsequent arrangement under which this was done.

Mr. Alex. C.
Bayley.

3 Jan., 1862.

7306. What was that arrangement? He was to keep it in repair for six months, and was to receive £175 for the six months.

7307. Did he do so? Yes; he had men employed filling up the ruts with stones and fresh metal.

7308. Was this sum too much for the work done? There was no breaking up of the stones or raking over the metal so as to cover them properly. If this had been done the amount would not have been too much.

7309. Then the work was not done properly? He did it well enough for the first two months; the ruts were properly filled, and the stones were covered with metal, but this was not done afterwards.

7310. Were there a number of men employed keeping the road in repair? There was always one man employed, and for the first two months, during which the work was properly done, there were three or four men. They were then taken off, and I think only the one man was at work.

7311. I believe the road was in a very bad state almost immediately after it was passed? Only that portion of it that had the bad gravel on.

7312. Can you state when it was that Mr. Collett formally opened the Liverpool Range Road? I do not think that it was ever formally opened. We had the traffic on a portion of it in the November before it was finished.

7313. Can you say when it was that he finally took the road off the contractor's hands? I have not got the date here.

7314. Can you not give us some idea as to when it was? I think it was on the 1st of March; I am not quite certain, but I think that was the time that the maintenance man was to commence.

7315. How many days previously was it that Mr. Collett was upon the road and passed it? That I cannot say. I am not sure whether it was at the latter end of January or of February.

7316. Can you not speak with some degree of accuracy on this point—surely it was a matter that you must have borne in mind? I do not remember. I have the date in another book.

7317. Was it previous or subsequent to Mr. Collett receiving the testimonial? It was previous to the testimonial.

7318. You are sure of that? Yes, I am quite sure it was.

7319. Do you happen to know whether Mr. Martindale was very active in soliciting signatures to that testimonial? He never asked me. I only saw him with Mr. Weaver; and Mr. Weaver afterwards told me that he had subscribed to the testimonial and that Mr. Martindale had asked him to do so.

7320. Murrurundi is not such a very large place but that, if Mr. Martindale had made himself active in this way, you would have heard of it? He did not tell me that he was getting signatures. If he was doing so he would take good care not to let me know it.

7321. We have had a letter in reference to this contract laid before the Committee—let me ask you if you recollect Mr. Collett directing you to copy a letter he gave you, which copy you were afterwards to send to him in Sydney as if coming from yourself, in reference to the amount required for work, in addition to the contract? Yes, I recollect it perfectly.

7322. Have you a copy of that letter? I have already handed it in.

7323. At the time Mr. Collett asked you to write this did you make any remark to him about it? No.

7324. Did you not think there was anything strange in it? No, I thought it nothing more than a fair thing; I did not think that Mr. Martindale would gain anything by it.

7325. Do you think that this mode of procedure was the usual course for the superior officer of a department to adopt—to direct an officer under him to write him such a letter? It was not usual, because it had never been done before.

7326. You thought the proposal a fair one? Yes.

7327. Do you consider that Mr. Martindale was bound by it? Yes, I think so.

7328. In your experience have you ever known an analagous case? No, I never before received a letter of the same kind to copy.

7329. What has been the usual course? When extra work has been required I have been directed to make an estimate for it, and to send it in to the Sydney Office.

7330. And when you are told to do this you consider yourself responsible for the correctness of the estimate? Yes.

7331. Did you reconsider yourself in the present case? I did not. I acted under orders.

7332. Did you make any estimate of what the cost of the proposed alterations would be? Yes; I went over the work with Mr. Collett, and we considered the amount only a fair thing to pay.

7333. Did you estimate the quantity of work to be done, and the cost in accordance with the schedule of prices of the department? Yes; we went through it all, and considered it only a fair price for the work to be performed.

7334. Then you think there was nothing wrong in the transaction, but that it was merely an irregular proceeding? I never saw it done before or since.

7335. Did you ever know an instance of the Commissioner authorizing a deviation from an adopted line without first consulting the Superintendent in charge of that line? I did not.

7336. Do you consider yourself empowered to allot contracts to individuals without submitting them to public competition? No.

7337. Have you ever received instructions to allot work to individuals without public tender? No; nor do I consider that I have the power to do so.

7338. Have you ever done so, under orders or otherwise? No, I have never given a contract to any person; it has always been done by the Office. When I have thought a good

- good opportunity offered, I have written to the Office stating what it was, and they have returned me an answer, accepting it or not, as they thought proper.
7339. Do you consider it to be your duty not to sign a voucher unless you are first assured that there is the quantity of work for which the voucher is required? I am not authorized to sign a voucher unless I have first made a measurement of the work.
7340. And you have never done so, except in the one case of the £600? No, only in that case.
7341. And then you protested against being called upon to do so? Yes.
7342. *By Mr. Dangar*: You were the Superintendent of the Sandy Creek Bridge? Yes.
7343. Who was the contractor for the work? Mr. Martindale.
7344. Was it not Mr. Miller? No, he had nothing to do with it; he did the approaches.
7345. The chief part of the work was completed, you say, when you went there? Yes.
7346. Are you acquainted with Mr. Maclean? No.
7347. Are you acquainted with Mr. O'Donnell? Yes, I know him.
7348. Do you happen to know whether they made any complaint in reference to the piling of this bridge? No, I do not.
7349. Of what wood were the piles composed? Of ironbark.
7350. Was there any red gum used? Yes, a few pieces.
7351. Was there any of it decayed—hollow? No; none.
7352. And you consider that the work was executed in a satisfactory manner? Yes; Mr. Bennett saw it, and passed it.
7353. You have passed near Mr. Kleinsinger's place? Yes, I have.
7354. Have you observed a quantity of timber lying there, by the road side, the property of the Government? I have seen some timber there.
7355. Do you know what the object was of going to this expense of cutting and drawing this timber? I believe it was intended for a bridge.
7356. Are they now being used by a contractor for another work? I think they are.
7357. There are a quantity of slabs there also? I have not seen them; but I believe there are.
7358. Do you know whether a contractor has been allowed to use any portion of them for a work he has undertaken? I cannot say.
7359. They were brought there at the time Mr. Newcomen was overseer? I believe so.
7360. Are they used now? I could not say positively if they are, but I believe some of them have been used.
7361. *By Mr. Hoskins*: Have you superintended contracts in which Mr. Miller, of Seone, was the contractor? Yes, one.
7362. What was it? The approaches to the Sandy Creek Bridge.
7363. Was it a large contract? No; only a small one.
7364. What was its amount? Ninety odd pounds.
7365. Was that let to him by public tender? No.
7366. It was allotted to him on his own private tender? Yes.
7367. That is the only contract of Mr. Miller's that you have been connected with? Yes.
7368. *By Mr. Dalgleish*: There might be some misunderstanding in respect to one question I have asked you. In answer to my question as to the comparative cost of long and short bridges, you said that the difference was one-fourth per foot run. Am I to understand you that the short bridge costs a fourth of the price of the long one; or, in other words, if the short one costs 1s. per foot, the long one will cost 4s.? No; by the difference of one-fourth I mean that if the short bridge costs 1s. the long one would be 1s. 3d.
7369. So that if the short one costs £2 per foot run, the long one would cost —? One-fourth more; or £2 10s. per foot.
7370. By the non-enforcement of the consolidation clause you say there would be a saving to the contractor of £300 a mile? Yes.
7371. How much would that make on the contract? There are about two miles in the contract.
7372. So that the non-enforcement of the clause would put £600 in the contractor's pocket? Yes.
7373. *By Mr. Garrett*: Are not 2,800 lineal yards of pitching 18 feet wide, with an average thickness of $7\frac{1}{2}$ inches equal in quantity to 3,500 yards of broken road metal? That is a matter of calculation.
7374. The original quantity of metal to be provided was 3,520 yards? I think it was.
7375. And the price was to be 6s. 6d. per yard? Yes.
7376. And the price for the pitching, of which there was to be 3,500, was to be 5s. 6d. per yard, the value according to your estimate? Yes.
7377. In addition to the pitching are there not 1,200 yards of broken metal at 6s. 6d.? Yes; but that was extra.
7378. *By Mr. Dalgleish*: And paid for as extra? Yes, included in the £700.
7379. In addition to the 1,200 yards of metal, there were 1,300 yards of shale for blinding, at 3s. 6d. per yard? Yes, the metal was to be blinded. I do not think that any precise price per load was fixed; it was made up in a lump sum.
7380. What is about the price per load of shale? The price varies according to the distance it has to be drawn.
7381. Is 3s. 6d. per load a high estimate for the blinding? I think it is a good price.
7382. When you say a good price do you mean that it is a fair price, or one at which the contractor would be well paid? I think he would be well paid at that.
7383. In comparing the cost of the blinding and of the metal with the cost of the pitching that was substituted, what would be the gain or loss to the Government by the change? I could not answer that question; it would require me to go into a long calculation.

Mr. Alex. C.
Bayley.
3 Jan., 1862.

- Mr. Alex. C. Bayley.
3 Jan., 1862.
7384. *By Mr. Lucas:* The object is to bring out the difference of price in these articles—the price of the metal, the blinding, and the pitching, as against the metal for which they were substituted? I could not answer the question.
7385. What did you say that the agreement stated that the price of metal was to be? It was to be 6s. 6d. per cubic yard.
7386. Then if the metal was worth 6s. 6d., what would the pitching be worth per cubic yard? About 3s.
7387. There was a letter produced here which you wrote to the department, sending in an estimate for extra work required, and stating the price at which it would be done? Yes.
7388. Did you receive a copy of that letter from the Commissioner? No; I received the original letter to copy.
7389. And you were ordered to send it in as if it originated with you, when in fact it originated with the Commissioner? Yes.
7390. Have you ever before received such a letter as that to copy? No.
7391. Has it ever come to your knowledge that a letter of the same kind has been received by other overseers or Superintendents? No.
7392. And you never had another to do? No; that was the only one I ever had.
7393. You have had some experience in road-making—do you think that a road ought to be well consolidated before metal is put on it? Yes, I think so.
7394. Have you ever known an instance of persons waiting till a road was soft before they put metal on it? No, I have not.
7395. Is not the object, in pitching the road, to get a good foundation for the metal? Yes.
7396. And even when pitching the road, would you not endeavour also to get as good a foundation as possible for the pitching? Certainly.
7397. Does not pitching tend in a great measure to drain the road? It does.
7398. There are always cavities or interstices between the pitchers through which the water drains, and so keeps the road dry? Yes.
7399. Suppose that you were superintending the making of a road, and that you had the works entirely under your own sole control and management, without being responsible to any one, would you not in the case of a cutting to form an embankment, think it necessary that the embankments should be well consolidated before you commenced macadamizing it at all? Certainly, I should think so.
7400. What is the height of the embankment in this contract? It varies.
7401. What is the highest part of it? About 6 feet or 7 feet.
7402. Supposing the earth for the embankment to be drawn solely from the cutting, and shot into the embankment, would not that earth be likely to sink a foot or eighteen inches? It would sink a great deal; about four inches to the foot, if it was barrowed or shovelled there.
7403. How long have you been engaged in the department? About five years.
7404. Were you employed in it during Mr. Bennett's time? I was.
7405. Was it not the custom in his time to cart the metal and put it in heaps by the roadside, and then measure it before it was put on? Yes, that was the way it was done in Mr. Bennett's time.
7406. Was not that the usual and ordinary way? Yes; that was the way I measured the metal on the Gap.
7407. *By Mr. Dalgleish:* Do you mean to say that an embankment would sink so much as four inches to the foot? Yes, I think it would if the stuff was shovelled or barrowed; that is, supposing there is no rain during the time the embankment is being put up.
7408. But we are not speaking of shovelling? It was all shovelling or barrowing in this case.
7409. *By Mr. Lucas:* Did they not use carts to tip the earth over? No; there was no lead to require the use of carts.
7410. How was that? All these embankments were sidlings, so that the earth cut out from one side of the road was thrown over to the other to make the embankments.
7411. Then one half the road was solid? Yes.
7412. And the other half was embankment? It was.
7413. And that particular kind of road is one that will shew the difference between the solid road and the embankments almost immediately? It would.
7414. Is it not usual in putting metal on roads to put it on in two layers? It is.
7415. Supposing the specification to be for nine inches of broken metal to be laid on a road, is it not usual to put five inches on first, to allow them to consolidate, and then to put the other four inches on top of them? Yes, that is the way it is done.
7416. If work is done in that style what would be the difference to the contractor as compared with putting it all on in one layer? The only difference would be the difference of time between the laying on of the two layers.
7417. He would be kept out of his money during that interval? Yes.
7418. That is, if the metal had to be measured in heaps on the road? Yes.
7419. In the specification here it says that all the stone for each layer shall be broken and measured in heaps before the layer is spread; and that the first layer shall be spread before the second layer shall be begun to be broken—was that carried out? I do not know; I was not there when the metal was put on, though there was some metal broken when I was there.
7420. Would it make any difference in the price of a contract, if, instead of spreading and putting on the metal in two layers, as specified here, the contractor was allowed to put on the

the whole nine inches at once? It would only make a difference in time; it would allow him to get rid of his contract all the sooner.

7421. What is your opinion, as a practical road-maker, of putting the whole nine inches of metal on at once, instead of at twice—suppose you were in a position in which you were responsible to no person, what plan would you adopt? I would put it on at once.

7422. You have no doubt, however, as to the desirability of having a road well consolidated before it is macadamized? No doubt about it whatever.

Mr. Alex. C.
Bayley.

3 Jan., 1862.

TUESDAY, 7 JANUARY, 1862.

Present:—

MR. ARNOLD,	MR. GARRETT,
MR. DALGLEISH,	MR. HOSKINS,
MR. DANGAR,	MR. LUCAS.

WILLIAM FORSTER, Esq., IN THE CHAIR.

W. R. Collett, Esq., further examined:—

7423. *By Mr. Dalgleish:* I think I was asking you, when your evidence was interrupted, to give way to Mr. Bayley, with regard to the officers in your department? Yes.

7424. I think you stated that the Engineer is next in authority under yourself? The next in authority as respects the roads.

W. R. Collett,
Esq.

7 Jan., 1862.

7425. In case a dispute arose between the contractor and the Superintendent, would you consider it any part of your duty to consult with the Engineer as to the matter in dispute? Not as regards the roads, but as regards the bridges.

7426. Did you consult that officer with regard to the bridges? I did consult that officer with regard to two bridges.

7427. Did you consult with him prior to paying the contractor for the bridges that were complained of? It had no reference to payment; he was consulted in the first instance about whether we should have three piles or four.

7428. You have not consulted him on any of the cases which have arisen from your consideration of Mr. Quodling's incompetency? He has nothing whatever to do with it; nothing whatever.

7429. If you were taken sick, or were unable to perform your duties, who would have to do with it? Some other officer in the department.

7430. What other officer in the department? Either the Chief Clerk, the Engineer for Roads, or the Assistant Engineer for Bridges.

7431. How long have you been acquainted with the Chief Clerk? Only since I have been in office.

7432. Do you know his antecedents? Yes, pretty well.

7433. How long experience has he had in the roads? I cannot say how long; he was a second-class Superintendent of the Southern Road before he was appointed Chief Clerk.

7434. You consider that he would be the most proper person? You did not ask me who would be the most proper person; you asked me who would take my place.

7435. I understood you to say he would be the most proper person? I did not say so.

7436. I ask you now who would be the most proper person to fill your place, from his fitness? I stated either the Chief Clerk, the Engineer for Roads, or the Assistant Engineer for Bridges; it would entirely depend upon what he had to do.

7437. I asked you, in a previous question, whether you had consulted with the Engineer on account of the roads, and you said, not on account of the roads but of the bridges; did you consult the Engineer with regard to this dispute? What dispute?

7438. The dispute arising between the contractor and the Superintendent of Roads? There was no dispute.

7439. Was there no dispute about the consolidation of the road? There was no dispute whatever.

7440. You know the tendency of my question—you know the consolidation has been called in question, and that one witness has stated that the contractor had saved £300 by the clause of the contract not being enforced—seeing that the Superintendent reported that this clause had not been carried out, did you feel it to be your duty to consult with the Engineer for Roads respecting it? Certainly not. I deny it in toto—excuse my saying so. I do not call in question your statement, but I deny that there was any dispute between the contractor and myself.

7441. I did not say between the contractor and yourself, but between the contractor and the Superintendent? There was no dispute. I have evidence, if I am permitted to bring it, that they never spoke together. The only record I have of anything of the kind is the letter of 16th August, which I do not recognize as official.

7442. I am not asking you what you recognize as official? I cannot admit what is not the case. If I were allowed to produce the evidence I should prove that the Superintendent and contractor never spoke, so far from remonstrating upon the subject.

7443. What called the contractor to Sydney to enter into a personal explanation with yourself? I beg pardon, he was not called to Sydney to enter into personal explanations with myself; he had contracts on the Western Road.

7444. What called him to Sydney to your Office? He came to the Office—I cannot answer the question.

7445.

- W. R. Collett, Esq.
7 Jan., 1862.
7445. What called him to your Office, unless it were this dispute between himself and the Superintendent, respecting which he made a personal explanation to you? You assume that.
7446. What did you assume—did not you write a letter to the Superintendent upon the matter, stating that in consequence of what had passed in this personal interview, the Superintendent's memorandum or his letter of complaint was not to be considered; that owing to this personal explanation everything was arranged to your satisfaction? I should like to have the letter read; I do not think it contained half that.
7447. The letter has been read? I have not heard it.
7448. You were present? I beg your pardon—I admit that the contractor had a personal interview and explained the matter.
7449. This personal explanation superseded the written complaint of the Superintendent? No, there was no superseding in the matter; he personally explained to me circumstances of which I was aware before. Having visited the works I did not require this remonstrance from the Superintendent. The contractor had carried out my instructions about stumping.
7450. In looking over your evidence I see some little matters which appear to be contradictory—in the first part of your evidence you stated that you considered Mr. Bayley was Mr. Quodling's superior officer? I consider so still.
7451. In what light could you consider that Mr. Bayley was Mr. Quodling's superior officer, seeing that Mr. Bayley was employed on only one portion of the line over the whole of which Mr. Quodling had the superintendence? If Mr. Bayley was employed on only one inch he was still Mr. Quodling's superior officer as far as ability went.
7452. Although I cannot now refer to the question, you stated that Mr. Quodling was Superintendent over 135 miles of road, and afterwards when I asked a question you stated of your own free will that it was not 135 miles? I state that it is not 135 miles.
7453. In the former instance, without any question being asked you in reference to that point, you said that Mr. Quodling had the superintendence of 135 miles of road? According to his own statement.
7454. I must find the question? It had been re-measured; it was originally 135 miles, but I had shortened it 14 miles.
7455. Had you shortened it that distance in the interval of giving evidence? I stated positively that Mr. Quodling's statement was wrong as to the 135 miles.
7456. You have, in several instances, stated that Mr. Quodling was perfectly capable of measuring, and in some other instances that a boy could measure what Mr. Quodling had to do; in what way, and from what did you infer, from the first, that Mr. Quodling was unable to measure the work in his district? I never said anything about from the first—I never used the words "from the first." I say he was competent to measure, and that a boy could do it; that is what I said, and I say so still.
7457. In answer to question 245 you say, "I need not say here anything about his incompetency, but it was impossible for him to superintend the works?" Exactly so.
7458. What did you mean by "I need not say here anything about his incompetency?" I did not wish then to say anything about his incompetency—to mix up the subjects together. I did not wish then to say anything. But I must say it is rather an unusual proceeding to cross-question by reading from printed evidence which I have not been allowed to see. I have seen examinations conducted before Committees at Home ———
7459. *The Chairman*: I must beg you will make no comments? This has never been given into my hands. I have had no opportunity of seeing it; but I must say it is a different proceeding from what I have been accustomed to, and I have seen something of Committees at Home, to cross-question me as to a number of questions put to me three weeks ago. My evidence has been interrupted five or six times, and is incomplete, but when completed I will stand by it; but to put questions to me at the commencement of the inquiry, in order to turn them against me in the latter part of my evidence, I do not think is fair. I have begged to be allowed to put in papers which are necessary to my case, and this has been repeatedly refused.
7460. *The Chairman*: As to whether they are necessary or not the Committee are to judge? I think for a witness not to be allowed to give in evidence what he considers to be material is unusual.
7461. What is it you complain of now? I complain that certain questions, numberless unnecessary questions, are put to me; whereas if you will allow me to hand in certain papers they will explain these matters; and by these papers I will abide, and will submit to any cross-questioning upon them. These papers will furnish evidence which, though it may not be to your satisfaction, will be to the satisfaction of the world at large, and a third of the time will be spared which will otherwise be lost in questioning me upon these various points.
7462. Have you any papers you wish to put in? I have a great many.
7463. Let us see what they are? If I hand them in I expect them to be read and to be acted upon.
7464. I do not consider you have any right to dictate to the Committee what they shall do; I consider your remarks impertinent, and will not allow this sort of remarks to be made. You say the questions are unnecessary—that is not your business to judge? When I used the word "unnecessary" I meant that they would not be necessary if the papers were produced, as they would explain the various matters and save time and trouble in putting the questions. I presume that if I put in a written statement which contains all the facts it will be better than to elicit the facts by slow degrees from me.
7465. I have no objection to receive any papers that are necessary to the case? I have three times presented the papers, and the reading of them has been refused to me, and they are in my possession at the present moment. I have three times handed in these reports,
and

- and they have been handed back to me; they bear very materially upon the present question. W. R. Collett, Esq.
7466. Are the papers you wish to hand in bearing upon the present question? I do not know what question Mr. Dalgleish is asking me; but they are cross-questions upon my previous evidence. 7 Jan., 1862.
7467. I cannot control the questions of Mr. Dalgleish? I wish to answer any questions that may be put to me, but I say it is unusual to print evidence and to cross-examine a witness upon that printed evidence.
7468. *By Mr. Hoskins*: You said that you could teach a boy in a week to do what Mr. Quodling did in measuring work? In measuring work.
7469. What else had he to do? To attend to the whole of his line; to see that the overseers and men did their duty.
7470. What is the duty of the overseer? To measure the work.
7471. And a boy could be taught in a week to measure the work? Yes.
7472. What else had he to do? To measure stones.
7473. The overseer's principal duty is to measure work? His duty is to measure the work.
7474. Has he any other duty? Yes; to send in returns of the work to the Superintendent—he has a great deal of writing.
7475. Is that a difficult acquirement? Certainly not if a boy could do it.
7476. What salaries do the overseers receive? £255 a year.
7477. And the Superintendents? £600 and £400.
7478. There is no part of the duties difficult of acquirement—the overseers' and Superintendents'? Not as far as measurement is concerned—do not mix up the two things.
7479. You say measurement is their duty? One of their duties.
7480. Did I not understand you to say that the Superintendent had merely to measure work, and that you were responsible? I did not use all those words—I say the Superintendent has to check the measurements.
7481. *By Mr. Dalgleish*: I must refer to this printed paper again. At 243 the Chairman puts this question—"What were called the Doughboy Diversion works were included in the portion of the road of which he had the superintendence?" To which you have answered, "It was included in the 135 miles of his district"? Yes.
7482. No one asked you about the length of his district or the number of miles of road of which he had charge? Mr. Quodling stated the previous day —
7483. What he did on the previous day had nothing to do with your answer? I believe I have got to say yes to that—there are two questions mixed up in one—yes is it or no. I am not aware. Do you ask whether I did say so or did not say so.
7484. You say in this instance that 135 miles was the length of his district? I explain that it was the length of his district one year, but not another, the road having been shortened 14 miles.
7485. When I asked you question No. 344, in which I did not say one word about the length of the road, "I must still beg to say you are not attempting to answer my question?" you replied, "I beg your pardon, I do not wish to evade your question. The duty of Mr. Quodling was to undertake the superintendence of what he states was 135 miles of road. I do not say it was?" It is 121 miles of road, and yet it was 135 miles of road. I will explain—by the old road or mail track it was 135 miles, and the new road to Armidale is 121; it makes very little difference whether I say 135 or 121 miles; I consider his duty to be over 121 miles, and I still consider it to have been so.
7486. Do you know what were the antecedents of Mr. Shairp? He was first in the Office; he was then promoted to be Superintendent of Roads in the Yass District; and then upon Mr. Walker's promotion to the Railway Department, he was taken back into the Road Branch, as Chief Clerk.
7487. Do you know what trade or profession he was previous to being taken into the Government service? I knew nothing about him.
7488. The Chief Engineer for Roads—do you know whether he is an engineer, brought up to the profession? No.
7489. The Engineer for Bridges—do you know how far he has received any education to fit him for that office? I do not know what you mean by "education"; I know both are competent, and I think ten years' experience ought to make any one so, if he applies his mind to it. A man can learn quite as much in his mature age as he can in his youth.
7490. Who is the next officer after the two Engineers—the Superintendents at £600 a-year? They are totally distinct officers—one is an officer in Sydney, and the other an officer on the spot. I should be sorry to give either one or other precedence.
7491. Are these Superintendents of the Main Road fitted by education or experience to perform the duties of Superintendents at £600 a-year? I imagine generally they are fully qualified. I believe I have one of the best staffs in the Colony.
7492. Did you take part of the Southern Road under your superintendence some time ago? Yes.
7493. Did you make considerable improvements in it? I have been told so.
7494. Under whose superintendence was the road previously? I suppose you are referring to Bargo now—you must refer to some spot.
7495. I am referring to that spot of which you say you had the charge? I ask what portion you refer to—do you refer to Bargo.
7496. We will call it Bargo? Do you call it Bargo?
7497. We will say Bargo—that is the portion you alluded to? You do say Bargo; that was previously under Mr. Moggridge.

W. R. Collett, Esq., 7498. And was for a long time almost impassable? It was very bad when I came into office; I had never been there before.

7499. You took the personal superintendence of that road—you took it under your immediate care? Yes.

7 Jan., 1862.

7500. And succeeded in making a good road of it in a very short time? I made a very passable road.

7501. What does that say for the experience of the Superintendent or his knowledge of his business, to have been so long in charge of the road, and not to be able to make a good job of it, which you succeeded in doing? That may be explained by my having full power to act, which he had not. It does not detract from his credit, because as Superintendent of the Southern Road his power was crippled by the previous Commissioner, but as Commissioner I had full power.

7502. You do not know whether he was fitted by previous education? I know he was fitted.

7503. By previous education? His testimonials were satisfactory; he came out as an engineer from England in the same ship with me.

7504. He is an engineer? Yes; I cannot swear to what he was, but his father was much connected with coal mining, and he had had knowledge of engineering and road-making in France; these two facts I know.

7505. You know Mr. Bayley—and you consider him an efficient officer? I will answer the first question, and I think the second does not follow; I do know Mr. Bayley.

7506. How long have you known him? I have known him for the last three years, and I knew him before, some eight or nine years ago.

7507. You have stated that you considered him an efficient officer? As compared with Mr. Quodling.

7508. Only by comparison you considered him efficient? Only by comparison.

7509. Did you know anything of his antecedents? Not so much, as I heard him say in this room, that he was in Jamaica previously; I knew he was Superintendent of Bridges in Moreton Bay.

7510. Under this Government? Yes; I consider him an excellent Bridge Superintendent, and although begging the question, I do not consider him an excellent Road Superintendent, and I never recommended him as such. I make a great difference between the two Superintendents, the one having charge of a local work, and the other being over work extending a hundred miles and upwards.

7511. You have stated that you considered Mr. Bayley more qualified to look after engineering work than Mr. Quodling? Certainly.

5712. Do you consider Mr. Bayley an engineer? I consider that he made an excellent bridge-builder.

5713. Are you aware whether his experience has been gained in the service of the Colony? I imagine that his experience has been gained in the service.

7514. Do you consider that it is proper the Colony should pay persons to acquire experience to fill these offices? I consider that there is a very great dearth of persons competent to fill the office of Road Engineers and overseers; it is a class of people that does not exist here.

7515. Do you know what the works at Newcastle are? Yes.

7516. Do you know the bridge across the Harbour to the Abattoir? Not at Newcastle.

7517. No, here at Sydney—the pier at Newcastle and the bridge from Pyrmont to the Abattoir? It is a pile bridge, I believe. I have not examined it particularly.

7518. Would it require more ability on the part of a person to superintend such a bridge as that, or as much, as to superintend such bridges as have been erected in the part of the country where Mr. Bayley was stationed? Considerably more experience in the Dough-boy works.

7519. You say there is a great dearth of persons qualified to superintend these works? Yes.

7520. Are you aware that the gentleman who superintended the work at Newcastle, and who afterwards superintended the bridge to the Abattoirs, is in the receipt of only £250 a year? No, I am not aware of anything of the kind. It is too low if it is the case. Allow me to state that I believe there is a list of a hundred or a hundred and fifty applicants for the office of overseer, but the Minister has the greatest difficulty, after referring them to me for examination, to find persons sufficiently qualified to fulfil the duties, and much more so in the case of Superintendents; for it is not merely required that they should be gentlemen possessed of engineering knowledge; there are many other things required; for instance, there is integrity.

7521. Mr. Hawkins stated that he was a tanner previous to being taken into the Government service? Very likely.

7522. Do you think his previous education would have fitted him for the superintendence of roads? Certainly not.

7523. Then the Colony had to pay for all his experience? I do not know that the Colony had to pay for all his experience, for he was very well as a ganger over men, but very bad to have the supervision of a bridge.

7524. Would you consider him qualified to take charge of the building of a bridge, especially with reference to the stone-work? Certainly not.

7525. In speaking of that bridge the other day, you said some report had reached you that it might have been built by a tailor? I beg to retract that expression on behalf of the gentleman who made use of it. I do not think I was justified in repeating it.

7526. Would not a tailor be as likely to prove a good overseer over a bridge as a tanner? As the letter in which that expression occurred was a private and not an official one, I beg to withdraw it, and to apologize to the gentleman who wrote the letter for having used it.

7527.

7527. Do you not think a tailor would make as good a Superintendent as a tanner? I think neither of them would make a good Superintendent. W. R. Collett,
Esq.
7528. Are you aware whether the bridge was built according to the specification? I do not imagine that any specification could have three stones laid one over the other without any bond. 7 Jan., 1862.
7529. It was to be rubble work, was it not? There was a mixture of rubble and ashlar work; I could not say whether you would call it ashlar or rubble work.
7530. Did you inspect the bridge after it was built? I inspected the piers while they were building; at least one pier was finished and another was commenced.
7531. Did you find fault with it? That it was not carried out. It was an extraordinary thing that, although I made two appointments to visit the bridge, when I went there the contractor could not be found, although I know he was in Tamworth.
7532. Did you make any memorandum about the bridge not being carried out, or take any steps to alter it? I had no occasion to make a memorandum; my memory was sufficient for that, and I had to report to nobody. I made inquiries at once respecting the foundations of the bridge; the foundations were built before I was in office, I beg to state.
7533. You made inquiries concerning them? I made inquiries concerning them.
7534. Were they satisfactory? While the inquiries were being made the flood came, and there was no necessity to make inquiries, for the thing spoke for itself. There is a great deal of correspondence on the subject of the Bendemeer Bridge in the Office, which resulted in the present piers being condemned.
7535. Would an unforeseen flood of that description, under any circumstances, with piers similarly shaped, and with the mortar green, have been subject to the same misfortune? The mortar had no business to be green.
7536. Will you have the kindness to state why? Will you repeat your question?
7537. Provided any other bridge, with piers of the same formation, were built of rubble, or after the same specification, and with the mortar green, would it have been subject to a similar accident or destruction that has fallen upon Bendemeer Bridge, if it had been exposed to a sudden flood? Similar causes produce similar effects. I understand you to ask me whether if a bridge were badly constructed as this was, it would be washed away. I answer, if it were badly constructed it would be washed away.
7538. Had you reported, prior to the bridge being washed away, that it was not to your satisfaction? I did not report.
7539. When you found the work was not to your satisfaction you made no written memorandum? I wrote by the clerk to the Superintendent that the work was to be taken out of the hands of the contractor, unless it were properly done.
7540. Was any portion of it at that time improperly done? The foundations were under water; it was difficult to see the foundations. The work did not give me satisfaction at all.
7541. What portion did not give you satisfaction? What I may call the north pier did not give me satisfaction.
7542. Did you order it to be taken down? No, it was under water, so that I could not examine it as well as I wished.
7543. The superstructure was above water? No.
7544. The stone was altogether under water? Yes; and nobody was working at it, although the river was tolerably low. I was not satisfied with the cutting of the stone that was above water.
7545. Was the coffer-dam taken away before the stone was above the level of the water? The coffer-dam was there.
7546. If the coffer-dam was not taken away, how was it the stone was not dry? That was part of my object in desiring to see the contractor. I stayed there upwards of an hour when I was on my way to New England, and I then left, saying that I should be back in ten days. On my return I did not meet the contractor, and I can only say that Mr. Quodling did not take the slightest interest in the matter, or if he did, it is my belief that it was to tell the contractor not to be there.
7547. Did you not consider it was consistent with your duty to order the foundation to be taken up and relaid? No, I think it was not exactly my duty.
7548. Whose duty was it? The Superintendent's.
7549. Even after your inspection? I inspected that among other things in the neighbourhood.
7550. Did you give orders? To have the foundation taken up?—Certainly not. There was not a man at work at either time I went there, and I wished to see the contractor about it.
7551. Your objection was to the fact that the men were not at work? That the contractor neglected the work.
7552. Not to the bad work? Not to the bad work.
7553. You did not object to the foundation? I objected to the foundation being on shingle with cement, but it was no foundation of mine, it was laid before I came into office. It would not do for me to upset everything that Mr. Bennett had done, immediately I came into office. It would not do for me to go diametrically against a man who was an engineer, and who had carried out many scientific works. I do not wish to cast any reflections upon Mr. Bennett.
7554. Were the foundations washed away by that flood? No.
7555. What was it that was washed away? The pier was built where the bank sloped into the river; that is to say, there was no water between the pier when it was built; subsequently the flood came, tore away the bank, and left the pier as a kind of island, and did considerable damage. I beg to say that I state this all from report, as I have not seen it.

- W. R. Collett, Esq.
7 Jan., 1862.
7556. Would Mr. Quodling be in any way responsible for that? I think through his overseer he would be responsible. I would be sorry to say it was the fault of Mr. Quodling; the building was wrong in the first instance.
7557. Would not the building be erected from a plan? Yes.
7558. If the plan were wrong, would Mr. Quodling or the overseer be to blame? Not so far as carrying out the work according to the specification was concerned, certainly not.
7559. That is his duty, I presume? Yes.
7560. So that when you visited the work, and found the pier in that relation to the bank, was it not more your duty to interfere than Mr. Quodling's, to see that an alteration was made? I stated before that the pier had not been commenced to be built.
7561. If it were not commenced to be built, it was the more under your supervision, was it not; and if anything wrong existed, more open to your correction? I had very little to do with it. I did not take it under my immediate charge; I have visited the place only twice, and that was before the flood. When I visited it it was not finished. I called for a statement from Mr. Quodling, which was unsatisfactory; and another engineer has been sent up who has condemned the site.
7562. Mr. Hawkins has stated that you visited the bridge when it was finished? I cannot help what Mr. Hawkins has stated; I did not.
7563. Was Mr. Quodling responsible for the site in which the bridge was built? Not in any way.
7564. In what did Mr. Quodling's incompetency consist with reference to the Doughboy works? I think I have stated pretty nearly before what my opinion was; that he was not a person in whom I could have implicit confidence in conducting a work with the engineering difficulties of the Doughboy Diversion; to do that properly it would require a man's undivided attention, and he had a large district to look after. Although I was Superintendent of the whole Northern District, I did not object to Mr. Bayley having the superintendence of the work on the other side of the Gap, and in the same way I thought Mr. Quodling need not have objected to his superintending the works at the Doughboy.
7565. If you considered Mr. Quodling incompetent, how was it you sent a letter to him directing him to take charge of the whole work from Mr. Bayley, as stated by him in his letter dated 16th August, 1861 (*referring to letter marked C., p. 8*)? That is only his letter.
7566. This is his letter in answer to your order to take charge of the whole work? It is no answer; it is perfectly uncalled for; it does not even refer to my letter.
7567. This is stated to be an answer to a letter written on the 12th instant:—"In compliance with your instructions, I took the Doughboy Diversion works over from Mr. Bayley on the 12th instant?" Very well, that is an answer so far, the rest is uncalled for.
7568. Is it uncalled for, when a gentleman who takes charge of work finds the work is not in a position that he considers right to make a report to that effect? His previous reports contradict it. I shall put in all his previous reports, and these must be taken together; his previous reports speak well of the work.
7569. Had he charge of the Doughboy works? Of the earth-works he had.
7570. What are the engineering works? The engineering works—these are the masonry, with a very heavy retaining wall.
7571. Had he charge of that? No, Mr. Bayley.
7572. Where did Mr. Bayley obtain any experience with regard to masonry? He built all the retaining wall on this side of the Gap, previously to Mr. Bennett's, and to my satisfaction; he also superintended the building of the stone piers at Falbrook Bridge—a very fine piece of masonry.
7573. Do you not think you could obtain the services of an educated carpenter or mason fully competent to carry on correspondence and to superintend such work, for the same salary that you pay this gentleman who has had no previous experience? I know nothing about it.
7574. You stated, a few minutes ago, that you found it impossible to get really efficient persons to carry out these works? I do not think it is usual to take common masons and carpenters to superintend works of this kind.
7575. What do you call common masons and carpenters? You said so.
7576. I did not—I said educated masons and carpenters? I have never met with them.
7577. Mr. Shairp is an engineer by profession? I never knew it.
7578. If so he would have been a common engineer when you took him—have you, although he was a common engineer, found him competent to fulfil the duties of Chief Clerk? Very competent.
7579. Could not a common mason or carpenter fill the office of overseer? A common mason or carpenter can earn £200 or £250 at his profession, and that is all these persons get. I acknowledge that persons in the profession have risen from the ranks. I presume Mr. Coghlan, the Superintendent, is a person who in his early life was a common bricklayer or mason, and I do not esteem him the less on that account; but I do not know where to look for such persons—they are very few.
7580. You were examined some time ago before a Committee of the Legislative Assembly? Yes.
7581. You then expressed a great objection to be under the orders of common blacksmiths, carpenters, &c.? I do not know that I used the word "common."
7582. I have the word here; I find the expression is "common"? "Common" does not imply any discredit to the persons to whom it is applied; it simply means general.
7583. You use it in the same way as the term "common sailor"? I do not. I make a distinction between persons having a large foundry like the Messrs. Russell and the man who shoes my horse, yet I presume they are both blacksmiths. 7584.

7584. In the latter instance the person would be a common blacksmith? Very well.
7585. There is no special ground of incompetency you have to charge against Mr. Quodling? I have stated in my previous evidence that the ground of the charge of incompetency was, that I gave orders with reference to a particular cutting, which he either would not or could not carry out. The paragraph in my letter refers to this cutting which he did not measure, and I presume therefore that he could not. He has now given his measurement to the Committee, and I will prove his measurement to be wrong; and I propose to shew that there were not 14,300 cubic yards in the cutting.
7586. *By the Chairman*: You say this is the only instance? The only instance in which I have charged him publicly with incompetency. I wrote the letter which Mr. Shairp copied.
7587. *By Mr. Dalgleish*: Have you any papers shewing the amount of work in the big cutting? (*The witness produced a memorandum book.*)
7588. What book is that? Mr. Hannington's.
7589. Are these Mr. Hannington's measurements? Yes.
7590. You are convinced that Mr. Hannington's measurements are right? No, I am convinced that Mr. Hannington's measurements are wrong.
7591. I thought you were going to hand them in to prove that Mr. Quodling's measurements were wrong? Yes.
7592. I thought you said that Mr. Hannington's measurements were wrong? Yes, so they are; but they prove that there could not be 14,300 cubic yards of cutting there.
7593. Can you hand in a correct account? I can hand in what I paid, which I presume to be the correct account. That is one of the accounts I will hand in at the completion of my evidence.
7594. Will you hand in now an account shewing that Mr. Quodling is wrong in his measurements? (*The witness handed in a memorandum book.*)
7595. Is that Mr. Hannington's measurements? Yes.
7596. You say that is not correct? Because it is in excess.
7597. *By Mr. Hoskins*: Have you made an accurate measurement? I have made it myself 12,000 cubic yards.
7598. How many yards of that is rock? It is paid for at 1s. 10d. rock and shale—not shale, rock and earth.
7599. How much of the total quantity is earth? I do not know.
7600. Nor how much is shale? No.
7601. How then can we compare it with the other? It is all at 1s. 10d.
7602. Earth, rock and shale? Everything; the big cutting was to be 1s. 10d. per cubic yard.
7603. Was that to be according to the specification? No, extra work entirely. The big cutting, which was in lieu of the two bridges, was to consist of so many cubic yards of earth and rock at 1s. 10d.
7604. *By Mr. Dalgleish*: Did you not receive a report to say that one side of the road was slipping? It could not slip—it was in the solid.
7605. Did you receive a report to the effect that on one portion of the Doughboy works there was a slip of the road? No; and if I had I should not have taken any notice of it, as it could not be true—it was solid.
7606. I thought some portion of it was not solid—that a portion of it was cut into the hill and a portion was embankment? No, the whole was in the solid rock.
7607. What portion of the road is that which is partly in the solid and partly made? The whole of the road is in the solid; that is to say, the road in the big cutting is twenty feet wide, but with the embankment it is about forty feet, but I do not consider the portion where the dirt is thrown down as the road. The original plan was to have a fifteen feet road cut into the solid and five feet thrown out, but I said "This is a very dangerous road," and I had the whole width cut into the solid.
7608. You agreed for it in the solid at a lump sum? I agreed for it at the yard.
7609. I thought you agreed for a lump sum? Not at all. I agreed to pay 1s. 10d. a yard.
7610. Did not a lump sum supersede that 1s. 10d. a yard? Yes, a lump sum superseded the 1s. 10d., in so far that the contractor was to be satisfied with £7,000.
7611. Is the contractor to be satisfied with £7,000? He would have been satisfied with £7,000, but I cannot judge whether he will be now. I have had no communication with him since the work has been finished.
7612. He would have been satisfied? He would have been satisfied.
7613. In what way are we to understand that? Because his character had not then been assailed; statements would not have been made so much as to infer that there was an understanding between him and myself—an insinuation which he repudiates as strongly as myself; but now that his character is attacked, and that he is represented as corrupt and everything that is bad, he may insist upon the work being measured.
7614. Is it at his option that the work is to be measured? No, I do not think it is; I should not give him the option.
7615. If he demands to have the work measured, could not the Government demand to have the whole work valued in proportion to the original contract? I cannot give an answer as to what the Government would do—I know what I should do.
7616. Would you, as Commissioner of Roads, consider it your duty to do so? If this was an agreement which he considered binding, the circumstances would not alter that.
7617. You gave one of your Superintendents instructions to write a letter to you with reference to this lump sum of £7,000? Yes.
7618. Had you any conversation with the contractor prior to that, on the same subject? No.

W. R. Collett,
Esq.
7 Jan., 1862.

W. R. Collett,
Esq.
7 Jan., 1862.

7619. What led you to instruct your Superintendent to address this letter composed by yourself to yourself? I wanted to bind the contractor, if possible, to this £7,000—that was my object.
7620. Could a simple letter of which the contractor had no knowledge have that effect? He had knowledge of it; Mr. Bayley was to speak to the contractor on the subject.
7621. Had you not spoken to the contractor prior to that? I had, but he had refused to do it for £7,000, his amount was £7,439; he sent in a tender for that amount.
7622. Have you got that tender? Mr. Bayley had it; I told him to bring all his papers.
7623. Was that sent to Mr. Bayley—you said it was sent in—I understand by that, that it was sent to the Office? It was not sent to the Office officially; there is a difference.
7624. Was it sent to the Office at all? By Mr. Bayley?
7625. By any one? I am not aware. I believe it is in the Office now.
7626. Do you hand it in? No, I do not hand it in; it is merely a tender from the contractor to do the work for a certain sum.
7627. You refuse to hand it in? No, I do not refuse to hand it in.
7628. Will you hand it in? I think I have got it. (*The witness searched among his papers*). It is on a very small slip of paper; I do not know where to look for it. It was to this effect—that the contractor was asked to do extra works, and he would require £7,439 to do them. We had not that money to spend, but we had £7,000, and my object in getting Mr. Bayley to write that letter was, that he should do the work to my satisfaction for £7,000—that was altering the slope from one to one, to one and three-quarters. I presume that the contractor tacitly consented, for the correspondence stopped. This letter was to form the ground-work of a future agreement with the contractor.
7629. You had exceeded the original contract without any agreement whatever? I think without any agreement, except that I had the power to exceed the contract under the 9th clause of the conditions. The Commissioner can at any time extend or reduce the work of a contract.
7630. If he can extend or reduce the work, must it not be done by agreement? I think not, where there is a schedule of prices.
7631. Will you hand in the paper I asked for before? Which paper?
7632. The contract? It is not a contract—it is a slip of paper. I have no wish to conceal it, though I may say it is a private contract.
7633. Will you explain how the contractor came to offer to perform a certain quantity of work at a certain price, unless you had had a prior conversation with him? There is a certain paper which will prove to you that he had more work done than would come to £7,000, and this tender of his, which is not an official tender, was stating what he would require to finish the work as I required it to be finished.
7634. It seems to be extraordinary that you should require your Superintendent to copy your own letter and to send it to yourself? Not at all.
7635. If it were not extraordinary, what would lead to it? Because there must be a commencement to an agreement of that description; that is to say, I had the Government interest at heart, and I wished to make an agreement which would benefit the Government to the extent of £500, and I therefore considered myself justified in writing this letter. That was the object of this letter. I wanted him to complete the work to my satisfaction for £7,000, and you must remember that at this time seven-tenths of the work was done. The only thing was to ask him whether he would do it, and as Mr. Bayley—as you have heard him state—wished to have everything in writing, I wrote this. This was a plan entirely my own, and so far from being anything wrong, or in favor of the contractor, it was against the contractor, which, from the work done, can be proved.
7636. In what way could the contractor be bound by your letter, sent by your Superintendent to yourself? The letter states that Mr. Martindale is willing to do so-and-so.
7637. Would not the regular way have been, for Mr. Martindale to have written himself that he was willing—why should your Superintendent have been instructed to write a copy of your letter, that he was willing? To form the basis of an agreement with Mr. Martindale.
7638. Would not the basis have been more satisfactory if Mr. Martindale had written himself? Not to me as Commissioner.
7639. Has Mr. Martindale written to you? Yes, repeatedly.
7640. Has he acknowledged this contract? No.
7641. What basis of agreement did this form? It formed the basis of the agreement that he should do the work for a lump sum of £7,000.
7642. Mr. Bayley's stating that Mr. Martindale was willing to take this contract for £7,000 does not bind the contractor to take that sum? No; but it formed a basis upon which an agreement might be made.
7643. Some conversation must have preceded this; you must have become aware that Mr. Martindale was ready to take this? No, I had no conversation with him.
7644. Does it not strike you as very irregular for you to write a letter or to dictate a letter to yourself, stating that another person was ready, not to perform a contract at certain prices, but—? If I had thought it had been irregular I would not have done it.
7645. What do you think it now, on reflection? I think it may be twisted into an irregularity, but the object was right and justifiable.
7646. The intention was right? Yes. I considered it no more than a bargain to get a certain work done for a certain price. If you have a certain quantity of work to be done, and you are afraid that it will exceed the sum you have at your disposal, you may say you will give the contractor such or such a sum to finish it—there is nothing wrong in the matter.

7647. If you got your clerk to write to you that the contractor was willing to finish the work for a certain price, would you consider that right? Yes.
7648. And that the contractor would be bound by it? That is another question. I think it would be perfectly right.
7649. What would be the object? To save money to the person who was building the house.
7650. This letter that you wrote, or that you directed Mr. Bayley to write, could not bind a third party? If you have officers and clerks under you, they are merely instruments in your hands. Mr. Bayley was merely an instrument; Mr. Shairp was an instrument. I do not wish to screen myself from any consequences; but I found upon entering office that Captain Martindale and Mr. Bennett had done the same thing that I have done.
7651. Captain Martindale drafting a letter to a Superintendent, and telling that Superintendent to copy the letter and to send it to him? The same as I would, he sends a letter to the clerk to copy.
7652. In that case he signs the letter himself? I beg pardon, he says "I am directed"——
7653. "I am directed by the Commissioner" to write to the Commissioner. Does it begin "Mr. Collett, I am directed by the Commissioner"——? I should think not, if it were sent to myself.
7654. There is a vast difference between a letter sent to another person and a letter to the Commissioner himself? I cannot see the distinction.
7655. *By Mr. Hoskins*: I think you said, in reply to a question of Mr. Forster, that you believe Mr. Martindale is a very efficient and very trustworthy contractor? Yes.
7656. You have never heard anything to his prejudice? Not in this Colony; I can not answer for what may have taken place anywhere else.
7657. Did you ever hear any rumours in reference to Mr. Martindale's qualifications and reputation as a contractor? Yes, as a contractor. I have heard that he undertook certain works in Victoria, and that in consequence of his partner's insolvency, he failed to carry them out.
7658. Did you ever hear that he had been implicated in a discreditable transaction in Victoria? Never, and I very much doubt it.
7659. You have heard nothing to his discredit, except his insolvency? There was a charge against him in Victoria, which became, as far as I understood, matter of investigation between the Government and the contractor, in which Mr. Martindale claimed a certain sum of money, £700, and after I think four years' investigation, the Government admitted they were in the wrong, and paid Mr. Martindale the £700.
7660. This is a letter (*producing the letter*) from the Commissioner of Roads and Bridges at Melbourne, to the Chairman of this Committee. (*The Chairman read the letter. Vide Separate Appendix A.*) Did you ever hear anything corroborative of that? No, I do not think it requires much corroboration. I think Mr. Steavenson believes that Mr. Martindale acted improperly; still, it is one thing to believe that he acted improperly as the agent of a contractor, and another to prove that he had acted dishonestly as a contractor. The first part of the letter, I think, states that he became insolvent.
7661. The second paragraph says, "His conduct was very unsatisfactory, he having become insolvent whilst a contractor, and more recently, having been responsible agent of a contractor on whose work a flagrant fraud was perpetrated, which I believe could not have been effected without his (Martindale's) knowledge"? He believed so.
7662. If you, in your capacity as Road Commissioner, believed that the agent of a contractor had been guilty of a fraud, had been privy to it, or must have known it in his capacity of agent, should you consider that he would be qualified to superintend any contract, or to enter into any contract with the Government? I considered when I found certain officers who were appointed, recognized, and approved, by my predecessors in office, that I had a right to assume their conduct and character were satisfactory. These charges had been investigated by Captain Martindale and Mr. Bennett; they were also, I presume, inquired into by Mr. Wilcox, Sir Morton Peto's agent; nevertheless Mr. Martindale got a large railway contract, the Gap contract, and others. He was the lowest tenderer for the new contract, and the question never came before me at all. I have already stated that the Minister and the Minister alone gives these contracts; the notice to take this contract was given by Captain Martindale; I never gave it to Mr. Martindale at all.
7663. You have given Mr. Martindale contracts subsequently? I beg pardon, I have never given Mr. Martindale any contract—that is a part of the duty I have nothing to do with; the Minister gives the contract to the lowest tender, without ever inquiring into the antecedents of the party, and if it were intended to inquire in one case there should be public notice given that the antecedents of the parties would be inquired into. We have this regulation, that if a contractor does not fulfil his contract, or throws it up, he is disqualified, but we do not make any inquiry as to previous character.
7664. But if you had heard that a person who had taken a contract under you or the Minister for Works had committed a fraud, by using an inferior article, that had not been noticed at the time, an inferior article to what was specified in the terms of the contract, would you consider that that person ought not to be disqualified for holding a contract, if the fraud were afterwards discovered? If it were done in an official manner, by the Superintendent or Commissioner reporting to the Minister. I consider that the Commissioner or Superintendent has nothing to do with the Minister in the first allotment of the contract. If I represented that such and such a person had been insolvent in Victoria——
7665. I say nothing about insolvency. I will put a particular case:—Suppose a person undertook to build a bridge according to a specification, the bridge to be constructed of a certain kind of timber—after the bridge had been passed, and he had received the money,
- it

W. R. Collett,
Esq.
7 Jan., 1862.

W. R. Collett, Esq.
7 Jan., 1862.

it were discovered that he had used an article inferior to that specified, would you not consider that a fraud? If an inferior article were used for the purpose of fraud I should consider it so, but in many instances an inferior article is used because there is no superior to be obtained.

7666. Suppose there were no authorization from a Government officer to use an inferior article—that it was used without having been previously authorized? Probably a reduction in price would be made. For instance, there is an inferior article used at Page Bridge, we know that, and we get two inches more stuff; the beams instead of being twelve inches are fourteen.

7667. That is a case where the inferior article has been used with the knowledge of the Government officer; I ask you whether, where the Government officer is not aware of such substitution, and the contractor has been paid the amount specified, and has thereby realized a greater profit than could have been derived from the contemplated plan, you consider—? I consider that both Superintendent and contractor should be dismissed. It is the business of the Superintendent to see that proper stuff is used; and he is as culpable as the contractor.

7668. I think you told us that from the conditions of your appointment, which you handed in, you consider yourself empowered to allot and extend contracts? To extend them.

7669. Not to allot? Not to allot; certainly not. I make a marked distinction—I have no power to allot otherwise than the Parliament intend; contracts must come from the Minister. The money for maintenance is at my disposal.

7670. Are there not contracts allotted to persons—for instance, this Highland Home—for which specific sums have not been voted by Parliament? They have been voted for places between certain points; for instance, between Grass-tree Hill and Murrurundi.

7671. You are talking of maintenance contracts? No, I am speaking of actual contracts, for which in 1859 the money was expended.

7672. Do you mean to say that you never allotted contracts to any persons without having them submitted to public competition? We have task work out of maintenance money, that is the distinction we make.

7673. No other contracts? No other contracts—no fresh contracts; we may have extensions of previous contracts at the same price.

7674. Did not Mr. Martindale have a contract, for the Doughboy extension at the Willow Tree, for culverts? He had to build culverts, but they were tasks, which is a great distinction, because we had no contract money for that—that was maintenance money. The Superintendent sends in a request that such and such work should be undertaken by task.

7675. What is the maximum amount of contract you consider yourself empowered to allot out of maintenance money, without submitting it to competition? £300 is the maximum I allow the Superintendents, but they seldom get so high as that.

7676. What is the maximum you allot yourself? I have nothing to do with that; it must come in the shape of a recommendation from the Superintendent to me; it does not originate with me.

7677. Did you not allot this extension of the amount of works in the Doughboy Diversion? Yes; by a clause in the extension contract the Commissioner can extend any contract he likes.

7678. Did you ever allot a contract to a person of the name of White, at Bargo, without submitting it to competition? There was no contract.

7679. What was it? A contract was allotted to Mr. Sivyver, and I asked Mr. White whether he would do it for the same or for a less amount than the original contractor, and as he was willing to do it for a less amount I put him in Sivyver's place.

7680. What was the amount of the contract? Sivyver's contract was £3,417.

7681. How much work did Mr. Sivyver perform—what amount of money did he earn? He did nothing at all to it; his sureties did a little—Messrs. Larkin and Pooley.

7682. To what amount? They did about £600 worth of work, for which I gave them £400.

7683. What did you give Mr. White? 9s. a cubic yard.

7684. What was the gross amount he received? About £3,000. The balance of the money at 9s. a cubic yard; he has since received more, but all the work at Bargo was done by measurement; every stone was measured.

7685. Are you empowered, in the event of a contractor failing, to allot a contract to another person without submitting it to public competition? Yes, under such circumstances I feel myself perfectly justified.

7686. Even to the amount of £3,000? Even to the amount of £3,000. I was sent down expressly there almost on the first day that I was appointed Commissioner, and was authorized, with the full knowledge of the Minister, to go and make the best arrangement I could with the money devoted to the purpose. I did so; I made a beneficial arrangement, being 1s. a cubic yard less than the previous contract, and the traffic was continued on the road. Subsequently tenders were called for for the metalling of the road, a great many tenders were sent in, but that of Mr. White was the lowest, and he concluded the metalling at Bargo.

7687. Do you know that the Minister for Works stated in his place in Parliament that no contracts were allotted to persons without competition, except in cases of emergency—as, for instance, where the roads were washed away? I am not aware that he stated so.

7688. The Minister said that only small amounts, of not more than £100, were allotted without competition? If so he did not recollect the case of Bargo, although no doubt that was a case of emergency.

7689. I ask you, do you consider yourself empowered to allot contracts to any amount without

without submitting them to public competition? To extend the previous contract; and it has been done on many occasions. The work is given to the lowest tender, and therefore if the party gets an additional quantity of work it is a benefit to the public.

7690. Do you not think it very probable that there might be a fall in the labour market, and that if tenders were advertised for they might be obtained for a less amount than that at which you would relet the contract, at the original schedule of prices? I did not take those circumstances into consideration. I consider that the contract was let at a cheap rate; the contractor has all his plant on the road, and I think I am benefiting both the party and the public by putting that condition in force.

7691. Are you aware that there has been a resolution passed in the Assembly, that all contracts should be submitted to public competition? I am not aware of anything of the kind; I do not say it may not exist.

7692. You have received no instructions of that kind? Yes, the instructions are to that effect; you let contracts by public competition.

7693. In the event of a party failing to carry out the original contract you can then relet it without competition, even though the contract involves a large amount of money? Equal to the previous contract; I consider so, on the same principle that I could give it to a second tenderer.

7694. Did you ever allot any contract to Mr. Martindale without submitting it to public competition? You will mix up contracts and tasks. I have extended contracts and let tasks; at least they must come through the Superintendent.

7695. Have you not told the Committee that you are in the habit of not consulting the Superintendent as to the terms on which a contract is to be extended. You mean that —? You are still mixing up contracts and task-work, and you understand, perhaps, better than any gentleman in the room, the difference between contract and task-work. The Superintendent submits to the Commissioner a list of what he considers proper tasks; these are approved, and the work proceeds accordingly. Contracts are by public tender, and the Commissioner, without reference to the Superintendent, has the power of extending these contracts. These are totally different things altogether.

7696. What you mean by allotting work by task-work is from the fund provided for the maintenance of roads? Yes, the £50 a mile; we did not do all by day labour, but by task-work.

7697. What is the maximum amount? Never to exceed £300, and then it must be submitted to me in the first instance.

7698. Not to public competition? No, not to public competition.

7699. Do you not think it very possible that if it were submitted to public competition, persons might be found in the locality who would contract for this work on more favourable terms to the Government? I do not. We never can get public competition in such cases—for instance, we found no one would undertake Bargo. We might have advertised it for weeks and weeks, and have then given it up as a bad job.

7700. Did you ever allot a contract to Mr. Martindale, on the Southern Road, in the vicinity of Camden, for instance? No, not to Mr. Martindale; it was a public contract —

7701. Did Mr. Martindale ever carry out a work there? He carried out a contract which was let to Mr. Frazer, with which my nephew was connected.

7702. What was the amount of that contract—the character of that contract? About £250—a small contract.

7703. Not more? No.

7704. What induced you to remove Mr. Martindale from the Northern Road there? He was a contractor who was contracting all over the country. The tender for Camden Flats was a public contract as far as metalling was concerned. The previous contract was one that was also put up; but the contractor again declined, and Mr. Frazer consented to do it for a less amount—so I was informed by the Superintendent; but that was before my time, or during the very first month that I was in office.

7705. Why did Mr. Martindale perform the contract? Mr. Frazer failed, and Mr. Martindale consented to do it, and lost money by it to my certain knowledge.

7706. Did he not remove a large staff from the Northern District there? Not a very large staff—twenty men, I think.

7707. Do you not think it a very small contract, £250, for a contractor to remove so large a staff of men from one district to another? Not when he had so many contracts in the west and south. This was not an isolated contract, but one of several.

7708. Do you consider that you have *carte blanche* to extend contracts, even though the extension may involve a considerable amount of money? I can only extend them to the extent of the money I have; it depends upon whether I am rich or poor; if I have plenty of money I can extend them largely, but that cannot be the case with the present means at my command.

7709. What do you mean by the money at your command? The gross amount voted by Parliament; we have, after putting aside the money for maintenance, appropriating the money for contracts to contracts, very little left for task-work.

7710. You say you could extend contracts which do not come under the category of task-work? Yes; if we have £8,000 for contracts, and we expend only £7,500 upon contracts, I have £500 which I can appropriate to the extension of contracts.

7711. You have only a limited amount of money available for the extension of contracts? We might not have any money at all if the tenders were not numerous. The sum of £8,000, I may assume, was put down for the Great Northern Road, for what we conceive to be the contracts on that road; but latterly there has been so much competition that the tenders amount to only £7,500, and the £500 has been applied by me, at the recommendation of the Superintendent, to extend the contract by two or three hundred yards.

7712.

W. R. Collett,
Esq.
7 Jan., 1862.

- W. R. Collett, Esq.
7 Jan., 1862.
7712. Am I to understand that you never extend a contract without consulting the Superintendent in charge? I do not say "never," but as a rule I consult him; I may make exceptions, as in the Doughboy works and the Bargo works.
7713. Do you mean to say that these are the only cases in which you have authorized the extension of the contracts without consulting the Superintendent in charge? I do not recollect any other.
7714. I think I might put a very pertinent question here, why you omitted to do so in these cases? Because I considered that they were difficult engineering works, and the officers in charge were not competent. I had confidence in myself and would stand by my works; but I did not wish my works to be carried out by either of these parties. I had confidence in neither Mr. Bayley nor in Mr. Quodling for these works, nor had I confidence in Mr. Quodling, senior, for Bargo Brush. He did his duty there, and I am happy to say has always been a most respectful officer. It was thought an impossibility to do Bargo; I said, "Very well, I will take it upon myself."
7715. Have you confidence in the present Superintendent of the Northern Road? In Mr. Brown?—the most perfect—he is one of the most talented engineers in the country.
7716. What salaries do the Superintendents receive? £600 the first class Superintendents.
7717. Who are the other first class Superintendents besides Mr. Brown? There are Coghlan, Moggridge, Quodling senior, Chauncey; in the West, Dawson; from Bathurst to Orange, Johnson; from Bowenfels to Mudgee, Nardin.
7718. What do these gentlemen receive as salaries? Four at £600, and three at £400.
7719. Have you confidence in the engineering skill of all these gentlemen? Yes, I have great confidence in the whole of them.
7720. Then why, if you have great confidence in the whole of them, did you not consult Mr. Quodling with reference to making the road at Bargo? Because Mr. Quodling had never acted as road overseer or Superintendent; he was appointed subsequent to my appointment; the matter was very pressing, and it was a very difficult question to know what to do with a road having holes in it 20 feet long and from 3 to 6 feet deep. I certainly did not consult Mr. Quodling, but Mr. Quodling obeyed my instructions, and carried out my plans, to my perfect satisfaction.
7721. I understood you to say, in reply to a question from Mr. Dalgleish, that you were not an engineer? I beg pardon. I consider that a man may be an engineer if he has applied his mind to it for five and twenty years; it is not absolutely necessary that he should have been brought up in an engineering school.
7722. You consider these Road Superintendents competent engineers? I believe the present staff is as fine a staff of engineers as any in the world.
7723. Do you not consider that an engineer ought to be capable of laying out works for the formation of a new line of road, or of repairing roads; do you consider the salaries paid inadequate to secure such men? I think there are exceptions—every Engineer-in-Chief or Commissioner ought to be. In the case of the Doughboy Diversion, I had to deal with a person who was prepossessed with a different mode of engineering to that I wished to adopt. In most cases I should leave the details of engineering work to the Superintendent, because I would not take the trouble of overlooking them. In all cases of deviation, or of entire departure from the existing line of road, as in the Great Northern Road, I should certainly trust to my own engineering capabilities, and not to the overseer or to the Superintendent.
7724. Who is the gentleman you refer to at the Doughboy Diversion? It is not so much to the Doughboy Diversion as generally; but I state that neither Mr. Bayley nor Mr. Quodling are in my opinion competent to carry out those works, neither separately nor conjointly. Still they were useful in their way—one to check the earth-work, and the other the masonry and bridges.
7725. What salaries were they receiving? One £400; the other equivalent to that.
7726. Do you not think competent persons might be obtained for £400? I really doubt it. For instance, it is said that a tubular bridge is to be built at the Menangle—it is not everybody who would know how to superintend such a work; and the Doughboy works were very difficult. There was a cutting there 98 feet deep, and there is not such another in Australia.
7727. Are you always consulted in the appointment of your subordinates, or are they political appointments, or in what way are they made? I know you wish me to give you this information, and therefore I give it in its integrity. In the first instance, the person sends an application to the Minister for Works, for a situation as Superintendent or overseer; that is put in a book, with the testimonials of the applicant. When a vacancy occurs I report to the Minister for Works that a vacancy has occurred, and he generally selects three or four of the names in the book, and after personal interviews, sends them down stairs to me, to examine as to their engineering capacity, their notion of surveying, of measuring rock; whether they are good accountants, write a good hand, and to see whether their manner is such as to lead to the belief that they would conduct the public works in a respectable manner. It sometimes happens that all three are competent, although that is not very often the case. The Minister is then left to his own decision. At least half have been appointed who have not been recommended by me; still they have never been appointed without the matter being thoroughly investigated as to their competency.
7728. Are there many cases where you have not been consulted? No. The Minister would not go into figures, but would send him to me. I should imagine, from their being sent to me, they were approved by the Minister.
7729. Can you say whether persons have been appointed whom you have represented as not being competent? I am not aware.
7730. Were you consulted when persons were appointed as road overseers? Yes.
7731. Do you consider them competent? Yes.

7732. Are they men who have been accustomed to act as Road Superintendents or overseers? W. R. Collett, Esq. No; they are men who have been accustomed to the overlooking of men before, which is a very necessary qualification.
7733. Are they examined as to whether they are capable of measuring work? Not always. 7 Jan., 1862.
7734. Is not that a necessary qualification? I think that can be learned; in fact, there might be no measurement in his district at all.
7735. How could that be? There might not be works which would require measurement, or the Superintendent might say, "I will measure the work." That might be an arrangement between the Superintendent and overseer.
7736. If he had not been accustomed to that kind of work before, how could he tell whether it had been done properly, if he had no previous knowledge? A person applying for such an office would be supposed to have some education—some previous knowledge, and he could see whether certain men were at work, whether they were filling in ruts, were wheeling barrows, or in what way they were employed as maintenance men. That does not require such a great amount of talent.
7737. Could he tell whether the batter was carried out according to specification, whether the road metal was according to gauge, and in sufficient quantities? Yes; he could learn measurement and the gauge.
7738. Then there is no duty to be performed by an overseer that could not be easily acquired? No; but perfect integrity cannot be acquired, nor the intuitive faculty of managing other people so as to get the proper quantity of work out of them. Some men may be constantly making complaints of and to contractors and men, while others with an easy manner, such as I believe I have the credit of possessing, may get a great deal more work done.
7739. Do you consider that where a man had no previous knowledge of road-making he could tell whether sufficient work were done or not? All of these overseers are considered to be on trial in the first instance, and if they do not appear to be competent for the first three months they are reported and removed. Mr. Williams was one of these cases. I thought he was a gentleman, in every sense of the word, but I did not know what his qualifications for road-making were; and from my observation of him I stated at a public dinner that I believed he would in a short period become a good practical Road Superintendent.
7740. During this three months' probation do the overseers receive salary? Yes.
7741. What salary does a road overseer receive? £255 a year—£200 salary and £55 for forage.
7742. Then you consider that the knowledge how to command men is the primary qualification? One of the primary qualifications. He should be of an active turn of mind—of a good constitution; this is an important qualification for a person who has to overlook works lying at a distance from each other.
7743. Should he be able to measure, and understand the laying out of work? The laying out of work I do not expect an overseer can do, but the measuring of work is not a very great difficulty; for after one day's trial, I do not know any boy who is not a natural fool who could not be taught to do it. I do not see any difficulty. It is not like cuttings in railways. All the overseer has to do is to see that the road is one foot higher in the centre than at the water tables, and it does not require any great genius to do that; but to lay out roads is one of the difficult points in engineering; it was an intuitive faculty in the elder Stephenson; he never learned it.
7744. Do you consider that if these overseers had not a previous acquaintance with road-making we might have inferior articles used in bridges? We do not give bridges to overseers.
7745. Had not Mr. Hannington bridges to oversee? No, he never had charge of any bridges.
7746. Were all the bridges finished at the time Mr. Quodling resigned? Yes, I think so, except a little tarring when I went up.
7747. When did you go up? In December.
7748. Then six weeks elapsed between Mr. Quodling's resignation and your visit? Yes; but Mr. Quodling's reports since the month of August state that the bridges were nearly all finished—the reports I have handed in—with small exceptions. He has reported upon the bridges and the quantity of timber in the bridges.
7749. During the six weeks which intervened between Mr. Quodling's resignation and your visit there was no person in charge but Mr. Hannington? Mr. Hannington has been in Sydney all the time.
7750. What brought him to Sydney? He came up to bring me all the papers and documents. Of course I must have some one to assist me with the necessary information, and he had all the documents connected with the works, as he was the overseer of that line.
7751. Is Mr. Hannington in Sydney now? I believe so.
7752. How long has he been in Sydney? About five weeks.
7753. Who has charge of that portion of the road over which Mr. Quodling was placed? Mr. Coghlan.
7754. Does not Mr. Coghlan's district extend from Doughboy Hollow to Armidale? Yes.
7755. Then immediately upon Mr. Hannington's departure for Sydney, did Mr. Coghlan assume the charge of the Doughboy works? No. I told him to go and see the whole line, and the Doughboy works would take care of themselves till I saw them.
7756. At what date did Mr. Coghlan take charge of the Doughboy works? About Christmas, I think. I am not sure that I shall give him the charge of them at all; I think I shall give them to a first class Superintendent.
7757. Then he has not had charge of them? He has charge of them now, because I told him to measure some work there.
- 7758.

- W. R. Collett, Esq.
7 Jan., 1862.
7758. On what date did Mr. Hannington leave for Sydney? He came as far as Murrurundi with Mr. Quodling, where they quarrelled, I believe, and he came on. I saw him on board the steamer at Newcastle; that is all I saw of him; I never saw him in the country at all; I never saw him but at one time in my life; he came over in the same ship with me, and I saw him once since.
7759. How long has he performed the duty of road overseer? I think about six months.
7760. How many times have you visited that part of the road? I never went to the lower part of the work till Mr. Quodling sent him there. Mr. Hannington had nothing to do with the Doughboy Diversion; he was employed to look after the clearing. Mr. Hannington never came to the works till September, and was never put upon the works till this investigation began.
7761. Who had charge of the works between the date of Mr. Quodling's resignation and the appointment of Mr. Coghlan? Nobody at all; all the overseers and Superintendents have been in Sydney ever since, and have never left; there is not a single person on the works.
7762. I do not clearly understand —? There is nobody in charge, both Superintendents and overseers either got leave or were summoned by the Committee, and came away without leave. To the best of my knowledge, there was no one on the Northern Road when I went there; there is no money to spend, so that it is not of much consequence.
7763. Was the work completed when you went there? If you will read my report upon the state of the works, dated the 19th December, which I have so repeatedly endeavoured to hand in, you will see the state of the works.
7764. Were you consulted upon the appointment of Mr. Hannington? I recommended Mr. Hannington. There was no overseer whatever in the second district; there was no work done previous, and very little to be done, as the road was not defined, so that all we had to do was to define the line from Doughboy to Armidale, because we would spend no money upon a line that was not defined; all we had to do was the clearing of the line, and we have hardly taken any advantage of the present road. There was no overseer under Mr. Quodling when Mr. Hannington was appointed.
7765. You recommended Mr. Hannington's appointment? On Mr. Quodling's recommendation. In passing through Tamworth I saw Mr. Quodling, and said, "I think you are rather under-handed." He said, "Yes, I am; there is a great deal of work to do." I asked him if he knew any one who could assist him; he said there was a young gentleman who had been with Mr. Wener's party, and had just returned from the Balonne; that he was a well qualified surveyor, and an excellent accountant. I said, I must examine him; when he was introduced to me he said he had known me before. I said, "I do not recollect you;" when he replied that we had come over in the same steambot together in 1852; I then recollected that there was such a person in the second cabin. I then said, "Are you qualified to perform the duties?" and he informed me that he had been engaged with Mr. Wener in the survey of the west, and had been left in charge of a party of men. He being on the spot at Tamworth, I said, "You must make a formal application to the Minister for Works, and refer to me." He did write to the Minister for Works, who referred to me, and Mr. Hannington was appointed, and I believe if he had fair play he would be one of the best overseers in the country; and in support of that opinion, I need only refer to the book I have handed in, which, although I differ from the results, is kept in an admirable manner. There is every bridge, everything connected with the works, the painting, tarring, rock, and earth-work, and the details, and I say if there were nothing else to prove it, that the manner in which Mr. Hannington has kept that book shews that he would make an efficient overseer.
7766. Can you say whether at the time of Mr. Hannington's appointment, he was capable of measuring work—whether he had been accustomed to road work and excavation? Mr. Quodling said one of his qualifications was his being a well qualified surveyor; he had also had charge of men; was a very good accountant; could write and read well. I considered that he was a person well qualified to have charge of men, and I think the proof of it is in the very good manner in which the clearing has been effected, and it was rather a difficult work to do between Wallabadah and Goonoo Goonoo, over mountains and rough country.
7767. Do you know, as a matter of fact, that he was a surveyor? That he was one of a surveyor's staff, and was left in charge of a party.
7768. Do you know a Mr. John Clarke? His name is not John.
7769. Mr. Clarke, a road overseer? Yes.
7770. Is he in the service of the Government now? Yes; between Goulburn and Gunning.
7771. Were you consulted as to his appointment? No.
7772. Who appointed him? Captain Martindale and Mr. Bennett. When the Minister appointed him Mr. Bennett was his direct guarantee.
7773. Was he under your supervision when he was appointed? He was one of my overseers; since then he has been removed to Goulburn.
7774. He was appointed to your district first? Yes; he had previously been a contractor on the Western and Southern Roads.
7775. How long? I cannot say how long; he was appointed from the knowledge he had displayed in carrying out the road contracts. Mr. Bennett had the greatest confidence in him, both as a surveyor and road contractor.
7776. Do you happen to know whether at any time he was a druggist's assistant? I know all about Mr. Clarke, his family, and antecedents. I know that, like many other persons, he lost money by deep sinking at Ballarat; that he came to Maitland, and was for a time in Mr. Lipscomb's house. That was only a temporary appointment. He then took a road contract, which was approved by Mr. Bennett, and he was appointed Superintendent for the Northern Road at Murrurundi. He was subsequently removed to take charge of a length of road in the Southern District, namely, that between Goulburn and Gunning.

7777. Can you say, from your own knowledge, whether, from the time of his appointment to an overseership, he was capable of measuring, and was an efficient officer? Perfectly; he was a very efficient officer. W. R. Collett,
Esq.
7778. Were you consulted on the appointment of Mr. Clements, who filled the situation of road overseer for some time? No; he is one of Captain Martindale's appointments; as a Superintendent I should not be consulted. 7 Jan., 1862.
7779. Was he sent to the Northern Road on his first appointment? He was a surveyor in Murrurundi when I first knew him. I think I have known him for the last seven years. He was surveying farms and laying out boundaries when I first knew him.
7780. Do you happen to know if he was a surveyor? - Yes; I have seen his plans. He was the first who laid out the Doughboy Diversion. He sectioned the whole of the Gap, and laid the plans before Mr. Bennett.
7781. Do you happen to know whether, at the time of Mr. Clements' appointment, he was capable of measuring work? Perfectly.
7782. Did you consider him an efficient overseer? When he was sober.
7783. Was he not dismissed from the Government service? No.
7784. Was he never dismissed? Yes, he has been dismissed lately; but he was not then exactly in the Government service; he held merely a temporary appointment.
7785. Was he dismissed previously? No. (*The witness handed in a paper. Vide Appendix.*)
7786. You positively assert that he was not dismissed for drunkenness? Not at that time, but lately.
7787. Did he resign to enable him to take that contract? He did resign.
7788. Had he not been previously reprimanded for misconduct? No; it is not usual to reprimand; it was stated—to use Mr. Bennett's own words—that “if he again used incoherent language he would be dismissed.” One morning he did not give a very sensible reply to a question; but he was not dismissed. He sent in that letter to become a contractor with Mr Greer, at Scone.
7789. Was he subsequently reinstated in the Government service? No; it was necessary to appoint some one who understood timber, to look after this bridge at the Highland Home, and Clements, who was starving, asked me to let him have a situation as ganger. I said, “I will let you have it rather than you shall starve, but if you get drunk you will be dismissed.” Subsequently he got drunk and was dismissed.
7790. What salary was he in receipt of? Nine or ten shillings a day.
7791. Where is he now? At the Denison Diggings, in great poverty.
7792. Did you ever write to him, censuring him for having anything to do with this testimonial, or any testimonial to you? I do not know; it is very likely I told him not to make himself too busy.
7793. Did you ever write to him at all? I dare say he considered that I had once or twice acted with a sort of kindness to him, and that he wished to shew his gratitude.
7794. I ask you whether you did actually write to him about the testimonial? I think it is more than probable I did.
7795. Do you remember whether you ever wrote to him stating the desirability of initiating a testimonial? No; I do not remember; if it were so, it had no reference to a money testimonial. There was some talk about a dinner; I think I did write; he wished me to have a dinner, and I believe I declined. I think he was secretary, but really I did not trouble myself anything about it.
7796. You think it possible you may have written to Mr. Clements and suggested the propriety of having a testimonial? Or not of a testimonial. I dare say I have written a great many letters. If I did so it was never intended to be made public.
7797. I have received a letter stating that such did take place? If you have got the letter it is hardly necessary to ask me the question.
7798. I hardly liked to take the *ipse dixit* of the person with reference to it? I dare say Clements dropped it from his pocket when he was drunk.
7799. Did you ever have a contractor of the name of Sharwood? Yes.
7800. Did you ever write a letter to him? Yes.
7801. What was the nature of that letter? It was to the effect that as the people of Maitland did all they possibly could—I do not know what word I used, but the meaning was—to slander me, the least they could do was to make amends for their previous conduct. I knew very well that Sharwood would shew it to Gorrick or somebody, and that Gorrick would laugh at it.
7802. You had another Government officer of the name of Newcomen—did you appoint him? No, he was originally appointed at 10s. a day, as an overseer. I am not sure that I did not appoint him; I believe I did appoint him. He was originally one of the subordinate overseers, was subsequently appointed at £255 a year, and then was appointed a second class Superintendent; he rose gradually up.
7803. You of course believed him to be a competent officer at the time of his appointment? He was perfectly competent.
7804. Was he competent to measure work? When first appointed?—I cannot say; he had no work to measure; at all events he very soon became competent.
7805. Was he capable of keeping accounts? Yes, he was a better accountant than writer; he was a very moderate scribe, but a very good accountant; his accounts were quite right.
7806. You consider yourself responsible for his appointment? Not at all. I am responsible for his appointment in the first instance, about 1854, but on his own merits he was recommended by Mr. Bennett and Captain Martindale to be a first class overseer; and then by the

- W. R. Collett, present Minister he was appointed to be a second class Superintendent. I presume there was an investigation as to his qualifications. I thought him an excellent overseer under me.
- Esq.
 1 Jan., 1862.
7807. Did you ever hear it represented that Mr. Newcomen would not employ any man unless he would purchase goods from his store, he keeping a sort of tally shop? I have heard such reports.
7808. Did you ever make inquiry into them? Yes.
7809. Did you ascertain their truth? I believe they were nearly all true.
7810. Did you reprimand him? No, nor did I see the difference between a Road Surveyor and a Railway Surveyor. It is not rare in one branch of the service—the Railway service—for the overseer to supply the men; it was the case in the Grosic Valley survey, and was made the ground of complaint against the elder Quodling. If a road overseer makes a little money by affording the accommodation to the men I do not see the objection. If the men are ten miles from a butcher's shop, and the overseer kills a bullock, I do not see why he should not sell the beef to his men, as it prevents their going a long distance from their work for their food. However, it was said that the system was abused and it was put an end to, and the salaries of the overseers were raised to £255.
7811. Do you disapprove of the system yourself? No, I approve of it; I think you get more work done; it may lead to abuse, but I do not see where.
7812. In the pay sheets sent in to the Government, are the names of the men actually working on the road, under charge of an overseer, entered, and the pay drawn for them according to the amount of work performed? I presume so; it is the overseer's work to send it to the Superintendent, and the Superintendent has to send in to me. Of course I cannot say from my own knowledge. I think the whole system is open to abuse; but it is much more easy to find fault than to suggest a remedy.
7813. Could you suggest a remedy? To find a perfectly fearless independent man for the head of the department, and not to give the Superintendents so much power. For the want of that the whole thing will go to the winds.
7814. Can you say whether Mr. Newcomen paid the men under him their wages in full—the amount of their earnings; or was he in the habit of withholding portions for stores received? I have no doubt if Mr. Newcomen killed a bullock for them he charged them for the beef, and withheld the money due for it, at the market price. I think it of the greatest service among mountain ranges, and at a distance from market, to have some one who would kill a bullock, or supply men with tea and sugar. I have felt the want of it ever since the new arrangement was made.
7815. Did you ever hear it represented that Mr. Newcomen made a considerable sum of money from providing these things? I know Mr. Newcomen left the service a poor man. He is much better off now he is married.
7816. Did he not combine various occupations, besides storekeeper, with that of overseer—was he not a farmer? Yes; he had a farm near Yarrundi.
7817. Where is that? Near Scone.
7818. Was it his own farm? No; Mr. Robertson's farm.
7819. The Minister for Lands? Yes.
7820. Do you think it possible that he could attend to his duty as road overseer and these multifarious matters? It was not only possible, but he did so remarkably well. It is possible for some men to attend only to one thing; some men can attend to many.
7821. What length of road had he to look after? Not very much; I think not more than 20 miles, if he had that.
7822. What was the average length the overseers had generally? Directly they were raised to £255 a year I believe their districts were increased from 35 to 45 miles.
7823. Was Mr. Newcomen's so increased? Yes; and then his selling and buying ceased, and also the holding the farm. There was a stipulation that the moment his salary was increased he should give up the farm.
7824. There was an objection made to the farm? There was the objection that they should have no other occupation than that of overseer.
7825. Do you know whether he was the only overseer who engaged in these different occupations besides his duty? I am not aware of any other overseer; it might have taken place at Murrundi, but I would not swear to it. There is no occasion for it where there are townships.
7826. You think Mr. Newcomen could look after his length of road and attend to his other occupation as well? I think Mr. Newcomen could do it; I do not say everybody could do so, nor do I think it is a good system—I refer to the farming part.
7827. Have you the power to dismiss your subordinates? No, nor the Minister either.
7828. Who then has the power? The Governor and the Executive Council. It is the same thing; for if I report to the Minister, the Minister considers my report to be tantamount to recommending the dismissal of a subordinate, and he brings the subject before the Executive Council, and I presume, as a matter of course, the person would be dismissed. But we have never dismissed any one that I am aware of; somehow or other just as we are going to dismiss them they resign. One case that bears upon the point is that of Clements; Quodling did not get quite so far as to be dismissed. Mr. Clements resigned, and Mr. Quodling, if he had kept his office a little longer, would have been dismissed.
7829. Are we to understand that no subordinate officer on the road can be dismissed without the concurrence of the Executive Council? They appoint, and they only can dismiss a gazetted officer.
7830. You are considered responsible for the management of the Roads Department? Yes.
7831. Do you not think it would conduce to the efficiency of the department if you had the power of dismissal? Not without I had also the power of appointment.

7832. Do you think it would conduce to the efficiency of the department if you had the power of appointment? I think it would; it would invest me with more responsibility. I think I ought to have the power of appointing my own officers.
7833. You told the Committee that Mr. Quodling had repeatedly been incompetent, and under the influence of liquor—did you ever state this to Mr. Arnold? I stated that he had repeatedly been reported drunk, by letter, and that I had travelled with him five days, during which time he had taken a great deal more brandy than he ought. I never saw him incompetent to do his work from drunkenness.
7834. You have seen him frequently out of his district, at Murrurundi? Frequently.
7835. That was a breach of duty? For which he was subject to dismissal, and he was threatened.
7836. Did you report it to the Minister for Works? Not officially; I mentioned the circumstance, but at the time I was determined not to bring a charge against a subordinate unless I could fully substantiate it, because Mr. Quodling and myself did not work in perfect harmony. I was determined nothing should influence my conduct till I was possessed of sufficient facts. I now am possessed of those facts, and regret that I was not before.
7837. When did you become possessed of those facts? From subsequent information I learned—
7838. Since this inquiry? Since his resignation.
7839. At the time when this inquiry was first instituted, and when you made certain charges against him, you had no specific data? Yes, I had always sufficient to prove insubordination and absence from his men, but that was not quite sufficient. I did not think because the man's manner was repulsive, or his being occasionally at Murrurundi, was sufficient, because there might be an excuse about the Post Office; but since then—however, I will answer the question.
7840. Go on? Since, I have discovered that the bank account—which I should, under any circumstances, have discovered at the end of the year—has been kept in a most irregular, and what I should consider a fraudulent manner. I have therefore no hesitation in saying that he is a person not worthy of confidence in any respect, because he has been guilty of fraud.
7841. Do you intend to take any ulterior steps in consequence of this charge of fraud? Yes, undoubtedly.
7842. What steps? I intend to have a warrant against him.
7843. Charging him with embezzlement? Charging him with embezzlement.
7844. You are aware, of course, that Mr. Quodling is to be seen daily? Yes, but I am also aware that I will not interfere with the operations of this Committee—the Colony is not so large.
7845. Do you not consider, as an officer of the Government, that having so serious a charge against him, it is your duty to take steps for his apprehension? The case is before the Crown Solicitor to day. I got the banker's papers from Tamworth only yesterday.
7846. May he not leave the Colony? Yes, but I am too sharp for him. I could send a telegram after him, and I have already mentioned the matter to the Inspector of Police.
7847. Are we to understand, then, that Mr. Quodling is under the surveillance of the police? Yes, I have mentioned the matter to Captain McLerie. I have given the whole statement of the matter to the Government.
7848. Why was it not given before? The facts were not sufficient.
7849. Do you consider that you are warranted in stating to the Committee that a person is guilty of embezzlement unless you have sufficient facts? I consider that no person has a right to bear false witness against his neighbour.
7850. Upon what ground do you make this charge against Mr. Quodling? I make the charge on the ground that his accounts are falsified, and that money is over-drawn, as the banker's books now prove.
7851. Have you mentioned the facts to the Minister for Works? Yes, I have, and he wanted to have the case submitted to the Crown Solicitor to know who is to prosecute. I was obliged to get a Treasury order, in order to get the books from Tamworth, in consequence of the question as to whether the Commissioner for Roads was in existence. However, I have got the banker's accounts in my hands.
7852. And you actually intend to prosecute? I intend to take every step for him to be prosecuted, and either to prosecute myself or to give evidence.
7853. Do you now consider yourself Commissioner for Roads? Yes, and I act as such.
7854. You are aware of course that the salary has been stopped? Yes, and I am aware it can be raised again to-morrow morning.
7855. How? By the people of Australia, who have confidence in me as Commissioner.
7856. Voluntarily? Yes.
7857. Do you consider yourself a Government servant still? Yes, of course I consider myself a Government servant till my commission is revoked.
7858. Are you aware, that in the opinion of Parliament, the office of Commissioner is no longer necessary? I am aware of it—I read the newspapers.
7859. Has the Minister for Works stated that he intended to prosecute? The Minister for Works has stated that he intends to submit the case to the Crown Solicitor when the case is prepared. Of course I cannot be here and in my office at the same time. I received the papers only yesterday afternoon; I am here this morning, and there is no such hurry; Mr. Quodling will not escape.
7860. Do you expect to be paid by the Government? I have not the most distant idea of receiving any payment from Government, as Commissioner; I wish I had.
7861. You say you did not communicate officially with the Minister for Works, representing
how

W. R. Collett,
Esq.

7 Jan., 1862.

- W. R. Collett, Esq.
7 Jan., 1862.
- how frequently Mr. Quodling had misconducted himself? I did not officially communicate either respecting Mr. Quodling's drunkenness or his absence without leave.
7862. Do you consider that absence—frequent absence of a Superintendent from his district—an offence which should be visited by dismissal? I think every case stands on its own merits. I should be very lenient where a courtship was taking place, as in this instance; but still I should suggest that an interview should not be prolonged over four or five days. I might overlook a day's absence in such circumstances, but I think when it extends to a week it is rather too much.
7863. That has been the case? Yes, I have a letter to prove that has been the case.
7864. And you have not made a representation of that to the Minister? Not officially.
7865. I understood you to say that you considered Mr. Quodling an incompetent officer? Yes; that is to say, a man may not be incompetent to measure a heap of stones, though he may be to manage an extent of road 135 miles long, as he calls it, and 121 as I call it.
7866. Do you remember whether you ever expressed a contrary opinion publicly? I could hardly express a contrary opinion, for I had nothing to guide me.
7867. Do you remember whether you ever expressed to a deputation that waited upon you in Tamworth, your unlimited confidence in Mr. Quodling? To carry out a ditch in the township.
7868. Did you indicate any particular work? Yes, a ditch in the township.
7869. Did you not say that you had every confidence in Mr. Quodling as an engineer? No; but the people of Tamworth wanted a flood-gate to prevent the water going into their cellars, and I said Mr. Quodling was competent to superintend that.
7870. Do you not consider that even such an undertaking as that would require more skill and professional ability than would be necessary to measure a heap of stones? Not much, when I laid out the work, for it was my suggestion, and I said he was competent to carry out my ideas, in the same way as he was to carry out the approaches to Tamworth Bridge.
7871. Did you ever on any other occasion express confidence in his ability? I am not aware at all.
7872. Is it usual for a Road Superintendent to sign certificates of a certain amount of work having been done by a contractor? After the overseer sends it in; the initiative is with the overseer; he sends it to the Superintendent, and the Superintendent sends it to the Commissioner; the Commissioner draws a cheque and afterwards sends the voucher to the Auditor General, to shew that the money has been properly paid.
7873. Have you known frequent departures from that practice? Yes, there have been frequent departures.
7874. In how many instances was this practice departed from in the case of the Doughboy Diversion? In the first instance by Mr. Bayley and Mr. Quodling, who for the first six months had no overseer's signature to the work at all. Subsequently, having seen the work, I thought my signature was the same as Mr. Bayley's or Mr. Quodling's, and the Auditor General thought so too.
7875. How many times did these gentlemen sign certificates in reference to this contract? They have already sent in vouchers for £7,040, these same gentlemen who accuse me of having over-paid the contractor, and who state, moreover, that there is £2,000 worth of work to do.
7876. How do you account for the departure from the usual practice of signing certificates in this case of the Doughboy Diversion? Very frequently it is the case, the overseer may be sick, or there may be other circumstances to prevent his signing. During the last year of my superintendence I acted for the Maitland district for three months as overseer and Superintendent, and signed the certificates. There was nothing unusual in it.
7877. Was it not indispensable to have the overseer's signature attached? Some one must be responsible that the contract money is spent in contracts, and the maintenance money in maintenance.
7878. Has there been any departure from the practice generally with reference to certificates, in any contracts which Mr. Martindale has performed, with the exception of this Doughboy Diversion? I am not aware that there has been a single one.
7879. Has there been none with reference to the Liverpool Range contract? You mean to say, the one under Mr. Bayley.
7880. I refer to the road over the range? I had nothing to do with that; that was under Mr. Bayley and Mr. Bennett, in the same way as the Doughboy Diversion was under me.
7881. Did Mr. Bayley and Mr. Bennett object to sign certificates for work performed upon this contract, in consequence of the gravel used being very inferior in quality? Certainly not. Mr. Bennett was gone—what signified whether Mr. Bennett refused or not? Captain Martindale was Commissioner.
7882. Did not Mr. Bennett refuse? He never wrote to me.
7883. Are you aware that Mr. Bayley and Mr. Bennett refused to pass this contract in consequence of the gravel placed on the road being very inferior, in fact being loam instead of gravel? I know Mr. Bayley, on the 7th April, referred to some gravel that was put on it, but that had nothing to do with the contract. On the 7th March he wrote a letter stating that the gravel had set remarkably well, and praising Mr. Martindale as contractor.
7884. You took charge of the work on the 7th April? Mr. Bennett left on the 15th January.
7885. Although this was in your district, previous to that time Mr. Bennett had charge? Mr. Bennett and Mr. Bayley had that contract.
7886. When you undertook the duties of Road Commissioner, and assumed the general supervision of this contract, did not Mr. Bayley represent to you that he had refused

- to pass the contract because the gravel was very inferior. There was about 200 yards out of two miles and a quarter which was gravel over pitching where the gravel was of a whiter character, and Mr. Bayley said, "Will you pass this; Mr. Bennett has objected to it?" I said, "Mr. Bayley, you should have objected when it was put down; it is hard to object now that it is completed." That was the whole conversation that took place. Mr. Bayley sent in a certificate that the contract was completed, and stated that the gravel which had been previously condemned by Mr. Bennett was setting very well. Here (*referring to some papers which the witness held in his hand*) are the certificates shewing the completion of the contract with the same gravel. Here, on the 30th of January, Mr. Bayley signs to the completion of the contract in a satisfactory manner.
7887. Did not Mr. Bayley object when you first visited this work—did not he tell you that he and Mr. Bennett concurred? Mr. Bennett had never seen this gravel. I do not know what Mr. Bayley told me.
7888. Did he not tell you that he had represented to Mr. Bennett that this gravel was not satisfactory, and that Mr. Bennett concurred with him? No.
7889. Did you not hear Mr. Bayley say so when he was here? I heard him say many things which I do not endorse; I think his memory is short.
7890. Did you certify for this contract? No, I never certified anything; Mr. Bayley certified; here are his certificates.
7891. You happen to know that Mr. Bayley objected to this gravel? Why then did he not remove it—why did he send to me, six weeks after I was there, to say these things were all right? My first visit was in January, my next was on the 6th April;—why did not Mr. Bayley wait, and, if I may use the term, not send in a final measurement; nobody forced him to do so? This (*referring to documents*) is the 30th January, the next is the 11th March, and the final certificates are from January to 6th March, including gravel, 320 yards.
7892. What date was it when Mr. Bayley told you he disapproved of this gravel, and that Mr. Bennett concurred in his disapproval? I have not admitted that he did; you assume that he did; I allow that I found the white gravel, having lime in it, bound better than the red, and I should put it on in preference to the red; I consider the gravel was excellent.
7893. Therefore, although this gravel was objected to by the Engineer and by Mr. Bayley, you passed it? I have no proof that it was objected to; Mr. Bayley's letter proves that it was approved, and I approved of it.
7894. If a Road Superintendent refuses to sign a certificate because he considers a sufficient amount of work has not been performed to warrant him in signing it, would you authorize the payment of money independently of him? Yes. When Mr. Bayley would not certify to some pavement on the Parramatta Road Mr. Bennett paid the money.
7895. You consider that you have the power; have you frequently done so? No, very seldom.
7896. How many times have you done it in cases where Mr. Martindale has been contractor? In the present case I think there have been five instances where there have been no vouchers whatever from the Superintendent.
7897. Have you ever disregarded the refusal of the Superintendent to sign vouchers, in cases of any other contractors than this? With the exception of the Doughboy Diversion.
7898. With the exception of Mr. Martindale? You ask me the question. I do not remember any other case where the Superintendent has not sent in vouchers.
7899. *By the Chairman*: Have you any papers you wish to hand in? I have, if they are read; not to have them put on one side.
7900. Do you decline to put in these papers unless the Committee previously tell you what they will do with them? I say they bear upon this investigation, and I wish to have them read.
7901. Do you wish to hand in any papers? Not to-day; the investigation is now closed.

W. R. Collett,
Esq.
7 Jan., 1862.

APPENDIX.

Murrumbidgee, 1 November, 1859.

Sir,

It is my intention to send in a Tender for the ballasting of Doughboy Hollow, and for other contract works on the Great Northern Road. It would be incompatible with my position as overseer to do so, &c.

I therefore beg to place my resignation in your hands, to take effect at the end of the present month, and you will have the kindness to forward this letter to head quarters.

I remain, &c.,

W. C. CLEMENTS.

WEDNESDAY,

WEDNESDAY, 8 JANUARY, 1862.

Present:—

MR. DALGLEISH, | MR. HOSKINS,
MR. LUCAS.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

William Rickford Collett, Esq., called in and further examined:—

- W. R. Collett, Esq.
8 Jan., 1862.
7902. *By Mr. Hoskins*: Can you say, as a matter of fact, whether Mr. Bayley condemned a portion of the gravel laid on this road at Liverpool Range, in Mr. Martindale's contract? Not to me, he never condemned it, and I have no proof that he did so to Mr. Bennett; but I find that letter I referred to yesterday.
7903. Without a signature? Without a signature. It has already been produced. (*Letter produced. Appended to evidence of Mr. Collett, 31 December, 1861.*)
7904. Are you sure this is Mr. Bayley's letter? Yes, I will swear to that.
7905. *By the Chairman*: What does this purport to be? It proves that the gravel was good. I found that letter in the Office. It is marked officially, and ticketed to Mr. Bayley.

Mr. Alexander Charles Bayley called in and further examined:—

- Mr. Alex. C. Bayley.
8 Jan., 1862.
7906. *By the Chairman*: There is a letter here, dated 12th January, which is stated by the Commissioner for Roads to be in your handwriting—will you state whether it is an authentic document? (*Witness referred to the letter.*) Yes; it is my handwriting.
7907. Under what circumstances did you write it—how was it you did not sign it? I do not know how I made that mistake; it is my own handwriting.
7908. Did you intend it as bearing any authority at all? Yes. I do not know how it was that it is not signed.
7909. You admit it entirely? Yes.
7910. You adopt that letter altogether? Yes; that is my letter.
7911. Is it all true that is stated in it? Yes, it is true.
7912. Do you not in that express approbation of something you have since condemned? No, I say it is set, but I cannot answer for it in wet weather.
7913. You merely speak to the external appearance of it? Yes.
7914. Did you write that letter of your own free will? Yes, of my own free will.
7915. You do not wish to retract from it? No.
7916. You do not consider it contradicts what you have said before? No, I do not. My only reason for writing that letter was, that he might be allowed some money to go on with, as I knew he was not well off, to complete the rest; and I left that for Mr. Bennett to decide.
7917. *By Mr. Hoskins*: Did you not say in your evidence that you refused to pass this, and that Mr. Bennett concurred with you, and withheld the money in consequence? Yes; I never passed any money for the gravel.
7918. Is not this an expression of your approval of it? No; I say it has set, but I cannot answer for it in wet weather.
7919. *By Mr. Lucas*: You consider that qualified it? Yes. This gravel was gravel put on for the pitching, to fill up the interstices in the pitching, and that is extra work; it had nothing to do with the original contract.
7920. *By Mr. Hoskins*: However, you did not approve of the gravel laid down by the contractor? No, I did not.
7921. And was a portion of the money comprised in the contract, withheld in consequence of the gravel not being good? Yes, it was not paid; it was lumped up till the contract was all finished.
7922. *By Mr. Lucas*: I heard you speak of gravel to fill up the pitching—is that usually an extra? Yes.
7923. Is it not usually set forth in the specification? No, it was not set forth.
7924. Is it not usually set forth in the specification? No, not gravel; because the gravel would go through the stone; it is impossible to hand-pack it so close as to prevent the gravel going through.
7925. Is it usual to have a coat of gravel placed over the pitching? No, that was not specified.
7926. Is it not usual? I never did any before that, and that was not specified there.
7927. Was there any pitching in the specification? No.
7928. Then the pitching was an extra? The pitching was an extra, the same as that gravel.
7929. What do you consider pitching worth per cubic yard? I never did any by the cubic yard, always by the run.
7930. What difference is there between pitching and broken metal. Suppose you had a yard of pitching and a yard of broken metal to do, what would be a fair price for pitching, or what would be the difference? About half.
7931. What did you pay? I paid, I think it was 6s. 6d. or 7s.
7932. For what? For the pitching.
7933. And what did you pay for the broken metal? 5s. 6d.; but that 6s. 6d. or 7s. was not for a cubic yard; it was for 24 feet wide by a yard forward, which would have contained more than a cubic yard.
7934. What is the thickness? 9 inches by 6—an average of $7\frac{1}{2}$ inches.
7935. *By Mr. Hoskins*: Do you remember the purport of the instructions you received from Mr. Bennett, when you were deputed to take charge of the Liverpool Range Extension contract? I had instructions to proceed to Murrurundi to take charge of it.

7936. Merely formal instructions? Formal instructions.
7937. Could you produce a copy of the letter you received? I have it, but not here.
7938. Were you not sent there primarily to take charge of the Arnold Bridge? Yes; that was the first work I had there.
7939. And you subsequently had this Liverpool Range contract added to your duties? Yes.
7940. Did you receive any special instructions when you had that additional charge? I cannot remember now; I think I did, but I am not quite certain. Mr. Bennett was there at the time, and we went over the ground and began to set out the ground together. I am not quite certain whether I had verbal or written instructions.
7941. What was their purport? To see the work done properly according to specification.
7942. Did you not consider it most unusual for you to have charge of road work in Mr. Collett's district when he was Road Superintendent? I thought it was given to me because it was so far distant from Mr. Collett; that it required more than ordinary care to carry it out; and that Mr. Collett could not be there sufficiently often to see that it was carried out properly.
7943. Was any reference made to Mr. Collett by Mr. Bennett, in giving you charge of the work? No.

Mr. Alex. C.
Bayley.

8 Jan., 1862.

William Rieckford Collett, Esq., examination continued:—

7944. *By Mr. Hoskins:* Did you ever make any complaint of Mr. Bennett giving Mr. W. R. Collett, Esq. charge of this work in your district? No official complaint.
7945. Did you make a complaint at all? To any human being, do you mean?
7946. To Mr. Bennett, or to the Minister for Works, or to any other person connected with the Roads Department—to Captain Martindale? Not to my recollection, I did not. I objected to it; but I cannot say I made any complaint. I thought it was a rather unusual proceeding.
7947. You had works in charge beyond that extension as well as on the Murrurundi side of it? Yes. Perhaps I might be allowed to give my idea of the reason why it was done. I think it was simply because I differed from Mr. Bennett in the engineering part of the work, and therefore it was desirable that I should not have to carry out work on a specification that I did not approve. I objected entirely to the 12 feet bridges, and protested against them.
7948. Has Mr. Coghlan received any special instructions from you as to the works he is to take charge of? Yes.
7949. What are the works he is to take charge of? The instructions he has received from me up to the present moment are to visit the whole of his district and to report. He was then to proceed to Doughboy Hollow and measure the pitching, and report also on that work, which he has done. I may state that the reason for not handing this work over to him arose from a doubt whether it was not desirable to make it a part of the first district instead of the second, as the first district is shorter than the second, and the first district has a first-class Superintendent, and the second district only a second-class Superintendent; and that matter is still undecided.
7950. When did he have these Doughboy extension works handed over to him to take charge of? I can hardly answer that question. As Superintendent of the Road the works are in his charge; but it was thought undesirable that he, being recently appointed, should at once go and send in evidence respecting these works. In fact I wished to see the works myself, and not to be influenced in any way by what Mr. Coghlan or any person else might say, but the moment I saw the works, and Mr. Coghlan returned from this Committee, I considered the works then under his charge.
7951. Subsequent to his examination here? Yes.
7952. I suppose you are not aware that he stated that at the time of his departure there was nobody in charge of the works, and that there had not been for some time? I have no doubt he spoke the truth.
7953. Are there any formal or written instructions given to Road Superintendents when they are appointed to that office? I am aware of none.
7954. Do Road Superintendents have copies of the specifications in reference to the contracts in the districts under their charge? I have answered that question before, but I will repeat it.
7955. Not to me? To the Committee I did. Copies of the specifications are always sent to the nearest Police Office when the contract is issued, and the question has often arisen whether the copy which is deposited at the Police Office belongs to the contractor or to the Superintendent, and it has generally been allowed for them to arrange that matter between themselves. It only involves making a copy on the part of either of them.
7956. Do you think a Superintendent or overseer can properly superintend the work unless he has a copy of the specification? That question also was asked in so many words before, but I will repeat it. In many instances the specifications proceed from the Superintendent. The plan has been generally, in the commencement of the previous year, to write to each Superintendent to send in specifications for such contracts as he may think necessary in his district; and these are submitted first to the Commissioner for Roads, and afterwards to the Minister, for proclamation in the *Gazette*. Therefore in a number of cases the specification originates with the Superintendent.
7957. Do you know that Mr. Coghlan has stated before this Committee —? I know nothing of what he has stated.
7958. It has been stated that he has not seen a copy of the specification? It was impossible that

W. E. Collett, Esq.
8 Jan., 1862.

that he could when the copy that was sent up there was handed to this Committee by Mr. Quodling, and the original specification was handed in by me. You asked whether we furnished the Superintendents with copies, and I stated that we sent them to the Police Offices, and left it to the Superintendents and overseers to take copies. Of course it is their duty to obtain a copy, but that is a very different thing from having them furnished to them from the Head Office.

7959. I asked whether you do not think it desirable they should have them? No doubt it is; but I do not think they have so much to do, but what they can make copies of the specifications for themselves. Our clerks have something else to do besides copying specifications, when perhaps there are 150 contracts, and something like 400 specifications.

7960. Are you sure that ten per cent. has always been kept in hand from Mr. Martindale—ten per cent. of the money earned on this contract for the Doughboy Diversion? To the best of my belief it was; I have no reason to suppose otherwise.

7961. When the Superintendent had reported that the contractor had not been carrying out the work properly on this Doughboy Diversion, you visited it, and directed the contractor to proceed with the work, in spite of the remonstrances of the Superintendent. Do you think by making a cursory examination you could tell whether it was done properly—whether the metal was broken to the proper gauge, or whether there were a sufficient number of spikes in the bridges? Excuse me, you have asked about ten questions. I will answer any one of them separately.

7962. Do you think you could tell, by making a cursory examination, whether the work was done properly or not? I could by making an examination; I did not use the word "cursory."

7963. I think you stated yourself that you were there only a few hours? I beg your pardon; I never stated so.

7964. Do you know whether the proper quantity of iron-work was put in the bridges? Yes, I do know it was.

7965. Do you know whether any of the iron-work has been removed since? I beg to hand in a letter from Mr. Loder, and the correspondence respecting the iron-work of the bridges, which is all official, and was all investigated and arranged before this Committee was thought of. (*The witness handed in the same. Vide Appendix A.*)

7966. Are you sure that the quantity of metal, as provided by the original specification, in the Doughboy Diversion contract, has been laid on the road? No.

7967. What is the difference—has there been an excess or a deficiency in the quantity provided in the original specification? A deficiency.

7968. How much is it deficient? About 2,000 yards less than there was in the original specification.

7969. What do you estimate the value of that per yard? Some at 6s. 6d., and some at 3s. 6d.

7970. What sort of metal is that at 3s. 6d.? Like this (*taking up the piece of stone called by some of the witnesses shale.*)

7971. Were there about equal proportions of the different descriptions of metal? I have calculated 1,000 yards of each; that is what I have given the contractor credit for.

7972. Do you remember, or do you know whether Mr. Quodling remonstrated with the contractor, and also pointed out to you that the contractor was filling up the channel of the creek at the foot of the embankment at the cutting? If Mr. Quodling remonstrated, it is in evidence.

7973. It is given in evidence by Mr. Quodling? A verbal remonstrance?

7974. A verbal remonstrance? I am not aware of any verbal remonstrance—at least I took no notice of it.

7975. Do you remember his pointing it out to you on the works? No; I remember pointing it out to him, and telling him to alter it.

7976. In what way to alter it? To cut a fresh channel for the creek—which was not in the original contract. He was ordered to estimate it, send in the amount, and do it, which he failed to do—at least he failed to do the work.

7977. Did you, when laying out the work, anticipate that the channel of the creek would be stopped up, and that the cutting would be an additional work for the contractor? Another two questions, you ask whether I anticipated that the channel of the creek would be stopped up,—I did anticipate it; I knew it would be stopped up.

7978. And that you would have to give the contractor an additional sum for cutting a fresh channel? If it was necessary I should. I am not certain about the necessity of it now. In our life-time it will not be necessary.

7979. Have you not let the contract to him for cutting a new channel? It was remarked by many persons, whether experienced or not, that the bank would be cut away, and in order to stop all remarks of that kind—not that I the least believed it—I said, a sum not exceeding £20 should be spent in cutting a new channel. It is a matter of very little consequence indeed.

7980. Could not the contractor have avoided stopping up this channel? Not when he had 12,000 cubic yards of stuff to make room for. I gained a double advantage by that; I got a road of forty feet wide at that dangerous spot—twenty feet in the solid cutting, and twenty feet of the embankment.

7981. Do you mean to say there are twenty feet of solid road in that cutting? Yes, quite solid. So that if the whole excavation were washed away I would still have my road intact in the rock.

7982. Do you not think a twenty feet roadway in the solid cutting would have been quite sufficient, without having had this earth deposited there to stop the channel of the creek?

It

It was impossible to deposit the earth anywhere else, the space is so confined. As to the creek I never saw it running yet. W. R. Collett, Esq.

7983. What amount of work was involved in the cutting of this channel? The estimate of Mr. Quodling was £20.

8 Jan., 1862.

7984. How do you know Mr. Quodling's estimate of the quantity of earth excavated in this cutting was not correct? Because although it is very difficult to prove the exact amount, it is very easy to prove that there cannot be so much as he stated. Although I would have some difficulty, the benches and buoys having been cut away, in stating how much there is, I can prove that there are not 14,300 yards.

7985. Have you measured it? I have had the sections gone over to see whether by any possibility there could be that amount in the cutting, and I can produce the evidence of engineers to state that it is impossible, and my own measurements come to the same result. In fact no measurement has been taken which comes within 2,000 yards of Mr. Quodling's.

7986. *By Mr. Dalgleish*: Are benches and buoys synonymous terms? Not exactly synonymous terms; but in a sidling cutting there are both benches and buoys.

7987. You have stated that the benches or buoys have been cut away, and therefore it is impossible to measure —? Impossible to measure accurately.

7988. What is the meaning of the term benches? When we attempt to carry up a cutting perpendicularly we leave a bench, in case it does not stand; then, if it does not, we come down with the slope afterwards from above it, and remove the bench in order to make the slope uniform.

7989. Were these benches removed in Mr. Quodling's time or Mr. Bayley's? They were removed by Mr. Quodling, without any instructions from me.

7990. During the time Mr. Quodling or Mr. Bayley had charge? Mr. Quodling and Mr. Bayley had charge together up to the 16th August, and to the best of my belief they were removed when Mr. Quodling had charge, and not when Mr. Bayley had charge—Mr. Bayley not having charge of the earth-work at all, therefore they were removed during Mr. Quodling's time.

7991. You say so from reasoning, not from knowledge? From knowledge. It could not have been otherwise.

7992. Will you say positively they were removed during Mr. Quodling's time? Yes, I say positively they were removed during Mr. Quodling's time.

7993. *By Mr. Hoskins*: I should infer from what you have said that you consider Mr. Quodling incapable of measuring earth-work excavation? Not common earth-work, certainly not. Common earth-work he could measure as well as anybody. But this is a very difficult cutting, and I am not quite certain there is an engineer in the Colony who can measure it. It is 98 feet high, on a precipice, with a perpendicular cliff to the bottom, and therefore it is very difficult to get at for one thing.

7994. May I ask how you estimated the quantity for payments to Mr. Martindale, or how you estimated it previous to allotting the contract? There were two bridges in the diversion, which I estimated to cost £1,100, and these are the two large bridges which were omitted. In the line, as proposed by Mr. Bennett and Mr. Wells, there were originally ten bridges in the contract, and two of the largest were omitted; and Mr. Martindale was to do this big cutting for an amount equivalent to the two bridges—one was to be set off against the other. I calculated the big cutting at 12,000 cubic yards, at 1s. 10d., through rock and earth together, making it amount to £1,100, the same as the two bridges. Now I beg to remark that 12,000 yards is less than any measurement that has been made; there is no measurement so low as 12,000. The next lowest is 12,195, and the next 12,386; all that has been allowed him is 12,000. In order to explain this matter fully, I beg to hand in, which I very much wished to have done before, a paper I have prepared, giving an analysis of the work to be done for the original contract of £6,379, and for the present agreement for £7,000. (*Paper referred to handed in and read. Vide Appendix B.*)

7995. *By Mr. Lucas*: I perceive you have lumped the rock and earth together at 1s. 10d.? Yes.

7996. How much rock was there? The greatest quantity was as hard as this (*referring to one of the pieces of stone on the table.*) It will all stand perpendicularly.

7997. Did you have it cut to a batter? I had it cut to a batter for this reason, that I was afraid that if I left it to stand perpendicularly, the contractor would have charged me 3s., according to the specification; and therefore I made that agreement with him.

7998. If you lumped it all together how could he charge 3s.? Because the schedule price was 3s. for rock.

7999. And the earth-work was 1s. 5d.—but you said you lumped it all together for 1s. 10d., how then, even if you left it perpendicular, could he charge 3s. for rock? Because I was always in a state of alarm lest he should fall back on the original schedule of prices, if we had no agreement together.

8000. Had you no agreement? The evidence of that was Mr. Bayley's letter, which has been so much referred to; that was the object I had. He stated to me verbally he would do it, and he stated so to Mr. Bayley also.

8001. That letter of Mr. Bayley's would not bind the contractor? I think if you take the whole document it binds the contractor; it is sent to me as being approved by the contractor, and it is approved by me.

8002. What is there in that letter to show that the contractor approved of it—what is there to bind the contractor? I think it states that the contractor is willing to do the work for the sum named.

8003. *By Mr. Hoskins*: As you did not measure this earth-work, your statement as to the quantity is mere haphazard? I did measure it.

- W. E. Collett, Esq. 8004. Previous to letting the contract? Previous to letting the contract; we knew by the sections what was in the original drawing. There was no difficulty in that.
8005. And after the contract had been performed, you measured the quantity that had been removed by the contractor, to see whether he had removed the quantity provided? He removed a quantity equal to £1,100. That was all I wanted—an equivalent for the two bridges. As long as the Government was not a loser I did not care how it was.
8006. How did you estimate that the work in the two bridges would be worth £1,100? By calculating them according to the original prices for the work in bridges. I have got the calculation of every bridge, and can tell you the price of the timber, iron-work, tarring, painting, and so on.
8007. What were the numbers of the bridges you dispensed with, and substituted this excavation for? One was called number 6 bridge, but directly I made the deviation of course the numbers changed.
8008. *By Mr. Dalgleish*: Can you state the numbers of the bridges dispensed with, according to the original numbers? They were the two bridges I pointed out the other day—number 6 and probably number 7, unless a small one intervened, making it number 8. Number 6 is one.
8009. *By Mr. Hoskins*: Surely if you made a calculation of the cost of two particular bridges, and in the interest of the Government believed that you were getting an equivalent in earth-work from Mr. Martindale, you can tell on which of the bridges you based your calculations? I could tell you which bridges they are, but when you ask with reference to certain numbers, which are different now, the matter is quite confused. However, I am quite certain number 6 is one, and I think number 8 is the other; but it is not called number 8 now. There were originally 10 bridges, and now they run from 1 to 8. You ask me which out of the 10 were left out, and I say, to the best of my belief, 6 and 8.
- [*After some conversation between Mr. Hoskins, Mr. Dalgleish, and the witness, and reference to plans of bridges on the table, examination proceeded.*]
8010. Will you tell us the length and character of the bridges dispensed with? As far as I can judge, I put them down at £750 and £350.
8011. I would like to know what length the bridges are? About 176 feet, one of them, and the other 96 feet.
8012. No. 6 bridge you see is to be very substantially constructed? Yes. It does not follow that I should have constructed it in that manner. My bridges are all cheaper than these. I should have had none of this sawn timber. My calculation is that I could build the bridge for £750.
8013. Did you not intend to have the bridges built on the original design, and according to the original specification? I never intended to have had that bridge built at all, on account of the impossibility of getting timber of sufficient length in the neighbourhood.
8014. *By Mr. Lucas*: Have you got the plan of No. 1 bridge as per original contract? I do not see it here, but it ought to be here. It is a very small bridge.
8015. Is there a plan in the Office of No. 1 bridge? There must have been a plan for the contractor to have built it.
8016. Has that bridge been constructed? It has.
8017. Has it been constructed according to the plan, specification, and contract? The bridges were all widened from 12 to 18 feet; but, as far as the bridge itself is concerned, it was erected, no doubt about it. I beg to state that, in order to distinguish them, I have christened all the bridges, every one of them, because the change in the numbers rather confused myself. I call No. 1 Adam Bridge.
8018. Just answer my question as near as you can—was that No. 1 bridge constructed in accordance with the plan and specification of the original contract? No.
8019. Was it increased in width or length? It was increased in width, not in length.
8020. Was it constructed, as far as expense goes, in accordance with the original plan and specification—what were the other deviations from the contract—was the timber for all these bridges to be squared or sawn, by the original contract? I am not aware that any alteration with respect to the timber was made. It was merely in the width of the bridge.
8021. No other alteration? Not that I am aware of.
8022. The mode of construction was the same? Yes.
8023. The plan of No. 2 bridge is here? Yes; that we call Brown Bridge.
8024. Was that constructed according to the original plan and specification? Yes, to the best of my belief, with the same alteration as before.
8025. No. 3? Clements Bridge.
8026. Was that constructed according to the original plan and specification? Yes, subject only to the alteration as to width.
8027. Number 4? Donaldson Bridge.
8028. Was that so constructed? Yes, to the best of my belief.
8029. Number 5? Evans Bridge.
8030. Was that constructed in the same way? Yes.
8031. Number 6? That was not constructed at all.
8032. What is the value of that bridge? 750; but I should be sorry to bind myself—say £700.
8033. Have you the calculation on which you value that bridge, or is it a mere guess? The calculation is based on the total amount of the whole work, the whole of the bridges, and then deducting the wood-work of that bridge—
8034. I do not want any deductions at all, if you will tell me the value of that bridge, to have it constructed in accordance with the original plan and specification, without any deductions. What is the value of it—what do you think that bridge could be erected for as per plan and specification? About £700.
- 8035.

8035. No. 7—has that bridge been constructed? No.
8036. What is the value of that bridge—what would it have cost the contractor to construct it? £400.
8037. Has No. 8 bridge been constructed? No. 8 bridge is the equivalent to No. 1 bridge in the other plan.
8038. Has it been constructed? The line joined there, and a bridge has been constructed of the same dimensions as that.
8039. But has it been constructed? Yes, you see it will tally with No. 1 here.
8040. Has No. 8 been constructed? An equivalent to No. 8, No. 1, has been constructed.
8041. What has become of No. 1 in the original specification? We have come now to the diversion.
8042. I only ask whether these bridges have been constructed—I am not talking of the deviation at all—I ask only whether this No. 1 has been constructed? That plan is missing. I dare say it can be found. There is no secret about the plan. It has been erected. I said Adam Bridge had been erected.
8043. You can say these other bridges have been constructed in room of them, if you like, afterwards. I only want to know now whether No. 8 has been constructed according to the original specification? A bridge has been constructed like it.
8044. Have you the plans of No. 9 bridge? That is No. 2 bridge on this plan.
8045. Has No. 9 been constructed? Yes.
8046. In accordance with the original plans and specifications? It has been constructed. We had no original plans and specifications that I am aware of.
8047. No plans and specifications for these bridges? There is one plan and specification for the whole of these bridges.
8048. How then do we find them different on these plans? The plans and specifications are the same to the best of my knowledge.
8049. I will draw your attention to the copy of the specification here—No. 9 bridge is “one queen-truss, 50 feet span, with three 21 feet spans, girders and corbels”—has that bridge been constructed? No.
8050. What would be the value of that bridge, No. 9, as per plan and specification? £369 11s. for the timber.
8051. The whole of it? I can give you the iron-work, tarring, and painting.
8052. And the labour? No; I do not give anything for the labour. This is the schedule of prices the contractor agrees to do it at. He includes his labour in the price per foot—say 5s. a foot.
8053. I merely want to know the cost or value of it? I state £500 then.
8054. *By the Chairman*: You can state about? The only estimate I can have is what is paid to the contractor. I put it down at £500.
8055. *By Mr. Lucas*: That bridge has not been constructed? Yes, it has; it is No. 2 here.
8056. No. 2 where? No. 2 on this plan.
8057. I am speaking of No. 9? Very well then, No. 2 does duty for No. 9.
8058. No. 10 I see is “one undertruss of 50 feet span, with two 21 feet and two 18 feet beams with corbels”—has that been constructed? According to that plan, no; according to this plan.
8059. What would be the value of that bridge, as per specification? About £800; the timber is £623, and the iron-work the other £177.
8060. Will you tell us how many bridges there are altogether on that new line? None.
8061. Then how many bridges are there in the contract—there were originally 10? There are 8.
8062. I see here the following:—“The timber for all the bridges to be of approved red gum or iron-bark, the floors to be of stringy-bark, to be of the full dimensions shewn on drawings, perfectly straight, free from waness, shakes, gum veins, and cores, with perfectly clean sharp arisses, whether sawn or hewn”—has that been carried out? I do not admit that specification; it is not what I have handed in.
8063. This is the original specification? Not the one signed by the contractor.
8064. Is this the specification under which the work was contracted for? It was not the one signed by the contractor.
8065. Will you answer me the question—is this the specification under which the work was contracted for? I do not know anything about that at all.
8066. Is not the contractor expected to sign the same specification under which he takes the contract—under which the works are tendered for—or is there one specification given for people to tender under, and another to do the work under? If circumstances demand it, certainly, as in this case; this was signed subject to altered specifications.
8067. *By Mr. Dalgleish*: You say the bridges are all built by a schedule of prices, provided the contractor, in this schedule of prices, contracts for a bridge with three times the amount of work—? I am not aware that I said anything of the kind. When did I say so?
8068. In answer to a question of Mr. Lucas, you said that the price was 5s. a foot for the workmanship? I beg your pardon; I did not say so.
8069. What is the price—do the bridges vary? Allow me to answer one question at a time. You state I said certain things. I do not say 5s. was the price; but if 5s. was the price, the labour is included in that 5s.
8070. What is the price per foot? Piles, 6s.; hewn timber, 4s.; sawn timber, 5s.
8071. *By Mr. Lucas*: Is that the cube foot, may I ask? That is the cube foot. Iron-work, 9d., tarring, 9d., painting, 1s. per superficial yard.
8072. *By Mr. Dalgleish*: Is the price of skilled labour in shaping and erecting these bridges with queen trusses, corbels, &c., &c., included in that estimate—sawn timber and hewn timber the same? Yes, invariably.

W. R. Collett,
Esq.

8 Jan., 1862.

- W. R. Collett, Esq.
8 Jan., 1862.
8073. What would be the difference in labour, the actual difference, between the construction of a bridge such as No. 6, and the construction of such a bridge as No. 1 on the original plan? No difference; the timber is exactly the same.
8074. What would be the difference to the contractor—allowing the timber to be the same, the labour cannot be the same in both bridges—the labour must be a very large item? The size of the bridge makes no difference; he takes so much timber at so much per foot, everything included; he does not care whether the bridge is a mile long or a yard long.
8075. But he takes the character of the work into consideration before he tenders? No, you will see by his tender he does not.
8076. He makes a uniform tender for ten bridges? Yes.
8077. In making that tender would he not be guided by the character of each bridge, and then take an average—provided No. 6 bridge were to be built as described, with “three 50 feet spans under-trussed, and one 21 feet span, beam with corbels”—could that be done as cheaply per foot as a simple beam bridge? That is a question for the contractor, not for the Commissioner.
8078. The Commissioner, I presume, has some knowledge on the subject? I only presume that if the contractor says he will do all my bridges for 5s. a foot he will do them.
8079. Could any contractor be obtained to perform work of this kind at a uniform price? I should imagine, from the list of tenders, that that is about the price. We generally pay 5s. a foot without reference to the bridge.
8080. But the whole of the bridges are constructed cheaper than intended by the original contract? You state that; I do not.
8081. I ask the question whether it is so or not—previously you stated that all the bridges are constructed cheaper than by that plan? I beg your pardon, I could not say that, when they are 18 feet wide instead of 12; they must have cost more money.
8082. I am not speaking of whether they cost more money or not, but whether they are cheaper than they would be as per plan? I am not aware of any alteration as to cheapness.
8083. *By Mr. Hoskins*: Did you not say rough timber was used instead of square? I said if ever I had carried those bridges across the creek I would have used rough timber. But the bridges never were constructed. I am not aware that any alteration has been made contrary to these plans, except widening the bridges.
8084. *By Mr. Dalgleish*: Have you not substituted three piles for four in some of the bridges? No; they were originally three, and I left them three. The question was put whether I should put an additional pile, and I did not put an additional pile; so that that was an adherence to the original plan.
8085. How many lineal feet of bridging have been constructed on the entire work? About 508 feet, not including culverts and minor bridges.
8086. That is 298 feet less than the original length? Probably; about one-third.
8087. So that the labour would be less than £100 on the construction of these 298 feet? I do not understand what you mean.
8088. 5s. a foot, you say, for the labour only? I did not say a word about labour; I said 5s. a foot for the wood for the bridge when completed.
8089. A cubic foot? Yes.
8090. Are these bridges taken by the foot run at all? They are taken by the cubic foot.
8091. How many cubic feet—you cannot tell, of course? I can tell exactly the number of cubic feet in any bridge you like.
8092. Can you tell the number of cubic feet less than in the original constructions? What do you mean by the original constructions?
8093. The original plans? I could calculate the work which has been done, and the work which has not been done, and deduct the one from the other. It makes a difference of £1,100. You will come to the same result as I do, you will find. I did not cheat myself in the matter. The whole amount of the bridges, allow me to state, is about £3,300, in round numbers, and I consider these two bridges as equal to one-third.
8094. You have some plans of bridges marked D? I am not aware of any marked D.
8095. Are not these termed the D bridges? Diversion bridges, perhaps.
8096. They were alluded to by Mr. Bayley as D bridges, in some way connected with Mr. Debenham? I do not know anything about that.
8097. How will you name this plan, to know it from the plan which Mr. Lucas has been questioning you on? By the names of the bridges. These are Hannington, Glover, and Fon Chin.
8098. What is the number on this bridge? Fon Chin.
8099. What bridge does it represent according to the original number? It represents No. 8, as I stated before. It is not exactly in the same place, but it is an equivalent bridge to No. 8.
8100. The same length? I presume it is exactly the same length; it is made on the same model.
8101. Is No. 2 bridge the same as in the original contract? I do not understand what you mean by the original contract.
8102. No. 2 bridge to be “a simple beam bridge of one 20 feet span”? That is not the contract the man signed. It is not the official contract. Mine is subject to alterations.
8103. Is not this the contract that was in the Court House—the contract that was handed to Mr. Quodling in order to guide him in his work? I have not the slightest proof of it.
8104. Mr. Bayley acknowledged it as the guide which had been given to him to do the work by? By whom?
8105. The department? No; Mr. Bayley had the other in his own hand and signed it. He signed the other specification.
8106. Mr. Bayley signed the specification —? Which is not that.

8107. Which is in the Office, kept in the Office; but he had a copy sent to him? He never had. W. R. Collett, Esq.

8108. Was a copy placed in the Court House? It was.

8109. An exact copy? No.

8110. What was the use of putting a wrong copy there? I did not put it in. It was done by Mr. Bennett and Captain Martindale. When I entered office I made my own specification.

8111. What bridge is substituted for No. 9? The bridge in your hand—(referring to plan.)

8112. Which bridge? No. 2.

8113. No. 2 is substituted for No. 9? —.

8114. A bridge of four 21 feet spans, and one 25 feet span, is substituted for a bridge of 50 feet span with three 21 feet spans? That is much the same thing.

8115. Is the same amount of timber used in No. 2 as would have been used in No. 9? One-third more.

8116. Are the queen trusses mentioned in No. 9 done away in No. 2? Yes. It was impossible to get 50 feet timbers there.

8117. Are the girders and corbels done away? Entirely. We have substituted braces and sills. They are not shewn there. They were substituted.

8118. So that the bridges are not executed according to this plan? You would not see them on that plan sideways.

8119. You would see the queen trusses? I am talking now of the braces to the sills. The queen truss bridge was not built. It was too expensive, and it was impossible to build it on account of the length of the timbers; timbers could not be got for it—50 feet spans. However, there is the same length of bridge there.

8120. What bridge is substituted for No. 3? I will answer that question directly. With regard to the quantity of timber you must be perfectly aware that if a queen truss is dispensed with it implies one or two more rows of piles or sills; and I conscientiously believe there is an equal amount of timber in the other bridge. At the same time, as an engineer, I would not commit myself to a cubic foot; but with the braces and extra piles and sills, which I believe made a much safer bridge, I think there is the same quantity of timber.

8121. What is substituted for No. 3? No. 3 is substituted for No. 10; you put one before the other.

8122. Does the same explanation hold good with regard to this bridge? Exactly; I believe it is the same length. I am not certain whether it was one span short, but it was equivalent. The earth-work and slabbing made it up. I reduced the length of one of the bridges, either that or the other; I think it was that one; but it was made up.

8123. So that altogether you say there is as much timber used in the constructions you have substituted as there would have been in the old plans? Exactly the same, or if anything rather more. I think the trussing employed for the queen truss, if I may use the term, would not be equivalent to two extra piers. There were only three in one and five in the other. There would have been by the first plan one 50 feet span in the centre, and I have of course inserted there another row of piles.

8124. No, there are five spans in No. 10—you have divided them differently. In No. 10 there are one 50 feet span, two 21 feet spans, and two 18 feet beams with corbels. You have made them uniform 24 feet spans—five times 24—so that you have got the same number of piers? I think then the diagonal beams to the piles, which are extra, are equivalent to the small difference there would be in the queen-truss. The quantity of timber in the queen-truss is very little more.

8125. Was there no provision for diagonal stays in the bridges? No, I do not see any; it was an oversight, but not of mine.

