* The Liverpool Establishment was opened at this period. The decrease occurred in consequence of a number of the men leaving the Asylum rather than go to Liverpool.

† During this quarter 47 children were transferred to the Destitute Children's Asylum at Randwick.

‡ In this quarter the mortality was great, in consequence of the epidemics (fever and measles) prevailing in the Asylum.

WEDNESDAY, 13 NOVEMBER, 1861.

Present:—

Mr. ALEXANDER,	Mr. HOLT,
Mr. HARPUR,	Mr. SADLEIR,
Mr. HAY,	Mr. SUTHERLAND.

J. LUCAS, ESQ., IN THE CHAIR.

Alexander Menzies Brown, Esq., M.D., called in and examined:—

1074. *By the Chairman:* You have been for some time visiting surgeon to the Benevolent Asylum? For the last three years.

1075. You are aware that the committee propose to build a new Asylum? Yes.

1076. I presume that the present site is not at all suitable for that purpose? That is the general opinion, and it is also mine.

1077. Have you seen the proposed site at Randwick? Yes, I have examined the site carefully, and reported upon it.

1078. Have you sent in that report to the committee of the Benevolent Society? Yes.

1079. What is your opinion of the suitability of that site for an Asylum for persons of aged and infirm constitutions? I think it a most eligible site. I have found it suitable for children of tender years and of depraved constitution, and I have no doubt it will be found equally favourable for the old and superannuated.

Alexander
Menzies
Brown, Esq.,
M.D.
13 Nov., 1861.

Alexander
Menzies
Brown, Esq.,
M.D.

13 Nov., 1861.

1080. What would you think of a position upon the Parramatta River, if there were any place in that direction which could be obtained? I have been up the Parramatta River only once, and I cannot therefore speak from experience of its fitness.

1081. Of course if the institution were removed out of town it would necessitate the establishment of a depôt in Sydney? Yes, unavoidably.

1082. What is the greatest objection to the present building? Its closeness to the burial ground is, I believe, the greatest objection, but the building is in every respect unsuitable; it is too small and too old; to make it tenable would cost almost as much as to erect a new building.

1083. Are the rooms generally too low? They are too low, and much too small for the number of inmates we are obliged to accommodate.

1084. Are they badly ventilated? Badly ventilated.

1085. Are there not a number of females in the institution at present, who have gone there for the purpose of being confined? Yes.

1086. Do you think the Asylum at all suitable for that purpose? I think such establishments ought to be distinct; and such was the original intention I believe.

1087. Of course, under ordinary circumstances, it would be inconvenient to have an establishment for that purpose so far away as Randwick? Exceedingly; it would not answer the purpose.

1088. If the institution were established at Randwick, would not that necessitate the erection of a separate establishment as a lying-in hospital? In the city.

1089. In going through the Sydney Asylum recently, the Committee found in one ward thirty-six women, the mothers of thirty-six children, and some thirty or thirty-two aged and infirm females; do you not think it injurious to the health of the young that they should breathe the same air with the aged and infirm? It must be very prejudicial, but under present circumstances it is unavoidable.

1090. In consequence of there being no establishment for this class? Not a suitable one.

1091. I find, from a return of the number of deaths in that institution, that during the month of June, 1860, there were as many as fifty-six deaths; how do you account for that large mortality—in December it fell as low as five? I suspect that must have been in consequence of measles. We had a great number of deaths from that disease in the city.

1092. In the city generally as well as in the institution? In the city generally we had a number of deaths from that cause, among the young and tender.

1093. In the month of July I see there were twenty-seven deaths—was that in consequence of disease being prevalent in the institution? Influenza among the aged carried off a number; and measles also carried off a considerable number of the young. I forget the exact number of deaths from measles, but the disease was of a very malignant character.

1094. In consequence of the great number of aged persons in the institution the mortality would naturally be greater than in the city generally? At that time there were too many children crowded into one apartment; since then they have been removed. There has been a draft to the Destitute Children's Asylum of, I think, fifty.

1095. You have a great number of children from the age of twelve months and upwards still in the institution? Yes.

1096. Do you think it would be a great advantage to the children if they were removed from the Asylum to some other institution? A great advantage. About a year ago there was a draft of fifty sent to Randwick.

1097. There are still a great number left? There are more there now than there is accommodation for.

1098. There is a resident surgeon at the Sydney Asylum? Yes.

1099. Have you ever visited the Liverpool institution? No.

1100. Do you think it an advantage to have separate buildings for males and females? It may be an advantage to have two separate buildings, but I do not see what is gained by having two separate institutions.

1101. You think there might be two separate buildings managed by the same Board? Yes.

1102. In the same way as at present the one at Sydney and that in Liverpool are managed by one Board? I presume that might be easily done, and with advantage too.

1103. I see, from the return of the deaths, that in the year 1860 there were as many as 195 deaths in the institution, and by a comparison with previous years that is a very high rate—was that a very unhealthy year? A very unhealthy year; we must have lost some thirty or more—I forget the exact number—from measles alone.

1104. Taking the number of 195 out of the total of inmates, which in the two institutions is about 700, is not that a very large mortality? The mortality is very great.

1105. One fourth? I think you will find the mortality was very great in the city in that year in consequence of malignant epidemics.

1106. Do you think the site selected at Randwick is very desirable in consequence of its suitability to persons of aged and infirm constitution? I think so.

1107. *By Mr. Hay:* You seem to think there will be no necessity for having two institutions at a distance apart for the male and female inmates? That is not generally considered necessary in such establishments; they are more easily managed within one wall than when they are thirty or forty miles apart.

1108. Of course it would be more economical to manage them as one, and you do not think there is any objection to countervail that economy? No, I cannot see any.

1109. You would have separate buildings? Separate buildings, in order to keep the sexes separate.

1110. You think one institution at Randwick would be sufficient to meet all the requirements of the destitute? For the accommodation of all the inmates of both establishments.

1111. Have you ever gone over the land which was proposed to be devoted to the purpose of a cemetery

cemetery near Sydney, and on the Randwick Road? Between Randwick and Sydney; I know the situation very well; it is on the right hand side of the road going from Sydney, before you arrive at the Racecourse.

1112. Do you think that would be a suitable locality for an Asylum? I do not know where they could find a flat sufficiently extensive for an establishment of that kind.

1113. You think the sand-hills too abrupt there? I do not think it would be so suitable as the site now proposed at Randwick.

1114. The removal of the establishment to Randwick would entail the necessity of having an establishment in Sydney for the reception of the sick and for the purpose of administering out-door relief? I should imagine such an establishment would be indispensable.

1115. *By Mr. Alexander:* If there were a large building put up at Randwick, sufficient for the classification of the patients, do you not think that would be a great advantage in promoting the object of the institution? It would be very great.

1116. If the situation should be too exposed, is it not your opinion that a large building, such as that contemplated, would afford a screen or shelter to the aged and infirm? Yes, and I think that would be quite sufficient.

1117. Allowing even that the situation were ever so exposed? In this case the site is only exposed to the south, and it is sheltered even from the south by a ridge of hills; it is immediately behind Randwick, in the hollow. I understand the supply of water is good, and it has many advantages.

1118. Do you think, supposing the institution were still obliged to receive *enceinte* women, there could be any objection to their going to Randwick? I think that would not be desirable; I think the building is even now too far away, that it ought to be in a more central position.

1119. As a lying-in hospital? Yes, sometimes women give birth to children before they can be brought in to the Asylum.

1120. Sometimes they are two or three months in the institution before they are ready to be confined? Yes. I think it is objectionable to have such an establishment as a department in the Asylum.

1121. *By Mr. Hay:* You would not, in the erection of a new building, contemplate that it should answer that purpose? No.

1122. *By Mr. Harpur:* Do you not think it desirable that a large space of garden ground should be attached to an institution of the kind, for the purpose of employing the inmates, and of giving them access to a garden? I should imagine that that would be very essential.

1123. Are you aware that they have not access to the garden in any way at present? I am not certain; I understand that they are supplied with vegetables from the garden.

1124. Are you connected with the institution? I have been for the last three years.

1125. Are you aware that the inmates are kept in a yard, in a state of compulsory idleness? Are you speaking of Liverpool?

1126. Of both institutions? I have not visited Liverpool, but probably it is too much the case in both places.

1127. Do you not think it is desirable that some employment should be given to these people? There are a number of young women who might be able to do something.

1128. Is it not both morally and physically injurious to these people to keep them in this state of idleness? Yes.

1129. Do you not think this compulsory idleness must have an injurious effect upon the physical health of these people? If not injurious, at all events it is not necessary that they should be idle.

1130. It is said to be a great torture in a prison, for instance, and I should think it could scarcely have any other effect in a Benevolent Asylum? I imagine that the people talk to each other, and employ themselves in various ways.

1131. You are aware that the aged inmates belong chiefly to a class who from early life have in the habit of smoking? Yes.

1132. I believe they have only a small quantity of tobacco allowed them? I know that they are supplied with tobacco.

1133. A small quantity, but they are not allowed to supplement that quantity or to obtain a larger supply by work? I know a great many do smoke, and that it is not objected to.

1134. It was a general complaint at Liverpool, that the men had not a sufficient supply of tobacco, and they stated that they were very willing to work for it—I presume you are not a smoker, but you must have observed that it is a great punishment to those who have been long in the habit of smoking to be short of tobacco? Yes, I imagine it must be.

1135. Especially in the case of old people in such circumstances as these? Yes. I have never understood that they were denied their tobacco in Sydney; of the Liverpool establishment I cannot speak.

1136. Do you not think it would be an advantage to them, not only in point of health, but of its moral operation, if they were allowed to do any little work which would enable them to obtain a supply of tobacco? I should not object to that.

1137. Do you not think it would have a beneficial effect in training and disciplining their minds, if they found they must work in order to obtain the means of gratifying their proper desires? I think many might be employed who are now idle.

1138. Do you not think a garden would be a means of giving them light employment? Yes; I should imagine it would.

1139. And that access to the garden would also have a cheering effect upon the mind—would it not be much better than to confine them to a prison-like yard? They ought to have access to a garden or recreation ground, and some might be employed in cultivation.

Alexander
Menzies
Brown, Esq.,
M.D.

13 Nov., 1861.

- Alexander
Menziés
Brown, Esq.,
M.D.
13 Nov., 1861.
1140. *By Mr. Holt:* To what do you attribute the great mortality in the year 1860—was it chiefly owing to a great number having been crowded into a small space, to a want of fresh air, or to natural causes? Partly to those causes; but the mortality was very great in the city in that year. The influenza and measles carried off a great many.
1141. I am aware that the general mortality was very great; but the number of deaths in the Asylum were out of proportion to those which occurred in the city? The imperfect ventilation and crowded state of the building were unavoidable.
1142. But the great increase of mortality in the Benevolent Asylum, over the increase in the general population, was attributable to those causes? Partly to those causes. The disease was much more malignant than that prevailing in the city, but the mortality was great.
1143. Which was in consequence of those causes? Yes.
1144. You have given it as your opinion that it would be beneficial, in a sanitary point of view, if the inmates of the Asylum were to have access to the garden? Yes, besides giving them employment.
1145. Are there many able-bodied persons in the Asylum—that is, persons who are able to do light work in the garden, such as weeding? Many of the young females, within two or three months of their confinement, are in a state that would enable them to do work of any kind.
1146. Are they not employed? I believe the young women are employed, but not so regularly as they ought to be, in laundry duties. I understand that they are liable to be called upon to do duties of that sort.
1147. They have no regular employment? No; only occasional.
1148. Do you not think these young women acquire idle habits by this compulsory idleness, as Mr. Harpur terms it—If persons confined in an establishment of this kind are not allowed to work, does it not unfit them for future service? It ought to exercise an influence of that sort.
1149. Must it not necessarily have that effect? I should imagine so.
1150. Do they grow their own vegetables at the Benevolent Asylum? They have a garden for that purpose; and I understand the establishment is supplied from the garden.
1151. They do not purchase any vegetables? I am not aware of that.
1152. Would it not be beneficial if the old men were employed in working in the garden, in growing vegetables? Those who are able; very few of the aged are fit to move about; many are confined to bed—bed-ridden.
1153. I do not know the ages of the paupers in the Asylum, but many are able to work—a large per centage? They would be able to do something.
1154. Light work, such as digging in the garden or weeding? Weeding they might; there are no able-bodied men in the Sydney Asylum.
1155. *By the Chairman:* The Committee found, in going through the institution, that the itch was among the children—that there was scarcely a child who was not troubled with it; and the nurse told us that it had been more or less in the establishment for two years? I am not aware that that is the case; some two years ago we had itch raging in the establishment, from the inattention of the resident officer. Even the honorary physicians were ignorant of the fact till they discovered it by personal observation.
1156. Almost every child in the institution is troubled with it, more or less? I know everything was done to remove it, but it is possible a few among them may be affected, more or less. I have examined them within the last few months, and I think there were some thus affected at that time. They were separated, and submitted to various modes of treatment.
1157. In examining the wardswoman in the children's ward we found that all the children were washed in a large tub, and in the same water; I presume if that is the course adopted the itch is not likely to be driven out of the institution? That would not hasten its removal certainly. There is plenty of water there, and the bath is large enough.
1158. *By Mr. Hay:* A bath with a cock would be most suitable? It is supplied in that way.
1159. *By the Chairman:* The wardswoman, in answer to a question of mine as to how often the water was changed, stated that the whole of the children were washed in the same water, as, in consequence of her having no assistance, it was impossible to bring sufficient water up-stairs to allow of her changing it. If that is the course pursued I presume it is not likely that the itch will be got out of the institution? It is highly improbable, if that is the fact.

William Bland, Esq., called in and examined:—

- William
Bland, Esq.
13 Nov., 1861.
1160. *By the Chairman:* You have been many years visiting surgeon to the Benevolent Asylum? Yes, upwards of forty years.
1161. Ever since its first establishment? From its first establishment.
1162. You are aware that the committee have in contemplation the erection of a new building? Yes.
1163. You have heard, I presume, that they have selected a piece of ground at Randwick, near the Destitute Children's Institution? Yes, on the south side of the road. (*The witness referred to a map shewing the proposed site.*)
1164. Do you approve of that site for persons of aged and infirm constitutions? I think, with a little arrangement, it might be made very good indeed—an arrangement that would be very easily accomplished.

1165.

1165. Will you oblige the Committee by describing the arrangement you would suggest? The wind you have to dread is the south, or more particularly, the south-west.

1166. There is a range of hills which protects the site from the westerly winds, but it is open to the south? Old people and children cannot bear intense cold—that is to them exceedingly offensive and injurious; but it would be an easy matter to obviate that objection, if it were not thought too expensive—by raising a wall some ten to twelve feet high, to protect them from exposure to the south, and to the west, if the range of hills does not extend far enough to effect that purpose. In that way the aged inmates could have a “constitution” walk, as well protected as they could require.

1167. Might not that be effected by planting trees? Yes, but not so well, though I think both the wall and the proposed plantation might, with a little care, be had recourse to with great advantage; the one as a protection from the wind, the other from the sun.

1168. The present institution is not at all calculated for the number of applicants? No, not unless you greatly increase the buildings; it is crowded. There is one remark I would make, if I may be permitted to do so—you may remove to this spot, it may be very healthy, and may answer every purpose you desire, but if anybody, or any number of persons, were to be allowed to convert the land in the neighbourhood into a burial ground, the case would be quite altered, the evil being greatly enhanced by the sandy character of the soil. We have a cemetery, also in a somewhat sandy soil, at the back of the present Asylum,* and it is the most offensive thing that could possibly be. I have observed, both early and late, more particularly when there has been a little dew falling, the offensive smell from it, as far away as Campbell-street, which is some hundred yards from the burial ground, and the malaria would reach even beyond that.

1169. *By Mr. Sadleir*: Particularly after rains? After rain or after the falling of the dew, though I question much whether the malaria from such a cause is not equally injurious and dangerous, even when it, from some peculiar state of the air, ceases to be perceptible to the smell.

1170. *By Mr. Holt*: Do you not think for aged persons it would be desirable to have a site more inland, rather than close to the sea; for instance, some place along the line of the railroad, to which they could have been conveyed more cheaply? Where would you propose?

1171. I would not propose any particular spot—say Petersham or Newtown,—I ask the question whether, in a sanitary point of view, it would not be beneficial to the health of aged persons to be more inland rather than so near the sea? The only objection is the exposure to southerly winds; the proposed site is a considerable height above the ocean, and at a tolerably fair distance from it, and I should not therefore object to it as being near the sea. One advantage would be lost by having the building away from town—the supervision of the public eye. As to the healthiness of the site, the site upon which the Asylum now stands was, within my recollection, perfectly healthy; nothing could be more healthy than the south end of the town, till the shambles and the cemetery were established there, together with other objectionable matters which sprung up by degrees afterwards.

1172. *By the Chairman*: A great number of females go to the present institution for the purpose of being confined—do you not think there ought to be a separate institution for that class of paupers? That would, I think, be a question of convenience rather than one of a sanitary bearing.

1173. In a sanitary point of view would it not be better to have the institutions separate? If the wards were sufficiently extensive to receive them, and there were a fair share of air for every patient, I do not think there would be much objection to these cases being received. The importance of good ventilation is now only beginning to be clearly understood. In the airing Dr. Dick informs me that a space containing 600 cubic feet of air is allowed to each man in barracks, and double this space, or 1,200 cubic feet, in hospital, but even that would not be sufficient unless due attention were paid to ventilation.

1174. The Committee found in one ward thirty-six children with their thirty-six mothers, and thirty or thirty-two aged and infirm females? There is not a ward in the establishment that could bear that number without the most destructive consequences.

1175. Do you not think it very objectionable to have infants and very aged persons in one ward, breathing the same air? I do not know as to the breathing of the same air, so that the supply of fresh air was sufficient, but it may be distressing to aged persons to be disturbed by children.

1176. Do you not think it likely to affect the health of the children? I think the crowded state of the ward must be very injurious, and whatever space you may have, without careful attention to ventilation there can be no safety. There is an extraordinary neglect as regards the ventilation of public buildings in this country, and I believe also in England, but in England they are now beginning to do something.

George Walker, Esq., M.D., called in and examined:—

1177. *By the Chairman*: You have been for some time visiting surgeon to the Benevolent Asylum? For the last eighteen months I have been one of the visiting physicians.

1178. You are aware that the committee propose building a new institution, and that they have selected a site near Randwick? Yes; I know the site.

1179.

William
Bland, Esq.

13 Nov., 1861.

George
Walker, Esq.,
M.D.

13 Nov., 1861.

* *Revised*:—And which is accompanied with many of the offensive and injurious consequences that might be expected from such a cause.

George Walker, Esq., M.D.
13 Nov., 1861.

1179. Do you think it is suitable for persons of aged and infirm constitutions? I see no objection to making use of the proposed site; but I heard one of the gentlemen of the Committee ask Dr. Bland a question which has rather led me to alter my mind upon the matter. I think it desirable, if the establishment be removed out of town, that it should go more inland—to Burwood or Canterbury.

1180. What is your opinion of the Parramatta River? I know that to be very healthy, because I lived there for some time.

1181. If the institution were removed out of Sydney, of course it would involve the necessity of having a depôt in town? No doubt.

1182. Supposing the institution were on the Parramatta River, and a depôt were established in Sydney, would it not be convenient to have a boat for the purpose of conveying stores and persons desirous of being admitted to the institution? I think it would be desirable to keep away from the water on all occasions, even travelling occasions; near the railway would I think be better.

1183. Generally when you get near the water, drainage is easy? I think, looking to the class of people who are inmates—the aged and infirm—it would be desirable to keep away from moist air.*

1184. That would be one of the chief reasons why the proposed site at Randwick should not be adopted? I should prefer the neighbourhood of Burwood or Canterbury.

1185. Or Petersham? Or Petersham; anywhere inland.

1186. Then if a depôt were established in Sydney, would it not be desirable that it should be erected on a portion of the ground occupied by the present building, that being so convenient to the railway terminus at Redfern? I think a very small depôt would be required. I do not suppose there would be a dozen inmates at one time waiting for transmission.

1187. A depôt would be required for the purpose of relieving the temporary wants of these people—for the distribution of out-door relief? Yes, an office.

1188. A great number of persons receive out-door relief; I think in one month the number amounted to 2,800? Yes.

1189. Of course it would be necessary to have a depôt for that purpose? That could and should be under the supervision of a mendicity officer, the same as in London.

1190. What is your opinion of the site of the present building? The sooner the building is burned down the better; it is the most unhealthy place I have ever been in of the kind, and I have been in a great many.

1191. Is it very much overcrowded? Very much overcrowded; and if it were not for the extreme attention of the house surgeon and the other officers it would cost more for coffins than the place is worth.

1192. Were you visiting physician in the institution at the time of the great mortality there? In 1860?

1193. In 1860? I was; when the measles and influenza broke out.

1194. I see from the returns that during the year 1860 there were 195 deaths, and in one month 56? I can account for the mortality, as, in consequence of the nearness of my residence to the Benevolent Asylum, I was enabled to visit that institution more frequently than the other medical gentlemen of the establishment, and was there frequently three times in a day. In one ward there were eighty children lying on the floor with measles. A great deal of the mortality was attributable to the bad constitutions and probably vicious habits of the parents; a great deal was no doubt also attributable to the want of proper ventilation, and at the time there was no resident surgeon. Dr. Aitken was doing the duty. The mortality was very great, but it was very great in private practice also, not only among children, but among aged people, who were attacked by influenza, which at that time was raging. I may however state that the return of the mortality in the Asylum is not a fair return of the Asylum mortality, as I have known people to be brought to the steps of the institution, and to die before they could be carried in. These have all been entered as died in the institution.

1195. Cases of that kind have not been confined to this one year, but may occur in any year? No doubt.

1196. *By Mr. Sadleir*: The mere removal of an infirm old man often kills him? Yes, very often. It doubtless would do so in a very infirm patient. We have had many sad examples.

1197. *By the Chairman*: You are aware that the itch is in the institution? I am not aware that it is there now. I believe itch has been banished ever since the present resident surgeon has been in charge. I have asked him particularly to examine the patients for this disease. I have not seen a case of itch in the establishment for three months, and I have visited it four times a week.

1198. Do you examine the children very often? I do.

1199. It has been stated in evidence that a large tub is filled full of water, and that the whole of the children are washed in the same water? I was not aware of that. I believe that there is a cock over the cask, and that the water has only to be turned on to obtain an abundant supply.

1200. The water is not laid on in the children's ward? I think it is; it is laid on on the landing, and I was under the impression that it was laid on there.

1201. That arrangement of washing all the children in the same water is not a very good one? Certainly not; cleanliness is next to godliness.†

1202.

* *On revision*:—Drainage is always easily managed from an institution erected on elevated ground.

† *On revision*:—This is not a fair question to put to a medical officer who works for the institution night and day gratuitously.

1202. *By Mr. Alexander*: Have you not often attended the meeting of the committee? I have attended several times. I have not been a regular attendant, because I do not feel called upon, as we, the honorary medical officers, are to give up a great deal of our time to the institution in the performance of our professional services. George Walker, Esq.
M.D.
1203. Most of the gentlemen of the committee pay a great deal of attention to the requirements of the institution? Some of the committee do, but not professionally, or in their medical capacity. 13 Nov., 1861.
1204. You have been sometimes to the meetings? I have been frequently.
1205. Have you known many of the persons who have applied for out-door relief? I have been complimented by the committee upon knowing all the blackguards in the city. I have been much amongst the poor, and consequently know those who poach upon charity.
1206. What is the course the committee generally take in those cases? You mean with reference to bestowing out-door relief?
1207. Yes? In most cases the applicant brings a letter from a clergyman, or from some respectable party; or perhaps a member of the committee is aware of the circumstances of the case. In many cases the applicants are refused, being known as drunkards or disreputable characters; but I consider that that part or portion of the charity is excessively abused. I have many patients in the neighbourhood, who keep public-houses, and I have heard from them that, in many cases, when parties draw their rations from the Asylum, the first thing they do is to step into a grog-shop and seek to barter them for drink.
1208. Have you given this information to the committee? Yes; I have mentioned it.
1209. What is the course the committee have taken? They have been very guarded in dispensing this charity, but it is very difficult to bring information of this kind to bear upon individual cases. So far as the committee are concerned they are perfectly blameless.
1210. You do not think they can exercise greater discretion? They exercise the greatest discretion.
1211. What objection have you to the site at Randwick? To its being too near the water, and the bleak winds coming over the swamps I think would be detrimental. Another reason for preferring an inland situation is the great advantage I have known to be derived in many cases of chest disease by persons going inland.
1212. Do you not think if an extensive stone building were erected, or if the site were planted with trees, your chief objection to Randwick would be removed? I look at the question from many points of view, and I think it would be more difficult of access than Burwood or Ashfield; provisions could be sent to either of the latter places more easily; the land is also better, and a better garden could be had, more vegetables could be grown, and the health of the patients would be much improved by a more liberal vegetable diet.
1213. You are aware that, as far as the garden is concerned, they are able to grow scarcely anything at the present place? Yes; I believe some beans have been put in, but* they have never come up. They can grow nothing but pumpkins—so I am told.
1214. Are you not aware that the burial-ground at Randwick is not much used? I am not aware of that fact; but I believe the other is still very much used, and I consider it a perfect pestilence.†
1215. *By Mr. Holt*: At the Benevolent Asylum? Yes. The sandy soil is a perfect filter for the juices of putrifying corpses; and during wet weather, the land of the cemetery being rather higher than that on which the Asylum stands, the water filtrates through, and washes portions of the decomposed bodies down to the Asylum. When I first visited there I found that after rain the place beneath was flooded, and the cook told me that it took a man all day to bale out the place; that he baled out 250 buckets of water. At length a representation was made to the committee, who ordered Mr. Mansfield to have a drain made to conduct the water away, and the place has been better since; but before that there was a well in the kitchen into which this water ran, and the smell arising from it was most offensive—most horrible. On one occasion I had to report to the committee upon the state of ventilation of the little room over the dispensary, used as a ward for the sick children. I believe it was a subject of remark when this Committee visited the institution, and I may state that the closeness they observed was not caused by want of cleanliness, nor of sufficient ventilation, but by the smell from the cemetery and from the water-closets in the rear. The room is well ventilated, is about 16 feet by 23 feet, contains four large windows, and has a deep air shaft or staircase communicating with it. (*The witness handed in the report. Vide Appendix A.*)
1216. You say that Petersham or Burwood would be a better site than Randwick—what are the grounds of that opinion? I cannot give you a better illustration of the good effect of removing the institution than Tarban Creek. Look at the health of the people there—and there are a good many aged people there—they have no bronchial diseases, no winter coughs. I ought to speak with some degree of confidence with reference to that site, for I was there fifteen months as assistant surgeon.
1217. You might not be able to get so good a site as Tarban Creek? I think Petersham or Burwood better adapted for aged people or young children who require very great care.‡
1218. How do you account for the good health of the children who are now at Randwick? They are certified to be free from disease before they are admitted to the place. In Sydney people

On revision:—They never came up, to my knowledge; but this is hearsay, as I am no gardener.

† *On revision*:—If the Government requests a statue of immortality let it close the city graveyards.

‡ *On revision*:—I do not possess an inch of land in the Colony, and can have no object in misleading you.

George
Walker, Esq.,
M.D.
18 Nov., 1861.

people come into the institution saturated, I may say, with disease, with broken-down constitutions, the result of different forms of vice—syphilis and many other diseases have to be contended with. Dr. Brown, the medical officer at the Destitute Children's Asylum, does not allow a single child to be admitted unless it is certified to be free from every sort of taint; and then the excellent ventilation and treatment the children have is sufficient to keep them in good health.

1219. Your only objection to the site at Randwick is its exposure to the south-west wind? And to the north-east wind also, which is a very trying one.

1220. Do you not think the shelter the inmates would receive from the building itself would be of very great value? Yes, but it would be a very long time before trees would attain a sufficient growth to afford much shelter.

1221. *By Mr. Harpur*: You are the medical visitor? Yes.

1222. Do you receive any stipend? No; the honorary medical officers visit gratuitously night and day, if called upon.

1223. Are you aware under whose care the children are placed, especially in the hospital—are there not mistresses in the schools? There are schools both for the Protestants and the Roman Catholics, and I presume the mistresses of those schools are the guardians of the children for the time being, but the whole of the sanitary arrangements of the establishment are under the resident medical officer.

1224. Then with reference to the health of the children, would you make inquiry of the schoolmistress? No; of the doctor.*

1225. It would not be the duty of the schoolmistress, or of any other person in charge, to report to you the existence of itch among the children? I go into the schools and see the children.†

1226. The schoolmistress has never reported to you on any occasion that the children have the itch? I have seen the itch, I may say in the most loathsome form, among them, but not lately; in fact, it was so bad in the institution that both the master and matron were affected by it.

1227. I suppose you are not aware that the schoolmistress exhibited to the Committee some of the children who were in a very bad state? Not from the itch, I am perfectly sure; they are suffering from a skin disease, but it is not the itch; it is a kind of scab, a form of ring-worm or porrigo. It is in a very great measure owing to tainted constitution, but probably it is aggravated by a want of sufficient vegetable food.

1228. Of course I shall not presume to dispute with you upon a professional question; I am only using the name given to the disease by the schoolmistress? Of course she is not a professional person; I know that there is a good deal of skin disease among the children, but it is not the itch, and is not infectious.

1229. *By Mr. Sadleir*: What is done with the children's clothing—do they continue to wear the clothing in which they are admitted, or is it taken off when they enter, and washed? I do not know; the proper person to ask that question would be the master or resident surgeon; I cannot be there for ever. I think there is a suit of clothes provided for each of the children, but I do not know that of my own knowledge; I believe the disease was communicated, in the first instance, in consequence of the extreme neglect of the resident medical officer, who did not obey the orders of the honorary visiting medical officers. Dr. Burgon was one who told him to keep the children, who were affected by the disease, secluded from the others, but he allowed them all to mix together, and the consequence was that the disease became fearful, and caused a great deal of trouble.

1230. As the institution is so much crowded, do you think it would be desirable to put up a temporary wooden building, as is sometimes done in similar institutions at Home? It is really a very difficult question to answer—there are so many things to be done; but I prefer not to spend a sixpence upon the present building in Sydney. I think a lying-in institution ought to be quite separate. There is a building opposite my residence—the old Sugar Works in Liverpool-street—which might easily be converted into a lying-in institution *pro. tem.* The objection to having two buildings is on the score of economy, that it would necessitate two sets of officers; but I think this might be managed with the present officers.

1231. My idea was, that a temporary building might be put up for two or three hundred pounds, in which the sick might be placed, to separate them from the other inmates? There is very little sickness.

1232. *By Mr. Holt*: My question as to the site at Randwick chiefly had reference to whether you did not consider that for aged persons sea air is very injurious? The best way in which I can answer your question is by giving an illustration:—If I were attending a person having a delicate chest I should not recommend him to go to Manly Beach, but to Burwood, or some inland place; I think the air at Randwick is too keen—too much charged with moisture.

1233. For a permanent institution you would think it desirable and advantageous to go inland? Yes, but not too far.

1234. Would Liverpool be too far? I have never been there, but I think it is too far.

1235. What is your opinion of Newtown or Petersham? I would prefer going a little further; at Burwood or Canterbury the scenery is more beautiful, and that would be an advantage.

1236.

* *On revision*:—I never obtain my professional information from nurses.

† *On revision*:—In professional matters I only recognize the resident medical officer, and to ask information from any other person, would be, in my opinion, an insult to him. He is a gentleman, and ought to be acknowledged as such.

1236. Are you aware that the people are not allowed to work in the Asylum? I know they are not compelled to work, but I am not aware that they are prevented from working. Very few of the people in the Sydney Asylum are competent; they are nearly all paralysed; there are only three or four who are able, and I think one of them is employed at the gate, and the others assist in various ways. There are several young women who might be advantageously employed in making clothing for the inmates.
1237. Do you not think some of the patients might be employed in the garden, in weeding and other light work? The class of people generally in the Asylum are the paralysed, the imbecile, fatuous, or insane. That is another point; there ought to be a ward for insane people.
1238. Are there insane people in the Asylum? Yes.
1239. Only temporarily? Yes; but one insane person in a ward will keep the whole of the inmates awake all night, besides the danger.
1240. You think one great cause of disease is the want of vegetables? Yes. I do not find fault with the dietary scale, but it should be more varied; at present all the food is boiled, and the cooking arrangements could not be altered in that institution without the outlay of a great deal of money; but if there were a new building erected, it would be desirable to have proper cooking apparatus for baking as well as for boiling; there should be attached to it a good garden, in which enough vegetables might be grown for the wants of the institution; there might also be a piggery, where the refuse would be eaten up—and there is an immense deal of refuse—and the manure would be of great value to the garden. By these means the health of the patients would be very much improved. There would be this one advantage in erecting a building on the banks of the Parramatta River, that the air is not too bleak, and the children would have the benefit of salt water bathing, which would be of great service to those who were suffering from wasting disease.
1241. Do you not think fresh water bathing would be more beneficial? I think, for medical purposes, salt water is the best.
1242. *By Mr. Hay:* You would not necessarily select the same situation for boys and girls that you would for aged people? I think they could all be under one establishment.
1243. Would not a cold harsh breeze that would be health to a lively, vigorous boy or girl, be death to an aged person? Yes; it would pinch them to death.

George Walker, Esq.,
M.D.
13 Nov., 1861.

ADDENDUM.

Suggestions.—Close the cemeteries immediately, and begin a new building as soon as possible, after having well considered the probable site. The cemeteries in the neighbourhood of the present Sydney Asylum are a disgrace to humanity, and a source of pestilence to the city.

A smaller committee of management, principally under the superintendence of the Government; allowing one clergyman of each denomination to sit as director, and one or two resident laymen as associates; the medical men to be *ex officio* members of committee; the Registrar General and Health Officer to be members and directors by right.

Pay a good stipend to the resident medical officer, and make him absolute and chief superintendent, subject to control of the Government, the board of directors, and the medical officers.

The introduction of magisterial authority and discipline are advisable.

The removal of the establishment from the city is absolutely needed. It is useless to try and effect a reform in abandoned characters, whose first introduction to the garden of the Asylum would be a present of a gin-bottle over the fence.

Good salaries for all officers occupying positions of trust; the work is heavy, and the responsibility considerable.

I beg to suggest the examination of Dr. Campbell, Superintendent of Tarban Creek Lunatic Asylum, as to the proposed site. From his position as a Government officer and former physician of your Asylum, from his position as an erudite scholar, and from his published essays on "Climatology and the Winds of the Colony," his information would, in my opinion, be valuable.

APPENDIX.

453, Pitt-street South,
Sydney, 8 February, 1861.

Sir,

With reference to a minute of Committee received by me, respecting some fault in the ventilation of the nursery of your Asylum, I beg to state that the said nursery measures about 16 feet by 23 feet, contains four large windows, and has a deep air-shaft or staircase communicating with it. The inmates at present are not numerous, and are frequently reduced to four in number. No death has occurred in this ward during the last ten weeks; and I am satisfied that the noisome smell complained of has its origin in the laundry or "smoky hay," and in the adjacent cemetery.

I am convinced that the matter of ventilation cannot be left in the hands of a more competent gentleman than our present house surgeon. He suggests, and the idea is a good one, that the gratings be transferred from the interior to external apertures of the ventilators of the wards. It is extremely desirable that a more commodious and healthy ward should be apportioned to the suckling women. I am persuaded that the infantine mortality would be largely diminished if No. 2 ward was appropriated for this purpose. It is advisable too, that some cooking apparatus especially devoted to the preparation of infants' food be provided.

The Hon. G. Allen, M.L.C.

I am, &c.,
GEO. WALKER, M.D.

Joseph Burgon, Esq., called in and examined:—

1244. *By the Chairman:* You have been for some time visiting surgeon at the Benevolent Asylum? Yes; upwards of seven years.
1245. Will you look at that plan (*referring to a plan shewing the proposed site for a new Benevolent Asylum*)? I know the locality.
1246. You are aware that the committee are about to build a new establishment? So I have heard.

Joseph Burgon, Esq.
13 Nov., 1861.

Joseph
Burgon, Esq.
13 Nov., 1861.

1247. Have you examined the proposed site? I have.

1248. Do you think it suitable for aged and infirm constitutions? The only objection I have to it, as I reported to the committee at the time I examined it, is its exposure to the south, which renders it, in that respect, unfitted to aged people.

1249. Have you found, in attending the present establishment, that a severe change of weather, after a hot to a southerly wind, seriously affects a number of the inmates? Materially. After a southerly wind we have more deaths among the aged and infirm than at any other time; it was that which induced me to report as I did.

1250. You reported unfavourably as to the site? Not unfavourably as to the site; the question was not whether this was the best of several sites, but whether it was suited to the purpose?

1251. As you find the southerly wind has an injurious effect upon the inmates of the present building, do you think if the establishment were removed to the proposed site at Randwick it would be equally injurious? I think it would be injurious to aged people.

1252. You heard the evidence that was given by the last witness—are you of his opinion, that it would be advisable to erect an institution inland? I can only give an opinion if you point out the site.

1253. At Petersham? There are many parts at Petersham that would be eligible; many that would be ineligible.

1254. Burwood? Many parts of Burwood would be good, and many bad.

1255. What would you think of Ashfield? At Ashfield, as you get higher up, more along the Liverpool Road, I think a good site might be found for an Asylum of the kind, not too low down—not too near the water.

1256. You think a site might be found along the Liverpool Road? Yes; but I could not give an opinion without you gave me the particular site.

1257. You would like a high situation? Decidedly.

1258. You think many sites might be found along the line of railway running through Petersham, Ashfield, and Burwood? Yes.

1259. Do you think more eligible sites than the proposed site at Randwick? That is a simple matter of comparison; if you point out the site you propose I shall be able to express an opinion.

1260. Upon any high lands in the localities you have named? Provided you had a place sufficiently high to get out of the damp atmosphere, and were secure from the southerly winds, I should say it was more eligible, decidedly. You find a marked difference as you get in the lower ground; you get warmer, instead of colder, as you ascend.

1261. There were a great number of deaths in the Sydney Asylum in 1860; I find that in that year there were as many as 195; something like a fourth of the inmates? There were a great many deaths in that year, and there were many causes for it.

1262. I believe there was also great mortality in the city? There was great mortality in the city, in private practice; larger I believe than in any previous year in the city.

1263. Measles raged at that time? Yes.

1264. And scarlatina? Not scarlatina. Influenza and measles were coincident, and we had scarlet fever two months afterwards.

1265. What is your opinion of the present site? I think it has been made bad; the site in itself is good enough. Any site you may select, however good, will be made bad, if you allow it to be surrounded with nuisances.

1266. Are you aware whether the itch is in the institution? I think there are a few cases; if I were to say seven I should be outside the number.

1267. You know that there are a few? Yes. I may state, as I heard the question put to one of the medical gentlemen who were examined, that one of the chief causes of the continuance of the itch in the Asylum is that the clothing is not destroyed. They will not part with the few rags brought in by the children, as there is no clothing provided for them; and as you are aware we cannot compel, we can only advise. The clothing ought to be destroyed in all such cases.

1268. Are you aware that the whole of the children are washed in the same water? I heard the question asked of a previous witness, and I may state that there is a tap for the water to come into the bath.

1269. Not into the bath in the children's room? No, but to the bath in the passage; therefore the statement that all the water has to be carried upstairs is not true.

1270. Do you think it desirable that so many children should be washed in the same water? No, but I see no reason why they must be; there is a plentiful supply of water, and it has only to be conveyed from the passage to the children's ward.

1271. While that system is pursued of bathing all the children in the same water, is it possible to expel the disease from the institution? I do not think bathing would have the slightest influence in that respect. The itch insect will not come out on the application of water; it will remain in its hole in the skin. I think it depends more upon the clothing; the insects remain in the old clothing, and are thus communicated from one to another.

1272. I suppose the present building is not at all suitable for the number of inmates? It is very much too small; we are obliged either to admit or to refuse applicants; we cannot refuse them, as there is no other place for their reception; and if we admit them we are over-crowded.

1273. Are the wards too low and badly ventilated? I have seen many similar buildings worse ventilated; I think everything we can do is done; we cannot build palaces for these people; we do all we can.

1274. A great number of females come to the institution to be confined? Yes.

1275. Do you think it desirable, or that it ever was intended, to have this class of persons

in this institution? I do not think it ever was intended to receive this class of persons into the Asylum; but the question is whether we are to allow them to be delivered in the streets, or to take them in? Joseph
Burgon, Esq.

1276. I am speaking of the desirability of having the two institutions in one—would it not be well to have the Benevolent Asylum kept for the aged and infirm, and to have a separate institution for lying-in cases? The women come to us as paupers; and to have a separate institution for them would be only, so to speak, for the purpose of classifying paupers. 13 Nov., 1861.

1277. Do you think it would be desirable to have a separate institution for that class of paupers? I do not see that any advantage would be gained by that.

1278. Of course if an Asylum were built out of the city it would entail the necessity of having a depôt in Sydney, to receive cases, and also for the purpose of supplying out-door relief? We should require more than a depôt, for many of these people come in actually in labour; there must be a bed or two for such cases, as we could not send a woman in labour up to Burwood or Ashfield; others come in in *articulo mortis*, and die on the steps, or within an hour of coming into the building.

1279. So that if a new building should be erected out of town, it would be necessary to have at least two or three wards in Sydney? There must be a house with limited means in Sydney, or at all events within a reasonable distance.

1280. Do you think the position of the present building sufficiently central for the immediate suburbs of the city? I have never found any difficulty in its working. I have never heard any complaints of the difficulty of getting to the Asylum.

1281. It came out, in the course of the evidence taken at Liverpool, that the inmates of the Asylum in that place had no vegetables? They have no garden there.

1282. They have a very nice garden, but the inmates do not even have potatoes? I know it was the subject of conversation at one of the committee meetings, and a Roman Catholic clergyman who was present spoke of the small accommodation they had there.

1283. Do you not think it would be much better if the committee were to allow them to have more vegetable and less animal food? I do not know that the scale at the Liverpool Asylum is different from ours, but they should clearly be allowed vegetables. I should say if they have the same proportions that we allow in town, they have a very fair proportion, and a very good ration.

1284. As a medical man, I presume you find a great want of different wards in which to classify your patients in the Asylum in Sydney? No, I have not much trouble in that way; the patients are much of the same class—worn-out people, lying-in women, and children.

1285. The Committee saw in one ward called the infirm ward, I think, thirty-six children, with their thirty-six mothers, and either thirty or thirty-two infirm and aged women? That ward was not originally one, but was separated by a partition, and access was had to the lying-in ward by another entrance and staircase. At present the two wards (lying-in and infirm) are divided by a large room, in which cooking is conducted, and in which the nurse sleeps; but for the convenience of infirm patients, and from a desire to save expense, by having one nurse instead of two, the partition was removed.

1286. You do not think it necessary that there should be a separate institution for lying-in women? No, I think it is merely multiplying the expense; I do not see the necessity of dividing them, proper appliances being given. We have never found the children suffer by their proximity to aged persons. There are some very beautiful children in the Asylum, and it is not sufficiently borne in mind that some of the children who are brought in have been lying exposed to the air for a night, who are put down as "Died in the Benevolent Asylum," would have died if they had been taken to Queen Victoria's palace, and had fifty nurses to wait upon them. That under such circumstances the child lives—that it struggles on—is the mystery, not that it dies. If these cases were taken out of our report of the mortality the number would be materially diminished. For the last three or four months we have not had more deaths there—even with the aged and infirm people we have—than would be a fair proportion of the general population of the city.

THURSDAY, 14 NOVEMBER, 1861.

Present:—

MR. HARPUR,	MR. SADLEIR,
MR. LOVE,	MR. SUTHERLAND.

J. LUCAS, Esq., IN THE CHAIR.

James Robertson, Esq., M.D., called in and examined:—

1287. *By the Chairman:* You are a medical practitioner in the City of Sydney? Yes. J. Robertson,
Esq., M.D.

1288. And have been so for a considerable period? Yes.

1289. Are you aware that this Committee have been appointed to inquire into the state of the Benevolent Asylum? I am. 14 Nov., 1861.

1290. One of the great objects of our inquiry is, with reference to the suitableness of the intended site for a new institution, and you have been summoned to give your opinion as to its desirableness for persons of infirm and aged constitutions? I know exactly the position of the Destitute Children's Asylum,* and I do not think you will find a colder place than that within the same distance of Sydney.

1291.

On revision:—After "Asylum," insert "and generally the adjoining land on which it is proposed to build the Benevolent Asylum."

- J. Robertson, Esq., M.D.
14 Nov., 1861.
1291. Evidence has been given here by some medical gentlemen with reference to the site, and one in particular says he should prefer going inland some short distance—for instance, to Petersham, Ashfield, or some similar locality? I am not prepared to give an opinion as to the best position, for it would require a considerable amount of investigation to enable me to say which is the best site in the neighbourhood of Sydney; to answer a question of this kind, off-hand, without giving it a good deal of consideration, I do not think would be wise.
1292. What is your opinion then of the proposed site? I believe this neighbourhood is exceedingly healthful for the middle-aged, robust, or young; but for infants or aged persons I think it is a very cold place. In the term young I do not include infants, but children, say from two to three years old.
1293. You think it is suitable for them? There is not much objection to it. The children in the Destitute Children's Asylum are very healthy; but they are much subject to chilblains, and this is a sign that it is a cold place even for those who are vigorous, and do not suffer under the same disadvantages as the aged and infants, who are not able to maintain their own heat in the same way as young and middle-aged people are.
1294. Then the Committee gather from your remarks that you think this would not be a most desirable site? I think it would be an undesirable place, for it is not only a cold, but a cold, windy place; and it is pretty well known that cold with wind is very much more unendurable than mere cold.
1295. Such as frost? Such as frost without movement of the air; and as this is a hot climate, and the elderly people here have acquired a kind of summer constitution, I think to place them in a very cold, windy position, would be very detrimental to them, and be calculated not only to increase the diseases that old people commonly suffer under, but to render them uncomfortable in every way from cold.
1296. By Mr. Harpur: Have you visited the exact spot? No.
1297. You speak merely of the situation generally? I prefaced my remarks by saying that I knew the position of the Destitute Children's Asylum, and that I know generally the neighbourhood.
1298. Excuse me for taking you somewhat out of the line of the examination, but do you not think it of importance, whatever site may be selected, that there should be ample room for a garden? Yes, decidedly.
1299. Do you think also that the inmates of the institution should have access to that garden, or to grounds? Yes.
1300. Do you think it would be the means of promoting their cheerfulness, and tend, at all events, to the purposes of the charity, if an opportunity were given them of enjoying a little freedom, while they were depending upon the charity of the world? Undoubtedly; for the aged and decrepit who are there, simply on account of their poverty, everything should be done to make them comfortable.
1301. Do you not think, looking to these people as reasoning beings, that the inmates of Benevolent Asylums, and similar institutions, are among the most unreasonable persons — ? The inmates of Benevolent Asylums must be classified —
1302. Decidedly, but I am speaking generally? I am speaking more particularly of the class to which my examination has referred—to the aged and infirm; and to the aged and infirm I confine my remarks.
1303. Those who have not made provision for the future are, generally speaking, the most unreasonable beings; do you not think these persons may be made good or bad, according to the influences brought to bear upon them? I do not think you can very much alter the habits of aged people.
1304. You cannot very much alter aged people, but you can alter any people? Aged people have their habits formed.
1305. I am glad you have referred to that; now there is a habit formed, the habit of smoking, and this, as no doubt you are aware, with many of these aged people, is a very powerful habit, formed from a very early period; do you think that should be rudely broken through—that they should be compelled to abstain from smoking, and have no opportunity of working to obtain their tobacco and gratify this long formed habit? I rather think we are going away from the question of the sanitary position of the Benevolent Asylum to the general management of it.
1306. Allow me to put the question in this way:—Do you not think it has a very intimate connection with the sanitary circumstances of the institution, inasmuch as it influences the mind, because the mind is very much influenced by physical circumstances—and you will admit, I presume, that the physical condition of a person is influenced by previous habits, and by the sudden breaking through of those habits—do you not think the state of mind, produced by a sort of compulsory idleness, which prevents a person from working to obtain the gratification of his innocent desires, is injurious? I have not found that aged and decrepit people are very anxious to work.
1307. But they are very anxious to smoke; do you not think the desire to gratify this innocent desire would act as a stimulus to exertion, and exercise a beneficial moral influence upon the mind, even upon the criminal? It is a question, as it seems to me, of smoking and working; now I have not found aged and decrepit people fond of doing work, and I have not found, as a matter of observation, that smoking makes them more desirous of working.
1308. Have you not observed, generally speaking, that this class of people can be brought to work for the most inadequate consideration—is it not the fact that in these Asylums persons will work hard for sixpence or a shilling a-week, when for the same amount of work they could earn thirty shillings a-week elsewhere; shewing that they are an unreasonable class of persons? There is not the slightest doubt that inmates of Asylums of this kind will do an amount of work far above the value of the money they get, for the sake of obtaining tobacco; but then they esteem the tobacco as worth the work they do.

1309. Do you think that has a salutary moral effect upon the mind? It keeps the people at work. J. Robertson, Esq., M.D.

1310. Do you not think compulsory idleness—a state of enforced idleness—has a highly injurious effect upon the mind? I apprehend it is quite voluntary on the part of the inmates whether they stay in the Asylum or not. Speaking of the aged and infirm, I suppose they go into the Asylum because they are unable to work, and that they cease to have the inclination. 14 Nov., 1861.

1311. Do you not think, considering the work they have done for the community, and of which others enjoy the benefit, that the public are bound to maintain them in comfort? I think people who go there simply because they are aged and unable to work should be taken care of, and every reasonable consideration shewn to them, * but the troublesome men are the middle-aged—the class of men who will not work.

1312. *By Mr. Sutherland:* You have stated that you are acquainted generally with the neighbourhood of Randwick, but not with the exact spot upon which it is proposed to erect this institution? Not the exact spot.

1313. Are you aware that the Destitute Children's Asylum is on a very much higher elevation than the proposed site? I have been told so to-day.

1314. Will your objection equally apply to a lower site? I have likewise been told that a range of sand hills protects the site from the westerly winds; if that be so it possesses an advantage over the Destitute Children's Asylum, which is unprotected; but I likewise hear that it is entirely unprotected from the southerly wind, which is very violent and cold.

1315. If the site were protected from the southerly wind you would not object to it? No, if the place be protected from cold and winds the objection I raise to the locality would be removed.

1316. *By the Chairman:* In one of the wards of the Benevolent Asylum in Sydney, intended to contain only forty persons, according to the usual space allowed to adults, the Committee found thirty-six infants with their thirty-six mothers, and thirty-two aged and infirm females of from 60 to 95 years of age—do you not think it must be very injurious to those infants to breathe the air of those aged and infirm persons? If the room contained only the proper number of persons, and the children were nursed by their own mothers, so that the warmth of the children were not abstracted by the old people, I do not think the children would suffer.

1317. You do not think it injurious that the children should breathe the same air with the aged? No; if the aged people do not habitually nurse them, provided the proper number of persons occupy the room. I think from what you stated there were upwards of ninety persons in this room.

1318. Above ninety in a room calculated to contain forty? That is highly objectionable; but if the number were reduced to forty, and the mothers were to nurse their own children, I do not think there would be any objection to the presence of aged persons in the same ward.

Bartholomew O'Brien, Esq., M.D., called in and examined:—

1319. *By the Chairman:* You have been a private medical practitioner in the City of Sydney for a considerable period? Yes, I have been in the Colony about twenty-six years, and in Sydney upwards of thirteen. B. O'Brien, Esq., M.D.

1320. You are aware, from the circular sent to you, that this Committee has been appointed to inquire into the Benevolent Asylum? Yes. 14 Nov., 1861.

1321. You are also aware that it is in contemplation to erect a new institution, and that a site has been chosen at Randwick—do you think the site selected desirable? Feeling that it was my duty before coming here to make myself acquainted with all the circumstances, I visited the Destitute Children's Asylum yesterday, and then went on to the proposed spot.

1322. Do you think, taking everything into consideration, that that is a desirable situation for the proposed institution? Standing upon the hill at the Destitute Children's Asylum, and feeling the strong wind there was there, I had very considerable doubts in my mind, but when I proceeded to the spot itself, although there was still the strong wind blowing at Randwick, I found the place really so sheltered that my opinion was altered. Of course I felt that I should not be justified in forming an opinion from merely standing at Randwick, and when I went down I made a sketch of the position in my own rough way. (*The witness handed a rough sketch to the Chairman.*) The place is a kind of horse-shoe, formed by a range of sand-hills; and when I placed myself as nearly as possible in the centre of that horse-shoe, looking eastward, the breeze was quite inconsiderable, and I could see no objection to the place. It is true that to the south-east a portion of it is open, but, as it was pointed out to me, two or three rows of maritime pine might be planted, and that would shelter the south-east. The place is very healthy, being lower than the Destitute Children's Asylum, and sheltered, as I have stated; and my opinion was that it was very suitable, or, at all events, not unsuitable; I could not object to it. Of course the actual site of the house is not yet determined upon; a piece of rock was pointed out as the probable site; that I cannot say I think the most desirable, but if it were placed in the centre, and facing easterly, it would be sheltered.

1323. You do not think the rock pointed out to you the best situation for the building? I do not; but the whole locality, viewing it as I did, appeared to me not at all unsuitable. The objection that persons would have to it from going to Randwick, feeling the strong breeze

* NOTE (on revision):—From "but the" to end to be omitted, as in nowise appertaining to this question.

B. O'Brien, Esq., M.D.
 14 Nov., 1861. breeze, and merely looking down at the site, would be removed if they went to the locality itself; and I felt that I could not appear before the Committee to give you proper information without going to the precise spot—knowing the importance of the matter.