8126. They never have been built without diagonal stays? All of them are over dry creeks, merely ravines, without any water; and in no instance have piles been driven, but in every instance sills have been employed. It takes more timber to build a bridge on sills than on piles.

8127. That is provided for in this specification, that either piles or sills are to be used, at the option of the engineer? Exactly; but sills would amount to a larger sum if the contractor was paid on a schedule of prices; there would be a larger quantity of timber used.

8128. Would the same quantity of iron-work be used on these bridges you have constructed, as according to the old construction? There would be more iron in the recent construction, but not so much in proportion as 12 to 18.

8129. Would the iron-work be of an equally expensive nature? Yes, exactly the same; but the number of piles not being increased by the additional breadth of the bridges, neither is the iron-work increased in proportion to the additional breadth.

8130. You have not got a calculation with you to shew the exact amount saved by the omission of these two bridges? I have a paper here which contains calculations of the cost of all the bridges, and I will hand it in if the Committee do not object to it. (Paper handed to Mr. Dalgleish.) These calculations are sufficient for me.

8131. I see here—No. 6 bridge, 180 cubic feet underground—I suppose they are cubic feet? Yes, all cubic feet, except when we come to superficial feet. They would be cubic feet underground.

8132. Does this include sills? Piles underground cannot include sills.

8133. I thought you said sills had been substituted? I did say so, but I did not say piles underground include sills.

8134. Sawn timber, 1,421½ cubic feet? No; I should doubt those being cubic feet.

8135.

8 Jan., 1862.

- W. R. Collett, Esq.
8 Jan., 1862.
8135. You stated that they were all cubic feet unless stated to be superficial? It is stated in the tender to be superficial.
8136. You say these calculations are sufficient—how are they sufficient unless we can identify them? I said they were sufficient for me.
8137. We want you to give information to the Committee? I am giving you information that I got from my predecessor. This is not mine, but Mr. Bennett's. It is my guide in estimating the value of these bridges.
8138. Have you calculated the value of this bridge yourself? I calculated the value of it to be £750.
8139. Where are your calculations. This paper which you have stated you were willing to hand in is not a paper which would explain to the Committee, the number of cubic feet and the number of superficial feet contained in No. 6 bridge? That would be easily calculated when you know the length and the breadth of the bridge.
8140. As it is, these figures would not explain the cubic contents of the bridge, as stated by you in the first instance? (*The witness examined the paper referred to.*) I presume they are cubic.
8141. All cubic? Yes.
8142. Then there were 1,421½ cubic feet of sawn timber? It seems a very large quantity.
8143. Do you admit them to be cubic feet? The total of the whole of the bridges was only 3,215. I am inclined to think that is an error. They are not my figures.
8144. In stating that you wished to band this in, you said they were quite sufficient for yourself? They are quite sufficient for me to make a valuation to see whether that bridge would be equivalent to another.
8145. Can you explain it to the Committee? I cannot make you understand it. It is not my paper, I beg to remark.
8146. You said you understood them—that you had adopted them? I never said a word about adopting them.
8147. You have stated your willingness to give this in to explain the matter to the Committee? You asked me if I had any calculation of what the values of these bridges were, and I handed in that paper for the purpose. I could make a calculation.
8148. If you can make a calculation, perhaps you can inform us on what ground you base your calculation—is this 1,421½ of sawn timber cubic or superficial? That is cubic measurement.
8149. Slabbing there is none? And I beg to state that the reason why that is cubic measurement is because there is no slabbing.
8150. Iron-work 2,800—what is this? Pounds.
8151. At how much per pound? 9d., I expect.
8152. Tarring, 1,689—is that superficial feet or is it pounds of tar? Superficial yards.
8153. There is nothing on this paper to indicate that it is yards? I have a paper that does though.
8154. But there is nothing on this paper to indicate it, and there is nothing on this paper to indicate that the 2,800 for iron-work is pounds? What would it be—would it be tons—what can it be but pounds?
8155. It might be hundred-weights, or tons, or ounces? Hundred-weights or tons of tar in a bridge!
8156. I have asked a simple question—is there anything in this to indicate what that 2,800 is? Yes, common sense.
8157. When the figures under the head of sawn timber were submitted to you—1,421½—you stated at first that they could not be cubic yards—why did not common sense indicate to you whether they were cubic or superficial feet? Because I am not in the habit of giving an answer I might have to revoke. Directly I saw that there was no slabbing I knew it was cubic feet.
8158. What was the price per cubic foot for the sawn timber? 5s.
8159. What is the price per cubic foot for hewn timber? I have stated all this repeatedly.
8160. Be kind enough to state it again? 4s.
8161. What is the price per cubic foot for piles under ground? Are you asking me Mr. Bennett's price or Mr. Martindale's price?
8162. The price according to the paper you have given to me is not sufficiently explanatory of the price of the bridge? You want to know the price of that?
8163. Yes? 6s.
8164. Are there any piles above ground in this bridge? The bridge does not exist.
8165. Were any piles to have been above ground? If piles were used they must have been above ground.
8166. 180 cubic feet are designated here as under ground, but there is nothing to show how much is above ground—How much pile-work in that bridge would be above ground? Do you expect me to answer that question?
8167. I presume there must have been pile-work above ground? I presume there is.
8168. Is the hewn timber a portion of the piles above ground? Of course it is; no question about that. They very often drive them round, and then hew them square what is above ground; at least that is the railway practice I believe.
8169. They drive them round and then hew them square? Yes.
8170. Do you state that is the railway practice? What little I have lately seen near Singleton has been done in that manner.
8171. To drive them round and then hew them square in their place? Yes; which I think very unnecessary.
8172. Is there any timber used in this bridge which should be calculated as superficial measurement? No. 6 bridge?
- 8173.

W. R. Collett,
Esq.
8 Jan., 1862.

8173. No. 6 bridge? None; not according to that paper.
8174. Would the planking in the bridge be superficial or cubic? Evidently cubic by that.
8175. I am not asking by this? It would be cubic.
8176. So that this would be the whole expense of the timber used in this bridge? Yes.
8177. And the whole expense of the iron-work? Yes.
8178. And the 151½ is square yards of painting? Yes, which is the painting of the railings.
8179. The hewn timber is 4s.? Yes.
8180. So that the hewn timber is cheaper by 2s. a cubic foot than the rough piles? I beg to refer you to Mr. Martindale's tender; I am not answerable for his prices; his tender is before you in evidence.
8181. The timber as cut from the bush and stripped of the bark is 2s. a foot dearer than the same timber squared? The one includes the driving of the piles, which is a rather serious item. What is underground is paid for as underground, and therefore that includes the pile-driving in the extra price.
8182. And the same timber is — ? 5s.
8183. The tarring—how much a yard? 9d.
8184. And the painting? 1s. I have stated generally that the big cutting, the earth-work, was substituted for the two bridges, and that I valued the diversion, the new line, as equivalent to the old line. But the whole of the new line has been metalled, which will also be a considerable amount; and there has been the fencing, which probably would not have been on the old line, and it is on the new line. But even if it were not the case that it is equivalent in value, I have still, by the statement I have handed in, a sum of £560 in excess of the work that would have been done on the old line. In case the big cutting was not equivalent to the two bridges, I have work done in other parts of the contract, amounting in value to an excess of £560. Therefore if the bridges were carried out by Mr. Bennett's calculation, to exceed the value of the earth-work in my estimate, I have still an excess of work on that cutting and elsewhere, more than equivalent to the value of the bridges. With reference to the analysis I have handed in, I have, to the best of my belief, put down everything at a minimum, in order not to shew that I had more work done than I was able to prove was done, by the evidence of any professional man visiting the spot. For instance, I put down pitching at 2,800 yards, and Mr. Coghlan reports that there are 3,070 yards.
8185. *By Mr. Hoskins*: Has Mr. Coghlan measured the works? Yes.
8186. The cutting and all? No. This is a report which I have wished to hand in on four different occasions, but which the Committee have not yet received. Mr. Coghlan states that a sum of £2,814 is a low estimate for the bridges.
8187. For what bridges? For the whole of the bridges that have been built. Mr. Coghlan states that the quantity of blue metal is 1,318 yards, which he has measured up; and in this analysis I have only taken credit for 1,000 yards of blue metal; and the blinding and inferior metal, which he has mixed up together, I took credit for only 1,000 yards, and Mr. Coghlan reports there are 4,360 yards; but that is qualified by their being lineal yards. All the measurements, whether by Mr. Quodling, Mr. Donaldson, Mr. Hannington, or any other person, are very much in excess of what I have estimated; yet notwithstanding the reduction in every item, there is still a sum, amounting in the aggregate, to £7,560 due to the contractor, according to the schedule of prices. I wish if possible to hand in these reports.
8188. We will bring them out in evidence? I want to hand them in as evidence.
8189. You are complaining of the length of the examination, and yet you wish to extend it by handing these reports? This is the only chance I have of stating my case; these papers are an important part of my case; and so far from extending the length of the examination, I think if they were taken in and read they would have the effect of shortening it.
8190. *By the Chairman*: What are these documents? Documents stating the state of the works. The first is a letter from the contractor, dated the 1st November. (*Document handed to the Chairman.*)
8191. This is a document which I think ought to be taken in, but it is one on which questions will have to be asked, and therefore I think it will be better to defer it for the present? I am ready to answer questions on all of them. I have several others.
8192. *By Mr. Hoskins*: Do you consider that a yard of pitching, this kind of pitching you have described, is equal in value to a yard of metal? A yard lineal of the pitching I do. It contains 33½ cubic feet to one yard of broken metal of 27 cubic feet. It is blue metal pitching, not sandstone—all basalt—there is not a bit of anything but basalt used in that.
8193. Then, although there is a deficiency in the quantity of metal, you consider the substitution of pitching equivalent? Yes.
8194. You have no confidence in Mr. Quodling's measurements of masonry? I only asked him once to measure masonry, in my presence, and he did it wrong. He was to re-measure Mr. Bayley's work, and he himself did it wrong. I have no doubt he could do it if he was not so careless.
8195. You asked Mr. Donaldson and Mr. Quodling to measure it, and they made an erroneous statement? Yes, both of them.
8296. Do you think it was intentional, or were they unable to do it? I can only give my opinion, but I have not the slightest doubt it was intentional.
8197. Was this subsequent to Mr. Quodling's resignation? No, in the middle of September.
8198. Did you point out to them that they had made an erroneous measurement? I did, and told them it was about time they knew better.
8199. Do you not think you treated Mr. Quodling very leniently, seeing that he had shewn
his

W. B. Collett, Esq., his inability to measure stone-work, though he was receiving a high salary, in not reporting his incompetency to the Minister? I may be guilty of what a witness has accused me of, of not being sufficiently strict.

8 Jan., 1862.

8200. Do you consider it consistent with your duty to allow persons in the receipt of large salaries from the Government, to continue in their positions without reporting them, after they have shewn their incompetency? I have stated that I always had a great objection to interfere with Mr. Bennett's and Captain Martindale's appointments, there not having been an exact unison of feeling between those gentlemen and myself in carrying out works. That influenced me materially in Mr. Quodling's case; more especially as he was a young man, whose prospects I should have been very sorry to have destroyed.

8201. You said you believed Mr. Donaldson sent down stones to this Committee? I said he had sent them down, on the authority of a letter I received, stating that the Postmaster had received them, and was willing to give evidence of it if necessary. I have no doubt it is true.

8202. Supposing it is not true—that the stones were not received by this Committee at all? I did not mean that they were sent direct to this Committee. They were received by Mr. Quodling, at the Office of Works, not here.

8203. Do you feel assured that there are six inches of broken metal on the sides of the road, and nine inches on the crown? I am sure there is nothing of the kind.

8204. Will you explain what thickness the metal has been laid down? Usually four and a half inches in the centre and three at the sides.

8205. You feel assured there is not that thickness? There could not be.

8206. Do you not know that it is provided by the original specification that there should be? It was to be laid on as directed, I think. Does it not state the quantity, 3520 yards?

8207. The original specification provided that there should be nine inches on the crown of the road and six at the sides—is that complied with? Yes, with respect to the pitching, which is an equivalent. The hand-packing is equivalent to the breaking; and all the other metal since put on is supplementary. The pitching exactly equalizes the amount within twenty yards.

8208. The metal placed on the road since is supplementary? Yes; the contract as it stood, after the substitution of the pitching, would have had no metal at all, and therefore I had to get 1,000 yards extra. The hand-laying of the stones of the same material was equivalent to breaking the stones.

8209. In allotting contracts, or extensions of contracts, for a lump sum, do you make your estimate on calculations based on a schedule of prices? We have both a schedule of prices, and a lump sum. We rather put the contractor to a disadvantage, because we take which we choose, but we can always fall back on a schedule of prices for an extension.

8210. Of course you make your calculation of the probable cost of the extension from the schedule of prices? Of course, that is our only guide; but our previous calculation is made from our own estimate of prices. Of course if I have a thousand pounds to spend I make some calculation; and I may say that in my time the contracts have all been let for very much less than the estimate, in almost every instance.

8211. In reply to a question from Mr. Forster, you said you were not aware of any contract in New South Wales being performed according to specification, or in which the estimates were not exceeded? I think it is a system which exists all over the world. I know something about railways, and I never knew them to be carried out according to the original specification. Of course a small work may be estimated for and carried out pretty accurately according to specification, but over miles of mountain road it is impossible for any engineer to put down everything and adhere to it throughout. For instance, until borings are taken he cannot tell whether piles can be driven or whether sills will have to be used, or until he has tried the rock he cannot tell the slope on which it will stand. So that I do not believe any contract in the world, of any magnitude, was ever taken in hand and carried out strictly according to the original specification, and within the estimate. That is the result of my experience, which has extended over thirty years.

8212. Will you state the average width of the road in the Doughboy Diversion? The average width, according to the specification, for the first 50 chains, is 30 feet, and for the remaining 149 chains it is 24 feet, with the exception of the big cutting, which is 20 feet in the solid cutting, and 20 feet on the embankment; so that the result is that there are 50 chains of 30 feet wide, 7 chains of 40 feet wide, and 142 chains of 24 feet wide.

8213. What is the width of the roadway for vehicles, without interfering with the water-tables? The width of the roadway between the water-tables is 30 feet. When the road is open for traffic they have the whole 30 feet, but there is only 18 feet of that pitched.

8214. You are sure there are 18 feet pitched? I have measured it and I never found it anywhere less—and 15 feet metalled. I always left a foot and a half on each side to shew the pitching. The metal is 15 feet over the 18 feet of pitching.

8215. Would you not consider it your duty, in the event of the Superintendent in charge of the work reporting to you that there were deviations from the contract, to examine the work and ascertain whether the contractor was or was not performing his contract properly—would you not consider it your duty to take notice of it? As a general rule I should take notice of it. In this case Mr. Quodling has reported that he was carrying out the deviations according to my directions. His reports would shew that he was aware of it. He states, "Mr. Martindale is carrying out the deviation according to your direction," or words to that effect.

8216. When Mr. Quodling with you visited the place and pointed out to you that Mr. Martindale was not carrying out the contract properly; did you remonstrate with the contractor, or did you take no notice of the representations of Mr. Quodling? He never pointed out

- out anything to me; I do not think we spoke; he never pointed out anything either to the contractor or to me; that is purely imaginary on his part.
8217. Do you know whether the names of Government officers were attached to the testimonial which has been spoken of? I only looked at it the other day, and I saw Mr. Bayley's name, which he seems to think is not there.
8218. Are there others too—Greer? He is not a Government officer.
8219. Mr. Williams I mean? I have no doubt Mr. Williams' name is there.
8220. There are a few questions which Mr. Quodling wished me to ask. One is, do you consider that the pitching of the road costs the contractor as much per cubic yard as supplying and spreading 2½ inch gauge of broken metal, spread on the road in two coats, the first coat to be consolidated before the second coat is put on? I do, in the proportion of 33½ feet of solid pitching to 27 cubic feet of broken metal—the same material broken.
8221. Do you consider consolidation, previous to spreading, of no consequence? I consider it the greatest nonsense in the world. My best roads have been made where the ground has been perfectly soft and pappy—roads which have stood now for years.
8222. Have you sanctioned a similar proceeding with reference to the pitching and consolidation in any other contract, and if so, the name of the contractor and the locality? Mr. White, at Bargo, pitched a mile; Mr. Holcombe, at Patrick's Plains; Mr. Mathew Miller, at Scone; under Mr. James Campbell's direction, between Maitland and Black Creek; and under Mr. Dennis and Mr. Johnson, on the Blue Mountains.
8223. What did you mean when you directed Mr. Shairp to write that the financial part of the contract did not concern Mr. Quodling? I meant that Mr. Quodling had nothing to do with the state of the funds in hand; he had simply to send in an account of the work done periodically. That was a question for our exchequer. He never received the money; Mr. Quodling never had it; it was paid to the contractor.
8224. There is a question arising out of that. Is it not the duty of the Superintendent to see that he does not certify for a larger proportion of work having been performed by the contractor than would warrant the Office in paying him more than he had earned, reserving 20 per cent.? As a general rule the Superintendents have acted upon that, but in this case the Superintendent for three months refused to do anything; from the 16th August to the 16th October he refused to send in anything. I visited the works in September, found the work done, and paid the money; but as a general rule I would not do that.
8225. Is it the practice when works are handed over from one Superintendent to another, to furnish a statement shewing the amount advanced on account of the work—shewing the state of the funds in connection with the work? The I form, furnished every fortnight, contains at the top of it an account stating the money at disposal for the particular work, so much spent on account, and so much done. If you refer to those forms relating to the Doughboy Diversion, you will see at the top the amount of the contract, £7,000; and the last certificate of Mr. Bayley made a total of £4,379.
8226. Do you not require the columns of the I forms to be filled in, shewing the amount already advanced, in all cases where the Superintendent recommends a sum for payment? No; it is more regular to do it; but I am not much in favour of the I form myself; it gives a great deal of trouble, and we have a check in the Office. I do not believe in these forms myself. It was a very recent institution of Mr. Bennett's which gives the Superintendent a great deal of trouble, and to be conscientious I do not think the check a sufficient one.
8227. What arrangement did you make with Mr. Martindale about the extension of the Doughboy contract to the creek opposite Evans' Inn? The arrangement was made by Mr. Quodling by my directions, on the same terms as the contract; the pitching to be at 6s. 6d., the earth-work at 1s. 5d., and the culverts at schedule price; the total amount being £140.
8228. Was this an extension of the contract? It was not included in the £7,000; it was not taken into consideration at the time; it is not completed.
8229. This is one of Mr. Quodling's questions—do you know that the contractor has metalled a portion of that road with metal belonging to the contract. I do not know what he means by it? The question insinuates that the contractor has taken metal paid for on one contract to put upon the other. But there was no metal that was not spread; and he can hardly have removed the metal already spread, Mr. Coghlan having recently remeasured the metal, and made it more than I thought it was.
8230. He wishes to know whether the bridges were carried out strictly according to the drawings furnished? Mr. Bayley was bridge engineer, and he has stated that the bridges were carried out in the most satisfactory manner, and I corroborate his statement in my report.
8231. *By the Chairman:* We may as well take those papers now that you wish to hand in? I beg to hand in first a letter from the contractor, dated 1st November, 1861. (*Handed in and read. Vide Appendix C.*)
8232. This is a letter from Mr. Martindale? An official letter.
8233. What course did you take in regard to it? It was before the appointment of this Committee; but still at a time when there was sufficient intimation that it would be appointed, and I am not aware that I did anything in the matter.
8234. This letter was written because this Committee was expected—is that what you mean? No, I will not say that. You asked why I did not take action on it, I understood.
8235. No, I asked what action you took? Well, I state that in consequence of expecting the whole thing to be publicly inquired into, I did not take any action. Mr. Quodling had sent in his resignation on the 24th October, and I had nobody to communicate with.
8236. This was written after Mr. Quodling's resignation? Yes, but before it was accepted.
8237. You will pardon my asking the question. It was not written in consequence of any suggestion of yours, was it? I will not deny it was in consequence of a suggestion of mine,

W. R. Collett,
Esq.
8 Jan., 1862.

- W. R. Collett, because I saw the contractor, and I asked him this question—Will you put it down in writing, or make an affidavit? I said I did not want any statement that I could not verify on oath. You may call that a suggestion. I said there will be certain things spoken of, and Esq.
 8 Jan., 1862. I know you are going to Melbourne, and I wished to have something that could be verified.
8238. What authority has the contractor over Mr. Quodling to ask him to send in returns? The letters I previously handed in, which were approved of by the Commissioner, arranging for returns every fortnight.
8239. He says he repeatedly asked Mr. Quodling to send in returns—did he repeatedly give you information of his having asked him? Yes.
8240. By letter? By letter.
8241. Then he made complaint, in fact, to you? He made complaint to me.
8242. Then this letter is simply a repetition of complaints made previously? It may be that. He made complaints very frequently before that, that Mr. Quodling refused to send in certificates. At last he got a letter from Mr. Quodling promising that he would send them in, but he did not keep his word.
8243. How is Mr. Martindale to know whether Mr. Quodling sends in returns or not—he does not get the returns? The return is brought to Mr. Martindale to sign by Mr. Quodling. Mr. Martindale must sign it.
8244. Sign all the returns? Sign the returns when the money is to be paid.
8245. If Mr. Quodling makes a complaint against Mr. Martindale, does he go to Mr. Martindale to sign it? I mean money returns.
8246. We cannot expect you to explain Mr. Martindale's letter? I do not wish to explain the letter at all. As part of the evidence I hand in that letter from Mr. Martindale.
8247. You say these are money returns—how do you know? I know they are money returns, from another letter of a previous date.
8248. Are all the returns from the Superintendent necessarily signed by the contractor? When the money is paid, of course the receipt is and must be signed.
8249. Supposing a return or report is made —? A return is not a report.
8250. I said, or a report. They are both different, of course. By a return you simply mean a money voucher? A money voucher.
8251. Then it is a pity, if he means vouchers, that Mr. Martindale did not say so, because the word return is very ambiguous. Do you state positively that all returns, of whatever sort, must be signed by the contractor, as well as by the Superintendent? All before they are submitted to the Auditor General.
8252. All returns of any kind? All money returns.
8253. Mr. Martindale says here that Mr. Quodling never remonstrated against the manner in which he carried on the work—how does he know that? He means personally. Mr. Quodling would not write letters to the contractor.
8254. I presume, if he remonstrates, he would not shew it to the contractor—he is not bound to do it? The meaning of that is that Mr. Quodling, when on the work, never told the contractor he was doing his work wrong.
8255. How is it you seem to know the meaning of this letter so well? Because I am perfectly aware of the routine of duty in the department. This is a previous letter, dated 1st October, from Mr. Martindale, which bears upon that letter. Perhaps you will have it read. (*Handed in and read. Vide Appendix D.*)
8256. What is your object in handing in this letter? As a proof of the other.
8257. What does it prove? It proves that he did not make any return.
8258. Does Mr. Martindale's statement prove that no returns were made—it is merely a statement that Mr. Quodling told him something? It is a statement that no return was made. I beg to hand in a letter from the foreman of the contractor, Mr. Muir. (*Handed in and read. Vide Appendix E.*) I beg to say that I saw that man, and he is willing to substantiate that on oath. He has been on the works since the commencement, and never left them for one day. *The next is a short letter from the overseer who was in charge of the works, Mr. Hannington. (*Handed in and read. Vide Appendix F.*)
8259. This is dated long after this investigation began? It was on his way down, Mr. Quodling having left Mr. Hannington in ostensible charge.
8260. Was he aware that this investigation was going on? He must have been aware of it from public rumour. He had an official letter to this effect—"Mr. Hannington and Mr. Hawkins will send in reports every week until a successor to Mr. Quodling is appointed."
8261. Was this written at your request? Not in the slightest degree. It was in pursuance of the official order I have just mentioned.
8262. *By Mr. Dalgleish:* When did he get the official order? I think about the 13th November. On Mr. Quodling resigning, an official letter was written to them directing them to furnish reports until the appointment of a successor to Mr. Quodling. I beg to hand in my own report on this contract to the Minister for Works.
8263. *By the Chairman:* After personal inspection? Yes. (*Handed in and read. Vide Appendix G.*)

APPENDIX.

W. R. Collett,
Esq.

3 Jan., 1862.

A.

Colly Creek,
Murrurundi, 17 October.

My dear Sir,

On returning from Murrurundi to-night I was informed by a party, who had the curiosity to go and see if it was true, that several of the iron straps and bolts had been removed from the third bridge down Doughboy Hollow Creek, the holes where the bolts were, plugged up with wood, and a paint or tar brush run over the parts. I could not get any more information, and it was too late to go and see myself. I can depend, however, upon the truthfulness of the statement, so that you may take what steps you consider necessary in the matter.

The Hon. W. M. Arnold.

I remain, &c.,
ANDREW LODER.

Acknowledge, and refer to Commissioner for Roads.—W. M. A. 23/10/61.

Acknowledged, 26/10/61.

In consequence of Mr. Quodling's resignation, ask Mr. G. P. Williams, road overseer at Murrurundi, to report.—W. R. C. 30/10/61.

Mr. Williams, 31/10/61.

Report herewith.—W. R. C. 12/11/61.

Murrurundi, 4 November, 1861.

Sir,

I beg to state that I have, in accordance with the instructions conveyed in your communication of the 31st ultimo, made a careful survey of the 3rd bridge down the Doughboy Hollow Creek. No wilful damage is apparent, but 5 iron straps and 6 bolts most certainly have been removed, and the holes plugged up as stated. * Should be the 4th bridge.

This circumstance, however, I account for in the following manner:—

"On examining plan of the bridge in question, I find only 8 iron straps and 16 bolts shewn thereon; Mr. Martindale, the contractor, however, thought proper to furnish 24 of the former and 24 of the latter. Subsequently, finding himself in want of iron, he removed or gave his agent orders to remove the surplus quantity; so that any deficiency occurring in the iron-work of the other bridge might be supplied." † This only refers to the iron-work of piles.

S. G. Shairp, Esq.,
Sydney.I am, &c.,
H. P. G. WILLIAMS.

Satisfactorily explained.—W. R. C. 12/11/61.

Submitted.—J. R. 14/11/61.

The explanation does not appear to me to be satisfactory, and I should like to see Mr. Collett on the subject. Inform Mr. Loder that the stipulated quantity of iron-work is still found in the bridge.—W. M. A. 15/11/61.

Commissioner for Roads.—B. C. 15/11. J. R.

A. Loder, Esq., J.P. 16/11/61.

On making further inquiry it would appear that Mr. Bayley ordered the contractor's workmen (in his absence) to put in the extra iron-work. On Mr. Martindale's return, Messrs. Bayley and Quodling both refused to make any allowance for the extra iron-work. Mr. Martindale then directed its removal, but is now ready to replace the same, should the Commissioner, when finally inspecting the work, consider the same desirable, and as these straps and bolts for the short land piles are not in the original specification, their replacing may be superfluous.—W. R. C. 16/11/61.

Submitted.—J. R. 16/11/61.

Seen.—W. M. A. 25/11/61.

B.

ANALYSIS of the Work to be done for the original Contract for £6,379, and the present agreement for £7,000.

W. B. Collett,
Esq.

8 Jan., 1862.

C.

Sydney, 1 November, 1861.

Sir,

In answer to your inquiry, I beg to inform you that I have repeatedly asked Mr. Quodling to send in returns, according to the 9th clause in General Conditions. He has never sent in, to my knowledge, a single return for the last three months; and I am ready to make an affidavit that he very seldom visited the works, and never remonstrated against the manner in which they were carried on, except in the case of one culvert, which Mr. Bayley certified for, and which you, at your last visit of inspection, made me alter. I can also state that Mr. Quodling has never sent in any return for any other works executed by me, although the whole are nearly finished, and you have a large balance in hand.

I have, &c.,

JOSEPH MARTINDALE.

The Commissioner of Roads,
Sydney.

W. R. C.—1/11/61.

D.

Grafton, 1 October, 1861.

Sir,

Mr. Quodling told me he would make a return for £500 on Doughboy about the 6th of this month; if he does not by the 10th, will you be so kind as to lodge the other £300? The works are going on fast.

I have, &c.,

JOSEPH MARTINDALE.

W. B. Collett, Esq.,
Commissioner for Roads,
Sydney.

Mr. M. can have £300 on account.—W. R. C. 7/10/61.

E.

Doughboy Hollow,
18 November, 1861.

Sir,

In answer to your letter of this date, I have the honor to inform you that the statement below you will find correct:—

1. Mr. Quodling told me the pitching would do first-rate when he first saw it, but I have done it much better since.
2. Mr. Quodling has never set out any works in the Doughboy Hollow contract, except the approaches to No. 5 bridge north.
3. Mr. Quodling came on the works about once a month.
4. Mr. Quodling has never spent more than ten hours on the works for the last three months; then he never looked at it. I have known him a week in the Page, and never came near the work, although I have asked him to come and look at it.
5. I have never seen Mr. Quodling measure the work, and I have never been an hour off them when it was fine, besides he could not do so without my knowledge.
6. Mr. Quodling never found fault with the pitching until last month; then he did not get off his horse to look at it; he was twenty yards from it.
7. I will not be more than two weeks with twenty men, if the weather keeps fine, in finishing.
8. I can say with safety that there is more than half cubic yard to the yard forward of metal on the pitching, and that we shall have plenty left for the maintenance of the road.

I can also say that the work would have been finished long before this if Mr. Donaldson had looked after it properly, but he always tried to keep them back.

Private.—I hear Mr. Donaldson and Mr. Quodling are going to contract on the Northern Road next year; there must be something in it, as Mr. Donaldson said to the men, "Martindale be damned; he has got too much money from Government already." I told him he ought to be ashamed of himself, as he was getting £5 per week, and trying to stop the works instead of pushing them on; really he has done nothing but talk about you, a nice contractor's man. I hear he sent some stone down to Sydney to Mr. Quodling to-day, yet he was the man that passed it.

I have, &c.,

WILLIAM MUIR,
Foreman.

Mr. Martindale.

F.

Sydney, 4 December, 1861.

Sir,

I have the honor of forwarding a report of the Doughboy Diversion contract works.

I visited there on the 30th ultimo, and found considerable progress had been made during the past fortnight.

Mr. Martindale is of opinion that he shall be able to complete the line in about eight or ten days. The following is a statement of the works to complete:—

- Adam Bridge—Middle rail and gravel beam; painting and tarring.
- Brown Bridge—Hand and middle rails; gravel beams; painting and tarring.
- Clements Bridge—Floor to be tarred and wing to abutment.
- Donaldson Bridge—Floor to be tarred.
- Evans Bridge—Floor to be tarred; approaches to finish.
- Fon Chin Bridge—Floor to be tarred.
- Glover's Bridge—Floor to be tarred.
- Hannington Bridge—Floor to be tarred; pitching about 3 to 4 chains; metal about 40 chains.
- Embankments to trim; fencing; ditching box culvert north of Hannington Bridge; clearing.

I have, &c.,

OLIVER L. HANNINGTON.

The Commissioner for Roads,
Sydney.

G.

G.

REPORT on the Doughboy Diversion Contract.

W. R. Collett,
Esq.

8 Jan., 1862.

I THOROUGHLY inspected this contract on Thursday, December 19, 1861. My previous inspections were made on April 11, April 18, June 26, and September 12, 1861. I found the whole of the works carried out in a very satisfactory manner, and in strict accordance with my directions.

1. *Clearing.*—The roadway, which is 30 feet broad for the first 50 chains, is fully 24 feet broad for the remaining 149 chains, except for a few yards near the big cutting, which is compensated by the big cutting itself, where the road is more than 35 feet broad. The whole has been cleared most efficiently, but 20 per cent. will be deducted from the lump sum of £200, on account of some stumps being left in the side cuttings and embankments, in order to prevent the same from sliding or giving away.

2. The cuttings and water-tables are properly trimmed and cleared out, where the embankments, on account of surplus excavation, exceed the required breadth of the roadway; the trimming of the same would be more prejudicial than otherwise.

3. The road is well consolidated throughout, and the laying down of the pitching in soft ground has exceeded my expectations, as the whole has settled down simultaneously, and by the recent addition of metal and blinding, the whole road has now a proper convexity with a sound foundation. Every new work will require attention when the heavy traffic comes upon it, and I have directed the Superintendent to watch this contract closely, particularly on the black soil and over the big cutting.

4. *Fencing.*—The original specification for this is faulty, and I have only permitted 192 rods to be erected, for which the contractor will receive the schedule price and nothing more. I would recommend a rough rubble parapet wall to be built in the most dangerous places. 192, £64.

5. *Metal.*—The original contract was 3,520 yards of broken blue metal. For this there was substituted 3,520 cubic yards of blue metal pitching, and 1,200 cubic yards of broken blue metal, and 1,300 yards of inferior metal and blinding. No shale has been used, from the simple fact that the geological nature of the Dividing Range of Australia, which is of volcanic upheaval, will not admit of a tertiary or secondary deposit on its culminating points. The second class metal, which I have directed to be used where the substratum is rock, clearly shews the action of fire, and is excellent material for the price paid, namely 3s. 6d. per cubic yard, and is superior to the white metal in use on the roads in the vicinity of Sydney, for which twice the amount is paid.

6. *Bridges.*—All the bridges have been completed in a most satisfactory manner, with the full quantity of iron-work. Some additional tarring has been ordered by me.

7. *Slabbing.*—This also has been carried out to my satisfaction. The increased width of the bridges, from 12 to 18 feet, has somewhat lessened the necessity of protecting the abutments and approaches, and guard rails, which I have ordered for all the bridges, are a better substitute.

8. The diversion of the creek is not in the original design, but a fresh channel will be cut, at an expense not exceeding £20, in order to protect the big cutting.

9. In a letter signed by the late Superintendent, and in another written under his dictation by his overseer, and respectively dated October 24, 1861, they both state that £2,000 would be required to complete the contract. The men employed by the contractor for the last 8 weeks have never averaged above 20, whose wages in the aggregate have not amounted to £450; and at the present moment it will not require more than £50 expenditure, in order to enable me to certify for the whole work.

The mail has been travelling over the entire line for the last fortnight with perfect safety.

WILLIAM R. COLLETT.

To be laid before the Honorable the Minister for Works.—W. R. C. 24/12/61.
True copy—S. G. SHARP. 30/12/61.

THURSDAY, 9 JANUARY, 1862.

Present:—

Mr. MARKHAM,		Mr. GARRETT,
Mr. LUCAS,		Mr. DANGAR,
Mr. DALGLEISH.		

WILLIAM FORSTER, ESQ., IN THE CHAIR.

John Rae, Esq., called in and examined:—

8264. *By the Chairman:* What position do you hold in the service of the Government? My present appointment is Under Secretary for Works and Commissioner of Railways.

8265. You have been in the Railway Office some time, have you not? Yes.

8266. Do you recollect any time when there was some fault found with Mr. Collett for allowing money to be spent in some way that was not considered regular? Yes, in the year 1857, some correspondence passed at that time between the then Commissioner and the Secretary for Lands and Works.

8267. Who was Secretary for Lands at that time? Mr. Robertson; he was Secretary for Lands and Works. It was before the Department was divided.

8268. What was the nature of the correspondence? The general purport of the letters was, that complaints had been made against Mr. Collett for not carrying out his duties according to instructions, as far as I remember; but I can give you a copy of the correspondence if that would be more satisfactory.

8269. Can you place the correspondence before us? Yes.

8270. You cannot specify it more particularly? I can specify generally that the Commissioner threatened that if such proceedings were continued he would bring his conduct before the Minister, and recommend his dismissal.

8271. The Commissioner? Yes, the Commissioner of Railways was at that time also Commissioner of Roads, or rather, empowered to act as such.

8272. What office did Mr. Collett then hold? He held the office of Superintendent of the Northern Road.

8273. And you have a correspondence that will state this more in detail, which you can place

John Rae,
Esq.

9 Jan., 1862.

John Rac, Esq.
9 Jan., 1862.

place before the Committee? Yes, it wound up by the matter being represented to the Minister for Lands and Works who, however, did not carry out the suggestions of the Commissioner.

8274. Then the Minister for Lands and Works did not agree with the Commissioner? He did not.

8275. He took Mr. Collett's part? He took Mr. Collett's part.

8276. Did he think then that Mr. Collett was in the right? He did not state that he was in the right, but he did not concur in the censure which the Commissioner seemed to consider necessary.

8277. He thought the censure was extreme? Exactly. The matter wound up with a reprimand.

8278. He was reprimanded then? Yes; that was some years ago—in 1859, I think.

8279. Do you remember any other occasion? No.

8280. Not in Mr. Secretary Eagar's time? I think the case continued from 1857 to 1859. Mr. Secretary Eagar followed soon after.

8281. Not in 1857? No; but it must have been going on from 1857 till 1859.

8282. For two years, in that case? It must have been going on from time to time. I was then acting as accountant. On the former occasion I was acting as secretary. Now that you mention it, I think there was a letter from Mr. Eagar in reference to the matter.

8283. Was this in reference to another matter, or was it part of the same? I cannot be sure without reference to the correspondence.

8284. But your impression is that it all referred to one affair? That is my impression.

8285. Perhaps you can give us copies of the letters? I have got the principal letter copied. I will hand in this; and if you wish for any more of the correspondence it can be had; but I think this letter is the gist of the whole.

8286. Your impression is that this letter contains the whole? Yes, I think it does—the substance of the case.

8287. It is signed by yourself? Yes; I was Secretary for the time for the whole departments of Internal Communication.

8288. It is dated July, 1859? Yes. This must have been in the time of Mr. Eagar.

8289. *By Mr. Markham*: Who was Chief Commissioner at that time? Captain Martindale.

8290. Was he Commissioner in 1857? I think it was in 1857 that he commenced the duties of his office; he came here only a few months before myself. I remember the date when I joined the department—July, 1857—and Captain Martindale was in the Colony only a few months before that; but I cannot remember exactly the time he was appointed Commissioner of Roads; I think it was in 1858. The date of the Roads Act, however, would give it in a moment.

8291. *By the Chairman*: You will be kind enough to produce the correspondence? Yes.

8292. You have made a statement to the Committee, and anything that bears upon your statement you will be kind enough to let the Committee have? Yes; I will send such portion of the correspondence as seems to bear on the case.

Oliver Leder Hannington called in and examined:—

Mr. O. L. Hannington.

9 Jan., 1862.

8293. *By the Chairman*: Will you state your office, if you please? I am overseer on the Northern Road.

8294. Have you had any particular place in charge? Yes; between Doughboy Hollow and Goonoo Goonoo.

8295. That is what you call your district? Yes, that is the district over which I was placed.

8296. And were the Doughboy works included in that? Yes.

8297. They formed a part of your district? Yes, they were included.

8298. Then you had the Doughboy Diversion works, and some other part of the road too? Yes.

8299. And who was over you? Mr. Quodling, the Superintendent.

8300. What are the duties of an overseer? It is his duty to inspect the works, and to see that they are carried out properly according to specification.

8301. According to specification? According to specification.

8302. Was the specification placed in your hands with regard to the Doughboy Diversion? Yes.

8303. You have always had one? No, only occasionally.

8304. From whom did you get it? From Mr. Quodling on one occasion.

8305. How did you manage without it on any occasion? I have —

8306. But how? Merely from recollection of the specification.

8307. Did not you find that inconvenient? Yes, occasionally I did. Occasionally I had to borrow a specification from Mr. Martindale's agent.

8308. Did you get any instructions about your duties, independent of the specification? No more than this, that I had a general instruction to see that the works were carried out according to specification.

8309. How long have you been in this office? Since the 11th May last.

8310. And how long have you been in charge of this spot? I took possession on the 12th August.

8311. You then took possession of that particular spot? Yes, on the 12th August.

8312. Who gave you instructions, Mr. Collett? No, Mr. Quodling.

8313. Are you on good terms with Mr. Quodling? I have had no reason to be otherwise.

We have always been on good terms. I have never had any quarrel with Mr. Quodling—
8314.
never.

8314. Have you had any reason to complain of him officially? I have never complained of him officially. Mr. O. L. Hannington.

8315. But have you had any reason to do so? I certainly think that a great deal of this investigation has arisen (if it has not arisen entirely) from his own neglect in not reporting on this matter in the first instance. 9 Jan., 1862.

8316. From his own neglect? I do, indeed.

8317. Will you state in what respect he neglected his duty, and what were the consequences? State the circumstances, if you please? I consider that he did so in not attending to complaints I myself have made, and which you will see from my reports. I made statements relative to certain works not being carried out according to specification—as to the consolidation, for instance—the pitching being put down before the road was properly consolidated. I made reports upon that; also as to the stumps which were left in the road, and the clearing of the line. I called his attention to these things, and from what I can hear he has never made any official report.

8318. Speak of what you know rather than of what you hear. I want you now to state the instances in which you made reports to Mr. Quodling of works being improperly carried on; state the instances and the dates? I can refer to my report, and give you also the dates.

8319. This was in regard to the Doughboy Diversion? Yes, the Doughboy Diversion. As late as October 31, I see that in my report I mention that a quantity of pitching and metalling has been done in a very unsatisfactory manner—the pitching having been done before the work was properly consolidated, particularly the approaches to the bridges. There was one instance at that time, and I believe there are others.

8320. Just state the instances; the way in which you are specifying them now will do, providing you state the date and the character of the work you condemned or found fault with? Yes. Here is another dated September 30; it states, "in reference to this line" (that is the Doughboy Diversion) "I beg to call your attention to my letter of the 9th instant, wherein I alluded to the non-clearing of various stumps on the main road, and "the sunken state of the embankments." That was on the 30th, calling attention to my letter of the 9th September. I believe that was about the first time I called his attention to that. My letter of the 30th was calling attention to my letter of the 9th: "I have the honor "to call your attention to certain portions of the works now in progress on the Doughboy "Diversion; viz., the non-clearance of various stumps on the main road, which, if not "properly cleared, may in a few years again take root, to the detriment of the traffic. I "have also to state that the embankments along the line have sunk considerably, and "require immediate attention." That was my letter of the 9th, so that I have called his attention to these matters many times.

8321. Have you stated all the cases in which you called his attention to those matters? I also called his attention to the difference of metal used on the road.

8322. That there was bad metal used? That there were two qualities of metal; one was shale and the other basalt.

8323. What was the fault—was the basalt not put on in quantities according to specification—in sufficient quantities? I am not alluding to any insufficiency in quantity, but to the difference in the quality of the metal.

8324. Do you mean to say that inferior metal was put on in place of the other? There was a certain portion of shale —

8325. Substituted —? In the place of basalt. I was told that the whole quantity was to be basalt, and he called my attention to the difference between the one and the other.

8326. He called your attention to the difference? Yes.

8327. I thought you were stating cases in which you called his attention? I did; I alluded to it in the first instance, and he told me it was wrong—that it ought to be basalt instead of shale—the whole of it.

8328. I suppose you know the difference between basalt and shale? Yes.

8329. Are you a geologist? Not sufficient to go into the matter scientifically; I do not profess to be.

[At this stage Mr. Rae (whose examination precedes this in the Minutes of Evidence) was called in and examined, after which Mr. Hannington's examination was resumed.]

8330. You say you called attention to the fact that improper metal was used; will you look at those two pieces of stone in front of you, and say what you call them? Shale and basalt.

8331. Are those something like the metal to which you are alluding? Yes.

8332. What you call shale is put in the place of the other? Yes.

8333. Do you state that you called Mr. Quodling's attention to those different irregularities and defects in the Doughboy Diversion Works? Yes.

8334. At what time? At various times.

8335. Was it from you first that the suggestion emanated, then, as to these defects—Mr. Quodling did not ask you to look particularly at them? He called my attention to them in the first instance.

8336. I thought you stated just now that you called Mr. Quodling's attention to them? Yes, but he called my attention to them in the first instance, when we first took possession; and afterwards when we went through them, I said, here is still a further quantity of this metal being put on—shale.

8337. Did you find Mr. Quodling's suggestions correct on your own examination? Most decidedly. There were two different descriptions. He told me that (witness pointing to piece of basalt) was the metal required to be placed on the roads, but I found that there was a certain quantity of this (shale) put upon them.

Mr. O. L.
Hannington.

9 Jan., 1862.

8338. In what proportion was the shale to the basalt? I think at the time I saw it there were about twenty chains of this metal.

8339. Of what character was the work of the bridges—did you find any fault with them? No.

8340. You did not? No.

8341. Was Mr. Quodling in charge of this portion of the work you found fault with—he was over you was he not? He was over me.

8342. You say that he neglected your suggestions—what course of conduct did he adopt—what did he do? Well, from what conversation we have had together, all I can imagine is, that he has taken, from time to time, private notes of this—for what purpose I of course cannot say.

8343. But did he not report? Not to my knowledge. As far as I know he has never reported upon them.

8344. Would he be sure to communicate with you in reference to the matter? He would not be sure to do so, but in general he has communicated to me what he had done in reference to certain works. He has never complained, but he had told me his complaint verbally.

8345. But he might have reported without your knowing anything about it? Oh! yes; certainly.

8346. Why do you say your impression is that this investigation has arisen from his neglect—why do you make that statement? I make that statement from this; because many of these errors might have been corrected at the time, had they been officially instead of privately made known. They would then have been attended to; but they were not officially made known, and nothing was said of them.

8347. They were not officially made known to the contractors, do you mean? Yes.

8348. Then you think Mr. Quodling had some design in overlooking them or taking no notice of them? Honestly speaking, I do.

8349. Did it strike you so at the time? No, not at that time, but it did at the time he called me to Tamworth, when he said he was going to Sydney, and wished me to take possession of certain works.

8350. What time was that? It was on November 1st that I went to Tamworth, and from the conversation that took place between us then, I was perfectly convinced that there was something behind. Let me see: I started on November 1st for Tamworth, and I remained there a week I think, in going through the various statements—clearing everything up—making out vouchers, and going through the various works with Mr. Quodling, relative to the roads.

8351. Did you make any report yourself? Only my report to the Superintendent.

8352. Your official report? That is all; merely my official report to the Superintendent.

8353. Well, were the defects corrected? They have been corrected since.

8354. By whom? By Mr. Martindale.

8355. Since what time? Most of these were corrected at the date when I left. The last time I was on the works was on the 29th November.

8356. Was that after Mr. Quodling's resignation? Yes; but many of them were corrected previous to that. He received his resignation on November 6th, during the time he was in Tamworth.

8357. If you thought there was anything going on wrong, how was it that you did not make a special report? I did not think it my duty to report over my superior officer.

8358. But if you saw your superior officer carrying on some conduct which —? It was only my suspicions.

8359. And you did not think them strong enough to justify you in acting? I did not feel justified in reporting on mere suspicion. I should only get reprimanded for doing so.

8360. Were you surprised when Mr. Quodling resigned? No; I was not.

8361. Do you think he was justified in resigning? That is a matter of opinion.

8362. What do you say? I think that is merely a matter of private opinion.

8363. I do not press the question? I think that is a matter of private opinion.

8364. By Mr. Dalgleish: You do not give your opinion? No.

8365. By the Chairman: When Mr. Quodling resigned did not you write a letter? I did.

8366. Which, of course, you have seen in the papers? And of which I have a copy here.

8367. Here is a copy which perhaps you can verify? (*Witness' attention having been directed to Appendix J, he replied*) Yes.

8368. That is the letter? Yes.

8369. State under what circumstances you wrote that letter—did you volunteer it? I did not.

8370. Did you write it by his orders? I will give you the whole particulars from my diary.

8371. You say you did not volunteer the letter, and I ask you did you write it by Mr. Quodling's orders? We went over these works. I met Mr. Quodling on the 24th, at Wallabadah, with a promise to meet at the Willow Tree on the following day. On arriving at the Willow Tree I found a note, requesting me to meet him at Murrurundi. That was on Friday. On Saturday I went over the works with Mr. Quodling and Mr. Donaldson, and on going over them I took notes with Mr. Quodling on that day. On arriving back again at Murrurundi he requested me to write a report upon the works generally.

8372. Well? I had made out my notes and he did not think they were sufficiently strong, so he interlined several, and made several additions.

8373. To the letter you had originally prepared? To my notes, from which I was about writing my report; from that I wrote the report which you see there.

8374. Then, from your notes, with some sort of supplements from Mr. Quodling, you wrote that letter? Yes.

8375. You wrote it then, not from his orders exactly? I should not have written it only he pressed me to write it. He said, "I am going to Sydney, and I wish you, before I go, to write me a report upon the works generally." I had no other source from which to gain information than the specification and what he told me; here is my original. He was present, in and out, at the time that letter was written. (*Letter read by witness.*)
8376. This letter was written from your notes which Mr. Quodling interlined and partly erased? From that I wrote the report.
8377. The alterations principally consisted of interlineations? Yes.
8378. Then you adopted your own notes in writing the letter? From those I wrote my letter.
8379. You adopted your own notes? As corrected there.
8380. Did you state what was not true? No; according to my instructions and the specifications, that is perfectly correct.
8381. But if you had been instructed to state that which was not true, you would not have stated it? No.
8382. Then you do not retract? Not one iota.
8383. Then the works were defective? According to my instructions, most decidedly.
8384. They did not comply with the specifications? They were not in accordance with the specifications.
8385. Is it your opinion that this ought to have been reported to somebody or other? It was his duty to have done so, most decidedly.
8386. But not yours unless he reported it? I reported it to him; it was his duty to have reported it elsewhere.
8387. Had you anything to do with the vouching for works so as to ensure payment to the contractor? Yes; I have to give a detailed account of the work.
8388. And that you gave regularly at certain periods? I was never requested by the Superintendent to make out any vouchers whatsoever.
8389. Never requested to make out any vouchers—but was not that irregular in him? Yes, I should say so. It is usual to give fortnightly or monthly vouchers; monthly generally, but sometimes fortnightly.
8390. You have been under other Superintendents then? No; I have only been under Mr. Quodling.
8391. Then how do you judge that monthly or fortnightly vouchers ought to be made out? I only go from the word of mouth of Mr. Quodling.
8392. He instructed you? He instructed me.
8393. But he did not keep you to his instructions? I had no instruction to do so.
8394. But if you thought it your duty to make out these fortnightly vouchers, why did you not do so? Because I never had any instructions to make out any vouchers for the Doughboy Diversion.
8395. How did you know it was your duty to do so? I may allude to other works.
8396. Then you made fortnightly vouchers out for other works? Where it was necessary to do so, but generally ours were monthly vouchers. Where maintenance men are employed in clearing and keeping the roads and bridges the vouchers are generally monthly, unless there are special orders that they shall be prepared fortnightly.
8397. Did it not strike you as rather extraordinary conduct in Mr. Quodling? It struck me sometimes, but I knew his feeling towards those works. When he has passed those works with me, he has expressed himself—"Oh, hang the works; I don't care for them; I'm sick and tired of them." He has never looked at the works, except as he rode across on horseback; he never stopped twenty minutes on the works.
8398. *By Mr. Markham:* Who are you speaking of? Mr. Quodling. In going over those works I can conscientiously say that I do not think he ever did at one time (only to allow his horse to go up and down) stay twenty minutes or half an hour at the outside.
8399. Do you think he is a good judge of works? I have always had a very good opinion of Mr. Quodling. I think he is quick and sharp.
8400. How did he form so correct an opinion of these works, if he did not examine them? The time I am alluding to is of late. He had an opportunity of examining those works previous to my going there. I never had any opportunity of seeing those works until the 12th August.
8401. You never thought it your duty to report any of these circumstances to Mr. Collett? I did not think it my duty to do so. I thought it my duty to report them to the Superintendent, and that it was his duty to report them to head quarters, if there was really any dereliction of duty.
8402. Do you know anything of any deviations having been made in these works, on the authority of Mr. Collett? There was one deviation—a deviation at the big cutting.
8403. What is your opinion in reference to that deviation—was it to the advantage of the public? Well, those works were commenced; I never saw the original plans.
8404. And you cannot form any comparison between the two? No; it was all settled before I was on the works; therefore it would be wrong in me to give an opinion.
8405. You had no reason to suppose that the contractor benefited by any of those deviations or alterations? I have no reason to suppose that he has.
8406. Were there any other alterations authorized by Mr. Collett? There were; there was the metal, for instance—pitching substituted instead of metal.
8407. That was by the authority of Mr. Collett; and what is your opinion as to that alteration? I think it was a very good one.
8408. And for the benefit of the public? Decidedly.
8409. The contractor did not make anything by it? No, the price was the same.

Mr. O. L.
Hannington.
9 Jan., 1862.

Mr. O. L.
Hannington.
9 Jan., 1862.

8410. And it was better for the public? Yes; I should think it would be rather a loss to the contractor.
8411. Was there not some order given by Mr. Collett about omitting the consolidation regulation, and allowing the stone to be put on while the road was moist? I cannot speak with authority; I never heard so from Mr. Quodling.
8412. Have you examined the works lately? I was there on the 29th November.
8413. Is that the latest? I will tell you. (*Witness referred to his note book.*) Over Doughboy—took an account of work to complete—Mr. Martindale said he would complete in eight or ten days. That was on Saturday. I took a note then of what was required to complete the works on that occasion.
8414. That is the latest date at which you were there? Yes; on the 29th I received a telegram—on the same day. I have got it here (*referring to note book*)—"Received telegram from Commissioner requesting me to be in Sydney on Tuesday, December 3rd." Therefore I have had no opportunity of visiting the works since. I have been in Sydney since then.
8415. But were these defects, to which you have testified in this letter, remedied at that time? They were remedied.
8416. They had been remedied? They were remedied or were in progress of being remedied at the time.
8417. They were being remedied? They were being remedied.
8418. Do you think any great injury had arisen from the circumstances not having been reported before? I consider that had such been the case, there would probably have been no cause for this inquiry.
8419. I am not asking you about this inquiry; I want to know whether any injury arose from these defects not having been pointed out at the time you said they ought to have been—was it possible to have applied the remedy at an earlier period? Those defects might have been remedied at a much earlier period.
8420. Who is the loser by that? I should say, the contractor.
8421. The public did not lose, then? I do not see how the public has lost there.
8422. Do you think this Doughboy Diversion work is in a good condition? From what I saw of it on the last occasion, I should say it is in a very good condition.
8423. You think the contractor properly finished his contract? I do, conscientiously, with the exception of one or two instances. A chain or a chain and a half or so of pitching, to which I immediately called the attention of the Superintendent, had been pitched too early, the ground not being properly consolidated.
8424. There are differences of opinion, are there not, with regard to consolidation? Yes.
8425. I suppose Mr. Collett entertains a different opinion? I do not know what Mr. Collett's opinion is; I have not spoken to him about it.
8426. He has given you no orders about it? No.
8427. When you say these defects were remedied, do you know whether all the clearing was done according to specification? No, it was not done according to specification.
8428. Then that error was not corrected? The error, up to the time I left, had not been corrected.
8429. Was all the fencing put up? No; they were putting it up when I left.
8430. That was on the 29th? On the 29th November.
8431. Was all the metalling done properly? There was only six chains to spread when I left, on that date.
8432. Do you think they were putting a sufficient quantity of basalt on then? They were putting basalt on when I left.
8433. Was the flooring properly tarred when you left? They were then tarring the whole of the floors.
8434. And was there a sufficient number of spikes put in? I spoke to Mr. Martindale relative to those spikes, only one being put in instead of two; but he said that as the slabs were only four or four and a-half inches, there was not room for two spikes. Where there was room for two spikes he put them. If the slabs were 9 inch, he put two, but if only 4½ inch he only put one.
8435. Do you think wide slabs better than narrow ones? I think narrow slabs equally good as the others.
8436. Then you thought that was a sufficient reason for not adhering strictly to the specification? I pointed it out to him.
8437. Do you think that was a good and sufficient reason for deviating from the specification? You could not put two spikes into four inch stuff.
8438. But if the contractor was bound to do it? Oh! according to the specification he was wrong.
8439. And that error is not corrected? It was not up to the time I left.
8440. Was the slabbing of abutments all done properly? Yes, that was just finished as I left. He wished to make it an extra charge.
8441. How came you to say that the contractor was wishing to make that an extra charge? I had it from the agent. I pointed out to him that the abutments were wanting. He said he had no instructions from the contractor to do it, and that if so it must be an extra charge. I said, if you refer to the specification you will find it.
8442. It may have been an error on the part of the agent? Yes.
8443. Did he admit that you were correct? Yes, afterwards.
8444. Then there was no extra charge made? There was no extra charge made there.
8445. Was the creek blocked up by the earth from the cutting? Yes.
8446. The last time you were there? Yes; but there was an order given and a price agreed upon, to cut a race from the other cutting, across, so as to meet the creek.

8447. And the price agreed to, was that something extra? That was an extra charge.
8448. That was right, I suppose? Yes, that was correct.
8449. The contractor was not bound, then, to take away the earth? No, that was an after agreement.
8450. Is it not a general understanding that when a contractor makes a bridge, he shall leave everything around it in such a way as not to damage it in case of floods? It is not a bridge, but a big cutting.
8451. Should you say that a contractor had fairly fulfilled his contract, if he made a bridge and left it so filled up as that it would be flooded? No.
8452. Do not you think he is bound to clear it? Yes; but this is not a bridge, it is a cutting.
8453. But did you see any damage done by the water in consequence of this obstruction to the creek? There was no damage done, as far as I saw.
8454. It is possible that damage might be done in the event of a heavy rain? There is but little danger; there is not a great flow of water there.
8455. Do you know anything about these payments of money you speak of here? No, they were previous to my being there on the 12th.
8456. Then how came you to make these statements about money? That is his letter there. If I had given it a second thought I should have seen that I had no necessity to mention this, and I should have repudiated it, for the reason that it was not during the time I was on those works.
8457. Then you have made statements here in ignorance of the facts? I am asked, if you notice by that letter, to certify for certain vouchers. I give my reasons there for not doing so, but I might have given far more simple reasons.
8458. Then, in fact, what you give about money, you give on Mr. Quodling's authority? Yes.
8459. You are not positive of the truth of what you stated here? Even supposing that I had been on the works, that would have been my reason then, and is now. I believe there is one payment on the 19th.
8460. You have said that you would not state what you knew to be untrue on the authority of Mr. Quodling? I have not stated what I believe to be untrue, because there was one payment on the 19th.
8461. But do you mean to say that money was paid more than was actually due on the works at any time? I mean to say that at that time there was only a certain sum in hand, and a certain quantity of work to do, which would not be covered by the amount in hand.
8462. Then there was rather an excess of payment in that case? There was an excess of payment.
8463. It was not very great, was it—what was the amount in round numbers? I think I have said there.
8464. You do not retract what you have said there? The only thing I retract is this: I took these figures from Mr. Quodling. I gave him a statement of the whole of the works, and he calculated them up from prices which I supposed to be the schedule of prices. I had never seen the schedule of prices on the works.
8465. Were they not included in your specifications? No.
8466. Is that usual? I never saw any schedule of prices there. So far as that goes Mr. Quodling made those calculations, and I never could get them from him; he always kept those from me.
8467. And on the assumption that the calculations were correct——? I made that statement.
8468. If the calculations were wrong you would be inclined to retract? Yes. I went through them with him, and at the time they appeared to be correct—although he never supplied me with a copy, which he said he would—thus keeping me in perfect ignorance of what they were.
8469. And you adhere to this statement—You felt it your duty to decline signing the vouchers on account of the circumstances, previously? Yes.
8470. Had you anything to do, as overseer, with the payments? No; I had only to make out detailed accounts and forward them to the Superintendent, who forwards them to the office.
8471. But upon these moneys were paid? I had nothing to do with that.
8472. But upon your vouchers moneys were paid? Not upon Doughboy. I made no vouchers there. I had no instructions to do so there. Mr. Quodling never asked me to make out a voucher for the Doughboy Diversion.
8473. Did it strike you that the system under which these works were managed was an irregular one? Yes, I believe there was a great deal of irregularity.
8474. Was Mr. Quodling, do you say, to blame for it? I consider so.
8475. Do not you think Mr. Collett was to blame at all? I do not see that, he being at a distance. I think it is the duty of the Superintendent to make his superior officer acquainted with these matters, and then if there are any errors it is the duty of the person in power to rectify them.
8476. But if those circumstances had been reported by Mr. Quodling, and no further notice had been taken of them, would you have said then that it was his fault? Certainly not.
8477. You are not aware whether Mr. Quodling did report or not? I am not.
8478. Do you think that generally Mr. Quodling attended to his duties properly? I think he attended to his duties generally, so far as I am individually concerned. On other works he was generally very attentive; but in reference to the Doughboy works he seemed as if he was disgusted, and he passed through them as if he was sick and tired of them.

Mr. O. L.
Hannington.
9 Jan., 1862.

8479. Was there any particular reason for this that you know of? I cannot say that there was; he never told me his own private reasons. For his attention to all the other works I give him great credit; he went through them and inspected them, and was always attentive, but to these particular works he seemed to have an antipathy.
8480. Do you consider him a competent person to perform these duties? I do.
8481. Did you hear Mr. Collett complain of him? I never had an opportunity.
8482. Did you ever hear any one else complain of Mr. Quodling's competency? No.
8483. Have you any reason to believe that Mr. Quodling was intemperate in his habits at all? He was free, but I never saw him the worse for liquor.
8484. Did you ever see him neglect his duties from that cause? No.
8485. Have you seen him absent oftener than —? He has taken a few days occasionally.
8486. To go "on the spree" as it is called? I have not been with him; I have been on one portion of the works and he may have been absent from another.
8487. Do you consider that the works under his charge were at any time neglected in consequence of his absence? I cannot say that. He may have been away a few days from duty, but previous to that time he had been doing his duty.
8488. Are you aware whether, when he was absent from that portion of the works which was under your immediate charge, he was not supervising some other part of the road under his charge? No; he was off that line.
8489. You knew that he was off the line? Yes.
8490. Was he at Murrurundi? Yes.
8491. Had he business to transact there? Not to my knowledge.
8492. But I suppose he might have had for aught you know? He might have had.
8493. Did you ever hear any complaints from the men under Mr. Quodling's charge of any wrong or unjust conduct on his part? As for "unjust" I will not say, but for "harsh" conduct, he was a man that was very strict, and would be, I think, a little arbitrary. He was very hasty in temper, but it was soon over.
8494. Did you hear any general complaint? I did not.
8495. Did you think that the men liked him? I do not think that they had any very great love for him.
8496. Was there an impression that he was too strict? He was rather arbitrary; very arbitrary in his line of conduct and bearing towards the men; he shewed a sort of over-bearing spirit.
8497. A sharp manner? Yes, which would give as it were a bad impression at first on the part of the men towards him.
8498. Do not you think being strict somewhat a good fault in any public officer? Decidedly.
8499. You have no reason to think the public interest suffered by this sharp conduct on the part of Mr. Quodling? No, I do not.
8500. By what authority have you come to Sydney, Mr. Hannington? I hold a telegram giving me orders from the Commissioner. This is a telegram I received on Saturday, November 29th.
8501. When did you get a summons to attend the Committee? To-day.
8502. Not until to-day? No.
8503. *By Mr. Dalgleish:* Are you any particular trade or profession, Mr. Hannington? I have been for a number of years connected with machinists. My father was the inventor of Hannington's Numerical Machines; we were the first to introduce the system of paging by our machinery in England. I introduced it to the Government of New South Wales. I sold my machinery to the present Government.
8504. Have you ever practised as a surveyor? No, I have not practised as a surveyor; but if you will allow me, I will hand you in a letter from Mr. Wener. I was with him twelve months. (*Letter handed to Mr. Dalgleish.*)
8505. This states that you were engaged with a surveyor to take charge of his party, and that you had charge of the surveyor's party for eleven months? Yes, but there is a second agreement.
8506. And that you continued to do the duties, during the time you were with this gentleman, to his satisfaction? Yes.
8507. What did these duties consist of? Assisting in making the surveys—laying the boundary line of the 29th parallel, traversing rivers, and laying out stations.
8508. What portion of this did you do? I assisted. I did not assist with the circumferenter; I did the chaining portion. I did all the works, and all the calculations. That was my business with him.
8509. Do you consider yourself a competent surveyor? I do not consider myself a competent surveyor.
8510. You have stated, I think, the length of time you have been in the Government service? My appointment was on the 11th May.
8511. Had you any previous experience in the formation of roads? I had not.
8512. Had you any experience in reference to the execution of public works of a similar nature? I had not.
8513. Had you any previous acquaintance with Mr. Collett? I knew Mr. Collett in 1852. I had not seen him for six or seven years. I happened to be in Tamworth at the time of his arrival there. I was then under an engagement with Mr. Wener—I was only waiting for supplies to join him. I called on Mr. Collett, and said, "I understood there was an appointment vacant on the road." I asked for it. Mr. C. said, "I cannot give it you myself; write immediately to the Secretary for Lands (Mr. Arnold)." I wrote that night. On his return to Tamworth from Armidale (Mr. Quodling at that time had a great deal of work to do), and just as he (Mr. C.) was leaving, he said, "Mr. Quodling, you had better take Mr. Hannington on as an assistant for the time being." 8514.

8514. Was that the first time you saw Mr. Quodling? No, I knew Mr. Quodling from January up to April—three months. Mr. O. J. Hannington.
8515. Did you make any application to Mr. Quodling prior to asking Mr. Collett? Yes, he was aware of it. In fact he wished me not to accept my engagement here—he said, “Collett will be up in a few days; wait and see him, and I will speak to Collett for you.” 9 Jan., 1862.
8516. Had you mentioned to Mr. Quodling previously that you were acquainted with Mr. Collett? Most decidedly.
8517. And did Mr. Quodling recommend you to Mr. Collett prior to your seeing Mr. Collett yourself? That I cannot say; I cannot say what transpired.
8518. When did you receive any official information, or did you receive any official intimation of Mr. Quodling’s resignation? I was in Tamworth at the time. Here it is (*referring to diary*):—“Wednesday, November 6th.—Received letter from Road Department.” That was the date. I have also got here—“Mr. Quodling’s resignation accepted.” The same day both arrived.
8519. Is that the letter you received? That is the letter I received.
8520. Authorizing you to take charge of the works? It is. (*Letter handed in. Vide Appendix.*)
8521. Did you take charge of the works in accordance with that notification? I received that letter on the 6th, which I answered on the 7th. I then, on the 7th, started per mail for Doughboy. I arrived on Friday at Doughboy Hollow. I was there, at the works, on Saturday. On the following Sunday, three days after leaving Tamworth, Mr. Coghlan, the new Superintendent, arrived, taking all power from me there. Oh! I see. It was on the 10th that Mr. Coghlan arrived.
8522. *By Mr. Dangar*: Then you were only in charge three days? Only three days, just giving me time to reach Doughboy from Tamworth.
8523. *By Mr. Dalgleish*: Did you take any notice of the measurements on those two days? No, I only arrived at Doughboy on Saturday.
8524. In your previous evidence you have said that your duty was to see that the work was properly performed according to specification, and that you had occasionally a copy of the specifications? Yes.
8525. You also stated that you had had no previous experience in reference to works of this description? Yes.
8526. Did you not then find a difficulty in determining whether the work was properly executed or not? I did at first.
8527. Did you find Mr. Quodling give you every assistance? I did not.
8528. Did Mr. Quodling not give you any assistance? Very little indeed.
8529. Had you had any experience in measuring works? No, I had not, but I had a knowledge of measuring of course. I could work measurements, and I had also a slight knowledge of the way in which those measurements ought to be made; and, of course, the moment I had a few lessons I was as qualified to do it as anyone else.
8530. Did you find a few lessons sufficient to enable you to measure unequal depths and slopes? Yes.
8531. You found a few lessons sufficient? Yes; I have had now something like seven or eight months at it.
8532. You said that you had had no quarrel of any description with Mr. Quodling? Not the slightest.
8533. At any time? At any time.
8534. You were in Tamworth together on one occasion? Yes.
8535. For a week I understood you to say—about a week? I had a letter from him requesting me —
8536. Was it about a week you were in Tamworth? Yes; six days or something like that.
8537. What were you engaged in during that time? In making out vouchers, and going through all his papers, so that he might put me and various other parties in possession of all the information relative to the works.
8538. And you had no misunderstanding of any description at that time? No.
8539. What led you to suppose that Mr. Quodling had something behind at that time—you stated that it was your impression that Mr. Quodling had something behind? I will tell you my reason for that impression. He wished me to give him up all my books, and to say, on being asked for them, that he had taken them, and would not give them up to me; and I was particularly requested by him to say nothing to the Commissioner relative to the works, but that I should keep everything as dark as I possibly could. I naturally concluded that there was something wrong, and I did not give up my books.
8540. You did not give up your books? Certainly not.
8541. You said you thought there was something between him and the contractor? I knew there was no good feeling existing between them.
8542. I understood you that it was your impression that, as he had paid no attention to your reports, there must be some “collusion,” I understood, between Mr. Quodling and the contractor? I never said that.
8543. It was a wrong impression, then, on my part? Oh dear, no! I never said that.
8544. You stated that the contractor would have been a loser, and not the public, from any irregularity that might have existed? From irregularities.
8545. As far as Mr. Quodling was concerned—that the loss would not have been a loss to the public? There were irregularities at the time, but all those irregularities had been rectified. In the state of the road at that time, of course there were many things that looked irregular, but now that the work is finished they look very different. Like everything else in an unfinished state, there appeared to be a good deal of irregularity; the work looked bad.
- 8546.

Mr. O. L.
Hannington.
9 Jan., 1862.

8546. These (*referring to witness's note book*) were your original notes? Yes; you will see that they are in my handwriting, interlined by Mr. Quodling.
8547. The original notes were not dictated by Mr. Quodling? As we went through the works together.
8548. You formed your own opinion? We went through them together.
8549. And in going through them together —? I dare say, if you were to look at his notes, that mine would correspond with his.
8550. You are convinced of the truth of these observations? I am, perfectly.
8551. You are convinced that the clearing was not carried out according to specification? Not according to the specification.
8552. The stumps on the main road and banks formed on timber not cleared away? Not cleared away.
8553. What would be the result of this—was it according to specification? No; according to specification they were to be cleared.
8554. Would this be detrimental to the public interest—leaving the embankments resting on this fallen timber? I do not know that it would be detrimental to the public interest, but it would be a great eyesore.
8555. Will it not render the bank hollow where this fallen timber is, and not so solid as it ought to be? It would not be so solid.
8556. And consequently more liable to give way? That is only in certain portions of the embankments to which I was obliged to call the attention of the Superintendent.
8557. You have another note:—“Embankments not trimmed as specified—not according to specification”? I spoke of that afterwards. The contractor said he should not do them until the last moment. They are now done. When I was there on the last occasion they were doing all those things.
8558. Mr. Quodling has interlined—“On entire length of road?” Yes.
8559. Do you concur in that interlineation? It says entire length of road in the original specification.
8560. And the trimming was not done, at that time, on any portion of the road? Not at that time.
8561. And this interlining was correct? Yes, it was perfectly correct.
8562. “Punning on embankments round abutments of bridges, culverts, and retaining walls, not done according to specification” is crossed out. Mr. Quodling, I suppose, crossed that out? Yes.
8563. Does the specification state that these works are to be punned? Yes.
8564. Have they been punned? No.
8565. Then they have not been carried out according to specification? They were not then.
8566. And the consolidation clause has not been carried out? In certain portions only, which I have pointed out in my letter.
8567. “Most particular clause in specification” is underlined by Mr. Quodling? Yes.
8568. Do you concur in that? Yes, it is a very particular clause.
8569. And that has not been carried out? No.
8570. Have you any idea of what the saving will be to the contractor? No, for the simple reason that Mr. Quodling kept back all the calculations. I gave him all those calculations, and he kept them.
8571. And the fencing has not been carried out according to the specification? It is carried out now, I believe.
8572. Is it all carried out now? Yes.
8573. You were informing Mr. Forster, a few moments ago, of the proportion of shale which had been used; but you did not finish the answer. You state the proportion of shale to be about 20 chains. Carry out, if you please, the proportion of shale to basalt on the entire work, in round numbers? It is about one in nine and three-quarters.
8574. One chain of shale? To nine and three-quarters of basalt.
8575. This is where the shale is spread separately? Yes.
8576. Is there not a mixture of shale and basalt in other places? There may be a few yards, but not more. They are generally separate.
8577. Has any peculiar or particular manner of placing the shale and basalt been adopted—is it with regard to any peculiar formation of the ground that shale has been substituted for basalt? No, it has sometimes been used in one place and sometimes in another. Oh! you mean as to any peculiar formation of the ground?
8578. Yes, of the formation of the bed? Not to my knowledge. I did not see anything peculiar in the formation of the ground.
8579. Is the basalt placed over a rocky bed of the road in any instance? Yes, and so is the shale.
8580. And the shale is also over a rocky bed? Yes.
8581. Is any of the shale placed over an earthy bed, where there is only the earth for a foundation? No, it is principally basalt there.
8582. Principally basalt? Yes.
8583. In what way then is this shale spread? I could not tell you precisely. Perhaps there might be half a dozen chains of basalt, and then, perhaps, two or three chains of shale; then would come, we will say, basalt again for some distance, say ten, fifteen, or twenty chains; then again would come a patch of shale, perhaps being in the immediate neighbourhood, nearer to where they took it from.
8584. Just where it has been convenient for breaking, without any particular regard to the locality, or where it was laid? Yes.
8585. Is shale used for blinding? Yes, broken shale is also used for blinding the pitching.
8586. Is it used for that only? Sometimes it is just spread over the ground.

8587. Over the ground? Yes; that is, over the road, and then the metal put upon it.
8588. And then the metal put upon the shale? Most of the pitching—in fact all the pitching—is blinded in the first instance principally with broken shale.
8589. Have you observed any slip in the road—I think you stated that you had observed a slip? In the big cutting.
8590. What is the width of that big cutting from the solid of the mountain? I suppose it is about 13 feet of the solid.
8591. What is the width of the road altogether? I never measured the width of the whole road.
8592. At the big cutting? I never measured the width of the road itself. I merely took particular notice of the solid.
8593. In what way did you obtain the quantity in cubic yards? We took it merely from what we cut from the solid.
8594. Did Mr. Quodling and you measure it? No, myself and Mr. Donaldson.
8595. Mr. Donaldson? Yes, Mr. Martindale's agent.
8596. At the same time as Mr. Quodling? Mr. Quodling was not present.
8597. Mr. Quodling was not present? He was not present.
8598. Have you a book containing those measurements? These are the measurements of the Doughboy Diversion works.
8599. Were those measurements taken by yourself? By me and Mr. Donaldson.
8600. Have they been corrected by any person since you took them? They were corrected by Mr. Donaldson, at the request of Mr. Quodling.
8601. Have they been examined by any one in the Office? Not to my knowledge.
8602. How long has this (*memorandum*) book been out of your possession? About three weeks or a month.
8603. What led to your giving this book up to any other person—it is a private memorandum book, is it not? No, it belongs to the Public Works Department.
8604. Were you asked for this book? I was asked to bring papers and books of every description, and I gave them all to Mr. Collett.
8605. Has any erasure or alteration been made in this book? It is the first time I have seen it since I gave it up.
8606. Look over it and say if there are any marks in the book now which you find strange? (*Witness inspected book.*) No, this is perfectly correct.
8607. You are aware that there are several erasures in this? Yes, they are my own erasures.
8608. They are corrected from after calculation? Corrected from after calculation.
8609. In some instances there are items scratched out; are they intended to be taken no notice of—there are a number of items scratched out in different pages? You will see them all enumerated below there; they are put again in different forms, that is all.
8610. And you have every reason to believe that these measurements are correct? I have every reason to believe that they are.
8611. In this letter, or in the notes from which you say you composed your letter, it states—deviating of the roadway at big cutting, two bridges are done away with; No. 6 bridge of three fifty feet spans, under trussed, and one twenty-one feet span, beams with corbels; and No. 7 bridge, three twenty-five feet spans, beams with corbels? But I have already stated that I knew nothing of those. It was previous to my being there that those alterations were made. He asked me to put that down, but I have taken no notice of it in my letter, because I could not make any notes upon it.
8612. No. 2 D bridge—two spans done away with. Were those two spans done away with from the drawings with which you were supplied for the formation of that bridge? Yes.
8613. What length of span were these two bridges that were done away with? Are they not down?
8614. No, the lengths are not mentioned? I could not tell without the drawings; I thought they were down there.
8615. Doughboy Creek—in many places filled up with the rubbish thrown over embankments. Is this the rubbish you state as extra, to be cleared away? That is from the tipping from the large cutting to form the embankment.
8616. Are you conversant with the specification? Yes, in that part.
8617. Can you remember whether the specification does not state that the spoil—the *debris*—from the cutting, is to be placed wherever the Superintendent may direct? Yes, it was directed to be put there.
8618. Did Mr. Quodling direct the rubbish to be thrown into the creek? I do not know.
8619. Is there not a clause in the specification, which states that the material from the cutting is to be deposited where pointed out by the Superintendent or overseer? Yes, to be placed, of course, where necessary. Here you had to form an embankment. It was tipped over, and formed the road by the natural fall.
8620. Is there a portion of the specification which states that any portion of the earth from the cutting, and which may be placed in a position of which the Superintendent does not approve, is to be removed at the expense of the contractor? A certain portion of the earth is, of course, to be placed at the option of the Superintendent or overseer; but you could not avoid filling up this creek; the rubbish could not avoid going into it.
8621. You are perfectly sure that there is not 30 feet of roadway at the big cutting in the solid of the mountain? 30 feet—Oh! no.
8622. Are you sure there is not 20 feet? It is 13 feet, I think, out of the solid, at the narrowest part of the cutting.
8623. What is the width of the road according to the specification? That is not in the specification at all; it was an after arrangement.

Mr. O. L.
Hannington.

9 Jan., 1862.

- Mr. O. L. Hannington.
9 Jan., 1862.
8624. Does the specification state the width of the metal? The metal is to be of the best and hardest available stone—the blue columnar basalt—broken to $2\frac{1}{2}$ -inch gauge, free from earth, sand, chips, and other impurities, to be spread to a width of 18 feet, 9 inches deep at the centre and 6 at the sides, in two layers of equal thickness; the first to be consolidated before the other is put on.
8625. Then would not the width of the metal determine the width of the road to some extent? Decidedly.
8626. Does the specification state the size of the water tables? Yes.
8627. The water tables are to be in addition to the width of the road? Yes.
8628. Does that sufficiently define the width the road should be? It is wider in some parts, but I am speaking of the narrowest portion. It may have been altered since I left, for that portion was not then finished. I am speaking from what I saw. I should say the cutting was not, when I was there, more than 13 feet in the solid. What has been done since I cannot say.
8629. And from that something must be taken for the water tables? For the water tables.
8630. So that the width available for dray traffic would be less than 13 feet by the width of the water tables? Yes.
8631. What allowance do you make for the consolidation of an embankment formed from the shovel, and not tipped from the cart or wagons—how many inches to the foot? How much allowance is made for shrinkage in that case? I could not answer that question exactly.
8632. What is the height of the embankment at that particular place? The height of the embankment is in some places 90 feet.
8633. 90 feet—and it is formed from the *debris* shovelled from the cutting? Yes.
8634. What allowance should have been made for shrinkage on this artificial formation of the road? I perfectly understand, but I do not know that I could answer that question.
8635. We have been informed that it is necessary to allow 4 inches to the foot. Was this portion of the road consolidated prior to being pitched? Most decidedly.
8636. It was consolidated? Yes; this portion was left to the very last moment—this big cutting.
8637. The last portion? All that was done to the big cutting was left to the very last.
8638. Are you aware that Mr. Collett's opinion is that consolidation is useless on roads? I cannot say.
8639. He has never given you to understand that the consolidation clause was not to be carried out? No.
8640. Have you any reason to know that this consolidation has been carried out with regard to that big cutting? I only know that that portion has been left to the last. I understood that it was left so that it might be properly consolidated.
8641. In what way has it been consolidated? By being rolled over, and being filled up as it shrunk several times.
8642. Was the traffic turned upon it? The traffic has been upon it.
8643. Have there been any heavy rains since the formation of that road? There have been a great many heavy rains.
8644. All that would tend to consolidate the road? Of course it would.
8645. Has any portion of this artificial formation shrunk from the natural formation of the road? It has shrunk.
8646. It has shrunk? Oh! yes; from these heavy rains.
8647. After it was finished? It was not finished when I left. I have not seen it since.
8648. Was any portion of it completed when you left? No portion of it was metalled.
8649. Was it pitched? No, there was not any of it pitched. It was neither pitched nor metalled.
8650. What is this memorandum in reference to No. 4 bridge? Marginal logs—rough unhewn saplings.
8651. What do you mean by marginal logs? What do I mean by marginal logs?
8652. Yes? The logs at the side.
8653. At the side of what? The bridges.
8654. Would you call those beams? No, they are merely for the sides. Those are the logs we alluded to when we went through them. They were rough, unhewn stuff. They were just put up at the sides of the abutments of the bridges.
8655. Were they not in their position? Oh! yes, they were in their position.
8656. They were not squared? No, they were only rough, unhewn timber.
8657. Well, unhewn timber means timber not squared, does it not? Yes.
8658. What would be the difference of price between unhewn timber and squared timber? There would be a difference of perhaps two or three shillings; that is, 2s. for hewn and 3s. for sawn.
8659. Two or three shillings a what? A foot.
8660. Could you not state exactly the price—what is the price of rough timber per foot? I do not know; I have not seen the schedule of prices.
8661. But do you not know of your own knowledge the price of rough timber? It is 1s. 6d. or 1s. 9d.
8662. Delivered? Yes.
8663. If hewn timber was 4s. per cubic foot by the schedule of prices, the difference would be in favour of the contractor? It would be in favour of the contractor, of course.
8664. You stated that they were saplings that were used—what do you mean by saplings? Young saplings cut, and just the bark taken off them.
8665. Where were these saplings placed? Well, I can hardly tell you now, it is so long since that memorandum was made.
- 8666.

8666. That is about the marginal logs? Yes.
8667. What is the difference between saplings and full grown trees? Full grown trees?
8668. Yes? Saplings, I should say, were quite young trees.
8669. What was the diameter of these saplings? I suppose about four or five inches.
8670. And did the floor of the bridge rest on these? No.
8671. Then what do you mean by the marginal logs? They are used for abutments, to keep in the earth-work at the sides of bridges.
8672. Then this is not part of the bridge itself? Oh! dear, no.
8673. You state that Mr. Quodling did not report to the contractor; was it Mr. Quodling's duty to report to the contractor? I should say so.
8674. How do you arrive at that conclusion? Why, I should say he was the party to find fault with, if the work was not done properly; that it was his duty to report to the contractor that certain works were not carried out according to specification.
8675. Do you know that he has not reported? I only have the word of the contractor himself.
8676. Do you think the contractor's word should be taken in opposition to that of the road overseer? The overseer never told me that he had. He told me he had spoken verbally, not that he had written officially.
8677. It is a matter of hearsay? Yes.
8678. You say that it was your duty to make out detailed accounts? Yes.
8679. Have you performed that duty? Yes.
8680. Did you take the measurements yourself? Yes, I took them myself.
8681. And give in a detailed account of all the works? Yes; here is my account of all the works from the first to the twelfth, and so on.
8682. Did Mr. Quodling accept those measurements? Those measurements I have sent to him regularly in my fortnightly or monthly reports.
8683. From your own experience, do you consider yourself a judge of Mr. Quodling's capability to perform his duties? Well, I have always considered Mr. Quodling a very clever young man at his business.
8684. But do you consider yourself qualified to give an opinion? I do.
8685. From your nine months experience? From my experience.
8686. Under Mr. Quodling? Under Mr. Quodling.
8687. You are qualified to give an opinion in reference to the capability of your superior officer to perform his duty? Yes.
8688. As to whether he is qualified to perform that duty? Yes, I certainly do. That is my full conviction.
8689. Did you measure the big cutting? I did, with Mr. Donaldson.
8690. Had you any buoys? We had no buoys; it was an approximate.
8691. Had you any bench marks? One bench mark.
8692. What do you call an approximate? That it was as near as it was possible to get it. A dozen persons might measure that, and perhaps each measurement would differ; there might be some three or four thousand cubic yards difference. It was only by guessing. Mr. Donaldson could only do it by his knowing the nature of the ground as it formerly stood. We had to guide ourselves by erecting poles, so as to make as nearly as possible the shape of the natural formation of the work.
8693. You were guided by the contractor's foreman, in that measurement for the Government? Yes.
8694. Did not that strike you as being irregular? It did; but I received instructions from Mr. Quodling to that effect.
8695. Were not your general instructions, according to what you said yourself, to make our detailed accounts? Yes.
8696. Was not that then part of your fixed instructions, without requiring definite instructions from Mr. Quodling on the subject? Previous to this, no measurements were required of that work. It was not necessary, as it was for a lump sum of money. It was never thought to be measured.
8697. For what purpose were those measurements taken? For Mr. Quodling. He said he wished to get a statement.
8698. A rough statement? He wanted to get a statement of the whole of the works. He wished me to go through the whole of the measurements, as he wished to make a statement to the Commissioner as early as possible.
8699. Do you know what that statement he wished to make to the Commissioner was? I do not.
8700. You do not know whether it was because Mr. Quodling wished to obtain an approximate value of the work done? I know nothing relative to that. He did not speak to me at the time. He merely asked me to forward to him a measurement of the whole of the works, as he wished to communicate with the Commissioner.
8701. Do you remember a letter asking Mr. Quodling to vouch for a certain amount of work or money to the contractor? I do not know about any letter he may have received; I only know the letter he requested me to vouch for which I have handed in.
8702. Did he state any reason for asking you to vouch for these? No.
8703. Did you vouch for them? I did not.
8704. Did you not sign a letter refusing to vouch for some particular work because Mr. Quodling had refused? Yes, in my letter of the 24th.
8705. Has this any allusion to that? Yes.
8706. You refused to vouch? I did.
8707. Because Mr. Quodling had refused? Not only because Mr. Quodling had refused, but also for my reason which I there stated.

Mr. O. L.
Hannington.
9 Jan., 1862.

- Mr. O. L. Hammington.
 9 Jan., 1862.
8708. What reason was that? The reason is there, if you notice, in my letter—that general letter of the 24th.
8709. You have got some papers there which you call a diary? Yes.
8710. What is the first date you have in that diary? Saturday, June 8th.
8711. How long was that after you took charge of the works? That is a long time before. I did not take those works till August.
8712. The Doughboy works? Yes.
8713. Did you keep a diary from the time of your first appointment under the Government? I did from the time of my first removal, when I left on June 8th, from Tamworth, to take Doughboy. Formerly I was at Tamworth. This is a diary I kept for my own convenience.
8714. You did not keep it for any special purpose? For no special purpose whatever, than to refer to any particular day if I thought proper to do so.
8715. Then what caused you to think there was anything “behind” or kept back by Mr. Quodling, because he kept a similar diary? I do not know that he kept a similar diary.
8716. I think you said that he made different memoranda? He used to make various memoranda.
8717. I understood you to say that it struck you that this was kept for some particular purpose? In going through the works he always took various notes. These notes I am confident were taken, because he used to refer to them in going through the works, and they agreed with mine. For instance, when we went through these works our notes were taken almost verbatim.
8718. Have you seen Mr. Quodling and Mr. Collett together on the works? On one occasion, yes.
8719. Was there any appearance of disrespect on the part of Mr. Quodling to Mr. Collett? There was a distance—an appearance of great distance between them.
8720. But was there any mark of disrespect shewn—did he treat him in any marked disrespectful manner? Not in my presence on that occasion; if he did I did not see anything of it.
8721. Did you hear Mr. Collett address any remarks to Mr. Quodling? I was not by. Although I was one of the party who went round, I was not constantly with him; therefore I could not tell.
8722. Have you heard Mr. Quodling make any contemptuous observations in reference to Mr. Collett? Privately I have, most decidedly.
8723. Has he ever given utterance to contemptuous expressions in reference to Mr. Collett, before the contractor or his agents? I have never heard him.
8724. Not to your knowledge? Not to my knowledge, before Mr. Collett or the contractor.
8725. Or any of the contractor's agents? Yes; I have heard him speak disrespectfully of Mr. Collett before Mr. Martindale's agent.
8726. Who was that agent? Mr. Donaldson.
8727. How long have you been in Sydney? Five weeks.
8728. How have you been employed during that time? In coming to the Assembly; I am in attendance every day.
8729. Where? At the office.
8730. Have you had frequent conversations, or have you had any conversation with Mr. Collett? I have been in conversation once or twice with Mr. Collett.
8731. Has this dispute formed the subject of conversation at any time? It did on one occasion.
8732. Relate as far as you can the conversation which took place? Our conversation was relative to my letter of the 24th.
8733. Relate what occurred, as far as you can remember? As far as I can remember I will do so. He was asking me relative to that letter.
8734. How did the conversation begin? Let me recollect a moment.
8735. Where did the first conversation between you and Mr. Collett take place with regard to this matter? The first conversation—
8736. With regard to the business that brought you to Sydney? Oh! the first conversation I had with Mr. Collett was on board the steamer, when I came down.
8737. From where? From Murrurundi—I took the mail.
8738. With whom? By myself.
8739. Where did you meet Mr. Collett? I saw him on board the steamer at Newcastle. I did not know that Mr. Collett would be on board the vessel.
8740. And then did Mr. Collett and you enter into conversation? Yes, I spoke to Mr. Collett.
8741. On what subject? In reference to the letter of the 24th; and he asked me plainly and distinctly whether I wrote that letter on my own responsibility.
8742. What did you say in reply? I told him Mr. Quodling was cognizant of it—that he was present at the time it was written, and that he supplied me with certain notes.
8743. Which you acknowledged to be correct? Which I acknowledged to be correct.
8744. Did you inform Mr. Collett of that? According to the information I had in reference to the specification.
8745. You adopted that letter? I adopted that letter.
8746. Did any further conversation take place in regard to that letter? Yes.
8747. What was it? Mr. Collett alluded to the metalling. He said that in my letter I stated that there was a clear deficiency of 1,016 cubic yards of metal which had not been supplied; and he said “how could you do that—you must have done it in ignorance, for the reason that there was only a certain quantity to be supplied—3,521 yards—and I thought “proper to substitute 2,800 yards of pitching, which if measured comes nearly to the
 “quantity

- “quantity of metal alone, independently of any other metal.” If you take the pitching—
8748. I am asking you with regard to the conversation you had together? I am alluding to it. Mr. O. L. Hannington.
8749. Mr. Collett used this argument with you? Yes; and I told him that if I had been aware that such was the fact I should not have written such a letter. 9 Jan., 1862.
8750. Did Mr. Collett converse with you and argue with you on the subject? No; it was a voluntary statement.
8751. You accepted the explanation? Yes, and it coincided with a conversation I had previously had with Mr. Martindale. I never dreamed that I should have seen Mr. Collett until I arrived here at the Office; but to convince myself after what I had heard from Mr. Martindale, I was determined to ask Mr. Collett about the matter. I found that the conversation I had with Mr. Martindale coincided with what Mr. Collett told me; and I had convincing proofs of it afterwards.
8752. Do you know of your own knowledge the difference between the price of pitching and broken metal? There is no difference in the price; one is 6s. 6d. and so is the other.
8753. You state that the pitching is 6s. 6d. per cubic yard? Yes.
8754. Do you know that of your own knowledge? I only heard it from the contractor.
8755. Which contractor? Mr. Martindale.
8756. Is he a good authority? I should say so, being the contractor, and having the schedule of prices.
8757. Have you seen it in the schedule of prices? I have not.
8758. Are you aware whether pitching is mentioned? Not at all. It was metal, I believe, in the first instance.
8759. Have you anything to guide you as to the relative value of a cubic yard of pitching and a cubic yard of broken metal of the same description? A cubic yard of pitching and a cubic yard of broken metal?
8760. Yes; of your own knowledge do you know the difference between the values of those two articles? We have always paid nearly the same price. It might have been 5s. 9d. or 6s.; 6s. 6d. is about the usual price for pitching.
8761. Do you know the description of stone that is broken into metal; is it the same stone that is used as pitching, and about the same sizes? It is about the same.
8762. So that pitching would be the rough stone before it is broken? Yes, the rough stone.
8763. What is the price of breaking that stone to the gauge required by the contract? The price at which it is supplied?
8764. No, what is the price paid for breaking the basalt? He supplies it broken; it is 6s. 6d.
8765. Is not the pitching the same stone that is broken into metal, of the gauge specified? Yes, some portion of it.
8766. Do you know the price that is paid for breaking that metal to the required gauge? I do not know what he is paying for it. It is supplied at 6s. 6d. the cubic yard of broken metal, or 6s. 6d. the cubic yard of pitching; they are both the same price.
8767. Has this basalt come from the cutting? Some portions of it.
8768. Are you aware that there is a clause in the specification which states that stones from the cuttings are to be piled in heaps, where directed by the overseer? Yes.
8769. Does not that form the pitching itself? No.
8770. Is the broken stone thus taken from the cuttings the pitching, previous to being placed on the road? No.
8771. What is that? It is only placing it in heaps ready for distribution.
8772. Is not that the stone used in pitching? Yes.
8773. It only requires putting in its place? In the road or in the pitching. Some portion of the road is not pitched.
8774. This broken stone is the property of the Government? It is the property of the contractor.
8775. Of the Government? It has to be placed in heaps for the use of the Government, and not to be used for any other purpose, at the will of the contractor—is not that according to the specification? What he has to do is to supply, we will say, 1,600 cubic yards of metal, to be placed on the roads in heaps.
8776. Will you look at this clause in the specification:—“Previous to making any of the side cuttings or embankments, or to forming the road surface where there is no cutting, if required, all the loose stones are to be removed and piled where directed, to be ultimately used as metal; where there are embankments in earth exceeding three feet in height, benches three and a half feet wide, and two feet deep, are to be cut on the side of the bank, as will be directed.” Have you observed that portion where the contractor has to lay the stones in heaps, to be ultimately used as metal, &c.? Those have been complied with.
8777. The contractor then broke these loose stones, and was paid 6s. 6d. per yard for breaking and spreading? Oh! no, that is different altogether. The metal which is supplied here is very different altogether.
8778. You state that basalt is taken from the cuttings? From portions of the cuttings.
8779. Which is, according to this specification, to be placed in heaps where directed by the Superintendent? Yes.
8780. To be used by the contractor as metal? Yes.
8781. The contractor would then have to break this stone to the gauge? Yes.
8782. For which he would receive 6s. 6d. per cubic yard? He has to supply 1,100 cubic yards.

- Mr. O. L. Hannington. 8783. And for this quantity he would be paid 6s. 6d. per yard? He would get it all from the cuttings.
- 9 Jan., 1862. 8784. Be pleased to answer my questions—you say that the basalt for the metal was obtained from the cuttings previously; if this rough stone is used as pitching, and pitched, that is, placed in blocks on the road, would not that be a saving of all the labour of breaking to the contractor? Yes, but there is not sufficient—
8785. Would that be a saving of all the labour of breaking to the contractor? Of pitching?
8786. As much of it as was used for pitching—it is a very simple question? I think there is a misunderstanding of the question altogether.
8787. If you will endeavour to understand it, it is very plain. I am asking the question from the specification, which you state you accepted as your guide? I beg your pardon, when I took possession of that work the whole of the stone was broken and laid in heaps.
8788. Was any of the pitching done at that time? Yes.
8789. Do you know whether the pitching was not formed by the stone which was thus preserved? I cannot say whether it was.
8790. In that case, if it was so, would it not be a clear gain to the contractor to the amount of the cost of breaking to gauge? He had to break this to the gauge; he must break it to the gauge.
8791. But a portion of the road being pitched instead of metalled—being formed of rough stone not broken to gauge—would it not be a saving to the contractor of the price of breaking? No, I do not think it would; I think even by the pitching he has lost.
8792. The pitching and metalling are not used on the same portion of the road? Yes, there is a certain portion of the metal over the pitching as well.
8793. A certain portion, but not the contract quantity? No.
8794. Not the contract depth? No.
8795. Mr. Collett has stated that where this pitching is used he had merely used shale for blinding? The shale is used for blinding afterwards.
8796. Will you be kind enough to confine your answer to this:—If the stone used as pitching had been obtained from the cuttings, and not broken to gauge but simply used as pitching, is not that a saving to the contractor of the price of breaking? It is a substitute for pitching.
8797. Never mind about it being a substitute; I am putting it to you as an abstract question? But it is just the same whether he supply pitching or metal.
8798. Leave the supplying out of the question, and answer my question as it is asked? I think it is the same.
8799. That the broken stone to be placed in heaps, at the order of the Superintendent, and afterwards merely hand-pitched by the contractor, is as expensive as the same stone broken to two and a half gauge and spread? Yes.
8800. And you state that it would be no gain to the contractor to use this metal which has been obtained from the cuttings and placed in heaps, as pitching, instead of breaking it to gauge and spreading it as per specification? Certainly it would be a gain if he did not break it up to the two and a half inch gauge, most decidedly.
8801. It would be a gain to the contractor? Of course it would; but what I contend is this, that he has to supply either pitching or metal at a certain gauge; he has got to supply 2,800 yards of one and 1,600 yards of another. There is nothing, I grant you, in the specification in reference to the pitching; that was an after arrangement, which the Commissioner thought proper to agree to—that pitching should be supplied instead of metalling. He supplies here a certain quantity of pitching in preference to all metal. He will supply 2,800 cubic yards of pitching and 1,600 cubic yards of metal, to be distributed in certain portions over that and over other portions. If you take the 2,800 yards, it will come to the quantity almost required.
8802. Will you tell me how many cubic yards of pitching it would require for a lineal yard of road of the width of the specification—how much would it require to pitch, say three lineal yards of the requisite width? 18 feet wide, I presume?
8803. Yes? And the pitching I suppose 9 feet 6 inches?
8804. Yes? It would be three and three-quarters cubic yards.
8805. And how many yards of broken metal would it require to make the specified thickness? I am alluding to the broken metal.
8806. Have you given the broken metal? No; it is pitching.
8807. What would be the quantity of broken metal for the same—9 inches depth at the crown and 6 inches at the ends? There is no difference at all.
8808. Then if the pitching is used without being broken to gauge, is not that a manifest saving to the contractor? The pitching requires much labour in the getting of it, and in bringing it in carts. You cannot always get it alongside; you have sometimes as much as three-quarters of a mile to bring your pitching.
8809. Did you state that there was a mile to go for this pitching? I have seen it necessary to go half a mile or three quarters of a mile to get stone for pitching.
8810. Did not you state that it was got from the cuttings? A certain portion of it; but you have to go half a mile sometimes—a quarter of a mile beyond the line, and then to bring it down the line half a mile.
8811. But would you not have to bring the broken metal the same distance? Of course.
8812. Then, as far as that is concerned, they are both equal—are they not equal in that respect? If they have to fetch it.
8813. By Mr. Lucas: Do they have to fetch it? Yes.
8814. By Mr. Dalgleish: Your objection would not be valid then, with regard to the bringing of it—would it be valid? No.

8815. Would it not be a direct saving to the contractor if he used this metal whole as pitching, instead of having it broken to gauge? No, I do not see that it would at all—not where he has to pitch it; he has either to fetch it a certain distance, or to have it broken in heaps there. Mr. O. L.
Hannington.
9 Jan., 1862.
8816. But you acknowledge that it is the same in both instances? Yes.
8817. Is it not then cheaper to lay the stone unbroken to gauge, than to break the stone and lay it afterwards? That is his loss.
8818. Whose loss? It is the contractor's loss; he takes it at the same price.
8819. Is it not a gain then if he uses the whole metal as pitching? Yes.
8820. A gain to the contractor? Yes.
8821. Are you capable of forming an estimate of the difference of price? I do not know the exact price he would pay.
8822. It is requisite to break this basalt into pieces similar to the size used for pitching, prior to its being broken to gauge? Yes.
8823. So that in that case the breaking to gauge is extra work? Yes.
8824. And you cannot give the Committee an estimate of the difference in the price between the two articles? I would not be certain as to the price exactly.
8825. Well, give us an approximation? Breaking, about 3s. 9d. to 4s.
8826. So that that would make a difference of 3s. 9d. a cubic yard between the pitching and the broken metal, which would be a clear gain to the contractor? I think I have given rather a low estimate—3s. 9d.; I think it is more than that, but I have told you that I am not positive as to the price.
8827. I presume 3d. is a considerable deal for a cubic yard of metal—is it not a good allowance? Yes.
8828. *By Mr. Markham:* Following up this inquiry—were there any basaltic cuttings on this particular portion? Only just the first portion of the cutting.
8829. There is a portion through basaltic rock? Yes.
8830. Now, with regard to this question of pitching and metalling, would not the smaller portions of the rock do for the metalling—I mean those portions which would not be capable of being used for pitching? Yes.
8831. Would the contractor have any advantage in that respect or otherwise? He would have an advantage I should say there, because he would not have it to break up.
8832. *By Mr. Dalgleish:* He would have a double advantage, would he not? He would have an advantage there.
8833. *By Mr. Markham:* A benefit would accrue to him? Yes, it would be less trouble of course to break.
8834. But supposing he had to cart large stones a considerable distance for pitching, he then, of course, when he could not take smaller ones would take larger ones? Yes, he would have to cart the large stones.
8835. With regard to the letter of the 26th October, I do not clearly understand that matter—did you mean to say that you had first made these memoranda yourself and that subsequently Mr. Quodling made suggestions to you? Yes.
8836. That you had made the memoranda first? Yes, we made our memoranda together; I went through with him.
8837. Did he suggest that you should make any memorandum or take the measurement? He did.
8838. Before? Yes.
8839. And afterwards he corrected it? Yes, and then he gave me that letter dated 20th October, which he delivered to me personally on the Saturday.
8840. But he first suggested to you that you should make the measurements? Yes.
8841. He then altered the memoranda you had made, by scratching out certain portions and interlining others? Yes, from which I wrote that report which you see.
8842. Was this subsequent or previous to the resignation of Mr. Quodling? That was written previous to his resignation.
8843. He had not resigned at the time? I do not know whether he had resigned or not then.
8844. Are you aware of the date on which Mr. Quodling resigned? I am not. I never saw that letter; I got no account of it.
8845. With regard to these bridges:—You state as a reason why the quantity of spikes mentioned in the specification had not been put in, that the slabs were narrow? Yes, that was the reason. I spoke to Mr. Martindale relative to that, and he said there was not room to put in two spikes.
8846. And I think I understood you to state that the slabs being narrow were no detriment to the bridge? Yes.
8847. Would it be possible, considering the narrowness of the slabs—it requiring two to make the width of one—for the same weight or quantity of iron to be consumed in the bridge as if the slabs were broader—would it be possible to use the same number of spikes, or would it amount nearly to it? I should not think there would be any great difference if you took the two slabs and put in one here and the other there.
8848. I understood you also to state that at Tanworth Mr. Quodling asked you to give him up your books and measurements? Yes.
8849. And at the same time requested you not to afford the Commissioner any information whatever? He did.
8850. Was that subsequent to or before his resignation? It was before his resignation.
8851. Had you any reason to believe, or did he tell you, that he was about to resign? Yes.
8852. Was it in consequence of any conversation to that effect that he endeavoured to induce

Mr. O. L.
Hannington.
9 Jan., 1862.

induce you to give up your books and measurements to him? He wished the Commissioner to be kept perfectly in the dark as to any measurements of mine.

8853. And he wished you to put him in possession of them? He said, "If the Commissioner asks you to give up the books, say that I have got them and will not give them up to you"; but I would not do it.

8854. I understood you to say that Mr. Quodling had spoken disrespectfully of Mr. Collett in the presence of the contractor's foreman or agents? Yes, several times in my presence. I could not say the exact words he uttered, but he used disrespectful language.

8855. Did you ever hear him speak in such a manner of the men upon the road? No; I never heard him say much in reference to the men. He is rather hasty in temper, but soon over, and so on.

8856. When you last saw the works on the Doughboy Diversion, were they proceeding satisfactorily? Yes, satisfactorily.

8857. Have you any reason to believe that the works have been since completed? I have.

8858. *By Mr. Lucas*: Did I understand you to say that they are since completed—that they are now completed? I understand that they are now completed.

8859. *By Mr. Dalgleish*: Do you know that of your own knowledge? I do not. I have not been there. I only know from persons writing to me in reference to the matter—from private information that I have received.

8860. *By Mr. Markham*: Was there a bridge called the Hannington Bridge under your charge? Yes.

8861. Do you know whether Mr. Collett ever condemned the approach to that bridge? Yes, a first-class culvert was condemned.

8862. Who laid that bridge out? It was laid out by Mr. Bayley.

8863. And the approach to it? The northern approaches to the culvert.

8864. But the northern approach to the Hannington Bridge, who laid that out? It was laid out by Mr. Quodling, I believe. If it was not laid out by him it was laid out under his superintendence.

8865. I think you also stated that you were appointed on Mr. Quodling's recommendation? Yes.

8866. Have you any reason to believe that any statements made to you by Mr. Quodling have led you astray with regard to the works at the Doughboy Diversion, either directly or indirectly? I have.

8867. You are under the impression that statements made by him to you were calculated to lead you astray? Undoubtedly. Had I been acquainted with the matter in the manner in which I am now acquainted with it, I certainly should not have written that report; I could not have done it conscientiously. I do not know whether he knew it or not; but, were I Superintendent, I should feel it my duty to make myself thoroughly acquainted with the work to be done. I had no other means of getting the information but through Mr. Quodling.

8868. *By Mr. Dalgleish*: I thought you stated that you had a copy of the specification? I grant you; but that specification, according to previous arrangement, was done away with, and other things were substituted.

8869. *By Mr. Lucas*: By whom? I understand by Mr. Collett.

8870. *By Mr. Markham*: Have you any idea whether the 1,200 cubic yards of metal were passed and paid for, or otherwise, by Mr. Quodling previous to your coming? I do not know.

8871. You are not aware? I know nothing as to any payments there.

8872. Have you made any statement as to any quantity required to finish? Yes; I have got it here in my books.

8873. How did you know whether any quantity had been measured and paid for before? I understood that there was a certain quantity to be done. That is, I was led to suppose that there were 2,600 yards of metal and 2,800 yards of pitching to be done, and of course I made my calculations upon that. You will find in my letter of the 24th, that I stated that there were 1,016 cubic yards of metal not yet broken to make up the quantity required—that we were that quantity deficient at that time.

8874. What quantity did the specification state? The specification?

8875. Yes; what was the quantity? 3,521 yards.

8876. You also made a statement to the effect that when Mr. Quodling visited these portions of the works he invariably passed over them in a hurry—that he never spent (I think you stated) more than twenty or forty minutes on them? He rode through the works as quickly as possible, and would say "Oh! don't shew me the disgusting works." He would have nothing to do with them.

8877. He did not appear to approve of them? No.

8878. *By Mr. Dangar*: When Mr. Collett visited these works did he pass over them very quick as well? No; the only occasion I was with Mr. Collett on the works he went on them at eleven and did not leave until four o'clock.

8879. Did you ever see Mr. Brown there? On some occasions with Mr. Collett.

8880. Does not he pass up and down very quick? I have nothing to do with him; he is in another district.

8881. Are you a surveyor by profession? No.

8882. You of course could measure the works? Yes.

8883. If Mr. Quodling stated that he instructed you, is that true—could you measure works before you joined Mr. Quodling? Mr. Quodling never measured any works with me whatever.

8884. Did he ever instruct you? No; he never measured a work with me the whole time I have been with him. He never measured a single work.

8885.

8885. You spoke of Mr. Quodling's strictness? Most decidedly I did.
8886. Do you not think that he has a right to see that those men do their duty? Certainly I do.
8887. Are you aware that some overseers and Superintendents are very careless in seeing the men do perform their duty? They may be; but out of my own district I have little opportunity of judging of others.
8888. It is nothing unusual for anyone to say that a master was strict or that he was a hard master—it does not imply that Mr. Quodling was incompetent? Not at all.
8889. And those day labourers were the only ones who spoke against Mr. Quodling? I have not said that anyone spoke against him.
8890. You said he was strict? Yes; and very likely they might think he was harsh, so far as that is concerned; but I could not say a word against any man for being strict in his duty.
8891. Have you a German employed on your line from Doughboy to Goonoo Goonoo with a team occasionally, or since you have been stationed there? If you could tell me his name.
8892. I do not know his name, but he is a German, that has a bullock team of his own? I do not know. Would you know the name if I were to mention it—Pounds, Walsh, Burk, and Barnes?
8893. The party I allude to is in Mr. Newcome's employ? Was it Alderson? They are the only men I have had.
8894. Do you employ his bullock team or a German's bullock team? No.
8895. *By Mr. Lucas:* I think you have already told us the difference between the value of pitched and broken metal? Yes.
8896. Which has to be drawn the furthest, the pitched or the broken metal? I think they have to be brought about an equal distance.
8897. About an equal distance? Yes.
8898. With reference to that letter, you say that some alterations were made in it? Yes, there are erasures and additions.
8899. Are the contents true, generally speaking? Oh! yes.
8900. With reference to the slabs, you say the slabs were narrow—what is your idea of the proper width of a slab? I think myself that slabs about 6 inches are quite wide enough.
8901. Do you not think it is necessary to put two spikes in each? I do not see that you have room; you would split the surface if you put two in.
8902. I am speaking of them as if they were properly put in? I think one would be quite sufficient.
8903. Have you any experience as to the qualities of Colonial timber? My experience in that respect is not great.
8904. Are you aware that if you cut a slab 6 inches wide the sun makes it curl up at the edges, supposing that you have one spike in the centre? If you put a spike in?
8905. Yes. Is it not necessary in a house, in floors, where the boards are 5 inches wide, to put a nail on each side, and particularly at the ends? Yes.
8906. And do you not think it requires this precaution much more when the sun shines on the floor? But with the bolts and spikes I do not think the sun would affect it.
8907. But still you have had no experience in such matters? No, I am only giving my opinion.
8908. You think 6-inch slabs a proper width? I think so.
8909. Suppose you were drawing out a specification, what width would you give? If I were to have two bolts, I should say 9 inches; but if I had only one, I should say 6 inches.
8910. Are you aware that two bolts are mentioned in the specification? You will see the specification; I mention it there.
8911. How did you happen to come to Sydney on this occasion? I received a telegram from the Commissioner.
8912. You said in reference to that letter, that if you had known as much when you wrote it as you do now, you would not have sent it to Mr. Quodling? Yes.
8913. How long is it since you left the roads? I left on the 30th November.
8914. And what opportunity had you of gaining experience between the time of signing that letter and the time you left? From a conversation I had with Mr. Martindale previous to my coming to Sydney, and that information being confirmed by the Commissioner, I was put in possession of information which had I known previous to the writing of that letter, I should not have written it.
8915. With reference to your experience as to the completion of the work, I understood you to say, that if you had had the same experience then as now, you would not have signed that letter? I could not have done so.
8916. You said that the only time Mr. Collett was on the road with you, he went down about eleven o'clock and remained till four—when was that—will you tell me the date, if you please? June 26th.
8917. I should just like to ask you one question with regard to measurement—it is said you are not competent to measure—suppose a heap of stones 40 feet 6 inches long, 9 feet wide, and 1 foot 6 inches deep—how many cubic yards would that contain? That would be 20 cubic yards—6' 9.
8918. *By Mr. Dalgleish:* Is that (*memorandum book*) the original diary, or is it a fair copy? These are my reports—the original of my reports.
8919. And that is the original diary? It is the original diary.
8920. That you have kept from day to day? Yes.

Mr. O. L.
Hannington.
9 Jan., 1862.

APPENDIX.

Mr. O. L.
Hannington.

(No. 61-1437.)

9 Jan., 1862.

Department of Public Works,
Road Branch,

30 October, 1861.

Sir,

I am directed by the Commissioner to request you to send in weekly reports of the works now being carried out on the Northern Road, between Doughboy and Tamworth, and also the necessary vouchers for payment, until Mr. Quodling's successor is appointed.

I have, &c.,

S. G. SHAIRP,
Chief Clerk.Mr. O. Hannington,
Tamworth.

FRIDAY, 10 JANUARY, 1862.

Present:—

MR. ARNOLD,
MR. DALGLEISH,
MR. DANGAR,MR. DICK,
MR. HOSKINS,
MR. LUCAS,

MR. MARKHAM.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

John Rae, Esq., called in and further examined:—

John Rae,
Esq.

10 Jan., 1862.

8921. *By the Chairman:* Will you be kind enough to hand in the documents to which reference was made in your evidence of yesterday? I now hand them in. The first document I hand in is a letter of 17 September, 1857, from the Commissioner to Mr. Collett (*vide Separate Appendix B 1*), complaining of his having exceeded his powers, and pointing out to him what his duty was. In this letter Captain Martindale states that the Roads constitute an integral part of the Railway Department under the Commissioner. No. 2 is a letter dated 30th October, 1857, from the Commissioner to Mr. Collett (*vide Separate Appendix B 2*), stating that renewed complaints had been received by the Colonial Secretary, about the roads under Mr. Collett's management, and that if he was either unwilling or unable to abide by his instructions, it would be necessary to remove him from his appointment. The next in date is an extract from a letter of the 14th January, 1859, from the Secretary for Lands and Works to the Commissioner (*vide Separate Appendix B 3*), expressing dissatisfaction at the accounts given of the manner in which Mr. Collett performed his duties, and requesting that his, the Secretary's, opinion might be taken before deciding upon any general plan of road management. This letter is very strongly in favour of Mr. Collett. The next letter is one of the 14th July, 1859, (*vide Separate Appendix B 4*), in which the Commissioner reprimands Mr. Collett for neglecting his duty, and threatens to bring his conduct under the notice of the Secretary for Lands and Works. The next is a letter of the 15th July, 1859, from the Commissioner to the Secretary for Lands and Works (*vide Separate Appendix B 5*), bringing Mr. Collett's conduct under the notice of the Secretary. No. 6 is the only other letter I find bearing on this question. It is dated 10th November, 1859, from Captain Martindale, as Under Secretary for Works, to Mr. Collett (*vide Separate Appendix B 6*), informing him that the Government will allow him another trial—this was in Mr. Secretary Eagar's time—but expressing great dissatisfaction at his conduct. This, I think, gives the whole history of the matter, and is the only correspondence essential to its elucidation.

8922. Should Mr. Collett think himself injured by any of the other correspondence being omitted, you will have no objection, I presume, to produce it? None in the least; but this is all that is material, and to produce the other letters would only be unnecessarily clogging up your Appendices.

8923. The Committee are quite willing to accept your assertion that all the correspondence which you consider bears upon the case has been produced? Exactly. I was asked the question yesterday, whether all this correspondence had reference to the same case, or whether it related to different cases. As far as I can gather from the correspondence, which ranged over a long period, it all has reference to the same case. It was kept hanging on year after year without decision, and was left by Mr. Secretary Robertson, when the Cowper Ministry resigned office, as a legacy to his successor; and it was only acted upon by Mr. Secretary Eagar soon after he came into office.

8924. And it is your impression that it is all one case? Yes, I believe it to be only one case that has been going on, without decision, from the date of the first of these letters until 1859.

W. R. Collett, Esq., called in and further examined:—

W. R. Collett,
Esq.

10 Jan., 1862.

8925. *By the Chairman:* Any statement that you may now wish to make, the Committee are willing to receive? I have only this statement to make, that the Committee promised that, as certain charges had been made against me, I should have a full opportunity of answering them, and that no evidence should be given to which I should not have an opportunity of replying. I have therefore to request that mine may be the last evidence taken.

Mr.

Mr. Robert Quodling called in and re-examined :—

Mr. Robert
Quodling.

10 Jan., 1862.

8926. *By the Chairman:* Mr. Quodling, the Committee understand that you wish to make a statement in regard to your bank account, and they have decided that you shall have an opportunity of doing so; your evidence, however, must be confined to this one point. If you think your character has been unfairly assailed in this matter, the Committee now give you an opportunity of clearing up this point? It has been stated in evidence that several of my cheques have been dishonored, and I wish to explain to the Committee how this has occurred, in order to justify myself from the charge made against me. When I left Tamworth I came away very hurriedly, without having had time to go through my account with the bank at Tamworth. This whole matter has arisen from my private and my public account in this bank having become confused and mixed up with each other. Cheques have been charged to my public account that were drawn on my private account, and *vice versa*. In this way it is that the misunderstanding has arisen. I requested the Manager of the bank to make up my account, but I have only got that account within the last few days. It was not made up when I left, and had not been made up from the 1st January, 1861, to the time I left, and therefore I did not know how my public account stood. I believed that there were plenty of funds to my public account to meet the cheques I drew against it; and so there would have been if the two accounts had not got confused. With reference to the statement made that cheques of mine on the public service are now out with no funds in the bank to meet them, that is altogether false; it is made for the purpose of injuring me with the Committee, and nothing else. The matter only requires explanation to shew there is no foundation for what is said about me. The banker has stated that he has received a letter from the head Office in Sydney, wherein he is requested by the Commissioner of Roads to send down a copy of my account to Sydney. He wrote in reply, furnishing the account demanded, and stating that the matter would require some explanation from me before it could be properly understood. That explanation they have never asked for, but instead of that, they go about making charges against me and blackening my character. Mr. Hawkins told me that he met Mr. Collett at Singleton, and that the first thing Mr. Collett asked was whether he had not had a cheque of mine dishonored. He told Mr. Collett he had, and then Mr. Collett directed him to write a letter to the head Office in Sydney, stating this; and he even dictated to him the letter that he was to write. This will shew the sort of thing that I have to stand.
8927. Do you know this of your own knowledge? Mr. Hawkins told me of it himself.
8928. Mr. Hawkins then will speak to the point if it be necessary? I only mention it to shew the feeling against me.
8929. Then during the time you were up at Tamworth, it never occurred but that all cheques drawn by you on account of Government work were duly honored? No, never such a thing happened; and this would not have happened if I had been up there.
8930. And this confusion in your accounts—between your public accounts and your private accounts—is the sole reason why these cheques have not been met? Yes;—by my private account and my public account having become mixed.
8931. It has originated then in an error on the part of the bank? No; not on the part of the bank. It has arisen from an error of my own, in going away so hurriedly without first balancing my account with the bank.
8932. *By Mr. Dick:* It has not arisen from an error in the bank? I say not.
8933. Are there funds in the bank to meet these cheques? There are.
8934. Placed there lately? I do not say when they were placed there.
8935. And it has arisen from your public and your private accounts being mixed? Yes; cheques on my public account have been charged to my private account and *vice versa*. This has led to the confusion; but any cheques of mine that are out will be paid.
8936. What book is that you have in your hand? My bank book.
8937. Does it contain your public or your private account? Both.
8938. Both in the one book? Yes.
8939. You say that cheques on your public account have been paid out of your private account—do you ever pay in public moneys to your private account? No. I have two accounts, but as I have said, they got confused, and cheques were paid out of my public account that ought to have been paid out of private account. As to any fraudulent dishonesty, such as you imply, I beg altogether to deny your statement.
8940. You misunderstand me—I am in no way charging you with fraud or dishonesty. I only ask you a question in reference to the manner in which you keep your accounts. It is of very great importance to know how parties holding situations of confidence, and entrusted with the expenditure of large sums of money, perform their duties and keep their accounts. That is my reason for asking you about your accounts, and whether you kept your private account distinct from your public one? I had two accounts, but when I came away so hurriedly, the two got confused.
8941. How is the money entrusted to you by Government remitted to you—by draft? I believe it is.
8942. In what way—is it sent to you direct, or paid in to your credit? It is paid in to my credit.
8943. How is your salary remitted to you? It is paid in to my credit, in the same way as any other account.
8944. In the same way as the funds, with the disposal of which you are entrusted by the Government? Yes.
8945. You are entrusted, I believe, with the money for paying the maintenance men? Yes.
8946. The amount is placed to your credit in the bank? Yes.—

- Mr. Robert Quodling.
- 10 Jan., 1862.
8947. And you draw cheques against it to pay the men? Yes.
8948. So that until you draw against it, the sum remains, or ought to remain in the bank? Yes, and it would have been there only for my two accounts having got confused.
8949. Is it not your custom to draw your salary separately, and to place it to your private account? No; I receive the money in one amount.
8950. Then the money you receive to expend for the Government, and your salary, remain in the bank in one amount? Yes, they do; but then I had other amounts.
8951. But if the two were kept in one amount in the bank, how could they become mixed? I say that I had two accounts in the bank. You must allow me to have an account of sums that I receive, besides those I get from the Government.
8952. Have you two bank books? No.
8953. Have you two cheque books? No.
8954. How do you distinguish the cheques drawn upon one account, from those drawn upon the other? I had a distinguishing mark on them; but the banker made a mistake about it, and that was how the confusion first arose.
8955. You had a private mark? Yes.
8956. Was this mark known to the teller? Yes.
8957. Was it made by arrangement between you and the bank? Yes.
8958. What was the mark? I altered it two or three times. I had different marks.
8959. What were they—tell us some of them? I had a letter with a number, 1 A, 2 A; but then they got confused.
8960. You told the bank about this marking of the cheques? Yes.
8961. Who did you tell—Mr. Roberts? No, Mr. Bushby.
8962. Did you ever write on your cheques, "On account of the Public Service?" No.
8963. Was the peculiar mark such a one as a stranger, myself for instance, would have been able to recognize, and to have told whether it was given on your public or your private account? I do not know.
8964. What was your general practice in regard to these cheques? I had no rule at all. I kept two accounts at the bank, and every amount paid in to my public account I can shew receipts for.
8965. You believe that the mistake occurred because of your going away? Yes, it was my error, in the hurry of going away from Tamworth.
8966. What error? That the accounts were confused. I went away in a hurry, without getting my account made up, and it had not been made up from the January previous until the time I came away.
8967. Do you keep any other books beside your bank book, to shew the payments you have made, either on public or private account? No.
8968. Do you make any return to the head Office in Sydney, of the mode in which you have expended the money entrusted to you? I get vouchers for all the money I pay away, and I send these down to Sydney.
8969. You do not make any periodical returns—quarterly or monthly? No, only sending the vouchers.
8970. Is it not one of the regulations that you should send in periodical returns of your disbursements of public money? I do not know that it is. I have never seen such a regulation. I send down the vouchers, and that is return enough.
8971. Have you ever done so? What—sent in returns?—I do not recollect.
8972. Did you ever receive instructions to make periodical returns? I do not know what returns I could make. There are the vouchers for the money paid. They are sent down regularly, and they should be sufficient.
8973. How much money do the Government place at your disposal for expenditure in the course of a year? It is difficult to say.
8974. In round numbers—is it £500? Considerably more than that.
8975. Is it £1,000? What is the use of asking such questions; you might go on rambling about in that way for any time. By adding up the amounts in the book you could see.
8976. It is not my question that is rambling, but your answer. If you would only answer me properly I should not be necessitated to adopt this style of questioning,—how much, including your salary, is annually placed to your credit in the bank by the Government? I cannot say without adding up the book.
8977. Perhaps you will be good enough to add it up and let me know the total? If you want the total you had better add it up yourself.
8978. Have you any objection to my seeing your bank book? I do not know why you should go into my private affairs.
8979. Have you any objection? No, I have not. I did not wish to go into all the matters. I only wished to shew how the mistake had arisen, and that any cheques of mine will be honored.
8980. Will you hand it to me then? I do not think I ought to let you go into my private affairs.
8981. You refuse then? Yes, I refuse.
8982. *By Mr. Hoskins*: Was that book supplied to you by the Government? No; I got it at the bank.
8983. Did the Government pay for it? No; I paid for it myself.
8984. *By Mr. Dick*: Are you quite sure that you paid for it yourself? Yes.
8985. Quite certain? Yes.
8986. Where did you pay for it? At Tamworth.
8987. In what way—in cash? Yes.
8988. Is it the custom of the bank to charge for the account book? Yes.
- 8989.

8989. *By Mr. Hoskins*: You are sure that Government did not supply the book? Yes, quite sure. Mr. Robert Quodling.
8990. And that you paid for it yourself? Yes.
8991. And got it at the bank? Yes. 10 Jan., 1862.
8992. *By Mr. Dick*: Let me ask you again, did you pay for it? I did—at least I believe I did. You do not want me to —
8993. I want nothing except to test your recollection; you seem to lay credit to having a very good memory in some matters, and I wish to see if it is as good in all. Are you aware that there is a regulation of the Government service, that no officer of the Government, entrusted with the expenditure of public money, shall keep his public and his private account together? No, I am not aware.
8994. Have you ever made any return to the Government of the amounts expended by you on Government account, except by remitting these vouchers? I do not recollect. I do not know what you want with any return beyond these vouchers.
8995. I ask you if you have ever made such returns? I do not recollect.
8996. Can you tell me how much Government money was entrusted to you to expend during last year? No, I cannot.
8997. Not from the book you have in your hand, or from papers in your possession? I could from documents that I have; from the vouchers for every payment.
8998. Does the amount appear in your bank book? Yes.
8999. Have you paid in to your account at the bank any moneys besides those which you have received from the Government? Yes.
9000. Money procured from private sources? Yes.
9001. Then, as I understand you, you have no other book besides this bank book, shewing the receipt of moneys from the Government, and the payments made on account of those receipts? No; I never gave any receipts.
9002. You misunderstand me; what I ask is, whether you have any book shewing the amount of money you have received from the Government, except this bank book? No.
9003. And that book includes the amount received for your salary, as well as amounts received from other sources on your own private account; and all these several sums have been paid into the Bank of New South Wales, to one account? Yes.
9004. Then, when you drew cheques upon this amount, you made a private mark, known to you and the teller, to distinguish whether the cheque was drawn on public or on private account? Yes, sometimes I did.
9005. Which private mark was understood by the bank? Not always; but they made an error at first, through my not telling properly how I numbered the cheques. I used to change the marks, and sometimes when I was away on the road I would forget the last number, and then I would take a new mark.
9006. But what could possibly be the use of numbering and marking the cheques when there was only one account to draw against? I have told you repeatedly there were two accounts.
9007. Did the bank keep the accounts in the ledger? I do not know what the bank kept.
9008. Did they keep a separate account for your private and your public cheques? Yes, they did.
9009. Did the bank keep in their ledger the account that you ought to have kept and furnished to the Government? I had no account to furnish to the Government.
9010. Is it not your duty to keep an account of the moneys you receive and expend on behalf of the Government? What do I want with an account?—I have the vouchers.
9011. You are satisfied with them? That is sufficient for me; if I shew how the money sent to me is paid, that is all I care about.
9012. We do not want to know what you care about—just answer my questions, and give us facts. When we have the facts we can draw our own inferences from them. You say that your cheques have not been honored on account of some error—what error do you allude to—were there funds in the bank to meet them? I believe there was.
9013. Will you swear that there was? I would not swear to it positively until I had gone through the accounts. This is what I want to do. I have been wanting, for weeks past, to go up to Tamworth and check my accounts. In fact, I have arranged to go to-night by the steamer if I can get away.
9014. Have cheques drawn by you on account of the public service been dishonored? I have heard that they have been.
9015. Who told you? I heard Mr. Collett state so before this Committee.
9016. Have you heard it from any other source? Yes, I did hear it from another person.
9017. Who from? From Mr. Hawkins.
9018. Is he one of the parties who holds dishonored cheques of yours? He is.
9019. What did he tell you? He told me that he had met Mr. Collett at Singleton, and that Mr. Collett had asked him if he held a dishonored cheque of mine. He replied that he did, and then Mr. Collett requested him to write to him at the head Office about it.
9020. What did Mr. Hawkins say to that? He said he would not do so, as nothing of the kind had ever occurred before; that my cheques had always been regularly met; and that he knew that this had only arisen from some error.
9021. And the error consists in your having drawn too much money? No. Sums that I expected to have paid into my private account were not paid as I expected; and then cheques on my private account were charged to my public account. This and certain sums that I expected to be paid to my private account not being paid, caused the mistake. It is a matter that I could easily explain when I had the account before me.
9022. Cheques drawn on your private account have been charged to your public account? Yes. 9023.

- Mr. Robert Quodling. 9023. And that you say has been the cause of the mistake? Yes.
- 10 Jan., 1862. 9024. Then, I suppose there was plenty of money to your private account to pay them, only they were wrongly charged? I believe so.
9025. You believe so? Yes.
9026. Can you not speak positively? No, I cannot.
9027. Not from your bank book? No, because I had not had it made up for some time.
9028. Since when? Since January of last year.
9029. Having only one bank book, how can you tell from that how much you have drawn on private account and how much on public account? I can tell by the cheques; and then I have the vouchers to guide me. I had a voucher for every penny of Government money that I paid away.
9030. Then by going through the cheques, and taking out those which you know to have been given on public account, you arrive at the amount you have paid for the Government? It is not necessary to do all that.
9031. Seeing that you do not obey the instructions in regard to keeping your private and public accounts separate, and that you keep no accounts of your own, I can see no other way of doing it? I have no instructions about my bank accounts. I do not want to keep any accounts, because if I produce the vouchers for the money paid that is all I want.
9032. If you keep no separate bank account, and sent in no returns, how did you account to the Government for the money entrusted to you to expend? By the vouchers I sent in. They contained a receipt from the parties for the money paid to them.
9033. And those vouchers you sent down to the head Office in Sydney? Yes.
9034. How long after you received them—immediately they were paid? Yes, sometimes; sometimes I kept them for a time until I could send down a lot together.
9035. How often did you send these down—once a month, once a quarter, or how? I cannot say positively. I may have one or two vouchers only, and then I would keep them till I got twenty or so. I sent them down in lots together, so that they might not be lost in the Office.
9036. How often was this—once a month? Yes, generally.
9037. On specified days? No, not at any specified time, only when I considered I had enough to send down.
9038. Was anything ever said to you about the desirability of sending in regular accounts? Yes; there was some circular sent round to all the officers of the Road Branch, recommending the advisability of shewing the balances unexpended on different portions of work entrusted to them.
9039. You have said that you have not had your bank-book made up since last January? No; not until after I came away from Tamworth.
9040. Your bank book not being made up, how is it you know how much you have drawn on your private account, when you have nothing to guide you? I had something to guide me.
9041. What? I had my own memos. to guide me.
9042. What do you call your memos.? Private memos. I made when I paid money away. I had them.
9043. Of what character were they? I do not know what character they were, but they were sufficient to guide me.
9044. That is as regards your private account—will you tell me how you kept that? I always knew what amount the Government paid to my credit, and then I knew what I drew against it.
9045. How did you know? I could always tell.
9046. But how? It was a very easy thing; I could always tell.
9047. How;—did you guess at it? No, I had my own documents, my notes to guide me.
9048. You kept notes of them? Yes.
9049. What kind of notes? I decline to tell you.
9050. Were they something of this kind—"Paid so and so, so much";—did you put down an entry like that? Yes, generally.
9051. You might just as well have told me that at first. Up to what date is your bank book made up now? Up to January.
9052. It has not been made up since? No.
9053. In whose possession has it been ever since? In my possession.
9054. How long is it since you have been in your present position as road overseer? Some considerable time.
9055. How long? A pretty long time.
9056. Two, three, or four years? I have not the dates, and I cannot say exactly how long.
9057. Do you mean to say that you cannot tell the day on which you were appointed? I do not recollect. I could not tell you from memory.
9058. Was it two years ago? No; not quite two years.
9059. Was it eighteen months ago? Somewhere about that time.
9060. Will you tell us the amount of money that has been entrusted to you to expend during that period—during the eighteen months you have been road overseer? No, I cannot tell you from memory.
9061. You cannot tell from memory? No.
9062. Nor yet from your bank book, because that you say is not made up? No.
9063. Nor yet from any books, because you say you kept none? No.
9064. How then would you find out? From the documents sent in to the Government shewing the amounts that have been paid in.

9065. And that is the only way you can tell? Yes.
9066. Then I ask you whether, at the time you gave these cheques that have been dishonored, on account of the public service, there were funds there either to your public or your private account, sufficient to take them up? Yes, I believed there was.
9067. You believed there was? Yes.
9068. That was at the time you gave the cheques? Yes.
9069. You believe now, I suppose, that there was not? There is money to my credit now to take them up.
9070. There are funds to meet these cheques now? Yes.
9071. Have you paid any money in to your credit in the Tamworth Bank lately? I do not say whether I have paid anything in or not. That is entirely my own private affair; I am not in the public service now.
9072. Then, as a matter of fact, money has been paid into your private account since you left the Government service? Yes.
9073. Have these cheques been paid since they were first talked of as having been dishonored? I cannot say. I do not know that they have been dishonored. I do not even know that they have been presented.
9074. I think I understood you to say that you had no objection to shew me your bank book? I decline to shew it. I do not see what you want with my private affairs. I only meant to state to the Committee, in answer to the charge made against me by Mr. Collett, that any cheques of mine, if they are presented at the bank, will be paid; and that if they have been dishonored it has been only through this error. I am going up to Tamworth now, and intend to go by the steamer this evening, to go through the whole accounts with the banker. I believe that there is some error in my private account, and that I ought to have a large balance to my credit. The banker himself says that they require looking into, because when he sent down to the Government a statement of my account with the bank, he stated to them that some explanation was necessary on my part, as the account was so confused.
9075. Did you ever instruct Mr. Roberts, the Manager of the Tamworth Bank, to open an account, to be called "The Northern Road New Account"? Mr. Roberts is such a strange banker that I scarcely recollect what I instructed him to do; but Mr. Bolton recollects perfectly the instructions I gave him. I have only to bring the thing to his mind, and he will know what took place. Everything that is wrong I will rectify when I go up.
9076. Then, because Mr. Roberts is a strange banker, you do not recollect what instructions you gave him? No; not because he is a strange banker, but because the accounts have been so mixed up. They are so confused now that it would puzzle a lawyer to make head or tail of them.
9077. Did you pay in to the Tamworth Branch of the Bank of New South Wales, or did anybody else, in your behalf, pay on the 4th October, £24 5s. to the credit of the Northern Road new account? I do not recollect; but that document you are referring to is of no use unless you have my private account, and my explanations with it.
9078. Did you authorize Mr. Roberts to transfer a balance that stood to the credit of your private account to the credit of the Northern Road new account? I do not recollect. I know that when I came to look into my two accounts they were so mingled together that I told him to make them out in one. They were so confused that it was impossible to make them out separately.
9079. You do not recollect whether you told Mr. Roberts to transfer this balance to the Northern Road account? I know that I told him to make the accounts in one.
9080. Have you seen Mr. Roberts frequently since your resignation? No.
9081. Have you seen him? No; not at all.
9082. Did you, on the 12th November, pay in £50 to the credit of the Northern Road account? Yes, I think I did.
9083. But you are not sure about it? Well, perhaps I did.
9084. Do you know a person named Gill? Yes.
9085. He is the mail contractor? Yes.
9086. Did he lend you £40? No.
9087. He paid in £40 to your credit in the Tamworth Bank? He may have done so.
9088. What did he pay you this money for? That is my business—not yours.
9089. However, he did pay that amount in to your account? Yes, he did.
9090. By your direction? I decline to answer that.
9091. Have you any private income beyond the sum you receive from the Government—any income besides your pay as road overseer? I decline to answer that question.
9092. During the time you have been in the Government service have you been engaged in any other occupation or business, whereby you have been able to add to the amount you received from the Government, by way of pay? I decline to answer that question.
9093. You decline to answer me? Yes.
9094. And why—on what grounds? Because the question does not bear upon the case at all.
9095. *By Mr. Hoskins:* I think it does, and I think that it is a question that for your own sake you ought to answer? What business has he with my private affairs?
9096. *By Mr. Dick:* Then you decline to inform us whether ———? Yes, I decline.
9097. What do you decline? I ask if I am to be questioned in this way. I am not in a Police Court?
9098. Perhaps you will wait until I have put my question before you take upon yourself to answer? I shall do nothing of the sort; I shall answer as I think proper; I am not in a Police Court.

Mr. Robert
Quodling.
10 Jan., 1862.

- Mr. Robert Quodling.
10 Jan., 1862.
9099. Will you tell the Committee why, or on what account, you received these £40 from Gill? I will do nothing of the sort.
9100. However, he did pay in £40 to your credit in the Tamworth Branch of the Bank of New South Wales? He did pay it.
9101. And that was on the 20th November? I cannot tell the date.
9102. However, you know that it was since the date of your resignation? I cannot tell.
9103. Do you know a person named Bennett? I do.
9104. Did he pay in £10 to your credit in the Tamworth Branch? Yes, I believe he did.
9105. Was that since the date of your resignation? I cannot tell, but I think it was.
9106. Will you state to the Committee on what account that money was paid to you? No, I will not.
9107. You have an objection to mentioning on what account it was paid? It is not that, but I do not see that you have business to enter into my private affairs.
9108. Then you decline to tell us? Yes, I do.
9109. Did William Coghlan pay in £1 5s. to your credit in the Tamworth Branch? He did.
9110. Since your resignation? Yes, I believe so.
9111. Did you yourself pay in £50 to that branch? I decline to answer. I am not to be cross-questioned in this way. I am not in a Police Court.
9112. Have you, since the date of your resignation, asked Mr. Roberts, the Manager of the Tamworth Branch, for a statement of your account with that Branch? I believe I have.
9113. You believe you have—did you not apply for it, and did Mr. Roberts not send it to you? I think he did.
9114. Did that account shew a different state of affairs from your bank book? I decline to answer that question.
9115. Have you that statement with you? Yes, I believe I have.
9116. Will that statement shew the balance you had to your credit at the date of your resignation? Yes, I believe it will.
9117. Have you any objection to shew it to me? I do not see what you want with my private business. I have already given all the evidence I intend to give on this matter, and you have no right to pry into my private affairs.
9118. Did Mr. Roberts in that statement shew that you had overdrawn your account by £200? No.
9119. Did he shew that it was overdrawn something less? No.
9120. As a matter of fact, was not your account overdrawn at the time you resigned? No, it was not.
9121. Was it at any time? I do not know that it was ever overdrawn.
9122. *By Mr. Hoskins*: Did you never between January, when you say your book was made up, and the time of your resignation, take any means to ascertain the state of your account, to know what balance there was at your credit? I got my bank book made up the other day.
9123. Where is it? It is here.
9124. Can you not state then the amount there was to your credit when the book was made up—have you any objection to do so? None in the least.
9125. Then be good enough to tell us? As I stated before, the accounts are so mixed up that it would puzzle any one to go through them.
9126. But surely it must shew all that there was to your credit? No, it does not show all. I believe that there is now a considerable sum to my credit, but this book does not shew it.
9127. Did you write to the Manager of the bank to furnish you with a copy of your account with the bank? I did.
9128. Up to the present time? Yes.
9129. And is that the reply you received to your application? Yes.
9130. Up to the beginning of 1862? Yes.
9131. And what balance does it shew? On the first January, 1862, it shews a balance in my favour of £8 0s. 2d.
9132. That is a balance on your general account, private and public? Yes; but there is a considerable deal more than this to my credit.
9133. However that is what the Manager says is to your credit? Yes; but it is not correct.
9134. And on the date previous to that, when it was made up, what amount was to your credit? I did not get it made up from January 2nd, 1861, until I was leaving; that is just twelve months, or very nearly so.
9135. Have you been in the habit of keeping accounts with banks before you went up to Tamworth? Yes, but I never kept two accounts; I never had but the one account.
9136. You have been in the habit of having accounts at the bank? I have.
9137. Did you never get your bank book made up oftener than once a year? No.
9138. How then could you keep your accounts with the Government? I had the vouchers to give them, and that was all I cared about; they shewed that I had paid the money.
9139. When did you receive that account you now hold in your hand? A day or two ago.
140. Did you write up to the Manager at Tamworth for it? Yes, I did.
9141. And now that you have received it, you believe it to be incorrect? Yes, I think it is.
9142. What steps do you intend to take to ascertain whether it is correct or not? I had made up my mind to start for Tamworth this evening; and when I get up there I am going through the cheques, and the whole account, to try and find out where the error is.
9143. Could you not from that book have given Mr. Dick a statement of the amount paid in to your credit at the bank by the Government, during the time you have been on the Northern Road? I might have done so; but I do not consider that I was justified in so doing.
- 9144.

9144. Are they not public accounts? They are public accounts, but my private account is mixed with them, and I do not think he has any right to go into my private affairs.
9145. When you first went up to Tamworth did you open an account at the New South Wales Branch Bank there? I did.
9146. Did you do so with your private funds or with the public money? I opened it first from my private funds.
9147. Will you state the amount you then paid in—the first sum you lodged in opening your account? I cannot say from memory.
9148. But will it not appear in your bank book? I do not know.
9149. Will you be kind enough to look in your book and see? Yes.
9150. Now give us the first entry that appears to your credit in that book? I have told you before that the whole accounts are so confused that I —
9151. I only want the first entry to your credit—what was it? The first entry is £143 Gs. 4d.
9152. On what date? July, the 3rd.
9153. 1861? Yes.
9154. Was that private money? No; public money.
9155. Then you opened that account with public money? Yes.
9156. And you had no private account when this account was opened? Yes, I had.
9157. Previous to this sum being paid in? Yes. In July I had a private account with the bank.
9158. Perhaps you will give us the date when you first made a deposit on private account from your own funds? I see by this book that it was on July 13th.
9159. What was the amount you paid in? I decline to answer that question. You have no right to go into my private account.
9160. I am sure you cannot regard this as an impertinent question. It becomes of importance to this Committee to know whether this account with the bank is a public or a private one, and only by these questions can we ascertain it? I do not think that you have any right to go into my private affairs. My private account is so mixed up with the public one that it would puzzle anyone to separate them; and I only wanted to explain this; to shew that it was quite a wrong statement that Mr. Collett had made about my having no funds to meet these cheques.
9161. I ask you again whether you had any private account at the bank when you opened this public account with the Government money? And I state that I had a private account; but you have no right to question me about the amount.
9162. Will you positively assert that on the date you mentioned, when you paid in the £143 of Government money to your public account, you had also a private account? No, I will not.
9163. Then you opened your account with the Tamworth Branch, in the first instance, with public money? Yes, that was my first account.
9164. In subsequently opening your private account, did you say to the Manager or the teller that you wished it to be kept separate from your public account? I do not recollect exactly what I told them, but I know I said that I should like to have the two accounts kept separate, and they were kept separate for a time, but the cashier made some errors in charging the cheques, and then corrections had to be made in the accounts. After this there were mistakes again made, and I saw that the two accounts were kept so confused, private cheques charged to public account, and *vice versa*, that it was almost impossible to separate the two. Then I said that I did not care about their mixing the two accounts and keeping them in one.
9165. Do you happen to know whether there was anything to the credit of your private account on the 3rd June last? I cannot tell you. I did not get my book made up.
9166. Was it ever represented to you by the Manager that there was nothing to your credit on that date? No.
9167. Do you recollect whether, as a matter of fact, there was nothing to your credit on that date? I do not recollect.
9168. Do you know, or can you say, whether you had overdrawn your account on the 3rd June, by £85 11s., or whether you had £85 11s. to your credit? I do not. I do not know whether I have ever overdrawn my account.
9169. Have you any objection to state whether, at the time of your going to Tamworth to reside, you opened a private account at the branch bank there, or whether you did not? I have told you that I did open a private account there.
9170. Did you ever receive instructions from the Roads Branch of the Works Department, requiring you to furnish the department, at stated periods, with your bank accounts, in order to shew the disbursements of public money that you had made? No, never.
9171. You never had orders to furnish a statement of your disbursements? No.
9172. Nor were ever asked to send in your bank book? No.
9173. Were you ever supplied with a bank book by the Government? No.
9174. Nor with a cheque book? No.
9175. Are you aware that there are some of your cheques given on account of the public service, that have been dishonored? I am aware of it; and I have explained that it was through my error in coming away so hastily. I have told you repeatedly that the two accounts got mixed.
9176. When did you become aware of the fact? When Mr. Hawkins came down to Sydney, he told me that Mr. Collett spoke to him about it, and wanted him to write a letter to the Sydney Office about me.
9177. You were not aware of it previously? No.
9178. Before you heard this, did you believe that there were funds enough to your credit in the bank to meet these cheques? I did.

Mr. Robert
Quodling.
10 Jan., 1862.

- Mr. Robert Quodling.
- 10 Jan., 1862.
9179. Did you take any steps to rectify the error you had fallen into? I did; and I want now to make myself sure about it, by going through the bank books with the Manager at Tamworth.
9180. Then at the time you heard of your cheques being dishonored you believed you had a balance at your credit in the bank? Yes.
9181. A sufficient balance to meet all demands that existed against it? I did.
9182. Can you say what number of cheques have been dishonored, and what amount they represent? I only know of the one given to Mr. Hawkins.
9183. What amount of money, on the average, is paid in by the Government to your account at the bank? Different sums, according to the returns I furnish of the amount I shall require for the month.
9184. Did you ever, between January, 1861, and the date of your resignation, ask the Manager of the bank to make up your account—for instance, when you found that your public and your private accounts had been jumbled up together? Yes, I asked him then.
9185. How many times have you asked him to balance your account? I do not recollect. I know that when I left Tamworth there was a balance to my credit; and since I have been down in Sydney, I sent my bank book up to the Manager, to be made up.
9186. Did you receive any money from the Government, for the payment of works constructed at Tamworth, by a person named Chapple? I do not recollect.
9187. Do you know a man named Chapple? Yes, I do.
9188. Who is he—is he a contractor? He is the man who had the Kangaroo Bridge to do.
9189. Where is that situated? Near Wallabadah.
9190. What is the extent of his contract? I cannot say from memory.
9191. Who had charge of the work? I had.
9192. Was he paid for that work? Yes, I believe so.
9193. Who paid him? I think that I drew cheques for the payment of his account.
9194. How long was he at work over this bridge? I cannot say from memory.
9195. He was some months at work at it? Yes, he was.
9196. Over six months? About five or six months.
9197. Did you have any misunderstanding with him over the work? I could not get him to carry out the works according to the specification, more particularly in regard to the painting. I reported the matter to Mr. Collett, but got no satisfaction. He told me not to get quarrelling with the contractors, but to try and keep friends with every one.
9198. Did you pay him money on account of that work? I believe I did.
9199. You believe you did—are you not sure? I cannot say from memory.
9200. Did you not keep an account of the moneys you paid him? All the accounts that ever I had are in the head Office. I send in my vouchers there, and they are the only accounts I keep. They shew what money I have paid.
9201. You believe then that you have paid him? Yes.
9202. Can you state the date when you paid him anything? No.
9203. Can you say how you paid him—whether it was by cheques? Yes, I think it was.
9204. Did you or did you not pay Chapple by cheques? I am not certain.
9205. Do you know whether Chapple has presented the cheque you gave him, and has found that there are no funds to meet it? I am not aware; but if he has, it has only been owing to the error that I have explained. But cheques are not always presented directly after they are given; on the contrary, it is hard work to get them in sometimes. I have had cheques of mine standing out at Tamworth for three and four months.
9206. Do you know whether you drew a cheque in favour of Chapple on the 17th October? I do not recollect.
9207. Had he completed his work before you resigned your situation? I believe he had.
9208. And completed it to your satisfaction? Yes, I think so.
9209. Then of course you would pay him—it is your duty, I believe, either to certify, to the proper execution of a work, where the Government pay the contractor, or to draw a cheque for the amounts where the work is in your hands? Yes, I think so.
9210. This was a work that you yourself allotted to Chapple? Yes.
9211. Then of course you yourself would pay him by cheque? Yes.
9212. And I presume that you did pay him by cheque? I dare say I did.
9213. Was that cheque paid on presentation? I do not know. If it has not been, it has been through this error in my account that I complain of.
9214. Do you know what was the amount of this cheque you gave to Chapple? I do not know.
9215. Was it for £17 10s.? It might be.
9216. But you do not know? No.
9217. Do you not keep any account of money or cheques that you pay away on Government account? No; the voucher is my account. I refer you to this voucher, which I produce, for money paid for work done from the 1st to 30th September.
9218. This amount was paid by cheque? Yes.
9219. And was the cheque refused payment? That I cannot say, but if it was, it has been from this error in the account.
9220. You are not aware that it has not been paid? No.
9221. Nor whether it has been paid? No, I am not.
9222. I hold in my hand a letter, from Messrs. D. Cohen and Co., in which they state that they hold several cheques of yours that have been dishonored, and request the Government to take steps for meeting them? If this has been the case it has been only through this error that it has occurred.
9223. Did a man named Burke do any work on account of the public service, under your supervision?

- supervision? Yes, I think so. But any of these things will all be settled; it is a matter that will soon be rectified when I get up there to go through the accounts.
9224. Did a man named Welsh do any work on account of the public service? Yes.
9225. Can you give us any idea of the amount involved in these cheques of yours, that have been dishonored? No, I cannot.
9226. This is your voucher for a payment made to the 30th September? Yes.
9227. Has this amount been paid? I cannot say. If it has not it is only through my accounts being mixed up so; and as I tell you these will all be paid when I have settled the account.
9228. I have a statement here of cheques amounting to £41 13s 4d., which you have given to different persons, and which have been dishonored—is that statement correct? Yes, it may be.
9229. Did you draw a cheque for Mr. Hannington's salary before you came away? I did.
9230. Has he received money for that cheque? I believe so.
9231. Do you know to the contrary? No. Perhaps his cheque is dishonored like the others.
9232. Do you not know that it is? No.
9233. Have you seen him lately? Yes; I met him in town the other day.
9234. Did he tell you whether his cheque had been paid or not? No; he never spoke to me about it.
9235. Has he not told you that the cheque you gave him in payment for his salary had been dishonored? No, he has not.
9236. And you are not aware of the fact that it has been dishonored, neither from him nor from anyone else? I had a conversation with Mr. Brodie in reference to the cheques of mine that had not been paid. I explained how my accounts had got confused, and that I intended to go through them and set these cheques right. In fact, I intended to have gone there a week ago, and should have gone, only for attending on this Committee. But the error is one that is easily set to rights.
9237. *By Mr. Lucas:* When you draw cheques for public works of which you have the payments, do you not name in the body of the cheque what it is paid for? No.
9238. Then you draw the cheque — ? I never had any official direction as to the mode in which I should draw my cheques.
9239. Supposing you give a cheque on account of a contract, or for task-work, or in payment of wages—would you not state in the body of the cheque whether it was paid for the one or the other? —
9240. Then you merely say, "Pay bearer so much, naming the amount, on my account?" Yes; that is all.
9241. Without mentioning what the cheque is given for? Exactly.
9242. The whole of the sums that have been entrusted to you to expend have been deposited by the Government to your account with the Tamworth Branch Bank? Yes.
9243. Then of course all these amounts will appear in your bank book? Yes, they do.
9244. And the same way with the cheques—they all appear in the bank book? Yes.
9245. Then could you not, by going over your bank book, see what amount of cheques you have drawn on account of the public service, and how much you have drawn for private matters? Yes; that is what I wish to do; and that is what I am so anxious to go up to Tamworth for.
9246. Have you drawn any cheques upon the Tamworth Bank since January, 1861? Yes; a great many.
9247. And you have not had your book balanced for twelve months? No.
9248. And now you hear that your account has been overdrawn? Yes; but it has only been by the mixing of the two accounts together.
9249. Who told you that your account was overdrawn? Mr. Hawkins.
9250. When you have been to Tamworth, and have gone through your accounts, will you be able then to tell exactly what amount you have paid on account of the public service? Yes.
9251. You will be able to recognize those cheques which you have given for public works on Government account? Yes.
9252. And do you propose to go to Tamworth for that purpose very shortly? Yes; I intend to start this evening by the steamer.
9253. *By Mr. Dalgleish:* In what way do you receive money from the head Office in Sydney? It is paid in to my credit at the bank.
9254. Then the Commissioner of Roads is aware that you have a bank account? Yes, he is.
9255. When payments become due to you, amounts are placed to your credit in the bank often before you receive any communication informing you that this has been done? No; the communication comes to me at the same time as the deposit, advising me that so much has been paid in for such a purpose.
9256. But supposing that you had to go to Sydney, and that whilst you were there a sum was forwarded up to Tamworth for you, would not that be placed to your credit without your knowledge? It would in that way; because if I was in Sydney I should not receive the letter advising me of the credit.
9257. But though the Director in Tamworth might be notified that a sum had been placed to your credit, yet, if you were in Sydney, the money would still be placed to your credit without your knowledge? Yes.
9258. And you would know nothing about it until you returned to Tamworth? No.
9259. The Government were aware that you were in the habit of paying these public accounts by your own cheques, and on your own signature? Yes, they must have known it.

- Mr. Robert Quodling.
- 10 Jan., 1862.
9260. And they remitted you money for the payment of all such works as come under the general denomination of task-work? Yes.
9261. In cases where there was a contractor, he would be communicated with by the Government? Yes.
9262. You would inspect and certify to the work, and the Government would pay the money direct to the contractor? Yes.
9263. In the case of Mr. Martindale, for instance, would money be paid in by the Government to his credit or to your's? To his.
9264. But for all works that were not held direct from the Government under contract, the money for payment was remitted to you? Yes.
9265. Have you two accounts at the bank in Tamworth? I had two at the time I first went up there, but they got mixed up together after a bit, and then the Manager made them up in the same book.
9266. Did the Manager understand, in the first instance, that you desired to have two accounts, a public and a private account? Yes; I told him that I wished to keep my public and my private account separate when I commenced banking there.
9267. Had you any cypher upon your public cheques, by which you might know them? Yes; but I found that errors were always being made by the teller, and saw that it was impossible to keep the two accounts separate.
9268. Then you agreed, in the first instance, with the officers of the bank, upon a distinctive mark by which all public cheques could be recognized, but, in the course of business, you found that this mark was not attended to? Yes.
9269. When were your accounts with the Government audited? I had no accounts with the Government.
9270. I mean your expenditure on account of small contracts or task-work, that you had to pay for? I do not know what the rule is, but I think they are sent in quarterly to the Audit Office.
9271. Did you not send in periodical accounts to be audited? No, I had nothing to do with that; the Sydney Office sent in the accounts to the Audit Office.
9272. Then these amounts, when once paid into your credit at the bank, are treated, as far as the Government are concerned, exactly as if they were your own private property? No; I am responsible to the Government for the money, and have to account to them.
9273. But the parties to whom the money is due have only you to look to for payment? Yes.
9274. And there is no audit of these large sums of money that are thus entrusted to you to disburse? I do not understand you about the audit; I have nothing to do with that.
9275. I mean this: that money to the amount of £1,500 a-year is entrusted to you for the payment of task-work, and that no account of it is ever rendered and checked? Yes, there is. All the vouchers are sent in, and these are all looked over in the Sydney Office.
9276. But these vouchers are nothing, as they may be all made a matter of arrangement? I do not understand.
9277. They may be made a matter of arrangement between the road overseer and the party signing? I do not see how they are to do so.
9278. Is there anything to guard against this collusion between the road officer and the party signing the voucher? Yes, there is this check, that wherever overseers are placed they make out and send in their returns to the Superintendent of the district, who checks them, and forwards them on to the Sydney Office, where they are checked again; then the money is forwarded to the Superintendent.
9279. Do the overseers have to report upon the works required? Yes; and they also send in the returns for the wages of the maintenance men. The maintenance men are all under the overseers.
9280. *By Mr. Markham:* The wages of the maintenance men are included in the pay abstract? Yes.
9281. This abstract is sent down to Sydney, and when it is passed the amount is paid in to your credit? Yes.
9282. And you draw cheques against this amount for every man's salary? Yes.
9283. Do you keep the docketts of your cheque book? Yes.
9284. Do you get so much paid in to your credit as is believed will be sufficient to meet the salaries, or have you to wait until the exact amount shewn on the abstract is paid in to your credit? It is always the exact amount of the abstract that is sent to me.
9285. And that exact amount is placed to your credit? Yes.
9286. Being a particular amount for a particular purpose? Yes.
9287. *By the Chairman:* Are you aware that Mr. Collett has stated here that he intends to bring a charge of embezzlement against you? Yes, I heard him state that he had done so.
9288. Has the fact that such a charge was intended been communicated to you? Only what I have heard stated here.
9289. Are you prepared to undergo an examination on that point? Yes; I am prepared to undergo any examination. The Government were told that an explanation of my account was necessary, but I have never been asked for any, and that is my reason for now coming before this Committee, to shew how my two accounts have got mixed up together and led to this confusion.
9290. *By Mr. Arnold:* How long have you had an account at the bank in Tamworth? The first payment to my credit was made in July.
9291. That was immediately after you were appointed? Yes.
9292. You were appointed in July? Yes.
9293. Has your account been always kept at the one bank? Yes, since I have been there.
9294. Since you have been in the Northern District? Yes. 9295.

9295. You have had no account since at any other bank? No, I believe not.
9296. Neither with your private means nor with the public money? No; but I had an account at the Commercial Bank in Sydney.
9297. Since you have been Superintendent on the Northern Road? Yes.
9298. Was it a private or a public account? It was a private account; but only a few pounds balance of an old account.
9299. Not an account current? No.
9300. Have you had an account current at any other bank? No, not on Government account.
9301. Nor on private account? I do not recollect.
9302. Does that account at the Commercial Bank now continue open? No.
9303. Can you remember whether you have made any payments to that account, or drawn anything from it, since the interval occurring between your appointment to the Northern Road and your resignation of office? I do not recollect.
9304. You do not remember whether you kept it open? I do not.
9305. With regard to the Tamworth Branch of the Bank of New South Wales, how many accounts had you at that bank? Two at first.
9306. One for public and one for private moneys? Yes.
9307. In what way did you distinguish between the cheques drawn on the different accounts? I marked them in several ways. I used a letter with a number with some of them.
9308. After your signature? No. In numbering the cheques.
9309. And that was understood between you and the officer of the bank as a distinctive mark? Yes.
9310. Then do I understand you to say that whilst this private arrangement was in force, the cheques drawn up on the two accounts became mixed? Yes.
9311. They became mixed up together and without any instructions from you? Certainly, without any instructions from me.
9312. You are sure you never told the officers of the bank to keep the two accounts together? When I went to the bank and found that the accounts had got so confused, I told him that I did not care about their keeping it in this way, so that I had my vouchers all right for the money I had to pay for the Government.
9313. Were cheques marked private charged to your public account? I believe that was done; and I believe public cheques were charged to my private account. There was so much confusion by the cheques being charged to the wrong accounts that I found it was no use trying to keep them separate; and I did not care about their being mixed, so long as I had my vouchers.
9314. Do I understand you then, that after the cheques became confused in this way, you had only one account at the bank? That is all.
9315. One account for public and private money? Yes.
9316. When did the two accounts first begin to get confused? I do not recollect the date.
9317. Could you not tell from your pass book? I did not get it made up until just before I was coming away. When I was coming away I went to the Manager and asked him to make up my account. I did not have it made up from the January previous, I think it was.
9318. January of last year? Yes.
9319. 1861? Yes.
9320. Is that in accordance with the Government regulations? I had no instructions from the Government with reference to my banking account.
9321. Had you any public banking account before you went to the North? Yes.
9322. For public moneys entrusted to you to disburse? Yes.
9323. You were on the Western Road, I believe, before you were appointed to the North? Yes.
9324. When did you first begin to have a banking account with the public money? I cannot tell you the date.
9325. Did you ever receive instructions that you were not to have a private account at the same bank in which your public account was kept? No, I never received any such instructions.
9326. Are you not aware that there is such a regulation in existence? I do not know of any such regulation.
9327. Have you never heard of it, either in the Western District or in the Northern District? No.
9328. Was it the case, when you were on the Western Road, that your private account was kept at the same bank as your public account? I will not say positively, but I think it was.
9329. Is it the case that all the money paid in to your public account by the Office in Sydney, consists of money applied for by you, in specific sums in respect to specific works, and for a specific purpose? Yes; returns are sent in by me for the amounts required, and then the Sydney Office forwards me the money.
9330. The returns are for sums required for particular payments set forth in them? Yes.
9331. And these sums are forwarded to you solely for the purpose of paying them to the persons to whom they are due? Yes.
9332. Then it is your duty to apply them to the particular purpose for which you apply for them? It is.
9333. And to no other purpose? No.
9334. Does it ever happen that the amount payable by you is less than the amount applied for by you and paid in to your credit by the Sydney Office; for instance, taking the case of the maintenance men, does it ever happen that the amount due to them is less than the sum you have applied for and that has been paid in to your credit? Yes; that sometimes happens.
9335. Then suppose such a case to arise, what would it be your duty to do with the balance between the amount paid in to your credit and that which you have actually paid—would it

Mr. Robert
Quodling.

10 Jan., 1862.

Mr. Robert
Quodling.

10 Jan., 1862.

it be your duty to return it to Sydney, or would you continue it on to your account? I would return it at once.

9336. How would it be seen whether there was this balance? The voucher would show it at once; it is only given for the amount actually paid.

9337. Then would you leave this balance standing to your account, or would you consider it to be your duty to repay it at once to the head Office? I think it would be my duty to repay it at once.

9338. Has such a thing as this ever occurred to you? Yes, I recollect some small item of a mistake occurring.

9339. And what did you do in that case? I recollect remitting down the balance in postage stamps. It was only a very small difference.

9340. That you consider to be your duty, and that you believe has been your practice? Yes.

9341. Do you ever draw cheques for money due on the public account before the amount has been remitted to you by the Office? Yes, I have done so.

9342. On what funds do you draw? It has happened in this way, that when I have been at the far end of the road, and when I have known that the vouchers would be done in Sydney, I have drawn cheques in payment of accounts, knowing that the money would be paid in to meet them before the cheques reached the bank.

9343. You knew when you drew the cheque that the money would be, if it had not then been, paid in to your credit? Yes.

9344. And have you ever been disappointed in this expectation? No, I think not.

9345. The amounts have always been paid in in time to meet your cheques? Yes, they have.

9346. Have any cheques drawn by you on public account been dishonored? I have been told that there are several that have been.

9347. Can you account for the way in which this has happened? I account for it in this way,—that my public and my private accounts have got mixed together, and through that, cheques drawn on my private account have been charged to my public account.

9348. Then, in point of fact, the two accounts, if they were kept separate, would stand in this way—the cheques drawn on the public account ought to exactly meet the amount paid in by the Office to your credit, whilst your private account would be overdrawn? Yes.

9349. The public cheques ought to be met whatever became of private ones? Yes.

9350. Then the dishonor of your cheques has been caused by the error made in keeping your banking accounts? Yes, from the two accounts being confused.

9351. Are you quite sure that the mode of distinguishing between your private and your public cheques has always been kept up by you? Well, I may have omitted to mark them sometimes. I cannot tell.

9352. Were they such marks as would permit of any persons besides those who knew the arrangement distinguishing your private from your public cheques? No; they were not.

9353. Were they marked "On the Public Service"? No.

9354. Or "Northern Road"? Sometimes I marked in the margin the words "Northern Road."

9355. But not always? No, not always.

9356. As far as the Office in Sydney is concerned, have they received vouchers and receipts, from persons to whom money was payable, for all the money payable through you in your district? I believe they have.

9357. For all the amounts payable in your district the Sydney Office holds receipts and vouchers? Yes; I do not know of any that have been omitted.

9358. You are not able to state, from recollection, the particulars of each cheque you have drawn? No, there are so many.

9359. I mean whether you are able to say how you marked any particular cheque, whether on your public or your private account? I could not say how I have marked any particular cheque; but I know that I wrote on some of them "The Northern Road," and others I marked with A, or a letter and number.

9360. When did you first find out that this error had been made? I found it out when I saw Mr. Bolton.

9361. How was it? A reference was made to the mistake in charging the cheques, and then he said it would be better to put the cheques all down together to one account. I told him that he could put them all down on one sheet if he liked, and that I did not care so that I had my vouchers all right for the Government.

9362. Then you did know before you left the Government service that there was some confusion in your accounts? Yes, I knew that they had got mixed.

9363. How long before your resignation did you know it? Well, I cannot say.

9364. Was it some months before? I cannot tell from memory.

9365. Was it half a year—however, were you aware that there was anything irregular in your mode of keeping your accounts? I was not aware that there was anything irregular in it. I see now that it was not a right thing to do, because this error would never have occurred if the accounts had been kept separate.

9366. But you say that you see in this mode of keeping accounts nothing inconsistent with the rule laid down by the Sydney Office? I do not know of any rule laid down by the Office. I had nothing to guide me as to the way I was to keep my accounts; and I know that there are plenty of Superintendents who keep their accounts in the same way.

9367. It is a general practice then to keep the private and the public accounts together? Yes; there may be some who have two accounts, but the most of them only have the one account.

9368. Where there other officers in your district besides yourself entrusted with the disbursement of public moneys? No, not in my district.

9369.

9369. But you say that it is the practice to have only one account? I believe it is. I know that it is the practice amongst surveyors to do it, but it was not my intention to do it. I opened two accounts, and if they had been kept correctly these errors would not have occurred.
9370. Then I understand you to say that you had only the one account at the bank, and that that was only made up once a year? I had it all made up when I was leaving, by the cashier. I was on very intimate terms with him, and he knows all about my cheques.
9371. Who is the cashier? Mr. Bolton.
9372. And who is the Manager? Mr. Roberts.
9373. Then, for some time before you gave up your office as Superintendent of the Northern Road, you had only one account at the bank? I consider that I had only the one, for the two were so confused and mixed together that I never thought of separating them; and as I had my vouchers to guide me as to what I had paid, I considered that it made no difference.
9374. Have you had your pass book made up? Yes, I have.
9375. Does that only shew one account? Only the one.
9376. Have you drawn any cheques since you received that pass book? I think I have.
9377. What was the state of your accounts when you received back your pass book? There is a balance in my favour.
9378. Do you remember how much? The balance here given is not correct; and I wrote up to day to see what was the exact balance in my favour, in order that these cheques might be met. I think there is sufficient to my credit in the bank now to pay them all.
9379. What was the date to which your pass book had been made up when you last received it? Up to January, I think.
9380. January of the present year? Yes.
9381. Have you that book here? I have.
9382. Have you any objection to my seeing it? I have no objection to your seeing it, so long as it is not handed in. I do not want all my private affairs dragged before the public.
9383. It must be a matter of very little importance whether you let me see it or no, as the bank books will give us the duplicate of your book? Yes; but there is another thing, which is that this pass book is not made up to the present date.
9384. It is made up, however, to the time of your resignation? Yes, but I consider that it is not correct, and I want to go through it with the Manager before I hand it in to the Government.
9385. You intend to lay your bank book before the proper officers of the department? Yes.
9386. And before you do this you intend to go up and get it correctly made up? Yes; I intend to leave this evening.
9387. And when will you be back—as early as possible? Yes; as soon as I have settled the account.
9388. And on your return you will be willing to continue your examination before this Committee? Yes, that is what I want. I should like also to hand in certain documents that I think the Committee ought to see.
9389. Have you compared your bank book with your cheque butts? No, I have not got them here, and that is mainly what I want to get up to Tamworth for.
9390. Can you say how many cheques have been drawn by you on public account that have not been presented? There have been some mentioned here to-day; I do not know of and others.
9391. How many have you heard of? Three or four; but their not being paid has only been caused by their irregularity.
9392. Are you prepared to say that if all the cheques drawn by you on public account, and those only, had been charged to your public account, as had been arranged by you in the first instance, that there would have been none of them dishonored? I do not think that there would have been any of them dishonored. It is as much owing to my own carelessness as anything else that this has occurred, as in writing out the cheques I may have omitted to mark them.
9393. I think I understood you to say that, as far as the regulations were concerned, you never knew there was a rule against mixing up private and public accounts? I was never directed to keep my private account and my public account separate.
9394. And you never knew that there was an instruction to that effect? No.
9395. Were you ever called upon by the Government to send in your pass book to be examined? No.
9396. Never? No.
9397. Neither whilst you were on the Western or on the Northern Road? No.
9398. Were you not aware that there was an official instruction to all the officers of the Roads Branch, that they should periodically send in their pass books to be examined in the Office?—I had no such instructions.
9399. Were you not aware that such instructions had been given? No.
9400. Is it the case in regard to each sum of money paid by the Government to your public account, for a definite public purpose, that you have drawn that money, and have applied it exactly to that particular purpose, throughout the whole of your connection with the Road Department? Yes, I believe it is.
9401. You think that has been the case? Yes. This would not have occurred had not these accounts been kept together, and but for my having the two accounts at the same bank.
9402. But the vouchers and receipts in the department will shew that this has been the case—that is, that all the money drawn by you has been applied to the purposes for which it has been drawn?—Yes, they will do so.

Mr. Robert
Quodling.
10 Jan., 1862.

- Mr. Robert Quodling.
- 10 Jan., 1862.
9403. The vouchers are all witnessed, and receipts given for the money? No; the vouchers are signed by the parties who receive the money.
9404. Then even though your cheques may have been dishonored, yet the Government hold the receipts of those persons to whom your cheques have been given? Yes.
9405. In every case? Yes.
9406. Take the case of Hannington, for instance—is it so in his case? Yes.
9407. You gave him a cheque for his month's salary? I did.
9408. For what month was it the payment? It was for some month in last year.
9409. You drew the salary from the Government? Yes; I made out the return, and sent it in, and then the money was forwarded to me.
9410. Did you do in Hannington's case what you had done in every other case whilst you were in office? I did.
9411. And have the Government Mr. Hannington's receipt for that particular month's salary? I believe so.
9412. Did you send in the voucher? No, I did not; it was never returned to me. I sent it up to Mr. Hannington to sign, and enclosed him my cheque; but I do not know whether he received it, as the voucher was not returned to me, and the receipt of my cheque was not acknowledged.
9413. Then you cannot say whether Mr. Hannington has given a receipt for his month's salary, for which you gave him the cheque that was dishonored? I do not. I never saw the voucher after I sent it away.
9414. Is not this rather inconsistent with your former statement, that the Government had vouchers for all the money you had received from them to disburse? This is a different case.
9415. In what way? When I came to Sydney, on leaving Tamworth, I had no voucher with me on which to make up my returns for the month, so I got one from the head Office, and made it out, and enclosed it with my cheque to Mr. Hannington. I expect he received it, but it was never returned to me.
9416. Then you do not actually know whether it has really been received? No. The voucher ought to have come back to me, as I was responsible for the amount; but it was not sent, probably because I had ceased to be in the Government service, and I cannot say if he has been paid or not.
9417. *By Mr. Hoskins*: Is it customary for officers under you to sign vouchers acknowledging the receipt of their salary? It is.
9418. Then there was a departure from that custom in this case? Yes.
9419. What became of the voucher? I cannot say, but it was not returned to me; I suppose because I was no longer in the Government service.
9420. What was the date of the cheque? That I do not recollect. I know that it was since I came down from Sydney, and that having no voucher with me, I went to the Office and got one there.
9421. *By Mr. Arnold*: This was after you came down from Tamworth? Yes.
9422. And when you were no longer in the Government service? Yes.
9423. You got a voucher from the head Office, made it out, and enclosed it with a cheque to Mr. Hannington? Yes.
9424. And you have never seen anything of it since? No; being out of the service I had no longer anything to do with Mr. Hannington.
9425. *By Mr. Hoskins*: Do you not consider yourself responsible to the Government for furnishing a correct account to them of the money placed at your disposal for disbursement? The Government never asked me for any account.
9426. But do you not consider yourself so far responsible as to give a correct account of how you dispose of the money they place at your credit? I was not asked for any account, and I was not going to furnish what I was not asked for.
9427. *By Mr. Arnold*: But there still remains this inconsistency, that in one of your former answers you say that the Government held vouchers for all the public money that has been paid in by them to your public account; whereas now you say that this amount of Mr. Hannington's was not paid before the date of your resignation, and that you do not know whether a voucher for it has been received? Yes, but this is a different case from any other. I sent a voucher from here with my cheque, and it ought to have come back to me, as I was responsible. I paid the money by my cheque, and I ought to have had the voucher to send in to the Government, to shew that I had done so.
9428. Then your doubt is as to whether or not it has been sent to your successor—to the gentleman who succeeded to your office? I do not know anything about where it has been sent.
9429. Ought it to have been sent to you, or to your successor? To me, because I was responsible for the amount to the Government.
9430. *By Mr. Hoskins*: When did you last receive a remittance of money from the Government, for the payment of salaries and small contractors, previous to your resignation? I cannot say the date exactly.
9431. How was the information conveyed to you when money was paid to your credit? I got a slip from the Office informing me that such an amount had been paid to my credit.
9432. They always informed you when money was paid in to your credit? Not at all times. Sometimes money has been paid in, and I have never been told a word about it.
9433. Do you consider it to be your duty to the Government to render them an exact account of all the money entrusted to you to disburse? I do not consider it to be my duty to do anything I am not asked for.
9434. How do you account then for all the money they pay in to your credit? They have receipts and vouchers for every penny they lodge to my account.

9435. You say you do not remember when the last amount was paid in to your credit? No. Mr. Robert Quodling.
9436. A portion of this, however, was for the salary of Mr. Hannington? Yes.
9437. Have you accounted for that? I have said that I could not do so, because the voucher was not returned to me. 10 Jan., 1862.
9438. Do you know whether he has received the money? I do not know; I have never seen any receipt from him for it.
9439. Do you consider yourself responsible to the Government for all the money remitted to you? I consider myself responsible so far that I have to account to them for it.
9440. Have you accounted to them in this instance? They have never asked me to do so. I suppose by that, that the cheque has been received, and that they hold the voucher.
9441. Have you forwarded receipts or vouchers to the Government for the whole amount? No.
9442. Not sent in any account of the manner in which you have disbursed the last amount paid in to your credit? No. I have sent in vouchers for the whole amount, with the exception of this salary of Mr. Hannington's: I sent it up to him with the money, and have not seen it since.
9443. Have you sent in vouchers for all the money you last received from the Government? I do not think I have.
9444. Do you know if you have paid away all that money to the persons to whom it was payable? I know that I have paid away all the amount last paid in to my credit, with the exception of this one item of Hannington's salary.
9445. How do you know that you have paid it away? I know that I have given cheques for it.
9446. Did not the Government require you to give them, periodically, a statement of your bank account, in order that they might see what money you paid away, and how you paid it? I have never been asked for anything of the kind.
9447. Omitting Hannington's salary, have you sufficient vouchers remitted to the head Office to prove that you have paid away all the money last paid in to your account—less Hannington's salary? I believe I have. If I have not, I —
9448. Did you draw a cheque in favour of Mr. Hawkins? Yes.
9449. On what date? I do not recollect the day.
9450. Was it at the same date as the cheque given to Mr. Hannington? Yes, it was drawn at the same time, and his name is on the same voucher as Hannington's.
9451. Do you know if he has received the money? I do not.
9452. Nor yet whether he has signed the voucher? No.
9453. Who has got the voucher? I do not know, but I think it is in the Office.
9454. Have you inquired to ascertain whether or not it is in the Office? No, I have not; I have nothing to do with the Office now.
9455. And you say that you cannot tell the date when you signed these cheques in favour of Hawkins and Hannington, for salaries due to them previous to your resignation? No, I cannot tell.
9456. You say you have papers at Tamworth that you are anxious to place before the Committee? Yes, I have several that I wish the Committee to see.
9457. What are they—public documents? Yes.
9458. Of what character? Most of them are letters; letters that I have received from the Office in Sydney, and letters from Mr. Hannington.
9459. What is the purport of them? That I cannot explain; there are so many of them, and all about various matters.
9460. Are they letters which, in your opinion, bear upon the subject of this inquiry? I think so; I think they are most material to the inquiry.
9461. And you wish to be examined again in reference to them? Yes, I should like to be so.
9462. I would now wish to ask you once more, are you not provided with a bank book or pass book by the Government? No, I never was provided with anything of the kind.

W. R. Collett, Esq., called in and further examined:—

9463. *By Mr. Hoskins:* Did you allot an extension of the Liverpool Range contract to Mr. W. R. Collett Martindale? I allot work to nobody. When extra work is required a recommendation comes to me from the Superintendent of the district in which it is situated, and I act on that recommendation. Personally I give no work. In the present instance I rather think that you must refer to the Doughboy Diversion. 10 Jan., 1862.
9464. No, I refer to the Liverpool Range contract; that was extended, was it not? Yes, but it was before my time; it was done by Mr. Bennett, at an additional expense of £730; I had nothing at all to do with that.
9465. Was there an arrangement made that the contractor should keep the road he had made in repair for a certain time after it was opened? Yes, an arrangement of that kind was made by Mr. Brown, the Superintendent of that district.
9466. Was that arrangement entered into subsequent to your being appointed Commissioner of Main Roads? The road was not opened until April, and I was appointed Commissioner on the 1st January preceding, so that the arrangement must have been made after my appointment; but the way it occurred was this:—In the original specification there was a clause providing that the contract should be maintained for one month subsequent to completion. When that month had expired it was found necessary still to maintain the contract, and it then became a question whether this could be done cheaper by putting on our own labour,

W. R. Collett,
Esq.
10 Jan., 1862.

labour, or by letting the work out to contract. Mr. Brown consulted with me on the subject, and after we had well considered it in all ways, it was decided that it would be cheaper to let it out to the contractor to maintain and keep in order during the remainder of the year.

9467. What was the nature of the arrangement made with the contractor, and what was the amount involved in the arrangement? The arrangement involved an outlay of £27 6s. per month.

9468. Was the number of men to be kept employed specified in the arrangement? I think not. The specification stated what work was to be done, such as that all ruts were to be filled up as they were made, with new metal. The fact is, that this was an experiment—it was trying the experiment of maintaining the road by contract after it had been made—a thing that had never before been done. The arrangement was rather on the principle of task-work, such as that all ruts were to be filled up with new metal, all drains to be backed up, but particularly it was stipulated that the proper convexity of the road was to be maintained as the traffic went over it; and it should be seen that all the bridges were in proper order. But a question arose that we expected would arise, although no provision had been made for it in the contract, and that was with regard to the land slips. Very large masses of earth might slip down from the cuttings and fall upon the road, and these had to be removed. It was a difficult question to decide whether the contractor, when he undertook to maintain the road, undertook to remove the earth that might come down with these slips.

9469. Are not the banks consolidated before the work is given up by the contractor? Yes, they are consolidated in so far as mere ordinary weather is concerned; but with a heavy thunderstorm large masses of earth are dislodged from the cuttings, and many tons of earth come down upon the roadway. The question was, then, whether the removal of these slips was to be included in the contract. I decided that, for that time, the contractor should clear the road, but that in future such work should be matter of arrangement. No doubt it was very hard on the contractor to make him do work of this heavy character that he had never anticipated, but it will only make them more careful in future to see what they contract to do. I propose to insert in all future contracts that the clearing away of land slips shall be paid for as task-work; if it is included in the contracts we shall have to pay more money for our works, for with this risk tenders are sure to be sent in higher than without it.

9470. The arrangement was made, in the first instance, for a month? That arrangement was in the specification of the original contract; afterwards the maintaining of the road was let out for the remainder of the year.

9471. You concurred in that arrangement? Yes, as being a saving over employing our own labour.

9472. What was the length of road? A mile and 77 chains.

9473. And he received £27 a month for maintaining the road? Yes; £27 some odd shillings.

9474. Was that arrangement complied with in every respect by the contractor? Yes, in every instance. The road was well maintained throughout, except only at Mr. Loder's big hole. That particular spot is in fact a most impracticable piece of ground, that no overseer has ever yet been able to master; we have tried every possible scheme with it, but have not yet been able to overcome; tons of gravel have been thrown upon it, but all to no purpose, for the first rain makes it as bad as ever. I imagine myself that there must be a spring in that particular spot, and that this causes the mischief. However, it has never yet been properly made, although it has had constant and unremitting attention. I have suggested that the whole of the present roadway at this spot should be taken up, and that a foundation should be made of solid blocks of stone, and this experiment is about to be tried. I hope it will answer, because we have been at a very great expense over this little piece of road, and the mischief is, that whenever this piece gives way, the traffic has to be turned off the road, and this causes annoyance.

9475. How many men per month have been employed under this arrangement, during the time it has been in existence? The numbers have varied, two being the minimum; but as many as six have been employed at times. To my knowledge six men have been repeatedly employed on the work.

9476. Was it ever represented to you that only one man was being employed on the work? No; no such representation was ever made to me, although I know that it has been given in evidence; but there was no complaint ever made to me, either by overseers or Superintendents, that there were not enough men at work. It was always understood that the minimum number of men to be employed was to be two, though more were to be put on if they were required.

9477. Do you know whether a suitable amount of labour to represent the price given for the contract was really employed? Of labour and material; you must not forget the material. There was not only to be a suitable amount of labour, but there was also to be an amount of material used of not less than 200 cubic yards of broken metal; that forms no inconsiderable item in the contract.

9478. And was that complied with? Yes, and more than complied with.

9479. That quantity of metal was used? Yes, more than that quantity; he had a very wet summer to contend with, or a wet winter, rather.

9480. Mr. Miller had a contract from you? What Mr. Miller?

9481. He who lately went to England? Yes; he had a contract when he resided in the Colony.

9482. He has left the Colony now? Yes; he has been out of the Colony more than a year.

9483. Did he obtain a contract to metal a piece of road, for a distance of about a mile and a half, between Harpur's Gate and Lochinvar? Not that I am aware of.

9484. Did he get that contract from you as Superintendent? He could not get it from me as Superintendent, as I had no power to give contracts. W. R. Collett, Esq.
9485. Had he a contract? I am not aware of anything of the kind having been done there. 10 Jan., 1862.
9486. Did he, to your knowledge, have one there? No, never.
9487. Has he ever, to your knowledge, had men employed there? No, never.
9488. Not since you have had charge of the road? Not during the last eight years.
9489. Did he ever have a contract under the Works Department, at Harpur's Hill? No.
9490. Nor at a place called the Nailer's? That is a very different place.
9491. It is about two miles from Harpur's Hill? Yes.
9492. Did he have a contract there? I do not recollect a contract being taken at the Nailer's.
9493. Did he ever have a contract between Harpur's Hill and the Nailer's? Yes.
9494. Will you explain the nature of that contract? He had to make and form the road, and gravel the roadway.
9495. What was the distance? About a mile.
9496. And what amount of money was involved in that contract? It is some time ago, and I almost forget; but I am inclined to think that the gravel was to be 3s. 6d. per ton.
9497. Was it not a contract for a lump sum? No, certainly not a lump sum.
9498. It was taken on a schedule of prices? On measurement; the forming was to be 2s., and there was a very good deal of forming to be done. I consider it to have been a very cheap work.
9499. Was this allotted by you on task-work? No, it was taken by public tender; I had nothing at all to do with it.
9500. Did you approve of the gravel that was used on this piece of road? No, I did not; but it was the best that was to be got in that neighbourhood.
9501. Then you did not approve of it? I did not altogether approve of it, but it was the best to be had; I passed it.
9502. Was that gravel subsequently removed? No, it is there still; at all events some of it—what is left of it.
9503. Was there any additional gravel laid down on it, or any extra work performed on it? We have since pitched some of it.
9504. Why did you condemn it? I did not condemn it; I passed it.
9505. But you say you did not approve of it? I did not approve of it for general use, but it was the best we could get there.
9506. Could you not have obtained stone? Yes, sandstone.
9507. Not sandstone, but metal—blue road metal? There is no blue road metal at that place, and I do not approve of the indurated clay, which looks like blue metal, and is found in that neighbourhood; at all events, not at the price they would have required for supplying it.
9508. But could you not have got good metal or stone to have laid on the road, instead of this gravel that you say you did not approve of? Yes, we could have got it if we had only had the money to pay for it. It was a question of money with us, and the amount voted for the road would not allow of our paying 6s. 6d. or 7s. a yard for metal. It has always been a drawback to us having to do so much work with so little money. If the Parliament would only vote us what we require, we would soon have good roads.
9509. Was this piece of road impassable soon after the contractor had completed his work on it? No; it has never been impassable since it has been made. It runs through a sandy hollow, and is heavy with sand, but by no means impassable. It has always been a good piece of road.
9510. *By Mr. Markham*: Was there, in your office, when you received your appointment as Commissioner of Main Roads, a document dated 8th August, 1860—an official letter? Yes, there was.
9511. From Mr. Bennett to Mr. Bayley? Yes.
9512. That letter, I believe, has been already put in as evidence? Yes.
9513. Is this, which I now hold in my hand, a copy of that letter? Yes, it is a copy I had made of it.
9514. Does the first paragraph of that letter go to prove that Mr. Bennett exercised the power of making alterations in contracts? Yes.
9515. Does the second paragraph go to prove that Mr. Bennett authorized Mr. Bayley to obtain the performance of certain works without public tender? It does.
9516. Does the concluding portion prove that money was paid without a voucher, on the promise that an arrangement would be subsequently made with the Chief Clerk? Yes.
9517. Will you read that last paragraph? I will. (*Witness reads.*)
9518. What do you gather from that? I should imagine from this, that money would be paid without the voucher of the officer superintending the works.
9519. The charges made against you before this Committee have been, that you have made alterations in contracts; that you have authorized the letting of works without tender; and that you have authorized the payment of money without vouchers? Yes.
9520. And this letter shews that in these cases you have the precedent of Mr. Bennett for what you have done? Yes; it shews that in all I have done I am only following in the footsteps of my predecessor.
9521. Have you any other documents that you consider essential to your exculpation, that you would wish to hand in and have read? Before this inquiry closes, as my professional competency has been called in question, I would wish to hand in one or two official documents bearing on that point; and perhaps I may take the opportunity of doing so now. I hand in a letter from the Surveyor General, Colonel Barney, dated December 6, 1855, in which he authorizes me to lay out the Northern line of Railway, and to furnish plans and sections

- W. R. Collett, Esq.
10 Jan., 1862.
- sections of the line. I produce this letter, as it has reference to my professional competency as an engineer. (*Letter read. Vide Appendix A.*) The next is a letter to me from the Surveyor General, dated 4th April, 1856, expressing His Excellency the Governor's thanks to me for the trouble I had taken in the matter. (*Letter read. Vide Appendix B.*)
9522. *By Mr. Dalgleish*: Did you make that survey? I did.
9523. Was it ever verified? That is shewn by the letter I have just read.
9524. What I mean is—has your line been acted upon? As far as the principal crossing-place over the Hunter and the Chain of Ponds, Dividing Range, are concerned, it has been acted upon exactly.
9525. You were associated with the Stephensons, in the Holyhead Railway Works? I was.
9526. They were your inferior officers, I believe; your subordinates? They were my personal friends, although they were under my orders.
9527. You were very far above them? There was no question of precedence; I was principal Director of the Company to which they were Engineers.
9528. *By Mr. Markham*: Are there any other documents you would wish to hand in? Yes, I wish to hand in an extract of a letter, dated January 14, 1859, from Mr. Robertson, then Secretary for Lands and Works, to the Commissioner for Internal Communication, in which he speaks of my qualification for the office I now hold. (*Letter read. Vide Separate Appendix B 3.*) I have only one more short document to hand in besides. It is a letter very kindly sent me by Sir John Young, and dated the 28th December, 1861, in which he bears testimony to the professional reputation I had obtained in England. (*Letter read. Vide Appendix C.*)
9529. Had you anything to do with testing the site for the Britannia Tubular Bridge, in connection with Mr. Fairburn and Mr. Stephenson? I was a party to the experiments that were made as to the form that the tubular bridge should assume, and I was also present during the elevation, in which I took an active part, as Chairman of the Holyhead line.
9530. You gave some evidence, I believe, before the Select Committee of the House of Commons, on the Holyhead Harbour Works? Yes; Mr. Rendell and myself were examined upon that subject by Sir Robert Peel. It was a work involving an expenditure of two or three millions of money; and our plans were taken into consideration and discussed with others that were sent in.
9531. Your survey of the Northern line for the proposed railway was approved of by Sir W. Denison? Yes; and His Excellency had the goodness to thank me for my labours.
9532. *By Mr. Lucas*: Did you ever express your high confidence in Mr. Quodling's talents as an engineer? No, not as an engineer.
9533. Did you ever state that, in your opinion, too little power was intrusted in the hands of the local Superintendents, and that in this way much valuable time was lost; and that you were disposed to place more confidence than had hitherto been reposed in them? Yes, that is my feeling; and that I believe to be the impression of the community at large.
9534. Did you not tell a deputation that waited upon you, that you had the most perfect confidence in Mr. Quodling as an engineer? Yes, with respect to the cutting of a ditch at Tamworth. A deputation waited upon me on the subject of cutting a deep drain to the river below the bridge; and I then stated to that deputation that I had perfect confidence in Mr. Quodling's ability to carry out that work. The remark was made only in reference to a mere local drain, and not to his general ability as an engineer.
9535. *By Mr. Arnold*: In reference to the official rule about keeping public accounts—first let me ask you how long you have been in the public service in this Colony? I have been seven years as Superintendent of the Northern Road, and one year as Commissioner of Main Roads.
9536. Are you aware of any rule by which officers intrusted with the disposal of public moneys are precluded from keeping their private accounts at the same bank with their public accounts? Yes; a circular was sent round to all the Road Superintendents with a rule to that effect.
9537. Is that rule well known, and is it acted upon by all the officers in the Road Branch? Yes, without exception. Every Superintendent keeps his private accounts at a separate bank from his public accounts.
9538. Were you aware whilst Mr. Quodling was in the public service that he kept his public and his private banking accounts in one? Not the least aware of it.
9539. When did you first know that Mr. Quodling's cheques had been dishonored? On my way to Singleton, when I met Mr. Hawkins.
9540. What did he tell you? He produced a cheque of Mr. Quodling's on the Tamworth Bank for the amount of his October salary, and told me that it had been presented and been dishonored.
9541. When was this? In the middle of December last.
9542. After Mr. Quodling had resigned? Yes.
9543. Do you know if vouchers have been received by the Government for all moneys intrusted by them to Mr. Quodling to disburse? I was asked that same question yesterday, and my answer to it was, that I believed that every voucher was in. With regard to what Mr. Quodling has said about his not having received the salary voucher, I may say that it is scarcely necessary that this should go back to him, as he has nothing to do with it when once the money intrusted to him is paid, provided we have his signature and the signatures of the two overseers under him, that is all that is required, because I have to certify for the Auditor General and not the Superintendent. He cannot certify to his own receipt of money, and therefore I have to certify in that case. The salary voucher is an exception to the usual voucher.
9544. Has Mr. Hawkins' receipt for the money for which the cheque was dishonored been received in the Office? I think not; I do not think we have received it. 9545.

9545. Then the Government liability to pay the amount still remains? Yes; unless we can shew that money to meet these claims was received by Mr. Quodling. W. R. Collett,
Esq.

9546. Even then that would not relieve the Government from their liability? Perhaps not; except we could shew that Mr. Hawkins had admitted that he had received the cheque from Mr. Quodling in payment of his salary. 10 Jan., 1862.

9547. Have you got a receipt for the salaries of the officers on the Northern Road, for the month of October? My impression is that we have not. Mr. Hannington omitted to draw until the last week in the month.

9548. Does any other similar case exist of money having been intrusted to Mr. Quodling, or to any other person to whom money is ordinarily intrusted for payment on account of the public service, in which the Government hold no receipts for the payment of the amounts provided for? I am not aware of anything besides this salary voucher; nor do I know even that that is not in the Office.

9549. The final check upon all these accounts would be with the Auditor General? Yes.

9550. The accounts as they are received from the different persons intrusted with money are checked off in the office of the accountant? They are; every account is gone over.

9551. Then the general accounts from the branch are finally checked off in the Audit Office? Yes.

9552. When accounts are paid from the Treasury they have to go to the Audit Office, and there a receipt is required for every amount specified? Yes; we have to satisfy the Auditor how every farthing is expended.

9553. Would it not be the duty of the proper officer of the Road Branch to see that receipts were transmitted for any amounts paid to Mr. Quodling in proper time to make out the accounts for the Auditor General? Yes, it would; but then this course was anticipated by his resignation. Having left the public service we could not apply to him for the receipts and vouchers usually furnished; and the consequence is, that though two months have elapsed since the payments were made to him, we are now only gradually getting in these vouchers.

9554. These amounts were paid then on his abstracts? Yes, as far as the salaries were concerned.

9555. Would not that involve the necessity for his signature? No, not to the pay abstract. I certify to that, and it goes to the Audit Office to be checked after it has received my signature.

9556. Do you know what amount of cheques of Mr. Quodling's have been dishonored? I have only immediate information of eight cheques held by Messrs. Cohen and Levy, of Maitland, who have applied to me for payment, and of that given to Mr. Hannington, amounting in the aggregate to more than £65; but I should say that the deficiency amounted to a very much larger sum, because on referring to the account furnished from the bank, I do not find the names of the maintenance men or of some of the smaller contractors, all of whom Mr. Quodling had to pay, entered on the debtor side of the account, as they would have been had their cheques been paid.

9557. Have the Government in all these cases received proper receipts from the persons to whom money was due? Yes, in every case except the last. All the vouchers which represent the dishonored cheques held by Messrs. Cohen and Levy are in proper order, and there only remains the salary sheet for October, and that I will not be certain about.

9558. When did you first become aware that Mr. Quodling was in the habit of drinking? When I went up to Tamworth to open the bridge there.

9559. In what year was that? This year.

9560. How long before Mr. Quodling's resignation? About six months before.

9561. Did you then think that his drinking was carried to such an extent as to disqualify him from holding a situation of trust in the public service? I thought that, if he had such an insatiable taste for brandy as he was represented to have, before very long it would lead to his becoming a confirmed drunkard. I felt this so strongly that I determined to speak to his father upon the subject.

9562. Did you ever make any representation to me upon the subject? No, not officially. I may have hinted to you in the course of conversation, that Quodling took rather more brandy than was good for him, but I never brought the matter officially under your notice.

9563. Do you mean that you ever hinted to me that Mr. Quodling was in the habit of drinking in such a way, and to such an extent, as to disqualify him from the performance of the responsible duties he had to perform? No, certainly not; I did not conceive, myself, that he had got to that length. I feared that he was on the highway to become a drunkard, but he had not gone so far as to disqualify him from the performance of his duties.

9564. In the case of contracts taken under the Roads Branch of the Works Department, is it the custom of that branch to take them without first obtaining the sanction of the Minister? There are many things that we do without first obtaining the sanction of the Minister, but certainly not contracts; they are an exception, and the Minister is invariably applied to for his sanction before they are entered into.

9565. With whom are the contracts made? With those who tender for the work, whatever it may be.

9566. But I mean who are the parties to the contract? The contractor whose tender has been accepted on the one hand, and the Queen on the other.

9567. Not the Commissioner? No; the Queen.

9568. Then, as I understand you, the Commissioner has not the power of himself to make contracts? No, not to make the contracts. They are between the contractor and the Queen; but the bond, which is the virtual contract, is given to the Commissioner and not to the Queen.

9569. I do not ask you about the bond, but about the contract? The bond is in reality the contract. We cannot sue upon the contract, but we can upon the bond. 9570.

W. R. Collott, Esq.
10 Jan., 1862.

9570. But a contract is signed. When a person is informed that his tender is accepted, does he not at once sign a contract? That is the bond which he signs. He signs a bond, in which he undertakes by his sureties to do certain things, and binds himself, under a certain penalty, to do them according to the specification; that is the real contract.

9571. Then do I understand you to be of opinion that it is not in the power of the Commissioner to make himself a party to the contract? That has been my impression throughout. I have always been of opinion that the Commissioner is no party to the contract; and if the contractor choose to refuse to recognize him, we should have no remedy. Neither is the Commissioner the party to sue in the case of a breach of contract.

9572. Then, at all events, the proper duty of the Minister for Works, in connection with the Roads Branch, is to determine upon the acceptance of all contracts;—that, after tenders are sent in and one is accepted, the contract cannot be considered as finally entered into until the sanction of the Minister for Works has been obtained? That is my belief. There is no power given to the Commissioner by the Main Roads Act to make contracts.

9573. Is it the case, as a matter of fact, that you never have made contracts on your own responsibility? I have extended them, but never made them.

9574. Is not extending a contract virtually making a new one? No; it is merely extending the old contract. The clause of the General Conditions gives me that power.

9575. Could the Commissioner, according to this, indefinitely extend a contract that had once been made? I think so; that is, if money for the work had been voted by Parliament.

9576. Then the only limit to his power of extension, according to your view, would be the amount of money placed at his disposal by Parliament? That is my belief.

9577. And you think he has this indefinite power of extension? I do.

9578. Then if a contract was made, with the sanction of the Minister for Works, for a part of a road—say for two miles of road—would you think that you were justified in extending that contract to any length on that road, provided the expenditure was within the limits of the money voted by Parliament for that road? Yes; the General Conditions give me that power, and those conditions have been sanctioned by the Minister.

9579. The price of labour and material varies considerably on different parts of the road? No, not very considerably.

9580. But there is a variation of price upon different parts of a line of road? The variation is very trifling on the Northern Road; there is just a barely perceptible difference.

9581. It is not the same on the other roads? No; on the other roads there is certainly a greater difference.

9582. And the Commissioner would have the same power of extension upon those other roads as upon the Northern Road? Yes, I presume so.

9583. Is there only very little difference in the prices at which contracts are taken on different parts of the road? On the Northern Road the difference of price is very slight.

9584. But on the other roads? On the Southern Road there is certainly a greater difference; on the Northern Road, which is gravelled throughout, and where gravel exists along the whole line, the price hardly varies.

9585. Is there any difference in the price at which contracts are taken when they are taken for large amounts of work, as compared with those let out in small quantities? Not so much a difference between the large and small quantities, as there is in the time at which the contract is taken. The price varies more with the time at which the work has to be performed. The contracts for last year, for instance, were let twenty-five per cent. cheaper than they were in the preceding year. But I can hardly answer the question as to the difference between the large and the small contracts. The probability, however, is that the larger contracts are taken up at a somewhat cheaper rate than the smaller ones.

9586. Was it not the case that, at the Bargo Brush contract, a contractor named White took a large contract for the supply of road metal at a reduced rate to what had been paid to others on smaller contracts? Yes; he took up the contract cheaper than had ever been known on that part of the road. The first price that was paid, under the task-work system, was 10s. a cubic yard for metal, and White supplied it at 7s. 9d. per yard.

9587. In that case I believe there was an extension of the original contract? No, hardly. The first contractor having become a defaulter, White was taken in his place to complete the work contracted for, and that had been left unfinished by the original contractor. The money set apart by the first contract was simply appropriated to the payment of White, who stood in the position of the person who had made the original contract. But I consider that case at the Bargo Brush as an exception to the general rule.

9588. This case that I have referred to was the first instance of a transfer of a contract by you from the original contractor to another contractor who undertook to execute the work at a lower rate? Yes.

9589. When a considerable extension of that contract was proposed, was it not the case that fresh tenders were called for? It was; I know that you insisted upon fresh tenders being called for, although I pleaded very hard for White that he should be allowed to take up the work by tender without competition; but you said that it was only fair that the work should be submitted to public competition, that every one might have a chance of getting it if they desired to do so, and that White must take his chance with the rest. He did take his chance with the rest, and sent in a tender at so low a rate that he got the contract.

9590. In the case of the contracts on the Northern Road, do I understand you to say that these have been extended by you without the authority of the Minister? I believe I did not apply to you officially for authority to widen the bridges.

9591. But there was the case of an extension of a contract previously to that? That was under Mr. Bennett, not in my time.

9592. Was that an extension of a contract without the sanction of the Minister? It was not

not an extra and must therefore have been an extension of the contract; and it must have been done without being sanctioned by you, because it was not known in your Office; it was only furnished to me this year in the list of works. I acted in exactly the same way in the case of the Doughboy Diversion.

W. R. Collett,
Esq.

10 Jan., 1862.

9593. Did that work at the Doughboy Diversion amount to a fresh contract, or did it merely consist of extras necessary to carry out the original contract effectively? It consisted of works necessary to the proper carrying out of the contract, the main thing being the widening of the bridges from 12 feet to 18 feet, that alteration at once involving an increased charge of £700. This, however, had the sanction of the Minister; or if not the sanction, it was known to you at any rate.

9594. No formal sanction was given or asked for? No; except that I gave you a general statement that I proposed to increase the width of all the bridges on the contract, from 12 feet to 18 feet.

9595. In reference to White's case, may not the general rule have been to accept no large contract except by public tender? I may say that that is your general rule, and that it has been very stringently adhered to, except in cases of great emergency. In such cases you may have relaxed the rule; or, for instance, where there have been heavy floods, and immediate work has been required.

9596. From information you have obtained in your position as Commissioner of Main Roads, are you of opinion that any of the proper duties of the Minister for Works have been delegated by him, in an unusual way, to any subordinate officer in his department? Not in any way. If in any way I have erred, you are certainly not blamable for any excess of duty on my part; you are by no means reprehensible for my conceiving my power to be more extended than perhaps it is.

9597. Supposing the Commissioner to assume powers more properly belonging to the Minister, or which might be in excess of those he possesses by law, would it be possible for the Minister to inform himself of the assumption of these powers by the Commissioner, unless the fact were communicated to him by the Commissioner himself? I am not aware of any other way he has of acquiring the information, except perhaps through the Under Secretary.

9598. Would he be able to become aware of it in any other way? I am not aware that he would.

9599. Would it not be the case that, in the event of any excess of power having been exercised by the Commissioner, the first information that would come to the Commissioner would be from the Audit Office? That would only be in regard to money payments, and not in the case of the authorizing of works.

9600. Then, until the information came from the Audit Office, no question could arise that the Minister could properly deal with? No; he would only learn it by the Audit Office sending the money voucher back to the department, and saying that there was no authority for the payment.

9601. Then, if the sanction of the Minister was withheld from the voucher, the Commissioner would be surcharged? Yes, he would have to pay the money out of his own pocket.

9602. And that forms the check upon any improper exercise of power by the Commissioner? Yes. He would not be likely to pay money that he knows would not afterwards be allowed at the Audit Office.

9603. But if the Commissioner, or the head of any branch intrusted with the payment of money, were to make it a rule to authorize payments which were obviously improper, and without the sanction of the Minister, would not such a thing be soon known in the branch, and observations made upon it? Undoubtedly. We have so many checks in respect to contracts, that —

9604. I am not speaking with regard to contracts so much as to other amounts? Taking the maintenance men for instance. The amounts required for them are sent in by the Superintendents. He receives the returns from the overseers, and looks into and checks them before sending them in. Then there is a check again in the Sydney Office, where the vouchers are all carefully looked into, and if it should be found that the money was not spent in accordance with the documents in the Office, there would be at once a suspicion of foul play. These accounts pass through so many hands that it would be impossible for the head of a branch to have all these people in collusion. I may remark here, with regard to the powers of the Commissioner, that no decision has ever yet been come to as to the relative powers of the Minister and the Commissioner. It is a question that ought to be settled, so that it might be known where the power of the Commissioner ceases and that of the Minister begins. For my own part I have left this question open, but until I am called upon to make myself less responsible, I shall continue to act as I have hitherto done. At the same time I may add that I have, for the sake of advancing the work of my department, taken more responsibility upon myself than I should feel inclined to do in future. I deny, however, that I have taken upon myself any responsibility, except to see that the work done is for the benefit of the public.

9605. Has the exercise of power by the Commissioner since the time of Responsible Government being inaugurated increased or decreased—has it been on the increase or the decrease since that time—are you aware from documents now in the Office of the Roads Branch? Do you allude to the actual duties of the Commissioner?

9606. Not exactly, but to his powers. In the first instance, under Responsible Government, was the power exercised by the Commissioner the same as it is now? I think they were very much of the same kind then as now. His duties were very much the same then as now.

9607. But my question is this—Whether the power exercised by the Commissioner, independent

W. R. Collett,
Esq.
10 Jan., 1862.

pendent of the Minister, was not, for the first year or two after the inauguration of Responsible Government, very much greater than it is now? As far as Capt. Martindale was concerned, I know that he exercised very much more power than I have done, or than I have thought of doing.

9608. Were not many powers of the Commissioner, in the first instance, very largely exercised, more especially in the taking of contracts independent of the sanction of the Minister? I am aware they were. I know that from documents in my Office. I have there very lengthy correspondence on the subject; one of these letters runs over thirty pages, and enters into the subject very fully. In that letter Capt. Martindale asserts his right as Commissioner to deal with all contracts independently of the Minister, though that right he had not insisted upon carrying out. It would seem from the correspondence that a compromise was made between the Minister and the Commissioner, the understanding being that the works should proceed more regularly than they had done, and that the Minister should have altogether in his hands the contract part of the business. At the same time, as far as I myself was concerned, when I took office on being appointed Commissioner of Main Roads, I naturally conceived that I possessed all the powers that had been exercised by my predecessor in office, though probably much less than that possessed by the Commissioner at first. I have already stated that I considered there was some necessity for restricting the powers of the Commissionership as it at first existed, because it was not right that any officer should be in a position to know that his powers were almost unimpeachable.

9609. Is it the case that in all matters of importance, since you have been in office—such for instance as the making of tenders, the final determination upon contracts, the appointment of officers—all these matters have, as a general rule, been brought under the consideration of the Minister, and have been determined upon by him? Invariably.

9610. That has been the general rule? That has been the invariable rule, without exception.

9611. Then if you have exercised powers inconsistent with this rule, you have done so on your own responsibility? I have exercised no powers but those I have under the General Conditions, and they give me the power of extending contracts.

9612. Are they the new Conditions that you allude to? Yes.

9613. Have you a copy of them? A copy has been handed in to the Committee.

9614. This right of doing a greater or a less quantity of work than that contracted for, would, I conceive, be considered as an extension of the contract? Yes, within the limit of the old contract.

9615. Within the limit of the money voted for the work contracted for? No, within the limit of the old work.

9616. Would you consider yourself justified, supposing a contract to be taken for two miles of road on a schedule of prices, in extending that contract over any length of road at the same rate? No; I should consider that my power went no further than to order any additional metalling, or any extra work that might be required on these two miles of road.

9617. Then it would consist, not in any extension of the length of the work contracted for, but in an extension of the quantity of labour or material to be employed on that work? Exactly.

9618. In fact, to meet any miscalculation or error? Yes; or for anything that we might see, as the work progressed, to be required; as in the case of bridges, where, for instance, I directed them to be widened from 12 feet to 18 feet. This principle having been acted upon by my predecessor in office, I considered that I was quite at liberty to follow in his footsteps.

9619. But take the case of a specific contract for the erection of a bridge, we will say, for which a tender of £1,000 has been sent in and accepted—you would not consider yourself justified in spending two or three times that amount on the work, at a schedule of prices? Yes, I should; and I have done so repeatedly. The Hume Bridge is an instance of this. By the contract it was to be constructed of piles, but the contractor found that he could not drive them, and I authorized sills to be used, as recommended by Mr. Beazeley. I did this without your sanction, and it entailed an expenditure of an additional £500.

9620. That, however, was only an expenditure to obtain a foundation; but the same kind of bridge was erected as that which had been determined upon? I can hardly bear that out.

9621. However, the extra work was rendered necessary to the proper performance of the contract? Yes, certainly.

9622. But suppose you had in your Office the plan of a bridge that would cost £5,000, whilst the work of erecting the bridge had been tendered for, and the contract taken on plan that cost only £1,000; would you have been justified in substituting your £5,000 plan for the £1,000 one, and so carrying the work out at a different cost, although on the same schedule of prices? No, I should not.

9623. Then, do you consider that your power of extension is limited to what is clearly shewn to be necessary in carrying out the contract? Yes.

9624. Do you know any case in which the departure from the original contract is more obvious than that of the Hume Bridge? Yes, I could find several. I have no doubt that no official sanction was given for the stone piers that were used for the Bendemeer Bridge, in substitution for the piles originally contracted for.

9625. That was done under the authority of Captain Martindale? Yes, and was recommended in the first instance by Mr. Bennett.

9626. Are you sure that that was not done by public tender? Yes, quite sure.

9627. And that it was to have been a pile bridge in the first instance? Yes, the contract was taken for a pile bridge.

9628.

9628. And when the plan was altered, are you certain that no tenders were called for for the masonry? Yes, I am positive about it; for I happen to know that the work was done on a private arrangement between Mr. Bennett and the contractor, Dewall. I presume that Mr. Bennett's idea was that, as it was found that the piles could not be driven to a sufficient depth to make a substantial structure, it was necessary for him to substitute some other kind of construction.

W. R. Collett,
Esq.
10 Jan., 1826.

9629. What was the original contract taken for? The original contract was for about £1,300, including the piles.

9630. And this amount was exceeded? Yes.

9631. Can you mention any other cases in which a contract has been extended without the sanction of the Minister? I am not sure that the Arnold Bridge does not come under this head. It was to have been a laminated arched bridge in the first instance, and then Mr. Bennett altered his mind about it, after Mr. Martindale had taken the contract for its construction. The plan was altered to a more simple one, and I am sure that no fresh tenders were called for in that instance.

9632. Then do you mean to say that the Arnold Bridge was in effect built without tenders having been called for, and without the sanction of the Minister? No, I do not say that. Public tenders were called for, and a contract was taken for a laminated arched bridge, which is a much more difficult form of construction than a simple beam bridge. After the contract was taken, Mr. Bennett altered his mind about the plan, and substituted a queen truss bridge; and Mr. Martindale, who had the contract, was to do it at the same price as he had contracted to construct the laminated arched bridge for.

9633. Was that done without the sanction of the Minister? To the best of my belief it was. I do not believe that the question of the alteration was ever referred to you; nor was the question of lengthening the Fallbrook Bridge by one row of piles submitted to you for your approval.

9634. Would it be possible for the Minister to inform himself of any alterations such as these you describe, unless it came to his knowledge in the usual official way, or unless some complaint were made to him by the contractor? I think he might find a way of making himself acquainted with what was going on; he might do it by requiring the Commissioner to report to him upon all such alterations when they were conceived to be necessary, or he might require the Commissioner to send in a report to him every three months. As things now stand, the relative positions of the Commissioner and the Minister are not sufficiently well defined. This is a thing that must be done if the Road Department is to be placed on a satisfactory basis.

9635. Then you consider that the power of the Commissioner to make alterations in contracts is only limited by the amount of money voted for the work? That is my opinion.

9636. And that is the principle upon which you have acted? Yes.

9637. That being the case, I refer to my previous question:—Supposing £20,000 or £25,000 to have been voted for the Southern Road, and that a contract were taken, say for two miles of it just outside of Sydney, at a schedule of prices, and amounting in the whole to a few hundred pounds only—would you in that case consider yourself justified in extending that contract along the whole length of the road at the same schedule of prices? No, I should never have conceived myself justified in doing such a thing as that.

9638. You would not have done that? No; our plan is to divide the road off into so many contracts, according to the amount of money voted and the proportion we intend to spend on each part of the road.

9639. I am not asking you as to the practice, but merely the abstract question of whether you conceive you have the power to extend a contract in the way I have described? In such a case as that you have mentioned, I do not think I could spend the remainder of the money without your sanction.

9640. Then, as a general principle, this power of extension that you assert is very slight, being limited by the amount voted for the particular work, as well as by the extent of the work itself? Yes, it is limited by my being able to let off the contract in the first instance under the amount of the estimate on which the vote has been taken; for instance, if £1,000 are voted for a particular work, and I let it to a contractor for £800, I consider myself entitled, where I conceive it to be necessary, to have additional work performed on that contract to the extent of the £200 balance.

9641. Then I do not understand where your power is limited? I thought I had made it clear that it was limited to the £1,000 voted for the work; beyond that I cannot go.

9642. But going beyond the £1,000, and taking a large amount of £20,000 or £30,000 voted for a line of road—would the same principle apply to that amount as to the £1,000? That is not done in one contract. Suppose we wish to have a piece of road twelve miles in length made and metalled, we do not let it out in one contract; I should divide it into six contracts of about two miles in each.

9643. I am not asking you what you do, but rather what you conceive you have the power to do. There is a sum of £20,000 or £30,000, or whatever it may be, voted for a line of road; now, if you have the power indefinitely to extend a contract, except only with a limitation of the sum to be expended, and if, as in the instance you have stated, you have the power to extend the contract up to the amount voted—why should you not have the power to extend a contract taken for a small section of the road over the whole of that road, provided you do not exceed the amount appropriated for the work? If I do not exceed the amount, I have the power.

9644. Then you may extend a contract taken for a few hundred pounds over work that will amount to several thousands? No; I should not do that, because there are many contracts on the road.

9645.

W. R. Collett, Esq.
10 Jan., 1862.

9645. But I am supposing that there is only one contract. If a man takes a few hundred yards of road to metal at one end of the road, would you have the power of extending that contract right along to the extreme end of the road? I should not conceive that I had power to do such a thing as this.

9646. But you say that you have the power of extending a contract within the amount available for the work? Yes, I have; that power is distinctly given me by the General Conditions.

9647. I do not say that you have not that power; all I ask is, do you consider that you have it? Whether I have it or not, I should not think of exercising it in such a way as you have described, as that would be an abuse of the power vested in me, and a diverting it from its legitimate object. It is one thing to have power and use it for a beneficial purpose, and another thing to have power and to abuse it.

9648. In the two cases to which you have alluded, those of the Hume Bridge and the Bendemeer Bridge—is it not the case that the extension of the contracts has been caused by matters that could not have been foreseen at the time the contract was taken, the extended works being such as had become necessary from the ticklish nature of the ground for the foundation? I have already stated to the Committee that I have never, during an experience of twenty-five years, known any contract to be carried out strictly in accordance with the original specification. Whether they were railway contracts or road contracts, or any other kind of contracts, certain deviations from the original specification would always be sure to occur, or certain alterations or improvements would suggest themselves to the engineer as the work proceeded, and in this manner the original plan is sure to be modified in some way.

9649. Then, as far as the extensions are practically concerned, they have only been sanctioned in cases of ordinary contract, when extra work is found to be absolutely necessary, or where it has been found to be palpably and unmistakably an improvement as the work proceeded? Exactly. As for example, if less or more cutting was required for an embankment; if a greater or less quantity of metal was required upon a particular piece of road, the necessity would be so very self-evident that it would scarcely be deemed necessary to go to you, as Minister for Works, to authorize the proposed alteration. In this respect I consider it as absolutely essential to the proper conduct of the works that some power of extension should be lodged in the hands of the Commissioner for Roads. At all events I have considered that, as Commissioner, I had such a power, and I have acted upon it in more than one case. But at the same time I may say that I have never in any case made an improper use of it, or ever exercised it unless when I have seen that the public service would benefit by my so doing. Questions are constantly arising in the course of the carrying out of a contract, and these have to be decided upon at once, so that the work may not be delayed. Suggestions for alterations or improvements are also made as the work proceeds, and these have to be dealt with without delay. If these things are not to be done by the Commissioner, by whom are they to be done? He knows the work and the nature of the contract taken, and in most cases, his sanction to an extension or an alteration is a mere matter of form. Thus, the Superintendent in charge of a particular work reports to the Commissioner that a certain alteration in the contract he is supervising is requisite for properly completing the work. Of course I presume that, as the Superintendent holds a responsible situation, he would not make such a report to me unless it was necessary; and on his report I sanction the alteration. So that, in point of fact, the Committee will see that it is the Superintendent in charge of the work, and not I, who make the alteration, since it is upon his report that it is done, and an inspection of the work is not made in every instance by the Commissioner.

9650. Still there should be some check in the head Office? Yes, and that is provided by the sanction of the Commissioner. As I said, he knows the work and the nature of the contract, and can therefore see the effect of the proposed alteration, and so form an opinion as to whether it has been judiciously recommended.

9651. In the case of any considerable deviation from a contract, would it be in accordance with the usual practice of the Road Branch for the Commissioner to obtain from the Minister a sanction in any way for the payments rendered necessary in consequence of this extension? It has not been the practice, either with Captain Martindale or myself, to obtain such a sanction.

9652. It has not been the practice with you, at all events? No, not to communicate with you officially.

9653. Is the largest instance of a deviation that which you have mentioned has having occurred under Captain Martindale—the largest in point of amount I mean? Do you refer to the Murrurundi Gap?

9654. Yes? I should be sorry to say so. The alterations to the Denison Bridge at Bathurst involved a much larger amount.

9655. Have there been any others of a larger amount? I have no doubt there have been; but I cannot recollect any just at this moment.

9656. There have not been any alterations made that have brought the work under the amount of the contract taken? No; but several have been executed in which the cost of the deviation has not exceeded the original amount of the contract.

9657. By whom was the contract for the Denison Bridge taken? I do not know.

9658. There were, however, additions and alterations made to the original plan? There were, and very extensive alterations.

9659. Do you know what they were? I do not. It is now several years ago since that bridge was constructed.

9660. Before your time, was it not? It was.

9661. Then you are not speaking of your own knowledge in respect to this work? No; but,

but, as you asked the question in regard to the cost of deviations from an original contract, I adduced the Denison Bridge as an instance. There is the Falbrook Bridge again, in which the deviation from the original specification entailed an additional cost of £600 or £700. There was an extra span of one chain added to the bridge, and I am not aware that the deviation ever came before you.

W. R. Collett,
Esq.
10 Jan., 1862.

9662. Are you aware that it did not? No; perhaps it did.
9663. *By Mr. Dalgleish:* Have you in your Office any calculation made by Mr. Bennett of the quantity of work to be performed under the contract for which the Doughboy Diversion was substituted? Yes, I have a calculation of the quantities of work made by Mr. Bennett.
9664. Was not that contract let by Mr. Bennett? It was.
9665. Have you those quantities with you now? Yes.
9666. Will you hand them in—that is, the calculation of the quantities on the work for which the Doughboy Diversion was substituted—the quantities and the work on the bridges. (*Witness produced a paper containing calculations.*) This is not what I require; these are the calculations for the Doughboy Diversion; what I want is the amount of work to be done on the piece of road for which the Doughboy Diversion was substituted? The deviation was only very trifling; it was only a deviation of 7 chains in a total length of 199 chains, leaving 192 chains exactly as they are here; the amounts would be the same as appear here by omitting two bridges and substituting for them a large cutting of 12,000 cubic yards.
9667. Can you give the Committee Mr. Bennett's calculations of these bridges that were contracted for? I gave them in yesterday.
9668. Are these that you have produced the only calculations of work and prices that Mr. Bennett has left behind him, in the Office of the Roads Branch, with regard to this matter? That is impossible for me to say. I only know that these calculations embrace all the works included in the specification.
9669. It is impossible to glean any information from these calculations which you have just produced? That may be the case with some persons, but we understand them well enough, and we work upon them.
9670. With the exception of this deviation, was the contract carried out in accordance with the original specification? No, the bridges were widened from 12 feet to 18 feet.
9671. Was any further alteration made? Yes; the fall of the slopes was increased, as it was found that they would not stand without.
9672. They were altered from the original drawings? Yes.
9673. When were the trussed bridges mentioned in Mr. Bennett's estimate erected? Not one of them was erected.
9674. Were any erected with beams and corbels? No, I regarded them as altogether useless. The corbels are really of no advantage to the structure, and they only add to the expense unnecessarily.
9675. They were not constructed then in accordance with the plans? Not in that respect.
9676. How many were mentioned in the specification, in the first instance, to be constructed with corbels? I cannot say how many, but I discarded the corbels as useless.
9677. Have these bridges been constructed in accordance with the plans furnished to the contractor, and on which he based his tender? Yes.
9678. Has not one of them been curtailed two spans? No, but one of them has been curtailed one span.
9679. Your answers and these calculations do not go to the point that I wish to arrive at; I want to know what the cost would have been under the original specification, as compared with the cost entailed by these alterations? I am perfectly aware of what your object is.
9680. Do you know a portion of road called the Camden Flats? Yes, at Camden, on the road to Razorback; that is on the Southern, not on the Northern Road.
9681. When on the Northern Road, did you ever authorize the payment of 16s. 3d. per cubic yard for road metal? No, I never heard of such a sum being given for metal there.
9682. Have you ever authorized the payment of that price on any other road? Yes, repeatedly, on the Southern Road; but then it was for metal supplied under contract taken by public tender, and was the lowest price at which it was to be got. I have even paid a higher price than that, for it has cost as much as £1 2s. 6d. per cubic yard in some cases. If you only look at what is the Sydney price of a yard of metal, you can judge what it is likely to be 30 or 40 miles on the road. However, the price has been reduced lately, and we have obtained it in some cases as low as 7s. 9d.
9683. What would the saving be to the contractor if he were allowed to leave stumps standing in the roadway, instead of taking them out as he had contracted to do? The saving in the case you refer to would have been about £40 on the whole contract; and I have knocked him off £40 for not having taken them out.
9684. You have mulct him in the sum of £40 for this breach of contract? I have deducted that amount, and there is an end of it. On the completion of his contract I authorized the payment of £160 instead of £200, the amount he had to receive under his contract, the £40 being knocked off for the stumps that were not taken out.
9685. *By Mr. Arnold:* Was that a fair price to take off? As I said, a cost of £40 would have taken them out.
9686. Then he would have been very willing to have done the work and to have taken the stumps out, if you had allowed him the £40 which you knocked off? Yes, of course he would; but then I would not allow him to do so, because in taking out the stumps he would spoil the road. In order to prevent any discussion about money having been paid away for work that was not done, I told him that this matter of his, having left the stumps standing in the ground, had been very much talked about, and that I should therefore dock him 20 per cent. for not having carried out the terms of his contract.

W. R. Collett, Esq. 9687. Did he submit to that reduction? Of course he did not like it, and grumbled a good deal, but he did not deny that the wood was there.

10 Jan., 1862. 9688. *By the Chairman*: This reduction was made after this inquiry had begun? Yes, because I told him that the matter had been generally talked about, and that I could not allow him the whole amount of his contract money.

9689. You told him so after this inquiry had been commenced? Yes, on my last visit to the Northern District.

9690. You did not say anything to him about a reduction prior to the institution of this inquiry? No, I could not do so. I had nothing to do with the payments until the work was finally finished and handed over to the Government as completed. Any question of the kind raised before then would be quite irrelevant, because the contractor might say that he intended to do what was complained of. It is only on the final completion of the work that the contractor is definitely bound.

9691. *By Mr. Hoskins*: Would you have paid him the full amount of his contract money if this investigation had not taken place? No, certainly not.

9692. Was it not stated here that there was fallen timber on the ground that was not removed when the road was cleared, but was allowed to go into the embankments? Yes, I know that evidence to that effect was given; but it is not the case; there is none of the fallen timber in the embankments.

9693. Do you remember Mr. Hannington's examination? I do.

9694. He stated very distinctly that it was so? He spoke of a different time. It was at the date of his letter that the timber was lying about; but when I saw the line shortly afterwards, there was no loose timber on the ground.

9695. Might it not have been hid from your sight by the earth from the cuttings, when you subsequently inspected the work? No, it could not have been, because if it had been in the bank I must have seen it lying about on some of my previous visits, and I was there four or five times before then. The clearing of the line was the first work done, and I was particular not to allow the contractor to leave any of the dead timber lying about on the line. I always took notice to see if it was all removed.

9696. Was there 20 feet of solid roadway in the big cutting? Yes, fully 20 feet.

9697. Are you certain about this? Yes, quite certain, for I measured it myself.

9698. Mr. Hannington says that he measured it and found only 13 feet? I do not care what he says; he knows nothing about it; besides that, his evidence refers to September last, and the plans have been altered since then.

9699. The road is cut on a siding, a certain portion of it being solid and the rest made ground from the cutting? Yes.

9700. Well, Mr. Hannington says that the solid portion of the road, that is excluding the made ground, is only 13 feet? And I say that it is considerably more—20 feet at the least. I will shew you the mistake Mr. Hannington has made. He speaks of September last, and the plans were altered. I produce the original plan as suggested by Mr. Debenham, which will shew the alterations made in the cuttings on these sidings. (*Plan produced and explained to the Committee by witness.*)

9701. *By the Chairman*: Your accounts are only checked in the Audit Office? Yes; all my accounts are sent to the Audit Office, where they are checked by the receipted vouchers.

9702. What other check is there? They are checked in the Office.

9703. But suppose you should make an improper payment of money, what check is there upon your so doing? I could not do such a thing unless the Superintendent and the Accountant were in collusion with me. Every account comes to me in the first instance from the Superintendent, with his voucher. Then I cannot take the book and draw a cheque on the bank; if I did, the bank would not pay it. The way is this,—when an account is sent in it is brought under my notice, and if I find it all correct I pass it. It is then checked in the Office and compared with the documents relating to the work for which it is the payment. Then a cheque is drawn for me sign, and even when I sign it, it is of no use unless it is countersigned by the Chief Clerk in the Office.

9704. So that there must be collusion between these two parties—the Commissioner and the Chief Clerk—before money could be drawn from the bank improperly? Yes, except there were collusion between the overseer and the Commissioner in furnishing fictitious vouchers.

9705. Then I suppose that the amounts voted for the works under your charge during the year is placed altogether to your credit in the bank? No. When the Appropriation Act is passed, it is intimated to me that such a sum has been voted for road works. I then state what amount I shall require for the month—say it is for the first month, January, and that I require £10,000—that amount is paid into my credit at the bank.

9706. Then all these various amounts that are voted for different works are not kept separate? Yes, they are, every one of them.

9707. A separate account for each particular work? Yes.

9708. Then you draw a cheque for that particular work and no other? No; we make no distinction in the cheque; they are the cheques of the Road Branch and that is all.

9709. So that if you chance to overdraw upon any particular work you are able to make up the deficiency by paying it out of another? No, we do not overdraw, because we have our account in the Office, from which we at once see when the sum is exhausted.

9710. But there is no separate account kept of these works in the bank? No, not in the bank.

9711. They are all kept together then in one account there? Yes.

9712. And are drawn upon by cheques from your branch, without stating for what particular work the payment is made? Yes.

9713. If three or four works are in course of construction, and others that are not required for

- for some time, where there are several of these amounts handed to you at once, do you not draw upon the sum indiscriminately, regarding it as one account? No, we do not; but the Treasurer does, by giving us the whole sum voted in one account. We separate the sum thus given into the various items voted for the different works. W. B. Collett,
Esq.
10 Jan., 1862.
9714. In your cheques? No, in our accounts.
9715. Not in the cheques? No; it would be impossible to do so in the cheques, because a cheque may include two or three payments upon as many different works.
9716. Then it is possible, and I do not say it offensively, but merely as a matter of possibility, for the Clerk and the Commissioner by collusion to draw from the bank the whole sum voted for road works during the year? Of course it is possible.
9717. *By Mr. Dangar*: Is your bank account audited by the Government? Of course it is—monthly.
9718. How much, about, is paid in to your credit every month? If £100,000 are voted for road works during the year, about £10,000 monthly. It depends entirely upon the amount voted by Parliament.
9719. You have stated, I believe, that you do not consider yourself, as Commissioner for Roads, liable to be called to account in any way except by the Governor and the Executive Council? I have. My liability is fixed by the Main Roads Act.
9720. When Mr. Hawkins presented you with Mr. Quodling's cheque that had been given for his salary, and been dishonored, did you impound it? No; I refused to have anything to do with it. He wished me to take it, but I declined.
9721. Was it dated previous to or since Mr. Quodling's resignation? It was dated the 20th November, and therefore since his resignation.
9722. Do you recollect Greer and Clements taking a contract for a piece of road from Scone to Aberdeen? I do.
9723. Was that contract taken for a large amount less than the estimate in your Office? Yes, considerably under our estimate.
9724. And much less than Miller's tender? Yes.
9725. And did you pass that contract? Yes; I was rather sick of them, and was glad to get rid of them in this way.
9726. Do you know Wightman? I do.
9727. He has often put in tenders for works on the Northern Road? He has not.
9728. What is the reason that he has never got a contract—that his tender has never been accepted? Because his tender has never been the lowest; he has always tendered too high.
9729. Are you aware that Mr. Brown, one of the overseers on the Northern Road, is now superintending the erection of a bridge at the Kingdon Ponds? I am.
9730. Has he been authorized to superintend this work? He was ordered to do so.
9731. By whose orders—those of the Commissioner? Not by my orders; by orders of the Minister, and I may say, in opposition to my opinion. I think a Superintendent has quite enough to do to attend to the works of which he has charge.
9732. How was it that he was directed to superintend this work? A representation was made by the Police Magistrate of the district that the services of one of the Road Superintendents would be of great advantage in the construction of the bridge, and the consent of the Minister was asked to this being done. He agreed to it, and Mr. Brown was directed to superintend the work.
9733. Then is it usual for road overseers to superintend the construction of bridges for Benches of Magistrates, as Mr. Quodling has done, and as Mr. Brown has been directed to do? If it is near to their line of road of which they have charge, there is nothing very unusual about it; but in Mr. Quodling's case the place was more than 70 miles distant from the works of which he had charge.
9734. You know Mr. Newcomen? Yes.
9735. Did you allow him to work his teams, day-work, on the road you had charge of? I did.
9736. Whilst he was an overseer under Government? No, whilst he was under me, when he was in my employment, but before he was a Government overseer.
9737. He sold flour and beef, I believe, to the men working on the road? He did, and was not dismissed for it.
9738. Was he a competent man as an overseer? Yes; he was a very good man.
9739. Did Captain Martindale appoint him in the first instance on trial? All the officers on the roads are appointed in the first place on trial.
9740. You let a large contract, amounting to several hundreds of pounds, on the Northern Road, without consulting the Minister for Works? Not a contract, but an extension of a contract. But I have explained that actually all these things are done by the Superintendents for and not by me. They recommend the alteration and extension; I simply approve or disapprove of it.
9741. Are you aware that Miller, Martindale, and Wightman, have put in a quantity of sand as ballast upon the portions of road they are making? I did not know before you mentioned it; but I will take care and see to it when I next go up there, and if they have done so they shall take it all off again.
9742. How is the work measured that is done on the road? What part of the work?
9743. The metalling? The present rule is to measure it at the quarry before carting it.
9744. But when it is on the road? We measure it at the quarry, not on the road.
9745. When it is used as ballast? Yes, it is all measured in heaps at the quarry before carting.
9746. Do you pay the same price for ballast, whether it is stone or sand? We pay the same price for whatever stone is used, provided it is the best to be got in the locality; but I am not aware of any sand having been used; we call it gravel; perhaps it is that which you allude to.

APPENDIX.

A.

*Surveyor General's Office,
Sydney, 6 December, 1855.*

Sir,

With reference to your letter of the 23rd ultimo, stating that you will lose no time in furnishing the department with longitudinal and vertical sections of the present line of road between Maitland and the Liverpool Range at Murrurundi, and also with a preliminary survey and sections of the line which the Railway should take between these termini, I have to inform you that I approve of your doing as you propose, and to request that you will do it as speedily as possible.

I am, Sir,

Your obedient servant,

GEO. BARNEY,
S. G.

W. R. Collett, Esq.,
Surveyor to the Northern Road.

B.

*Surveyor General's Office,
Sydney, 4 April, 1856.*

Sir,

Sections and
Report of Line of
Railway North
to Liverpool
Plans.

Having submitted to His Excellency the Governor General, your letter and its enclosures, dated the 31st ultimo, received yesterday, I have been directed to express to you His Excellency's thanks for the trouble which you have taken in the matter.

I have, &c.,

GEO. BARNEY,
S. G.

W. R. Collett, Esq.,
Surveyor to the Northern Road,
Singleton.

C.

*Government House, Sydney, New South Wales,
28 December, 1861.*

Dear Mr. Collett,

I am directed by His Excellency Sir John Young to write you a line, for the purpose of stating that he was personally acquainted with you in England for some years, at the time that you were a Member of the House of Commons. From the active part which you then took in railway management, and in promoting the Holyhead Harbour, His Excellency believes you to be quite competent to superintend public works, such as the roads, which have been intrusted to you in this Colony.

Believe me, &c.,

F. TURVILLE,
Private Secretary.

To
W. R. Collett, Esq.,
&c., &c., &c.

A true copy.—A. J. CHISHOLM. 30/12/61.

SEPARATE

SEPARATE APPENDIX.

A.

*Roads and Bridges Office,
Melbourne, 11 December, 1861.*

Sir,

In answer to your letter of the 3rd instant, inquiring, as Chairman of a Select Committee of the Legislative Assembly of New South Wales, whether Mr. Joseph Martindale had been disqualified from contracting under the Board of Land and Works, I have the honor to inform you that he has never been formally so declared, but that he has held no contract under the Government of this Colony since 1858.

2. His conduct was very unsatisfactory, he having become insolvent whilst a contractor, and more recently, having been responsible agent of a contractor on whose work a flagrant fraud was perpetrated, which I believe could not have been effected without his (Martindale's) knowledge.

3. I think it therefore unlikely that the Board of Land and Works would again entrust him, either as principal or agent, with the execution of any contract, and I certainly should have no hesitation in using my influence to prevent any tender of his from being accepted.

I have, &c.,

JOHN STEAVENSON,

Commissioner of Roads and Bridges.

William Forster, Esq., M.P.,
Union Club, Sydney.

B 1.

*Roads,
Railway Department,
Sydney, 17 September, 1857.*

Sir,

Your letter of the 14th instant has been submitted to the Chief Commissioner, and upon it he has to make the following observations:—

1. Murulla Diversion.—It appears that upon his own responsibility Mr. Collett has expended the sum of £120 upon the Murulla Diversion, and in so doing, has involved the Government in an expense which there is no vote to cover.

Mr. Collett, however, received a sort of authority for his proceedings, in that no orders appear to have been sent to prevent his commencing the work, and under these circumstances I shall recommend that the £120 be defrayed from the vote of £8,000. Mr. Collett will distinctly understand no further sum is to be expended upon this Diversion without special sanction.

In what he has already done Mr. Collett has exceeded both his instructions and the wishes of the Government; he has made a road they were not prepared to order, and pledged them, as far as lies in his power, to complete and maintain it. I wish Mr. Collett to understand my views, in such cases, of the term, "responsibility," viz., that an officer who expends money for which he has not authority is liable to have it deducted from his salary, and I request that he will not in future consider himself empowered to assume any such responsibility, except in cases of such extreme emergency as will not permit of the delay of a reference to me, when he must be prepared to justify the expenditure by the exigency of the case, but that he will confine his exertions to the best expenditure of the authorized votes, under the regulations he may from time to time receive for his guidance.

2. "Conical Hill"—On the 10th instant, by order of the Honorable the Secretary for Lands and Works, I directed Mr. Collett to report upon a letter from Mr. Loder; I have not received any report, but I now learn that Mr. Collett is at work upon the road. I wish to know from Mr. Collett why the report has not been sent, and upon what authority and vote Mr. Collett is expending money at this point?

3. As the expenditure of the special vote of £1,000 *must* be kept separate, as ordered, I cannot admit the impossibility of doing so. Mr. Collett states it to be impossible, because the repairs have been going on since the first flood of the 18th June, and the grant has been anticipated by at least £200; but Mr. Collett had again no right to make such an anticipation, and no power to involve the Government in an expenditure of £200, without sanction. The £200 must remain as it now is, debited against the £8,000; and a clear account must be kept of how the £1,000, or so much of it as is absolutely necessary to repair the damages done by the recent floods, is spent.

To facilitate this a form is enclosed which Mr. Collett will forward monthly, shewing the expenditure upon each part of the roads under his immediate supervision, both under the £1,000 vote and the ordinary vote of £8,000.

4. Mr. Collett states—"The money in hand (say £3,000,) is already appropriated to clearing, draining, and ballasting contracts along the line, together with the maintenance of an efficient staff till December 31st, 1857.

If I understand this rightly, Mr. Collett has made contracts, amounting together, with the maintenance of his staff, to £3,000, but by his general instructions of 28th March, 1855, contracts previously to being taken were to be submitted for the sanction of the Colonial Architect. Here again Mr. Collett appears to have exceeded his powers, and I request he will furnish me with an early statement of how he proposes to expend the above £3,000, for my consideration and sanction, if approved.

With reference to Mr. Collett's statement, that both roads (Murulla Diversion and Warland's Flat) are indispensable, I must call his attention to the fact, that while he has twice made this statement, he has given no reasons for it, and I request he will furnish me with them.

The result now is, that in addition to the vote of £8,000, and a special grant of £1,000, Mr. Collett states it to be absolutely necessary that a sum of £1,020 should be given for the repair of Warland's Flat Road, and £350 (in addition to £120 already spent) for the Murulla Diversion, or £1,400 in all.

In looking into the question of these two roads, Mr. Secretary Hay stated his opinion that the Murulla Diversion might ultimately be found the preferable road for the great part of the Northern traffic; and if so, that only such a sum should be spent upon the Warland's Flat Road as would put it into such repair as to enable it to bear the light traffic that in such a case would pass over it. By his letter of the 20th April, 1857, copy of which was forwarded to Mr. Collett on the 22nd April, 1857, Mr. Hay directed this road to be put into repair. I wish to know from Mr. Collett whether this was ever done, or if not, why it was not done; and, taking Mr. Secretary Hay's view of the case, whether £1,020 will still be required to put this road in repair?

The question of any further grant for these roads will be referred to the Secretary for Lands and Works.

As

As regards the deviation at Warland's Range, I have no objection to Mr. Collett consulting Mr. Bell upon the subject, when that officer arrives; after which Mr. Collett will attend to the instructions conveyed to him in my letters of the 25th August and the 12th instant.

In order that there may be no misunderstanding on the part of Mr. Collett, as to the exact system under which the roads are to be at present carried on, enclose him a copy herewith of the letter of the Secretary for Lands and Works, dated 28th July, 1857. By this Mr. Collett will see that the roads constitute an integral part of the Railway Department, under the direction of the Chief Commissioner.

I feel it necessary to call Mr. Collett's attention to this, since from many expressions in his reports, and their general tone, there appears to be in his mind an idea of a responsibility and authority independent of the Chief Commissioner.

That officer is responsible to the Government for the due management of the roads placed under his charge; Mr. Collett is responsible to him for carrying out his orders, in compliance with the direction of the Government.

The Chief Commissioner will always be happy to receive and weigh, to the best of his ability, every suggestion, either from Mr. Collett or any other officer of the department, for the good of the public service; on the other hand, he expects from all, that spirit of subordination and cordial co-operation, in carrying out his views and wishes, without which no department can work efficiently, and without which he cannot recommend the Government to retain any officer under his orders.

I have, &c.,

JOHN RAE,
Secretary.

W. R. Collett,

Surveyor to Northern Road, Singleton.

The form referred to in the above observations of the Chief Commissioner, is not yet printed, but will be transmitted by the next post.—J. R.

NOTE.—The form forwarded on the 22/9/57.

B 2.

Roads,
Railway Department,
Sydney, 30 October, 1857.

Sir,

I am directed by the Chief Commissioner, with reference to his letters dated 13th, 22nd, and 24th instants, to inform you that renewed complaints have been received by the Honorable the Colonial Secretary, of the road at Singleton not having been yet repaired; and that he has been instructed to acquaint you, that should it be found you are either unwilling or unable to obey the instructions transmitted to you, it will be necessary to remove you from the appointment you now occupy.

I have, &c.,

JOHN RAE,
Secretary.

W. R. Collett, Esq.,

Singleton.

B 3.

EXTRACT of a Letter from the Minister for Lands and Public Works to the Commissioner for Internal Communication, dated the 14th January, 1859, in reply to a Letter from Captain Martindale on the Management of the Main Roads of the Colony.

“ 9. Referring to that portion of your letter under reply, in which you state that the remarks made by you as to the want of qualification on the part of the Superintendent of the Western Road apply to the Superintendent of the Northern Road, I am directed by the Secretary for Lands and Public Works to state that he is very much surprised to find Mr. Collett—a gentleman who possesses a larger share of the confidence of the Government, and of the public, than any other man in the Colony, as a road-maker—should be thus alluded to. Mr. Collett has within a few years constructed the Northern Road, and it is now incomparably the best of the three Great Roads; and this, notwithstanding that it had no advantage whatever, or scarcely any, from prison labour, in the earlier days of the Colony, while the Western and the Southern Roads had many thousands of pounds expended on them. Mr. Collett, I am to observe, introduced an entirely new system of dealing with the works under his charge, and employed respectable persons as overseers, and has given entire satisfaction.

“ 10. The Secretary for Lands and Public Works would therefore desire, before determining any general plan of road management, to have from Mr. Collett, as the oldest and most successful practical road-maker and manager in the public service, a report containing any suggestions he may be disposed to make upon the matter.”

B 4.

Road Branch,
Department of Internal Communication,
Sydney, 14 July, 1859.

Sir,

I am directed by the Commissioner to acknowledge the receipt of the following letters and memoranda from you, viz.:—Your letter of the 29th ultimo, 59/129, in reply to my letter of the 25th ultimo, 59/722, having reference to the charges made by Mr. Dangar against you and the overseers under your immediate orders; your memorandum of the same date, in reply to the Commissioner's Minute of the 24th ultimo, having reference to M'Donald's contract; and your letter of the 2nd instant, No. 59/156, in reply to the Commissioner's Minutes of the 27th and 29th ultimo;—and I am to inform you that the explanations afforded by you are not satisfactory to the Commissioner, and that it is his intention to bring your conduct, in these particular matters, and generally, under the consideration of the Secretary for Lands and Public Works.

The Commissioner has arrived at this decision with the greatest reluctance, but it is as impossible as useless for him to continue such a correspondence with you as you have rendered it necessary for him to commence; and he has borne with conduct in you similar to that of which he has now to complain, until he feels that he would fail in his duty were he to permit it longer.

Upon the particular papers now under consideration, I am to make the following remarks:—

1. In reference to your letter (59-129) relative to Mr. Dangar's charges, I am to inform you that Mr. Dangar's letters were sent to you in order that you might be fully acquainted with the charges preferred against you, and the overseers who are or have until very recently been under your immediate orders, and in order that you should furnish the Commissioner with a detailed report, in refutation or explanation of those charges. This you have not done.

As

As regards the arrangement for a deposit of £20, which you state you made with your overseers, and repaid to them on leaving your service, I am to observe that Mr. Dangar's complaint was the first intimation the Commissioner ever had of such an arrangement being in existence with the overseers employed under your immediate orders; and the Commissioner presumes no such arrangement now exists with Messrs. Hawthorne, Doyle, and Clements.

I am to express the Commissioner's surprise that you should refer him to Mr. Newcomen for an explanation about work carried on by that officer while employed as an overseer under you; that work should have been in progress of such a character without your being aware of it; and that you should state that Mr. Newcomen had no idea he was exceeding his duty in contracting for slabs for a bridge never sanctioned by the Commissioner, and, it would appear from your letter, never authorized by you.

The Commissioner does not understand how, in the face of the numerous explanations he has lately been compelled to call for, from you, relative to your conduct as a road superintendent, and his letter and minutes upon these explanations, you could think that Mr. Dangar's letters were sent to you by the Commissioner as a mark of his confidence in your superintendence. They certainly were not so sent, but for your report, as stated in the official letter which accompanied their transmission to you.

2nd. In reference to your memorandum of the 29th ultimo, relative to Mr. M'Donald's tender, I am to observe that, if the tender was, as you state, very ambiguous, it was in your power to have obtained full information by reference to this office, and especially as the Commissioner himself acquainted you that, though about to be absent from Sydney on duty, he could always be communicated with by telegram, and directed you, by letter, to forward your reports and papers as usual. The Commissioner had your estimate of the value of this work before him when he made his recommendation to the Government, and he did not consider it necessary, therefore, to "solicit your views" upon this matter.

As regards your statement that your certificates were for 70 per cent. only of the amount due to M'Donald, I am to observe that there was nothing whatever upon your voucher to intimate that such was the case; and that, in the £279 4s. 6d., named by you, you still improperly include 1s. per lineal yard, for forming.

The Commissioner does not understand how, in the face of the vouchers sent in as above stated, and your previous correspondence, you can state that you made no arrangements with M'Donald. He directs me to say that he is about to take the instructions of the Secretary for Lands and Public Works in this matter, but that in the meantime no money must be paid to M'Donald unless in accordance with paragraph 9 of his minute of the 24th ultimo, a copy of which is again enclosed.

3rd. As regards your letter of the 2nd instant, 59/153, the Commissioner does not comprehend why you should regard official memoranda in a different light from official letters, but his remarks are justified by both your letters and memos. At the same time the Commissioner has never in any way or at any time desired that you should not express yourself freely and frankly on all subjects.

When the Commissioner met you at Maitland on the 6th April last (a journey which the great difficulty he experienced in obtaining full and satisfactory explanation on the subject of expenditure from you, without endless correspondence, rendered necessary), he repeatedly asked you if you were certain that you were acquainting him with all the liabilities you had incurred, and he arranged to pay all that you then informed him was due, and even to meet contracts to which, without authority, you had pledged yourself; and the Commissioner cannot attach much weight to your excuse that you had not your accounts with you, because his interview with you was only the conclusion to a long correspondence on the subject of your expenditure, and he is under the impression that, although you had not actual vouchers, yet you had a memorandum book to which you referred, and from your present letters and other circumstances he is disposed to attribute the erroneous statement made by you to him rather to your ignorance of the amount of work going on in your district, and to the fact, as stated by you, of contractors having ventured to execute work upon the road under your charge, without any authority, than to your not having accounts with you. But I am to observe that at any rate it was your duty as soon as you became acquainted with the discrepancies between the information given by you to the Commissioner, and the facts, to have communicated them to the Commissioner, and to have requested instructions, and the Commissioner cannot, for a moment, admit that your views upon road-making may, as you intimate, be considered as a palliation of "apparent negligences and extravagancies," and disobedience to the Commissioner's instructions.

In reference to the £1,500, and the manner in which you have expended it, I am to refer you again to my letters to you of the 9th March and 12th April last, and the papers which accompanied them, which in the clearest way defined how, when, and where this amount was to be expended, and shewed that no more funds were available, but to which you do not appear to have attended, and I am to observe that as vouchers are sent in and paid weekly, there ought not have been any difficulty arising from "winding up Mr. Newcomen's accounts."

In reference to paragraph 4 of your letter, I am to observe that no instructions have been sent to you to do work where contracts have been advertized for.

In reference to paragraph 5 of your letter, the Commissioner has never directed you to issue public tenders for the maintenance of the road in the Scone district, and desires that you will forward him copies of the notices issued, and state how, when, and where they have been made public; and he requests that you will not in future issue such notices without first obtaining his sanction. He is unable to concur in your view of the peculiar dangers and difficulties of the Scone district.

The explanation offered by you in the 6th paragraph of your letter is no justification for disregard of the Commissioner's orders, and the Commissioner fails to see why the overseers should be quoted, or that it is not their interest to give satisfaction to the Superintendent—their immediate superior.

After the opinion expressed by you in the 7th paragraph of your letter, the Commissioner is not surprised to find that day labour has been continued in your district, and that any attempts you may have made to introduce task-work have been so unsuccessful; and he has no hesitation in expressing his belief, that had it been possible for him to have been on the spot himself, or to have sent the Engineer for Roads, or the Clerks of Works, any difficulty about the introduction of task-work would have been overcome.

The Commissioner has until now given you every credit for zeal of purpose and energy of action, but the fact of Mr. Newcomen executing work of which you had no knowledge, and of Messrs. Miller & Co. carrying on work without any authority, and to an extent of which you were not aware, and also of the manner in which it appears Mr. Margrie has been paying his workmen, respecting which the Commissioner has called upon you for explanation, tend to shake the opinion he had previously entertained; at any rate, the Commissioner must observe that zeal and energy are dangerous qualities when coupled with disregard of orders.

It is because the Commissioner has found it necessary so frequently, both personally and by letter, to warn you against unauthorized expenditure, against disregard of orders, and against the use of language highly improper in official correspondence, and has found all his warnings set at naught by you; and because, even were it advisable, which it is not, it would be impossible with his other duties, for him to be from time to time occupied with such a correspondence as the present, that he feels it his duty to bring your conduct under the consideration of the Secretary for Lands and Works.

I have, &c.,

JOHN RAE,

Secretary.

W. B. Collett, Esq.,
Singleton.

B 5.

*Road Branch,
Department of Internal Communication,
Sydney, 15 July, 1859.*

Sir,

I regret much to be compelled to bring the name of Mr. Road Superintendent Collett unfavorably under the attention of the Secretary for Lands and Public Works; the conduct of that officer leaves me no alternative.

In the beginning of the present year the system to be pursued for the management of the Main Roads was discussed at great length, both in writing and verbally, by Mr. Secretary Robertson with myself, and I finally received his instructions as to the measures that I was to take for their construction and maintenance.

On the 15th March, as soon as the Estimates were passed, I addressed to Mr. Collett a letter containing the *most detailed* statements of the funds available for the division of the Northern Road under his charge, and of the localities in which they were to be expended. I sent instructions to Mr. Collett that road construction was invariably to be carried out by contract, unless otherwise specially ordered, and road maintenance wherever possible—day labour being continued, as a necessary evil; only where contract or task-work was found to be impossible; and I directed Mr. Collett to transmit, for my consideration, as early as possible, statements and specifications of the works he proposed to carry out with the funds available, together with a memorandum shewing distinctly his expenditure, and all liabilities to the 31st March, so as to enable me to make exact arrangements for calling for tenders, &c.

It was necessary to obtain this latter information from Mr. Collett, because that officer had both spent money and incurred liabilities without my sanction, to an extent of which I was ignorant, and for which I had severely censured him; but the statements and specifications I received in reply to my letter of the 15th March were useless, and the information relative to the expenditure was so vague and unsatisfactory, that I finally determined, as the only course left, to go myself to Maitland, with the Assistant Engineer for Roads, and to settle on the spot, with Mr. Collett, the arrangements I found it all but impracticable to conclude by means of correspondence.

I met Mr. Collett on the 5th April last. I took his own statement of his past expenditure. I arranged with him to provide funds to meet not only that, but also a sum of £859, to meet liabilities, (including even contracts made without my sanction, and the current expenses to the 9th of April), and I decided with him for what works and to what amount tenders should be called for, and in so doing I provided a sum of £1,500 for the salaries and allowances of overseers, and the maintenance of the road by task-work, till the end of the year; and being aware that Mr. Collett had no practical knowledge of how to draw specifications, &c., I directed the Assistant Engineer for Roads to prepare these.

My letter and enclosure to you of the 9th April submitted the arrangements I then made for the consideration of the Secretary for Lands and Public Works, by whom they were sanctioned.

On the 12th April a copy of my last-named letter and enclosure were transmitted by me to Mr. Collett, together with the necessary instructions, and copies of the specifications, form of tender, &c.

On the 28th April I left Sydney, to inspect the Southern Road, and did not return until the beginning of June. Almost immediately after my arrival I had to return several vouchers of Mr. Collett's, without payment, for explanation of the number of sub-overseers and day labourers still employed, and I received the impression that Mr. Collett had not been endeavouring to carry out the views of the Government relative to the introduction of task-work, but was persisting in the former system of day-work.

Mr. Collett has long known the views of the Government relative to the abolition of day labour: he was, besides, instructed on the 5th March, that the repair and maintenance of the roads were to be carried out by contract or task-work; his plea of the men requiring a month's notice after the 5th April will therefore be seen to be of little value: and I am assured that, had Mr. Collett been sincerely desirous of introducing the system of task-work, in accordance with his instructions, no difficulty existed that might not have been easily overcome.

On the 30th May Mr. Collett addressed to me a letter, stating that after reserving £493 14s. 9d., for the payment of the overseers, and their allowances, he had expended, in addition to the £859, the whole of the £1,500 allotted for minor repairs and maintenance till the end of the year, with the exception of £310 13s. 6d., and requests "my advice." The real balance in hand, however, on the 28th May, was only £627 6s. 6d. in all, excluding from the amount spent £126 14s. for work done by Messrs. Miller, but Mr. Collett states without his authority, leaving, after providing for the overseers, a balance of only £133 10s. 9d., for maintenance, and this has since been spent. This letter arrived in my absence, and on examining into the matter, on the 11th June, a few days after my return, I found that it would require me to review all the arrangements made by me with Mr. Collett. It was not, therefore, until the 29th June that more urgent matters permitted me to address Mr. Collett, when I called upon him, in reference to my letter of the 12th April, for a report of his expenditure, and informed him that if his explanation was not satisfactory, it would be my duty to bring his conduct under the attention of the Secretary for Lands and Public Works.

Mr. Collett's explanation is not satisfactory to me; I enclose it, together with my reply of the 14th instant, and copies of his letter of the 30th May, and my reply of the 29th ultimo, for the information of the Secretary for Lands and Works.

Before leaving this subject I may state that, between the 1st July, 1855, and 30th June, 1859, there has been expended upon the Northern Road about £49,500; on the Western Road £12,293; on the Southern Road about £34,784. Of the expenditure upon the Northern Road about £48,000 have been spent between Black Creek and the Gap, a distance of about 84 miles, and by it about 30 miles of road have been formed and ballasted, and a considerable portion of the remainder improved.

It will be seen that my reply of the 14th instant adverts to several other matters upon which it is necessary that I should give some explanation.

1st. In reference to M. Dangar's charges against Mr. Collett and his overseer, I enclose copies of the letter transmitting Mr. Dangar's letters to Mr. Collett for report, and of his reply.

2nd. In reference to Mr. M'Donald's contracts I enclose a copy of specification and tender, of my minutes upon the vouchers transmitted, and of Mr. Collett's reply.

I enclose also copies of the correspondence relative to Mr. Margrie.

Upon these matters I take leave further to observe, that however reprehensible I consider Mr. Collett's conduct, I might not have thought it necessary to take such serious notice of it, as I feel it my duty now to do, had it not been that I have so frequently, and as it now appears, so vainly, drawn Mr. Collett's attention to the impropriety of his incurring unauthorized expenditure, to his disregard of orders, and to the tone of his official correspondence. In September and October, 1857, very soon after a portion of the Main Roads were placed under my charge, I wrote to Mr. Collett in the strongest terms on these subjects, even informing him, by direction of the Colonial Secretary, that if he was unwilling or unable to obey orders he must be removed, and Mr. Collett replied, requesting his misconceptions might be overlooked, and they were so.

In the beginning of the present year again, I had repeatedly to write to Mr. Collett on the subject of incurring expenditure without authority, and to state that I would not honor his vouchers; in February I returned to Mr. Collett a letter, on account of its improper tone, and gave him the opportunity of revising it; and I had to write again upon the same subject in March.

Throughout my official intercourse with Mr. Collett, I have had the greatest trouble in exercising any control over his expenditure, or in obtaining from him accurate information as to where and upon what the money was being expended by him, a difficulty rendered greater by the impossibility of frequent

frequent personal inspection, and causing an amount of correspondence and of labour in examining vouchers and returns totally needless, and such as seriously to interfere with my more important duties.

Many circumstances have prevented my bringing the conduct of Mr. Collett under the attention of the Government until now. In 1857, I had but lately arrived in the Colony; it was not till the middle of 1858 that the Main Roads Act was passed; and only in September of that year that I was able to visit that road, and judge for myself. During that time, and in the course of this year, I have personally, and at the cost of incredible correspondence, done all in my power to induce Mr. Collett so to work as to enable me to feel it right that he should be retained in the department placed by the Government under my direction. I have failed, and feel it would be mere weakness and waste of time to make further endeavours, and I have come to the conclusion, though with great reluctance, that it is my duty to recommend the Government to dispense with Mr. Collett's further services in the Road Branch of this Department.

The Under Secretary
for Lands and Public Works.

I have, &c.,
B. H. MARTINDALE.

B 6.

*Department of Public Works,
Sydney, 10 November, 1859.*

Sir,

Referring to your letter of the 10th August last, on the subject of the charges of dereliction of duty and insubordination preferred against you by the Commissioner for Internal Communication, I am directed to inform you, that the Secretary for Public Works has, under the recommendation of the Commissioner, approved of your being allowed another trial.

2. I am, however, at the same time to severely reprimand you, and to state that your conduct has given the Government great dissatisfaction.

3. Mr. Secretary Eagar desires me to add, that should you give occasion for any further complaint, you will at once be dismissed the service.

I have, &c.,
B. H. MARTINDALE,
Under Secretary.

W. R. Collett, Esq.,
Road Superintendent,
Singleton.

C.

*Road Branch,
Department of Public Works,
Sydney, 11 June, 1861.*

Sir,

Referring to your letter of the 1st instant, relative to the contract from Cohen's to Brodie's Bridge, in which you complain of an undue preference having been given to certain parties, I am directed by the Commissioner to inform you, that the matter has been inquired into, and the overseer reprimanded by the Superintendent for not giving greater publicity to this task-work, which, however, in the aggregate, will not exceed £200, and will form a continuous ballasted road for 10 miles in length, being the same distance as the ballasted road in the vicinity of Scone, so that no undue preference has been shewn to either township.

Thomas Dangar, Esq., M.P.,
&c., &c., &c.,
Wce Waa.

I have, &c.,
S. G. SHAIRP,
Chief Clerk.

WAGGA WAGGA BRIDGE COMPANY'S BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, to whom was referred on the 27th September last, the "*Wagga Wagga Bridge Company's Bill*," and on the 1st instant, "*a Petition from certain Inhabitants of Gundagai, Tumut, Adelong, and the surrounding Districts*," beg leave to report to your Honorable House,—

That they have examined the several witnesses named in the margin* (whose respective evidence will be found appended hereto), and that the Preamble of the Bill, as verbally amended, having been proved to the satisfaction of your Committee, they proceeded with the several Clauses and Schedules, in the consideration whereof it was deemed necessary to make the Amendments shewn in the accompanying Schedule.

* Mr. R. Driver, junr.
Mr. G. Forsyth.
Mr. E. O. Moriarty.
C.E.
Mr. D. Howison.
Mr. J. G. Church.
Mr. A. G. M'Lean.
Page 5.

With reference to the prayer of the Petition referred to them, your Committee have taken the evidence of two of the Petitioners,* and have duly ascertained that the provisions in the said Bill are such as to insure the navigation of the Upper Murrumbidgee from being impeded by the erection of the proposed Bridge.

* Mr. G. Hart.
Mr. D. Winton.

And your Committee now beg to lay before your Honorable House the Bill as amended by them.

WILLIAM MACLEAY,

Chairman.

*Legislative Assembly Chamber,
Sydney, 15 October, 1861.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 2 OCTOBER, 1861.

MEMBERS PRESENT:—

Mr. Mate,		Mr. Morris,
Mr. Macleay,		Mr. Wilson.

W. Macleay, Esquire, called to the Chair.

Printed copies of the Wagga Wagga Bridge Company's Bill upon the Table.
Petition from certain inhabitants of Gundagai, Tumut, Adelong, &c., before the Committee.

Same considered.

Promoters of the Bill:—Certain Directors and Shareholders of the Wagga Wagga Bridge Company.

Solicitor for the Bill:—Mr. W. G. M'Carthy, present.Richard Driver, Junior, Esquire, *M.P.*, *Solicitor*, examined.

Letter from the Department of Lands, No. 61-663, dated 27 March, 1861, and Lithograph Plan of the Town and Environs of Wagga Wagga (enclosed in the former), severally produced by Witness.

Mr. George Forsyth, *Director*, *Wagga Wagga Bridge Company*, examined.

Mr. Edard Orpen Moriarty, *C.E.*, *Engineer-in-Chief for Harbors and River Navigation*, examined.

Specification and five (5) Plans in reference to a Timber Bridge, to be constructed over the Murrumbidgee River, at Wagga Wagga, severally produced by Witness.

Committee inspected the Plans.

Mr. Davis Howison, *Surveyor*, examined.

Mr. John George Church, examined.

[Adjourned till Tuesday, 8th instant, at *Eleven o'clock*.]

TUESDAY, 8 OCTOBER, 1861.

MEMBERS PRESENT:—

W. Macleay, Esquire, in the Chair.

Mr. Mate,		Mr. Morris.
-----------	--	-------------

Solicitor for the Bill:—Mr. W. G. M'Carthy, present.

Original Deed referred to in the Preamble of the Bill, together with a Certificate of the Shares which have been taken up, severally produced by the *Solicitor for the Bill*.

Mr. George Hart, *Petitioner* for such provisions as will protect the Navigation, examined.

The *M.S.* Evidence given by Mr. Forsyth, on the 2nd instant, read, by direction of the Chairman.

Mr. David Winton, *Petitioner* for such provisions as will protect the Navigation, examined.

[Adjourned till Tuesday, 15th instant, at *Eleven o'clock*.]

TUESDAY, 15 OCTOBER, 1861.

MEMBERS PRESENT:—

W. Macleay, Esquire, in the Chair.

Mr. Hay,		Mr. Morris,
Mr. Mate,		Mr. Wilson.

Solicitor for the Bill:—Mr. W. G. M'Carthy, present.

Mr. M'Carthy stated that the Acting Surveyor General would be in attendance shortly, with a view to afford further evidence on the site approved for the erection of the Bridge.