1324. I may state that some of the medical gentlemen who have been examined suggest that there are several places along the line of the present railway which would be very desirable; for instance, about Petersham, Canterbury, Ashfield, and Burwood? I think these are very healthy positions, but it is cold as you go along Liverpool Road. I like that locality, and am continually sending patients there, for the sake of the pure and beautiful air there is there, but I do not think the air is more pure than at Raudwick, and it is to be borne in mind that this is an Asylum for the aged and for infants, without any reference to particular chest affections; if it were an Asylum for the consumptive it would not then be desirable to have it on the sea-coast.

James Charles Gilbooley, Esq., called in and examined:—

J. C. Gilbooley, Esq.
 14 Nov., 1861. 1325. *By the Chairman:* You have been a medical practitioner in Sydney for some time? Yes.

1326. The Committee have summoned several of the medical practitioners of the city to ascertain their opinions with reference to the suitability of the proposed site for a new Benevolent Asylum. (*The Chairman pointed out the position on a map.*) Do you think that a desirable situation for persons of aged and infirm constitution? I have not visited the spot, but as far as I can judge I should think there would be no objection to the site.

1327. You see it is protected by a range of hills from the westerly winds? Yes, precisely.

1328. I was under the impression that it was not protected from southerly winds, but Dr. O'Brien says if the building were erected in a certain position upon the proposed site it would be sheltered from all winds—do you, under those circumstances, see any objection to this site? I see no objection at all.

1329. You think it a really desirable situation? I see no objection. I heard some objections urged against it, in consequence of the sea air being rather too sharp for the people, but I do not think the objection holds good if it is protected by surrounding hills.

1330. Have you at any time visited the present institution? I was the resident surgeon there.

1331. For how long a time? For better than two years—from January, 1858, to June, 1860.

1332. You know the crowded state of the institution? Yes, it was very crowded when I was there.

1333. There is one ward called the infirm ward, calculated, I think, to hold forty-four beds, in which we found thirty-six infants with their mothers, and thirty or thirty-two aged and infirm people, in all upwards of a hundred persons—do you not think it injurious to the health of the children that they should thus have to breathe the same air as the aged? I do; I think it is almost death to them.

1334. *By Mr. Love:* In the erection of wards in the new Asylum it is proposed to build, how many cubic feet of space would you recommend to be allowed to each individual—Suppose there were forty patients in a ward, what size do you think the room ought to be? I know that in the Benevolent Asylum the beds are very close together; I should think there ought to be three feet at least between each bed.

1335. What height would you recommend that the ceilings should be? I should say that the ceilings ought to be about the height of this. (*The ceiling of the Committee Room, being about fourteen feet high.*)

1336. *By the Chairman:* Do you not think seven feet in width would be little enough space, including the bed, and the space between it and the next? I think that would be about a fair space.

1337. The width of twenty feet would be little enough for two rows of beds; that would leave about eight feet between the feet of the beds? That would be little enough.

1338. And fourteen feet high would be little enough? Yes, I think so.

1339. That would give a space of 980 cubic feet for each individual? I think that would be about a fair allowance.

1340. Are you aware that at the present time, in military hospitals, 1,200 cubic feet is allowed to each patient? I am not aware.

1341. Are you aware that in barracks, where the inmates are in good bodily health, 600 cubic feet is considered sufficient? I am not aware.

1342. Were you in the institution in 1860? I was.

1343. Did you leave before the great mortality commenced, in June, 1860? I left in June; the greatest mortality was in July.

1344. I believe the visiting surgeons are expected to visit the Asylum twice a week; did they attend pretty regularly? When I was there their attendance was rather irregular at times.

1345. *By Mr. Hargrave:* Of course you cannot speak of their attendance during the month in which this great mortality occurred? I know nothing in regard to that; but I know that shortly before I left, some of the visiting medical men did not visit for a whole fortnight.

1346. *By the Chairman:* Do the visiting surgeons write their names in the book? There is a visiting book.

1347. Do the visiting surgeons write their names in that book every day they attend? Yes.

1348. *By Mr. Love:* Were there any deaf and dumb children in the institution while you were there? Very few.

1349. Were there any? I do not think there were any.

1350. *By Mr. Sutherland*: Do you know the number of sick in the Asylum when you left? No, I think the mortality was, in a great measure, owing to the overerowed state of the house at the time; we could have no classification of the inmates; they were all huddled together indiscriminately.

J. C.
Gilhooly,
Esq.

14 Nov., 1861.

1351. You were unable to make any proper classification, for want of room? It was quite impossible. It was proposed by some of the committee to build additional wards, something like the temporary sheds built at the poor-houses at Home, but that was not carried out; I think if it had been a great many lives might have been saved.

1352. *By the Chairman*: Under whose charge were the medical comforts during the time you were there? Under the charge of the master.

1353. Who was that? Mr. Mansfield.

1354. It was your duty to prescribe a certain allowance of medical comforts to the patients? Yes.

1355. Under the term medical comforts you include malt liquors, brandy, wine, and so on? Yes.

1356. When you gave the orders for these how were they served out—did you know of your own knowledge whether the patients got their proper allowances? I did not always give a written order; I merely sent a messenger. I had a bottle for port wine, which was the wine most generally used there, and I had that filled and given to the nurses and wardswomen, to be divided among the patients.

1357. You used to get it filled by Mr. Mansfield, and then gave it to the wardswomen to divide it among the patients? Yes.

1358. Was porter distributed in the same way? Precisely.*

Charles Meymott, Esq., M.D., called in and examined:—

1359. *By the Chairman*: You are perhaps aware that this Committee has been appointed to inquire into the Benevolent Asylum? Yes.

Charles
Meymott,
Esq., M.D.

14 Nov., 1861.

1360. And also that it is proposed to erect a new institution at Randwick—the Committee are desirous to obtain from medical gentlemen, practising in Sydney, their opinion as to the desirableness of the proposed site? I know the site.

1361. Is it, in your opinion, a suitable position for an Asylum for persons of aged and infirm constitutions? If it is simply to answer a question of that sort I have very little to say, and that it is a decidedly favourable site for anybody—even for aged people. Indeed for any class of invalids I consider that part of Sydney, if I may so call it, the most healthy of any, and I have myself lived at Paddington, which is part of the same peninsula.

1362. There is one advantage in this position, that it is backed by a range of hills, which protect it from cold westerly winds? I am aware of that.

1363. Which makes the site more desirable? Yes.

1364. Have you visited the present institution? I have not gone through it to visit it. I have been in it and that is all.

1365. Have you given your attention, at any time, to the subject of the space necessary for each individual in a building of this kind—if you were building an hospital for patients, what space in cubic feet would you allow for each individual? That is a subject upon which I have been examined in London, for I was for some years surgeon to the Horsemonger Lane Gaol, and when improvements in the cells were projected, I visited many barracks and similar places, for the purpose of obtaining information upon the subject, but my memory will not serve me at the present time.

1366. In building an institution for the aged and infirm, or for any persons where a large number would be collected in one ward, what height would you have the ceilings—say this ceiling is fourteen feet high—would you have it of that height, or higher, or lower? In these climates one would, of course, prefer more air than would be necessary in England. I should consider that an hospital containing a number of beds ought to be quite as high, if not higher than this, especially in this climate. Therefore, if I give an opinion as to the quantity of cubic feet necessary for the preservation of health in an hospital, or where a large number of people are living together, that will refer to England, and I should imagine you would have to add a certain per centage to the space there allowed; I ought to have particulars respecting Kensington and other barracks, which I measured, and if I can lay my hand upon them I will forward them to the Committee. (*Vide Appendix.*)

1367. Do you think it desirable that infants and their mothers should sleep in the same ward with aged persons—persons for instance of from 60 to 90 years of age. I may tell you that in the present building, owing to its crowded state, they are compelled to put in one ward about thirty-six infants, with their thirty-six mothers, and about thirty-two very aged women? It is very injurious indeed—I think it is universally allowed by medical men—for infants to sleep in the same apartment with aged people; there can be no question that the aged people receive a portion of the vital principle of the life from the young children.

1368. *By Mr. Harpur*: Even without actual contact? Yes.

1369. *By the Chairman*: From breathing the atmosphere of the same ward? That I believe has been decidedly proved. I know it has where they have slept in the same bed, but I believe the other has been also.

1370. Have you any suggestions to make to the Committee with reference to the best means of promoting the sanitary condition of this institution? ———

APPENDIX.

Note (on revision):—I wish to correct this answer (having refreshed my memory) by withdrawing the word "*Precisely*," and by stating that Mrs. Mansfield, the matron, gave the porter to the nurses and wardswomen, to be distributed among the patients, when ordered by me; I did not give it myself to be so distributed.

APPENDIX.

Charles
Meymott,
Esq., M.D.

14 Nov., 1861.

I have been unable to find the papers referred to in my evidence, I cannot therefore speak positively as to the number of cubic feet of space which in England was considered necessary for each individual, in order to the preservation of health, in those establishments which I visited.

I answer to the question—"Have you any suggestions to make to the Committee with reference to the best means of promoting the sanitary condition of this institution?" I beg to say a few words on the subject of ventilation. I would suggest that a large shaft or chimney be built in some convenient portion of the building. This shaft should be heated by artificial means to such an extent that the temperature within it shall always be higher than that of the external atmosphere, and also higher than the temperature of the atmosphere of any of the rooms of the said building. That in each room there should be at least two openings, one near the ceiling in one of the angles of the room, and the other near the floor in the opposite corner; one communicating with the external air, and the other with the heated shaft. By these means every portion of the air contained in the rooms will be continually moving towards the shaft, whilst at the same time there will always be an abundant supply of fresh air from without circulating in the room. The shaft may be sufficiently heated by means of such fire or fires as may be required in the establishment. The requisite temperature within the shaft should be maintained during the night. According to the size of the room, there should be two, four, or six openings.

I may mention that the new Model Prison at Pentonville is ventilated throughout on the above principle.

CHARLES MEYMOTT,
M. R. C. S., &c.

C, Wynyard-square,
21 November, 1861.

John Aitken, Esq., M.D., called in and examined:—

John Aitken, Esq., M.D. 1371. *By the Chairman:* For some considerable period you have been a private medical practitioner in Sydney? Nearly twenty years.

1372. You know the institution in the city called the Benevolent Asylum? I do.

1373. You are aware, perhaps, that a Committee has been appointed by the Legislative Assembly to inquire into that institution? Yes.

1374. You are also aware that it is in contemplation to erect a new building, and that a site has been selected at Randwick for that purpose (*The Chairman pointed out the position on a map*)? Yes; I have some idea of the locality.

1375. The Committee wish to have your opinion of the desirableness of that site for persons of aged and infirm constitutions? I consider it a mild, bracing spot, well adapted for either of those; very well calculated; very invigorating.

1376. Have you visited the present institution at any time? Yes; last year, in a case of emergency, I was requested by Mr. Allen to visit it; in the month of May, June, or July.

1377. Are you aware that it is very much overcrowded? Yes.

1378. That site is not suitable? No; from its adjacency to the grave-yard, putrid effluvia and malaria are always arising from it.

1379. The Committee, in visiting the institution, found that infants, their mothers, and very aged persons, were all sleeping in one ward? Yes, all in one ward.

1380. Do you think it is injurious to the constitutions of infants to breathe the same air with very aged and infirm persons? It is, from the noxious exudations, which are poisonous and oppressing.

1381. In the ward to which I refer, which is calculated to contain forty-four persons, the Committee found thirty-six infants, together with their thirty-six mothers, and some thirty or thirty-two aged persons, between the ages of 60 and 95 years, in all upwards of a hundred persons—must not that be very injurious to the bodily health of the infants? Very much so. Each occupant should have 1,000 cubic feet of air, by night and by day; that would be a cube ten feet each way.

1382. Would it not be better to have a height of, say fourteen feet, and say seven feet in each other direction? Yes; that is the space each party should have, whether infants or adults.

1383. Supposing you were building an hospital, what height would you have the ceiling? Not less than twenty-five or thirty feet; the higher and the more space the better.

1384. *By Mr. Harpur:* Taking care, at the same time, to preserve proper ventilation? Yes.

1385. *By the Chairman:* The higher you raised the building—the ventilation being so high above where the person was lying—the less liable would the patients be to suffer from any immediate change of temperature? Not from a sudden change of the temperature; in certain seasons that could be remedied by circulating hot air or water, in pipes.

1386. You think the proposed locality is very suitable as a site? Very invigorating; a better I do not know.

1387. *By Mr. Harpur:* You have spoken of having visited the Asylum in June or July, 1860? Yes.

1388. Are you aware that in July there was a very great mortality there? There were two fearful epidemics; there were eighty-six deaths during those two months, and between thirty and forty deaths from measles, and in most of those cases—for during that period I had the whole responsibility upon myself—the deaths were among the children of strumous, syphilitic, and diseased parents. For fifteen or eighteen months the itch was in the institution, but we got rid of it; the children who were affected in that way were the greatest sufferers.

1389. Measles was the cause of the great mortality? Yes; that was one cause; and the others were influenza, bronchitis, and lung or chest diseases among the aged.

1390. Influenza prevailed at that particular time? Yes; Sydney was much affected at the time, and the building was much overcrowded; it was fearful; over that the committee had no control.

1391. *By Mr. Love*: You spoke of the itch having been prevalent in the institution? John Aitken,
Esq., M.D.
Yes.
1392. Is there any difficulty in curing that disease? None whatever, if we have the appliance of hydropathy, of baths, and the means of isolating the cases; but no sooner had we cured one child than it became contaminated by coming in contact with others. If we had had a ward for skin diseases, with hot, sulphur, and other baths, the disease might have been soon cured. 14 Nov., 1861.
1393. What are the usual remedies for itch employed in the Asylum? Cleanliness.
1394. Any medicine? We gave them some alkalies, potass, and sulphur, and a vegetable diet.
1395. Has an outward application of sulphur been tried? It has been tried.
1396. Has it not always been found effectual? Not in that institution, where so many were troubled with it.
1397. Is it not known that the application of sulphur outwardly will effectually cure the disease in two or three? If you can isolate the case.
1398. When you say that it is hard to remove the disease in that institution, have you tried that remedy? They had tried it, but not effectually, before I went there.
1399. *By Mr. Harpur*: Are you an hydropathist? I would adopt hydropathic treatment in cases of that kind; and where the aged and infirm had been over-physicked, or abused their constitutions with ardent spirits, I should say that bathing, sea bathing, hot or cold baths, according to the circumstances, would have a sanitary influence.
1400. *By Mr. Sutherland*: Who was the resident surgeon at the-time you refer to? There was no resident surgeon there at that time; they were hard up to get a medical man there to visit, and as I was living in the neighbourhood, Mr. Allen applied to me. I went there twice a day during that period.
1401. *By Mr. Harpur*: These epidemics account for the unusual number of deaths? Yes.
1402. And the crowded state of the institution? Yes; and other causes over which the Board had no control.
1403. *By the Chairman*: The children's nurse, in her examination, stated that all the children were washed in one water—she said, that they filled the tub with water, and washed all the children in the same water, one after another—do you think that was calculated to banish the itch from the institution? I think there cannot be two opinions upon that.
1404. Do you think it likely they will ever get such a disease as the itch out of the institution while they pursue that mode of treatment? I should say it was more calculated to aggravate than to remove the disease.
1405. *By Mr. Sutherland*: How long was the institution without a resident surgeon? At that period nearly two months.
1406. Had the epidemic prevailed before you went there? It had just commenced when I went there; it had been there a few days before.
1407. *By Mr. Harpur*: I suppose you were busily employed? Yes; in fact I became sick under it, and was very glad to be removed from my duties. I was going about the wards with a blister on my chest, as I suffered from influenza myself.
1408. *By the Chairman*: In going through the institution the Committee found that there is only one mode of cooking the meat; that the inmates have boiled meat day after day, week after week, and month after month—do you not think it would be a great improvement if there were ovens built in this institution, so that the meat might occasionally be baked? It would be a great improvement.
1409. In institutions of this nature you would, I presume, recommend that there should be less animal and more vegetable food? Yes, something that the toothless aged could masticate; now they are obliged to bolt their food.
1410. Do you not think it a deplorable state of things, that in an institution of this kind, with some three or four hundred inmates, they should have no vegetable food for many months, with the exception of the little put into their soup? I cannot understand how they can remain healthy under such circumstances.
1411. It was given in evidence at Liverpool that they had potatoes only twice or three times in a year? Have they no rice, carrots, turnips—nothing in that way?
1412. Nothing, with the exception of the little vegetables their own garden afforded, which were cut up in the soup they had twice a week. Do you think it likely they can remain in a healthy state under such a system? Not so healthy as they would be if they had vegetables, for I think that is essential.
1413. Do you not think it very desirable, in such an institution, to have wards to classify the patients; do you think it proper to keep persons suffering from cancers and such diseases, in the same ward with healthy persons? Most aged persons have ulcers in their legs, and they ought all to be classified.
1414. All suffering from that class of diseases ought to be in one ward? Yes; all the aged people ought to be in a ward by themselves, more particularly in inclement weather, and should have artificial heat.
1415. I am particularly referring to persons suffering from syphilis and cancers; should these be allowed to remain in the same ward with persons in good bodily health, which is the case at Liverpool? Certainly not; it is very injurious.
1416. I understood you to say that it is very injurious to have infants and very aged persons sleeping in the same ward, breathing the same air? Very injurious—very prejudicial.
1417. *By Mr. Harpur*: Are there no means of imparting artificial heat at present? Not at present.

1418.

- John Aitken, Esq., M.D.
14 Nov., 1861.
1418. Do not you think that the enforced idleness of the patients—for, as you are conversant with the management of the institution, you must be aware that they are not allowed to work—has a very injurious effect? It produces a very depressing effect upon the system. The inmates give way to anxiety, grief, gloomy thoughts, forebodings. If they had some light occupation, as straw hat making, match-box making, gardening, weeding, cleaning, or some other simple occupation, it would be very desirable.
1419. They have complained more of that than of anything else; that they are not allowed to work to enable them to obtain the means of gratifying the habit of smoking, to which most of them have been accustomed from their early years. Do you not think it desirable that they should have the means of gratifying this habit if they are willing to work for it? Yes.
1420. Would not that have both a good physical and moral effect? Yes, I look upon that point as most important, as I believe the want of some occupation accelerates their death; most of them can do something, make cabbage-tree hats, paper bags for the grocer, or something of that kind.
1421. Which would occupy their minds? Yes.
1422. Although in the case of aged people it might not have any great influence in the disciplining of their minds, is it not important to make a man do something in order to obtain the means of gratifying his desires? Yes.
1423. *By the Chairman:* The institution at Liverpool is surrounded by a wall some ten feet high, which prevents the inmates from looking outside; do you not think it would be much more conducive to health if the building were surrounded by a palisade, through which the people might see the surrounding country? It would be a relief to the mind.
1424. *By Mr. Harpur:* I think you attach as much importance to that as to anything? I do. One thing which pained me very much during the two months I attended the Asylum, was the waste I observed. The second day's bread ought to have been given, but instead of that they had new bread, and this was thrown about the grounds, in the gutters, on window sills, and under beds. I animadverted upon this subject in a letter to the committee.
1425. *By the Chairman:* In examining the institution at Liverpool we found that many of the inmates kept their clothing, their boots, and in some cases pieces of bread, under their beds—do you think that ought to be allowed? Certainly not; I am surprised that any person having control over them could have allowed it.
1426. Do you not think in an institution of such a nature there should be an airing ground into which the inmates should be compelled to take their beds? It should be a rule, weather permitting, that the beds should be taken into the airing ground every day, and that the patients where they could not get out by themselves should be carried out, and their beds be aired.
1427. *By Mr. Love:* On the lower floor that could be easily managed by having casters to the bedsteads? Yes, or the patients might be lifted by means of broad bands of calico.
1428. *By the Chairman:* Have you any further suggestions you can offer with reference to the sanitary arrangements desirable in institutions of this nature? There is no subject of greater importance in the whole range of *hygiène* than cleanliness, sewerage, drainage, and ventilation, and the accumulated evils which arise from their neglect. The present state of the Benevolent Asylum, the annals of medicine, and the bills of mortality, prove the truth of this. Amongst other nuisances, Committees of the House of Commons have unequivocally condemned interments in towns; if so in an English climate, how much greater is it in an Australian, therefore demanding legislative enactments to discontinue it. I would suggest that the water-closets and urinals in the Asylum be constructed on improved principles; remove all old-fashioned brick and stone sewers, and substitute earthenware drain pipes, duly adapted in form, size, material, and inclination; the latter being carefully observed, so that all deposits be quickly removed, by the aid of the waste water daily used in the wash and bath houses, from which have pipes conveying water to closets, &c. The poisonous effluvia that arises from the opening of sewers is not the result of immediate decomposition, but of a decay which is found to be established a few days after the discharge of the decaying matter, consequently suggest earthenware pipes, with inclination, &c. The garden and grounds connected with the Asylum should be used to better advantage; would suggest that all the space at present useless be neatly laid out, and that the inmates spend their leisure time in cultivating it; and that some part of it be used or set apart to resort to during wet or very hot days; in a few months they would soon erect bowers, &c., to protect themselves from the vertical noon-day sun. I would recommend that all the children suffering from scrofula or strumous habit be treated to salt water baths in the Domain twice a week during the summer months. The laundry, kitchen, wash and bath houses, should be together, and built on scientific principles. An educated and qualified cook could give the inmates varied dinners made out of the material in daily use, with profit to all concerned.

FRIDAY, 22 NOVEMBER, 1861.

Present:—

MR. CALDWELL, | MR. LOVE,
MR. SADLEIR.

J. LUCAS, Esq., IN THE CHAIR.

Henry Graham, Esq., M.R.C.S.E., called in and examined:—

- 1429. *By the Chairman:* You are the Health Officer of the City of Sydney? Yes.
- 1430. You have occasionally visited the Benevolent Asylum? I have.
- 1431. Will you have the goodness to inform the Committee what is your opinion of the state of that institution? On each occasion that I have visited it I have found it, according to my opinion, excessively overcrowded—very defective as far as ventilation is concerned. I have observed a want of general classification of the inmates, of separation of the sick from the healthy, and of the young from the old. The first occasion of my making any report with reference to it was in February, 1861, when, from certain rumours that itch was prevalent among the children, I went with the resident medical officer and examined all the children. I found that there were a large number, in fact some forty or fifty of them, then suffering from the disease, in consequence of which I reported the circumstance to the City Council. Each quarter, before making my quarterly report, I have made it a practice to visit the institution, and on the 10th September I made a report, which was published, with reference to the condition of the Asylum, its overcrowding, the very bad management which existed, for want of classification of the inmates and the separation of the children from the adults; and I further directed special attention to the necessity there seemed to be that there should be, in connection with or separate from this institution, a lying-in hospital. It seemed to me that it was calculated to produce very injurious consequences to lying-in women to put them into an overcrowded place. On a subsequent occasion I visited the establishment at night. I beg to hand in extracts from the several reports to which I refer. (*Vide Appendix.*) I was requested by the medical officer, if I wished to see the institution at its worst, to visit it at night; I did so, and I noticed what I have not stated in the report, a great deficiency of light in the institution, in the yard, and at the back, and even on the stairs. There is no gas laid on, and the only means of lighting is by dirty, old-fashioned oil lamps, which not only emit a quantity of smoke, but I should think are also dangerous, where there are so many old decrepit people.
- 1432. In the erection of a new establishment, how high do you think the ceiling should be—taking this ceiling to be fourteen feet high, do you think it should be as high as that? It ought to be at least that. In all institutions of this kind with which I have been connected—and I have been connected with hospitals for some years—it has been always a rule to allow of a space of five feet for every individual.
- 1433. Between each bed? Yes, as far as possible, about a thousand cubic feet of air for each individual.
- 1434. Are you aware that in the barracks six hundred cubic feet of air are allowed, and in the hospitals for the sick, twelve hundred? Yes; when I spoke of five feet being allowed, I had reference to the military and convict hospitals in Van Diemen's Land, under the Army Medical Department.
- 1435. Of course you have seen that the whole of the females who go to the Benevolent Asylum to be confined are kept in one ward? I believe so; there is no separate ward.
- 1436. Many decent although poor people are confined there? Yes; I should be desirous of sending many decent people there, if there were proper arrangements for their accommodation.
- 1437. At the same time there are also some of the worst characters? No doubt.
- 1438. Do you not think there should be some mode of classifying these people? Yes, there should be a proper classification, it is more necessary in a lying-in hospital than in any other; it is always the case in such institutions at Home.
- 1439. Do you think, in erecting a new building, it would be desirable to have the wards so large as in the present one—would it not be better to have the wards smaller and more numerous, so as to afford the means of classification? That depends upon whether you are speaking of an hospital or not.
- 1440. I am speaking of a Benevolent Asylum, to which women go to be confined? I think that ought to be a separate establishment altogether.
- 1441. I am speaking of a Benevolent Institution—if this class of paupers are to be received there, do you not think it would be better to have the rooms smaller, to afford the means of classification? Yes; in classifying them I would have a day room; the sleeping room should not be occupied during the day, excepting by the sick and those who were unable to move out.
- 1442. When the Committee visited the institution, they found in one ward thirty-six children with their thirty-six mothers, and about thirty-two aged females, in all above a hundred individuals, in an apartment intended for forty-four? Yes, I saw them.
- 1443. Do you not think that very injurious? Yes; most of these old people are suffering from chronic diseases, ulcerations, and other affections, and the impure exhalations from them must be injurious to young people inhaling the same atmosphere, and tend to produce scrofula and all the incipient stages of pulmonary disease. For many years I had charge of a very large institution in Van Diemen's Land, (the convict nursery,) and I never allowed old people and lying-in women to be in the same ward; the children were always separated from their mothers when they were nine months old, and kept in separate rooms.

H. Graham,
Esq.,
M.R.C.S.E.
22 Nov., 1861.

H. Graham,
Esq.,
M.R.C.S.E.
22 Nov., 1861.

1444. In visiting the Liverpool institution the attention of the Committee was particularly directed to the sick ward, in which persons suffering from cancerous and syphilitic diseases were huddled in a room with persons in good bodily health, except so far as they might be affected by the ordinary infirmities of age; do you think it very necessary to have some mode of classification in cases of that kind? The sick ought to be separated from those who are in moderately good health. The presence of the sick, particularly if labouring under cancerous affections, must have an effect in shortening the lives of the others, and of making them feel excessively wretched. Nothing can be more debilitating than the inhalation of a bad atmosphere; it not only produces disease, but a weariness and lassitude for which it is often difficult to account.

1445. From your evidence I understand that you have been very much engaged in public institutions of this kind? Yes; for seventeen years I have been engaged in the convict and military medical department.

1446. Do you not think that during dry weather the beds and bed clothing should be taken out daily to air? They should be taken out and put in a separate room daily.

1447. If there were a grass plat would it not be well to lay them out on it in the open air? Either on that or in a large open laundry.

1448. Would it not be better to put them out on a grass plat? Yes; in dry weather.

1449. Do you not think that should be adopted as a system? That was generally done in all our institutions; the bedding was taken out every day, and every inmate was compelled to fold his bedding in a certain manner, by a certain hour in the morning.

1450. You would not, I presume, if you had the management of an institution of this kind, allow the inmates to keep their old clothing, boots, or a portion of their ration, under the heads of their beds? That was contrary to all the regulations in the institution of which I had charge; it was considered to be one of the most important matters; we would not even allow anything to be hung out of the window, but we were especially particular with reference to keeping any portion of the dietary out of bed.

1451. We found also, on visiting the Liverpool institution, that it was surrounded by a very high wall, so that the patients had not an opportunity of seeing anything outside—do you think it would conduce to the bodily health of these people if this wall were removed, and a light fence were put up, so that they could see the country outside? I think the comfort of the inmates should be taken into consideration, and I have no doubt that where the mind is unoccupied and shut out from all external objects, it must affect the bodily health.

1452. The Asylum at Liverpool is built on the banks of George's River, and from the upper portion of the building there is a very pretty view both up and down the river—if a portion of this dead wall were removed, the inmates could have an opportunity of enjoying that; do you not think that would tend to promote their comfort, and through their comfort, their health? No doubt. When that place was built it was intended for a convict hospital, and it was necessary to have those high walls for the sake of discipline; but there is not the same necessity in the case of the present inmates, any more than in that of the institution next door—the Infirmary—where the wall has been removed and a railing substituted. I was there some three or four and twenty years ago, as assistant surgeon, and it was then entirely surrounded by a wall.

1453. Of course you are aware that a great many of the old people in this Colony smoke—do you not think it desirable that they should be allowed to employ themselves in some way for the purpose of earning the means of obtaining this little comfort? I think if occupation could be found for them it would be very desirable; we used always to find occupation of some kind for the old women at Launceston Factory, and at Port Arthur, either in picking oakum or something of that kind.

1454. Or in gardening? Yes; as far as a man could he was compelled to work; the work was classified; there were different kinds of work which were assigned to the people under the direction of the medical officer. Even blind men used to find employment in some way or other.

1455. What is your opinion of the present site of the Benevolent Asylum? I think it is as bad as it can be. I think its contiguity to the burial ground is likely to be a source of injury for centuries.

1456. You refer to the soakage from the burial ground? The exhalations from human remains, medical history tells us, are productive of the most serious consequences, even when those remains have been buried and the tombs over them have been closed for a hundred years. I have myself seen the fatal results. When the vaults of Old Saint Dunstan's Church were opened, and the dead were removed from them, I was a lad, and articulated to the parish surgeon in Fleet-street —

1457. A site for a new institution has been selected at Randwick—what do you think of that situation? My impression is, that for old people of weakly constitution it would be too bleak, unless it were put in such a position as to be sheltered from southerly gales. It must be remembered that what may be good for young people may not be so for old men.

1458. When you say young people, do you mean children over three years of age? Yes; it may be a good site for such, though it may not be for aged and broken-down people.

1459. I may inform you that there is a range of hills at the back of the proposed site, which forms a sort of horse-shoe, and protects it effectually from the cold westerly winds, and that if the building were erected on a particular spot it would also be protected from the southerly winds, while the hill upon which the Destitute Children's Asylum stands would protect it from any bleak wind from the sea—Do you, under those circumstances, see any objection to the site? I do not think the site is so much a matter of consideration in a medical point of view, but I think the mode of getting to it is one of the most important points. I think, as we have the advantages of railway communication, such an institution should be approachable by railway.

1460. Has your attention been drawn to Petersham, Burwood, Ashfield, Canterbury? All those are excellent localities.

1461. Taking every circumstance into consideration, if you were left to select a site for an institution of this nature, what locality would you choose? I would go somewhere between this and Parramatta, as the institution would then be approachable from so many places by railway.

1462. Of course you would look to an elevated position? There are some very beautiful spots, though flat, about Burwood, Ashfield, and Petersham. I recollect some years ago when I was living in Sydney, about 1840, I used to go out to a station where the Canadian prisoners were kept. I had the medical charge of them, and used to visit them two or three times a week. I used to look upon that as a very healthy locality.

1463. That was at Longbottom, midway between Parramatta and Sydney? Yes; I used to think that a very nice situation, a very pretty spot.

1464. *By Mr. Love:* Have you seen the children in the institution in Sydney? Yes, I have seen them, but not lately; not since my last report, two months back, when I visited the institution.

1465. Did you think them quite equal in looks and intelligence to children of the same class outside? They had not so healthy an appearance; in fact, if I were to draw a comparison between them and the children in the convict establishment in Van Diemen's Land, where the regulations were strictly carried out under the medical department, I should say that I have seen children in the Queen's Orphan School, in Hobart Town, far superior and far more healthy.

1466. To what do you attribute the inferior condition of the children here? It is most likely attributable to the want of ventilation, to the vicious habits of parents, their poverty, and disease. Perhaps it is rather unfair to institute a comparison between the children in these two institutions, because we had these convict children under our care from the time of their birth. When they were nine months old they were taken from their mothers; they received plenty of suitable food, there was no crowding, good ventilation, everything was done that medical science could dictate, and consequently we had the establishment in a state creditable to the officers and to the Home Government. We had little or no mortality, and the children grew up strong and healthy.

1467. Have you seen any deaf and dumb children in the Asylum here? I have seen some idiots; and I think Dr. Smith pointed out one deaf and dumb child. I think there were two or three idiotic, and some epileptic.

1468. Did you examine the deaf and dumb child, so as to form an opinion of its intelligence? No; my visits were simply in connection with sanitary matters, and I did not feel at liberty to interfere with other questions. In my visits to the institution, it appeared to me that the great evils were, the want of classification and the overcrowding of the building. I am also of opinion that no person should be allowed to retain his own clothes upon entering the institution. Everyone entering should be washed, and clothed with the clothing belonging to the Asylum; their own clothes should then be put away; there would be no degradation in this, as in military hospitals the clothes are always taken away upon a patient being admitted, and the hospital clothing is given.

1469. *By Mr. Caldwell:* When you speak of classification do you mean that persons who are diseased should be separated from those who are in good health? Yes; but I mean also as to intelligence and age; for example, I would not put an old man of eighty to mess with a young man of twenty, because the young man of twenty would eat a great deal more than the other. I also refer to the classification of dietary; I do not know the dietary scale, but, as far as I can understand, there is no regulation as to dietary. There should be a classification as to physical capability, character, intelligence. When a man was admitted, it should be decided by the medical authorities to what class he should belong, and the same with the women; if a woman were capable of performing light work, such as sewing, she should be put to it; others might be employed in washing.

1470. Do you think any injurious effect would be likely to arise to young children, from aged persons in good health being with them? I think so; I think the old and young ought to be separated. I do not mean that families ought to be separated, but I would not put a number of children with old persons labouring under pulmonary or strumous diseases.

1471. I can easily understand that it would be injurious to put children with aged persons suffering from disease, but would you apprehend any danger from their being with aged persons in good health? No, provided they were not overcrowded; besides I think old people are fond of children, and like to see them about them, so long as they are not overcrowded.

1472. With reference to a lying-in hospital, do you think it would be desirable that there should be an apartment which should be exclusively devoted to women awaiting the time of their confinement? I think it would be most desirable in a lying-in hospital that there should be a proper classification as to character, so that any poor but respectable married woman, who was in circumstances unable to find necessaries during her accouchement, (perhaps deserted by her husband,) might be treated differently from a common prostitute.

1473. Would it not be desirable to have a room set apart? Yes, under those circumstances they ought to have a room for themselves. In the convict establishment at Launceston there was a large room in which the women remained a week; in that room there were several nurses to attend upon the women who were confined. After nine days they were transferred to the nursery, if they were able to get up, and make room for others. There are many poor women in this city who would be very glad to avail themselves of an institution of the kind, and pay a small sum for their admission. I know several at the present moment. There is now a poor woman near her confinement at Chippendale, and her husband is dying of fever.

1474. Have you seen the institution at Liverpool? Many years back I went with a board of inspection, but I almost forget it.

1475.

H. Graham,
Esq.,
M.R.C.S.F.
22 Nov., 1861.

- H. Graham,
Esq.,
M.R.C.S.E.
22 Nov., 1861.
1475. You cannot say what would be the effect of this wall upon the feelings and health of the inmates? I should think, judging from the effects of prison walls, that it would have a depressing influence.
1476. Supposing they can see over this wall? It would be all the better.
1477. You heard the Chairman say that this building is on the banks of a river, and that there is a very pleasant view from it? Which is shut out by the walls. If I had the management of it, I would pull down the wall and put up an iron palisading.
1478. *By Mr. Sadleir*: Might there not be a danger that grog would be introduced by that means? That might be provided against.
1479. I think you said that there was a good deal of itch in the institution—do you attribute that, in a great measure, to the children being allowed to retain their old clothes after their admission into the institution? Yes. My attention was drawn to the fact from seeing a child out of doors who was affected by it. A woman came to me at the Infirmary and I saw that her child had the itch; I asked where she had been to catch that, and she said she had just come out of the Benevolent Asylum.
1480. I think you said something about erysipelas—is not that a dangerous disease? It depends upon whether it attacks aged persons or not; it is a skin disease, and in a climate like this when it attacks aged people it is most fatal—it is a sort of typhoid fever.
1481. Therefore the necessity for separation? They ought to be separated. There was also another skin disease which I noticed the children were suffering from—porrigo—a sort of scab, which I attribute to a want of proper diet, ordinary cleanliness, and ventilation.
1482. Are there not also diseases peculiar to lying-in women which spread themselves where a number of them are associated in a close room? Puerperal fever is a very fatal disease, and is brought on chiefly by impure air and want of ventilation. If a woman suffering from this disease is lying in a bed contiguous to another lying-in woman, the latter is likely to take the disease in a few hours. It has been known in thickly populated parts of London, and in the Continental cities, to spread from house to house, and hundreds of lives have been lost in consequence. It was common in former days in many work-houses in London when people were crowded into them.
1483. Has it not often been conveyed by medical men themselves from one house to another? Yes; in fact it is a species of typhoid fever; a low putrid fever.
1484. Is there not a great deal of sympathy between women who are pregnant, so that when they are put together one of them being taken in labor would cause premature labor in another? Yes; the cries of one in the pains of labor, would bring on a similar feeling in another who was not within a month of her time, if she were a sensitive person.
1485. Is not one of the objections to this place that it combines two things which ought not to be combined—a poor house and an hospital? Yes, they ought to be separated. I think it would be desirable that there should be an institution out of town, and that there should be a depôt in Sydney where inmates might be received and classified; and then from time to time the patients might be sent off as circumstances permitted. The main institution might be somewhere upon the line of railroad, and that would facilitate the communication.
1486. May it not be better to have a separate lying-in hospital, and to leave this institution as a poor-house? Yes; and I am only surprised that when Government gave up the buildings now occupied by the Mint, they did not reserve the wing which was always intended to be a lying-in hospital. I understood at the time I left as assistant surgeon, that that was the intention.
1487. Would it not have been better to have kept the Benevolent Asylum as a poor-house, and to have had a separate hospital and lying-in hospital? Yes; there might be a place for chronic diseases, not for acute diseases; as you will find medical men object to chronic cases being taken into a place like the Infirmary. They do not want incurable diseases in such a place as that, which is intended for curable diseases. In the military and convict services the thing was carried out in that way; there was an invalid depôt where invalids were kept, quite a separate institution from the hospital. There ought to be an invalid depôt for incurable paupers, a lying-in hospital, and a work-house for those who are destitute, and who, if left to themselves, would become sick and ill from poverty.
1488. Do you not think the exhalations from the burial ground worse than the bad drainage? Yes; I think the superficial exhalations from the ground itself, on a day like this, most injurious to health.
1489. Where the burial ground is in a sandy soil? Yes; particularly where heat and moisture are combined.
1490. Do you remember the immense amount of disease which resulted from the exhumation of bodies in the parish of St. Dunstan, in London? Yes; I was at the time the pupil of a medical man in Fleet-street, who was the parish surgeon. I remember, as a matter of curiosity, going to see the excavation when they were taking out the coffins, and I had a violent attack of typhus fever afterwards. Typhus fever spread through the whole of that part of the city, and carried off hundreds of people; the men who were working there were struck down while they were at work, and they were at last obliged to give it up.
1491. Those portions of the city were actually deserted by the population, and some of the streets were blocked up? Yes; I was very ill in consequence of it myself, and had to leave London.
1492. *By the Chairman*: Are you aware that the itch still continues in the Asylum? I have been told so. Dr. Smith has told me that there are still some very slight cases; he has them under treatment.
1493. I will refer to some of the evidence taken upon this subject:—I asked Mrs. Louisa Stone, "How many children have you in this ward?" She said she then had sixty, and she said that

that they all dined and slept in the same room, that they were all bathed in the same tub, and with the same water. There was a large tub in the room which I should suppose would hold about forty gallons, and the children were all bathed in the same water. Do you think the itch will ever be got out of the institution while such a system as that is pursued? No; the only way of effectually subduing the disease is by taking away all the clothes of the children as they are admitted, and fumigating the room.

H. Graham,
Esq.,
M.R.C.S.E.
22 Nov., 1861.

1494. What do you think must be the effect of sixty children eating and sleeping in the same room, and being washed in the same water? When I went there at night I saw all the children huddled together in rows on the floor.

1495. I asked the nurse, "Is the same plan pursued in washing the faces, hands, and feet of the children?" and she said, "No; we are obliged to change the water then, because it is sometimes very dirty." The reason she gave for not changing the water was that it was not laid on to the ward. I suppose they will never get rid of the itch while this system is continued? No, there will always be disease.

1496. *By Mr. Caldwell*: Would the water convey the itch? Yes, more than the clothing; even wiping with the same towel would convey it.

1497. *By the Chairman*: Do you not think the inmates should have a good vegetable diet? Yes; I do not know exactly what their dietary is.

1498. At Liverpool it was stated that they had no vegetables, excepting a little in their soup, and that they did not see potatoes above once or twice a-year, that they had merely bread, meat, and soup? I think that is very bad. We used to give to the convicts, as a dietary for those in the hospital, or the invalided, 1 lb. bread, 1 lb. meat, 1 lb. vegetables, and so much rice to make into soup; and when they had onions they had either a larger or smaller portion of the other vegetables, (I forget which,) so much cabbage, or so much potatoes.

1499. In the institution here all the food is boiled—do you not think the mode of cooking should be varied? I think that might be altered by frying or baking the meat. At Norfolk Island every second or third day the meals were baked; the convicts there had an unlimited supply of sweet potatoes and other vegetables.

1500. I understood you to say that there should be a separate institution for lying-in women? Yes.

1501. Might not the lying-in hospital be on the same premises as the other institution, if the women were separated from the others? Yes, it might be under the same supervision.

1502. If it were a separate institution it would involve additional expense, perhaps greater than would be derived from its being separate—might not both be under the same supervision? They might both be under the same supervision, but entirely separate from any other building.

1503. In answer to a question from Mr. Sadleir, with reference to passing spirits through the fence, you said that might be guarded against—I suppose if there were one wardman placed there he might prevent that? Yes; or there might be an inner and an outer fence.

1504. Generally the inmates of a Benevolent Asylum are not persons who have much money, or many friends who would supply them with drink? No, I think there is not much reason for fear on that account.

1505. I suppose if they had friends who would supply them with drink they would keep them out of the institution altogether? Yes. In connection with the subject of dietary I would give to these poor people and children lime juice to a certain extent. I think it is easily got.

1506. *By Mr. Caldwell*: I suppose if they were supplied regularly with vegetables they would not require lime juice? No, but it would be a very grateful drink, particularly to the old people.

1507. *By Mr. Sadleir*: Many of the women are employed in washing—do you not think a better diet should be given to them than to those who have no employment? Yes.

1508. Do you think it would be desirable, in order to relieve the house, that a temporary weatherboard building should be erected? I think there should be some shed, some cover for them; you now see them lounging about upon the grass, or on the bedding in the yard.

1509. *By Mr. Caldwell*: You speak now with reference to the Sydney institution? Yes, you now see the children and old women lounging about together.

1510. *By Mr. Sadleir*: You mean that there should be a temporary building, into which all those who were able should go during the day? Yes.

1511. Do you not think there should be a temporary building, to assist in the classification of the inmates—to relieve the main building of a number of those who are now sleeping there? I think it would be better to send. There was a large building at Port Macquarie, (I do not know whether it is still standing), which we used to use as an invalid depôt; a number of these people might easily be sent down there.

1512. *By Mr. Caldwell*: You have spoken of the exhalations from the grave-yard—do you think there is any danger to be apprehended from bodies when they are four or five feet under ground? Many are not two feet under ground; I have seen some of the coffins almost close to the surface.

1513. Supposing they are three feet under the ground? I think that is too near the surface, as the atmosphere gets to the body, and as the ground is porous, these noxious exhalations escape. That is a question which comes in connection with the establishment of cemeteries.

1514. I merely ask whether the inmates of this establishment are likely to be injured by exhalations from the cemetery, supposing the bodies are buried three feet below the surface of the ground? Yes; and the evil would continue long after the ground ceased to be a burial ground, unless some means were adopted of deodorising it. All superfluous grass and

- H. Graham, Esq., M.R.C.S.E.
22 Nov., 1861.
- and trees might be removed, the graves filled with quick-lime and charcoal, and the ground levelled. There is no better deodoriser than charcoal; it neutralises all the vapours.
1515. *By Mr. Sadleir*: Have you any idea of the quantity of gas that would be generated by ten bodies? It is enormous. I have seen leaden coffins ready to burst. A report has recently been published respecting a cemetery at Quebec, which, a number of years back, was used as an Indian burial ground, the re-opening of which caused a fearful epidemic—it had been closed 100 years.
1516. *By Mr. Caldwell*: Supposing the proposed site at Randwick to be sheltered from the southerly and also from the westerly winds, do you think it would not be suitable for a Benevolent Asylum? I think it is a nice healthy place. I do not know a nicer spot than where it was proposed to have the cemetery.
1517. *By the Chairman*: Have you seen the proposed site? No.
1518. *By Mr. Sadleir*: Your objection to moving out there is not on the ground of its unhealthiness, but of the difficulty of access? Yes, the supplying of an institution of that kind with the necessary provisions is an important question.
1519. And the institution would be more easily inspected if near a railway? Yes, and that is a mode of transit suitable for old persons.

APPENDIX.

Town Hall, Sydney, 23 November.
Health Officer's Department.

6 February, 1860.

Having heard it publicly stated by Mr. Raphael, and others, that a contagious disease, termed "itch," was prevalent in the Benevolent Asylum, I visited that institution on Friday morning last, and was afforded every facility for investigation by the resident medical officer. It appears that the above-named contagious disease has been generally prevalent among the children for some time past, and that at the present time there are about thirty-eight afflicted. There are no means in the institution, from its over-crowded state, of causing the complete separation of these children from the other inmates; so there is a liability of the extending and continuation of the disease, and of its further extension into the city.

10 September, 1860.

Much has recently been written in the public papers about extreme mortality in the Benevolent Asylum. There can be no doubt but that the institution is in a very bad sanitary condition; that it is over-crowded; that the inmates live in an impure air, hastening death in the aged and infirm, and producing premature disease in the young. There are no means of proper classification: old, young, sick, and healthy, are crowded together in ill-ventilated apartments. There is no regulation as regards dietary for old people—all fare alike; the old and feeble are the sufferers. The inmates were badly clothed; many I saw in rags. The children had an unhealthy appearance—pale, scrofulous, and scorbutic eruptions on the body.

10 September, 1861.

A few nights back, when the inmates had retired to bed, I visited this establishment (the Benevolent Asylum.) What was intended for the occupation of 200 then contained 400! I visited several of the wards—the lying-in, and sick wards for children. One ward, calculated to hold 40 persons, then contained 100! Old women, young women, nursing children, and others. The bedsteads along the wall contained the old and sick; the centre part was strewn with beds on the floor, so close together as to prevent a free passage. The ward was dimly lighted by two open oil lamps, the smoke emitted from which had already partially filled the upper part of the ward. Some open night-pails were placed in the middle of the ward. There was no means of ventilation; the effluvia was most oppressive. In another ward I found 70 children, lying in crowded heaps along the floor, but few having separate beds. The room was dark and smoky, from the oil-lamps. No ventilation.

The lying-in ward was somewhat more comfortable; the inmates provided with better beds; so also the wards for sick children; but still both much overcrowded.

Taking the establishment on the whole, nothing can be worse, and bears no comparison to convict establishments of a similar nature which, for years, were under my supervision.

HENRY GRAHAM, M.R.C.S.E.,
Health Officer, Sydney.

James Smith, Esq., called in and examined:—

- J. Smith, Esq.
22 Nov., 1861.
1520. *By the Chairman*: You are resident surgeon to the Benevolent Asylum? Yes.
1521. How long have you filled that office? Since the 16th July, 1860.
1522. What is your idea of the present situation of the Asylum? It is very bad.
1523. What is the reason of that? The smells about, and the place being overcrowded.
1524. Is there any drainage from the institution? There is a drain.
1525. Sufficient to take off the water? Scarcely.
1526. Are you aware that it is proposed to build a new institution? Yes; that has been spoken about for the last five or six years.
1527. Have you been to the proposed site? I have never been out there.
1528. Then you can hardly give us an opinion as to the desirableness of the site? I have only seen it from a distance—from the hills.
1529. There are a large number of females who go to the institution to be confined? We have had a great many this year.
1530. Do you think there ought to be a separate institution for this class of persons? There ought to be.
1531. For what reason? All large towns have one.
1532. That is your only reason? Yes.*

1533.

* *Note (on revision)*:—By "yes," I mean the reason why large towns which have a proper organization in such matters have a separate establishment for lying-in women; because in such a system as that obtaining at the Benevolent Asylum, there are no facilities for a proper treatment and classification of such patients; and the Benevolent Asylum is obstructed in its proper management by the introduction of an element not originally contemplated.

1533. If a new institution were erected large enough for the purpose, would you see any objection to a portion of it being set apart for lying-in women? I can see no reason at all.
1534. If you had the carrying out of an institution of this kind, would you have the wards in the building made so that you could classify the females? I would keep the lying-in women by themselves.
1535. You have now a number of decent, respectable women, although poor, who are compelled to take advantage of the institution on account of their poverty, and you have also others who are very bad characters—would you have these respectable people kept by themselves? Yes.
1536. You have no means of doing that in the present institution? Not at all.
1537. Do you think, in the erection of a new building, provision should be made for the carrying out of this classification? It should be.
1538. Can you give us an idea of the average number of that class of paupers who take advantage of the institution in the year? In 1855, from the 5th January to December, we had 39; in 1856 there were 53; in 1857 there were 56. From that time until July last year I was away from the institution. From the 18th July to the 31st December, 1860, there were 30; and I think for this year, until this morning, there have been 92.
1539. Then the numbers are increasing? Yes, that is 92 for this year alone; they have increased every year.
1540. You are aware that when we went through the Asylum we found 36 infants, their 36 mothers, and some 30 or 32 aged and infirm women in one ward—I suppose they were crowded there for want of room? Yes.
1541. So that even to accommodate the number of inmates you now have in your institution you require a building twice as large as the present one? Twice as large.
1542. That is, for your present wants? Yes; for Sydney.
1543. Looking twenty years forward, you would require a building four times as large? If you put the people now at Liverpool and those in Sydney together, you would require a building for a thousand people.
1544. There are about eight hundred now, are there not? About seven hundred.
1545. How much space would you require for each individual—how many cubic feet? About eight or nine hundred feet.
1546. You are aware that in military hospitals twelve hundred cubic feet are allowed for the sick, and in barracks, six hundred for the hale? I think in the barracks here the space is about eight or nine hundred feet.
1547. The Committee were of opinion that the sick children's room was in a very bad state—the smell was fearful? It is very close.
1548. It was so bad they could not stop in the room two minutes; they were forced to come out? When I went there first the gratings of the ventilators were inside, and I was obliged to close them, because in the mornings after leaving them open all the children were ill. In the summer I take out the two head boards, and then there are four large windows.
1549. I am speaking of the day when the Committee visited the institution—we then found the smell very bad? It seems that the whole building smells.
1550. It was not, I thought, so much from the overcrowding of the rooms as from closeness and want of ventilation? That house is badly situated, because it is sheltered by the whole building, and there is no draught. I sleep up-stairs there myself, and I feel it very much myself at times.
1551. Many of the women who come to the institution to be confined remain there a considerable time, do they not? Some have been there twelve months.
1552. Have you any females in the institution who have come from other Colonies—from Victoria and New Zealand—for the purpose of taking advantage of it? A few have come from Melbourne.
1553. Have you found these stop long after they have been confined? One is now in the institution who has been there about twelve months, but her parents I believe are living above Campbelltown; she was a servant in Melbourne.
1554. Under whose charge are the medical comforts? Mr. Mansfield keeps them.
1555. And of course you direct their supply? I give the order for them.
1556. Do you keep an account of what medical comforts you order? I have a book in which I enter them; this is the form of the order. (*The witness handed in the same. Vide Appendix.*)
1557. You send this order to Mr. Mansfield, and keep the butt? Yes.
1558. Do you send the butt to the accountant? Whenever he wants it.
1559. Then is there no statement made up as to the quantity consumed? Yes, every quarter.
1560. As to the quantity consumed and the quantity in the institution? Yes.
1561. Have you upon any occasion seen any persons connected with the institution intoxicated? Very often.
1562. That is, persons who have the management? Yes, they have the management.
1563. Will you name them? —
1564. Have you seen that repeatedly? I have seen it very often lately.
1565. How lately—within this month? Within this week.
1566. Have you seen Mrs. Mansfield so? I have seen her often when I have believed her to be intoxicated.
1567. Has she ever been complained of to the Board? I know Mr. Allen knows of it.
1568. Was it understood that she got intoxicated with the medical comforts? I do not know where she gets it.
1569. She is the matron of the institution? Yes.