Committee proceeded to consider the Preamble of the Bill.

And the same having been verbally amended—(*Vide Schedule of Amendments*)—

Motion made, (*Chairman*) and Question,—That this Preamble, as amended, stand part of the Bill,—*agreed to*.

Clauses 1 and 2 then severally read and agreed to.

Clause 3 amended (*Vide Schedule*) and agreed to.

Clauses 4 and 5 severally read and agreed to.

Clauses 6 and 7 severally read and expunged.

New Clause, 6, read and agreed to.

Clause 8 (now 7) amended (*Vide Schedule*) and agreed to.

Clauses

Clauses 9 to 17 severally read and expunged.
 Clause 18 (now 8) amended (*Vide Schedule*) and agreed to.
 Clauses 19 and 20 (now 9 and 10) severally read and agreed to.
 Clause 21 (now 11) amended (*Vide Schedule*) and agreed to.
 Clause 22 (now 12) read and agreed to.
 Clause 23 (now 13) amended (*Vide Schedule*) and agreed to.
 Clauses 24 to 26 (now 14 to 16) severally read and agreed to.
 Clause 27 (now 17) amended (*Vide Schedule*) and agreed to.
 Clauses 28 to 30 (now 18 to 20) severally read and agreed to.
 Clause 31 (now 21) verbally amended (*Vide Schedule*) and agreed to.
 Clauses 32 and 33 (now 22 and 23) severally read and agreed to.
 Clauses 34 and 35 (now 24 and 25) verbally amended (*Vide Schedule*) and agreed to.
 Clauses 36 and 37 (now 26 and 27) read and agreed to.
 Clause 38 (now 28) verbally amended (*Vide Schedule*) and agreed to.
 Clauses 39 to 42 (now 29 to 32) severally read and agreed to.
 Clauses 43 and 44 (now 33 and 34) severally amended (*Vide Schedule*) and agreed to.
 Clauses 45 and 46 (now 35 and 36) severally read and agreed to.
 Clause 47 (now 37) read and considered.

And the Witness being present,—

Mr. Alexander Grant M'Lean, *Acting Surveyor General*, examined.

Clause 47 (now 37) further considered and agreed to.

Clauses 48 and 49 (now 38 and 39) severally amended (*Vide Schedule*) and agreed to.

Clause 50 (now 40) read and agreed to.

Clause 51 (now 41) amended (*Vide Schedule*) and agreed to.

First Schedule read and expunged.

New Schedule proposed to be substituted,—read and agreed to.

Second and Third Schedules severally read and agreed to.

On motion of Mr. Hay the Petition from certain inhabitants of Gundagai, Tumut, Adelong, and the surrounding Districts, ordered to be appended to the Report and Evidence. Separate Appen-
dix. Page 16

Chairman requested to report the amended Bill, and to state that the Committee have duly ascertained that the provisions of the Bill insure the navigation from being impeded by the proposed Bridge.

SCHEDULE OF AMENDMENTS.

Page 1, Preamble, line 11. Omit "to be appointed or"; insert "which has been"

 " 2, clause 3, lines 14 and 15. Omit "William Stewart Mitchell"
 " clause 3, line 15. Omit "and"
 " clause 3, line 15. After "Baylis"; insert "and Henry Wallace"
 " clause 6, lines 27 to 49. Omit clause 6, viz. :—

" It shall be lawful for the said Company to make and construct a good and substantial Bridge of not less than _____ feet
 " in width across the River Murrumbidgee from _____
 " to or near _____ with all necessary wharves piers
 " landing places buildings gates and other works and conveniences and
 " upon the completion of the said Bridge with roads and approaches thereto
 " to receive and take the tolls for the use thereof hereinafter specified and
 " authorized to be taken and from and after such completion to make and
 " continue a Road from such Bridge through and to make and continue a
 " Road from the said Bridge to _____
 " at one or more points and from _____
 " to _____ and also to make a branch road from _____

" and for the foregoing purposes to appropriate and use the Lands of the
 " Crown as described in the _____ Schedule hereto Provided that before
 " any such Bridge shall be commenced to be constructed a plan and specifi-
 " cation thereof shall be laid before and approved by the Minister for Public
 " Works And provided further that no Bridge constructed by the said
 " Company shall be so constructed as to obstruct the navigation of the River
 " aforesaid"; insert new clause, viz. :—

" 6. It shall be lawful for the said Company to make and construct a good and
 " substantial Bridge of not less than twenty-five feet in width across the River
 " Murrumbidgee at a site which has been approved of by the Government
 " between Crampton-street and Travers-street in the Township of Wagga
 " Wagga with all necessary wharves piers embankments landing-places build-
 " ings gates and other works and conveniences and to make proper roads and
 " approaches to the said Bridge from the existing public streets and roads
 " through over and along the Waste Lands of the Crown contiguous thereto
 " and upon the completion of the said Bridge to receive and take the tolls for
 " the use thereof hereinafter specified Provided that the said Bridge shall
 " be so constructed as not to obstruct the navigation of the said River."

Pages

Pages 2 and 3, clause 7, lines 50 to 6. Omit clause 7, viz. :—

" 7. Before commencing any such Bridge Roads or Works as aforesaid by this Survey and Plans
 " Act authorized to be made the said Company shall by some qualified
 " Surveyor to be by them appointed cause to be made proper surveys of the
 " sites or lands over or through which it is proposed the same should be
 " constructed with a map or plan describing the houses and buildings (if
 " any) grounds and premises required to be used or taken for the purposes
 " aforesaid together with a book of reference in which shall be entered the
 " names of the owner or proprietor (if known) of each and every portion
 " of the said sites and lands on or through which it is proposed to construct
 " the said bridge roads and works and the nature and quality the state of
 " cultivation the inclosures (if any) and the quality of such land which shall
 " or may be required for such bridge roads and works respectively."

Page 3, clause 8, lines 9 and 10. Omit " or any person "

Page 3, clause 8, lines 18 to 27. Omit " the said Company their agents and
 " workmen doing as little damage as may be in the execution of such survey
 " and if required so to do making full satisfaction in manner hereinafter
 " mentioned to all persons interested in any land which shall be required by
 " such survey or by any steps which may be taken to ascertain the value of
 " the soil or the substrata of such lands as aforesaid And this Act shall be
 " sufficient to indemnify the said Company and all other persons for what
 " they or any of them shall do by virtue of the powers hereby granted in
 " the execution of such Survey and examination as aforesaid"; insert " and
 " to take remove carry away and use any earth stone gravel timber or any
 " other material from such Lands of the Crown which may be proper for
 " making maintaining altering repairing or using the said Bridge."

Pages 3 and 4, clauses 9 to 17, lines 28 to 57. Omit the following clauses, viz. :—

" 9. All maps plans and books of reference relating to such survey or surveys Public may inspect Plans.
 " as aforesaid shall for thirty days before the commencement of the
 " formation of any such Bridge Works and Roads as are hereby authorized to
 " be made or any part thereof be kept in the office of the said Company at
 " Wagga Wagga and all persons shall and may have free liberty and per-
 " mission to view and examine the same at all convenient times after the
 " publication of the notice hereinafter mentioned.

" 10. As soon as the said Company shall have determined upon making any Notices of intended Works.
 " bridge works and roads as aforesaid they shall by advertisement in the
 " Gazette and in one or more newspapers published in Sydney and at Wagga
 " Wagga at least thirty days before the commencement of the formation of
 " any such Bridge Works and Roads respectively give notice that they intend
 " to make the same or such part thereof as the said Company may think fit
 " in accordance with the said survey and the map or plan and book of
 " reference.

" 11. A copy of the map or plan and book of reference relating to every such Plan to be sent to Minister for Public Works.
 " survey or surveys shall thirty days before the commencement of the
 " formation of any such Bridge Works and Roads as are hereby authorized
 " be transmitted to the Minister for Public Works.

" 12. It shall be lawful for the said Company by their directors agents officers Appropriation of Lands &c.
 " surveyors and workmen and all other persons by them authorized to take
 " and appropriate to the use of the said Company and for the purposes of this
 " Act such of the lands so stated or otherwise ascertained or set out and
 " shown in the said map or plan and book of reference as they shall think
 " necessary for the making and constructing and the convenient operation or
 " use of the said Bridge Works and Roads hereby authorized to be made and
 " constructed without any previous agreement with the owner or occupier of
 " the said lands and the said Company their agents and workmen doing as
 " little damage as may be in the execution of the powers hereby granted and
 " the said Company if required to do so making full compensation in manner
 " hereinafter mentioned to all persons interested in any lands which shall be
 " taken used or injured for all damages to be by them sustained in or by the
 " execution of the power hereby granted.

" 13. When the said Company shall have finally determined on the appropria- Intended Appropriations to be advertised &c.
 " tion for the purposes of this Act of such land as shall have been so shown
 " in the said map or plan and book of reference subject to such modifica-
 " tions as shall have been required by the Minister for Public Works the
 " said Company shall by advertisement in the Gazette and in one or more
 " newspapers published in Sydney and at Wagga Wagga give notice that such
 " appropriation has been so determined upon in accordance with the said map
 " or plan and book of reference subject to such alterations as shall have
 " been made therein by the said Minister for Public Works and the said map
 " or plan and book of reference if any alteration shall have been made
 " therein shall be kept in the office of the said Company at Wagga Wagga
 " and all persons shall have free liberty to view and examine the same at all
 " convenient times after the publication of the last mentioned advertisement
 " and such last mentioned advertisement shall be deemed an act of final
 " appropriation of the lands determined to be taken.

" 14.

- " 14. When any lands which the Company are by this Act authorized to take without the previous consent of the owner or occupier shall have been set out taken and appropriated for the purposes herein mentioned such lands and the fee simple and inheritance thereof and all the estate use trust and interest of all persons therein shall thenceforth by virtue of this Act and without other assurance in the law become and be vested in the said Company and their successors for ever for the purposes of this Act. Appropriation when final to vest land in Company.
- " 15. The owners and all persons interested in any lands so taken appropriated used or prejudiced as aforesaid or under any of the provisions herein contained and all persons who shall have sustained any loss or damage whatsoever in or by the execution of this Act shall be entitled to reasonable compensation for the loss or injury sustained by them and such compensation shall be ascertained assessed and awarded as hereinafter mentioned. Provided that such compensation shall be claimed within the period of two years from the date of the advertisement hereinbefore required of the intention of the Company to make such part of the said works hereby authorized as shall have occasioned such taking and appropriation or such loss or damage. Compensation to owners.
- " 16. In case the said Company and the claimant shall not agree as to the sum to be paid for such compensation nor upon the same being settled by arbitration as hereinafter provided the amount shall be determined in the Supreme Court or if the claim do not exceed two hundred pounds in the District Court of the District by an action for damages to be brought by the claimant against the said Company. Provided that in every such action the said Company may plead any tender which they may have made in bar thereof or paying into Court the amount of money tendered or may pay into Court such sum as the Company shall think fit and plead such payment in bar of the further maintenance of such action and whatsoever party shall succeed in such action shall be entitled to costs to be awarded and recovered according to the practice of the Court. Non-compensation to be enforced.
- " 17. In estimating the purchase money or compensation so to be paid by the said Company for any land purchased or taken regard shall be had not only to the value of such land but also to the damage (if any) to be sustained by reason of severance or other injury by the exercise of the powers of this Act." Severance &c. to be allowed for.

1861.

Legislative Assembly.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

WAGGA WAGGA BRIDGE COMPANY'S BILL.

WEDNESDAY, 2 OCTOBER, 1861.

Present:—

Mr. MACLEAY,		Mr. MORRIS,
Mr. MATE,		Mr. WILSON.

WILLIAM MACLEAY, Esq., IN THE CHAIR.

Present for Parties:—

W. G. M'Carthy, Esquire, Solicitor for the Bill.

Richard Driver, Junior, Esquire, M.P., examined:—

1. *By Mr. M'Carthy:* You are the Solicitor who drew this Bill? Yes.
2. And you also prepared the deed of settlement referred to in the Preamble? Yes.
3. You are aware, of your own knowledge, that a Joint Stock Company has been established for the object named in this Bill? Yes; at Wagga Wagga.
4. Can you state what is the date of the deed of settlement? I have only the draft of it here; the deed having been executed at Wagga Wagga, the date was filled in there, but I believe it is the 23rd August, 1860, as mentioned in the Bill.
5. Can you say whether sufficient provision has been made in the settlement for the management of the affairs of the Company by Directors? In my opinion sufficient provision has been made.
6. Can you tell at what sum the capital of the Company is fixed? £4,000.
7. Is there any power to increase? There is power to increase to a limited amount.
8. Are you aware whether the Company have obtained the license of the Crown to appropriate land for the abutments of the bridge? I am.
9. Is that license conveyed by letter from the Secretary for Lands? Yes. (*Letter produced*) This I received on the day of its date.
10. Is this the lithographic plan referred to in that letter? Yes. (*Plan produced.*)
11. Have you any knowledge of the locality which would enable you to say whether the erection of a bridge, as proposed, would be greatly for the benefit of the inhabitants? I know nothing of the locality of my own knowledge, but from information I have received, I believe it will be very greatly for the convenience of the residents of the district and parties travelling in that direction.
12. *By Mr. Mate:* To what extent are the shareholders liable under the deed of settlement? "In proportion to his or her interest for the time being in the funds or property of the Company." That is under the 30th clause of the deed of settlement. "And no proprietor shall be liable to any person except to the extent to which he shall not have paid up his shares in full and not further or otherwise."

R. Driver,
Junr., Esq.,
M.P.

2 Oct., 1861.

R. Driver,
Junr., Esq.,
M.P.

2 Oct., 1861.

13. Then he is not liable to an amount greater than his shares? No.
14. *By Mr. Morris:* That is to say, to an amount equal to the amount of his shares, exclusive of what property he has in the bridge? Yes.
15. I apprehend the shareholders are liable for double the amount of their shares. Is the deed of settlement in accordance with the last clause of the 40th section of the Bill, which provides "that in the event of the assets of the Company being insufficient to meet its engagements the shareholders shall in addition to the amount already paid and to be paid upon their shares in the capital of the said Company, be responsible to the extent only of a sum equal to double the amount of their shares?" To the best of my belief it is. It is some time since I read through the deed of settlement, but to the best of my belief it agrees with the Bill before the Committee, in every respect.

George Forsyth, Esquire, called in and examined:—

G. Forsyth,
Esq.

2 Oct., 1861.

16. *By Mr. M'Carthy:* Are you one of the Directors of the Wagga Wagga Bridge Company? I am.
17. From your knowledge of the locality are you aware that it will be a public benefit that a bridge should be erected over the Murrumbidgee at Wagga Wagga? I am.
18. Can you state whether the whole amount of capital has been taken up? £4,000 have been taken up, and ten per cent. paid up.
19. That is £400? £400 have been paid up.
20. Have you examined the plans and specifications of the proposed bridge? Yes, I have looked at them.
21. Do they, in your opinion, make sufficient provision for the navigation of the river? They do. I speak on my own opinion, and on an expressed opinion of Captain Cadell, the Manager of the Murray River Steam Navigation Company, whom I asked on the subject, and who saw the plans.
22. He was satisfied with them? He was satisfied that no impediment would be offered to the navigation.
23. Do you mean in ordinary times? I mean in the ordinary times that steamers can ply on the river. Whenever a steamer can ply on the river she can pass under that bridge by striking her funnel.
24. The river is subject to floods? It is subject to floods, but I have not seen it over the banks for the last five years.
25. During such floods as you speak of, the navigation would not be impeded by the bridge? The navigation would not be impeded by the bridge, the bridge being to be erected six or seven feet above the banks, according to the plan I saw—seven feet I think it is.
26. *By the Chairman:* What distance do you think it is necessary to allow for the passage of a steamer? The Directors had the paddle-boxes of the "Gemini" measured, and I think they ran eighteen feet, so that if the river were within eleven feet of the top of the bank the steamer could pass through.
27. And when the river is at that height you believe it would be dangerous for a steamer to ply? Yes, dangerous in consequence of the drift. I have never seen a steamer running when the river was at that height.
28. Did Captain Cadell express himself to the effect that he did not consider that a steamer could navigate the river when it was so high? He said it was dangerous when the river was up, in consequence of the drift.
29. And he was quite satisfied with the plan? Yes. We anticipated opposition at first, in consequence of a low level being proposed for the bridge; a high level was then adopted, and he expressed himself satisfied with it.
30. *By Mr. M'Carthy:* I suppose he, as a Director of the Murray Steam Navigation Company, is more interested than other people in keeping the navigation of the river free? Yes, much more.
31. Are you aware that an objection has been made by the inhabitants of Gundagai—that a petition has been presented? I have heard that a petition has come down, but I do not know the purport of it.
32. You have had no conversation with any Gundagai people on the subject? No, except that I spoke to a storkeeper from Gundagai this morning, Mr. Emanuel, and he seemed to think they hardly wanted steamers at Gundagai, because the rates of carriage from Sydney were less than goods could be taken for by the steamers to Gundagai; it costs £14 by the steamers, and carriage from Sydney is £12. Only one steamer has ever passed up to Gundagai since steamers navigated the river; at the second attempt they got thirteen miles from Wagga Wagga, and had to unload their cargo; and the attempt was never made again.
33. *By Mr. Morris:* Has the flood in the river ever risen higher than within eleven feet of the bank during the last five years? Yes, two or three times.
34. How near to the top of the bank? Within two feet on one occasion, and on other occasions five or six feet.
35. Of course on such occasions as that the bridge would not admit steamers under it? No; but a steamer would not attempt to go up at such times; she would haul-to for safety until the river fell, which would occur in forty-eight hours; it is seldom up more than forty-eight hours.
36. Were you living at Wagga Wagga during the great flood seven or eight years ago? I was living at Tareutta then.
37. How long did the flood remain up on that occasion? Over the flats?
38. Yes? It remained up one day.

39. So that, under any circumstances, the navigation of the river could never be impeded more than two or three days? I should say one day.

40. And that only on extraordinary occasions? Yes; when the water broke over the banks of the river.

41. *By Mr. Wilson:* At such times the navigation would be impeded from other causes? Yes, by the drift.

42. *By Mr. Morris:* Do you know the rate of the current? About four miles in flood, but the usual current is from two miles and a half to three miles.

43. I suppose the erection of such a bridge is of great importance to the district? Of most vital importance. We have nothing but punts at present, and the least rise in the river causes them to stop working.

44. The bridge would greatly facilitate the communication of the country on the north side of the Murrumbidgee with Victoria, by way of Wahgunyah? Yes, a large proportion of the stock from the northward, by way of Bathurst, passes by that route to Victoria and the Billibong.

45. *By Mr. Mate:* It is in the town that you contemplate putting the bridge? Yes, at the lower end of the town, where a large reserve exists, consisting of the racecourse and commonage. The site was left to the Government to fix upon, and they sent Mr. District Surveyor Adams to report upon it, who, after searching up and down, approved of this spot as the most eligible.

46. *By Mr. M'Carthy:* How far off is the next public crossing place or available ford from Wagga Wagga? Sixty miles down the river, and fifty up—one at Gundagai, and the other at Narrandra.

47. Those are the points nearest to Wagga Wagga, at which the river can be crossed? The nearest points where it can be crossed.

48. *By Mr. Morris:* The specifications of the proposed bridge are prepared? Yes; in fact we have taken a contract, subject to our getting the proposed Bill. I may remark that the whole of the steamers that have come up the Murrumbidgee, except the one that went up to Gundagai, have landed their goods at the wharf below where the bridge is supposed to be built; out of some thirty trips that have been made up the river, twenty-nine have unloaded there.

49. *By Mr. M'Carthy:* Can you state what number of stock are likely to cross at that point annually? I am only able to answer in round numbers; but I should say one hundred and fifty thousand sheep, forty thousand cattle, and five or six thousand horses, pass there in the course of the year, from the northward to the southward.

50. *By Mr. Morris:* The route by Wagga Wagga is more advantageous than any other for stock travelling to Victoria from Bathurst, the head of the Lachlan, and all the Northern and Western country, being better grassed and watered than any other route? Yes, it is well grassed and watered, and a better road. It is the road most adopted by persons travelling from the northward.

51. During the last two years has it not been the case that people travelling in that direction have preferred it to the route by Hay? Yes; they embrace the whole Billibong country by going that route, and consequently, if they have stock for sale, they have a better chance of disposing of them. I never heard the objection raised that we were going to impede the navigation of the Murrumbidgee until I came here yesterday.

52. From your acquaintance with the gentlemen who have formed themselves into this Company, do you feel satisfied that they will carry out the work they propose to do? Yes, I am quite sure they will carry out the work. The Company consists of only a few individuals.

53. And they have quite the means to perform what they propose? Yes, I am sure they will do it, inasmuch as they have already accepted a tender for £5,800 to build the bridge, contingent on this Bill being granted.

54. *By the Chairman:* With reference to the scale of charges is it not intended to make them the same as those of the Wahgunyah Bridge? Yes, I know it is the wish of the Directory that the charges should be assimilated to those of the Wahgunyah Bridge.

Edward Orpen Moriarty, Esquire, called in and examined:—

55. *By Mr. M'Carthy:* Did you make the plans and specifications for the Wagga Wagga Bridge? Yes. Edward Orpen Moriarty, Esq.

56. Do you produce them here? I do. (*Plans produced.*)

57. Does the plan of the bridge provide for maintaining a free navigation of the river at all times? At all times except at the top of the flood level; for all ordinary states of the river it provides for the navigation. 2 Oct., 1861.

58. What is the height of the bridge above the flood level? The height of the bridge above the highest known flood—I mean the great flood of 1852, when Gundagai was swept away—will be two feet, as near as we can get the level.

59. What will be the height above floods of an intermediate character—between that extraordinary flood and ordinary freshes? That is a very varying quantity; every flood would give you a different height; but I have provided a headway of eighteen feet after the river has risen fourteen feet above its ordinary level. As far as I can learn—of course I am entirely guided by hearsay—that is about the state of the river when navigation would about cease; when it gets beyond that I apprehend steamers would be scarcely able to pass up, on account both of the velocity of the current and the large quantities of drift wood, which would be apt to obstruct their passage up.

- Edward Orpen Moriarty, Esq.
2 Oct., 1861.
60. Do you know the height of ordinary steamers above the water? I think about fifteen feet, but I have allowed eighteen feet.
61. With depressed funnel? Yes, allowing the funnel to be lowered.
62. Then, whenever the river is navigable at all, the proposed bridge would not impede the navigation? I think it would not, as far as I can judge; but I do not speak positively, because my only information is obtained from the young gentleman whom I sent up to make the survey, and he is here himself. I think the navigation should be preserved whenever it is practicable to navigate the river at all.
63. *By the Chairman*: You have made these plans with the view of not impeding the navigation in any way? Yes, supposing my information to be correct.
64. *By Mr. Morris*: What is the width of the bridge that you propose to erect? There is a carriage-way in the centre of seventeen feet six inches, and a footway on each side of three feet; the whole width of the bridge is twenty-five feet over all.
65. *By Mr. M'Carthy*: Has that plan been laid before the Minister for Public Works? No; the plans were made long ago, but no action has been taken on them.
66. *By Mr. Wilson*: What is the width between the different rows of piles? Seventy feet. There are four spans of seventy feet each. I should have recommended them to put in a swivel, but that it is a very difficult place to get a swivel; we must go such a height above the ordinary level that it would be very difficult to brace the piles, so as to render them sufficiently rigid to stand a swivel, and the banks are not very sound on which to construct a work of that kind; they consist of a loose loam, and are always washing in. No doubt it might be done, but it would be a very costly and difficult work.
67. *By Mr. Mate*: Do you propose to box the piers in with planking? I propose leaving them open on account of the expense.
68. Would it not be a great security to the bridge, inasmuch, as by leaving them open, trees might become entangled between the piles, and not only endanger the structure, but form an obstruction to the navigation? I have made some provision against that, because the piers are so laid that there is a cut-water pile in the centre, and the piles in each pier are all braced strongly together. I find in practice, that piles set in this way have stood very well; I built a bridge at Richmond some years ago, which is completely immersed in times of flood, and although large quantities of timber come down, it has suffered no damage. The water goes thirty feet over the bridge at Richmond.
69. In that case the trees go over it? The timber in this country does not float on the surface; it comes tumbling down, rising and falling in a most dangerous way. In America the timber is light and will float, but here it is not so; the trees go to the bottom and rise again, twisting and turning in all directions; the timber is of greater specific gravity than the water.
70. I think I have seen a great many going down the river floating? Those are merely the old dead and very dry ones.

David Howison, Esquire, called in and examined:—

- David Howison, Esq.
2 Oct., 1861.
71. *By Mr. M'Carthy*: Were you engaged to survey the site of the Wagga Wagga Bridge? Yes, I was up for Mr. Moriarty.
72. You surveyed the river banks? Yes.
73. And it was on your recommendation the site was chosen? Yes, as the most available one we could find.
74. Can you describe the position of the site of the bridge, from any plans before you? It is between Crampton and Travers Streets, and inside Fitzmaurice-street; the other side is a Government reserve.
75. *By the Chairman*: There is Government land on each side? Yes.
76. *By Mr. M'Carthy*: The site has been reported upon by you to the Government? To Mr. Moriarty.
77. Not to the Government? No. Mr. District Surveyor Adams reported to the Government.
78. With reference to the features of the surrounding localities that is the best site that could be obtained? Yes.
79. Can you mention any particular facts to shew that it is the best site? The banks are highest and most uniform at that point; lower down they are high on one side and low on the other.
80. Have you any knowledge of the ordinary rise and fall of the river during floods? About twenty feet—four feet below the southern bank.
81. *By the Chairman*: That is the height of ordinary floods, not of extraordinary floods? Yes, of ordinary floods.
82. What is the height of the water at ordinary times, when the river is not in flood? There is about twelve feet of water at the bridge site; it is lower than that in summer time, and at the very lowest I believe it is fordable.
83. At what season of the year were you there? In July and August, the usual flood times.
84. What is the height from the bed of the river to the bank at that place? Thirty-six feet from the bed to the top of the bank; that is the deepest portion.
85. You have seen the water within four feet of the bank? I have seen the water to the top of the bank.
86. Do you think the river could be navigated when the water is at that height? No; on account of the great quantity of timber which comes down it would be impossible for the steamers to go up.

87. *By Mr. Morris*: How high is the bridge proposed to be taken above the highest bank of the river? I think it is seven feet above the highest bank.
88. *By Mr. Mate*: Do you know the highest known flood level, where it is contemplated to put the bridge? Yes, two feet below the proposed bridge.
89. *By Mr. Morris*: How did you ascertain that? From the flood marks on the houses; you can see it on the walls; it is shewn by the inhabitants; they have it all marked on the walls.
90. And the lowest part of the arches of the bridge will be two feet above the highest known flood level? Yes.
91. If a flood of that height were again to occur would access to the bridge be possible—would the country in the neighbourhood beyond the bridge on either side be so flooded as to prevent any access to the bridge? During very high floods it would be impossible to pass over; there is a lagoon at the back which hems in the township altogether.
92. Could navigation proceed by that lagoon? Not safely.

David Howison, Esq.

2 Oct., 1861.

John George Church, Esquire, called in and examined:—

93. *By Mr. M'Carthy*: You resided in the neighbourhood of Wagga Wagga? I did, for about twelve years.
94. You are well acquainted with the river there? Yes.
95. And its rise and fall at different periods? Yes.
96. Were you there at the time of the great flood as it is called? I was.
97. That is the highest known flood? Yes.
98. What was the height of that flood above the ordinary level of the river? From twenty-five to thirty feet.
99. How high does the river rise during ordinary floods in ordinary winter weather? I think to within ten feet of the top of the bank; that is the highest that I remember.
100. Then, if the bridge were seven feet above the bank, that would give seventeen feet between it and the water? Yes, about that.
101. During the time of extraordinary floods would it be possible to navigate the river at all? I should think not, on account of the immense trees that come down; and not only that, but when once it breaks over the banks the flats are covered, and it is difficult to discover the channel.
102. *By the Chairman*: It breaks over the low flats long before it reaches within several feet of the banks at Wagga Wagga? Yes, in many places.
103. *By Mr. M'Carthy*: Have you seen the spot where it is proposed to erect the bridge? Yes, I know the site, but I have not been there lately.
104. Do you know that the banks are highest and most equal there on either side? Yes. With reference to the navigation of the river I do not think it would be possible for a steamer to go up during a heavy flood, even if she could find the channel, on account of the velocity of the current.
105. Do you know the rate at which it flows? No; I do not.
106. *By Mr. Morris*: During what is called a flood at Wagga Wagga do the punts work? No; I have known the punts to stop working when persons going to Melbourne or down the river with sheep have had half their stock on one side and half on the other, and they have had to wait until the river fell. Parties have sometimes offered to work the punt themselves, but the proprietors would not risk it.
107. *By the Chairman*: Was that in ordinary floods? Yes.
108. *By Mr. Morris*: Is that on account of the velocity of the river or the timber coming down? I think the velocity of the river. I think one punt went down with sheep in it.
109. Then the construction of such a bridge as is proposed would be an immense advantage to the public? Yes, I should say so. The delay in getting sheep across is often very great, and they are greatly knocked about, which is, of course, very injurious to them, especially to fat stock. The time when the bridge is most wanted is the time it is most difficult to get stock across; that is winter. Of course cattle are not put into the punt, and it is very difficult to get them to take the water; I have seen some terrible scenes at Wagga Wagga in crossing cattle, not only causing great labour to the parties in charge, but also cruelty to the beasts; whereas if there were a bridge they could be got over in ten minutes.
110. *By Mr. M'Carthy*: What is the nearest point that they can cross, taking Wagga Wagga as the centre? I should say about fifty miles at Gundagai, or at Narrandra, sixty or seventy miles lower down the river.
111. *By the Chairman*: Have steamers ever actually passed Wagga Wagga in ordinary flood times? No.
112. They have not attempted it? No; I remember they have to just below a cattle station I had, I think about two days, and I understood that was on account of the timber coming down.
113. *By Mr. Morris*: That is below Wagga Wagga? Yes. I was living myself about five miles from that station. There was a large creek just out of the river, and they went into that to avoid the timber.
114. *By Mr. M'Carthy*: I think you said yours was an experience of twelve years? I think it is more, but I am certain it is twelve years; in fact Wagga Wagga was a sheep station when I went there.
115. *By Mr. Morris*: Are you a shareholder in the Bridge Company? Yes, I believe I have some five shares. I have no interest in that country beyond that; I sold out eighteen months or two years ago.

John George Church, Esq.

2 Oct., 1861.

TUESDAY, 8 OCTOBER, 1861.

Present:—

MR. MATE, | MR. MORRIS.

WILLIAM MACLEAY, ESQ., IN THE CHAIR.

W. G. M'Carthy, Esq., appeared as Solicitor for the Bill.

Mr. George Hart called in and examined:—

- George Hart, Esq.
8 Oct., 1861.
116. *By the Chairman:* You are resident at Gundagai? At North Gundagai.
117. You are one of those who signed a petition from the inhabitants of Gundagai, praying the Assembly to make such provision in the Wagga Wagga Bridge Company's Bill, as to insure the navigation of the Murrumbidgee from being impeded? Yes.
118. When you signed this petition did you or any of the petitioners know anything of the plan upon which the bridge was to be constructed? We knew that it was proposed to be a pile bridge, and we believed that it must necessarily impede the navigation of the river, so that no steamers could pass.
119. Did you know what height the bridge was to be? We were not certain—at least I was not.
120. Your object in petitioning was simply to prevent the navigation from being impeded? Yes.
121. Without your being aware that it would actually be impeded by the bridge as proposed? I quite understood that it would be impeded, and that the only way to avoid that was to have a swing bridge or a drawbridge, something after the style adopted at the Pyrmont Bridge.
122. Have you been at Wagga Wagga? I have not.
123. Do you not think the bridge might be placed so high as not to impede the navigation? I am not aware of the height the piles will be above the flood level, but the water rises at Gundagai something like twenty-eight feet, and that would make it impossible; I take it to have a pile bridge sufficiently high.
124. Do you consider the river at Gundagai navigable during a flood? Yes.
125. At any time? At any time.
126. However high the flood may be? Yes.
127. Does not a large quantity of drift timber come down the river at such times which would make it dangerous, or almost impossible, for a steamer to navigate the river? I think not; in fact about a month ago the flat was covered with water, and it would have been quite possible then for a steamer to have navigated the river.
128. *By Mr. Mate:* Have you any idea of the rate of the current of water at the time of these high floods? I have not.
129. Are you aware that these river steamers cannot stem a current beyond a certain rate? Decidedly they cannot.
130. *By Mr. Morris:* How long does the river remain at the highest flood level? Not twenty-four hours.
131. How many feet does it fall within forty-eight hours, say? I think within two hours it rose something like ten feet, and would fall as fast.
132. If the bridge were made, say two feet above the highest known flood, would not that ordinarily allow steamers to ply along the river under the bridge, inasmuch as the flood falls almost as rapidly as it rises? Still it would not rise or fall the whole twenty-eight feet in a short space of time; after it had risen fifteen or sixteen feet it might rise and fall twelve feet more very quickly, but the sixteen feet might last a month or two.
133. If the bridge were raised, as according to the evidence before us it will be, eighteen feet above the ordinary flood level, would you then object to the bridge as impeding the navigation? I think that would be scarcely high enough.
134. It is sufficiently high, we are informed, and that is all that persons interested in the steamers require? If that is known I think that would be quite satisfactory.
135. It is stated to the Committee that at Wagga Wagga the flood invariably falls so much within forty-eight hours, that any steamer, by striking her funnel, as is usual, might pass under the bridge? I should not have thought it would fall so fast as that; there is a vast difference between winter and summer; in winter the water is, of course, very high. I should have thought it impossible to get piles sufficiently long. (*The plans produced by Mr. Moriarty were here exhibited to the witness.*)
136. *By Mr. M'Carthy:* Do you know any instance of the river having been navigated as far as Gundagai? It was, on one occasion.
137. *By Mr. Morris:* Do you remember the height of the river then? No, I was not there.
138. Were you at Gundagai during the highest flood that has been this year? Yes.
139. How near to the top of the bank did that flood rise? Over the bank.
140. On both sides? No, on the north side, not over the south side because the bank is so high there.
141. How many feet did that flood fall within forty-eight hours after having risen to its full height? Fifteen feet I should say.
142. Has it risen since then? Not to any extent.
- (*The evidence of Mr. Forsyth, taken on a previous day, was here read by the Clerk.*)
143. *By the Chairman:* Do you take exception to any of the statements made in the evidence just read? I would only remark, with reference to the punt, that if the punt is compelled to cease working before the river reaches its highest, the same cause would probably

probably prevent the steamers from coming under the bridge; if the river were so high as to put the tackle of the punt under water, it would, I should think, be too high to allow the steamers to pass the bridge. However, if the water-line shewn on the plan before the Committee, is really the average height of the water in the river, there can be no impediment to steamers coming up; but that is the question, is it a fair average? I do not think the water is shewn sufficiently high here.

Mr. George
Hart.
8 Oct., 1861.

144. After hearing Mr. Forsyth's evidence read, and the opinion which Captain Cadell expressed on the subject, are you inclined to think the bridge will not seriously impede the navigation? According to Mr. Forsyth's evidence it most decidedly will not. If the flood levels are shewn correctly on this plan, I certainly do not think the bridge will impede the navigation.

Mr. David Winton called in and examined:—

145. *By the Chairman*: You are resident at North Gundagai? Yes.

146. You were one of those who signed the petition against permitting the bridge at Wagga Wagga to impede the navigation of the Murrumbidgee? Yes.

Mr. David
Winton.
8 Oct., 1861.

147. Did you do so from actual knowledge that the bridge would impede the navigation, or simply as a precaution against allowing it to do so? It was done merely to prevent a bridge being erected there in such a manner as to obstruct the navigation higher up—to guard against the bridge being built without any consideration being given to that point.

148. You had not seen the plans and did not know whether the bridge would impede the navigation? No; it was only feared by the inhabitants that such might be the case.

149. Have you ever been at Wagga Wagga? Yes.

150. Do you know the site of the proposed bridge? No, I have not seen the plans. (*A plan of the Town of Wagga Wagga, shewing the site of the bridge, exhibited to witness.*)

151. By looking at that map you know the place where it is proposed to build the bridge? Yes; the banks are pretty high there.

152. Have you been there in time of flood? No.

153. Do you know what height it is necessary to have the bridge above the water-line to enable a steamer to pass? It would require to be pretty high to allow such a steamer as Captain Cadell brought up on one occasion to Gundagai, to pass.

154. What steamer was that? I think it was the "Albury."

155. You do not know the height of her paddle-boxes? No.

156. It is proposed to construct this bridge two or three feet above the highest known flood; now, judging from what you know of the river in the district you are best acquainted with, Gundagai, do you think that a bridge of that height would impede the navigation at all? I should say not.

157. The water falls after a flood within a very few hours? Within twenty-four or forty-eight hours it falls very considerably; after a high flood the water goes down very fast, generally speaking. (*The evidence of Mr. Forsyth read, and plans of the proposed bridge exhibited to witness.*)

158. After inspection of these plans, and hearing the evidence just read, do you think there is any objection to the proposed bridge on the ground of its impeding the navigation? I think not. If Captain Cadell expressed the opinion stated by Mr. Forsyth, that would be sufficient. The petition was hastily got up, seeing that the Bill was so soon to be before the House, without there being time to make reference to Wagga Wagga or to see the plan. So far as I can judge, this plan meets all the objects the inhabitants of Gundagai have in view; they merely wish to keep the navigation open.

159. *By Mr. M'Carthy*: If you had seen the plan beforehand you would have been satisfied? Perfectly.

160. *By Mr. Morris*: I apprehend the inhabitants of Gundagai wish to keep the navigation open in order that they may be enabled, at some future time, to send down wheat and other produce that can be raised in the district to advantage, rather than to receive goods up? To receive them up as well. The primary object of the petition was, not to offer any opposition to the bridge, but merely that such provision might be made as would enable steamers to pass.

161. *By Mr. Mate*: You know Captain Cadell? Yes, I have seen him repeatedly.

162. You believe he is a gentleman whose judgment may be relied on in such matters as this? Yes, I would trust his judgment with perfect confidence. In fact, if we had had an interview with Captain Cadell we should not have thought of sending the petition; there would have been no petition if the inhabitants had been aware of the height they were going to put the bridge.

TUESDAY, OCTOBER 15, 1861.

Present:—

Mr. MATE,
Mr. WILSON,Mr. MORRIS,
Mr. HAY.

WILLIAM MACLEAY, Esq., IN THE CHAIR.

W. G. M'Carthy, Esq., appeared as Solicitor for the Bill.

Alexander Grant M'Lean, Esq., called in and examined:—

- Alexander Grant M'Lean Esq.
15 Oct., 1861.
163. *By the Chairman*: You are Surveyor General? Acting Surveyor General.
164. Do you know the site on which it is proposed to erect the Wagga Wagga Bridge? I know the site recommended by Mr. Adams. It is represented in the plan.
165. The approaches are entirely through Crown Lands? Entirely through Crown Lands.
166. On both sides? On the one side through a reserve, and from the road on the north side of the river, on the other side. (*Witness pointed out the road on plan.*) There is some little change made now that a portion of these lands have been sold.
167. Leaving, however, an access open from the road to the bridge? Leaving open a road to the bridge. I have brought with me a copy of a memorandum which I wrote, in March last, to the Under Secretary for Lands, relative to the bridge site and approaches. It states, "The bridge site has been recommended by District Surveyor Adams, and has been tacitly approved by Government; and the land through which it will be approached from the streets of Wagga Wagga on one side, and the principal lines of road on the other, being still in the hands of the Government, there can exist no objection to the approaches being formed by the Company, and to the subsequent dedication to the public, by Proclamation, or otherwise, of suitable ways of approach to the bridge." Nothing has taken place since.
168. *By Mr. M'Carthy, (Solicitor for the Bill)*: Will you be good enough to say on what side of the bridge the streets are? The nearest street is Morris-street.
169. But the immediate site is between two streets? Yes; Crampton-street and Travers-street, about two hundred feet below Crampton-street.

SEPARATE APPENDIX.

(PETITION.)

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the inhabitants of Gundagai, Tumut, Adelong, and the surrounding districts,—

HUMBLY SHÉWETH:—

That your Petitioners being aware that a Bill is now before your Honorable Assembly, the object of which is to empower a number of individuals, to be incorporated under the name of the Wagga Wagga Bridge Company, to construct a bridge across the Murrumbidgee River at the Town of Wagga Wagga.

That your Petitioners beg to submit to your Honorable Assembly that a bridge at Wagga Wagga is likely seriously to interfere with the navigation of that portion of the said River which lies between Gundagai and Wagga Wagga, unless such bridge be of sufficient height to admit the passage of the river steamers beneath it, or of such a construction as to allow such steamers to pass through.

That your Petitioners being deeply interested in the progress and development of the navigation of the upper portion of the Murrumbidgee River, pray your Honorable House to make such provisions in the said Bill as to ensure the navigation of the Upper Murrumbidgee from being impeded by the erection of the bridge proposed to be so constructed, as by any such obstruction, your Petitioners would materially suffer.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 382 Signatures.]

PYRMONT BRIDGE COMPANY'S SUPPLEMENTARY BILL.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, to whom, on the 18th instant, was referred the "*Pyrmont Bridge Company's Supplementary Bill*," beg leave to report to your Honorable House,—

That they have examined the Solicitor for the Bill* and the other *Mr. G. W. Allen, witnesses named in the margin† (whose respective evidence will be found †Mr. E. O. Moriarty, C.E. appended hereto), and that the Preamble of the Bill having been proved J. Sutherland, Esq., M.P. to the satisfaction of your Committee, they proceeded to consider the Clauses and Schedule, in which they found it unnecessary to make any Amendments.

And your Committee now beg to lay the Bill before your Honorable House.

WILLIAM FORSTER,
Chairman.

*Legislative Assembly Chamber,
Sydney, 25 October, 1861.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 23 OCTOBER, 1861.

MEMBERS PRESENT:—

Mr. Dalgleish,		Mr. Piddington,
Mr. Dick,		Mr. Shepherd,
Mr. Forster,		Mr. Windeyer.

W. Forster, Esq., called to the Chair.

Printed copies of the Pyrmont Bridge Company's Supplementary Bill, before the Committee.

Promoters of the Bill:—Certain Directors and Proprietors of the Pyrmont Bridge Company.

Solicitors for the Bill:—Messrs. Allen & Bowden.

Parties called in.

Present:—Mr. George Wigram Allen, solicitor.

Mr. Allen examined.

Room cleared.

Committee deliberated, desiring certain evidence on behalf of the Civic Authorities, in respect of the Pyrmont Bridge.

Solicitor called in, and so informed.

[Adjourned till Friday 25th instant, at *Eleven o'clock*.]

FRIDAY, 25 OCTOBER, 1861.

MEMBERS PRESENT:—

W. Forster, Esq., in the Chair.

Mr. Dalgleish,		Mr. Shepherd,
Mr. Hay,		Mr. Terry.

Parties called in.

Present:—Mr. George Wigram Allen, solicitor.

Mr. Edward Orpen Moriarty, C.E., Engineer-in-Chief for Harbours and River Navigation, examined.

J. Sutherland, Esq., M.P., Mayor of Sydney, examined.

Room cleared.

Preamble of the Bill, considered.

Motion made (*Chairman*), and *Question*,—That this Preamble stand part of the Bill,—*agreed to*.

Solicitor called in, and informed.

Clauses 1 and 2, and the Schedule to the Bill, severally read and agreed to.

Draft Report read and agreed to.

Ordered, to report.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PYRMONT BRIDGE COMPANY'S SUPPLEMENTARY BILL.

WEDNESDAY, 23 OCTOBER, 1861.

Present:—

MR. DALGLEISH,
MR. FORSTER,MR. PIDDINGTON,
MR. SHEPHERD,

MR. WINDEYER.

WILLIAM FORSTER, Esq., IN THE CHAIR.

George Wigram Allen, Esq., called in and examined:—

1. *By the Chairman:* You are Solicitor to the Pyrmont Bridge Company? Yes; I appear as Solicitor for the Bill. G. W. Allen,
Esq.
2. Will you state any reasons of which you are aware for the passing of this Bill? By the original Act of Incorporation, the Company are empowered to borrow money in aid of the purposes for which the Company was formed; and by the amended Act, they were authorized to raise that money by the issue of debentures. The amended Act was an Act to authorize additional works to be made by the Pyrmont Bridge Company—mainly, the making of a bridge across Johnson's Bay to Glebe Island; and there was a clause in that Act (the eighth) stating that, if the bridge over Johnson's Bay, with the approaches thereto, be not *bona fide* commenced within one year, and fully and properly completed within two years next after the passing of the Act, the powers given in and by the same should cease and determine. This work not having been finished, it has been thought that the power to re-issue debentures has ceased. 23 Oct., 1861.
3. That is, the power given by this Act? By the amended Act. There was no power given by the original Act to issue debentures; it merely gave power to the Company to raise money by mortgage. The power to issue debentures was given by the amended Act. In consequence of the bridge over Johnson's Bay not having been completed by the Company within the time specified, the power to issue debentures is thought to have ceased; and the Company now ask merely to have the same powers as were given to them for this purpose in the Act to amend their Act of Incorporation.
4. That is, to issue debentures? To issue debentures—nothing more. The clauses are nearly *verbatim* the same as those in the last Act. They are as much like them as they could be made.
5. You are not asking anything by this Act that is inconsistent with the amended Act, or with the original Act? Nothing.
6. In fact, you consider this a supplementary Bill? It is merely to continue the power to issue debentures given by the amended Act.
7. Do you consider that the powers you ask for are necessary to the profitable carrying on of the undertaking the Company has commenced? They are.
8. Do you believe them to be in any way inconsistent with the public interest? Not in any way.

9.

- G. W. Allen, Esq.
23 Oct., 1861.
9. Do you think the public interest will be benefitted by giving the Company this power? The public interest cannot be injured. A number of the debentures already issued will become due next year, and some of them the following year; and the object of applying for this Act now is to have the power of re-issuing those debentures, or of borrowing money on new debentures for the purpose of meeting those which fall due.
10. Borrowing money by the issue of debentures is an easier way of carrying on the operations of the Company than borrowing on mortgage? Yes, it is much easier, because debentures being payable to bearer, are much more easily transferable, and the loans obtained by debentures are secured precisely in the same way as loans by mortgage.
11. *By Mr. Shepherd*: The Company could not carry on without a renewal? As I have said before, the Company will have no further power to issue debentures.
12. *By Mr. Dalgleish*: Are you aware whether certain restrictions were imposed upon the Company, with regard to the public safety, and if so whether they have been complied with? I believe that all the restrictions imposed by the Act of Incorporation have been complied with.
13. Are there not some restrictions in the Supplementary Act, relating to the protection of foot-passengers against the cart traffic and horse traffic? I speak from memory, but I believe it was understood, if not expressed, that suitable provision should be made for the safety of foot passengers.
14. In this bridge there are no recesses, such as are to be found in almost all the bridges of the Mother Country, for the public safety, into which, in case of a horse running away, foot passengers can retire? Provision for the protection of foot passengers was only required in the case of the bridge across Johnson's Bay to Glebe Island, which has not been made. It is only in the amended Act that the words occur:—"It shall be lawful for the Pymont Bridge Company hereinafter styled the 'Corporation' in addition to the works authorized by the said Act and to the works before mentioned as being in progress to make and construct a good substantial bridge of not less than thirty feet in width with all proper protection for foot passengers by the erection of rails on either side of such bridge between the outer rail of the bridge and the roadway across Johnson's Bay, Darling Harbour, to Glebe Island," &c. That bridge has never been made, and therefore the rails could not be erected.
15. You think that was not intended to apply to the bridge across Darling Harbour to Pymont? No; it could not have been made at the time to apply to it. I know that one of the Members of the Committee at that time stated to the Secretary, or to one of the Directors of the Company present, that it would be well if that were done also to the present bridge, but no restriction of the kind was made, nor was it thought even competent for the Committee to insert it in an Act which did not apply to that bridge at all.
16. This renewal is intended to apply to this bridge? It is intended to apply to the whole of the works of the Company. There is one thing to be said in reference to the erection of that rail; and that is, that the foot passengers frequently do not walk on the foot-path now, but constantly take the middle of the bridge in preference to the side. If a rail were put there it would make the path very narrow, and would be, I think, very little protection to foot passengers. There is an iron kerb along the side of the footpath.
17. That iron kerb, I think, is much lower than it was expected to be? It is a little lower than it was expected to be.
18. In fact it is so low as to be absolutely no protection against carts that are racing over the bridge, or going at an undue speed, which is frequently the case. I dare say you have observed it yourself? Yes, frequently; it is a matter which ought to have been prevented by the police long since. The person in charge has frequently asked the police to take into custody persons for furiously driving, but he has informed me that the police would not interfere.
19. *By the Chairman*: I think you stated that all the conditions have been complied with? All the conditions under the Act of Incorporation, in reference to this bridge, have, so far as I am aware, been complied with.

FRIDAY, 25 OCTOBER, 1861.

Present:—

MR. DALGLEISH,
MR. HAY,

MR. SHEPHERD,
MR. TERRY.

WILLIAM FORSTER, ESQ., IN THE CHAIR.

G. W. Allen, Esq., appeared as Solicitor for the Promoters of the Bill.

Edward Orpen Moriarty, Esq., C.E., called in and examined:—

- Edward O. Moriarty, Esq.
25 Oct., 1861.
20. *By the Chairman*: Will you be kind enough to state to the Committee the office you hold? Engineer-in-Chief for Harbours and Rivers.
21. Has your attention been called to this Bill? No; I have never seen it before.
22. Will you be kind enough to look at the Bill, and say whether you think it likely any objection will be offered, or ought to be offered, on the part of the public or of the civic authorities,

- authorities, to such a Bill? I do not see that it is a question in which the public are very much interested; it is merely a financial arrangement of the Company.
23. I suppose you are aware of the existence of the Company, and of what they have done? Edward O. Moriarty, Esq.
25 Oct., 1861.
- Yes.
24. Do you consider the continuance of the Company a public benefit? I fancy so; it is not a private benefit.
25. You would not consider it your duty to object to the passage of the Bill? No; this appears to me to be merely to enable the Company to borrow money by debentures or mortgage.
26. *By Mr. Dalgleish*: Was the original plan for the bridge carried into effect? No, not the original plan; the centre opening was altered in consequence of the loss of one of the swivels in the "Catherine Adamson." That alteration was an improvement, as it gave two openings instead of one.
27. With regard to the means for securing the safety of foot passengers—has there been any deviation from the plan? No.
28. Is the kerb lower than was proposed by the plan? No; it is exactly the same height; it is specified on the plan six inches.
29. Six inches above the foot way—not six inches above the road way? It is six inches; it may be half an inch or a quarter of an inch less, but it is about six inches; in fact I am almost certain of that, for I measured it, as a dispute arose some time ago as to the weight of the guard-irons.
30. Do you consider the provision as sufficient for the public safety? I do; because in the first place it is quite equal to the provision found in ordinary roads. The foot-paths in the streets have rarely a kerbing of more than six inches above the ordinary road; and again, the bridge has now been open above three years, and there has never been a single accident.
31. It is usual in long bridges to have recesses, is it not? It is not; it was the practice sometimes to have them in old-fashioned bridges, but that is now exploded.
32. Would it have been very difficult to have constructed them here on a continuous wooden structure? Yes.
33. Do you not think it necessary for the public safety, to have posts and chains at intervals along the bridge? No; that has not been done on Glebe Island Bridge, which is ten feet narrower.
34. Would it not be a very small expense to erect posts and chains? A very slight expense.
35. *By Mr. Shepherd*: There is no necessity for them? I do not think there is the least; if I had thought so, I would have put them in the plan in the beginning, or have suggested them afterwards.
36. *By the Chairman*: You state that Glebe Island Bridge is ten feet narrower than this? Yes, and there is no danger there; the cattle and other animals keep in the centre of the bridge.
37. *By Mr. Dalgleish*: The Glebe Island Bridge is not a parallel case with the Pyrmont Bridge, as that is almost confined to the traffic to the Abattoirs, rather than as a place of public passage? I think there will be a heavy traffic over the Glebe Island Bridge.

John Sutherland, Esq., M.P., examined:—

38. *By the Chairman*: You are Mayor of Sydney? Yes.
39. Has your attention been drawn to "A Bill to continue the powers of the Pyrmont Bridge Company to raise money by the issue of Debentures and by Mortgage"? J. Sutherland,
Esq., M.P.
25 Oct., 1861.
40. Would you consider it your duty to suggest any objections to this Bill? I can see no objection to the Bill as it at present stands. There were some matters connected with the former Act to which I objected.
41. *By Mr. Dalgleish*: Does it strike you that adequate provision for the public safety has been made on the Pyrmont Bridge? There is little safety for the public, in the event of a horse with a vehicle running away on the bridge.
42. In your position as Chief Magistrate of the City, and having, therefore, some interest in seeing that the public safety is provided for, have you anything to recommend to prevent accidents? That is one of the matters I refer to. The kerb put down to prevent carts and carriages running on to the pathway where the foot-passengers walk is very low. I think it was lower at first than the Act provided for, and the roadway has since been raised by planking, so that the kerb is still lower. Since the Abattoir has been opened, there has been a great traffic over the bridge with butchers' carts, and if a horse were to run away, there would be nothing to prevent the cart going on the footway, and there would be no way of escape for the foot-passenger.
43. There is no recess or shelter along the whole length of the bridge? Nothing that I can see. I have often observed, in passing across the bridge, that horses generally quiet have become restive and have danced about, and that has called my attention to it.
44. Horses that would go quietly along a macadamised road become very restive, and are liable to run away with their riders, in crossing a wooden bridge? Yes.
45. It is usual in bridges to have some protection for foot-passengers against horse traffic? On bridges of that kind it is usual to have some rail or guard to protect foot-passengers.
46. Is the kerb you have spoken of, the usual height of kerb-stones used by the city authorities? The city authorities have no such kerbs.

- J. Sutherland, Esq., M. P.
25 Oct., 1861.
47. They have stone kerbs—but does the height of the iron kerb on the bridge correspond with that of the stone kerbs in the streets? The iron kerb is not so high as our stone kerbs; it was some six or seven inches at first, but some three inches of planking—I do not know the exact thickness—has since been laid down, which takes off the height of the kerb.
48. *By the Chairman*: Can you offer any suggestions upon the subject to which you are referring, which it would be possible to embody in a Bill of this kind? No, I think if the attention of the Directors were called to it, it would not be necessary that any reference should be made to it in the Bill.
49. *By Mr. Allen*: Do you know the exact height of the kerb? I do not know the exact height. I judge simply from having looked at it.
50. Nor do you know the height of the kerb, intended to be placed on the bridge? Some twelve months ago my attention was called to this kerb as not being sufficient for the protection of the foot passengers. It did not appear to me to be deep enough to prevent carts going on it, in the event of the horses drawing them running away.
51. You are not yourself aware that the kerb is less than it was originally intended to make it? It is simply from memory I speak, but I recollect referring either to the Bill or to the specification, and I found the kerb was not of the depth it was specified to be.
52. Did you find it was so by measurement? By measurement at the time.
53. Might not the difference from the specification have been rather in the weight of the kerb-iron than the height? It might be. It is more than twelve months since, and I did not take particular notice.
54. I ask you the question because the Engineer for Harbours and Rivers, who was also the engineer for the bridge, has stated that the kerb was of the height originally intended, but that the difference was merely in the weight of the iron? It might have been in the weight that the difference was; but there is a difference in the height now from what was intended; for supposing the kerb to be six inches, there is the thickness of the planking to be deducted.
55. Has that been altered since the bridge was made? I think so.
56. Was it not the original intention of the engineer to place the kerb-iron upon the footpath; and is it not now placed on the roadway, making the kerb-iron therefore some inch or so higher than it was intended? I am not aware of the original intention of the engineer, but I believe the kerb is on the roadway; that, however, will not make the kerb either higher or lower.
57. Is not the roadway higher than the footpath? Yes.
58. Then if the kerb-iron is on the roadway it must be higher than it would be if it were on the footpath? Yes.
59. I think you said the kerb was different from that required by the Act? I said it was different either from the specification or the Act.
60. Does the Act require any height of kerb at all? I do not know.
61. *By Mr. Dalgleish*: Do you think it probable an Act would be granted for the construction of a bridge without any precaution being taken for the public safety? I think no Act should be passed without proper precautions being taken to secure the safety of foot-passengers. With reference to the kerb, I spoke merely from memory.

George Wigram Allen, Esq., examined:—

- G. W. Allen, Esq.,
25 Oct., 1861.
62. *By the Chairman*: This Bill is based, as you stated before, upon a previous Bill having lapsed? Yes.
63. Was the *laches* in that case the fault of the Company? The Company were not able to carry out the design they entertained; they intended to make the bridge which the Company have now made, and also to make a bridge across to Glebe Island, and they asked the Legislature for power to do so, but their funds would not enable them, and consequently they could not do it. The power to borrow money was given by the original Act of Incorporation, but the power to issue debentures was given by the Act to enable them to form a bridge across to Glebe Island, which has not been done.
64. Then the Bill does not depend upon the non-fulfilment of conditions? Not the slightest.
65. The operations of the Company have become contracted by want of funds; they are carrying out their original proposal upon a more limited scale, and this Bill is necessary to enable them to do that? They have carried out all their original proposal in the way they intended, but they are not able to carry out a proposition they subsequently entertained. The only power this Act will give is the power to raise money by debenture as well as by mortgage. The power to issue debentures was given in the Act which authorized the making of another bridge, but the debentures were not intended to apply to that bridge alone, but to all the purposes of the Company.

1861.

RICHMOND BRIDGE COMPANY'S ACT AMENDMENT BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred on the 1st of October last, the "*Bill to Amend the Richmond Bridge Company's Act of 1861,*" beg leave to report to your Honorable House,—

That they have examined the witnesses named in the margin* • John Town, Esq.
A. Fraser, Esq.
(whose evidence will be found appended hereto), and that the Preamble of the Bill having been satisfactorily proved, your Committee proceeded to consider the several Clauses and the Schedule, which they passed without amendment.

And the Committee now beg to lay before your Honorable House the Bill so passed by them.

J. A. CUNNEEN,

Chairman.

Legislative Assembly Chamber,

Sydney, 12 November, 1861.

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 15 OCTOBER, 1861.

MEMBERS PRESENT:—

Mr. Cunneen, | Mr. Hay,
Mr. Dangar, | Mr. Wilson.

J. A. Cunneen, Esq., called to the Chair.

Printed copies of the Richmond Bridge Company's Act Amendment Bill, together with the Order of the House referring same, upon the Table.

There being no appearance of the Parties in support of the Bill,—

Committee ordered,—That the Promoters be informed of the day to which they adjourn.

[Adjourned till Tuesday, 22nd instant, at Eleven o'clock.]

TUESDAY, 22 OCTOBER, 1861.

MEMBERS PRESENT:—

J. A. Cunneen, Esq., in the Chair.

Mr. Dangar, | Mr. Terry.

The Promoters of the Bill not being in attendance,—

Ordered,—To be informed of the further adjournment of the Committee.

[Adjourned till Tuesday, 29th instant, at Eleven o'clock.]

TUESDAY, 29 OCTOBER, 1861.

MEMBERS PRESENT:—

J. A. Cunneen, Esq., in the Chair.

Mr. Dangar, | Mr. Driver.

Committee met at Eleven o'clock, and—

Adjourned till Noon, this day.

Committee resumed.

Additional Members present:—Mr. Gray and Mr. Wilson.

Committee deliberated on the absence of the Promoters of the Bill at their several sittings.

Ordered,—That the Chairman be requested to communicate with the Parties prior to the next meeting.

[Adjourned.]

TUESDAY, 12 NOVEMBER, 1861.

MEMBERS PRESENT:—

J. A. Cunneen, Esq., in the Chair.

Mr. Piddington, | Mr. Burns,
Mr. Dangar.

Committee met pursuant to summons.

Promoters of the Bill:—

Mr. B. Richards, *Chairman, Richmond Bridge Company.*

Mr. J. Town, *Treasurer, ditto.*

Mr. A. Fraser, *Secretary, ditto.*

Mr. Alexander Fraser, *Secretary to the Company*, called in and examined.

Witness withdrew.

Mr. John Town, *Treasurer to the Company*, called in and examined.

Witness withdrew, and,

Committee proceeded to consider the Preamble of the Bill.

The same having been proved to the satisfaction of the Committee,—

Motion made (*Chairman*), and Question,—That this Preamble stand part of the Bill,—*agreed to.*

Clauses 1 and 2 then severally read and agreed to.

Schedule read and agreed to.

Chairman requested to report the Bill to the House.

LIST OF WITNESSES.

Legislative Assembly.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

RICHMOND BRIDGE COMPANY'S AMENDMENT BILL.

TUESDAY, 12 NOVEMBER, 1861.

Present:—

Mr. BURNS,
Mr. CUNNEEN,

Mr. DANGAR,
Mr. PIDDINGTON.

J. A. CUNNEEN, ESQ., IN THE CHAIR.

Mr. Alexander Fraser called in and examined:—

1. *By the Chairman*: You are Secretary to the Richmond Bridge Company? Yes.
2. You are aware that the Company have petitioned the Assembly for leave to bring in a Bill to amend their former Act of Incorporation?—Yes.
3. What are the reasons for seeking to amend the original Act? Because it is not paying the shareholders a sufficient dividend.
4. It is not paying a reasonable return for their capital? No.
5. Can you inform the Committee what was the capital of the Company when its Act of Incorporation and the Schedule were passed? It was £6,000.
6. What did its erection cost them? £12,201.
7. Then it cost nearly double what they estimated? Yes.
8. Had they been aware of its costing so much, would they have asked to be allowed a higher schedule of tolls in their Act of Incorporation? Yes, I should think so.
9. Can you inform the Committee how much per cent. per annum was the last dividend declared to the shareholders? There has been no dividend declared yet; they are paying off the debts of the Company. The Company is £2,000 in debt at this moment.
10. Is the bridge a great public convenience? Very great indeed.
11. It not only does not pay a reasonable interest, but do you think it is also an uncertain security, because of its being subject to be washed away by floods? No, I do not imagine there is any fear of that kind; it has been tried sufficiently to enable us to form an opinion that it will stand the floods.
12. You consider the investment of capital in the erection of this bridge a great benefit to the public? Yes, very great indeed.
13. Before the erection of this bridge the public were put to great inconvenience in waiting a long time in endeavouring to cross stock? Yes, the punts were very inferior indeed.
14. Do you think the expense from loss of time was far greater than even the tolls you require now? By far.
15. Is it your opinion, then, that the increased tolls which the Company now seek to obtain are but reasonable to them? They are only reasonable.
16. And you think they are not unreasonable as regards the public? No.
17. They are not so high as are generally charged at private bridges? I do not know what the charges are at other bridges, but I think these are very moderate.
18. *By Mr. Piddington*: How long has the bridge been open to the public? Since August, 1859.

Mr. Alexander Fraser.

12 Nov., 1861.

- Mr. Alexander 19. What was the largest amount of debt that the Company incurred at one time? £2,500.
Fraser. 20. And they now owe £2,000? Yes.
- 12 Nov., 1861. 21. The bridge has not been open more than two years? Two years in August last.
22. Is the £2,500 borrowed included in the total cost you mention—£12,201? Yes.
23. During two years the Company have not been able to pay off more than one-fifth of the sum originally borrowed? No.
24. Do you think the proposed increase of the tolls will be sufficient to enable the Company to pay off their debt in less time than they otherwise could? Yes.
25. With this additional schedule of tolls, how long do you think it will take—what period of time will elapse before the Company will be enabled to discharge the debt now owing? In about two years.
26. Of course until that time the Company can pay no dividend? No.
27. They do not expect to pay any dividend? No.
28. They intend to pay off the debt before they declare a dividend? Yes.
29. *By Mr. Dangar*: Will they be able to pay the disbursements for repairs of the bridge and so on, as well as the debt, in two years? Yes.
30. *By Mr. Burns*: Do you think the increase in the tolls is likely in any way to decrease the traffic over the bridge? No.
31. You think the public will not be likely to complain of the charges? No.
32. They will consider them reasonable? Yes.
33. Is there any toll for foot-passengers in the original Bill? Yes.
34. How much? Two-pence, I think.
35. You do not propose to increase that? No.
36. Only the tolls on sheep and cattle? Only on sheep and cattle in droves.
37. What has been the annual receipt since the bridge has been erected? The first year it was let for £775; the second year, for £901; and the third year, £845; the third year is going on now.
38. Then in three years you will have actually received for the tolls £2,500? Yes, but we have not got the whole of that yet.
39. The bridge is let for the third year, but it has not yet expired? No; it expires in August, 1862.
40. What is the paid up capital of the Company? £9,000; it was £6,000 originally, and then there was another call for £3,000.
41. Is the whole of that capital paid up? Yes; and we borrowed £2,500 besides.
42. *By Mr. Piddington*: You must have borrowed more than £2,500? No, I think not.
43. *By Mr. Burns*: Has the amount the bridge is let for, for the present year, been received by the Company yet? No; it is received monthly.
44. This bridge forms part of a highway, does it not? Yes.
45. There are roads on either side which it connects? Yes.
46. Has no objection been made in any way to the charges being increased? No, I think not.
47. You have heard of none? None at all.
48. *By Mr. Dangar*: Are you aware of any other bridge similarly situated, where the tolls are the same? No.
49. *By Mr. Burns*: In the schedule of tolls you propose now, you ask for power to charge for every ox or head of neat cattle in drove, 2d.? Yes.
50. The additional charge is 1d.? Yes.
51. And you propose to charge ½d. for every sheep, lamb, or goat, instead of ¼d. as at present? Yes; doubling the charges for both in droves.
52. Is there a fair prospect of your being able to let the bridge annually, for the amount you have let it for, for the present year, £900? £845—Yes, I think there is.
53. I suppose the principal receipts of the bridge are from cattle and sheep? Not exactly. I have here an account of the receipts from all sources last year:—
- | | | | |
|--|------|----|---|
| 99,515 sheep paid toll at ½d., from August, 1860, to July, | | | |
| 1861 | £103 | 13 | 0 |
| 33,913 cattle paid toll at 1d., same period..... | 141 | 6 | 0 |
| Ordinary traffic, same period | 547 | 6 | 0 |
| | £792 | 5 | 0 |
54. *By Mr. Dangar*: Are there many farms on the other side of the river? Not many; there are some at the Kurrajong.
55. *By Mr. Burns*: You think the increased tolls proposed will be sufficient to give the Company a fair rate of interest for its investment, and to meet contingencies, wear and tear, and so on? Yes.
56. *By Mr. Piddington*: What is the interest you pay on the debt incurred? Eight per cent.
57. *By Mr. Burns*: You know of no opposition to the proposed scale of charges? None whatever.
58. You do not propose to make any increase in the charges for carriages, carts, or drays? No; on nothing but sheep and cattle.

Mr. John Town, called in and examined:—

59. *By the Chairman*: You are the Treasurer of the Richmond Bridge Company? I am, up to the present. Mr. John Town.
60. You and others have petitioned the Assembly for a Bill to amend your Act of Incorporation? Yes. 12 Nov., 1861.
61. Would you be kind enough to state to the Committee for what reasons you seek to obtain higher tolls on sheep and cattle in droves? When we first incorporated ourselves our capital was £6,000; but we found the bridge cost £12,070, and it does not pay at the present time; the charge on sheep is so low, and on cattle too.
62. When you obtained your original Act of Incorporation, you only anticipated it would cost half what it actually did? Precisely.
63. And consequently you made the tolls lower than you would had you known the real cost? Yes; we expected £6,000 would have done us, but it doubled it; and the tolls are so low it does not cover the expense.
64. In fact you formed a scale of charges to represent a capital of £6,000, whereas in reality it has cost £12,000? Yes, £12,070; we were bound to come to £9,000 ourselves, and then we had to borrow £2,500 to carry it on, and all the outlay together came to £12,070.
65. Had you been aware it would cost £12,000, you would have applied in the first instance for a scale of tolls that would have remunerated you for that amount of capital? Of course we would.
66. Are you aware whether this bridge is a great public convenience? It is the greatest convenience to the sheep and cattle coming from Bathurst and the northward.
67. The whole of the cattle from the northern country have to cross this bridge? Yes.
68. And a great number of those from the western country, by Bell's line? Yes, more or less of them.
69. Before the erection of this bridge, are you aware whether there was not a great deal of time lost in trying to cross cattle and sheep over the river, and great expense incurred by the delay? There was indeed; sometimes they would be there three or four hours, or nearly all day, before they could cross a flock of sheep, because they would not face the punt; and sometimes they would lose three or four head of cattle in rushing them through the water; now they do not take above a minute or two.
70. On some occasions human life was lost in crossing stock? I cannot exactly say that there has been in crossing stock, but there has been human life lost on two or three occasions in getting off the punt, but it was generally when the parties were intoxicated, and walked off the punt too soon.
71. *By Mr. Burns*: The crossing was dangerous? Yes, in that way. That was some years ago. I do not know for anything particular about cattle, any accident to human life, but merely, as I say, going over as foot-passengers.
72. *By the Chairman*: Do you consider the tolls which you now demand are only reasonable for the Company to receive, in return for the capital invested? Yes.
73. And you do not think they would be too high for the public to pay for the benefit they receive? No, I think not. It is generally the squatters that have to pay that, and I do not think it will be too high.
74. *By Mr. Piddington*: You receive about £845 a year rental? Yes, this year.
75. What are your expenses in the shape of costs out of that sum—have you to pay anything? Nothing; except when the floods come, and some damage happens; of course, then, we have to put the bridge to rights again.
76. Independent of such accidents, the whole of the rental is applicable to the purposes of the Company? Yes.
77. How is it you have not paid off more than £500 of the debt within the last two years? We had to pay £350 to take the punt off the water, and of course that gave us a grab at once; and then there were all the rest of our liabilities,—for the engineer, Mr. Moriarty, perhaps £500,—and other things, which took a deal of money out of our capital.
78. *By Mr. Dangar*: Can you inform the Committee whether the Government was applied to, to build this bridge, before the Company commenced it? We applied for liberty to make the bridge through an Act.
79. Was the Government applied to before that? Not that I know of.
80. *By Mr. Piddington*: The whole rental you receive is applicable to paying off the debt, and when the debt is paid off, to paying a dividend? Yes.
81. *By Mr. Burns*: You have had no dividend yet? No.
82. Is the river fordable at any place near the bridge? Yes; about a mile and three-quarters from it.
83. Do you think the increase of the charges will be likely to lead to many persons availing themselves of the crossing-place at the Falls hereafter? There might be a few carts that would cross there.
84. You do not propose to make any increase in the charge for carts? No; they might get over.
85. If this increase is granted, do you think drovers will be likely to take their cattle across at the Falls in preference to going over the bridge? If I tell you the truth about that, they are roguish enough to do it, and put the money in their own pockets.
86. *By Mr. Piddington*: Do you think there are many rogues among them? I have known them do it at the time of the ferry. The floods have lately made a great alteration at these Falls—made them deeper.
87. *By Mr. Burns*: Do you think, as a matter of convenience or economy, parties are likely to prefer running the risk of going over the Falls rather than pay the extra toll over the bridge? If they could get over, many of them would.

- Mr. John Town.
12 Nov., 1861.
88. Do you think it is dangerous for them to do so? It is now, but in former times it was not.
89. Do you think the owners or the drovers of cattle are likely to consider the extra charge excessive? Well, I do not know; but they might be roguish enough to give us the go-by there, if the water got low again there.
90. They cannot do it at the present time? No; there have been several floods in the river.
91. *By Mr. Dangar*: You are aware that the owners of the cattle allow the drovers for the toll? Yes.
92. *By Mr. Burns*: What depth is the water now? Three or four feet.
93. Sheep could not cross there? Not well, they would lose many of them; the water would take them off their feet.
94. The water is rapid? Yes.
95. Have you heard of any opposition to the increased tolls? No.
96. You do not think the increase too much? I do not think it is; it will merely give us a reasonable consideration to get our capital back.
97. It will enable you to have your capital returned to you, and pay a reasonable dividend? Yes, that is what we have applied for.
98. Do you know what have been the receipts annually since the bridge was erected? The first year we ought to have got £775, but we did not get it at all; the next year £901; and this year we are in now £845.
99. Did I understand you to say, in answer to a question from Mr. Piddington, that you had to give the lessee of the punt some consideration for giving up the punt? Yes, £350.
100. In the first instance? Yes.
101. But you have not to give him anything now? No, that paid him off.
102. Had you to pay anything for any existing interest besides the punt? We had to pay Mr. Moriarty.
103. What had you to pay him? £500—five per cent.
104. For what? For his services as engineer of the bridge.
105. *By Mr. Dangar*: Is the road on the northern side of the bridge fenced in? It is for a certain distance.
106. How far? Three or four miles.
107. Then the cattle cannot diverge from the road as they near the bridge to go to the Falls? There is the Belmont Road.
108. Do many cattle go the Bell's Line road? Yes, lately.
109. Cattle generally coming from the northward make for Richmond, as a place where the butchers meet? Yes.
110. But they are not compelled to cross at the bridge? No, they may go to the crossing-place if they choose. Suppose a master sends a man with a flock of sheep and gives him money to pay the tolls, the man may keep the money and go across at the Falls.
111. *By Mr. Burns*: You say the Falls are dangerous? They are dangerous now.
112. What is the ordinary depth of water at the Falls? I have seen no water there at all.
113. That is in times of drought? Yes; but generally speaking there is always water there.
114. In ordinary seasons what is the depth of water? About two feet; but the rush of the river in the floods and freshes we have had lately has made the channel deeper.
115. Since the last floods there is an alteration of the channel—they have made it deeper? Yes.
116. Sheep could not cross there now? Not without taking them off their feet.
117. Could cattle cross there? Yes, but it is not likely they would.
118. *By Mr. Piddington*: Have you known many cases in which they have crossed at the Falls since the bridge has been opened? I have not seen anything of the sort since, because the river has generally been up, and stopped all communication there.
119. It has not been so high during the whole of the last two years as to prevent cattle from crossing? Well, it has; there has always been a full body of water in the river.
120. *By Mr. Burns*: Since the bridge has been erected have you known of any cases in which drovers have brought cattle over the river at the Falls? No, I have known it formerly; not since the bridge has been erected.
121. All the cattle have passed over the bridge? All we know of.
122. Are the settlers in the district in the habit of crossing at the Falls? In the upper district they have been; but this year the water has cut out the bed.
123. In previous years, you have known instances where settlers have been in the habit of crossing at the Falls? I have known them evade the punt and go over the Falls, when the punt was in existence.
124. *By Mr. Dangar*: In a dry season you think the tolls would be very much decreased by people crossing at the Falls—supposing we had a drought again? That is it.
125. *By Mr. Burns*: In case of the Falls becoming nearly dry, people would generally prefer crossing there? Some of them might. There is a main road there they can go if they like. We have known it in the punt time, but never seen it in the bridge time; they were roguish enough to do it then.
126. *By Mr. Piddington*: You would not conclude that a man was dishonest because he avoided paying the tolls? It was not the master that did it, but the servants, to save the money for themselves.
127. *By Mr. Dangar*: You are aware there is no gain to the squatter by evading the toll—you are aware the drovers are paid so much a head from the stations to Sydney or Richmond, and they pay all tolls out of the price of droving? Yes, that is it; they get a cheque or order for the money, and they can cross where they like.

128. *By the Chairman*: This place you term the Falls is a public right of way? Yes, there is a surveyed road there. Mr. John
Town.
129. Do you include, in the £12,000 which you say was the cost of the bridge, the £500 paid to Mr. Moriarty? Yes. 12 Nov., 1861.
130. And the £350 to the lessee of the punt? Yes.
131. *By the Chairman*: Every item of the cost is included in the £12,000? Yes, every shilling that I know of; but perhaps you would hear more about that from Mr. Fraser.
132. What interest are you paying for the borrowed capital? The bank interest—eight per cent.
133. *By Mr. Burns*: You pay £160 a-year for interest alone? Yes.
134. Have you any salaries to pay also? Yes, Mr. Fraser, we have to pay him; formerly we paid him £100 a-year, while the bridge was in actual building; now we only pay him £25.
135. Do you let the bridge by tender, or receive the tolls? We let it by auction to the highest bidder.
136. *By Mr. Piddington*: What are Mr. Fraser's duties now? He keeps the books.

1861.

Legislative Assembly.

NEW SOUTH WALES.

BRIDGE AT WEST MAITLAND.

(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

Unto the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the undersigned Inhabitants of West Maitland, and Residents of
the surrounding neighbourhood and County of Durham,—

HUMBLY SHEWETH:—

That your Petitioners are fully sensible of the great and important benefits arising to all classes of a community and the country generally, in having good roads and bridges over rivers, at suitable and convenient places, so as to connect distant parts of the country with those localities where stock, produce, and other industrial and marketable commodities may be disposed of, not only for use and consumption locally, but shipped or otherwise conveyed to distant ports and places offering a ready and profitable market.

That West Maitland is the centre and market town of a rich and important district; and the intercourse between this town and the county of Durham (the latter being situated on the north side of the River Hunter) has for a length of time been great, and is steadily increasing. This intercourse has been greatly impeded and restricted, and at times entirely suspended, from the want of a bridge over the River Hunter, to connect West Maitland with the County of Durham and adjoining and neighbouring districts.

That until very recently, the only mode of communication between West Maitland and the County of Durham, and other important places and districts in that direction, was by a ford at a place called "The Falls;" and this mode was only available when the river was low. For some time past a punt has been in use at "The Falls," which punt has to be entirely laid up when the river is in any way high; but the recent floods have so materially and permanently altered the bed of the river at this point, that the ford before referred to has been swept away, thereby rendering it impossible to cross the river in this way; and the channel otherwise has been so altered that this punt has become almost useless, even when the river is at its ordinary level, as it cannot approach either of the banks of the river, so as to allow parties or carriages, drays, &c., being landed in safety.

That the settlers and others on the Paterson, at Clarence Town, Dungog, on the Allyn and Manning Rivers, and other important districts on the north side of the River Hunter, and also West Maitland, have suffered, and are daily suffering serious loss and injury, from the want of a bridge at West Maitland, at some convenient and eligible place as may be fixed upon.

That the revenue to be derived from tolls and puntage at such a bridge would yield an ample return for the money expended on its erection, as the present amount of income from the punt would be greatly increased if a bridge in every way suitable and passable at all times and seasons, were erected.

That the erection of such a bridge would add materially to the traffic of the Great Northern Railway, and benefit a large and important section of the Colony. That there are no engineering difficulties to contend with, and the necessary expenses would be comparatively moderate, while the benefits to be derived therefrom would be incalculable and widely extended.

That your Petitioners may take the liberty of referring to the circumstance of a sum of money having been voted by your Honorable House to erect a barrier or dam across the river at the Falls, for the double purpose of enabling the inhabitants of West Maitland to obtain fresh water at all seasons, and also for this barrier being used as a roadway to and from the opposite side of the River Hunter, from Maitland; but your Petitioners understand that this scheme has, for certain good reasons, been abandoned, and the sum voted not required for the purpose originally intended.

May it therefore please your Honorable House to take this Petition into your consideration, and to act in the premises, as to your Honorable House may seem just and proper in the circumstances.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 1,377 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

STEAM CRANE AT NEWCASTLE.

(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 15 October, 1861.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 27 September, 1861,—

“(1.) That a copy of the Specifications issued for making the Steam Crane at Newcastle, dated 18 July, 1860, be laid upon the Table of this House.

“(2.) Also copies of all Correspondence between Mr. Moriarty and Messrs. P. N. Russell and Co., relating thereto.”

(Mr. Allen.)

SCHEDULE.

NO.	PAGE.
(Specification of Steam Crane, Newcastle)	2
1. P. N. Russell & Co., forwarding to the Engineer-in-Chief for Harbours, &c., general tracing of Steam Crane, &c. 21 August, 1860	2
2. Do. to do., drawing attention to above. 30 August, 1860.. .. .	3
3. Engineer-in-Chief for Harbours and Rivers to the Messrs. Russell, in reply to above. 1 September, 1860	3
4. P. N. Russell & Co. to Mr. Moriarty, further on the subject. 3 September, 1860	4
5. Mr. Moriarty to P. N. Russell & Co., in reply. 4 September, 1860	4
6. P. N. Russell & Co. to Mr. Moriarty, further respecting. 4 September, 1860.. .. .	4
7. Mr. Moriarty to P. N. Russell & Co., in reply. 5 September, 1860	5

STEAM CRANE, NEWCASTLE.

SPECIFICATION of a Steam Crane for Shipping Coals at Newcastle.

THE work to be executed under this Contract will consist in supplying, erecting, and putting to work, on the Wharf at Newcastle, a good, substantial, and powerful Steam Crane, with boiler, and all proper appliances and fittings, suitable for the loading of coals on board ship.

The accompanying drawing and this specification describe, generally, the dimensions and kind of Crane required. The ordinary weight which the Crane will have to lift will be about eight (8) tons; but the Crane will be required to be constructed of strength sufficient to be capable of lifting, with safety, a weight of not less than twelve (12) tons; and in order to prove that the Crane is competent to do the work required of it, and above described, the contractor will be held responsible for its safe working for a period of two months after it shall have been opened for *bona fide* use by the public.

A five-horse power high-pressure boiler, of approved construction, fitted with proper feed apparatus, and all the usual cocks and pipes, steam and others; blow-off pipes and cocks; steam and water gauges; and, in fact, all fittings and mountings usually required in such cases, shall be supplied and erected by the contractor, on some convenient part of the wharf adjoining the Crane.

The drawing exhibits the size and general arrangements of the Crane, as much in detail as it is considered necessary to shew them.

Minute details or particulars are not given, it being presumed that an intelligent contractor will understand all that will be required, and will estimate accordingly; it being distinctly understood that the work will be required, in all its parts, to be turned out in first-class style, and finished in every respect, both as regards material and workmanship, to the satisfaction of the Engineer-in-Chief for Harbours and Rivers, or whomsoever he may appoint to superintend the same.

The Boiler is to be capable of being worked up to a pressure of fifty pounds to the square inch.

All bearings to be of brass or gun-metal, with proper lubricating apparatus.

Any slight modification which may be suggested by the contractor, the effect of which would be either to improve the work or diminish the cost, such as slightly altering dimensions to suit patterns, will, if approved of by the before-named Engineer, be allowed.

The amount stated in the contractor's tender will be considered as the full price of the Crane, complete, and set to work to the satisfaction of the Engineer; and no allowances whatever will be made for any alleged extras.

The contractor is to state in his tender the time within which he will be prepared to complete the Crane and put it to work, under a penalty of £3 3s. per day, for every day that the work remains unfinished after the time so specified.

Payments will be made in three instalments, on the certificate of the Engineer as to the value of the work performed; the first instalment to be paid when the Castings are all made; the second instalment to become due when the Crane and its appliances have been erected on the Wharf at Newcastle; and the third and final instalment to be paid when delivery shall have been taken by the Government at the end of the period of maintenance by the Contractor—two months, as before specified.

The cast iron centre frame of the Crane is shewn as fittings on a pile; this pile will be supplied, driven, fixed, and braced into the Wharf, and roughly trimmed up by the Contractor for the Wharf; the cost, therefore, of this pile should not be included in the estimate of the Contractor of the Crane; but, with the exception of this pile, all other matters or things connected with the Steam Crane, such as holding-down bolts, chains, slings, and all other things required to set the Crane to work, shall be furnished by the Contractor for the Crane, and are to be considered as included in the amount specified in his tender.

E. O. MORIARTY.

P. N. RUSSELL & Co. to ENGINEER-IN-CHIEF FOR HARBOURS, &c.

*Sussex-street Engine Works,
Sydney, 21 August, 1860.*

SIR,

We have much pleasure in forwarding for your approval the general tracing of Steam Crane. We have made out the full-sized drawing on a very large board, shewing details which we shall be happy to shew you at your earliest convenience. The alterations which we propose, and which are principally suggested from the experience we had in a fifteen-ton Steam Crane we supplied to the Victorian Government eighteen months ago, and which

which has been at work since that time and giving the greatest satisfaction, are as follows:—
 The base plate we have strengthened with deep ribs, and intend turning it in the lathe where the bevel rollers work on, as well as boring out the socket for the Crane post at the same time, so as to ensure both being perfectly concentric. We have introduced three friction rollers to take the thrust at bottom of Crane post for the purpose of diminishing the friction in turning round the crane, also anti-friction gear at the top of the post for the same purpose. The cheeks of the Crane we have made of cast iron, $1\frac{1}{2}$ thick in the web, with very strong flanges all round the outside, as well as round the inside panels. The Crane post we have made larger in diameter and stronger. We have put the friction break wheel on the opposite side from the main spur wheel, so as to enable us to keep the box of main spur wheel as close as possible to the bearing, and lessen the strain on main gudgeon. We have made the cylinders with trunk pistons for the sake of compactness, exactly the same as those of the Victorian Crane. The whole of the remainder of the Crane, as well as general arrangement, is identical with the original plan.

Trusting the same may meet with your sanction,—

We remain, &c.,
 P. N. RUSSELL & CO.

P. N. RUSSELL & Co. to ENGINEER-IN-CHIEF FOR HARBOURS, &c.

*Sussex-street Engine Works,
 Sydney, 31 August, 1860.*

SIR,

We had the honor of addressing you on the subject of a Steam Crane on the 21st instant, but are still without a reply from you. We have now got many of the patterns completed, but would wish much to have your approval of them before putting them into the Foundry. As it is extremely probable we may soon have a rise in wages, we are very anxious to push on as fast as we can; we trust, therefore, you will give the subject your attention as soon as you conveniently can.

We remain, &c.,
 P. N. RUSSELL & CO.

No. 3.

ENGINEER-IN-CHIEF FOR HARBOURS, &c., to P. N. RUSSELL & Co.

*Department of Public Works,
 Harbour and River Branch,
 Sydney, 1 September, 1860.*

SIRS,

Absence from Sydney has prevented my replying at an earlier date to your communication on the subject of the Steam Crane at Newcastle, a tracing of some alterations in which accompanied your letter.

The sketch submitted by you contains so many defects, and is altogether so crude and ill-considered a design, that I could not on any account permit its substitution for the one you have contracted to erect; in fact, I am rather surprised at such a production emanating from any respectable mechanical firm, as it certainly does not appear to embody any of that great experience to which you allude as having acquired in the erection of an imported Crane at Melbourne, and which, by the way, is totally different in every respect from the Crane under consideration.

1. The trunk pistons your design exhibits are manifestly unsuitable; in high winds the trunks would get so covered at every stroke with coal dust and sand, for which Newcastle is celebrated, as to destroy any packing in a few days, and to render it impossible to keep them steam-tight.

2. The cylinders are placed in the very most inconvenient position you could possibly have selected, even if your intention had been to shut out the view in front from the man working the Crane. This error might lead to the most serious accidents, as an instant's reflection will convince you.

3. The cast-iron cheeks are neither so strong, nor so much to be depended upon, as the wrought-iron for which I have specified.

4. The cast-iron column is, by your plan, merely fitted into the sole-plate without being in any other way fastened to it or to the wharf; neither are the side frames fastened in any way to the centre column, so as to counteract the obvious tendency which the great weight acting at the outer end of the gib would have, to lift the frame off the column, or draw the column itself from its place. In the original plan this tendency is guarded against by fastening the column down to the sole-plate and the wharf by six $1\frac{1}{2}$ inch bolts, and by securing the movable frame to the column by a collar at the top; in fact, as your plan stands at present, there is nothing whatever to prevent the whole thing toppling over when the weight comes on the end of the gib.

5. The cross-frame at top of column shews the greatest amount of metal where it ought to have the least, and *vice versa*; this frame is not nearly so strong as that shewn in the original.

6. You make no provision for adjusting the conical rollers so as to ensure their concentric movement; this is a curious oversight, and one which your proposed arrangement of the box would render it difficult to obviate.

7. The manner in which you propose to secure the stay rods to the movable frame, by cast-iron lugs, is very objectionable; the sudden jerks and strains would be certain to break them off. In the original design they are secured to the wrought-iron cheeks by $\frac{7}{8}$ inch bolts.

8. The internal diameter of the column is less than the original; this I cannot allow.

9. I also object to the coupling clutches being at the outer extremity of the shaft.

10. If more convenient to you, and provided that the same strength of rail be maintained, and that the surface be turned up to the true bevel, I have no objection to a cast iron ring being substituted for wrought iron as specified.

11. As I mentioned to you at first, although I see no occasion for them, there is no objection to your introducing friction rollers, or increasing the diameter of the wheel into which the worm for slewing works; but the speed shewn in the original must be maintained.

12. You will please attend at your earliest convenience at the Crown Solicitor's Office, for the purpose of signing the necessary bond for the due fulfilment of your contract.

I have, &c.,
E. O. MORIARTY,
Engineer-in-Chief for Harbours and Rivers.

No. 4.

P. N. RUSSELL & Co. to ENGINEER-IN-CHIEF FOR HARBOURS, &c.

*Sussex-street Engine Works,
Sydney, 3 September, 1860.*

SIR,

We this morning received yours of the 1st instant. We regret much to give you so much trouble with regard to the Steam Crane. Nearly all the objections you have made to our general plan have been corrected in the full-sized drawing we have made, and which we would like you to see.

We are perfectly willing to construct a Crane in exact accordance with your plan, but must decline to prove it to twelve tons and uphold it for two months.

We remain, &c.,
P. N. RUSSELL & CO.

No. 5.

ENGINEER-IN-CHIEF FOR HARBOURS, &c., to P. N. RUSSELL & Co.

*Department of Public Works,
Harbour and River Branch,
Sydney, 4 September, 1860.*

SIR,

In reply to your letter of yesterday's date, I have the honor to inform you that, inasmuch as you have declined to carry out the contract for the Steam Crane for Newcastle in accordance with your tender, I have felt it my duty to recommend that the work should be re-advertised or else given to the tenderer next above you.

It will be obvious to you, that it would be most unjust to the parties who competed with you for the Crane, to permit you to substitute for the design on which they tendered, a contrivance of your own totally different from it.

I have, &c.,
E. O. MORIARTY.

No. 6.

P. N. RUSSELL & Co. to ENGINEER-IN-CHIEF FOR HARBOURS, &c.

Sydney Foundry, 4 September, 1860.

SIR,

We are duly in receipt of yours of this date. We regret that you have so misunderstood our letter of yesterday. We are quite willing to construct a Crane in accordance with our tender. Relying, however, upon several clauses in the specification, we expected that we would be allowed to make such modifications in the plan as would insure us from all risk in testing and upholding the Crane for two months.

We think that if you were to see the full-sized drawing we have made, and hear an explanation on the subject, that all would be arranged to your satisfaction. Or if you would prefer it we are quite willing to refer the matter to two unprejudiced individuals, or meet you and refer the matter to the Minister of Public Works, and abide by his decision. In fact we are willing to meet you in any way you may suggest, only we must positively decline to construct a Crane and take the responsibility of its carrying 12 tons, unless we are allowed to make several modifications in your plan.

We have, &c.,
P. N. RUSSELL & CO.

No. 7.

ENGINEER-IN-CHIEF FOR HARBOURS, &c., to P. N. RUSSELL & Co.

*Department of Public Works,
Harbour and River Branch,
Sydney, 5 September, 1860.*

GENTLEMEN,

I have the honor to acknowledge the receipt of your letter of yesterday's date. Permit me to say you are in error in supposing that I have misunderstood your letter; on the contrary, I thoroughly understand it, as well as the motives by which you appear to have been actuated throughout in this (as you have made it) very troublesome transaction.

You tender, amongst others, for a specific work, and as soon as your tender is accepted you immediately set to work to endeavour to substitute something totally different from that for which you and the others had tendered, thereby seeking to take, what I cannot help designating as a most unprofessional, as well as a most unfair advantage of the other tenderers.

If you are permitted to supply a Crane on some plan of your own, why should not the others have equally fair play and be allowed to do likewise? They may possibly supply, if called upon to do so, a cheaper and better design than you can; and to say truth, judging from the combination of stupidity and ignorance which the plan you sent in for my approval exhibits, they would not find much difficulty in doing so.

I certainly shall not look at your full-sized plan, nor will I allow myself to be a party to any such manifest injustice to the other mechanical establishments as you seem desirous of perpetrating.

I have, &c.,
E. O. MORIARTY,
Engineer-in-Chief for Harbours and Rivers.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

CIRCULAR WHARF, WOOLLOOMOOLOO BAY.
(SPECIFICATION FOR.)

Ordered by the Legislative Assembly to be Printed, 17 January, 1862.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 7 January, 1862, That there be laid upon the Table of this House,—

“ The Specification or a Copy of the Specification of the Works
“ required in the construction of the Circular Wharf at the head
“ of Woolloomooloo Bay.”

(*Mr. Lucas.*)

CIRCULAR WHARF, WOOLLOOMOOLOO BAY.

COPY of Specification for a Wharf in Woolloomooloo Bay.

THE work to be executed under this Contract will consist in the construction of a Wharf in Woolloomooloo Bay, in the position indicated in the accompanying general plan of the Bay, and in accordance with the general and detailed plans thereunto attached, and numbered consecutively 1 to 3.

Plans.—Plan No. 1 is a Survey of the Bay, on which is delineated by a red line the extent of the proposed Wharf, but the part only between the red lines will be entered upon under this Contract.

Plan No. 2 shews in elevation and cross section the manner in which the work is to be carried out; some slight alterations are purposed to be made in this drawing, which are shewn in red.

Plan No. 3 shews some borings which have been made in a line across the Bay, but they are only intended to give a rough approximate view of the depth of the sand and mud.

This Contract will be for the timber, iron-work, and copper, and other matters connected with the timber facing of the Wharf, and is not intended to include the stone ballast facing or the back filling, both of which will be executed under different contracts.

Piles.—The piles shall be truly pitched and driven at distances of ten feet apart from centre to centre, both longitudinally and transversely; they shall be of the best ironbark, round, not less than fifteen inches diameter at the toe, or than twenty inches at the head when driven in place and cut off to the proper lengths; they shall be shod with a cast-iron shoe weighing about seventy-seven pounds (77), of the kind shewn in the drawings, accurately fitted and secured with four $\frac{5}{8}$ inch spikes.

The piles shall be driven home to the bed rock with a 20 cwt. monkey, and no pile shall be considered to be fully driven till it shall have ceased to descend one inch after having received five blows of the monkey, falling from a height of 20 feet. Any pile driven out of the true line, or which may exhibit any injuries or defects after having been driven, shall be immediately drawn and replaced by a sound pile, at the Contractor's sole charge; when fully driven, the pile shall be cut off to the proper level, and a tenon worked on it 14" x 6" x 6" to fit into a corresponding mortise in the cap; the pile shall be secured to the caps and girders with anchor straps and bolts, in the manner shewn in drawing No. 2.

Copper.—All that part of the pile which will be exposed to the action of the salt water, namely, from eighteen inches below the surface of the mud or sand to high water mark, shall be sheathed with the best copper, or Muntz patent yellow metal, twenty ounces (20 oz.) to the foot, smoothly and evenly laid with proper laps, and secured with $1\frac{1}{2}$ inch nails of the same metal, in the proportion of $\frac{3}{4}$ lb. of nails to the sheet. Before laying on the copper or metal, all knots, projections, or other irregularities, shall be carefully trimmed off the piles.

All bolts passing through piles and walings below the top level of the copper or metal shall be of one inch round copper or metal, rivetted over rings of the pattern which may be seen on application at this Office.

Land Ties.—Land ties shall be attached to every fifth bay of piles; the land tie piles shall be not less than twenty feet in length, more if required. They shall be driven full twenty feet from the back of the wharf, in a slanting direction; they shall be secured to the inner end of the cap by two half timber braces 12" x 6", bolted to cap and land tie pile; to the face of the latter shall be spiked six hardwood slabs 9 feet x 4" x 9", against and around which may be packed a mass of stone ballast.

Diagonal Braces.—The diagonal braces are to be of the best ironbark, 12" x 6" x 25 feet in length, fitted to every alternate bay of piles, and secured to the centre and inner ones with copper bolts, and to the outer row with wrought iron bolts, one inch in diameter.

Fender Pieces.—Fender pieces are to be fixed to the face row of piles, and securely bolted to them with two iron and one copper bolts, each of one inch; they shall be scored into the pile, and shall be neatly rounded off at top and bottom, to prevent vessels riding on the Wharf or otherwise injuring it.

Landing Stairs.—One landing stair is to be fixed at the centre of each street, for the convenience of passengers landing from boats.

Stringers.—A stringer or guard piece 12" x 12" shall be laid over the outer ends of the planks on the face of the Wharf, and secured to the lower face beams with $\frac{3}{4}$ " bolts and nuts ten feet apart. The back stringer or that covering the inner ends of the planks to be 12" x 6", and secured with similar bolts and nuts.

Planking.—The deck or platform will be formed by a layer of planking 3" x 9"; the whole to be of the full width of the wharf in length. The planking shall be of approved Colonial hardwood—ironbark, spotted or blue gum, or blackbutt—sound and good. The whole to be closely and evenly laid and spiked down to the girders with $\frac{5}{8}$ " bolts 8" in length, of a pattern which may be seen at this Office, one to each beam.

Longitudinals.—The longitudinal bearers on which the planking is to rest shall be of ironbark, 12" x 12" and 12" x 6" alternately, of sufficient lengths to take four bays each; but they shall be so laid as to break joint on the caps properly. They shall be joined by vertical scarfs, at least three feet in length, and secured by three one-inch iron bolts. The

centres

centres of all scarfs to come over the centres of the piles or caps; the stringers shall be secured to the caps or piles with $\frac{3}{4}$ -inch plain, or one-inch anchor bolts, respectively. All scarfs to be closely and evenly worked, planed on the joints, and saw-fitted at the butts, and set up taut with a timber key before the fastenings are inserted. The cross caps also to be ironbark 14" x 14" and 26 feet long; they shall be mortised down on the pile heads, as before described, and secured with wrought iron anchor straps and bolts, in the manner exhibited in the drawing; to the inner end of every fifth cap will be attached the half-timber braces of the land tie piles.

The stone ballast shewn in the drawing as resting under the inner end of the Wharf will be executed under another contract.

All materials and workmanship to be used in any part of this work to be of the very best of their respective kinds; the timber shall be quite sound, perfectly straight, and with the exception of the piles, truly squared, of ironbark, spotted or blue gum, or other approved Colonial hardwood, free from knots, shakes, pipes, sapwood, and all other defects. All butts and joints to be neatly and closely worked. Scarfs to be planed, tenons to fit their mortises, and planks to be set fair on their supports, and to be set up close at the edges.

The cast iron to be sound and free from cracks, air-holes, and all other defects; the wrought iron to be of the best crown bar or cable iron, well and neatly forged. All screw bolts and nuts to have well and clean cut threads. Nuts to be one and one-half times the diameter of the bolt in depth. Washers of boiler-plate, 4" by 4" by $\frac{1}{4}$ ", to be placed under all heads and nuts.

Tarring.—The whole of the timber work shall receive two good coats of Stockholm or Archangel tar, boiled with a little pitch, and laid on hot. All joints to be well tarred before they are put together; the iron-work to be coated while hot with pitch or black varnish.

Mooring Piles.—A mooring pile shall be driven at every hundred feet on the Wharf, bolted to the girders, and rising about three feet above the platform; it shall be neatly rounded off at the head and covered with a cast iron cap, similar to those on the Circular Quay, Sydney Cove.

The plans, sections, and this Specification represent generally the nature, extent, and dimensions of the work, and are signed by E. O. Moriarty, Engineer-in-Chief for Harbours and Rivers.

Should any discrepancy be found between the scale attached to the drawings and the written dimensions, or between the drawings and this Specification, or should there be any ambiguity in them, the same shall be referred to the before-named Engineer, whose decision shall be final; and anything contained in the drawings or in this Specification shall be as binding upon the Contractor as if it had been contained in both.

As it is intended to carry out the work by a Schedule of Prices, the Contractor will be required to furnish one, stating in detail the cost of the different parts of the work. All such prices being for their respective items, fixed and fastened in place, to the entire satisfaction of the before-named Engineer. Schedule to state cost of—

1. Piles, as specified, driven at per foot run.
2. Caps, 14" x 14" x 26 feet, fixed and fastened in place, at per foot run.
3. Girders or stringers, fixed and fastened, 12" x 12" x 43', at per foot run.
4. Do. do. 12" x 6" x 42', at per foot run.
5. Walings do. 12" x 6", at per foot run.
6. Fender pieces do. 12" x 12" x 6", at per foot run.
7. Other timbers at per foot cube.
8. Planking 3" x 9", as before specified, laid and spiked, including spikes or bolts, at per hundred of 3 in.
9. Planking or sheathing, 2" x 9", at per hundred of 2 in.
10. Land tie piles and mooring piles, fixed in place, at per foot run.
11. Slabs for do., of the thickness specified, at per hundred super.
12. Wrought iron in straps and bolts, fixed in place complete, at per cwt.
13. Cast iron, fixed, including pattern and all other charges, at per cwt.
14. Copper or Muntz metal, laid as specified, including laps, nails, and all other expenses, at per foot super.
15. Copper bolts, rivetted on rings as specified, at per lb.
16. Tarring, at per one hundred feet super., one coat.
17. Coal tarring, at per one hundred feet super.

The Contractor shall find and provide at his own cost all timber, iron, tar, copper, or metal, and all other materials of every kind, together with tools, implements, pile engines, punts, and plant of all other kinds, as well as skilled and unskilled labour required to carry out the work in an efficient and expeditious manner. Should it appear that any minor matters have been omitted in the plans and specification, but the intention to include which is obviously necessary for the completion and stability of a well-constructed wharf according to the general design exhibited on the plans, all such additional parts or things are to be provided by the Contractor, and are supposed to be included in the contract sum on the rates stated in the Schedule.

The Contractor shall not in any case depart from the Specification, nor from the dimensions shewn on the accompanying drawings, without written directions to that effect signed by the before-named Engineer for Harbours and Rivers. But if the Government or the Engineer shall direct changes to be made, the Contractor is to execute them and to be paid the extra cost, or allow the corresponding reduction, both at per Schedule price, or as may be agreed upon between the Engineer and the Contractor, before such change is made; and

and in all cases of change authorized as above described, the change or alteration is only to be considered as affecting the object in view, and not as tending in any way to vitiate or annul the Contract generally.

The Contractor will be required to give due personal attendance, and in his absence to leave some properly qualified person with whom the Engineer may at all reasonable times confer.

The entire of the work, both as regards the quality of the materials and the mode of execution, is in every respect to be performed to the satisfaction of the Engineer-in-Chief for Harbours and Rivers or his assistant; and all its parts are to be executed in the most complete, permanent, and substantial manner, according to the true intent and meaning of the drawings and this Specification.

Should it appear to the Engineer that the Contractor is not performing his work in a proper manner, or with requisite expedition, or that he does not comply with the orders he may receive from time to time from the Engineer, then the Government are to have power to take the work out of the Contractor's hands, on giving him fourteen days notice in writing to that effect, and to employ other Contractors or workmen to complete the same, the Contractor and his sureties still remaining liable to the extent of their respective bonds for any extra cost the Government may be put to by reason of failure of the Contractor properly to complete the work; and any balance which may be due to him at the time he may be so discharged shall be retained by the Government, towards defraying any extra expense which may be incurred.

The Contractor shall state in his tender the time within which he will complete the work, and in the event of its non-completion to the satisfaction of the Engineer within such specified time, he shall forfeit and pay Fifty pounds (£50) per week for every week that shall elapse after such specified time, till its completion.

The work will be measured at the end of every four weeks, and payments made to the Contractor at the rate of eighty per centum on the value of the work actually executed and certified to by the Engineer and his assistant, estimated according to the Schedule of Prices to be furnished by the Contractor; the balance to be retained by the Government till the work shall be finally taken off his hands, which will be in three months after its final completion, if all its parts shall then be found to be in proper and perfect condition.

The Contractor will be bound to maintain the work for a period of three months after its final completion and use by the public; and if any parts should within that period shew any signs of weakness or of giving way, or should any defective workmanship or materials be detected, the Contractor, when called upon to do so, shall make good the same at his own cost, to the satisfaction of the Engineer, before the reserved balance will be paid.

Any materials or workmanship the Engineer may disapprove of shall be immediately removed, or if not done so within seven days after receiving notification so to remove them, the Engineer may cause the same to be removed, and deduct the cost thereof from the Contractor's next instalment.

Only net measurements of timber, iron, or other materials, will be allowed, notwithstanding any practice or custom to the contrary.

E. O. MORIARTY.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

RECLAIMING OF LAND IN DARLING HARBOUR.

(CORRESPONDENCE WITH W. C. WENTWORTH, ESQ., RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 17 January, 1862.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 17 January, 1862, That there be laid upon the Table of this House,—

“ A Copy of all Correspondence between W. C. Wentworth, or
 “ his representative, and the Secretary for Public Works, or
 “ any Officer of the Government, on the subject of reclaiming
 “ a large portion of Land from below high water mark in
 “ Darling Harbour, bounded by Druitt-street on the south;
 “ together with a Copy of all Correspondence and Reports from
 “ the Engineer for Harbours and Rivers, on the same subject.”

(*Mr. Dalgleish.*)

RECLAIMING OF LAND IN DARLING HARBOUR.

W. C. WENTWORTH, ESQ., to SECRETARY FOR PUBLIC WORKS.

Sydney, 29 October, 1861.

SIR,

I have the honor to represent, that having obtained permission from the Government to fill up and erect Wharves on my land in Darling Harbour, bounded by Sussex and Druitt streets, and having acted on that permission for many years, without interruption, until this day, when my workmen have been warned not to proceed further, I have therefore to request that they may be allowed to proceed with their contract, it being my intention, when the work is completed and the land reclaimed, to apply for a grant under the new Regulations.

I have, &c.,

W. C. WENTWORTH.

Mr. Moriarty is requested to report on this case.—W. M. A.—29/10/61.

Mr. Moriarty accordingly.—B.C., 29/10/61.—J. R.

E. O. MORIARTY, ESQ., to UNDER SECRETARY FOR PUBLIC WORKS.

Report.

THE filling in of the space in question is, in a sanitary point of view, highly desirable; the exhalations given off from the semi-putrid mud, when left bare by the receding tide, must be highly offensive and noxious. I therefore consider that the reclamation should be proceeded with as expeditiously as possible.

E. O. M.

31/10/61.

Submitted—Mr. Wentworth may be so informed.—J. R.—1/11/61.

Approved—W. M. A.—1/11/61.

UNDER SECRETARY FOR PUBLIC WORKS to W. C. WENTWORTH, ESQ.

Department of Public Works,

Sydney, 1 November, 1861.

SIR,

In reference to your letter of the 29th ultimo, requesting that orders given to your workmen to desist from filling up the water frontage of your land in Darling Harbour, between Sussex and Druitt streets, may be authorized to be withdrawn, I am directed by the Secretary for Public Works to inform you, that under a report received from the Engineer-in-Chief for Harbours and Rivers, he has approved of your being allowed to proceed with the filling in of the frontage in question, as desired by you.

I have, &c.,

JOHN RAE.

UNDER SECRETARY FOR PUBLIC WORKS to ENGINEER-IN-CHIEF FOR HARBOURS AND RIVERS.

Department of Public Works,

Sydney, 1 November, 1861.

SIR,

I am directed to inform you, that under your B.C. Report of the 31st ultimo, the Secretary for Public Works has approved of W. C. Wentworth, Esq., being allowed to proceed with the filling in of the water frontage of his land in Darling Harbour, between Sussex-street and Druitt-street; and I am to request, that if the orders to desist from this work, given to Mr. Wentworth's men, did not emanate from any of your officers, you will have the goodness to communicate this decision to the Harbour Master.

I have, &c.,

JOHN RAE.

1861.

Legislative Assembly.

NEW SOUTH WALES.

PILOT BOARD.

(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 27 September, 1861.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 5 March, 1861, That there be laid upon the Table of this House,—

“ A Report from the Pilot Board on the working of that
 “ Department, so far as regards Harbor Regulations, Harbor
 “ Masters, Pilots with their boats’ crews, Light-houses, Light-
 “ keepers, and suggestions for improvements in those matters.”

(*Mr. Dalgleish.*)

NOTE.—A portion of the Appendices referred to in this Report, and which are not printed herewith, will be found (in print) on the Record File of the Legislative Assembly Office.—Regis. No. 61—591.

PILOT BOARD.

SECRETARY TO THE PILOT BOARD to UNDER SECRETARY FOR FINANCE AND TRADE.

Pilot Board Office,
9 April, 1861.

SIR,

In reply to your application of the 7th ultimo, for a Report from the Pilot Board on the working of the department, I have the honor, by direction of the Board, to state, with respect to—

HARBOR REGULATIONS,

that they are very defective in many important respects, with regard both to Sydney and Newcastle; and acting upon the instructions of the Honorable the Treasurer, the Board prepared a Bill in 1859, embodying all the useful matter contained in the present Harbor Acts, and also certain matters not already legislated for; and they take this opportunity to urge upon the Minister, the desirability of having the same, with the few alterations now made, brought before the Legislature as soon as possible. (*Appendix A.*)

In connection with the subject of Harbor Regulations, the Board deem it their duty again to invite attention to the necessity for the appointment of an Inspector (who shall receive one moiety of the fine on any conviction), to see that the provisions of the Steam Navigation Act are enforced; and particularly with reference to the overcrowding of steamers engaged in the harbor-passenger traffic; otherwise they fear that some fatal consequences will result from the hazardous manner in which such vessels are overcrowded on Sundays and public holidays. (*Appendix B.*)

HARBOR MASTERS.

Sydney.—The Harbor Master of Port Jackson is an active energetic officer, and proved himself, while Sea and Harbor Pilot, to be thoroughly capable of those situations—knowing the harbor well, and exhibiting much skill in the management of a ship; the Board, however, regret that he does not possess the education, administrative ability, and urbanity, necessary for so important a situation.

The Board have had correspondence with the Government, which goes far to support the foregoing remark. (*Appendix C.*)

Newcastle.—The Harbor Master of Newcastle is a most efficient officer, and well qualified for the situation.

Eden.—The Harbor Master and Pilot at Eden was not examined before the Board as to his capabilities or knowledge of that port, and they can only state from report, that he does not appear to be well qualified for the situation; but this may not be of much consequence now, through the failure of the Kiandra Gold Fields, which will allow of this establishment being reduced.

Out Ports.—The business at the other out ports appears to the Board to be conducted to the general satisfaction of the public.

It being desirable that swinging moorings for adjusting ships' compasses should be laid down in this port, the subject has received the attention of the Board, and they have already searched for a suitable position; but pending a final decision in this respect, they advise that the sum of £500 should be placed upon the Supplementary Estimates for the work, believing that this amount, with the mooring chains and anchors now in possession of the Government, will be sufficient for the purpose.

PILOTS.

Port Jackson.—The Board are of opinion that no pilot system will ever be effective at this port, unless pilot vessels, to cruise outside the Heads, are introduced; and as their views upon this question are fully expressed in a Report, dated 15 September, 1858, they consider that it will be sufficient for the present to append a copy of the same hereto, with other papers, which shew how the present system came into operation. (*Appendix D.*)

Most of the boats belonging to the Pilot Establishment at the Heads are not adapted to the work, being far too heavy and unmanageable in a seaway; and the same remark will apply generally to the boats used at the Government boatshed; and the Board would again urge upon the Minister the necessity for adopting their recommendations in this respect. (*Appendix E.*)

As an improvement in the present departmental arrangement of the pilot service at the Heads, the Board beg to suggest that the Honorable the Treasurer should reverse the decision he arrived at a short time past, that the pilots should not be allowed to take private communications to vessels arriving off the port. The great advantage that the mercantile interest would derive from the adoption of such a practice at Home was made known to the Trinity House, and an order was at once issued to the Pilots in the Downs to deliver on board of vessels any communications sent for the purpose. (*Appendix F.*)

Before

Before disposing of this subject, the Board beg to express their conviction that no system of any kind will work satisfactorily unless they are authorized to exercise direct control over both pilots and men, even to their appointment and dismissal, subject to confirmation of the same by the Executive Council; for it is quite clear that good men will not come forward as candidates for the situations, if they find that their claims are passed over to make way for inferior persons, who may happen to possess more interest.

The Board beg to invite attention to the necessity for having screw moorings laid down at Newcastle, as recommended both by themselves and the Harbor Master there. (*Appendix G.*)

LIGHT-HOUSES.

The Lights of the Colony are all in good repair and in efficient working order; and from the judicious introduction of teal oil, which is in every respect more suitable for the purpose than the oil formerly used, a saving of at least one half in the cost of this expensive article, has been effected.

The Board, however, regret to have to comment upon the ill-advised manner in which the site for a Light-house has, at least in one instance, been decided upon by persons who, from want of a knowledge of the characteristics which it is necessary should be sought for in selecting a site for a Light-house, are wholly incapable of forming a correct opinion on such a matter. Of this the Jervis Bay Light affords a lamentable instance. But as the Government and Legislature are already familiar with the circumstances, the Board merely append a copy of the correspondence (*Appendix H*), and beg to express a hope, that, in future, before such matters are finally determined upon, they, as a nautical authority, may be afforded every facility for taking evidence as to, and personally inspecting the locality at which it may be the intention of Government to erect a Light-house. The same suggestion holds good with reference to buildings of every description appertaining to marine establishments; and as the Board are often in a position from experience and personal knowledge to offer valuable suggestions respecting structures of this nature, they would advise that all plans and specifications of proposed works should be submitted for their inspection before any decisive steps are taken.

The Board beg to recommend that the Lighthouse near Jervis' Bay be removed to Crocodile Head, and the lantern changed; and when this and the Port Stephens Light are in operation, they conceive that the coast of New South Wales will be sufficiently lighted for the present.

LIGHT-KEEPERS.

The Board much regret that their repeated recommendation, that increased and graduated salaries should be given to light-keepers, is disregarded, and they beg to assure the Minister that unless some inducement is offered to the subordinates to secure promotion to higher salaries by good conduct and zealous discharge of duty, the economy of the Light establishments will never be brought to that degree of efficiency which it is most desirable should be attained.

The Board cannot deprecate too strongly the manner in which appointments are made to, and vacancies in these establishments are now filled up.

When it is considered how many lives, and what great value in property depends upon carefulness and accuracy in the exhibition and management of a light, the absolute necessity for the employment of respectable, temperate, and experienced men, must be apparent to everyone; but the Board greatly regret to have to report that due regard has not hitherto been paid to these qualifications; men wholly inexperienced (and in one instance of intemperate habits) have been sent to enter upon the duty of managing (at times during a four-hour's watch in the dead of night) an apparatus which requires to be worked by a skilled and steady hand; and to be entrusted with the care of costly reflectors and glasses, which if damaged or broken it might not only be difficult to replace, but would involve considerable pecuniary outlay.

Not the least evil in the present mode of appointment is, that the men who have served many years in the Light-houses, and whose experience and past conduct are guarantees of their competency, and who therefore have a claim for consideration from the Government, are entirely overlooked, and even slighted, when new appointments or vacancies occur; consequently they become sensible that merit, experience, and assiduity, in the performance of their duty, are valueless; therefore they take no interest in their situations beyond doing, as a matter of form, that only which is absolutely required of them.

The Board would therefore beg to recommend that all appointments to new Light-houses be filled by promoting keepers from other lights, so that, if possible, there shall only be one person unacquainted with the duties in any Light-house at one time. (*Appendix I.*)

In support of the foregoing observations the Board beg to refer to the various papers and extracts from their correspondence hereto attached. (*Appendix A to I.*)

I have, &c.,

W. J. WILSHIRE,

Secretary.

APPENDIX.

A.

*Pilot Board Office,
25 November, 1859.*

Sir,

I am directed by the Pilot Board to transmit a Draft Bill, compiled by them, to consolidate and amend the Laws relating to Harbors and Shipping, in accordance with directions from the late and present Honorable Treasurers.

This Bill, it is believed, will be found to be sufficiently comprehensive for all requisite purposes. It does not involve any new principle, or matter likely to create discussion, and embodies the amendment required in the Pilotage Act of last year.

It repeals all the existing laws applicable to harbors, excepting as to any rights, or acts done in pursuance thereof; provides for a Pilot Board, and amalgamates the Steam Navigation Board with it, and gives the Governor power to appoint Boards at the out-ports; empowers the Governor to make Port Regulations, as at present, and provides for the control of licensed watermen, and ballast and gunpowder boats.

Gives power to the harbor authorities (not, as at present, to the Bench of Magistrates), to remove obstructions in the harbors or rivers.

Provides for the payment of dues of 4d. per ton in, and 4d. per ton out, for the support of pilots, light-houses, &c.; but exempts vessels under thirty tons, if employed in the coasting trade, and also vessels commanded by certificated masters, from all but one annual payment.

Gives the Board authority to grant, revoke, or suspend certificates of competency to masters of vessels; also, to inquire into the circumstances of a wreck, collision, or accident, or into cases of neglect of duty by a master of a vessel, and to summon witnesses.

Provides for the collection of all dues, rates, and fees, and payment thereof to the Colonial Treasurer; for taking summary proceedings for punishment of offenders, and for the appropriation of the penalties.

As this Bill has been framed without legal assistance, it is necessary that it should be forwarded to the Parliamentary Draftsman for correction; and when corrected, or amended, it would be more convenient if it were printed and returned to the Board for further consideration, before being submitted to Parliament.

I have, &c.,
W. J. WILSHIRE,
Secretary.

To the Under Secretary
to the Treasury.

B.

*Steam Navigation Board Office,
29 April, 1859.*

Sir,

I am directed by the Steam Navigation Board to request that you will have the goodness to invite the attention of the Honorable the Secretary for Finance and Trade to the subject of the overcrowding of the steamers running in this port on holidays, and intimate to that Minister that the prevention of this practice has received the constant attention of the Board; and the Water Police Magistrate has been requested to make example of such cases as might come under the notice of that officer; but from the inadequacy of the Water Police Force to attend to the matter in question, in consequence of their duty calling them elsewhere, the practice of fearfully overcrowding the steamers has now almost reached its climax.

It appears, therefore, to the Board, that some steps should be taken by the Government to check this dangerous custom, by enforcing the Act, either by an instruction to the police generally, or by the appointment of an Inspector of Steam Vessels, whose duty it should be to watch them on the particular days mentioned.

I have, &c.,
W. J. WILSHIRE,
Secretary.

The Secretary
to the Treasury.

*Steam Navigation Board Office,
31 December, 1860.*

Sir,

I am directed by the Steam Navigation Board to request that you will have the goodness to invite the attention of the Honorable the Treasurer to the Board's letter of the 29th April, 1859, upon the subject of the over-crowding of the steamers on holidays, and that you will intimate to that Minister that as the police have not been instrumental in bringing to punishment the masters of vessels who, the Board believe, on such days wilfully and constantly infringe the provisions of the Steam Navigation Act, and thereby endanger the lives of the people—and as, in case of accident, the loss of life would be most serious, they beg again to urge the necessity of some more efficient means being taken to prevent a recurrence of the violations of the Act.

I have, &c.,
W. J. WILSHIRE,
Secretary.

The Under Secretary
for Finance and Trade.

Upon a representation to the same Minister that a certain steamer had been allowed to run in a very deficient state, he asked the Board "to favour him with a report, whether any steps are taken to see that all the requirements of the Act are complied with by any supervision at uncertain periods, and on occasion of steam vessels leaving their respective wharfs?" The Board replied, "That with the exception of cases in which accidents occur to the machinery or vessel (when they send the surveyors on board) the supervision is left to the police authorities, or to any casual informer to bring under notice any breaches of the Act."

W. J. WILSHIRE,
Secretary.

16 January, 1861.

C.

C.

REPORT of the Pilot Board on the complaints made by John Foley, Boatman, against the Harbor Master and the Boatswain :—

In pursuing this inquiry the Board afforded Foley every opportunity of proving his case, and permitted him to elicit from the witnesses he summoned, all the information they were capable of affording. The complaints made by him may be summed up in the following charges, recorded in a journal kept by a friend of his; and, as he states, written from his dictation at the time the events occurred :—

- 1st. That the Harbor Master is in the habit of making use of the public boat and crew for the amusement of his family and friends, and that he employs the men in carrying coal and provisions to his house.
- 2nd. That he has employed the Government mechanics to repair his own boat, at the same time using Government materials; that he has also given, for the use of the same, a pair of oars, and to the master of his cutter a quantity of oakum, and has employed the mechanics at other matters for his private use.
- 3rd. That he has treated him, Foley, in a harsh and unjust manner, having dismissed him from his situation without sufficient reason, whilst he has shewn favouritism to other of the men by allowing them to be absent from duty, not on account of ill health, but to nurse their wives and to work in his garden.

The charges against Mr. Barnett are, that he is in the habit of making use of blasphemous and bad language to the crews, in the discharge of their duty, and that he neglects his own by being constantly asleep during the usual hours of work.

Foley's witnesses were—boatmen Briggs, O'Shea, McCraw, Jarratt, Tessier, and Johnson. Mr. Crook called Mr. Cronin, boatman Sleith, and Sergeant Dewar; and Mr. Barnett called Mr. Hinton and boatman McCraw.

The Board having weighed the statements and evidence put in by the Harbor Master and boatswain, are of opinion that in respect of the first charge against the former, the evidence does not at all bear out the complaint, as, although it was at once admitted by the Harbor Master that he has occasionally, when going to Bedlam Ferry, or to the Heads, on duty, or to other parts of the Harbor for the inspection of sites of proposed wharfs, taken in his boat one or two of his daughters, or his son-in-law, there does not appear to be any day on which the boat was sent on a pic-nic, or in which ladies were taken, except on regatta days, unless the Harbor Master was availing himself of the opportunity of taking them when going afloat on duty; and the employment of the men to take coal to his house consisted of directing his own boatmen to tow round to Moore's Wharf, on one occasion, a lighter of coals, which he had purchased for his own use.

In respect to the second charge, Mr. Crook admits, and Mr. Barnett also bears out the fact, that a large long boat, formerly his own, but now the property of his son, was repaired at the Government boat-shed, at a cost amounting to about £16, according to Mr. Barnett's estimate, but all the materials used were not the property of the Government, some, particularly the copper, having been supplied by Mr. Crook himself.

Mr. Barnett also states that he gave an old and useless pair of oars away, by Mr. Crook's order; and also a small handful of oakum to the master of the cutter, who had brought up some lamp glasses, to pack which he had used his own oakum.

In justification of the repairing of the boat at the Government shed, Mr. Cronin, master of the Steam Dredge, and Sergeant Dewar, R.A., were called, both of whom proved that they had had the use of the boat on several occasions for carrying out anchors, shot, shell, and large pieces of gun carriages; and although their evidence failed to prove that they were aware of any particular damage having been done, the Board believe that the Harbor Master's statement in that respect is correct, and that the boat was damaged in the service of the Government.

The charges as to the oars, oakum, and mending of a shutter at Mr. Crook's house are proved, and are such irregularities as ought not to have occurred.

In respect to the third charge the Board have failed to elicit anything particularly bad on the part of the boatman Foley, except that he was, on a previous occasion, reported for misconduct; and that there is every reason to believe that he was seen at a public-house at a late hour on the evening previous to that on which he absented himself; and, although his dismissal was rather of a summary character, the Board are not inclined, after the vindictive feeling which he has manifested against Mr. Crook and Mr. Barnett, at the inquiry, and the evident bad spirit in which the charges are brought forward, to recommend his reinstatement to the Government service. The other portion of this charge also falls to the ground, as it is clear to the Board that the boatman Sleith was really ill, and not employed, during his absence, at Mr. Crook's house, and that it has occasionally been the practice to allow a man, in case of his wife's illness, to stay at home a day or two to nurse her; and in this way the absence of Haggerty is accounted for, which for so many days escaped the notice of the Harbor Master.

The charge of neglect of duty against Mr. Barnett has not been proved, the evidence going only to shew that he was asleep on two occasions; and, as it was admitted by some of the men that he was on more than one occasion ill, and recommended to go home, but preferred to lay down at the premises in case he should be required, the Board believe this also to be a frivolous complaint.

In respect to using bad language the Board regret to say that it is not only proved by the witnesses, but admitted by Mr. Barnett himself. He however pleads in justification that the men were put to such duty as quarrying stones, &c., in addition to their proper work, and were consequently very disobedient and troublesome; and that as he did not consider that he was supported by the Harbor Master, and not unfrequently complained of in the presence of the men, and his authority thereby lessened, he occasionally lost his temper, and was guilty of the charge against him. The Board believe that Mr. Barnett has had a good deal to contend with in the present imperfectly regulated establishment under his charge; but as this forms the subject of a separate Report it will not be necessary to allude to it further, and they consider that a reprimand and caution as to future behaviour will in this respect suffice.

Deprecating, as the Board do, the course adopted by Foley in bringing charges against his superior, after his removal from the Government service, it is gratifying to them to be able to report an almost satisfactory explanation of all; but, in arriving at this conclusion, they cannot but condemn a practice fraught with so much danger, as that of lending private boats for the Government service, the employment of public labor on which is capable of so much misrepresentation, and they would, therefore, advise that the Harbor Master should be instructed to make a representation when he has not a sufficient number of Government boats for the duties required of him; and that he is not to allow, on any pretence whatever, any work to be performed, except for or on account of Government property, or part with any stores, however useless, without the authority of the Government.

The

The Board in closing this Report, regret that the statement made by Mr. Barnett, in respect to the report he made of repairing Mr. Crook's boat, remains unanswered by that officer, and they hope that it was a misconception by Mr. Barnett, of what fell from Mr. Crook on the occasion alluded to, as the Board could not but observe, in the course of the inquiry, that, although relations, these officers did not appear to be on the best terms, which may have accounted for the indiscretion of which the Harbor Master was guilty, if the conversation reported actually took place.

By order of the Board,

W. J. WILSHIRE,
Secretary.

Pilot Board Office,
21 March, 1860.

C. (2.)

In reporting on the working of the *Boatshed* Establishment, at Sydney, the Board stated:—

“ We are fully sensible that the general, uncertain, and harassing duty now imposed on the men,—
“ the absence of all consideration on the part of the Harbor Master and the boatswain, together with
“ the evident misunderstanding between these officers, is sufficient to render the whole establishment
“ inefficient, and the men discontented and unwilling.

“ Whilst inquiring into this matter the Board have not overlooked the charges and counter-
“ charges contained in the correspondence between the Harbor Department, Treasury, Post Office, and
“ Customs; and they believe that the recommendations they submit, will, if properly carried out,
“ remedy all the defects complained of; and whilst the Board consider it only right on the part of the
“ Harbor Master to bring under notice any unnecessary detention of a boat, or improper employment
“ of the men, it must, nevertheless, be the province of the officer in charge of the boat to know best
“ when he can dispense with it, and if not permitted to be entrusted with such a responsibility, he
“ must be unfit for the position he holds in the service of the Government.”

D.

REPORT of the Steam Navigation and Pilot Board upon the Pilotage system.

Appendix C. (2.)

In attention to the Treasury letters of the 10th June, and of the 22nd and 26th July, we have now the honor to report that, having given the subject matter therein alluded to, our best consideration, we have arrived at the conclusion that the only thoroughly efficient system of pilotage to be introduced, which is likely to provide properly for the growing requirements of the port, is by the establishment of pilot vessels to cruise outside the Heads. In arriving at this conclusion we have carefully reviewed the evidence taken before the Light, Pilot, and Navigation Board in October last, and considering that the weight of evidence, given by men of considerable experience and nautical ability, is in favor of sailing vessels, and that our own view in this matter is unchanged, we have no hesitation in recommending the adoption of this scheme for the consideration of the Government.

It is admitted by every one that the present system is not only faulty in principle, but also ineffectual in operation, and as a return to the system of competition would place the pilots so completely beyond the sphere of control, it is not advisable to adopt it.

The question, therefore, resolves itself into two propositions, namely,—the establishing of sailing vessels to cruise outside the Heads; and the adoption of six-oared whaleboats, and employment by the Government of sufficient crews to man them; and as the annual expense of maintenance of each system would be nearly equal, with the exception of the first cost of the sailing vessels, we propose giving preference to the sailing vessels, as ensuring the attendance of pilots in pilots water, which could not be effected under any other arrangement.

We therefore recommend that two vessels be obtained, of not less than 70 tons burthen, and that they be manned and maintained at the following expense, namely:—

For each vessel, including the cost of provisions:

	£
One master, at per annum	250
One mate, at £15 a month	180
Five seamen, at £10 do.	600
One boy, at £7 do.	84
	<u>£1,114</u>

or £2,228 for the two vessels.

That, for rendering assistance for supplying pilots for outward bound vessels, a whaleboat with four men and a coxswain be attached to the establishment.

The coxswain of the boat, as also the crew, should reside at Camp Cove, in the neighbourhood of the lifeboat station, in whose charge the lifeboat should be, and they will thus form the nucleus of the crew for manning her whenever required in case of wreck or accident.

The annual cost for the support of the whaleboat would be as follows:—

	£
One coxswain, at per annum	120
Four men, at £103 each	482
	<u>£552</u>

The number of pilots, to be permanently maintained, should be six; the three senior pilots should receive an annual salary of £400, and three junior, £350, subject to a reduction of 2½ per cent. to form a fund for the relief of the families of pilots, which may require assistance in consequence of loss of life, or of injury which may be sustained by any of the pilots, when engaged in the discharge of their duties.

The masters of the pilot boats should be licensed as pilots, and when called upon to act as such, they should be entitled to receive from each vessel of less than 500 tons, the sum of £2 10s., and for any above that tonnage, £5—such sum to be deducted from the salary of the pilot who ought to have been in attendance to take charge of the vessel so piloted; but in the event of no neglect existing on the part of the pilot, no deduction shall be made.

In making this suggestion the Board have not thought it necessary to enter into any question of detail, as they anticipate that it will take probably to the end of the year before the vessels can be provided, which will afford ample time for making the proposition complete in all its minor arrangements, so as to secure an efficient discharge of the duties appertaining to the service in question.

The coxswain of the whaleboat must be at once appointed, and placed in charge of the lifeboat now about to be stationed at Camp Cove.

In

PILOT BOARD.

In carrying out this scheme the Government will be called upon to expend out of the funds collected under the "Pilotage Amendment Act of 1853," about £3,000, for the purchase of the vessels; and the total annual cost for the maintenance of the sea pilots, after this outlay, may be estimated as follows, which it is anticipated will leave a large balance available towards upholding the lights, out of the tonnage duty to be collected under the Act before mentioned.

	£
1858. Cost of building two vessels, at £1,500 each	3,000
Maintenance of five pilots, at £640 each per annum, from 22nd July to 31st December	1,420
One coxswain, at £10 a month, for three months	30
	£4,450
1859. Maintenance of two pilot vessels, at £1,114 each	2,228
Four—crew of whaleboat, at £108 each	432
One coxswain, at £120	120
Stores, repairs, sails, &c., £200 each vessel	400
Three pilots, at £400 each	1,200
Three do., at £350	1,050
Cost of whaleboat	50
Fuel and light, £50 each vessel	100
Extra pilotage	200
	£5,780
HARBOR PILOT.	
Deputy Harbor Master and Harbor Pilot	300
Two men, at £108 each	216
	£516

The Board propose that the sea and harbor pilots be kept distinct, and that, as at present, the harbor pilots should take charge from the sea pilot when the vessel is brought as near as practicable to the intended place of anchorage; and that the sea pilot also take over the vessel in like manner when removed by the harbor pilot for the purpose of proceeding to sea.

We propose that a Deputy Harbor Master, to act as harbor pilot for the removal of vessels proceeding to sea, be maintained at a salary of £300 a year; and that he be allowed a boat and two men, at a salary of £108 a year each, to be paid out of the collections under the Act.

The amount received for removals we recommend should be paid over to the mud pilots, who, we propose, should be licensed as such, and limited, in the first instance, to three, with power to increase that number, should circumstances require it.

These mud pilots should be obliged to maintain, at their own expense, a boat and two men; they should be licensed, and be removable in manner similar to all other pilots.

They should receive payment for whatever vessels they might remove, in accordance with the scale of charges provided by the Act.

They should be subject to the orders of the Harbor Master, or his deputy, as to the removal, anchorage, or berthing of vessels; but they might, in other respects, be entitled to seek for employment, without interference on the part of the Government or harbor authorities.

H. H. BROWNE, Chairman.
W. S. DELOITTE.
BENJN. DARLEY.
S. NORTH.
GOTHER K. MANN.

Steam Navigation and Pilot Board Office,
15 September, 1858.

The Executive Council adopted a six-oared whalchoat system, and requested the Board to prepare regulations for carrying the same into effect. They did so accordingly, and the system detailed in the regulations (hereto attached) of 25th January, 1859, is the one now in operation.

In forwarding the Estimates for 1860, the Board wrote:—

" 2 August, 1859.

" For the pilot service of Port Jackson the Board have framed the estimate, on the assumption that it is the intention of the Government to continue the system now in force; but, if such be the case, the Board take leave to observe that such a* system will not, in their opinion, be found to work satisfactorily; and they would again recommend the establishment of sailing vessels to cruise outside the Heads, and the abolition of the up-harbor pilots, by licensing mud pilots to perform the duty. Should the Honorable the Treasurer feel any doubt as to the applicability of sailing vessels to the performance of the duty outside, the Board would suggest that one vessel be placed at their disposal as an experiment.

*That under Regulation of 25 Jan., 1859.

" To carry out this system an additional sum of £2,000 would be required to be voted for the purchase of a vessel, but a reduction would be made in the general cost of the establishment, both in the number of men and the salaries of the pilots; whilst, to carry out the mud pilot system, a considerable reduction could be made, by leaving the pilots to collect the fees leviable for the removal of vessels.

" The pilot service, with sailing vessels, would not be more costly than at present, whilst it would, in the opinion of the Board, be more effective; and, looking to the large amount collected in Sydney, from the shipping, as pilotage, the Board consider that every means should be adopted for making the service as efficient as possible."

In forwarding the Estimates for 1861, the Board wrote:—

" 22 August, 1861.

" In forwarding these Estimates the Board beg to remark, that the whole of the expense for the harbour and pilot Establishments, is met by the revenue collected for pilotage; and, when it is considered that many of the out-ports, whose annual cost for maintenance is very considerable, contribute a very small proportion of this revenue, the Board feel that they are not exceeding their duty in recommending that ample provision should be made for maintaining an efficient staff at the principal ports, and they hope, with some confidence, that the day is not far distant when they may be authorized to construct Pilot Establishments at Sydney and Newcastle, having sailing vessels to cruise outside."

E.

EXTRACTS from a Report of the Pilot Board on the Boatshed Establishment at Sydney Cove.

"19 March, 1860.

" Having analyzed the evidence taken at the inquiry the Board have arrived at the conclusion that this establishment, although amply sufficient for all the present purposes of the port, does not perform the duties required of it in a satisfactory manner, and that it is defective in organization and discipline.

" That the boats attached to it are unnecessarily heavy and cumbersome, and thus an amount of labor is uselessly expended in the management of them.

" In this the Board are borne out by almost all the witnesses, from the Harbor Master downwards; the Health Officer, Post Office Superintendent, and Mr. Mowle, Tide Surveyor, fully believing that the use of these large boats occasions an unnecessary expenditure of money and labor; and these officers feel that they would be able to perform their respective duties more satisfactorily, if provided with well appointed small boats, pulled by willing and efficient men.

" Before recommending so great an alteration in the constitution of the establishment, the Board availed themselves of the evidence of Mr. Cook, Shipping Reporter to the *Sydney Morning Herald*, who, it was well known, is in the habit of boarding, in any weather, all inward-bound vessels; and his opinion as to the advantage of using small boats confirms the Board in the recommendation they are about to make. Mr. Cook states that he formerly employed a whaleboat and five men, and that now he employs a waterman's skiff and one man in fine weather, and two in bad; that he finds that he is able to do his work more satisfactorily by this arrangement, and without danger. He also instances an occasion on which he boarded a vessel in company with the Health Officer, and in consequence of the heaviness of the boat, although pulled by four men, they, with much difficulty, got to Sydney, and considers that, if in his own boat with two men, he would have got back in half the time.

" Agreeing, therefore, in most that has been said by the witnesses in respect to this establishment, and believing that the duty, as now arranged, is not only irksome to the crews, but unsatisfactory to the Government officers generally, the Board are unanimous in making the following recommendations, which will not entail any outlay for additional men, but only a small extra cost for carrying out an alteration in the organization of the establishment, and the introduction of a different description of boats.

" The Board accordingly recommend:—

" That the boatmen be divided into 3 classes—the first to consist of 6 coxswains, whose duty

" it shall be to join in charge of every boat, and to pull the after or stroke-oar. That, as coxswains, they receive an addition of 10s. a month to their present pay.

" That the 2nd class consist of 16 men, to receive the same pay as at present.

" That the 3rd class consist of 6 men, to receive £6 a month only.

" That promotion be made according to good behaviour, and that all vacancies be filled up by appointment in the lowest grade.

" That young, strong, and healthy men, accustomed to the sea, or having been employed as boatmen or fishermen, be appointed to the establishment.

" That misconduct be punished only after due inquiry, on report from the boatswain or superintendent, the first offence being visited by degradation in class, but ultimate dismissal only on an inquiry before the Pilot Board.

" That the superintendent be allowed to exercise more direct control than at present; and that, although subject to the direction of the Harbor Master and Pilot Board, he is not to be liable to continual interference, or to be found fault with in the presence of his men. He should also exercise the same control over the crews employed by the Harbor Master and Harbor Pilots, as over all others.

" That the crews should, as far as possible, be placed on similar routine duties daily, and the coxswains always.

" That three or four small boats be at once built, of somewhat larger dimensions than a waterman's skiff, to pull two oars or two pairs of sculls.

" That, in arranging the duties of the small boats, the boatswain must consider the state of the weather, but that, irrespective of this, he will be expected to provide a four or five-oared boat for the Customs' officer who has the inward boarding duty; and two two-oared boats for the other two tide surveyors, who perform the duty of visiting the vessels and the examining of pricking notes.

" That the Health Officer, Post Office Superintendent, Chaplains, and Visiting Surgeon, Cockatoo Island, Inspector of Distilleries, Landing Surveyor, and Colonial Storekeeper, be provided with two-oared boats.

" That, to ensure a uniform appearance in the men, when on duty, they be provided with two suits of clothing a year—one for summer, and another for winter months.

" That, as far as possible, single men be selected for the establishment, and eventually that a barrack be erected for their accommodation in the vicinity of the shed."

F.

*Pilot Board Office,
14 December, 1860.*

Sir,

It has happened that the pilots, in boarding vessels arriving off the port, have taken private communications, which had the effect of altering the vessel's destination, and risk being thereby incurred of the pilot and men losing remuneration for their services, I am directed to submit the following suggestion of the Board, for the approval of the Honorable the Treasurer, viz. :—

" That letters, or telegrams, addressed to vessels expected to arrive, shall be taken on board by the pilot in turn for duty outside, and that he shall (in the event of the vessel not coming into port), be entitled to demand from the captain, or take his order on the agent, for half of the usual remuneration, that is, £3 5s. outer-bearings, or £1 7s. 6d. inner-bearings. The circumstances, in such cases, to be reported to the Harbor Master."

The Under Secretary
for Finance and Trade.

I have, &c.,
W. J. WILSHIRE,
Secretary.

This communication was returned from the Treasury with an intimation that the Minister considered that the agents of vessels should communicate with them at their own expense, and requesting the opinion of the Board whether it would not be better to forbid the pilots from communicating with such vessels at all.

The

The Board replied, that to forbid the pilots doing so, would lead to irregularities, tending to breaches of the revenue and quarantine laws; and that they considered that it would be better to allow the practice, under proper regulations, and in connection with a department over which Government had control.

The Minister, however, decided that the pilots should be prohibited from making or taking any such communications to vessels; and they were instructed accordingly.

On 23rd March, 1861, the Board forwarded a copy of a notice issued from Trinity House, London, to pilots in the Downs, ordering them to communicate information intended for vessels expected to arrive, and invited the Minister's attention to the circumstance of his having lately decided against a recommendation that an order to that effect should be given to the pilots here.

G.

In December, 1860, the Board recommended that the sum of £500 should be placed on the Estimates, for purchasing and laying down screw-moorings at Newcastle.

The Minister required further information before being prepared to propose so large a provision for this service, and the Harbor Master, Newcastle, was instructed to report fully on the subject, and furnish plans.

This report and drawings were sent to the Treasury in January, 1861, and the Board repeated their recommendation as to £500 being provided for the service, but suggested that the opinion of the Engineer-in-Chief for Harbors and Rivers should be taken as to the description of moorings to be used. That officer did not approve of the proposition of the Harbor Master, on account of the very considerable outlay that it would involve; but neither the Board nor the Harbor Master ever intended that such an extensive system of moorings as that shown in the drawings should be laid down at the commencement, and when the former recommended £500 for the work they considered that that sum would be sufficient to initiate an undertaking equal to the present requirements of the Port. As Mr. Moriarty disapproved of the Board's scheme, but admitted the necessity for moorings of some kind, the Board advised that that gentleman should be requested to submit a plan.

I.

COMPLAINT having been made by the Principal Keeper, Hornby Light, against an Assistant Keeper named Hunter, the Board reported:—

"8 October, 1858.
"From the ill-feeling which appears to exist between the keepers, they fear that if Hunter be allowed to remain, his conduct will prove detrimental to the service, and they recommend that he should be provided with a situation in the Steam Dredge, or with some other employment for which he is more suitable than that in which he is at present engaged."

And again—

"13 October, 1858.
"With reference to the charge of intoxication it was distinctly stated by Mr. Brown that Hunter was intoxicated, and as firmly denied by the latter; and as members of his own family only were present at the time of his arrival from Sydney (with the exception of Mr. Brown), the Board did not think it advisable to call them. They are, however, satisfied that it would be beneficial to the Government service to remove Hunter from the Lighthouse. In consideration of his large family and extreme want, the Board recommend that he should be placed in the Steam Dredge, or in some other service more suitable to his capabilities."

This man was not removed until the end of December, 1858. During the 7 months that he was one of the keepers 344 glass cylinders were broken; during the corresponding 7 months of 1860, 22 were broken.

Pilot Board Office,

24 March, 1859.

THE Pilot Board have the honor to report with reference to the matter of complaint by the principal keeper of the Hornby Light, against the second keeper, McGrath (inquired into 17th inst. and postponed until 21st inst., in order that the Board might visit the Establishment in the meantime), that they proceeded to the Lighthouse in company with the Harbor Master, and examined the first keeper, Robinson, in the presence of McGrath, and although there does not appear to be sufficient evidence to prove McGrath guilty of having recently scratched and destroyed the reflectors, it is nevertheless conclusive in the minds of the Board that he is a person of slovenly and indolent habits, and that on the occasion referred to by Mr. Brown, he was disobedient, and neglected to perform the duty to which he was ordered; and they therefore consider that it would be advisable to appoint a more suitable person.

The Board beg also to report that it was painfully evident to the members, on the visit in question, that through the employment of incompetent persons, not only unaccustomed to the management of the delicate apparatus of a Lighthouse, but also from their previous habits, physically unfit to perform such a duty, the reflectors have already become so much scratched and destroyed as to render them less effectual than they ought to be; and they have, in fact, during a period of not more than 10 months, received irreparable injuries, which, if allowed to be continued, will render it necessary for the Government to expend, within a short time, a large sum of money to replace the reflectors, which ought, with proper care and attention, to have lasted for 20 years; the Board beg therefore to urge upon the Government the necessity for leaving the nomination of lightkeepers in the power of the Board, who must, from their knowledge and attention to the matters in question, be best able to select proper persons to fill such situations.

I have, &c.,

H. H. BROWNE,
Chairman.

During the time McGrath was at the light (3 months), 93 glass cylinders were broken.

On the appointment of Mr. Griffin to the Jervis Bay Light, the Board reported that:—"In accordance with the verbal request of the Honorable the Treasurer to the Chairman, the Board will recommend two persons suitable for the appointment of assistant keepers, Cape George Light.

"With respect to the appointment of Mr. Griffin, they consider it their duty respectfully to refer to their communication of the 24th March, 1859, respecting the damage to the Hornby Light reflectors by the employment of inexperienced persons, and to add that, considering the delicate and somewhat complicated construction of the Cape George apparatus, it being fitted with colored lenses, " and

"and also the distance at which the station is situated, in case immediate assistance should be required, they regard with considerable alarm and apprehension the injury to the commercial interest, by Mr. Griffin's appointment, as he is only now undergoing instruction at the Macquarie Light; and the Board are of opinion that if efficiency is to be considered, and proper care and attention is to be taken in the management of the very costly lanterns of the Lighthouses of this Colony, the English practice should be followed, viz., that no person should be eligible for the situation of principal keeper until he had served a reasonable time in one of the under grades.

"The Board have directed Mr. Siddins to receive and instruct Mr. Griffin in the duties; and in placing a senior keeper in such a position, the Board consider that it cannot but be felt as a hardship and disappointment by the junior keepers, who receive very small salaries, to find that they are shut out from that promotion which is usually made in other branches of the public service."

W. J. WILSHIRE,
Secretary.

Pilot Board Office,
10 May, 1860.

With reference to the graduated salary system, the Board reported, in forwarding the Estimates for 1860, as follows:—

"2 August, 1859.

"LIGHTHOUSES.

"An increase in the Estimates for these establishments has been made as follows:—

- "£20 to the Principal Keepers;
- " 36 " 1st Assistants;
- " 16 " 2nd do. each.

"In making these additions it appears to the Board that, to keep the establishments in an efficient state, it is necessary that the persons employed should have some inducement to look forward to the situations, as of such a character as to lead them to seek for no other employment. They should also be able to look forward for promotion to higher grades in the service, and additional remuneration.

"The experience of last year has clearly shown that experienced persons have not been willing to undertake the duties, and the employment of inexperienced men has tended to injure the delicate structure of the Light apparatus; and the frequent changes of assistants have entailed much more expense upon the Government than would have arisen if the appointments had been made secure, and responsible and experienced persons only employed.

"The Board observe that the salaries paid in South Australia to the keepers of Troubridge Light are—

" Principal Keeper	£200
" 1st assistant do.	126
" 2nd do. do.	120

"and they believe that in Victoria these amounts are nearly doubled."

Again, in forwarding the Estimates for 1861, they wrote—

"LIGHTHOUSES.

"Under this head additional expenditure is recommended, by repeating their proposal of last year for placing these establishments on a footing calculated to bring up efficient and trustworthy men as lightkeepers, and to secure to the Government a permanency of service, which cannot now be relied upon.

"The result of the inconvenience of the present system was fully demonstrated on the appointment of the keepers to the Cape George Light, as no volunteers could be obtained to take the minor situations, and the costly and delicate apparatus of that Light is consequently under the charge of three persons wholly without experience in the management of a Lighthouse."

* The Estimates would then stand thus:—

Principal Keepers.....	£200
1st Assistant do.	120
2nd do. do.	100

SEPARATE APPENDIX.

(CIRCULAR.)

The Treasury, New South Wales,
1 May, 1860.

Sir,

I am directed by the Treasurer to request, that with a view to the preparation of the General Estimates of the Government Expenditure to be laid before Parliament in the ensuing Session, you will transmit to me, *on or before, but not later than the 1st June next*, an Estimate of the probable Expenditure of your Department, for the year 1861.

2. In transmitting this Estimate you will submit, under the proper head, such remarks as you may consider necessary in explanation of it, and a statement of the reasons for recommending any alteration of pay or allowance. You will also report whether any reduction upon the expenditure of the present year can, in your opinion, be made in the number or emoluments of the persons in your department; or should you consider any increase to be absolutely required for the due and efficient performance of that portion of the Public Service which is immediately entrusted to you, you will state specifically the grounds upon which you consider such increase necessary.

I have, &c.,
HENRY LANE.

To the Chairman of the
Steam Navigation and Pilot Board.

H. H. BROWNE.

The

The Office of the Pilot Board,
2 August, 1859.

Sir,

Exclusive of the
Steam Dredge.

I have the honor, by direction of the Pilot Board, to transmit, for the consideration of the Honorable the Treasurer, the Estimates of Expenditure for the several Harbor Departments in the Colony, for the year 1860, amounting in all to £25,732.

In framing these estimates the Board have been guided, as far as possible, to secure an efficient performance of the duties which devolve on the officers included therein, and at the same time to make the expenditure as economical as possible.

STEAM NAVIGATION AND PILOT BOARDS.

In this department an increase will be found in the amount of fees payable to the members of the Boards, of £300, which is accounted for by the increased number of gentlemen composing the Boards, compared with the year 1858, there being now five non-official and one official member, against two non-official and three official in that year.

In the item of surveyors to the Steam Navigation Board there will be found a reduction of £250, the amount now payable to the Engineer Surveyor being £2 2s. for each survey and declaration; and it is proposed to make an arrangement to pay the Shipwright Surveyor £1 1s. for each survey and declaration.

HARBOR MASTER.

Under this head an increase of £100 per annum is proposed to the salary of the Harbor Master of Sydney, that being, in the opinion of the Board, only a proper remuneration for an officer charged with such responsibility.

An increase of £75 is also proposed to the salary of the Harbor Master at Newcastle, the present income being, in their opinion, quite inadequate to the considerable and increasing duties of the port.

The Board propose to abolish the office of Assistant Harbor Master, both in Sydney and at Newcastle, and to increase the number of pilots for harbor duty in Sydney, and for both services in Newcastle, by one each.

LIGHTHOUSES.

An increase in the Estimates for these Establishments has been made, as follows:—

£20 to the Principal Keepers;
£36 to the 1st Assistants;
£16 to the 2nd do. each.

In making these additions it appears to the Board that, to keep the establishments in an efficient state, it is necessary that the persons employed should have some inducement to look forward to the situations as of such a character as to lead them to seek for no other employment.

They should also be able to look forward for promotion to higher grades in the service, and additional remuneration.

The experience of last year has clearly shown that efficient persons have not been willing to undertake the duties, and the employment of inexperienced men has tended to injure the delicate structure of the lights; and the frequent changes of assistants have entailed much more expense on the Government than would have arisen if the appointments had been made secure and responsible, and experienced persons only employed.

The Board observe that the salaries paid in South Australia to the keepers of the Troubridge Light are—

Principal Keeper	£200
1st Assistant	126
2nd do.	120

and the Board believe that in the Colony of Victoria these salaries are nearly doubled.

PILOTS.

A considerable increase will be found under this head, as the Board presume will be the case, in seamen's or boatmen's wages, on account of the withdrawal from the merchant service to the navy, arising out of the present disturbed state of Europe, and which will continue in case of war and cease in the case of peace.

The sum voted last year for the harbor of Port Jackson will be sufficient to meet this increase for Sydney, but the wages at all the outports will, it is contemplated, be much increased.

For the pilot service of Port Jackson the Board have framed the estimate on the assumption that it is the intention of the Government to continue the system now in force; but if such be the case the Board take leave to observe that such a system will not, in their opinion, be found to work satisfactorily, and they would again recommend the establishment of sailing vessels, to cruise outside the Heads, and the abolition of up-harbor pilots, and the licensing of mud pilots to perform this duty; and should the Honorable the Treasurer feel any doubt as to the applicability of sailing vessels to perform the duty, the Board would suggest that one vessel be placed at their disposal as an experiment.

To carry out this system an additional sum would require to be voted of £2,000, for the purchase of a vessel, but a reduction would be made in the general cost of the establishment, both in the number of the men and the salaries of the pilots; whilst, to carry out the mud pilot system a considerable reduction could be made, leaving the mud pilots to receive the fees which they would collect for the removal of vessels.

The pilot service, with sailing vessels, would not be more costly than the present, whilst it would, in the Board's opinion, be more effective; and seeing the large amount collected in Sydney from the shipping as pilotage, the Board consider that every means should be adopted for making the service as available as possible.

In respect to the Port of Newcastle the Board recommend a reduction in the salaries of the principal pilots to £100, with a gratuity of 10s. for all vessels piloted in, and 10s. for all vessels piloted out of port, and 5s. for all removals in the harbor. To the assistant pilots a reduction to £75, and one-half of the before-mentioned gratuities.

The vote for the Fitz Roy River is reduced to £391, being salary for the master and crew of two men for the pilot cutter "Satellite."

BOATMEN.

A similar increase will be found in the boatmen's salaries to that alluded to in the pilots' crews. There is also an increase in the number of men by four, to provide for a row-boat for the Customs' Department during the night.

BOATS.

In this item the Board have estimated for two boats for the sea pilots, Sydney; two for the Royal Artillery; and seven for the probable demand in case of loss at the bar-harbors and out-stations.

A sum of £600 has been inserted for re-coppering the Lightship "Bramble," that vessel requiring considerable repairs.

In conclusion the Board beg me to observe that no estimate has been submitted for their consideration in respect to the probable cost of buoys, beacons, moorings, ground-tackle, oil, paint, or any other kind of stores, and they assume that this has already been provided for by the Colonial Storekeeper.

I have, &c.,
W. J. WILSHIRE,
Secretary.

1861.

Legislative Assembly.

NEW SOUTH WALES.

GEORGE MULHALL.

(PETITION FROM.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of George Mulhall,—

RESPECTFULLY SHEWETH:—

That your Petitioner has been engaged upon the Coast and in the Harbor of Sydney for upwards of twenty years, and has a full knowledge of the duties of Light-keeper.

That your Petitioner held the situation of Pilot at Brisbane Water for three years and a half, till the office was abolished, during which time he saved some hundreds of lives, and rescued many vessels from imminent danger.

That, in December, 1860, your Petitioner applied to the Colonial Treasurer, E. C. Weekes, Esq., as a candidate for the office of Lighthouse-keeper at Port Stephens, upon which application Sir William Denison endorsed the following recommendation:—
“I believe the applicant to be a very honest and deserving man, and I shall be glad to see
“him appointed.”

That nevertheless the situation which your Petitioner sought was given to another person, and thus the hopes of your Petitioner were unfilled.

That your Petitioner prays your Honorable House to take these circumstances into consideration, and to grant him such redress as to your Honorable House shall seem fit.

And your Petitioner, as in duty bound, will ever pray, &c., &c.

GEORGE MULHALL.

Legislative Assembly.

NEW SOUTH WALES.

S E A M E N.

(SHIPOWNERS, CAPTAINS, AND SEAMEN OF THE PORT OF SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 11 October, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Shipowners, Captains, Seamen, and others interested in the Inter-colonial and Coasting Trade of the Port of Sydney,—

HUMBLY SHEWETH :—

That, at a Public Meeting of the above, held at Elliott's Hotel, in the City of Sydney, on the 2nd July, 1861, and numerous attended, it was unanimously resolved,— That, in the opinion of this Meeting, all vessels engaged in the Inter-colonial trade should be exempt from attending at the Shipping Office to engage their men, and that Seamen should not be compelled to go there for a discharge.

Your Petitioners, in carrying out the object of the foregoing resolution, respectfully represent to your Honorable House, that while the Shipping Office is a cause of much inconvenience and delay, and consequently of considerable loss to a number of your Petitioners, it is productive of no good whatever either to Shipowners or Seamen.

That Seamen agree with owners as to the desirability of exempting coasting and Inter-colonial traders.

That, in the opinion of your Petitioners, the charges of the Shipping Office is an unnecessary class tax, and a tax upon labor, and as such, ought to be abolished.

Your Petitioners respectfully pray that you will take the premises into your consideration, and act in such way as to your Honorable House may seem meet, in granting the desire of your Petitioners.

And your Petitioners, as in duty bound, will ever pray, &c., &c., &c.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES, No. 17. TUESDAY, 1 OCTOBER, 1861.

11. Seamen :—Mr. Dalgleish moved, pursuant to notice,—
- (1.) That a Select Committee, with power to send for persons and papers, be appointed to enquire into and report upon those Acts which regulate the shipping, discharging, and lodging of Seamen, and the general condition and management of the Seamen of New South Wales.
- (2.) That such Committee consist of the following Members :—Mr. Sadleir, Mr. Burns, Mr. T. Garrett, Mr. Driver, Mr. Stewart, Mr. Love, Mr. Lewis, Capt. Moriarty, and the Mover.
- (3.) That the Minutes of Evidence and Progress Report of the Committee on Seamen, laid on the Table of this House last Session, be referred to this Committee.
- Debate ensued.
- Question put and passed.
-

VOTES, No. 57. TUESDAY, 10 DECEMBER, 1861.

1. * * * * *
- Seamen :—Mr. Dalgleish, as Chairman, brought up the Report from, and laid upon the Table the Proceedings of, and Minutes of Evidence taken before, the Select Committee appointed on the 1st October last, on Seamen.
- Ordered to be printed.

SEAMEN.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 1st October last, "*to inquire into and report upon those Acts which regulate the shipping, discharging, and lodging of Seamen, and the general condition and management of the Seamen of New South Wales,*" "*with power to send for persons and papers,*"—and to whom were referred "*the Minutes of Evidence and Progress Report of the Committee on Seamen, laid on the Table of this House last Session,*"—have agreed to the following Report:—

Your Committee having carefully considered the Evidence taken before the Committee appointed last Session with a similar object, and having taken additional Evidence, find the recommendations contained in the Progress Report of that Committee fully justified by such Evidence.

Your Committee would direct the attention of your Honorable House to the main features of what appear to be the evils emanating from the Laws relating to Seamen.

The working of the Shipping Office is found to be vexatious and, in many instances, oppressive to Seamen, whilst to owners it is doubly so, through the detentions to vessels caused by the forms imposed, and at present necessary to be complied with. Favourable opportunities of sailing are lost, and an amount of expenditure, that otherwise would have no existence, is entailed on the owner, who receives nothing whatever in return. The weight of evidence appears to favour the discontinuance of that establishment, at least as far as Colonial Shipping is concerned.

Your Committee would call attention to that portion of the Act 17 Vic., No. 36, which relates to Seamen's Lodging-houses. Whilst your Committee admit the desirability of providing, if possible, well regulated lodging-houses for all classes of the community who may choose to resort to them, they cannot but think the present system of compelling Seamen, as a class, to live in lodging-houses, is a restriction calculated to cause the discontent apparently now existing amongst Seamen with reference to this matter.

It

It also seems that ships' articles are generally unequal in their action, binding the employed only, as to the time of leaving; whilst the employers are free, or liable only to a fine for any violation of contract,—for similar breaches of agreement the employed being subject to imprisonment, as for criminal offences.

Your Committee would also recommend to your favourable consideration the complaint embodied in the Evidence of the late American Consul, and that steps should be taken at once to remove the anomaly that exists between the Laws of this Colony and those of the United States of America, relative to the discharge of Seamen of that nation.

D. C. DALGLEISH,
Chairman.

*Legislative Assembly Chamber,
Sydney, 10 December, 1861.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 16 OCTOBER, 1861.

MEMBERS PRESENT :—

Mr. Dalglish,		Mr. Lewis,
Mr. T. Garrett,		Capt. Moriarty.

On motion of Capt. Moriarty, D. C. Dalglish, Esq., called to the Chair.

Order of the House appointing Committee, together with Progress Report relating to Seamen, from the Select Committee of last Session,—upon the Table.

Committee deliberated relative to their course of procedure.

Further evidence ordered.

R. D. Merrill, Esq., to be summoned to give evidence at the next sitting.

[Adjourned to Wednesday, 23rd instant, at *half-past Ten o'clock.*]

WEDNESDAY, 23 OCTOBER, 1861.

MEMBERS PRESENT :—

D. C. Dalglish, Esq., in the Chair.		
Mr. Driver,		Mr. T. Garrett,
		Mr. Lewis.

Committee deliberated.

The witness not in attendance.

[Adjourned till Friday, 25th instant, at *Eleven o'clock.*]

FRIDAY, 25 OCTOBER, 1861.

MEMBERS PRESENT :—

None.

[The meeting lapsed at *half-past Eleven o'clock.*]

FRIDAY, 8 NOVEMBER, 1861.

MEMBERS PRESENT :—

D. C. Dalglish, Esq., in the Chair.

Mr. T. Garrett,		Mr. Lewis,
Mr. Sadleir,		Capt. Moriarty.

Committee met, pursuant to summons.

Mr. J. Campbell called in and examined.

Witness withdrew.

R. D. Merrill, Esq., U. S. Consul, called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Robert Towns, Esq., be summoned to give evidence before the Committee at the next meeting.

[Adjourned to Wednesday next, at *Eleven o'clock.*]

WEDNESDAY, 13 NOVEMBER, 1861.

MEMBERS PRESENT :—

D. C. Dalglish, Esq., in the Chair.

Mr. Sadleir,		Mr. Lewis,
Capt. Moriarty,		Mr. Burns,
		Mr. T. Garrett.

R. Towns, Esq., called in and examined.

Committee deliberated as to their further course of procedure, and—

It was Resolved :—That sufficient evidence has now been taken for the object of this inquiry.

To consider Draft Report at the next meeting.

[Adjourned.]

THURSDAY,

THURSDAY, 5 DECEMBER, 1861.

MEMBERS PRESENT:—

D. C. Dalgleish, Esq., in the Chair.

Mr. T. Garrett, | Mr. Lewis,
Mr. Stewart.

Committee met, pursuant to summons, for consideration of Draft Report.
Chairman stated the nature of proposed Report.
Committee deliberated, and—

[Adjourned to Tuesday next at *Eleven o'clock.*]

TUESDAY, 10 DECEMBER, 1861.

MEMBERS PRESENT:—

D. C. Dalgleish, Esq., in the Chair.

Mr. T. Garrett, | Mr. Lewis.

Chairman laid before Committee, Draft Report.
The same read, amended, and agreed to.
Chairman requested to report.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

S E A M E N .

FRIDAY, 8 NOVEMBER, 1861.

Present:—

Mr. DALGLEISH,
Mr. T. GARRETT,Mr. LEWIS,
CAPT. MORIARTY,

Mr. SADLEIR.

D. C. DALGLEISH, Esq., IN THE CHAIR.

Mr. John Campbell called in and examined:—

1. *By the Chairman:* You are a merchant of this City? I am.
2. And a shipowner? And a shipowner.
3. You are aware of the object in asking your attendance on this Committee? I am.
4. I believe you, in common with other shipowners, have some cause of complaint against the Shipping Office? Yes.
5. Will you detail to the Committee the evils which you think attend its working? The greatest cause of complaint is the delay caused by the time taken up in shipping men. If we send a captain to engage a man or a number of men, he can seldom do it under three or four hours; and on a Saturday it very often happens that if he is a few minutes late, when perhaps he only wishes to engage one man in the place of one that he is obliged to leave behind from some cause or other, he is thrown back entirely, and has to wait till the next week, and in the meantime the wind might change, and the vessel be kept for three weeks before she would get a favourable wind again. I have known instances where vessels have been delayed three weeks for just a few minutes on Saturday; and within the last two months one of our captains went to engage one man, and attended at the Shipping Office from nine o'clock till four, the entire day, but did not succeed in getting to the Shipping Master in all that time, and had to go next day again.
6. Did he state any reason why he could not get to the Shipping Master? I suppose it was on account of the great number that were there shipping.
7. Press of business? Press of business; and sometimes when they are engaging men for steamers, they give a preference to the steamers and throw the sailing vessels out entirely.
8. Then your principal complaint is the loss of time? The loss of time.
9. And the loss of money in consequence of the loss of time, by losing favourable winds? Yes; and besides we lose the services of the captain, which sometimes is a very important matter. For instance, when a captain goes in the morning to engage men, which he might do in a few minutes if he had not to go to the Shipping Office, he is away the entire day; and though we may require him for something very important, he cannot be had without a good deal of trouble.
10. Are your objections with regard to the Shipping Office shared by many? They seem to be entirely concurred in by all with whom I am acquainted—seamen, captains, and owners—all object to the Shipping Office.
11. There was a public meeting held in Sydney some short time ago in reference to this? There was.

Mr. J.
Campbell.

8 Nov., 1861.

Mr. J.
Campbell.
8 Nov., 1861.

12. You were chairman of that meeting? I was.
13. What was the object? To do away with the Shipping Office, as far as the Inter-colonial traders and coasters are concerned.
14. Simply to do away with the restriction on the Colonial trade? Yes.
15. Were any means proposed, or spoken to, on that occasion, of superseding the Shipping Office—were any means shewn that could be adopted for the speedy shipping of seamen? I do not know that there was any definite proposal; but I think it would have met the views of all if the owners or captains could ship the men themselves, and let them sign articles on board the vessels instead of at the Shipping Office.
16. To let seamen make their own agreements, the same as any other servants? Yes; they are quite wide awake enough to know what suits their own interest.
17. Are there any other drawbacks to the trade or commerce of the port, caused by the Shipping Office? I do not know whether the Shipping Office has anything to do with the police that are stationed down at the Heads, but I do not see what earthly use they are there, as far as coasters and Inter-colonial traders are concerned.
18. They are there for boarding vessels? Boarding vessels at the Heads.
19. This is an inquiry into the general condition and management of seamen, so that if you are acquainted with anything that in any way would throw any light on this question, you are, of course, invited to do so? Seamen object very much to paying the small fee they have to pay on being discharged; they think it very hard, and it does appear very hard in some cases. Supposing we engage a number of men for six months, and when the six months have run out we wish to retain the same men in the same vessels, and the seamen also are willing to remain, yet the seamen have to pay the 2s. each for their discharge, and we have to pay for re-engaging them. The seamen object to paying for a discharge when they are not going from the vessel at all.
20. Are there not other cases of even greater hardship in connection with the payment of this money—are you aware of any cases where greater hardship would be suffered? Supposing we engage a seaman, and the ship has to go away without him, because of his getting drunk, perhaps, and not coming on board, we have to pay the whole of his wages up to the time that the vessel comes back, if he likes. That is a very great hardship.
21. Are you acquainted with many seamen of the port—have you a knowledge of them? A good many; we have about forty in our own employ.
22. Do you hear them complain of the Shipping Office? They complain of the fee they have to pay; and all seem desirous of not having anything to do with the Shipping Office at all; they would prefer making their own agreements.
23. If you were compelled, through the sickness of one of the men that you regularly employ, to engage a seaman merely for the trip—it might be a fortnight—it would still be necessary for this seaman to pay this amount that you call a small fee—2s., I think—the same amount as if he had engaged for a long period? Yes, he would have to pay even for one short trip.
24. Even if he had shipped for only one day? When they ship they are compelled to go one trip.
25. In the case of a steamboat that trip might be one day? Yes.
26. What has been the average rate of wages for seamen during the last twelve months? About £3 15s., but they are much higher at present, in consequence of the Otago Gold Fields; before that they were £3 5s. or £3 10s. a month. £3 15s. is a fair average.
27. Then this small fee would make a serious inroad on the earnings of a sailor who shipped for a short period of time? Yes, those who have families particularly.
28. It would take away the better part of his wages in the case of short trips? If he shipped very often it would fall heavily upon him.
29. The shipowner has to pay 2s. for each seaman when engaging him? Yes.
30. So that there is an equal hardship, though perhaps it may not be felt so much? Still I do not see why the masters and the seamen might not be allowed to make their own agreements, and sign the articles on board.
31. You have to pay no fee for engaging servants who follow other occupations? No.
32. And you are not aware why seamen should be taxed more than any other members of the community? I cannot see the object of it at all.
33. Are you aware of any particular protection that seamen receive in return for this tax? They could receive quite as much protection without it, because the law could stand just as it is, both as regards owners and seamen, in all other respects; every clause in the Act could stand just as it is; owners could be compelled to perform their duties towards the seamen, and the seamen towards the owners, just as well without the interference of the Shipping Office as with it.
34. Does the Shipping Office in any way compel the payment of wages? Not in the least; the Police Office does that.
35. So that the Shipping Master cannot, of his own authority, obtain the wages for the seaman? I do not see what earthly use he is at all, except witnessing the discharge and engagement.
36. He just stands in the same relation as any other respectable witness would do? Yes, that is all I can see. The only use I can see in the Shipping Master is this, that supposing a vessel were going a long voyage, and a seaman deserted before she left the harbour, he could prove that he had engaged for that vessel; but that would be of no material use in the case of vessels going to Melbourne or Adelaide, or other Inter-colonial ports.
37. Are you aware that a great number of the seamen of this Colony are married men, who have settled in the Colony and have families, so that they are in some way bound to the soil? I believe a good many have families in Sydney; I know several of the men in our vessels have families.

38. So that they could be reached by the ordinary laws relating to other citizens? They could be reached in the very same way. Besides, this Shipping Office does not facilitate any action in that way whatever. Supposing a seaman were to run away from an Inter-colonial trader, the Shipping Office would be of no earthly use in facilitating any action against him.

Mr. J.
Campbell.

8 Nov., 1861.

39. Are you the owner of more than one vessel? We own five at present; we have had seven, but one was wrecked, and we sold another.

40. Are you aware of the law authorizing owners to change seamen from one vessel to another? I believe there is a law of that kind in existence, when the owners engage the men themselves.

41. Have you ever put it in force? We have not. I do not know of any parties here who act upon it except the Illawarra Steam Navigation Company. I believe in that case the owners engage the men.

42. Who are the owners of that Company? I think Mr. Manning is the principal owner—he is the Manager.

43. From what you know of seamen, have they any objection to being ordered from one vessel to another? I could not say; I do not think they would like it very well, but still I could not say positively. Seamen have generally a preference to one vessel over another, and when that is the case they would think it very hard to be sent to a vessel that they did not enter for.

44. Are there seamen engaged for one vessel that would not engage for another? Yes.

45. And they would consider it very hard to be compelled to go in a vessel against which they might have a prejudice? Yes, and besides they might have a prejudice to a particular captain or mate. I think it would be the greatest tyranny to put a seaman under a man against whom he might have an antipathy.

46. A seaman might have no objection to the owners, but he might have strong objections to the captain or mate? Yes.

47. You have spoken of the delay which has ensued through being unable to ship men on Saturdays—does not this occur equally on other days—is it not often the case that a vessel might obtain such a slant of wind as would enable her to get an offing, and make the port she was going to, provided she could leave on any night? Yes, cases of that kind have been reported to me, where captains have waited almost the whole day, and have not been able to ship their men after all, for whenever the hour comes to close the Shipping Office it is closed, though five minutes more would have answered their purpose, and to-morrow the wind has changed, and they are left any length of time.

48. Let the emergency be ever so great they are not allowed to take a man, even for a short trip, unless he has regularly shipped before the Shipping Master? No.

49. Do you know anything of the lodging of seamen, or seamen's lodging-houses? I am not much acquainted with it, but I hear some complaints about it. I do not know whether it is a fact or not, but seamen state that even if their friends were residing in Sydney they would not be allowed to stay with them; they have to go to a house licensed to lodge seamen.

50. There is no law compelling any other class of men to lodge in any particular locality? Not that I am aware of.

51. *By Mr. T. Garrett:* Supposing we should do away with the restrictions placed on the shipping of seamen for the Inter-colonial trade, how would you prevent the shipping of seamen in that trade who had deserted from other vessels—how would you detect them? The police would detect them; the police are always on the look-out for runaway sailors.

52. Supposing they were not compelled to produce any discharge—supposing there were no registry of discharge or shipping, how would you detect a deserter? When a seaman was discharged from a vessel he could get his discharge from the captain in the same way as he does now, and it could be made penal for any person to engage a seaman who had not a discharge, and if a seaman gave a false discharge or a discharge previous to subsequent employment, he could be punished in the same way. It is the same in the Masters and Servants Act, at least it was; if you engaged a servant who had not a discharge you were liable to some fine, and the man was liable for producing a false discharge.

53. In regard to the engagement of ordinary servants, domestic and farm servants, the registry offices are resorted to, are they not? Not always; if you put an advertisement in the paper you may have twenty or thirty call the next morning, perhaps by six o'clock.

54. But it saves a deal of trouble to go to the registry office? I do not think it does.

55. Are you aware what is the fee usually charged at registry offices? 7s. 6d., I think.

56. Do they charge the servants anything? 5s., I believe.

57. The charge at the Shipping Office is 2s.? Yes, for a discharge, and 2s. for shipping.

58. Your great complaint against the Shipping Office is the delay? The delay.

59. You would not wish to keep it open beyond six o'clock? Even supposing it was open till six o'clock—this is the cause of complaint, that you may have to send the captain away the entire day, and he attends to nothing else, even for shipping one man. I think it is a great hardship to be deprived of his services a whole day, for the sake of engaging one man, whereas if you could do it yourself it would not take five minutes.

60. But I suppose you think it would be necessary to have some provision for detecting undischarged seamen attempting to re-engage? There is a clause in the Seamen's Act, I believe, that makes it penal to engage a man without a discharge. The Act could stand the way it is, with the exception that captains or owners in the Inter-colonial or coasting trade might be allowed to engage their men themselves, without the intervention of the Shipping Office. Let the law stand as it is in every other respect.

61. Would you give the police power to apprehend a man on suspicion of being a runaway seaman, if he could not produce a discharge? I do not know, I am sure; it would seem to be oppressive in some instances perhaps.

Mr. J.
Campbell.
8 Nov., 1861.

62. Would it not work to the injury of even the Colonial trade to do away with the registry of engagement? I do not think it would.
63. How would you, without endangering the general liberty of the subject, make provision for the apprehension of deserters? Would there not be the same provision as at present.
64. That is effected by the registry of engagement—if there were no registry kept of the engagement how would you be able to detect a deserter? The captain would be able to give information to the police.
65. *By the Chairman*: Do you know how seamen, who desert from foreign vessels, that is, vessels not in the Colonial trade, are detected at the present time? The police detect them; the Shipping Office has nothing to do with seamen that come in from England; they know nothing about their names or description.
66. *By Mr. T. Garrett*: Are not the articles lodged? I think not. They are not with Inter-colonial traders belonging to other Colonies. Supposing a vessel belonging to Melbourne came here, her seamen would have nothing to do with the Shipping Office here unless she engaged seamen here.
67. *By the Chairman*: If a man deserts, the captain lodges a complaint with the Water Police, and the police endeavour to apprehend him? Yes; the captain gives the description.
68. In the same way as you would do if an indentured servant left your employment? Yes.
69. So that the Shipping Office is only a registry of the agreement entered into, and the rate of wages you agree to give, and the seaman agrees to receive? Yes.
70. Something has been said about registry offices for engaging servants, and you stated that masters pay 7s. 6d. to engage the services of a servant? Yes.
71. How much do you think the average cost of engaging a seaman would amount to, provided you have to send your captain to the Shipping Office a whole day, and then he has to go again? I could not tell exactly, but sometimes it costs something considerable, because if a vessel is detained on her voyage for three or four weeks by contrary winds, after having been made to miss a favourable chance of getting away, the expense is enormous.
72. *By Mr. Sadler*: In consequence of not being able to engage a seaman? Yes; by missing a wind which would give her a good offing, she may be baffled by contrary winds for weeks when she does get out.
73. Why should the captain be detained all day? I suppose it is through the press of business. Sometimes, as I said before, when the steamers are engaging men they give them a preference.
74. *By Mr. T. Garrett*: Do you not think that is for the public convenience? I do not suppose that is objected to; all the captains of sailing vessels wish it, to be served themselves and get away in time.
75. *By the Chairman*: With regard to the apprehension of seamen, are you aware that seamen can be apprehended at the present moment without any warrant whatever, on the mere suspicion of the officer? Yes, I believe any policeman may take up a man if he thinks he is a runaway seaman. I have known a private servant arrested here on suspicion of being a seaman, and locked up in the watch-house for the night.
76. When you apply at a registry office for a servant, you apply for a servant of a particular description, and also expect to get some inquiry made with regard to his habits, honesty, and capability? Yes, generally; you rely in great measure upon the character you get with the servant from your agent.
77. Does the Shipping Office supply any of this information with regard to seamen, or act in the same way at all? The Shipping Office takes nothing to do with the employing of the men; it only records the fact and witnesses the signatures.
78. Are the registry offices much resorted to by those who employ labor for the interior? No; people generally insert an advertisement in the paper, and get as many as they wish next morning.
79. *By Captain Moriarty*: Has it ever occurred to you, that where a large sum is paid for hiring a servant, on the part of the master, and for procuring a situation, on the part of the servant, there is a direct interest in the individual who meets both these wants in effecting as rapidly as possible a breach of that arrangement, so that he may go over the same process ten times a year, if possible, instead of once? No, that would interfere with his business, because if he did that parties would not resort to his office.
80. *By Mr. T. Garrett*: Supposing we were to abolish the Shipping Office, as far as Inter-colonial seamen are concerned, what would you substitute in its stead? I would allow seamen and captains to make their own arrangements, and sign articles on board their ships.
81. Would not that lead to the re-establishment of the old style of shipping offices which were considered so objectionable? I do not think it would. I do not see why we could not insert an advertisement, so many seamen wanted this morning, and have them on the wharf ready to engage.
82. How long does your experience extend over the shipping trade in this Colony? About six years.
83. Then you have no knowledge personally of the old private shipping offices? No.

Robert Dodge Merrill, Esq., called in and examined:—

R. D.
Merrill, Esq.
8 Nov., 1861.

84. *By the Chairman*: You are American Consul? I am United States Consul.
85. You wish to give some evidence before this Committee with regard to the condition and treatment of seamen in this port? I wish more particularly to make a statement to the Committee, in case they have it in contemplation to alter the laws with reference to the shipping and discharging foreign seamen in this port. I have already communicated with this Government on the subject, at the time Mr. Forster was Chief Secretary; and I have with

with me a copy of my letter to him, and also of a letter which I wrote to my own Government, and a reply from the latter, conveying an extract from an opinion of the Attorney General of the United States, with respect to the Act relating to foreign seamen. I cannot throw much light on the subject with regard to Colonial ships. I wish to place these before the Committee, in case they should have it in contemplation to alter the law or any portions of it. I may mention that I received no reply to the communication I made to this Government in 1859; the party then in power went out of office directly after that. (*Witness requested to withdraw. Committee, at the instance of the Chairman, deliberated as to whether, under the terms of their appointment, they could entertain the subject referred to by the witness, and decided to hear Mr. Merrill's statement. Witness recalled.*)

R. D.
Merrill, Esq.

8 Nov., 1861.

86. Will you have the goodness to proceed with your statement? I wish to place the documents I have referred to before the Committee. (*The witness handed in the same. Vide Appendix.*) The Seaman's Act of this Colony has conflicted very much with foreign ships, and interfered with our captains complying with instructions from Home, and subjected them to penalties for a large amount for each seaman they discharge here otherwise than is prescribed. An American captain can go now and discharge a seaman before the Shipping Master without my consent, whereas our law says he shall come before me to discharge him. I suppose it is the same with regard to all other representatives of foreign nations; and if you are going to alter the law, I merely suggest that you should give to us the same privileges as are granted to Consuls in other British ports, or British Consuls in American ports.

87. *By Captain Moriarty*: I think the view you wish to have adopted has been that taken by some of the Magistrates here of the law as it stands? By some few; but the present Shipping Master, who is the leading Magistrate at the Water Police Court, decides in the reverse way. I do not think the Colonial Act should interfere with foreign ships, where you have treaties with those countries, and where those States are represented by Consuls.

88. Your proposition is that the American Consul here should have the same power as British Consuls have in any other port of the globe? Yes, we merely want the same privileges as other countries grant to British Consuls.

89. The law of the United States is, that no seaman belonging to an American ship in a foreign port can be discharged without the consent in writing of the American Consul? Yes.

90. And the captains of your ships are imperatively bound by that law? They are under heavy penalties at Home.

91. Then what I understand you to wish is, that in any alteration about to be effected in the shipping or discharge of foreign seamen in this port, reference should be had to the laws existing between the two countries? Between Great Britain and other countries.

92. And also the existing laws of the different States? Where those States are represented by Consuls.

93. *By Mr. Sadleir*: The laws of the two countries should not clash? Certainly not; but the Colonial law interferes with the treaty between Great Britain and America. I had a case last week, where a captain let his men go on shore to remain, and gave them money, and the Shipping Master has taken him up for discharging seamen at other places besides the Shipping Office. At the Shipping Office they give the captain no writing at all, and yet they say the men are discharged, and going Home he is under a penalty of 400 dollars for each man if he does not produce him or account for him. This is a copy of most of our laws relating to the shipping of seamen, printed on the back of the articles, which I may hand in for the information of the Committee. (*The witness handed in the same.*)

94. Some of the Magistrates here consider the Colonial Act to apply to all ships—not only British and Colonial, but all foreign ships; but it was laid down by Lord Ashburton, and Daniel Webster, as the rule and comity of nations, that any ship going to a foreign port for legitimate objects of trade shall carry her own laws with her.

95. *By Captain Moriarty*: Unless some criminal act is performed? Yes. The question arose in the case of the ship "Creole," which went into some port in distress, having on board at the time a cargo of slaves, and it was decided that a ship can go into any port for legitimate purposes of trade.

96. *By the Chairman*: You are not acquainted with the working of the law as it affects Colonial vessels? No; I have had no experience except from hearsay.

97. Are you conversant with the method of shipping in America? Yes, in some States. It is different in some States. The British Consuls ship their own seamen in New York, and in every seaport town where I have lived, unless they chose to employ a shipping clerk or agent, to save the trouble of having so many seamen about their office; but I cannot ship seamen here.

98. *By Mr. T. Garrett*: With regard to vessels of your own nation, are there any Government shipping offices for them in America? In some states there are—in others not. There is no United States law requiring shipping offices. The local laws can require them; but then they do not interfere with foreign nations.

APPENDIX.

United States Consulate,
Sydney, New South Wales, 26 December, 1859.

Sir,

In compliance with your request made to me during our interview this morning, I have the honor to submit in writing, the substance of my verbally expressed opinions as to the expediency of an Act by the Legislative Assembly now in Session, respecting the discharging and shipping of seamen of foreign vessels arriving in New South Wales.

The

R. D.
Merrill, Esq.
8 Nov., 1861.

The Water Police Act, 17 Vic. 36, 1853, contains several objectionable sections, particularly 9 and 12, which I respectfully represent to you the propriety of modifying, in so far as they apply to seamen of the respective nations represented by Consuls, save and except when such seamen enter into or are discharged from the British, Naval, or Merchant Service.

- 1st.—Because so far as the Government I represent is concerned, it is expressly specified by my instructions that in all cases of discharge from, or shipment of seamen on board of vessels bearing the flag of the United States, such discharge or shipment can and shall only be made by the Consul located at the port where such discharge or shipment shall be made or take place, so that the sections referred to oppose and prevent the efficient discharge of one of the most important duties of a Consul—a duty which is made imperative by his instructions, and the faithful discharge of which is one of the principal benefits looked for from the establishment of Consulates in foreign ports.
- 2nd.—Because it could not have been considered that, in framing this Act, it was originally intended to make sections 4 and 12 applicable to other vessels than such as were under the British flag, unless in the case of a ship whose flag was not represented at this port.
- 3rd.—Because the provisions of this Act are not in reciprocity with those of the United States Government, which affords to the consular representatives of Her Britannic Majesty, located in its ports, every facility to conform to the letter of their instructions.
- 4th.—Because the disabilities forced upon me by this Act, and the penalties to which I am made liable for performing the duties entrusted to me by my Government, are in breach of the pledge of local aid in the performance of these duties, which is conveyed in the *Exequatur*, bearing the sign manual of Her Most Gracious Majesty, accompanying my recognition as Consul.
- 5th.—Because the sections referred to, if applicable to other than British ships and seamen sailing under the British flag, are opposed to the general policy of the Imperial Government, and without precedent anterior to this Act of the Colonial Parliament of New South Wales.
- 6th.—Because there is no local necessity for any such peculiar enactment.
- 7th.—Because, for the reason already stated, the enactments already mentioned (until they are repealed, or so far modified as to assimilate the laws and practice here to those which prevail elsewhere) place me in a position which has never been contemplated either by the Government which has commissioned me, or by the Government to which I have been accredited. For so long as these enactments remain unrepealed or unmodified, the intended usefulness of the consular establishment at this port is paralyzed, while my authority and influence with and over those whose interests I represent, and am especially enjoined to guard, is materially weakened. While therefore I fully recognize and admit the good intention of the framer of these enactments, and am prepared to bow in all things to the majesty of the Law, I must as a matter of justice and right, appeal with a full confidence in the propriety and justice of a consideration of my present representation.

I would therefore respectfully request that the premises be taken into early consideration, and that you will be pleased as speedily as possible to introduce such measures to the notice of the Honorable the Legislative Assembly as may be necessary to effect the repeal or modification of the enactments before alluded to, and to place the representative of the Government of the United States upon the same unmistakable footing with the Consular Officers of Her Most Gracious Majesty the Queen of Great Britain in the several ports of the States of the Government I have the honor to represent.

I have, &c.,

ROBERT D. MERRILL,
U. S. Consul.

The Honorable
The Colonial Secretary,
New South Wales.

United States Consulate,
Sydney, New South Wales, 6 July, 1860.

Sir,

I have the honor to enclose slips from the *Sydney Morning Herald*, published at this port, containing action and decisions of the Supreme Court of this Colony, and also copy of the "Shipping Regulations" upon which is apparently based the decision above referred to.

I also enclose a copy of my last communication to the Colonial Secretary upon the same subject, which contains the substance of representation in personal interview with him, as also my remonstrances to the Government Shipping Master, in regard to what appears to me to be an exercise arbitrary in the extreme of his power when an American ship is concerned, to none of which have I received the courtesy of reply.

The Act referred to as contained in the enclosure, No. is of years standing, and has always been applied solely to British ships until within three months.

At present my right to discharge a seaman or ship one, under any circumstances, is denied, and my certificate of discharge is declared *waste paper*. I have simply the honor to submit my views contained in enclosure No. , and shall continue (unless otherwise advised) to pursue the course adopted by my predecessor, followed by myself, and as instructed by my "Regulations."

My *Exequatur* appears hardly to be considered here as to a part of H. B. M. Dominions, and either for myself or any who may supersede me, the question should certainly be determined, if not for national honor, at least for the well-being of our mercantile marine.

I have, &c.,

ROBERT D. MERRILL,
U. S. Consul.

Hon. Lewis Cass.

Department of State,
Washington, 11 December, 1860.

Sir,

Your despatch relating to a Colonial Act has been received.

In this despatch you refer to the Colonial "Act for preventing descutions and other misconduct of Seamen belonging to Foreign ships," and to that provision of the same which provides "that none of the provisions of this Act shall be enforced in respect of the masters and seamen of any foreign ship, until it shall have been signified, in writing, to the Governor of New South Wales, by a Consul or some other proper officer of the Government of the Nation or State to which such ship shall belong, that it is the desire of such Government that this Act shall be enforced in respect of the master and seamen of the ship of such Nation or State." It has been suggested that it is desirable that this Department approve of this enactment, and that you should be authorized to make the necessary application, in time to have the matter placed on a proper footing before the commencement of the approaching shipping season.

In

In reply, I have to inform you that a like request has been made to the Department in respect to a Legislative Act of the Colony of Tasmania, embracing provisions similar to that of New South Wales. The question, "whether the President of the United States, as such, has authority, by so signifying his desire, to give general effect to this Colonial Act," was submitted to the Attorney General of the United States.

R. D. Merrill, Esq.
 8 Nov., 1861.

An extract from the opinion of that officer is hereto annexed. From this you will perceive, that though the Department is fully aware that the object of the Act is the laudable one of more effectually preventing desertion and other misconduct of seamen belonging to foreign ships within the jurisdiction of the Colony, yet the Government of the United States cannot give express sanction to the law, save through a Treaty or an Act of Congress.

R. D. Merrill, Esq.,
 Consul of the United States,
 Sydney; New South Wales.

I am, &c.,
 JOHN APPLETON,
 Assistant Secretary of State.

EXTRACT from an Opinion of the Attorney General of the United States, dated October 28, 1853, on the power of the President touching the giving of Assent on the part of the United States to a legislative Act of a British Colony relative to Seamen.

"The question is,—Whether the President of the United States, as such, has authority, by so signifying his desire, to give general effect to this Act of the Colony of New South Wales.
 "I am of opinion that he has not. Neither the Constitution of the United States nor the Treaties between this Government and that of the United Kingdom, nor any Acts of Congress, empower the President to communicate to the law of a Foreign State authority or effect which it does not possess *proprio vigore* as a law of such Foreign State. I have no occasion to speak here as to the question of the right of a Foreign State to exercise of its own mere authority the penal jurisdiction and the right of search contemplated by this Act. Suffice it now to say, that, in my judgment, the Government of the United States can give express sanction to the law before me in no other way, in the first instance, save through a Treaty or an Act of Congress. While commending, therefore, the general purpose of the Colony of New South Wales in this enactment, and the comity of the British Government in communicating the same to this Government for its action in the premises, I feel constrained to advise you that it is not within the constitutional authority of the President, by any separate Act of his, to confer efficiency on this law, as respects either the ships or the seamen of the United States."

WEDNESDAY, 13 NOVEMBER, 1861.

Present:—

MR. BURNS,	MR. LEWIS,
MR. T. GARRETT,	CAPT. MORIARTY,
MR. SADLEIR.	

D. C. DALGLEISH, ESQ., IN THE CHAIR.

Robert Towns, Esq., called in and examined:—

99. *By the Chairman:* This Committee is appointed to inquire into the various Acts having reference to the shipping, discharging, lodging, and general treatment and management of seamen in the Colony of New South Wales; and we believe that, from your position, you will be able to throw considerable light on the subject? Any information in my power I shall be very happy to give.

R. Towns, Esq.
 13 Nov., 1861.

- 100. You are a shipowner of this port? I am.
- 101. And have been so for a number of years? Many years.
- 102. You are thoroughly conversant with the management and condition of the seamen of the Colony? Yes, I ought to be, if experience will afford me the opportunity.
- 103. Is there anything in relation to this matter that you wish to give the Committee the benefit of your information upon? I am hardly aware of the main drift of your inquiry, but I will be glad to answer any questions.
- 104. With regard to the Shipping Office as it at present exists —? My masters find a great deal of fault with the delay that takes place there; but that is a matter of detail which may be amended. If you ask me my opinion with regard to its utility as a department, I think it highly necessary.
- 105. *By Mr. Burns:* You think the department should exist? Decidedly I think such a department should exist. There seems to be a great deal of difficulty at present in working out the details; and perhaps it is fettered with a little more minutiae in small cases than what would be absolutely necessary.
- 106. *By the Chairman:* You said the captains in your employment had complained of the detention? They do; in consequence of the length of time that the routine of shipping and discharging so many men occupies, they have to go repeatedly, before they can effect their object; but that is a matter of detail that may be improved upon. It would appear to me a very simple matter to discharge a ship's company, if they are all mustered together.
- 107. Are you the owner of vessels in the coasting trade? I am.
- 108. Do you think the same regulations that are necessary for the shipment and discharge of seamen for foreign service are requisite in the coasting trade? I think there might be some relaxation with regard to the coasting vessels; but my coasters are not among those that are in the habit of taking very short trips, which are, I suppose, the vessels that find the inconvenience the greatest; mine go to Moreton Bay, Rockhampton, and such places; but I should think that if the whole paraphernalia of the establishment are brought to bear on the small coasters that go to Wollongong, Newcastle, and those places, it must be very troublesome.

R. Towns,
Esq.
13 Nov., 1861.

109. Then, having more immediate reference to such coasters as you mention—those that visit Shoalhaven, Wollongong, Newcastle, and other ports on our own coast—you think the detention caused by the Shipping Office must be a very serious drawback? I think it must be a very great impediment, from what I have heard spoken amongst them; not having any vessels immediately connected with that trade, my own business matters have prevented me from seriously looking into it.

110. You have been brought in contact, I suppose, with seamen on various occasions—do you ever hear them express any discontent at the charge made for a discharge? I have not heard it. My seamen generally ship for three months at a time, in the vessels that go comparatively short trips, and others for the length of the voyage, whatever the period may be; and it does not come so hard on them as it would do if they were changing ships more frequently. But I do not consider it by any means a heavy tax, if the tax were properly applied; and in fact it was at one time my own intention to have proposed a measure to Parliament for the better regulation of shipping out of this port, and amongst other things to introduce apprentices, in order to nurse a Colonial marine of our own; and also what would be a very harmless tax in itself, but would ultimately be of great benefit to "Poor Jack," the same as they had in former times in England, 6d. a month (for Greenwich Hospital it was then), which, however, our merchant seamen never got the benefit of—it went to the King or Queen's service.

111. Are you aware of any peculiar advantages or any particular protection that the seaman derives from this extra tax on his labour? The advantage he derives is indirect. By conducting the business of shipping and discharging in a properly authorized Shipping Office, he obtains a position of respectability and standing, and every man's name must be registered and recorded. In former times, when the seaman had the full run of the place, and there were no restrictions, the scenes that took place with the crimps, and among the crimping officers, must have been seen to be believed. Now, the man cannot ship and neither can the master employ him without his regular discharge, which is a monster check upon fraud; and thereby the man is protected from the abuses that otherwise would occur, if he had unfortunately the license of his own frolic; and the shipping interest is also protected by the men being obliged to have their discharge, and cannot be shipped without it.

112. Where charges are made on the seaman in Great Britain, he derives some benefit from the fund that is created by the sum so contributed? I have endeavoured to explain that though he might not have an immediate and direct advantage, he has a decided advantage indirectly by the protection of his position. The protection of the Shipping Office is, that he cannot be discharged wantonly, and neither can he ship without its being duly recorded; and the money he pays goes for the support of the office which affords him this relief.

113. I alluded to funds being established in Great Britain for affording relief to merchant seamen who meet with accidents, or relief to their families in certain cases of extreme distress? That is exactly what I was going to introduce myself, had I had the opportunity.

114. *By Captain Moriarty*: There is no such thing in operation in this country? No.

115. And I understood you to say, that in England the money subtracted from the merchant seamen went to Greenwich Hospital, and therefore they received no benefit? They did not; it was entirely for the support of the Government seamen; but latterly that tax has been abolished.

116. *By Mr. Burns*: You say you had some measure in contemplation? Yes, exclusively for their benefit; and a very large fund would soon accrue.

117. Did you propose to establish an hospital for the benefit of seamen? Yes, and a fund for the relief of their families in case of need. It strikes me now that just when I was about leaving England, there was a charge of a shilling a month for another fund for the benefit of merchant seamen in cases of distress.

118. Would the fund you propose to establish be in any way made available for rearing up youths to a seafaring life? Not at all; only for the aged and imbecile, and those suffering from accidents or sickness. Sixpence or a shilling a month appears a small sum, but it would soon mount up, and then every man who contributed would be eligible for receiving assistance in case of need. It would require some years, however, before such a fund could accumulate so as to be available for any purpose.

119. *By the Chairman*: I find, by a Return on the Table, that in the years 1854, -55, -56 -57, -58, -59, and -60, there has been a surplus of revenue over expenditure in the Shipping Office of £8,192 14s. 11d.—do you not think this sum, which is abstracted from the pockets of seamen in excess of the working expenses of the Shipping Department, should have been devoted to the amelioration of the condition of the seamen themselves? I think it would have formed a very nice nucleus on which a large fund might have been accumulated in a very short time.

120. *By Mr. Burns*: To be devoted to an hospital? Certainly; after the requirements of the office to render it efficient had been provided for in the first place.

121. *By Mr. Sadleir*: Are there not very large sums paid into the Savings Bank, or in the hands of the Government, derived from the intestate estates of seamen which have not been claimed by their relatives? I believe there are.

122. *By Mr. Burns*: Can the trustees of any fund that you are aware of, claim any funds that may arise from the intestate estates of seamen in the Colony, or do the funds go to their relatives? If their relatives prove their right I believe they can get the money.

123. If there are no relatives? It is paid in to Government.

124. Can the trustees of any particular fund for the benefit of seamen claim it? No; the Government are custodiers of the property until some person can prove a better right to it.

125. What is your opinion of the lodging-houses for seamen—do you think as a general rule they approve of the present regulations under which they are compelled to resort to the

lodging

lodging-houses? I think it is necessary that lodging-houses should be under the surveillance of the police to a certain extent, and that no person ought to keep a lodging-house without a proper license; but I never saw the value of the distinction that confines a sailor to a particular lodging-house.

R. Towns,
Esq.

13 Nov., 1861.

126. Do you not think they are protected to a certain extent? Certainly, but any other lodging-house would do equally well under proper regulation; and I think it much more likely that a sailor will improve his mind by mixing with other classes of men, than by associating only with his own class all his life.

127. Do you think the restrictions are found oppressive in any way? I have never heard it complained of. But I look forward with great hopefulness to the Sailors' Home; I think that properly worked, and with due encouragement, it will be a great protection to the seaman.

128. *By Mr. Sadleir:* Do you know whether many seamen lodge in other places besides their lodging-houses? I think it is very likely.

129. *By Mr. Burns:* Do you think the seamen consider the tax they have to pay on being discharged unjust? It would be very like "Jack" to think that; I dare say he would rather have a drink with the money; but I never heard any particular complaint of it. I do not think the charge is excessive at all, if he had the prospect of benefit from it hereafter; that is, of any amount that might be accumulated in excess of the necessary working expenses of the establishment.

130. *By the Chairman:* We were speaking of the proceeds arising from the surplus of revenue over the expenditure of the Shipping Office, and I asked your opinion whether it should be appropriated to the benefit of the seamen themselves—I think your opinion was that it should? Yes, clearly, after payment of expenses.

131. I find that at Home, in 1851, an Act, called the Winding-up Act of the Merchant Seamen's Fund, was passed, which abolished the former Act and resulted in a consolidated Act in relation to seamen, which Act provided for the mode of dealing with the wages and property of deceased seamen; and I find that merchant seamen not only obtained benefit then, but they still receive benefit from the Government, although they do not pay the tax direct. I take the following from McCulloch's Dictionary:—"Merchant Seamen's Fund, to be provided for by Annual Vote. The several payments and expenses which, by the said Seamen's Fund Winding-up Act of 1851, are charged partly on the said general fund therein mentioned, and partly on the Consolidated Fund of the U. K., shall, except as regards the payment to the Seamen's Hospital Society above mentioned, be provided for by annual votes of Parliament." So that it appears that in Great Britain they still provide for seamen in the merchant service who meet with accidents, and who otherwise would have been chargeable on what is termed the Merchant Seamen's Fund? I am not aware of any establishment we have in England, unless it is the "Dreadnought," and that is a private establishment, supported by contributions and private subscriptions.

132. *By Captain Moriarty:* The Government pay something towards that? Yes, the Government always subscribe largely; I believe there is an annual vote.

133. The medical superintendents are naval officers, are they not? Yes, I believe they are.

134. *By the Chairman:* I also find the following in the same work:—"New Establishment for the support of Merchant Seamen, &c.—And to provide still more effectually for the relief and support of maimed and disabled seamen, and the widows, &c., of those killed or drowned in the merchant service, the Act 4 and 5 William 4, c. 52, was passed. This Act repealed the 20 George 2, c. 38, except in so far as it related to the establishment of the corporation of the President and Governors for the relief of maimed, &c., merchant seamen, and the widows and children of seamen killed or drowned in the merchant service; and it also repealed as much of the Act 37 George 3, c. 73, as related to the wages of seamen dying while employed in ships trading to the West Indies; and having thus cleared the way, it proceeded to introduce a new system, which was further extended and perfected by the 6 & 7 William 4, c. 15, and the 7 & 8 Victoria, c. 112. Under this system, all masters of British ships, whether owners or not, and all British seamen employed in navigating the same, will be obliged to contribute certain sums out of their wages to the support of the Merchant Seamen's Fund. In the case of seamen, this contribution, which in the first instance was only 6d. a month, was subsequently raised to 2s. per do, and in addition to these contributions, the wages and other effects of deceased seamen were, in the event of their not being claimed by their relations, paid over to the fund." And it is this which we find was done away with in 1851, and provision made for the same purpose from the Consolidated Revenue? Yes, I recollect now perfectly; there is a large establishment in the Mile-end Road—the Merchant Seamen's Orphan Asylum—and it is surprising the number of applicants there are in the event of vacancies. There are schools for the children of seamen.

135. So that we find that in England the sums which are collected from seamen, for these purposes, are absolutely applied to the relief of the distressed and the maimed? Yes, evidently so. It was an idea too that struck me, that we ought to establish in this infant Colony an apprentice system. It was a great pity, in my opinion, that it was ever done away with in England. What with steam, and one thing and another, the honest old tar of our forefathers, who bore us to the pitch of perfection in the Mother Country, is now only heard of in history; we are pestered now with a pack of sea-lawyers, many of whom only go to sea to make out a voyage from the master by any means but honest industry.

136. As the owner of numerous vessels out of the port, you are aware that a law has been passed enabling an owner to transfer a seaman from one vessel to another vessel, though both it and the captain may be strange to him—do you consider that any cause of complaint? I dare say seamen would naturally complain of a thing of that kind. I do not know that it

R. Towns,
Esq.
13 Nov., 1861.

is exactly right that a seaman who has shipped for one vessel should be compelled to go to another. I do not see any great hardship in it on coasting or short voyages, but it gives room for a complaint or grievance.

137. *By Captain Moriarty*: It was, I believe, originally introduced, with the view of facilitating the steam navigation out of the port, to enable the proprietors, if they had one vessel suddenly injured, to transfer the seamen bound to them without a fresh shipment, and with that object they are bound to the Manager, not to the master? That takes it rather out of the ordinary course of things with respect to seamen. But I think it would be a very hard case on the owners of steam vessels if they could not avail themselves of such a provision as that, in case of one of their vessels being disabled; for they would without it have to keep very expensive crews in idleness. For instance, there is the engineer getting £20 a month; the second engineer, £16 or £18; half-a-dozen firemen, £9 or £10 each; besides the coal-trimmers and deck hands. Suppose a vessel has to go on the slips to have her bottom cleaned, and be repaired; she may be there a month; and it would be a most painful tax if all these men were doing nothing all that time, and eating the bread of idleness at the expense of their employers.

138. In the case of ordinary seamen in sailing vessels, you do not think this provision should be applied? That is what my remark amounts to. In the case of a steamer which does not make long voyages, the seaman could not take much hardship from being transferred.

139. I understood you to say you did not see the necessity of seamen being confined to particular boarding-houses? I think not.

140. Do you know of any reason why a seaman should not have the same facilities of lodging himself that any other man in the community has? I do not. As I said before, I should like to see houses that are professedly open for lodging men of any description licensed, and under the surveillance of the police.

141. As I understood your observation it goes thus far,—that you would see that those men who had licenses for lodging seamen were persons of unexceptionable character, and that the police had some right to interfere with them, but you would not compel seamen to go to their houses unless they wished? Certainly; if a man had a brother or sister, or a friend, it would be a very hard case if he could not enjoy the benefit of his friend's society.

142. *By Mr. Burns*: How would you protect seamen unless their lodging-houses were under some regulation? I would have all lodging-houses under the surveillance of the police; but the seaman should have the same freedom to pick and choose among them as any other class of men.

143. *By the Chairman*: We were speaking of the transfer of the services of seamen from one vessel to another—you think that objectionable; that seamen have a natural objection to having their services transferred from one vessel to another, and one captain to another, without their immediate consent? I do, in a general way; but then I look upon it that it would be hard to the owners if it could not be done in the case of the steam vessels. Take one of the Company's vessels, and calculate the expense of their engine-room for a day. The chief engineer has £20 a-month,—in fact, the engineer of the "Balclutha" has £25—the second engineer, £16, and the third, £12; then six firemen, at £9, three coal-trimmers, about £7, and about six deck hands, at £5. So that the total expense is very heavy.

144. You think steamers should be the only exception? I think a distinction might be made in their favour. In sailing ships I think it is objectionable; but in steamers it is only an act of justice to allow it. Besides, the voyages of steamers are so short that the men could scarcely suffer any hardship from the change. It is not like compelling a man to go a long voyage with an unpleasant customer for captain; no steamer's voyage out of this port is longer than eight or ten days.

145. We find, in practice, that the objection with regard to the expense to the Steam Companies is easily got rid of, for we have it in evidence that they are in the habit of discharging their crews, engineers, firemen, stokers, and deck hands, when wages fall, in order that they may be re-shipped at a reduction, and no doubt the same thing could be done in the case you have supposed? Well, I should question that assertion, at all events with respect to the engineers. I can speak from my own knowledge that there are engineers in the Company's service that have not been removed these ten years. Those men are the right hand of the Company. So far as the rest of the engine-room hands are concerned it is very likely, for the men are quite ready to strike if wages should rise. I have been a long time at the Board, and witnessed their movements. If there was the slightest movement in wages, no fires a-light; and then it was to be supposed the Company would sometimes give them a Roland for their Oliver.

146. The objection with regard to the great expense of the engine-room, it appears, may be easily got rid of by discharging the crew, and in the Company's boats we know that the chief engineers are transferred to the shop, or employed in the necessary repairs of the boats they belong to; but the others are immediately removed, even on the slightest reduction of wages? I think it might easily be met. I am not one that would arbitrarily compel any man to go in any vessel against his will; one vessel might be eligible and another not; but I should say, make it optional; that is, that the men should either go to another vessel or take their discharge.

147. *By Captain Moriarty*: Allow me to ask your opinion on one point; what is your idea of the terms upon which a contract between the owner of a ship, or the captain acting in his name, and his crew, should be made—should it not be absolutely reciprocal; that is to say, should the captain have it in his power to enforce the services of his crew for the full term of the articles under which they shipped, and also have it in his power to terminate the agreement whenever he wishes? He cannot do it; it is reciprocal; he cannot discharge the men without their own consent until the term agreed upon has expired. Take the

case

case of one of my own vessels, the "Bcrengaria." The articles run something in this way:—"From hence to the islands in the Pacific Ocean, thence to Manila, China, or other ports in the Pacific and in the Chinese or Java seas, such service not to exceed twelve months." When the vessel comes back she makes her voyage in five months. Now these men could insist on our keeping them on pay unless the concluding clause, which generally terminates the voyage, thus—"and back to a final port of discharge in Australia." They are invariably too anxious to have their discharge, but it is perfectly in their power to insist on continuing by the vessel so long as they perform their duties.

B. Towns,
Esq.
13 Nov., 1861.

148. If you are informed that the Water Police Magistrate has stated that it is not so—that the men are bound absolutely for the six months, and the master is not, are you of opinion that such a state of things should be permitted to exist? Well, I hardly understand your question; but I must go a little further in my explanation. There is also a concluding paragraph in our articles—sometimes we have it—"forwards and backwards and backwards and forwards, and ultimately to a final port of discharge in the Australian Colonies, such service not to exceed 12 months." There is a *finale* to the engagement, and it is also limited to a period. If the vessel comes back to the port of discharge the voyage is ended.

149. Is not the man's only remedy for a breach of agreement on the part of the master, to claim under a clause of the Imperial Act, which gives power to the Magistrate to impose a penalty of one month's wages—so that his only remedy for a breach of agreement by the master is the payment of one month's wages, although he may be compelled, if the master chooses, to serve the entire period. I will read you the opinion of Captain North on the matter, when he was examined:—"74. *By Captain Moriarty*: I understood you to say that the articles were mutual only so far as to entitle the seaman to one month's pay, in the event of his owner discharging him prior to the expiration of his term? Yes. "75. By what clause of the Act has the master the right to discharge a seaman by payment of one month's wages, although the articles may have been signed for six months? "You will find the clause in the Imperial Act, which gives power to the Magistrate to impose a penalty in cases of breach of agreement of not more than one month's wages." So that the Water Police Magistrate, under that view of the Act, declares his opinion that the shipping under articles is not reciprocal; one has the power of enforcing the period, but the other only a power of demanding one month's wages. Do you think that state of things should be permitted to exist? Well, where is the hardship; I do not see the hardship.

150. And yet you gave evidence that they were reciprocal? To that extent.

151. And you think it ought to be so? Every agreement ought to be reciprocal so far as it can be carried out with consistency. The American law provides that a man can be paid off in any port in the world on payment of three months' wages, but our seamen cannot unless you provide them a passage back to the place where they shipped.

152. *By the Chairman*: Allow me to suggest that the American law definitely specifies that it must be at the seaman's own request, and if he is discharged the captain must pay him three months' wages? —

153. *By Captain Moriarty*: I want to get at your opinion as to making all agreements of that kind reciprocal—if binding on one it should be binding on another? No doubt; I quite agree with you in one sense; but you must bear in mind that they do not stand in that reciprocal light towards each other; certainly as employer and employed they do as long as each is faithful to the other; but supposing a crew strike, as they often do, and will not navigate the vessel, what are you to do?

154. Are they not liable to some punishment for an act of that kind? They are, but what does it come to. You have to provide yourself with others if you can.

155. The law of mutiny provides for that? It does; but it is a very poor remedy.

156. I want to know from you exactly what your opinions are upon the necessity of there being something like reciprocity in any engagements entered into between a master and his crew? Well, I think the month's pay is not an unreasonable equivalent, provided it is in the port of engagement or discharge; it would not do abroad. A man cannot be discharged abroad except with the sanction of his Consul. Suppose a fractious man shipped on board your vessel—one of those whom I designated as sea-lawyers—and you saw clearly that you could not get on with him, the law would provide that you could get rid of him by payment of one month's wages; but you could not do that in any port in the world but the port of shipment.

157. If a man ships in England to go back to England, is a month's pay an equivalent to him for a breach of the agreement in this port? —

158. *By the Chairman*: He is under the English law? Yes, it does not bear at all. I think there is as much reciprocity as meets the merits of the case.

159. This is more an inquiry as to Colonial seamen? Quite so. I say that if a master ships a man with whom he is dissatisfied after a short trial, he should put him on shore, and not merely pay him wages for the two or three days he has worked, but a month's pay for the breach of agreement, unless he can legally do so by the man's consent. That is quite equivalent to any loss he sustains, and in many cases too much. There are plenty men make a living by what we call, at Home, a Gravesend voyage.

160. *By Mr. Sadleir*: The only doubt I have is whether a month's pay is sufficient? Plenty. You may depend the captain would never get rid of a good man in that way. If you were to make it more it would only be an encouragement and bribery to abuse.

161. Do you think the intestate estates of seamen, not claimed by their relatives, and now paid to the Government, should be carried to the account of a fund for the benefit of seamen? Yes, and I think the law should be so shaped that the surplus revenue of the Shipping Office, after providing for its efficient working, should also go to a Merchant Seamen's Fund. It could not go to a better purpose. I should also be happy, as one perhaps more extensively

engaged

R. Towns,
Esq.

13 Nov., 1861.

engaged in shipping than any man in the Colonies, to see the shipowners compelled to take apprentices, with a view to create a Colonial marine and bring up seamen for our own service, though many people seem to think it is against their interest.

162. *By Captain Moriarty*: You would restore the old law of apprenticeship? Yes.

163. *By Mr. Burns*: How would you legislate so as to encourage Colonial youths to follow the nautical profession? The only plan is to compel shipowners to take them in proportion to tonnage. I take as many as I can get now. You may see my advertisements in the paper nearly every month,—wanted 15 or 20 apprentices to the sea; but we cannot get them so easily as we used to do. Some years ago they would stow themselves away to get to sea, but lately they have taken a monster aversion to it.

164. To what circumstance do you attribute that aversion? The lower orders of the people, where children would follow the sea, have so few wants, and those easily supplied, and they are generally so well off, that they do not like to part with their children. I have seen a great aversion on the part of parents to part with them.

165. Have you met with many cases where the Colonial youth have a taste for the sea? No. It is only latterly that I have seen a better feeling. Since I returned to the Colony I have bound not less than twenty. These are the terms I invariably offer:—Supposing a lad is about fifteen years of age, I bind him for four or five years, but that is never any bar to his promotion if he is competent and an opportunity offers. The apprentice is preferred, and promoted to mates, as their abilities render them capable. I pay them at the rate of £30 for the period, divided over the period, and a bonus of £10 if they serve their time to the satisfaction of the employer. If a youth of the age I mention is worth his salt, he ought to be second mate of the vessel by the time he has been three years at sea, and chief mate at the end of his time. I have made it a rule now, that I do not give any man out of my employ the command of a ship if I have a mate I can promote.

166. *By the Chairman*: There is an objection among shipowners at the present time to ship boys, is there not? There is, but it is far from it with me.

167. *By Mr. Burns*: What does the objection arise from? I do not know. Perhaps it is because these boys must be provided for at all times, whether in harbour or at sea, and when they get their ships in harbour they like to discharge their crews so as to be off their expenses. I would rather have the boys about the ship, although they are very troublesome to keep in order and at work, and this may be the reason.

168. *By Captain Moriarty*: They could always be doing something? Always.

169. *By the Chairman*: I understood you to say, with regard to the transhipping of seamen, that you do hold it objectionable to transfer seamen from one vessel to another? I do. I would not bind a man to change ships or change masters against his will.

170. *By Mr. T. Garrett*: You only allude to sea-going vessels? Yes; but I think it might be optional even in the steamers for a man to be transferred, if necessary, to another vessel, or take his discharge.

171. *By the Chairman*: Do you know any reason why seamen should be engaged differently, or under different circumstances, to any other servant? Well, the nature of their servitude is very different. You see they are without the pale of the law for a certain period, and the law looks with very great jealousy on any agreement where a man is so placed, and properly so.

172. Is there any reason why there should be a different mode of entering into agreements with seamen than with other servants? I do not think you can assimilate them precisely. You see the seaman's services are called for at all times, by night and by day; but such is not the case with domestic servants. There are many circumstances in connection with a nautical life which do not apply to persons on shore.

173. Do you think that should affect the primary agreement, or the mode of making it? I do not think you can render agreements strictly consistent with the duties of seamen by anything that you have in the law respecting the ordinary servant. There are duties incumbent on a seaman that are strictly confined to a nautical life. The ordinary agreement, as between master and servant, would not be found either satisfactory or binding. I think it must be an exclusive agreement, and such it has been, and is, in all parts of the world.

174. I think your observations refer principally to vessels going long voyages? You cannot separate. There are the same difficulties, and the same control is necessary, even on short voyages. I think, on reflection, you will find you could not assimilate them.

175. *By Mr. T. Garrett*: Have you read the Act of 1860, which provides for this transferring of seamen—will you look at the second clause, and particularly at the proviso:—“Provided also that the names of such vessels and their respective masters, and the nature of the service, be specified in the agreement.” After reading that clause and the proviso, do you think the objection holds good? I think if the names of the vessels, and the names of the masters, with the nature of the service, are mentioned in the agreement, there is no hardship; he enters into the agreement with the facts before him; and the wrong is on his own part if he does not like it afterwards; but I do object to men being transferred in the way that was spoken of in the first instance.

176. But that removes your objection? It does, so far as that is concerned, and the voyages being short and stated, as provided.

177. *By the Chairman*: Is there any definite rule for the employment of seamen, or any acknowledged day's work for seamen, or are they expected to be at work night and day? When in harbour they always conform to the usual day's work of the labouring class; they turn to at six o'clock, have their hour to breakfast and their hour to dinner, and they knock off at six o'clock, unless something extraordinary require them in the evening; but at sea, of course, they must work, when required, night or day. Sometimes it occurs that they are called upon for extra work, as in the case of the “Balclutha” the other night at the wharf, when it was necessary to get her away at a certain time.

178. These are exceptional cases? Quite so.

179. We have had a case in evidence where a steamer left the port of Sydney on a Sunday morning, commenced to take in cargo at Shoalhaven at five o'clock on Monday morning, left there at nine o'clock, called at Kiama and Wollongong, where they also took in cargo, and arrived in Sydney about midnight, where the crew were called upon to discharge the cargo immediately, in order that they might take in cargo again and proceed to sea without any rest; the crew complained that they were incapable of doing so from exhaustion, and they were taken before the Magistrates, and the entire crew were punished for disobedience of lawful commands—would that, in your opinion, be fair? My opinion is, that the law, as it stands at present, is ample and sufficient for the protection of the seaman, and that no master can coerce a man beyond that which is reasonable; and, with all respect to your opinions and present position, I think any further legislation in that direction would only be aggravating an evil which is sometimes very hard to bear.

R. Towns,
Esq.
13 Nov., 1861.

180. I think you have already given your opinion as altogether against the compulsory lodging of seamen? I have. It is a matter that I always wonder at, that "Jack" should be treated like some extraordinary animal that cannot be trusted alone. I would not deprive any man of the right of living with any acquaintance, or associating with respectable people in any way.

181. In sailors' homes, as far as you are aware, no such supervision is exercised? They have perfect freedom, being only expected to conform to the rules of the establishment.

182. It is this freedom which has made these institutions so generally in favour with seamen? Yes, they are generally in favour of them; all well-disposed men prefer them; they live well, have every comfort, and pay reasonably for what they have.

183. From what you know of seamen, do you think that the mere attempt to legislate in such a way as to force them to resort to these lodging-houses would give them a dislike to them? Decidedly so; "Jack" is a rational being, and likes to have a free choice as well as other men.

184. If there are any other suggestions that you can make to the Committee, and particularly with reference to the qualifications of captains and mates sailing out of this port, we will be glad to receive them? No doubt that ought to be looked to, for there is more depending on the character of the men in charge than on the ship, with respect to the safety of life and property.

ADDENDUM.

In compliance with the concluding question, I beg briefly to recapitulate my views on the subject generally.

Firstly.—I consider the Shipping Office is necessary for the protection of both seamen and owners, but the duties at present are not efficiently carried out, or otherwise clogged in detail, which renders the department justly unpopular; this is capable of improvement.

Secondly.—Two shillings for each engagement or discharge is by no means excessive; but any surplus arising from the absolute charge in the office should (in my opinion) be devoted to a *beneficial* fund for seamen and their families; only first having the office in perfect efficient working order—this the first object; the fund to be under a trust created for that purpose, and legally constituted.

Thirdly.—I am of opinion the same law which governs the shipment of seamen for foreign and long voyages should not prevail with coasters; the same necessity does not exist in the latter, and gives great cause to complain; but whatever change may be considered necessary, every effort should be used to keep *poor Jack* from the clutches of the *crimp*.

Fourthly.—Lodging-houses for seamen.—This I have ever looked upon as a masterpiece of humbug; unjust in its operation, and a failure in the results. Sailors, for the short time they have on shore, deserve at least the common freedom allowed to landmen; and why poor Jack should be compelled to herd with his own flock (however much against his will) has ever been to me a mystery. I would certainly allow "Jack" the privilege common to all, but no more, and if (which is unfortunately too often the case) he commit himself, the law is ever ready to restrain him.

Fifthly.—I am also of opinion that all and every description of lodging-houses should be subject to the surveillance of the police, and that seamen should have the privilege in common with all.

Sixthly.—I would here remark, as my opinion, there should be a distinction between the engineers, firemen, and coal-trimmers; these men have no right, title, or interest, to exercise the privilege you assumed and call them seamen. In my opinion they should be governed by a separate law. They are, generally speaking, the most troublesome men to deal with; they are also much better paid than seamen, and I would rule them by a separate law. They at present sign articles to obey the master and officers, which is the furthest thing from their thoughts of doing. The men in the engine-room are taught only to obey the engineer, and a monster rivalry and jealousy exists between the worthies in authority. I have known a case, from the information of one of my masters, where a man has been refused to ship in a sailing vessel at fifty shillings per month, as ordinary seaman; the same man, before he left the office, was engaged by one of the engineers in the Company's service, as a fireman, at nine pounds per month. This occurred before I left the Colony in 1853. Such creates great jealousy.

Sevently.—Since replying to your question as to the law in England with reference to merchant seamen, I have recollected the arbitrary rule is this:—"If an English registered ship should trade out here or any other part of the world, and return to England, after twenty years, or any longer time, the owner will have to pay the Merchant Seaman's Dues"—as occurred to myself in the "Royal Saxon," of which vessel I was sole owner when I left England in 1842. I settled in this Colony in 1843, and kept the ship on the English register, hailing from London. In 1847 she went to London from Calcutta. On arrival, and preparing to pass entry at the Custom House, the receipt for last payments of Merchant Seamen's Dues was demanded, when it was found nothing had been paid from 1844. My agents memorialized the Board of Trade, but to no avail; they were obliged to pay thirty-one pounds four shillings and sixpence, a fair average, all I was allowed; as we are only chargeable while the ship is employed and men engaged, I was thankful of that allowance.

Eightly.—

R. Towns,
Esq.

13 Nov., 1861.

Eighthly.—Masters and Officers.—It is most desirable that some examination should be held on the characters and capabilities of men so placed in trust, as I ever contend there is much less risk to life and property in charge of a good and competent master, even in an inferior vessel, than in the finest ship that ever spread canvas, in the hands of a drunkard or otherwise incompetent man.

Ninthly.—But such regulations here would be attended with difficulty; certainly there might be two classes of examinations—one for coasters and whalers, and one for foreign-going vessels.

Tenthly.—In the latter case I speak from experience; some of the best whalers out of this port can do little more than write their names, but are in every other way competent to command a vessel; in such cases we put on board a competent navigator.

Eleventhly.—Such a class examination may be held touching the characters for sobriety and seamanship, and experience on the coast, in like manner with whalers. I mention this to shew the difficulty there would be to meet this desirable object.

Twelfthly.—For foreign-going vessels, the regular course of examination, as established at Home, might be with advantage carried out here by the Pilot Board, or such other parties appointed for the purpose, relaxing to some extent the critical points in navigation which they insist on at Home, which may be worked by any schoolboy, and would puzzle the writer, and in no way necessary (absolutely) for a first-class commander.

Such examination will be self-supporting, the fees paying the expense.

NEW SOUTH WALES.

EMIGRATION AGENTS AND LECTURERS FOR
NEW SOUTH WALES.

(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be Printed, 17 October, 1861.

No. 1.

EMIGRATION AGENTS to SECRETARY FOR LANDS.

*No. 10, West Strand, London,
24 August, 1861.*

SIR,

We have the honor to report to the Government the course of our proceedings since our arrival in England, on the mission contemplated by section 2 of the Act 22 Vic., 24.

2. We landed in Liverpool on Sunday, the 4th August, and left that town the same day; Mr. Parkes for Birmingham, and Mr. Dalley for London. On the morning of the 8th Mr. Parkes joined Mr. Dalley in London.

3. During his stay in Birmingham Mr. Parkes communicated with one of the Members for the Borough, with the Mayor and others, on the subject of our mission to England; and in London we have both anxiously availed ourselves of whatever opportunities have offered, to ascertain how far public feeling may be favourable to the objects we have in view. From our intercourse with persons variously connected with the great interests of the country, and as the general result of our inquiries, we are led thus early to form an opinion that there is a growing disposition among the propertied classes of England to discourage emigration. But in the humbler walks of life we have found generally a desire for information respecting the Colonies, and in many cases a strong inclination to remove to Australia.

4. On the 9th we called at the Colonial Office, and also at the office of Mr. Hamilton, but both the Duke of Newcastle and Mr. Hamilton were out of town. A few days later, on the 15th instant, we had an interview with the Secretary of State for the Colonies, and received from His Grace, as well as from other gentlemen of his department, the assurance that every assistance would be afforded to us by them, in carrying out the views of the Colonial Government.

5. On the 12th we had an interview with Mr. Walcott, at the Colonial Land and Emigration Office, in Park-street, and we received from that gentleman the most courteous attention, and the assurance that the Commissioners would be glad to assist us at any time with information or otherwise.

6. During this period we opened communications with gentlemen connected with the shipping interest, including the firms of James Baines and Co., of Liverpool, and T. M. Mackay and Co., of London, in order to acquaint ourselves with the rates of passage, dietary scales, and other similar particulars, that would be useful to intending emigrants. We find that the eminent firms mentioned are desirous of establishing a line of passenger packets between London and Sydney, provided that sufficient inducement can be offered in the shape of steerage passages.

7. On the 16th we proceeded to Birmingham, with the intention of holding a public meeting in that town. Considerations arising from our first preliminary enquiries having been made there, and the fact that it is the centre of one of the finest agricultural districts, decided us in selecting that place for the commencement of our public addresses. On arriving in Birmingham we immediately took steps for convening a meeting; and after some little disappointments and delays, we arranged for the

2 EMIGRATION AGENTS AND LECTURERS FOR NEW SOUTH WALES.

delivery of an address in the Music Hall, the second largest hall in the town, on the evening of the 21st. Though the notice given was short, the audience that assembled must have numbered 1,500 persons, including many ladies, and was remarkably orderly and attentive. Mr. Parkes addressed the meeting, and spoke for two hours and a half, briefly explaining the origin and history of the Colony, its present social state and system of Government; giving the latest statistics of gold, coal, wool, and copper, of its cereals, fruits, and vegetable products; and describing the character of the country in soil and climate, its extent of trade, and its means of communication and education. He concluded by explaining the Land policy of the Government, as embodied in the Bills not yet passed into law.

The chair was occupied by Mr. Alderman Baldwin, a wealthy and influential manufacturer; and a vote of thanks was unanimously accorded to Mr. Parkes, on the motion of Mr. George Edmonds, a gentleman who has been a well known public man in Birmingham for fifty years.

8. While this was being done at Birmingham, Mr. Dalley proceeded to Coventry, and made arrangements for a public meeting on the evening of the 22nd, which took place in St. Mary's Hall, and was presided over by the Mayor of the City. Mr. Dalley addressed the Coventry meeting, occupying the whole evening with his explanation of the progress and condition of New South Wales, and its manifold advantages as a field for British emigration. On the motion of the Rev. Mr. Weddington, Vicar of St. Michael's, the meeting, which was a very crowded and respectable one, was unanimous in according to Mr. Dalley a vote of thanks for his address. At both these meetings, the rates of wages in the Colony were quoted from the Report of the Select Committee of the Legislative Assembly on the condition of the working classes of Sydney.

9. Though only a few hours have elapsed since these meetings were held, we have already received many applications in person and by letter, for information respecting New South Wales; and we have the satisfaction of thinking that our exertions must in many respects be beneficial to the Colony. It appears to us now more forcibly than it did before leaving Sydney, that the appointment of persons to perform the duties with which we have been charged was exceedingly opportune, seeing that others (even some members of our community) have been employing all their powers to depress the character of the Colony, for the purpose of advancing the younger Colonies that have separated from us.

10. We observe that, by the Regulations of the 21st of June for the expenditure of the vote for assisted Immigration, a deposit of £5 will be required in the Colony to secure the passage of a male emigrant over 12 and under 40 years of age. In the event of further sums being voted by the Legislature for Immigration, it may be well to consider whether the selection of the persons who are thus to be benefitted by the Colonial Revenue should not be left to the Colony's own Agents. We feel persuaded, from the experience we have already acquired, that we could obtain large numbers of the most eligible emigrants, who would be prepared to pay at least half the amount of their passage money, thus effecting a large saving to the Colony.

11. We have engaged permanent Offices in London, at No. 10, West Strand; and for the purposes of business, we have adopted the style of "New South Wales Government Emigration Agents."

We have, &c.,

HENRY PARKES.
WILLIAM B. DALLEY.

No. 2.

EMIGRATION AGENTS to SECRETARY FOR LANDS.

No. 10, West Strand, London,
24 August, 1861.

SIR,

We have to acknowledge the due receipt of your communications of June last, informing us of the intentions of the Government respecting the administration of the Public Lands, and enclosing a copy of the Immigration Regulations of June 21.

We have, &c.,

HENRY PARKES.
WILLIAM B. DALLEY.

1861.

Legislative Assembly.

NEW SOUTH WALES.

EMIGRATION AGENTS AND LECTURERS FOR
NEW SOUTH WALES.

(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be Printed, 5 December, 1861.

No. 3.

EMIGRATION AGENTS to SECRETARY FOR LANDS.

London,
25 September, 1861.

SIR,

Since the date of our despatches Nos. 1 and 2, we have been employed principally in organizing a machinery of action for the furtherance of the objects of our mission, and entirely unaided as we have been by advice or assistance, we have found this part of our work more troublesome and requiring more time than might have been supposed. In this business especially we felt that the utmost caution was necessary not to take any step that would have to be retraced; and we have succeeded in establishing, at a small expense, a permanent and centrally situated office in London, under the care of a respectable man, where all correspondence can be received and answered, and applicants can be personally seen during our absence in the Provinces, or in Scotland or Ireland.

2. We have advertised our Agency in *The Times*, *The Daily News*, *The Daily Telegraph*, *The Morning Star*, *The Standard*, and *The Farmer's Magazine*, and in several of the country newspapers. We append a copy of the advertisement, marked A.

3. During the month we have held meetings in Surrey, Berkshire, Worcestershire, Staffordshire, Warwickshire, and Leicestershire, which have been tolerably successful in point of numbers, and everywhere drawn together most attentive audiences. These meetings have already resulted in many applications to us for further information, from persons of means and respectability who are desirous of emigrating to New South Wales. A copy of the form by which the meetings have been convened is appended, marked B.

4. Our first impressions of the existence of a strong feeling of opposition to emigration, among the landed gentry and the large employers, is confirmed at every step in our experience; and this adverse feeling extends to the newspaper press, which of course largely depends upon the moneyed classes.

5. Active efforts are being made to promote emigration to Canada as well as to Queensland and other Colonies; and pamphlets, printed by the local Governments, setting forth the advantages held out by those Colonies, are being extensively distributed throughout the United Kingdom. We thus find ourselves in the midst of a keen competition for the outflowing population of the Mother Country, in which "free grants of land" are offered as prizes; an advertisement to that effect, on behalf of Canada, appearing in all the London papers.

6. We may mention that we find it impossible to obtain the use of the public buildings for our addresses, without payment, which very materially adds to our miscellaneous expenses. We shall require at an early date an addition to the sum of five hundred pounds placed to our credit for this purpose. A statement of account, as far as our expenditure has proceeded under this head, shall be forwarded to you by the next mail.

7. We append a copy (marked C) of a hand-bill we have compiled for gratuitous distribution, which is the only publication we have as yet issued.

We have, &c.,
HENRY PARKES.
WILLIAM B. DALLEY.

[Appendices referred to.]

A.

Emigration to Australia.

PERSONS desirous of emigrating to New South Wales, the largest and richest of the Australian Colonies, may obtain every information by applying to the Government Emigration Agents, No. 10, West Strand, London.

B.

Emigration to Australia.

(By authority of the Colonial Government.)

ON Monday Evening, September 23, an address will be delivered in the Temperance Hall, Leicester, by Henry Parkes, Esq., late Member of the Legislative Assembly for the City of Sydney, and one of the Commissioners of the Colonial Government, on the "Advantages of New South Wales as a Field for British Emigration."

Mr. Parkes will explain the social and industrial condition of the Colony, the present state of its gold mines, its agricultural capabilities, the land policy of the Government, &c., &c.

The doors will be opened at half-past seven o'clock, and the Chair taken at eight precisely, by E. S. Ellis, Esq., Mayor.

Seats will be reserved for families. Admission free.

C.

THE COLONY OF NEW SOUTH WALES.

*New South Wales Government Emigration Agency,
10, West Strand, London.*

THE Colony of New South Wales contains an extent of Territory of 207,000,000 acres, more or less occupied; and a population, according to the last Census, of 350,553. The City of Sydney, which is the capital of New South Wales, contains, with its suburbs, a population of 93,102.

2. The soil and climate of the Colony are alike favourable to the cereals of the United Kingdom, and to the tropical and semi-tropical products of other parts of the world. Wheat, barley, oats, maize, lucerne, &c., are grown in some places side by side with, and in others at no great distance from, tobacco, cotton, and sugar; while the pear and apple flourish in the midst of peaches, apricots, oranges, bananas, &c., all which fruits are cheap and abundant. In 1859, there were under crop in the Colony 250,000 acres of land, producing 1,500,000 bushels of wheat, about the same of maize or Indian corn, between 60,000 and 70,000 bushels of barley, 90,000 of oats, and 20,500 tons of potatoes. There were also under crop 1,100 acres of vineyards, producing 96,000 gallons of wine and 1,300 gallons of brandy, and between 500 and 600 tons of grapes for table use. The quality of the wine of New South Wales has been tested by superior judges, and elicited their approval. It can be produced quite equal in quality to, and probably, after the lapse of a few years, not higher in price than the ordinary light wines of the Continent of Europe. The effect of more abundant labour will of course be still further to improve the quality and diminish the cost of production.

3. The Educational Establishments of the Colony are numerous, well attended, and munificently maintained both by Government endowment and private support. They comprise the University of Sydney, the Sydney Grammar School, 217 schools in connection with various Religious Denominations, 125 National Schools, and a large number of private establishments—in all, 739 schools.

4. The prices of the necessaries of life are, in many cases, lower than in the United Kingdom. Meat (beef) is from 2d. to 4d. per lb.; mutton, the same; bread, 5d. the 2lb loaf; sugar, 4d. per lb.; and tea, from 1s. 6d. to 2s. 6d. per lb.; butter, in May last, was 10d. and 1s. per lb. House rent in the metropolis is considerably higher than in the great cities of England; but a house of moderate convenience for a mechanic with a family of five or six children may be obtained at from 10s. to 15s. a week, and in some of the suburbs at 6s. to 8s. It may be added, that all English manufactures are necessarily dearer in the Colony than in England. An advance of 25 per cent. on the English price is probably a fair average of the additional cost. An article that costs 4s. here may generally be bought for 5s. or less in New South Wales.

5. The wages of labour in the following list are taken from an average printed from the evidence of employers and labourers to a Select Committee of the Parliament of New South Wales in the year 1859:—

Rate of Wages of Mechanics and Labourers—1860.

Trades.	Per Day.	Trades.	Per Day.
			s. d.
Carpenters	9s. to 11s.	Boilermakers	12 6
Masons	9s. to 11s.	Strikers	7 6
Brick-setters	13s. to 14s.	Patternmakers	13 3
Plasterers	10s. to 12s.	Smiths	11 6
Painters	9s. to 10s.	Coppersmiths	9 6
Bookbinders	8s. 4d.	Engineers	11 6
Printers	10s. to 13s. 4d.	Labourers	7s. to 9s.
Iron and Brass Founders	9s. to 13s.		

Rate of Wages of Domestic Servants, per annum, with Board and Lodging—1860.

	£	£		£	£
Male servants	30	to 46	Cooks	26	to 30
Cooks	40	to 60	Laundresses	26	to 30
Gardeners	35	to 45	Housemaids	20	to 26
Grooms	40	to 50	Nursemaids	20	to 25
General female servants	20	to 26			

Rate of Country Wages, per annum, with Rations—1860.

	£	£		£	£
Farm labourers	30	to 40	Shepherds	25	to 30
Married couples	40	to 50	Stockmen	40	to 50
Hutkeepers	20	to 25	Bullock drivers	40	to 50

In all the above cases the rations for each individual comprise—Flour, 8lbs. to 12lbs.; meat, 10lbs. to 14lbs.; sugar, 2lbs.; tea, ½lb.—weekly.

6. The advantages offered by the Land Policy of the present Government—which it is confidently expected will be embodied in an Act of Parliament before the expiration of the current year—are briefly these :—

7. With the exception of certain lands reserved under lease, and in the immediate neighbourhood of towns of a certain population, the whole of the Crown Lands of the Colony of New South Wales will be open to the selection of intending agriculturists, in lots of not less than 40 nor more than 320 acres. The price of these lands will be £1 per acre. Upon payment, however, of a deposit of 25 per cent., or 5s. per acre, the land may be occupied at once, temporary boundaries being defined by the occupier until an accurate survey can be made; and, for the remaining 75 per cent., or 15s. per acre, three years' credit will be given, and after the end of the three years, it may remain for any term, on payment to the Government of 5 per cent. interest per annum. It is however indispensable that the selector shall occupy and cultivate a portion of the land so selected. This is necessarily a brief outline of the mode of acquiring land which is about shortly to be adopted in New South Wales; and it is confidently affirmed that no other country presents greater advantages in soil, climate, general prosperity, and the means of easily and permanently acquiring a freehold, than this Colony.

8. Apart from the gold yield of the Colony, which is continually increasing, and the export of which, in 1859, reached the value of £1,259,127, the Colony, in the same year, exported 17,261,359 lbs. of wool, and raised, from its own coal mines, £204,371 worth of coal. Beside these resources of wealth, there are numerous and rich mines of copper and iron, only wanting labour for their successful development.

9. With reference to the mode in which Emigration is conducted to the Colony, the Emigration Agents desire to say that, under the Assisted Immigration Act, which regulates the disposal of the funds voted for Emigration purposes by the Colonial Legislature, it is absolutely necessary that the deposit required for the purpose of obtaining Government assistance towards Emigration should be paid in the Colony. The Emigration Agents can only render assistance in the way of explanation and advice, and cannot pecuniarily aid intending emigrants. The regulations which provide for Assisted Immigration contain the following scale of contributions, which is furnished for your information :—

SEX.	AGE.			
	Under 12 years.	12 and under 40 years.	40 and under 50 years.	All above 50 years.
Male	£ 3	£ 5	£ 8	£ 12
Female	2	3	6	12

10. The contributions towards assisted passages, according to the above scale, it must be borne in mind, are not payable in England, and can only be paid into the Colonial Treasury at Sydney. The object of the Government in adopting the present policy was chiefly twofold; first, to encourage immigration partially from private sources, which it was conceived would be most likely to be of a useful character, and secondly to secure a home for the immigrants on their arrival. The operation of the system may be illustrated thus :—A, residing at Penrith, in New South Wales, wishes his sister B, residing at Warwick, in England, to be brought out to the Colony. On his paying into the Treasury the required deposit of £3, and giving the necessary particulars, the Government will provide his sister with a passage in other respects free, including provisions, of which she will be officially informed; and on her arrival she will of course have A's home to go to. So if C wishes to engage the services of four mechanics or labourers (D, E, F, and G,) in England, he can, in the same manner, by paying the necessary sums, secure their passages to the Colony, and they, on their part, will have his employment ready to their hands, without loss or disappointment.

11. It may be further stated that the Government of the Colony is conducted upon the principle of ministerial responsibility, similar to that of England. The basis of the Legislature, however, is much wider; the Electoral System embracing Manhood Suffrage, Vote by Ballot, and equal Electoral Districts, with no property qualification for a seat in the Legislative Assembly.

12. The Emigration Agents appointed by the Colonial Government, having placed themselves in communication with leading shipowners engaged in the passenger transport trade between England and Australia, and having well informed themselves of the rates of passage, dietary scales, accommodation of ships, &c., will be happy to furnish this information on receipt of applications containing a postage stamp.

1861.

Legislative Assembly.

NEW SOUTH WALES.

EMIGRATION LECTURERS.

(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be Printed, 21 November, 1861.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 8 October, 1861, praying that His Excellency the Governor would be pleased to cause to be laid upon the Table of this House,—

- “ (1.) Copies of all the Correspondence which has taken place
 “ between the Executive Government and Messrs. Parkes and
 “ Dalley, and any other persons, relative to the appointment of
 “ Emigration Lecturers.
- “ (2.) Copies of any and all Correspondence between the Governor
 “ and the Executive relative to the same.
- “ (3.) Copies of all Letters of Instruction from the Government
 “ to these gentlemen ; and also copies of any Letters of Intro-
 “ duction, if any, with which these gentlemen have been fur-
 “ nished.”

(Mr. Hoskins.)

EMIGRATION LECTURERS.

No. 1.

SECRETARY FOR LANDS to MR. HENRY PARKES.

(Confidential.)

Department of Lands,
11 May, 1861.

MY DEAR MR. PARKES,

It is the intention of the Government to appoint forthwith, at a salary of £1,000 a-year and allowances, two gentlemen, to proceed to the Mother Country as Commissioners of Emigration; and my colleagues and myself are desirous of placing one of those appointments at your disposal. Will you, therefore, say whether or not you are willing to comply with our wishes? It is unnecessary for me to describe for you the nature of the duties of the office, as the proposal, sanctioned by Parliament, originated upon your own motion.

It may, however, be proper to mention that a similar communication to this has been made to Mr. W. B. Dalley.

I am, &c.,

JOHN ROBERTSON.

No. 2.

MR. HENRY PARKES to SECRETARY FOR LANDS.

Sydney, 13 May, 1861.

MY DEAR MR. ROBERTSON,

I beg to acknowledge the receipt of your letter of the 11th instant, offering me, on behalf of yourself and colleagues, the appointment of Commissioner of Emigration in England.

After mature consideration I have determined to accept the appointment, principally with the hope that I may be of material use in successfully carrying out the important undertaking sanctioned by Parliament. I beg the Government to accept my assurance that I shall enter upon the duties of my office with an earnest and anxious purpose to disseminate a correct knowledge of this Colony, to exhibit its real advantages as a field for the better class of emigrants, and to raise its reputation in the estimation of the British people.

I have this morning resigned my seat in the Legislative Assembly, and shall be prepared at once to receive the instructions of the Government, and to proceed to England by the first opportunity.

I have, &c.,

HENRY PARKES.

No. 3.

Proceedings of the Executive Council on the 14th May, 1861, relative to the appointment of Messrs. Dalley and Parkes as Emigration Agents and Lecturers.

Minute 61-21.—Confirmed, 28th May, 1861.

His Excellency the Administrator of the Government, lays before the Council a Minute, by the Honorable the Secretary for Lands, recommending the undermentioned gentlemen for appointment to the offices of Emigration Agents and Lecturers, for which provision has been made in the Appropriation Act for the present year, and that they be severally paid from this date, and whilst so engaged under authority, a salary of £1,000 a year, and an allowance of £500 a year to cover travelling and all other personal expenses, including the cost of passage to and from England.

The Council approve of the appointment as above proposed, of the gentlemen named by the Honorable the Secretary for Lands, and advise that they be so appointed accordingly, viz. :—William Bede Dalley, and Henry Parkes, Esquires.

In pursuance also of the further recommendation of the Honorable the Secretary for Lands, the Council advise that an advance be at once granted to each of these gentlemen of three months salary and allowance; and that in communicating to them the fact of their appointment, it be intimated that the salary and allowance will be continued to them for a period of three months, and no longer, after the delivery at their official address in London, of a notice from the Colonial Government, that their mission is at an end.

EDWARD C. MEREWETHER,

Clerk of the Council.

NOTICE in the Second Supplement to the New South Wales Government Gazette of Tuesday, 14th May, 1861.

*Department of Lands,
Sydney, 14 May, 1861.*

INMIGRATION.

His Excellency the Administrator of the Government, with the advice of the Executive Council, has been pleased to appoint—

WILLIAM BEDE DALLEY, Esquire,
and
HENRY PARKES, Esquire,

to be Immigration Agents and Lecturers in great Britain and Ireland.

JOHN ROBERTSON.

No. 5.

UNDER SECRETARY FOR LANDS to UNDER SECRETARY FOR FINANCE AND TRADE.

*Department of Lands,
Sydney 15 May, 1861.*

SIR,

With reference to the notification in the Supplement to yesterday's *Government Gazette*, of the appointment of Henry Parkes and William Bede Dalley, Esquires, as Immigration Agents and Lecturers in Great Britain and Ireland, I am directed to inform you that the Secretary for Lands has authorized their receiving the amount of three months' salary and travelling allowance in advance; and I am to request, therefore, that the money may be forthwith paid to them.

I have, &c.,

MICHL. FITZPATRICK.

P.S.—I am to add that the Executive Council have approved of the salaries and allowances being charged to the Vote of £5,000 for Assisted Emigration purposes, the rate being £1,000 each per annum salary—£500 per annum travelling expenses; and that these appointments will take effect from the 14th instant—the date of the Notice.

No. 6.

UNDER SECRETARY FOR LANDS to UNDER SECRETARY FOR FINANCE AND TRADE.

*Department of Lands,
Sydney, 18 May, 1861.*

SIR,

Referring to my letter of the 15th instant, informing you of the appointment of Messrs. Dalley and Parkes to be Emigration Agents for this Colony, I am directed by the Secretary for Lands to suggest that the following should be the arrangement according to which they shall be at liberty to draw against the vote of £5,000—which arrangement, it is understood, will meet their wishes; viz.:—Each of the Agents will draw in his own name, and on his own account, monthly, his own salary and travelling allowances, at the rate of £1,500 per annum; commencing after the expiry of three months from his appointment, up to which period each of them has been paid in advance.

2nd. As regards expenses to be incurred for the public service, and irrespective of their own personal and travelling expenses, they will be at liberty to draw from time to time on their joint cheques, they making their own private arrangements as to the distribution between them of the sums so drawn.

I have, &c.,

MICHL. FITZPATRICK.

No. 7.

MR. SECRETARY ROBERTSON to MESSRS. DALLEY AND PARKES.

*Department of Lands,
Sydney, 18 May, 1861.*

GENTLEMEN.

Under a separate cover I have caused to be forwarded to you separate Commissions, under the hand of the Governor-in-Chief and the Great Seal of the Colony, appointing you to be Emigration Agents in the United Kingdom, for and on behalf of the Colony of New South Wales, in pursuance of the provisions of the Act passed by the local Legislature during the session recently concluded.

2. This Act provides for the salaries and travelling expenses of Emigration Agents and Lecturers in Great Britain and Ireland, and for defraying the expenses of printing for circulation, in a cheap and popular form, throughout the United Kingdom, copies of Land Acts, and other trustworthy information relating to this Colony.

3. The words which I have here quoted express pretty well the scope of your labours; and whilst practically leaving to your own discretion the precise manner in which you will seek to achieve the object aimed at by the Government and Legislature of this Colony, I may be permitted to suggest that it will be of the first consequence to the success of the undertaking, that you should, as early as possible after your arrival in the Mother Country, associate yourselves with and seek the co-operation of gentlemen having local influence amongst those portions of the community whom it is especially desirable to attract to our shores; that is to say, small capitalists, and such of the labouring classes as have the means of defraying the cost of their passage to the Colony.

4. To place before such persons the advantages which it is conceived this Colony possesses as a field, as well as for the man with small means, as for the industrious mechanic and labourer, is of course the very essence of your mission. Whether you effect this by means of lectures, or pamphlets, or by means of the public press, or by *viva voce* addresses, is a matter which must be left, and which is confidently left, to your own discretion. Whatever mode of success may attend this experiment, the Government are fully assured that it will not fail from the want of able and zealous advocacy.

5. I will take care that you are duly supplied with all official information respecting the acquisition of Land in the Colony; and also the introduction of Immigrants into it. I have already directly, or through my colleagues, caused instructions to be given to the various Heads of Departments to furnish you with such information, statistical, and otherwise, as it was conceived might be useful to you.

6. I may add that until you shall have apprised me of your address in London, I purpose directing all communications made to you, after your departure from the Colony, to the care of Her Majesty's Emigration Commissioners, No. 8, Park-street, Westminster.

I have, &c.,

JOHN ROBERTSON.

No. 8.

MR. HENRY PARKES to MR. SECRETARY ROBERTSON.

Werrington,

Sunday, 19 May, 1861.

MY DEAR MR. ROBERTSON,

I hope you will have ready by 10 a.m. on Tuesday, the Commissions (as arranged with me and Mr. Dalley) together with Letter of Credit for payment of salaries and travelling allowances in England, and also Letter of Credit to operate on Public Fund, (say £800 to £1,000,) for printing, hire of buildings, and other miscellaneous expenses necessary to our mission.

I notice in the *Gazette* of our appointments, that precedence has been given to the name of Mr. Dalley; and I infer from this, that in any communications addressed to us jointly by the Government, the same deference will be shown to that gentleman. I presume this distinction must have been intended, as it could hardly have arisen from seniority in years, greater prominence in public life, or more intimate connection with the subject of our mission. Though this consideration, if it had been hinted at previous to my acceptance of the appointment, would have determined me in declining it, I should not now allude to the matter were it not that it may lead to some embarrassment hereafter;—for instance, if we have to make joint reports to the Government, I shall decline to sign my name after Mr. Dalley, unless I am instructed to do so.

If the Government, however, consider Mr. Dalley has superior qualifications for the direction of our movements in England, I shall raise no objection whatever to such an arrangement, but shall implicitly obey your instructions in acting under the advice of that gentleman as my duly appointed superior.

All I desire to know before leaving the Colony is, our precise position in matters of courtesy as well as action; and our relative responsibilities.

I am, &c.,

HENRY PARKES.

P.S.—Though I have not felt at liberty to mention the purport of the latter portion of this letter to Mr. Dalley, I can have no objection to your showing it to him if you think proper.

No. 9.

MR. SECRETARY ROBERTSON to MR. HENRY PARKES.

Lands, 20 May, 1861.

MY DEAR MR. PARKES,

I have your note of yesterday, and will have all the arrangements relative to money matters and the Commissions ready for you, at the time you mention.

I regret very much to find the view you take of the relative positions of yourself and Mr. Dalley; and especially I regret the tone and temper of your observations thereupon.

You

You assume that one of the Emigration Agents will have functions superior to those entrusted to the other; an idea which I confess appears to me not only now, but unnecessary.

You also say that if it (this supposed preference of Mr. Dalley) had been hinted at previously to your acceptance of the appointment, you would have declined it.

To me the necessity for these statements is quite unintelligible. I look in vain for anything that has been done, warranting the supposition that Mr. Dalley is placed in a position of superiority to yourself.

As to your reference to the absence of any hint on the subject, previous to your taking office, of course there could have been none, it never having been intended that any superiority should exist. It seems however evident, that had your name appeared first in the *Gazette*, you would have claimed something of the kind; why so, I do not understand, as I am sure no hint of mine ever justified it.

One of two names necessarily appeared first, and the usual custom, in cases where it is intended that gentlemen shall hold equal positions, is to give alphabetical precedence; and as D stands before P, Mr. Dalley's name would appear before your's. But there is another ground for his nominal precedence, and one that I am not disposed to overlook;—it is that he has held high office in the Colony, having been Solicitor General, and a Member of the Cabinet, with several Members of the present Government.

You speak of your determination not to sign joint reports after Mr. Dalley, unless specially instructed on that behalf. I have too much confidence in your good sense to suppose that you will not speedily see that a statement of that kind is unworthy of you. At any rate I feel quite sure that no difficulty will arise—that Mr. Dalley will have too much regard for the important interests intrusted to him, to allow them to be impeded by refusing to you any comfort that you may desire from signing first, on such occasions; I shall therefore give no order in the matter. In great haste—

I am, &c.,

JOHN ROBERTSON.

No. 10.

MR. SECRETARY ROBERTSON to HIS EXCELLENCY SIR JOHN YOUNG.

*Department of Lands,
Sydney, 17 May, 1861.*

MY DEAR SIR JOHN,

Referring to the personal interview with which you did me the honor this morning, on the subject of the desirability of the Emigration Agents, who are proceeding to the United Kingdom, being furnished with letters from Your Excellency to the Duke of Newcastle, the Right Honorable Mr. Gladstone, and Lord Brougham, I beg to furnish you with the following particulars:—

The Emigration Agents have been appointed, in the hope that their efforts in the Mother Country, by way of lectures, personal interviews, and general explanation, having relation to the capabilities, resources and requirements of the Colony, may result in the promotion of an active and intelligent Immigration; and it is considered desirable, in order to strengthen their position, that they should have the advantage of introductions to the distinguished gentlemen I have named, and to any other influential persons known to Your Excellency.

In order that this may be done, (if it seems proper to Your Excellency,) it will be necessary here to say, that Mr. William Bede Dalley is a highly talented gentleman, and a native of the Colony; he is a barrister-at-law, and was Solicitor General and a Member of our Cabinet in 1859. Mr. Dalley was of course also a Member of the Parliament here.

Mr. Parkes is also a very talented gentleman, and has also occupied a seat in Parliament for several years.

I may add, that of course this communication is made to Your Excellency with the concurrence of Mr. Cowper and the rest of my colleagues.

I am, &c.,

JOHN ROBERTSON.

No. 11.

HIS EXCELLENCY THE GOVERNOR to MR. SECRETARY ROBERTSON.

18 May, 1861.

MY DEAR SIR,

I send notes of introduction to Lord Brougham and Mr. Gladstone for Mr. Dalley; I have sent those for Mr. Parkes to himself, and I will write by this post to the Duke of Newcastle, recommending both the gentlemen to His Grace's good offices.

Believe me, &c.,

JOHN YOUNG.

EMIGRATION LECTURERS.

HIS EXCELLENCY THE GOVERNOR to HIS GRACE THE DUKE OF NEWCASTLE.

*Government House,
Sydney, 20 May, 1861.*

MY LORD DUKE,

At the request of Her Majesty's Ministers in this Colony, I have the honor to introduce to your Grace's notice and acquaintance Mr. Henry Parkes and Mr. W. Bede Dalley, two gentlemen recently appointed as Emigration Agents by the Government to proceed to England, in the hope that their efforts in the Mother Country, by lectures, personal interviews, and general explanations relative to the resources, requirements, and capabilities of this Colony, may result in the promotion of an active and intelligent immigration.

Mr. Parkes has occupied a seat in the Legislative Assembly for several years, and acquired much distinction by his ability and various exertions, especially by those he has made for the moral and social improvement of his fellow-citizens.

Mr. W. Bede Dalley is a highly talented gentleman—a native of New South Wales. He is a Barrister-at-Law, held for a considerable time a seat in the Legislative Assembly, and was in the year 1859 Solicitor General and a Member of the Cabinet.

I have, &c.,

JOHN YOUNG.

No. 13.

COLONIAL SECRETARY to EDWARD HAMILTON, ESQ

*Colonial Secretary's Office,
Sydney, 21 May, 1861.*

SIR,

I have the honor to enclose a copy of an Act passed in the recent Session of Parliament, in which provision is made for salaries and travelling expenses for Emigration Agents and Lecturers in Great Britain and Ireland, and to defray the expenses of printing for circulation in a cheap and popular form throughout the United Kingdom, reliable information relating to the Colony.

2. To carry out the object contemplated in this clause of the Act, William Bede Dalley and Henry Parkes, Esquires, have been appointed by His Excellency the Governor, with the advice of the Executive Council, to be Emigration Agents and Lecturers; and as these gentlemen proceed to England immediately, in the execution of their commission, I beg to introduce them to you, and to state that the Government will feel obliged to you, for any attention which you may shew them, or information which you may have it in your power to afford them.

I have, &c.,

CHARLES COWPER.

No. 14.

UNDER SECRETARY FOR LANDS to SECRETARY TO HER MAJESTY'S EMIGRATION COMMISSIONERS.

*New South Wales,
Department of Lands,
Sydney, 20 May, 1861.*

SIR,

I am instructed by the Secretary for Lands to inform you, that in pursuance of an Act passed by the Legislature of this Colony, during its recent Session, the Executive Government have appointed Messrs. W. B. Dalley and Henry Parkes to be Emigration Agents in Great Britain, for and on behalf of the Colony of New South Wales.

2. The object aimed at in the appointment of these gentlemen—whose duties will in no way clash with the functions of Her Majesty's Emigration Commissioners—is to circulate in a cheap and popular form, throughout the United Kingdom, copies of Land Acts, and other trustworthy information relating to this Colony, with a view to attract to our shores small capitalists, and such of the labouring classes as have the means of defraying the cost of their passage to the Colony.

3. I am further instructed to request that you will move the Commissioners to afford these gentlemen any information or facilities they may stand in need of; and which it may be in the power of the Commissioners to supply.

4. Until the Emigration Agents shall have apprised the Secretary for Lands of their address in London, he will take the liberty of directing all communications intended for them to your care.

I have, &c.,

MICHL. FITZPATRICK.

No. 21.

UNDER SECRETARY FOR LANDS to MESSRS. DALLEY AND PARKES.

*Department of Lands,
Sydney, 20 May, 1861.*

GENTLEMEN,

Referring to my letter of the 18th instant, I am directed to inform you that it has been arranged with the Honorable the Colonial Treasurer, that you shall, when in England, draw your individual cheques for your salary and allowances monthly, after the first three months (for which you have received an advance at the rate of £1,500 per annum, that is to say, £1,000 salary, and £500 for personal and travelling expenses); and that for all expenses to be incurred on the public account, you will be at liberty to draw against the balance of the vote to the extent, in the first instance, of £500 on your joint cheques; making your own arrangements as to the distribution between you of the sums required by each.

2. I am, however, to remind you, that for all expenditure incurred on the public account, you will, as is usual in all such cases, be expected to keep, and supply eventually to the Auditor General, vouchers accounting for and explanatory of such expenditure.

3. I am finally instructed to inform you that your pay and allowances will be considered as accruing for three months after the arrival in England of recall from the Government of this Colony.

I have, &c.,

MICHL. FITZPATRICK.

No. 22.

SURVEYOR GENERAL to UNDER SECRETARY FOR LANDS.

*Surveyor General's Office,
Sydney, 13 June, 1861.*

SIR,

I have the honor to inform you, that in pursuance of the instructions conveyed by your letter of the 15th of May, Messrs. Parkes and Dalley were, prior to their departure, supplied with Maps of the Colony, of the best description available at present, and such information in regard to the lands of the Colony as the shortness of the notice would admit of my collecting.

I have, &c.,

A. G. McLEAN.

No. 23.

UNDER SECRETARY FOR LANDS to MESSRS. DALLEY AND PARKES.

*Department of Lands,
Sydney, 21 June, 1861.*

GENTLEMEN,

I am directed to transmit for your information a copy of the New Regulations, 21 June, 1861, determined on by the Government, relating to Assisted Immigration to this Colony.

I have, &c.,

MICHL. FITZPATRICK.

[Enclosure in No. 23.]

IMMIGRATION.

Department of Lands,
Sydney, 21 June, 1861.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to establish the following Regulations for Assisted Immigration, under the Act, 24 Vict., No. 26 :—

1. Any person resident in the Colony, who may be desirous of introducing from the United Kingdom Immigrants of the laboring classes, will be permitted to do so on making the following deposits, and subject to the conditions hereinafter named :—

SEX.	AGE.			
	Under 12 years.	12 and under 40 years.	40 and under 50 years.	All above 50 years.
Male	£ 3	£ 5	£ 8	£ 12
Female	2	3	6	12

2. Such deposits must be made, if in Sydney, at the Government Immigration Office, between the hours of 10 a.m. and half-past 2 p.m.; and if in the Country Districts, with the Clerks of Petty Sessions, during the usual office hours. Any sums which depositors desire to add for the purpose of providing for their nominees the outfit required by the Immigration Commissioners in London, will be received at the same time, and transmitted to the Commissioners. The estimated costs of such outfit for an adult is about £3.

3. The Immigrants must be brought out in ships chartered by Her Majesty's Emigration Commissioners in London, and the depositor will be required to afford all such information respecting the Immigrants he proposes to introduce, as may be necessary to enable the Agent for Immigration or Clerk of Petty Sessions to comply with his application, and the requirements of these Regulations.

4. The persons eligible under these Regulations are mechanics of every description, domestic servants, and all persons of the laboring class. They must be of sound mental and bodily health, and of good moral character.

5. No advantage will be allowed in respect of any person brought out as a cabin or intermediate passenger.

6. Passages will not be granted under these Regulations to children under 15 years of age, unless forming part of a family, or unless their parents be resident in the Colony.

7. Depositors must undertake to provide for the Immigrants they introduce after the expiration of ten days from the time of their arrival, or pay to the Government for their subsistence at the rate of 1s. per day for each adult, or half that amount for each child under the age of 12 years, so long as they may be maintained at the public expense after the expiration of that period.

8. In the event of any person nominated for a passage declining to emigrate, or in case the amount deposited shall exceed that required for the number of Immigrants actually introduced, the amount deposited, or the excess, as the case may be, will be returned to the depositor, upon receipt in the Colony of the Emigration Commissioners' report recommending its refundment.

9. The Clerks of Petty Sessions, on receipt of any deposit under these Regulations, will immediately remit the amount to the Agent for Immigration at Sydney, with a statement of the number and description of Immigrants whom the depositor wishes to introduce. The Agent for Immigration will thereupon prepare and forward to the Clerk of Petty Sessions, for delivery to the depositor, a Passage Certificate. Similar Certificates will be issued to depositors in Sydney, on payment of their deposits to the Agent for Immigration.

10. The Passage Certificate must be forwarded by the depositor to his friends or agents in the United Kingdom, and it must in every case be produced within *twelve months* from the date of it to Her Majesty's Emigration Commissioners in London, who will provide passages to the Colony for the Immigrants proposed to be introduced.

11. Forms of application, as well as all other information for the guidance of depositors, can be obtained from the several Clerks of Petty Sessions in the Country Districts, or in Sydney at the Office of the Agent for Immigration.