J. Smith,
Esq.
22 Nov., 1861.

- J. Smith, Esq.
 22 Nov., 1861.
1570. In what part of the establishment have you seen her when she has been intoxicated? About the place; not in any particular place.
1571. Have you seen her in the yard in that state? Yes.
1572. And in the wards? Yes, and in the wards too; the patients complain of it.
1573. How long is it since you first observed her in that state? It has been ever since I went there.
1574. Mrs. Mansfield also has charge of the clothing? Yes.
1575. She gives it out to the cutter? She tells the cutter what to do.
1576. She supplies the cutter with calico, and other articles, to make up? Yes.
1577. Has there been any mention made with reference to the supply of calico, and things to make up for the patients? They were very badly off for things, I am aware, before the cutter came; they are getting rather better now.
1578. Are you aware whether the same quantity was allowed before the cutter came as there has been since? There was never enough before.
1579. But there was no difference as to the allowance by the Committee? Not at all.
1580. Then there was a quantity supposed to go somewhere else, instead of to the place intended—some other use was made of it? I could not say that.
1581. Did ever you see the master tipsy? Not since I went back there.
1582. Have you seen any of the wardsmen or wardswomen in that state? There is one wardswoman I suspect.
1583. Who is that? The one over the old women.
1584. In the infirm ward? Yes; she is one of the old hands.
1585. *By Mr. Caldwell:* She is a wardswoman? Yes; she is never in that way in the day time, she may be at night.
1586. You do not know that of your own knowledge? Yes; I have seen her tipsy, and checked her for it.
1587. *By the Chairman:* Have you repeatedly seen the matron tipsy? That may be seen at any time.
1588. Is it usual? When she can get it.
1589. Can you give the Committee any further information as to the institution, with reference to the health of the patients, the diet, or anything of that kind, or as to the conduct of the wardswomen? The health is pretty good just now, but the people require watching.
1590. Were you in the institution during the months of June, July, August, and September, of 1860? I went there on the 16th July.
1591. During the month of June there was a great mortality—something like fifty-six? Yes.
1592. During the two months preceding that, there was no house surgeon? Dr. Aitken attended for six weeks before Dr. Gilhoolley.
1593. Do the gentlemen who attend there as visiting surgeons place their names in the visitor's book? They have not done so lately.
1594. Did they formerly? Yes.
1595. Do they attend regularly twice a week? Not every week.
1596. Do they give their attendance as regularly as gentlemen in their circumstances could be expected to do? Yes.
1597. Do you know whether they attended during the month when there was this great mortality? I could not say.
1598. I believe there are four medical gentlemen there as visitors? Yes; two physicians, and two surgeons.
1599. *By Mr. Caldwell:* Do you know how many foundlings you have in the institution? I think we have three at present.
1600. Under whose care do you place them? They are under the care of the nurses. There is one who was found at Dr. Williams' door, he is now fourteen months old; one who was picked up in Crown-street, six or seven months old; and the third was found in Bathurst-street lately.
1601. How are they reared? The nurse rears them.
1602. Some woman who has a child takes one of them? Yes, a woman with a good supply of milk.
1603. She nurses her own—? And that too; the child is also spoon fed.
1604. Do you, under such circumstances, give the woman increased comforts? Yes.
1605. Have you any women of loose character who have been confined more than once in the institution? Yes, there is one who has been confined since I came back—she was confined there four years ago. I believe there are only two have been there before.
1606. Do you know whether a number of the young women who come there to be confined will not give the names of the fathers of their children? They generally give names, but you cannot depend upon them.
1607. Can they not be reached? They tell you they are away, at sea, at the diggings, or somewhere.
1608. But suppose they name a person as father of the child who is in the city—do the Committee take steps to oblige the father to support the child? I believe they make her take out a warrant, but they make nothing of it.
1609. Have they ever done it? They have done it, but it is a very difficult thing.
1610. Have they ever recovered anything from the father for the support of the child in the institution? I do not remember an instance.
1611. You have spoken of having seen Mrs. Mansfield tipsy—did you ever report that circumstance to the Board? No, it is not my place.

1612. Has she ever been in the sick wards during the time she has been tipsy? I have seen her in the sick ward I would say touched a little.
1613. You stated that the inmates complained of Mrs. Mansfield? They pay no respect to her at all.
1614. If they complained, to whom did they complain? I have heard them grumbling among themselves; they laugh, and pay no attention to her.
1615. Supposing Mrs. Mansfield interfered with your sick patients, would you not consider it to be your duty to report it? She cannot interfere with the sick wards, she goes up to see whether the clothes or wards are clean; she has nothing else to do with them.
1616. Is she not matron of the whole establishment? She cannot interfere with the sick wards.
1617. Not so far as the medical treatment is concerned, but as to the oversight? Yes, she goes up sometimes to get the particulars of the patients admitted.
1618. If she was in the ward in such a state would you not consider it to be your duty to report the circumstance to the Board? It is not my place to do it.
1619. Was it ever, to your knowledge, reported to the Board? I know it has been reported to several members of the committee.
1620. Can you name any members of the committee to whom it was reported? I name Mr. Allen.
1621. How do you know Mr. Allen knows it? I know Mr. Anderson informed him. Mr. Allen asked Mr. Anderson particularly about it.
1622. Under whose care is the stock of calico and clothing? It is supposed to be under the care of the master and matron.
1623. Have you a room for the purpose of keeping these things? Yes, there is a store.
1624. The cutter cuts out the clothes in the same place? Yes.
1625. During the time she is there these goods are under her care? Under Mrs. Mansfield's care.
1626. Is not the cutter present in the room? Whatever she requires Mrs. Mansfield gives her an order for.
1627. She points out a certain pile of calico from which to cut out those things —
1628. *By the Chairman*: Mrs. Mansfield supplies her with a quantity of calico? Yes.
1629. A quantity of material is supplied to the woman? Most of the stores are kept in the store —
1630. *By Mr. Caldwell*: When a stock of calico comes in, it goes into this room? Into the store, and then it is removed into the cutting-room as is required.
1631. You have mentioned a wardswoman whom you suspected to be in the habit of drinking? She is an old hand; I know her, and knew her years ago.
1632. Do you not think you should have reported that to the committee? When I saw her at first I said I would remove her without waiting for the committee.
1633. You never reported her case to the committee? I would not; she being under my charge I could remove her at once.
1634. In fact you never reported this case? I warned her, and she listened to me; she takes good care now to keep out of my sight when she is in that way.
1635. You have spoken of the sick ward for the children, of the bad smells in that room— from what do they arise? The room window opens on the laundry.
1636. Is the room on a level with the laundry? No; but the smell arises.
1637. The whole laundry is underneath? Just at the back of it.
1638. Have you been annoyed by smoke arising from the chimney of the wash-house? No, I could not say that.
1639. Have you not ventilators in this room? There are what are called ventilators, but the gratings are inside.
1640. I suppose they go through the wall? Yes; but I want them removed, the draught is from the outside in; if the gratings were outside the draught would be the other way.
1641. *By Mr. Sadler*: Do you lose many women or children in childbirth? One this year died six weeks after her confinement.
1642. What was the cause? Child-bed fever.
1643. Of a malignant character? That is always bad.
1644. Is that the only case of that description of disease you have known there? Yes. When there is one case there are generally several; but that is the only one that was lost.
1645. That is a most dangerous disease? Yes, when it gets into a lying-in ward.
1646. Therefore it is necessary that women in this condition should be separated? Yes, if possible. There were several cases at that time.
1647. Do you attribute that to the state of the atmosphere—the want of cleanliness? Perhaps she took cold and did not tell of it, but allowed it to go on. I saw her every day, but she always denied it.
1648. Want of proper cleanliness and ventilation would cause that disease? Cold would.
1649. Would not the crowded state of the ward and the want of ventilation? That would scarcely have anything to do with it. I have seen as many as eleven children in the ward at one time; the place is altogether too small.
1650. *By the Chairman*: The place is in a fearful state about ten o'clock at night? Yes, that is the best time to see it.
1651. To have a correct idea of the state of the institution it should be visited then? Yes, between nine and ten; you can form no idea of the state of the building from visiting it by day; you should do so when the doors are closed, and all the inmates are in bed.
1652. Do you not think it would be an advantage if there were an inspector appointed by Government to inspect that place, once a quarter or once a month? I should like to see that, much.

J. Smith,
Esq.

22 Nov., 1861.

- J. Smith, Esq.
22 Nov., 1861.
1653. You think that would tend to improve the institution? I think it would tend to make the committee work better—make them attend to their work.
1654. Do the committee generally meet there every week? Yes.
1655. How many are there upon the committee? There are too many, close upon forty.
1656. What is the usual attendance? Some of them attend very well—very few of them.
1657. *By Mr. Caldwell:* How often do the committee meet? Once a week.
1658. You have a weekly meeting and a quarterly meeting? Yes.
1659. The committee that meets weekly is called the house committee? Yes.
1660. *By the Chairman:* How often do the committee meet for the purpose of admitting patients, or do they admit them every day? They are admitted every day, and are brought before the weekly committee when they meet.

TUESDAY, 26 NOVEMBER, 1861.

Present:—

MR. ALEXANDER, | MR. SADLEIR.

J. LUCAS, ESQ., IN THE CHAIR.

Simeon Henry Pearce, Esq., called in and examined:—

- S. H. Pearce, Esq.
26 Nov., 1861.
1661. *By the Chairman:* You are residing, and have been for many years, at Raudwick? Yes.
1662. You are aware that this Committee has been appointed by the Legislative Assembly to inquire into the adequacy of the provision made for the destitute through the instrumentality of the Sydney Benevolent Asylum? Yes.
1663. You are aware that the committee of the Benevolent Society have selected a site for a new institution? I am.
1664. Are you aware where they have selected a site? I am.
1665. You are, I believe, one of the committee of the Destitute Children's Asylum? I am.
1666. Do you see any objection to an institution of this kind being established in that locality? Not provided proper sanitary measures are carried out.
1667. Do you think the site proposed is the best site that could be selected in that neighbourhood? I think it is the best that could be selected, taking into consideration the distance from Sydney, and taking all the other advantages into consideration. I think the site which the doctors have given their report upon is the best site that could have been selected, inasmuch as it has an eastern aspect.
1668. And is protected, by one of the spurs, from the southerly wind? Yes.
1669. It is in the shape of a horse-shoe, with the ranges round it? Yes, it is something similar to the shape of a horse-shoe; and in the centre of that horse-shoe, as we might term it, if they were to build, it would be protected from the west and south.
1670. And also could be well drained? It could; proper measures, of course, would have to be adopted with reference to drainage, and so on.
1671. What position do you hold in connection with the Destitute Children's Institution? I am one of the Board of Directors of that institution.
1672. And have been since its establishment, I believe? Nearly so.
1673. You selected the site for the Destitute Children's Asylum? Yes.
1674. As a director of that institution, can you see any objection to the erection of the Benevolent Asylum on the site proposed? No, I can see no objection.
1675. Is there plenty of water there? Plenty of water, at all seasons.
1676. What distance is it from Sydney? About two and three-quarter miles; I think that would be the outside.
1677. *By Mr. Alexander:* What distance is the proposed site from the Destitute Children's Asylum? About a quarter of a mile from where I have suggested the institution should be built; quite a quarter of a mile.
1678. *By the Chairman:* It was proposed by some gentlemen to build the institution on a rocky point—that is not where you would propose to build it? That is where it was intended to be built. I suggested that spot because there you would be able to build on a good foundation, and would save a good deal of labour and expense in excavation. It is a little exposed to the south, but is well protected from the west.
1679. You have since altered your opinion, and think a better position would be in the bend of the shoe? If it were to be protected from the west and the south I would suggest that it should be placed in the bend of the shoe, so called.
1680. *By Mr. Alexander:* Would that cause a much larger expense for foundation than was at first intended? Yes, for you would have to sink for a foundation. The expense which that would cause would do more than build a wall on the south side of the place first selected. If it were built on the rock the drainage would be better, but the site is not quite so good, unless a wall were erected, or a double row of pines were planted to protect the building from the south winds.
1681. *By the Chairman:* While the pines were growing a great many of the people might die? A wall or temporary high fence might be erected on the south side, as a protection, until the trees had grown up.
1682. *By Mr. Alexander:* The committee might have the pines planted at once? Yes, while the building was being erected.

1683. *By Mr. Sadleir*: You think this site of the Horse-shoe would be more expensive, on account of the foundation? Yes; in a large building such as that the expense would be very considerable. S. H. Pearce, Esq.

1684. *By Mr. Alexander*: Did you take any active part in the building of the Destitute Children's Asylum? Yes. 26 Nov., 1861.

1685. Do you think if this building is erected on low land it will be well to build it on piles, on a sort of pier, so that the underneath part might serve as a sort of shelter for these people? I would as soon have a sandy as a rocky foundation, provided I could get out of the run of the water. I would have no objection to build a tower and steeple on the sand if I could keep the water from it.

1686. *By Mr. Sadleir*: What is the character of the sand there—is it of such a character as that you could build safely upon it? Yes, it is the same kind of sand as that upon which St. Mark's Church is built—that is nothing but a sand bed.

1687. The cost of building a foundation for so large a building would be very great, perhaps two or three thousand pounds? I would suggest the propriety of building the institution on the spot originally proposed. £500 would build a wall for the protection of the inhabitants. You would have better drainage there, and you would also have a good foundation, which would save perhaps £1,500, and it would be close to the stone which they would require for the building.

1688. Is the water good? Yes, very good; and there is plenty in all seasons. I never saw it dry. Moreover, by applying to the Government you can have a hundred acres on the west of the site, for depasturing cattle, if you will merely fence it in, for it is reserved for the purpose of the Sydney watersheds, but would not damage the Reserve.

1689. *By the Chairman*: That would be rather a matter of application to the City Council than to the Government, for the Government have already reserved it? No; the City Council at the present time have nothing to do with it; it is Crown Land, which will be reserved from sale for the Sydney watershed.

1690. *By Mr. Alexander*: That is the swamp above that? No, that will be secured for the watershed for the Randwick Municipality; the forty acres does not include that. The land I now refer to is on the west of the site selected.

1691. *By Mr. Sadleir*: On the whole you are in favour of the first selection, in respect to the expense of building, and you do not think it would be too bleak? Yes, there is one thing in favour of that, namely, that it will not be backed up by a sand-hill, which it would be if it were placed in the centre of the Horse-shoe. In the latter case you would have to excavate a portion of the sand for a foundation, and the heat which would be caused by the attraction of the sand would be objectionable. I think it should be erected on the spot which was first recommended by the doctors and approved by the doctors.

1692. Is it equally accessible? Yes, quite so. We are now forming a street there, and are putting down bushes previous to covering it with gravel.

1693. Do you consider that the sand at the back would be easily carried about, and would be dangerous to the eyes? It would if denuded of its vegetation, but the committee of the institution must take care of that; they must have trees planted, and see that the shrubs are not destroyed until the trees are grown.

1694. *By Mr. Alexander*: There is plenty of stone there? Any quantity of stone, and a good supply of water, and the land, for garden purposes, is not to be excelled in the whole locality; it is beautiful swampy land. I tried to get it for myself, but the Government would not sell it.

1695. You say there is good land at the last place—is there also good ground at the place now selected? The greater portion of the land in the Horse-shoe is good land; the place where the rocks are marked on the map is the site I propose for the institution; that is fit for nothing but for being built upon.

1696. *By the Chairman*: If there were a wall built upon the south side it would protect the institution from the southerly winds? Yes, and the garden also; and you would then have a place equal to any in the world.

1697. In the Horse-shoe, where one of the medical gentlemen proposed to erect the institution, it is very damp? Yes; Dr. O'Brien selected that on account of the protection afforded from the wind.

1698. *By Mr. Sadleir*: Is there any injurious exhalation from these swamps, for in some peat swamps the exhalation is terrible? No, there is no decomposed vegetable matter there which causes any effluvia to arise of an injurious character. The matter in these swamps is nearly all decomposed vegetable matter and sand.

1699. Then they are not peat swamps? No; the soil is formed of sand washed from the hills, and decomposed vegetable matter.

1700. Do you think if we could get a site along the railway line it would be more convenient for sending up these paupers? No doubt it would be more convenient for sending them up, but the question is, whether it would be more healthy. I consider the land upon the line is not the most healthy position for a public institution, for it is generally low land; at all events, I do not think it so healthy as Randwick, for since the Destitute Children's Asylum has been established there, (say three years,) I think there have not been more than three or four deaths among the children out of 270 in number.

Samuel Hebblewhite, Esq., examined :—

- Samuel Hebblewhite, Esq.
26 Nov., 1861.
1701. *By the Chairman* : You have been for some time a resident at Randwick ? About six years.
1702. You also have something to do with the Destitute Children's Institution ? I am one of the directors.
1703. How long have you been a director ? I think between three and four years.
1704. You are aware that this Committee has been appointed to inquire into the adequacy of the provision made for the indigent and destitute through the instrumentality of the Sydney Benevolent Asylum ? I am.
1705. You are aware that the committee of that society are about to erect a new building, and have selected a piece of land near the Destitute Children's Asylum, for that purpose ? Yes.
1706. As a director of the Destitute Children's Institution, do you see any objection to an Asylum of this nature being erected so near to it as this is proposed to be ? I see no objection ; there is a great distance between the two places ; besides there would be no danger to our institution, for there is such strict discipline kept that there could be no interference at all.
1707. You were in the room when Mr. Pearce gave his evidence just now ? Yes.
1708. Do you concur in his views ? I do entirely. I could add a little more with reference to the healthiness of the situation. My residence is in a very similar position to this site.
1709. I thought you lived upon the hill ? I do ; but we have two sites—one sloping to the west, and one to the east, and I have scarcely had a doctor in the place for my family since I have been there, and the children are proverbial for their healthy appearance. I attribute a good deal in the first place to the water, which is superior to any I have tasted ; it is free from the hardness which is peculiar to the water in the neighbourhood of Sydney.
1710. We shall be happy to hear any further information you can give the Committee ? With respect to the building, I know nothing about it. I went over the site with Mr. Pearce long before it was intended to be appropriated to this purpose, and we were so much struck with it, as being an eligible piece of ground for a garden, that he and I intended getting hold of it. It is protected from the westerly winds, which is a very important matter in this locality.
1711. It is in the shape of a horse-shoe, is it not ? Yes, the range comes round to the south, and protects it from the south-east winds, which are very strong.

John Matthew May, Esq., examined :—

- J. M. May, Esq.
26 Nov., 1861.
1712. *By the Chairman* : You are connected with the Destitute Children's Institution ? I am the superintendent.
1713. And have been for what period ? Three years and a half.
1714. You are aware that this Committee has been appointed to inquire into the adequacy of the provision made for the destitute and indigent through the instrumentality of the Sydney Benevolent Asylum ? Yes.
1715. You are aware that there is a piece of land about south-west from your institution which has been selected as a site for a new Benevolent Asylum ? Yes ; not quite so much to the westward.
1716. Do you, as Superintendent of the Destitute Children's Institution, see any objection to the establishment of an Asylum of that nature in your neighbourhood ? It occurs to me that such a building upon the proposed site, situated as it is in the immediate neighbourhood, might operate prejudicially to the management of the Randwick institution, inasmuch as the offspring of the inmates of the Benevolent Asylum are special objects of admission into the Destitute Children's Asylum. Parents, I fear, would be exceedingly troublesome in their importunities to see their children, which would, in a great measure, interfere with what we consider so desirable, namely, to break off the connection of children from their parents, on account of the depraved and vicious habits of the latter. It would tend to keep up an intercourse, and if the plan proposed be carried out, it will be necessary to enforce a greater degree of restraint upon the inmates of both institutions than would otherwise be required. I have no doubt means could be adopted that would prevent any intercourse, such as the erection of walls ; but at present our institution is quite open ; it is not even enclosed by a paling fence.
1717. But if there were proper lines drawn, and the keeping within them were enforced, that would meet your objection, would it not—the children are always kept under the eye of some person ? Unless there were proper boundary walls, it would be quite impossible to keep them in.
1718. You are aware that in an institution of the nature of a Benevolent Asylum, people are not allowed to wander about where they please—there are certain limits defined ? I understand they get permission occasionally, to go out and seek service.
1719. When they apply they have leave to go out of the institution for a certain period, but I do not see how that would interfere with your institution, if you had regulations made to prevent persons seeing their children without first obtaining permission ? It is not as if they would come and apply in a regular manner, but they would come about to the extent of our boundary, and get at the youngsters in that way.
1720. If you look at that map (*referring to the map on the table*), you will see that there is only one portion of your land that runs down to the street, and then there is a street which runs between your land and that to be given to the Benevolent Asylum—I presume you never allow your children to ramble about without being under the charge of some person ? We do not allow them, and there is no inducement at present.

1721. That is your only objection? That is my only objection. I have no doubt that means might be adopted to prevent any intercourse whatever. As far as the healthiness of the site is concerned I cannot speak of it in too favourable terms. The fact that during the last three years and a half we have only had three deaths speaks for itself. J. M. May,
Esq.
26 Nov., 1861.
1722. Have you a garden there? We are getting the land under cultivation rapidly.
1723. Do you find any difficulty in getting supplies—what is the cost of getting them out? Our supplies are generally furnished by contract, and we pay no extra charges for their being sent out.
1724. How do you get your inmates from Sydney—do you send a cart for them, or are they sent out by the omnibus? We have regular committee days; the applicants know those days, and are generally in attendance; some of them afford to come by the omnibus, others walk, and others get a lift in a cart; they generally manage to get out; there is not much difficulty about that; it is a very easy transit.
1725. *By Mr. Sadleir*: Have you any restrictions upon parents visiting their children now? They are supposed to obtain an order from a director, but there is a certain discretionary power left with myself. It is a long way for parents to come from Sydney, and if they were ignorant of the regulation it would be a great disappointment to them to be sent back without attaining the object of their visit.
1726. There are two sites which have been proposed? Yes, one upon the rock and the other in the bend.
1727. Is the rocky site much farther from you than the bend? No. I am happy to say that the children are now under such control that if I were to draw a chalk line and say they must not pass over it they would not.
1728. How can you shut out the parents? Not well.
1729. *By the Chairman*: Are there many of the children in your establishment whose parents are in the Benevolent Asylum? There are several; I can scarcely form an opinion of the number. We have had several applications from inmates in the Benevolent Asylum for permission to see their children, and I know many are blind or too infirm to get out to see them, but who write to them. There are also inmates of the House of the Good Shepherd and of the Refuge who have children there.
1730. *By Mr. Alexander*: Are you not aware that a great many women who are not in the Benevolent Asylum have children in the Destitute Children's Asylum? Yes, I should exceed the number, I think, if I said that ten per cent. of the children in our institution were the children of the inmates of the Benevolent Asylum.
1731. Of course when they get their children into the Destitute Children's Asylum they are able to go to service? Yes.
1732. *By Mr. Sadleir*: In fact the greater the opportunity given to parents, the greater the reason to dread intercourse between the parents and their children? Yes.

THURSDAY, 28 NOVEMBER, 1861.

Present:—

MR. ALEXANDER, | MR. SUTHERLAND.

J. LUCAS, ESQ., IN THE CHAIR.

Alderman Joseph George Raphael called in and examined:—

1733. *By the Chairman*: You are a director of the Sydney Benevolent Institution? I am. Alderman
J. G. Raphael.
28 Nov., 1861.
1734. How long have you been a director? Nearly two years.
1735. Has there been any inquiry since you have been there? Two separate inquiries.
1736. There was one, I think, some twelve or eighteen months ago? The first, I think, was about twenty months back.
1737. What was the nature of that inquiry? It was into some complaints against the conduct of the doctor, the master, and the matron of the institution.
1738. What was the result of that inquiry? The result of the inquiry was that the Board of Directors were recommended to adopt a different course from what had been pursued. Many of the complaints were found to be groundless, and many others were thought to be worthy of attention.
1739. Did the sub-committee appointed to make this inquiry report to the general committee? There is a written report, or ought to be, in the hands of the Under Secretary, among the papers of the institution.
1740. Was there a second inquiry? There was.
1741. What was the nature of that inquiry? It was with reference to charges made by the inmates.
1742. What was the nature of the charges? The charges were against the secretary, Mr. Johnson, and against the master and matron, for having, purloined the stores and for making an improper use of them—selling them and placing the proceeds to their own account.
1743. That was against Mr. Johnson? No, against Mr. and Mrs. Mansfield.
1744. Mr. Johnson is not now connected with the institution at all? No, he is dead. The charge against Mr. Johnson was that he had withheld certain moneys which he ought to have paid to the weekly outgoing.
1745. That is, for out-door relief? Yes.
1746. There are many cases in which persons out of doors receive money from the institution to pay their rent, and it was a portion of this money which he should have given to the out-door paupers that he embezzled? That is what was stated.

1747.

- Alderman 1747. Was there evidence taken? There was a large amount of evidence taken from the
 J. G. Raphael. different inmates.
1748. Was a report made? A report was made and signed by the chairman also.
- 28 Nov., 1861. 1749. What was the nature of the report? The committee did not exactly agree in it, only
 it fully relieved Mr. Johnson of the charges made against him.
1750. Did it relieve the others? The master and matron were not so fully cleared, but the
 matter was not sufficiently made plain to support the charge that was preferred.
1751. *By Mr. Alexander*: That is your opinion—that the matter was not fairly cleared up;
 was that the general opinion of the Board of Inquiry? The Board were of opinion that
 there were not sufficient grounds to support the charge that was made.
1752. *By the Chairman*: Is that report now in existence? It should be at the institution,
 signed by the chairman, Mr. Hunt.
1753. Were you appointed one of the committee to visit the Liverpool institution? I was.
1754. Was there a committee of inquiry appointed, or merely a sub-committee of the
 managing committee of the Benevolent Asylum, to visit and look over the institution—was
 it for the purpose of inquiring into any alleged mismanagement? A sub-committee
 was appointed from the general committee to visit the Liverpool Asylum, in consequence
 of certain charges having been made against the doctor and master of the institution.
1755. What was the nature of the charges? Drunkenness and neglect of the welfare of the
 institution.
1756. Did you visit that institution? We did.
1757. Did you take evidence? We did.
1758. Did you report? We did.
1759. What was the nature of that report? The nature of that report was, that sufficient
 had not come under our notice to warrant us in stating that the parties were as represented,
 although some of us were of opinion that the doctor was not in the state we would have
 liked to have seen him in.
1760. Upon the occasion of the inquiry? Yes.
1761. And you reported so? We did.
1762. With reference to the inquiry, and the report made when the charges against the
 master and matron were inquired into, you say that the report did not confirm the charges?
 It did not.
1763. Do you state your opinion of the matter, or the opinion of the committee generally?
 I am giving the opinion of the committee generally; the charges were not substantiated, at
 all events, to our satisfaction.
1764. Was that the unanimous opinion of the committee, or were there any dissentients?
 I was a dissentient to the first report, and I gave in a written protest against it.
1765. I presume also that that protest is in existence, or should be? Yes.
1766. In the custody, as I should imagine, of the accountant? Of the accountant.
1767. Have any changes taken place since this report? Considerable changes, both at
 Sydney and at Liverpool.
1768. In what respect? At Liverpool, with regard to the rations, some changes have taken
 place.
1769. Will you name what they are? I believe the food is now of better quality, and more
 conscientiously distributed. If I may be allowed to state, we found fault with the rations,
 and on some occasions the people stated that they did not get their fair allowance.
1770. Were there any vegetables served out? At that time there were not. In conse-
 quence of the remarks of some of the inmates there, myself and the gentlemen who were
 with me—I think the Rev. Mr. Sheridan and Mr. Robinson—instituted an inquiry upon the
 spot, and we found that the remarks of the paupers were too true.
1771. They had no vegetables? They had no vegetables; and other things were not sup-
 plied according to the scale they were entitled to.
1772. How long is that ago? I think about eighteen months.
1773. Are you aware that no vegetables have been served out since that? Since that they
 have been served out.
1774. How often? I cannot say; the master had instructions to serve them out.
1775. Do you know of your own knowledge that they have had vegetables? I do not;
 I have been to Liverpool several times, but at no time have I seen vegetables served out;
 but I have heard the paupers state, in the presence of Mr. Mulholland, that vegetables have
 been sent out of the institution to persons residing in Liverpool.
1776. Have you visited Liverpool since that? I have been to Liverpool three times since that.
1777. Did you think it your duty to ask whether the recommendation made by you, and
 the gentlemen who accompanied you as a sub-committee, had been carried out, with regard
 to the supply of vegetables? We did; as also with regard to the tea and sugar.
1778. Would you believe that they have never had any vegetables served out since, with
 the exception of what have been grown in a garden hardly sufficient to supply a moderate
 family? I believe there has been great neglect.
1779. Would you believe that they have not had vegetables above twice for the last eighteen
 months? I can only fall back upon what I have stated, that the master had orders to serve
 them out.
1780. Supposing the committee did not supply the master with potatoes, he could not serve
 them out? In reply I can only say that the master was directed, if he wanted anything,
 to write, and he should be supplied. There was the item of barley, which had not been
 supplied, and upon our recommendation that was sent.
1781. One of the witnesses at Liverpool stated—(*The Chairman read Frank Allen's evidence,*
Nos. 909 to 911)? I can say I never heard a complaint to that extent. We had a complaint
 that

that they did not get a sufficient supply of meat, and that the beef as well as the tea and sugar were not used for them.

1782. Will you look at that scale of rations given by the master of the institution at Liverpool. (*Handing the scale to witness.*) You perceive that under that there is no provision for serving out vegetables, excepting what are supplied by the garden? With regard to the vegetables in the garden, the master had positive orders if he had not them to get them.

Alderman
J. G. Raphael.

28 Nov., 1861.

1783. But the committee never supplied them? I must say that I think it was as much the fault of the visiting committee at Liverpool as of the master.

1784. *By Mr. Alexander:* You mean the local Board? The local committee,—inasmuch as these gentlemen are aware of the complaints. I have three times found fault with the quality of the meat. The local Board know when we are going up, and I have no doubt that, on these occasions, they endeavour to get a better show of meat than ordinary. The soup, on one occasion, was pretty good; on others, indifferent; the meat has been always indifferent—of the worst quality the contractor could send; so much so, that on our return from Liverpool I informed the general committee of it, and asked the chairman, who was then sitting, to send an order that on alternate days, as beef and mutton were supplied, it should be sent up in bulk—that is, a side at a time, and not cut in pieces; that it should not be left to the discretion of the contractor to send scrags, and odds and ends of boiling pieces. I am positive that I saw a shoulder of mutton, when boiled, that had shrivelled up to the size of this note paper.

1785. You are aware that there is no other mode of cooking the meat at the institution than boiling? At present; although myself and the other gentlemen suggested that there should be a proper oven for baking; but that seemed to meet with every opposition from the master of the institution at Liverpool.

1786. Have you also recommended that there should be an oven in the Sydney institution? I have once or twice spoken of it, but I have been out-voted and it could not be carried out.

1787. Do you not think it desirable that there should be some change in the mode of cooking the meat? I have always been of that opinion. I believe that the present system causes great waste, because, from constantly taking of the same food, it becomes nauseous to the people, and they will not eat it.

1788. We found that, in the institution in Sydney, the people had boiled meat and potatoes two days a week, and boiled meat and soup four days a week—do you think it would entail any extra expense, with the exception of the first outlay for building an oven, to bake the meat? I am quite sure it would be a saving to the institution, if they were not only to bake their meat but the whole of their bread.

1789. And it would make a very agreeable change? If I may be allowed I would state that I am of opinion, and always have been, and have suggested it to the committee, that we should bake the whole of the bread for the establishment. After the oven had been heated for baking the bread, the meat could be baked at no expense, and would be more generally consumed; the saving in the waste alone would more than compensate for the expense. I would also add, that it is essential that the institution should be supplied with milk from its own cows, for it has been supplied more than once with rubbish called milk, which has called forth a strong opinion from some of the directors. I may add, that the garden at Sydney might be made to grow a large portion of the vegetables required for the institution, if it were properly looked after and cultivated.

1790. Do you think that could be done in the garden of the present establishment in Sydney? I do. The erection of an oven would not cost above £60. There is now a large plot of ground miserably looked after; in fact it is hardly looked after at all; and I have been told that, years ago, nearly enough vegetables were grown there for the supply of the institution. I believe, if it were well looked after now, it would grow nearly enough for the supply of the inmates.

1791. Do you approve of the manner in which the institution is at present managed? I do not; I think it should be on a different footing altogether.

1792. Do you think it would be an advantage if an inspector were appointed by Government to visit the institution monthly, and to make reports in duplicate, giving one to the committee and sending one to the Government? I do not think that would be any advantage; I think the institution should be differently managed altogether.

1793. I do not mean that the inspector should have any control over the managing committee, but that he should visit the institution monthly, and report, sending one copy of his report to the Government, and the other to the committee. You are aware that a very large amount of the public money is annually voted for the institution, something like twelve-thirteenths—do you not think, under those circumstances, that the public should know how the institution is going on? In reply to that I would say that the institution should be managed by a medical superintendent, who should be elected by the directors, and approved by the Government; he should be a married man, and be compelled to live there. The persons holding the situations similar to those now occupied by Mr. and Mrs. Mansfield should bear the titles of steward and stewardess of the institution; or one might be termed the medical superintendent, and the others master and matron, but subservient to the ruling of the chief officer—the medical superintendent. The institution would be then so managed that the Government would have a larger control over it than at present. In addition to the officers I have named, there ought to be a person holding the office of steward, whose sole duty should be to have charge of the stores.

1794. You say that the committee should first have the appointment of this medical superintendent, and that the Government should merely sanction the appointment? The Government should have the right of sanctioning the appointment.

Alderman
J. G. Raphael.

1795. Who should have the right of dismissing him? I have no doubt that upon a representation of the Board of Directors, to the effect that such a course was necessary, the Executive would immediately dismiss him.

28 Nov., 1861. 1796. Without such a report from the committee the Government should not dismiss him? Certainly not.

1797. What would be the use of giving the Government the power of sanctioning the appointment, if they must dismiss him upon the report of the committee? No, I do not say *must* dismiss him; there would be nothing imperative, but the committee might recommend his dismissal, and in the meanwhile suspend him; and on the other hand, if the Government wished to dismiss a person, they could immediately suspend him, and call for a Board of inquiry into his conduct.

1798. How would the Government obtain information? The Government have sometimes obtained information which we have not; for instance, the second inquiry was caused by one of the inmates, who wrote to the Government, and the Government sent his letter to us. It was that which led to the inquiry.

1799. You have spoken in your evidence of charges having been made against the master or matron of using certain stores—did it ever come before you that there was a deficiency in the medical comforts, spirits, wine, porter, or anything of that sort? It has, both in Sydney and Liverpool.

1800. Was there found to be a deficiency? In consequence of the reports we found at Liverpool —

1801. Will you in the first instance confine yourself to Sydney? It was in consequence of complaints we heard when I was on the visiting committee at Liverpool, we ordered for the future that all supplies were to pass through the storekeeper's hands, and that the items of tea and sugar were to be put by him into the boiler. It was said that there was some way of getting the stores out of the establishment at Liverpool, and that certain rums came over the wall in exchange. The paupers stated that although the tea and sugar were brought into the kitchen, it did not all find its way into the boiler, and that accidental packages went over the wall once or twice a week, and accidental bottles of rum came in exchange.

1802. Was there a charge of a similar nature with reference to the institution in Sydney? I was informed by one of the directors—I think the Rev. Mr. Dougal, the Scotch minister—on one occasion, that a large quantity of brandy was deficient, and that it was supposed it had been used by the heads of the establishment.

1803. When you speak of the heads of the establishment, whom do you mean? It was supposed to have been consumed in the master's and matron's branch.

1804. Were they compelled to make good that deficiency? When Mr. Dougal informed me of it, it was Board day, and I was just about to bring it before the Board; but just as I was about to introduce it Mr. Dougal came to me and asked me not to do so, because the stores were to be made good.

1805. Without being brought before the Board? Yes; he said it would perhaps be better not to bring it before the Board on that occasion, as the stores were to be made good immediately.

1806. Do you know whether they were made good? I was informed when I next attended, on the following week, that they had been made good.

1807. And you did not think it was your duty then to bring the matter before the committee? As I only knew of it from hearsay evidence, and as I was requested not to do so by the gentleman who had informed me, and by another gentleman on the Board not to do so, I acted upon their request.

1808. Will you mention the name of the other gentleman? I have no hesitation in saying it was my friend Mr. Alexander. I believe the good nature of the directors has caused many of the faults.

1809. Has any charge of drunkenness been brought before the committee when you have been present? No.

1810. Have you heard any? We have heard rumours, but we could never have any direct charge brought to us.

1811. There are a great number of females who go to the institution to be confined, and the Committee learn that cases of that kind are very much on the increase. From the evidence of the doctor we learn that, up to the present date, nearly double the number of women have taken advantage of the institution that have done so in any previous year; I think he stated there were upwards of ninety. It is also in evidence that some of these women remain in the institution as long as twelve months after their confinement—do you think that is a desirable state of things? I believe the institution is most grossly abused, and I have been of this opinion for a long time past. It is nothing but a pleasant domicile for the worst of characters. It enables them to carry on their bad practices, and every encouragement is given them to do so.

1812. When you say every encouragement is given to them, do you mean merely that their reception into the institution has that effect? By being so readily received into the institution, and by the very munificent way they are provided for when they are there.

1813. But when women come to the institution in that state they must be received under any circumstances? I should admit every case; but my mode of dealing with these women would be very different from that adopted.

1814. Will you inform the Committee what is your notion as to how these women should be dealt with? I think that all single girls who come there to be confined with their bastard children should, after two months have elapsed, and themselves and their children have gained strength, be compelled to seek service in Sydney, or the Board should have the power to compel them to go into the interior and seek situations, the Board paying their passages up to the principal townships.

1815. What would you do with them when they arrived there? I am sure the bulk of them would get immediate employment, and many would get married, and thereby the institution would be relieved of these persons, who are continually making a practice of being confined there, and either of getting rid of their children, and then going back to be confined with another, or else of living on the institution. During the time I have been connected with the institution I have seen instances of the most brazen and hardhearted conduct on the part of these mothers. I have seen a woman who had been three different times in the institution to be confined; upon the last occasion she threw her child down upon the grass and went away, saying she would soon get another.

Alderman
J. G. Raphael.
28 Nov., 1861.

1816. *By Mr. Alexander*: Why did she do so? Because the committee would not allow her to remain in the institution.

1817. The committee refused to allow her to remain? The committee were compelled to expel her on account of her bad conduct—her vile and blasphemous language.

1818. What was her object in throwing the child upon the grass? To compel us to take her and her child back again. I believe the bulk of these women, when they are once admitted, try their hardest to remain there; and there are but few cases where you can get them to go out and keep out. It is nothing less than a lazy, indolent home for them. I would like to state, with reference to this subject, that when the first inquiry was being made, a married woman, who was examined as a witness, stated that she should avail herself of the institution on every occasion when she was confined; for that she had found so much comfort there beyond what she could get in her own house. Her husband was a seafaring man. I was on the committee at the time, and she seemed to think it was highly complimentary, but I thought it was disgraceful that such an institution should be so abused. She said she could get ale and porter, and brandy, and other comforts, far more than she could get in her own place.

1819. What was the nature of her circumstances when she was first admitted? When she applied at first she was in distress; her husband was away at sea, and she stated that she was in destitute circumstances; but when she was before the Board to be examined in the matter of this inquiry she was in a better position, and she kindly told us that when she again needed to be confined she would avail herself of the institution.

1820. What was the nature of her recommendation when she was first admitted? It was in consequence of her husband being away at sea, and of her being left without means.

1821. Upon whose recommendation was she admitted? I cannot say.

1822. Was the party who recommended her a clergyman? I cannot say, but I think clergymen generally are too ready to give their recommendations, from Christian charity; perhaps they would not have so much Christian charity if it were to come out of their own pockets, instead of out of the funds of the country.

1823. She got admission in consequence of having a recommendation from some respectable person? Yes; and no doubt in the first instance the woman was a proper object; but she had been treated so well that she had resolved on future occasions to patronize the establishment, even when the necessity did not exist. I may state that in many cases the women who come there—servant girls who come there to be confined—have means of supporting themselves during their confinement. In one case a woman living in service on Church Hill came there with an order from some clergyman for admission to be confined, and we elicited from her that she had been in the habit of seducing a married man—knowing at the time that he was an engineer, living at Pyrmont, and a married man—of inducing him to come over to her mistress' dwelling and to cohabit with her; and that on these occasions she used to get hot suppers for him. The woman admitted that she had been receiving good wages—ten or twelve shillings a week; she represented that at the time she had no means. I opposed her admission, but was out-voted by the other members of the committee, who stated, perhaps properly, that as the woman stated she had no means we were bound to receive her statement. That woman told me herself in the ward that when she went out she should know where to come again the next time.

1824. *By Mr. Sutherland*: How long did she remain in? I think she managed to remain in three months. I think the luxuries provided for them are the great inducements for their return.

1825. *By the Chairman*: I believe some of them, or at least one of them, has been confined there three times within four years? Yes; and that one told me on the last occasion that we might do what we liked,—she would come in when she pleased, would go out when she pleased, and that she meant to have another, and would be in again shortly.

1826. She told you that? She told me that in the establishment.

1827. Do you not think these persons should be compelled to work when the medical officer reported them to be sufficiently strong? Yes; my opinion is that they should all be compelled to work, and earn their own living.

1828. There would be no difficulty in getting different kinds of work upon which to employ them, in order that they might earn sufficient to meet their own expenses? That might be injurious to artizans in the town. I think the best course would be to send them into the interior, where they would not be known, might get into service, and become respectable members of society. If they are kept in the Asylum, at needlework, they will abscond, get over the walls, and in a short time come back again in the family-way.

1829. You could not compel them to go into the interior? I think the institution taking them in under such circumstances ought to have the power. If they have not the power I think there should be an Act passed to enable the committee to compel them to go into the interior. It would be better than to allow them to bastardize the city to the extent they now do.

1830. Do you see any objection to their obtaining work from the city—it could not possibly interfere with the labour of other women to any extent? I am sure it would; I know many respectable

Alderman J. G. Raphael. respectable women who are now working for a mere pittance, and the labour of inmates in the Asylum would come into competition with theirs.

23 Nov., 1861. 1831. Do you think the institution should have the power to sue the fathers of these children for the expenses incurred while the women are in the institution? I think the institution should not only have the power but should be compelled to do that.

1832. That is, where the fathers could be found? I think that would be the means of putting a stop to the present proceedings.

1833. Do you think there should be a separate institution for lying-in women? I am of opinion that it should be separate altogether.

1834. Under a separate management? It could be a separate wing of the same establishment, but the inmates could be kept entirely apart.

1835. Do you not think there should be better means of classification than they have in the present institution;—we find from the evidence we have taken that many decent married women go there, whose only fault, if fault it be, is their poverty, and some of the worst characters in Sydney may be lying in the next beds to them; do you think that a desirable state of things? I think alterations should be carried out in the lying-in wards to this extent,—that there should be a separate room for married women; a second room for girls who have come in for their first accouchement; and a third room for incurables—common prostitutes. I think that many of the young girls who come there for the first time, though they have erred, should have the opportunity, if they have the desire to reform, and that if these were forwarded into the interior they might become respectable members of society.

1836. *By Mr. Alexander:* You say that some work should be found for these women? Yes.

1837. Have any attempts been made by the committee to make them work? Yes, repeatedly, but they will not do it; they know the committee have no power of compelling them, and they will not do it.

1838. You just now made some objection to the management, on the ground that there was no work for the women to do? There are lots of work for them to do, but the cause of their not being able to do it is their children; the mothers will not part with their children, and we have not the means of compelling them. There would be an outcry on their parts, if required to go into the wash-house or drying ground, that their children would fall sick if they left them; and they are prepared with evasions of all kinds to stultify any efforts to make them work. I think it ought to be compulsory upon the inmates that they should do the work of the institution.

1839. You are aware that certain women are put to the wash-tub—what is the nature of the difficulty the committee have to contend with to make them work? I know that certain women ought to be put to the wash-tub, but from time to time they cause a large amount of trouble. The committee have sometimes to threaten that if they do not work they will turn them out; and the Rev. Mr. Dougal and myself, on one occasion, turned out five or six in one day, for their insolent conduct to the matron, and their stubborn refusal to work.

1840. Are you aware that the question of baking the meat to be supplied to the inmates has ever been brought before the Board? Yes.

1851. What has been the difficulty in the way of that? It has been objected to on the ground that it would create an immense amount of labour, and that the provisions would not go so far.

1842. Has there been any inquiry as to bread being baked upon the premises? I believe that has been brought up and objected to; but from my experience as a director of the Destitute Children's Asylum, where they bake their own bread, I am convinced there would be a large saving.

1843. What was the reason this matter was not carried out? I have understood from the honorary secretary that the expense of an oven would be too great.

1844. Was it not that the building was not of sufficient extent? I believe there is ample room.

1845. Are you aware that there is not a store room capable of holding a ton of goods? I believe you would not have had the store you now have, if it had not been for the present committee, and that if a larger one were required there is abundant room where it could be erected.

1846. That is your opinion? Yes; it could be placed in a similar position, on the opposite side to the last new store erected.

1847. You said something as to the management of the garden—are you not aware of the cause of the destruction of the vegetables which should have supplied the house? I believe the want of supplies from the garden is from want of the garden being properly cared for.

1848. Are you not aware that there has been a disease among the vegetables—the aphids—which has destroyed them? The principal disease is the laziness of the inmates, and the want of proper care.

1849. You say you have been to Liverpool, and that the inmates get no vegetables there? While I was there they had no vegetables. The inmates complained that the vegetables they ought to have had, had been sent into the town.

1850. Another matter you have set forth, about women being sent into the interior—have not women at any time been sent into the interior, and have not their passages been paid for by the institution? Not to my knowledge.

1851. Is it not within your knowledge that several women have been applied for and sent up the country? As wet nurses?

1852. Have not even wet nurses been sent into the country, and have not they in a few months returned to the institution? I believe there have been some few cases.

1853.

1853. You seem to recommend strongly that Government should sanction the appointment of the chief officer—will you state, for instance, when we have required a doctor, an under secretary, or accountant, what has been the mode of electing those officers by the present committee? I believe the present committee elected as good men as they could have got for the salaries.

Alderman
J. G. Raphael.
28 Nov., 1861.

1854. Do you consider that there have been any great improvements made in the institution during the last two years? I do; very material improvement.

1855. In what way? As regards the management; in the mode of discharging their duties by the servants, and in the economy of the expenditure. I would like to say that I do not think sufficient care has been taken by the medical officer to eradicate that pest, the itch, from the institution. I am convinced that it might have been done, as in the other institution, to which children are continually drafted who have some remains of the disease; it has been entirely eradicated.

1856. You are a director of the Destitute Children's Asylum; I am.

1857. How long have you been so? About five years.

1858. Do you know the site which has been selected for the new Benevolent Asylum? Yes.

1859. Do you know the exact spot? Yes.

1860. What is your opinion of that site? I think it is a very excellent situation, and that the Government ought soon to make it over to the directors, and thereby enable them to take immediate steps for the erection of a new building.

1861. What is your opinion of the salubrity of the locality? I think it is a most healthy situation, and that the Government ought to urge upon the directors to get things into fair building order as soon as possible.

1862. Are you aware whether the committee have any means of punishing any of the inmates who may misbehave themselves? They have none whatever—not even by stopping their rations, consequently, when they please, they set the Board of Directors at defiance.

1863. *By the Chairman:* Is it not in the power of the committee to expel them? It is.

1864. Is it not also in the power of the committee to stop their rations? If they were to stop their rations other inmates would give them some of theirs, and this cannot be prevented, as there is no means of keeping those who may misbehave from the other inmates. With regard to expelling them, many of the women who have children are in delicate health, and it often happens that these are the most disobedient. It would be impossible to expel them under such circumstances.

1865. The new building is not likely to be completed under four or five years? I think if it were commenced at once, in two years it might be brought into use.

1866. Do you think the present objectionable mode of cooking the victuals should be continued? I do not; I think it should be altered immediately.

1867. The expense that would be incurred would be merely the cost of building an oven? I believe the cost of an oven and a proper shed would not exceed £100.

1868. *By Mr. Alexander:* Are you aware whether at any time the inmates have been supplied with baked meat? I am not aware of my own knowledge.

1869. Have you heard so? I have heard that once or twice at Christmas time they have had roast beef.

1870. Have you not heard that they expressed themselves as better satisfied with boiled than with roast meat? They have not told me so; they have given me a very different version. There is one matter I would refer to with regard to religious separation; I think some endeavour might be made to keep invalids of different religious persuasions separate; as at present if a Protestant minister is delivering a lecture to or praying with a patient of his own religion, the person in the next bed may be a Roman Catholic and make a mockery of it; and the same thing may be done by a Protestant inmate when the priest visits those of his flock. With regard to outdoor relief also, the applicants should be classed under the heads of the different Churches to which they belong. I know that many impositions are practised by Roman Catholics going to Protestant ministers for recommendations. In one case, a woman who was a Protestant went to Archdeacon M'Enroe, and represented herself to be a married woman and a Roman Catholic; she was afterwards proved to be a single woman. I asked her how she could go to a respectable clergyman and practise such a cheat? She said her circumstances were desperate and they made her desperate. She was in labour at the time, otherwise I would have prayed the committee not to have admitted her. Catholics come before the committee with recommendations from Protestant clergymen, and Protestants with recommendations from Catholics.

1871. Are you aware whether the committee countenance that system—have they not often refused to receive the recommendation? In consequence of the complaints of the Roman Catholic priests, as also of myself, the matter has been brought under the notice of the Board, and the committee now set their faces against it. I know that a large amount of fraud has been practised by Protestants, who have come with certificates from Roman Catholic clergymen, and got rations to which they were not entitled. I believe that if an account were kept of the religion to which the various applicants belonged this would be a great check upon frauds of this kind, as the ministers of the different religions would be likely to be best acquainted with the circumstances of the people applying to them.

1872. You are a very regular attendant at the Board? I am very seldom absent from the meetings.

1873. Of course you take good care that these abuses of which you complain shall not be continued? I have been compelled, in consequence of being over-voted, to submit. I say that in every case where impositions are brought before us we ought to check them. Now I have known cases where it has been shown that people have been receiving much larger out-

door

Alderman J. G. Raphael. door rations than they were entitled to, and have had money besides for rent; in such cases the Board, in their mercy or charity, have stopped the money but allowed the rations to them; but I think it is the duty of the committee to deal with these cases as they would do if it were at their own expense, and to check the thing at once.

28 Nov., 1861.

1874. Have your representations had any weight in these cases? I believe they have on many occasions, and that the committee, if they have erred at all, have erred from too much mercy and kindness to such parties; but I am afraid if the money came out of their own pockets they would be much more cautious of their charity. I would suggest the advisability of the directors being in connection with the Inspector General of Police, to have the various inspectors to inquire into the deserving and worthy objects of out-door relief, they having a far better mode of getting said information than the present master, who being so well known in many neighbourhoods, from his repeated inquiries, that it frustrates his getting the proper information; no sooner is he seen in any neighbourhood than all are on their guard—"here is the poor-house man"—and consequently many abuses exist that otherwise could be stopped. Furthermore, a larger number of tradesmen ought to be on the committee, as I consider it would greatly assist the better working of the institution.

Mr. Frederick Ropier Robinson examined:—

Mr. F. R. Robinson.

28 Nov., 1861.

1875. *By the Chairman:* You are a director of the Benevolent Institution? I am.

1876. How long have you been so? Nearly two years.

1877. Were you on the first Committee of inquiry mentioned by Mr. Raphael? Not the first inquiry.

1878. Were you on the second? I was on the second.

1879. What was the nature of that inquiry? It was with reference to charges made against the acting secretary or clerk, Mr. Johnson; against the master, Mr. Mansfield; and the matron, Mrs. Mansfield.

1880. What was the nature of these charges? The charges were generally very frivolous, that is in their proofs particularly. The greatest charge against Mr. Johnson was that he had detained some money which ought to have been paid to a person who was leaving the institution. That charge Mr. Johnson satisfactorily explained by producing his books, to the Committee of inquiry, which proved that the money was in the funds of the institution, and that if there were anything at all due to the man who had left it was still due by the institution.

1881. What were the charges against the master? The principal charge against the master was as to his having appropriated the proceeds of the sale of bones and fat. This Mr. Mansfield satisfactorily proved to the Committee to be unfounded; he proved that all the bones and fat which had been produced in the institution had been sold and credited to the institution—that the institution had received all the proceeds. He shewed also that he it was who instituted the saving, and that when he first came they were thrown away, or that the bones were used as fuel under the copper; that it was at his instance entirely that the bones and fat were made available, and proved by receipts and documents that he had paid over to the institution all the proceeds during the period of his management.

1882. Then the whole of the charges against the master, as well as against the acting secretary, fell to the ground? Fell to the ground entirely. They were considered by the gentlemen who formed the committee—of whom Mr. Plunkett was the Chairman, and Mr. Moutry, Mr. McArthur, Mr. Raphael, myself, and I think, but am not sure, another gentleman, were members—to be unfounded. They were satisfied that they had arisen from mere conversation and report among the inmates, and were almost entirely without foundation; that is, that they were without foundation as to criminality, and the parties were quite exonerated by the Committee.

1883. What were the charges against the matron? The charge against the matron was for keeping fowls upon the place, and supplying the institution with eggs at double the price they could be purchased for outside. The reply of the matron was, that the fresh eggs which had been laid by her hens had been used for the benefit of the institution, but that in no case had she charged so much for them as would have been paid if they had been purchased out of doors. I think she charged something like 1s. or 1s. 6d. a dozen when they were sold at 1s. 6d. or 2s. at shops in Sydney.

1884. Were there any other charges against the matron? I do not recollect that there were any other charges on that occasion.

1885. You were present when Mr. Raphael was examined—do you know anything about the circumstance to which he referred, of brandy having been missed? No, I never heard of that; I am not upon the acting committee, and therefore, although I attend very often, I do not attend weekly.

1886. You accompanied Mr. Raphael to Liverpool? I did.

1887. Do you bear out Mr. Raphael in his evidence, with reference to the institution in Liverpool? In what way?

1888. With reference to the vegetables, and the instructions given to the master, that if there were any deficiency in the supply of vegetables he was to obtain them from the town? I never heard such instructions given. I always understood that the garden produced sufficient vegetables for the purposes of the institution; such was the assertion of the master. I did not know that vegetables formed a part of the diet, beyond what were put into the soup. On all occasions when I have been there I have given particular attention to the quality of the soup, and I have found it very good, with apparently plenty of vegetables, and that was the extent to which vegetables were used, as I understood, in the institution.

tion. As I before said, I was not aware, nor am I at the present time, that vegetables were given simply as vegetables; but that the instructions were that vegetables should be given in the soup to the fullest extent that it was necessary for the master to give.

1889. Do you not think it is desirable that, where a large number of aged people are thrown together, as they are in this Liverpool institution, that a great proportion of vegetable diet should be provided for them? Yes.

1890. Is it not much more desirable even than that they should have a large proportion of animal food? Yes, decidedly.

1891. It appears from the evidence given before the Committee that they are abundantly supplied with animal food, so abundantly that a great portion is sent back to be thrown away, but that there is a great want of vegetable food. There are many private families which have a larger garden than that at Liverpool, and that is expected to supply vegetables for 380 persons? I quite agree that the garden is not large enough to supply vegetables to be used as vegetables, though it may supply sufficient to put into the soup.

1892. Do you not think the committee should take steps to supply this institution with vegetables? I believe they are supplied with potatoes lately.

1893. Within the last fortnight or week? Within a short time.

1894. You have heard the evidence given by Mr. Raphael, with reference to the females who take advantage of the institution to be confined there—do you approve of his suggestions in that respect? Not of all. I believe that the use of the institution as a lying-in hospital is entirely foreign both to its capability and to its intention. I believe that the two institutions should be perfectly separate; but the fact of there being no lying-in institution in Sydney renders it a matter of charity and necessity that they should be admitted there.

1895. A matter of necessity more than of charity? A matter of necessity, and also of charity, that the Benevolent Asylum should receive parties applying in that manner. If a female applied to be admitted, and stated that she was within a few days of being confined, that she had no home, no friends, and no means, and were to say, "You must either receive me or I must lie down in the street"—and these are the circumstances under which these characters appear before the committee—the committee would be compelled, as a matter of Christian charity or of common humanity, to receive her. But, at the same time, I think all the committee are thoroughly convinced that the reception of this class of cases is quite foreign to the object of the institution.

1896. What would be the objection to having a lying-in institution in connection with the Benevolent Asylum—If there were a separate wing devoted to that purpose, do you not think it would be an advantage to have the lying-in institution under the management of the same committee as the Benevolent Asylum? I scarcely think it would; the circumstances are so entirely different. The Benevolent Asylum is a receptacle for invalid, elderly, worn-out people, in the last stages of life, who have no means of helping themselves; but it is very different with people who avail themselves of the institution for a short time for the purpose of lying-in.

1897. In one of the wards visited by the Committee they found 36 mothers with their 36 infants, and some 32 aged and infirm women from 60 to 95 years of age; now I think the greatest objection to have a lying-in hospital in the same building as a Benevolent Asylum is the association of these old people with young women and children under such circumstances? No doubt; that arises in the present institution from the want of a sufficiently extensive building to afford the means of classification. If it is intended that the two institutions—the lying-in hospital and the Benevolent Asylum—shall be carried on by the same committee, it is absolutely necessary that your suggestion shall be carried out, that there shall be a separate wing, and separate rules for the management of the two institutions. The circumstances of the two are so different, that different sets of rules and regulations would be required for their management.

1898. You heard my question to Mr. Raphael, with reference to the classification of these females. From information we received from the wardswomen and others, we find that respectable married women, who are compelled to go there from poverty, are sometimes lying in beds next to common prostitutes of the worst character; do you not think there should be at least three wards to afford the means of classification? I have no doubt about it; it would have been a great advantage to the present institution if that could have been carried out there. One of the greatest difficulties the committee has had to contend with has arisen from the fact that they have been unable to classify these women; it has given rise to great dissatisfaction, and has been a prolific cause of insubordination among the inmates at times.

1899. In going through the institution at Liverpool we found men suffering from syphilitic and cancerous diseases lying in the same ward, and almost in the same beds, as men who were in a good state of health excepting the effects of age, and that from the crowded state of the institution there were no means of classifying the inmates. We also learned that in the immediate vicinity of the Asylum there was a house which had been purchased by the railway authorities, and that the Government were making little or no use of it except as a residence for the railway porters. The doctor said if he could obtain that house he would have the means of classifying the patients—Are you aware whether the Board of Directors have made any application to the Government to grant them that house? I am not aware that any application has been made, but the subject of classification has often been a matter of discussion with the committee, from an anxious wish to do their best, but I do not recollect that any particular application has been made for that building.

1900. There are a great number of children in the Sydney institution—I am not now speaking of infants, but of children from the age of three years to the ages of ten or twelve years; we found that there were two schools—one a Roman Catholic and the other a Protestant—

Mr. F. R.
Robinson.

28 Nov., 1861.

Mr. F. R.
Robinson.
28 Nov., 1861.

Protestant; and from the schoolmistresses we learned that the children were suffering, and had suffered for the last two years from the itch—Are you aware that that disease has made its appearance in the Destitute Children's Institution, and been eradicated at once by the attention of the medical gentleman there—Do you see any reason why, if similar attention had been paid to the children in the Benevolent Asylum, it should not have been cured in that institution? I do not. I understand that the disease is almost all but eradicated there; that it does not exist to any extent at the present time.

1901. Are you aware that the children are all washed in the same water—that the water is not changed? No, I am not.

1902. Are you aware that the children all sleep in the same ward? I am aware that they do so, that there is one room appropriated to the use of the children.

1903. I will read the evidence of the wardswoman on this subject. (*The Chairman read the evidence of Mrs. Stone, Nos. 355 to 362*) Do you think this a probable mode of getting rid of the itch? Decidedly not; I consider it most reprehensible conduct on the part of those who have the management and immediate care of the children, and quite contrary to the instructions of the directors.

1904. I asked the nurse if the water were laid on, and she said, "Not in that ward," but at the same time the Committee saw, within a few yards of the ward, on the landing, a tap to which the water was laid on, so that this woman would not have had to carry the water above six or eight feet? Indeed, if application had been made to the committee, a piece of pipe might have been added, so that the water might have been laid on to the room. There is an abundant supply of water there, and the committee were not aware that such a state of things existed.

1905. I asked her, "Is the same plan pursued in washing the faces, hands, and feet of the children?" and she replied, "No, we are obliged to change the water then, because it is sometimes very dirty? I suppose it is a bath of such capacity as to be able to hold a large amount of dirt without its being seen.

1906. I presume they are not likely to get rid of the disease there while this manner of cleaning the children is adopted? No, I should say not.

1907. Do you not think it would be better to have a uniform dress for the inmates of the institution? I see no objection to it, provided that uniform dress be adaptable to comfort, convenience, and economy.

1908. You are, I suppose, acquainted with the site on which it is proposed to erect the new Benevolent Asylum? I am not aware of the exact spot, although I know the site pretty nearly; I know the locality.

1909. Of course, if the institution were established at Randwick, that would entail the necessity of having a dépôt or receiving house in Sydney? No doubt it would.

1910. Where it would be necessary to have several beds and the means of distributing outdoor relief? Some office would answer all the purposes, for I apprehend that any person received need not remain longer than one night and a day.

1911. Do you think it desirable that the managing committee should hold their meetings at the dépôt in Sydney, or at the main institution? I am a great advocate for the meetings of the managers being held at the institution itself.

1912. There would be many advantages in that? There might be great advantages from the fact of holding their meetings upon the spot. They would be ready to see and hear what was going on, and to receive any information necessary for the guidance and management of the institution.

1913. With reference to the cooking of the food of the inmates, do you not think it desirable that there should be some other mode of cooking than that adopted in the institution. At present there is no change, from day to day, from week to week, from year to year, they have their food cooked in the same way; nothing but boiled meat. Do you not think they should have their meat baked once or twice a week? Looking at the matter from my own experience, no doubt it is desirable, inasmuch as the larger proportion of the inmates of the institution are those well advanced in years, whose appetites are not good, and a change of that kind might be a very great comfort; but as far as economy goes I fancy the system adopted—that of boiling the meat—is far the best, and also as far as nourishment goes.

1914. It is not usually considered so? I may be wrong—it is my individual opinion—and I have been led to believe that boiled meat and soup are more nutritious than baked meats.

1915. *By Mr. Sutherland:* You have stated that you know the locality at Randwick which has been chosen for the Benevolent Asylum, but that you do not know the exact spot—do you think that a good site for the purpose? I do.

1916. You consider it an advisable place for a Benevolent Asylum? I consider the locality pointed out as the spot upon which the new buildings are to be erected is every way suited for the institution, as far as regards the purity of the air and the general salubrity of the position, and I believe that an institution of that kind would be far better removed from the centre of the city. The advantages would be very great in every particular, as to the health of the inmates, the ability to conduct it in a proper, wholesome, and cleanly manner, plenty of room, and means of classification. The institution would receive great benefit from all these things in such a position.

1917. *By Mr. Alexander:* In connection with this inquiry which took place you have heard the evidence of Mr. Raphael, who set forth that the committee was almost as corrupt as it could possibly be if it acted contrarily to his views; that it was only by carrying out his views and suggestions that the institution could be benefited—do you recollect what conclusion the committee came to with reference to this charge against Mrs. Mansfield of selling eggs? The report of the committee was that the whole of the charges made by the man

Brehany

Brehany were entirely without foundation, and that they had arisen from the common gossip of the place among a parcel of old women.

Mr. F. R.
Robinson.

1918. What I want to arrive at is this, what conclusion did the committee come to with regard to Mrs. Mansfield keeping poultry? The result of the inquiry was, that the committee determined no poultry should be kept on the place, that the clerk's (Mr. Johnson's) horse should not be kept on the premises at night. There were several other little matters; there was the matter of a sheep having been fed on the premises; in fact the charges were so trivial that Mr. Plunkett expressed the utmost disgust at the attempt which had been made to injure the character of the parties charged. At every examination we entered into the charge fell to the ground, or resolved itself into some common gossip among the old women; we traced it to somebody said this, Mrs. So-and-so said the other.

28 Nov., 1861.

1919. To prevent any scandal or talk out of doors, it was determined by the committee not to allow the mistress to keep fowls, or, though it was actually a benefit to the institution, Mr. Johnson to keep a horse there? I did not mention before that one of the charges against Mr. Johnson was that he kept a horse, which was fed with some of the stores of the institution. Mr. Johnson proved, by producing bills, that he had purchased chaff and corn, that the horse never used anything else, that the bran was used by the cows, and that in no case was the horse fed with anything of the same description as the stores of the institution. There was another charge with reference to the horse, namely, that it was attended by one of the inmates, who was paid out of the funds of the institution. The result of the inquiry into this charge was, that the man who took the horse from him and led it away when he came in, was the man who had charge of the hot water, and who for performing the duty of lighting the fire received a gratuity of a shilling a week from the funds of the institution, and that was the ground of this charge. That was the character of all the charges made before the committee; they all ended in similar results. The committee sat, I think, for five or six days, and went through voluminous evidence. Another charge was, that Mr. Johnson had permitted a man named Cox to have some important books to copy; that also fell to the ground; Mr. Johnson proving that the only book he had was one which contained a list of out-door pensioners. It appeared that he had once taken it out of the office to a convenient spot, to fill it up. When we came to investigate the charge it was found to be entirely without the animus or foundation which it had in appearance.

1920. *By the Chairman:* I presume if there had been anything wrong in the accounts Mr. Johnson would not have been likely to have allowed Cox to look over the books? There was also some charge about erasures in Mr. Johnson's book made by this man Behany. When the committee came to investigate this charge, it appeared from the statement of Behany that he had been told by somebody else, and that somebody else had been told by Cox, that some changes had been made in the books as to receipts or payments on certain days, and that the item was found to have been erased. Mr. Raphael, Mr. Moutry, and myself, were very particular upon that point. We went through the books for a long time both before and after the dates stated; we held the pages of the book up to the light to see if an erasure had been made, and no such erasure exhibited itself, but we found that a corresponding entry had been made on this particular day in a proper and regular manner; there was no erasure, and nothing to substantiate the charge.

1921. Considering that the amount paid from the General Revenue of the Colony is fully twelve-thirteenths of the money expended by the institution, do you not think it would be more satisfactory to the committee, to the Government, and to the public generally, that a Government Inspector should be appointed, it being clearly understood that he should have no control over the management, but should simply inspect the institution, perhaps monthly, and make reports in duplicate, one to be sent to the committee, and one to the Government? Taking into consideration the amount of money which the Government are called upon to supply to this institution, I do think they should have a considerable voice in its management; but whether that would be better carried out by means of an inspector, or whether by the nomination of a portion of the directors, is the question. Of course, in managing an institution of this kind, it is absolutely necessary that there should be a feeling of unity among those who have the management; I mean that it would not do for any part to feel that they were overlooked, or affected by a power over which they had no control. I think it possible that a mixed committee, partly appointed by Government, and partly elected by the public, would work very well and amicably together.

1922. Do you not think that these women, particularly the inmates generally in the institution, if able, should be compelled to work? I think providing employment for the inmates of such an institution is the best means of keeping them out of mischief, of keeping them healthy, and in every way an advantage both to them and to the institution.

1923. If they were compelled to work, they would not come into the institution except from necessity? Certainly.

1924. Such a system would be advantageous if it could be effected, but the difficulty would be to find the kind of work at which they could be employed. For instance, if you had the institution at Raudwick, where you had plenty of land, could they not work in the garden, produce their own vegetables, and if they had anything to spare, send it to market—do you not think in such an institution it would be possible for the inmates to provide for their own necessities, to bake their own bread, milk their own cows, grow their own vegetables, make their own clothes—would not these various occupations be a source of employment to the inmates, and a saving to the institution—is it not contrary to common sense that people who are maintained out of the public funds, and who are capable of working, should have others employed for them to bake their bread, to cook their food, to wash their clothes, and to clean their wards? I think it foreign to anything like economy and comfort, that anyone should be employed and paid for doing for them what they can do for themselves.

1925.

- Mr. F. R. Robinson. 1925. In looking over the establishment at Liverpool, we found that a great number of wardsmen were paid what, I believe, the Committee considered to be high salaries, for doing that which the inmates should be compelled to do for themselves; they learned that the wardsmen were compelled to pay the inmates a 1s. or 1s. 6d. a week to assist them in keeping the wards clean—do you not think that the hale portion of the inmates should be compelled to clean up the wards, under the direction of one general wardman? I do think so, and I have always been under the impression that such was the system carried out in the present institution; it should be so; the only person who should be paid is the head wardman, he has a certain duty to do and is paid for it.
1926. Perhaps I am not understood; when I say one wardman, I mean one for the whole establishment, not a person for each ward, as is now the case. If you look over the evidence you will find that at Liverpool, wardsmen in some cases receive as much as £30 a year, for looking after one ward, and that they have to pay the inmates something to induce them to assist. Do you not think that at most two paid wardsmen would be sufficient for the whole requirements of the institution, the inmates being compelled to assist in the performance of the duties? Upon inquiry, I think you will find that these wardsmen who are paid are set apart to attend upon the sick and infirm, upon patients who are unable to wait upon themselves, and these inmates who are paid by them cleanse after them, bring the food and necessary utensils to the patients as they lie in bed.
1927. Have you any further information you can give to the Committee? Referring to the inquiry upon the charges by Brehary:—One important result arose out of these investigations, viz., an improved system of book-keeping. The Committee of inquiry found the previous books of the institution so deficient in detail, so inexplicable in themselves, that they recommended at the earliest possible date the whole should be entirely done away with, and a new set kept, in which a more modern and mercantile system should be adopted; hence it became, in the election of clerk a short time afterwards, an imperative qualification, to be capable of keeping books by double entry, &c., as is now carried out in the institution. Referring to the question relative to the washing, &c., of the children, I would recommend:—In any future establishment a special attention and preparation of all necessary apparatus for sanitary purposes, such as abundance of water close at hand, hot and cold baths at all times available, and such sanitary regulations and surveillance as to render impossible any evasion of this most essential part of the management and well-being of such institutions.

TUESDAY, 3 DECEMBER, 1861.

Present:—

MR. ALEXANDER,		MR. LOVE,
MR. HARPUR,		MR. SADLEIR.
J. LUCAS, Esq., IN THE CHAIR.		

The Reverend Alfred Hewlett Stephen called in and examined:—

- Rev. A. H. Stephen. 1928. *By the Chairman:* You are a Minister of the Church of England? Yes.
1929. Of what parish? St. Paul's, Redfern.
1930. You are aware that this Committee has been appointed by the Legislative Assembly to inquire into the adequacy of the provision made for the destitute through the instrumentality of the Sydney Benevolent Society? Yes.
1931. You have been a frequent visitor at the Asylum in Sydney? I have been on the committee for twelve years next month, and moreover, when I was Curate at Christ Church it was my duty to visit there as well.
1932. Is Divine Service held in that institution by the members of your Church? The Reverend Mr. Allworth holds service there every Sunday, and once or twice a-week besides.
1933. I believe service is held there by ministers of various religious denominations? Every facility is given. The Church of England clergyman is paid out of the Church Society's funds; he is the paid Chaplain to the Infirmary, and also to the Benevolent Asylum.
1934. You are aware, I suppose, that the place is very crowded? Yes, the place has been overcrowded ever since I have known it.
1935. You are also aware that a great number of females take advantage of the institution, for the purpose of being confined there? Yes; and I have myself recommended many for admission during the last twelve years.
1936. The Committee, in going through the institution, found in one ward thirty-six infants with their mothers, and some two or three and thirty aged and infirm women, ranging from 65 to 95 years of age—do you think it desirable, taking into consideration the character of many of these persons, that the inmates of this establishment should be classified? I consider it highly desirable. It is a subject which has occupied the attention of the committee, to my knowledge, during the last ten or twelve years; but they have no means—no accommodation for classification, otherwise that would have been done long ago.
1937. The Committee also found that there were many respectable married women, whose husbands perhaps had deserted them, or who for some other cause were compelled to take advantage of the institution, to be confined, and perhaps lying in the next beds to them might be persons of very bad character—do you not think there should be some means of classifying these people? I quite think so; in fact the evil has struck me as being so great that I have always recommended poor people, respectable people but in indigent circumstances,

not

not to go there, and have done all in my power to keep them away, in consequence. I consider that one of the principal objects of the institution is lost sight of in consequence of our not having a ward or wards where indigent people of respectable character could be placed. For a respectable married woman to be in the next bed to a diseased prostitute is a state of things which cannot be approved. Not that I know of such cases having actually occurred, but, from the nature of the case, it is not impossible.

Rev. A. H.
Stephen.
3 Dec., 1861.

1938. You see no reason why there should not be a lying-in institution in connection with the Benevolent Asylum, managed by the same committee, if there were a proper system of classification carried out? I think, considering that nearly all the charitable institutions are managed by the same people, the multiplication of committees would be undesirable; and therefore the more objects one good working committee—such as I believe ours to be—can carry out the better. But I should think it not desirable to have a lying-in institution under the same roof; there might be a distinct wing, completely separate, appropriated to that purpose.

1939. It might be completely separate, and particular care should be taken that no aged or infirm people should be allowed to sleep in the wards where these people were confined? Yes; I think so. For the same reason I cannot see any good cause why the Benevolent Society, supposing we had proper means of classification and so on, could not undertake this very necessary work that Dr. Douglass and others contemplate, by forming a society to be called the Indigent Room-keeper's Society.

1940. The Committee found a great number of children in the institution between the ages of three and fourteen—do you think it desirable that children of that age should be kept in an institution of that sort for any prolonged period? Certainly not. With reference to that, I may mention, as Secretary to the Destitute Children's Society, we have been in correspondence with the Government, and have in fact agreed, on condition of the new wing being erected to the Asylum at Randwick, that we will take all the children now receivable into the Benevolent Asylum, provided they come within our rules. When our new wing shall be completed, which we hope will be in June or July at the latest, that is, provided they are free from disease such as that so prevalent in the Benevolent Asylum, the itch, we shall then be able to relieve the society of a great proportion of them.

1941. The itch, I believe, made its appearance at Randwick? Yes; but it was cured directly. I believe it was introduced there by children from the Benevolent Asylum, but we had no difficulty in curing it. It does not appear to be a chronic affair there; but then we have great advantages in the way of fresh air and means of separation.

1942. Are you aware that the Benevolent Asylum has not been free from the disease for two years? I have reason to believe that it has been there for more than two years—certainly for two years.

1943. Do you know what mode has been taken of getting rid of it? No.

1944. Are you aware that the whole of the children in the institution—those who are suffering from itch, and those who are not—are washed in the same water? I am not aware of it. I know that some eighteen months or two years ago, there was considerable dissatisfaction in the minds of many, if not all of the committee, that the then medical man had not used sufficient care in eradicating the disease; but that of course was merely an opinion, we might have been wrong.

1945. We found that the children, to the number of sixty or seventy, eat, drink, and sleep there in the same room? Yes.

1946. As many as eight in a bed, some of them lying with their heads to the top, and others with their heads to the bottom of the bed, and all covered with the same blanket—do you think such an arrangement likely to remove a disease of this nature? I should think not.

[The Chairman read the evidence of Mrs. Louisa Stone.]

1947. Is it likely that the itch will ever be eradicated from the institution while this system is carried on? No; certainly not. One of the reasons why the children at Randwick are kept so free from this disease is, no doubt, the splendid washing conveniences they have there.

1948. But there is very good convenience here, for within ten yards of the bath in which this woman washes the children, the water is laid on from the city; so that it must be idleness on the part of this woman which prevents her changing the water, and she is receiving a very good salary of £30 a year? I do not think that is very good, considering the work she has to do; we have great difficulty in getting competent women at all to do the work.

1949. It also appears that the bedding in which these children sleep is never taken down to the yard to be aired—while such a system as this is pursued, is it probable that the disease will be cured? I should think not.

1950. Are you a director of the Destitute Children's Asylum? I am a director and secretary.

1951. I imagine you approve of the site selected for the proposed Benevolent Asylum at Randwick? I have hardly made up my mind on one point, viz., the suitableness of the site. As far as its contiguity to the Destitute Children's Asylum is concerned, I think it objectionable, for reasons I will state directly.

1952. You are aware of the locality, I presume? I believe I know the place; it has a westerly aspect. (The Chairman pointed out the position on a map.)

1953. There is a range of hills which protects it from the westerly winds, and Dr. O'Brien has stated in evidence that this range forms a sort of horse-shoe, and that, if the building were erected in the bend of the horse-shoe, it would be protected from the southerly wind, and would be a most admirable situation? I was inclined to think at first—but of course the opinion of a medical man must be preferable—that it would be rather bleak for old people.

Rev. A. H.
Stephen.

3 Dec., 1861.

people. As far as the Destitute Children's Asylum is concerned, you must bear in mind that the parents of the children in that Asylum are nearly all abandoned characters; in fact the society was formed expressly to rescue the children of drunken profligate parents from the evil influences to which they were exposed. Now the parents, and especially the mothers, are from time to time the inmates of the Benevolent Asylum, and the close contiguity of that institution might therefore be a great nuisance, as it would be almost impossible to keep the mothers away from their children, which is our great design. We have no means of keeping them away, as there is at present only a fence round the institution; and at present even parents or friends have been known to come to the fence and hold clandestine communication with the children. I am afraid if you bring this Benevolent Asylum next door, as it will be practically, unless we have a high wall round our institution—which would make it like a prison, and would be very undesirable—it would be found productive of annoyance. That strikes me at present, without having given much consideration to the subject; but I spoke to the superintendent, Mr. May, because I had been asked by Mr. Hay—who is a member of this Committee, I believe—upon this matter, and his opinion coincided very strongly with the one I have just given expression to.

1954. Are you now alluding to the opinion of Mr. Hay or of Mr. May? Of Mr. May, the superintendent of the Destitute Children's Asylum. In consequence of a note I received from Mr. Hay, asking my opinion upon that point, I spoke to Mr. May.

1955. And Mr. May's opinion coincided with your own? Yes.

1956. That is the only objection you see? That is the only objection I see, provided the medical men's testimony is in favour of the salubrity of the site. I was inclined to think—but of course I attach no value to the opinion, for it was formed without having actually visited the very spot, and it is a matter for a medical man to express a judgment upon—but I was inclined to think it too bleak, and I think so still. I know that when I have ridden out to the Destitute Children's Asylum in winter or in very cold weather, it has struck me as being a remarkably bleak place, and I have thought I should not like to live there on that account.

1957. Dr. O'Brien was of that opinion when he was upon the top of the hill, but when he went to the spot where he proposes that it should be built he found that it was completely sheltered from objectionable winds—Do you approve of the present means by which persons obtain admission into the Asylum, or could you suggest any improvement? I believe it is about the best that could be devised. They nearly always get in upon the recommendation of some minister of religion, and I consider that if he performs his duty he will take the necessary pains to find out whether they are really eligible for admission; I try to do so myself, still I am imposed upon sometimes.

1958. Also subscribers to the amount of one guinea have the right of recommending persons for admission? Any subscriber to the amount of one guinea. I doubt if they take the same pains as ministers of religion can, because they can hardly be expected to give up their time to inquire into such cases. A fair proportion of my time is taken up in my parish—being, on the whole, a poor one—in investigating these cases. I feel it to be part of my duty to do this, in most cases, before I recommend to the committee for relief, and yet I am often taken in. To shew that I do endeavour to guard against imposition, I may mention that I recently looked over the list of persons receiving out-door relief, and I found that many whom I had recommended for relief, as much as three, four, or five years since, and some of whom I had quite lost sight of, were still receiving relief from the institution. I immediately struck off twenty-one families, declining to be responsible for their being deserving cases any longer unless they were sent to me for fresh recommendations.

1959. They had been on the list how long? Some had been on fully three years; the impression on my mind is, that some had been as long as five years, but in order to be quite safe I will say three years.

1960. Do you not think, in such cases, the committee or the manager should insist upon these persons bringing fresh recommendations periodically—say every month? I think every three months would be sufficient. I believe the committee are doing that practically. Several things have conspired to open their eyes to the necessity of doing so, even more than heretofore, within the last few months. It came to my knowledge that three families in a small street in Chippendale, who had been receiving relief for a long time, were each in a position to maintain themselves. It was told me by a poor widow, and I was obliged to conceal her name, as she dreaded violence, or, at any rate, great abuse, if she were known to be the informant. I reported the cases to the visitor for inspection and his report to the committee. I believe there are great impositions practised, and I know that the rations are even occasionally sold; but though that is the case, I believe as much pains is taken to prevent imposition as the nature of the case will admit.

1961. You cannot suggest any remedy? No, I cannot; I think the plan adopted is very good:—the committee meet every Tuesday, all the cases come before them, the applicants have to bring a recommendation from a subscriber or a clergyman, the clergyman is supposed to take some pains to make inquiries as to the case, the committee cross-examine the applicant, and the master of the institution, who acts as visitor, visits during the week, or as soon as he can find time to do so. I cannot imagine any plan which would be more satisfactory.

1962. You would recommend that the recipients of relief should bring fresh recommendations every quarter, and also that the master should visit them at least every quarter? Every quarter. I do not know whether the committee could find time to do it, but I should even think with a large committee it would be not at all unadvisable—though it might perhaps be throwing too great a burden upon a number of gentlemen whose time is valuable—if the city were divided into wards, and were visited by divisions of the committee; practically I do not think the duty would be very heavy.

1963.

1963. The committee find that a great number of the women who go to the Asylum to be confined remain there many months—in some instances as long as twelve or eighteen months; do you not think every means should be adopted to prevent their stopping there after a certain period? I think every means is taken; we advertise to people in the country that such servants are procurable, as people in the country have not so strong an objection to take women with infants as residents in town. We try every means of obtaining employment for them.

Rev. A. H.
Stephen.
3 Dec., 1861.

1964. Do you not think that some work should be taken in, and that these women should be made to work after the doctor has stated that they are fit to do so? I think the grand defect of the Asylum is, that all the inmates are not compelled to work. With the exception of the sick and bedridden, all should be compelled to work. I can mention that, ten years ago, for nearly a year, I was constantly in attendance there, and was frequently the only member attending the house committee, and I often had the women and men brought before me for refusing to work; but I had no power to compel them, I could only stop their tea and sugar, and then the others gave it them. A large proportion of them can work, but some will not even take part in cleaning the place. I really think, even if a legislative enactment were necessary for the purpose, some means should be devised to compel all who were passed by the medical man as fit for work to do work of some kind. If this were done, I believe it would do more than anything else to keep out worthless imposters; for if they knew they had to work there as well as outside, they would pack up their traps and be off.

1965. The Committee found at the Liverpool Asylum the men strolling about the yard, or collected under a shed, and learned that they had nothing to do from Monday morning to Saturday night—from one month's end to another; do you not think that very objectionable? Decidedly.

1966. Have you known many cases in which the committee have received payment from the reputed fathers of illegitimate children, for the support of the children during the time they have been in the institution? I cannot charge my memory. I have known cases where the society has compelled mothers to prosecute the reputed fathers of these children, but I cannot charge my memory as to how the money has been applied. I think it is used by the institution as long as the mother remains there.

1967. I believe you are compelled to prosecute through the mother? Yes; I have known our late assistant secretary, Mr. Johnson, to take proceedings, but I do not know whether his successor has ever been called upon to do so. I have known Mr. Johnson to attend at the Police Office and watch the cases, if I may so express it, for the women. The Destitute Children's Act gives us the power to do all that is necessary; perhaps it might be well to give the same power to the Benevolent Society.

1968. That the Directors should have power to prosecute the reputed father of a child, and recover the expenses the institution may be put to by his child? Yes. It would be much better though if there were no lawyers, because almost every time we have tried a case of the kind, some sharp man or other has come and upset us on some technical point. It seems that they can drive a coach and four through any Act of Parliament.

1969. An Act may be made that a lawyer cannot drive through? I should like to see it. I am quite disheartened about prosecuting cases under the Destitute Children's Act, for we have never yet succeeded, to my recollection, and I don't think we ever shall.

1970. *By Mr. Love:* When the Destitute Children's Asylum receives children from the Benevolent Asylum, does the Government pay an annual sum for their support in the former institution? Yes; but I believe it is deducted from the sum the Benevolent Society would have received.

1971. Are you aware what is the sum given for each child? Speaking from memory, I believe it is £14 per annum. They also give us a sum for outfit—for buying beds. I think they gave us a lump sum of £300 when we received the children some time since.

1972. I think your objection to the intended site for the Benevolent Asylum arose in a great measure from this, that the children there might mingle with their parents? That the parents might come and entice them away, or make them discontented.

1973. Where would they come from? The Benevolent Asylum. Of course I cannot yet speak from experience, but I speak of what the possibility might be. That is my opinion, and the superintendent is also strongly of that opinion, unless you have high walls round the two institutions, which would make them look like prisons.

1974. Would you recommend that the children in the Destitute Children's Asylum should not be allowed to see their parents who were in the Benevolent Asylum? Certainly not; I would not deprive a parent, however bad, of the pleasure of seeing her child, but at present parents can only see their children under a sort of surveillance; they have to come to me or to the superintendent, for permission, and as long as the superintendent knows that the parent is in the institution, he sees that there is nothing wrong. If we had the Benevolent Asylum close to us the parents might climb over the fence and plot a great deal of mischief.

1975. Would it not be something like harshness, to prevent communication between parents and their children? I would be sorry to do so; I would give them every facility to see them in a proper manner, but what I fear is, secret communication, and the unsettling of the children's minds.

1976. As far as I have seen the Destitute Children's Asylum, there is a very good watch kept over the children's conduct? There is a very good watch, but children have communicated with their parents or friends, and some have even absconded, with all our care. I was asked if I had any objection, and to that question I felt bound to reply; still I do not attach any great weight to it. I think it perfectly possible the objection may be overcome. Still as it is an objection in my view, I thought it worth mentioning. If I may be allowed, there are five points to which I would direct the special attention of the Committee:—first, the

necessity

Rev. A. H.
Stephen.
3 Dec., 1861.

necessity of a new building for carrying out the objects of the institution; secondly, the necessity of proper classification; thirdly, the finding of proper employment for the inmates; fourthly, the necessity of having a legislative enactment to enable the committee to compel the inmates to work; and fifthly, the necessity of giving the committee the power to prosecute the reputed fathers of illegitimate children.

1977. *By Mr. Sadleir*: Do they destroy the clothing of children when they come in to the institution, and put new clothing upon them? I think they do, but I am not certain upon that point. I know they do in the Destitute Children's Asylum; they are there put into a bath and washed as soon as they are admitted.

1978. *By Mr. Harpur*: The inmates of the Liverpool Asylum complain that they are not allowed to work in order to obtain some little luxuries, as tobacco? I cannot say that I am perfectly satisfied with the state of things at Liverpool.

1979. *By the Chairman*: In what way? In various ways. I think perhaps it is not altogether fair for me, as a member of the committee, to speak of matters complained of, and which the committee are trying their best to remedy. When I have been at Liverpool, as one of a quarterly deputation, the men have crowded round us and made great complaints of the treatment of the master there, but it is fair to say that both we and other deputations could find no tangible ground for complaint, on closer inquiry. Still I was individually of opinion that all was not quite satisfactory. It is difficult to get at the truth, and I do not wish to throw any aspersion upon anyone, or to reflect upon my brother committee-men; but I think there is a considerable residuum of truth in the statements of the men. It is, however, extremely difficult to get at the real truth, for the men make certain statements one day and back out of them the next; or rather they cannot, or will not, substantiate before the committee that which they allege in their communication to individual members of it.

1980. *By Mr. Harpur*: When the deputation visited the institution the men made complaints to me, and when the officers or wardsmen came up, or when examined face to face with the master and local committee, they said nearly the contrary, or considerably softened their allegations; but I could excuse men placed in their position? I cannot help thinking, although it may be a mere theory, that the men might be more cheerful and more happy if they had some kind of light work. I think if they were removed to a new and capacious Asylum—and, I presume, if a new building were erected at Randwick they would be removed there—they might help to cultivate the garden, and be employed in other ways. I may illustrate what I mean by reference to the Destitute Children's Asylum:—During the time that was under the management of the late superintendent, and in the old very unsuitable building, the children had a dull, haggard, uncomfortable, "don't-care" look about them, while under the present superintendent, who is a man of a different calibre—at least of a more cheerful temperament—they are indulged by having little gardens, have gymnastic poles, and other amusements, and are allowed to plait cabbage-tree, out of school hours, and the money earned by that means is appropriated to their own use, either to be laid by or to be expended in the purchase of such things as children delight in. There is, in consequence, a wonderful change in the whole appearance of the children; they look cheerful and happy, and evidently regard the committee and officers as their friends. I was struck with the very reverse of this when I visited Liverpool; it seemed to me as if idleness had paralysed the best feelings of the inmates, and it seemed lamentable that upwards of two hundred people should be cooped up in a yard with nothing whatever to do.

1981. *By the Chairman*: The people at Liverpool are enclosed within four high walls, and they can see nothing beyond them. If you ascend the building you may have beautiful views both up and down George's River, and also see the trains on the railroad passing from time to time. Do you not think it would have a cheering effect upon the spirits of the inmates if a portion of these walls were pulled down and a paling were substituted, so as to afford them an opportunity of seeing the country beyond? I should consider it a kind of imprisonment to live in Liverpool, even outside the walls, but inside it must be even more depressing. Liverpool is about the dullest place I know.

1982. Would it not be a great improvement, and conduce to the inmates' comfort, if a portion of these walls were removed, and a light fence were put upon the top? Yes, if you could prevent their scaling the fence. I can quite imagine that the place might be improved, but if you are going to build a new Asylum it is hardly worth while.

1983. However active the committee may be, it will hardly be possible to have the new institution ready in less than three or four years. I think you may arrive at that conclusion from the length of time the new wing of the Destitute Children's Asylum has been in course of erection—do you not therefore think that if in the meanwhile anything can be done to promote the comfort of these poor people, it should be attended to? Certainly.

1984. Do you not think it would be a great advantage if the walls were removed, so that at least they might see the trains pass and repass, and be able to get a breath of fresh air, instead of having nothing but the miserable brick walls to look at. It has been objected that if this were done the inmates might have spirits brought to them, but if a wardsmen were stationed there might not that be prevented? Yes. My opinion is that the man at the head of such an institution should be not a mere hireling, but a philanthropist—a man of a benevolent mind, having a sympathy with those around him; that, in fact, he should be of a higher class altogether than the men generally chosen for such offices.

1985. Do you not think it desirable that there should be a uniform clothing used? That I very strongly recommended; in fact I was chairman of one deputation to Liverpool which strongly recommended that there should be a uniform clothing, and that an order should be sent to England that a material might be woven expressly for the purpose.

1986. Do you not think there should be some means of compelling the inmates to take their bedding into the yard, to be aired. When the Committee visited the institution at
Liverpool

Liverpool they found pieces of bread, meat, old boots and other articles of clothing, stowed away under the heads of the beds; do you not think the committee should make some rule to prevent old clothing from being put under the beds? I quite think so; but in order to carry out such rules you must have a superior class of wardsmen, and to get proper wardsmen you must pay them well. We now most generally get the lame and infirm, and people of the most unsuitable description; even at the Sydney Infirmary the medical men complain of this, and say that in order to make it a perfect institution they should have a different class of wardsmen and nurses, but with the salaries we can afford to pay them we can, as a general rule, procure none but inferior people; there are, of course, exceptions. I believe that many of the evils of which you complain arise from this cause; but with the pay we are able to give for the performance of such very unpleasant duties as those to be performed by the wardsmen, we cannot get better attendants.

Rev. A. H.
Stephen.
3 Dec., 1861.

1987. The Committee, when they visited Liverpool, were struck with the difference in the condition of the several wards; in some the beds were nicely rolled up, no old boots or clothing were under the beds, and everything was in order and comfortable—Do you not think it desirable that the inmates should be compelled to attend to these matters; and that if, when able, they refused to roll up their beds, or to assist in keeping the wards clean, they should be turned out of the institution? Yes, I think so.

1988. We also found, on making inquiries at the institution in Liverpool, that no vegetable diet was allowed for the inmates there, with the exception of that produced in the garden, which was not larger than would supply a moderate family; they stated that they had no potatoes there, with the exception of twice, for some eighteen months, and that they had no other vegetables beyond what were put into their soup very sparingly—Do you not think it desirable, even if the supply of animal food were made less, to increase the vegetable diet? It is desirable, but there again the difficulty is the want of means. It would add to the expense very largely to supply the inmates with potatoes, but I have thought that a larger vegetable diet would be very desirable.

1989. The committee have never found any difficulty with the Government in getting the amount they required placed upon the Estimates? No doubt, but if all these things were done that are desirable we should outrun our money.

1990. Have you not outrun that already? Yes, I believe so.

1991. Have not the Legislature always voted the sums placed upon the Estimates for this purpose? Always; for which we are very grateful.

1992. What is your opinion of the erection of a new building on the line of railway; there are many beautiful sites to be obtained there? That is what I should prefer from the time I first heard that Randwick had been selected; I have thought it would be far more convenient if a piece of ground had been chosen either at Petersham, Ashfield, or Homebush; and I believe access by railway would be more easy for old people than jolting in an omnibus to Randwick.

1993. Land could be got upon the line of railway which would be suitable for the purpose, and of far less value than the land at Randwick? Yes, probably.

1994. I have now to approach a very unpleasant subject. Have you ever heard any complaint against any servant of the institution, as to intemperance? I suppose I must answer that question. I myself moved a resolution some few months ago that the medical man at Liverpool should be dismissed, even though we had no actual proof of his intemperance; but in consequence of there being no direct proof of the fact I was over-ruled; although I was the only supporter of my resolution, I requested that the fact might be entered upon the proceedings. We had heard in many quarters of the frequent intemperance of the medical man at Liverpool, and I had heard myself such accounts that, even without waiting for positive proof, I felt that I was justified in moving for his removal. Dr. Macfarlane and myself agreed to bring the matter forward, and he was to have moved the resolution, but on the occasion of my moving it he was unable to attend, and I therefore stood alone. The reason the committee did not support my resolution—and no doubt they were quite right—was, that they ought not to remove a man from his situation unless completely satisfactory proof were obtained, which they were not then able to obtain, though they did their best to find it. Since that time a circumstance has occurred which would, I think, enable me to adduce proof of neglect and inattention on the surgeon's part. The clerk of my church, Mr. Hudson, has had a large contract for building a bridge in the neighbourhood of Liverpool; one of his men employed upon that work broke his leg, and was taken to the Liverpool Asylum; and Mr. Hudson gave me a most unsatisfactory account of the way in which this man was treated, or rather neglected, by the doctor. I have intended to bring this matter before the committee, but have been unable to attend the meetings for the last two or three weeks, and I also thought it advisable to wait and see whether the medical men at the Sydney Infirmary would bear out this charge.

1995. Is that the only instance you have heard of? I have heard of another instance, which came under the notice of the Rev. George Macarthur. He was present when a child had a limb amputated, or in some other way operated upon, and the doctor's hand shook so much, from intemperance, that the operation was an unsuccessful or mismanaged one. That was not in connection with the institution; it was a private case. I have heard it, and I believe it is a matter of common repute at Liverpool; all the committee know it as well as I do myself, for it has been a matter of anxiety amongst us.

1996. Have any other of the servants there had a similar charge made against them? I have heard, but it is only hearsay, that the master there is given to intemperance. As a member of the committee, I think it right to state that the committee have taken every means to ascertain. I believe that Mr. Raphael and the Rev. Mr. Corish went up one night to try and catch him, but were unable to obtain any proof. I thought, proof or no proof,
that

Rev. A. H. Stephen. that as the common report was such respecting the doctor, that it would be far the safer plan to remove him, than to run the risk of allowing any of these people to suffer from his mismanagement.

3 Dec., 1861.

1997. You will see from that, that the committee are about to do something (*The Chairman handed a paper to the witness*)? The committee up there are aware of it; I know the Rev. Mr. Hodgson is very well aware of it, as a matter of report; but the difficulty is to catch him in that state.

1998. Have you heard similar charges against the servants in the institution in Sydney? No; at least I do not remember that I have heard it. No, I have not heard it; certainly not.

1999. *By Mr. Alexander*: Was not a letter once sent to the Sydney committee, by the Rev. Mr. Macarthur, complaining of the drunkenness of the surgeon and master at the Liverpool Asylum? A communication was made (not by letter) respecting the doctor, not the master; and I remember that the committee took every pains to get Mr. Macarthur to attend as a witness. He did attend one day at Liverpool, to meet the sub-committee there, but from some cause—I believe from the committee missing the train—it did not arrive there in time, and he could not go again.

2000. Mr. Macarthur would not give evidence? He attended once, as I have stated; but as the committee did not meet him, he would not go again; that is my impression.

2001. Are you aware whether the local committee are acquainted with the drunkenness of the surgeon and master? I believe they have taken every means to get proof of the fact—such proof as would be necessary in a Court of Justice—but I consider that an institution of that sort, where the interests of our poorer fellow creatures are at stake, that it is far better to do an injustice to the surgeon than to run the risk of doing so to all these poor unfortunate creatures. If the Committee like to send to Mr. Hudson, the builder, at Redfern, he will no doubt tell them the story he told me. I simply mention it on his authority, and in answer to a question of this Committee.

2002. Were you one of the deputation to the local Board? I was one of the deputation, and I think the Rev. Mr. Sheridan was with me. We met the local Board, and told them we had heard complaints respecting the conduct of the surgeon, as to his intemperance. The committee told us that they had also heard reports, but that they knew nothing definite—that they had never seen the surgeon intoxicated themselves. The doctor was before the committee, and it was the impression of myself and others of the deputation, most strongly, that he was shewing signs of liquor on him at that very moment, though he was certainly not intoxicated.

2003. Were you with the deputation at the time the local Board were requested particularly to have their eyes upon the surgeon, and were informed that, in the event of any mistake, the acting committee would consider them liable? Yes; I think we told them that we should consider them responsible, or else a letter was sent them to that effect, from the Sydney committee. I wish to say, that I believe the committee have done everything they possibly can, and in reference to my being in the minority on the occasion referred to by me, perhaps the committee took the proper course, not to deprive the surgeon of his office and his character without direct evidence, but I thought it was better to remove him from his position than to run the risk of endangering many lives.

2004. *By Mr. Harpur*: Do you think that a sound principle—that it is better to do an injustice than to run the risk of doing an injustice? I think I see what you mean, and I think you see what I mean.

2005. *By Mr. Alexander*: That to do a great right, you must sometimes do a little wrong? That is certainly not a tenable position, nor would I propound it, still, if I was firmly convinced in my own mind that the man was a drunkard, I might not think further evidence necessary, still I quite admit that the position, as you have put it, is not tenable in morals.

2006. Do you keep any register of the parties you recommend? No, I do not; but if it be thought desirable, I shall be glad to do so. A register is kept at the house.

2007. Do you not think it desirable that clergymen generally should keep a register of the persons they recommend? I keep a register of those receiving relief from our church alms, but many persons come to me for relief whom I should not feel justified in relieving out of this fund, and those I send to the Benevolent Asylum, without making any memorandum of their names.

2008. I mean, do you not think it would be an advantage, if clergymen were to keep a memorandum of the people whom they recommend? I have no doubt that the Sydney clergymen, of any denomination, would be happy to do so, if asked.

2009. It would assist in bringing them to your mind, if you found any were misapplying what they received from this charity? I have mentioned that, on looking through the register at the house, lately, I had struck off twenty names.

2010. *By the Chairman*: Can you favour the Committee with any suggestions which would promote the objects for which they have been appointed? Since giving my evidence, I have come to the conclusion that the objection which I entertained in the first instance to the site of the proposed Asylum, and which, in consequence of the medical men's opinion I was inclined to modify, is by no means a groundless one. I think it will be found that the air of Randwick will prove prejudicial to the health of aged inmates of the Asylum, and specially to those, young or old, who may be suffering from pulmonary disease. I am satisfied that a site more inland will be found to be more healthy, as I have little doubt it will be more convenient; *e. g.*, to remove a sick or infirm person from Sydney to Randwick would occupy nearly an hour, to remove the sufferer even as far as Homebush would scarcely occupy half that time, and the mode of transit would be far easier to the patient. Other reasons might be given on the score of convenience.

The Reverend John Felix Sheridan examined:—

2011. *By the Chairman*: You are a minister of the Roman Catholic Church in Sydney? Yes. Rev. J. F. Sheridan.
2012. You are on the committee of the Benevolent Asylum? Yes. 3 Dec., 1861.
2013. How long have you been on that committee? I think, as far as I can recollect, five or six years.
2014. Are you aware that the institution is very much overcrowded? Yes, I think so; particularly the institution in Sydney.
2015. Do you approve of the present mode of obtaining relief at that institution, either admission or out-door relief? As far as I can see it has been working pretty well.
2016. I presume a great number of persons come to you for recommendations? A great number for admission as inmates, and also a great number for out-door relief.
2017. Do persons apply to you whom you do not know, from other parishes? Yes, oftentimes, and occasionally I refer them to their own clergyman. If a member of another denomination comes to me for a recommendation I refer him to his own clergyman; not that I would refuse to relieve them, but on principle.
2018. Do persons come to you, for instance, who do not belong to your own parish? Yes; they may belong to St. Patrick's, St. Mary's, or St. Benedict's, and when refused by their own clergyman they might go to another.
2019. You think they should be compelled to apply to their own clergyman? Yes.
2020. Do you think the present system of allowing subscribers of one guinea to recommend people for relief should be continued? I see a good deal in favour of it and a good deal against it; but I would not wish to deprive subscribers of their right to recommend a certain number, say one or two in the year, in the same way as at the Infirmary.
2021. We find that a great number of women take advantage of the institution, for the purpose of being confined there? Yes.
2022. And the Committee also found that in the lying-in room a decent married woman who might be compelled to go in there because of her husband having deserted her, or of other causes beyond her control, might be lying in the next bed to a common prostitute, do you not think it desirable that there should be some mode of classifying such cases? I think it highly desirable.
2023. Do you think that the lying-in hospital should be a separate institution, or that it would be desirable to have it under one management, but in a separate wing of the building? If the wing could be perfectly distinct and separate, I think it would be better to have one institution. There should be a complete classification and separation in every respect.
2024. Several wards? Yes.
2025. So that the women might be classified according to character? Yes; there is nothing to prevent there being a lying-in ward.
2026. Or two or three? Yes; you might call it an hospital if you liked, with two or three wards.
2027. The wards might be smaller than the present wards? Yes.
2028. We found from the evidence, that this class of paupers has increased very much. In 1858 there were I think but thirty-five, and up to the present time in this year there have been ninety—nearly twice as many persons of this class as have been admitted during the whole of any previous year? Yes.
2029. Can you account for that in any way? I am well aware of the fact; the members of the committee have frequently made it a subject of conversation, and have endeavoured to account for it. Various opinions have been expressed; some have thought whether it can be attributed to the facility these persons have of getting into the institution.
2030. Do you not think power should be given to the institution to compel these people to work, after the doctor has reported them able to work? I was going to proceed to make that remark. I really think in the first instance they are allowed to come in on very easy terms, and afterwards they are not obliged, when they are able, to work. Of course I would not be hard on those who are not able.
2031. But when the doctor reports them as able to work you would compel them to work? Yes.
2032. The Committee found that some of these women had been there twelve months who were evidently able to work, and upon asking if they could be compelled to work, it was said there were no means except by turning them out, and that if they were turned out they would soon be in again; do you not think if they were compelled to work they would soon find employment outside? It is all very well to say oblige them, but it is very difficult to oblige them. I have known some instances where it has been impossible. We have no alternative but to turn them out, and if we did so they would lie in the streets, and their last state would be worse than their first.
2033. Could they not then be punished as vagrants? Yes, they could be punished certainly. We are obliged, from the nature of the institution, it being a charitable institution, to take the most lenient view, and to adopt the most merciful course under all the circumstances.
2034. *By Mr. Love*: Do you not think if a gratuity of tea and sugar, or some other comforts, were given to these people for working, it would be an inducement to them? I believe that is the case at present.
2035. *By the Chairman*: If you gave them short allowance for not working, it appears to me that that would have the effect of keeping many out of the institution; it is because they are treated too well there that they remain. One instance was brought under the notice of the Committee of a woman who had been confined there three times in four years, and of others who said that they would come there whenever they wanted to be confined, as they found themselves so well treated and comfortable; do you not think some means should

- Rev. J. F. Sheridan. be taken to compel these women to work, or to make the institution less comfortable for those who would take advantage of it in this way? Undoubtedly.
- 3 Dec., 1861. 2036 Do you know the proposed site for the new institution at Randwick? Yes.
2037. Do you approve of that site? I must say I do.
2038. You heard the evidence given by the Rev. Mr. Stephen? Yes; I must say I differ from him on that point.
2039. On what point? With regard to the site. He appeared, if I understood him rightly, to prefer some site on the Parramatta or Liverpool Road.
2040. The only objection he had to the site at Randwick was, that a great portion of the children in the Destitute Children's Asylum had parents in the Benevolent Asylum, and he thought they should be kept apart? They would be two institutions perfectly distinct and separate; I do not think there would be any communication whatever.
2041. *By Mr. Alexander*: How many women in the Benevolent Asylum do you think have children in the Destitute Children's Asylum? I do not think there are many Catholics. There are children in the Randwick institution whose parents have been in the Benevolent Asylum, but who have left.
2042. *By the Chairman*: There are a great number of children between the ages of three and fourteen years in the Benevolent Asylum—do you think it desirable that they should be continued in that institution, or that they should be drafted off to the Orphan School, or to the Destitute Children's Asylum? They should be sent at once to one or other of these institutions, for I think the Benevolent Asylum is no place for them at all. I think the great objection is that the Asylum is made to answer every purpose of an infant establishment, a lying-in hospital, a foundling hospital—everything, in fact—which it was never intended to be. I think it has not a fair chance in that respect.
2043. You heard the questions I asked the Rev. Mr. Stephen, with reference to the vegetable food supplied to the inmates at Liverpool—do you approve of a less amount of animal and more vegetable food being given to them? I am of that opinion.
2044. I presume in a new building you would have a proper classification, not only of lying-in-women, but of other inmates; for instance, in the Liverpool Asylum we found persons suffering from syphilitic, cancerous, and other offensive diseases, lying in the same ward with others who, except from age, were in good bodily health—do you not think proper means of classification should be adopted in such cases? In a building erected for that purpose those things, as a matter of course, would be attended to. The building at Liverpool was never intended for such a purpose, consequently proper sanitary arrangements do not exist.
2045. You also heard the question put to Mr. Stephen, with reference to lowering the walls that surround the Liverpool institution. The people there are collected under a small shed, or room about the yard in a state of idleness, and have nothing to see but four blank walls, while, if a portion of the wall were removed, they might have a beautiful view either up or down George's River. Do you not think it would be a great advantage if a portion of the wall were removed, and a light fencing were substituted? At present, high as the walls are, the people manage to get over them, and unless there were some precaution taken, in the way of putting iron spikes, many of them would get over. If that were done, I think it might be an advantage.
2046. It is not because a few might get over the fence that a large number of persons should suffer, and it seems to be dreadful that three or four hundred people should be huddled up in that small space; for it is only one side they are allowed to occupy, as half the ground is occupied with the garden, and fully a quarter with the buildings, so that they have not above an acre to walk about? Yes.
2047. *By Mr. Alexander*: Has any difficulty been felt by the committee, with reference to making the inmates work—have any such cases come under your notice? Yes, several. I know it has been brought under the notice of the committee by the master.
2048. Charges were made by him against the inmates who would not work? Yes.
2049. What were the general results of the charges made by the master? They have generally resulted in proving that the parties were unmanageable and refractory, and that it was impossible for the master to control them.
2050. Are you aware whether any of these parties were expelled from the house in consequence of refusing to do the house-work? I think there were a few within my own knowledge, but that they were received back.
2051. What was the great objection these people had to work? None, but that as far as I may judge they were lazy, and would not work, I suppose.
2052. You said something in your evidence about the desirability or non-desirability of allowing subscribers to give recommendations—can you state the average number of recommendations that come from subscribers? I think very few; I think they come principally from the clergy of the different denominations.
2053. Do you think, taking the year round, there is one a-week from private subscribers to the institution? I believe there are very few indeed; I doubt whether they would average one a-week.
2054. *By Mr. Harpur*: How would you compel the inmates to work, in case you thought they were able to do so—what means would you take? I would first bring moral influence to bear; I would recommend that the clergyman of the denomination to which they belonged should remonstrate with them and shew them their error, and I am of opinion that this, in ninety-nine cases out of a hundred, would be attended with the desired effect. I have known instances myself, when all other means have failed, when persons have declared they would not work, regardless of consequences, that when the salutary influences of religion have been brought to bear upon them they have had the desired effect. I would recommend, before harsh measures were resorted to, that the minister of religion of the denomina-

tion

tion to which the offender belonged should use his influence; and in the event of that failing, which would be very seldom indeed, other measures might be resorted to. I do not know—

Rev. J. F.
Sheridan.

2055. *By the Chairman*: Might not a slight gratuity be offered? Yes.