12. These Regulations will take effect on and after the 1st July next.

JOHN ROBERTSON.

No. 24.

UNDER SECRETARY FOR LANDS to MESSRS. DALLEY AND PARKES.

New South Wales.

Department of Lands,

Sydney, 21 June, 1861.

GENTLEMEN,

In reference to my letter of this date, forwarding a copy of the Regulations under which the Vote for Immigration is to be expended, I am directed, by the Secretary for Lands, to inform you that, as the land policy of the Colony must largely influence the success of your mission, and as also there now remains no reasonable doubt whatever of the passing of the Crown Lands Bills of the late Session of Parliament, in the form in which they last passed the Assembly, it has been determined to make at once such arrangements as will be necessary to admit of those measures being brought into operation on the 1st day of January next, as provided for in them.

2. With regard, therefore, to the Alienation Bill, the surveys for reservations, and other necessary steps, to allow time for which that date was fixed, will be immediately and vigorously proceeded with, while the restriction of the right of pre-emptive purchase to one square mile out of each twenty-five square miles of leasehold, will, from the present time, be acted upon. And, to provide for the Occupation Bill, the rent payable under the present law will only be received for the half-year ending 31st December, 1861, leaving a clear field for the operation of the new policy from that date.

3.

3. With regard to the carrying out of the provision contained in the Alienation Bill, for the restriction of the right of pre-emptive purchase, Mr. Secretary Robertson thinks that it may not be out of place to add, that the pre-emptive right of purchase within the 2nd class Settled Districts, formerly Intermediate, ceased to exist—except in very few cases, in which the eight years' leases are unexpired—at the termination of the original leases, on the 31st December, 1859. Any new leases now being, or having been created since the 22nd February, 1858, will be held under the provisions of the new Act.

I have, &c.,

MICL. FITZPATRICK.

No. 25.

UNDER SECRETARY FOR LANDS to MESSRS. DALLEY AND PARKES.

Department of Lands,

Sydney, 21 September, 1861.

GENTLEMEN,

I am instructed by the Secretary for Lands to transmit to you copies of the Bills for regulating the Occupation and Alienation of Crown Lands in this Colony, which were read yesterday a third time in the Legislative Assembly.

2. These Bills were this Session first introduced into the Legislative Council, but as some question was raised as to the propriety of that course in consequence of their partaking of the character of Money Bills they were withdrawn, and brought into the Assembly; they were read a second time on Thursday, the 19th instant, without division, and almost without discussion; the Occupation Bill was passed without any alteration whatever, and the Alienation Bill, with the trivial alteration noted with the pen on the enclosed copy, in Clause No. 17, in one of the two enclosures; on the same night the whole of the Clauses were passed through Committee, the reports adopted, and the third reading fixed for the next day.

They were yesterday read a third time, and passed in the state in which they are now transmitted to you.

I have, &c.,

MICHL. FITZPATRICK.

P.S.—One of the Bills enclosed (Alienation) is the copy as introduced, the other as passed.

No. 26.

UNDER SECRETARY FOR LANDS to MESSRS. DALLEY AND PARKES.

New South Wales.

Department of Lands,

Sydney, 21 October, 1861.

GENTLEMEN,

The Honorable the Secretary for Lands has peculiar satisfaction in at length informing you that the Bills for the Alienation and Occupation of Crown Lands in this Colony, which have been so long before the local Legislature, have at length become law.

2. I am instructed to transmit to you by this opportunity, for your use and information, twelve copies of each of these Acts, which were assented to on the 18th instant, and to mention that there is no material alteration in their provisions from those of the Bills transmitted to you by the last mail.

3. Mr. Secretary Robertson desires me to suggest to you the expediency of publishing these Acts in extenso throughout the United Kingdom. His own impressions lead him to prefer their publication through the more largely circulated newspapers in different parts of the Kingdom, but he is of course prepared to leave the determination of this question to your discretion.

4. You will not fail to perceive that the provisions of these Acts take effect at once, save only in the case of the 13th clause of the Alienation Act, generally known as the "Free Selection Clause," which will not come into effect until the 1st of January next.

I have, &c.,

MICHL. FITZPATRICK.

No. 27.

UNDER SECRETARY FOR LANDS to MESSRS. DALLEY AND PARKES.

New South Wales.

Department of Lands,

Sydney, 21 October, 1861.

GENTLEMEN,

I am directed to transmit to you, for your information, six copies of the general abstract of the Census of the Colony of New South Wales taken in this year.

2. These, as you will perceive, will be followed hereafter by more elaborate abstracts, but the present will no doubt serve any purpose of reference.

I have, &c.,

MICHL. FITZPATRICK.

(FURTHER CORRESPONDENCE.)

Ordered by the Legislative Assembly to be Printed, 10 January, 1862.

No. 5.

EMIGRATION AGENTS to SECRETARY FOR LANDS.

London, 18 November, 1861.

SIR,

We have the honor further to report the progress made in the business of this Office.

2. For the last fortnight both Mr. Dalley and Mr. Parkes have been in London, endeavouring to concert plans to render our exertions more effective in obtaining the objects of our mission. We have met with some difficulties which we did not contemplate in the provision of steerage passages for persons disposed to emigrate at their own expense. Shipping Agents are unwilling to come under the operation of the Passengers Act of 1855, unless a given number of steerage passengers can be guaranteed; and the minimum number that any agent has been induced to name is forty statute adults. Within the last few days we have entered into this definite understanding with Messrs. Houlder Brothers, if we can guarantee the equivalent of forty statute adults, they will open the 'tween decks of their ships to steerage passengers, and not otherwise. Some other difficulties have required our anxious consideration.

3. We continue to receive numerous applications for free and assisted passages, and letters from all quarters of the United Kingdom requiring all kinds of information. Within the last month we have received more than two hundred letters from the neighbourhood of Manchester alone, and many of them from persons evidently of superior character; very many of the applicants offer to defray part of the expense of their passages.

4. We have found much difficulty in making persons in humble life understand the Assisted Immigration System now in force. For this purpose we have adopted a Circular, a copy of which is appended, marked A.

5. Having determined to make an organized effort to meet the proposal of Messrs. Houlder Brothers, we have adopted a Circular to be addressed to persons who express an intention of emigrating at their own expense. We append a copy, marked B.

6. Mr. Parkes reports that he has found a strong desire to emigrate existing in the colliery districts of Staffordshire. We append a copy of a letter on the same subject received this morning from Nottinghamshire, marked C.

7. To enable you to judge of the character of the applications made to us, we append six original letters, all received by one morning's post, marked D 1 to 6.

We have, &c.,

HENRY PARKES.

WILLIAM B. DALLEY.

APPENDIX.

A.

No. C.

*New South Wales Emigration Agency,
10, West Strand, London, 1861.*

Sir,

In reply to your letter, the Emigration Agents beg to offer the following remarks, in further explanation of the Assisted Immigration System of New South Wales.

(2.) That system is specially intended to be worked by the people of the Colony, from whose public revenues the grants in aid of immigration are made. The moiety of the passage money payable by private persons must therefore be paid into the Colonial Treasury, as already explained.

(3.) By this system it is considered that three principal advantages will be secured:—

- 1st. The public immigration grants, being thus supplemented from private sources, will be rendered more extensively beneficial.
- 2nd. The sums paid on behalf of immigrants are regarded as some guarantee of the respectable character of the persons so introduced.
- 3rd. The assisted immigrants will necessarily have some person, either an employer or a friend, who will be interested in their welfare, to receive and advise them on landing in the Colony.

(4.) You will thus see that the system does not contemplate such a case as yours. If you have no friend in Sydney, the only way by which you could avail yourself of the assistance of the Colonial Government, would be to find some responsible person who has an agent in Sydney (and there are many merchants and manufacturers who have such connexions), to whom you might intrust the amount of the required deposit on your own account, and who would undertake to pay it into the Colonial Treasury for you. This cannot be done, however, through this Office, which is established to afford information respecting New South Wales to such persons as are disposed voluntarily to emigrate, and to whom the desire of permanently improving their condition in life is superior to the consideration of a free passage. The Agents of the New South Wales Government, in supplying information, have deemed it part of their duty to explain the Assisted Immigration System as it exists; but, as you have already been distinctly informed, they are not empowered to provide free passages.

(5.) The whole of the information furnished by the Emigration Agents, at public meetings and otherwise, has been throughout consistent with the explanation here given. It may be further pointed out, that the inhabitants of New South Wales, consisting of only 350,553 souls, could not possibly find the money necessary for the removal of the tens of thousands in England who would gladly emigrate, if they could do so without cost to themselves. It is proper to add, that the assisted passages under the present system are so eagerly taken up that the votes of the Legislature are soon exhausted.

(6.) The Assisted Immigration deposits, namely, £5 for a male, and £3 for a female, between 12 and 40; £8 for a male, and £6 for a female, between 40 and 50; £12 for males and females over 50; and £3 for a male, and £2 for a female, under 12, secure a steerage passage, including provisions, without other cost; and the immigrant is perfectly free when he arrives in the Colony. The emigrant has, of course, to find his own outfit.

We are, &c.,

HENRY PARKES.
WILLIAM BEDE DALLEY.

B.

No. D.

*New South Wales Emigration Agency,
10, West Strand, London, 1861.*

Sir,

In reply to your letter of _____, the Emigration Agents beg to say that if, when you have finally decided upon going to New South Wales, you will communicate with this Office, they will undertake to provide for you the required steerage accommodation, in a first-class ship, without your being put to any further expense or trouble, beyond the amount of passage money and the cost of your removal to the port of embarkation. As an earnest of good faith in the transaction, however, they will require you to place in their hands, before they enter your name on their books, a deposit of £2 on each passage, which they, in due course, will pay over to the agents of the ship, in reduction of the total amount of your engagement. The Emigration Agents will also undertake to inspect the accommodation of the vessels, and the quality of the provisions, and to do all that can reasonably be done to insure your comfort.

(2.) The steerage passage will be £15 15s. for adults, and half-price for children under twelve years. The quantity of baggage allowed to each adult will be 10 cubic feet. Passengers may, if they think proper, make special arrangements for the accommodation of families; but in such case they must themselves communicate with the agents of the ship.

(3.) All steerage passengers must provide themselves with the following utensils, viz.:—2 knives and forks, 2 table and 2 tea spoons, a metal plate, a hook-pot, 2 drinking mugs, 2 cups and saucers and plates, a water-can or bottle, and a few pounds of marine soap.

(4.) All packages must have the passenger's name distinctly marked upon them, with the words "Wanted on the voyage," or "Not wanted on the voyage." They must be alongside the ship at least three days prior to the date of sailing.

(5.) First-class ships sail from London for Sydney about the 10th of each month; but, to secure a passage, it will be necessary to communicate with this Office at least a fortnight before the time of sailing. The average length of the voyage may be set down at ninety days.

(6.) The following is the scale of victualling:—

FOR THIRD-CLASS PASSENGERS.

3½ lb. biscuit.	½ lb. oatmeal.
1½ lb. beef.	2 oz. tea.
1 lb. pork.	1 lb. sugar.
1 lb. preserved meats.	6 oz. butter.
3 lb. flour.	1 gill vinegar or pickles.
6 oz. suet.	½ oz. mustard.
½ lb. raisins or currants.	½ oz. pepper.
1 lb. peas.	2 oz. salt.
1 lb. rice.	6 oz. lime juice.
½ lb. preserved potatoes.	21 quarts fresh water.

When fresh beef is issued, 1 lb to each adult per day will be allowed; there will be no flour, rice raisins, peas, suet, or vinegar, during the issue of fresh meat.

MEDICAL

MEDICAL COMFORTS.

A supply of Medical Comforts will be put on board in the following proportions to 100 Statute Adults.

56 lb. oatmeal.	12 bottles sherry wine.
20 lb. West India arrowroot.	66 gallons stout.
40 lb. Scotch barley.	5 gallons brandy.
100 lb. sago.	15 gallons vinegar.
20 lb. tapioca.	12 dozen pints of preserved milk.
300 lb. sugar.	4 gallons Sir William Burnett's chloride of zinc.
30 lb. preserved boiled beef.	$\frac{1}{2}$ cwt. chloride of lime.
20 lb. preserved boiled mutton.	$\frac{1}{2}$ cwt. Collins' patent disinfecting powders.
400 pints lemon juice.	2 cwt. marine soap.
24 bottles port wine.	

We have, &c.,

HENRY PARKES.
WILLIAM BEDE DALLEY.

C.

16 November, 1861.

Sir,

Seeing the news from New South Wales, dated the 26th of September, that owing to the miners at the Newcastle Collieries having ceased working, the proceedings on their part has the effect of considerably raising the price of coals, both at Sydney and Melbourne, to the great detriment of the colonist, I beg to say that I—and I might guarantee 100 more miners, colliers—would be glad to proceed to New South Wales, to there work the coal, providing we had the means by loan or otherwise so as to provide us a passage to the Colony.

Providing you could advise or otherwise inform us as to the best means of obtaining a passage to Sydney, your will confer a favour on your obedient servant,

WILLIAM CARLIN,

Hoplis' Yard, Newthorpe, Notts.
Near Eastwood.

To H. Parkes, Esq.

WILLIAM B. DALLEY, ESQ., to SECRETARY FOR LANDS.

(No. 5.)

London, 12 November, 1861.

SIR,

I have the honor to forward, for the information of the Government, a Report of my proceedings in England since the date of the first Despatch signed by my colleague and myself.

I have addressed meetings in the Counties of Berkshire, Kent, Surrey, Suffolk, Norfolk, and Hampshire. In each of the places of meeting I have obtained the use of the Guildhall; and in the majority of cases the Chair has been taken by the Mayor of the City.

In estimating the results of the movements already made, it is right that I should inform you of two circumstances which materially affect the possibilities of immediate success. There can be no doubt that in the agricultural Counties of England, labour is at present by no means in excess of the requirements of employers, and as a natural consequence, the sympathies of landed proprietors and people of great influence are not with those whose only object is a diminution of the labour of the country. I have been assured by persons highly competent to form an opinion, that during the late abundant harvest some difficulty existed in procuring sufficient labour; and from the general indifference to the objects of our mission manifested by those identified with the landed interests of the country, there can be no doubt that some apprehension exists of a deficient supply of labour in the agricultural parts of England.

Under these circumstances I have endeavoured as much as possible, both by means of public addresses and in the course of private interviews, to direct the special attention of the tenant farmers of limited means to the facilities afforded by the proposed land system of New South Wales.

The great advantages of the land system have been generally recognized, but at the same time it is of course necessary to explain that, however certain the inauguration of this system may be, it is as yet unsanctioned by an Act of Parliament; and as in furnishing a fair history of the administration of public lands in New South Wales, it is necessary to observe that legislation upon the subject has not been characterized by undue precipitancy, some degree of hesitation is evinced in finally deciding before the policy of the Government becomes the law of the land.

I have to inform you, that in the intervals between the dates of the various meetings to which I have adverted, I have been occupied in the conduct of the business of this Office.

I have, &c.,

WILLIAM B. DALLEY.

HENRY

HENRY PARKES, ESQ., to SECRETARY FOR LANDS.

(B. No. 2.)

Birmingham, 25 November, 1861.

SIR,

Since the date of my separate Report, B. No. 1, October 24, 1861, I have held only two public meetings, one at Kidderminster and one at Leeds, both of which were numerously attended. I shall address another public meeting to-morrow evening, at Bilston.

2. A considerable portion of the present month I have spent in London, in consultation with Mr. Dalley, and in arranging some difficulties that had arisen in the general business of our mission.

3. In reporting my separate movements, I find more and more every day that the most effective action lies in private intercourse with persons who are interested in the Colony, either with the view of emigrating themselves, or in promoting the emigration of others. While in London I had several conversations respecting New South Wales, with men of established influence in political and literary life, and I was very much gratified by the warm interest in Australian progress, and the broad views on the subject of colonization, expressed by these eminent persons. In the country too I am beginning to find more persons of influence who offer me their cordial co-operation and assistance; but it is chiefly by personal communication with the emigrating class, frankly explaining to them the condition of the Colony, and their own prospects of success as colonists, and advising them, according to the differing circumstances of their cases here, that the work indicated above is to be done. Of late I have frequently had interviews with whole families of this class. Men come to me with their wives, and a son or daughter, or perhaps a friend, lay their case before me, apparently with the utmost confidence, and explain their views in wishing to emigrate, which sometimes discover a long course of thought and inquiry on the subject. I am at present in communication with several families, who reckon that, after removing themselves to Australia, they would have little capitals, ranging from £100 to £600; and I have reason to believe that their lot will be cast among the inhabitants of New South Wales next year. In this way—travelling, corresponding, and giving personal interviews—I have been much occupied of late, and shall be for some time to come, in the Midland and Northern Counties.

4. These Counties are so important in population and the variety of their industrial interests, and have always been so distinguished for their progressive spirit and enterprise, and they are at the same time so intimately connected in trade and commerce with New South Wales, that it is to be regretted that more cannot be done to diffuse among their skilful artizans and intelligent agriculturists, a correct knowledge of the Colony. If we take the seven Counties of York, Lancaster, Chester, Stafford, Derby, Warwick, and Worcester, they give us considerably more than one-third of the total population of England and Wales; and those valuable qualities of the English character—the disposition and ability to improve every art of industry—are nowhere to be met with more frequently than here. While their manufactures are unrivalled their farms are perfect models of cultivation, and everywhere you are struck by the vigorous character of the people. These facts of their condition are made apparent by the results of the late Census. During the last ten years the progress made by some parts of England is scarcely perceptible, and five Counties have actually and very sensibly declined, while the advance of the seven Counties named has been astonishingly rapid. The accompanying Table will shew their extent and increase of population:—

	Population in 1851.		Population in 1861.		Increase.
Yorkshire	1,797,995	2,033,061	235,066
Lancashire	2,031,236	2,423,744	397,508
Cheshire	455,725	505,153	49,428
Staffordshire	608,716	746,584	137,868
Derbyshire	296,034	339,377	43,293
Warwickshire	475,013	561,723	86,710
Worcestershire....	276,926	307,601	30,675
	<u>5,941,695</u>		<u>6,922,238</u>		<u>980,543</u>

Strange to say, this populous part of England, which receives all our wool, and is destined, I hope, to receive our cotton, and which supplies us with nearly all our manufactured woollens, cottons, and hardware, has been generally overlooked by the advocates of emigration. I recollect no effort of the kind to direct the attention of this portion of the English people to New South Wales, except a lecture in Leeds, some years ago, by Mr. Donaldson.

5. The Census Returns supply some curious facts relating to general emigration. During the last ten years it appears that the enormous number of 2,249,355 persons have emigrated from the United Kingdom, the majority of whom must have gone to increase the strength of Foreign nations. The relative numbers from the three Kingdoms have been 649,210 English, 183,627 Scotch, and 1,230,986 Irish, with 194,532 persons of Foreign origin.

6. It is surprising that English statesmen should be blind to the national importance of turning this torrent of emigration to the British Colonies, yet persons of great influence in the political world are frequently met with who manifest an adverse feeling towards the Australian Colonies, not definitely expressed, it is true, nor entertained from any very clear convictions on the subject, but not the less, in its practical operation, adverse to our interests. They are afraid of "stimulating" emigration, they tell you, for it is the best class of people who emigrate. They want the Colonies to produce wool, and cotton if possible, and they want them to consume large and increasing quantities of manufactures; but it would seem

that

that they want them to produce and consume without population. Among too many of the propertied classes the Colonies are regarded in the light of a convenience, though even that light is very confused. A few days ago, a wealthy manufacturer and an influential politician was speaking to me of New South Wales. "It is a fine country," he said; "it sends us amazing quantities of wool and gold, and is a splendid customer for our manufactures. I do a good trade with Sydney myself. Don't you think the colonists could be persuaded to take our convicts again?"

7. Nor is this an exaggerated instance of remarks continually made, which evince the same feeling—a want of hearty recognition of the Colonies, morally and socially, as an "integral part of the Empire;" but among the more provident and thoughtful of the working classes, including those who do not work for weekly wages, there is a keen desire for information respecting the Colonies; and the number of persons who have entertained thoughts of emigration, more or less influencing their course of life for years past, is quite surprising. It appears to me that these are the people most likely to make good colonists; and as a rule, I spare no pains in affording them information, however numerous and tedious their inquiries may be.

8. I beg to enclose, for your information, a statement of my separate expenditure on public account, to the 24th of October inclusive.

I have, &c.,
HENRY PARKES.

[Price, 2d.]

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

IMMIGRATION.

(PETITION, MECHANICS, &c., SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 20 January, 1862.

To the Honorable the Legislative Assembly, in Parliament assembled.

May it please your Honorable House, the Petition of the undersigned Mechanics and Labourers, Citizens of Sydney,—

RESPECTFULLY SHEWETH:—

1st. That, owing to the great want of employment at present existing in this City and throughout the Colony, your Petitioners are in circumstances of the deepest distress, every avenue both to the Government as well as the Civil Service being completely filled up.

2nd. Your Petitioners would most earnestly beg of your Honorable House not to vote any sum either for assisted or any other kind of Immigration, by Estimate or Resolution, during the present year, as the introduction of thousands of persons at the present time, when your Petitioners are earning but a precarious existence for themselves and families, would be fraught with the direst consequences to the peace and prosperity of the Colony.

3rd. Your Petitioners would submit they have repeatedly agitated this question, by Petition and otherwise; your Honorable House has satisfied itself upon the question, both by police investigation, and by the inquiry into the condition of the working classes, by which you have suspended Immigration, and given a season of comparative tranquility to the Colony; and we pray you will again suspend it during the present year, for the same reasons and for the promotion of the same objects.

4th. Your Petitioners cannot help looking upon the employment of the public money (part of which they have contributed) for purposes of Immigration, as an interference with the labour market which the laws of free trade in no way justify, and in direct contravention to the law of supply and demand.

5th. Your Petitioners would suggest that this country offers as many inducements as any other country in the World, possessing every natural attraction, with millions of acres of the finest land, which, together with the Gold Mines, have so much exalted us in the eyes of the World, and which render the employment of public money as an additional inducement for purposes of Immigration, questionable and unnecessary.

Lastly, your Petitioners therefore pray your Honorable House will not vote any sum during the present year, either by Estimate or Resolution, for assisted or any other kind of Immigration, as it is a direct interference with the labour market, and an unjust application of the public funds. And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of a Public Meeting, held in Hyde Park, on 2nd January, 1861.

WILLIAM JENNETT,
Chairman.
J. H. WEST,
Secretary.

1861.

Legislative Assembly.

NEW SOUTH WALES.

CHINESE IMMIGRATION.

(SOFALA, WESTERN GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 20 September, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Miners, and other inhabitants of Sofala,
Western Gold Fields, New South Wales,—

HUMBLY SHEWETH :—

That your Petitioners are most seriously injured in their mining operations and social interests, and the future welfare of their families seriously jeopardized by the great number of Chinese located amongst them, and by others daily arriving in such numbers that, unless immediately checked, must ultimately place our Gold Fields entirely in their hands, to the utter exclusion and great injury of the European diggers; that such is now actually the case in Sofala, where already the Chinese population far outnumber the European miners.

That the Chinese, by their idolatrous customs, moral depravity, and detestable habits, are viewed with a constantly increasing disgust and dislike by all classes, which lead to constant antagonism between the two races, tend to degrade and demoralize the rising generation, and disturb the growing interests and lower the moral tone of this Colony.

Your Petitioners, therefore, earnestly desire and trust that your Honorable House will be pleased to direct that such measures be immediately framed, in the present Session of Parliament, as will effectually stop the further immigration of Chinese to this Colony.

And that your Honorable House will cause to be introduced in the Gold Fields Management Act, to be brought before Parliament, such clauses as will exclude those Chinese already in the Colony from the privilege of mining on the Gold Fields of New South Wales.

And your Petitioners will ever pray, &c., &c.

[Here follow 805 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

CHINESE IMMIGRATION.

(HANGING ROCK AND PEEL RIVER GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 20 September, 1861.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Memorial of the Miners and Residents on the Peel River and Hanging Rock Gold Fields,—

HUMBLY SHEWETH:—

That Memorialists regard with apprehension and alarm the continued and increasing influx of Chinese to this Colony—when they no sooner land than they settle on the various Gold Fields, on many of which they already far outnumber the European miners.

That, for many reasons (too numerous to detail here), Memorialists regard the Chinese as a very undesirable class of immigrants, and can assure your Honorable House that a feeling of deep hostility against them exists on those Gold Fields—a feeling which increases with the intelligence of every cargo of Chinamen landed in Sydney.

That whilst Memorialists would desire to respect the laws, and have equal protection afforded to both Chinese and European miners, they greatly fear, from the hostile feelings prevailing, that collisions will take place, and blood be shed, and lives be lost, on more Gold Fields than one; the presence of a large Military and Police Force on every Gold Field alone can prevent such a deplorable result.

Memorialists, therefore, humbly pray your Honorable House to take the foregoing premises into your serious consideration, and adopt measures to prevent the further immigration of Chinese into this Colony; or by ordering the Commissioners on the Gold Fields not to issue "Miner's Rights" to Chinamen after a certain date, sufficiently distant to allow them time to leave the Colony; or by annually increasing the cost of their Miner's Rights, so that the Europeans on the Gold Fields may not be utterly swamped by them; or in any other way your Honorable House may deem expedient, to preserve the European element predominant in New South Wales as a British Colony.

And Memorialists, as in duty bound, will ever pray.

Legislative Assembly.

NEW SOUTH WALES.

CHINESE IMMIGRATION.
(SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 20 September, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Sydney,—

HUMBLY SHEWETH:—

That your Petitioners are firmly convinced that the immigration of the Chinese to this Colony is most impolitic; that, as Colonists, they are unnecessary and injurious; and that, inasmuch as their social habits are repulsive to those of Europeans, they are a continual source of irritation, which may tend to alienate the affections of the people, jeopardize the public peace, and injure the character of this Colony as a field of emigration for British enterprise and industry.

That your Petitioners are of opinion that the most effectual way of terminating the unhappy disturbances which are continually taking place between the Europeans and the Chinese, would be by preventing the Chinese from digging for Gold, and imposing a Tax upon their landing in this Colony.

And your Petitioners devoutly pray that your Honorable House will be pleased to take into your consideration the views of your Petitioners, and will enact such measures to remedy the evil complained of as to your Honorable House shall seem meet.

And your Petitioners, &c., &c., &c.

Legislative Assembly.

NEW SOUTH WALES.

CHINESE IMMIGRATION.
(PADDINGTON.)

Ordered by the Legislative Assembly to be Printed, 27 September, 1861.

To the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The humble Petition of the Inhabitants of Paddington Electorate,—

RESPECTFULLY SHEWETH :—

That the immigration of the Chinese to this Colony is, in its present state, impolitic, injudicious, and dangerous to the sanitary condition of the Colonists from the low character of these immigrants, and the extremely crowded state of the vessels in which they arrive, and from their not being regulated by any proper code of immigration laws in China calculated to insure the sanitary conditions usual in such cases. And further, that we, as Austral-Anglo Colonists of New South Wales, consider it a gross invasion of our rights to permit the natives of China, or any other Pagan race, to occupy or work upon the Gold Fields of this Colony.

Your Petitioners, therefore, respectfully pray that your Honorable House will please to pass such measures as will remedy the evils herein mentioned; and your Petitioners, as in duty bound, will ever pray, &c., &c., &c.

NEW SOUTH WALES.

CHINESE IMMIGRATION.

(THE GLEBE AND BALMAIN.)

Ordered by the Legislative Assembly to be Printed, 1 October, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the Electorate of the Glebe and Balmain,—

RESPECTFULLY SHEWETH,—

1st. That your Petitioners are firmly convinced that the Immigration of the Chinese to this Colony is impolitic; that, as Colonists, they are unnecessary and injurious; and that, inasmuch as their social habits are so repulsive to ours, that they are a continual source of irritation, which tends to alienate the affections of the people from our institutions, to jeopardize the public peace, and injure the character of this Colony as a field of emigration for British enterprise and industry.

2. Your Petitioners are also of opinion that the most effectual way of terminating the unhappy disturbances which are continually taking place between the Europeans and Chinese, is by preventing the Chinese from digging for Gold, and by imposing a Tax upon their landing in this Colony.

Your Petitioners therefore humbly pray that your Honorable House will take this Petition into consideration.

And your Petitioners will ever pray, &c.

1861.

Legislative Assembly.

NEW SOUTH WALES.

CHINESE IMMIGRATION.

(MAJOR'S CREEK.)

Ordered by the Legislative Assembly to be Printed, 8 October, 1861.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned, Inhabitants of Major's Creek and its vicinity,
in the District of Braidwood,—

HUMBLY SHEWETH :—

That your Petitioners are loyal British subjects, and that, while strongly deprecating all unconstitutional demonstrations, sympathize with that antipathy which they believe to be general throughout the Colony to the Chinese race.

Your Petitioners believe the existence of the Chinese in large numbers in this Colony to be a great evil, and are fearful that, should the evil remain uncorrected, the future interests of this portion of Her Majesty's dominions will suffer greatly.

Your Petitioners, having daily opportunities of acquainting themselves with the habits and peculiarities of the Chinese, are convinced of their moral and physical inferiority to the European races, and look upon them as a most undesirable and improper class to be encouraged as colonists; believing that the perpetuation of the blood in a British Colony would be productive of the most baneful results.

Your Petitioners, as loyal British citizens, cannot appreciate the extension of any of their peculiar rights and privileges to the Chinese; who, being aliens in blood, morals, country, and religion, are presumed to have no legitimate claims thereto; and they, having been permitted to participate in such rights and privileges, now remove a large portion of the mineral wealth of this Colony, without providing their equitable share to its support, the chief burthen of which is borne by the Europeans in their larger proportionate consumption of dutiable commodities.

Your Petitioners also beg to suggest to your Honorable House, that as it is the policy of the Government of this Colony to encourage population by the introduction of immigrants from Great Britain and Ireland, the wide-spread existence of an enervated, immoral, and Pagan race, will tend to render those efforts abortive. That while our Lecturers are supported in the Mother Country to induce immigration thence, their labours are in a measure counteracted by the unlimited admission of the Chinese here.

Your Petitioners, therefore, humbly pray your Honorable House that, in your wisdom, measures may be immediately adopted,—

1st. To prohibit, rather than restrict, the further admission of the Chinese into this Colony.

2nd. That the Chinese may be withdrawn from the Gold Fields of this Colony.

And your Petitioners, as in duty bound, will every pray, and subscribe themselves as your most obedient humble servants.

Major's Creek, Braidwood,
New South Wales,
9 September, 1861.

[Here follow 365 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

CHINESE IMMIGRATION, LAND, AND UPPER
HOUSE BILLS.

(CANTERBURY.)

Ordered by the Legislative Assembly to be Printed, 27 September, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the Electorate of
Canterbury,—

RESPECTFULLY SHEWETH :—

That your Petitioners sincerely believing in the necessity for the early settlement of the long agitated and universally desired measures, viz. :—The Chinese Immigration Bill, the Land Bill, and the Elective Upper House Bill.

That your Petitioners believe the peace, prosperity, and confidence in the community depend upon the speedy settlement of these three great questions.

That your Petitioners believe the unfortunate collisions between the Europeans and Chinese at Burrangong and Native Dog Creek, as well as the antagonistic feelings which exist between these two races at all the Gold Fields, evidently proves that Europeans and Mongolians cannot live peaceably together, and that the late disturbances are only the foreshadowings of more serious evils; and your Petitioners believe that if disturbances are quelled in one locality they will most assuredly break out in some other; and your Petitioners believe that fully nine-tenths of our fellow colonists are of opinion that a Bill should be passed to restrict Chinese Immigration to this Colony.

That your Petitioners are of opinion that the opening up of the land, as contemplated by the Land Bill passed by your Honorable House, would tend to develop the vast natural resources of the Colony; would open up a large field for the employment of labour; would afford means for the investment of capital now idle, and would give a stimulus to immigration of the most desirable class, and considerably increase the public revenue.

That your Petitioners are of opinion that the Members of the Upper House, being nominated, have not the confidence of the people, and it is therefore desirable that that branch of the Legislature should be constituted upon an Elective Basis.

Your Petitioners, therefore, most earnestly pray, that your Honorable House will be pleased not to pass any Appropriation Act till a Chinese Immigration Restriction Bill, the Land Bill, and an Elective Upper House Bill, are passed into law.

And your Petitioners, as in duty bound, will ever pray, &c., &c., &c.

ASSISTED IMMIGRATION.

No. 1.

ASSISTED IMMIGRATION REGULATIONS.

(As notified in Gazette of 21st June, 1861.)

Department of Lands,
Sydney, 21 June, 1861.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to establish the following Regulations for Assisted Immigration, under the Act 24 Vict., No. 26 :—

1. Any person resident in the Colony who may be desirous of introducing from the United Kingdom Immigrants of the labouring classes, will be permitted to do so on making the following deposits, and subject to the conditions hereinafter named :—

SEX.	AGE.			
	Under 12 years.	12 and under 40 years.	40 and under 50 years.	All above 50 years.
Male	£ 3	£ 5	£ 8	£ 12
Female	2	3	6	12

2. Such deposits must be made, if in Sydney, at the Government Immigration Office, between the hours of 10 a.m. and half-past 2 p.m.; and if in the Country Districts, with the Clerks of Petty Sessions, during the usual office hours. Any sums which depositors desire to add for the purpose of providing for their nominees the outfit required by the Immigration Commissioners in London, will be received at the same time, and transmitted to the Commissioners. The estimated cost of such outfit for an adult is about £3.

3. The Immigrants must be brought out in ships chartered by Her Majesty's Emigration Commissioners in London, and the Depositor will be required to afford all such information respecting the Immigrants he proposes to introduce, as may be necessary to enable the Agent for Immigration or Clerk of Petty Sessions to comply with his application and the requirements of these Regulations.

4. The persons eligible under these Regulations are mechanics of every description, domestic servants, and all persons of the labouring class. They must be of sound mental and bodily health, and of good moral character.

5. No advantage will be allowed in respect of any person brought out as a cabin or intermediate passenger.

6. Passages will not be granted under these Regulations to children under 15 years of age, unless forming part of a family, or unless their parents be resident in the Colony.

7. Depositors must undertake to provide for the Immigrants they introduce after the expiration of ten days from the time of their arrival, or pay to the Government for their subsistence at the rate of 1s. per day for each adult, or half the amount for each child under the age of 12 years, so long as they may be maintained at the public expense after the expiration of that period.

8. In the event of any person nominated for a passage declining to emigrate, or in case the amount deposited shall exceed that required for the number of Immigrants actually introduced, the amount deposited, or the excess, as the case may be, will be returned to the depositor, upon receipt in the Colony of the Emigration Commissioners' report recommending its refundment.

9. The Clerks of Petty Sessions, on receipt of any deposit under these Regulations, will immediately remit the amount to the Agent for Immigration at Sydney, with a statement of the number and description of Immigrants whom the depositor wishes to introduce. The Agent for Immigration will thereupon prepare and forward to the Clerk of Petty Sessions, for delivery to the depositor, a Passage Certificate. Similar Certificates will be issued to depositors in Sydney, on payment of their deposits to the Agent for Immigration.

10. The Passage Certificate must be forwarded by the depositor to his friends or agents in the United Kingdom, and it must in every case be produced within *twelve months* from the date of it to Her Majesty's Emigration Commissioners in London, who will provide passages to the Colony for the Immigrants proposed to be introduced.

11. Forms of application, as well as all other information for the guidance of depositors, can be obtained from the several Clerks of Petty Sessions in the Country Districts, or in Sydney at the Office of the Agent for Immigration.

12. These Regulations will take effect on and after the 1st July next.

JOHN ROBERTSON.

No. 2.

THE UNDER SECRETARY to BENCHES OF MAGISTRATES.

(Circular.)

Colonial Secretary's Office,
Sydney, 27 June, 1861.

GENTLEMEN,

With reference to the notice, dated 21st instant, and inserted in the *Government Gazette*, headed "Immigration," I am directed by the Colonial Secretary to request that you will apprise the Clerk of Petty Sessions in your district, that instructions for his guidance in the execution of the duties which will devolve upon him in carrying the Regulations therein contained into effect, will be addressed to him from the Department of Lands, to which the business relating to Immigration belongs; and that you will, at the same time, enjoin on him the strictest attention to such instructions.

I have, &c.,
W. ELYARD.

No. 3.

UNDER SECRETARY FOR LANDS to CLERKS OF PETTY SESSIONS.

(Circular.)

Department of Lands,
Sydney, 29 June, 1861.

SIR,

I am directed to enclose, for your information and guidance, a copy of the Assisted Immigration Regulations, recently published by the Government, from which you will perceive that, on and after the 1st July next, depositors under these Regulations can have the parties whom they desire to bring out introduced in ships chartered by the Emigration Commissioners in London. (See No 1.)

2. The forms to be used under the new Regulations, a supply of which will be forwarded to you by the Agent for Immigration, are as follows:—

(1st.) That marked A, which you will use in cases where the parties to be introduced are nominated in the Colony, and,—

(2nd.) That marked B, to be used where the parties are to be nominated in the United Kingdom.

3. It will be necessary for you to observe great care in the preparation of those forms, as on the information contained in the particular form used by you will entirely depend the correctness of the Passage Certificate forwarded to you by the Agent for Immigration for delivery to the depositor.

4. All moneys received by you under the Regulations referred to are to be forwarded direct to the Agent for Immigration, and at the termination of each Quarter it will be necessary for you to render an account of all such receipts to the Auditor General, for that officer's satisfaction.

5. On this subject I cannot too strongly impress on you the necessity of forwarding the moneys which you receive under the Regulations, by the first post which leaves after your receipt of them; care being taken by you, in every case, to register the letters containing such remittances. For any departure from this instruction you will be held responsible.

6. It is desirable that you should give the Regulations all the publicity in your power within your district; and in order to enable you to do so as effectually as possible, the Agent for Immigration will forward to you a supply of the Regulations, for distribution amongst its inhabitants.

7. In conclusion, I am to state, that as the Government are most anxious to make the Regulations as easily available by the working classes as possible, they are desirous of your zealous co-operation in carrying them out; and the Agent for Immigration will afford you every assistance in his power in facilitating the object desired.

8. I may add, that a circular letter on the subject will be addressed to the Bench of Magistrates in your district, by the Principal Under Secretary.

I have, &c.,

MICHL. FITZPATRICK.

ASSISTED IMMIGRATION.

No. 4.

FORM A.

(To be used when the persons intended to be introduced are to be nominated in the Colony).

IMMIGRATION REGULATIONS OF 21ST JUNE, 1861.

DISTRICT OF

DESCRIPTION OF THE PERSON OR PERSONS FOR WHOSE BENEFIT THE REMITTANCE IS MADE.								
Christian Name and Surname, at full length.	Age.	Whether Husbands or Wives resident in the Colony.	Trades or Callings.	Where living, in Great Britain or Ireland.	Names and Addresses of some persons of Note, to whom references can be made respecting the Emigrants.	Proportion to be applied to Passage.	Proportion to be applied towards Outfit.	TOTAL.

I, _____ of _____ in the District of _____ in the Colony of New South Wales, the Depositor in this case, hereby undertake, in the event of passages being granted to the parties selected in pursuance of the above deposit, to pay to the Immigration Agent at the Port of Arrival, any additional amount which he may require of me, for the passage or passages of any child or children belonging to the said parties, which have not previously been provided for by me, in my deposit as above, or been paid for before embarkation to the Emigration Commissioners in London, according to the rates set out in the Immigration Regulations of the 21st June, 1861; and I further undertake to pay to the said Immigration Agent, subsistence money at the rate of 1s. per diem for each adult, and 6d. for each child under 12 years of age, for every day any or all of my nominees may be maintained at the expense of the Government, from and after the expiration of ten days from the date of their arrival in the Colony.

Dated at _____ this _____ day of _____ 186 .
 Witness _____ Depositor.

Received on this _____ day of _____ 186 , from _____ of _____ in this District, the sum of _____ pounds, _____ shillings (£ _____) to be remitted to the Emigration Commissioners, for the purpose of being applied in the provision of passages to this Colony, for the above-described persons.

Witness, _____ Clerk of Petty Sessions

NOTE.—If more than one person's name be inserted in this Certificate, it should be distinctly stated to whom the money is intended to be paid, on account of Outfit; and in case of the death or absence of the persons so named, to which of the others it is to be paid.

No. 5.

UNDER SECRETARY FOR LANDS to ACTING IMMIGRATION AGENT.

*Department of Lands,
Sydney, 18 September, 1861.*

SIR,

The attention of the Secretary for Lands having been called to a statement in one of the daily papers, to the effect that Mr. Hodgson had been permitted to introduce nearly five hundred Immigrants, under the provisions of the Vote for Immigration; and it appearing from the statements personally made by you to Mr. Secretary Robertson, that this representation is substantially correct, and that you had received £2,400 for the purpose,—I am directed to inform you, that, upon a reference to the Immigration Regulations, the Secretary for Lands is clearly of opinion,—

- 1st—That they do not warrant the course pursued;
- 2nd—That if they did in the letter, their whole spirit was opposed to it;
- 3rd—That even if it were otherwise, in both respects, such an extraordinary use of the Regulations should not have been made without the special sanction of the Responsible Minister having charge of the Department; and
- 4thly—That the fact stated in the explanation given by you,—that Mr. Hodgson did not act only for the Company with which he was connected, but also for four or five Companies, each in all other respects competing with, and antagonistic to each other; and who are known to be in difficulty with their employes,—only, it seems to him, made it the more necessary that you should, as was done in the "Donegal matter", have obtained some special instructions.

2. I am directed therefore by the Secretary for Lands to request, that you will at once furnish an explanation in the matter; and also say whether there are any other similar instances of your acting with the funds in question.

3. Mr. Hodgson, I am to add, has been apprised that the money was improperly received by you, and that it will be returned to him.

I have, &c.,

MICHL. FITZPATRICK.

No. 6.

UNDER SECRETARY FOR LANDS to A. HODGSON, ESQ.

*Department of Lands,
Sydney, 18 September, 1861.*

SIR,

The attention of the Secretary for Lands has been drawn to a statement in one of the daily papers, to the effect that you had been permitted to introduce nearly five hundred Immigrants, under the provisions of the Vote for Immigration; and it has been ascertained that the statement is substantially correct, the Acting Immigration Agent having received two thousand four hundred pounds for the purpose.

2. Mr. Secretary Robertson desires me to inform you that the money was improperly received by Mr. Logan, and will be returned to you on application.

£2,400

I have, &c.,

MICHL. FITZPATRICK.

No. 7.

ACTING IMMIGRATION AGENT to UNDER SECRETARY FOR LANDS.

*Government Immigration Office,
Sydney, 18 September, 1861.*

SIR,

In reference to the issue of the certificate, which formed the subject of conversation at an interview with which I was this day favoured by the Honorable the Minister for Lands,—while I have to state that in such issue I merely followed long established precedent, I would now suggest that as the Honorable Secretary for Lands seems of opinion that the same should not have issued, instructions should be forwarded to the Emigration Commissioners not to act upon such certificate. I make this suggestion, having reason to believe that the certificate itself was forwarded by the last mail.

I have, &c.,

WILLIAM LOGAN.

The instructions alluded to should be forwarded. Mr. Logan should be asked to say what he means by his allusion to long established precedent: the Regulations under which he acted being quite of recent date. He should also be requested to state the cases he alludes to as precedents.

JOHN R.
20 Sept.

No. 8.

No. 8.

ACTING IMMIGRATION AGENT to UNDER SECRETARY FOR LANDS.

*Government Immigration Office,
Sydney, 19 September, 1861.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 18th instant, calling upon me to explain the circumstances under which a deposit of two thousand four hundred pounds was received from Arthur Hodgson, Esq., towards the passage to this Colony of a number of coal miners and their families.

£2,400.

2. In reply I beg to state, for the information of the Secretary for Lands, that the amount in question was received by me under the impression that I was fully warranted in doing so, as there appeared to be nothing in them precluding employers from introducing any description of labour they might require, through their agents in the United Kingdom.

3. I felt the more justified in adopting this course, presuming that, as the Regulations were mainly a revival of those formerly in force (in which no special provision was made for such cases), the practice which had hitherto prevailed in this Department might safely be continued, and that if deposits had been received from Messrs. Peto, Brassey and Betts, Messrs. P. N. Russell and Co., and others, towards the introduction of servants to be nominated by their agents in the United Kingdom, without, as far as I was aware, any reference having been made to the Government for instructions, similar deposits might be accepted under the existing Regulations.

4. To shew that this was my impression upon the promulgation of the new Regulations, I would refer to the printed letter of Instructions on the subject, issued from your Department to Clerks of Petty Sessions, a draft of which was in the first instance submitted by me for approval. In this letter allusion was made to a form marked B, to be used when the parties are to be nominated in the United Kingdom. That form is the same as one in use under the old Regulations, and the only object in retaining it was, as I thought, to enable residents in the Colony still to nominate Immigrants through their agents at Home.

5. The first clause of the Regulations, moreover, distinctly states that any person resident in the Colony who may be desirous of introducing from the United Kingdom Immigrants of the labouring classes will be permitted to do so on making deposits subject to certain conditions, none of which restrict nominations to the mere relatives or friends of depositors.

6. If therefore I have mistaken the intentions of the Government and the Legislature, and departed from the spirit of the Regulations, by accepting deposits of this nature, I sincerely regret it; and though by so doing I may have committed an error of judgment, I trust that the character I have borne during a period of upwards of fifteen years in the public service, will convince Mr. Robertson that I was actuated in the matter by the conscientious conviction that I was doing right.

7. I may add that the only other deposits for persons to be nominated at Home have been made by Mr. Samuel Wilcox and Messrs. Dickson and Burrowes; the former having paid the sum of forty pounds for the passage of eight adults, and the latter the sum of twenty pounds for four adults.

£40.

I have, &c.,

WILLIAM R. LOGAN,
Acting Agent for Immigration.

P.S.—Since writing the above, I find that one more deposit of £3 was received from Mr. J. Mulholland.

W. R. L.

Mr. Logan is entitled to the full benefit of this argument. The forms were prepared by him, and the inapplicability, or at least the ambiguity, of the one marked B, was not detected here.

M. F.

No. 9.

A. HODGSON, ESQ., to SECRETARY FOR LANDS.

*Australian Agricultural Company,
227 (late 152), George-street, Sydney,
20 September, 1861.*

SIR,

In reply to the Under Secretary's letter of the 18th instant, I have the honor to state that I have no knowledge of the "provisions of the Vote for Immigration" to which you refer.

In applying for permission to introduce Emigrants of the labouring classes, I acted under the provisions of the Regulations of 21st June, 1861, issued by the advice of the Executive Council, and bearing your signature, and I am satisfied that the permission granted to me in pursuance of my application is strictly in accordance both with the letter and the spirit of those Regulations.

The

ASSISTED IMMIGRATION.

7

The authoritative tone assumed in your letter would lead me to suppose that you entertain a different opinion; if so, I have to request that you will inform me somewhat more definitely in what respects the permission granted to me is at variance with the Regulations.

I have to inform you, however, that I forwarded the passage certificate handed to me by the Immigration Agent, to the Governor of the A. A. Company, by the August mail, with a request that immediate steps might be taken to select the number of labourers for whom the certificate provided, and I beg you most distinctly to understand that it is not my intention to abandon the rights which I am assured I possess in virtue of the Regulations in question.

I have, &c.,

ARTHUR HODGSON,

I am of opinion that the permission to introduce Immigrants not nominated in the Colony, is contrary, not only to the Regulation, but to the spirit in which the Immigration Vote was granted by Parliament. The money will be paid on application to the Colonial Treasurer.

JOHN R.

1 October.

No. 10.

UNDER SECRETARY FOR LANDS to ACTING IMMIGRATION AGENT.

*New South Wales,
Department of Lands,
Sydney, 21 September, 1861.*

SIR,

In reference to your letter of the 18th instant, relative to the passage certificate issued for certain coal miners,—I am directed to inform you, that in accordance with your suggestion, a communication will be addressed to the Emigration Commissioners by this mail, requesting them not to act upon the same.

2. With regard, however, to your statement, that in the issue of such certificate you only acted on long established precedent, I am directed by the Secretary for Lands to inquire what you mean by such allusion; the regulations under which you acted being of quite recent date.

3. I am also to request that you will state the cases you allude to as precedents.

I have, &c.,

MICHL. FITZPATRICK.

No. 11.

UNDER SECRETARY FOR LANDS to SECRETARY TO EMIGRATION COMMISSIONERS, LONDON.

*New South Wales,
Department of Lands,
Sydney, 21 September, 1861.*

SIR,

It has recently come to the knowledge of the Government, that the Acting Immigration Agent in this Colony, without the sanction of the Government, received a large sum of money from the Agent of the Australian Agricultural Company (Mr. Arthur Hodgson), as deposits to secure the introduction from the United Kingdom of a large number of coal miners, professedly under the Assisted Immigration Regulations of this Colony; and there is reason to believe that the certificate delivered to Mr. Hodgson, (No. 592), was transmitted to England by the August mail.

2. I am now directed to inform you, that the Secretary for Lands has officially intimated to Mr. Hodgson that the money so lodged by him was improperly received, and will be returned to him; the Government being clearly of opinion, that the Regulations of the 21st June last do not sanction the introduction of any persons, except such as may be named by the depositor at the time of making the deposit.

3. I am to request, therefore, that the Commissioners will not act on the certificate so obtained, should it be presented to them.

I have, &c.,

MICHL. FITZPATRICK.

No. 12.

No. 12.

ACTING IMMIGRATION AGENT to SECRETARY FOR LANDS.

*Government Immigration Office,
Sydney, 30 September, 1861.*

SIR,

With reference to the second paragraph of your letter of the 21st instant, in reply to mine of the 18th idem, relative to the passage certificate issued to Arthur Hodgson, Esq., for a number of coal miners and their families; I have the honor to inform you, that, when stating that in issuing the certificate in question, "I merely followed long established precedent," I alluded to the usage of the Office under the former Regulations, of which I considered the present mainly a revival.

2. My communication of the 19th instant particularizes the cases to which I referred as precedents.

I have, &c.,

W. R. LOGAN,
Acting Agent for Immigration.

I can only regret Mr. Logan's want of perception of what appears to me to have been his clear duty; and his still greater want of perception evinced by his not being able to comprehend the matter when called to his attention specially.

Agent for Immigration.

No. 13.

UNDER SECRETARY FOR LANDS to A. HODGSON, ESQ.

*Department of Lands,
Sydney, 3 October, 1861.*

SIR,

Referring to your letter of the 20th ultimo, on the subject of the deposit recently made by you for the introduction to this Colony of Emigrants of the labouring class, under the Assisted Immigration Regulations, who were to be nominated in England; I am directed by the Secretary for Lands to state, that he is of opinion that permission to introduce Immigrants not nominated in the Colony, is contrary not only to the Regulations but to the spirit in which the Immigration Vote was granted by Parliament; and that the money will therefore be returned to you, on application to the Colonial Treasurer.

I have, &c.,

MICHL. FITZPATRICK.

No. 14.

UNDER SECRETARY FOR LANDS to UNDER SECRETARY FOR FINANCE AND TRADE.

*Department of Lands,
Sydney, 4 October, 1861.*

SIR,

I am directed to request that you will move the Honorable the Finance Minister to cause the sum of £2,400 to be returned (upon application) to Mr. Arthur Hodgson, being the amount paid by him in behalf of the Australian Agricultural Company, for the introduction to the Colony of persons to be nominated in the United Kingdom under the Assisted Immigration Regulations; it being considered that the introduction of persons not nominated in the Colony is contrary to the intention of such Regulations, to which effect Mr. Hodgson has been informed.

I have, &c.,

MICHL. FITZPATRICK.

No. 15.

SUPERINTENDENT, A. A. COMPANY, to SECRETARY FOR LANDS.

*Australian Agricultural Company's Office,
Sydney, 5 October, 1861.*

SIR,

Referring to Mr. Hodgson's letter of the 20th ultimo, on the subject of the introduction of certain labourers under the Immigration Remittance Regulations,—I have the honor to acquaint you, that I have been requested by the Managing Directors of the Coal Companies named in the margin, who were associated with Mr. Hodgson in the proceeding above referred to, to draw your attention to the fact, that as yet no reason has been assigned

for

for your statement that the permission to import the labourers in question was unauthorized; and as we have been informed, that by the last mail a communication was addressed to the Emigration Commissioners in London, instructing them not to act upon the passage certificate granted to Mr. Hodgson by the Acting Immigration Agent, I am further requested to apprise you, that we shall leave no means unemployed to ensure the completion of the engagement entered into by the Government in pursuance of their own Regulations; and shall hold the Government responsible for any loss or damage we may sustain, should the Commissioners comply with your instructions.

I have, &c.,

EDWARD C. MEREWETHER,
General Superintendent, A. A. Company.

No. 16.

SUPERINTENDENT, A. A. COMPANY, to SECRETARY FOR LANDS.

*Australian Agricultural Company's Offices,
Sydney, 10 October, 1861.*

SIR,

Having succeeded Mr. Hodgson as General Superintendent of the affairs of the Australian Agricultural Company, I have the honor to acknowledge the receipt of your letter of the 3rd instant, which having been addressed to that gentleman, did not reach me until the 5th, after mine of that date had been written.

I have submitted your reply to the gentlemen who were associated with the A. A. Company in the Immigration Deposit to which it refers, equally with myself; those gentlemen are at a loss to understand upon what grounds you base the opinion that permission to introduce Emigrants not nominated in the Colony is contrary to the Regulations.

We fearlessly assert that there is nothing in those Regulations to support such a view; and that your own forms and your own acts distinctly refute it.

The application to introduce the labourers we require was made in a Form B, which was furnished by your own officer, and is indorsed, "to be used when the persons intended to be introduced are to be nominated in the United Kingdom"; and we are aware that only a very short time prior to the date of our application, you had sanctioned the introduction of a large number of Emigrants, to be nominated in Ireland, under a deposit made by the Very Reverend Dean M'Encroe.

Of the spirit in which the Vote for Immigration was granted by Parliament we know nothing. We only recognize the Regulations of the Government, and the Forms used to give them effect; but as these have received your sanction, we cannot for one moment suppose that they are inconsistent with the intentions of the Legislature.

By those Regulations, and the rights we have acquired under them, we mean to abide; and speaking for myself and the gentlemen associated with me, I again respectfully decline to receive back the deposit made by Mr. Hodgson.

I have, &c.

EDWARD C. MEREWETHER.

No. 17.

UNDER SECRETARY FOR LANDS to CLERKS OF PETTY SESSIONS.

(Circular.)

*Department of Lands,
Sydney, 12 October, 1861.*

SIR,

With reference to the circular letter of the 29th June last, enclosing a copy of the Assisted Immigration Regulations of the 21st of that month, with instructions respecting the same, I am directed to inform you, that so much of the circular as relates to Application Form B, to be used "where the parties are to be nominated in the United Kingdom," was introduced under a misconception, and is hereby cancelled.

2. The Regulations are intended to apply only to persons *nominated* in the Colony by the depositors at the time of making the deposit.

I have, &c.,

MICHL. FITZPATRICK.

Sydney, 8 July, 1858.*

VERY REVEREND SIR,

I have the honor to acknowledge the receipt of your letter of the 7th instant, expressing the desire of the Sub-Committee of the Donegal Relief Fund, to obtain for Mr. Durbin a letter from this Office to the Land and Emigration Commissioners, stating that he is their accredited Agent in the measures which they propose for enabling persons from Donegal to emigrate; and, in reply, I am directed by the Colonial Secretary to enclose a letter introducing Mr. Durbin, as the Agent of the Committee, to the Commissioners, who will no doubt afford him every necessary information and facility in making his arrangements for sending out, in accordance with the Remittance Regulations, the persons you desire to assist.

I have, &c.,
W. ELYARD.

No. 23.

COLONIAL SECRETARY to SECRETARY TO EMIGRATION COMMISSIONERS, LONDON.

*New South Wales,
Colonial Secretary's Office,
Sydney, 8 July, 1858.*

SIR,

I have the honor to inform you that application has been made, by the gentlemen forming the Sub-Committee in this Colony for the Donegal Relief Fund, for a letter from this Government to the Emigration Commissioners, intimating that Mr. J. H. Scott Durbin has been appointed their accredited Agent in the measures which they propose for the emigration of labourers from the County of Donegal, in Ireland, and requesting that he may be recommended to the Commissioners for any assistance which may be necessary from them in carrying out the objects of the Committee.

2. The sum of £900 has, it appears by the Report of the Agent for Immigration (of which I enclose a copy), been deposited by the Committee, under the Immigration Remittance Regulations, to be expended for passages to this Colony of the persons they desire to assist; and, as they are to be selected and sent out under the conditions prescribed by those Regulations, I have furnished Mr. Durbin with this letter as an introduction to the Commissioners, who will no doubt have the goodness to afford him such information and facilities as may be requisite in making the arrangements with which he is entrusted.

I have, &c.,
CHARLES COWPER.

No. 24.

MR. W. M. DAVIS to COLONIAL SECRETARY.

*Committee Room, Brougham Tavern,
Pitt-street, Sydney, 20 June, 1861.*

SIR,

The Committee of the management of the Donegal Relief Fund having a balance in hand of about thirteen hundred and fifty pounds sterling, are desirous, in accordance with the views of the subscribers, to expend the same in introducing into this Colony, under the Assisted Immigration Act, some portion of the people of that part of Ireland who may be in distress.

The sum of three thousand eight hundred pounds sterling has already been applied to the same purpose, in accordance with an arrangement entered into with the Government by the Committee.

Four gentlemen having been appointed, at a meeting held on the 18th instant, to wait upon the Colonial Secretary, to ascertain if the Government are prepared to allow the Committee to disburse the balance above stated, as they were formerly allowed to do, I have now the honor to request that you will do me the favour of appointing a time when it may be convenient for you to receive said Deputation.

I have, &c.,
WILLIAM M. DAVIS,
Hon. Sec. Donegal R. Fund.

Call Mr. Logan's attention to this matter, with the view of his reporting what difficulties there may be (if any) in the way. Appoint any day (say Wednesday) at 11 a.m.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

ASSISTED IMMIGRATION.

(UNDER REGULATIONS OF 21 JUNE, 1861.—DESPATCH FROM GOVERNMENT EMIGRATION BOARD.)

Ordered by the Legislative Assembly to be Printed, 16 January, 1862.

EMIGRATION BOARD to SECRETARY FOR LANDS.

*Government Emigration Board,
8, Park-street, Westminster,
26 November, 1861.*

SIR,

I have to acknowledge your letter of the 21st September, stating that the certificate for the introduction of immigrants, delivered to the Agent of the Australian Land Company, under the Assisted Immigration Regulations of New South Wales, had been issued under a misapprehension, and requesting that we will not act on that certificate if presented to us.

Your letter was received at this office in the afternoon of the 19th instant, but as far back as the 19th ultimo the certificate in question had been lodged with us by the Governor of the Australian Agricultural Company, and arrangements had been made by the Company to engage miners to be sent out under it. As there was nothing on the face of the certificate inconsistent with the Regulations, and as we had previously received similar certificates in favor of Archdeacon McEnroe and Mr. Wilcox, we did not consider that we had any discretion as to the admission of the claim of the Company. We accordingly informed the Governor that we should be prepared to find passages for the emigrants the Company might present to us under virtue of the certificate.

On receiving your letter we immediately telegraphed to the gentlemen employed by the Company in collecting emigrants to suspend his operations, and the same evening we informed the Governor of the Company that, in consequence of instructions from the Colony, we must consider their operations under the certificate, so far as they depended on assistance from this Board, as brought to a close. But we added, that as in the interval between the receipt of the certificate and of your letter our faith had been pledged to find passages for certain emigrants, we should feel bound to carry out our pledge to those individuals although we could not accept any more. By the same post we directed the selecting agent to send us up a list of all those to whom, up to that time, promises had been made.

That list we have received. It shews a body equal to 115½ statute adults, and for so many of those as come forward (probably between 80 and 90) we propose to find passages in the "Annie Wilson," which is appointed to sail from Birkenhead on or about the 21st of next month. We could not refuse to provide the passages promised to these people without a breach of faith which would not only have been most cruel on the people, but would have been most discreditable to ourselves, and fatal to any future operations we might have to conduct. We feel confident, under these circumstances, that the Government of New South Wales will approve the course we have adopted, and that they will feel satisfied that if we have been unable to comply literally with their wishes, we have done so to the full extent which our duty to the public allowed us to do.

I may add that we have acted in the same manner in respect of the passage certificate No. 494, issued to Mr. Samuel Wilcox, for eight statute adults—six of these, having been nominated and approved before the receipt of your letter, will be provided with passages in the "Annie Wilson," but the remaining two we have declined to accept.

I have, &c.,
S. WALCOTT.

Legislative Assembly.

NEW SOUTH WALES.

SPECIAL ROMAN CATHOLIC EDUCATION.

(KIAMA.)

Ordered by the Legislative Assembly to be Printed, 11 October, 1861.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholics of the Parish and District of
Kiama,—

HUMBLY SHEWETH :—

1. That the Roman Catholics of the Colony cannot avail themselves of the National Schools.

2. That their objection to these Schools is not one which might be removed by any modification in matters of detail, but that it lies against the fundamental principle of indifference in respect of Denominational religious teaching, training, and practice, and is therefore insuperable.

3. That your Petitioners are firmly convinced that Roman Catholic children cannot be properly educated, except in Roman Catholic Schools, taught by Roman Catholics, and amidst the symbols and practices of Catholic devotion.

4. That the practically compulsory forbearance from Catholic devotional habits and destitution of Catholic symbols imposed on Catholic children in National Schools, although in theoretical statement they may be represented as simply negative, are, in reality, a most subtle and positive persecution.

5. That Catholics are as willing as any of their fellow Australians to yield any matters purely indifferent, or even practically separable, for the sake of mutual accommodation and comprehension, but that in this most important affair of education, the abandoning of their own integral system would be a barter of religious duty and privilege for which no secular advantages could be an adequate compensation.

6. That your Petitioners, therefore, nothing able to participate as other denominations may, in the presumed benefits of the National Schools, are in fact suffering an injustice, to the extent of their rateable share, in the sum devoted out of the common purse, to the so-called National Education system.

7. That your Petitioners, therefore, pray your Honorable House to redress this injustice, by causing the sum appropriated for Roman Catholic Schools to be set apart in the ratio of the Roman Catholics to the whole population, from the gross amount expended on public education, before deduction of the sum assigned to the said National Schools. Finally, that your Petitioners may have their Schools vested in Catholic trustees, and your Petitioners will ever pray.

[Here follow 71 Signatures.]

SPECIAL ROMAN CATHOLIC EDUCATION.

(SHOALHAVEN.)

Ordered by the Legislative Assembly to be Printed, 11 October, 1861.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholics of the Parish and District of Shoalhaven,—

HUMBLY SHEWETH :—

1. That the Roman Catholics of the Colony cannot avail themselves of the National Schools.

2. That their objection to these Schools is not one which might be removed by any modification in matters of detail, but that it lies against the fundamental principle of indifference, in respect of Denominational religious teaching, training, and practice, and is therefore insuperable.

3. That your Petitioners are firmly convinced that Roman Catholic children cannot be properly educated, except in Roman Catholic Schools taught by Roman Catholics, and amidst the symbols and practices of Catholic devotion.

4. That the practically compulsory forbearance from Catholic devotional habits, and destitution of Catholic symbols imposed on Catholic children in National Schools, although in theoretical statement they may be represented as simply negative, are in reality a most subtle and positive persecution.

5. That Catholics are as willing as any of their fellow Australians to yield any matters purely indifferent, or even practically separable, for the sake of mutual accommodation and comprehension; but that in this most important affair of education, the abandoning of their own integral system would be a barter of religious duty and privilege, for which no secular advantages could be an adequate compensation.

6. That your Petitioners, therefore, nothing able to participate as other denominations may, in the presumed benefits of the National Schools, are in fact suffering an injustice, to the extent of their rateable share, in the sum devoted out of the common purse to the so-called National Education system.

7. That your Petitioners therefore pray your Honorable House to redress this injustice, by causing the sum appropriated for Roman Catholic Schools to be set apart in the ratio of the Roman Catholics to the whole population, from the gross amount expended on public Education, before deduction of the sum assigned to the said National Schools. Finally, that your Petitioners may have their Schools vested in Catholic trustees. And your Petitioners will ever pray.

[Here follow 65 Signatures.]

Legislative Assembly.

NEW SOUTH WALES.

CHARITABLE AND EDUCATIONAL INSTITUTIONS.

(WITHIN THE CITY OF SYDNEY, AND COUNTY OF CUMBERLAND.)

Ordered by the Legislative Assembly to be Printed, 17 October, 1861.

FURTHER RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 24 April, 1860, That there be laid upon the Table of this House,—

“ Information connected with the Charitable and Educational
 “ Institutions, wholly or in part maintained by Public Funds,
 “ within the City of Sydney and County of Cumberland—being
 “ Returns from the Sydney University.”

(*Dr. Lang.*)

SCHEDULE.

NO.	PAGE.
1. The Registrar of the Sydney University to the Colonial Secretary, 9th October, 1861, forwarding Returns respecting the University, called for by the Legislative Assembly ..	2

CHARITABLE AND EDUCATIONAL INSTITUTIONS.

No. 1.

REGISTRAR OF SYDNEY UNIVERSITY to COLONIAL SECRETARY.

University of Sydney,

9 October, 1861.

SIR,

I do myself the honor to transmit herewith the following Returns called for by the Legislative Assembly, viz. :—

1. The Names and Dates of Appointment of the Members of the Senate of the University, from 1st January, 1855, till 31st December, 1859.

2. The Names and Dates of Appointment of Officers, &c., of the Institution ; together with the particulars of the annual Salaries, Fees, and Allowances, of same.

3. Number of Attendances of Members of the Senate at Meetings of the Senate, during each year.

4. The Number of times in each Year in which the Transaction of Business was postponed, in consequence of the non-attendance of a Quorum.

5. A detailed Account of all Moneys received and expended during the period from 1st January, 1855, to 31st December, 1859.

I have, &c.,

HUGH KENNEDY,

Registrar.

CHARITABLE AND EDUCATIONAL INSTITUTIONS.

10 May, 1861.

C. E. ROBINSON,
Secretary.

SCHOOLS.

Urgently as the increase (viz. £5,000) voted for Denominational Schools for the year 1860 was required, the Board were unable to take full advantage of it during that year, owing to the late period at which the Estimates were passed in Parliament.

Notwithstanding the pressing applications which the Board had for some time been receiving for the establishment of new Schools (copies of which applications have been appended to Reports for previous years), and the great desire on the part of the Board to commence a system of School inspection, they were unable to take any steps in reference to these important matters until the increase to the vote in question was secured.

In ordinary establishments, where a more extended sphere of operations is contemplated, it is comparatively easy to effect such changes almost as soon as the necessary funds are obtained; but, in opening Denominational Schools, where the assistance granted by the Board is only a portion of the whole expenditure required, both as regards salaries and buildings, other elements have to be brought into operation before Schools can be set going, not that the Board find any backwardness on the part of the originators of new Schools, but because they cannot encourage private enterprise, which of itself is not sufficient for its purpose, by promises of assistance until the means of fulfilling these promises are secured.

The same remarks applied to Denominational Schools in the year 1858, when an increase was made for that year, so late in the Session, that full advantage could not be taken of it during the then current year; yet, in the first six months of the succeeding year, the number of the Schools and of the children in attendance was much increased.

Among the objects which, owing to the extended means placed at their disposal, the Board have lately been able to accomplish, are the establishment of a regular Training School in connection with the Church of England, the appointment of an Inspector of Roman Catholic Schools, and the re-organization of the Wesleyan Model School under a Teacher lately arrived from the Wesleyan College, at Westminster. In addition to these important changes, the Board have been able to slightly raise some of the salaries of Teachers, and to grant salaries to some of the new Schools, which have been urgently brought before them by the various heads of religious bodies. They have also had it in their power to allow several grants of money in aid of building and repairing Schoolhouses, where the sites are held in trust for School purposes, and where sums equal to (and, as it appears in many cases, far exceeding) those granted have been locally contributed.

The Board hereto append Reports and communications from the Church of England Appendix A,
Bishops of Sydney and Newcastle, the Roman Catholic Archbishop of Sydney, the Moderator " B,
of the Presbyterian Synod, and the Master of the Church of England Training School at " C,
St. James'. " D,
" R

The great encouragement which the small increase to the Denominational Vote appears to have given, and the large field of improvement which, from these communications, is still shewn to exist, opens up this important question—"Should the willing exertions of the various religious bodies in favour of Denominational Education continue to be retarded and discouraged from want of reasonable means?" The Board again respectfully urge upon the Government that a further increase should be placed at their disposal, to enable them to meet some of the pressing demands made upon them.

GEO. ALLEN, Chairman.

JOHN DUNSMURE.

P. FAUCETT.

ALEXR. GORDON.

APPENDIX A.

*Church of England Schools Office,
1 July, 1861.*

Sir,

I regret that I have been prevented, by various circumstances, from replying at an earlier date to your letter of May 7, in which you ask for information regarding the operations of our Training Schools during the past year, and our Schools generally within the same period. I beg now to enclose a copy of the Report of the Training Master, in a letter to the Lord Bishop, which supplies, as far as regards the Training School, all the information you desire.

It affords me much pleasure at the same time to bear testimony, not only to the accuracy of the statements which are contained in the Report, but also to the regularity and assiduity with which both the Training Master, and the Head Master of the Model School have attended to their respective duties.

The Board will be glad to learn, that there are good evidence in several quarters of the improvement which has been effected in the training of our Teachers, and that the expense which has been incurred for this object is justified by experience. There are now in the Diocese of Sydney, several Schools conducted with a fair amount of ability and efficiency, by Masters who have received their only training in the Model School; while we have ample proof that without this means of preparing Teachers it would be quite impossible either to supply the vacancies which occur from time to time in existing Schools, or to provide for the due management of new Schools, as they may be brought into operation.

The subject is, however, one which should be viewed prospectively; and its aspect when thus regarded, becomes still more important. The steady increase of our population, and their probable dispersion throughout the Colony; the upgrowth of new townships and villages, and the settlement of agricultural and gold-digging, and other communities in various parts, will, ere long, render the demand for increased means of education, and among these of competent Teachers, much greater than at present. And if we do not train them, we can hardly expect that they will be found when required.

In connexion with this view of the subject, I would invite the attention of the Denominational School Board, to the fact, that hitherto no provision has been made in our Schools for pupil Teachers, owing to the utter inadequacy of the funds provided to meet the demands made upon them. And yet these are the material out of which our Teachers ought, as in the English National Schools, to be reared.

The

The reason why His Lordship has forborne to press this matter upon the consideration of the Board, has been his knowledge that the whole of our share in the Educational Grant was absorbed in satisfying the most urgent claims for Primary and Infant School Teachers; and, that there are numerous applications for these, which, for the above reason, could not be brought forward at all.

It is greatly to be regretted that a more liberal Educational Grant has not been made by the Parliament, and that our means of providing for the education of that portion of the youth of the Colony which falls under our care is so limited.

II.—But I pass on to speak of our Schools and their condition.

The number sanctioned by the Denominational School Board, at the close of the year, was ninety-five; but of these, seven were not brought into operation, partly from the want of Teachers to conduct them; partly because the buildings in which they were to be conducted were not ready for occupation. To this number may be added (5) five *supplemental* Schools, *i.e.*, Schools to which a salary is granted for one year, without any pledge for its continuance beyond that period. Such, however, is the desire for Church Schools, under the superintendence of the Clergy, that nearly (20) twenty applications have been recorded in addition to the above; the answer which His Lordship is obliged to give to the applicants being that there are no funds available. The children in these districts are, in consequence, growing up destitute of the means of scholastic training, or even of acquiring the simplest rudiments of instruction.

Regarding the *condition* of our Schools, the Board will bear in mind that, during the second half-year, there was no paid Inspector recognized by them. Having resolved to terminate their engagement with the late Inspector, on the 30th June, Mr. W. J. Cuthbert, ceased from that date to hold that office, and the inspection has since been left to the Clergy and the Local Boards.

From the Returns sent in by them, and from information otherwise obtained, there is reason to believe that a considerable number of our Schools are very creditably conducted; though, in some respects, there is still room for improvement in all.

During the present year, it is intended to employ the Training and Organizing Master occasionally in the duties of Inspector.

There is one point which I should wish to bring under the notice of the Board, in connexion with the Resolution passed by them, that no salary should be under sixty pounds (£60) for a Primary, and fifty pounds (£50) for an Infant School Teacher.

As a general rule, this is undoubtedly desirable; and it would be well if we could afford to *increase* the stipends of the majority of the Teachers. But there are some Schools whose average attendance is so small as to enhance considerably the cost of education to each child, and it may be a question whether such a rule should apply to them. I find that, of our Schools now in existence,

2	have an average attendance of	150
3	"	100
4	"	80
6	"	70
9	"	60
15	"	50
11	"	40
24	"	30
14	"	20
12	"	below

Now, it is undoubtedly necessary, if the children of the Colony are to be educated, to have these small Schools in the sparsely peopled districts of the interior; for, if such Schools are not sustained by some allowance from the Public Funds, it is very problematical, to say the least, whether they will be carried on at all. Rather, it is tolerably certain that they will not. And I would suggest for the consideration of the Board, whether it might not be expedient so far to modify this rule as to allow of such small Schools as I have referred to, where the average attendance is under twenty, to be placed on the list as somewhat exceptional; one-half of the ordinary stipend being allotted to them upon the condition—to be attested by some competent person—that the School has been satisfactorily conducted. It is probable, that, by such encouragement being held out to Teachers in small country districts, education, in its simpler elements, might be much more widely extended.

III. Great inconvenience has been felt from the want of funds for School buildings and repairs. The amount accruing from the Church and School Estates Revenue each year is so small that it affords only the most scanty relief to those by whom such relief is needed.

Were local efforts aided by public contributions to the extent which is afforded under the National Board, the stimulus to the erection of Church Schools would be far greater than at present; and many substantial buildings would exist in places where they are at present only temporary. Would it not be possible for the Denominational School Board to obtain some additional funds from the Government for this object, in order that the two Boards might, in this respect, be placed upon an equality?

In the meantime, however, I would beg leave to recommend, on behalf of His Lordship, and with his sanction, that the balances which may annually accrue from vacancies in Schools, &c., may be regarded as generally applicable to this purpose, upon such terms as to stimulate the private benevolence and liberality of the members of our Church in providing and furnishing buildings for the education of our youth.

Trusting that the remarks now offered may be acceptable to the Board, while showing at the same time our increasing wants, and the urgent need of further assistance,

I remain, &c.,

WILLIAM M. COWPER.

The Secretary of the Denominational School Board.

APPENDIX B.

Morpeth, 25 May, 1861.

Sir,

In reply to your letter of the 9th instant, in which you ask me to furnish you with any information relative to the Church of England Schools, in the Newcastle Diocese, which I consider might be advantageously inserted in your Report, I send you, with much pleasure, some information on the following subjects:—

I.—The present state of our Schools.

II.—The reasons why the state of our Schools should be considered highly satisfactory.

III.—Some suggestions relative to the appropriation of future grants.

I.—The present state of our Schools:—

I may confidently affirm that the Church of England Schools in this Diocese have, during the last few years, greatly improved. They are still far from perfect—because we have not yet granted for Denominational Schools a due proportion of the public funds available for education, and, therefore, have not the means of providing either agents or machinery, such as we could desire. Still our Schools have greatly improved. They are really progressive, and this progressive improvement is very obvious with respect both to School Masters and School buildings.

(a.)

DENOMINATIONAL SCHOOL BOARD.

5

(a.) We now each year obtain from England some regularly trained Masters, and this is effected not only through my Commissaries in England for the Diocese in general, but some of the Clergy have, through their friends in England, taken great pains to obtain a really efficient Master and Mistress for the School in their own parish. The Masters thus chosen are referred to my Commissaries, who inquire into their general character, and examine their testimonials, and provide such as they approve of with £50, if married, and with £25, if unmarried, towards the expenses of their passage to this Colony.

I may mention the Schools of Christ Church, Newcastle, and of Scone, and of Raymond Terrace, as greatly improved under the charge of Masters lately obtained from England; and there is every prospect, that, in a few years, the old class of Masters will give way to others who are fully qualified for their important office.

(b.) Our School buildings also have been greatly improved: much more improved than could have been expected, when we consider the little aid your Board is able to give for this purpose from the funds at its disposal.

From the last printed Report of your Board, it appears that, during the year 1859, aid was given towards the building and repair of the 227 Denominational Schools, to the very small amount of £664; while the National Board expended during the same year, 1859, on its 73 vested Schools the sum of £5,356.

One excellence, however, of your Denominational system is the strong appeal which it makes to the religious sympathies of the members of the different denominations; and for the generous aid thus obtained I have been enabled to provide excellent School buildings at Morpeth; Christ Church, Newcastle: St. John's, Newcastle; Stroud, Tamworth, and Armidale; and this year we are building or rebuilding superior Schools at St. Mary's, West Maitland, East Maitland, Singleton, Nundle, and Rolland Plains; while almost all the other School buildings are being placed in good substantial repair.

Thus our School Masters and School buildings are really improving. I will mention—

II.—The reasons why this progressive improvement should be considered highly satisfactory:—

I have already said that our Schools are far from perfect; and the reason of this is, that your Board has not the means placed at its disposal to make them so, except by the long process of gradual improvement. If we are asked whether we have an efficient department for training Masters, like the National Board, we must answer, no. If we are asked whether we have any general system of inspection in operation, we must again answer, no. And why not? Is it because the Denominational system of education does not admit of these valuable aids? Far from it. The warmest supporters of the National or Irish system of education do not assert this. In the Second Progress Report, from the Select Committee of Education (1854), in the evidence of Sir Charles Nicholson, it is asked (Question 68, p. 61).—"Are there any of the regulations you have stated, as to the training of Masters incom-
patible with the Denominational system?" And the answer to this question is—"Certainly not."

Why then has not the Denominational Board these valuable aids to efficient education in operation? For this simple reason—It has not the funds necessary to maintain a training department, or a system of effective inspection. For many years, the whole grant of the Denominational Board was absorbed in the payment of existing stipends, and in the purchase of school books; and though the grant has for the last two years been increased, it is still wholly insufficient, and more urgent wants have still to be first supplied.

What facts respecting funds do the last printed Reports of the two Educational Boards (for 1859) disclose? During 1859, the average attendance of children in—

Denominational Schools, was	11,268
National Schools	6,450

which is in the ratio of 44 to 25. If, then, the grants to the two Boards were in due proportion to the number of children educated by them, and the grant for National Schools for 1860 and 1861, was £25,000, the grants for Denominational Schools should have been £44,000 instead of £25,000, the amount really granted; while the grants to the two Boards are so disproportionate to the number of children educated by them, it is no wonder that the Denominational Schools are without many advantages which the National Schools enjoy; or that only £664 was expended in 1859, in the erection and repair of 227 Denominational Schools, while £5,356 was expended on the 73 vested Schools of the National Board.

And if it be said that large sums of public money may now justly be expended in the erection of National Schools, because in past years very large sums of public money have been granted for the erection of Denominational Schools; the answer to this statement is this,—That the fact asserted is untrue, and completely refuted by the return made to the Legislative Council, of all moneys expended in the erection of Denominational Schools, shewing the amount derived from private sources, and the amount granted from public funds. This Return was as follows:—

Expenditure in erecting the School Buildings of the different Denominations.

	Private Subscriptions.			Government Aid.			Total Expenses.		
	£	s.	d.	£	s.	d.	£	s.	d.
Church of England Schools—									
Diocese of Sydney	7,350	0	0	1,779	0	0	9,129	0	0
Diocese of Newcastle	4,534	0	0	770	0	0	5,304	0	0
Presbyterian Schools	2,897	17	8	241	1	10	3,138	19	6
Wesleyan Schools	1,583	0	0	92	0	0	1,675	0	0
Roman Catholic Schools	4,364	0	0	960	0	0	5,324	0	0
	£20,726	17	8	£3,842	1	10	£24,570	19	6

Thus the whole amount of Government funds expended in the erection of 171 Denominational Schools, which were in existence when this Return was made, was £3,842, while the amount expended in the erection of 73 National Schools has been, on the average, for each of twelve years, more than £5,000, and, in some years amounted, as in 1855, to upwards of £10,000 in one year.

These are the facts which make the progressive improvement of our Denominational Schools so highly satisfactory. If we consider the smallness of the funds at the disposal of your Board, it must be acknowledged that the good effected has been far beyond what could have been expected, and thus the opinion of Sir John Kay Shuttleworth is confirmed, when he asserted the great advantage, if not the absolute necessity, of educating the children of England through the great religious bodies, which is the principle of Denominational Education.

III. I would now offer some few suggestions for the consideration of your Board, respecting the appropriation of the Government grant in future years.

In a late communication I tried to impress upon your Board that the two points in which Denominational Schools are working at a great disadvantage, in comparison with National Schools, are these: First—A great deficiency of the best School apparatus; and, secondly—An almost total absence of aid in erecting and repairing School buildings.

To remedy these defects would it not be expedient—

1st. If one-tenth of the Government grant is not now required for School books alone, still to allow the appropriation of one-tenth for the supply of books, with School furniture and apparatus.

2nd.

2nd. It is stated in the Report of the National Board for 1855, p. 13,—“Perhaps the most prominent of the hindrances to education is the difficulty in obtaining funds for the erection of decent School buildings. A proper Schoolhouse and Master's residence cannot be erected anywhere for much less than £400, and to contribute one-third of this sum is often beyond the means of the inhabitants of country districts.” And again, in the Report of the National Board for 1859 (p. 6, l. 2), it is stated—“This lack of the necessary funds (*i. e.*, of funds required to be contributed for the erection of Schools) is universally found to be the principal obstacle to the establishment of vested Schools, and consequently to the spread of the National system.”

If this be true in the case of vested National Schools, when two-thirds of the expense is provided by the National Board, and only one-third has to be contributed by the promoters of the School, how much more must it be the case, when, as hitherto, in establishing Denominational Schools, the residents are required to contribute the whole amount required for the buildings. If, then, the difficulty of providing one-third of the expense of building is confessedly so great—would it not be wise and expedient for your Board to exercise the power, which it undoubtedly possesses, of lessening the difficulty of providing the whole expense of building, and to appropriate some portion of the annual grant to building purposes. Why should not one-tenth of the grant be set apart for building and repairing Schools—when the National Board expends in this way more than one-fourth of its annual grant, in which case your Board might retain in force its present regulation of requiring any grant for building purposes, to be met by an equal amount contributed from other funds.

3rd. Again, in the Report of the National Board for 1859, p. 26, there is the following statement:—“We are aware of the existence of numerous localities in which a School of twenty children might be formed, but in which it is highly improbable that the minimum required by the Board could be obtained for many years to come. These places, which, perhaps, have the most imperative claim for state interference and assistance, are virtually excluded from any participation in the public funds by the operation of the Board's rule, which requires the attendance of thirty pupils at least. The difficulty may be met, to some extent, by awarding aid to such Schools at a reduced rate, in proportion to the number of pupils in actual attendance.”

On this subject I have conversed with you before, and, supported by this statement from the Report of the National Board, I would suggest, for the consideration of your Board, the expediency of encouraging Schools in thickly populated localities, by granting half salaries in cases where for a long time so great a number as thirty children are not expected to be in average attendance.

I will conclude this letter by calling your attention to the avowed failure of the local patrons of National Schools, as set forth in the last Report of the National Board (1859), p. 24, which should make us value most highly one of the chief excellencies of the Denominational system, namely, in the constant superintendence of our Schools—by the clergy, who thus fulfil the duty of feeding the minds of its flock committed to their care.

The Secretary of
The Denominational Board,
&c., &c., &c.

I remain, &c.,
W. NEWCASTLE.

APPENDIX C.

St. Mary's Cathedral,
29 August, 1861.

Gentlemen,

Having been informed that you are about to present to the Legislature your Annual Report of the condition and prospects of the Denominational Schools, I avail myself of the occasion to state to you, at once, my satisfaction in the results that have been obtained by the slight increase of means placed in our hands by the last year's vote, and my conviction that a still further increase is urgently called for. I am but adding my own testimony to the stock of general experience, when I express my belief that, unless a decently liberal scale of payment can be secured for our Teachers, it is in vain to hope for the qualifications and the perseverance necessary for their important but ill-appreciated work.

Whilst, however, I am most anxiously desirous that our School Masters should receive stipends adequate to their support in such condition and habits of life as befit their occupation, and that they should not relatively be worse paid than those who toil in unskilled labour, yet I would have them fully accomplished for their position, so that their acknowledged worth should be felt by all to merit more than we claim for them. I would by no means have any competent judge suspect that their remuneration went beyond their social value.

And, therefore, it is, Gentlemen, that I now do myself the honor to intreat you to provide me, if possible, with means to do something more towards raising the standard of qualifications in our Teachers. What we have already achieved in this sort gives me great desire and great hope of further success. Our present Model School has done what was fairly to be expected from it. I have no fault to find—rather praise is due. But still, as we have gained one step, we would mount the next higher, and I desire to establish a Model and Training School with more ample means, and, of course, with higher aims.

I have, therefore, determined, at some considerable inconvenience and cost, to allow St. Mary's Seminary, a large and handsome building, to be occupied as a Roman Catholic Metropolitan Model and Training School. My hope is, that the Denominational Board will be able to supply salaries for the School Master, for the Training Master, and allowances for candidate Teachers, at the rates adopted in other principal establishments in Sydney.

I should certainly recommend that funds necessary for insisting on a prolonged training of candidate Teachers be, if possible, provided. It is comparatively easy to obtain men possessed of sufficient knowledge. The grand difficulty lies in finding them endowed with desirable manner, and practised in successful methods of teaching. Our weak point is here, and it boots little to speculate on the cause. The only remedy is obviously a systematic and lengthened training of Teachers in their special work. This training, intended to form the Teachers to the requisite habits, and enable them to apply intelligently the sound theories they are taught, can only be given in such establishments as that for which I now solicit your support.

If you decide upon affording me this support, you will, perhaps, permit me to suggest, that, for the first year, funds may be derived from the unexpended balance of 1860. Afterwards, the Legislature, we must hope, may be pleased to extend its vote. We trust to give proof to it, and to the public generally, that, in this matter at least, pecuniary liberality is the true economy.

In the Report of the National Schools the two systems are spoken of as rival systems; one flourishing only in the weakening or destruction of the other. I think that no such antagonism need be kept perpetually in mind; and I say this without meaning in the least to express any abatement of the earnestness of my protest against a system of education which we believe to be fatally unsound in principle.

Yct,

DENOMINATIONAL SCHOOL BOARD.

7.

Yet, even for friendly rivalry, there should be fair conditions, and we have to hope that the Legislature will allot resources to the Denominational equal to those of the National Board. I should then have no fears for the result of public comparison, although the Denominational measures of value in the education of the young are not precisely the same, nor are they so readily exhibited to popular appreciation as those in favour with the National system. However, what we have at this moment to deprecate, is, the imposition of an Egyptian task, and to urge that the rulers and disbursers of the common revenue should not expect one class of the community to produce, in the work of education, the results, without the means, of labour.

The Denominational
Board of Education.

I have, &c.,
† J. B. POLDING SYDNEIEN.

Report of Roman Catholic Denominational Schools.

Sir,

I beg to state, for the information of the Denominational School Board, that great improvements have been made in Roman Catholic Denominational Schools within the last two years. Buildings for School purposes have been erected at the following places, viz.:—West Maitland, East Maitland, Braidwood, Miller's Forest, Araluen, Dapto, Newcastle, Armidale, Kincumber, Mudgee, and Richmond.

Schools have also been established or revived at the undermentioned places:—Dapto, North Richmond, Bulli, Wagga Wagga, Araluen, Lane Cove, Irish Town, and Bombala. Additions and repairs have been made to many of the old buildings. A considerable accession has been made to our staff of Teachers. Six were selected in Ireland, by the Very Revd. Dr. Woodlock, President of All Hallows College, under direction of His Grace the Most Revd. Dr. Cullen, Archbishop of Dublin, and have been sent to this Colony as School Masters of emigrant ships, by authority of the Emigration Commissioners.

Deserving Teachers have also received an increase to their stipends; and, where there was a sufficient number of both sexes, the Schools have been divided, and separate stipends given to the Masters and Mistresses.

The establishment of a Model and Training School for female Teachers has been commenced. It is also in contemplation to establish a Model and Training School for Masters at the building adjoining St. Mary's Church, at present known as St. Mary's Seminary.

An Inspector of Roman Catholic Schools has been appointed, with a stipend of £350 per annum, and travelling expenses. His duty will be to examine and report on the state of the Catholic Schools under the Denominational Board throughout the Colony. He has already visited the several Schools under the Board in the Northern, Western, and Central Districts.

The Teachers in a short time will be classified in the several Schools; a Board of Examiners having been appointed, whose duty it will be to give certificates of relative merit to the Teachers according to their competency.

By these means we trust to have, in a short time, a most efficient staff of Teachers.

C. E. Robinson, Esq.,
Secretary, Denominational School Board.

I remain, &c.,
J. M'ENCROE.

APPENDIX D.

Paddington, 28 August, 1861.

Sir,

I have the honor to inform you, for the satisfaction of the Denominational School Board, that on the receipt of your letter of the 4th of July, intimating that the sum of £607 of the vote for Presbyterian Schools for the current year remained unappropriated, I, as authorized by the Moderator of Synod, convened a meeting of the Synod's Committee on Schools and Education, to consider as to the most useful mode of appropriating the said sum. At the meeting of the Committee four modes of appropriation, all of them useful, were brought under consideration, namely:—The augmentation of the salaries of present Teachers, the erection of new Schools in localities where wanted, the establishment of a proper Model or Normal School in Sydney, and the giving of salaries to female Teachers in connection with the Synod's Schools. The Committee finding that the comparatively small sum at their disposal confined them to one of the above proposals, and having considered the last mentioned the most needful, resolved to recommend to the Central Board the application of this sum of £607 as salaries to female Teachers qualified to instruct the girls attending School in the more useful branches of female education—as needle-work, cutting out, and knitting, besides to take a part, if necessary, in the general teaching of the School. At a subsequent meeting of the School Committee, called for the purpose of allocating the said sum among female Teachers, as agreed upon, it was found that the amount at their disposal was not sufficient to make them do justice to all the various Schools having or requiring female Teachers, as ascertained by circulars which had been issued to the Local Boards; it was, therefore, resolved to refer the whole matter of the division of funds to the meeting of Synod in October next.

I may here also observe, that the Synod's School Committee regret extremely their inability, from want of funds to carry into effect the often expressed wishes of the Synod in regard to the establishment of a proper Model or Normal School, under the superintendence of a Home trained and well qualified Teacher—an institution which they deem especially called for in this Colony, and, indeed, essential to the prosperity of the Schools in connection with the Synod, inasmuch as it would be the means of fixing a higher standard of qualification in the Teachers, and, likewise, of introducing a uniform and improved method of teaching in our Schools.

In order to carry out the above desirable objects for the advancement of education it is respectfully requested of your Honorable Board, that you will be pleased to take such steps as may be deemed fit to obtain such an increase of the existing Government grant as shall enable the Synod to establish a proper Model or Normal School, to provide additional Schools where wanted, and also to give suitable salaries to well qualified and efficient Teachers, both male and female, thereby rendering the Presbyterian Schools under their superintendence more extensively useful, and thus promoting the laudable desire of your Honorable Board in forwarding the interests of education in the Colony.

To the Secretary of the
Denominational School Board,
Sydney.

I have, &c.,
JAS. MILNE,
(for Moderator of Synod.)

APPENDIX

APPENDIX E.

REPORT on the Training Department, in connection with St. James' Model School, Sydney, for 1860.

31 May, 1861.

My Lord Bishop,

I have the honor to submit, for your Lordship's information, the following Report of the progress of the Training School during the past year.

No. in training during the year.

1. The number of candidate Teachers who have been under my charge during the year, has been seventeen (17); twelve (12) of these have begun and completed their course within the year; the remaining five (5) had not completed their training at its close.

Length of training course.

2. Of those who had completed their course during 1860,—

2 had remained in the School for 6 months.

1	do.	5	"
1	do.	4½	"
1	do.	3½	"
2	do.	3	"
2	do.	2	"
3	do.	1	"

It will be seen from this, that the period of training has varied during the year, from one (1) month to six (6) months; whilst the average length of course has been only two (2) months and a few days.

Irregularity in length of course, and causes thereof.

3. The principal causes of this irregularity have been: First—the number of vacancies in Schools in your Lordship's diocese, which vacancies have chiefly been caused by the creation of upwards of fifteen (15) new Schools; the increase to the vote for Denominational Schools, granted by the Parliament, having placed your Lordship in a position to recommend stipends to these places. Secondly—the great variation in the extent of acquirements of the candidates when they enter into training, some requiring a more lengthened period than others to fit them for their future duties.

Routine of admission to Training School.

4. In order to make the statements in this Report more intelligible, I will briefly describe the routine of admission to the Training School:—Candidates must produce satisfactory testimonials of their moral and religious character. This having been done, they are examined—chiefly on paper—in Scripture history, arithmetic, grammar, geography, and the rest of the ordinary subjects of instruction in Primary Schools. If they pass satisfactorily this test, they are admitted to one month's probationary training, one-half of which is spent in the Model School in actual teaching. Should the report of the Training and Model School Masters be favourable, as to the capabilities of the candidates, they are permitted to remain and complete the (nominal) six month's course. During the time of training, probational included, candidates are allowed thirty shillings (30s.) per week, or at the rate of £78 per annum, for their support. It is understood that candidates should be married men, in order that their wives may teach needlework in the Schools to which their husbands may be appointed. Some single young men, however, who have had sisters competent to assist in, and willing to accompany them to Schools, have been admitted to training during the year, and appointed to Schools. With respect to those who have offered themselves for training, and have been declined, I may state that five (5) were ineligible on account of age, some being more than 50 years old; four (4) in consequence of unsatisfactory testimonials as to moral and religious character; and five (5) could not pass the preliminary examination.

Routine of Study.

5. Having described the mode of admission, I will now briefly point out the order of study pursued by the successful candidates. The subjects of the curriculum are—reading, penmanship, grammar, geography, arithmetic, Scripture history and Liturgical instruction, and School management. The theoretical part of these subjects is taught by myself, in a room set apart for that purpose; while the practice of such knowledge is carried out in the Model School, under the superintendence of the Head Master, Mr. John Huffer. The amount of time devoted to each of these branches varies with, and is regulated by the (probable) length of stay of each candidate; but it may be stated, generally, that an equal portion is given to each. While under my direct personal instruction the candidates do as much of their work as possible on paper; especially is this the case in writing, at home, reproductions of the lessons or lectures delivered during the day. The work in the School takes the form of—

- (a) Class teaching;
- (b) Preparation and giving of lessons to groups or divisions;
- (c) Superintending, in rotation, the three (3) divisions;
- (d) Taking sole charge, in class-room, of junior School.

In order that candidates may follow up, in their own Schools, the instruction which has been begun in this, each, on leaving, is supplied with such books as he has been in the habit of using, and some others of a similar character. By this means every candidate has with him, in his own School, the foundation or nucleus of a Teacher's library, formed without expense to himself.

Results of Training.

6. The results of these attempts at training during the past year are, on the whole, satisfactory; but only so when regarded in the light of attempts. To suppose that even in six (6) months a man could be thoroughly trained for the office of Teacher would be absurd. It would be nearer the truth if we put years in lieu of months. With respect to those (12) who have gone out from us as Teachers, I believe that five (5) would pass with credit an examination for Class II. (vide Appendix A), and the rest for Class I. The second (2nd) class men would be competent to conduct efficiently—both as disciplinarians and Teachers—a mixed School of (say) eighty (80) children; and the others would satisfactorily fill the post of Master in a small country School, where the children remain just long enough to require the rudiments of education. With regard to the moral character of these candidates, I can refer your Lordship, with confidence, to the several Local Boards attached to their respective Schools.

7. In concluding this Report I would remark, that in the absence of any regular or authorized systematic test of the standing of the Teachers, both candidate and others, of your Lordship's Schools, I regret that I can offer no specific details other than those hinted at in section 6, as to the result of the labours of the past year. And I cannot conceal from myself, what your Lordship will be able from personal knowledge to uphold and confirm, this belief and strong conviction, viz.—that, unless some means of regular inspection and classification of the Schools and Teachers in your Diocese be soon devised, all the efforts that may be made at the beginning will fail, permanently and effectively, to raise the standard of elementary education in our Schools. In hope, however, that one result of the increased grant to Denominational Schools may be an effort made in this direction, the department under my charge continues to prepare the way for raising the character and tone of Denominational Education.

I have, &c.,

The Right Reverend
The Lord Bishop of Sydney.

ISAAC COBURN,
Training Master.

Enclosure

[Enclosure in Appendix E.]

APPENDIX A.

CLASS I.

Candidates for this Class will be required :—

1. To read with fluency, and due regard to emphasis, and punctuation, any passage selected from Reading Book, No. 3, I.N.B.,* or S.P.C.K.
2. To write a clear and legible hand, and exhibit a knowledge of the rules of penmanship.
3. To write, from dictation, with correct spelling and punctuation, any passage selected from Reading Book No. 3, I.N.B.,* or S.P.C.K.
4. To be thoroughly acquainted with numeration and notation, first four rules (simple and compound) and reduction ; to understand simple proportion, and to be able to work sums in these rules with facility, neatness, and accuracy.
5. To know the parts of speech, and their signification ; and to be able to parse and analyze any simple passage in prose.
6. To be acquainted with great divisions of the globe, and with local geography of Europe, Palestine, and Australia.

CLASS II.

The candidates for promotion to this Class will be required :—

1. To read with ease, and expression, and to be familiar with the principles of reading, and with the principles and difficulties of pronunciation.
2. To write, from dictation, in a neat and legible hand, with correct spelling and punctuation, any passage, selected from the new series of the S.P.C.K. Lesson Book, or I.N.B.
3. To know compound proportion, fractions, vulgar and decimal ; practice, simple interest, involution, and extraction of the square root ; and to be acquainted with the rules of mental arithmetic.
4. To be able to analyze and parse any sentence in prose—simple, or complex—selected from any of the first four Lesson Books, giving the roots, prefixes and affixes.
5. To know the elements of mathematical and physical geography, with the general geography of the other four divisions of the globe, especially that of Australia, and to be acquainted with the map of Palestine.
6. To know duodecimal multiplication, and the measurement of plane surfaces.
7. To be familiar with the improved methods of teaching, and with the rules and regulations of the Denominational School Board.

* I.N.B.—Irish National Board. S.P.C.K.—Society for Promoting Christian Knowledge.

1861.

NEW SOUTH WALES.

NATIONAL EDUCATION.

(REPORT FOR 1860.)

Presented to both Houses of Parliament, by Command.

THIRTEENTH REPORT OF THE COMMISSIONERS OF NATIONAL
EDUCATION IN NEW SOUTH WALES.*REPORT for the Year 1860.*To His Excellency the Right Honorable SIR JOHN YOUNG, Bart.,
Governor-in-Chief of New South Wales, &c., &c.

MAY IT PLEASE YOUR EXCELLENCY :—

We, the Commissioners of National Education in New South Wales, beg to
submit to your Excellency this our Thirteenth Report.

1.—SCHOOLS.

By a Return hereunto appended it will be seen that, during the year, we had 144 Appendix A.
Schools in operation, attended in the aggregate by 9,256 children. 25 of these Schools were
opened in 1860, namely :—

1. Aberglasslyn.	14. Myrtleville.
2. Adelong.	15. Omega Retreat.
3. Avisford.	16. Pitt Street.
4. Avondale.	17. Pyree.
5. Bendemeer.	18. Parkhaugh.
6. Broughton Creek.	19. Richmond.
7. Balmain.	20. Rockley.
8. Guntawang.	21. Strontian Park.
9. Kempsey West.	22. Telegerry.
10. Limekilns.	23. Tuena.
11. Luddenham.	24. Waller Owang.
12. Marulan.	25. Wagga Wagga.
13. Marengo.	

Eleven vested Schools were erected during the year, or were in progress of erection at
its close, viz. :—

1. Aberglasslyn.	7. Mount Macquarie.
2. Bendemeer.	8. Myrtleville.
3. Blaney.	9. Omega Retreat.
4. Binalong.	10. Wagga Wagga.
5. Evans' Plain.	11. Wallalong.
6. Gledswood.	

And

And twenty-five School buildings (vested) received important additions and improvements, namely:—

1. Albury.	14. Mudgee.
2. Brookfield.	15. Murrurundi.
3. Bega.	16. Orange.
4. Cambewarra.	17. Parading Ground.
5. Cleveland-street.	18. Paddington.
6. Dubbo.	19. Port Macquarie
7. Fort-street.	20. Seabam.
8. Gundagai.	21. Singleton.
9. Hinton.	22. Tamworth.
10. Jamberoo.	23. Wattle Flat.
11. Louisa Creek.	24. William-street.
12. Major's Creek.	25. Wollongong.
13. Meadow Flat.	

Appendix B.

A Return hereunto appended will shew that thirty-four new Schools were sought to be established under the Board during 1860, at the places therein mentioned; and what action was taken by the Board in each case.

2.—GRANTS IN AID OF SCHOOL BUILDINGS.

Appendix C.

The aggregate amount paid for the erection of School buildings, and for repairs, rent, and furniture for 1860, was £3,915 5s. 3d. At the close of the year we had pledged sums for similar purposes amounting to £1,900, contingent on the vote for 1861, being double the amount of local contributions promised, to be raised in accordance with our published regulations. The amount mentioned above as paid for School buildings, &c., does not include the sums locally contributed, but refers only to the expenditure of the public money.

3.—SALARIES.

The salaries and allowances paid to Teachers, officers, and servants of the Corporation for the year amounted, in all, to £17,360 6s. 6d., of which sum £14,535 0s. 8d. was paid to Teachers; and £2,825 5s. 10d. to the other officers, namely, Secretary, Chief Inspector, and District Inspectors (3), Accountant, Clerk, Architect, and Messengers (2). The gross amount of fees paid by the children during 1860, was £7,838 5s. 6d., shewing a decrease of £407 3s. 6d. on the fees paid for 1859.

4.—CLASSIFICATION OF TEACHERS.

In continuation of our previous efforts for raising the qualifications of Teachers, by affording frequent opportunities for examination, we endeavoured, during the past year, to devise means for making the examinations real tests of ability, and thus to give a value to the Board's certificates, which, in course of time, the public would recognise and appreciate. With this view, we invited the assistance and co-operation, as Examiners, of gentlemen eminent in their respective departments of learning, and thoroughly competent to examine Teachers, and to form a true estimate of their acquirements. The undermentioned gentlemen having intimated their willingness to undertake the duties of the office, were appointed a Board of Examiners, to examine Teachers, and report upon their qualifications in the subjects set opposite their names.

Dr. Woolley...	Logic and Mental Philosophy.
Professor Pell	Mathematic and Natural Philosophy.
W. J. Stephens, M.A.	Classics and English Literature.

Annex B.

These arrangements were communicated to the Teachers in a circular, bearing date 1st November, 1860, of which a copy is annexed to this Report.

The

The Commissioners feel much pleasure in adverting to the fact, that the heads of some of the highest educational institutions in the Colony, are, by this arrangement, brought into direct connection with Primary Schools, and that the National System will receive the benefit of their ability and experience.

5.—TRAINING DEPARTMENT.

The arrangements for training candidates, in force during 1859, were continued in 1860.

6.—INSPECTION OF SCHOOLS.

The number of National Schools having increased considerably during 1859, we found it necessary early in 1860, to appoint an Inspector to supervise the Schools in the Southern Districts. This office was conferred upon Mr. A. L. Forbes, M.A., who had been upwards of six years in the Board's service in the Singleton National School, and held a certificate of the first class. Each district was, consequently, placed in charge of an Inspector. In other respects the arrangements for inspection remained the same as in the previous year.

The following report from the Chief and District Inspectors embodies their joint views, as expressed during their conference in Sydney, in the month of January last, on the state of the National Schools in the Colony, the comprehensive nature of which will render any lengthy observations of our own thereon unnecessary.

GENERAL REPORT upon the condition of National Schools in 1860.

I.—ARRANGEMENTS FOR INSPECTION.

At the beginning of the year, the staff of Inspectors was increased by the appointment of an officer to supervise the Schools in the Southern District. As by this appointment each of the four districts was placed in charge of an Inspector, the arrangements for the examination of Schools assumed a more complete character than they had possessed at any previous time; and it was confidently expected that the duties of inspection would have been carried out in a more thorough and systematic manner than had been possible with the limited agency employed in former years. These arrangements contemplated the visitation of every National School in the Colony, although some of them are situated at great distances from the Inspectors' stations; and the frequent inspection of those which, from their position, could be reached with less expenditure of time and labour.

II.—AMOUNT OF INSPECTION.

The extraordinary character of the weather during nearly the whole year, and the numerous floods that occurred, especially on the eastern side of the dividing range, seriously deranged the scheme of inspection, both by preventing the pupils from attending School for somewhat lengthened periods, and by rendering the roads impassable, and thus stopping the Inspectors on their tours. These facts will account, in a great measure, for the circumstance that several Schools, not remotely situated, were left unvisited, and that others were examined once only, instead of two or three times. The following Table will shew the number of Schools inspected in each district:—

DISTRICTS.	No. of Schools.		
	Visited.	Not Visited.	TOTAL.
Metropolitan	35	7	42
Northern	50	3	53
Western	33	3	36
Southern	18	3	21
TOTAL	136	16	152

NOTE.—In the case of four Schools, each consisting of three departments, under responsible Teachers, each department was considered as a separate School.

Of

Of the Schools inspected—

58	received one visit.
46	„ two visits.
22	„ three visits.
10	„ four or more visits.

In addition to the inspection of Schools in operation, visits were paid by the Inspectors to various localities for the purpose of inquiring into the merits of applications for aid in the establishment of Schools; and of giving information on the principles of the National System, and the means by which participation in its advantages might be secured. The duties performed by the Inspectors, in connection with Schools, may be thus summed up:—

Inspection of Schools in operation	261	visits.
„ of proposed Schools	34	„
Visits for the purpose of affording information	30	„
TOTAL	325	„

The labours of the Inspectors, in connexion with the examination of Teachers and candidates, will form the subject of remark in a subsequent portion of this Report.

We annex Tables, marked A and B, which exhibit the number of pupils on the Rolls of the various Schools inspected on the day of examination, and also the number actually present on the occasion, with their ages and sexes.

On comparing these Tables with those contained in the Report for the preceding year, it will be found that, in some cases, the number on the Roll and in attendance had considerably declined. As a different state of things might have been expected, it may be desirable to explain the causes which appear to us to have produced this result. The first of these causes was the inclemency or uncertainty of the weather, and the continual recurrence of floods, which rendered it impossible, in many instances, for the children to reach the School. In some parts of the Colony scarcely two consecutive dry weeks occurred throughout the year; and, in the numerous localities in which children had to walk two or three miles to School, this circumstance proved a serious obstacle to regularity of attendance. The prevalence of influenza and measles was not less effectual in preventing the attendance of pupils, and in several Schools, owing to this cause, not half the average number was present at the examination. Again, during 1860, many children, who under ordinary circumstances would

would have continued at School, were withdrawn to assist their parents in farming operations. The additional demands upon the exertions of persons engaged in agricultural pursuits, required to repair damages occasioned by the floods, and their inability to employ hired labour, compelled many to have recourse to the services of their children, and thus led to the premature removal from School of a considerable number. These causes affected the attendance of pupils for at least nine months of the year.

III.—CHARACTER OF THE INSPECTION.

The process of inspection has already been minutely described; it only remains to state that, while the inspection was equally as minute and careful as in former years, attention was especially directed to a few prominent points, requiring more than ordinary care. Among these special subjects of inquiry were the questions as to the efficacy of the local supervision, the steps to be taken for securing regularity of attendance, and the mean of improving the instruction in a few branches of School instruction.

IV.—CONDITION OF SCHOOLS INSPECTED.

We append a detailed statement, shewing the condition in which the various Schools Annex A. were found at the time of examination. The state of each School is described under the heads of—

1. Material condition.
2. Moral character.
3. Subjects and methods of instruction.
4. Proficiency of the pupils.

In some cases, where Schools had been sufficiently long in operation to enable the Inspector to form a decided opinion, the effect of the discipline is described as the Moral Tone, and the result of the instruction is expressed by the terms Mental Capacity or Power, or Development of the Intelligence. When, in these cases, a decidedly favourable opinion is stated, it may be regarded as a strong testimony to the efficiency of the School, and as affording ground for present satisfaction, and for future hope. Some misconceptions having arisen respecting the detailed statement of Schools inspected in former years, we think it incumbent upon us to explain that the highest possible standard was kept in view in framing those Reports. In every case, the School visited was compared with the best known model, either in the home country or in the Colony. Thus, in every aspect, the School was measured by the standard of decided excellence, and no allowance was made for difference of circumstances. We still deem it advisable to retain this high standard, partly because circumstances vary so greatly as to render it difficult to fix upon any other, and partly because excellence cannot be generally attained, except by working up to a perfect model.

V.—MATERIAL STATE OF SCHOOLS.

The situations of the Schools inspected may be thus described:—

	<small>Situation.</small>
Good or fair	114
Tolerable	13
Indifferent or bad	9
TOTAL	136

Considerable improvement is manifest in the condition of the School buildings, the School buildings. number of those reported as indifferent or bad, being smaller than 1859, although many new Schools were established during last year. The condition of the School buildings is thus represented—

Good or fair	88
Tolerable or moderate	34
Indifferent or bad	14
TOTAL	136

Allusion has been made in former Reports, to the great value of a playground, in Playgrounds. connexion with Schools; and it is with much regret, that we are compelled to notice the

total

total absence of these adjuncts in no less than ten instances. Some of these are situated in Sydney, and in the larger towns of the Colony, where the high price of land renders it difficult to secure a suitable piece of ground for the purpose; and in other cases, there is plenty of unoccupied land, available for the purpose of recreation, but not otherwise suitably provided. No opportunity has been lost, of impressing upon the minds of persons interested in the establishment and success of National Schools, the importance of due attention to this point. The following is the character of the playground accommodation in the Schools visited:—

Good or fair	99
Tolerable or moderate	24
Indifferent or bad	3
None	10
TOTAL	136

Furniture.

The opinion of the local managers of Schools as to what constituted a sufficient and suitable supply of furniture, appears to have undergone considerable changes, inasmuch as a progressive improvement has taken place since 1858, as regards both the kind and the amount. As evidence of the more correct views on this head that now obtain, we refer to the Table annexed.

Number of Schools in which the supply of furniture is—

Good or fair	90
Tolerable or moderate	34
Indifferent or bad	12
TOTAL	136

Apparatus.

The amount of interest felt in a School in any locality, and the character of the patrons, may often be inferred from the quantity and description of the apparatus with which it is supplied. For when a School is adequately provided with maps, diagrams, blackboards, and other necessary articles, it is generally observed that the people are interested in the welfare of the School, and that the managers are persons holding enlightened views on Educational matters. On the other hand, when the School is scantily supplied, it is equally probable that those charged with the local guardianship of the School, either lack interest in its well-being, or fail to discern the necessity for providing the requisite material appliances for the use of the Teacher. Suggestions have been made from time to time by the Inspectors to local patrons on this subject, and, in some instances, with beneficial results. Still it must be acknowledged, that the *duty* of providing School requisites, is far from being generally felt or acted upon, and that, in many cases, a disposition has been evinced to deny the utility and necessity of such articles. In consequence of this feeling, it not unfrequently happens that Schools have to rely entirely upon the liberality of a few persons for obtaining a proper supply of apparatus; but, however praiseworthy the motive which prompts the contributors in making their donations, it must be a matter of extreme regret that there is not some other means of securing the object in view, than dependence upon the *charity* of a small section of the community. In expressing these opinions, we are not unmindful of the many difficulties to be encountered in remote country districts, in obtaining the necessary materials, especially when they have to be procured from the metropolis and conveyed long distances by dray. The year 1860 was a year of peculiar difficulty in this respect. That some improvement has been effected will appear from the following Table.

Number of Schools in which the supply of apparatus is—

Good or fair	88
Tolerable or moderate	32
Indifferent or bad	16
TOTAL	136

Books.

As regards the supply of books, it may be remarked that some Schools reported as badly provided, were newly established, and that, owing to the condition of the roads, the first

first stock granted to them by the Commissioners did not reach in time for the Inspector's visit. In some cases, books have been months in course of transmission before they arrived at their destination. This fact will account, in some measure, for the apparent want of improvement in respect of books, discernable in the following statement.

Number of Schools in which the supply of books is—

Good or fair	101
Tolcrable or moderate	27
Indifferent or bad	8
TOTAL							136

It is unnecessary to describe minutely the records kept in National Schools, a full ^{Registers.} account having been given in a previous Report. It may not be out of place, however, to repeat the opinion, that carefully preserved and correctly kept registers are frequently indications of well-managed Schools and conscientious Teachers.

Number of Schools in which the records are—

Correct	110
Incorrect	15
Incomplete	9
None	2
TOTAL							136

VI.—MORAL CHARACTER OF SCHOOLS.

While we are unable to report any improvement in the punctuality of the attendance ^{Punctuality.} of pupils during the past year, it is satisfactory to be able to state that, notwithstanding the hindrances caused by inclement weather and bad roads, the Schools have not visibly deteriorated in this respect. The condition of the Schools, as regards punctuality, may be thus stated,

Number of Schools in which the punctuality is—

Good or fair	80
Tolerable or moderate	32
Indifferent or bad	24
TOTAL							136

The extreme irregularity of the pupils in Country Schools has been adverted to in ^{Regularity.} former Reports, and we have expressed an opinion that this defect appears to grow more formidable every year. We regret that the past year's experience confirms us in this belief. Even when allowances are made for the many interruptions to which the Schools were subjected in 1860, it is plainly evident that no improvement has been effected. The knowledge of the wide-spread existence of this evil, and of its influence in neutralizing educational effort, has prompted us to study the question in all its bearings, in the hope that some practical remedy might suggest itself, by means of which a better state of things might be brought about, and the youth of the Colony no longer be debarred from participation in the advantages afforded by early instruction. We can add little, however, to the information contained in our last Report, though the following remarks may be of assistance in discussing the subject. The question is of wider and deeper import that would appear on the surface, as it involves the consideration of several points in the social economy of the people. Parents may be divided into three classes: 1st.—Those who send their children regularly to school; 2ndly.—Those who send them with varying degrees of irregularity; and 3rdly.—Those who keep their children at home entirely, or send them infrequently to School. Of the first class, some are actuated by a sense of duty, while others are influenced by the knowledge of the pecuniary value of Education. As the result in both cases is the same, it is not material, in this point of view, to inquire into the motive which prompts a parent to discharge his duty. In the second class, are to be found persons who act from
proper

proper motives, but who are too weak and vacillating in their own characters to follow out a systematic line of conduct which they know to be proper. The customs of the Colony unfortunately furnish such persons with excuses for their neglect. Ignorance of the value of time, lateness in rising, a trifling accident, or their desire to save the small sum paid as School fees,—all these supply excuses for the detention of children from School, to say nothing of the numerous cases in which parental caprice is the only motive. To the same class belong persons whose convictions are on the right side, but with whom the desire of gain is the ruling motive. These persons acknowledge the duty of educating their children; but to save or gain a trifling sum, they will sacrifice the best interests of their children, reconciling their minds to this course by the promise that, at a future time, they shall attend School regularly, and so compensate for the time lost. Persons who, from ignorance and prejudice, are often indifferent, or opposed to Education, constitute the third class. The arguments adduced by people of this class are literally the following:—In one case they say, “We have succeeded without Education,—why should not our children?” On the other hand, the remark is common enough in the mouths of persons who have themselves been educated, “What good has our Education been to us? None; we will not, therefore, waste our money in procuring it for our children.” We believe that, sooner or later, a legislative enactment must be passed to render Education to some extent compulsory. We are further of opinion that such an act would meet with very general concurrence, and would not practically interfere with the services of children to their parents in any material degree. Supposing that the law required all children, within certain ages, to attend some School for three hours on five days in every week, we think no serious objection would be raised to the scheme, and that, after a fair trial, it would be hailed as a practical benefit to all. It may be remarked, that a compulsory measure of the kind mentioned would not in any way interfere with the existing practice of the first class of parents who already, from principle, do all, and even more, than such a law would require. To many in the second class, it would be a positive relief, inasmuch as it would supply a stimulus—a stronger motive than now exists, and the want of which is much felt; while to others it would simply act as a curb upon their love of money. Persons who, from ignorance or prejudice, refuse to educate their children, would, perhaps, inveigh against such a law as an infringement upon the liberty of the subject. We do not undervalue that privilege; but, on the other hand, we cannot concede that it entitles any one to omit the performance of an obvious duty to the State, especially in a country where every individual, without distinction, will be entitled, on attaining a mature age, to participate in political privileges which Education can alone qualify them to employ advantageously for themselves and others. Such persons as those before alluded to are seldom amenable to reason, but require the exercise of authority to make them observant of their social duties. Before an Act were passed, making Education compulsory, the existing arrangements would need to undergo important modifications, or the working of the law would be nullified, and its requirements evaded. The general character of the attendance in National Schools may be gathered from the annexed Table:—

Number of Schools in which the regularity is—						
Good or fair	56
Tolerable or good	50
Indifferent or bad	30
TOTAL						136

Cleanliness.

Attention to personal cleanliness continues to characterize a large majority of National Schools, and constitutes one of their most pleasing features. On the whole, the condition of the Schools in this point has improved, fewer Schools being reported upon unfavourably, although the total number has increased since 1859. The following Table will exhibit this fact:—

Number of Schools in which cleanliness is—						
Good or fair	106
Tolerable or moderate	24
Indifferent or bad	6
TOTAL						136

We have constantly endeavoured to set before the Teachers a high standard by *Order*, which to judge of the *order* of their Schools. While cheerfully acknowledging the very considerable success of the more conscientious and painstaking, we cannot avoid the conclusion that a much higher standard of order might have been more generally attained. Teachers either fail to realize the importance of the subject in its influence upon the formation of the characters of their pupils, or they are unwilling to give themselves the trouble necessary to produce the desired results. They rest contented with a degree of success that reaches only far enough to shield them from positive blame. The bearing of *order* upon the moral tone of the School is not perceived, and hence Teachers are apt to regard the mechanical means employed to secure order as the results instead of the instruments, forgetting that the effect remaining after the mechanism has retired from view and is no longer felt, gives to the order of the School its proper value.

Number of Schools in which the order is—

Good or fair	97
Tolerable or moderate	30
Indifferent or bad	9
TOTAL						136

Under present circumstances, it is impossible wholly to dispense with corporal *Government*, punishment in the government of a School. In general, it is little resorted to in National Schools, and only in those extreme cases in which moral suasion has been found to fail. Perhaps the general tendency is towards laxity in the government of our Schools, though, in a few instances, undue severity has been noticed.

Number of Schools in which the government is—

Good or fair	91	
Tolerable or moderate	29	
Indifferent or bad	16	
TOTAL						136

In this Table, those Schools are rated as indifferent or bad, as respects government, in which the Teacher is either too severe, or too lax in his discipline.

VII.—INSTRUCTION.

Compliance with the provisions of the Table of Minimum Attainments, as the *Classification*, standard for the arrangement of the various classes, has been rigidly insisted upon by the Inspectors, and, in general, has been observed by the Teachers. Instances have occurred in which Teachers, from underrating the importance of some subjects, or from deference to the wishes of ill judging parents, have departed from the proper principles of classification, and have, consequently, entailed upon themselves greater difficulties in the instruction of the pupils. But on the whole, there is little cause for complaint on this score, as may be inferred from the following Table.

Number of Schools in which the classification is—

Good or fair	99	
Tolerable or moderate	28	
Indifferent or bad	9	
TOTAL						136

The occupation of the pupils in National Schools is regulated by the *Time Table*, *Occupation*, which, together with the Table of Minimum Attainments, and the Programme of Lessons, forms a series of documents by which the course of instruction is defined and systematized. In some cases, difficulty has been experienced in causing Teachers to construct Time Tables and Programmes of Lessons. This has arisen, in some measure, from ignorance and want of skill, from conceit, or in a few instances, from reluctance on the part of Teachers, to commit themselves to a course which supplies a check upon their own proceedings. On the whole, however, there is evidence that considerable pains have been taken to secure an equitable distribution of time among the various subjects and classes, and to provide stated and suitable occupations for the pupils. With the exceptions above alluded to, the Time Tables appear to be faithfully observed.

Number of Schools in which the arrangement of occupations is—

Good or fair	97
Tolerable or moderate	26
Indifferent or bad	13
TOTAL	136

Subjects.

All the ordinary subjects of instruction are taught in nearly every National School, and the giving of object lessons has become much more general. The number of Schools is still small, in which the pupils remain sufficiently long to profit by instruction in the higher branches, although a considerable proportion of the Teachers are qualified to impart it, in its elementary stages at least. The extra subjects taught and the number of Schools are given below :—

Vocal Music	21
Outline Drawing	22
Algebra	8
Mensuration	8
Geometry	9
Latin	4
French	3

The number of pupils receiving instruction in the various subjects is exhibited in the following Table :—

Reading	6,053
Writing	5,681
Arithmetic	5,751
Grammar	3,343
Geography	3,912

Methods.

No decided improvement has been manifested during the past year in the methods of teaching employed: The Teachers have, generally speaking, put forth a greater amount of energy, and have been guided in their work by more definite aims. But, with a few marked exceptions, they are not in the habit of studying methods and comparing results, with the view of ascertaining which are the most suitable to their own powers and to the circumstances of the pupils. Independently of the want of skill, there are other faults of method which only require industry for their remedy. Such are, the omission to test the effect of their teaching by searching examination; neglecting to revise frequently lessons formerly given, and the disposition to rest satisfied with small and imperfect results. The character of the methods in use may be gleaned from the annexed Table :—

Number of Schools in which the methods are—

Good or fair	53
Tolerable or moderate	54
Indifferent or bad	26
TOTAL	136

Character of the instruction.

The character of the instruction has not improved to any considerable extent during the year. The theory of National Schools, as regards the course of instruction, has not yet received a sufficiently general exemplification in practice. This conclusion will have been anticipated from previous portions of this Report. Deficiency of material appliances, irregularity in the pupils' attendance, their early removal from School, and want of skill and industry on the part of the Teachers, may be assigned as the most evident causes of the want of improvement. The remarks which follow are intended to describe the character of the instruction in each of the ordinary branches.

Reading.

At the commencement of the year it was agreed by the Inspectors, that reading, from the comparatively imperfect results hitherto attained, from its importance to the pupil in after life, and from its utility as a means of mental culture, should receive a larger share of attention than any other subject. In the merely mechanical part of this subject, the instruction has not materially improved. Few Teachers, we suspect, study reading as an *art*: they appear not to attach sufficient importance to it as a means of expressing sentiment, feeling, and thought. Hence there is still much monotonous and inexpressive reading in our Schools. But in other respects, the instruction in reading has been tolerably successful. The lessons have been more thoroughly prepared, more effectively treated, and more fully comprehended by the pupils. When examined upon the matter of their lessons, the pupils have

have answered more readily and exactly, and with much greater life and spirit. Teachers still complain of the difficulty they experience in convincing unreasonable people that the mere enunciation of words from a book is not "reading," but that it is a practice of no educational value, unless the information conveyed by the words, is properly understood. In this, as in some other departments of School instruction, it is necessary to teach the parents, before the children can be effectively dealt with. Ignorant themselves, it is not surprising that parents fail to realize the true object of reading, and thus impede the Teacher's exertions by their prejudices.

No decided advance has been made in the teaching of this branch, though it would Writing. convey a wrong impression of the fact, to omit to state that there has been no falling off as regards care and attention.

As in previous years, spelling is taught chiefly in connection with reading and Spelling. dictation lessons, and is practically impressed upon the minds of the pupils by the reproduction of object and other lessons in writing.

Somewhat more satisfactory results have been attained in the higher branches of Arithmetic. arithmetic, which is now very generally taught demonstratively, that is from principles, rather than rules. This advance is chiefly due to the increased use of the black board in giving explanations of arithmetical principles. The elementary operations of arithmetic are still taught to the junior classes, either in a mechanical or in an abstract manner, and the instruction consequently fails to produce the desired effect. Unless arithmetic be taught to children in a sound and effectual manner at the commencement, their subsequent progress must be greatly impeded, and their notions become so confused as to render proper instruction a work of great difficulty.

Except as regards the elementary portions, we are unable to report any advance Grammar of skill in treating this subject. Success in teaching grammar may be regarded as one of the tests of a Teacher's skill; and we accordingly find that none but the better class of Teachers are capable of leading their pupils forward beyond the introductory parts of the subject. The reasons assigned in our Report for 1859, for the defective teaching of grammar still hold good. They are, want of knowledge on the part of the Teachers, use of inappropriate text books, and absence of definite aims and systematic arrangement of lessons.

In teaching so extensive a subject as geography, it is but reasonable to expect Geography. that errors of fact and of method may occasionally be discernable; but, on the whole, there is little ground for dissatisfaction with the manner in which this branch is treated. The errors of method have been neglect of frequent recapitulation, irrelevancy, and want of systematic arrangement of facts. Mistakes have frequently been committed, from the omission, on the part of long established Teachers, to read up the subject from modern books. Since geography is constantly receiving accessions of new facts, as well as modifications of statements formerly received as correct, it is obvious that a Teacher who relinquishes the study of the subject and rests content with the knowledge already acquired, will, in time, fall behind and become liable to error. The instruction given by such Teachers must, consequently, be defective or unsound. No more striking example of this fact could be adduced than one which actually occurred in a School in charge of a Teacher of considerable skill, but deficient information in geography. Being ignorant of the explorations of Dr. Livingstone, he had described the whole interior of the southern part of Africa as a barren desert which the foot of white man had never trod. And, notwithstanding that Australian geography is now much better understood and taught, it is not uncommon to find children describe the interior of Australia as a vast sandy desert, rivalling the Sahara in extent and sterility.

Object lessons have been more generally taught during the past year, and some of Object lessons. the Teachers have exhibited increased skill in their treatment. But much remains to be done before these lessons can be viewed as successfully given. There is in many Teachers a striking absence of resource, which prevents their seeing that the "common things" around them are the most suitable for object lessons, both from the fact that they lie within the sphere of their pupils' observation, and because they are easily understood, and convey much useful information.

While no great increase of knowledge was exhibited last year, it is satisfactory to Scripture lessons know that the leading facts of Scripture, especially of those portions contained in the
 Scripture

Scripture lessons, No. 1 of the Old and New Testaments, are well understood and remembered. The principles of the general lesson have been regularly inculcated.

Proficiency of
the pupils.

We annex Tables, shewing the proficiency of the pupils who were examined in the various ordinary branches.

TOTALS	2,878	1,034	3,912

The amount of proficiency exhibited in these Tables, compared with that shown in our Report of 1859, is not of an encouraging description. There is no doubt that the character of the seasons and the restrictions upon School attendance, produced by the frequent floods, have materially contributed to bring about this state of things. A more favourable year may probably enable us to exhibit more satisfactory results of the teaching in National Schools.

VIII.—LOCAL SUPERVISION.

No perceptible improvement in the mode in which the duty of local supervision has been discharged, can be recorded as one of the results of last year's work. With the exception of the small number of Schools in which the local patrons are qualified for the office by education, social position, and influence, interest in Education, and high sense of duty—the defects noted in our Report for 1859—remain in full force, and it is questionable whether, on the whole, matters have not grown worse. In many places the local patrons continue to be as unsuitable as in former years; their visits to the School and their meetings on School business occur at long intervals, and are irregularly attended, and their proceedings are seldom recorded. So far as zealous and intelligent co-operation with the Teacher is concerned, the local patrons are, in not a few cases, utterly useless, and, in some, positively injurious to the best interests of the Schools. In accounting for this state of things, it may be remarked, in the first place, that many persons, otherwise quite eligible, neglect their duties as patrons, from the pressure of private business, or public business of another kind. It would scarcely be fair to blame these persons, however much the circumstance may be regretted

regretted; for even if they resigned the office, the duties of which they are unable to fulfil, it would often prove most difficult to find equally suitable successors. The utility of the system of local patronage would be open to serious question, were it not for its complete success in the case of a few Schools more fortunate than the majority. We are inclined to think that some considerable modifications in the system are necessary, to make it generally efficient. Suggestions on some of these points are included in this Report, and others in the Report for 1859.

IX.—TEACHERS.

While some amelioration has undoubtedly been effected in the position of Teachers, ^{Position of Teachers.} during the past year, the instances are still numerous in which much suffering has been occasioned by the arbitrary conduct of local patrons, and the unreasonable interference of parents. In one case, the local patrons of a School met, and without previous notice, reduced the School fees fifty per cent., thus depriving the Teacher of a considerable proportion of his emoluments, at a time when his wife was suffering from an illness, of which she died shortly after. It is true, such practices arise from ignorance, rather than design; and, as the steps taken to acquaint local patrons with their duties gradually accomplish that object, it is to be hoped, that grounds of complaint on this score will be proportionately diminished.

The average amount of emoluments, from all sources, received by National Teachers of all classes, including probationers, was one hundred and twenty-nine pounds eighteen shillings, of which eighty-nine pounds three shillings constitute the salary paid by the Board, and the remainder was derived from School fees. In addition to these sums, each Teacher of a National School in the country had a residence rent free.

The following Table shows the average amount of emolument received by Teachers of each grade in country Schools, exclusive of residence.