2056. If there were a better mode of classification this might be carried out? Yes.

3 Dec., 1861.

2057. Or there might be a yard in which refractory persons might be placed, and they might be kept on an inferior allowance—Do you not think that might have the desired effect? Yes, I think supplying them with tobacco would have a beneficial effect.

2058. *By Mr. Harpur*: And giving them the opportunity of earning tobacco? Yes, for they literally prize that more than food.

2059. You are aware that a large portion of this class of persons have been addicted to smoking from their early youth? Yes.

2060. And many of them are very old—have you not heard from old smokers that it is a severe punishment to be deprived of their tobacco? Yes, very.

2061. The prospect of obtaining tobacco would be one of the greatest inducements you could offer to them to work, or to do anything? Yes.

2062. At Liverpool the men receive (if any) a very short allowance—a quantity which is as nothing to them, and they stated to the Committee that they were willing to work in the garden, or to do anything, to obtain it; but they were not allowed to work for that purpose, or for any other—Are you not of opinion that persons who are received into this, as well as into every other Benevolent Asylum, are generally of defective intellect. Even where they are physically strong is not their intellect generally defective and weak? I would not say so, as a general rule.

2063. In a country like this, where persons possessed of anything like physical strength can make good wages, is it not a certain sign of weak intellect for such persons to seek refuge in a Benevolent Asylum? I think that is owing rather to physical than to mental debility, in the great majority of cases.

2064. Then in those cases there could be no reason to compel them to work? No.

2065. There are persons who, if they went up the country, could get £30 or £40 a-year, who are working in the institution for a shilling or eighteen-pence a-week; is not that a sign that these people, though able to work, are really defective in intellect—You would see no objection to the inmates being allowed to earn tobacco for themselves? Not the slightest; on the contrary, I would rather give them tobacco if that would be the means of getting them to work. I think some of them might be employed in plaiting.

2066. *By Mr. Alexander*: Are you not aware that at one time they were employed in plaiting and making cabbage-tree hats? No.

2067. *By Mr. Love*: Are you aware whether there are many tradesmen among the inmates at the Liverpool Asylum? I am not aware.

2068. Tinnen, shoemakers, and carpenters? I am not aware of the fact, but I think it is very natural to suppose there are.

2069. Do you not think these men would be much happier if they were allowed to work a little at their trades? Yes, I think it would save much murmuring.

2070. Would you recommend the committee at Liverpool to try that plan? Yes, I would.

2071. *By the Chairman*: You are aware that the children in the institution in Sydney have been suffering from itch for the last two years? Yes.

2072. Are you aware that they are all washed in the same water? No.

(*The Chairman read the evidence of Mrs. Louisa Stone.*)

2073. Do you, after hearing that evidence, think it likely the itch can be got out of the institution while the present course is pursued? No.

2074. Do you not think some immediate steps should be taken to alter that system? Yes, I am shocked at that; I was not at all aware of it.

2075. You are aware that there are many people in the Liverpool institution who work for a small gratuity—a shilling or eighteen-pence a-week, or ten shillings a-month? Yes.

2076. I suppose if similar inducements were held out, the whole of the inmates might be induced to earn their own livings there? I think so.

2077. Have the intemperate habits of any of the servants of the institution ever been brought under your notice? I have heard a good deal about the officials of the Liverpool institution. I heard the evidence of the Rev. Mr. Stephen on this subject, and I can only say with him, that we endeavoured by every possible means to come at the truth, and to have something tangible, but I am sorry to say we failed. Although we had some very good reasons to suspect, still we could not put our fingers upon anything tangible; I have always found, even when I have gone there unexpectedly, when I have had private business at Liverpool, and have called at the institution, that everything was in a proper state; and although I have reason to fear that the doctor indulges a little, I believe he has always done his duty, as far as I can hear.

2078. Have you ever heard anything against the master of the institution? Yes, I have heard the same thing of the master, but I have never seen it; he has always done his duty.

2079. Have you ever heard anything of the servants of the institution in Sydney indulging in that way? No.

2080. Can you offer the Committee any suggestions to forward the object for which they have been appointed? I would suggest an entire change, principally with regard to classification; that cannot be done with the present means—it is impossible to do it; but as a minister of religion, I would suggest that there should be a classification in the sick ward; I would have the members of the Catholic Church in one ward, those who are bed-ridden, because our ministrations are of a private nature, and of course members of other denominations do not, and are not supposed to understand them, and they might form the subject of ridicule; and when this could be avoided it would be well that it should be, as it is hurtful to the individual receiving the last rites of his Church, as well as to the clergyman.

2081.

- Rev. J. F. Sheridan. 2081. The classification of women who come in to be confined which you suggest, is not a classification of that sort? No, I refer only to the sick ward, where it is necessary that the clergyman should go to the bedside of the patient.
- 3 Dec., 1861. 2082. The classification you would recommend, in the case of lying-in women, has reference to their moral character? Yes; the other has reference only to the sick ward.
2083. The classification in the lying-in wards would be to prevent respectable married women from coming into close contact with prostitutes, perhaps suffering from disease? Yes. With reference to the removal of the institution from Sydney, unless provision were made to relieve applicants for out-door relief in the city, inconvenience might arise.
2084. It has been suggested that there should be a depôt in Sydney, with two or three beds, to accommodate people in cases of emergency, and that from this place out-door relief should be administered? That is my view.
2085. *By Mr. Harpur*: Do you not think if the doctor's irregularities, which have been described as characterizing the conduct of the doctor at Liverpool, were of such a kind as to interfere with his efficiency, it would be easy to obtain proofs against him? I do not know; we tried to obtain sufficient evidence against him, but could not.
2086. Do you not think that, although it may be easy to get up a report against a person, it may be impossible to prove the charges circulated? Yes.
2087. Do you not think that is something like the present case? Yes.
2088. Do you not think it would be dangerous to go upon mere report, without proof? Yes. I may mention that on one occasion, when I went to Liverpool, as I saw there was a delicacy, on the part of a number of the committee, to state to him the charge which had been brought against him, I called the doctor aside, told him the reports that had been circulated, and asked him what he had to say for himself. He appeared to be indignant at the charge, and although there were unmistakable signs of his previous habits, he said that he was a persecuted man, that he had enemies, that we all had enemies, and he commenced moralizing, but he stated that he was perfectly innocent.
2089. There are persons of a certain temperament who behave ordinarily when excited, as if under the influence of liquor. I have seen the gentleman but once, and had only about five minutes conversation with him; but he appeared to me to be of that excitable temperament? Yes.
2090. *By Mr. Alexander*: Did his conduct and manner appear to be the result of excitement only, or of drinking? He appeared to be very indignant.
2091. *By Mr. Harpur*: I have seen persons of that temperament, who, if anything crossed them, appeared as if they were tipsy? Yes; that is a very charitable view to take, and I should be happy to take that view. I think if a person performs his duty in an office, and there is no positive proof against him, it is difficult to remove him.

MONDAY, 16 DECEMBER, 1861.

Present:—

MR. ALEXANDER, | MR. CALDWELL,
MR. LOVE.

J. LUCAS, Esq., IN THE CHAIR.

The Rev. William Allworth called in and examined:—

- Rev. William Allworth. 2092. *By the Chairman*: You are a minister of the Church of England? I am.
- 16 Dec., 1861. 2093. You often visit the Benevolent Asylum, I believe? I do.
2094. Do you receive any remuneration for that? I receive remuneration from my own Church; it forms part of my duty. Our Church supplies the Chaplain for that place and the Infirmary, and the salary is for the two conjointly.
2095. You are aware that the whole of the sick patients are in one ward—do you not think there ought to be a classification—when ministers of religion go there to visit patients, is it not objectionable to them to have persons not of their religion in the same ward? I think so, decidedly; that has been my opinion for a long time.
2096. For instance, if a minister of the Roman Catholic Church visits patients of his persuasion, are not the doctrines he teaches likely to be brought into ridicule by patients of other sects, and *vice versa*? Yes; and another good effect would be, that it would prevent proselytising.
2097. With reference to classification, the Committee were struck with the fact that, from want of space, decent married women, who were compelled to take advantage of the institution, in consequence of poverty, were lying in the next beds to prostitutes—do you not think it absolutely necessary, in the erection of a new institution, that means should be provided for proper classification in this respect? Decidedly; in fact, I find great difficulty in the performance of my duties, from want of classification.
2098. I believe there is now one room in which gentlemen of different religious denominations hold services? Yes, the dining-room.
2099. They have it in turn? Yes, we have stated times; and they are so arranged as not to conflict with each other.
2100. How long have you been in the practice of visiting the institution? During my last residence in town—it will be two years in January next. Some ten years ago I visited there.
- 2101.

2101. Would it be as convenient for the purpose of ministers of different denominations, if a new institution were erected at Randwick? In my case it would scarcely be so, because I have a separate charge at Pymont. Rev. William Allworth.
2102. Then the minister at Randwick might then take charge? He might; that would depend upon the Bishop's arrangements. 16 Dec., 1861.
2103. During your visits to the institution has your attention ever been called to any of the managers of the institution being intoxicated? Never on one occasion, and I have been there at all hours.
2104. Have you ever seen any person connected with the establishment under the influence of drink? I have never seen anything of the kind.
2105. *By Mr. Caldwell:* Have you had an opportunity of seeing the master and matron when you have called there? I scarcely ever visit there without seeing them, for I walk in from Pymont, and I am tired enough sometimes to be glad to sit down; sometimes I go into the office and speak to Mr. Anderson, and sometimes I go into Mrs. Mansfield's room, so that I scarcely ever visit the establishment without speaking to one or other.
2106. Would you recommend that there should be classification according to the religious denomination of the inmates? Decidedly. I will state my reason, if I may be allowed to do so:—There are many sick patients in the men's and women's wards who are altogether dependent for religious instruction upon the visitation of the clergyman; and to teach some of them who may be deaf the doctrines and the duties of religion in a loud tone of voice would be grating to the ears of those who held different views, and whose religious opinions ought to have some respect paid to them. Then again, I should not like a Romish priest to go in and teach the doctrines and duties of his Church so as to disturb the members of the body to which I belong; indeed I have found this to have some effect upon persons of weak minds.
2107. Do you think this classification would be sufficient if it were confined to the sick ward? Simply to the sick ward. If dissenters choose to come in they may do so, but then we should have only a Protestant congregation. With regard to the public service it does not matter, as the Wesleyans hold their service in the forenoon, and that of the Church of England is conducted in the afternoon. Dr. Fullerton has his only in the week.
2108. *By Mr. Alexander:* Do not a good many young men connected with the Young Men's Christian Association visit there? There are two or three who visit very frequently in a praiseworthy manner.
2109. *By Mr. Love:* Are any persons of the Jewish persuasion in the institution? No, I think there is not one in either of the places I visit. I found one in the Infirmary, but that was a long time ago. I think something should be done with reference to one of the lower wards, where there are a great many women with children, mingled with old people. The old people complain bitterly of the squalling of the children, and several applications have been made to me by them to be removed from the ward. With reference to the women being required to work, they frequently refuse to do so, and set the matron at defiance. It is impossible for her to do anything, as physical force would be the only thing of any avail in such cases, and they do, I fear, get some measure of support from outside people.
2110. *By the Chairman:* We have had some evidence upon that point—would you approve of compelling the people by force, or would you hold out some inducement, by giving those who did work some little indulgences? I scarcely know how that could be brought about.
2111. *By Mr. Alexander:* It has been attempted, has it not? By compulsory means?
2112. Not by compulsory means, but by threatening them with expulsion? Certainly.

Mr. R. Anderson again called in and further examined:—

2113. *By the Chairman:* You have been examined before? Yes.
2114. Chiefly with reference to the accounts of the institution? Yes.
2115. You have been there, I think, since 1859? Since the 8th of May, 1860.
2116. Have you, since you have been there, seen any of the officers or servants of the institution tipsy? In reference to the officers I should almost wish a direct question were put. 16 Dec., 1861.
2117. Did you ever see the master in that state? Never in my life.
2118. Did you ever see the matron in that state? I have seen her what I consider worse for liquor.
2119. Upon one occasion, or upon several? Upon several occasions, I am sorry to say.
2120. In what part of the institution? In my own room; I have seen her going along the passage, and I have seen her in the yard.
2121. Have you seen her going into the wards in that state? I have seen her going into the wards, but I never saw her in the wards; I do not frequently go into them, as it is not my business to do so—it is not in my department.
2122. You say you have seen her that way several times? Yes, I have seen her in an excited state several times.
2123. Did you ever report it to members of the committee? I have; they have spoken to me about it, and I have mentioned it to several of them, perhaps a dozen of them.
2124. Could you name any of them? In the first place, the question has been put to me, on more occasions than one, by the secretary, the Honorable George Allen, and I have answered him in as direct a way as I could that I had seen her; I have also mentioned it to Mr. Alexander, the honorary treasurer, when we have been conversing and lamenting over the matter. I have mentioned it to, and the question been asked by, a good many others. Such questions have been put to me upon various occasions, and I have answered them to the best of my belief, and with the utmost regret; for I had the highest opinion of both her and her husband.

Mr. R.
Anderson.
16 Dec., 1861.

2125. Did you ever know of any deficiency in any of the stores, medical comforts, such as brandy? In answering that question when it was put to me before, I said there was no deficiency as between me and the society, but certainly there was a deficiency between Mr. Mansfield and somebody else; I think I shewed Mr. Alexander the statement.

2126. *By Mr. Alexander:* That was about the brandy? Yes, I am speaking of the brandy. I spoke, as I felt it to be my duty to do so, to Mr. Alexander, the honorary treasurer, of the deficiency, and two or three days afterwards when he put the question to me, I said the deficiency was made up, so that the institution lost nothing.

2127. *By the Chairman:* You are aware that there was a deficiency? There was.

2128. Do you know who made good the deficiency? Mr. Mansfield; he told me so.

2129. Do you know of any deficiency in any other portion of the store? No, all were correct. I consider Mr. Mansfield a very honorable, steady, correct, and upright man.

2130. Who serves out the porter? Mr. Mansfield.

2131. Does he serve it out himself? I do not know whether he does so on all occasions. He is the visitor of the out-pensioners of the institution, and his duties in that capacity require him to go out, and during his absence I think Mrs. Mansfield serves it out.

2132. *By Mr. Caldwell:* She serves out the porter? Everything in the shape of stores. Mr. Mansfield keeps the keys.

2133. *By the Chairman:* Have you never heard any fault found with the quantity or quality of the articles served out? No report has ever been made to me by any inmate or by anyone, of quantity or quality, in any instance that I can recollect.

2134. Has any complaint been made of any articles having been missed? I never heard it; no complaint has been made to me. Any talk inside I have nothing to do with; I only speak of what I know myself, and it is with great reluctance I do so.

2135. *By Mr. Love:* Which do you call your own room? The room I call my own is the Board room.

2136. The room into which visitors go to put down their names in the visitors' book? Yes, the Board room; it is the only room I have as an office.

2137. The matron's business takes her there occasionally? Yes.

2138. Then it is not your room any more than any other's expressly? It is the only room I have to do with.

2139. At what time have you seen the matron in that way? Generally in the forenoon. My hours are from nine to four, and it has, generally speaking, been within those hours.

2140. *By Mr. Alexander:* You are often there after four o'clock? Yes; I often go back in the evening, but my hours are from nine to four.

2141. *By Mr. Love:* This excitement you speak of would scarcely have been sufficient to have attracted the notice of strangers? It is a difficult question to answer. I may have seen her in such a state as might have attracted the notice of strangers.

2142. Not in such a way as that she could not manage the business of the place? I have seen her in a state that I did not think her altogether fit to manage it.

2143. *By Mr. Alexander:* Have you not since heard that she has been in the habit of taking a great deal of morphia? I have heard so.

2144. Have you ever heard of an account having been sent in to Mr. Mansfield to the amount of £100, for morphia? Never for such an amount. From my own knowledge I know nothing about this matter.

2145. *By Mr. Love:* What would be the effect of morphia? I do not know—I am not a medical man—but I have heard medical men express the opinion that when a person has taken a great quantity of spirits during the day, in the morning morphia destroys the effects of the spirits.

2146. *By Mr. Caldwell:* I suppose morphia produces an effect upon those who take it similar to that caused by spirits? It produces in my opinion the very reverse effect; it makes the person stupid or languid; it has a deadening or soothing effect.

2147. *By Mr. Love:* Might you not mistake the effects of morphia for what you suppose was caused by something else? I do not think so; I should be glad to know that such was the case.

2148. *By Mr. Caldwell:* Do you know of your own knowledge that Mrs. Mansfield is in the habit of drinking brandy to the extent of making herself tipsy? No.

2149. Have you seen her take brandy to the extent of making herself tipsy? Never in my life.

2150. Nevertheless you have seen her what you consider tipsy from drinking brandy? I do not know that it was caused from taking brandy.

2151. You could not tell whether it was the effect of brandy or of morphia? The only way I could tell was from her appearance, and the smell of spirits.

2152. *By Mr. Alexander:* Is she noisy when she is in that state—troublesome and quarrelsome? Sometimes she is a little quarrelsome with inmates, and a little talkative, but I never quarreled with her.

2153. *By Mr. Caldwell:* You spoke of a deficiency in brandy—how did that occur—you say it did not take place between you and the institution? We get in ten gallons of brandy at a time, and it is my duty, when the cask is done, to check the consumption. I checked the cask in this instance, and found the deficiency I have mentioned.

2154. You checked the quantity served out with the quantity received in? Yes, and found there was a deficiency.

2155. *By Mr. Love:* How much deficiency? About three gallons and four pints, I think.

2156. *By Mr. Caldwell:* Out of what quantity? A ten gallon cask.

2157. *By Mr. Love:* How is it served out—by measurement? Yes, glasses and gills.

2158. I have seen it served out at Liverpool by pouring a little quantity into a tin pan? I had

had imperial measures made for the purpose, and they are made so nicely that they perfectly agree with the measurement or weights of the doctor.

2159. It is never poured out by guess? No; Dr. Smith is very particular; he always measures or weighs it when it is taken over to him; he gives it in the way of medicine to the children and other patients.

2160. *By Mr. Alexander*: Do you check the casks of porter? Yes; porter I have never found any deficiency in.

2161. *By Mr. Caldwell*: Are you prepared to say that when this cask came in it actually contained ten gallons? I do not measure it when it comes in, but it was a ten gallon cask, and was full.

2162. Where did it come from? From Sir Daniel Cooper's.

2163. Did you examine the cask when you received it? I did not, but I saw that it was full. When a cask comes in I give it a shake, and from that I can tell pretty well whether it is full or not.

2164. Did you examine that particular cask? Yes, I examine almost every cask. When a cask comes in Mr. Mansfield calls me, and I examine it. Some time ago a hogshead of porter came in, and he and I thought it was short, and upon examination it was found to be several gallons deficient.

2165. *By Mr. Love*: Who has access to the room besides the matron and master? No other body should have.

2166. Occasionally may not some inmate go there? Not that I am aware of.

2167. Does not the doctor go there? Never; he has no charge of the stores, and I do not think he ever goes. The stores are under Mr. Mansfield's charge, and the medical comforts subject to the orders of the doctor.

2168. *By Mr. Alexander*: Although the brandy was short, it cannot be said that this was all drank by the matron? It might have been stolen by some of the inmates.

2169. *By the Chairman*: How long would ten gallons last? That would depend upon the number of the inmates—perhaps three months—at this time it lasted about two months; it ran from the 13th March to 28th May, but there being a deficiency of upwards of three gallons it would run about a month less than usual.

2170. *By Mr. Caldwell*: What length of time do the irregularities you speak of on the part of Mrs. Mansfield extend over? I cannot say; I was there some time before I observed them.

2171. And you went there so recently as in 1860; how long were you there before you observed them? A month or two, so far as I can recollect.

2172. When was the last time that you observed anything wrong? The last time that I observed anything wrong was about three weeks or a month ago. Mr. Mansfield happened to be called away into the country, to Dapto I think, and during that time she was worse than when he was present. Since then she has been very quiet; I have seen nothing wrong in her since.

2173. There is a person named Stone in the Asylum? Yes.

2174. How many children has she? I think only two; there is a grown-up daughter who has been living there for some time.

2175. What are the ages of these children of Mrs. Stone? There is one, a boy of about thirteen years of age, in fact he was put on board a vessel.

2176. Is he back again? Yes; he is subject to epileptic fits, and is not fit to be at sea.

2177. Is he on the books of the institution? Yes.

2178. The grown-up daughter, does she live there continually? She is there now, and has been for some time.

2179. What is her age? I do not know exactly, but she has been in service. I think she is a girl of about sixteen or seventeen.

2180. When she is there, they all sleep up in the children's ward? Yes.

Mrs. Mary Lamont called in and examined:—

2181. *By the Chairman*: I believe the Committee examined you during their visit to the Benevolent Asylum? Yes.

2182. During your residence in the institution have you ever seen the master worse for drink? No.

2183. Have you ever seen the matron the worse for drink? Yes, I have seen her a little the worse for drink.

2184. Once, or often? Would once be sufficient to say?

2185. I ask you the question, answer it as you like—have you seen her once or several times? I have seen her once.

2186. Have you seen her more than once? Yes; I have seen her just that anyone might know that she had been taking something.

2187. *By Mr. Caldwell*: You have seen her only once that a stranger might know —? I have seen her several times; but once that anyone might know.

2188. Have you seen Mrs. Mansfield drinking? No.

2189. Do you know yourself what she has been in the habit of drinking? Ale sometimes, and sometimes brandy and water.

2190. Have you seen her drink brandy and water? Yes, I have seen her; but there is no more harm in one-kind of drink than another, is there?

2191.

Mr. R.
Anderson.

16 Dec., 1861.

Mrs. Mary
Lamont.

16 Dec., 1861.

- Mrs. Mary Lamont.
16 Dec., 1861.
2191. It has been stated that Mrs. Mansfield has been in the habit of taking morphia? I do not know what she is in the habit of taking; but when I first went there she told me she was in the habit of getting something from Mr. Porter, and I said I thought it was wrong for her to do so without letting Mr. Mansfield know; and I have since heard that it was morphia.
2192. Do you know whether that produced the same effect upon her as the taking of spirits? I heard at first it was that made her so stupid looking. I have heard since that it was to take away the effects of the spirits.
2193. *By Mr. Love*: I believe morphia is taken for other purposes than for sobering people? I do not know anything about it; but Mrs. Mansfield told me it was a medical man who prescribed it for her some years ago.
2194. For some illness? Yes; but I really could not say what it was; she said she could not do without it.
2195. Having found it beneficial she continued the use of it? Yes.
2196. Would you say whether or not this excitement which you have seen in Mrs. Mansfield might not have arisen from the use of that morphia? I could not say.
2197. *By Mr. Alexander*: Are you sure it originates in the use of brandy? It might be from beer.
2198. *By the Chairman*: Have you ever seen Mrs. Mansfield drink brandy? Yes.
2199. Have you seen her drink porter? Yes.
2200. Have you seen her drink ale? I have seen her drink ale.
2201. Have you seen her drink any other intoxicating drinks—have you seen her drink brandy once or several times? Several times.
2202. *By Mr. Caldwell*: When you have seen her drink brandy, did she drink to be drunk? No.
2203. You never saw her drinking to excess? No. I have seen her drink a little brandy and water with her dinner.
2204. *By Mr. Love*: I believe it is a usual thing for persons to take a little brandy and water? I think it is a very unusual thing for a lady to take brandy and water; but I would not blame Mrs. Mansfield for taking a little, for her duties have been very heavy, and she has had a large family. Mrs. Mansfield might do what others who had not had her troubles might not.
2205. *By Mr. Love*: Have you ever been over the children's sick room, which is nearly over your cutting room? Yes; I have been there twice, at the door.
2206. Have you felt a bad effluvia from that room? Yes; I have felt it at the door.
2207. If any person had visited that place, do you not think they would feel relieved by a little brandy and water—might they not after visiting it take a little? I think they would be very great stupid if they did not.
2208. You think they would require it very much? I do.
2209. Do you not think there are several wards in that institution which would make you feel desirous for a little brandy and water if you had to visit them? There are some of the wards I have been in only once since I have been there.
2210. *By the Chairman*: Have you ever seen Mrs. Mansfield take brandy and water on any other occasion than at dinner time? She may have taken a little.
2211. We want you to tell us what you have seen—we can hardly make anything of your evidence? I have told you very candidly, I have seen her take a little.
2212. What do you call a little? I have seen her take a little.
2213. *By Mr. Caldwell*: Never to excess? No; but I have seen her when I thought she had not an opportunity of taking it, going about in a stupid sort of way, so that people in the building remarked it, and shewed no respect to her whatever.
2214. On this occasion you could not say whether it was the effects of morphia or not? I am not telling you anything but what I told Mrs. Mansfield I would tell you.
2215. *By Mr. Alexander*: Have you ever seen her take as much as there is in that glass (*referring to a tumbler containing about a wine-glass of water*)? She very seldom put it in a glass.
2216. What did she drink it from? Out of a mug.

Mrs. Mary Stubbs called in and further examined:—

- Mrs. Mary Stubbs.
16 Dec., 1861.
2217. *By the Chairman*: I think the Committee took your evidence at the Asylum, when they visited it? Yes.
2218. We have an unpleasant matter to examine you upon, and it is for that purpose you are summoned here to-day. You have been in the Asylum, I believe, for the last two or three years? I have been there only fourteen months.
2219. During the time you have been in the institution have you noticed the matron of the institution the worse for drink? What might in my eyes appear to be the worse for drink might not seem to be so to other people's eyes.
2220. I ask you for your opinion? I might see her sometimes in a state I would not like to be in myself, or that I would not like to see any female.
2221. Have you seen her in that state up in your ward? I have seen her in away that any one with an eye would say she was excited—to say she was drunk I could not; for what I call drunk is when you fall down and cannot get up. I have seen her in a way you would not like to be yourself.
2222. Have you seen her so many times? Dear me, don't ask me that question.

2223.

2223. I know it is unpleasant, but still we are all called upon at times, in the performance of our duties, to answer unpleasant questions? It is very unpleasant; I do not wish to hurt Mrs. Mansfield, and I do not wish to tell a lie.

Mrs. Mary
Stubbs.

2224. *By Mr. Caldwell:* We do not want to know whether Mrs. Mansfield was in the habit of drinking to such an excess as to be incapacitated for the performance of her duty? I have often heard her insulted, and told she was drunk, by the inmates of the house, but I always ran away for fear of hearing or knowing anything. Before I went in I told Mrs. Mansfield I always avoided interfering in anything; and when Mr. Anderson has called my attention once or twice to things, I have always said I wished him not to bring my name in, and if I saw anything I always liked to run away, so as not to see it if I could help it. But more than I might tell you more; I do not want to tell you anything at all.

16 Dec., 1861.

2225. *By the Chairman:* You are summoned here to tell the truth in the matter? Well, but I think—

2226. Again I ask you, have you several times seen her in that state in the ward? I have seen her, if not in the ward, in a way you would not always see her, and that is all I know.

2227. *By Mr. Caldwell:* Do you know whether Mrs. Mansfield is in the habit of taking morphia? Pray don't ask me.

2228. It will be better for her that you should answer the question? When she was ill she took some, I believe; so she said.

2229. When she was ill she took morphia? Yes.

2230. Do you know whether she has continued to take it since? I do not know; I very seldom went in and out to Mrs. Mansfield, because I heard so many tales—so much talk—I was glad to keep out of it.

2231. Did you ever see her drinking brandy? I never did; I do not think I was ever five minutes in Mrs. Mansfield's room in my life.

2232. Can you say, when you have seen her excited or stupid, it arose from the use of brandy or morphia? Well, I do not know, I never saw her drinking myself; but in my family I saw very little, and perhaps very little may make me think people have taken too much, and that makes me cautious in speaking, because I do not like to see it upon anyone. I have seen her in a state I would not like to see myself.

2233. I want to know whether it was from brandy or morphia? I could not tell whether it was or was not, but I have heard it from hearsay, scores, and scores, and scores of times; anything more I have never seen, but indeed I have heard it; that is all I know. They would all call me to the windows, and "look at this," and "look at that." The moment I saw it I would go away. Don't ask me any more.

2234. *By Mr. Alexander:* Is Mrs. Mansfield popular in the house—is she liked? I have always seen her; I never asked for anything from her I did not get.

2235. *By Mr. Caldwell:* Is she attentive to the inmates? Yes, so far as I see; there are broils in every place of the sort; I dare say many a broil if managed in a different way might be avoided.

2236. Have you visited the room where the sick children sleep? Only once.

2237. When you were in that room what was its condition? At the time I went everything was very nice, the children were clean and playing about the room with some little toys; on that day they happened to be very well. But to tell the truth, there was so much confusion, and I heard so much in the Asylum, that I would not go from one place to another, because I was afraid there would be an observation made about it, and that Mrs. Mansfield would say I was talking about things that kept me from attending to anything but my own business.

Maurice Alexander, Esq., M.P., (Member of the Committee) examined in his place:—

2238. *By the Chairman:* You are a Member of this Committee? Yes.

M. Alexander
Esq., M.P.

2239. You are also Honorary Treasurer to the Benevolent Society? I am.

2240. Can you state what is the position of the institution at present—what funds are in your hands? I cannot give you any information in that way, for one particular reason, namely, that I do not know. We have an open account at the bank, and we operate upon that. Money is remitted to me, and when I get a certain amount I bank it. I cannot tell you the state of the accounts from recollection, but they are made up every three months, and I think the accountant has already handed them in.

16 Dec., 1861.

2241. You have heard the evidence with reference to the deficiency of spirits? Yes.

2242. That deficiency was made good? Yes.

2243. *By Mr. Mansfield?* So I have been given to understand.

2244. You were informed as Honorary Treasurer? Yes, and a return was brought up to me shewing that there was no deficiency.

2245. What deficiency there was, was made good? Yes. With reference to the finances, I would state that the Government grant is paid in to the bank, to the credit of the institution, and I sign a receipt for it. Other amounts, such as fines from Benches, come to me direct, and I give receipts for them in duplicate. These sums are entered in a book, and when they exceed £20 I deposit them in the bank. Amounts to be expended on behalf of the institution are drawn by cheques signed by the Honorable George Allen, the honorary secretary, and by myself as treasurer. The accounts are first gone over by Mr. Mansfield who receives the goods, he checks them, they are then brought before the committee and passed, and the cheques are drawn out as I have stated.

2246. You have an investment fund? We have.

2247. You make use of that for your current expenses, and when you receive your money from the Government you pay it back? Yes. I think the current account is indebted to

- M. Alexander Esq., M.P.
16 Dec., 1861.
- the investment fund over £3,000. All I hold is £3,000 in debentures, and there is £3,075 on deposit in the Oriental Bank.
- 2248 For which you receive interest at five and a half per cent.? Five per cent. That is a portion of the legacy left by the late Frederick Jones.
2249. That is all you have invested? All the actual cash we have.
2250. In reality you ought to have £10,000? We ought to have something like £10,000.
2251. But you make use of some £3,000 or £4,000 to carry on the institution, to pay the current expenses? Yes.
2252. That is to avoid the necessity for opening a cash credit account at the bank, for moneys for which you would have to pay nine per cent. interest? Yes.
2253. By using this investment fund you save the per centage on the current account? Yes.

THURSDAY, 2 JANUARY, 1862.

Present:—

MR. CALDWELL, | MR. SADLEIR,
MR. SUTHERLAND.

J. LUCAS, ESQ., IN THE CHAIR.

Francis Campbell, Esq., M.D., called in and examined:—

- F. Campbell Esq., M.D.
2 Jan., 1862.
2254. *By the Chairman:* You are now, and have been for many years, the Superintendent of the Tarban Creek Lunatic Asylum? Yes.
2255. The Committee understand that you have considered the effects of the winds of this country upon human health? I have, among other things, considered this subject somewhat attentively.
2256. My chief object in summoning you is, to obtain your opinion as to the suitability of the proposed site for a new Benevolent Asylum; you are aware that the inmates of that institution consist chiefly of aged and infirm people, and the site proposed is at Randwick; the Committee are desirous of having your opinion whether you think that locality desirable? It is exposed to the sea a good deal, I believe. I never was at Randwick; but I think I know about where it is.
- (*The Chairman pointed out the position, by reference to a map.*)
2257. Are you of opinion that that would be suitable? The inmates of the Asylum are of all ages, but mostly very young, or very aged and very infirm, which amounts to the same thing. My opinion is, that they ought to be more inland—less exposed to the influence of the winds sweeping off the Southern Ocean.
- 2258 I hand you the evidence of three medical gentlemen who have been examined before this Committee—Mr. Burgon, Dr. Robertson, and Dr. O'Brien. (*The Chairman handed the evidence to the witness*)? Would it not be better for me to give my independent opinion first?
2259. As you had not been on the spot, I thought it might afford some guide to you? I have been at Bondi; but I have never been at Randwick. I think I have been twice at Bondi. My opinion is founded on the grounds that the constitution of the old and very young can hardly withstand the acrid quality of the air there; there are saline particles constantly floating off the Great Southern Ocean, which affect the atmosphere of the sea-board. I have had occasion many times to recommend infants to be carried into the country, for the improvement of their health, when every external appearance would have led one to think the sea-side was the best, and they have immediately improved upon going into the country. The whole evil arises from the state of the atmosphere—the more condensed and more acrid state of the atmosphere. I am, and have long been satisfied that Sydney is not the healthiest place in the world for old and young people. For strong and vigorous constitutions it is well suited; but for those in the decline of life, and for early infancy, Sydney and the locality about are not the healthiest positions.
2260. I understand that you would prefer some place inland? I should say, at least five or ten miles away from the sea.
2261. Do you know the situation of Ashfield, Petersham, Burwood, or Homebush? I should say none of them would be far enough, though they would be better than the proposed site. I would say still farther inland, sheltered from the effects of the Southern Ocean.
2262. What would you say to Liverpool? Liverpool would be better; still in a direct line Liverpool is not far from the Ocean.
2263. Parramatta? Beyond Parramatta—the swampiness about Parramatta renders it unhealthy.
2264. Suppose you had the selection of a site, where would you recommend? I am hardly prepared to say, for I have never but once been as far as Mr. James Macarthur's.
2265. It must not be far from Sydney, because the expense of transit from Sydney to the Asylum is a great consideration—would you prefer some position along the line of railway? Some sheltered situation on the line of railway, five or ten miles out.
2266. Homebush is about ten miles out? That would be a good situation, provided it were somewhat sheltered, so that the atmosphere was not directly influenced by the sea, but was modified by intervening hills or forests. I will now read this evidence, having given my opinion, but I did not wish to do so before, in order that I might not give, or appear to give, a slavish opinion. (*The witness read the evidence of Mr. Burgon.*) I perfectly agree in

- in these observations of Mr. Burgon. The south wind has a very severe effect. I know that from my patients in the Asylum. After the wind has been from the east, west, or north, and has changed rapidly to the south, I am sure to be plagued with a great deal of violence and change in the behaviour of the people. The most remarkable changes take place after the blowing of the south wind. You can have no better barometer than the lunatic—he is so sensitive of every change, and the changes here are so remarkable, that it is a sort of maxim with us to prepare ourselves for the south wind.
2267. Do you think the ill effects of this wind could be warded off or prevented by the erection of a wall, or by the planting of rows of trees? Yes, these things have been known to have had beneficial effects. There is a street in Rome guarded by a small grove of trees, and the disease of the marshes did not operate upon the people in that street; after those trees were cut down the residents there became as liable to marsh remittent fevers as the people in any other part of Rome. Sometimes the distance of half a mile will make a great alteration in the atmosphere, supposing there is a little hill or mountain between. That is an observation as old as three thousand years, and is perfectly correct. The atmosphere may be modified by a small distance, provided the screen is sufficient. (*The witness read the evidence of Dr. Robertson.*) I do not think anything of the chilblains; they arise from want of vigour in the constitution, in a semi-tropical country like this. (*The witness read the evidence of Dr. O'Brien.*) There is nothing in this evidence that would modify my opinion at all. It is the proximity to so great an ocean to which I object. In Europe, where the oceans are not so large—in Ireland or England—the breeze is sufficiently modified by so many intervening things that it blows innocuously upon the inhabitants. Here there are no islands to modify it, and it comes loaded with acrid and moist saline particles, which are prejudicial to the lungs and general health of this class of patients.
2268. The Committee take it for granted that your opinion is in favour of the new institution being erected on the line of railway, some five or ten miles from the town? Yes, inland, and if possible sheltered from the south wind. To be thoroughly out of the influence of the sea atmosphere, it must be quite forty miles inland; but if it were sheltered, a distance of ten miles would, I think, be a safe situation.
2269. Are there any places on the banks of Parramatta River which you think would be suitable? You mentioned one, Homebush, which is pretty near the river; but it would not be desirable too near the river, as I do not think that a very healthy situation; for low situations on the banks of this river are very subject to heavy fogs at certain seasons of the year, and these are never to be desired in any conditions of health.
2270. You prefer land by the side of the railway? Decidedly, inland; at the same time it would be essential to get a good spring of water, or a little creek or river, running past, to carry off the drainage.
2271. Do you know where Duck River is? I know the situation.
2272. Do you think that would be a good situation, if rising ground could be found on the bank? Yes, a little beyond that would be a good situation; but I fear very much the ground does not rise enough till you go farther on.
2273. Are you acquainted with Fairfield? No, I am not.
2274. Between Liverpool and Parramatta? I have never been there but once.
2275. Large quantities of water could be preserved there, and there is excellent drainage into a large salt water creek, the Lansdowne Creek, where the tide flows? That would be an important matter. Is there much ground exposed when the tide goes out?
2276. No; the banks of the creek are very steep, and the whole of the banks of George's River are very abrupt; as the tide recedes, for every two feet fall of water not above five feet in width of the bank is exposed? There is nothing more conducive to the healthiness of a situation, than perfect natural drainage and plenty of good spring water.
2277. *By Mr. Caldwell:* I suppose trees could be planted round the site at Randwick, and that these would counteract any injurious influence from the sea? I am afraid the breeze would be too strong.
2278. On this side (*referring to the plan*) the drainage would be perfect? Yes. One great object in an Asylum of this kind is to have a proper site where water can be got; the life of every living thing is water.
2279. Have you visited the Destitute Children's Asylum? No, I have never seen it—in fact I have very little time to amuse myself by visiting any place; during the fourteen years I have held my present appointment I have never been beyond Parramatta on an excursion of pleasure.
2280. Perhaps you are not aware of the state of that Asylum, so far as the health of the children is concerned? No.
2281. During the time that institution has been established, there has been only one death among the children? Is there not a constant change among the children?
2282. No; they are admitted into the institution very young, and they are not allowed to be taken out of the institution until they are twelve years of age? They may not have remained long enough in the school to give you data to go upon, to enable you to judge of the influence of the position upon their health.
2283. Frequently children are taken out of the streets in a very bad state of health? Change in their diet may have had a beneficial effect.
2284. *By the Chairman:* Do you not sometimes find that a change from a more healthy to a less healthy locality is for a time beneficial? Yes.
2285. *By Mr. Caldwell:* Would you not suppose that the removal of children in a bad state of health to such a locality would have an immediate effect? No, it would not probably be immediately apparent, owing to the improved circumstances in which the children were placed

placed, and their better diet. It would be after a residence of some time that the effects would be seen.

2286. *By Mr. Sadleir* : Might not the effects be more injurious upon the aged than upon the young ; the young child is vigorous and growing up, the old is feeble and declining ? No doubt.

2287. *By Mr. Caldwell* : Then you think the site might be less favourable to the aged, than to young persons ? I think it would. Where the seeds of decay are in the body it requires the greatest care to prevent their growth and development, and nothing is more conducive to this than a variable temperature and bleak air.

2288. *By Mr. Sadleir* : In old age there is generally organic disease ? Generally.

Legislative Assembly.

NEW SOUTH WALES.

FRIENDLY SOCIETIES.

(QUINQUENNIAL RETURNS—1856 to 1860.)

Ordered by the Legislative Assembly to be Printed, 8 January, 1862.

THE REGISTRAR GENERAL to THE HONORABLE THE COLONIAL SECRETARY, reporting on the
Quinquennial Returns of Friendly Societies in New South Wales. (1856 to 1860.)General Registry Office,
Sydney, 31 December, 1861.

SIR,

By the Act 17th Victoria, No. 26, passed in the year 1853, intituled, "*An Act to Consolidate and Amend the Laws relating to Friendly Societies*," it is enacted (Section XV.) that "the Trustees or other Officers of every Society or Branch established under the provisions of this Act &c. shall within three months after the expiration of the month of December 1855 and so again within three months after the expiration of every five years succeeding transmit to the Office of the Registrar General or other Officer appointed by the Governor to receive the same a Return of the rate of sickness and mortality experienced by the Society or Branch within the preceding five years in such form as shall be prepared for that purpose and furnished to the Trustees of every such Society or Branch by the Colonial Secretary."

2. The Act nowhere directs the use to which these quinquennial Returns are to be put; but as I conceive the object of legislation on behalf of these Societies to have been to regulate their operations, to check irregularities, and to protect the general interests of their members, and as these objects may be best secured by giving publicity to the returns required to be furnished, I deem it my duty to present to you the following facts and statements, taken from the quinquennial Returns received in the early part of the present year, extending over the period from 1856 to 1860, both inclusive.

Supposed object
of the Friendly
Societies Act.

3. It is solely in the interest of these institutions that I take upon myself the labours of this self-imposed task, for I can discover no possible good that can accrue to them by the mere receipt of the Returns. I have therefore attempted to tabulate the results in a manner that will convey, in the simplest and most useful form, the more important facts which are exhibited in the Returns, and which may be useful to illustrate the practical operation of the Societies established under the provisions of the Act in question.

Reasons for
making report
on the quinquen-
nial Returns.

4. The information given in the Returns is not of that full and complete description necessary to elucidate the measure of success of the Societies to which they relate; nor is it possible to examine, with any degree of accuracy, the soundness of the basis upon which they are established. My object will be attained if I succeed in drawing attention to their working, and to the degree of benefit they may be made the means, under good management, of conferring on society.

Information not
so full as to be
wished.

5. It appears then that the number of Societies established in the Colony does not exceed five, viz. :—

Of the number
and designation
of Friendly
Societies.

- 1st. The Ancient Order of Foresters, numbering 830 members;
- 2nd. The Grand United Order of Oddfellows, numbering 989 members;
- 3rd. The Australian Mutual Benefit Society, numbering 130 members;
- 4th. The St. Patrick's Total Abstinence Society, numbering 64 members; and
- 5th. The United Shipwrights' Society, numbering 34 members.

These five Societies embrace an aggregate of 2,047 members, and there is hardly any description of industry which does not contribute more or less to make up this number. The

classes of labour which are chiefly distinguishable are described as labourers, carpenters, wheelwrights, blacksmiths, mariners, shoemakers, and tailors, combining *light* and *heavy* labour, both *with* and *without* exposure.

Heads of information supplied.

6. The information required in the forms established for making the quinquennial Returns is as follows:—

- 1st. The name or initials of the member;
- 2nd. The trade or profession;
- 3rd. The date of birth;
- 4th. The date of admission;
- 5th. The date of becoming a free member;
- 6th. For what time entitled to relief on account of sickness;
- 7th. Ditto on account of superannuation;
- 8th. Date of death;
- 9th. Place of residence at time of death.

From these data I have endeavoured to classify into four divisions the more important facts which they are found capable of illustrating.

Mortality and sickness compared with England.

7. Table A, appended to this statement, shews that out of 2,047 persons liable to mortality, 74, or 3.61 per cent., died during the five years; and that out of the same number liable to sickness, 410, or 20.02 per cent., were sick and had relief during the same period.

The mortality of the Friendly Societies of England, taken from a Report of Mr. Finlaison's, presented to Parliament in 1853, was at the annual rate of 1.26 per cent., or 6.30 per cent. for the five years; and the sickness was 24.99 per cent. for the same period.

I have no statistics later than these to refer to.

The comparison stands thus:—

	Died.	Sick.
England.....	6.30 per cent.	24.99 per cent.
New South Wales.....	3.61 „	20.02 „
Difference in favour of New South Wales }	2.69 „	4.97 „

It would seem, then, by these figures, that whilst the amount of sickness is less than England, by nearly *five per cent.* for the quinquennial period, the mortality is less by nearly *one-half.*

Classification of occupations.

8. In establishing a Friendly Society it would, no doubt, theoretically speaking, be desirable to limit the admission of members to particular classes of occupation, but in practice this is found impossible, more particularly in a limited community like ours.

I have endeavoured to classify the occupations set down in the Returns, into *four* divisions, namely, *light* labour, *with* and *without* exposure, and *heavy* labour, *with* and *without* exposure, after the plan adopted by Mr. Finlaison in the preparation of the English Tables.

The results of this classification are as follows, namely,—that out of the total of 2,047 members, 707, or 34.53 per cent., are engaged in light labour without exposure; and 143, or 6.98 per cent., in light labour with exposure.

233, or 11.38 per cent., are engaged in heavy labour without exposure; and 964, or 47.09 per cent., in heavy labour with exposure.

Or putting the results in another way:—Those classes of labour *not subject to exposure to the weather* contribute 940 members, or 45.92 per cent. to the Societies, whilst those *subject to exposure* contribute 1,107 or 54.07 per cent.

Of the mortality in proportion to members.

9. The mortality of our Societies seems to be small compared with that which the returns I have quoted shew it to be in the Societies of the Mother Country.

It appears that out of 707 persons engaged in light labour *without exposure*, 30, or 4.24 per cent., died during the five years; and that out of 143 persons engaged in light labour *with exposure*, only 2, or 1.40 per cent., died.

It further appears that out of 233 persons engaged in heavy labour *without exposure*, 8, or 3.43 per cent., died; and that out of 964 persons engaged in heavy labour *with exposure*, 34, or 3.52 per cent., died during the five years.

Or putting it in another way:—Out of 940 persons engaged in labour *without exposure*, 38, or 4.04 per cent., died; and out of 1,107 persons engaged in labour *with exposure*, 36, or 3.25 per cent., died.

Of sickness in proportion to members.

10. Turning to the question of sickness, shewn in the third column of the Table, it appears that out of 707 persons liable to sickness, who were engaged in light labour *without exposure*, 138, or 19.51 per cent., were sick and got relief in the five years; and that out of 143 persons engaged in light labour *with exposure*, 17, or 11.88 per cent., were sick and had relief. It further appears that out of 233 persons liable to sickness, engaged in heavy labour *without exposure*, 37, or 15.87 per cent., were sick and had relief; and that out of 964 persons engaged in heavy labour *with exposure*, 218, or 22.61 per cent., were sick and received relief. Or putting it in another point of view:—It seems that out of 940 persons engaged in labour *without exposure*, 175, or 18.61 per cent., were sick and received relief from the Societies; and that out of 1,107 persons engaged in labour *with exposure*, 235, or 21.22 per cent., were sick and experienced relief during the quinquennial period.

FRIENDLY SOCIETIES.

3

11. There are two very essential things to be determined, in order to turn the facts before us to the most useful account; namely, the quantum of sickness to which the members of Friendly Societies are liable at each age, and the law of mortality to which they are subject. Let us turn to Table B in the Appendix, which exhibits in quinquennial periods the ages at which deaths occurred, and we shall find that there died at the ages specified as follows, viz. :—

Essentials to be determined by the returns.

AGES.	LIGHT LABOUR.		HEAVY LABOUR.		TOTALS.
	Without exposure.	With exposure.	Without exposure.	With exposure.	
25 to 30	2	..	1	3	6
30 " 35	3	..	4	5	12
35 " 40	6	..	1	5	12
40 " 45	7	..	2	4	13
45 " 50	9	2	11
50 " 55	1	1	..	3	6
55 " 60	2	2
Over 60	5	5
Unspecified	2	1	..	5	8
	30	2	8	34	74

Upon so slender data it would perhaps be unsafe to attempt to deduce the law of mortality; indeed much greater research than I have the means or leisure to institute would be necessary to frame such a law as would be useful as a guide to the members of Friendly Societies.

The assistance of a professional actuary might advantageously be engaged to prosecute further inquiry. The duty of the Government Statist is fulfilled in presenting the facts; it is for the Societies to take steps to turn those facts to the greatest use.

12. It is obvious that the contributors to Friendly Societies are placed in very different degrees of command over those requisites which prolong or shorten life; of these requisites, food, air, and clothing, are supposed to form the chief ingredients.

Contributions to Friendly Societies placed in different degrees of command over health.

The nature of the man's occupation, the density of aggregation, and the temperature and quality of the atmosphere are very important agencies affecting the health and vigour of the working classes, and influencing in a very material degree the quantum of sickness to which they will be subject.

13. The frequency of attack and duration of illness are important elements for consideration, as it is the combination of these two things that produces the whole amount of sickness with which an association may be affected within a given space of time.

Frequency and duration of illness important elements for consideration.

This is also a matter which it behoves the members of Friendly Societies to inquire into. Let us see what light the returns throw upon the subject :—

14. Table C, in the Appendix, shews the total instances of sickness in each Society in each year of the five, and the weeks and days during which relief was administered from the funds.

Of the extent and duration of sickness in the Societies.

I shall draw no comparison between the respective Societies, but shall confine myself to an exposition of the total results.

In the five years, out of the number of 2,047 persons liable to sickness, the returns exhibit 663 cases of sickness, extending over the period of 3,590 weeks (less one day.)

The cases of sickness are in the proportion of 32.39 per cent. of the persons liable, and the period of sickness to the number of cases of sickness averaged five weeks and three days.

The Returns, with one exception, do not shew the sums paid for relief.

The ages at which sickness occurred amongst the members of the different Societies have been classified and tabulated, with the following results, namely :—

AGES.	LIGHT LABOUR.		HEAVY LABOUR.		TOTALS.
	Without exposure.	With exposure.	Without exposure.	With exposure.	
15 to 20	10	2	12
20 " 25	26	3	3	15	47
25 " 30	23	1	2	54	80
30 " 35	35	2	10	43	90
35 " 40	14	2	6	20	42
40 " 45	18	3	7	29	57
45 " 50	8	4	3	8	23
50 " 55	3	1	7	11
55 " 60	1	1	3	6	11
Over 60	1	2	3
Unspecified	34	34
	138	17	37	218	410

15. The last Table, D, in the Appendix, has reference to one Society alone, namely, The St. Patrick's Total Abstinence Benefit Society.

Of the St. Patrick's Total Abstinence Benefit Society.

The

The officers of this Society having taken pains to furnish full details of its practical working, I am enabled to present a statement of the average expense falling upon each member of the Society, on account of sickness, in each of the five years; it was as follows, viz. :—

	Number of Members.	Average of sickness to each Member.		Average expense to each Member.		
		Days.		£	s.	d.
1856	59	5.1		0	14	10½
1857	55	3.3		0	9	4½
1858	46	6.4		0	17	11½
1859	45	8.9		1	5	7½
1860	43	4.7		0	13	6

16. I do not, on the present occasion, deem it necessary to pursue this investigation at greater length; my object in doing what I have done is to invite attention to the practical working of the Societies already established amongst us, and to the great advantages which Benefit Institutions, when properly conducted, are calculated to confer on society.

Were institutions of this self-reliant and provident nature more widely established, we should see and hear less of the misery and destitution which haunt our daily walk through the streets, and make so large a demand upon the alms of the benevolent.

As to the effect of physical exertions upon the health of members.

17. A closer investigation of the subject than I have the means of following out, would probably reveal the fact which has been abundantly established in the Mother Country, that the greatest demands upon the funds of Friendly Societies are consequent rather upon the expenditure of physical exertion than upon the other agencies which are supposed to influence sickness amongst the members of these Associations.

A careful study of the returns in England and Wales has shewn that the quantum of sickness annually falling to the lot of man is in direct proportion to the demands on his muscular power; and there can be no reason for supposing that the prodigal waste of corporeal energy is less likely to be followed by enervation and decrepitude of the bodily frame in New South Wales, where the climate adds its exhausting effects, than is found to be the case in the Mother Country.

Remarks on financial management.

18. I would wish to say a few words, in conclusion, upon the management and social advantages of these institutions; and first, as to their financial condition:—As I have elsewhere said, the Returns do not enable me to examine the soundness of the basis on which the contributions of the members are based, and I would earnestly impress upon the minds of members the necessity of thoroughly investigating this essential element to ultimate success. Owing to erroneous calculations, many Societies at Home have been wound up; some through extravagance, others through fraud practised by those in whom the members reposed confidence. These sources of failure should be carefully guarded against, and in order to induce greater attention to these matters, it might be well that there should be required of the officers of these Societies, an annual statement of the funds, receipts, and disbursements, to be rendered to some officer appointed for the purpose.

Social advantages of Friendly Societies.

19. Social intercourse almost invariably enlarges human sympathies; and one of the chief recommendations of Friendly Societies to the favour and encouragement of the philanthropic mind is, that they are a spontaneous development of that germ of all social union—man's innate sense of the insufficiency of isolated individual effort to secure happiness and prosperity.

Another most important consideration connected with these Societies, and one which should commend them to the sympathy and protection of the State, is the provident and self-dependent spirit they are apt to infuse into the minds and habits of the working classes.

If these self-governed Societies presented no more valuable contribution to the cause of social progress than the practical education of their members in habits of self-dependence, and in the constant exercise of the duties and functions appertaining to the management of their affairs, they would deserve the support of every true friend of the people.

Facts and figures essential to proper knowledge of the condition and progress of Friendly Societies.

20. In order to insure an extension of the social blessings to New South Wales, which have attended the development of these and similar institutions in the Mother Country, it is necessary that we should enlist into the service of philanthropy the powerful aid of facts and figures. Benevolence and charity cannot be too much encouraged; but to provide against future discomfiture, facts must be admitted to have their due weight, and *natural laws* must be allowed to govern. The sooner, therefore, these are calmly investigated and understood amongst the members and all well-wishers of these Societies, the better for their own immediate interests and for the general good.

It has been with the view of throwing some little light upon the subject, and of assisting in awakening attention to the valuable agencies of these interesting institutions, that I have taken upon myself the task, the results of which I have now the honor to lay before you.