CLASS OF TEACHERS.	EMOLUMENTS.		
	Salary.	Fees.	TOTAL.
	£ s.	£ s.	£ s.
First Class	144 0	49 9	193 9
Second Class	113 7	51 7	164 14
Third Class and Probationers	78 14	36 17	115 11

Compared with a statement of Teachers' incomes, contained in the Report for 1859, the foregoing figures would appear to indicate a considerable reduction in the average amount of emolument. In some respects, the diminution is more apparent than real. For example, the average amount of fixed salary appears to be less by three pounds than in last year, but this arises simply from the appointment of a number of Teachers as probationers, but does not imply that the salaries of classified Teachers have been reduced. It is true that, with a larger number of Schools in operation, a smaller aggregate amount of fees was paid in 1860. Various causes may be assigned in explanation of this fact: increasing disinclination to pay School fees, and in some instances, doubtless, inability to pay, arising out of the impoverished state of the country in consequence of floods and bad seasons.

The qualifications of the Teachers employed during the year in the Schools that were inspected may be ascertained from the following Table, which exhibits the number holding each grade of classification, pupil Teachers not being included:—

NO. OF TEACHERS HOLDING CERTIFICATES OF	SECTION A.	SECTION B.	TOTAL.
First Class.. .. .	1	3	4
Second Class	21	25	46
Third Class	39	34	73
Probationists	60
			173

Efforts

Efforts have been made to induce the Teachers to raise their qualifications, by affording opportunities for re-examination, with a view to gain a higher classification and proportionate increase of salary. At the same time, in order to prevent Teachers from retrograding, all beneath a certain rank have been required to undergo examination annually. The issue of the experiment has been of a kind to demonstrate the absolute necessity for this regulation, but in no other respect has the result been of a gratifying character. Comparatively few Teachers have voluntarily sought re-examination for the purpose of securing a higher grade of classification, and among those whose examination was compulsory not a few proved that their attainments had decreased since leaving the Model School. This result is easily accounted for. While at the Model School, they are subject to a strong and constant stimulus, which incites them to make the greatest exertion in study of which they are capable; but when removed to the country this pressure is removed, and, there being no present necessity for continuous study, their efforts at self-improvement become feeble and intermitting, and gradually cease altogether. While this is the state of things with many Teachers as regards their own personal culture, similar defects may be observed in their mode of managing their Schools. There may be literal obedience to rule, and conscientious discharge of the mechanical round of duties imposed, while the vivifying spirit and animating intelligence are entirely absent. In this point of view, the result of our inspection during the past year appears the least satisfactory. The causes producing the defects complained of are patent. The Teachers to whom we have just referred, having in most cases adopted teaching late in life, have neither the personal cultivation nor the technical skill required for success in their new profession; *nor have they the disposition to labour with sufficient energy for the attainment of these essentials to their own efficiency.* It is not merely that the best part of their lives has been spent in other and uncongenial pursuits—that, as many examples among National Teachers would prove, is no insurmountable barrier to success. The great difficulty is the '*vis inertia*' which characterizes so many Teachers, the impossibility of rousing them from their intellectual apathy and inducing habits of vigorous thought and exertion. It is probable that, after another year's trial of examinations, we may be able to report more favourably on this point, and that the spirit of inquiry and desire for self-improvement which now characterizes but a portion of the National School Teachers may be spread through the whole body. Some allowance must also be made for the fact, that the system of examinations has not yet been fully developed, and that the machinery has hitherto been imperfect and inadequate.

Even supposing all the Teachers now in the Board's service to have become thoroughly efficient, there will yet be a deficient supply of Teachers or candidates to fill vacancies caused by the rapid extension of the National System—that is, of men willing to devote themselves to the scholastic profession for life, and to assume its responsibilities and duties. The remedy for this deficiency that approves itself to our minds as least encumbered with objections, is the gradual extension of the Pupil Teacher System, by which persons are trained and instructed from early youth, for the office of Teacher. Under judicious training, we anticipate much good from the labours of the youth of this country, when they enter upon the business of teaching. With sympathies confined mainly to their own Country, and quickened by patriotic zeal for the advancement of their native land, with hopes and aspirations limited to the noble profession they have chosen, and with the personal culture and technical skill requisite for success, they will be likely to avoid the errors and failings which now render the labours of so many of the present race of Teachers ineffectual and unproductive.

It would be unfair to omit reference to the serious discouragements to which Teachers have been subjected during the past year, and the various impediments to their success. The foregoing portions of this Report will shew that we take pleasure in acknowledging the zeal and energy with which some of the Teachers have struggled against overwhelming difficulties. We believe that, with scarcely an exception, the Teachers in the Board's service are persons of good moral character, and exemplary members of society.

X.—SPECIAL SCHOOLS.

The Model Schools in Sydney suffered the same interruptions from storms and
sickness

sickness as National Schools in the Country Districts. The Table annexed exhibits the condition of these Schools as regards attendance during the year 1860.

SCHOOL AT	Average No. on the Rolls.	Average Daily Attendance.	Amount of School Fees Paid.
Fort-street	1,005	641	£ s. d. 1,215 15 7
William-street	754	461	710 18 6
Cleveland-street	262	170	333 6 9
Paddington	202	124	209 13 10
TOTAL.....	2,243	1,396	2,469 14 8

There is nothing of importance to record in the history of these Schools during the past year, as respects the primary department.

In the training department, twenty-five candidates were instructed and prepared for situations. Eighteen of these succeeded in obtaining certificates and were classified as follows:—

CLASS.	SECTION A.	SECTION B.	TOTAL.
I	1	1
II	4	4
III	4	9	13

The average period of training was two months. The insufficiency of this period has been adverted to in former Reports, but the expensiveness of the only available means of improvement, has hitherto rendered a more satisfactory arrangement impossible.

The District Model School at Mudgee, the only one yet established, still maintains its character and efficiency. The advantages attendant upon the establishment of similar institutions in the other principal country towns of the Colony, have been described on former occasions. For the training of candidates, for the guidance of Teachers already in charge of Schools, for the exposition of the best methods of teaching and of School management, District Model Schools are invaluable and essential.

XI.—GENERAL RESULTS OF INSPECTION.

It will be seen from the foregoing portions of this Report that, during the past year, improvements have been effected in the material state of our schools; that, with the exception of regularity of attendance, the moral tone has been considerably raised; but that the character of the instruction has not been distinguished by any noteworthy increase of skill, though communicated with greater industry and sincerity. Making allowance for the exceptional character of the seasons, the proficiency of the pupils may be regarded as slightly improved. The position, qualifications, and emoluments of Teachers remain nearly as in previous years. While therefore the National System has been steadily advancing as regards the number of Schools, the progress in efficiency has been but small.

XII.—HINDRANCES TO EDUCATION.

In our Report for 1859, we stated, the principal obstacles to educational success to be—

1. The existence of two rival systems.
2. The ignorance of parents.
3. Irregularity of pupils' attendance.
4. Deficiency in professional qualifications on the part of Teachers.

These impediments continue to exist, nor is the force of any of them lessened. It will be observed that the first of all these difficulties is imposed by the Legislature, by whom
it

it is easily removable. We are convinced that the advent of a general system, based on liberal views of Education, would be hailed with satisfaction by a great majority of the colonists; and that, after a fair trial of its working, many, who would now oppose its introduction, would acquiesce in its universal establishment. The second obstacle mentioned, is the fault of the public in its social capacity. No improvement can be expected on this point, unless by the gradual progress of public opinion, and the education of the public mind. Another generation will probably have to grow up before a satisfactory state of things can be anticipated on these grounds. The irregularity of attendance has undoubtedly become worse during the year, and at present there appears to be no reasonable prospect of amelioration, unless some stronger motive than any now existing be induced in the minds of parents to send their children regularly to School. Some steps have been taken to remedy the defective qualifications of Teachers, but as yet the measures initiated for this purpose have been productive of little practical benefit, partly because time is needed to bring them into full operation and observe the results, and partly because they are necessarily partial in their character, and inadequate to cover the whole ground of complaint.

XIII.—SUGGESTIONS FOR FUTURE IMPROVEMENT.

Most of the suggestions contained in our Report for 1859 have been carried out, and now form part of the ordinary administration of the system. The following matters still require consideration :—

School sites. 1. In some localities it is found impossible to procure land for School sites, either from the fact that all land belonging to the Government has been alienated, or because land is too costly to be given by a private owner. In such cases there is danger that the establishment of a National School may be rendered impossible from the large amount of local contributions necessary to be raised, and which it is probable the inhabitants may be unable to collect. We, therefore, think it desirable that, in such cases, the Commissioners should contribute, in the usual proportion, towards the cost of purchasing a site.

Teachers' residences. 2. We are of opinion that, in future erections, the number of apartments in the Teacher's residence should be at least three, together with a kitchen. By adopting this rule, the Commissioners will be enabled to add materially to the Teacher's comfort, and to enhance greatly the respectability of his position.

Local patrons 3. The necessity of defining the qualifications required in local patrons has long been apparent, and has been urged upon our attention by the extreme unfitness of certain persons elected to that office during the past year. We submit, therefore, that no persons should be appointed as local patrons unless they are capable of reading and writing, exhibit prudence and discretion, and are especially of temperate habits and good moral character.

School fees. 4. Notwithstanding the salutary changes introduced by the Board last year, in the regulations bearing upon the subject of School fees, much yet remains to be done before a thoroughly satisfactory arrangement can be arrived at. As an example of the abuses still existing, we have before mentioned the case of a Teacher whose income was lessened very considerably by the arbitrary and unjust conduct of certain local patrons, who suddenly, and without notice, reduced the rate of School fees by fifty per cent. In this case, the tacit contract implied between Teacher and patrons was evidently violated; and although such a course was not forbidden by the Board's rules as then existing (and was, therefore, not legally wrong), it is difficult to view the transaction in any other light than as being morally indefensible. The following rule would meet such cases as that under consideration :—
“ The scale of fees having been fixed, must not be altered without the sanction of the Commissioners; and six months' notice must be given to the Teacher before a revised scale can be acted upon.”

District Model Schools. 5. As far as we are aware, no steps have been taken towards the erection of District Model Schools, although, in our Report for 1859, we pointed out at some length the advantages likely to accrue from the establishment of such institutions in the large towns of the Colony. The experience of the past year confirms our opinion as to the desirability and even necessity for these Schools. It is evident to us that, until each inspectorial district is supplied with a good Model School, the National System, however much it may extend its operations

ANNEX D.

DETAILED STATEMENT of the condition of National Schools inspected during the year 1860:—

- The remarks under the head I. relate to the material condition of the Schools.
 Under II. To their moral character.
 Under III. To the subjects and methods of instruction.
 Under IV. To the proficiency of the pupils.

NATIONAL EDUCATION.

21

METROPOLITAN DISTRICT.

NAME OF SCHOOL	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Avondale (Non-vested.)	1860. 22 May..	14	18	32	<ol style="list-style-type: none"> 1. The material state of the School is not satisfactory, but as measures are in progress for the erection of a vested School, the defects of the present buildings, may be borne with for a time. 2. On the whole, the School in its moral aspect is promising. The pupils have not attended the School long enough to become thoroughly disciplined, but the defects now visible will probably disappear in time. 3. With most of the pupils, the Teacher had to commence from the very rudiments of School knowledge, and, consequently, none but the ordinary subjects have been introduced. The methods are characterized by a considerable amount of natural tact, and are fairly adapted to the capacities of the pupils, though defective in a few technical points. 4. The actual attainments of the pupils are inconsiderable; but their progress relatively to the period they have been under instruction, and to their ignorance at the outset, may be fairly regarded as satisfactory. Little can as yet be said as to the effect of the instruction in developing the intelligence of the pupils.
Burwood..... (Non-vested.)		6	6	12	<ol style="list-style-type: none"> 1. The School building is a very good one, but in all other respects the material state of the School is unsatisfactory. 2. The attendance of the pupils is irregular, having been frequently interrupted by heavy rains and by sickness. No decided opinion can be given as to the moral tone of the School. 3. Some important matters have been omitted from the instruction. 4. The attainments of the pupils are very meagre in every subject, and the development of mental power very small. <p>The general tone and spirit of the School are, at present, not satisfactory.</p>
Botany Road..... (Non-vested.)	18 July..	20	11	31	<ol style="list-style-type: none"> 1. The School building is fairly suitable and in good condition, and the supply of furniture, apparatus, and books, is adequate to the present requirements of the School. 2. The pupils are irregular in their attendance, though this fault may have been partly occasioned by the prevailing epidemic; and many are unpunctual. The majority are clean and tidy, in fair order, obedient, and pleasing in their manners. On the whole, but with a few very decided exceptions, the moral tone of the pupils may be considered as fair. 3. Some necessary subjects have hitherto been omitted from the course of instruction. The methods are not very suitable. 4. The attainments of the pupils are but small.
Berkeley (Vested.)	21 May..	31	19	50	<ol style="list-style-type: none"> 1. The School buildings are in good condition, and the supply of furniture, apparatus, and books, is sufficient for present wants. 2. With the exception of the elder children, the pupils are tolerably regular and punctual, they are clean, very orderly, obedient, and well conducted. The moral tone appears to be good.

METROPOLITAN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Berkeley—continued.	1860	<p>3. None but the ordinary branches are taught. The methods employed are fairly judicious and skilful, there being a proper admixture of individual with collective lessons, and a careful adaptation of the instruction to the capacities of the pupils.</p> <p>4. The proficiency of the pupils may be considered as very fair. Great improvement is visible since the last inspection. The general tone of the School is very satisfactory.</p>
Berrima (Non-vested.)	17 Oct..	13	16	29	<p>1. The School buildings are in a ruinous condition. Suitable furniture and additional apparatus are required. The material state of the School is very unsatisfactory.</p> <p>2. The pupils are irregular, but tolerably punctual, clean, and orderly. The moral tone is, on the whole, good. The discipline of the School is very strict.</p> <p>3. The subjects of instruction do not accord with the requirements of the Table of Minimum Attainments. The methods are almost wholly individual, and exhibit a fair amount of skill.</p> <p>4. The actual proficiency of the pupils is moderate, on the whole; but there is a wide difference in this respect between the classes. For example, the first-class pupils rank low in point of attainment, while those in the third class are fair in this particular.</p>
Bishopsgate (Non-vested.)	11 July..	82	51	133	<p>1. No improvement has been effected in the material condition of this School, except that the supply of books has been increased.</p> <p>2. The pupils are still irregular and unpunctual, but have greatly improved in conduct and demeanor. While some defects still exist, the moral tone of the School may now be regarded as very promising.</p> <p>3. Generally speaking, the subjects of instruction are judiciously selected. The methods employed are fairly skilful.</p> <p>4. On the whole, the progress of the pupils can only be regarded as moderate, though it is probably as good as could be expected under the very difficult circumstances in which the Teachers are placed.</p>
Balmain..... (Non-vested.)	27 Sept..	68	25	93	<p>1. The Schoolroom is small and unsuitable. It is badly supplied with furniture. The material state is altogether unsatisfactory.</p> <p>2. From the crowded state of the room, proper discipline is impossible, however much the Teacher may strive to preserve order.</p> <p>3. The subjects of instruction are those prescribed in the Table of Minimum Attainments. The methods in use can scarcely be defined, on account of the imperfect means of organizing the School.</p> <p>4. The actual proficiency of the pupils is low, and their intellectual development very small. The average of each child's attendance is but short.</p>
Cleveland-street (Vested.)	Dec...	154	92	246	<p>1. This School is well supplied with furniture and apparatus. Its material state is good.</p> <p>2. The pupils are regular, clean, and in good order. The moral character of the School is good.</p>

METROPOLITAN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Cleveland-st.—continued	1860.	<ol style="list-style-type: none"> In addition to the ordinary branches, instruction is given in vocal music and elementary drawing. The methods employed are skilful. The proficiency of the pupils is good, and their mental power fair.
Castlereagh (Non-vested.)	13 June..	6	5	11	<ol style="list-style-type: none"> After being closed for some time, this School has recently been re opened under a new Teacher. Only eleven pupils were present, some being kept away by influenza, and others being required at home to assist their parents in repairing the damage occasioned by the late floods. The attainments of the pupils are very meagre in every subject.
Cobbity Paddock (Non-vested.)	8 Oct. ..	20	22	42	<ol style="list-style-type: none"> The School building needs repair, the furniture is of an inferior description, the apparatus is deficient, and the stock of books is reduced to nine servicable volumes. A remarkable improvement is manifest in the moral character of the School since the appointment of the present Teacher. The pupils are punctual and regular in their attendance, considering the obstacles to be overcome; clean in person and dress; quiet, orderly, and well behaved. Fair judgment has been shown in the selection of lessons; and the methods in use are, in the main, correct and effective. The actual proficiency of the pupils is very moderate; but their progress under the present Teacher is highly satisfactory. In all but its material aspect, the School is in a promising condition.
Cawdor (Non-vested.)	10 Oct. ..	8	21	29	<ol style="list-style-type: none"> The material state of this School is very good in every respect. The cleanliness and order of the pupils are particularly worthy of note; they are less regular than could be wished, the district being agricultural. The subjects of instruction are appropriate, and accord with the Table of Minimum Attainments. The methods employed are characterized by average skill, but are applied with great industry and perseverance. The actual proficiency of the pupils is somewhat better than moderate. All things considered, this is not an unsatisfactory amount of progress.
Camden (Vested.)	4 Oct. ..	30	20	50	<ol style="list-style-type: none"> The School buildings require some repairs; and the stock of books is insufficient. In other respects, the material state of the School is good. The pupils are, generally speaking, irregular in their attendance, and not very punctual. In personal appearance, they are clean and tidy. The subjects of instruction are selected with judgment, and the methods in use are, in general, decidedly good. Considering all the difficulties the Teacher has had to contend with, such as floods, sickness, and the disorganized state in which he found the School; the proficiency of the pupils may be estimated as fair.

METROPOLITAN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Eling Forest (Vested.)	1860. 16 Oct. ..	23	7	30	<ol style="list-style-type: none"> Repairs are needed to the School-house and Teacher's residence, and a larger supply of books is required. In other respects, the state of the School as regards material appliances is satisfactory. The School bears a high character for the efficiency of its discipline, and, with the exception of some slight remains of bashfulness, the moral tone is very good. Considerable judgment and much earnestness have been evinced in the selection of lessons; and the methods in use indicate a fair amount of skill on the part of the Teacher. On the whole, this aspect of the School is very gratifying. The proficiency of the pupils is but moderate. Irregularity of attendance arising in part from sickness and bad weather, and the advanced age at which some of the pupils began their Education, account for their slow progress.
Fort-street (Boys) (Vested.)	Dec. ..	232	232	<ol style="list-style-type: none"> The material state of this School continues to be the best possible in the Colony. The regularity, punctuality, cleanliness, and order, are still satisfactory. As in previous years, vocal music, and outline drawing are taught to the whole School, in addition to the ordinary branches; and algebra, geometry, and the rudiments of Latin are learned by the advanced classes. Satisfactory progress has been made by the pupils, both as regards acquirement and mental culture.
Fort-street (Girls) (Vested.)	Dec.	170	170	<ol style="list-style-type: none"> This School, in its material aspect, closely resembles the boys. The pupils are tolerably regular in their attendance, clean, and in tolerably good order. No change has been made in the list of subjects taught, and the methods continue to be characterized by fair skill. Fair progress has been made by the pupils, and the cultivation of their minds has been tolerably successful.
Fort-street (Infants) .. (Vested.)	Dec. ..	151	117	268	<ol style="list-style-type: none"> As remarked in previous reports, the Schoolrooms are inconveniently small. The material appliances are, in other respects, amply sufficient. The moral character of the School is very fair for an Infant School. Suitable subjects are taught by methods appropriate to young children. Very fair proficiency has been attained in the subjects taught, and the cultivation of the children's minds has received due attention.
Fairy Meadow (Vested.)	15 Nov. ...	27	33	60	<ol style="list-style-type: none"> On the whole, this School is well furnished with material appliances. The moral aspect of the School is good. The conduct and demeanour of the pupils are highly pleasing. Both subjects and methods are judiciously chosen. The instruction is farther characterized by careful adherence to a systematic course, by energy and industry, and thoroughness to the extent to which the various branches are taught. The attainments of the pupils are barely tolerable, but the efficient instruction of the Teacher will probably soon have the effect of raising their proficiency.

METROPOLITAN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Jamberoo (Vested.)	1860, 30 May..	29	19	48	<ol style="list-style-type: none"> 1. The Schoolroom is suitable and in good repair. There is a tolerably plentiful supply of furniture, apparatus, and books. 2. Considerable improvement is manifest in the moral aspect of the School, though there is still ground for complaint in connection with the irregularity of attendance. The cleanliness and order are good; and it is worthy of notice that the bashfulness complained of in former years has greatly diminished, and that the pupils manifest some willingness to answer questions. 3. The ordinary subjects are taught as directed in the Table of Minimum Attainments, and the methods are fairly suitable. 4. The pupils exhibit moderate proficiency; but on a few subjects their attainments are rather meagre.
Manly (Vested.)	19 Sept...	9	1	10	<ol style="list-style-type: none"> 1. In every respect the material state of this School is good. 2. It ranks very low in point of punctuality and regularity of attendance. Otherwise the moral character is good. 3. The subjects of instruction are selected with tolerable skill, and accord with the provisions of the Table of Minimum Attainments. The methods are of an individual character. 4. The proficiency of the pupils is small.
Marshall Mount (Vested.)	23 May..	15	27	42	<ol style="list-style-type: none"> 1. The School buildings, furniture, apparatus, and supply of books, are all excellent. In this respect the School will bear comparison with the best in the Colony. 2. The discipline of this School is good. The pupils are orderly and well conducted, and much of the bashful timidity they exhibited on former occasions has disappeared. 3. The subjects of instruction are confined to those named in the Table of Minimum Attainments; the Teacher having of late discontinued his lessons on vocal music, on account of the irregular attendance of the elder pupils. His methods are judicious. 4. On the whole, the progress of the pupils has been moderate, though the School appeared to some disadvantage from the fact that all the more advanced pupils had left since my previous visit.
Omega Retreat (Vested.)	20 Nov...	6	2	8	<ol style="list-style-type: none"> 1. This School had been open but one week, when visited; and, during that period, the weather had been very wet. 2. The building is new, well suited for its purpose, and well furnished.
Paddington (Vested.)	Dec.	76	58	134	<ol style="list-style-type: none"> 1. The School is well furnished with appliances for teaching, and its general condition in this respect is good. 2. In point of discipline there is little to be desired; the moral tone is good. 3. Besides the ordinary branches, instruction is given in vocal music, drawing, and algebra. The methods employed are skilful. 4. The proficiency of the pupils is good, and their mental power considerable.

METROPOLITAN DISTRICT—*Continued.*

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Picton..... (Vested.)	1860. 12 Oct. ...	10	9	19	<ol style="list-style-type: none"> 1. This School is badly situated, and the building is fast decaying. The furniture is in bad condition; but there is a fair supply of apparatus and books. 2. The pupils are unpunctual and irregular; but tolerably clean and orderly. 3. The Teacher is capable of making a judicious choice of lessons, and possesses a very fair acquaintance with good methods. The teaching lacks energy and system. 4. The attainments of the pupils are very moderate in extent, and in grammar they are very small. The excessive irregularity of the attendance partly accounts for the want of progress.
Pitt-street..... (Non-vested.)	25 Oct. ...	47	38	85	<ol style="list-style-type: none"> 1. No playground is attached to this School. With this exception, the condition of the School, with regard to material appliances, is very fair. 2. Considering that the School has been opened but six weeks, the discipline and moral tone are creditable. 3. The matter of instruction is judiciously chosen, and the methods in use are of an excellent description. 4. The proficiency of the pupils is barely moderate.
Shell Harbour..... (Non-vested.)	24 May ..	22	15	37	<ol style="list-style-type: none"> 1. The School building is not a very good one, and more furniture is required. In other respects, the material state of the School is satisfactory. 2. The regularity and punctuality are still somewhat defective; but, in those points of discipline over which the Teacher is able to exercise any control, a decided improvement is visible since my former visit. I have a very favourable impression of the moral tone of the School. 3. The ordinary branches are taught, and the methods are judicious and earnest. 4. On the whole, the pupils have made fair progress.
South Head..... (Non-vested.)	26 Sept...	6	9	15	<ol style="list-style-type: none"> 1. In its material aspect, this School is in fair condition. The furniture is not well adapted to its purpose. 2. The pupils are tolerably punctual, but very irregular. The cleanliness and order are satisfactory; and, excepting a little bashfulness, the conduct of the children is pleasing. 3. Tolerable judgment has been shewn in the choice of lessons. The methods are necessarily of an individual character. 4. The proficiency of the pupils is very small.
Smithfield..... (Vested.)	2 Oct.....	17	11	28	<ol style="list-style-type: none"> 1. The School is, on the whole, in favourable condition as regards its material appliances. 2. In its moral aspect, the School has improved in every point but regularity of attendance, in which it has rather deteriorated. Sickness, bad weather, and other causes, have contributed to produce this result. 3. In general, the Teacher adapts the matter of his lessons to the capacities of his pupils with fair skill. His methods are chiefly of the individual kind. The irregularity of the attendance has rendered the adoption of these methods necessary.

NATIONAL EDUCATION.

27

METROPOLITAN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Smithfield—continued ..	1860.	4. The attainments of the pupils are but small, and their mental powers have received but little cultivation.
Violet Hill..... (Vested.)	17 May ..	6	11	17	1. The material state of the School still remains imperfect, several additions to the building being required. 2. The day being wet, only half the usual number of pupils attended. These were clean and in good order. 3. The children present were examined and found to be making fair progress.
Wollongong (Girls).... (Vested.)	13 Nov...	33	33	1. This School is tolerably well furnished with material appliances. 2. The pupils are tolerably punctual, but irregular in their attendance. They are very neat and clean, obedient, and in good order. The discipline is strict and effective. 3. Fair skill has been exhibited by the Teacher in the selection of both subjects and methods, and it is especially manifest that she has industriously striven to advance her pupils. 4. Taking the average of the different classes, the proficiency of the pupils may be described as tolerable. The absence of some of the more advanced pupils reduces the character of the attainments, which would otherwise rank as fair.
Wollongong (Infants).. (Vested.)	13 Nov...	16	21	37	1. The Schoolroom is scarcely a suitable one, and the supply of furniture and apparatus is defective. 2. The discipline of the School, as far as it depends upon the Teacher, is creditable, the pupils being very neat, clean, and in good order. They are punctual, but not regular. 3. Some judgment has been exhibited in selecting from the round of subjects proper to Infant School instruction, such as are specially appropriate under present circumstances, and lie within the Teacher's power to deal with effectually. Very fair skill has been evinced in the choice of methods, which, both in form and spirit, are identical with those in use in the Model School. 4. The actual proficiency of the pupils is small, as might be expected from their tender age and the shortness of the period—a few weeks only—they have been under instruction.
Wollongong (Boys).... (Vested.)	14 Nov...	70	..	70	1. The material state of this School is tolerably satisfactory. The School buildings exhibit marks of the effects of the weather. 2. The punctuality and regularity of attendance are still less satisfactory than could be wished, but the discipline has improved in every other particular. 3. Fair skill is shewn in the selection of appropriate lessons, and the methods in use are generally good. 4. Considering all the circumstances of the School, the amount of progress made must be deemed fair.
William-street (Girls).. (Vested.)	Dec.	101	101	1. The material state of the School has been improved by flooring the room with boards. It is now in excellent condition. 2. The pupils are in good order, very clean, and tolerably regular.

METROPOLITAN DISTRICT—*Concluded.*

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
William-street (Girls) <i>continued.</i>	1860.	<ol style="list-style-type: none"> 3. In addition to the ordinary branches, vocal music and elementary drawing are taught. The methods in use are characterized by a fair amount of skill. 4. The pupils have made fair progress and display a considerable amount of intelligence.
William-street (Boys) (Vested.)	Dec.	204	204	<ol style="list-style-type: none"> 1. The material state of the School is now good in every respect. 2. The pupils are punctual and regular in their attendance, clean, and in good order. 3. Vocal music, elementary drawing, mensuration, and geometry, are added to the ordinary branches of instruction. As before, the methods of teaching are skillful. 4. The pupils have made good progress in all the branches taught.
William-street (Infants) (Vested.)	Dec.	125	98	223	<ol style="list-style-type: none"> 1. The material condition of this School is excellent. 2. The discipline is very good, the pupils being clean, orderly, and as regular in attendance as could be expected of infants. 3. Appropriate subjects of instruction are chosen, and the methods adopted are those best suited to Infant Schools. 4. The proficiency of the pupils in the subjects taught is very fair, and the development of their intelligence considerable.
Westbrook (Vested.)	9 Oct. ...	24	14	38	<ol style="list-style-type: none"> 1. The School building is somewhat leaky; but as regards furniture, apparatus, and books there is no reason to complain. 2. The School ranks low in respect of punctuality and regularity, but otherwise the discipline is very fair. The pupils are clean, orderly, and well conducted. The moral tone is satisfactory. 3. The Teacher is fairly judicious in his choice of lessons. His methods are a tolerable imitation of those employed in the Model School. His teaching is defective in system and thoroughness. 4. The attainments of the pupils are of moderate extent.
NORTHERN DISTRICT.					
Aberglasslyn (Vested.)	1 Nov...	14	13	27	<ol style="list-style-type: none"> 1. This is a new building, substantially constructed. The ground is enclosed, and out-buildings have been provided. The furniture and apparatus are also new. Altogether the material condition is satisfactory. 2. The regularity and punctuality are not fully satisfactory. The pupils are clean in person, and in general are orderly, but deficient in habits of attention. The government is not sufficiently firm. 3. The instruction is to a certain extent judiciously chosen, and carefully conducted, but requires a greater degree of precision. 4. In the second and sequel classes, the attainments in reading, writing, and grammar are very fair; in arithmetic fair; in geography and Scripture, tolerable. The first-class pupils are low in point of attainments. The mental power is tolerable; self-reliance, moderate. 5. The local patrons of this School are attentive and zealous.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Bendolba (Vested.)	1860. 30 May..	2	18	20	<ol style="list-style-type: none"> 1. With the exception of out-buildings, not yet provided, and interstices in the slab walls, which require to be filled up, there is little to complain of in the material condition of this School. 2. The pupils are irregular in attendance, but in general they are punctual, clean in person, and neatly dressed. They are very bashful; but in other respects behave with propriety. 3. The subjects taught are appropriate; while the methods employed are judiciously chosen, and rationally applied. 4. In reading and writing, the attainments may be considered very fair; in arithmetic, grammar, and geography, fair; in object lessons and Scripture, tolerable. The mental capacity is moderate.
Bishop's Bridge (Non-vested.)	17 July..	8	10	18	<ol style="list-style-type: none"> 1. The building is too small, and in very bad repair. The furniture is unsuitable, and the apparatus insufficient. It is proposed to erect a better building, as soon as a suitable site can be obtained. 2. The children are in general regular and punctual. They are clean, orderly, and well conducted. 3. The subjects taught are those prescribed in the Table of Minimum Attainments. The instruction is conducted with perseverance, but with moderate skill. 4. The attainments in writing, arithmetic, and grammar, are very fair; in reading, good; in object lessons, tolerable, in geography and Scripture, good. The older pupils shew a fair degree of animation and intelligence.
Black Creek (Non-vested.)	22 March.	14	7	21	<ol style="list-style-type: none"> 1. The general condition of this School in its material, moral, and intellectual aspects, was so unsatisfactory, as to render it expedient in the early part of the year to discontinue the aid granted, until a better arrangement could be effected. The building used was especially unsuitable. 2. Measures have been adopted for the erection of new premises on a more convenient site.
Bolwarra (Vested.)	25 June..	18	12	25	<ol style="list-style-type: none"> 1. The Schoolhouse having been rendered unsafe by a storm, the School business is conducted in temporary premises adjoining. The furniture, apparatus, and books are sufficient in quantity, and in fair condition. 2. The attendance is irregular; but the greater number of the pupils are tolerably punctual and clean. They are decently attired and well conducted. 3. The subjects taught are appropriate. The instruction is modern, and is characterized by attention, patience, and skill, but requires greater force. 4. The attainments in reading and writing rank as very fair; in arithmetic, grammar, and geography, as fair; in Scripture, as tolerable. The mental capacity may be considered fair.
Brookfield (Vested.)	31 May..	12	16	28	<ol style="list-style-type: none"> 1. This building has lately undergone repair, and considerable additions have been made. On the whole, its material condition is very good. The furniture and apparatus are sufficient and suitable.

NORTHERN DISTRICT—Continued.

		Boys.	Girls.	Total.	
Brookfield—continued ..	1860.	<p>2. Generally speaking, the children have not been regular, but usually they are punctual. With some exceptions, they are clean and properly dressed. The order is fair.</p> <p>3. The subjects taught are appropriate, and the methods of instruction are judiciously chosen, but require more energy.</p> <p>4. In attainments, the first class may be considered fair; and the second as very fair; mental capacity and general intelligence, tolerable. The School had lately been reopened, after a considerable recess.</p>
Cessnock (Non-vested.)	July 14	<p>1. The arrangements, as regards the School building, ground, furniture, and apparatus, are temporary, and very unsatisfactory. From the lack of public interest, no effective measures have yet been taken to remedy these defects.</p> <p>2. The pupils are neither regular nor punctual, but are clean, neat, and orderly.</p> <p>3. The instruction is obsolete, mechanical, and therefore of little value.</p> <p>4. The attainments in reading and Scripture are fair; in writing, tolerable; in arithmetic and grammar, low; and in geography, very limited. Mental power, not cultivated.</p>
Clarence Town (Vested.)	1 June ..	23	28	51	<p>1. This building is a good one; but it stands in need of repair. Otherwise, the material condition is good. The furniture, apparatus, and books are sufficient.</p> <p>2. The pupils are punctual; and, generally speaking, regular in attendance. They are clean, neat, and orderly. The moral tone is good.</p> <p>3. The subjects taught are appropriate. The instruction is modern, and conducted with skill.</p> <p>4. In the first, second, and third classes, the reading and writing may be considered very fair. Arithmetic, grammar, geography, object lessons, and Scripture, range from fair to very fair. The attainments of the fourth class range from very fair to good. The mental power is fair.</p>
Cundletown (Vested.)	22 May ..	21	18	39	<p>1. The Schoolhouse, out-buildings, and fences, are in good preservation. The furniture, apparatus, books, and registers, are in a satisfactory condition.</p> <p>2. No cause of complaint exists as regards the regularity, punctuality, and cleanliness of the pupils. They are orderly, attentive, and obedient.</p> <p>3. The instruction is earnest and skillful.</p> <p>4. The attainments in reading, arithmetic, grammar, and geography, are very fair; in writing, good; and in vocal music, fair. The pupils display a very fair degree of observation and of general intelligence. The local patrons are attentive and zealous.</p>
Dungog (Vested.)	29 May ..	25	40	65	<p>1. The building is old and unsuitable. The ground is destitute of fences and out-buildings. The furniture, apparatus, and books, are sufficient in quantity. Measures are in progress for the erection of a better Schoolhouse.</p>

NATIONAL EDUCATION.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Dungog—continued	1860.	<ol style="list-style-type: none"> The attendance fluctuates greatly; but the children are reasonably punctual, clean, and neatly clothed. The order, attention, and general demeanour of the pupils should be better than they are. The subjects taught are appropriate. The instruction is characterized by attention, perseverance, and a considerable degree of skill. In the first and second classes, the proficiency ranges from tolerable to fair; in the sequel, from fair to very fair; and in the third, from very fair to good. The mental power is fair. A new body of Patrons has lately been appointed.
Dunmoro (Vested.)	10 Dec. ...	16	16	32	<ol style="list-style-type: none"> The Schoolhouse, fences, and Teacher's residence, are in want of repair. The furniture and apparatus are sufficient, and in fair condition. The supply of books needs renewal. The pupils are tolerably regular and punctual. They are clean and neat; but the order is not good. The moral tone is low. The instruction is judicious and earnest. The proficiency in reading and grammar may be considered fair; in writing, arithmetic, and Scripture, very fair; in geography and object lessons, tolerable. The mental power, sustained attention, and inclination to exertion, are all very unsatisfactory. The Teacher has only lately taken charge of the School.
Ellalong (Non-vested.)	13 July..	6	13	19	<ol style="list-style-type: none"> This building has lately been repaired, and the material condition of the School considerably improved. It is not yet fully satisfactory. As an educational institution it is badly supported. The few pupils who do attend are reasonably punctual. The order and attention have slightly improved since last year. The instruction is characterized by patience and attention, though moderate skill. In reading, grammar, and needle-work, the attainments are very fair; in writing and Scripture, fair; in arithmetic, geography, and object lessons, tolerable. The mental capacity is tolerable.
Falbrook (Vested.)	28 Aug. ..	16	8	26	<ol style="list-style-type: none"> The ground is properly enclosed; but the Schoolhouse stands in need of some repair. The furniture is rude and unsuitable, and the apparatus is insufficient. The books are in fair condition. The children are neither regular nor punctual. They are clean, tolerably neat, and, in general, well conducted, but want animation. The subjects taught are those required. The instruction is fairly skilled, but wants energy and care. The attainments are not satisfactory. In the first class they are only tolerable; in the second they are fair; in the sequel, very fair. In general intelligence, and in habits of observation, the pupils are below the average.
Fishery Creek..... (Vested.)	6 Aug. ...	11	14	25	<ol style="list-style-type: none"> This is a new building properly enclosed. The supply of furniture, apparatus, and books, is good. On the whole, the material condition is satisfactory.

NORTHERN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Fisbery Creek — continued.	1860.	<p>2. The pupils are punctual, but irregular in attendance. They are much more cleanly and neat, but less orderly than before. Their demeanour is not sufficiently subdued.</p> <p>3. The subjects taught are appropriate, and the instruction is fairly adapted to the capacities of the pupils.</p> <p>4. In attainments, the first class may be considered fair; the second fair; and the sequel class good. Upon the whole, the mental power is fair.</p>
Four Mile Creek (Vested.)	26 July ..	7	6	13	<p>1. The Schoolhouse, furniture, and apparatus, are in fair condition. The books are much worn, and scarcely sufficient. The Registers are properly kept. The fencing is of a very temporary character.</p> <p>2. The School is not well supported. The children are punctual, but not regular. They are clean and orderly. The moral tone is fair.</p> <p>3. The subjects taught are those prescribed. The instruction is patient and earnest, but is not sufficiently intellectual.</p> <p>4. The attainments of the first class may be considered tolerable; of the second, fair; of the third, very fair. In self reliance and mental exertion the pupils do not stand high.</p>
Glenwilliam (Vested.)	4 June ..	13	17	30	<p>1. This building was undergoing repair at the date of inspection. The ground is not enclosed. The furniture, apparatus, and books, are sufficient for present wants, and in fair condition.</p> <p>2. The children are not regular in attendance, though usually they are punctual. They are clean, neatly dressed, and attentive, but are not sufficiently animated.</p> <p>3. The subjects taught are those required. The instruction is judicious, and is conducted with a fair degree of skill.</p> <p>4. In attainments, the reading is good; writing, arithmetic, grammar, and Scripture, are very fair; geography and object lessons are fair.</p>
Gosforth (Vested.)	26 June..	10	6	16	<p>1. The buildings are in good preservation, but part of the ground only is fenced, and no outbuildings have been provided. The furniture, apparatus, and books, are in fair condition, but scarcely sufficient.</p> <p>2. The children attend very irregularly, but are tolerably punctual. The cleanliness, order, attention, and moral tone of the School may be considered fair.</p> <p>3. The subjects taught are appropriate. The instruction is earnest, and otherwise is of an average character.</p> <p>4. The attainments of the first class are fair; in the second class they range from fair to very fair; and, in the sequel class, are very fair. The mental power is tolerable.</p>
Grafton (Vested.)	23 Oct. ...	42	20	60	<p>1. From the increase of the population, this building is not now central nor is it of a very suitable character for a large School. It requires cleaning, painting, and other repairs. The fences, furniture, and apparatus are in fair preservation; but the books are much worn and need replacing.</p>

NATIONAL EDUCATION.

NORTHERN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Grafton—continued	1860.	<p>2. The children attend irregularly; but they are punctual, clean, and becomingly dressed. The order and moral tone are fair.</p> <p>3. The instruction is modern and skilful; but the subjects taught do not satisfy the requirements of the Table of Minimum Attainments.</p> <p>4. The attainments of the first class are moderate; of the second tolerable; of the third, fair; and of the fourth very fair.</p> <p>On the whole the School has improved since last year; but sustained attention, and individual thought are yet deficient. The mental power is tolerable.</p>
Hinton (Vested.)	27 June..	26	23	49	<p>1. This School is well organized. There is very little to complain of in the material condition of the establishment.</p> <p>2. The pupils are neither regular nor punctual in attendance. They are clean, becomingly dressed, and attentive. The moral tone is fair.</p> <p>3. The subjects taught agree with the Table of Minimum Attainments. The instruction is adapted to the capacities of the pupils.</p> <p>4. In attainments, the first class may be regarded as fair. Those of the second class range from fair, to very fair; and of the third class, from very fair to good.</p> <p>The pupils are deficient in sustained attention. The mental power is fair. Observation and general intelligence in the younger pupils tolerable.</p>
Iona (Vested.)	14 Aug..	22	11	33	<p>1. The Schoolhouse, outbuildings, furniture, and apparatus are in fair condition, but not so well kept as could be desired.</p> <p>2. The pupils are neither regular nor punctual. They are clean, tolerably neat, and more orderly than before. The moral tone has slightly improved.</p> <p>3. The subjects taught do not fully agree with those prescribed. The instruction requires more precision, vigour, and searching examination.</p> <p>4. Through the various classes, the attainments range from tolerable to fair. Only the writing and arithmetic of the third class rise above this limit. Mentally, the children are very indolent.</p>
M'Donald River..... (Vested.)	10 July ..	12	11	23	<p>1. This is a slab building, but is so well cared for as to rival many Schoolhouses of a more costly nature. The furniture and apparatus are in good condition.</p> <p>2. The pupils are generally regular and punctual in attendance. They are clean, orderly and attentive. The moral tone is good.</p> <p>3. The subjects taught are those prescribed. The instruction is evidently conducted with care and diligence.</p> <p>4. The attainments of the first class are good; of the second, very fair; of the third, ranging from very fair to good. The elder children shew a very creditable degree of general intelligence and mental capacity.</p>
Merriwa (Vested.)	20 Sept...	16	14	30	<p>1. This building is substantial, but, both it and the outbuildings are in need of repair. The fences, furniture, and apparatus are in fair condition.</p>

		Boys.	Girls.	Total.	
Merriwa— <i>continued</i>	1860	<p>2. With a few exceptions, the pupils are regular and punctual in attendance. Most of them are clean, well dressed and attentive, although the moral tone scarcely rises to the average limit.</p> <p>3. The subjects taught are those prescribed. The instruction is appropriate and judicious.</p> <p>4. The attainments in reading, grammar, and geography are good; in writing, object lessons, and scripture very fair; in arithmetic and needlework they range from fair to very fair. Upon the whole there is a decided tendency to improvement since last year's examination.</p>
Mosquito Island (Non-vested.)	29 Nov. ...	9	14	23	<p>1. This building is too small, and not in good repair. No accommodation has been provided for the teacher. The School ground is not enclosed, nor are outbuildings provided. The furniture, apparatus, and books are sufficient in quantity, and in fair condition.</p> <p>2. No cause of complaint exists as regards regularity, punctuality, or cleanliness; but more noise than is necessary pervades the School business. The moral tone is tolerable.</p> <p>3. The subjects taught are those prescribed; but the classification is defective. The instruction is suitable and earnest.</p> <p>4. Compared with the usual standard the attainments of the first class are fair; of the second, fair; and of the sequel class, very fair. The mental power is tolerable.</p>
Murrurundi (Vested.)	31 Aug.	31	16	47	<p>1. This building has been repaired, and is now in a very good condition. In other respects the material state of the School is reasonably good.</p> <p>2. The pupils are not regular, nor are they, generally speaking, punctual. They are clean, neat, and attentive. The moral tone is very fair.</p> <p>3. The subjects taught are those prescribed, and the instruction is on the whole good.</p> <p>4. The attainments of the first class are fair; of the second class, good; of the sequel good; and of the third, ranging from good to very good. The mental power is very fair. Since last year this School has greatly improved. Some of the local patrons are very attentive.</p>
Nelson's Plains (Vested.)	15 Oct.	24	20	44	<p>1. The Schoolroom is in fair condition, but the Teacher's residence is out of repair. The fences are broken, and there are no outbuildings. The furniture, apparatus, and books, are sufficient, and in fair preservation.</p> <p>2. The pupils are irregular, but reasonably punctual. They are clean and orderly. The moral tone is fair.</p> <p>3. The subjects taught are those required. The instruction is appropriate, and shews a fair degree of skill.</p> <p>4. The attainments of the first class are tolerable. In the other classes the proficiency in reading, writing, geography, and Scripture, ranges from fair to very fair. Arithmetic and grammar are good. The mental capacity is fair.</p>

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Newcastle (Non-vested.)	1860. 20 June..	54	20	74	<ol style="list-style-type: none"> 1. The Schoolroom is in good condition. The ground is only partially enclosed, and is not provided with outbuildings. The furniture and apparatus are sufficient, but the books are insufficient and much worn. 2. The pupils are irregular and not punctual. They are clean and properly dressed. The order and moral tone are somewhat better than last year. 3. The subjects taught are appropriate. The instruction is not deficient in skill, but is superficial and not sufficiently earnest. 4. The attainments in reading, writing, and object lessons are fair; in arithmetic, unsatisfactory; in grammar, geography, and Scripture, the proficiency ranges from fair to very fair. The pupils cannot sustain their attention in any subject, even for a reasonable time. The mental capacity is tolerable.
Oswald..... (Non-vested.)	23 July..	18	22	40	<ol style="list-style-type: none"> 1. The material condition of this School is, upon the whole, very fair. 2. The pupils are clean, orderly, punctual, and tolerably regular. The moral tone is good. 3. The subjects taught agree with the Table of Minimum Attainments. The instruction is attentive, earnest, and judicious. 4. The attainments in reading, arithmetic, writing, and Scripture, are good; in grammar, very good; in geography and other subjects, very fair. The general intelligence of the younger children, and mental capacity of the older pupils, are very encouraging, and speak favourably for the industry of the Teachers.
Parading Ground (Vested.)	15 Nov...	14	17	31	<ol style="list-style-type: none"> 1. The general condition of this School, materially considered, is tolerably good. 2. The children are not regular in attendance, but are reasonably punctual. They are clean, orderly, and subdued in their demeanour. 3. The subjects taught agree with those required. The instruction is conducted with care, and a fair degree of skill. 4. The attainments in reading and writing are good. The arithmetic also is good. The other subjects range from tolerable to fair. The children sustain their attention tolerably well. The mental power is fair.
Parkhaugh (Non-vested.)	7 May..	17	13	30	<ol style="list-style-type: none"> 1. The playground attached to this place was too limited in extent; and, when visited, the out-buildings had not been erected. In other respects, the material condition was fair. 2. The pupils attended with punctuality and regularity. They were clean, orderly, and attentive. 3. The instruction was fairly adapted to the capacities of the pupils; and, considering the time which the School had been in operation, the proficiency attained was gratifying.
Pitt Town (Non-vested.)	20 June..	33	20	53	<ol style="list-style-type: none"> 1. A very good building, well supplied with furniture, apparatus, diagrams, and books. The playground, however, is not yet enclosed. 2. At the date of examination nearly one-half of the pupils were

Pitt Town—continued..	1860.	absent through sickness. They are usually regular and punctual. The cleanliness, order of the School, and general demeanour of the children are tolerably satisfactory. 3. The subjects taught agree with the Table of Minimum Attainments. The instruction is careful and judicious. 4. The attainments of the first class are fair; of the second and sequel classes, very fair on the whole; of the third class, approaching to good. General intelligence, fair; sustained attention and mental power, tolerable. The local patrons of this School are very attentive.
Port Macquarie (Vested.)	10 May ..	2	9	11	1. The Schoolroom and the premises generally are in fair condition. The furniture is sufficient, and in good condition. The apparatus and supply of books are insufficient. Owing to a change of teachers the School records were mislaid, and could not be found at the date of inspection. 2. The School having been lately re-opened, the attendance was limited. The pupils are tolerably regular, but not punctual. They are clean, neatly dressed, and well-conducted. 3. The subjects taught are in conformity with the prescribed standard. The instruction is judicious and skilful. 4. Considering the time the School has been in operation, and the disadvantages with which the teacher has to contend, the proficiency attained is as high as could be expected.
Purfleet (Vested.)	18 May ..	10	13	23	1. On the whole, the material condition of this School is tolerably good. 2. The children are punctual, and fairly regular in attendance. They are clean, neat, and orderly. The moral tone is good. 3. The subjects taught are those required by the Table of Minimum Attainments. The instruction is careful, earnest, and persevering. 4. In attainments the reading and geography are good. The writing, grammar, and Scripture are very fair. The arithmetic, and other subjects, are fair. The general intelligence and mental power are very fair.
Raymond Terrace (Non-vested.)	2 March .	25	20	45	1. The material condition of this School is satisfactory, upon the whole. 2. The children are tolerably regular and punctual in attendance. They are clean, orderly, and attentive. The moral tone is very fair. 3. The subjects taught are appropriate. The instruction is skilful and earnest. 4. The attainments of the first class may be considered fair; of the second, very fair; and of the third, good. The mental power is very fair.
Redbank (Vested.)	21 May ..	6	6	14	1. Fencing and out-buildings have yet to be erected for this School. In other respects the material condition is tolerably good. 2. The pupils are irregular and not punctual. They are clean, decently dressed, and tolerably well-behaved; but bashful, and void of animation.

The order and moral tone of the School are very fair.</p> <p>3. The subjects taught are appropriate. The instruction is conducted with energy and judgment.</p> <p>4. The attainments in reading and writing are good; in grammar and geography, very fair; in arithmetic, vocal music, and Scripture, fair. The mental power is moderate.</p>
Sugar Loaf (Vested.)	21 Nov...	15	11	26	<p>1. On the whole there is nothing to complain of in the material condition of this School. Its general keeping is tolerably satisfactory.</p> <p>2. The pupils are neither regular nor punctual in attendance. They are clean, neat, and for the most part orderly, but are not attentive.</p> <p>3. The subjects taught, agree with the Table of Minimum Attainments. The instruction is marked by industry and care, but requires more spirit to enforce it.</p> <p>4. In the upper classes the reading, writing, and grammar, are fair; and the arithmetic is very fair. The attainments in other subjects rank as moderate, or tolerable. In the older pupils the mental power may be regarded as fair.</p>
Tamworth (Vested.)	4 Sept. ...	21	14	35	<p>1. This building has been repaired, and the ground is now properly fenced. With the exception of some deficiencies in the furniture, apparatus, and books, which require to be made up, the material condition is good.</p> <p>2. Generally speaking, the children are punctual and regular. The girls are very neat and clean—much more so than the boys. The order, attention, and moral tone are fair.</p> <p>3. The subjects taught are those prescribed. The instruction is conducted with industry and skill.</p> <p>4. The attainments of the first class are tolerable; of the second, fair; and of the sequel, very fair. This is as much as could be hoped for, considering the previous backward condition of the School; and that the present Teacher has not been long in his situation.</p>
Tellegherry (Non-vested.)	12 Nov...	23	21	44	<p>1. The apparatus of this School is incomplete. In other respects, the material condition is good.</p> <p>2. This is a new School. The children have hitherto attended with punctuality and regularity. No cause of dissatisfaction exists as regards cleanliness, neatness of dress, or propriety of demeanour. The moral tone is very fair.</p> <p>3. The subjects taught are those required by the Table of Minimum Attainments. The instruction is earnest and judicious.</p> <p>4. The attainments in reading, writing, and needlework, range from very fair to good; in arithmetic, and in Scripture knowledge, they are fair; in the other subjects, tolerable. The pupils are very timid. Their mental power is high.</p>

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Thimby (Non-vested.)	1860. 8 Aug. ..	8	9	17	<ol style="list-style-type: none"> 1. The building is greatly in want of repair; although, in other respects, there is little to complain of. There is no want of furniture, apparatus, or books. 2. The pupils are not regular in attendance, nor are they so punctual as they should be. They are clean, and becomingly dressed, but the order is defective. The discipline, though improved, is not all that could be desired. 3. The subjects taught are those required. The instruction is fairly adapted to the capacities of the pupils. 4. In the first class the attainments are very fair; in the second class, they range from tolerable to fair; and in the sequel, are very fair. The general intelligence is fair.
Tinonee (Non-vested.)	25 May ..	8	13	21	<ol style="list-style-type: none"> 1. The apparatus of this School is incomplete. In other respects the material condition of the building, furniture, and books is tolerably good. 2. The children are regular, but not punctual. They are clean, neat in person, and orderly. The moral tone is fair. 3. The classification is defective, and the subjects taught do not conform to the Table of Minimum Attainments. The instruction is largely mechanical, individual, and not free from superficiality. 4. In attainments the first class pupils are tolerable; the second and sequel are moderate; the third are fair. Mental power undeveloped.
Tomago (Vested.)	31 July ..	18	23	41	<ol style="list-style-type: none"> 1. The buildings require to be repaired. The furniture, apparatus, books, and records are sufficient, and in fair condition. 2. The children are irregular and not punctual. They are clean, properly dressed, and orderly. The moral tone is good. 3. The subjects taught are appropriate. The instruction is conducted with earnestness and skill. 4. In attainments the reading, arithmetic, geography, and Scripture rank as good; the grammar as very fair; and the other subjects as fair upon the whole. The mental power is fair. In many respects the School must be regarded as having undergone a decided improvement.
Vacy (Non-vested.)	7 Aug. ..	20	17	37	<ol style="list-style-type: none"> 1. This is a very good building, but the ground is not fully enclosed. The furniture is temporary and very rude. The apparatus is incomplete. The material condition is unsatisfactory. 2. The pupils are tolerably regular and punctual. They are clean and neatly dressed, but not orderly. Most of them want that subdued demeanour so desirable in youth. 3. The subjects taught agree with the Table of Minimum Attainments. The instruction is mechanical, and to a considerable extent superficial. 4. The proficiency attained in reading is fair; in writing and arithmetic, very fair; in grammar, geography, object lessons, and Scripture, tolerable. Although many of the pupils have for some time attended other Schools, they are, with a few remarkable exceptions, inattentive and disinclined to exertion. The local patrons are attentive to the interests of the School.

		Boys.	Girls.	Total.	
Walcha (Vested.)	1860. 11 Sept..	12	15	27	<ol style="list-style-type: none"> 1. This is comparatively a new building. The material condition is, in general, satisfactory. 2. But for the very wet weather, a larger number of pupils would have been present at examination. The regularity and punctuality are, however, not satisfactory. The children are clean, neat in person, and well-behaved. 3. The subjects taught agree with the Table of Minimum Attainments. The instruction is skilful, but partakes a good deal of the individual character. 4. The attainments in reading, writing, arithmetic, and Scripture, are very fair. In grammar, geography, and object lessons, they range from tolerable to fair. The mental power is fair.
Waratah..... (Non-vested.)	4 Dec. ...	31	31	62	<ol style="list-style-type: none"> 1. The material condition of the School is not fully satisfactory. The furniture is rudely made, and not suitable; otherwise the general keeping of the School is fair. 2. The children are, upon the whole, regular and punctual. They are clean, neat, and attentive. Under the present Teacher the moral tone has greatly improved. 3. The subjects taught are those prescribed. The instruction is earnest, and fairly skilful. 4. The attainments of the first class may be considered fair; of the second very fair; of the sequel, good, in most subjects. A decided improvement is perceptible in this School.
Warkworth (Non-vested.)	24 Sept...	11	17	28	<ol style="list-style-type: none"> 1. The building used for a School is too small, and is quite unsuitable. It is occupied until new premises can be erected. The furniture and apparatus are sufficient. 2. The pupils are regular but not punctual. They are very clean, neatly dressed, orderly, and attentive. The moral tone is good. 3. The subjects taught agree with the Table of Minimum Attainments. The instruction is careful, and adapted to the capacities of the pupils. 4. The attainments in reading, writing, arithmetic, and grammar are very fair; in geography and Scripture, good; in object lessons, fair. The mental capacity is fair.
Wollombi (Vested.)	12 July ..	41	43	84	<ol style="list-style-type: none"> 1. This is a very good building, well enclosed, and properly kept. The supply of furniture and apparatus is ample. The books are considerably worn. 2. The children are regular and punctual. The cleanliness, order, attention, and moral tone of the School are good. 3. The subjects taught agree with the Table of Minimum Attainments. The instruction is earnest, judicious and skilful. 4. In nearly all subjects the proficiency ranges from very fair to good. The upper classes answer with alacrity and remarkable precision. The fourth class pupils work high in arithmetic, and are well acquainted with the first book of Euclid's elements, and with algebraic equations. The local patrons are very attentive, and take much interest in the welfare of the School.

		Boys.	Girls.	Total.	
Woola Woola (Non-vested.)	1860. 23 May..	1	12	13	<ol style="list-style-type: none"> 1. The building is rude, but fairly suitable. The furniture is not suitable; the apparatus is incomplete, and the classification defective. 2. The pupils are irregular, and not punctual. They are tolerably clean, neat, and orderly, but disinclined to exertion. 3. The subjects taught do not agree with the Table of Minimum Attainments. The instruction is not deficient in either method or skill, but wants earnestness, if not sincerity also. 4. The attainments of the first class may be considered tolerable, and of the second class, fair. In general intelligence, and in habits of observation, the pupils are low.

WESTERN DISTRICT.

Bathurst (Non-vested.)	4 & 5 Dec.	68	17	85	<ol style="list-style-type: none"> 1. This is the largest, the leftiest, and the most suitable Schoolroom in the district. The furniture and apparatus are sufficient in quantity and in good condition. Its material state is very good. 2. The pupils are clean, orderly, and punctual. The discipline is greatly improved. The moral character of this School is very pleasing. 3. The pupils are properly classified, and the subjects are improved both in quantity and quality. The methods exhibit increased skill and judgment on the part of the Teacher. 4. The proficiency of the pupils is, on the whole, very satisfactory.
Blaney (Temporary vested.)	13 Nov..	17	21	38	<ol style="list-style-type: none"> 1. This School is held in temporary premises. It is not sufficiently large for the accommodation of the pupils. The supply of furniture and apparatus is good. The material state of the School is tolerable for the kind. 2. The pupils are tolerably punctual, but not very regular. Cleanliness and order are well attended to; the moral tone of the School is fair. 3. The ordinary subjects have not, in every case, been introduced to the extent required by the "Table of Minimum Attainments." 4. Little progress has been made during the year; the answering was as satisfactory at the end of the year 1859 as at the close of the year 1860.
Burrundulla (Non-vested.)	20 Feb..	13	12	25	<ol style="list-style-type: none"> 1. The School is in good repair. The supply of furniture and apparatus is tolerable. A black-board, however, forms an important deficiency. On the whole, its material state is tolerable. 2. The demeanour and conduct of the pupils have not been properly regulated; no well defined course of discipline has been introduced. The moral tone of the School is not satisfactory. 3. The subjects of instruction are of a very elementary kind, and the methods partake too much of the individual system. 4. The proficiency of the pupils which is small, is, except in a few cases, unsatisfactory.

		Boys.	Girls.	Total.	
Dubbo—continued	1860.	<ol style="list-style-type: none"> The pupils are very clean, and very orderly. The moral tone of the School is fair. The subjects are appropriate, and the methods of instruction are tolerable. A fair proficiency has been made since the appointment of the present Teacher. The School promises to be a good one.
Dennis Island (Non-vested.)	18 Oct. ...	12	17	29	<ol style="list-style-type: none"> The School continues in good repair, and the furniture and apparatus are reasonably sufficient in quantity, well arranged, and suitable. This is a nicely organized School. Its material state is fair. The moral tone of the School is particularly pleasing. Everything under this head is very satisfactory. The ordinary subjects have been generally introduced to the extent required by the Table of Minimum Attainments. The methods of instruction, though yet too mechanical, are nevertheless improved. A fair progress has been made during the year. The School retains its previous good character.
Evans' Plains (Vested.)	10&14Aug.	17	12	29	<ol style="list-style-type: none"> This is a new School, well finished and well furnished in every respect. Its material state is good. The pupils are not very regular. The discipline is admirable for a country School. Its whole moral character may be considered good. Only the ordinary subjects have been introduced. The Table of Minimum Attainments has been fairly attended to. The methods of instruction are, on the whole, tolerable. A fair progress has been made during the year. The School is promising one.
Ironbark's (Non-vested.)	29 Aug. ...	7	7	14	<ol style="list-style-type: none"> The building is altogether unsuitable, and in bad repair. The furniture and apparatus are very deficient and very unsuitable. They are, for the most part, rough contrivances. The material state of the School is very bad. The pupils are very irregular. No well defined course of discipline has been introduced. The moral tone of the School is very low. The subjects are very elementary, and the methods of instruction entirely mechanical. The proficiency of the pupils is very small. The School has retrograded much. The salary has, I believe, been withdrawn.
Kirkconnell (Vested.)	10 Oct. ...	11	20	31	<ol style="list-style-type: none"> This is a large brick building, in excellent condition, and well furnished in every respect. Its material state is very good. The pupils were clean, in fair order, tolerably punctual, but not regular. Their manners and demeanour are modest and well regulated. The moral tone of the School is very good. The subjects are elementary, but yet appropriate, and the method of instruction are, on the whole, fair. A fair proficiency has been made during the year. This School is much improved.

WESTERN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Keen's Swamp (Non-vested.)	1860. 19 Nov...	6	6	12	<ol style="list-style-type: none"> 1. This School has been lately erected. It is a slab building, shingled, and, considering the locality, tolerably suitable. The furniture and apparatus are, at present, reasonably sufficient in quantity. 2. The few pupils present were punctual and regular. The discipline of the School is very indifferent. Its moral tone is not satisfactory. 3. Only the mere elements of reading, writing, and arithmetic have been introduced. The subjects are not appropriate, and the methods of instruction scarcely deserve the name. 4. The School having been closed for a considerable part of the year little progress has been made by the pupils. The School promises to improve.
Louisa Creek (Vested.)	22 Sept...	9	13	22	<ol style="list-style-type: none"> 1. Though improved, the material state of the School is not satisfactory. Its site is neither healthy nor pleasant. The furniture and apparatus, though sufficient in quantity, are not suitable. 2. The cleanliness of the School, of the Teachers, and of the pupils was satisfactory. The pupils are irregular in attendance, but the order and government of the School are very fair. The moral tone of the School, considering the locality, is good. 3. The subjects are appropriate, and the methods employed, considering he has not been trained, exhibit increased skill and judgment on the part of the Teacher. 4. A fair progress has been made since the appointment of the present Teacher. This School is improved in almost every respect.
Lime Kilns Non-vested.)	21 Nov...	11	12	23	<ol style="list-style-type: none"> 1. The building, which is constructed of slabs and bark, is in tolerable repair for the kind. It is sufficiently large for the number of pupils expected to attend. The furniture and apparatus are reasonably sufficient at present. Considering the locality, the material state of the School is tolerable. 2. The pupils were clean, but not in good order. The moral tone of the School is likely to improve. 3. The mere elements of reading, writing, and arithmetic have been introduced. From the Teacher's reputation, I have reason to believe the methods of instruction will be fair. 4. The pupils have, as yet, made but little progress, but the School is only in its infancy.
Merrendee (Non-vested.)	29 Mar...	6	10	16	<ol style="list-style-type: none"> 1. The building is in every way unsuitable. The whole material condition of the School is very unsatisfactory. 2. The moral character of this School is, on the whole, very low. 3. Only the subjects required to be taught to the first class have been introduced, but the methods of instruction are tolerable—more satisfactory than might be expected under such unfavourable circumstances. 4. The proficiency of the pupils is very small.

WESTERN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Meadow Flat..... (Vested.)	1860. 29 June..	8	11	19	<ol style="list-style-type: none"> 1. The several improvements which this School required at the time of my visit have since been carried out. The material state of the School is now, in every respect, satisfactory. 2. From the well founded complaints against the Teacher, I cannot say the moral character of the School is other than unsatisfactory. 3. The subjects do not accord with the Table of Minimum Attainments, and the methods of instruction employed are unskillful. 4. Owing to the unsettled state of the School, for several months, the progress of the pupils has been very slow. The Teacher has since been removed, and another appointed. The School is now in a fair way of becoming an efficient one.
Molong..... (Non-vested.)	31 Oct. ..	16	16	27	<ol style="list-style-type: none"> 1. The building, which is in good repair, is constructed of stone, and shingled. The furniture, though sufficient in quantity, is unsuitable. There is not a black-board in the School. On the whole, the School is imperfectly organized. 2. The discipline is very defective, and the moral tone of the School is otherwise defective. 3. The subjects are not in every case appropriate, and the methods are of a very mechanical character. 4. The proficiency of the pupils, except in a few cases, was unsatisfactory.
Mount Macquarie (Non-vested.)	19 July ..	7	14	21	<ol style="list-style-type: none"> 1. The building is in bad repair; and the furniture and apparatus are insufficient in quantity, and in bad repair. The whole material state of the School is unsatisfactory. 2. The pupils are tolerably clean, punctual, but not very regular. The manners of the pupils are simple, and their demeanour modest. The moral tone of the School is improved. 3. All the ordinary subjects are taught. The methods of instruction are unskillful; more calculated to cram the pupils' minds with knowledge than to cultivate their understanding or develop their intellectual understanding. 4. Considering the School has not been long in operation, and that few of the pupils received any previous instruction, the proficiency is reasonably satisfactory.
Mudgee (Boys) (Vested.)	7 March..	69	69	<ol style="list-style-type: none"> 1. Few Schools in the Colony are in a better position, as regards material appliances, than this. There is no important deficiency under this head. 2. In a general point of view the moral character of the School is good. The pupils are orderly, obedient, and clean, and exhibit considerable propriety of manner and demeanour. The discipline, however, is somewhat languid. 3. The ordinary branches are taught, together with mensuration, vocal music, and, at extra hours, Latin. The methods are skilful, and are moreover industriously used, but the teaching generally requires more vigour and animation. 4. The pupils have, on the whole, attained tolerable proficiency. Their mental power can scarcely be regarded in an equally favourable light.

WESTERN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Mudgee (Girls)..... (Vested.)	1860. 8 March.	50	50	<ol style="list-style-type: none"> 1. As regards material appliances this School is in excellent condition, being amply provided with every requisite for carrying on the work of instruction. 2. The moral character of the School is good, except that the elder girls are somewhat restless and intractable. 3. The matter of the lessons is in general judicious, and fairly adapted to the capacities of the pupils. The methods are good, but the teaching is not sufficiently impressive and favourable. 4. The average proficiency of the pupils is moderate.
Mudgee (Infants)..... (Vested.)	9 Mar. ...	41	35	76	<ol style="list-style-type: none"> 1. With the exception of the limited capacity of the Schoolroom and slight insufficiency of furniture, the material appliances of the School are of a satisfactory kind. 2. The moral character of the School is excellent. 3. The instruction is of the kind adapted to Infant Schools, and is imparted in a careful and judicious manner. 4. All things considered, the pupils have made good progress.
Ophir Road..... (Non-vested.)	9 Aug. ...	10	9	19	<ol style="list-style-type: none"> 1. The building, which is new, is in good repair. The furniture and apparatus are reasonably sufficient in quantity, tolerably suitable, and in good condition. On the whole, the material state of this School is very fair. 2. The pupils were not, in every case, clean, and the discipline is defective. The moral tone of the School is unsatisfactory, but improvements have taken place, under this head, since the date of my primary visit. 3. The subjects are not altogether appropriate, and the methods are unskilful. The Teacher is, however, eager for improvement, and intelligent. 4. The proficiency of the pupils is very small. The School is only a short time in operation.
Orange..... (Non-vested.)	29 July...	22	15	37	<ol style="list-style-type: none"> 1. The building which is in tolerable repair, is too small for the number of pupils expected to attend, and otherwise imperfectly planned. The furniture and apparatus are neither in good repair, nor exactly suitable. The premises are inadequate to the growing requirements of the School. 2. The pupils were very clean and orderly; they are also punctual and regular in attendance. The moral character of this School is fair. 3. The subjects are appropriate, and, in general, accord with the Table of Minimum Attainments. The methods of instruction are tolerable. 4. The proficiency of the pupils is comparatively small. The School is, however, in a promising state.
Peel..... (Vested.)	11 Oct. ...	23	12	35	<ol style="list-style-type: none"> 1. The building is in good repair, and in every way suitable. There is a scarcity of books, and the furniture is not exactly sufficient. 2. The pupils were clean, and in fair order. The punctuality and regularity are tolerable. The number of pupils in attendance has comparatively decreased. I cannot say the moral tone of the School is satisfactory. 3. The subjects of instruction are generally appropriate, and the methods tolerable.

WESTERN DISTRICT—Continued.

NAME OF SCHOOL.	DATE.	NUMBER OF PUPILS PRESENT AT EXAMINATION.			REMARKS.
		Boys.	Girls.	Total.	
Pool—continued	1860.	4. The proficiency of the pupils is scarcely tolerable—small considering the School has now been some years in operation.
Rylstone. (Non-vested.)	19 Nov.	9	9	18	1. This School is in tolerable repair. The furniture and apparatus are sufficient in quantity, and in good condition. The records of the School have been incorrectly kept. Otherwise its material state is satisfactory. 2. The Schoolroom was not clean, and the pupils were not regular in attendance. The moral character of the School was scarcely tolerable. 3. The ordinary subjects have been introduced, but not in every case, to the extent required by the Table of Minimum Attainments. 4. The proficiency of the pupils is small. This School appears to retrograde rather than progress.
Rockley (Non-vested.)	31 July ..	11	10	21	1. The building which is constructed of slabs, shingled, plastered, and ceiled, is in good repair for the kind. The furniture and apparatus are also reasonably sufficient in quantity, suitable, and in good condition. The material state of the School is, on the whole, fair. 2. The pupils are clean and orderly; their manners are simple, and their demeanour modest. The moral tone of the School is very pleasing. 3. The subjects are, at present, necessarily of a very elementary character. The methods are tolerable, and the Teacher, though not trained, exhibits an aptitude for teaching. 4. The proficiency of the pupils is very small. The School has only been a short time in operation, and the books had only arrived a short time before my visit.
Tuena (Non-vested.)	26 Nov...	16	13	29	1. The building is unsuitable, and in bad repair. The furniture and apparatus are insufficient in quantity. The whole material state of the present School is bad. The former premises were partially burned. 2. The moral character of the School is, as far as I could judge, unsatisfactory. 3. All the ordinary subjects have been introduced, and the Master appears tolerably competent to teach. 4. The proficiency of the pupils is, as indicated by the classification, very small. <i>Note.</i> —The number of pupils above given, was gleaned from the registers, the School having been temporarily closed on the occasion of my visit.
Tambaroora (Non-vested.)	26 Sept ..	15	12	27	1. The Schoolhouse, which is not in very good repair, is rather small for the number of pupils sometimes in attendance. The furniture is unsuitable, but yet sufficient in quantity. The material state of the School is scarcely tolerable. 2. The discipline is defective, otherwise the moral character of the School is tolerable. 3. The ordinary subjects have been generally introduced to the extent required by the Table of Minimum Attainments. The methods of instruction are not very judicious; the Teacher is, however, industrious.

WESTERN DISTRICT — *Continued.*

Tambaroora— <i>continued.</i>	1860.	4. The proficiency of the pupils is not very satisfactory; a fair progress has, however, been made. The School is a promising one, and the Teacher is a very worthy man.
Wattle Flat (Vested.)	12 Oct. ...	24	14	38	1. This Schoolhouse is much improved. The roof has been newly shingled, and the School ground has been fenced in. The furniture and apparatus are reasonably sufficient in quantity, but not very suitable. Its material state is tolerable. 2. The discipline is defective, and the moral tone of the School otherwise faulty. 3. The subjects are not, in every case, appropriate, and the methods are too mechanical. 4. The pupils having been injudiciously classified, their proficiency appeared to a disadvantage. The School appeared improved as regards attendance; but the number of pupils present, as returned by the Teacher, was incorrect.
Wallerawang (Non-vested.)	20 April. .	12	13	25	1. This School is a handsome stone building. It is in excellent repair, and suitable in every respect. 2. The pupils are particularly clean, tolerably punctual, but not regular in attendance. The order is good. The general tone of the School is very pleasing. 3. The subjects are, at present, necessarily very elementary; but they are, however, appropriate. The methods of instruction are rather mechanical, but they have since been improved. 4. The proficiency of the pupils, for the time, in reading, writing, and arithmetic, is satisfactory; but the progress in grammar and geography is very small. The School had only been a few months in operation. It is a very promising one.
Winburndale (Non-vested.)	17 May...	5	9	14	1. The building is in bad repair, and unsuitable. The furniture and apparatus are insufficient in quantity. A black-board is an important deficiency. The whole material state of the School is indifferent. 2. The furniture, books, &c., were not arranged in an orderly or becoming manner; the floor was not brushed, and the general tone or moral aspect of the School was very unsatisfactory. 3. The methods of instruction are very unskilful, and the subjects are inappropriate. 4. The proficiency of the pupils, notwithstanding the School has been a considerable time in operation, is very small. The School appears to retrograde rather than progress. The Teacher has since been removed.
Windayer (Vested.)	27 Jan....	14	19	33	1. This is a neat brick building, in good repair. It is suitably furnished in every respect. Its material state is very good. 2. The pupils were clean, tolerably punctual, but not very regular. The order is fair, and the general moral character of the School is satisfactory.

Windcyer— <i>continued</i> ..	1860	3. The subjects are very elementary, but yet appropriate. The methods of instruction exhibit, on the whole, tolerable skill in teaching. 4. The proficiency of the pupils, though small, is yet fair. The School has only been a few months in operation.

SOUTHERN DISTRICT.

Albury (Vested.)	22 Aug...	40	34	74	1. The Schoolhouse is by far too small, and in bad repair. Its furniture and apparatus are defective. 2. Regularity of attendance on the part of the pupils has been much impaired by the generally unfavourable character of the season; their punctuality has been similarly affected. They are clean, and generally well conducted. 3. The character of the instruction is fairly skilful, judicious, and efficient. 4. The proficiency of the pupils, in the main, is satisfactory. Several in the three more advanced classes read remarkably well, and write very fairly.
Adclong (Non-vested.)	16 Aug...	13	13	26	1. The School is conducted in a sort of tent, which is very uncomfortable. 2. The children are clean. Their attendance is tolerably regular; but in School there is the absence of that order and attention which are necessary to progress. 3. The instruction is not skilfully imparted. The subjects of instruction are very limited. 4. The attainments of the scholars are very low.
Bangalore (Non-vested.)	10 May..	10	12	22	1. The situation of the Schoolhouse is bad, being subject to floods, and its condition even worse. The furniture and apparatus are neither good in quality, nor sufficient in quantity. 2. Taking into account the locality, the character of the season, and the roads, the attendance of the scholars is tolerably regular and punctual. They are cleanly in person and respectful in demeanour. 3. The character of the instruction is somewhat unskilful. This may be caused partly by defective arrangements for conducting the School properly. The ordinary subjects of education are taught in the School. 4. The proficiency of the pupils is fair. Some of them write and perform the working of questions in arithmetic very well.
Bega (Vested.)	28 March.	18	10	28	1. The site of this School is central and pleasant; the land is enclosed with a good paling fence, and the Schoolhouse, erected of brick, is neat, substantial, and appropriate. The School is well supplied with furniture, books, and apparatus, with the exception of maps, which, however, have been ordered. 2. Little can be said as to the moral character of the School, as it has been but a very short time in operation. 3. As yet, scarcely anything has been attempted beyond the rudiments of reading, writing, and arithmetic. Few of the pupils had attended any other School,

SOUTHERN DISTRICT—Continued.

		Boys.	Girls.	Total.	
Bega—continued	1860	and their average period in this was one month only. The methods are tolerably good. 4. The attainments of the pupils are very small.
Braidwood	14 Nov.	23	32	55	1. The School site is good, and the buildings substantial and suitable, but in need of some slight repairs. There is room for improvement in the furniture and apparatus, both as to quality and quantity. Owing to the unwillingness of the parents to comply with the ordinary rules, a very unsatisfactory mode of supplying books prevails in this School, viz., that of each pupil supplying his own books, and carrying them to and from School. 2. The demeanour of the pupils is in the main becoming. They are clean, and tolerably well conducted. 3. Only the ordinary subjects are taught. The methods are fairly judicious and effective. 4. The proficiency of the pupils is not very satisfactory. This is partly the result of their irregular attendance.
Edon	26 March	16	14	30	1. The material state of this School is not fully satisfactory; for though the building is a good one, the supply of furniture, books, and apparatus is deficient. 2. The School had been closed for some time previously to the appointment of the present Teacher. The few children who have returned since the re-opening of the School, do not afford sufficient material for forming a fair judgment as to its moral character. 3. Only the most elementary portions of the ordinary subjects can be taught at present, as the pupils are very backward. The Teacher's methods seem to promise fairly. 4. With the exception of one girl, the attainments of the pupils are very meagre. The development of their minds seems scarcely to have commenced, for they are puzzled to answer the simplest question involving the necessity for reflection. Although the general tone of the School is now unsatisfactory, there are grounds for hope in the energy and skill of the new Teacher.
Gunning	7 August	21	8	29	1. The slab building in which the School is held is in very bad repair. The furniture is rude, and ill adapted to school purposes. Apparatus is deficient. 2. The moral character of the School is fair. The scholars, though neither regular nor punctual, are clean and generally well conducted. 3. In addition to the ordinary subjects, a little Latin is taught. There is not sufficient in the method of teaching to call forth exercise and strengthen the mental faculties. 4. The writing of several of the scholars is very fair. In their lessons they manifest considerable mental inertness.
Goulburn	30 April..	22	15	37	1. The present Schoolrooms are too small. A new building is in progress for a boys' Schoolroom. Furniture and apparatus are somewhat defective in quantity.

Goulburn—continued ..	1860	<ol style="list-style-type: none"> 2. The moral character of the School is fair. The pupils are regular, cleanly, and in tolerably fair order. 3. Only the subjects usually taught in National Schools are taught; the collective method of teaching might be more adhered to with advantage. 4. The attainments of the scholars are, upon the whole, creditable.
Gundagai	13 Aug.	26	22	48	<ol style="list-style-type: none"> 1. The School building is neither substantial nor well arranged. The general organization of the School is fair. There is a deficiency of suitable furniture and apparatus. 2. The moral character of the School is fairly satisfactory. It would be well that the pupils attended more regularly and punctually. 3. In the selection of subjects, care is taken to adapt them to the capacities of the several classes. The minds of the pupils are fairly exercised; and on the whole, the methods of instruction are satisfactory. 4. The attainments of the pupils are of a very fair order.
Panbula	27 Mar...	11	6	17	<ol style="list-style-type: none"> 1. The School site is one of the most unsuitable that could have been chosen, being an alluvial flat near a river, and subject to inundation. The Schoolroom is small; the furniture is clumsy and so arranged as to prevent proper discipline, and the apparatus scanty. 2. The pupils are tolerably punctual, extremely irregular, and deficient in personal cleanliness. They are in fair order and appear to be quiet and tractable. 3. None but the ordinary subjects are taught, and of these only the most elementary portions. The methods are mechanical. 4. The attainments of the pupils are very small. Their mental development is also very backward. They are puzzled to answer very simple questions, and they appear almost incapable of thought.
Long Reach	17 May..	4	6	10	<ol style="list-style-type: none"> 1. The situation of the School exposes it to floods. The building is a very fair slab building, slightly open through the shrinking of the slabs. There is a fair supply of furniture. 2. The scholars are neither regular nor punctual in their attendance. They are clean and well behaved. 3. The ordinary subjects are taught in the School. The methods employed are not very skilful. 4. The proficiency of the pupils is upon the whole fair.
Major's Creek	15 and 16 Nov.	31	30	61	<ol style="list-style-type: none"> 1. The School occupies a very good site. It is a good building of sawn timber, and very well shingled, but it requires to be finished in order to its being fully comfortable. The furniture and apparatus are not what could be desired. Out-buildings and fencing are required. 2. The moral character of the School is tolerably fair. 3. The ordinary subjects are taught in the School. There is too much individual teaching, through ignorance of proper methods. 4. The proficiency of the scholars is upon the whole tolerably fair.
Marulan	26 Nov...	9	14	23	<ol style="list-style-type: none"> 1. The material state of the School is unsatisfactory. There is no suitable furniture, nor apparatus. 2. The moral character of the School is upon the whole tolerable.

Marulan— <i>continued</i>	1860.	<ol style="list-style-type: none"> 3. Through some mistake the books had not arrived, and the School was not in fair working order. 4. There is not as yet much indication of mental energy among the pupils.
Myrtleville (Vested.)	19 Dec. . .	9	9	18	<ol style="list-style-type: none"> 1. The School is a new, substantial building of slabs, and shingled; fencing and out-buildings are provided. There is, as yet, a deficiency of furniture and apparatus. 2. The pupils are clean and orderly. 3. None but the ordinary subjects are taught. The methods employed are fairly effective. 4. The attainments of the pupils are tolerably satisfactory.
Tumut (Non-vested.)	15 Aug. . .	12	17	29	<ol style="list-style-type: none"> 1. The Schoolroom is rather small, but in good repair. The furniture and apparatus are neither sufficient nor suitable. 2. The moral character of the School is very fair. The pupils are very clean, and tolerably regular. 3. Only the ordinary subjects have been introduced. The rote system of teaching is too prevalent. There is little mental exercise. 4. The proficiency of the pupils is considerably below the Table of Minimum Attainments. This is partly to be ascribed to injudicious classification.
Tarlo (Non-vested.)	7 May . .	10	17	27	<ol style="list-style-type: none"> 1. The material aspect of the School is bad. There is a deficiency of furniture, books, and apparatus. 2. The moral character of the School is satisfactory. The pupils are clean, and tolerably punctual and regular. 3. The ordinary subjects are all that are attempted to be taught. The teaching is not such as to exercise and cultivate the mind. 4. The attainments of several of the elder pupils are fair.
Taralga (Non-vested.)	18 Dec. . .	11	7	18	<ol style="list-style-type: none"> 1. The material state of the School is unsatisfactory. There is a want of proper furniture and apparatus. 2. The moral character of the School is fair. 3. None but the ordinary branches are taught. Little knowledge of the art of teaching is manifest in the conduct of the School. 4. The attainments of some of the scholars were tolerably satisfactory; of others, indifferent.
Towrang (Non-vested.)	20 June. . .	7	5	12	<ol style="list-style-type: none"> 1. The material state of the School is good. 2. Its moral character is very fair. 3. The ordinary subjects are taught in the School. Energy and perseverance are manifested in the work of teaching. 4. The few scholars that attend are making fair progress.

ANNEX B.

(Circular No. 32.)

National Education Office,
Sydney, 1 November, 1860.

Sir,

I have the honor, by direction of the Commissioners of National Education, to acquaint you, that they have adopted the following revised Regulations for the examination and classification of Teachers in their service.

2. The Commissioners have constituted a Board of Examiners, for the purpose of setting Examination questions and revising the papers of answers. The undermentioned gentlemen have consented to act as Examiners in the subjects specified against their names :—

- Dr. Woolley Logic and Mental Philosophy.
- Professor Pell Mathematics and Natural Philosophy.
- W. J. Stephens, M.A. Classics and English Literature.
- Rev. Henry J. Hose Modern Languages.
- Professor Smith Experimental Sciences.
- S. R. Pittard, Esq. Natural Sciences.
- W. J. Cordner, Esq. Music.
- J. Fowles, Esq. Drawing.

In addition to these gentlemen, the names of the Inspectors and of the Head Master of the Model School must be included in the list of Examiners. They will be especially charged with the examination on the ordinary subjects, and with the estimate of the Teacher's practical skill.

3. Examinations will be conducted in the same manner as hitherto. The questions, being written, are to be answered on paper by the Candidate in the presence of an Inspector, who, at the close of the examination, will forward the replies to the Examiners for revision. Each Examiner will set questions on the subjects belonging to his own department, and will also assign a value to the papers of answers in accordance with his estimate of their merits. The values of the different papers will then be collated by the Inspectors and the Head Master, who will report the result to the Commissioners.

4. All Teachers holding a lower classification than Class II., Section A, will be required to undergo examination annually, as stated in Circular 27. Success in the examination will not necessarily entitle a Teacher to a higher classification, but failure will lead to a loss of classification, unless a very satisfactory reason could be assigned for the decrease of attainments. The precise date of the annual examination cannot be fixed, as it will depend much upon the engagements of the various Inspectors; but, in general, it will take place about the time of the Secondary Inspection of the School. Teachers who desire to be examined with a view to obtain a higher Certificate, must apprise the Inspector of the District of their wish; and, at the same time, furnish to him a list of the Alternative Subjects upon which they are prepared for examination.

5. The subjects on which Teachers may be examined are divided into two classes :—Ordinary and Alternative. The former class embraces those elementary branches with which it is necessary for every Teacher to be acquainted, inasmuch as they form the staple of daily instruction in School. Reading, writing, arithmetic, grammar, geography, and the knowledge of the School Books are of this kind; to which must be added, as being equally requisite, acquaintance with the principles of School Management. All other subjects are styled Alternative, because it is optional with the Teacher to undergo an examination in any of them with which he may be familiar.

6. In order to obtain a First or Second Class Certificate, Teachers must submit to examination in one or more Alternative subjects; and it is recommended that they should confine their attention to one group of subjects.

7. Teachers who undergo examination for a higher certificate will be expected, at every successive grade, to show increased acquaintance with the ordinary branches. In Alternative subjects, should one branch only be taken, higher proficiency will be required than where two or more subjects are selected. For example, less extensive knowledge in each branch would be required from a Teacher who chose Latin and Greek, than from another who was examined in Latin only.

8. No higher classification will be awarded, even if an examination be passed successfully by a Teacher, unless the Inspector's Reports upon his School speak in favourable terms of his ability, industry, and efficiency. Attainments, therefore, without practical skill, will not entitle a Teacher to promotion; while on the other hand, success in the actual work of the School will always be recognized and rewarded. It will be seen from the foregoing statements that a teacher's classification depends, first, upon his attainments, and, secondly, upon his practical skill.

9. Teachers who are desirous of being promoted to larger or more important Schools, are to intimate their wishes in this respect to the Inspector of the District, in writing. A list of such Teachers will be kept in the Board's Office, and all promotions will be made in accordance with the principle of classification and seniority, except in special cases.

10. The schedule annexed hereto is intended to exhibit the Alternative subjects of examination, and to advise teachers as to the study of suitable text books.

I have, &c.,

W. O. WILLS,
Secretary.

To Mr. _____
Teacher of the National School,
At _____

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE LEGISLATIVE ASSEMBLY.

VOTES No. 16. FRIDAY, 27 SEPTEMBER, 1861.

13. Benevolent Asylum, Sydney :—Mr. Lucas moved, pursuant to *amended* notice,—
- (1.) That a Select Committee, with power to send for persons and papers, be appointed to inquire into and “report upon the” State and Management of the Sydney Benevolent Asylum.
- (2.) That such Committee consist of Mr. Sutherland, Mr. Caldwell; Mr. Alexander, Mr. Holt, Mr. Harpur, Mr. Sadleir, Mr. Love, Mr. Driver, Mr. Hay, and the Mover. Debate ensued.
- Mr. Wilson moved, That the Question be amended, by the omission of all the words of section (1) after the words, “report upon the,” with a view to the insertion in their place of the words “adequacy of the provision made for the Destitute, through the “instrumentality of the Sydney Benevolent Society.”
- Debate continued.
- Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.
- Question,—That the words proposed to be inserted in the place of the words omitted be so inserted,—put and passed.
- Question, then,—
- (1.) That a Select Committee; with power to send for persons and papers, be appointed to inquire into and report upon the adequacy of the provision made for the Destitute through the instrumentality of the Sydney Benevolent Society.
- (2.) That such Committee consist of Mr. Sutherland, Mr. Caldwell, Mr. Alexander, Mr. Holt, Mr. Harpur, Mr. Sadleir, Mr. Love, Mr. Driver, Mr. Hay, and the Mover,—
- put and passed.

VOTES No. 23. FRIDAY, 11 OCTOBER, 1861.

6. Members of Legislative Council as Witnesses :—
- (1.) * * * * *
- * * * * *

(2.) Mr. Lucas moved, That the following Message be carried to the Legislative Council :—

MR. PRESIDENT,

The Legislative Assembly having appointed a Select Committee “to inquire into and report upon the adequacy of the provision made for the Destitute through “the instrumentality of the Sydney Benevolent Society,” and that Committee being desirous to examine the Honorable George Allen, Esquire, Member of the Legislative Council, in reference thereto, requests that the Legislative Council will give leave to its said Member to attend accordingly, on such day and days as shall be arranged between him and the said Committee.

*Legislative Assembly Chamber,
Sydney, 11th October, 1861.*

Speaker.

Question put and passed.

11. Members of Legislative Council as Witnesses :—The Speaker reported the following Messages from the Legislative Council :—

(1.) MR. SPEAKER,

In answer to the Message from the Legislative Assembly, dated the 11th instant, requesting leave for the Honorable George Allen, a Member of the Legislative Council, to attend and be examined before a Select Committee of the Legislative Assembly “to inquire into and report upon the adequacy of the provision made for “the Destitute through the instrumentality of the Sydney Benevolent Society,” the Council acquaints the Assembly that leave has been granted to its said Member to attend and be examined by the said Committee, if he think fit.

*Legislative Council Chamber,
Sydney, 11th October, 1861.*

W. C. WENTWORTH,
President.

- (2.) * * * * *
- * * * * *

VOTES No. 28. TUESDAY, 22 OCTOBER, 1861.

14. Benevolent Asylum, Sydney :—Mr. Lucas moved, pursuant to notice,—
- (1.) That the Select Committee appointed to inquire into and report as to the adequacy of the provision made for the destitute through the "instrumentality of the Sydney Benevolent Society," be authorized to make Visits of Inspection to the Institution in Sydney and Liverpool.
 - (2.) That the said Committee be authorized to require the services of a Short-hand Writer in such visits, and to receive any evidence that the majority of the Committee may deem necessary.
- Question put and passed.
-

VOTES No. 72. TUESDAY, 7 JANUARY, 1862.

3. Benevolent Asylum, Sydney :—Mr. Lucas, as Chairman, brought up the Report from, and laid upon the Table the Proceedings of, and Minutes of Evidence taken before, the Select Committee to whom it was referred, on the 27th September last, to inquire into and report upon the Adequacy of the provision made for the Destitute through the instrumentality of the Sydney Benevolent Society.
- Ordered to be printed.
-

1861-2.

BENEVOLENT ASYLUM, SYDNEY.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 27th September, 1861, "*to inquire into and report upon the adequacy of the provision made for the Destitute, through the instrumentality of the Sydney Benevolent Society, with power to send for persons and papers,*" and authorized on the 22nd October, "*to make visits of inspection to the Institution in Sydney and Liverpool, to require the services of a Short-hand Writer in such visits, and to receive any evidence that the majority of the Committee may deem necessary,*"—have agreed to the following Report:—

Your Committee have held meetings, and taken the evidence of sixty-one persons. The list of witnesses examined includes the Honorable Secretary, the Treasurer, the Accountant, several of the Committee of the Institution, the Visiting Clergymen, the Medical Gentlemen who visit, as well as the resident Surgeon; six Medical Gentlemen of large private practice in the City; and most of the Officers and Servants, as well as several Inmates of the Institution. The Committee have also paid three visits of inspection: two to the City, and one to the Liverpool Branch of the Institution.

Your Committee are of opinion that the Sydney House is not at all suited for its present uses, the buildings being far too small and inconveniently laid out; the ceilings are low; most of the wards badly ventilated; the drainage is defective; the land on which the Asylum stands is too limited to make any further improvements; and on the high land at the back of the Institution are several Burial-grounds, the drainage and exhalations from which, some of the medical gentlemen examined consider to be detrimental to the health of the inmates. The house is crowded to such an excess that it is not only injurious to the health of the inmates, but dangerous to the citizens generally. Your Committee are therefore of opinion, that it is positively necessary that immediate steps should be taken to complete, as soon as possible, a new Institution. To give an idea of the over-crowded state of the house, your Committee report that on their first visit, when passing through the Asylum, in No. 1 ward, in which there were 42 bedsteads

steads (but only sufficient room for 38,) they found 63 women, including 9 blind, 2 lame, 20 between 65 and 95 years of age, 32 young mothers, as also 36 infants, 4 of whom were foundlings—in all 99 human beings, huddled together in a room only calculated to accommodate 38.

No. 2, Infirm Ward, contains 24 bedsteads, but scarcely room for 20. There are 33 or 34 sick women.

In the Lying-in Ward, although there are but 8 beds, and scarcely room for this number, there often are 12 or 13 patients.

In the Women's Hale Ward, which is calculated to accommodate 42, your Committee found 44 bedsteads, and were informed by the Medical Officer that they have to make as many more beds on the floor.

The Children's Hale Ward, in which 63 children eat, sleep, wash; &c., Mrs. Stone, the wardswoman, in her evidence, said:—
 “The beds are laid close together all round the room; the children
 “are placed 4 at the head and 4 at the foot of the beds, by which
 “means we make one blanket cover 8 children. The children (63)
 “are all bathed in the same water, which is placed in a tub in the
 “room. When we wash their faces, hands, and feet, we are *obliged*
 “to change the water, because it is sometimes so very dirty.”

In the Male Hospital we found 17 patients, and the Medical Officer informed us that, although he had 20 bedsteads, he is often so much crowded that he has had as many as 8 patients lying on the floor. In this ward there are also 9 or 10 boys, from 10 to 14 years of age, who sleep on the floor.

In the Children's Sick Ward, in consequence of the overcrowded state and the defective ventilation, the atmosphere is so fetid that after breathing it for two or three minutes, your Committee were no longer at a loss to account for the large amount of juvenile mortality at the Sydney Benevolent Asylum.

The house at Liverpool is also very much overcrowded; for although it can only conveniently accommodate 190, the Master informed your Committee that there were 352 patients who slept in the house the night previous, and at one time he had as many as 389. But the overcrowding is not so perceptible there as in Sydney; the house being well situated, with lofty ceilings, well ventilated, and in other respects well suited for the purpose, having been built originally for an hospital. In the two houses there are twice as many inmates as can be conveniently accommodated. From the above facts your Honorable House will see that a new institution is most urgently required.

Your Committee cannot too strongly recommend, that in the construction of a new institution, means should be provided for the classification of the inmates. In passing through the present Asylum the want of classification becomes evident. The decent married

married woman (who may, from circumstances over which she has no control, be compelled to take advantage of the Asylum, to be confined), the seduced female, and the known common prostitute (who has made her second, or perhaps her third appearance) are all packed together in the same lying-in ward. Your Committee are of opinion that there should be at least three wards for this class of paupers; one for the married women, one for those who have made their appearance for the first time, and one for those of known bad character. Again, both in Sydney and Liverpool, your Committee were struck with the want of classification in the sick and infirm wards; persons who were suffering from cancerous, scrofulous, and other loathsome diseases, were lying side by side with others who were in a good state of health, excepting the effects of age. Your Committee also think there ought to be a sectarian classification in the infirm or hospital wards, the Roman Catholic and Protestant being disposed to ridicule the religious rites of each other, if administered in a room common to all; and the Rev. Mr. Allwood, the Rev. Mr. Sheridan, and other gentlemen, strongly complain of the want of such classification. Means should also be adopted by which the industrious and well-behaved could be kept apart from the idle and turbulent throughout the whole of the Institution.

Your Committee are of opinion that, when a new Asylum is erected, it should be so constructed that additions could be made at any time without interfering with the ventilation or other sanitary arrangements, and that sufficient space should be allowed for at least 1,200 inmates. For taking the present number of inmates (733), and allowing for increase at the same ratio for the last few years, there will be fully 1,000 paupers to be provided for by the time the new Institution is completed; so that, to prevent immediate overcrowding it is necessary to provide room for at least 1,200 patients.

Your Committee find that the Society have in hand £10,594 6s. 6d. as an Investment Fund, and they think that the property of the Society will realize £20,000, which, together, will go far to complete a new Asylum. The removal of the Institution to the suburbs will involve the necessity of a Depôt in the City, for the purpose of receiving cases of urgency and distributing out-door relief.

Considering it of the utmost importance to ascertain as far as possible, as to the suitability of the proposed site for the New Institution for the aged and infirm, your Committee have taken the evidence of ten members of the medical profession, who are engaged in large private practice in the City, and several other gentlemen who are well qualified to give an opinion. The greater portion of the medical evidence is opposed to, while the majority of the other gentlemen who were examined are in favour of the proposed site at Randwick.

On visiting the Asylum, your Committee found a large number of children between the ages of three and twelve; and they consider this Institution quite unsuited, both morally and physically,
for

for children of that age, and strongly recommend that immediate steps should be taken to remove (monthly) all such children, to either the Orphans' or Destitute Children's School; and that in future, no children of that age should remain above three months in this Institution.

As fully twelve-thirteenths of the expenses of the Society are supplied from the Public Revenue, your Committee are of opinion that the Government should have some official knowledge of the state of the Institution; and they would recommend that an Inspector be appointed, who should audit the accounts and make periodical reports on its condition.

The return of out-door patients shews that, in 1843, there were 225 persons receiving out-door relief, which number gradually increased to 840 in 1858. The next two and a half years shew an extraordinary increase; for we find on the 31st of December, 1860, the numbers were 3,276, being an increase of nearly 400 per cent. in that short period. But it is gratifying to be able to report that since then the number has decreased; for on the 31st of October last there were only 2,412, shewing a decrease of 864 in ten months.

Your Committee regret having to report a very large increase of in-door paupers during the last ten years, compared with the ten years previous, and a more than corresponding increase in the expenses of the Asylum.

In 1843 there were 346 inmates, and the expense during the year was £5,067. In 1851 the paupers numbered 375, and the expenses £5,369. In 1861 the paupers had increased to 733, and the annual expenses to £14,230. The first shews an increase of only 29 persons for the ten years, and a small increase of £302 in the annual expenses; while in the last ten years there is an increase of 358 paupers, and £8,861 in the annual expenses of the Institution.

There is an alarming increase in the number of women who take advantage of the Institution, to be confined. During the year 1860 there were 53; during this year they have increased to 98. There are conflicting opinions as to whether there should be a separate Asylum for this class of paupers. After taking into consideration the whole of the evidence on this question, and balancing the advantages against the objections, your Committee are of opinion that, with proper means of classification, the objections would be removed; and there are many advantages besides that of economy, which make it desirable that such separate Asylum should form a part of, and be under the same Committee of Management as, the Benevolent Asylum.

As, however, some years will probably elapse before a new Asylum can be fit for occupation, it will therefore be necessary that, in the meantime, some means should be taken to relieve the present houses; which, in Sydney, would in some degree be effected, if the children now in the Institution were removed (as your Committee recommend) to a more appropriate Asylum.

The

The Liverpool House could also be very much relieved if the Government were to allow the Society the use of the house purchased by the Railway Authorities from the trustees of the late Dr. Hill.

During your Committee's visit to the Asylums, they saw many inmates who were evidently able to work, and some of them expressed their willingness to do so, but there appeared to be a sort of forced idleness throughout the establishment. Your Committee therefore think it desirable that measures should be taken to correct this evil, by supplying such work as the inmates would be able to perform, and which may yield some revenue to the Institution. One of the greatest advantages of a proposed new site would be the possession of a large space of ground, a large portion of which might be cultivated by the paupers. If some such system as the above were adopted, your Committee believe that the Asylum would be relieved of a large number of idle impostors who seek there a home, to be clothed, fed, and kept in idleness.

It is very gratifying to your Committee to be able to report that the food supplied is of the best description, and sufficient in quantity, but wanting in variety. It is desirable that more vegetable and less animal food be supplied; and also that ovens be constructed, in order that baked meat can occasionally be substituted for boiled.

The evidence discloses some irregularities, which, from their nature, are matters for the consideration of the Committee of the Asylum. Those matters which are objectionable, and come under the province of your Committee, chiefly arise from the want of room, without a considerable increase of which it is impossible those objections can be removed, or the Institution satisfactorily conducted. When the present over-crowded state of the buildings, and the many other difficulties with which the Committee of the Asylum have to contend, are taken into consideration, your Committee believe the Institution has been as well managed as can be expected, and also that the thanks of the community are due to those gentlemen who have for so many years devoted much of their time and means to relieve the suffering of their infirm and destitute fellow-beings.

Attention having been called to the unhealthy and ill-ventilated state of the Sydney Benevolent Asylum at night, your Committee were desirous to ascertain by personal observation the condition of the sleeping wards; and with this view several of the Members visited the Institution, and were conducted over the building by the Master and Matron, after the inmates had retired to rest.

The ward pre-eminent for its deficient accommodation, and for its fetid atmosphere, was that devoted to the sick children. In this room were 16 children, with their nurse. The foul effluvia arising from so many human beings, (several suffering from an offensive cutaneous disease,) and crowded into a very limited space, was so overpowering that the visitors were unable to remain longer than two or

three minutes in the room. The windows and ventilators of this apartment were tightly closed, and the offensiveness of the atmosphere was increased by the fumes from a common oil lamp.

In the Children's Hale Ward, although the windows were also closed, the air was less impure, a larger amount of space being allowed to each inmate. Here the children were lying upon the floor closely huddled together, on each side of the room, while their clothing was thrown in heaps in the centre, no care being apparently taken to keep the apparel of one child distinct from that of another. Eight boys of from ten to fourteen years of age were lying upon the floor of the Male Hospital.

The Females' Hale Ward was much crowded. This was originally intended to accommodate about 45 inmates; but at the time of the visit referred to it contained nearly 90, including aged and infirm women, and young women with their infants. A large number of the mothers, with their children, lay upon the floor, on mattresses placed between the feet of the bed, on each side of the room. This room was better ventilated than the ward above, which was devoted to the sick. In the latter the air was very close and oppressive, and the windows were not allowed to be open during the night.

JOHN LUCAS,
Chairman.

*Legislative Assembly Chamber,
Sydney, 6 January, 1862.*

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 8 OCTOBER, 1861.

MEMBERS PRESENT :—

Mr. Alexander, | Mr. Caldwell,
Mr. Lucas.

The above Members not proceeding to the election of a Chairman this day, the meeting lapsed.

[To be called for Friday; 11th instant, at *Eleven o'clock.*]

FRIDAY, 11 OCTOBER, 1861.

MEMBERS PRESENT :—

Mr. Caldwell, | Mr. Lucas,
Mr. Hay, | Mr. Morrice,
Mr. Sadleir.

J. Lucas, Esq., called to the Chair.

Order of the House appointing Committee, upon the Table.

Committee deliberated on the course to be adopted in carrying out the inquiry.

Mr. R. Anderson, Accountant, Benevolent Asylum, to be examined.

The Chairman requested to move, in the House, that a Message be transmitted to the Legislative Council, requesting leave for the attendance of the Honorable G. Allen before the Committee.

[Adjourned till Thursday, 17th instant, at *Eleven o'clock.*]

THURSDAY, 17 OCTOBER, 1861.

MEMBERS PRESENT :—

J. Lucas, Esq., in the Chair.

Mr. Alexander, | Mr. Hay,
Mr. Harpur, | Mr. Holt,
Mr. Sadleir.

The Honorable George Allen, Esq., M.L.C., attending by permission of the Legislative Council, examined.

Several plans and papers handed in by witness. (*Vide List of Appendix.*)

Mr. R. Anderson not in attendance.

[Adjourned till Tuesday, 22nd instant, at *Eleven o'clock.*]

TUESDAY, 22 OCTOBER, 1861.

MEMBERS PRESENT :—

Mr. Caldwell, | Mr. Love,
Mr. Hay, | Mr. Sadleir.

In the absence of the Chairman, J. Hay, Esq., called thereto, *pro temp.*

Committee deliberated relative to obtaining power from the House to visit the Institution, both in Sydney and Liverpool, with a view to take such evidence upon the spot as a majority of their Members shall think fit.

Ordered, That the Chairman be requested to move accordingly.

[Adjourned.]

WEDNESDAY, 23 OCTOBER, 1861.

MEMBERS PRESENT :—

J. Lucas, Esq., in the Chair.

Mr. Alexander, | Mr. Love,
Mr. Caldwell, | Mr. Sadleir,
Mr. Harpur, | Mr. Sutherland,

Mr. Hay.

Committee visited Benevolent Asylum, Sydney.
(*For Proceedings, vide Minutes of Evidence.*)

[Adjourned till To-morrow, at *Ten o'clock.*]

THURSDAY,

THURSDAY, 24 OCTOBER, 1861.

MEMBERS PRESENT:—

J. Lucas, Esq., in the Chair.

Mr. Alexander,		Mr. Love,
Mr. Caldwell,		Mr. Sadleir,
Mr. Harpur,		Mr. Sutherland

Committee again visited Benevolent Asylum, Sydney.
(For Proceedings, vide Minutes of Evidence.)

[Adjourned.]

TUESDAY, 29 OCTOBER, 1861.

MEMBERS PRESENT:—

J. Lucas, Esq., in the Chair.

Mr. Alexander,		Mr. Love,
Mr. Caldwell,		Mr. Sadleir,

Mr. Harpur.

Committee met pursuant to summons, and visited Asylum at Liverpool.
(For Proceedings, vide Minutes of Evidence.)

[Adjourned.]

FRIDAY, 1 NOVEMBER, 1861.

MEMBERS PRESENT:—

Mr. Caldwell,		Mr. Sadleir,
Mr. Love,		Mr. Sutherland,
Mr. Lucas,		Mr. Harpur.

The Committee having assembled, pursuant to summons, in No. 1 Committee Room, proceeded to Randwick, to inspect the proposed site for a new Institution.

[Adjourned.]

FRIDAY, 8 NOVEMBER, 1861.

MEMBERS PRESENT:—

J. Lucas, Esq., in the Chair.

Mr. Hay,		Mr. Harpur,
		Mr. Sadleir.

The Committee met pursuant to summons.

Mr. R. Anderson, *Accountant, Benevolent Asylum, Sydney*, called in and examined.
Witness withdrew.

And Committee deliberating as to further course of procedure,—

Resolved,—That Dr. Brown, Dr. Walker, Dr. Burgon, and Dr. Bland, be summoned to give evidence at the next meeting.

[Adjourned to Tuesday next, at *Eleven o'clock*.]

TUESDAY, 12 NOVEMBER, 1861.

MEMBERS PRESENT:—

Mr. Lucas,		Mr. Love.
------------	--	-----------

A Quorum of the Committee not being present, the meeting convened for this day lapsed.

WEDNESDAY, 13 NOVEMBER, 1861.

MEMBERS PRESENT:—

John Lucas, Esq., in the Chair.

Mr. Hay,		Mr. Alexander,
Mr. Holt,		Mr. Sadleir,
Mr. Harpur,		Mr. Sutherland.

Committee met pursuant to summons.

The following witnesses severally examined:—

Alexander Menzies Brown, Esq., M.D.,

William Bland, Esq.,

George Walker, Esq., M.D., and

Joseph Burgon, Esq.

[Adjourned till To-morrow at, *Eleven o'clock*.]

THURSDAY,

THURSDAY, 14 NOVEMBER, 1861.

MEMBERS PRESENT :—

J. Lucas, Esq., in the Chair.

Mr. Sadleir,		Mr. Harpur,
Mr. Sutherland,		Mr. Love.

The following witnesses severally called in and examined :—

James Robertson, Esq., M.D.
 Bartholomew O'Brien, Esq., M.D.
 James Charles Gilhooly, Esq.
 Charles Meymott, Esq.
 John Aitken, Esq., M.D.

Other witnesses summoned not being in attendance,—

[Committee adjourned to Tuesday next, at *Eleven o'clock.*]

TUESDAY, 19 NOVEMBER, 1861.

MEMBERS PRESENT :—

Mr. Lucas,		Mr. Sadleir.
------------	--	--------------

In the absence of a Quorum, the meeting convened this day lapsed.

WEDNESDAY, 20 NOVEMBER, 1861.

MEMBERS PRESENT :—

None.

The meeting lapsed at half-past *Eleven o'clock.*

FRIDAY, 22 NOVEMBER, 1861.

MEMBERS PRESENT :—

J. Lucas, Esq., in the Chair.

Mr. Sadleir,		Mr. Love,
		Mr. Caldwell.

Committee met pursuant to summons.

Henry Graham, Esq., *City Health Officer*, called in and examined.

Witness withdrew.

James Smith, Esq., *Resident Medical Officer, Benevolent Asylum, Sydney*, called in and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Tuesday next, at *Eleven o'clock.*]

TUESDAY, 26 NOVEMBER, 1861.

MEMBERS PRESENT :—

J. Lucas, Esq., in the Chair.

Mr. Alexander,		Mr. Sadleir.
----------------	--	--------------

Messrs. S. H. Pearce, J. M. May, and S. Hebblewhite, severally examined.

[Adjourned to Thursday next, at *Eleven o'clock.*]

THURSDAY, 28 NOVEMBER, 1861.

MEMBERS PRESENT :—

J. Lucas, Esq., in the Chair.

Mr. Alexander,		Mr. Sutherland.
----------------	--	-----------------

J. G. Raphael, Esq., and F. R. Robinson, Esq., called in and severally examined.

The Rev. A. H. Stephen, Rev. J. McGibbon, and Rev. J. Sheridan, to be summoned to give evidence at the next meeting.

[Adjourned to Tuesday next, at *Eleven o'clock.*]

TUESDAY,

TUESDAY, 3 DECEMBER, 1861.

MEMBERS PRESENT:—

J. Lucas, Esq., in the Chair.

Mr. Alexander, | Mr. Sadleir,
Mr. Love, | Mr. Harpur.

The Rev. Alfred Hewlett Stephen, and Rev. John Felix Sheridan, examined.

[Adjourned.]

FRIDAY, 13 DECEMBER, 1861.

Proceedings stopped by sitting of the House at the hour appointed for the Committee to meet.

MONDAY, 16 DECEMBER, 1861.

MEMBERS PRESENT:—

John Lucas, Esq., in the Chair.

Mr. Love, | Mr. Alexander,
Mr. Caldwell.

Committee met, pursuant to summons.

The following witnesses called in and examined:—

The Rev. William Allworth.

Mr. R. Anderson.

Mrs. Lamont.

Miss Stubbs.

M. Alexander, Esq., M.P., (a Member of the Committee) examined in his place.

[Adjourned.]

THURSDAY, 2 JANUARY, 1862.

MEMBERS PRESENT:—

J. Lucas, Esq., in the Chair.

Mr. Sadleir, | Mr. Sutherland,
Mr. Caldwell, | Mr. Hay.

Committee met, pursuant to summons.

Francis Campbell, Esq., M.D., *Medical Superintendent, Lunatic Asylum, Tarban Creek*, examined.

Witness withdrew.

Chairman submitted Draft Report—Printed Copies (in proof) before the Committee.

Proposed Report read, considered, and verbally and otherwise amended.

Short-hand Writer called in.

Evidence just given by Dr. Campbell read from Short-hand Writer's notes.

Committee deliberated.

The following Schedule of Expenses submitted to the Committee, and, on motion of Mr. Caldwell, the sums therein set forth, *agreed to*.

EXPENSES incurred on Visits of Inspection.

Date.	On what Visit.	Name of Party.	Profession or condition.	Particulars of Service rendered.	Total Expenses allowed.
1861.					£ s. d.
29 Oct.	Liverpool Asylum	Railway Commissioner ..	Government Department	Special Train from Sydney to Liverpool, 22 miles at 15s. Three hours delay at £1	16 10 0 3 0 0

Printed Evidence to be circulated prior to next meeting.

[Adjourned to Monday next, at *Eleven o'clock*.]

MONDAY,

MONDAY, 6 JANUARY, 1862.

MEMBERS PRESENT:—

J. Lucas, Esq., in the Chair.

Mr. Alexander, | Mr. Sadleir,
|
Mr. Love.

Committee met, further to consider Report.

Chairman laid before the Committee a Return, furnished by Mr. R. Anderson, of the number of Females confined in the Benevolent Asylum, Sydney, from 1 January, 1851 to 25 December, 1861.

Ordered to be appended to the Evidence. (*Vide Separate Appendix.*)

Draft Report further considered.

Same read, paragraph by paragraph.

Paragraph 1 read and agreed to.

Paragraphs 2 and 3 read, verbally amended, and agreed to.

Paragraph 4 read and agreed to.

Motion made (*Mr. Alexander*), and Question—That the following paragraph be here inserted in the Draft Report:—"Your Committee find that the Society have in hand £10,594 6s 6d. as an Investment Fund, and they think that the property of the Society will realize £20,000, which, together, will go far to complete a new Asylum. The removal of the Institution to the suburbs will involve the necessity of a Depot in the City, for the purpose of receiving cases of urgency and distributing out-door relief"—*agreed to.*

Paragraph 5 read, amended, and agreed to.

The remaining paragraphs read, verbally amended, and agreed to.

Resolved,—That the Report, as amended, be the Report of the Committee.

Chairman requested to report to the House.

1861.

Legislative Assembly.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

BENEVOLENT ASYLUM.

WEDNESDAY, 17 OCTOBER, 1861.

Present:—

MR. ALEXANDER,
MR. HARPUR,
MR. HAY,MR. HOLT,
MR. LUCAS,
MR. SADLEIR.

J. LUCAS, ESQ., IN THE CHAIR.

The Honorable George Allen, Esq., M.L.C., (by permission of the Legislative Council),
examined:—

1. *By the Chairman:* You are aware that this Committee has been appointed to inquire into the "adequacy of the provision made for the destitute, through the instrumentality of the Sydney Benevolent Society"? Yes. The Hon.
George Allen,
Esq., M.L.C.
2. The Committee have summoned you, in consequence of your having been, for the longest period of any of its Members, connected with that institution, thinking you can afford them some very useful information; you are the honorary secretary, and vice-president, are you not? Yes. 17 Oct., 1861.
3. And have been for many years? I think I commenced my career as a member of the Committee of the Benevolent Society in 1821, and that I succeeded the Rev. Richard Hill, who died suddenly in 1836, who was then secretary. Two secretaries were appointed when Mr. Hill died. The late Rev. Archdeacon Cowper, then the Rev. William Cowper, and myself; afterwards Mr. Gordon became a joint secretary with me, and for the last eighteen years and upwards, that is, since July 1843, I have been sole secretary.
4. How is the institution constituted? I think the best answer to that question will be to refer to Rules I and III, which are as follow:—"1. That the object of this society be to relieve the poor, the distressed, and the aged, and thereby to discountenance, as much as possible, mendicity and vagrancy, and to encourage industrious habits among the indigent, as well as to afford them religious instruction and consolation in their distress, and that it be called 'The Benevolent Society of New South Wales.' 3. That the business of the society be under the management of a president, one or more vice-presidents, a treasurer, a secretary, and a committee (not to exceed thirty-six in number, exclusive of *ex officio* members), to be chosen from among the members at the annual general meeting, to be held as hereinafter is provided." I beg to hand in a copy of the Rules of the institution. (*The witness handed in the same. Vide Appendix A.*)
5. How is the institution supported? By donations from the Colonial Government, fines from Benches of Magistrates, unclaimed poundages, money received from pauper labour, and voluntary contributions, &c. These voluntary contributions consist of collections made at churches and chapels, and private subscriptions and donations.

The Hon.
George Allen,
Esq., M.L.C.

17 Oct., 1861.

6. Have you found these voluntary contributions increase or decrease? They vary; some years they are more, some years less.
7. Generally speaking, in your report I think you will find the same names occur year after year? You will find the same names as contributors to all the charitable institutions of the city; and it is disgraceful to the Colony to find so few names to the various charities; for the same persons subscribe to all.
8. I believe when you call meetings to receive your annual reports, they are very thinly attended? They are, in comparison with what they ought to be.
9. In many cases you have to adjourn your meetings, in consequence of there being no subscribers, or very few, present? Our annual meeting is held in a month which is rather uncertain as to the weather. It is held in January, a month in which thunder-storms prevail; and it very frequently happens that the day sets out very warm, and winds up with a thunder-storm, or an awful "brickfielder," and I believe that is often the cause of so few attending; however, it is the fact that we have not had the good attendance at our annual meetings I would have liked to have seen.
10. Are there a great number of females who come to your institution for the purpose of lying-in there? Yes.
11. Do you consider this institution suitable for that class of paupers? I do not think the institution was ever intended to take those persons in; but we have taken them simply because there was no other place for them to go to; and because we felt that if we refused to receive them there, many of them must die in the streets.
12. Are you aware whether any of those women who have been confined there have been more than once in the institution? *Yes.
13. Has it been reported to you the probable proportion of those women who are common prostitutes? I do not think we have many of that class; we may now and then have one, but the class who generally go there are those who have been seduced—girls who have been seduced while in domestic service, or on board ship coming out to this Colony. But I should say that lying-in cases are not confined to this class; there are respectable married women who have been deserted by their husbands, and who have been compelled to apply to the Benevolent Society, for the purpose of coming in to be confined.
14. There is no law by which the institution can sue the reputed father of these illegitimate children, for any expenses the society may be put to in these cases? I am not prepared to answer that; that is a legal question. Whenever we take into the Asylum women of the class I have just mentioned, we always inquire who is the father of the child, and we insist that the mother shall, as soon after her confinement as possible, take out a warrant for the support of the child; but in most cases we find that the father is not in the country, or that he is in some part of the country unknown to the woman. Whether she speaks truly or falsely we cannot tell.
15. Have you known any instances where the reputed father has paid the expenses incurred? I cannot at the present moment bring any to my recollection; I cannot name any particular instances. Many of these girls will at once give you the name of the father, but where he is they will say they do not know; either he has gone up the country, or gone to England. Sometimes they will tell you that the seduction took place in another part of the world.
16. Do you think it is desirable there should be a law by which the institution should be enabled to recover these expenses? I do not think it would help us, because there are sufficient means at present if you could find the father—the mother can take out a warrant.
17. That would not assist the institution—I am speaking of the expenses of the institution? It would be desirable to make these fellows pay the expenses the institution is put to for keeping their illegitimate children, if it could be done. I would state that we never take a case of the class I now refer to into the Asylum if we can help it; it is simply that the women may not be left to die in the street; if we cannot get rid of them in any other way, so as to satisfy ourselves that they will not die in the streets, we take them in.
18. There is another class of paupers received by you—a great number of young children? A great number.
19. Are not they drafted off to the Destitute Children's Asylum? Not as a matter of course. We do not take children into the Asylum if we can possibly help it. We almost invariably tell the parties when the application is made to us, that it is almost next to bringing them there to die. They are sent to us from the Police Office in a most filthy and degraded state. Sometimes, poor little infants not able to walk or speak are picked up in various parts of the town, and we cannot refuse to receive them. We receive children in the same way as we receive these women—because there is no other place to send them to.
20. *By Mr. Holt:* There is the Orphan School? On the meeting following the reception of a child we inquire into the case, and if we find it a fit object for the Orphan School we immediately write to the Government, and attention is forthwith paid to the communication—there is no difficulty in the matter; the Government is very attentive in all these matters—and an order is sent for the admission of the child into the Orphan School. If it is a case for the Destitute Children's Asylum we make an application in the same way, but it is not so easy to get a child into the Destitute Children's Asylum, for the Committee will not take a child into that Asylum—and very properly—who may contaminate the other children with disease. Sometimes they come to us in the last stage of disease, and we cannot refuse to admit them.
21. *By the Chairman:* That will account in some degree for the great mortality among them? There was great mortality in one year among them, but that was a year of mortality everywhere,—I think it was 1859 or 1860,—people died all around us; many persons were taken away, whom if you had seen a short time before you might have taken a lease of their lives.

22. Is there any arrangement between your institution and the Destitute Children's Asylum, as to the latter receiving children from you? It is rather, I should say, between the Government and them; if we can shew to the Government that there are any cases fit for them, we have no difficulty in getting an order.
23. Is there not a stated sum paid annually by the Government for all children sent by them to the Destitute Children's Asylum? That is a matter which rather belongs to the other society. I happen to be a director of the other society as well as of this, and I therefore know that the Government do pay a sum of money.
24. *By Mr. Alexander:* At one time there was a great anxiety to draft a number of the children from the Benevolent Asylum to the other, and the directors of the Destitute Children's Asylum would not receive them unless the Government would pay them a large sum of money? It was like taking from Peter to pay Paul; the Government paid us, and we paid them.
25. *By the Chairman:* Do you not think it is very injurious to the health of the children to be allowed to remain for any considerable time in an institution with so many aged persons? I think the Benevolent Asylum should be kept under the original rule—for the benefit of the aged, the infirm, and the destitute.
26. These children are destitute? Yes, but it was not intended for destitute children.
27. *By Mr. Sadleir:* Do you think the formation of industrial schools would meet the wants of these children? Many of them are too young.
28. In the institution with which I was connected we received children a year old? They could not do much in the way of industry. I would say, I do not think these children should be in the Benevolent Asylum.
29. *By Mr. Hay:* It is a bad school? It is a bad school for them.
30. In point of fact, there are not a number of children there, except those who are on their passage from the streets to these other institutions? This is the last report, a copy of which I hand in. (*The witness handed in the same.*) In an abstract of the ages of the inmates, it states that the number of inmates under ten years of age was 82.
31. That does not give us a guide as to the number of children who are of such an age that they might be taken either to the Orphan School or to the Destitute Children's Asylum? Speaking generally, there may be two or three kept waiting, but we keep none permanently in the Asylum who are objects for the Orphan School; as soon as we discover that they are so, we make application to the Government to remove them.
32. Or objects for the Destitute Children's Asylum? Or objects for the Destitute Children's Asylum; we make a similar application in their case. We made application to the Government the other day, and I believe they are going to move 40; but we must bear in mind that the Destitute Children's Asylum cannot receive more than a certain number.
33. In the meantime you will not have any difficulty from the incapacity of the Destitute Children's Asylum to receive any more? I do not think it could receive many more.
34. The lock has not actually come? I do not know that it has actually come; being a member of both institutions, I have a difficulty in speaking upon the subject.
35. That I should think is an advantage? Officially as secretary to the Benevolent Society I have not received notice of the lock, but as a director of the other institution I know that until the building is enlarged we cannot take many more, and we have applications from the City and Colony generally to that institution.
36. That is a difficulty you will have at hand soon? I do not apprehend that it will soon occur, for the Parliament were good enough to give us £8,000 to increase our buildings.
37. You think that has come in time to prevent serious difficulty? I hope so.
38. For instance, will there be a possibility of accommodating these 40 children? I hope so.
39. At the present time? I could not speak positively.
40. Are the buildings finished? No; it will be some months before they can possibly be finished; but there is every disposition on the part of the two societies to do what they can.
41. In fact, nearly all the children can practically be removed as soon as they are clean and in a proper state? I think some are not eligible either for the Destitute Children's or for the Orphan Asylum—they are too young; the Destitute Children's Asylum does not, I think, admit them under three years of age.
42. *By Mr. Holt:* The Orphan School receives them very young? Very young; I do not know at what age.
43. *By Mr. Sadleir:* They were brought to us in blankets? You received them I suppose for the same reason that we do—that you could not help it.
44. *By the Chairman:* How many in-door patients is the Benevolent Asylum calculated to accommodate with comfort? Here is a ground plan of the Sydney Asylum. (*The witness handed in the same. Vide Appendix B.*) This is a plan of the upper portion. (*The witness handed in the same, Vide Appendix C.*) The house was supposed to contain 200 or 250. This is the plan of the Liverpool Asylum. (*The witness handed in the same. Vide Appendix D.*)
45. How many will that hold? I have here a return which shews that there are 339 persons there at present. It is intended only to accommodate 250. I have here a return of the number of patients in the sick wards, which I beg to hand in. (*The witness handed in the same. Vide Appendix E.*) Also a return of the number of inmates sleeping in the hale wards. (*The witness handed in the same. Vide Appendix F.*) Also a return stating the dimensions of wards and of ground, &c. (*The witness handed in the same. Vide Appendix G.*)
46. Do you find your numbers gradually increasing? Yes.
47. And you receive inmates from all parts of the Colony? Yes.
48. With regard to the Liverpool house, there is a great want of out-door accommodation, such as sheds? Yes, that is all stated in the account I have handed in.

The Hon.
George Allen,
Esq., M.L.C.

17 Oct., 1861.

The Hon.
George Allen,
Esq., M.L.C.

17 Oct., 1861.

49. You are in treaty with the Government for a new site for the Sydney Asylum, are you not? We have applied to the Government, for some years past, for a new site. The committee have considered that the present site is not adapted for it in Sydney; we have applied to the Government, and have received every attention, not only from the present but from former Governments.

50. Have you partly selected a site? Yes; the Chief Secretary, the president of the institution, the treasurer, and myself, went out a short time ago, to look at a piece of land at Randwick of about fifty acres, which it was thought might be a suitable site.

51. Have you had the opinion of any medical men as to the suitability of the position proposed? Not as to that precise spot, but with reference to another in that vicinity which it was found had been disposed of.

52. *By Mr. Hay:* Who were consulted? Our present Doctors—Bland, Burgon, Brown, and Walker.

53. *By Mr. Holt:* Would it not be a considerable expense to send patients there—would it not be an advantage to have them on the line of railway? I think not; in my opinion this is as good a spot for it as could be found.

54. *By the Chairman:* Have you had plans and estimates of the probable cost? No. At our last meeting we appointed a sub-committee to take these matters into consideration; that is to say, what sort of building ought to be put up, to get a plan, and then of course all the rest would follow.

55. From what funds do you intend to erect this building? We have some money—some-where about £10,000. We have what we call an endowment fund, which has arisen from large donations; for instance, we got a donation of £3,075 the other day from Mr. Jones. The Government, some years ago, were good enough to listen to our cry, and gave us a nice piece of ground by the railway, part of which has been sold, and part of which yet remains; so that we have in money about £10,000, the piece of land near the railway, and the present site which we propose to sell, and we may calculate that this altogether will bring us about £30,000, and I think we could put up a very good building for that sum. That is my idea, but it is only my individual opinion.

56. *By Mr. Holt:* At the present price of labor and materials a very good building might be erected for £30,000, but it would be necessary to obtain an Act of Parliament before you would be able to sell the land? Yes.

57. *By the Chairman:* Are there not a great many persons who receive out-door relief from the institution? Yes, a great number.

58. It appears from the last returns that there are some 2,800? Yes.

59. *By Mr. Alexander:* They are put down in families? I may say, from my experience, that you may reckon each family to consist of about five. "The average number of persons receiving out-door relief during the year was 2,808. To whom was issued 38,637 loaves of bread; 129,560 pounds of flour; 38,470 pounds of meat; 1,581 pounds of sugar; 13,714 pounds of rice; 604 pounds of arrowroot; 1,131 pounds oatmeal; and £345 16s. 6d., towards the payment of rent; the whole of which amounts to £2,688 6s. 6d." The number of cases of out-door relief is constantly increasing.

60. *By the Chairman:* What plan do you adopt with reference to granting this out-door relief? On every Tuesday of my life, unless I am called away by other business over which I have no control, such as my Parliamentary duties, or am prevented by my health, I go there and sit in committee. The applicants are brought before us, and we judge of the cases from the recommendations brought by the applicants, or from their appearance.

61. *By Mr. Holt:* Would it not be desirable to have a visitor to go to their houses? We have that. The mode of procedure is this:—A person comes to us with a recommendation, or possibly he may have no recommendation, although in nearly all cases one is brought; according to the recommendation we give relief for that week. During the week the visitor has to visit the house of the person relieved, and on his report we either increase, decrease, leave it at the same rate, or strike off the supply altogether.

62. *By the Chairman:* Are you frequently deceived? No doubt we are frequently imposed upon, but we act upon the old proverb that "it is better to let ninety-nine guilty persons escape than one innocent suffer." The moment we find we have been imposed upon we strike off the name of the person.

63. Would it not be very inconvenient for the purpose of affording this out-door relief to have this establishment at Randwick? We must have a receiving place in Sydney, and to that place the persons needing out-door relief might apply. I look upon the out-door relief as being quite as important as the in-door.

64. If you erect a new building, you would have a house in Sydney from which this out-door relief could be granted? We should not require a large house.

65. Rooms? We must have more than that, we must have a receiving place; we might have a house in that part of the town for about £120 a-year.

66. *By Mr. Holt:* If you had sufficient funds, would it not be better to build a house for the purpose? We could not do without that.

67. *By Mr. Alexander:* Would it not then be a question whether it should not be in a more central part of the town? There is this to be said,—that there are a great many members of the committee who are engaged in the active business of life, and it is a long way to go to the present Asylum; they have now to go and neglect their own business for two or three hours in the day. If the building were more in the centre of Sydney it would be better, on that account.

68. *By the Chairman:* Nevertheless, if you take into consideration how the city is extending in that direction, would not that, say in five years, be as central a position as you could have? It does not appear to me to be extending so much in that direction as in the other.

69. *By Mr. Alexander* : The committee used formerly to meet in Castlereagh-street, and it was then the general wish of the committee that their meetings should be held in the house, in order that it might be more immediately under their supervision? Yes.

The Hon.
George Allen,
Esq., M.L.C.

70. *By the Chairman* : If you build a new Asylum, do you propose to continue the Liverpool branch of the Asylum? It is difficult to say what is proposed; I can give only my own ideas. It would be some years before the building could be completed; probably two or three years.

17 Oct., 1861.

71. Do you not consider Liverpool is an excellent situation? The ground belonging to the Asylum is not sufficiently large.

72. *By Mr. Hay* : What is the extent of the ground? I do not know, but there is no means of extending it.

73. *By the Chairman* : As a general rule, you keep the females in Sydney and send the males up to Liverpool? Yes.

74. Do you not think that under any circumstances it would be a very good plan, for the future, to keep the Liverpool institution either for the males or for the females? We might adopt a plan by which there might be two buildings at Randwick a little distance from each other, one for the males and the other for the females, and the master's house might be in the centre.

75. Do you send paupers from Sydney to Liverpool by the railroad? Yes.

76. Do the Government charge for their conveyance? Yes, the full price; but then it is only fair to say that it comes to the same thing, for the Government give us the money. I can only say in general terms, that every Government I have had to do with in my connection with the Benevolent Society, have been as kind as they could be.

77. But the conveyance of patients is one of the expenses charged to the Asylum? Yes. We have water also from the railway at Liverpool, which we pay for; we pay for everything we get.