I have, &c.,

CHRIS. ROLLESTON,

Registrar General.

THE LEGISLATIVE ASSEMBLY.

VOTES No. 9. TUESDAY, 17 SEPTEMBER, 1861.

16. Distribution of Relief to Sufferers by last Flood at Windsor:—Mr. Driver moved, pursuant to notice,—
- (1.) That a Select Committee be appointed, with power to send for persons and papers, to inquire into and report to this House upon the distribution and relief to sufferers by the Flood at Windsor, as shewn in the Return from the Windsor Bench of Magistrates, ordered by the House to be printed on the 27th March last.
- (2.) That such Committee consist of Mr. Cowper, Mr. Hay, Mr. Forster, Mr. Walker, Mr. Cunneen, Mr. Leary, Mr. T. Garrett, Mr. Stewart, and the Mover.
- Debate ensued.
- Question put and passed.

**DISTRIBUTION OF RELIEF TO SUFFERERS BY LAST FLOOD
AT WINDSOR.**

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 17th September last, “*to inquire into and report to this House upon the distribution of relief to Sufferers by the Flood at Windsor, as shewn in the Return from the Windsor Bench of Magistrates, ordered by the House to be printed on the 27th March last,*” “*with power to send for persons and papers,*” have agreed to the following Report :—

In the course of the inquiry entrusted to them, your Committee have examined a number of witnesses resident in the District, who have afforded to your Committee much useful information. It appears to your Committee that relief has, in many cases, been most improperly distributed. Parties have been relieved who were not at the time destitute, and others whose distress had no connection with the Floods.

RD. DRIVER,
Chairman.

*Legislative Assembly Chamber,
Sydney, 4 December, 1861.*

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 20 SEPTEMBER, 1861.

MEMBERS PRESENT:—

Mr. Driver,		Mr. T. Garrett,
Mr. Forster,		Mr. Leary.

R. Driver, Esq., called to the Chair.

Votes, No. 9, (17th instant, Entry 16), appointing the Committee, upon the Table.
Printed copies of the Return relative to the Relief granted during the last Flood at Windsor, before the Committee.

Committee deliberated.

Ordered, That Messrs. Ascough and Day, Magistrates at Windsor, be informed of the Sitting of the Committee.

[Adjourned to Wednesday, 25th instant, at Eleven o'clock.]

WEDNESDAY, 25 SEPTEMBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Cowper,		Mr. T. Garrett,
Mr. Cunneen,		Mr. Leary,
Mr. Forster,		Mr. Stewart,

Mr. Walker.

Committee deliberated.

Ordered, That a letter be transmitted to the Magistrates of the Bench at Windsor, collectively, informing them of the sitting of the Committee.

Present:—J. Ascough, Esq., J.P., of Windsor;
H. Day, Esq., M.D., J.P., of Windsor;
Mr. J. M'Quade.

Mr. John M'Quade called in and examined.

Question arising as to the witness reading a paper in evidence,—

Strangers ordered to withdraw.

Committee deliberated.

Motion made (*Mr. Stewart*), and Question,—That the document offered by witness be handed in to the Committee, with a view to determine its reception in evidence, or otherwise,—*agreed to*.

Parties called in, statement received from witness, and read.

Ordered, That the statement be not received as evidence, but remain upon the table.

Examination concluded.

Remaining witness, Mr. Cope, called in.

On motion of Mr. Stewart,—

[Adjourned till To-morrow, 26th instant, at Ten o'clock.]

THURSDAY, 26 SEPTEMBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Cowper,		Mr. T. Garrett,
Mr. Cunneen,		Mr. Stewart,
Mr. Forster,		Mr. Walker.

Present:—J. Ascough, Esq., J.P., of Windsor;
H. Day, Esq., J.P., of Windsor;
Mr. J. Cope.

Mr. Joseph Cope examined.

Henry Day, Esq., M.D., J.P., examined.

Several documents handed in, certain whereof appended to the Evidence (*Vide List of Appendix*).

The

The Chairman having occasion to leave the Chair,—

W. Forster, Esq., called thereto.

Examination concluded.

The Honorable Charles Cowper, Esq., M.P., *Colonial Secretary*, a Member of the Committee, handed in the Correspondence with the Bench of Magistrates at Windsor (*Vide Separate Appendix*).

[Adjourned to Monday, 2nd October, at *Eleven o'clock*.]

WEDNESDAY, 2 OCTOBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Cunneen, | Mr. Forster,

Mr. Stewart.

Present:—J. Ascough, Esq., J.P., of Windsor.

Mr. John Frederick Jones called in and examined.

Witness submitted a verbal application for the reimbursement of his expenses in attending Committee.

To be subsequently considered.

Mr. John Armstrong Dawson called in and examined.

Witness submitted a verbal application for payment of his expenses in attending the sittings of the Committee.

To be subsequently considered.

Committee deliberated.

[Adjourned to Wednesday, 9th instant, at *Eleven o'clock*.]

WEDNESDAY, 9 OCTOBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Cunneen, | Mr. Forster,

Mr. Stewart.

Mr. Henry Moses called in and examined.

[Adjourned to Tuesday, 15th instant, at *Eleven o'clock*.]

TUESDAY, 15 OCTOBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Cunneen, | Mr. Leary,

Mr. Forster, | Mr. Walker.

Present:—J. Ascough, Esq., J.P., of Windsor.

H. Day, Esq., M.D., J.P., of Windsor.

Mr. J. B. Laverack called in and examined.

Witness applied for his expenses in attending the Committee.

Mr. Robert Dick, Postmaster, Windsor, called in and examined.

Witness applied for his expenses in attending the Committee.

Mr. David Cockerell called in and examined.

[Adjourned till To-morrow, 16th instant, at *Eleven o'clock*.]

WEDNESDAY, 16 OCTOBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Forster, | Mr. Walker.

Present:—J. Ascough, Esq., J.P., of Windsor.

H. Day, Esq., M.D., J.P., of Windsor.

Henry Day, Esq., M.D., J.P., further examined.

Mr. Thomas Marsden called in and examined.

James Ascough, Esq., J.P., examined.

[Adjourned to Wednesday, 23rd instant, at *Eleven o'clock*.]

WEDNESDAY, 23 OCTOBER, 1861.

MEMBERS PRESENT :—

R. Driver, Esq., in the Chair.

Mr. Cunneen,		Mr. T. Garrett,
Mr. Forster,		Mr. Leary,
	Mr. Walker.	

Committee deliberated.

[Adjourned to Wednesday, 30th instant, at *Eleven* o'clock.]

WEDNESDAY, 30 OCTOBER, 1861.

MEMBERS PRESENT :—

R. Driver, Esq., in the Chair.

Mr. Forster,		Mr. Walker,
	Mr. Leary.	

Mr. R. W. Cobcroft called in and examined.

Mr. D. Cobcroft called in and further examined.

Witness submitted a verbal application for payment of his expenses in attending the Committee.

To be subsequently considered.

William Walker, Esq., M.P., a Member of the Committee, examined in his place.

[Adjourned to Wednesday, 6 November, at *Eleven* o'clock.]

WEDNESDAY, 6 NOVEMBER, 1861.

MEMBERS PRESENT :—

Mr. Forster,		Mr. Walker,
	Mr. Leary.	

In the absence of the Chairman, Mr. Leary called to the Chair.

And Mr. Leary having stated that it was the wish of the Chairman that the Committee should be further adjourned,—

Ordered, That, during the interval of adjournment, printed copies of Evidence be distributed to the several Members of the Committee.

[Adjourned to Wednesday next, at *Eleven* o'clock.]

WEDNESDAY, 13 NOVEMBER, 1861.

MEMBERS PRESENT :—

Mr. Forster,		Mr. Walker,
Mr. Cunneen,		Mr. Leary.

In the absence of the Chairman, Mr. Leary called to the Chair.

Printed copies of complete Evidence not having been yet supplied,—

Committee adjourned (on motion of Mr. Forster) to Wednesday next, at *Eleven* o'clock.

WEDNESDAY, 20 NOVEMBER, 1861.

MEMBERS PRESENT :—

Mr. Forster,		Mr. Cunneen,
Mr. Leary,		Mr. Walker,
	Mr. T. Garrett.	

In the absence of the Chairman, Mr. Forster called to the Chair.

Committee deliberated upon the Evidence taken during this inquiry.

And the Chairman not having yet submitted a Draft Report to the Committee,—

Motion made (*Mr. Leary*) and Question proposed,—That this Committee do now adjourn to this day "week."

Amendment proposed (*Mr. Walker*), to omit the word "week," with a view to the insertion in its place of the words "six months."

Question put,—That the word proposed to be omitted stand part of the Question.

Committee divided.

Ayes, 2.

Noes, 2.

Mr. Leary,		Mr. Walker,
Mr. T. Garrett.		Mr. Cunneen.

Mr. Walker,
Mr. Cunneen.

The Chairman gave his casting vote with the Ayes.

Amendment negatived.

Original

Original Question then put.
Committee divided.

Ayes, 2.		Noes, 2.
Mr. Leary, Mr. T. Garrett.		Mr. Walker, Mr. Cunneen.

The Chairman gave his casting vote with the Ayes.
Original Question agreed to.

[Committee adjourned accordingly to Wednesday next, at *Eleven o'clock*.]

WEDNESDAY, 27 NOVEMBER, 1861.

MEMBERS PRESENT :—

R. Driver, Esq., in the Chair.

Mr. Forster, Mr. Leary,		Mr. Cunneen, Mr. Walker,
Mr. T. Garrett.		

Chairman laid before the Committee a Draft Report.

Draft of Report read, viz. :—

1. In the course of the inquiry entrusted to them, your Committee have examined a number of witnesses resident in the District, who have afforded to your Committee some useful information. It appears to your Committee that "a very large amount of" relief has in many cases been most improperly distributed. Parties have been relieved who were not at the time destitute, and others whose distress had no connection with the Floods.
2. The misappropriation has been owing to some degree of negligence, and to a still greater degree of fraud practised by the parties relieved and recommending relief, and has been further extenuated by the difficulties in which the Magistrates found themselves, which however might, in the opinion of your Committee, have been avoided, had ordinary care been exercised.
3. It seems difficult to avoid the conclusion that very little real good is done by the distribution of public funds for such charitable purposes as were contemplated in the case before your Committee, and therefore, though perhaps it would be rash to refuse such relief in all cases in future, your Committee beg to recommend that the utmost caution be exercised in acceding to any such demands in time to come.

Committee deliberated.

Resolved :—That the Draft Report be considered paragraph by paragraph, with a view to its being printed in amended shape, and circulated amongst the Members of the Committee before their next meeting.

Paragraph 1 read, and verbally amended.

Motion made (*Mr. Leary*) and Question proposed,—That the words "a very large amount of" be struck out.

Committee deliberated.

Question put.

Committee divided.

Ayes, 3.		Noes, 2.
Mr. Forster, Mr. Leary, Mr. T. Garrett.		Mr. Walker, Mr. Cunneen.

Words struck out accordingly.

Motion then made, and Question,—That this paragraph, as amended, stand part of the Draft Report of the Committee,—*agreed to*.

Paragraph 2 read.

Motion made, and Question,—That this paragraph stand part of the Draft Report,—*put and negatived*.

Paragraph struck out accordingly.

The following paragraph proposed instead thereof (*Mr. Forster*):—"Your Committee feel bound to record their conviction that no grounds whatever exist for any imputation upon the good faith of the Magistrates by whom the difficult task of distribution was undertaken and gratuitously performed, and that whatever errors may have been committed are greatly extenuated by the circumstances in which they were placed."

Question,—That this paragraph be inserted in the Draft Report,—*put and negatived*.

The following new paragraph proposed (*Mr. Leary*):—"Your Committee are of opinion, from the evidence adduced before them, that many of the recommendations for relief were improperly given; and your Committee are also of opinion that, whilst the Magistrates have not acted in many of these cases with discrimination, they nevertheless believe that they acted with the best intentions to distribute the relief in the most judicious manner."

Question

Question put,—That this paragraph be inserted in the Draft Report.
Committee divided.

Ayes, 3.

Noes, 2.

Mr. Leary,
Mr. Walker,
Mr. Cunneen.

Mr. Forster,
Mr. T. Garrett.

New paragraph inserted accordingly.

Paragraph 3 read.

Committee deliberated.

Motion made (*Mr. Walker*) and Question proposed,—That the words, "It seems difficult to avoid the conclusion that very little real good is done by the distribution of public funds for such charitable purposes as were contemplated in the case before your Committee," be struck out.

Question put,—That these words be struck out.

Committee divided.

Ayes, 2.

Noes, 3.

Mr. Walker,
Mr. Cunneen.

Mr. Forster,
Mr. T. Garrett,
Mr. Leary.

Motion made and Question,—That this paragraph stand part of the Draft Report,—*agreed to.*

Committee deliberated.

Ordered, That the Draft Report, *as amended,* be printed without delay, and a copy thereof transmitted to each of the Members of the Committee, for his perusal.

[Adjourned to Wednesday next, at *Eleven o'clock.*]

WEDNESDAY, 4 DECEMBER, 1861.

MEMBERS PRESENT:—

R. Driver, Esq., in the Chair.

Mr. Leary,

Mr. Walker.

Mr. Cunneen,

Committee met further to consider Draft Report—paragraph by paragraph.
Printed copies of the same as amended, before the Committee.

Paragraph 1 read.

"In the course of the inquiry entrusted to them, your Committee have examined a number of witnesses resident in the District, who have afforded to your Committee much useful information. It appears to your Committee that relief has, in "many" cases, been most improperly distributed. Parties have been relieved who were not at the time destitute, and others whose distress had no connection with the Floods."

Motion made (*Mr. Walker*), and Question proposed,—That the word "many" be omitted, with a view to the insertion in its stead of the word "some."

Committee deliberated.

Question put.

Committee divided.

Ayes, 2.

Noes, 2.

Mr. Walker,
Mr. Cunneen.

Mr. T. Garrett,
Mr. Leary.

The Chairman gave his casting vote with the Noes.

Question negatived, and paragraph, as read, agreed to.

Paragraph 2 read.

Motion made (*Mr. T. Garrett*), and Question proposed,—That paragraph 2 be struck out.

Committee deliberated.

Question put.

Committee divided.

Ayes, 2.

Noes, 2.

Mr. T. Garrett,
Mr. Leary.

Mr. Walker,
Mr. Cunneen.

The Chairman gave his casting vote with the Ayes.

Paragraph struck out accordingly.

Paragraph 3 read.

Motion made (*Mr. T. Garrett*), and Question proposed,—That paragraph 3 be struck out.

Committee deliberated.

Question put and agreed to.

Motion then made (*Mr. Walker*), and Question proposed,—That the words "Your Committee at the same time are of opinion that the distributors of relief, acting upon recommendations, were not actuated by any improper motives in the distribution of such relief," be added to the Report.

Committee deliberated.

Question put.

Committee

Committee divided.

Ayes, 2.
Mr. Walker,
Mr. Cunneen.

Noes, 2.
Mr. T. Garrett,
Mr. Leary.

The Chairman gave his casting vote with the Noes.
Question negatived.

Motion made, and Question,—That this Report, as amended, be the Report of the Committee,—put.

Committee divided.

Ayes, 2.
Mr. T. Garrett,
Mr. Leary.

Noes, 2.
Mr. Walker,
Mr. Cunneen.

The Chairman gave his casting vote with the Ayes.
Report accordingly agreed to.
Chairman to report to the House.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

DISTRIBUTION OF RELIEF TO SUFFERERS
BY LAST FLOOD AT WINDSOR.

WEDNESDAY, 25 SEPTEMBER, 1861.

Present:—

MR. COWPER, MR. CUNNEEN, MR. DRIVER, MR. FORSTER,		MR. T. GARRETT, MR. LEARY, MR. STEWART, MR. WALKER.
--	--	--

R. DRIVER, ESQ., IN THE CHAIR.

Mr. John Michael M'Quade called in and examined:—

1. *By the Chairman:* You are a resident of Windsor? I am.
2. And have resided there some years? I have.
3. Do you recollect the distribution of relief to the sufferers by the flood at Windsor? I do, very well.
4. Has your attention been directed to the Return from the Bench of Magistrates of that District? It has.
5. Have you looked over the list carefully? I have.
6. Can you state from your own knowledge how the relief referred to in that Return was distributed? I find there are a number of persons who, according to the instructions of the Colonial Secretary to the Bench of Magistrates—some electors and others resident in the town of Windsor,—received relief who were not entitled to it, nor in need of the same.
7. Can you state why they were not entitled to this relief? They were in constant employment, and the flood never affected them. They were living in the town of Windsor, always away from the reach of any flood.
8. Can you give the Committee the names of any of these persons? I can. First of all, Mrs. Richard Arnold—the Return gives the names of several females, the wives of those who received relief. Mrs. Richard Arnold was recommended by J. F. Jones, one of the persons supplying tea and sugar. The husband of this person was, I believe, in the employ of Mr. Joseph Cope, of Windsor, at this time, and receiving good wages. If the Magistrates will explain who the Mrs. Byrnes here mentioned is meant for—whether it is meant for Mrs. William Byrnes—
9. Do you know any Mrs. Byrnes in the district? I know three; two reside in the town of Windsor.

Mr. J. M.
M'Quade.

25 Sept., 1861.

- Mr. J. M. M'Quade.
25 Sept., 1861.
10. And the third? Is the wife of a freeholder in the town of Windsor, and one of the electors in the Hawkesbury. In fact, if it is the third, he could get credit anywhere.
11. Do you notice any other names? I do; I just wish to mention that this Mrs. Byrnes is recommended by Isaac Hopkins; he is working in his father's mill, who was one of the persons who supplied the flour, and I believe, he himself delivered the flour. I know he is working in his father's mill.
12. Is William Hopkins any relation of his? That is a brother; Isaac Hopkins is a son of the person who supplied the flour. I wish to call the attention of the Committee to the fact, that Edward Breeze is mentioned twice as having received this allowance.
13. *By Mr. Garrett*: What is Edward Breeze? I believe he is a farmer; he is a carrier; he has a wife, but no children.
14. *By Mr. Leary*: Was his farm subject to flood? I believe so, but he received this allowance twice. The next is Thomas Burgess; he is put down as a gardener, recommended by John A. Walker, brother of one of the candidates. This person, from all the information I could gather, lived at M'Grath's Hill, away out of the floods. He was a cakeman; in fact, he was no gardener; he used to sell cakes, oranges, and so forth.
15. *By the Chairman*: Did he lose anything by the floods? I believe not.
16. Have you any others? Yes; Lucy Carroll is mentioned twice; on one occasion as having received 200 lbs. of flour, and on another, 300 lbs.; that is, 500 lbs. That woman was living in the town of Windsor, always away from the reach of the floods; and from what I have heard, she was washerwoman to the family of Mr. Henry Day, one of the Magistrates.
17. *By Mr. Garrett*: Who is Mr. Edward Enhall, the gentleman who recommended Lucy Carroll in the first instance? I know nothing of the man.
18. Who is the party recommending the second time? No person recommended her.
19. *By the Chairman*: Do you see the name of John Cavanaugh on that list? I do.
20. What was he? A person living on M'Grath's Hill; he is a wood carter.
21. That person does not appear to have been recommended; are you aware whether he lost anything? I am not aware; I know he had some ground, and a small portion might have been flooded, but as far as I remember he had nothing in it; it is at the bottom of M'Grath's Hill; the same ground is cropped now, but it was not upon that occasion. The next case is that of Mrs. Connor, of Cornwallis; I believe that woman received relief three times.
22. Do you know anything of that case? The woman deserved relief; but I only state that there was no care taken in the distribution of relief. The next is Patrick Dillon; he is recommended by as respectable a person as any in the district—an old gentleman, Mr. Thomas Tebbutt; but it is well known to the Honorable Member for Windsor that this man, for a long time previous, received every fortnight, relief from the poor-house.
23. That was well known to the residents of the district? It was, and Dr. Day, as the surgeon to the hospital there, ought to have known it, and I made enquiries yesterday about that matter. A Mrs. Dunn is mentioned thrice, as having received 350, 200, and 300 lbs. of flour; I wish to know if, in each case, that is the same individual? *
24. This Isaac Hopkins, who recommends her is the miller's son? Yes.
25. She appears to have been relieved twice without any recommendation? If it is the same person; but from the way in which this Return is made out I cannot find out; this could have been ascertained if the Christian names had been given. The next is Mrs. Enright, recommended by no person, 200 lbs. flour; she lives in Windsor, away from the reach of any flood, and never had any cultivation; she keeps a shop. I now come to one who was relieved on my recommendation—Joseph Elliott. In the Return he is stated to be a farmer, but he is nothing of the kind; he never was a farmer; he is a brickmaker, and lost £60 worth of bricks to my knowledge; he was in actual want. Henry Featherstone was a voter, and received 250 lbs. flour; that man is a blacksmith, and was working at his trade at the time; he is as well known to the Magistrates as I am.
26. *By Mr. Garrett*: Who is the person recommending him? As respectable a person as any in Windsor—Mr. Thomas Primrose. The next I consider a glaring case, Michael Flood, recommended by his wife's father, who was, as was well known—a canvasser for Mr. Walker.
27. *By the Chairman*: Was Michael Flood well known? Both by Mr. Ascough and Dr. Day.
28. Personally known? Personally known, and so is Mr. George Seymour; and the fact of Mr. Seymour being Flood's wife's father was well known to Dr. Day and Mr. Ascough.
29. Did this Flood lose anything by the flood? No.
30. What is he? A shoemaker; a good workman; I know where he is living this year.
31. *By Mr. Leary*: Where was he living at this time? In Windsor, away from the reach of the flood.
32. *By the Chairman*: Had he been there any time? Yes.
33. Working at his trade of bootmaking? Yes, of late; at one time he was agent for Mr. John Ridge, butcher.
34. You know that at the time he was not in actual want? Not on account of the flood; he was not entitled to this relief on account of the flood.
35. *By Mr. Garrett*: Patrick Flood, is he a relative? Yes. Patrick Flood has I believe—and I think the Magistrates will acknowledge it—some right to property in Windsor, but I believe he lost something.
36. *By the Chairman*: You say Michael Flood was very well known to the Bench of Magistrates at Windsor? Yes, very well known.

37. Is this Flood a person of any influence in Windsor? Among a certain class of electors he has very great influence. Mr. J. M. M'Quade.
38. Does he take any part in elections? Yes, a very active part, and he did so on the last election. 25 Sept., 1861.
39. About what time did that election take place? The elections were about to take place within a fortnight or so. The elections were over the day before Christmas, and this relief was being distributed in December.
40. Do you find any other names to which you object? Yes; Thomas Forrester, farmer, if that is the man. I do not know any Thomas Forrester, a farmer, but there is a cake man of that name, a ginger beer brewer.
41. There is a Robert Forrester—you have not mistaken the names? I believe there is a Robert Forrester, but I am speaking of Thomas Forrester; I have made all enquiries, and he never had any cultivation. The next case is George Graham; this person is put down as a farmer, and he received 200 lbs. of flour; now he was a servant in the employ of Mr. John Ridge, and was living on his farm. Sometimes he goes by the name of George Lock. At the time of the flood he was in the employ of Mr. Ridge, and he had to leave Ridge's farm and come into Windsor, but he was in the employ of Mr. Ridge.
42. Did he suffer from the effects of the flood in any way? We all suffer by the floods, everybody in the district suffered in one way or other, in business or in some other way.
43. *By Mr. Leary*: Was this party entitled—I presume that was the object of the Chairman's question—to receive relief according to the instructions of the Colonial Secretary? He was not entitled according to the instructions.
44. You state that he did not lose anything by the flood himself? Not that I am aware of.
45. What do you mean when you say that everybody in the district lost by the flood? I mean in business or in some other way. I lost myself, and lots of people besides. The people had not so much money to lay out to make purchases, and that affected every person more or less.
46. *By the Chairman*: Are there any other names you wish to point out to the Committee? I wish to call the attention of the Committee to Mrs. Green; she is put down as having received 350 lbs. flour; she is living in the town of Windsor and is a washerwoman, well known to Dr. Day and Mr. Ascough.
47. Did she lose anything by the flood? Not that I am aware of. She is a washerwoman, never had any cultivation, and lives in Windsor.
48. Quite out of reach of the flood? Yes; the water certainly came into the back paddock of Mr. Cadell, but I am not aware that it came into her yard.
49. *By Mr. Leary*: What is the position of Mr. Primrose, the person recommending? He is a respectable person.
50. *By Mr. Walker*: He is no supporter of mine, is he? I cannot tell. I was sworn, and I cannot reveal anything that occurred in the ballot room, for I was a scrutineer.
51. *By the Chairman*: Have you any other names? Mrs. Hunt—I do not know who is meant; and if Mrs. Horan is meant for Mrs. John Horan, of Windsor, her husband was a very active canvasser for Mr. Walker. If Mrs. Hunt means Mrs. James Hunt, her husband had a vote for Windsor, and was out of reach of the flood. Mrs. Izzard, if that is Mrs. George Izzard, George Izzard had a vote. He received 350 lbs. flour on the recommendation of Mr. Stiles. I believe this next case of Mrs. Johnston is a glaring case, she having received 100 lbs. flour, 2 lbs. tea, and 8 lbs. sugar, upon no person's recommendation. Her husband—whether he is her husband or not I cannot say, but her reputed husband—was in the employment of Mr. Henry Moses, miller, and was receiving high wages at the time, and this was well known to Mr. Ascough. I presume she is the wife of Abraham Johnston.
52. Do you know any other person in the district of the same name? There are several persons in the district, but not in the town of Windsor. The next case is Joseph Jasper, an elector and voter, recommended by John Langford, a well-known canvasser and supporter of Mr. Walker, and a butcher in Windsor.
53. What is Jasper? He is a workman in the town; he works about in the town; drives a horse and cart.
54. He is not a farmer? He is not a farmer; he lives in the town of Windsor.
55. Was he thrown out of work by reason of these floods? Not that I am aware; his work is generally in the town of Windsor. Frederick King is put down for 200 lbs., recommended by Francis M'Donnell, who appears on Mr. Walker's requisition.
56. Do you know this Frederick King? I do; he is a labouring man in the town of Windsor, living away from the reach of the floods.
57. Did he lose nothing by the floods? Not that I am aware. The next case is Ann M'Guffin, washerwoman, living in Windsor. She came to me for a recommendation, and I refused to give her one. She then went to George Walker, (I believe the father of the Honorable Member for Windsor), who recommended her, and she got this relief. She was living at old Mr. M'Kellar's, away from the reach of the flood.
58. *By Mr. Walker*: She had no vote? No.
59. *By Mr. Garrett*: Had she any influence? I just state the fact; it is for the Committee to draw their own conclusions. John Mills, put down as a farmer, received 150 lbs. flour. I wish to mention that, from all the information I can gather, that this man was working upon the roads, and receiving £3 a week.
60. *By the Chairman*: At the time of the floods? Yes. William Priestly, put down as a farmer; he had no farm that I am aware of; he lived in the town of Windsor, and was on the Electoral Roll, and earned his living by driving a team.
61. He lost nothing by the flood? Not that I know of. Thomas Reedy, labourer, 200 lbs. flour; he is a labourer in the town of Windsor, and lost nothing by the floods. He is well known

- Mr. J. M. M'Quado.
25 Sept., 1861.
- known in the district. The next is Richard Ryall; he received 200 lbs. flour, and was recommended by Francis M'Donall.* This man was well known to both Magistrates, and was receiving £20 a year from Mr. Fitzgerald; he was supported by Mr. Fitzgerald, and had a house to live in, in the town of Windsor.
62. Did he carry on any business? None whatever.
63. *By Mr. Walker:* You have been informed of what you have stated? He told me himself, and he told me he had £20 in your Savings' Bank, and that you were cashier. He came to me for a recommendation, in fact, and I would not give it him. James Shopherd; he is a shingle-splitter, in the bush.
64. *By the Chairman:* Did he lose anything by the floods? Not that I am aware of. In my experience I never knew him to cultivate anything. John Shearing, the next person, certainly is a farmer, but he lives away on the top of M'Grath's Hill.
65. Is that beyond the reach of the floods? Yes; he is living on some land that Mr. Canneen owned.
66. *By Mr. Garrett:* Who recommended him? Richard Edwards.
67. Is he a neighbour of his? No, he lives in the town, and is a chemist and druggist. Morgan Sheehy is the next, a farmer; he received 300 lbs. flour on the recommendation of William Hopkins; he purchased a valuable freehold, and is living upon it.
68. Are you sure it is the same man? Yes.
69. *By the Chairman:* Did he lose anything by the floods? Yes, I believe so, but I do not know it.
70. *By Mr. Garrett:* Was this purchase made after or before the flood? Before the flood; a long time ago.
71. Was he a man well known in the district? Very well known. Catherine Slater, a washerwoman, living in the town of Windsor; she never had any cultivation. The next case is that of Henry Steever (in the Return, Henry Stephen). He appears on the list as having received 200 lbs. flour, 5 lbs. tea, and 20 lbs. sugar. Several weeks after the Return was ordered by Parliament, after the Colonial Secretary wrote to the Bench at Windsor, and on the very same day that the Returns from the Bench are dated he asked me to give him a recommendation. I do not know whether this is the proper time to make this statement. (*The witness produced a written document.*) I produce a statement signed by Steever, which I will read if the Committee wishes.
- (*Mr. Walker objected to the reading of the paper. Strangers were ordered to withdraw. Committee deliberated. The witness and parties were again called in.*)
72. *By the Chairman:* The Committee have decided that we cannot receive this letter as evidence. Have you had any conversation with Dr. Day with reference to Steever? I have.
73. Have you any objection to state what passed between Dr. Day and yourself? Dr. Day told me that he did go to Steever, and asked him to get some person to recommend him. This was after he received my letter.
74. You wrote to Dr. Day? I did, and Dr. Day acknowledged to have received this letter.
75. Can you state when you wrote to Dr. Day? On the 25th February, 1861; on the same night or afternoon I saw him.
76. Is the letter you hold in your hand a copy of the letter addressed to Dr. Day? Yes.
77. What was the effect of your letter? I wrote to tell him that this man Steever had called upon me to give him a recommendation for flour, tea, and sugar he had received at the flood time. That was on the 25th February, 1861. I think several weeks after the Returns were ordered by the Colonial Secretary, and on the same day as the Returns were sent from the Bench to the Colonial Secretary.
78. Had you any conversation with Dr. Day upon the subject of that letter? I had, last week I think, just afterwards; he said this man —
79. I thought I understood you to say, a few minutes since, that you saw Dr. Day the same evening? Yes, but I have had several conversations with Dr. Day since.
80. On the evening of that day had you a conversation with Dr. Day upon the subject of that letter? I had; I told the doctor what the man came and told me, and that I had taken it down in writing. I asked him if he had received my letter, and he said, "Yes."
81. You told Dr. Day you had taken the man's statement down in writing: what did he reply to that? He said, "Oh that man promised to get me a recommendation."
82. *By Mr. Garrett:* That was at the time he got the flour? Yes, "The man promised me to get me a recommendation when he was getting the flour."
83. *By the Chairman:* That was what Dr. Day told you? Yes, I may say that the man has told me different to that since, on last Saturday night.
84. Do you find any other names? Mrs. Teale, I may mention, is recommended by Charles Sommers, her father, and afterwards by Isaac Hopkins; she received relief twice; the first time 350 lbs. and the second 250 lbs.
85. Do you know anything of the circumstances of Mrs. Teale? Her husband has a freehold, and is living on a farm out of Windsor. The next case I shall refer to is that of three females of the name of Vaughan. They are three females living in Windsor—needlewomen—Sarah, Winifred, and Catherine; their brother appears on the Electoral Roll as Patrick Vaughan.
86. What is this Patrick Vaughan—do his sisters reside with him? No, he was at that time in the employment of Mr. George Cunningham, driving a team.
87. Were these ladies living together? Winifred and Catherine I believe are, but not Sarah.
88. *By Mr. Garrett:* By whom are they recommended? Sarah, by T. Paul.

* Revised:—A known supporter of Mr. Walker's.

89. Who is T. Paul? Timothy Paul, overseer of the Asylum; and Stephen Gow, who recommended Catherine, is a farmer out of Windsor, at South Creek. Mr. J. M. M'Quade.
90. Both respectable persons? Yes. I wish to refer to the case of George Wood, farmer, who received 300 lbs. flour, recommended by the Honorable Member for Windsor. He is 25 Sept., 1861. possessed of a large freehold at Cornwallis, and it is well known that this George Wood was in good circumstances.
91. *By the Chairman*: Is he a man well known in the district? Very well; he has been living in the district these years. James Whitechurch, a person living in the town of Windsor, recommended by William West, a tailor. I know this William West has not been very long in Windsor.
92. This Whitechurch, you say, lives in the town? Yes, he is a labouring man.
93. Did he lose any property? No, he never had any farm to lose by that I know of.
94. Are there any others? That is all I can make out. In the list there are ten "Bearers," but I cannot make them out.
95. Do you notice any one of the name of George Cupitt? Yes, George Cupitt, farmer, received £250 lbs. flour upon no person's recommendation. This person is well known in the district, and possesses a freehold in the town of Windsor, and on the Hawkesbury.
96. Does his name appear on the Electoral Roll for Windsor and the Hawkesbury? Yes.
97. And was very well known to the Magistrates? Yes, very well.
98. *By Mr. Walker*: Are you speaking of George Cupitt, the old man? * There is a George Cupitt, the old man—he has a son George Cupitt, at Cornwallis, a freeholder on the Electoral Roll.
99. This son of George Cupitt—is he living with his father? No, he is on his own account.
100. Did he lose any goods or property? I believe he did.
101. You cannot tell, judging from this Return, whether the relief was given to the father or to the son? There are two in the Return, and Thomas Cupitt as well.
102. *By Mr. Garrett*: Who is Thomas Cupitt? Another son.
103. Recommended by yourself? Yes.
104. *By the Chairman*: Looking through this list, should you say that most of the persons relieved were known to the Bench of Magistrates? That is my belief. Dr. Day admitted in conversation the other day that they had done wrong in several cases in giving relief.
105. Do you know any of the Magistrates in particular to whom they were known? To Mr. Ascough and Dr. Day, because they reside in the town, and Mr. Ascough went about canvassing with Mr. John Walker.
106. At or about the time this relief was being granted? Yes, two days before the flood and afterwards.
107. Did Mr. Ascough or Dr. Day take any part in the elections? Both did, very active part.
108. *By Mr. Garrett*: Who is Patrick Flood; is he any relative of Michael Flood? Yes, I believe he is a relative and John Flood as well; they are brothers, I believe.
109. The name of William Norris occurs twice; does it in both instances refer to the same person? That I am not aware of. They are both recommended by John Ridge. The Norrises I know were people living on the flooded land.
110. Who is Patrick Molloy? He is a publican living at M'Grath's Hill. It was generally understood at the time that any recommendation would do; all that the Magistrates wanted was somebody.
111. Who is Mrs. Turner, recommended by Isaac Hopkins? She lives in the town of Windsor; she is the wife of William Turner. Her husband is a freeholder.
112. There are three James Smith's mentioned; are they one person? I am sure I cannot tell that.
113. *By Mr. Stewart*: All the persons whom you have named you believe did not lose property by the flood? I believe so, from all the inquiries I have made.
114. *By Mr. Leary*: You have stated there were several persons received relief, some of whom were recommended and others who were not; but that two gentlemen, who were Magistrates, Dr. Day and Mr. Ascough, knew that the persons so relieved were not sufferers by the flood—are you aware of that as a fact? They must have been aware.
115. You have stated that certain persons received relief on the recommendations of particular persons, and at the same time that Dr. Day and Mr. Ascough were perfectly aware that these persons were not sufferers from the flood? This is what I state, that they must have known it.
116. Could you refer to particular persons? Michael Flood, for instance, who was recommended by his wife's father.
117. Do you know of your own knowledge that Dr. Day and Mr. Ascough knew that this party was not a sufferer? Yes, I have no doubt of it, none whatever, because I know that Dr. Day and Mr. Ascough were always in communication with him; I saw them often speaking to Flood on that occasion.
118. Do you know that he was a resident in Windsor at that time? I swear that positively.
119. There was some person referred to as being a servant of Dr. Day? No; a washer-woman, Lucy Carroll.
120. Can you state whether Dr. Day was aware that this woman was not a sufferer by the flood? I believe he did. I can state this—Dr. Day knew where Lucy Carroll lived; he knew she never had any cultivation; he knew that the land and house in which she lived were never flooded.
121. Can you mention any others who were recommended, or otherwise who received relief, where

* Revised:—Yes.

† NOTE (On revision):—"A freeholder, on the Electoral Roll," should be out.

- Mr. J. M. M'Quade.
25 Sept., 1861.
- where Dr. Day or Mr. Ascough knew they did not require it, or had not suffered from the floods? Mrs. Johnston, the wife of Abraham Johnston, the miller in the employment of Mr. Henry Moses.
122. What is the position of Mrs. Johnston? She is the wife of Abraham Johnston, miller in the employ of Mr. Henry Moses, receiving good wages, and in constant employment for years; he is never out of work for a day.
123. And Messrs. Day and Ascough were aware of that? They knew it well.
124. *By Mr. Walker*: Where did this Michael Flood reside? At Windsor.
125. In what part of the town? I really forget the street; it is out of George-street.
126. In one of Mr. Beddek's cottages? No; I think in one of Mr. Ridge's.
127. Was he not living in one of Mr. Beddek's cottages at the time? I do not know.
128. Do you know the cottages known as Beddek's cottages? I do.
129. Did he not reside in one of them at the time of the flood? I am not aware.
130. Was not the water in those cottages? No,* it was at the back.
131. The front faces the river, does it not? The banks are higher than the back part.
132. The water was in these cottages was it not? I did not see it.
133. Was it not three or four feet deep? I cannot say; I was not down there.
134. You have stated a good deal from hearsay—did you hear it was there? No, I did not. I think I stated he was a boot and shoe maker, and not a farmer.
135. Here is Mr. Elliott, that you recommended? I did—Joseph Elliott.
136. What was he? A brickmaker.
137. You recommended a brickmaker? I did; two brickmakers who—
138. You canvassed that man for his vote—Mr. Elliott? I do not know whether I am at liberty to mention it. I was a scrutineer—
139. You canvassed that man Elliott for his vote? I think I did; I am pretty well sure I did.
140. Although he was a brickmaker and not a farmer you recommended him for relief? Yes.
141. Did he lose any property? He did—£60 worth to my knowledge. He was indebted to myself a large sum of money; he owed his butcher and baker accounts; and I knew he could not carry on. In the same way I recommended George Crief, another brickmaker.
142. You keep a grocer's shop in the town? I do; and an hotel—in fact everything.
143. You sell tea and sugar? I do.
144. You did not supply any of these goods? No; I did not. I was requested by the Bench—a messenger came to me and asked me to put in a tender—the Chief Constable came to me to ask me, but I told him I would have nothing to do with it.
145. I think you have brought the Electoral Roll with you? I have.
146. How many names are there on the Electoral Roll? 632 in Windsor and Richmond.
147. *By Mr. Cowper*: Some names are two or three times over, are they not? I think not in this list.
148. *By Mr. Walker*: Can you tell me how many electors out of this 640 have received relief? No, I have not examined.
149. Could you by referring to the roll? I think I could.
150. Do you think more than fifteen or sixteen received relief out of that 640? I reckoned before I came that there were eighteen in Windsor who had no right to it.
151. Eighteen persons who were electors? Electors and others.
152. How many electors out of that 640 received relief? I cannot tell without referring to the list; about twelve or fifteen, I should say, in Windsor.
153. Joseph Elliott is one of them? No; not of the number I refer to.
154. Joseph Elliott is one of the electors? I say about twelve or fifteen in the town of Windsor who were not entitled to receive relief.
155. That is not what I ask you—I ask you, looking to that list, whether you can say how many electors of the town of Windsor received relief—can you make more than fifteen or twenty? I cannot, because the wife's names appear instead of the electors.
156. Do you think there are twenty? I think there are more; I think there are about thirty.
157. Will you take the list and see if you can make more than twenty? (*The witness referred to the list.*) I cannot tell if Mrs. Byrnes is the wife of William Byrnes. There is Joseph Brooks; that man is well known to you.
158. But I did not recommend him? No.
159. He was recommended by a respectable man? A well known supporter of yours. Thomas Burgess next recommended by your brother; Henry Featherstone, blacksmith; Michael Flood; Mrs. Hunt, if she is the wife of James Hunt—he is an elector.
160. I think you know James Hunt did not vote at all? I cannot reveal anything that occurred in the polling booth. Mrs. Horan, if she is the wife of John Horan.
161. There is a Mrs. Hunt, a widow, in Windsor, is there not? Not that I am aware of—Mrs. Izzard, wife of George Izzard.
162. Is there not an Izzard at Wilberforce? Not that I am aware of; there are two Izzards down in the list.
163. She is recommended by the Rev. Mr. Stiles; he is a respectable man is he not? Yes. Mrs. Johnston—wife of Abraham Johnston, Joseph Jasper, Frederick King, William Priestly, Thomas Reedy, Richard Ryall, William White.
164. Was not he drowned before the election? Not that I am aware of. I do not know whether that was this William White—James Whitchurch.

165. Fourteen electors of the Electoral District of Windsor—that is all you can make out? *Mr. J. M. M'Quade.*
Yes.
166. You omitted Joseph Elliott? Yes, and George Crief. There is also George Cupitt the elder; I forgot him; he is a freeholder in the Town of Windsor and the Hawkesbury. *25 Sept., 1861.*
167. Thomas Burgess resided at M'Grath's Hill, did he not? Yes.
168. Had he not a small garden? Not that I am aware of; from all the inquiries I have made, he earned his living by selling oranges.
169. Was not a portion of M'Grath's Hill flooded? Not of M'Grath's Hill.
170. I do not mean the top of the hill, but was not a third or half of the hill flooded? I cannot say how far; it was in one or two of the houses below.
171. Henry Featherstone, did he not live in one of Beddek's cottages that was flooded? I believe so.
172. *By Mr. Garrett:* Did he lose any property? No; I have made all inquiries and he had no cultivation.
173. *By Mr. Walker:* Did he lose all he had? No; he had nothing to lose by the flood.
174. Was he not employed at the time harvesting? No; he was a blacksmith.
175. Have you not known a blacksmith to go and reap? No; I never knew a blacksmith to go into a harvest field in Windsor.
176. You do not know that Featherstone was at work in the field at that time? No.
177. You do not know that he was thrown out of employment? I am aware that at the time of the floods he was not working in the fields, for he was in Windsor.
178. Is he a man of family? I believe so.
179. Were not the family distressed by the flood? Not in my opinion.
180. *By Mr. Garrett:* Would you, as a storekeeper, have given him credit? Yes, I would, as I would in any other instance a man of his class.
181. *By Mr. Walker:* To what extent? Ten or twelve shillings. These labouring men I would not credit any of them more.
182. Was Featherstone recommended by Thomas Primrose? Yes.
183. He was no supporter of mine? I believe not.
184. Michael Flood—was not he employed by your committee as you call it? No.
185. Flood was not employed by Byrnes' committee to stick bills—just remember? Not that I remember.
186. Joseph Jasper—is he a labouring man? He is.
187. Employed working on the roads? He is always* working in the town.
188. Is he not employed by the Road Trust? Sometimes.
189. Were not the labourers of the Road Trust thrown out of employment by the flood? For two days they could not get across to their work—at least they could get across but they did not; they stayed in Windsor strolling about.
190. Was not that part of the road where they were employed, from M'Grath's Hill to Windsor under water at the time? I am not aware.
191. Jasper was employed at that time by the Road Trust? I never knew Jasper to be out of employment.
192. Frederick King—was not he employed as one of the Road Trust labourers? Yes, occasionally; he lives at Windsor, out of reach of the floods.
193. Were not these men thrown out of employment for a time? Not that I am aware of.
194. William Priestly—was not that man employed in agricultural operations at Cornwallis at the time of the flood? Not that I am aware of; I know he earns his living chiefly by carrying.
195. Thomas Reedy—was he not employed by the Trust? Not that I am aware, at that time; he lives at Windsor, out of reach of the flood.
196. You do not know that he is employed by the Road Trust? Sometimes.
197. Is he not very generally employed by them? I cannot say that.
198. This man Richard Ryall—did he not cultivate something on Fitzgerald's farm? From all inquiries I could not make out that he did. He told me when he asked me for a recommendation that he had no cultivation; he said he was getting £20 a year from Mr. Fitzgerald, and a house to live in—in fact, he sold Mr. Fitzgerald his cattle.
199. Did you see this man the day before the election? I did, the same day.
200. Did you give him a bottle of grog? No, I did not; I gave him nor no other person anything at the time of the election.
201. William White—do not you believe that he was dead before the election? I have been trying to make that inquiry, but I cannot make out.
202. He was drowned in one of the floods? Yes. I do not know whether he is the William White who received relief.
203. James Whitechurch—is not he a man employed by the Road Trust? Sometimes.
204. Was not he thrown out of employment too? Not that I am aware.
205. George Crief—what is he? A brickmaker.
206. Like Mr. Elliott? Like Joseph Elliott and Mr. Langton; the three of them are adjoining; they lost £60 worth of bricks, each of them, to my own knowledge.
207. Then you do not consider relief should be confined to farmers exclusively, having yourself recommended a brickmaker? I should not recommend any person except one who had suffered from the flood.
208. Mr. Carney—do you know him? Yes; he is living on my farm—at least, not on my farm; he is a tenant of mine; he leased Mr. Sydney Scarvell's farm.
209. You recommended him for relief? I did.
210. Were you aware that he was a small freeholder? I was not, and am not to this hour.

- Mr. J. M. M'Quade.
25 Sept., 1861.
211. You do not know that he has a small freehold at Mar's Hill? No, this is the first I have heard of it. Both his farms were flooded at that time; the farm he rented from me, and Mr. Sydney Scarvell's; and Dr. Day himself admitted to me that he was a fit person to receive relief when I spoke to him afterwards about it.
212. Edward Breeze you have spoken of—was not his farm flooded on the Peninsula? I do not know his farm; I know the house.
213. Do you not know that he is a tenant of Joseph Windred, on the Peninsula? Yes, I have heard so.
214. Was the Peninsula flooded? Part of it.
215. Is not Windred's farm situated in the low part? A portion of it.
216. The portion that is cultivated? Most of it is cultivated.
217. It is not cultivated next the banks? No, the low part. I do not complain myself of Edward Breeze having received relief.
218. Lucy Carroll—is she a single woman? No.* I am not aware how many children she has; I have been informed, three or four. I have been informed she washes for Mr. Day and his family.
219. She is a poor washerwoman? I do not say she is poor; I know she lives in a house high away from the floods.
220. You are not aware whether she lost any employment in consequence of the floods? I think not, as she was living in the town.
221. Do you mean to say a person cannot suffer who is living in the town? I suffer, and every person suffers more or less; of course every person in the district suffers more or less.
222. Patrick Dillon—he is a poor man, is he not? Yes, receiving relief from the Asylum for these last two years, every fortnight, I think.
223. *By Mr. Garrett*: He receives out-door relief? Yes.
224. *By Mr. Walker*: Recommended by Mr. Thomas Tebbutt? Yes.
225. A very respectable man? A very old man—a very good natured old man.
226. If Mr. Tebbutt had recommended any person to you for charity, would you not have considered it a very good recommendation, coming from such a gentleman? Yes; if I had been giving away a charity.
227. Mrs. Enright—is she not a single woman? No; her husband is alive.
228. She was not living with her husband? No; she lives by herself.
229. She has a number of children? I do not know how many.
230. She is a very poor woman? †I think not; she keeps a shop in Windsor.
231. What kind of shop? She sells tea, sugar, lolly-pops, cakes, soap, and anything.
232. George Graham, you say, is a servant of Mr. John Ridge—was not Mr. Ridge's farm at Cornwallis flooded? Yes.
233. Was the house Graham was living in flooded? It was.
234. How high up? I suppose nearly to the roof; they had to remove.
235. They were in some distress, were they not, on account of the flood? They had to come into Windsor for shelter.
236. Do you not know that they suffered considerably on account of the flood? I know they had to come into Windsor—to leave the farm; I think they went up to Ridge's. †They were in the employ of Mr. Ridge, at so much a year.
237. Do you not know that all their property was flooded and destroyed? No, I do not; I believe Mr. Ridge's was, but not Graham's.
238. He was a man with a family? A wife and two children.
239. *By Mr. Garrett*: Did he get rations from Mr. Ridge? Yes; I believe so.
240. He had yearly wages, and got rations? Yes; I believe so.
241. *By Mr. Walker*: You say Graham told you a number of things—did he tell you Mr. Ridge was insolvent, and that he never got his wages§—do you know that Mr. Ridge became insolvent? George Graham's brother told me that Ridge had not paid him his account.
242. He became insolvent about the time the relief was distributed? I think some considerable time after that. I think many weeks after that.
243. Morgan Sheehy—you referred to him as being a freeholder? Yes.
244. You do not know whether his freehold is paid for? No; I do not. Morgan Sheehy himself told me it was paid for not long ago.
245. His farm was all flooded, was it not? Not that I am aware of; he lives at Wilberforce.
246. In the case of Henry Steever—you say the recommendation was got after the Return was called for? Seven weeks after.
247. Is that the only case of the kind you know? I have heard of some others.
248. Do you know of any others? I do not.
249. You say that Mrs. Teale received relief twice? I go according to the Return.
250. That is, you see the name of Mrs. Teale in the Return twice—do you not know that there are more Mrs. Teale's than one—has not Henry Teale a wife at Wilberforce? Yes; but that is in the Town of Wilberforce.
251. Is there not a Mrs. Teale at Windsor? Yes.
252. John Teale, at South Creek,—his farm was flooded? The portion next the creek.
253. Is not that a very poor farm? There are poorer; it is adjoining a very valuable farm of Mr. Fitzgerald.

* Revised:—Yes.

† Revised:—No she is not.

‡ Revised:—Graham was.

§ NOTE (On revision):—He told me he did.

254. Do not you know the Teale's there are very poor people? No; I do not. I know that he sold some property some years ago, and that he paid off the mortgage on that farm. I know that he owed me money, and paid me.
255. You do not know whether the farm is free now or not? I am not aware of that.
256. I think you have looked through that list—how many parties do you find I recommend? Two; George Wood, a large freeholder.
257. Are either of the parties recommended by me electors of Windsor? No.
258. *By Mr. Garrett*: Are they electors of the Hawkesbury? Yes.
259. *By Mr. Walker*: You say one is a freeholder—George Wood? Yes; he purchased a valuable freehold in Cornwallis.
260. Do you know whether that freehold is free? I do not. I know he is in comfortable circumstances.
261. Do you know that he has a wife and large family? I think he has a wife and several sons; the sons are away earning their livelihood.
262. Are there not a number of little children? Not that I am aware of.
263. At all events you think I erred in that case? Yes.
264. *By Mr. Forster*: You mention persons having come to you for recommendations—do you mean that they expected you to give them recommendations implying something that was not the case? Certainly.
265. Was the application made to you, do you think, by persons who were perfectly aware that they were not entitled to relief? I told them so.
266. How was it they expected you to recommend them if they knew they were not entitled? I cannot tell. Several whom I considered not entitled asked me to give them recommendations, and I refused.
267. And these persons got recommendations afterwards from somebody else? Yes.
268. *By Mr. Walker*: Are you on good terms with Messrs. Ascough and Day? I am on excellent terms with Dr. Day; but with Mr. Ascough I cannot say that I have been on very intimate terms.
269. You have been generally opposed to him on political grounds? Yes, and I hope I always shall be. I have a letter here which I will produce if Mr. Walker pleases; and I have never been on friendly terms with Mr. Ascough since I received this letter.
270. You were scrutineer for Mr. Byrnes at the last election? Yes.
271. And Mr. Ascough was scrutineer for me? I think so.
272. You had some hot words over it—over the election? We generally have.
273. You have not been on good terms since? No. I do not wish to have anything to do with Mr. Ascough since I received this letter.
274. *By Mr. Leary*: What do you mean by friendly terms? On speaking terms.
275. I presume you have no ill feeling against him? None whatever; but I consider a person who would write such a document as this —*.
276. *By Mr. Walker*: In consequence of some document you say you are not on friendly terms? Yes.
277. *By Mr. Cowper*: Do you consider, looking to this list as a whole—considering that nearly four hundred persons were relieved—that a large number of persons obtained relief who were not entitled to it, and that the funds of the public were partially or extravagantly administered? I believe they were partially and extravagantly administered to a large extent; for I find that in some cases persons without families receiving 300 lbs. and 200 lbs. of flour, which would last them three or four months. In some cases they have received a sufficient supply for six months.
278. *By Mr. Garrett*: How many has Mrs. Dunn in family? I do not know.
279. *By the Chairman*: Have you heard many complaints in your district of the manner in which this relief has been distributed? From one end to the other. Dr. Day himself complained to me of the conduct of Mr. Ascough, who, after Dr. Day had given Mrs. Daley an order on Crew for 200 lbs. of flour, gave her an order on Hopkins for 350 lbs. of flour.

Mr. J. M.
McQuade.

25 Sept., 1861.

THURSDAY, 26 SEPTEMBER, 1861.

Present:—

MR. COWPER,
MR. GUNNEEN,
MR. FORSTER,MR. T. GARRETT,
MR. STEWART,
MR. WALKER.

R. DRIVER, Esq., IN THE CHAIR.

Mr. Joseph Cope called in and examined:—

280. *By the Chairman*: You reside in Windsor? Yes.
281. And have done so for many years? From childhood.
282. Do you recollect the relief being distributed to the sufferers by the late floods at Windsor? Yes.

Mr. J. Cope.

283.

* NOTE (On revision):—I meant to state, no ill feeling that would make me state to the Committee what was false.