78. Is there divine service held in the institution every Sunday? Yes, as far as I know.

79. Clergymen of different denominations go there of course? Yes.

80. How do they arrange for holding service—do they the same as in the gaol—all use one room? I believe service is conducted by the Church of England, the Wesleyans, the Church of Rome, and the Presbyterians.

81. Any denomination has liberty to hold service? Any recognized denomination—we should not allow Mormons to go there.

82. They adopt the same principle as that carried out at the gaol—all may have the use of the room at certain times? Everyone is allowed to worship God according to his conscience.

83. Are the inmates compelled to attend? Not that I am aware.

84. It is quite voluntary? Quite voluntary. It is not allowed that the inmates should be disturbed in the wards by public preaching in them.

85. I believe the means to be taken for obtaining admission is the same as that to procure out-door relief? There is no difficulty. If any person sends me a line, and I know the individual, I never refuse admission, unless I know that the person writing to me has been imposed upon. There is no difficulty in the way of any case of real distress being taken in there; if anything, it is rather too open.

86. Do the in-door paupers perform any labour? Yes, they do, but it is not much, I believe. We consider that every person is bound to do what he can; but they are a poor set. If they were able to do much they would not be allowed to be there.

87. *By Mr. Hay* : How long has the Benevolent Asylum been established? The Benevolent Society of New South Wales was established about the year 1818.

88. How was its operations conducted—had you a building then? I was not connected with the society until 1821. The building, I think, was opened some time in that year, by Governor Macquarie.

89. Was the building erected for the uses of the society? Yes, but it was not of its present size; it was on the present site.

90. Which was an original grant from the Crown? Yes.

91. The building has been gradually increased since that time? Yes.

92. I suppose at the expense of the Government? The whole funds, except the small sums subscribed, have been provided by the Government; but the British Government for many years contributed largely to its support; that was while this was a convict Colony, and while they thought convicts were deriving the benefit of it. I think they gave us as much as £3,000 a-year at one time, and then they gradually reduced the amount.

93. The British Government made use of your services, and supplemented your subscriptions? The Benevolent Society was a private matter got up by some benevolent individuals, among whom was the late Mr. Edward Smith Hall; I think he was the principal mover in it; and from time to time they applied to the Government for assistance. The British Government, as I have stated, contributed largely to the support of the institution, and from the report I have before me, I see that in 1851 we received £750; in 1852, £500; and in 1853, £250; which appears to be the last contribution received from the Imperial Government.

94. *By the Chairman* : As the Imperial Government decreased the amount of their contribution, the Colonial Government increased their's considerably? It only came to this—that when the fathers would not pay, the sons did.

95. At one time the Colonial contribution was very small? Yes.

96. You represented to the Government, that in consequence of the decrease of the Imperial contribution it was necessary for the support of the institution that the Colonial Government should supply the deficiency? Yes, and whenever we asked for it we were never refused.

97. *By Mr. Hay* : I take it that, from the beginning, the way this Benevolent Society provided

The Hon.
George Allen,
Esq., M.L.C.

17 Oct., 1861.

vided for the poor of this Colony was more as a means of applying the funds, than as really contributing the great bulk of the funds by which the relief was effected? When it commenced it commenced as a little thing; a few charitable people supplied the money and dealt out relief to out-door patients; there were no in-door patients at that time. The wants of the people gradually increased, and at length were greater than could be supplied by the unassisted efforts of these persons; they then went to the Government and asked for money. I am now speaking of the time when the Colony was under the direct rule of the Imperial Government, and there was no Council at all. They sent in an account to the Government, saying they were indebted £100, £200, or £300, and asking assistance, and this assistance was from time to time given by the Government.

98. I understood you to say, that from the very first period of your connection with this institution, it received considerable donations from the Government, from time to time? Yes.

99. The great advantage then, I presume, in as far as this Benevolent Society is concerned, has been the wise distribution of the funds, more than the provision of the funds? I will say the distribution of the funds; I will not say whether wise or not.

100. If any object has been gained at all, it must have been in that way? Of course it has been in the distribution of the funds, that is all it could be. We did not find the money ourselves; the principal part of the money came from the Government. We did what we could to excite the benevolence of the public around, and then we applied to the Government to supply the deficiency. At last it became a settled thing—we made out our estimate of what we supposed we should get, and what we supposed would be our deficiency, and that deficiency has always been granted.

101. You say that the site is in itself bad, and yet as I understand you say, that on the average of years, considering the character of the inhabitants, the mortality has not been at all great? As to the mortality, in one year it was very great.

102. You think that was an exceptional year? That was an exceptional year. I have my own opinion about that.

103. That there might be causes for the great mortality in that year, separate from anything in the site? I think you had better ask the doctors about that. The site is one question, the building is another; the building is on the ground; there is no cellarage, no ventilation; but of course we cannot alter that now without we take down the whole building.

104. *By Mr. Harpur*: That causes a dampness? Yes.

105. And unwholesome effluvia? Yes.

106. *By Mr. Hay*: Then you object rather to the building, and the want of ventilation beneath it, than to the site? It is in the vicinity of the burial ground, and that cannot be considered a very nice spot for such a building. The burial ground is at the back, and the ground dips from the burial ground to George-street, and of course that cannot be very wholesome.

107. Do you think the land would be particularly valuable for building if it is so unhealthy? No doubt the bodies must become every year less likely to have any injurious effect.

108. *By Mr. Holt*: They still continue to bury there? Only those who have vaults.

109. *By the Chairman*: Burials still take place in the Roman Catholic, the Presbyterian, and Independent burial grounds? There are very few, comparatively speaking.

110. All the different denominations, with the exception of the Church of England—the Roman Catholics, Presbyterians, Independents, and Jews? The Jews are a long way off, the principal would be the Roman Catholic and Presbyterian.

111. *By Mr. Holt*: The Congregationalists? That burial ground is a long way off, and is pretty full now.

112. *By the Chairman*: The water from the Independent burial ground would not naturally drain through the ground of the Asylum, though it might from the Roman Catholic and Presbyterian grounds? I would not say there is any drain through the ground, but it is not a pleasant spot to congregate a large number of people on.

113. *By Mr. Hay*: If the land were sold and built upon, there would be a large number of people congregated there, with less opportunity of complete drainage? They would build houses upon the land —

114. Do you not think the drainage could be made more complete, and at less expense, from one large building, than if the land were cut up into small allotments, and a number of houses were erected there? I do not think that is the point for our consideration; the matter for our consideration is whether we can remove our people to a more healthy spot.

115. Still, practically, I do not see that your evidence goes to shew us that this is an unhealthy spot; you say that one year the mortality was very great? I believe it to be the opinion of the doctors that it is not a good spot.

116. *By Mr. Holt*: You say that you have had an experience of forty years; from the mortality of the average of years, do you not yourself consider that it is an unhealthy spot? I dislike the building itself more than anything. I do not think the building is sufficiently ventilated.

117. With regard to the site, do you not consider it an unhealthy site? I should prefer, for old people like these, a more airy situation, there being so many congregated together. I do not think it advantageous to have the old people in the city, and I think it would be an advantage to the city to have them removed a little way from it.

118. *By Mr. Hay*: Do they go into the city? They are constantly breaking bounds.

119. For drink? Yes; it would be far better for them if they could not get out. I think it might possibly tend to work a cure, if the building were a few miles away from Sydney.

120. You do not think practically there would be any great difficulty in communicating with Randwick? No.

121. *By Mr. Holt*: Formerly you sent paupers to Liverpool in drays? Yes. If we had a building at Randwick I should propose that we should keep a covered conveyance, a good horse, and driver, so that the expense would be the driver and the feed of the horse.

The Hon.
George Allen,
Esq., M.L.C.

122. Would not a couple of horses be necessary? I do not know why one good horse should not answer for the purpose as well as a couple. I do not think it would be necessary for the conveyance to go into Sydney every day; but I do not think that would be a matter of any moment; a great many would be able to walk out. We have a rule, that if a man is sent to Liverpool and he breaks bounds there, and afterwards applies to us for re-admission, that he shall walk back; we do that as a sort of punishment, to let him see that it is not so easy to return as to get admission in the first instance. There would be this advantage in going to Randwick—that we should get fifty acres of land there.

17 Oct., 1861.

123. *By Mr. Hay*: You must have central offices in Sydney, and a receiving place? Yes, we must have them. If we had a place at Randwick we might have a garden there, where the old people could be employed in raising their vegetables.

124. *By the Chairman*: At one time, did not the inmates of the Asylum draw the wood required for the use of the establishment? Yes; we now burn coals principally at the Asylum.

125. *By Mr. Hay*: Has it not struck you, that if both the Benevolent Asylum and the Destitute Children's Asylum were at Randwick, some serious evil might arise from having the two institutions in the neighbourhood of each other? I think they would be a sufficient distance from each other—from half-a-mile to a mile apart.

126. Do you know the extent of ground belonging to the Destitute Children's Asylum? I do not exactly; but I think sixty or seventy acres.

127. Extending a considerable way down the hollow? The Children's Asylum would be at some distance from the other.

128. It would not be desirable that the children at the Asylum should be too much limited in their walks about; and if the grounds of the other Asylum came in contiguity with theirs, do you not think it might cause considerable evil? No, I do not think there would be any danger.

129. Do you not think these vicious old people wandering about might injure these children? They would not be allowed to wander about.

130. They do now sometimes break bounds? They do so in Sydney.

131. It is the contiguity of the establishments which might give rise to evil? I think it would be some advantage to have the two establishments contiguous, provided they were managed by the same committee.

132. That does not refer to the sort of evil I anticipate—it is one of a moral character—either that you must control these people too much, or that they will have the opportunity of mixing with these children? I do not think there is any danger.

133. The building at Liverpool is a good building, is it not? It is a good building as far as it goes—a good lofty building; but, as appears from the statement I have handed in, it is capable of holding only about 250. Now we ought to have a building put up that would hold at least 1,000; at present we have about 800, or taking away the women and children, 600.

134. In what ratio has the number of inmates in the Asylum been increasing from year to year? I hand in a statement of the increase of inmates, from December, 1853, to this date. (*The witness handed in a Return. Vide Appendix G 2.*)

135. Are there any public buildings at Liverpool which might be converted to your uses? No, I am not aware of any that could be given for that purpose. I made application a day or two ago to the Government, for the use of a large building on the wharf at Parramatta, formerly the Commissariat Store, for the purpose of removing thither the children and pregnant, or any other women whom the committee might consider it desirable to remove. That matter is now under consideration; and if we can get the building it will relieve us a good deal for some time to come, but at the same time it will involve a good deal more expense.

136. *By Mr. Holt*: For separate management? It will not involve any separate supervision; we shall be able to supervise it in the same way as we do the Asylum at Liverpool; but we should require a matron and medical man. I think it is most desirable that we should get that or some other building.

137. Have you considered whether it would not be better to enlarge the Liverpool Hospital, which is a splendid building, erected on a site about the healthiness of which there can be no doubt? There is not sufficient ground attached to it. Besides I do not think you would be able to get a committee in Sydney to manage a building up there. If the building were erected at Randwick, or if there were a desirable spot thereat, Newtown, they might get there in half an hour, but to go to Liverpool and back would consume a whole day.

138. If a special train were employed, they might get to Liverpool in almost as short a time as to Randwick? It would then be necessary to have two special trains, or to keep one waiting two hours. The property at Liverpool is Imperial property.

139. I believe there was a despatch of the Imperial Government in the time of Sir George Gipps, making over to the Colony all the property that was not required for Imperial purposes? We have the use of this property, and for every building we put up they will repay us if they take this away, but I do not think we could put upon the present site a building sufficiently large to receive all who might apply to us. The piece of ground around it is very small.

140. There is a paddock of ten or fifteen acres directly opposite belonging to the Government? If the Government will give us twenty or thirty acres there it may alter the aspect of affairs, and if the Government will also provide us with transit free of expense.

141. *By Mr. Hay*: With regard to these lying-in cases—your opinion, as I gather from your answers,

The Hon.
George Allen,
Esq., M.L.C.

17 Oct., 1861.

answers, is that it will be necessary to make some provision for these women who come to you? I do not think that ought to belong to the Benevolent Society at all.

142. What do you think should be done with them? I think there should be a separate establishment altogether for them.

143. A lying-in institution? It is sufficient for me to say that there should be a separate establishment for that particular purpose.

144. Do you think if there were a building erected for that purpose, there would be any impropriety in having it under the management of the same Benevolent Society—might not the same gentlemen manage it who now have the general management of the affairs of the destitute? I do not see any difficulty in that part of the business; that is, if the committee are willing to undertake the supervision.

145. You think there ought to be a separate building for that purpose? Yes.

146. And built with a view to that purpose? Yes.

147. You do not see any reason why there should be a separate board of management? I do not see any difficulty in the same gentlemen managing it as those who are on the committee of the Benevolent Society.

148. How long do the women generally remain after their confinement? I am sorry to say that they remain longer than I like them to remain, but there seems to be no help for it. As soon as we can get situations for them we say, "You must take that situation."

149. What do you do with their young children? They must take them with them; we cannot take charge of young babies unless the mothers stay too; it would be almost certain death to the child to allow it to stay without its mother.

150. Then there is a practical difficulty in getting rid of these people? Yes, some remain months in the institution.

151. Are there any cases in which the mothers remain until the children are removed to the Orphan School? No, I never knew one to remain so long as that; I have known them to remain months; but as soon as a situation can be obtained for them, by their own exertions or by ours, we require them to leave.

152. Then the difficulty is to get places for them into which they are allowed to take their children? Yes; we have obtained places for many of them, and have had to take them back on account of their children.

153. Are cases of out-door relief on the increase? Yes, they are always on the increase.

154. Perhaps you will furnish the committee with statistics shewing the progressive increase? If the committee suppose for one moment that this Benevolent Society meets all the destitution of Sydney, they are much mistaken. There are many cases of distress, perhaps the most heart-rending, that do not come before us at all. There are many persons who have been in the middle walks of life, and whose circumstances are greatly reduced; and these cannot overcome the feeling of repugnance to the seeking for relief from us. Such cases can only be met by private charity.

155. Have you many applications from the able-bodied for relief? I am sorry to say we have, but in such cases we are very particular in our inquiries. We have persons come to us for relief, who, we are satisfied, though able to work, cannot obtain employment; and to these, after the fullest inquiry, we give relief; but in such cases we only relieve for a fortnight or a month at a time. For a long time I could not believe that there was truth in the statements of these people that they could not get employment, and I stood out for a long time against their obtaining relief. I have said to them, "If you cannot get full wages you ought to go to work for half wages rather than come here to seek relief. We do not meet here to keep up the rate of wages, but merely to prevent the people from starving."

156. In point of fact, you have occasion to relieve the able-bodied? Yes.

157. Do you observe in some cases, that the individuals receive relief from you for a considerable period; that they then disappear and turn up again at intervals? Yes, there are many who receive relief; they then go off for a time, and after some period has elapsed return again.

158. Have these been men who could not obtain work? Yes, but in all these cases of able-bodied applicants the committee are very particular; they require strong recommendations, and test the statements of the applicant in a variety of ways.

159. They feel the importance of doing so? Yes; sometimes a member of the committee will say to one of these men, "Come down to me to-morrow and I will give you a job," and in that way we occasionally find that we have been imposed upon, but I do not think the cases of imposition are very numerous.

160. As taking a leading part in this institution, would you feel it was objectionable to have an inspector appointed by the Government, who should have the power of looking over all the arrangements of the institution? It would depend upon what his powers were.

161. I mean as inspector on behalf of the Government, who furnish the larger portion of the funds; to certify the Government as to the mode in which those funds are expended? I think the Government should have a considerable representation on the Board, if the Board is to continue as it has been; I have always thought so, and have endeavored to get as many Members of the Assembly on the Board as I could. I have often asked Members of the Assembly to take a seat on the Board—I do not know whether I have not asked you.

162. I do not think so? If not, we shall be glad of your services next year.

163. *By Mr. Alexander:* Do you think if an officer were appointed by the Government as an inspector, there would be any practical advantage in it? I have no objection, provided he is not to control the committee.

164. *By Mr. Hay:* Merely to have a full opportunity of seeing how the institution is conducted from top to bottom? I see no objection to that, but he should have no power to say

to

to the committee, "You shall do this," or "You shall not do that." I also think the Government should have the liberty of nominating persons on the committee.

The Hon.
George Allen,
Esq., M.L.C.

165. *By Mr. Holt*: I think one would be quite sufficient, who should be specially nominated for the express purpose—it should be part of his official duty? (*The witness read the names of the committee. Vide Appendix H.*) I think if you look over that list you will find that it is a committee which would meet with general approbation. I think a smaller number would be better, but I believe every sect of religion is represented on it.

17 Oct., 1861.

166. With respect to the reputed fathers of children born in the Asylum, do you not think it desirable that some measure should be systematically adopted, as in England, to compel the fathers to contribute to the maintenance of these children—that an officer should be specially appointed for the purpose of enforcing payment? I think I have answered that question.

167. What I wish to know is, whether it should not be the special duty of an officer of the institution to enforce these claims? I do not see how I can answer that question; I do not see what officer we could appoint, or what special duty he should perform.

168. I would ask you whether the same rule should not be applied here as in England, namely, that the reputed father should be compelled to support his child? No doubt, if you could get hold of him; but you must first find him out.

169. What I wish to ask you is,—whether it would not be well to appoint an officer whose duty it should be to ferret out this information. I know there would be difficulties in the way, but they would not be insurmountable generally, though in some cases they might be? I do not think we want a special officer for the purpose, for we do it by our Board in this way:—A girl comes into the room, she says she wants to come in to be confined; the question is then asked, "Who is the father of the child?" and I think I may say, that in nine cases out of ten she tells the name. "Where is he?" Either in England, up in the bush somewhere, in some other part of the world, or I do not know where, is the answer. If she tells where the man is, and he is in Sydney, we require her, as soon after her confinement as possible, to take out a warrant against the father for the maintenance of the child.

170. In England the parochial authorities act at once? I was young when I left England, and therefore I do not practically know the working of the poor laws; only as a lawyer I know the theory, and it appears to me that the difference between the two cases is this: In England the parties have a right to go to the parochial authorities and to ask for assistance, but they have not a right to come to our Asylum and demand relief; we may say, "You shall not have it." Therefore, when a woman comes to us under these circumstances, we put this question to her, and if she does not choose to satisfy us, we could say, "We will not take you in at all."

171. Is not this large sum of money appropriated for the purpose of relieving distress? Yes. You misunderstand me; you are speaking of a branch which I do not think should be a branch of the Benevolent Asylum at all.

172. If these women are in destitution, how can you separate the two? All I can say is, that this institution was never intended for such cases.

173. Being for the destitute, you could not by any possibility refuse them? It is upon that ground we have taken them in.

174. Then they have a claim—an undoubted indisputable claim? I do not know about their having a claim.

175. *By the Chairman*: On the other hand, you receive this money from the Government to distribute it as you please—that is, the committee? I believe the Government have never interfered with our expenditure.

176. You are not compelled to relieve such cases? No. If the Government send a case to us, it is always with a request that we will admit it.

177. *By Mr. Holt*: I think we have not understood Mr. Allen fully,—he wishes to draw a distinction between this Colony and England? I will answer the question shortly,—I do not think we require such an officer.

178. Not an officer whose duty it should be to ferret out and prosecute these people? Not an officer set apart.

179. I do not mean set apart—one of the officers, whether the master or one of the subordinates, whose duty it should be to ferret out these cases? We do ferret them out.

180. The committee? No, the committee do not; but if they can get any clue to the supposed father of the child, and it is thought it would be beneficial to the institution, we direct the officer to ferret it out. But we will put this case: Suppose a woman comes in and says, "The father of my child is John Smith." "What is John Smith?" "A labourer." We are satisfied that the man is not worth sixpence in the world; what then is the good of taking any proceedings against him.

181. If he does not pay for the maintenance of his child, he is liable to be punished with imprisonment? The woman must be able to shew to the Magistrates that he is able to contribute towards the support of the child; if he has nothing the Magistrate probably would not give an order, which would have the effect of incarcerating the man for the term of his natural life. In cases where the man is able to support the child, an order is given to him to pay so much a-week, and if that is not paid he is sent to gaol.

182. You have spoken of some men having got over the wall at Liverpool—do you consider it necessary to keep the men in restraint as prisoners? If people came to your house for relief, you would consider that they should obey the rules of the house.

183. And if not, should be compelled to obey? No; if they chose to go out they could go out at the gate. I apprehend the gate is the proper place to go out, and not over the wall. If a man says he does not want to remain in the establishment he can go.

- The Hon. George Allen, Esq., M.L.C.
17 Oct., 1861.
184. Why should he get over the high wall of the Liverpool Asylum if he can go out at the gate? I cannot tell you why people do wrong.
185. It appears that they must be kept in a state of restraint? They never have been; we have no power to keep them. These people come to the committee and ask for permission to go out for a day; and if we believe they want to go out merely for a day's spree, we refuse to give them leave. Instead of obeying the committee, as soon as they have a chance they get over the wall and run away, and when they escape in this way from the Liverpool Asylum, if they apply to us for re-admission we think they should walk back.
186. If you could get a sufficient quantity of land at Liverpool, do you not think that would be a better site than Randwick? No, I do not.
187. *By Mr. Harpur*: Supposing an inspector were appointed, responsible to the Government, of course exercising no direct control over you, whose duty it would be to examine, to inquire, and to report to the Government upon the state of the institution, the accounts, and so forth, do you not think it would have the effect of shielding you from such undeserved blame as may now be thrown upon you—would it not be more satisfactory to those people who find fault with you? All I can say is, that I should not object to the appointment of an inspector, provided he had no control over us. If he attempted to exercise any such control I should consider it as equal to saying, "Gentlemen, we do not want your services."
188. Would it not save you from unmerited censure? It ought to have that effect, but unfortunately people do not consider these things.
189. *By Mr. Alexander*: Is it not usual for certain gentlemen of the committee to visit the house every week, and to go over it? Yes, and we send a deputation every quarter to Liverpool. The buildings are open to the public; any person who chooses can visit them; and I shall be happy to go with the committee to visit them at any time they please, though I would much rather that no previous intimation were given. I have gone to the Liverpool Asylum unexpectedly, and have found everything in the first order.
190. *By the Chairman*: I see by your report that the cost of the Liverpool establishment, for salaries, wages, &c., was £710 7s 8d.; and gratuities for the inmates for work, £105 2s 8d., amounting together to £815 10s 4d. Now, if there were an establishment at Parramatta, such as you propose, that I suppose would involve a similar outlay? It would not perhaps involve the whole for the present; we should have the same expense in managing the —
191. This is merely for wages? The nurses for the children would go with them, and that expense would therefore be saved at the other establishment. It would however involve a considerable expense, and I do not see that it could fall far short of the expense of the Liverpool establishment. We should require a medical man on the staff to attend midwifery and other cases; but we should have in Parramatta the advantage of the visitation of the ladies, who there shew a disposition to visit institutions of that character.
192. *By Mr. Harpur*: I see that this institution is under the patronage of clergymen of all denominations? Yes.

APPENDIX.

A.

RULES FOR THE REGULATION OF THE MEDICAL DEPARTMENT OF THE BENEVOLENT SOCIETY.

Resident Medical Officer.

1. That the Resident Medical Officer shall be a duly qualified practitioner, certified by the Medical Board of New South Wales.
2. That his salary shall be £200 per annum, with rations and quarters.
3. That the medicines, surgical instruments, and all stores belonging to the Dispensary, shall be under his charge, subject to such directions as he may from time to time receive from the gratuitous Medical Officers.
4. That it shall be his duty to make up and dispense all the Medicines prescribed for the sick in the Asylum.
5. That he shall have the superintendance of the sick wards, and see that all the orders of the Medical Officers are duly carried into effect; that he shall attend to such midwifery cases as are admitted; that he shall, when required, perform the minor operations of surgery, and in cases of emergency shall prescribe until the next visit of the Ordinary Officer; that the wardsmen and nurses of the sick wards be under him, subject to the direction of the Medical Officers.
6. That he shall not be at liberty to practice on his own account, either in or out of the Asylum.
7. That he shall never leave the Asylum for a longer period than two hours at a time, unless by permission of the gratuitous Medical Officers; and that he shall never be absent from the house for a longer period than twelve hours at a time without the permission of the Acting Committee, or, in the interval of its meeting, that of the Secretary and two members of the said Committee.
8. That he shall keep a register of the cases treated by the Medical Officers, a periodical abstract from which he shall prepare, to be laid before the General Committee at their Quarterly Meetings, embracing the numbers, diseases, and results; that he shall draw up a list of the patients admitted into the Asylum, every week, to be laid before the Acting Committee at their Weekly Meeting on Tuesday, stating the name, age, and disease of the patients.
9. That he shall also keep such other medical books and papers as the Medical Officers may require for the use of their department.

Gratuitous Medical Officers.

1. That they shall consist of two Physicians and two Surgeons, who shall be certified by the Medical Board of New South Wales as duly qualified practitioners.
2. That they shall divide the patients, by an arrangement to be mutually agreed upon among themselves.
3. That one or more of them shall visit the patients at the Asylum daily, at such hours as they shall themselves fix.

REMARKS

NO 1 WARD furnished with 42 Beds now occupied by 64 Women and 36 Infants. DINING HALL used as Place of Worship, Dormitory for 13 male Men and School-room. MEN'S SICK WARD furnished with 20 Beds, at present 16 Patients, 8 Boys and 2 Servants. NO 2 WARD furnished with 42 Beds occupied by 75 Women, 1 Infant and 2 Wardswomen. CHILDREN'S WARD at present 65 Children, 4 Women Nurses INFIRMARY WARD 25 Beds occupied by 30 Patients, Majority Bed-ridden. SICK FEMALE WARD 17 Beds occupied by 24 Patients and 2 Nurses Lying-in WARD 8 Beds, 6 Women and 6 Infants. CHILDREN'S SICK WARD 8 Beds now 12 Children and Nurse. There are at the present time 40 Young Women in the Institution nursing their Infants and 8 awaiting confinement.

APPENDIX D.

Plan
OF THE
Benevolent Asylum
LIVERPOOL

SCALE OF 20 FEET TO ONE INCH

SELECT COMMITTEE ON THE BENEVOLENT ASYLUM.

11

RULES AND REGULATIONS.

1. That the object of this Society be to relieve the poor, the distressed, and the aged, and thereby to discountenance, as well as possible, mendicity and vagrancy, and to encourage industrious habits among the indigent, as well as to afford them religious instruction and consolation in their distress, and that it be called "The Benevolent Society of New South Wales."
2. That His Excellency the Governor General be respectfully solicited to become the Patron of this Society.
3. That the business of the Society be under the management of a President, one or more Vice-Presidents, a Treasurer, a Secretary, and a Committee (not to exceed thirty-six in number, exclusive of *ex-officio* members), to be chosen from among the Members at the Annual General Meeting, to be held as hereinafter is provided.
4. That the President, Vice-Presidents, Treasurer, Gratuitous Medical Attendants, and Secretary, be *ex-officio* members of the General and Acting Committees.
5. That one-fourth of the Committee retire annually, but shall be eligible for re-election; the retiring members to be those who have attended the least number of times during the past year.
6. That the number of Gratuitous Medical Attendants shall not exceed four, one of whom shall retire annually, but shall be eligible for re-election; and that the gentleman who has been longest elected shall be the retiring member.
7. That every Subscriber of one guinea per annum be a member; and that every Subscriber of thirty guineas be a life member of the Society.
8. That every Minister raising, by one or more collection sermons, the sum of thirty pounds, shall be a life member.
9. That the Committee shall have the power of proposing to a General Meeting the names of any persons, as life members, who have rendered essential service to the Society.
10. That the executor under any will paying to the Society a bequest of fifty pounds or upwards, shall be a life member; and if there be more than one executor to the will, every fifty pounds so paid shall qualify one life member, in the order in which they stand in the will.
11. That subscriptions in cattle, sheep, grain, clothing, and such other articles as may be serviceable to the poor, shall be received in lieu of money.
12. That the General Committee shall choose from among themselves an acting Committee, three to form a quorum, with power to avail themselves of the assistance of any suitable persons who may be willing to aid them in their duties.
13. That the General Committee shall meet on the second Tuesday in January, April, July, and October, in each year, for examination of the accounts and general business of the Society, when (in the absence of the President and Vice-President) they shall choose a Chairman for the time being, from among themselves; that five do form a quorum.
14. That Special General Meetings of the Members may be called either by the General Committee, whenever there may be important business to submit, or by the Secretary, on a requisition addressed to him by at least eleven members of the Committee, or twenty-four members of the Society, when he shall be authorized and required to call a Special General Meeting within ten days from the date of such requisition.
15. That the Acting Committee shall visit, as occasion may require, persons receiving relief from the Society, and shall meet once a week, or oftener, to afford relief, to superintend the internal economy of the House, and to conduct the general business of the Society; and that all Members of the General Committee shall have the privilege of meeting and voting with the Acting Committee.
16. That no member of the Committee shall be at liberty to supply any articles for the use of the Society for which he shall receive any pecuniary compensation, and that the purchase of all supplies of stores for the Society, and the payment of all moneys, shall be authorized by the Acting Committee.
17. That the Treasurer shall receive all subscriptions, pass his receipts for the same, and make all payments on account of the Society, agreeably to the foregoing rule, and shall keep an account of all such receipts and payments; that he shall, at every Quarterly Meeting of the Committee, present an abstract of the accounts of the Society; and at the January Quarterly Meeting in every year present an annual account, for the purpose of its being audited by two members to be appointed by the Committee.
18. That the Secretary shall minute all proceedings of the Society, carry on its correspondence, sign all orders of the General and Acting Committees, countersign all cheques for the payment of moneys, and see that the Collector performs his duty correctly.
19. That every person applying for relief must be recommended by a member.
20. That relief shall not be afforded in money, except in special cases.
21. That the annual accounts be closed on the 31st December in each year, and that the Annual General Meeting of the Society be held at such time in the month of January as may appear most expedient to the General Committee, when a full account of the funds and proceedings of the past year shall be presented.
22. That no law of the Society shall be altered except at an Annual or Special General Meeting, and that twenty-one days' notice shall be given in writing to the Secretary, of any intention to propose either an alteration of, or an addition to, any of the existing laws of the Institution.

The Hon.
George Allen,
Esq., M.L.C.

WEDNESDAY, 23 OCTOBER, 1861.

Present :—

Mr. ALEXANDER,
 Mr. CALDWELL,
 Mr. HARPUR,

Mr. HAY,
 Mr. LOVE,
 Mr. SADLEIR,

Mr. SUTHERLAND.

J. LUCAS, Esq., IN THE CHAIR.

[The Committee having assembled in the office of the Benevolent Asylum, Sydney, proceeded to the Court-yard in the rear, where were assembled from ninety to one hundred persons, chiefly women and children, who were in attendance for the purpose of receiving out-door relief. Having entered a small lean-to attached to the main building whence the supplies were distributed,—]

Mr. Samuel W. Mansfield, was examined as follows :—

193. *By the Chairman:* In what capacity are you engaged here? I am master of the institution.

194. How long have you held that office? About seven years.

195. The persons whom we see here are those who receive out-door relief? Yes.

196. How often is that supplied? Once a-week; every Wednesday.

197. How is it supplied? According to the number of the family; persons who wish to obtain relief come before the Committee, having a recommendation from a subscriber to the institution; they then state the number of their family and their circumstances, the committee then award such relief as they think necessary; in the ensuing week I visit these persons, ascertain their circumstances and character, and report accordingly.

198. What are the articles served out to these persons? Flour, loaves, meat, sugar, rice, arrowroot, oatmeal, and money. This book contains the reports made by me to the committee, and upon my report either the relief is continued, increased, diminished, or struck out.

199. Under what circumstances are these people relieved in money? They are only relieved in that way upon a special recommendation for the payment of rent, and there are only certain individuals who are entitled to that relief—widows with young children, women whose husbands are sick and unable to do anything for their families, or women with large families who have been deserted by their husbands.

200. The bread we see here is that with which they are supplied? Yes.

201. Supplied by Mr. Wilkie, the contractor? Yes.

202. What quantity of bread is usually served out? At the present time from 1,300 to 1,500 loaves a-week, and from 2,000 lbs. to 3,000 lbs. of flour.

203. Sugar? About 25 lbs.

204. Tea? No tea.

The Hon.
 George Allen,
 Esq., M.L.C.

17 Oct., 1861.

Benevolent
 Asylum.
 23 Oct., 1861.

Mr. S. W.
 Mansfield.

205.

- Benevolent Asylum. 23 Oct., 1861. 205. What quantity of rice? I can give you the totals:—On the 25th September 1,055 loaves, 1,970 lbs. flour, 755 lbs. beef, 17½ lbs. sugar, 217 lbs. rice, 2½ lbs. arrowroot, 20½ lbs. oatmeal, and 12s. 6d. in money.
- Mr. S. W. Mansfield. 206. Will you furnish the Committee with a return of the quantities served out on the first week of each quarter, during the past ten years? I will.
207. This is the place whence you serve out the whole of the provisions? Yes.
208. And these persons outside are the recipients? Yes.
209. Do the parents come themselves, or do many of them send their children? The parents sometimes, and sometimes the children.
210. When the parents apply for relief, do they bring their children with them? They very rarely bring their children with them.
211. *By Mr. Caldwell:* They are generally recommended by some person when they are unknown to the committee? All the cases when they are first put on by the committee are considered temporary.
212. Do you afford relief before the parties are visited? Yes, for in some cases if the relief were withheld for a week it would be a great deprivation. The circumstances of the parties are inquired into afterwards, and the reports are entered here. (*The witness produced a book.*)
213. *By the Chairman:* How many different families have you now on the books? About 400, and they average about five or six individuals to a family.
214. The report states that about 2,800 receive out-door relief? Yes, but they are rather on the decrease now, and have been for the last five or six weeks.
215. Do you find these people discontinue their visits of their own accord? Not one in a hundred.
216. They obtain relief as long as they can? Yes. I lately brought before the committee the case of a man who was highly recommended, who bore an excellent character; he had been receiving 30s. a-week for some weeks, and continued to receive assistance. It requires great vigilance to prevent such cases.
217. *By Mr. Love:* When will the present contract for the supply of bread and flour terminate? At the end of the year.
218. You are not at liberty, upon giving a month's notice, to cancel the contract? No.
219. *By the Chairman:* What is that (*pointing to a cask*)? That contains chloride of lime, which is extensively used in the establishment, for disinfecting purposes.
220. Do you serve out these potatoes, or use them in the establishment? In the establishment; the inmates get them twice a-week.
221. Any other vegetables? They get vegetables every day in their soup.
[The Committee next visited the dining hall, at one end of which were six stretchers and beds. In the centre of the room were assembled between thirty and forty children, repeating their lessons to their school-mistress.]
222. *By Mr. Love:* How long have the people to wait outside before they are served? They are all served in their turn. I commence weighing about half-past nine, and generally finish about half-past one; that is, if I have no interruption.
223. *By the Chairman:* Do you not think that it would be an advantage to serve out the bread twice a-week instead of once? It might be.
224. Is not the bread likely to become stale? There is not sufficient allowed to maintain a family; the largest number of loaves given under any circumstances is six.
225. Has it ever come to your knowledge that the relief given has been sold? I have never known it of my own knowledge, but from information that has been given me. When such cases are discovered they are struck off the list immediately. I believe it is not unfrequent. I visit these people every week, but I am well known in the localities where they reside, and as soon as I appear in the neighbourhood the word is given from one to another, and I find the women engaged at their washing tubs, and at their various occupations.
226. In consequence of want of room, you have to use this part of the building as a school? Yes, as a school, place of worship, and also as a dormitory. This is the Protestant school; the part of the room which is partitioned off at the other end is used for the Roman Catholic school.
227. What number of beds do you make up here at night? We have a number of spare beds always ready, so that if any cases come in during the night we may make them up; otherwise we have no more than you now see. These are all for the servants.
228. Have you two dining rooms—one for the men and one for the women? No.
229. The schoolmistress teaches both boys and girls? Yes.
230. How many can conveniently dine in this room? At those tables, about 120.
231. If the tables were extended from end to end of the room? About 300.
232. What is the length of the room? Ninety-six feet.
233. That includes the part partitioned off? Yes.
234. Are the people provided with knives and forks? Yes; with knives, forks, dishes, and plates.
235. *By Mr. Caldwell:* Do they use knives and forks? Not one in twenty.
236. How do they then manage to eat their meat? Most of them take their soup in the room, and take their meat away with them to eat at tea.
237. *By the Chairman:* How many meals have they a-day? Three.
238. What do they get for dinner? Twice a-week potatoes and meat, on other days soup.
239. When they have soup do they always have bread for dinner? Yes; they have both bread and meat served out every day.
240. What have they for breakfast? Bread and tea.
241. What for tea? Bread and tea.

242. Is there a certain portion of bread served out? Yes, served out every morning; twelve ounces to females, and sixteen to men. Meat, three quarters of a pound to a female, and one pound to a man. The tea is given out in this proportion: one and a half ounces sugar to every adult, and one ounce of tea to five.
243. That is all made in one general boiler? Yes; and served out in the panikins you see hanging up.
244. *By Mr. Caldwell:* That is served out twice a-day? Yes; each inmate has a pint every morning and a pint every evening. In addition to this, they have boiling water provided at seven o'clock in the morning, and at three in the afternoon; so that those who have tea supplied to them by their friends can then make it.
245. What is the ration served out to the children? There is nothing fixed for the children, but they have what they can consume.
246. What have they? They have the same as the adults, with the addition of milk, rice, and treacle, and the younger ones have arrowroot.
247. You have children here of all ages under ten? Of all ages, from infants a few hours old.
248. You have a female as matron for these children? Yes.
249. What is provided for females who are confined here? They have the same allowance as the others, with the addition of milk night and morning; for their infants they receive arrowroot, sugar, and extra bread.
250. Is it your duty to keep an account of the different classes of paupers who come here? No.
251. Have you, in your experience, known women to come here more than once for the purpose of lying-in? Yes; I have known one to be here three times.
252. Within what period? Within four years.
253. Was she a married woman? Unmarried.
254. Can you give the Committee any idea of the proportion of these women who are common prostitutes, of married women, or of young women who have been seduced? I think the large majority of these cases are girls who have been in service at the time. There are very few cases of town girls.
255. Are there many married women who are confined here? Not many.
256. Have you known any instances of married women whose husbands and families have been living in Sydney taking advantage of this institution? There have been one or two such cases.
257. Have there not been many cases where the women have been deserted by their husbands? The majority of cases among married women have been of that class. In one case I know that the husband deserted his wife in order that she might be brought here; for the moment after her recovery from her confinement he was ready to take her away.

Benevolent
Asylum.
23 Oct., 1861.
Mr. S. W.
Mansfield.

Sarah Cropper examined:—

258. You are engaged in the instruction of these children? Yes.
259. How many children have you? To-day I have thirty-two.
260. How many have you usually? I had thirty-eight last week.
261. At what age do you take charge of them? These are the youngest (*selecting three of the children*); these are three years old.
262. Among these children are there some who have been here a considerable time? Some have been here for years.
263. (*To Mr. Mansfield*): Have you no rule for sending them away from here to the Destitute Children's Asylum? No, the parents of some of the children are here.
264. Have not many been sent from this institution to the Destitute Children's Asylum? Not many; there was one draft of fifty.
265. At that time I suppose you cleared off nearly all the children? No; it was only fifty out of about a hundred and twenty.
266. Is it in contemplation to send a further number? Yes, I believe it is.
267. When you sent these children, how were they selected? They were selected by the doctor.

Sarah
Cropper.

[Mr. Smith (the surgeon) stated, that he had selected those who were most likely to remain, and to be an incumbrance to the institution.]

268. (*To Mrs. Cropper*): You say you had thirty-eight children in the school last week? Yes.
269. Where are the others? There are some sick, and some have left.
270. Are these children all of one religious denomination? They are all Protestants.
271. Of different denominations—Church of England, Presbyterians and Wesleyans? I only know them as Protestants.
272. Do you receive a salary for teaching these children? Yes.
273. What remuneration do you receive? Five shillings a-week.
274. Do you live in the institution? Yes, I am an inmate.
275. How long have you been here? Two years last August.
276. During the whole time have you been engaged in teaching? No, I have been five months so employed.

[The Committee then proceeded to the adjoining room in which was held the Roman Catholic school.]

Catherine

Catherine Maher examined :—

- Benevolent Asylum, 23 Oct., 1861.
Catherine Maher.
277. *By the Chairman* : You are the schoolmistress here? Yes.
278. This is the Catholic school? Yes.
279. How long have you been here? I think six years.
280. Have you been a teacher during the whole of that time? During part of the time I acted as nurse; at the time the children had the itch.
281. What remuneration do you receive? Five shillings a-week for two years; then I had £20 a year, for a-year; and now I have £26 a-year.
282. Have you children under your charge who are affected by any disease? They have an eruption on the skin like the itch.
283. How long is it since they first had that? I think two years.
284. Have they been affected by this disease ever since? Off and on.
285. It has not been out of the establishment entirely? It has been here mostly since.
286. Do the children all sleep in one place? They all sleep and dine in one nursery.
287. Do the children afflicted with this disease sleep in the same room with those who are free from it? Yes.
288. There is no classification of the children with reference to the disease? There is no separate room for them; some of the elder boys sleep in the hospital.
289. In the school, may you not have a child afflicted with this disease standing next to a child who is free from it? Every one of them has it more or less.
290. How many children have you under your charge? I have thirty to-day; there are a few more on the doctor's list, in the hospital.
291. What is the largest number you have had? I have had fifty at a time; some of them were removed to the Destitute Children's Asylum.
292. What number had you taken from your school? There were forty-seven altogether; about half were taken from me and half from the Protestant school. I have never less than thirty-four or thirty-six.
293. Is this your bed (*pointing to a bed in the corner of the room*)? Yes. I suffered so much from headache from sleeping in the room with so many, and I obtained permission to have my bed here.
294. Are there any adults, or aged persons, who sleep in the ward with the children? Yes, a nurse and four or five women as attendants.
295. Do all the children in the institution sleep in one ward? No; the sick are in the hospital, but all the healthy ones are in one ward.
296. Have you any idea of the number of unhealthy children? They are healthy enough, except for the itch.
297. *By Mr. Love* : Have you any deaf and dumb children? Only one.
298. Are there any in the other school? I think not.
299. Are the parents of this deaf and dumb boy living? Some person comes to visit him.
300. How long has he been here? About twelve months.
301. What means have you of developing the intellectual faculties of this boy? I make no remark about it.
302. Has he any knowledge of the being of a God? He might turn to making baskets, or something of that.
303. I think you do not understand my question—do you suppose he has any idea of a God? Yes; he is quite sensible, in his way, as to God; he kneels down with the others to make his prayers.
304. Can he speak with his fingers? No.
305. *By the Chairman* : What steps have been taken to cure the children of disease? They were washed and rubbed according to the orders of the doctor. He is very attentive in his visits. Before Dr. Smith came, some of the children were nearly rotten.
306. Are there any baths here? There is a tub, and water has to be carried to it.
307. I suppose four or five children are washed in the same water? I am not aware; I dare not take notice of that; I would give you every information with pleasure, if I could.
308. You have seen several children washed in the same water? I did not enter down. I am not certain, because I did not notice.
309. Did I understand you to say that some of these children have had this disease for two years? It broke out about two years ago, and if a child has come in since he has been infected with it afterwards.
310. How often are these children washed? I do not know; the nurse will tell you; they receive every attention.
311. How many children have you who are learning to write? Only eight at present; some of them are only beginners.
312. Do any of them learn arithmetic? Some of them are just doing numbers.
313. Have any of these children been long in school? No; some have been eight or nine months, some two or three.

[Mr. James Smith, the medical officer of the institution, and Mr. Robert Anderson, clerk and accountant, here joined the Committee, and proceeded with them to the women's hale ward. At the top of the staircase leading to this ward was a landing, on which stood an oval tub of about five feet in length, two in breadth, and three in height. This tub was placed beneath a tap. Having arrived at this landing, Mr. Smith was examined.]

- Mr. Smith. 314. *By the Chairman* : Is this the bath? It is.
315. Is the first operation upon the reception of any person as an inmate here to put her in the bath? It is when they are dirty.

316. Are the inmates of that ward (*the women's hale ward*) bathed twice a-week? They are. Benevolent Asylum.
23 Oct., 1861.
317. Is there a screen put round the bath? Yes. Mr. Smith.
- [The Committee then entered the ward. This room is about 95 feet long by 24 feet wide, and 12 feet high; it is lighted by four windows on the northern side, five on the southern, and one on the western end; it was ventilated by small iron gratings in the wall, and three perforated ventilators in the ceiling. On the floor at the foot of each iron stretcher, a mattress and bed-clothes were rolled up; some thirty or forty women were engaged in knitting, needlework, &c., in various parts of the room.]
318. How many bedsteads does this ward contain? About forty-four; about as many more beds are made on the floor.
319. Are the beds I see lying at the feet of the stretchers spread on the floor at night? Yes; one on each side of the room.
320. Then, although the room is intended only to contain forty-four beds, you have sometimes double that number of persons sleeping here? Yes.
321. Are these bed-clothes ever taken out into the yard? Yes; and spread on the green.

Christina Sanderson, examined:—

322. You are wardswoman here? Yes. Christina Sanderson.
323. Do you compel the whole of the inmates of this ward to wash every day? They bathe twice a-week.
324. Are they not compelled to wash their faces every day? Yes.
325. Has this person (*pointing to an elderly female who appeared to have been recently in the bath*) just come in? Yes; very few come in but have to be washed.
326. From the appearance of the ward, I should imagine twice as many people sleep in it as it was originally intended to hold? Yes; there are more in the ward than can be properly accommodated.
327. How are these beds laid down? Across the room.
328. Then there is scarcely space left between them for a passage? No; it is as much as you can do to go up and down between the beds. Every bed is occupied.
329. How many have you now sleeping in the ward? I have eighty people in the ward.
330. And there are bedsteads for only forty-four? Yes; and they are too close, I think.
331. Is the ventilation sufficient? On warm nights we have to put the windows down, sometimes three and sometimes six inches from the top.
332. (*To Mr. Smith*): The ventilators do not seem to be sufficiently numerous? I wanted the gratings you see round the top of the wall to be put outside.
333. How does the ventilation come to the gratings? Through a large opening in the wall outside, divided into two holes by a brick in the centre.
334. Do you not think if patches of the ceiling were broken away, the ventilation would be better than it is at present? The wind blows down very strongly at present through the ventilators in the ceiling. I think if there were ventilators of perforated zinc round the edge of the ceiling it would be better.
335. (*To Christina Sanderson*): Do you find it very warm here at night? Yes; sometimes we cannot let the windows down.
336. Are the inmates allowed to be here all day? Yes; those who are not able to do other work, do needlework.
337. They are not compelled to go out? Not unless they think proper.
338. *By Mr. Love*: Do you not think it would be a great convenience to have a chair alongside each bed? Yes, for they have nothing to put their victuals on, or to set a drop of tea on.
339. Would you recommend that a number of chairs should be supplied? Or stools—I think stools would be better than chairs.
340. *By the Chairman*: How long have you been wardswoman? I have been in this place about five years, and I have been wardswoman about eighteen months.
341. Do you receive pay? Yes; eighteen-pence a-week.

Catherine Moore examined:—

342. *By the Chairman*: How long have you been here? A fortnight last Monday. Catherine Moore.
343. What are you now doing? Knitting.
344. Who supplies you with this work? This is for the mistress.
345. Are you paid anything for it? I do not know; I should say not. The mistress asked me if I could do fancy work; I said yes, and she gave me this window curtain to make.
346. How long will it take you to make this? About another fortnight to finish it.
347. How long have you been employed upon it? Since last Monday week.
348. Who is the mistress? Mrs. Mansfield, the matron. I had bad hands, and was unable to do other work.
349. (*To Christina Sanderson*): Do the inmates do any needle-work? Yes; they make all their own clothes.
350. Do they do any work for out-of-doors? Not that I know.
351. Do they receive any remuneration for their work? No.
352. Do they all wear one dress when they come here? They wear dresses of different colours, but all the dresses belong to the house.
353. When persons come in here the dresses they have on are taken from them? Yes, and a clean dress belonging to the house is given them; everything they wear belongs to the house.

Benevolent house. If their own clothes are dirty they are washed, sewn up in a cloth, and put in the store; the name of the party to whom the parcel belongs is put upon it.
 Asylum.
 23 Oct., 1861. 354. There is no work done in the institution except what is necessary for the inmates?
 Catherine Moore. No, there is an old woman who mends all the clothes; there are some who are employed as laundresses and in house-work; some are able to do needle-work and some are not.

[The Committee next visited the children's ward, a room about 60 feet long by 24 wide and 12 high. One end was divided from the rest by a curtain being drawn across. To the left on entering was a large tub, and around the room in various parts, piled against the wall, a number of mattresses and quantity of bed clothing.]

Mrs. Louisa Stone examined :—

Mrs. Louisa Stone. 355. *By the Chairman:* How many children have you in this ward? At present sixty three—I have had more.
 356. Do they all sleep here? Yes.
 357. And dine here also? Yes, they take all their meals and sleep here.
 358. Is this where they bathe (*pointing to a large tub*)? Yes.
 359. How often are the children washed? They are bathed once every week.
 360. How often are they washed? They are washed and combed every morning.
 361. When you use the bath, how many children do you wash before you change the water? We must wash them all.
 362. The whole sixty-three in the same water? Yes; we have to fetch all the water up and to carry it all down again.
 363. The water is not laid on? Not for this ward.
 364. Is the same plan pursued in washing the faces, hands, and feet of the children? No; we are obliged to change the water then, because it is sometimes very dirty.
 365. You have to carry up the water? Yes, the cold water is carried up from the yard; the hot water from the coppers.
 366. Do all the children sleep here, or is there another ward? The big boys sleep in the ward below, but sixty-three sleep here and take all their meals here.
 367. How long have you been here? I have been children's nurse two years and nine months.
 368. What is your remuneration? My salary is £30 a-year and rations.
 369. Have you any children? I have two children with me at present.
 370. *By Mr. Love:* Do the children sleep on the floor? Yes, these are the beds, which are piled up against the wall.
 371. What is done with the beds when the children get up? They are folded up and placed there.
 372. *By the Chairman:* Are they taken out into the air? Yes, about once a fortnight.
 373. How often are the bed-clothes taken out of the room to be aired? Perhaps once a week, perhaps not so much as that; as often as I see it to be necessary I send them below; but some of them, in consequence of the dirty condition and habits of the children, have to be changed three nights in the week.
 374. Has each child his own bed? No; it is impossible for each child to have a bed for itself. Some of the children come in here in a most filthy state—crawling all over, covered with vermin and sores; others come in in a cleaner condition. In such cases I endeavour to keep the cleaner children apart from the others.
 375. Then a bed occupied by John Jones to-night might be occupied by Samuel Smith to-morrow night? It might be so, but the children are very sharp about taking their own places. The mattresses are very wide, and four children are placed on one side of the mattress, four on the other, and one blanket covers the whole.
 376. You have a great number of children afflicted with a disease similar to itch? There are several.
 377. I suppose from the manner in which you are compelled to arrange the beds, that children who have the itch lie with those who are clean? I prevent that as far as I can, and keep the blankets separate; but when they are in the school or about in the yard, of course they come in contact with each other, and the doctor says that the disease is so contagious, that a child who is clean taking anything from the hand of another who has the disease may contract it.
 378. Nevertheless the children who are afflicted with this disease, as well as others, sleep in the same ward? Yes; the boys sleep on one side, and the girls on the other.
 379. Are they provided with knives and forks? No; with dishes and spoons. To the delicate children I give beef-tea, rice, and other things; the other children have soup. For breakfast they have bread, tea, and a little milk; for dinner, soup and bread, and a little meat; and two days in the week they have meat and potatoes.
 380. For tea what have they? The same as for breakfast.
 381. Have they any treacle? They did have it, but the doctor found it did not agree with them; it acted too much upon their bowels. A great many of the children who come here have very bad constitutions; they are very troublesome, and hard to manage.
 382. I see you have some infants here? Yes; I am sorry to say I have two or three who are very troublesome.

[The Committee proceeded to the sick ward.]

Mr.

Mr. James Smith further examined:—

Benevolent
Asylum.
23 Oct., 1861.

Mr. James
Smith.

383. *By the Chairman:* This is the sick ward? Yes.
 384. How many patients have you here? Seventeen.
 385. How many beds are there in the ward? Twenty.
 386. Have you ever had more patients than the ward could conveniently hold? Yes; I have had as many as eight lying on the floor.
 387. Have you many patients who have been in the Infirmary a considerable time? There are eight who have come from the Infirmary lately; one has been here three years.
 388. Do you find this ward hardly large enough for the ordinary number of patients? Yes, whenever we can draft them off to Liverpool we do so.
 389. I suppose you would not think it too large if it were as large again? No.
 390. Have you any warm baths? Yes; both warm and cold.
 391. Have you any properly constructed bath? There is a room where there is a large oval tub used as a bath.
 392. You have no other description of bath? No; the hot water is brought up from the boiler below.

[One of the patients stated to the Chairman that he was a Presbyterian, had been nine months in the Asylum, and during the whole of that time had never been visited by a clergyman of that denomination.]

393. Do some boys sleep in this ward? Eight, who are between the ages of ten and fourteen.
 394. Are they ill? No; it is to keep them away from the younger children and the girls.
 395. Do you not think it is very injurious to them to sleep here? They are never sick.
 396. As a general principle do you not think it is objectionable that young children should sleep in such a place with old people? Yes.
 397. Is Divine service held in the institution every Sunday? Yes; Mr. Allworth is the paid chaplain.
 398. Is there any other clergyman? Dr. Fullerton, the Presbyterian clergyman, has service every Thursday, and the Roman Catholic priests come here very regularly.
 399. Do the clergymen visit the sick wards? Yes; Mr. Allworth visits the sick once or twice a-week. I suppose Dr. Fullerton does not come because he does not wish to interfere with the paid clergyman.
 400. What medical comforts are allowed? Whatever I think necessary is ordered.

[The Committee next visited the laundry-yard and laundry. In the former were several women engaged in rinsing clothes in large tubs.]

401. (*To Mr. Anderson:*) I suppose these are some of the women who have been confined? Yes.
 402. When they get strong they are made to take a turn at the washing-tub? Yes.
 403. These are blankets belonging to the institution? —

[The laundry was an old weather-board shell building, about 35 feet by 20, the wall considerably out of the perpendicular, and the roof very much out of repair. Ten or twelve washing tubs, at which women were engaged, were placed upon benches extending along one side of the building. At one end a portion is partitioned off.]

Sarah Hale examined:—

404. How long have you been here? About sixteen months.
 405. Have you been laundress ever since you have been here? Yes.
 406. Are you remunerated for your services? Yes.
 407. What pay do you receive? £35 a-year.
 408. Have all these women been here for a long time? Some have been here a good bit, others have come only recently.
 409. How many have you generally engaged here in washing? I ought to have eleven. There is one young person who does the baby-clothes.
 410. Some have been here a considerable time? Yes; four or five.
 411. Others are young women who have been confined, and who having become strong, are put to work? Yes.
 412. Are the old women who have been here a considerable time paid? No.
 413. Do you find this a convenient place for your purpose? No; in bad weather we have no place to dry the clothes, and through these windows the damp comes, so that it is impossible to dry them here.
 414. While these young women are washing who mind their children? Some of the old women—the lame and blind; some of them will lie down a good bit.
 415. It appears as though the building were falling down? I have been afraid sometimes that a high wind will blow it down.
 416. What is that place divided off at the end? The place where McCabe lives.
 417. Who is he? The copper-man—he attends to the copper.
 418. He sleeps there? Yes, he attends to the fire and takes up the heavy clothes.
 419. Have the women who are engaged in washing any extra allowance? They have at the end of the week half a pound of tea, two pounds of sugar, and five loaves of bread extra, to be divided among eighteen or twenty of them. They ought to get that twice a-week, considering that the washing is very heavy.
 420. There is a great deal to be done? Yes; if you were to come here about ten o'clock on Monday morning, you could scarcely get up to the fire-place.

Sarah Hale.

- Benevolent Asylum. 23 Oct., 1861. Sarah Hale. 421. Do these ten women wash for all the officers of the institution? No, not for the doctor. I have a woman under me who does the matron's work.
 422. Do you wash the children's clothing? Yes; the children's clothing comes all in a lump. In fact, there is always dirty clothing coming down to me—sometimes four or five times a day. Just now there are some very bad cases, and these make a great deal of washing.
 423. Is there any tobacco allowed? A fig of tobacco is allowed to each of the women.
 424. Do the women generally smoke? Most of them—the old people.
 425. Do these young people who come in to be confined? No.
 426. Is a fig of tobacco served out to each whether they smoke or not? Yes; if I have any to spare I give it to them, and they give it to the old women who mind their children.

[The Committee having returned to the laundry yard,]—

John M'Cabe was examined:—

- John M'Cabe. 427. *By the Chairman:* What are these large casks kept filled with this stagnant water for? Just to keep the casks from falling to pieces.
 428. How long has the water been in them? A week or ten days.
 429. You have the water laid on from the Sydney main? Yes.
 430. Do you require the water in these tubs for use? No.
 431. How long have you been here? About six months.
 432. Do you sleep in the room partitioned off from the laundry? Yes.
 433. What pay do you receive? Eighteen-pence a-week.
 434. Are you pretty well engaged? Yes.

[Crossing the yard, and descending the steps at the south-west angle of the building, the Committee next visited the kitchen. This was situated beneath the dining hall, and was of about the same extent as the apartment above; it was paved with stone and ill-lighted. Ranged on a bench at the foot of the stairs were pieces of beef of various sizes, which were being distributed to applicants, who, in exchange for them, gave the distributor round tin tickets.]

William Allen examined:—

- Willm. Allen. 435. *By the Chairman:* What is your occupation here? I work in the garden.
 436. What duty have you to perform in this apartment? I have to serve out the meat every Wednesday morning to the people who come for out-door relief.
 437. How is it cut up? Into pieces of 6 lbs., 5 lbs., 4 lbs., 3 lbs., and 2 lbs. each. There are pieces of five different weights.
 438. How do you serve it out? Mr. Mansfield gives the person a ticket with the weight he is to receive stamped upon it, and I then give the quantity of meat marked on the ticket.
 439. *By Mr. Caldwell:* Do you account to Mr. Mansfield for the distribution of the meat? Yes, I give him the tickets, and he counts them to see what they amount to.
 440. He checks the quantity of meat served out by weighing the bones that are left, and counting the tickets.
 441. *By the Chairman:* Are these the bones (*pointing to a heap lying on the floor*) that have been taken out of the meat you have been serving out to-day? Yes.
 442. *By Mr. Caldwell:* What do you do with these bones? They go into the soup to-morrow.

[Paul John Maria, the cook, having brought a basin of soup for the Chairman to taste, was examined.]

- Paul John Maria. 443. Is this the soup you have prepared for the inmates? Yes; it will be better soup to-morrow, because the bones will be boiled with it.

[The witness then shewed the quantity of meat supplied to both the male and female inmates.]

444. What quantity of soup do you give to the inmates? About a pint and a half; to a working man we give more.
 445. What is the allowance of meat for a man? $1\frac{1}{4}$ lb.; 1 lb. is the allowance, but a working man has a little more.
 446. Besides that he has soup? Yes; two days a week he has a pound of potatoes with his meat, but no soup.
 447. In the morning what do you serve out? A man gets a quart of tea, and a woman a pint; and the same quantity at night.
 448. What bread do you serve out? The master serves out the bread.

THURSDAY,

THURSDAY, 24 OCTOBER, 1861.

Present:—

- | | |
|----------------|-----------------|
| MR. ALEXANDER, | MR. LOVE, |
| MR. CALDWELL, | MR. SADLEIR, |
| MR. HARPUR, | MR. SUTHERLAND. |

J. LUCAS, Esq., IN THE CHAIR.

[The Committee having assembled in the Office of the Benevolent Asylum, Sydney, proceeded to the sick children's room. This room was 9 feet 10 inches high, 15 feet 8 wide, and 21 feet 2 inches long; lighted by two windows, one facing to the east and the other to the west, and had ventilators near the ceiling which had been closed up. On one side of the room was a large fire, with an iron guard in front. Against the wall on two sides were eight iron stretchers and an iron bedstead for the matron.]

Benevolent Asylum. 24 Oct., 1861.

Sarah Horsford.

Sarah Horsford examined:—

- 449. *By the Chairman*: Is this the only ward for sick children? Yes.
- 450. How many children have you in the ward? Thirteen.
- 451. Are you the wardswoman? I am nurse to the sick children.
- 452. How long have you been here? Two years.
- 453. What remuneration do you receive? £25 a-year.
- 454. What is the largest number of children you have had here at one time? I have had as many as fifteen.
- 455. I suppose when you had fifteen here the beds were very close to each other? I had to put them head and foot at the top and bottom of the bed; I had also beds on the floor for little babies.
- 456. You had then no spare space at all? No.
- 457. The floor was covered with these children? Yes.
- 458. Do you sleep here? Yes, that is my bed (*pointing to a bedstead in a corner of the room.*)
- 459. Fifteen is the largest number you have had at one time sick in this institution? In this room; but at the time of the measles there were many of the sick in the nursery—there was not room for them here.
- 460. I suppose these children have whatever comforts the doctor prescribes? Yes.
- 461. What is their usual food? They have arrowroot if they are very sick, and sago, or anything they require, if the doctor thinks fit to order it.
- 462. Have you an assistant? I pay a woman to assist me, for I have the rheumatism and am not able to kneel.
- 463. The woman who assists you is one of the inmates of the Asylum? Yes.
- 464. Are these ventilators ever open? No, they have not been for twelve months.
- 465. *By Mr. Caldwell*: Do you close these windows at night? Yes.
- 466. Then there is no ventilation except by the door? No, I am obliged to close the door at night because it opens on the landing to the doctor's quarters.
- 467. Then the only ventilation you have is by the chimney? Yes; the door is shut and the windows are closed.
- 468. *By the Chairman (to Mr. Smith)*: Who closed up these ventilators? I was obliged to do so, for when there was a strong wind at night the children would be ill the following morning. These gratings should have been on the outside of the wall.
- 469. (*To Sarah Horsford*): Since you have been here has this always been used as a sick ward for children? Yes.

[The Committee next inspected the cutting-out room. This room was about 10 feet high and 15 feet long, by 6 feet wide. On one side was a cutting-out bench, on the other a large table, and at the end a rack in which were placed the bonnets of the inmates, and the various articles used for the manufacture of bedding and clothing.]

Mary Lamont examined:—

- 470. *By the Chairman*: You have the charge of this room? I was appointed by the committee as cutter-out, but I have not the keys. I give out the various articles only under Mrs. Mansfield's direction. Mary Lamont.
- 471. You cut out the clothing? Yes, and brand them for each ward.
- 472. Do you find this room sufficiently large? No; it is very close, and not large enough.
- 473. When the women come in here, are the clothes taken off them brought into this room? No; their bonnets are brought here.
- 474. The bonnets I see here belong to the different inmates of the institution? Yes.
- 475. Are other articles of clothing brought here? When the winter clothing of the children is left off, it is brought here, and remains here during the summer. I wish the clothes were not brought here, for I do not like to touch them.
- 476. Do you observe an unpleasant smell here? When I come here in the morning the smell is very unpleasant, though I leave the window open during the night.
- 477. Then of course any person might get in and take away anything he liked? I have spoken to Mrs. Mansfield about that, but she says there is no danger, as there is a watchman on duty during the night.

- Benevolent Asylum. 24 Oct., 1861. Mary Lamont.
478. How long have you been here? Only three months. There was not anyone here before as cutter-out.
479. After you have cut out the various things you send them to the hale women's ward to be made up? Yes.
480. Do you think a larger room than this is necessary? Yes, to keep things as they ought to be kept, and I think the cutter-out ought to keep an account of everything as she gives it out. I do not now give anything out without Mrs. Mansfield's permission, and she keeps the account.
481. Do you think it desirable that you should keep it? If anyone came to me and asked for a thing I think I should be able to give it out if it were required.
482. If anyone comes to you now, you tell her to go to Mrs. Mansfield? I do, and she puts down everything as it goes to each ward.
483. Do you not think it would be much better if no clothing were brought here that had been worn—that these articles should not be mixed with new clothing? Yes; I do not like to touch the things that come from the women's and children's wards.
484. *By Mr. Caldwell*: Do you not think it would be desirable to use a smaller stamp, so that the articles to be worn might be less disfigured? (*Mr. Mansfield* :) You cannot disfigure them too much; even now the women cut out the brands and take the material to make up for bags, handkerchiefs, and other purposes.

[The mangling room was next visited. This was a small room about the same size as the cutting-out room, and was lighted by a small window near the door. In it was a Baker's patent mangle and two tables for folding, which occupied nearly the whole of the space.]

Sarah Hale examined:—

- Sarah Hale. 485. Do you find this room very inconvenient? Yes, there is no room for the folders.
486. Do you do the whole of the mangling for the 380 inmates of the institution in this place? Yes, and it is not too large for the laundry of a private family. Sometimes if the weather is unfavourable we have to send some of the clothes out without being mangled, because there is not room for more than two folders, and one to turn the mangle, so that we are obliged to fold the clothes in the laundry, which we cannot do in wet weather.

[The Committee next visited No. 1 Ward.]

- Mr. Mansfield. 487. *By the Chairman (to Mr. Mansfield)*: What ward do you call this? The hale ward.
488. How many windows are there in this ward? Ten, and the sashes are hung top and bottom—the windows are about 6 feet 6 by 4 feet 6. The ward is 95 feet long by 24 feet wide.
489. How many beds does it contain? Forty-two.
490. How many persons slept in it last night? Sixty-three women and thirty-six infants.

Ellen Conroy examined:—

- Ellen Conroy. 491. Are you the wardswoman? Yes.
492. Do you find this ward very hot and close? Yes, very hot. When you go out for a moment into the yard and return into the ward you are nearly smothered with the bad smell caused by the children; and at night in the same way.
493. How many bedsteads have you in this room? Forty-two bedsteads; and twenty-three beds were made on the floor last night.
494. How did you lay down these beds? Across the room, at the feet of the bedsteads.
495. So that nearly the whole space on the floor was covered? Yes.
496. What assistants have you? None, excepting one of the women might help me a little in the morning. The women generally attend to their own beds, except the blind and infirm.
497. How many blind women have you in the ward? I think nine.
498. And how many infirm and aged women? There are only two lame and upwards of twenty aged.
499. All with the exception of those who have infants are aged, infirm, or blind? Yes, with the exception of the nurse.
500. I see you have ventilators round the room—do you find them an inconvenience or a benefit? They are a benefit.

Mr. Mansfield said one great inconvenience attending the mixing together of different classes of inmates in this ward is, that the old people are disturbed during the night by the infants. This causes a great deal of cursing and swearing among the old women, who curse both the mothers and their brats. *Mrs. Mansfield* is frequently obliged to come over here to quell the disturbance. The women say they cannot get a wink of sleep with the—some sort of brats.

[At the foot of the stairs, ascending from the hall of No. 1 ward to the infirm ward, was a small apartment about 7 feet by 5, lighted by a wooden grating opening to the hall, and having two ventilators in the wall. In this was a bath tub, supplied by a tap.]

- Mr. Mansfield. 501. *By the Chairman (to Mr. Mansfield)*: This is the bath room? Yes, for that ward (*No. 1. ward*) only.

502. Is it supplied with water from the City works? Yes; and it has a waste pipe from it. Benevolent Asylum.
 503. Is anything paid to the City for this supply of water? No. 24 Oct., 1861.

[On the landing at the top of the stairs was an apartment similar to that at the foot, having also a tub bath. The Committee then proceeded to inspect the several rooms in this storey, viz., the infirm, the hospital, and the lying-in ward; between the two latter was situated the kitchen, a portion of which was divided off as a bed-room for the nurse.] Mr. Mansfield.

In the Infirm Ward.

Ann Johnson was examined:—

504. *By the Chairman:* What are you? Wardswoman. Ann Johnson.
 505. What ward is this? The infirm ward.
 506. How many patients are there in it? Thirty.
 507. How many beds ought there to be in this ward? Twenty-four bedsteads; we have twenty-five.
 508. How many have you had sleep in this ward in one night? I should say three or four and thirty; there may have been more.
 509. What is the largest number of beds you remember to have made on the floor? For a short time last summer we had nine on the floor.
 510. What complaints are your patients suffering from chiefly? Most of them are cripples, and suffering from old age. There are some who cannot rise from their beds unless they are lifted.

In the Hospital Ward.

Mrs. Stubbs was examined:—

511. What are you? The nurse. Mrs. Stubbs.
 512. What do you call this? The hospital ward for females.
 513. How many beds have you in this ward? Seventeen bedsteads.
 514. How many patients have you had at one time in this ward? Thirty-four.
 515. Of course when you have above seventeen you have to make the beds on the floor? Yes.
 516. You have then no space to walk along the ward? No; if anything happens in the night, we can only pass along by stepping from one to another.
 517. How many doctors attend here? Drs. Walker, Burgou, Brown, and Macfarlane.
 518. How often do they come? About twice a week.
 519. How long have you been here? Twelve months.
 520. Have you many deaths in this ward? Very few; we have had two or three deaths in the last fortnight or three weeks.
 521. The ward through which we have come is the infirm, this is the sick, the next is the kitchen, and beyond is the lying-in ward? Yes.
 522. Have you charge of this ward only? No; I have the whole three.

In the Kitchen.

523. This is the kitchen? Yes; and this is my little apartment.
 524. How are these women engaged (*referring to two females who were in the kitchen*)? These are two wardswomen, one for the sick and the other for the lying-in ward.
 525. Do they receive any pay? One has four shillings, and the other five shillings a-week.
 526. What is your remuneration? £50 a-year.
 527. Is this place which is boarded off (*referring to a small apartment separated by a partition from the kitchen*) your own apartment? Yes.
 528. Do you observe any disagreeable smell here? Yes; if you wish to know what is the real stink here you should come at ten o'clock at night.
 529. That is when all are in bed? Yes; if you were to come in from the fresh air you would be ready to drop.
 530. That is caused by want of space to accommodate so many inmates as you have here, and by imperfect ventilation? Yes.

In the Lying-in Ward.

531. How many patients are in this ward? Eight; we have often had twelve or thirteen in this room at one time.
 532. How long, as a general rule, do the women remain in this ward before they are removed? If they are strong they are removed at the end of fourteen or fifteen days.
 533. They do not generally stop longer than a month? No; but we have had women here two months; it depends upon the state of their health.
 534. Have you any books here for their use? They have prayer books and bibles, but no library books.
 535. The women have no sort of amusement in the institution? No, they have no recreation; that makes them growl and grumble, &c.
 536. Do you not think it would be a great advantage if they were to be allowed to have Chambers' Journal, the Sunday at Home, the Leisure Hour, or a few books of that kind? —
 537. (*To Mr. Smith*): I see the ventilator in the ceiling is covered with a board? Yes; we were

Benevolent Asylum. 24 Oct., 1861. were obliged to put that up because the wind blew down so strongly. These ventilators in the ceiling, when the roof is slated, frequently cause the rooms to be hotter than they would be without them.

[The Committee then passed to the laundry yard, where Mr. Caldwell drew attention to the fact that the smoke from the chimney of the laundry, which was very low, was blowing towards the window of the children's sick ward.]

Mr. Mansfield. 538. *By Mr. Alexander (to Mr. Mansfield):* Have complaints been made by the doctor, of offensive smells arising from the washing establishment to the children's sick ward? The laundry is a great nuisance to the building.

539. Does not the smoke also cause considerable annoyance when the wind blows from the eastward? It is altogether a nuisance.

[The Committee then walked round the garden.]

William Allen examined:—

Willm. Allen. 540. *By the Chairman:* You are the gardener? Yes.

541. How long have you been here? I do not know exactly; I dare say seven or eight months.

542. Have you any assistance in the garden? When Mr. Mansfield has a man who can work, but they are generally unable to do so; they are mostly cripples.

TUESDAY, 29 OCTOBER, 1861.

Present:—

MR. ALEXANDER,
MR. CALDWELL,
MR. HARPUR,

MR. LUCAS,
MR. LOVE,
MR. SADDLEIR.

[The Committee having assembled at the Railway Terminus, Redfern, at 9 A.M., proceeded to Liverpool Asylum. In the Hall they were met by the Master of the Institution.]

Liverpool Asylum. 29 Oct., 1861. Mr. Patrick Henry Mulholland, who having accompanied them to the Board Room, was there examined:—

Mr. P. H. Mulholland. 543. *By the Chairman:* What situation do you hold here? I am master of the establishment, and my wife is matron.

544. How long have you been master? Eight years.

545. Is that ever since the institution has been established here? No; Dr. Russell was here before me.

546. Can you tell us how long it is since its first establishment? We have no date even in the house. I can only tell from the visitors' book.

547. What do you use this room for? The Board room; the committee meet here every Friday, and transact the business of the house.

548. What committee? The local Board; one member of which is supposed to visit here daily.

549. How many gentlemen compose the local Board? Only four—the Rev. Mr. Hodgson, the Rev. Mr. Priddle, the Rev. Mr. Young, and Mr. Lester, of Denham Court. Mr. Lester does not come here often.

550. Three of the local Board are ministers of religion? Yes.

551. Belonging of course to different denominations? Two are clergymen of the Church of England, and one is a Catholic.

552. Is there a Presbyterian minister? There is no Presbyterian minister who resides here; he only comes to Liverpool occasionally to preach.

553. How often? He does not visit here.

554. Are there any Wesleyans? No, very seldom; there has not been a minister of that persuasion here for the last twelve months.

555. Neither a Wesleyan nor a Presbyterian? No; Mr. Coutts used to come here, but it was very seldom.

556. How often do the other gentlemen come here? Usually once a day.

557. How often do the committee from Sydney visit you? Quarterly, or when they choose to come.

558. How often do they come? Quarterly.

559. Do they hold quarterly meetings here? Yes, but not always on the same day; they fix the day among themselves.

560. They come usually about once a quarter? Yes.

561. *By Mr. Caldwell:* Do they summon the other committee? Yes; they invite the house committee to meet them.

562. *By the Chairman:* I think what Mr. Caldwell wishes to know is, whether they let the local Board know of their intentions to visit previous to coming? Sometimes they come without notice.

563. *By Mr. Caldwell:* When they come do they meet the local Board? That depends upon circumstances; the local Board do not perhaps know of their coming until they arrive.

564.

564. *By the Chairman*: How many patients have you in the house? We had 352 last night.
565. Have you had more than that? I have had 389.
566. Then the numbers are really on the decrease? Yes.
567. Can you state to the Committee the number of deaths, discharges, the increase or decrease for every quarter since the establishment of this institution, or since you entered upon your duties here? Yes. (*Vide Appendix A.*)
568. You say your wife is matron here? Yes.
569. Are there any female paupers here? There are only three females in the establishment; two hired servants who conduct the laundry work, and an aged pauper.
570. Have you many visitors here—gentlemen in the neighbourhood? Yes; sometimes they put down their names in that book, sometimes they do not. (*The Chairman referred to the visitors' book.*)
571. I see Mr. Byng is a pretty constant visitor here? Almost every day.
572. What is Mr. Byng? A divinity student; he comes here to read to the Protestants.
573. I see the name of J. B. Watson; he is the surgeon I suppose? Yes.
574. He is surgeon to the house? Yes.
575. I see also P. Young; who is he? The Catholic clergyman; he is generally here two or three times a day.
576. I see that Henry H. Belton is a pretty regular visitor to the institution? Yes; he is a divinity student also, at Moore's College.
577. *By Mr. Alexander*: Does Mr. Gillespie come here? No; he has not come lately; he is busy building.
578. He is one of the local Board, is he not? No, he has resigned.
579. *By the Chairman*: Charles F. D. Priddle; who is he? The Rev. Mr. Priddle, Church of England clergyman, and Chairman of the local Board.
580. William Hodgson; who is he? The Rev. Mr. Hodgson, President of Moore's College.
581. Who is Mr. Chas. Allanby? He is also a divinity student at Moore's College.
582. The whole of the gentlemen at Moore's College are pretty regular visitors here? Yes.
583. *By Mr. Alexander*: Do they take any part in the religious instruction of paupers on Sundays? Twice a week there is service.
584. Who officiates? One of the divinity students—those who are in holy orders, or Mr. Hodgson himself, twice a week.
585. *By the Chairman*: Do any of the paupers work here? Yes.
586. What do they do? They white-wash, paint, garden, attend funerals, holystone the place, and some of them assist in cooking.
587. I suppose they do the whole of the work required by the institution? Yes, with a few hired servants.
588. Hired servants as wardsmen? Yes.
589. Have you any paupers as assistant wardsmen? Yes.
590. When they act as assistant wardsmen are they paid? Yes; they are allowed 6s. 6d. a month as a gratuity; that is only a few; some are only allowed extra bread.
591. *By Mr. Alexander*: Do they want extra bread? Yes.
592. Is not the ration sufficient? Some could eat more than a pound of bread a day,—more than two pounds.
593. *By Mr. Caldwell*: What is the scale of provisions? (*Vide Appendix B.*)
594. *By the Chairman*: You say you have two hired female servants here? Yes.
595. What pay do they receive? £20, and £18 a year; the laundress gets £20, and her daughter, as needlewoman, £18.
596. You say you have a female pauper here; what does she get? Nothing; she is an old woman, not able to walk about.
597. *By Mr. Alexander*: What is the reason she remains here? She was here many years before I came, and she remains here still. I could not get her away, and the acting committee allowed her to remain.
598. It is not usual for women to be allowed to remain here? No.
599. *By the Chairman*: What are the wardsmen paid? £30 a year.
600. What other persons have you who are paid salaries? The gate-keeper has 13s. a month; he is an inmate.
601. The cook? There is one cook, at £30 a year.
602. He is assisted by other inmates? Yes; some of them get 6s. 6d. a month, and some get nothing; only those who remain stationary are paid.
603. What salary do you receive? £200 for the master and matron, and a common ration the same as the servants.
604. With firing, lighting, and quarters? Yes.
605. Have you any books for the inmates? Yes; this is the library which has been commenced (*directing the attention of the Committee to some twenty or thirty Bibles, prayer, and religious books.*)
606. These appear to be chiefly Roman Catholic books? There are some Catholic, some Church of England, and some Wesleyan.
607. Are these the whole of the books you have, consisting chiefly of Bibles and Prayer Books? We had a few volumes of Hogg's Instructor, and some other books.
608. *By Mr. Caldwell*: Can you tell me how many there are in the institution who call themselves Wesleyans? I dare not put any questions about their religion. I have seen some who called themselves Wesleyans when they came in, who now go to Church.
609. Are there any who go to the Wesleyan Chapel on Sundays? Four or five; and tracts are distributed every week.
610. *By the Chairman*: Religious tracts, I presume? Yes.

- Liverpool Asylum. 29 Oct., 1861. Mr. P. H. Mulholland.
611. Will you favour the Committee with a list of books in the library? Yes. (*Vide Appendix A.*)
612. *By Mr. Caldwell:* Will you point out any books that are Wesleyan publications? (*The witness examined the books.*) I do not think I can.
613. Have you any books in this library on controversial subjects? Not that I am aware of.
614. What do you call that book (*handing a book to witness*)? "The Poor Man's Controversy."
615. There is another (*handing a book*)? That is similar.
616. Who selects the library for the inmates? The different clergymen. A grant of £5 has been lately made to each of the clergymen; these are part of the books selected by the Rev. Mr. Young; Mr. Priddle's and Mr. Hodgson's have not arrived yet.
617. *By the Chairman:* Is the building generally in a state of good repair? The outside is in bad repair.
618. What part of the outside? The roof.
619. Does it leak? Yes.
620. Through the lead or the shingles? Both.
621. Is there any part but the roof out of repair? The roof is good enough, but the shingles were put on very thin.
622. With the exception of the roof is there anything out of repair? There is a good deal of other work required.

[The Committee proceeded to inspect the various wards of the building, accompanied by Mr. Mulholland.]

In No. 2 Ward.

Thomas Divers was examined:—

- Thos. Divers.
623. You are wardman to this ward? Yes.
624. How long have you been here? I may say three years; I have been five in the house.
625. What pay do you receive? 16s. a month.
626. How many beds have you here? Sixteen.
627. Have you ever had more than sixteen? No.
628. You have never had more than sixteen sleeping here at night? Yes, I have had seventeen—one on the ground.
629. Are not these beds very close? Yes.
630. Should not these beds along the middle of the room be removed altogether? Yes.
631. Then this room ought to contain only ten beds? Ten would be quite enough for sick bed-ridden people.
632. You have now sixteen, and have had seventeen lying here? Yes.
633. How often are the beds taken out to air? Very often, when they are any way damp; sometimes daily.
634. Do you make it a rule to take them out at certain times? Some of them are taken out twice as often as others, according as they get damp.
635. You have no regular rule? No; whenever a new bed is wanted we fill the case.
636. The beds are filled with straw? Yes.
637. What covering have the inmates? Two blankets.

[The Committee examined the beds and blankets, and found old boots and various articles of clothing concealed under several of the beds.]

638. *By Mr. Caldwell:* Is it usual for the men to keep their boots in that way? The men in this ward are sometimes here, and sometimes in the yard; we cannot put their clothes away as we do when they are in the hospital, and they hide them away sometimes.

In No. 3 Ward.

Patrick Grogan was examined:—

- Patk. Grogan.
639. *By the Chairman:* Are you the wardman of this ward? Yes.
640. How long have you been here? I have been in the house close upon eight years, and have been wardman about six.
641. What pay do you receive? £2 10s. a month.
642. How many beds have you in this ward? Fifty-five.
643. How many persons have you had sleeping in the ward at one time? All the beds were full the other day.
644. Have you ever had any sleeping on the floor? There were some last summer.
645. Are not the beds round the walls very close? Yes.
646. Do you think there ought to be any beds in the centre of the room? No.
647. How many have you in the centre of the room? Eighteen.
648. These eighteen ought not to be there at all? No.
649. And are not those round the wall too close to each other? Yes, there ought to be one or two out on each side.
650. Then, out of the fifty-five there ought to be twenty-four taken away? Yes, that would leave thirty-one; then it would be a wholesome ward.
651. Do you find it disagreeable at night? Yes; moreover in muggy weather it is hard to keep the place sweet, even with this disinfecting fluid.
652. What ward do you call this? The sick and infirm ward.
653. Do any of the inmates go out of the ward, in the day, into the yard? Yes, a good number. They do not go out till after seven in the morning.

654. At what time do they come in? They can go out and come in as they think proper. Liverpool Asylum. 29 Oct., 1861.
655. At what hour are you up in the morning? Six o'clock; but they can go in and out of the ward at all hours.
656. *By Mr. Caldwell:* Do you allow the men to keep their old clothes and boots under the beds? No; their clothes are taken away from them when they are in the regular hospital. Patk. Grogan.
657. *By the Chairman:* How often do you take their bed-clothes out? At any time when we want clean clothing we can go to the store and draw them.
658. I am speaking about your taking out the bedding to air—how often do you take it out? Sometimes weekly, sometimes monthly.
659. *By Mr. Caldwell:* Instead of making the beds in this way (*spreading them on the bedstead*) do you ever turn them up? No, not in the lower wards.
660. Why not? The doctor does not approve of it.
661. If you were to turn them up the people could not hide their clothes under them? No.

In the Store Room.

662. *By the Chairman (to Mr. Mulholland):* What do you call this? It is the small store, and the largest we have. No. 2 ward was our store room. Mr. Mulholland.

Mr. George Girling examined:—

663. What are you? Storekeeper. Mr. George Girling.
664. Is this the sugar you use here (*examining the sugar*)? Yes, we were obliged to buy that in the town; we are just out of sugar.
665. Where do you get your flour from? Nicholson, in Sydney.
666. I presume it is the same as that used in Sydney? It is not the same contract.
667. Is this the rice you use (*examining the same*)? Yes, this is sent by the contractor from Sydney.
668. Where is your bread? (*A sample was shewn.*)
669. What do you pay for this? 3 $\frac{1}{2}$ d. for a 2 lb. loaf.
670. What books are these? Some belong to me; the others were bought for the institution nearly seven years ago; they have been patched up from time to time, but they are now nearly worn out.
671. What is that (*pointing to a cask*)? Sherry.
672. And what in that (*pointing to a second cask*)? There was porter in that, but I have bottled it to preserve it. There is some lime juice which I serve out from time to time in the yard, under the doctor's orders.
673. You seem to have plenty of room? Many of the stores are out now; but when we have a full supply there is not much room.
674. What leather is this (*referring to a quantity of leather in the store*)? It is to sole and mend the people's shoes.
675. *By Mr. Caldwell:* What quantity of porter do you serve out in a day? Sometimes more, sometimes less; generally twelve or thirteen half-pints daily.
676. How much wine? Between twenty and thirty glasses; thirty-one or thirty-two, sometimes more, sometimes less.
677. That is served out in accordance with the directions of the medical officer? Yes.
678. *By the Chairman:* You have charge of these medical comforts? Yes; I have the key.
679. No one else has the key? No; no one else has access to them.
680. Then you are responsible for everything? Yes, in the store.
681. The porter, wine, &c., are measured out to you; you have to serve them out according to the instructions of the medical officer, and to keep an account of them? Yes.
682. *By Mr. Caldwell:* Do you serve out any spirits? Very seldom; occasionally a glass is given to the men going out with a funeral, or to any dirty work, such as emptying the cesspool.
683. Does the medical officer order any spirits to be served out in any cases? Yes, brandy. For instance, a man was brought in yesterday who had met with a severe accident, and was in a state of collapse. There is no great deal used.
684. What class of inmates do you supply with porter? The sick.
685. None but the sick? None but the sick, except the master orders a man a pint of porter for extra work.
686. Then occasionally the master, as well as the medical man, orders porter to be given? He does occasionally, but I give nothing unless I have an order.
687. *By the Chairman:* What salary do you receive? £100 a-year and rations.
688. How long have you been here? Eight years.

In the Surgery.

689. (*To Mr. Mulholland*): Have you a medical officer stationed here? No, we have one who visits daily—Dr. Watson. Mr. Mulholland.

In No. 4 Ward.

William Jones was examined:—

690. Are you the wardsman here? Yes. Willm. Jones.
691. How long have you been so? Four years.
692. What salary do you receive? £2 10s. a month.
693. How many beds have you here? Twenty-two.
694. Is that the largest number you have had? Yes.

- Liverpool Asylum. 29 Oct., 1861. 695. Have you ever had persons sleeping on the floor? Sometimes; in cases of emergency.
696. How many have you had sleeping on the floor at one time? One.
697. Are not the beds much too close? Yes. When I came here at first there were only sixteen in this room, and there was a table in the middle, upon which operations were performed; that was taken out, and these beds were put in.
698. Do you not think fourteen would be as many as should be put in this room? Yes; it is very hot and close here in the summer nights.
699. What do you call this? The sick or hospital ward.
- Mr. Mulholland. 700. *By Mr. Alexander (to Mr. Mulholland—handing a loaf of brown bread):* Is that the bread you give to the people in this ward? Some have fine bread, some coarse.
- Jones. 701. *By Mr. Caldwell (to Jones):* How do you ventilate this ward—do you keep the top windows down? Yes, we must do so; sometimes we have a dreadful case of dysentery, and the smell is unbearable.
702. Have you any assistants in this ward? Yes, I am the head wardsman, and that (*pointing to one of the men*) is my mate; I pay him out of my salary.
703. *By the Chairman:* Is he an inmate of the institution? Yes.
704. You have taken him from the yard to help you? Yes.
705. He seems a hale, hearty, man? There is nothing much the matter with him, only he is a little flighty.

In No. 5 Ward.

Robert Salter was examined:—

- Robert Salter. 706. Are you the wardsman here? Yes.
707. How long have you been here? This time, only a month.
708. Were you here before? Yes, nearly two years.
709. How many beds have you in this room? Thirty-four.
710. Is it not very much crowded? Yes.
711. How many beds have you in the middle of the room? Eight. I think we could very well dispense with four of these beds, two from one end of the room, and four on each side.
712. Besides those in the centre? I think we could do with them.
713. Is it usual to have beds in the centre of an hospital? Sometimes a man falls sick in the yard and we are obliged to take him in here, and alter the arrangement of the beds.
714. What ward do you call this? The infirm ward.
715. Turn down some of these beds?
- [The witness turned over some of the beds, and exposed boots and various articles of clothing.]
716. What are those things? They belong to the men who sleep here, and who are gone out into the yard.
717. Would it not be better that the men should be compelled to take these things with them into the yard?
- [Mr. Mulholland said it was a rule, that nothing should be allowed to be kept under the beds.]
718. How often do you change the bed-clothes? About once in three weeks, or once a month; if I find them dirty I send them away.
719. Do you ever send the bedding into the yard to be aired? Yes; perhaps three times in the course of the summer, but then I change the beds three times as well, and they have a clean sheet and pillow-case every fortnight.
720. What food do your patients generally get? The ration that is going generally for the yard, which I suppose will amount to about half a pound of meat, a pint of soup, and a pound of either brown bread or white, according to the doctor's orders.
721. Have they tea? Yes; a pint in the morning and a pint in the evening.
722. And medical comforts as the doctor thinks proper? Yes; wine, milk, arrowroot, and rice, if the doctor orders it.
723. Do you often see clergymen of the different denominations in the ward? Yes; three or four times a week.

In No. 11 Ward.

William James Bullen was examined:—

- W. J. Bullen. 724. Are you wardsman of this ward? Yes.
725. How long have you been wardsman? Nine months.
726. What do you receive for your services? 10s. a month.
727. Were you an inmate here before? Yes.
728. Were you taken out of the yard and brought here as wardsman? Yes.
729. Have you any assistants? I have one to assist me to make the beds.
730. Do you give him any pay? No.
731. How many beds have you in this ward? Fifty-four; I had sixty-five in the winter.
732. The ward is very much crowded; I see the space between the beds against the wall is not above fifteen inches? Yes.
733. The beds are placed all round the room, and there are two rows in the middle without more than twelve inches between them? Yes, and I have had sixteen sleeping on the floor.
734. (*To Mr. Mulholland*): If the whole of the centre beds were taken away would it not then be desirable to remove four of the beds from the sides, which would reduce the number in the ward to thirty-four? I think forty might be accommodated, as there is good air in this room.

In

In No. 10 Ward.

William Allen was examined:—

Liverpool
Asylum.
29 Oct., 1861:
Willm. Allen.

735. What are you? Wardsman.
 736. How long have you been wardsman? I have been about seven years in this establishment.
 737. What pay do you receive? £32 a-year.
 738. I see you have the bedding folded up? Yes.
 739. Do you fold them up every day? Yes.
 [The Chairman directed several of the beds to be opened.]
 740. Do you allow the men to keep any old and dirty clothes under their beds? No, I am ordered by the master to take them away.
 741. Are there any clothes under any of these beds? No, I am sure there are not.
 742. How many beds have you in this ward? In winter we had forty-five, now we have thirty-eight bedsteads.
 743. Have you had any sleeping on the floor? Seven.
 744. What ward do you call this? They are all hale wards up stairs.
 745. Can the men go out of the ward at any time? No, the master locks them in at night and opens the door in the morning.
 746. Suppose any of the people are taken ill at night what do you do? Knock at the door, and the master gets up. If he does not hear I open the window and call to the clerk and storekeeper who lives in front.
 747. At what time is the door locked up at night? At half-past eight.
 748. When is the door opened? At a quarter after five.
 749. *By Mr. Caldwell:* How many times a week do you scour out this room? It is washed every morning.
 750. How often do you move this bedding and these boards? The beds are generally taken down once a month—whenever they are required.

In No. 9 Ward.

John Bell was examined:—

751. Are you wardsman here? Yes.
 752. How long have you been so employed? Upwards of three years.
 753. What do you receive? 6s. 6d. a month.
 754. You were an inmate before you were employed as a wardsman? Yes.
 755. How many beds have you here? Thirty-two beds, and two beds on the floor.
 756. What is the largest number you have had sleeping in this ward? Thirty-seven.
 757. Are not your bedsteads too close together? Yes, at one time we had only twenty-six bedsteads here.
 758. How often do you change the bed-clothes? The sheets go down every fortnight.
 759. How often are the beds and bedding taken down to air? Sometimes once a month.

John Bell.

[The Committee examined the bedding.]

[On the entrance of the Committee into this ward, the witness was engaged in drawing the plan of a building.]

760. *By Mr. Caldwell:* Is this your drawing? It is.
 761. For what is it intended? The plan of a chapel for this Asylum.
 762. For whom are you drawing that? For the society.
 763. *By Mr. Alexander:* Who gave you the instructions? The committee.
 764. Which committee? The committee here—the Rev. Mr. Hodgson and the Rev. Mr. Priddle.
 765. *By Mr. Caldwell:* Do you know whether the committee have it in contemplation to build a chapel of this description on the grounds? I believe that was the intention.
 766. Do you receive any pay for what you draw? I receive allowances, and have more liberty than others.

In No. 8 Ward.

[This ward was being cleaned at the time of the Committee's visit.]

William Stokes was examined:—

767. *By the Chairman:* Are you the wardsman here? I am.
 768. How long have you been wardsman? Three years.
 769. What pay do you receive? 10s. a month; and I pay 2s. out of it to the man who helps me to take out the tubs, and then I pay another shilling for matches.
 770. To whom do you pay that? I buy matches.
 771. How many beds are there in this ward? Forty-seven.
 772. How many have you had sleeping in this ward at one time? Sixty-three.
 773. Of course you would then have sixteen sleeping on the floor? Yes.
 774. How many bedsteads are there in the centre of the room? Sixteen.
 775. Do you find it unpleasant here of a night? Yes.
 776. I see you are engaged washing the floor? Yes.
 777. How often do you wash out the ward? Every morning.

Wm. Stokes.

[The Committee examined the bed boards, and observed in the crevices of many a large number of bugs. The wardsman said the boards were taken down in every month, and that these were about to be removed.]

In

Liverpool
Asylum.
29 Oct., 1861.

In No. 7. Ward.

Robert Sully was examined:—

- Robert Sully. 778. Are you wardsman here? Yes.
779. How long have you been here? Eighteen months.
780. What pay do you receive? 6s. 6d., and I have to pay a man 2s. out of that.
781. For what? Taking the tubs down.
782. How often do you change the bedding? The men have sheets every week.

[The Committee examined the bedsteads.]

783. I see there are bugs in every bedstead? They are in the cracks of the boards, and you cannot keep them out.
784. This blanket looks black and dirty—how often do the men have clean ones? I shall return one of the blankets in a few days; the men will have one instead of two during the summer.
785. How often are they washed? About every month or six weeks.
786. How many beds are there in this ward? Thirty-two.
787. You have six beds in the centre of the room? Yes.
788. How many have you had sleeping here at one time? Thirty-five.
Mr. Mulholland. 789. (*To Mr. Mulholland*): The blankets in this room are very dirty? It is caused by the dye from the cotton rugs; in the other room, where woollen rugs are used, the blankets do not appear to be dirty.

[The Committee next visited the basement floor, which was appropriated to the purposes of washing, the storage of lumber and coffins. The vault devoted to the latter purpose was also used as a carpenter's shop. The floor, which was paved with stone, was flooded with soap-suds, and boards were laid down to enable the men employed in washing to pass to and fro dry shod.]

In the Wash-house.

790. (*To Mr. Mulholland*): Do the men wash all the clothes? Yes.
791. I see the ground is covered with water? Yes, and on a wet day the water rises in the cellars.
792. Have you not a drain to the river from this place? No.
793. Supposing there were good drainage the water would not continue here? No.
794. Do the men who are employed in washing here receive any pay? No, they get extra tea, sugar, and bread.

Mary Finnerly examined:—

- Mary Finnerly. 795. Are you the laundress? Yes.
796. Of course you superintend the washing by the men? Yes.
797. What do you receive per annum for your services? Myself and my daughter £44 a-year.
798. How long have you been here? Going on for eight years.
799. Of course you receive rations and quarters also? Yes.
800. How do you account for this place being so wet? It is from the suds.
801. Do the men throw the water down here? No, it is spilled in carrying out the clothes from the copper to be rinsed.
802. Where does the water you use here come from? From a tank, and the tank is supplied from the railway.
Mr. Mulholland. 803. (*To Mr. Mulholland*): Do you pay Government for the supply? Yes, 2s. for each tank, and the tanks holds 1,000 gallons.
Mrs. Finnerly. 804. *By Mr. Caldwell (to Mrs. Finnerly)*: I suppose you sweep down this place? Yes, it is washed down, and we keep it as clean as we can.

[Passing a dark cellar in which was kept chloride of lime that had over-spread the floor.]

- Mr. Mulholland. 805. *By the Chairman (to Mr. Mulholland)*: What do you keep there? Chloride of lime.
806. *By Mr. Caldwell*: Has anyone charge of that? Yes; the cask has burst.
807. Does any member of the local board examine the lower premises? Yes, constantly.

In the Coffin Room.

Thomas Read was examined:—

- Thos. Read. 808. *By the Chairman*: Are you a carpenter? I am.
809. How long have you been here? Backwards and forwards I have been here ever since Mr. Mulholland came here.
810. About eight years? Not quite so much.
811. Do you work here? Yes.
812. What work do you do? I mend anything that wants repair; sometimes locks, at other times sashes, at others the roof.
813. Do you get paid for your services? I have no salary; I receive a few pounds as a gratuity, but I dare say I have done better than £300 worth of work for them since I have been here.

814. *By Mr. Caldwell:* I suppose you have charge of this department? I am here whenever there is anything to be done; and I believe my health has been injured by the damp here, for when there is any rain the place is in a float. Sometimes I am employed on the roof and other parts of the building, doing repairs.

Liverpool
Asylum.
29 Oct., 1861.
Thos. Read.

[The Committee next visited the garden, inspected the dead house, and proceeded thence to the laundry, kitchen and dining room.]

In the Garden.

815. *By the Chairman (to Mr. Mulholland):* Is the work in the garden done by the inmates? Yes.

Mr.
Mulholland.

816. When you came here was there any garden? There was part under cultivation.

817. The produce of this garden supplies the kitchen with vegetables? Yes.

818. Nothing goes out of the garden into the town? No.

819. I observe a small shed by the wall; what is it? The cobbler's shop.

820. What is the other erection? A shed for keeping the garden tools.

821. *By Mr. Caldwell:* Does not the tower of the building require repairing? The roof requires to be taken off; and the upper part of the tower is lath and plaster—it ought to be of brick.

822. Would it be an advantage to the institution if the brick wall facing the railway were taken down, and a fence were substituted? I think it would be unsafe; the men would get over the fence; even now they get over the wall.

In the Kitchen.

John Moran was examined:—

John Moran.

823. *By the Chairman:* Are you the cook? Yes.

[The Committee inspected the soup, a tin dishful of which was brought by the cook.]

824. The meat we see in each dish is the allowance for one man? Yes; and a pint of vegetable soup.

825. What bread do they receive? 1 lb. and a pint of tea, morning and evening.

826. Are any potatoes served out? Not usually; they have only the vegetables that grow in the garden.

827. The committee do not supply the inmates with any other vegetables than those which grow in the garden? No.

828. What are you supplied with by the committee? Flour.

829. Is there any regulation as to the quantity of flour you are to be supplied with? Yes, so much flour for so many men.

830. Where do the men eat? In the dining-room.

831. Have you any oven? Yes. (*The witness showed the oven.*)

832. Do you always supply the inmates with boiled meat? Yes, excepting at Christmas time.

833. You have no convenience for baking the food for the inmates? No, the oven is not large enough.

834. It would not be attended with much more labour, I suppose, to bake than to boil the food? No, and it would shut out a great deal of the heat.

835. Have you any convenience for making hot water for those who are supplied with tea and sugar? We have only five coppers and the two pots you see.

836. You have not sufficient convenience? We have not, but we do the best we can.

837. I see you have been baking? Yes, for the laundress and the officers; they can have their meat either baked or boiled.

838. How often do you clean the floor here? Every day.

839. What is your pay? £2 10s. a month.

840. Have you any assistants? Yes, three men.

841. What is their pay? 9s., 10s., and 12s. a month.

842. *By Mr. Caldwell:* The meat I see in the tin dishes is ready to be served out to the men? Yes, that is the sick ration; they are not able to eat it this hot weather; some of it is always brought down and thrown away.

843. *By the Chairman:* They have as much as they can eat then? Plenty; after dinner perhaps three-parts come down.

844. *By Mr. Caldwell:* How often do they have soup? Every day.

In the Dining Hall.

845. *By the Chairman (to Mr. Mulholland):* Do the whole of the men dine here? All who are hale.

Mr.
Mulholland.

846. Is it large enough to accommodate the whole? It is large enough to accommodate 500 men; it is 100 feet long by 25 feet wide.

847. It has a shingled roof? Yes.

848. Would it not be better if there were windows made through the wall on both sides? I should say it would be an improvement to have grated windows.

849. Can the men who are in the yard come here out of the sun when they please Excepting when the place is being cleaned.

- Liverpool Asylum.
29 Oct., 1861.
Mr. Mulholland.
850. You have three rows of tables—one on each side, and one down the middle? Yes.
851. Are the men allowed knives and forks? No.
852. How do they cut their meat? Some have knives, some have not.
853. Do you not supply them with knives? There are knives and forks in store, but I have not permission to give them out.
854. Are you prevented doing so? Yes.
855. By whom? The local Board, who think it dangerous to trust them with knives. They have often attempted acts of violence.
856. But have never succeeded? Nobody has been killed, but several attempts have been made.
857. Is it the duty of the officers to be present in the ward during meal times? Yes, to examine the meals before they leave the kitchen.
858. *By Mr. Caldwell:* Is anyone here during the time they have meals? Only to say grace.
859. Who says grace? I do—the master.

Henry Moss was examined:—

- Henry Moss.
860. *By the Chairman:* Are you the wardsman in charge? Yes.
861. How long have you been in charge? Four years.
862. How often is the floor washed? Every day.
863. Have you anyone to assist you? I have an old man to assist me, and I give him bits of tobacco for doing so; I am only an inmate.
864. What pay do you receive? 13s. a month.
865. Have you during the time of taking meals heard any quarrelling among the men? The quarrelling is principally among the yard men.
866. Have you heard them quarrelling during meal times? I am not here during the meals.
867. Is there any officer present during the meals? Not that I am aware of; the master comes in, and I go into the kitchen to assist.
868. There is no one in charge who remains here while the people are eating their dinner? Not officially.
869. You have never heard any quarrelling? There is quarrelling repeatedly.
870. In this room, while the men are eating? Yes, generally, more or less.
871. *By Mr. Caldwell:* When quarrels take place are they reported? The master is always about.
872. Are they reported to the authorities? Yes. I have thirty-two people sleeping here every night.
873. *By the Chairman:* Where do they sleep? They are principally cripples, who cannot go up stairs.
874. Where do they sleep? On the floor. Those who are able and cleanly on the tables, and some on the forms.
875. Do you allow any of them to sleep on the tables? One or two.
876. Which the people eat from? Yes.

[Leaving the kitchen, the Committee went outside the wall, then returned, inspected sheds, which were occupied severally as a washing-house, a store for bedding when removed from the dining hall, and a barber's shop; and finally, a large open shed in the middle of the ground, beneath which were assembled a large number of the oldest and most infirm inmates. At one end of this last-mentioned shed was a brick fire-place, on the outside of the wall.]

- Mr. Mulholland.
877. *By the Chairman (to Mr. Mulholland):* I see a house in the rear of the Asylum which I believe lately belonged to Mr. Hill? Yes.
878. That is Government property, is it not? Yes.
879. Under whose charge is it? The Railway Commissioners.
880. What is done with that? It is let to some of the railway porters.
881. If the committee could get that house, would it not be a great advantage to the institution? Yes.
882. Would you not, then, be better able to classify your people? Yes.
883. How is it enclosed on the back side? By a wall in front, and by a fence on the railway side.
884. You could send some of your best behaved men there? Yes, or could take away from other wards such men as had scorbutic diseases.
885. I presume that house would hold 60 or 70 people? With very little repair we could have fifty beds there.

In the Washing-house.

886. I see there is a bench here with holes in it, I presume to hold the basins used for washing? Yes, the tin basins you see are the washing basins.
887. And the large cask contains the water whence they are supplied? Yes.
888. Are the men compelled to wash themselves every day? They are supposed to do so, but there are some very refractory.
889. Is there any bath room? No.
890. This is the only place where they can wash? Yes.

891. When a man enters the institution, you have no means of giving him a bath? No; he is merely sent to the barber's shop, and his hair is cut, or he is shaved, and has to wash his face. Liverpool
Asylum.
29 Oct., 1861.
892. Have you any trouble in making them keep themselves clean? Yes; some of them think it is not beneficial to their health. We propose to have the water laid on here, and to have a shower and other bath. Mr.
Mulholland.

In the Barber's Shop.

[In this place there were two men who stated that they were both inmates; that one received 10s. and the other 16s. a month; and that they shaved the people twice a-week, and cut their hair when required.]

In the Open Shed.

[The Chairman observed that the roof of this building was in a very imperfect condition.]

893. *By the Chairman:* When the men come in here, do they continue to wear their ordinary clothing? Yes.
894. And when they are thoroughly worn out, you supply them with fresh? Yes.
895. Are the clothes of a uniform kind? No; sometimes they are of one colour, sometimes of another.
896. If the men are able to obtain any employment from outside, are they allowed to do it? No.
897. There is no kind of occupation for them? Nothing beyond clearing up the house, and keeping it in repair.
898. They have nothing to do but to walk about the yard, or to sit down here hour after hour, day after day, and month after month? No.
899. *By Mr. Harpur:* Cannot you give them work yourself? No.
900. Then they are kept in a state of enforced idleness? Yes.

[The attention of the Chairman having been called to one of the old men beneath the shed, who was complaining of the general want of cleanliness in the establishment, the complainant was examined as follows]:—

901. *By the Chairman:* What is your name? Frank Allen.
902. How long have you been here? On and off, seven years here. I was here in Dr. Russell's time. I came to this country in 1813.
903. How old are you? Eighty-five come New Year's Day, at six o'clock in the morning. Where I sleep there are ten thousand million of lice; I can get no rest—scratch, scratch, scratch, all night long; there are fleas, lice, and bugs.
904. Where do you sleep? In the dining-room—that is the place.
905. You do not mean to say there are fleas, lice, and bugs in the dining-room? I do though. There is the place where the beds are put away; them beds are not shown, they are scandalous; they ought to be taken out and burned.
906. How many sleep in the dining-room? I dare say thirty or forty. There are a good many beds lying on the floor; some lie on the table; I am not able to get on the table, so I lie below.
907. I suppose you can during the day-time either go into the dining-room or sit down here? No; there is a certain time when the men must do the dining-room out.
908. What you complain of is the vermin in this room? Yes.
909. Have you any other complaint? We never have any garden stuff; we have not had any garden stuff for three years.
910. Have you not any vegetables in your soup? There is nothing in our soup, only sometimes a rotten turnip or a bit of a cabbage leaf is chucked in.
911. Have you no potatoes? I think, if I tell the truth, I have had seven little potatoes; the whole lot would not weigh an ounce, roots and all together.
912. That is within the whole time—the five or seven years you have been here? Yes; there was lots of garden stuff when Dr. Russell was here.
913. *By Mr. Alexander:* Where did you get that hat from (*an old and battered silk hat*)? From the house.
914. *By Mr. Love:* Would you not prefer potatoes instead of some of the bread you receive? Yes, I would, your honor; the bread is very coarse, very rough. I don't know what it is made of; chaff, or some mess or another, if it is a day old it would choke you.
915. Have you to soak it in water? You have no time to get your victuals here. The other people at the lower end of the dining-room gets their dinner before we at the upper end can get any; and then they come and snatch away the things.
916. *By Mr. Caldwell:* How much meat do you get a day—beef or mutton? I cannot say, I never weighed it. The other day I could not eat a single mouthful; I had no knife, I have no teeth, and I could not get it apart.
917. Could you not get a knife to cut it? No knife would cut it.
918. If you had not eaten all your meat when the people have dined, can you not bring the rest out with you and eat it in the yard? You must be brisk, or they would shove you out altogether; they will not give you time to eat, you must bolt it, for you have not time to swallow it properly. There are some regulations in the gaol, there are none here.

- Liverpool Asylum. 29 Oct., 1861. 919. *By the Chairman* : Such as it is, you get enough to eat? Sometimes, I think if it was weighed, there would be from eight to nine ounces in half a loaf.
- Mr. Mulholland. 920. Do you not know that the loaves weigh two pounds each? I do not know; if so, I get very short of it.
921. Have you had a row since you have been here with anybody? Not a day throughout the year but what there is a row here.
922. You do not want to quarrel? No, I do not want to quarrel; but thieves will be thieves; if you have a knife, a spoon, or a bit of tobacco, they will nail it.
923. You take care, I suppose, to hinder them? I could not hinder them; as for quarrelling, my time for quarrelling is pretty well over, but if they will do so, I cannot help it.

Moses Pollit was examined:—

- Moses Pollit. 924. How long have you been here? Three months.
925. Do you sleep in the dining-room? Yes.
926. You have heard the statement just made by Allen as to the quantity of vermin in the dining room, is that true? I do not believe it, and I sleep in the next bed but one to him, and I have not seen anything of that.
927. When the beds are taken from the dining room, are they at once folded up and put in the shed, or are they brought out to air? Not so far as I know.
- [Patrick Conolly came forward and stated:—I have been sleeping for three years in the mess room, and the beds are never put out to air; I have been sleeping for three years on the floor.]
- Pat. Conolly. 928. *Examined by the Chairman* : Have you seen vermin there? I have, plenty; I had to rub blue stuff into my head, and was like to die. You never can keep yourself clean; we never have clean clothes; I had a new pair of trousers when the bishop came here, and the day after, they were taken away.
929. Do you know who took them? The wardsman took them to Mr. Mulholland.

Robert Jones was examined:—

- Robert Jones. 930. Do you sleep in the dining room? Yes.
931. How long have you been in the institution? Six months.
932. Have you found any inconvenience from vermin there? There are no vermin there to my knowledge.
933. Are you blind? No, I have good eyesight, thank God.

John Hayburn was examined:—

- J. Hayburn. 934. Do you sleep in the mess room? Yes.
935. Do you feel any inconvenience from bugs or other vermin? I am clean of them; I am blind, and I get a man to examine me every day.

Richard West was examined:—

- Richard West. 936. Do you sleep in the mess room? Yes.
937. What is done with the beds after you get up? The beds are put away in the shed; they are not exposed to the air.
938. Have you felt any inconvenience from vermin? I have found one or two about me.

Dennis Sullivan was examined:—

- Den. Sullivan. 939. Do you sleep in the mess room? Yes.
940. Have you felt any inconvenience from vermin? No, not where I sleep.
- [Henry Moss was directed to take several of the beds from the shed, and to open them for the inspection of the Committee.]
- Henry Moss. 941. *By Mr. Caldwell (to Moss)* : When you find any of the beds wet, what do you do with them—do you roll them up and put them away? No, I put them on the green.
942. That has not been aired (*referring to a bed which was then wet*)? No, not this morning.

[William Ray, who appeared to be suffering from difficulty in breathing, was examined.]

- William Ray. 943. *By the Chairman* : You seem to be ill? I am.
944. What is your disease? Consumption.
945. How long have you been here? A fortnight next Thursday.
946. Do you find yourself getting better? No.
947. How often do you see the medical man? He comes once a-day; but he merely comes and goes away again.
948. How long does he remain? He does not stop. I have not been examined since I have been here.
949. Have you not received any medicine? Some cough mixture.
950. *By Mr. Caldwell* : Have you been examined by any medical man? Yes, but not here.

Mr. J. B. Watson (Medical Officer), was examined:—

- Mr. J. B. Watson. 951. *By the Chairman* : The place at the back belongs to the Government, does it not? So I believe.

952. Would it not be a very excellent situation as an auxiliary to this establishment? Yes, for the purpose of classification. Liverpool Asylum.
29 Oct., 1861.
953. If the use of that property could be obtained for this institution, would it not be able to remove the sick from this building? It would enable me to remove those who are suffering from infectious diseases from those who are merely infirm. Mr. J. B. Watson.
954. If this place could be obtained, you would have greater facilities for classifying the inmates? Yes, it would be very desirable.
955. It would relieve this building of from sixty to seventy persons? I dare say it would.
- [As the Committee were about to leave, Mr. Girling, the storekeeper, drew their attention to the limited extent of his accommodation, which consisted of the two gate-houses, each containing two very small rooms.]

APPENDIX.

A.

QUARTERLY RETURN of the Number of Inmates of the Benevolent Society's Establishment at Liverpool, from 1st January, 1852, to 20th September, 1861, shewing the Admittances, Discharges, Deaths, &c., during each Quarter.

First day of each Year.	No. in the House.	Admitted in Quarter.	Discharged in Quarter.	Died in Quarter.	Increase.	Decrease.	REMARKS.
1852	1st Quarter	62	232	64	13	150
	2nd "	212	98	53	35	10
	3rd "	222	84	92	29	87
	4th "	185	97	80	40	23

October 1st, 1861.—345 remaining in the house on this date.

B.

SCALE of RATIONS issued to the inmates in the Benevolent Society's Establishment at Liverpool:—

- 1 lb. bread and 1 lb. meat to each inmate, daily.
- 1 oz. tea to every five inmates, and 1½ oz. sugar each, daily.
- 4 lbs. rice or pearl barley to every 100 men, daily.
- 2 lbs. flour to every 100 men, daily.
- Pepper and salt, as required.
- Vegetables, as the garden may afford, under the directions of the master.
- Extras for the sick, under the directions of the surgeon.

P. H. MULHOLLAND,
Master.

FRIDAY,

FRIDAY, 8 NOVEMBER, 1861.

Present:—

MR. HARPUR, | MR. HAY,
MR. SADLEIR.

J. LUCAS, ESQ., IN THE CHAIR.

Mr. Robert Anderson called in and examined:—

- Mr. Robert Anderson. 956. *By the Chairman*: You are clerk and accountant to the Benevolent Society? I am.
957. How long have you been in that capacity? Since the 8th May, 1860.
958. Had you anything to do with the institution previous to that? Nothing.
8 Nov., 1861. 959. What gentleman held that office before you? Mr. Johnson.
960. Are you aware how long he held that office? I think about twenty years.
961. The Honorable George Allen is honorary secretary? Yes.
962. Have you books which will shew the receipts and expenditure of the institution? Yes.
963. For how long back? I was required, by the note which I received yesterday, to bring the books containing the accounts of the last five years; those I now produce extend over a longer period. (*The witness produced several account books.*)
964. Can you give us the annual receipts and expenditure for the last five years? Yes, I have prepared a return of the annual receipts and expenditure, from the 1st January, 1840, to 30th September, 1861. (*The witness handed in the same. Vide Appendix A.*)
I have made out that return from the accounts and other materials upon which I could lay my hand, as the books do not very explicitly shew the receipts and expenditure.
965. To the best of your ability you have collected the return you now hand in? Yes, from the accounts put before the annual meetings, as audited by the auditors.
966. Who are the auditors? Two gentlemen connected with the institution are appointed annually to audit the accounts.
967. Will you favor the Committee with the names of the auditors for each year? (*Vide Appendix A. 2.*)
968. I understood you to say that you could not make up a correct return, in consequence of some defect in the manner of keeping the books? I believe they do shew the sums received and the sums expended, but it has been done in a very partial way; the books do not shew every particular; I believe the cash book is almost an exact copy of the bank book. (*The Chairman referred to the book.*)
969. This does not give any account in detail of the expenditure of the institution? No; it gives the expenditure, but it is not very explicit.
970. It appears to be a mere account of the cheques as they were given upon the bank? Yes, merely a copy of the bank book.
971. And these are the only books you can get at? Yes.
972. *By Mr. Sadleir*: These are mere gross amounts? Yes.
973. *By the Chairman*: I see put down here, "salary," "wages," "white-washing," "current expenses, £30." These are the only details you could get at? Yes. There is what is called the petty cash book, that is handed in monthly to the committee.
974. *By Mr. Sadleir*: If you had that petty cash book, you could trace out the items which went to form that £30? Yes.
975. There was a petty cash book kept? Yes.
976. Where is that? It is in the office, but it is kept in the same way as this which I now keep. (*The witness handed in a cash book.*)
977. *By the Chairman*: This is the petty cash book you now keep? Yes; at the beginning of every month I put down on one side what I receive, and on the other side I enter what I expend.
978. There was a book of that kind kept before you took this office? Yes.
979. Is that in the office now? Yes.
980. I understood you to say that it was impossible for you to give a correct account, in consequence of the manner in which the accounts were kept,—what did you refer to? I referred to a different book altogether—to the general cash book; this is the petty cash book.
981. I see in this book (*the cash book*) an item, on the 1st August, 1855,—"Current expenses, £30"; would the petty cash book kept at that period shew every item of which that sum of £30 was made up? Yes.
982. Then what difficulties did you find in the way of giving a correct return? I could not find the particulars of the sums received on account of the institution.
983. How are these sums generally received? They are generally received by the treasurer; I do not know whether all sums were received by him before I entered the office, but I make every sum received go through the hands of the treasurer; I send all I receive to him.
984. I see, in December, 1855,—"To cash, £54 16s. 6d., £15, £40, £21"; is there no way of shewing how these amounts are received? No. I may mention that Capt. Browne, who was our previous treasurer, did furnish Mr. Johnson, in the same way as he did me, with copies of the amounts he had received during the quarter, but they never appear to have been entered in these books. No record, so far as I can find, was kept of the sums so received.
985. Then from what you can gather from these books, you cannot say whether these accounts only were received, or whether others also were received? No.

986.

986. You have no data to shew how, or from whom these accounts were received? No. Mr. Robert Anderson.
987. Have you balanced these books? I have.
988. For how long back? I balanced them to the end of the year 1859, and then I started on the 1st January, 1860, from a balance which I made up at the end of that book. ⁸ Nov., 1861. I started a new cash book upon another principle.
989. Why did you alter the principle of keeping your accounts? In the first place, when I was appointed to the situation I was asked to keep the books upon a different system—the system adopted in mercantile establishments, of double entry; and I considered it to be my duty to start the books from the beginning of the year upon that system.
990. How did you find that these books balanced? I found them by the bank book.
991. You had no other means of making up the accounts but the bank books? No other than the bank books and the old accounts which had been annually produced. I went through them, and found on the 1st January, 1860, the balance produced was £741 6s. 1d.
992. That was in the hands of the treasurer? That was the sum due to the treasurer, or rather to the bank.
993. That is to say, your account had been overdrawn £741 6s. 1d. when you balanced? Yes.
994. There was no check upon Mr. Johnson, as to the moneys received by him on account of the institution? None that I am aware of. I should have paid all the money to the treasurer, and I believe he did so, but I am not aware of any check.
995. What plan do you adopt now? I opened a new cash book from the 1st January, 1860; that was a few months before I entered upon my duties; but I considered it a better plan to commence from the beginning of the year, and to put the accounts upon a new footing. I have entered all the sums I have received since 1st January, 1860, in detail in that book (*the cash book*). In connection with that book, to carry out the system of double entry, I opened up a journal, where I entered all particulars; and I also opened up this ledger, shewing every account as it stands at the end of the year, and I balance every account at the end of the year. The balance against the institution on the 1st of January this year was £1,952 18s. 10d. I keep in detail every account—beef, bread, oatmeal, tea, &c.
996. Taking the items as you find them in the book kept by Mr. Johnson, and the accounts at the bank, do they balance, or is there any deficiency? They balance, I believe; there is a little discrepancy which I could not very well understand, but I believe it to be correct. There is a fund called the investment or building fund, which is added to every year by bequests, and moneys coming into our hands permanently. On the 31st December, 1859, there was a sum of £3,785 to the credit of the investment or building fund, which was lent out in this way—lent on mortgage, £1,500; sum said to be in the bank, £2,285. I had gone over the bank book and checked that, and this is the account I found made up at the time—at the bank, £1,543 12s. 11d.
997. Which shews a deficiency of £741 7s. 1d.? Yes; the £2,285 was not in the bank, and I presume that the institution had encroached upon this fund to the extent of £741 7s. 1d.
998. How have you carried that forward in your account? This balance I carried forward in the cash book as the balance due by the institution.
999. You say when you balanced your accounts in January last, you were due to the bank £1,952 18s. 10d.? Yes.
1000. Was this £741 7s. 1d. included in that £1,952 18s. 10d.? Yes, it formed part of that balance; the treasurer had encroached to that extent upon the building fund.
1001. If the treasurer encroaches upon the building fund, does he not, when he obtains funds, again pay back the amount due to the building fund? Yes.
1002. Then, in reality, this money was not due to the bank? No.
1003. You say that in the commencement of January, when you balanced your books, you found that you stood indebted to the bank £1,952 18s. 10d.? That was the subsequent January—January, 1861.
1004. Then, if you were due to the bank £1,952 18s. 10d., you must have owed the investment fund £741 7s. 1d.? The whole is included in the £1,952 which was drawn from the investment fund. If we had overdrawn our account at the bank they would have charged us seven or eight per cent. interest.
1005. Then this £1,952, which the institution was in debt for current expenditure in January, 1861, was owed to the investment fund? Yes.
1006. So that, in reality, there was only £1,154 19s. 8d. in the bank to the credit of the investment fund? Yes.
1007. That was all the money you had? Yes; but we have increased the investment fund at this period.
1008. I am speaking of January, 1860—all the money you then had to the credit of the investment fund was £1,154 19s. 8d.? Yes.
1009. Have you made up the account to the last quarter? Yes.
1010. How did the account stand then? There was a balance due by the treasurer to the investment fund, on last September, of £2,718 19s. 4d.; but the investment fund has very much increased.
1011. To what amount has it increased? To £10,594 6s. 6d.
1012. What are the causes of that increase? A number of legacies to the institution, and the proceeds of land sold.
1013. From that amount the sum of £2,718 19s. 4d. has been drawn for the current expenditure of the institution? Yes.
1014. So that you are continually drawing from the investment fund for current expenses? Yes.

- Mr. Robert Anderson.
8 Nov., 1861.
1015. When you took office the treasurer owed £741 to the investment fund, and since that time the debt has been gradually increasing, until it now reaches the amount of £2,718 19s. 4d.? Yes.
1016. *By Mr. Hay*: I observe a discrepancy of one shilling in the account, at the end of 1859? I believe the discrepancy was in adding up the bank account at the time I started. The figures were £741 6s. 1d., and I gave the institution the benefit of the shilling.
1017. *By the Chairman*: How are these various sums invested? In a farm at Bankstown.
1018. Purchased for the institution? I believe it was a sum of money lent upon a farm of Mr. George Thornton, and the institution foreclosed.
1019. How much was due in the shape of interest? £80 due for interest.
1020. What was the amount of money lent? £400.
1021. Have the institution endeavoured to sell that? Not since I went there.
1022. How many acres are there? I think 210 acres. At one time they received £40 a-year rent; now they are receiving only £20.
1023. Has it been rented ever since the institution foreclosed? Yes, by the same tenant. We purchased in Government debentures, some time ago, £3,000, and we have lodged in the Oriental Bank, in the name of the treasurer and secretary, upon a deposit receipt, £3,075.
1024. That is the amount you have in hand of the investment fund? On the 30th September we had lying at the bank £1,275 7s. 2d.
1025. At the same bank? No, at the Bank of New South Wales. Then there is a balance due by the treasurer of £2,718 19s. 4d., which I think will make up the whole credit fund for building. I have valued the building and land at £25,000.
1026. *By Mr. Hay*: What is the extent of land you value at £25,000? I think between three and four acres of land; and the sites are very valuable there; we got very good prices for the land we sold at the railway station.
1027. *By the Chairman*: You have sold some? Yes.
1028. To whom? To the Government, for the railway, for which we received £3,000; and to the Rev. Mr. Oram, as a site for a Wesleyan church, £1,976 18s. 10d.
1029. Have you a return of the deaths in the institution? Yes.
1030. For how far back? For twenty years. (*The witness handed in the same. Vide Appendix B.*)
1031. Have you also a return of the number of inmates? Yes. I beg to hand in a return of the number of inmates in the Benevolent Asylum, from 1st quarter of 1840 to the 25th October, 1861. (*The witness handed in the same. Vide Appendix C.*)
1032. Do you also produce a return of persons who have received out-door relief from the Benevolent Society? Yes; I have made that up from 1843; I could find no data from which to compile a return previous to that. (*The witness handed in the return. Vide Appendix D.*)
1033. Under whose charge are the medical comforts? Under the charge of the doctor; they are given only upon a certificate from him.
1034. Under whose charge do they remain? Under the charge of the master, Mr. Mansfield—the stores, wine, porter, &c.
1035. As the doctor gives prescriptions or orders for them, Mr. Mansfield serves them out? Yes.
1036. They are under the charge of no other person than Mr. Mansfield? No. I check his accounts; when a hogshead of porter, or a quarter cask of wine comes in, I take an account of the contents; the doctor then gives me duplicates of the orders he gives to Mr. Mansfield, and I check them with the quantity, and see that the accounts are correct before a fresh supply is obtained.
1037. Have the accounts always been correct? They have always been correct.
1038. What salary do you receive for your services? When I entered I received £300; I am now paid at the rate of £350 a-year.
1039. Have you quarters? No; nothing but my salary.
1040. You do not live in the institution? No.
1041. Is not the whole of the money received for the institution paid into the bank? Yes, every penny.
1042. Are payments made by cheques? Yes.
1043. Signed by the honorary treasurer and secretary? Yes.
1044. *By Mr. Hay*: This money received on account of investment, instead of being paid in to the account of the investment fund in the bank, is paid in to the general fund? There is no separate account kept of the investment fund at the bank.
1045. *By the Chairman*: Still you say you have £1,275 to the credit of the investment fund in the bank? That lies on the general account, though it belongs to the investment fund.
1046. *By Mr. Hay*: I suppose it forms the balance of the general account? Yes, it did at that particular period.
1047. Then apart from the investment fund there is no balance? No.
1048. In fact, your general account is constantly overdrawn? Yes.
1049. And you are working upon the money belonging to the investment fund? Yes; except for a short period at the commencement of the quarter, when we receive a large sum from the Government, and that wipes it off.
1050. *By the Chairman*: The amount you receive from the Government you place in the bank to the general account, but any balance that may be in the bank at the time you consider as belonging to the investment fund? Yes.
1051. Did you ever hear that there was any deficiency in the accounts? No, I never did; but

but I was once asked that question. I believe it was this sum of £741 which was considered to be a deficiency, but to call it so would be a misnomer.

1052. Then there was some talk about a deficiency? I could not reconcile the accounts myself at first, and I believe I was the first to mention it. I believe there was no deficiency, but a wrong statement of account; that this sum was said to be lying at the bank when it was not.

1053. It was drawn out to meet the current expenses? Yes.

1054. There is nothing to shew that? Nothing except these books of the bank.

1055. Then in reality the institution, on the 30th of September, was indebted £2,718 19s. 4d.? Yes.

1056. You are still continuing to make use of the moneys belonging to this fund, for the general purposes of the institution? Yes, as we require it.

1057. There is no separate account kept at all? No.

1058. The only separate account you have is with reference to the farm, the £3,000 debentures, and the £3,075 deposited in the bank? Yes; all the rest is lying in the bank to the general account, or is due by the treasurer to the investment fund.

1059. So that although you have £10,594 6s. 6d. as an investment fund, you have in reality only £3,075? Yes.

1060. That is the only actual sum you have as an investment fund? Yes, that is the position. I may state that in making up the estimate for next year I asked for a larger sum, in order to try to wipe off the debt due to the investment fund, but there has been an increase in the number of inmates to the extent of 150, so that I fear we shall be unable to liquidate that debt, even with the increased sum, though I hope it will be reduced.

1061. I perceive that latterly the number of persons receiving out-door relief has been decreasing? Yes.

1062. *By Mr. Hay:* You have said that the balance due to the investment fund will probably be reduced at the end of the year; do you not think it will be larger than at the end of the last year? I think it will be at least as large.

1063. So that for the last two years, at any rate, the sums applicable for the ordinary uses of the institution would have been insufficient for the purpose? Yes.

1064. You have been enabled to go on only by trenching upon the investment fund? Yes.

1065. As a matter of security for this investment fund, and as a matter of propriety for the accounts, do you not think it would be better if all the moneys received for the investment fund were placed in a separate fund at once? I have always thought so.

1066. *By the Chairman:* Of course you keep separate accounts for the institution in Sydney and for that in Liverpool? No, I do not except for wages.

1067. *By Mr. Hay:* Are you in a position to say whether it is more expensive to support a pauper in the Sydney or in the Liverpool institution? I should say there is very little difference.

1068. As regards the prices of provisions? They are almost the same.

1069. As to the bread? There is a contractor in Liverpool who supplies it at nearly the same price as we pay for it in Sydney.

1070. Is it as good for the money? I do not think so.

1071. The beef? I do not think the beef is equal to what we get in Sydney. I see it only once a quarter, when I visit Liverpool; and as far as I am able to judge, it is not so good.

1072. *By the Chairman:* Will you have the goodness to hand in to the Committee accounts current of the institution for the last three quarters? I will. (*The witness handed in the same. Vide Appendix E.*)

1073. Will you also favour the Committee with the balance sheet for the year 1859, being the year previous to your entry upon office? Yes. (*The witness handed in the same. Vide Appendix F.*) I beg to hand in also a list of salaries and wages for the Sydney establishment; a return of the officers of the Benevolent Society's establishment at Liverpool; a return of assistants receiving gratuities in Sydney; a return of the number of hired wardsmen, inmate wardsmen, &c., in the Liverpool establishment; and a statement of bank account of Benevolent Society, 30th September, 1861. (*The witness handed in the same. Vide Appendices G, H, I, J, K.*)

Mr. Robert
Anderson.

8 Nov., 1861.

APPENDIX.

A.

RETURN of the Annual Receipts and Expenditure, on account of the Benevolent Society of New South Wales, from 1 January, 1840, to 30 September, 1861.