- Mr. J. Cope. 283. Has your attention been directed to the Return from the Bench of Magistrates? A copy was transmitted to me by a gentleman present—Mr. Forster.
- 26 Sept., 1861. 284. *By Mr. Forster*: At your request? Yes.
285. *By the Chairman*: Have you carefully gone through that Return? I have.
286. Are you acquainted with any of the persons named there? To the best of my belief I am.
287. In your opinion was that relief fairly distributed by the Bench of Magistrates at Windsor? In my opinion many persons very competent to help themselves, have received relief; and it does appear to me inexplicable on what grounds such relief was afforded them.
288. Can you point out any objectionable cases by reference to the Return before you? Yes. In the first place I would object to the system which has been pursued of putting down the names of women in this list; I think when a married woman receives relief, her husband's name ought to be put down. The first name I come to is Mrs. Richard Arnold; that woman's husband was in my own employ from the 10th September last year to the 10th January of this present year, and during that time he was in the receipt of about £2 a week, and he received money on account whenever he pleased, so that I do not imagine that woman could have been in destitute circumstances.
289. Was the husband a farmer? He was leading an entire horse for me.
290. Did they lose any of their goods? I think it exceedingly probable they did.
291. You state he was in the receipt of a salary from you? 30s. a week, and 5s. groomage for every mare—which would make about £2. He had about £30 during the time he was with me.
292. Then he was not in actual want of any assistance? Decidedly not; he received money on account whenever he asked for it; I think I paid him a balance at the end of the term of about £14. The next case is that of Mrs. Becroft—she also has a husband, and I am under the impression, that in right of his wife her husband should be a freeholder; I am informed her maiden name was Bushell. Mrs. Bowers—her husband I am told is a carrier. The next is Mrs. Byrnes—I have not been able to obtain very conclusive information as to whom Mrs. Byrnes may be; there are two men resident in the neighbourhood of Windsor of that name—Patrick and Laurence. Laurence is a water-carrier, and I suppose is not in good circumstances; but if this is the wife of Patrick, her name ought not to be here; he is the freeholder of a farm worth £1,000 at least. Alfred Bushell and David Brown—I apprehend these two men are half brothers, and I have been informed they are freeholders. There is a large family of the name of Bushell at Wilberforce. William Brown—I heard of that man selling a farm the other day, whether he had more interest in it than the equity of redemption, I am not prepared to say. George Bushell is, I believe, a man possessed of means, and since the flood he has sold a farm at Campbelltown. Mrs. Bushell is one of the same family. Paul Bushell, I have been informed, sold a farm near Kurryjong, since the last flood, to Mr. Hoskisson, for which he got £150. Mrs. Bushell must be the wife of one or other of these parties. Edward Breeze got two supplies. Perhaps the Magistrates may be able to explain why he obtained these two supplies; but it does appear a suspicious circumstance that he should have been recommended by John A. Walker, on the eve of his brother's election. The election may, or may not, have had to do with the matter. Joseph Brooks was in the employ of Mr. Crew, store-keeper, and was high and dry from the reach of the flood; he was living at Windsor, and upon the authority of Mr. Crew I can state was in the receipt of 30s. a week. Thomas Burgess, I am instructed, lived on the top of McGrath's Hill, beyond all reach of the flood; he sells cakes. He is also recommended by John A. Walker. Mrs. Connor's name appears three times. I want to know why she was relieved thrice; she is a poor woman, I am prepared to admit? Mrs. Cavanaugh was not in circumstances to warrant her application for relief. Daniel Cunneen sustained no damage by the flood. Lucy Carroll received two donations, amounting jointly to 500 lbs. flour, besides tea and sugar. She is a laundress at Windsor. John Cavanaugh is a wood carter, if I am not mistaken in the identity of the man, and I have no reason to suppose I am; the only inconvenience he can have sustained may have been the inability of coming to Windsor for a few days, which was undoubtedly the case. I think that man has saved a little money. Samuel Clarke—there is a man of that name living at Freeman's Reach, who is a comparatively wealthy man. John Daly, farmer—I would take that man's cheque for £500 this morning; I have asked various persons in Windsor the question if they would not do so, and they have invariably said they would. I believe the man to be worth £1,000 at least. On the authority of Abraham Cornwall, of Richmond, I can state Mrs. Docking was a resident in Richmond at the time of the last flood. I know her and her husband—he is an able, stout man, and as a farm labourer he need not be one minute out of employ. Mrs. Thomas Eather, junior—I do not think that person should have received relief; her husband's name should have appeared instead of hers. Mrs. Enright may have been indigent circumstances; I am aware she has a husband a good tradesman, who deserted her, and I can scarcely blame her for declining to live with him again, but I think such a person ought not to have been helped out of these funds. Robert Eales is a boatman on the Hawkesbury; I do not think he sustained loss. Henry Featherstone is a blacksmith. S. Freeman I know to be a freeholder; he is a gardener, and I have no doubt he did sustain injury by the flood, but his freehold is worth £200. Patrick Flood, in right of his wife, possesses a very fair income; he has been married some time, and I believe he did receive assistance from his father-in-law, who was a wealthy man. Michael Fitzpatrick, I believe, is a freeholder, living on his own farm, part of the Argyle estate, which was sold two or three years since. G. Graham, I have been informed, at the time of the flood, was not a cultivator on his own account, but in the employ of John Ridge, and in the receipt of wages. Joel Grono is, I suspect, a freeholder, and is, I believe, a boatbuilder by trade

as well. John Geehan is a stout able young man, a tenant farmer. I do not think he could have been in very indigent circumstances, since he sold 400 bushels of maize to one individual. I state that on the authority of Mr. Henry Moses, miller, living at Windsor. Michael Gleeson—I state on the authority of Mr. Crew, removed a sum of money from the Savings' Bank to the Bank of New South Wales, because he could not get interest; so that I infer the sum exceeded £100, as interest is given for sums up to that amount. Thomas and William Grono—I believe, they are boatbuilders and shipwrights, and, I think, freeholders and electors. Mrs. Greentree—I think her husband is a splitter, the flood could make no difference to him. John Guillam—there are two of this name down, I believe, father and son; Guillam has, I believe, pensioned his wife, and is keeping another woman, and if he can afford to be so luxurious as that, I do not think he can need assistance. One name I see I have passed over, George Cupitt—George Cupitt, junior, and George Cupitt, without any appendage—I know of only two men of that name, father and son, and I have applied to their relatives to ascertain if they knew any person of that name besides, and they have said they do not. If, then, these are the parties referred to, George Cupitt, junior, is a carrier, and George Cupitt is a freeholder; he lives on his own farm, for which, I believe, he gave £1,800. I am told that he has another farm near Kurrygong, for which he gave £400, and that he has two houses in Windsor, for which he receives a rental of about 10s. a week. If he be the man referred to in the list, he certainly had no business to receive relief from a public fund. John Holden, put down as a farmer—I believe at the time of the last flood he was in the employ of the Windsor Road Trust, and now is a publican. Mrs. Horton—there is a freeholder of that name at Pitt Town; I am not satisfied of the eligibility of that person to receive relief. Mrs. Izzard had no business to receive it; she has a husband, and I am aware that he was in possession of a good team of horses, and was represented as being too indolent to work them. Jacob Innes I do not believe should have received it. Mrs. Johnston—I state this on Mr. Henry Moses' authority, that her husband was in Mr. Moses' employment, receiving 50s. a week as his standing wages, and making 25s. a week overtime, or £3 15s. a week altogether. Joseph Jasper, I believe, was at the time in the hired service of Richard Ridge, as horsekeeper. Thomas Kearnes, I have been told, has money. Mrs. Sooby, the wife of a man who lived on the farm of Mrs. Barker, at North Rocks, who has since left the district—I am aware that Mrs. Sooby had been an old servant of Mrs. Barker, of Windsor, who afforded her considerable assistance*; Mrs. Lillis I believe to be the wife of a man named Silvester Lillis, a shoemaker, at Wilberforce; and it was represented to me a few days since that Mr. Lillis had purchased a farm off Brown, and gave £450 for it. It does not appear to me that that was any conclusive reason why he should have had relief from this fund. Ann M'Guffin is a house servant, indeed she need not be out of employment one instant.

293. I see she is recommended by George Walker—do you know who that is? I believe him to be the father of the Honorable Member for Windsor. I do not presume to say Ann was a voter. Mrs. Morrison, I do not think, was in circumstances to need this relief. I will now draw the attention of the Committee to three names—Mrs. Moran, Mary Moran, and Edward Moran. They have been represented as members of one family, father, mother, and daughter; if so, among them they received 500 lbs. of flour, and the adjuncts in proportion. Donald M'Kellar, I take it should be Dugald M'Kellar, a man in possession of a freehold of his own, and moreover, I believe, has some £200 or £300 in ready money. Alexander Morrison I believe to be the husband of the Mrs. Morrison I before referred to. Ann Neale was the widow of an old man, I forget now whether deceased since the flood or previous to it. I have every reason to believe she inherited some few hundred pounds. Mrs. Norris, senr., I believe to be an aged widow, but living on a very valuable freehold farm, of course, her own property, and she has since been able to put up a new house.

294. *By Mr. Walker:* You state that for a fact? To the best of my information. It may be encumbered; of that I know nothing.

295. You would lead the Committee to suppose she could raise money upon it? I believe she could.

296. You state that that is her unincumbered property? To the best of my belief. Mrs. North I can speak somewhat positively about. I have the authority of a personal friend, who will, if necessary, come forward to corroborate my statement, that she is the wife of one Gifford North, who has money out at interest, and I can prove that not very long since he offered £700 for a property. Henry Phipps I do not think was in a position to require this assistance. John Pye and Henry Pye—one or other of these men, I am not prepared to say which, purchased a property situated at Newtown, near Windsor, for £150 since the flood, and he has also sold a horse for a large sum of money. William Priestly was decidedly not eligible for relief; he is in possession of a good team of horses, and has generally good employment for them; he has several sons able to earn good wages, and one has lately engaged as horse driver at £1 a week. Thomas Reedy lost nothing, and was employed by the Windsor Road Trust. Richard Ryall has been represented to me as a man who received an annuity from Mr. Fitzgerald of £20 a year, a double ration, a cottage to live in, and wood and water found him; he was also, I believe, in possession of money at the Savings' Bank. William Scarf, I believe, has a pretty good bank account; I state that on the authority of Mr. Richard Dunston. It must be very apparent to the Committee that none but the parties who received the relief, the parties who recommended or ordered the distribution, or those who supplied the goods, can know anything personally, and I do not come within that category. John Shearing is a wood carter residing on the Windsor Road, out of reach of the floods, I believe. There are two Robert Smiths, and I should like to have some information as to which of the two appears in this list. One man of that name I am told did receive this relief, who is

in

* *Revised:*—Her husband was also a man capable of earning high wages.

Mr. J. Cope. in very good circumstances. M. Sheehy—recommended by William Hopkins, a man residing on a freehold worth £1,000, his own property, of course. John Spiers—I know that man personally; he was once in my employment; he did certainly suffer by the floods, but he was pretty well off, and if he did fall into indigent circumstances it was in a great measure his own fault; he was a carrier and is very drunken in his habits; he used to come home a horse or two short; he is a very excellent farm servant, and has been in constant employment since the flood. Henry Stephen, a man in my own employment at the time of the flood; he is still in my service at a wage of 25s. a week; he is put down here as Stephen but in point of fact his name is Henry Kraunstuyver; he is a Dutchman. Joseph Stubbs—there are two men of that name on the Hawkesbury Electoral Roll; one is a tenant farmer residing at Richmond Bottom. It has been represented to me that that is the man, if so he is very well off. There is another Joseph Stubbs resident at Maroota; I do not think he is in a position to require relief. Mrs. Teale—recommended by Charles Sommers, her own father; her husband resides on his own freehold, not a very valuable one certainly, but I should say worth £400 or £500. Robert Taylor, I believe, lives out of reach of the flood; I think he lives on the edge of the Riverston Estate; he is a splitter and fencer. Here are three women—Sarah, Winifred, and Catherine Vaughan; they have been represented to me as being three sisters; Winifred Vaughan I know by sight. It seems that they are too independent to be employed as servants, and it is almost impossible to procure female servants in Windsor. Any of these women could procure 7s. or 8s. a week in service. I want to know why these women should receive relief, when any woman moderately industrious could obtain employment? Thomas Wall is a tenant, and has a very large farm, for which he must pay a considerable rent, and on that account I do not think he was eligible for relief. George Wood—recommended by William Walker. It has been represented to me that this is George Wood, of Freeman's Reach, and if so he is a freeholder, and is possessed of other means besides. I have passed over the name of Michael Flood. That man is capable of earning 50s. a week as a boot maker, and I do not see why he should have received relief.

297. Is he a resident in the town of Windsor? Yes.

298. Have you any other names? Various other names have been marked by various persons to whom I have shewed this list, but I am not in a position of sufficiently accurate information to mention them to the Committee.

299. Are any of the persons you have named in the Electoral Roll for the Hawkesbury or Windsor and Richmond? A number upon both. Michael Flood is an elector, and, moreover, a very busy man at elections; he has considerable power of talk. I have known him at various elections to receive what may be called a retaining fee on behalf of a particular candidate.

300. Did he take any part in the last general election? I am not prepared to say.

301. Were the circumstances of the persons you have objected to, known to the Bench of Magistrates, or could they, by the exercise of ordinary care, have ascertained them? I think they should have been known. I am not prepared to say they were; but I think it needed very little research to have discovered them.

302. Can you state, from your own knowledge, the general opinion of the district with regard to the manner in which this relief was distributed? I know that many persons were very much dissatisfied. I may mention the names of Mr. Moses, Mr. Ridge, and many other persons known to myself.

303. Are the two gentlemen you have named well known in the district as residents of standing? Undoubtedly. I shewed this list to Mr. Fitzgerald, who may be supposed to be acquainted with the residents in the district; his phrase was, "it was a very bad piece of business." I shewed it also to the Rev. Mr. Adam, the Presbyterian clergyman, and he spoke in strong terms of disapprobation. I may state that Mr. Adam mentioned the case of a man named Bell, who, he understood, had received relief. He said he did not like to hear that he, as a Scotchman, had taken it.

304. *By Mr. Forster*: Can you suggest any persons whose personal evidence would be of use in this inquiry, who could state facts within their own knowledge? The contractors, of course, ought to be prepared to identify the persons to whom they issued relief.

305. Can you name the contractors? Mr. Moses, Mr. Dick, Mr. Crew, Mr. Hopkins. Mr. Hopkins himself is in a bad state of health; his wife conducts the business. Mr. Dawson, and Mr. Jones. I have had personal communication upon the subject with Mr. Moses and Mr. Crew, and I am aware, from his own admission, that Mr. Dick was one of the contractors.

306. Was this Presbyterian clergyman cognizant of any of these facts, so that his evidence could be taken? He merely looked over this list and identified the name of Bell; he said it was a shame he should have received relief.

307. Some of the parties themselves could be produced? *All of them.

308. Were these floods of a very disastrous character throughout the district? They may be regarded as an uncommon visitation; we had four floods in one year.

309. Do you think they were of such a character as to justify the giving of relief in some cases? In some cases, undoubtedly.

310. What was the character or general condition of the parties who suffered most, and who you think ought to have been or were properly relieved? Small tenants.

311. Were their lands generally flooded? Yes.

312. They lost most of their property? They saved their stock but they lost their whole crop.

313. And were in absolute destitution? A very few; there were some no doubt.

314. Do you think all the cases that called for relief were relieved? I have heard but of one

* Revised:—Almost.

one where the party applying was refused relief, and that was the case of a man named Mr. J. Cope. Langton. I have his own authority that he was refused on the plea that he had a small house. I do not see why this plea should have been made in one case and not in others. 26 Sept., 1861. That is the only case.

315. You think some good was done by the distribution of this relief? Some good was, but I think more wrong was done; for I think a man who is able should keep himself. I think £300 would have supplied all the parties who were *bonâ fide* entitled to relief, and I believe there was £1,200 expended.

316. You seem to have implied, in the course of your evidence, that some political use was made of this relief—did you mean the Committee to infer that the political use had been all on one side? With regard to Windsor I believe a political use was made of it, in the case of Langton for instance.

317. Have you ever taken part in elections at all? Yes. I did not take much part in the last election.

318. Do you consider yourself identified with one or other of those two parties to which you refer? In point of fact I voted for Mr. Walker.

319. Then I understand you as belonging to his line of politics? Yes, undoubtedly; I had generally approved of his votes I may say. This man Langton stated to me that he was requested to sign Mr. Walker's requisition and refused, and that he afterwards applied for relief and was refused.

320. You refer to some party who exercised political influence by the distribution of these funds—can you name the party? It appears to me that certain parties, personal friends of Mr. Walker, must have exercised some influence in this matter, the gentlemen who are here present (*Messrs. Day and Ascough.*)

321. Is this division of parties local, or does it apply to the politics of the Colony generally? I think there is a kind of a local feud. These gentlemen may be able to explain these things satisfactorily, but it does appear to me suspicious.

322. *By Mr. Garrett:* How long was this matter pending—was Mr. Byrnes a candidate from the time the writ was issued, or did he become a candidate a day or two before the day of election? Mr. Byrnes was at first a candidate for the representation of Parramatta, and afterwards he came forward for Windsor; there was some canvassing for Mr. Byrnes previously; I cannot say how long.

323. Mr. Walker was the first candidate in the field? Yes.

324. He was a candidate from the first? Yes.

325. At the bottom of the first page of the list is the name of Mrs. Carroll—is that the same person mentioned in the third page? I think not; I think she is a widow resident at Pitt Town.

326. There are eight or nine Norris's; are they of one family? No.*

327. Do they all live together? No; they are all tenant farmers; I know they are not in very prosperous circumstances.

328. They suffered by the flood? I have every reason to believe they did; indeed I am certain they did.

329. Who is this Edward Robinson, who recommends so many persons? A very good natured man on the Wilberforce side of the river.

330. Not on the Windsor side? No; he has a son, Edward C. Robinson; he is a resident on the Windsor side; but I think his name appears to only one recommendation.

331. *By Mr. Stewart:* Do you consider that the distribution of this fund has been a considerable relief to a great number of persons who were in distress? A number of persons in distress as such had no claim upon it.

332. I think, in the cases you have referred to, that would not apply? I think the fund was abused.

333. Do you not think the parties who recommended the applicants for relief were sufficiently reputable? Many reputable parties, who recommended others for relief, were very much mistaken; for instance, the Rev. Mr. Stiles, my own clergyman, I think was imposed upon by parties.

334. Would not the character of the parties who recommended applicants be likely to guide those who had the administration of the relief? In the case of McKellar, that man's wife went and told Mr. Stiles a story of distress, and he recommended her for relief.

335. You think the Minister could have had no motive in recommending these parties unless he believed their statement? I think he was mistaken.

336. *By Mr. Walker:* With reference to Arnold—is he still your servant? When the season closed I had no further occasion for him.

337. What date was that? The 10th of January of the present year.

338. Subsequent to the flood? Yes.

339. Did he reside with you? He resided on my premises, but I had nothing to do with boarding or finding him rations; I may add, moreover, that I paid his expenses when he was absent from home on his round.

340. William Brown—was his farm flooded? I believe it was; but it brought £150 the other day.

341. Do you know how much he had to take of that to pay his debts? No; but I have also heard he had a reversionary interest in other lands. Not very long since the same Brown told me he was as well off as I was; I was not prepared to dispute with him.

342. Edward Breeze—was not his farm flooded? Yes, he suffered severely; all I object to in his case is that he received relief twice.

- Mr. J. Copo. 343. You have mentioned that he was recommended by my brother? Yes; and the election took place immediately after.
- 26 Sept., 1861. 344. Do you know that that man did not vote at all? No; I know nothing of that.
345. Do you not know that the man was away from the district at the time the election took place? I do not think he was; I know he went to Snowy River afterwards with his team, but that was a considerable time after the flood—in fact, I am pretty certain that at the time of the flood he was resident on this farm.
346. This man, Burgess—are you aware that he had a garden on M'Grath's Hill that was flooded? It could not be flooded on M'Grath's Hill.
347. Is not the bottom part liable to be flooded? I think John Wood was my authority, that he did not suffer from the flood; I do not know the man myself.
348. You do not know that he had a garden? No.
349. He is a very poor man? That I cannot say; I cannot suppose him to be very well off; he is a cake-seller, I believe.
350. John Daley—is not he a farmer at Wilberforce? Yes.
351. Was his farm flooded? Yes; I believe he is worth £1,000.
352. Can you say that the Magistrates knew that? I will not. I will not say what any man knows; but I think John Daley is pretty well known.
353. This man Docking—is not he a farmer in the Richmond Bottoms? Yes.
354. That was flooded? At the time of the last flood I believe he was resident in Richmond.
355. Living there? Yes.
356. Where was the land he cultivated? I am not aware whether he held a farm or not; I know he is a stout able man, and an excellent farm labourer; I know that man personally.
357. Do you not know that Mrs. Enright has been deserted by her husband? Yes; but I have been informed that she sued him for a maintenance, and that certain persons became his sureties. I know also, that she has three brothers; John Moore, one of them, is very wealthy; and she has two others, who can put their hands in their pockets and find £100 there at any time.
358. That is the reason she was not entitled to relief? Yes; I think it a bad precedent, as there is an institution to meet such cases. She sustained no loss by the flood.
359. Robert Eales—does that man live down the river? He is a Hawkesbury boatman I know, but I do not think he is a cultivator.
360. Do you mean to say that he lost nothing by the flood? I do not; but my impression is, that he did not.
361. Henry Featherstone—do you know where he resided during the flood? Not at the time of the last flood; I know he was once compelled to leave the house of Macdonald; but water does not injure a blacksmith's tools much, and I know he is a blacksmith.
362. Did you ever know him to go to agricultural pursuits? Never, and I am pretty certain he never did in his life; I do not think he ever planted a cabbage. He was at one time employed by me.
363. Do you know Beddek's cottages? Yes.
364. Did not Featherstone live in one of them at the time? I am not prepared to say; he may have done.
365. Do you know whether those cottages were flooded? I think very possibly they were.
366. Spence Freeman—is not he a gardener on the Peninsula? Yes.
367. Was not his garden flooded? One part he used as a garden was flooded; he had purchased another property on the hill that was not flooded; that purchase was a proof that he ought not to have had relief.
368. You think it was a mistake to give it? Yes, if he was eligible there were thousands of others who were also. If the Government were to undertake to supply in all such cases, there would be a deficit in the revenue very soon.
369. Do you know that he was recommended by Mr. John Wood? I can only say that I think Mr. Wood made a mistake.
370. Mr. Wood is a very respectable man? Yes; I have a very high opinion of him.
371. He made a mistake in recommending this man? Yes.
372. This Featherstone—who was he recommended by? Thomas Primrose.
373. He is a respectable man? Yes, I believe so; he is an industrious man, pays his way honestly, and I know nothing to his discredit.
374. Michael Fitzpatrick—was not his farm flooded? Yes; but, as he was able to purchase this farm that should have prevented his applying to this fund for relief.
375. Do you know whether it is paid for? I do not; even if it is not paid for, if he had credit sufficient to purchase that farm, he must have credit sufficient to buy a bag of flour.
376. Do you think it was a mistake to give it him? Yes.
377. Michael Gleeson—was not his farm flooded? I know nothing of his having a farm; but it has been represented to me that he removed a sum of money from the Savings' Bank on the plea that he did not receive interest for it, therefore he must have had above £100.
378. These Gronos, are they not poor men, living down the river? They may be poor men, but I do not think they ought to be destitute men. I am aware that some, if not all of them, are boatbuilders.
379. They live upon the river? I see from the Electoral List John lives at Cattin, William at Pitt Town, and James at North Rocks.
380. This man, John Gnillam, you say has pensioned his wife off? I have been so informed—there was some litigation.
381. Do you not know the man is very poor? If a man indulges in such luxuries he is apt to be so.

382. Was not his farm flooded? I presume it was.
383. John Holden—was not he employed by the Windsor Road Trust? Yes.
384. Was not that man thrown out of employment by the flood? For a very few days while the flood lasted; that is, he could not get to work upon the road. The men could have got over in a boat if they had pleased.
385. Would not the circumstance of their having been thrown out of employment entitle them to relief? I think that was hardly to be taken into consideration.
386. They were thrown out of employment? I am not prepared to say they were; there were means of access to their employment.
387. You said they were for several days? I spoke without reflection; there was a boat which they could have availed themselves of if they had chosen.
388. Was not the Windsor Road flooded from Windsor to M'Grath's Hill? Undoubtedly.
389. Joseph Jasper—you undertake to say that that man was employed by Mr. Ridge at the time this flood relief was distributed? I am pretty certain he was.
390. Did you not hear that he was employed by the Windsor Road Trust? I have not heard so; I know he was in the employment of Mr. Ridge and that he left him lately.
391. Thomas Kearnes—is he a small farmer in Cornwallis? Yes.
392. Was his land flooded? A small portion; but he lives on a dry spot which was not flooded.
393. Do you know where Ann M'Guffin was living at the time the flood took place? No; but I am sure she could procure a place at any time she chose; she has been a servant in my own house, and could have remained to the present time if she had chosen to conduct herself properly.
394. Do you mean to say that every person who wants employment can get it? I mean to say that every female servant in Windsor who wants employment can get it; I do not hesitate to say that, if she needed relief, it is to be attributed to her own fault.
395. Where was she living at the time? I cannot pretend to say; she might have been living in my house to the present time, but she chose to go away and get drunk. I know this woman could have had a respectable place, where she would have been well paid and well fed.
396. Donald M'Kellar, recommended by the Rev. Mr. Stiles, you think that a respectable recommendation? Undoubtedly I do; but, although I have a great personal regard for Mr. Stiles, I should not be disposed to rely upon his recommendation, for I believe he is a man easily imposed upon.
397. The Magistrates may have been the same? Undoubtedly; I do not wish to attribute infallibility to them.
398. Alexander Morrison—do you know where he resided? I do not; I believe he resided in Pitt Town.
399. Pitt Town Bottoms was all flooded? He lives in the very township, I believe, which was not flooded.
400. Does he not carry on his farming occupation in the Bottoms? I cannot say what his occupation is, except that I see he is here represented as a farmer, and is recommended by J. Pendergast and C. May.
401. Was not North flooded out at the Peninsula? His farm was; but I utterly protest against North receiving relief. The man has some hundreds of pounds, and I say so on indisputable authority.
402. You cannot say that the Magistrates knew he had this money? No.
403. Phipps and Pye—were not they flooded out? I have a strong suspicion that Phipps was not flooded; he is a resident at North Richmond, and I think he is beyond flood mark. Henry Pye I believe has purchased a freehold for £150 since the flood, which is not a proof of destitution.
404. Supposing Phipps were recommended by the Rev. Mr. Elder, do you think that a good recommendation? So far as its being given upon philanthropic motives; but Mr. Elder is a man subject to be imposed upon; I know him very well.
405. William Priestly—are you not aware that he was at that time employed in agricultural operations at Cornwallis? Not for himself, for he was employed and was in receipt of wages.
406. Thomas Reedy—was not he employed on his own account? Yes, and that is the reason I complain of his name appearing here.
407. Teale's farm was flooded? Yes; but it is worth £400 or £500.
408. George Wood, recommended by me—that is one of the mistakes I made—was not his farm flooded? Yes, the farm he was resident upon; but, independently of that, he was receiving rent from a freehold at Cornwallis. I am also aware that he is at the present moment at any rate worth £2,000—that is, if I am not mistaken as to his identity.
409. Michael Flood—do you know where he resided at the time of the flood? No; I know he was a good bootmaker, and could obtain constant work if he chose to do it.
410. Was he not living in one of these flooded cottages of Beddek's? I really do not know.
411. I take it that in most of these cases of tenant farmers their land was flooded? I have no doubt they sustained loss, but I believe they were in circumstances to procure supplies for themselves. I sustained loss myself, and if the principle was to have been adopted that every one who suffered by the floods was to receive relief, I would have applied for a bag of flour myself.
412. Do you know what is the population of the Windsor District? I think, by the last Census, it was estimated to be 7,000. That is my impression—that is the Police District.
413. You cannot be sure of that? I cannot tax my memory; but my impression is, that I looked into the matter, and saw that the population was reckoned at 7,000.
414. You may have made a mistake? I do not think so.

Mr. J. Cope.

26 Sept., 1861.

- Mr. J. Cope. 415. Among the names you have mentioned as improper persons to receive relief, how many are electors of Windsor? About twelve; I object to that being considered as an accurate estimate.
26 Sept., 1861.
416. You cannot tell how those persons voted? I know nothing about how they voted.
417. As many may have voted one way as the other? Very probably they did; but there are some names which appear on your requisition—Jasper, Flood, Featherstone, M'Kellar, Whitchurch, George Bushell, Thomas Reedy, and, I think, Robert Smith, but I am not prepared to say.
418. There is no Robert Smith on the Windsor Electoral Roll? I am not sure; but there are eight names.
419. This requisition appeared some considerable time before Mr. Byrnes appeared in the field—are you of opinion because these names appeared on my requisition, that, therefore, they ought not to have been relieved? I have some faith in the old axiom that people should not only do right, but seem to do right, and there was enough to create suspicion.
420. *By Mr. Garrett:* You object to relief having been given to most of these people? Yes; to Dugald M'Kellar for instance.
421. *By Mr. Walker:* Though he was recommended by Mr. Stiles? Yes; I think Mr. Stiles was wrong, and thinking him wrong I should object how much soever I might personally respect him; I should more especially object to M'Kellar as Langton; Dugald M'Kellar's next neighbour, who was in worse circumstances, applied for relief and was refused.
422. If you look upon the list you will find the name of Elliott? Yes, Joseph Elliott.
423. Was not he in similar circumstances to Langton? I am not aware that he has a freehold.
424. Was he not similarly circumstanced to Langton—is he not a brickmaker? Yes.
425. Did Elliott get relief? I think his name is here, but I do not see why one brickmaker should not get relief as well as another.
426. You will see there are two brickmakers who did receive relief? I believe Johnson, the builder, recommended Langton, and I see no reason why his recommendation should not be taken. I have no reason to suppose he is not a respectable man.
427. You have heard that Johnson recommended him? I have reason to believe he did; I have never spoken to Johnson upon the subject.

Henry Day, Esq., M.D., J.P., examined:—

- H. Day, Esq., M.D., J.P. 428. *By the Chairman:* You are in the Commission of the Peace at Windsor? Yes; and have been for some years.
26 Sept., 1861.
429. I believe you were one of the Bench of Magistrates who distributed the relief to the sufferers by the flood there? Yes, I am one of them; and I relieved more than any one else.
430. You have heard the evidence of Mr. McQuade and of Mr. Cope? I have.
431. Do you wish to offer the Committee any remarks upon that evidence? To repudiate entirely the colouring put upon the cases of those persons who have been relieved. There are in this list the names of persons who have been relieved, where the names of the parties who recommended them have not been put down. This is attributable to the great number who were relieved, and to the urgency of the cases. There was no possibility of my arranging these matters, for I have had my doors blocked up with fifteen or twenty applicants at a time. Anticipating something of this kind I requested Mr. Ascough to be cautious, and get recommendations from all the parties who sought relief; but in the confusion, as duplicate and triplicate orders had to be given to the applicants—some contractors supplying flour, some blankets, some tea and sugar—there was a large accumulation of papers, some eight or nine hundred, and though put, as I thought, carefully by, they were some in one place and some in another, and were extremely difficult of arrangement. In this way many of these recommendations were omitted in the Returns. I have here a number of them and shall be happy to supply them as I go through the list.
432. You stated just now that you were frequently compelled to send no less than three orders? Yes; I have four names at the end of the list, bearer, bearer, bearer, bearer 200, 100, 200, 200 flour. One John Foster, recommended by Mr. M'Quade, not on the list, was relieved among the bearers.
433. These four bearers do not appear to have been recommended by any one and to have obtained nothing more than flour? I can explain that—there is a bearer recommended by David Cobcroft, that would be one of these. (*Handing in a paper.*) Here is Charles Martin, recommended by the Rev. Mr. Wilson, and John Foster, by J. M. M'Quade. (*Handing in recommendation.*)
434. This bearer appears to have received 4lbs. tea and 20 lbs. sugar? The second person on the list appears to have received 100 lbs. flour, and most probably this is the individual who received the tea and sugar mentioned there.
435. But there is nothing there about 20 lbs. sugar and 4 lbs. tea? There is, immediately preceding it—Henry Aspery is the first person whose name appears on the list without any recommendation. He was recommended by James Dunston. (*The witness handed in the recommendation.*) Mrs. Richard Arnold was living on Freeman's Reach, and her husband was in the employ of Mr. Cope; they were in such difficulties that I had to pay money out of my own pocket for medicine supplied in her sickness. He asked Mr. Cope for money to pay my account, and was refused. John Alcorn—there appears to be no person recommending him. I have since found the recommendation: it is from James Rochester, junr. (*The witness*

witness handed in the same.) John Armstrong, against whose name there appears to be no person's name as recommending him. I have the recommendation here, it is from a person named Grono. (*The witness handed in the same.*) Thomas Bashan was recommended by James Gahan. (*The witness handed in the recommendation.*) William Bell had no recommendation. Upon my own responsibility I afforded that man relief. The circumstances were these—he was flooded out twice or thrice before, and he said to me, “I ought to come to you for relief, but it goes against the feelings of a Scotchman to seek relief;” I said, “Why do you not come?” The last time he came, and said, “I am afraid I shall have to ask for relief.” I knew his land and house were flooded, that his garden stuff and some of his clothes were injured, and that he was obliged to come into the town to live, and on my own responsibility I afforded him relief; and, in so doing, I acted in accordance with the power vested in me by the Government. No blame is to be attached to anyone but myself in that matter. As to what has been said of the Rev. Mr. Adam having spoken of Bell as underserving, I may state that Mr. Adam, in the presence of three or four persons, and of Mr. Walker, lamented that any such steps as these had been taken. Mr. Cope objects to Mrs. Becroft—Mrs. Becroft belongs to the family of the Bushell's. I have known that family for the last fifteen years. Bushell, the father, died some time ago, leaving a large family, his property mortgaged to a very considerable amount to Thomas Tebbutt—four hundred and odd pounds. The property is very good but mismanaged; the sons all have a share in it and cannot sell an acre, for she has a life interest in it. They are all wretchedly poor—I may say half of them in debt, and have been for years to me for medical attendance. Mrs. Byrnes was not relieved by me, but I believe she was relieved; at all events, if I did not relieve her, I should have done so if she had applied to me, for she is the wife of Patrick Byrnes, in Cornwallis, a man whose farm is mortgaged over head and ears to John M'Quade's father, and who owed me an account for years and years—poor in the extreme, but honest. Mrs. Bowd does not appear here to have been recommended, but I have since found the recommendation; it is from Pendergast and May. (*The witness handed in the same.*) She is living at Cattai, upon a freehold that would scarcely support a bandicoot, wretchedly poor. William Brown, although, I admit, a profligate, is in difficulty and distress. Public charitable institutions would have no inmates if their doors were to be closed against persons of bad character. He sold his farm for £450, and all his wife received after the payment of the mortgage was £10. George Bushell is another very poor man—at least, I do not know so much about him; I believe he is better off, but he is not one who would receive relief if he could do without it. Edward Breeze was up the country, and his wife applied to me for relief. I did not want Mr. John Walker's or any other recommendation. They were wretchedly poor, for though he had £200 or £300 three years ago it was all gone—he lost it all on old Windred's farm. Breeze had gone up the country, and when he came back I am sorry to say he got relief a second time, but not from me. He deserved it once, but got it twice. Mrs. Connor, of Cornwallis, got relief twice, and deserved it once; I spoke to her about it. Joseph Bashan—no recommendation appears. I have here one from William Dunston. (*The witness handed in the same.*) Mrs. Barker, no recommendation appears in the list, but I beg to produce one from Richard Edwards. (*The witness handed in the same.*) Joseph Brooks—this person is mentioned by Mr. Cope. This person came to me for relief; I knew he was in the employ of Mr. Crew, and in the receipt of wages, and I declined to give it him. He said he had a large family; I knew he had; but I also knew his wife did some washing, still I did not think it my business to dive into the private affairs of these people,* so I said, “If you get me the recommendation of some person in whom I can place confidence, I will give you relief.” He brought me the recommendation of Henry Forrester, one of the most respectable men in the town; he said, “I suppose I shall get no relief, but I shall vote for Mr. Byrnes.” He had relief. Thomas Burgess, gardener—I do not know anything of him, but I know he has a small garden, and the loss to this man of a little garden stuff might be as much as the loss of a thousand bushels of grain to many. I am surprised that Mr. Cope does not recollect that portion of M'Grath's Hill, which is very low at one end, and liable to be flooded. There are some gardens and cottages there, and he lives in one of them. If any plants were in the garden there, at the time of the flood, they must necessarily be lost. If Mr. John Walker recommended a case, I should take it as soon as Mr. Cope's or any one else. John Brown, was recommended by Pendergast. He lives at Cattai, a name associated with floods; the land which he occupies, is inundated even by freshes. William Cupitt—there is an error here—if old George Cupitt got relief, he ought not to have got it; if he had come to me I should not have relieved him. William Cupitt deserved relief; he is very poor. John Curtis—no recommendation appears here, but he is recommended by John M'Quade. George Cupitt—both the son and the old men are recommended by William Holland and John Hoskisson.† (*The witness handed in the recommendation.*) †William and George Cupitt, if they did not require relief, were driven off their place, with the loss of clothing and of all their crops. John Cavanaugh—I have no recommendation in the list, but I have here the recommendation of Richard Edwards. (*The witness handed in the same.*) Patrick Caligan does not appear to be recommended in the list, but I have here the recommendation of Edward Robinson. (*The witness handed in the same.*) Christopher Cross, recommended by Marsden and Pendergast. (*Upon the suggestion of the Chairman that it would shorten the proceedings, the witness handed in a considerable number of recommendations, in other cases, not mentioned in the printed list.*) Mrs. Connor, recommended by §—. Lucy

* NOTE (*On revision*):—When respectable persons, who knew the circumstances of the applicants better than I did, recommended them.

† Revised:—George Cupitt, junior, and Thomas, his brother, are recommended by W. Holland.

‡ Revised:—Thomas.

§ NOTE (*On revision*):—I forget the name—it was handed in to the Chairman.

H. Day, Esq., M.D., J.P.
 26 Sept., 1861.

Lucy Carroll, this washerwoman of mine. I will take upon myself the responsibility of having afforded her relief. Although she is a washerwoman she receives from me but 12s. or 13s. a week, has a house full of children—five or six children—and when she was hemmed in by the floods, because Windsor became an island in flood times, she was cut off from getting work out of Windsor, and was thrown back upon the 12s. or 13s. Her name appears twice upon the list; but had Mr. Cope applied to me I could have explained that to him. The first order for flour she received was upon one Chalmers; the flour was very bad, and she brought it down the following morning to shew to me. I said, "Tell him to send you better, or return it." She returned it, as he would not give her any better, and I gave her an order upon another contractor. *Somehow or other, in the confusion, the person who supplied the flour, Lowe, told Mr. Walker that the woman had had it twice.* John Daley is objected to by Mr. Cope, and I think very properly, from what I have since heard. He was recommended by Mr. Edward Robinson—a good man, a just man, a man who lived in the neighbourhood, whose knowledge of those who lived in his locality must have been better than mine, but he was imposed upon. This was an unfortunate recommendation. He is an uncle of Henry Moses. Here is a person of the name of Patrick Dillon, recommended by Thomas Tebbutt—another good and just man—objected to by Mr. M. M'Quade on the ground of his being the recipient of rations from the Benevolent Asylum. I have the honor to be the surgeon to that institution, and should know the circumstances of those who received relief. This man, it is true, is a pauper, and I did not supply him; but if I had been applied to, recommended as he was, I should have given relief. Once a month he receives from the Asylum 4 lbs. flour, 3½ lbs. meat, and ¼ lb. soap. Mrs. Docking, Mr. Cope objects to; I will say nothing about her—I do not think her character was good; but if she were in distress it was no matter what her character was. Robert Eales, commented upon by Mr. Cope, I think with a great deal of presumption, when he was recommended by James Bligh Ridge, who must have known more of the circumstances than Mr. Cope. I supplied him upon the strength of Mr. Ridge's recommendation, and would again. Henry Featherstone I did not supply; but I would wish, as far as I can, to justify the step taken by Mr. Ascough. The recommendation was by Mr. Primrose, a respectable man, and political opponent. Michael Flood was living in one of the cottages that have been alluded to, belonging formerly to the late Mr. Beddek; two feet of water came in there. He came to me seeking relief, and I refused him, but it appears that he afterwards came with a recommendation and was relieved; I do not know whether by Mr. Ascough or another Magistrate. Patrick Flood I did relieve; he is stated by Mr. Cope to be possessed of property; it is true that he will have a share in old Allen's property, and his brother will also have a share, but at present he is without means; even now Mr. Rochester discounted a bill for £65 to supply him with the means of carrying on a law suit. 436. *By Mr. Stewart:* Was he a sufferer by the flood at the time, in distress? Yes; he was working at filling up cellars, like a day labourer; he drew gravel and all that sort of thing. William Fletcher, I find, is a person not recommended; he was supplied by one of the other Magistrates. Mrs. Gardiner is recommended by the Rev. Thomas Wilson, of Pitt Town. John Forrester is a person who called upon me for relief; I said, "I could not give you relief, for I believe your circumstances are good." "How do you know my circumstances?" said he; I replied, "It is for me to be satisfied of that; if you can get a respectable person to recommend you as deserving of relief I will give it." He came to me shortly after with a recommendation, signed John M. M'Quade. When I spoke to him afterwards about it, he said he had not certified that Forrester was in distress, but that he had lost his property by the flood; upon the strength of that recommendation I gave him relief. John Gardiner, recommended by Mr. Coley, solicitor. John Gleeson, a very poor man, recommended by James Farlow. Joel Grono—allusions having been made to these Granos; they are not worth, if the whole of them were sold off to-morrow, £50 among them, and it is a question in my mind if £300 would pay their debts; I can speak feelingly there; they are recommended by Christopher May and James Pendergast. Mrs. Greenfield, recommended by James Dunstan, about whom so much has been said. John and Michael Gleeson are two nephews of ——— they live at Freeman's Reach, on a little bit of land of Farlow's; they were both flooded out, and both I gave relief to. John Guillam, was recommended by C. W. May and J. Pendergast. James Graham was recommended by Rochester; he was not in the employ of Mr. John Ridge at that time; his brother George was; George Graham lost what little means he had—his blankets and other things—by the flood, and was recommended by a very respectable person. James Graham was living at Freeman's Reach, on a farm belonging to one of his brothers-in-law, a farm of six acres, and lost everything; Frederick Nichols is his brother-in-law. Mrs. Horan, about whom so much has been said, was recommended by Mr. Laverack. John Holden, recommended by Charles Barber. Rody Heffernan, recommended by John M. M'Quade. Mrs. Humphreys, recommended by C. May and J. Pendergast. James Hay, recommended by J. Pendergast. John Izzard, a young man living upon Freeman's Reach—upon my own responsibility I afforded him relief; Greentree and some two or three others will testify to his losses and indigence, though his father is pretty well off. Joseph Jasper was, with great respect to Mr. Cope, working on the road; this road was covered with the floods, and as his livelihood depended upon his employment, if he were cut off from that, he would sustain as much harm as another who lost his crops. He was poor I know. John Kirwin, recommended by William Hall and Mr. Edwards. George Kable, recommended by Thomas Chasely, of Pitt Town. Mrs. Leeson, recommended by ———† John Ledam, recommended by Laban White. Mrs. Looby—I only know that she is very poor. George Lucas, recommended

* Omitted, (on revision.)

† NOTE (On revision):—Recommendation handed in to the Chairman.

recommended by J. M. McQuade. Ann McGuffin—I am inclined to fall in with the views of Mr. Cope respecting her; but no doubt she had been in the hospital a short time before, and was wretchedly poor. Mrs. Morrison, recommended by Patrick Buckley; I am sure Mr. Buckley is a respectable man. Mrs. Moran, recommended by Rev. Mr. Adams. McKellar I cannot say much about. Mrs. Moran the second, ought to be Mahon, recommended by Tiernan. James McCarroll, recommended by James Parnell. Mrs. Munday, recommended by Christopher May. Charles Martin, wretchedly poor, recommended by James Farlow. Mrs. Mitchell, recommended by Pendergast. James Manus, recommended by Christopher May. Ann Neale, about whom so much has been said, recommended by one of our most respectable tradesmen, William Beard. Alfred Norris—in speaking of one of these Norrises I shall speak of them all: Mrs. Norris had two farms, one in possession of John Hoskisson, and one, it is true, her own, but at her decease to be divided among her sons; there is a great number of them, and every vestige of this poor old woman's crop was destroyed; she is wretchedly poor, and some time since she payed me her account in corn, and she was sorry she could not pay me before; they are poor, all of them except Patrick.

437. *By Mr. Stewart:* Are they all living separately? Yes; one has two or three acres here, and another two or three there. Now comes a case in which I take to myself blame, as far as it goes; but I wish you to place yourselves in the same position. The wife of a person of the name of North came to me for relief; I knew that he was a person in the possession of means, and I said to her, "How is it Mrs. North that you have come to me for relief; where is your husband?" "He is up the country." I said, "Surely you cannot be hard up?"—I always looked upon her husband as a saving hard man—"Surely you can get some assistance, I cannot relieve you?" She came several times, and at last a person named Burke said she was in great distress. I suggested to her, to ask Mr. Dick for a recommendation, and I gave her an order for only a small quantity, in consequence of being by herself. That was on the recommendation of Mr. Burke, and I think, if others had been in the same position, they would have done the same. Thomas Nippres was recommended by Dr. Selkirk. Mrs. Phillips, recommended by George Pye. John Pye—there was deceit practised there. There were two parties in partnership, Pye and Willoughby. Pye is very well off, and Willoughby is very poor. They are both dark swarthy men; and when Pye called upon me, I believed he was Willoughby; when I afterwards saw him, I said, "You have deceived me, you have done wrong." He was recommended by a respectable chemist, Mr. Jones; I was inclined to stir in this matter, and did threaten him, but I did not see my way clear.

H. Day, Esq.,
M.D., J.P.

26 Sept., 1861.

438. If you knew nothing of the parties yourself you were inclined to act upon the recommendations they brought? Yes; no person in a population of ten thousand can know the circumstances of every individual. Sometimes, when I thought I knew the circumstances of a person, I afterwards found I was deceived. Henry Pye, recommended by Mr. Powell. Henry Plate, recommended by Thomas Chasely. Henry Peck, recommended by Thomas Wilson. William Priestly—I really think if Mr. Cope had looked at the name of the person who recommended Priestly, James Upton, he would have paused before he expressed the opinion he has done. Darby Ryan, recommended by Mr. Bligh Johnson; he might have given him an order himself.

439. Did Mr. Bligh Johnson interfere in this matter? Yes, he relieved several; but Windsor being the spot where the relief was distributed, the weight of the whole district fell upon us.

(The Chairman here vacated the Chair, which was taken by William Forster, Esq.)

440. *By the Chairman:* Who is Bligh Johnson? A Magistrate living down the river. Thomas Reedy—I may be allowed to make a remark upon that case—he worked on the roads, and came to me for relief. I said, "You are a drunken fellow, and I cannot give you relief." He went away, and his wife then came to me with tears in her eyes; she said, they had a house full of children, six or seven I think, that their living depended upon the employment of her husband upon the roads which were flooded. I called upon a gentleman whose opinion I value, and whose goodness I revere, Mr. Thomas Tebbutt, and consulted him upon the subject. He said, "Afford relief, never mind the consequences; that man having lost his means of subsistence requires relief as much as one who has lost his crops." Richard Ryall I know nothing about. Robert Rutter, recommended by E. Robinson. Barney Shanlan, recommended by Pendergast. William Scarf, again recommended by E. Robinson. If persons like Mr. Robinson living near those whom he recommends is not to know the circumstances I do not know who is, unless those who possess some intuitive knowledge like Mr. Cope's. John Shearing, recommended by Mr. Edwards, a respectable person. Edward Seelcy, recommended by Mr. Coberoft. Robert Smith, *alias* Michael Betts; he also goes by the soubriquet of "Long Michael;" that man is excessively poor, and was recommended by Mr. Edwards, who himself relieved him a little; he lives at Hominy Point. Morgan Sheehy was recommended by William Hopkins; I did not relieve him. It is very well for a man to flourish as the owner of a good property, but I know he has not paid off the mortgage money. James Smith, recommended by Mr. Mountford, a respectable man. John Speirs, recommended by John Wood. I now come to the case of Henry Steever. About the time of the flood I was coming up from the Cornwallis, by the Church, when this man met me and said, "I believe you have been appointed to relieve those who are in difficulty and distress?" I said, "Yes." He then said, "I am told that because I am a foreigner, a Dutchman, I am not entitled to receive relief?" I replied, "Indeed you are if you have suffered from the floods; what is your name?" His name appears to be Steever, although it is Stephen on the list. I said, "Where are you living?" "With Mr. Cope." I then asked him to get a few lines from Mr. Cope, and he said he had been there only a few days. I told him, I made a point not to relieve any one unless a recommendation

were

H. Day, Esq., were produced. He then said he had a wife and two children, and was in great distress, and had been previously living with Mr. Miller. I told him to get a few lines from Mr. Miller and I would give him relief. Two or three days after, he called upon me and said he had been to Mr. Miller, who was ill in bed, and had, therefore, been unable to get the recommendation. Knowing Mr. Miller to have been ill, I believed the man's statement to be true. Moreover, I asked Mrs. Rochester about the man, and she said the man's statement was correct. I then gave the man an order, saying, "This will relieve your immediate distress;" but I will never again trust a man who cries, as this man did when he came to me. When this Return was called for, I met this man in the street and said, "Where is the recommendation you promised?" Charles Smith, recommended by Mountford. Mrs. Savage, by Pendergast and May. Mrs. Stapleton, recommended by Farlow. Joseph Stubbs is one of a large family, living down the river. I know they are poor; there is not one worth anything of the whole lot, except the Stubbs living in Windsor, who may be possessed of a little from hard work and industry upon a farm of a hundred acres, on which seven or eight sons are located. James Smith, recommended by Mr. Alderson. Mrs. Teale—certainly Mr. Cope has not the same opportunity of judging of the circumstances of these people as I have, but I know they live in a wretchedly poor place, and they are very poor. There is a Mrs. Henry Teale living at Wilberforce, still more destitute; her husband has gone up to the diggings, and she has been ill. I take no credit to myself, but I have given them gratuitous assistance.

26 Sept., 1861.

441. *By the Chairman:* Because they were poor? Yes, I should not give my professional services for nothing if the parties were in a position to pay for them.

442. *By Mr. Walker:* Were they in distress in consequence of the flood? John Teale was; I do not say Henry was; but he must have suffered as he had three or four acres of wheat at the side of his grandmother's house, in which he lived. George Turner is recommended by Mr. Ancell, the Treasurer of our Institution. Edward Turner, also recommended by Mr. Ancell. Mr. Cope says they are not poor, but Mr. Ancell says they are; and I can add my testimony. Robert Taylor, recommended by William Beard, junr, a respectable iron-monger, who ought to know. Mrs. Wood, recommended by Dr. Selkirk. John Widdows, recommended by George Ancell. Mrs. Wilson, a poor woman, recommended by Wm. Williams, a respectable farmer, and these are the men whose means of knowledge and testimony must be the best. William White, recommended by Dr. Selkirk. Richard Weaver, recommended by Chasely. Edward Webb, recommended by William Alderson. Joseph Wood, recommended by Mr. Powell, a Magistrate. Mr. Cope says that the Rev. Mr. Adam objects to the list. I can only say that in my presence, the presence of Mr. Walker and of others, he spoke in the highest terms of those who had conducted the distribution; and in the most indignant terms of those who objected.

443. *By the Chairman:* Can you explain to the Committee the reason why the recommendations you have now laid before the Committee were not included in the Return? From the circumstance of a great number of them having been lying loosely about.

444. Is that the only reason you can assign to this Committee? It is. I think the clerk, perhaps, might have filled up these omissions.

445. Who was the Return prepared by? By the Clerk of the Court.*

446. Had he access to the whole of the recommendations then in existence? That I am not prepared to say; but I furnished him, to the best of my belief, with as many as I could gather then. I have found out a good many since; he had not all these.

447. In whose custody were these recommendations? In mine; these are what I found.

448. Some you handed over to the Clerk of the Bench, to enable him to make out that Return? Yes.

449. Have you any doubt whether any were withheld from him? I think it is highly probable I did not send them in.

450. Why not? I cannot tell—some were here; some were there.

451. You knew they had been ordered by the Legislative Assembly? Yes.

452. And yet you do not think you sent in all? They were in various parts, and I had to separate them one from another; they were all mixed together.†

453. They are all arranged together now? Yes; because I have been at an infinite deal of trouble.

454. Which trouble you did not take in order to complete the Return? I sent up what I then believed to be the whole.

455. Did you take any trouble to ascertain that? I did.

456. You saw this Return before it was forwarded from the Bench of Magistrates? I did.

457. Did you not notice that, in a great many instances, the parties recommending were not mentioned? We were not called upon for recommendations, we were directed to relieve those who were in difficulty and distress.

458. In the first instance? In all instances; if you refer to this letter of Mr. Cowper you will perceive.

459. You signed this Return before it was forwarded? I believe I did.

460. Did you not sign it? Yes, I believe I did.

461. Then you must have seen it? Yes.

462. And noticed its imperfect state then? No.

463. You know John M'Quade? Yes.

464. Have you had any conversation with him about the relief of the sufferers by the flood? Yes.

465.

* NOTE (On revision):—His assistant.

† NOTE (On revision):—Those recommendations, which were sent to me on former floods, were mixed with those connected with the last flood.

465. Do you remember having any conversation with him as to the conduct of Mr. Ascough in this matter? Yes, he has spoken about it; he said his object was not to say anything that would affect me, but I knew he wanted to attack both of us. H. Day, Esq.,
M.D., J.P.
466. You recollect him complaining of what he called the shameful way in which the public money was squandered? I think you know sufficiently of Mr. M'Quade to know he made no such comment. He said, "I will be alongside of you yet." 26 Sept., 1861.
467. Had he some words with you about the relief afforded to Mrs Daley? He spoke about it; he said he had all the particulars from Mrs. Crew, and I felt very indignant about it; I must have misunderstood the number of children she had, as I gave her an order for 200 lbs. of flour, and I heard that Mr. Crew had said Mr. Ascough had increased it. I felt indignant that my order had been ignored, and I spoke to Mr. Ascough about it; I have since had reason to believe that Mr. Ascough was influenced by the consideration that this woman had a large family of some ten or eleven children, and it is highly probable, if I had been aware of that in the first instance, I should have ordered 300 lbs. of flour.
468. *By the Chairman*: Did you, in the distribution of these funds, adhere to the instructions sent you? I believe so, entirely.
469. Did you lay it down as a principle not to give relief except to sufferers by the flood? Directly or indirectly.
470. I ask you the question because in the cases of a number of persons you lay great stress upon the fact of persons being wretchedly poor—do you mean by that the poverty of persons apart from this flood? No, I mean those who could directly or indirectly trace to the flood as the cause of their distress.
471. Did you in any case allow the recommendations you received to prevail against your personal knowledge? I have once or twice objected, on the ground of my personal belief as to the circumstances of the parties, and I have in each instance found myself to be in error. I objected to Lindsay because his son had a farm, but I afterwards found the old man was destitute.
472. As a general rule you did not allow recommendations to prevail against your personal knowledge? No; for when this Langton, the brickmaker, called upon me and asked for relief, I said, "Langton, I shall not give you relief unless you satisfy me as to your poverty." "Why?" said he, "M'Kellar and others, near me, received relief?" I replied, "If you wanted to raise £50 you could get it upon your house." He said, "Yes, but why should I not get it as well as M'Kellar?" I did not relieve M'Kellar, and I would not relieve him; but any feeling as to his being a voter never entered my mind.
473. As a general rule, did you relieve or allow any persons to be relieved whose circumstances were pretty good, even though they had suffered from the floods? No; I never afforded relief to any one who I thought did not require it. So careful and cautious was I that the Government should not be imposed upon, that I mentioned the number of family, the quantity, and the person upon whom I gave the order, upon the order.
474. You admit that some mistakes have been made—can you say in how many cases you have found out since that you have been misinformed? I think I relieved four or five I would not relieve again if they were to apply to me.
475. Wrongly? When I say wrongly —
476. What I mean is, that if you had known all the circumstances of their case, you would not have relieved them? Yes.
477. You considered them mistakes? Yes; and I congratulate myself thus much, that if similar circumstances were to occur again, there are not any two Magistrates in the Colony, if placed in our position, who would not be as much, if not more, imposed upon.
478. In these cases of mistake were you led into them by the recommendations of others? Yes; I trusted to the recommendations of parties in the country. This letter, which was written to me by Mr. Ascough, will shew you the feeling that actuated us. (*The witness handed in the same. Vide Appendix.*) I may mention that when the Flood Relief Committee for seed wheat was appointed, it consisted of thirty-five gentlemen, who knew almost every individual in the district; five or six of them resided at Cornwallis, five or six at Pitt Town Bottoms, others at Wilberforce, and yet, strange to say, no fewer than thirteen persons crept in and imposed upon that numerous Committee.
479. Several cases of washerwomen having been relieved have been mentioned? I know nothing more about washerwomen than the one who washes for me.
480. As a general rule do you think persons getting good wages for their labour should receive relief? Certainly not, and I refused scores. When Wooley came to me, I said, "You are getting good wages, and if you choose to drink and spend them you cannot expect relief."
481. Can you mention the proportion of cases you rejected as compared with those you relieved? I dare say I refused thirty or forty; but I took the whole number of applications to the Bench; Mr. Sydney Scarvell looked through them, and said, "Here are three or four that should have been relieved," and upon the strength of his knowledge I relieved those cases.
482. You mentioned William Bell in your evidence? Yes; on my own responsibility I relieved.
483. Was he in the employment of Mrs. M'Grath? Yes.
484. Did you receive any information respecting him from Mr. or Mrs. M'Grath? I did not require it; he was almost under my eye, living at the foot of the bridge; he was flooded out three times, and he told me that he could not get his wages from Mrs. M'Grath, but that he did not like to apply for relief; I said, "It is a duty you owe to your children if you are in distress and want, and cannot get your wages, to apply for relief."
485. Did he state that he could not get his wages from Mrs. M'Grath? Yes.

- H. Day, Esq.,
M.D., J.P.
26 Sept., 1861.
486. In fact if he had had his ducs from Mrs. McGrath the public would not have been called upon to assist him? Yes.
487. You stand by that on your own responsibility? Yes, and I am sure Mr. Cope would have done the same.
488. I see the name of J. F. Jones frequently in this list as recommending persons for relief—are you aware that he is one of the contractors? His character stands too high for him to be under any suspicion.
489. Is he one of the contractors? Yes, for tea and sugar. I think his account came to £30 or £40.
490. You consider him to be a man of such high character as to be above suspicion? I do not think there are two men in the district who would speak to his prejudice, and that is strange to say in Windsor.
491. Are you aware of any political influence at all throughout the matter having been exercised on the part of the persons recommending? I solemnly repudiate such an imputation with scorn myself, and I believe myself that the steps were all taken, and relief afforded, before Mr. Byrnes came into the field. It was only a few days before the election that Mr. Byrnes came into the field: that is the handle, no doubt.
492. Political feeling runs very strong in Windsor? Yes, it does indeed.
493. Is it political feeling? All the political feeling I would not value so much as the unquestionable name of Cope being in the affair.
494. Are you able to understand the political principles that guide these parties? Yes.
495. Can you discover any principle? Yes, I was opposed to Mr. Dalley. I would not think of hiding my feelings. You would find about twenty who would support Mr. McQuade's views —
496. You mean who would support Mr. McQuade? You heard him say yesterday he hoped he would never be on my side. There is only one thing that grieves me, and that is, that there should be a personal feeling.
497. You think personal feeling has been brought into the matter? Only on Mr. Cope's part.
498. *By Mr. Stewart:* From the opportunity you have had of judging since, I think you say that in your opinion not more than four or five of those who received relief were improperly relieved? Of those I relieved I think I may congratulate myself that there are not more than four or five whom I would not relieve again under similar circumstances.
499. The number you refused were persons who made personal applications? No; although I made it a rule to have recommendations, I did not ignore my position, for I was allowed to afford relief on my own judgment.
500. These you did refuse were persons who were not recommended? Before refusing them I sought the opinion of Mr. Ascough, and of Mr. Sydney Scarvell, so that the parties were not refused until every inquiry had been made to see whether they were entitled to relief or not.
501. *By Mr. Walker:* Do you know the population of the District of Windsor? I think 9,700.
502. That is the police district? Yes.
503. Your jurisdiction extended over the whole of that district? It did, from Penrith and Richmond to Parramatta and McDonald River Districts.
504. Can you state the extent, the length, and breadth of your district? Thirty-five miles, by seven or eight.
505. Were the parties you have mentioned living in various parts of that extensive district? Yes.
506. Was it possible for you to know the circumstances of the great majority of these persons? You never can tell, for persons may have mortgages on their properties, and yet present a fair appearance.
507. Do you know how many of these persons were recommended by Mr. McQuade? A great number; unfortunately several of these are persons whose recommendations have been omitted in the list.
508. Was the Bench of Magistrates called upon at all to get recommendations? Not at all. Anticipating something of this kind, I was extremely cautious, and I said to Mr. Ascough, "We have a most unpleasant and invidious task to perform, unless we are very careful. Remember, we have enemies, and I advise you to be cautious." I have since spoken to Mr. Ascough about it, and have said, "Is it not fortunate that we obtained recommendations?"
509. Some labourers appear to have been relieved—on what principle was relief given? If I could trace that the party was in suffering or distress—unless he were a single man—if the applicant had a wife and children, I would relieve him at all hazards.
510. That is, if he were in distress in consequence of the floods? Yes, directly or indirectly. I did pause before I adopted that principle; but when I had the approval of a good man like Mr. Tebbutt, I felt that I could not be wrong. He said, "Relieve them in such cases; if a poor man is bringing in bread for his children by his labour upon the roads, which are flooded, he may suffer as much by the loss of his labour as another would by the loss of a thousand bushels of corn."
511. You mentioned the case of Daniel Cunneen—was there a recommendation in that case? Yes; but I should not have asked for one, at all events. He has a farm on the road, a very poor one. He was recommended by Christopher May and J. Pendergast.
512. That is no relation of the Member—not a brother? No; I believe he lays claim to be a fifteenth cousin, or something of that kind.
513. He lives at Eastern Creek? I think he was formerly clearing off part of his relation's farm.
514. Mr. McQuade made a statement that from one end of the district to the other the public generally

generally were very indignant at the distribution of this fund? I believe that, under the influence of political feeling, Mr. McQuade loses the attributes of a human being, and assumes the characteristics of the gorilla. H. Day, Esq.,
M.D., J.P.

515. From your knowledge of public opinion should you say the public generally are dissatisfied? Most unquestionably not—about twenty of those who belong to his party may be so. 26 Sept., 1861.

516. Is the public generally dissatisfied? A public meeting will soon answer that question; I believe you will find where one is dissatisfied two hundred are pleased.

517. Is there some talk of a public meeting to express indignation at this inquiry? Yes, many have spoken to me about, but I have declined to take part in it, as I have had trouble and bother enough. Perhaps about one in two hundred are opposed to us. I may be wrong; but I will say that I believe where one thinks that way there are fifty the other, throughout the district.

518. Is the William White, who received relief, on the Windsor Electoral Roll? No, he is a Richmond Bottom's man—he is not an elector of Windsor.

519. If it has been stated that he is so, is that incorrect? As much incorrect as many other things I have heard.

520. Do you know anything of this man, Lillis? He ought not to have been relieved.

521. Did you relieve him? I do not know whether I did relieve him or not; if I did, it was a mistake.

522. Mr. Cope mentioned the Rev. Mr. Adams' name—did you meet Mr. Adams in my presence lately? I did.

523. When? On Monday afternoon.

524. On what occasion was that? A meeting of the Committee formed for the reception of His Excellency on his coming visit to Windsor.

525. Will you state to the Committee the substance of Mr. Adams' remarks? He condemned, in unmeasured terms, the persons who were bringing forward these charges against Mr. Ascough and myself. There were three or four persons present near us.

526. Did you hear the expression "spite" used? Yes, I did; "spite and bad feeling" He said, "I think when I come to look through the matter, and consider that nearly four hundred people were relieved, that very few mistakes have been made, and I do not know how you got through with it."

527. You had in a considerable number of recommendations that were inadvertently omitted in the original Return? Yes, and I think I shall be able to find a few more.

528. You did not, I suppose, take the care of these documents—you would have done if you had been called upon in the first instance to obtain recommendations? I did at first; but when I thought the thing was all dropped I might have put some here and others there, still having my eye to them, but not so careful of them as at first.

529. How long is it since this relief was distributed? Nine months ago. If these had been called for within the first two months they would have been all forthcoming—at my fingers' ends—but after a while there was not so much care taken of them; I expected for the first few months there would have been some action taken.

530. Did you hear any reason assigned? It was said that the matter should not rest till Mr. Ascough and myself were struck off the Commission of the Peace.

531. Who said that? John McQuade.

532. *By Mr. Forster:* Did he tell you that? No, he said the opposition was not directed against me.

533. *By Mr. Walker:* Do you believe there is a feeling of that kind? I could swear to that from the actions and conduct I have seen and heard. I can bring plenty of witnesses before whom that has been said.

534. Do you believe that Mr. Ascough intended any discourtesy to you when he changed your order? I do; and I told him so at the time.

535. Have you believed so since it has been explained? My words were, "You have done wrong?" He said, "Your words are uncalled for." I said, "If you think that is wrong, this is worse; I consider it ungentlemanly." Since then I have had reason to believe that he was actuated by the feeling that the woman had a large family. That, however, is a matter between him and myself.

APPENDIX.

My dear Day,

The bearer, Robert Wood, has called upon me as an applicant for relief.

From what he says, I think he ought to be relieved, and if you agree with me, I would suggest, say—

200 lbs. Flour.
20 " Sugar.
4 " Tea.

Yours truly,
JAMES ASCOUGH.

P.S.—There is a man named Faucett with Wood; I can collect nothing satisfactory from him. Do you know anything about him?

WEDNESDAY,

WEDNESDAY, 2 OCTOBER, 1861.

Present:—

MR. CUNNEEN,

MR. FORSTER,

MR. STEWART.

R. DRIVER, ESQ., IN THE CHAIR.

Mr. John Frederick Jones called in and examined:—

- J. F. Jones, Esq.
2 Oct., 1861.
536. *By the Chairman:* You are a storekeeper in Windsor? A chemist, druggist, and storekeeper.
537. How long have you resided in the district? In Windsor about two years and a half.
538. Do you recollect the relief being distributed by the Bench of Magistrates to the sufferers by the flood? Yes.
539. Did you contract for, or supply any of the goods to the Bench of Magistrates? Yes, I supplied some small portion.
540. Have you any idea as to the amount of your contract? £31 something.
541. Have you seen the Returns sent in from the Bench of Magistrates? I have.
542. Is it your opinion that that relief has been properly or improperly distributed by the Bench of Magistrates? I think it might perhaps have been a little better distributed, but I think on the whole it was pretty fairly distributed as far as I know of it. I merely supplied tea and sugar in very small quantities.
543. Then you only speak now as to the goods you yourself supplied? Yes.
544. Not as to the whole of the cases stated in the Return? Of course I do not know what the other parties supplied, they would know better themselves.
545. The Committee have heard that you recommended a Mrs. Arnold for relief—have you any objection to state under what circumstances you gave her a recommendation? I knew the woman from having come to my shop several times, and she said she had lost considerably by the flood; of course, therefore, I recommended her.
546. Upon her own statement? Certainly.
547. I suppose you had no reason to doubt the truth of that statement? No.
548. Had you known her for any time? Yes; she had come backward and forward for some time. They appeared to me to be needy, poor people; at least people who were working on small means.
549. Did you know this of your own knowledge, or from what she told you? From what she told me.
550. Had you any conversation yesterday or on Monday with any person at Windsor upon this subject? No.
551. Did you tell any person on Monday that you did not know Mrs. Arnold, but that you gave her the recommendation merely upon her own statement? No. I may have said something similar to what I have stated now; I am not quite certain.
552. It would have been impossible for you to have told that to any person if you had no conversation? I may have spoken in the shop to some one; I am not quite certain. In the course of business sometimes we converse with different persons.
553. *By Mr. Forster:* You have not heard in the district any expression of dissatisfaction as to the way in which this relief was distributed? I have heard several complain.
554. Your opinion appears to have been that there was no good ground for any general dissatisfaction? Of course I cannot speak generally; the quantity I distributed did not appear to be at all out of proportion to the people.
555. You do not think there were numerous cases of improper relief? I think not; not that came under my observation. Of course I have heard different people talking about it, and representing it as such; but in my opinion there has been a good deal of political feeling in the matter.
556. Do you mean that political feeling has coloured the statements or affected the distribution? It might have affected the distribution, but I am not aware of it in my own case.
557. You have no reason to believe there was anything wrong, though mistakes might have been made? There might have been mistakes.
558. You are not aware of that? I am not.
559. As far as the matter came under your observation you think the relief was properly distributed? Yes; one or two may have obtained relief who should not have had it, but when such a multitude of people were to be relieved it was almost impossible to prevent that.
560. Do you know the Magistrates of the district personally? Yes.
561. Have you every confidence in their fair treatment in a matter of this kind? I would, so far as I know them.
562. Did any persons apply to you to be recommended whom you did not recommend? Yes, a great number; I only recommended some four.
563. Then you refused to recommend them because you thought them not proper persons for relief? I refused to recommend them, not knowing them.
564. Although not knowing whether they were proper persons or not? Yes.
565. Did it come within your knowledge whether any of these persons were recommended afterwards? Yes, they were.
566. *By Mr. Cunneen:* What arrangement did the Magistrates make with the storekeepers who supplied the goods for distribution? They called for tenders.
567. Did the parties who offered to supply at the lowest price obtain the contract? I think there were four storekeepers who tendered, and their prices were so very near each other that

that they were considered to be almost equal, and it was agreed to give them each a proportion. If that were the case mine was a very small one.

568. Then, in the case of tea and sugar, for instance, instead of accepting the lowest tender the purchases were divided among the four storekeepers? Yes.

569. Still there was a difference in the prices, some one of these four parties would have supplied the goods at a lower rate than the others? That I am not aware.

570. You are not aware that some tenders were lower than others? No.

571. Do you think at that time there were four hundred people in want of immediate assistance? Really I cannot say; I am not sufficiently acquainted with the district to answer the question. There were men thrown out of employment in consequence of the flood, who were not really farmers; many who were employed by the farmers—poor people—and I think it was these who were chiefly supplied with tea and sugar in small quantities. I do not know what else they got; I suppose they got flour. The tea and sugar amounted to a mere trifle.

572. *By the Chairman:* You are on very friendly terms with the Magistrates there? Well I am on friendly terms certainly, but there is nothing at all intimate between us.

573. You know that a general election was impending when this relief was being granted? Yes.

574. And all you have stated merely relates to your knowledge of parties in cases where you supplied relief? Certainly.

Mr. J. F.
Jones.

2 Oct., 1861.

Mr. John Armstrong Dawson called in and examined:—

575. *By the Chairman:* You reside in Windsor? Yes.

576. You carry on business there? I do, as draper and grocer.

577. Do you recollect relief being granted to sufferers by flood in that district? I do.

578. Did you contract for the supply of goods to be distributed? Yes, for a portion of the relief that was administered.

579. Has your attention been at all directed to the Return sent by the Bench of Magistrates, with reference to the relief? I have not seen any Return.

580. Are you aware, from your own knowledge, as to how that relief was distributed? I am only aware as to how it was distributed, as far as I gave it myself. I can give no information as to what others supplied. I can supply the names supplied by me; there were many I did not know, for I am a comparative stranger in the district. I have been there not more than four years; and there are many I do not know at all as to their circumstances.

581. Have you heard any complaints made by the older residents in the district, of the distribution? I never heard of any complaints in the town, except from one, and that was from hearsay. I never heard any settlers or business people in the town complaining, though I have heard them comment upon the remarks made by Mr. M'Quade. That is the only thing I ever heard.

582. At the time this relief was being granted was there not a strong canvas in Windsor for the election of a member to serve in Parliament? On or about the time I think it was.

583. Your name appeared to the requisition of Mr. Walker, did it not? No; in fact I was rather opposed to Mr. Walker. I put my name down to the requisition to Mr. Byrnes, but afterwards I did not vote for any one, and I got a good deal of ill feeling for not voting. It was in consequence of the bad feeling in the town that I withdrew from the contest altogether, and took no interest in it.

584. You say you have heard no complaint of the conduct of the Magistrates, except from hearsay? Never. I believe, myself, the whole thing proceeded from Mr. M'Quade; he was the person who got it up; and I never heard the slightest dissatisfaction expressed, except what came from that quarter, and one or two persons mixed up with him.

585. Do you know Mr. Joseph Cope, of Windsor? Yes.

586. He is a very respectable man I believe? Yes.

587. One not likely to be influenced by anything Mr. M'Quade might say? No.

588. Do you know Mr. Moses, of Windsor? Yes.

589. Is not he one of the most respectable men in Windsor? As respectable as any business man in Windsor.

590. Mr. Laverack is also a respectable man? Yes.

591. One not likely to be influenced by Mr. M'Quade? No.

592. Do you know Mr. Dick, the postmaster? Yes.

593. Is he one not likely to be influenced by Mr. M'Quade? Yes. The parties you have named are of high character and standing as business men.

594. Very old inhabitants of the place? Yes, they are, I believe.

595. Of far longer standing than yourself? Of course they have had more experience of the district. I stated at starting that my experience was limited; that I had been but four years in the district.

596. You yourself have every confidence in the Magistrates in the distribution of this relief? I have no reason to have any other opinion than that they were acting from a feeling of sympathy towards the sufferers.

597. Have you had any conversation with any persons in Windsor as to your examination? Yes; indeed it has been talked about all over the town by everybody.

598. Have you seen Mr. Ascough or Dr. Day within the last two days? Yes, I think I have, for Dr. Day is attending my wife at present, who is in a very bad state of health.

599. Did you see either of them on Monday last? I think I did.

Mr. J. A.
Dawson.

2 Oct., 1861.

- Mr. J. A. Dawson.
2 Oct., 1861.
600. Had you any conversation with them at that time? Yes; Dr. Day asked me if I had got a summons to attend the Committee, as he thought I should be summoned, Mr. Cope having stated that it was necessary the contractors should be examined.
601. *By Mr. Forster*: Did any large number of persons apply to you for recommendations? Some applied to me, but I did not give any recommendations.
602. What was your reason for declining—that you did not know the circumstances of the applicants? My reply was this: “I am a contractor for a portion of this relief, and a recommendation coming from me would not look well; it would seem like recommending customers ‘for my own shop,—getting grist for my own mill.’” I believe some of these persons afterwards got recommendations from others, and were deserving; they came from Freeman’s Reach.
603. Do you think any, or many, improper recommendations were given? I believe there were some, but not many that I am aware of.
604. That would not affect the position of the Magistrates; they might be under mistake as to the circumstances of the parties? Unquestionably. I do not think relief can be given on a large scale without some improper persons being relieved. I recollect being on a committee at the time of the potato blight in Ireland, when there were relief committees, soup funds, and other means for relieving the distress in all directions, and I know we were imposed upon to a great extent. It was not the money of the country or of the Government that we were then distributing, but our own funds, and, notwithstanding that, we were economizing and doing the best we could with it, we were imposed upon. I believe that relief cannot be administered upon a large scale, and particularly in the hurried manner necessary in this instance, without cases of imposition.
605. *By Mr. Stewart*: It did not come to your knowledge that any improper persons had received relief? There were one or two persons in the town who certainly did not lose anything by the flood, but they suffered indirectly; some were put out of their houses by the flood, and they had nothing but what was in them to lose, and others were thrown out of employment. They were sufferers to a small extent indirectly.
606. Then, as far as it came under your knowledge, the parties receiving relief were persons who actually suffered by the flood? Yes.
607. Did it come to your knowledge, through other persons better acquainted with the district, that any large number received relief who were not entitled to it? No; I heard no complaint at all till after, not even indirectly.
608. At the time the opinion was that the relief was needed? Yes.

WEDNESDAY, 9 OCTOBER, 1861.

Present:—

MR. CUNNEEN, | MR. FORSTER,
MR. STEWART.

R. DRIVER, ESQ., IN THE CHAIR.

Mr. Henry Moses called in and examined:—

- Mr. Henry Moses.
9 Oct., 1861.
609. *By the Chairman*: You are a resident of Windsor? Yes.
610. And have been so for several years, I believe? Yes.
611. Do you recollect the distribution of relief to the sufferers by the flood at Windsor? Yes.
612. Have you seen the Return from the Bench of Magistrates in that District, with reference to that subject? Yes.
613. Have you looked into it at all? Yes; I went through it two or three times.
614. Can you state of your own knowledge whether any objection exists in the minds of the people at Windsor, or whether any objection has been taken, as to the manner in which the relief has been distributed? Yes; I have, on several occasions, heard persons speak of the way it was used; they have stated that it was given to persons living in the town, where the flood did not reach, and who were in constant employment.
615. Men you say who were in constant employment in the town of Windsor? In the town of Windsor.
616. Can you name any such persons? Yes; Brooks and Johnston.
617. Are they two men living in the town? Yes; one of them was in my employment for a length of time, and he had not been out of it long, not more than three weeks or a month; and he was afterwards in the employment of the other miller opposite, from whom, I believe, he got a recommendation.
618. Did he suffer any loss from the floods? He could not have suffered any. He is back in my employment now.
619. Was he a man well known to the Magistrates? He must have been well known.
620. And they also could know that he was in constant employment? Well, I should think they would know it as well as I did. It is a small place, and they must have known most men as well as myself.
621. I believe you contracted for a part of the supplies? Yes; I supplied part of the flour.
622. Can you name any other persons resident in the town of Windsor who received relief, and to whom objection can be taken? Yes; a man named Forrester; I think all the laundresses in Windsor received relief; I do not know why.
623. Have you heard of a man named Flood? Yes; Michael Flood; he is a boot-maker.
624. Living in the town of Windsor? Yes.

625.

625. Did he lose anything by the flood? No; the flood came up to the houses in one of which he was living, and he perhaps had to move out; but he could not have lost anything.
626. At the time this relief was being distributed was any canvass being made on behalf of any person for a seat in the Legislative Assembly? They were getting up a requisition to Mr. Walker; at that time I do not think Mr. Byrnes was in the field.
627. Did two Magistrates (Dr. Day and Mr. Ascough) take any part in the proceedings? Mr. Ascough took a leading part; I think he went round with the requisition in the interest of Mr. Walker.
628. Were any of the persons you have named on the electoral roll for the District of Windsor? Yes; Johnston's name is on the electoral roll; and Flood's, I believe; I do not know whether Forrester is on the roll or not.
629. You say you have heard complaints in the town of Windsor as to the mode in which relief was distributed; were the circumstances of the persons objected to known to Mr. Ascough or Dr. Day? The circumstances of some of the farmers were objected to; some of them being freeholders, being well in; but I spoke of men in town, who were only tradesmen or labourers.
630. Were their circumstances known to the Magistrates? Yes; they must have been.
631. Can you state the general opinion in the district as to the mode in which this relief was distributed? Yes, that it was not satisfactorily distributed.
632. Have you any reason to believe that the mode in which the relief was distributed affected the election in Windsor? I think so.
633. You are on intimate terms with Dr. Day and Mr. Ascough are you not? On very intimate terms with Dr. Day, and friends with Mr. Ascough—we never had a quarrel.
634. *By Mr. Forster:* What is your opinion of the general feeling as to this distribution—is there any general impression either that it was fairly or unfairly distributed? That it was unfairly distributed; that it was given to parties who had not suffered by the flood, and to whom it should not have been given.
635. Do you think there is a strong feeling to that effect? The feeling has now passed away, but for some time after the distribution the feeling was very strong.
636. Did many persons apply to you for a recommendation? Several.
637. Did you make many or any recommendations? Not any, being a contractor.
638. Were those applications made by parties not properly entitled to receive relief? Mostly farmers who had suffered.
639. Did any persons apply to you who, from your knowledge of their circumstances, you thought were not entitled to relief? No, I think not, on the last distribution.
640. You state pretty broadly that a number of persons were improperly relieved? Yes.
641. Do you blame the Magistrates or the persons recommending for this? In some cases the persons recommending; in others, the Magistrates. In most cases the Magistrates knew the applicants as well as the parties recommending.
642. Can you name any of those cases where the Magistrates knew the parties, and ought not to have given relief? Yes; the cases of Brooks and Johnston.
643. Can you name any others? Yes; Flood.
644. Will you mention all the cases of a similar kind within your knowledge? Lucy Carroll, Mrs. Enright, Henry Featherstone, Michael Flood, Mrs. Forster, and Mrs. Johnston.
645. *By the Chairman:* Are those the whole of the names you can find in the list? Yes.
646. *By Mr. Forster:* In those cases you think the Magistrates ought to have known the circumstances of the parties? Yes.
647. Have you any reason to believe that, supposing your statement is correct, that the relief was improperly distributed in those cases, that it was on the part of the Magistrates anything more than an error of judgment; or do you think it arose from any other influence? I cannot think it arose from error of judgment, the Magistrates knowing the parties so well.
648. Do you attribute the improper distribution to political influence, or to personal partiality, apart from politics? I could not say.
649. Did you ever, by looking at the cases, notice any connection between the politics of the parties to whom the relief was distributed, and those of the parties distributing? Yes, in the case of Brooks; he was recommended by a party who was a great supporter of Mr. Walker at the time of the canvass.
650. Have you any reason to believe these Magistrates would not have given relief to parties whom they supposed to be opposed to them? I heard one person complain that parties around him, who had suffered in the same way as himself, had received relief; but because he would not put his name to a requisition it was refused to him. That was Langton; he is a brickmaker, and lost his bricks the same as McKellar, and—
651. Was that a case requiring relief? I do not think he was in want; he lost something by the flood.
652. What he complained of was, that others in a similar position to himself had obtained relief, while it was refused to him? Yes.
653. Was he on the side of the Magistrates? No; opposed to them.
654. Can you state at all what principle separates these two parties at Windsor—are they two political parties? One party is supposed to be supporting the Government in office, and the other is opposed to it.
655. Which party do the Magistrates support? The opposing party.
656. Then there could have been no Government influence brought to bear upon this distribution? I think the influence was used the other way, if at all.
657. *By Mr. Stewart:* You are not aware of any cases where parties entitled to relief have been refused because they would not sign the requisition? No.
658. The party to whom you have referred considered himself equally entitled to receive relief with others to whom it had been given? Yes.
- 659.

Mr. Henry
Moses.

9 Oct., 1861.

- Mr. Henry Moscs. 659. In the cases you have referred to, you think the Magistrates must have known these people had not suffered by the floods? Yes.
- 9 Oct., 1861. 660. Do you know by whom they were recommended? Brooks was recommended by Henry Forrester, and Flood by George Seymour.
661. Are those both residents in Windsor? Seymour is father-in-law of Flood, and Mr. Forrester is a resident of Windsor.
662. And they must have recommended these persons knowing they had not suffered? Yes. They must have known that they had not suffered from the floods, and I think Mr. Forrester must have known Brooks was in employment at the time.
663. As far as you know, was it the general feeling in Windsor that only those persons who had suffered losses by the flood were entitled to relief? Yes.
664. That was the general impression? Yes.
665. The feeling was rather unfavourable to those receiving relief who had not so suffered? Yes.
666. *By Mr. Cunneen*: The man you spoke of who was in your employ lost no property by the flood? No.
667. Was he thrown out of employment by the flood? No; he was in my employ for a time, and then he went to Mr. Hopkins. He received from me a regular salary of £2 10s. a week, and made £1 5s. overtime.
668. In the other cases you have referred to you are aware the parties lost no property by the flood? They could not have lost any.
669. And they were not thrown out of employment through the flood? I do not know how a boot-maker could be thrown out of employment.
670. You do not think any of them were thrown out of employment? No.
671. Then they suffered neither directly nor indirectly? No.
672. *By the Chairman*: Have you anything further you desire to state to the Committee upon the subject, by way of explanation? No; I have nothing more to say.
673. Do you know a person of the name of James Winton, who recommended several persons? Yes.
674. Is he related to any of the contractors? Yes; he is related to Mr. Hopkins.
675. Flood was recommended by his father-in-law? Yes.
676. Was his father-in-law an elector of Windsor? Yes.
677. Most of the persons you object to were recommended by electors of the town? Flood was recommended by an elector, and so also was Brooks.
678. Did the whole of the parties you have named support the magisterial candidate on that occasion? It is hard to say how people vote now.
679. I mean as far as you can judge from electioneering meetings? I believe Flood did.
680. He is well known as an out-and-out supporter of theirs? Yes; he pretended to support the other party, but I believe that was only to lead them astray.
681. *By Mr. Cunneen*: In your opinion did the Magistrates of Windsor use any undue influence on account of their position, to forward political interests at elections? Not that I am aware of.
682. *By the Chairman*: In point of fact, do the Magistrates enjoy the confidence of the people of your district? No, they do not.
683. Can you suggest the names of any persons in your district who would be likely to afford information to this Committee upon the subject of their inquiry? Mr. David Cobercroft, of Richmond; and, I think, the contractors, Messrs. Dick and Laverack.

TUESDAY, 15 OCTOBER, 1861.

Present:—

Mr. CUNNEEN,		Mr. LEARY,
Mr. FORSTER,		Mr. WALKER.

R. DRIVER, ESQ., IN THE CHAIR.

Mr. John Bolton Laverack called in and examined:—

- Mr. J. B. Laverack. 684. *By the Chairman*: You are resident at Windsor? I am.
- 15 Oct., 1861. 685. Have you been in business there some years? Yes; some fifteen or sixteen years.
686. Do you recollect the last flood at Windsor, when the relief was distributed? I do.
687. Has your attention been directed to the Return sent in by the Magistrates? It has.
688. Have you heard any complaints in the district as to the distribution of the relief? I have.
689. From persons living in the district? From residents in the district.
690. Have you any objection to the distribution? None myself, personally.
691. Can you state what were the objections made to the manner in which the relief was distributed? Relief was given where it ought not to have been given in several instances, but I think it was done out of good nature more than anything else.
692. Could you yourself point out any objectionable names on the list? If you will ask me any questions I will answer them.
693. Do you find there the name of Lucy Carroll? Yes; the name of Lucy Carroll is on the list.

694. Do you know Edward Enhall, the person recommending her? I do.
695. What is he? A labouring man.
696. Living in the town of Windsor? He is at present; he has not been there very long; he is a man who has been working on the roads, under one of the contractors.
697. Do you know Mrs. Enright? I do.
698. Do you consider her a proper person to obtain relief from a fund of this sort? No; for she has an income; she has a small farm for which she receives £24 or £25 a-year rental.
699. Did you hear any complaints either before or immediately after the last election of a number of the electors having received relief? Yes, I did; it was common conversation in the town.
700. Do you think it had any effect upon the result of the election at all? I cannot say; it is supposed it had.
701. Is that by many of the residents of Windsor? By many of the residents of Windsor it is supposed it had an influence upon the election.
702. Do you know P. Byrnes? There are two P. Byrnes', father and son.
703. In what circumstances are those persons? P. Byrnes is, I consider, an independent man; he is farming, and has town properties.
704. Do you know G. North? He is a man in very good circumstances.
705. Do you know George Wood? I do.
706. Do you know anything of his circumstances? Yes; I have always considered him to be in good circumstances. He purchased a farm at one of my sales two or three years ago, at from £1,500 to £2,000.
707. There are two or three persons of the name of Vaughan on the list? Yes.
708. Do you know their circumstances? They are washerwomen or needlewomen living in the town.
709. Do you know Mrs. Barker mentioned in that Return? There are several of that name, I do not know which this alludes to—at least there are two to my knowledge in Windsor; if it alludes to Mrs. Charles Barker she ought not to have received it, but I do not think it does.
710. There is the name of James Shepherd there? He does not reside in, but about three miles from, Windsor.
711. Had he not one of the best crops in the district? Not one of the best crops in the district, but one of the best crops that has ever been grown on the land cultivated by him. It is land that would never grow a good crop.
712. Were most of the persons whose names have now been mentioned, well known to Messrs. Ascough and Day? They had the same opportunity of knowing them as others, they having been resident in the district so long. Both Mr. Ascough and Dr. Day have been resident there many years, and had a good opportunity of knowing the circumstances of the people.
713. Could they by the exercise of ordinary care have known the circumstances of these persons? Yes, they might if they had used a little exertion in making inquiry.
714. Can you yourself point out any other names than those I have mentioned? I have not looked carefully over the list; if any questions are put to me I will answer them with pleasure.
715. *By Mr. Forster:* Are you aware of the amount of the income of Mrs. Enright? I think from £20 to £25 from rent. I know it from this circumstance, that when I was going down the river twelve months ago, she, or rather her son, asked me if I would call and ask for half-a-year's rent then due. That was about Christmas, the time of this relief.
716. Do you know what led to her receiving relief? No.
717. You have no idea of what influence was brought to bear? No; at that time I know she was very ill.
718. Are you aware whether any of these parties who received relief had any amounts lodged in the Savings' Bank? I am not aware; of my own knowledge I can state that North offered £700 for a house some time back, and that he purchased a property in Windsor about two years ago, and has been making improvements upon it. He offered £700 for a house, and I sold it for £800 the other day.
719. You seem to have come to the conclusion, that whatever errors may have been committed they have arisen from good nature rather than from any improper motive? I think a great many of them have. I know Dr. Day well, and I think a good deal of the relief he has given has been from good nature.
720. The circumstances in which the Magistrates were placed were very difficult, I suppose? Yes, they were.
721. I suppose it would have been almost impossible to distribute this relief without making some mistakes? Yes, but some of the mistakes were very glaring; they must have known the circumstances of some of these parties, for instance the party I have just mentioned—North.
722. Did people come to you to be recommended? Yes, several, and I recommended one, the tenant of a farm for which I am agent, and I knew she suffered severely.
723. Then you did not refuse to recommend on the ground that the parties were not entitled, or that you did not know their circumstances? No, I knew their circumstances, but declined because I did know their circumstances.
724. Do you know whether any of those you declined to recommend got relief afterwards? Yes.
725. Could you name any of those persons? There were several whom I refused and who got relief afterwards, but I should not like to mention their names.
726. Are you aware whether in those cases the parties got recommendations from other persons, or whether they obtained relief without? I see that some got recommendations.

Mr. J. B.
Laverack.

15 Oct., 1861.

- Mr. J. B. Laverack.
15 Oct., 1861.
727. Have you any reason to suppose that there was any political influence at work in this matter? I have not myself, but it was reported so at the time. I thought it was done out of good nature.
728. Do you take any part in politics? Not much; I was polling clerk at the last election.
729. There is a good deal of strong party feeling at Windsor? Yes.
730. Are you able to distinguish the principle that divides the parties? No.
731. *By Mr. Leary*: In reference to the person North—will you look at the Return, and see who recommended North? James Bourke.
732. Is James Bourke a respectable individual? Yes; the owner of a large property in Windsor.
733. Are you aware whether this person, North's, circumstances were within the knowledge of the Magistrates who granted the relief? I think they must have known, for he purchased this property and has been improving, and it is close to the residence of one of the parties. North is a man well known in the district.
734. He lives on his farm? Yes, and is a carrier as well.
735. Did he lose any of his crops by reason of the floods? Yes, he lost his crop by every flood.
736. You think the Magistrates must have known; but is it not quite possible they did not know? I think his circumstances are well known by almost every individual in Windsor; he is known to be a man very snug.
737. *By Mr. Walker*: Do you notice in the Return that the name is Mrs. North? Yes.
738. Do you know whether Mrs. North's husband was at home at the time this relief was given? I think he was not; I think he was up the country at the time.
739. Do you know whether North allows his wife the use of his means to any extent? I know nothing at all of his private affairs.
740. Have you heard, or do you know, that she stated to the Magistrate who granted her relief, that her husband was up the country, that she was in great distress and could not get assistance? I have heard that reported.
741. She was flooded out, was she not? I believe she had to remove; in fact I know all the parties about there had.
742. Can you take upon yourself to say that the Magistrate knew Gifford North's circumstances as well as you do? I cannot say; it is impossible for me to say what he knew, but I should say from the long time the Magistrates have been resident there, they must have known he was a man in easy circumstances. Windsor is a place where every man knows his neighbour's affairs pretty well.
743. Mrs. Enright, is she not apparently in very poor and needy circumstances? Yes, she is; but she cannot be very destitute, as she gets assistance from her husband. This I know, for she has received money from him at times through me.
744. How long ago? About eight or nine months; just about the time relief was given.
745. She has a number of young children, has she not? She has two at home; she has more, but they are not at home.
746. P. Byrnes, you say, you consider an independent man? I consider him in very easy circumstances.
747. Are you aware of the state of his means? From twelve to eighteen months ago he put a property in George-street, Windsor, into my hands for sale, and would not take under £1,000 for it.
748. You do not know whether that property is encumbered or not? Still those were his instructions, and if I did not get £1,000 I was not to sell it. He gave a portion of that to his son.
749. He was all flooded out? Yes, but the farm he resided upon was his own.
750. George Wood's farm was all flooded, was it not? Not the whole; a great portion was.
751. You say you recommended Mrs. Horan? Yes.
752. That Mrs. Horan is not the wife of an elector of Windsor? No, she is a widow at Cattai Creek.
753. Then if it has been stated that this Mrs. Horan's husband is an elector at Windsor, that is not correct? It is not; there is but one Mrs. Horan on the list, and I recommended her; she is also known by the name of Mrs. Dunn.
754. I think you stated that you did not complain of the way this relief had been distributed generally? There are several cases which ought not to have been relieved.
755. Taken as a whole? I think more care might have been used in distributing the relief. There are several I should have objected to, more especially those in Windsor. I do not consider that the relief was intended for those who did not suffer by the flood. Many of those who were relieved were in better circumstances than those who recommended them.
756. Will you mention these "many"? William Constable, recommended by Patrick Molloy. Constable is put down as a labourer; he is a wheelwright. Molloy is a publican. Isaac Cook, recommended by John Ryan; Cook has a fine farm of his own; Ryan has not. If I went through the list I have no doubt I could find plenty.
757. Is Molloy a publican and freeholder? He is; and I daresay you know as well as I do his circumstances. Constable is a man of no family, and a good tradesman.
758. Is he a freeholder? I do not know whether he is or not. Cook is a freeholder, or rather he was, for he is dead now; he is recommended by John Ryan. Here is also a Mrs. Cook, recommended by Charles Gardner; I do not know whether it is the same.
759. *By the Chairman*: Do you know the date of the flood, for which the relief was distributed? I do not know the exact date.

Mr. Robert Dick called in and examined:—

760. *By the Chairman:* You are Postmaster at Windsor? Yes.
761. And have been residing there some time? Yes, a very long time.
762. Do you recollect the flood in Windsor, when relief was distributed to the sufferers? Yes.
763. Has your attention been directed to the Return furnished by the Magistrates? My attention was drawn to it in the first instance by Mr. Cope, not otherwise.
764. You have not carefully looked into it? I never have looked into it at all; I never had a copy of the list.
765. Have you heard any complaints in the town of Windsor relative to the distribution? Certain complaints have been made.
766. Do you know the nature of the complaints? The complaints, so far as I could understand, were that persons had got relief who were not deserving of it, who had not suffered directly from the floods.
767. You cannot state of your own knowledge whether those persons obtained relief or not? The only person I supplied with relief, as a contractor, who I thought did not require it, was Carroll.
768. Lucy Carroll? That is the only one supplied by me who I thought was not entitled to relief; I did not think she had suffered by the flood.
769. Do you know a person named Bell? I do, well.
770. In Windsor? Yes.
771. Did you hear anyone mention a conversation between Bell and a gentleman in Windsor about his applying for relief? No, I did not. Bell spoke about it himself to me on my verandah, and, as a Scotchman, I said I did not think he ought to have taken relief, because I did not think he was entitled to it. I believe Dr. Day told him he ought to take it. He had an acre of land from Mrs. McGrath, and he lost all that he had upon the acre; but I told him I did not think he was entitled to take it. No gentleman ever spoke to me about the matter.
772. You must have misunderstood my question —? There was no conversation whatever between me and any other person about it.
773. In looking through this report do you consider any number of persons have received assistance who were not entitled to it? I do not see any excepting this Mrs. North, if that is Gifford North's wife, and Mrs. Sillis, who are not entitled; they had other means of obtaining what they needed.
774. *By Mr. Walker:* You do not think there are any besides Mrs. North and Mrs. Sillis? No.
775. *By the Chairman:* Do you remember the date of the flood? No; but I know it was a long time ago.
776. Are you not aware that at the time this relief was given there was an active canvass going on? No, for I have had nothing to do with politics since the first election; from the ill feeling then exhibited I have kept aloof.
777. I do not ask you whether you took any part in it, but do you not know that there was a strong canvass? No, for on a previous occasion I was asked to sign a requisition, and I declined; and therefore, I suppose, I was not called upon at this time. I was not aware that any such requisition was in existence.
778. *By Mr. Forster:* Are you aware whether any of these parties who have been relieved, have amounts lodged in the Savings' Bank? I do not know it of my own knowledge. I know North has funds, but not lodged in the Savings' Bank.
779. You know he has funds? Yes.
780. You state that of your own knowledge? Yes.
781. Had he at the time of receiving relief? Yes; I questioned North about the matter shortly after; he said he was at the time up the country, and he was very much annoyed at his wife receiving the relief. He said he was not at home, and when he came home he was very much annoyed to find she had received relief.
782. Are you aware whether he returned it? He did not.
783. He made no attempt? No attempt; but I dare say if I had asked him to have done so he would; but I thought the persons having supplied it would not take it back.
784. Do you know a person named Enright? I do.
785. A woman? Yes.
786. Are you aware whether she received relief? I believe so.
787. Do you think she was a proper person? I do not think she was entitled to receive it from this fund; but she is nearly blind, her husband had left her, and she had some young children. I do not think that altogether an improper case; it was one that might be given to, although there may be institutions in the town to which she might more properly have applied for relief.
788. Did you make many recommendations yourself? I gave none; several persons came to me for recommendations, but being a contractor I gave none.
789. Did many apply to you? Yes, and people who were worthy to receive relief, but I would not give any on account of being a contractor.
790. Did many come to you who were not entitled? I do not think one.
791. *By Mr. Leary:* You know Mrs. North, I suppose? I do, both Mr. and Mrs.
792. Was the farm of North much flooded? Yes, the whole of it.
793. Do you know how long North was away previous to this flood? He was away loading.
794. Some weeks? Yes, I am sure it must have been; for he could not have returned from the western districts where he was, as the Nepean was swollen.
795. Are you aware whether Mrs. North was in good circumstances at the time? Her husband was.

Mr. Robert
Dick.
15 Oct., 1861.

- Mr. Robert Dick.
15 Oct., 1861.
796. Was she? If she had wanted money, and had come to me, I would have given it her.
797. She held that position? I am sure of that.
798. Do you think the Magistrates knew that? I could not say. I do not think the Magistrates knew the circumstances of the man. I think I am the only person in Windsor who knows his circumstances.
799. *By Mr. Walker:* You have stated that you have heard certain complaints made in reference to that Return? Yes, several.
800. Do you know whether most of the persons who made those complaints are persons who have any good feeling towards the Magistrates? Some of them, perhaps, have not a good feeling towards the Magistrates.
801. You think some of them have a feeling of animosity against them? Some of them, I dare say.
802. Do not you think the Magistrates had a very difficult task? Very much so indeed; I have no doubt about that.
803. Do you think it was possible to avoid some mistakes? I do not; I think if I had been a Magistrate myself I would have looked a good deal to the recommendations sent to me.
804. Do you know whether Mr. M'Quade has a very strong feeling against Mr. Ascough? He had at one time. I do not know what his feeling may be at present, for I have not spoken to Mr. M'Quade latterly.
805. Do you know whether there was any scarcity of flour at that time? There was at the time the orders were first given, because I gave one or two orders to Mr. Moses, and they could not be supplied till the beginning of the following week. He could not supply the demands, they came so quickly upon him.
806. Do you know whether the orders for tea and sugar were distributed equally among the contractors? As far as I can learn. I have heard no complaints from the contractors that one had more than another.
807. You say you have heard complaints from some persons about the distribution of this relief—have you not heard others say that there was no ground for complaint? I think myself there was very little.
808. *By Mr. Leary:* Who was the person who recommended Mrs. North? James Bourke.
809. What position does he hold—is he a respectable man? He is a landed proprietor.
810. If you did not know an individual who applied to you for relief, and such a person were to recommend him, would you give relief? Yes, I would.
811. *By Mr. Walker:* As far as you can ascertain, do you believe the Magistrates were actuated by any political motive? I could not say; not to my knowledge.
812. *By the Chairman:* You say you believe Mr. M'Quade is unfriendly to the Magistrates? At one time I say he was, and I have no reason to believe that the same feeling does not exist at the present moment, but I have not spoken to Mr. M'Quade latterly.
813. You know Mr. M'Quade? Very well.
814. Do you think Mr. M'Quade is a person likely to carry his opposition to such an extent as to make charges against the Magistrates without foundation? I cannot say that.

Mr. David Cobcroft called in and examined:—

- Mr. David Cobcroft.
15 Oct., 1861.
815. *By the Chairman:* You reside in the town of Richmond? Yes.
816. And were formerly resident in Windsor? Yes.
817. Will you look at that Return (*the Return from the Bench of Magistrates*)—have you ever seen that before? Yes, I saw it the other day.
818. Have you looked through it? Yes.
819. Were you residing at Richmond or Windsor at the time of the last flood? At Windsor.
820. Do you think any of the persons relieved by the Bench of Magistrates were not entitled to relief? I do.
821. Can you point out any names? William King.
822. *By Mr. Walker:* He is not on the list? He is, I believe, one of the "bearers." He was about leaving the district at the time he got the relief.
823. *By the Chairman:* You are aware that he obtained relief? Yes.
824. For himself? For himself and wife.
825. From whom? I believe Dr. Day granted it him.
826. Any others? Yes; Peerie Lyons, Mary Rose, Alfred Bushell, Paul Bushell, Mrs. Bushell, George Wood, John Daly, William H. Rose, William Scarf, Robert Smith, Thomas Wood, Mrs. Beeroft, Mrs. Bowers (should be Bowd), William Bragg, William Clarke, George Bushell, John Brown, David Beynon, Bridget Crummy, Mrs. Symons, Joseph Stubbs.
827. Have you heard many complaints made in the district as to the mode in which the relief was distributed? Yes; I heard it was given to anybody who applied for it.
828. In your opinion the persons you have named as having obtained relief were people who did not require it? Yes.
829. Why? Because they had sufficient of their own means, and were not in a state of starvation. They had property of their own.
830. Could the persons granting relief, by the exercise of ordinary care, have ascertained the fact? Yes.
831. Are not many of the persons you have named well known old hands, long resident in the district? Yes.

832. You have mentioned the family of the Bushells? Yes.
833. They are well known? Yes.
834. Do you recollect the date of the flood? No.
835. Was there a strong canvass going on in the town of Windsor at the time this relief was being distributed, or about that time? About that time.
836. Do you know whether any of the persons relieved were residents of the town of Windsor? Yes. I have none upon my list; but they are here upon the printed list.
837. They are upon the electoral roll? Yes.
838. Do you think the mode in which the relief was distributed at all influenced the election? I could hardly say;* it was currently reported such was the case.
839. Can you state, of your own knowledge, if many persons in Windsor were of that opinion? Yes.
840. *By Mr. Forster*: Do you know anything of the actual incomes of these parties; or of the circumstances of these parties who, you say, received relief improperly? Yes, I think I can state.
841. Can you state their circumstances more in detail? William King was a carrier, and was leaving for Bathurst at the time he got relief.
842. Had he a load upon his dray? Yes; and when he got relief he placed it upon his dray.
843. Perhaps he intended to distribute it along the road? I do not think so, unless to himself and wife.
844. Can you name any others? Peerie Lyons; he is a fencer and splitter by trade, in the bush.
845. He could not have lost anything by the flood? No.
846. You are quite certain he did not lose his maul and wedges; or, at all events, mauls and wedges were not the sort of relief afforded to him? No. Alfred Bushell had a freehold farm at Wilberforce.
847. What kind of farm—do you know its extent, and the income it produced? It was a good sized farm.
848. Was it flooded? Part of it; the high parts were not; besides, he had his stock.
849. What should you say his income was? I should say £200 or £300 a-year.†
850. Does he live in pretty good circumstances? Yes, he lives pretty well; he has some fine horses and cattle.
851. He got relief? Yes.
852. Do you know who recommended him? Mr. Edward Robinson.
853. Will you state if Edward Robinson was in better or worse circumstances than the person he recommended? Better.
854. Will you name some other parties? Paul Bushell, he has a freehold farm.
855. What should you say his income was, in round numbers? I could not say exactly.
856. Do you consider him in good circumstances? Yes, his circumstances are pretty nearly the same as his brothers'.
857. Do you know whether he serves on the jury? I am not certain on that point.
858. Do you know if he has any sums in the Savings' Bank? That I cannot say.
859. Can you tell me if any of these parties have sums in the Savings' Bank? It would be impossible for me to tell.
860. Will you particularize some more of these cases? Mrs. Bushell, the mother of Paul and Alfred Bushell, is living in the next house, about ten yards from Paul Bushell; she is maintained by him and his brothers.
861. Then she lost nothing? She had nothing; the sons had all. George Wood, a freehold farmer. He has a farm on each side of the river, at Cornwallis and at Wilberforce.
862. All these freeholders were registered as voters? They were voters.
863. Do you know if they took part in the election? No more than giving their votes.
864. Not actively? No.
865. Will you name some more? John Daly; he is a tenant at Wilberforce.
866. In good circumstances? Yes, pretty good circumstances; he has property, horses, cattle, and teams.
867. Did he lose much by the flood? He could not have lost much. William Henry Rose has a freehold farm at Wilberforce; he is in pretty good circumstances; he is a boat-builder also.
868. Did the flood take any of his boats away? No.
869. Boat-builders generally build close to the water? Yes; I do not think he is carrying on his business at present. He used to be living at Balmain, and then he came back to his farm, and I know he is cropping it. William Scarf, a freehold farmer, a fencer and splitter besides.
870. In good circumstances? Yes, he generally gets his living by fencing, splitting, and so forth. Robert Smith is a tenant farmer at Wilberforce; he has property, also horses and cattle, and I do not think he could have lost much by the floods, for a great portion of his farm is on high land. Thomas Wood is son-in-law to Mr. John Hoskisson, a very rich man in that district. It is possible he might have suffered a little on his own farm at Cornwallis.
871. What are his own circumstances? He was pretty well off, I cannot say what he is now.

872.

* NOTE (on revision):—It is my opinion that it did influence the election; but would not positively swear it.

† NOTE (on revision):—I should say his farm alone produces from £200 to £300 a-year.

- Mr. David Cobcroft.
15 Oct., 1861.
872. At the time of the distribution of the relief? I think he was pretty well off.
873. Do you think he would have had any difficulty in getting £100 or £200 from his father-in-law—are they on good terms? Himself and his father-in-law are not on very good terms, but the latter is kind to his daughter.
874. What kind of house is he living in? I can hardly say. At first he lived at Wilberforce; then at Cornwallis; he is a change-about.
875. Has he different properties? No, he was a tenant at those places.
876. Are you sure he was not in any distress? No; he could have managed without relief, in my opinion.
877. Would he have had any difficulty in getting goods on credit? Not such as the common necessaries of life—tea, sugar, and flour; in fact, he used to deal with me when I was living at Windsor. Mrs. Becraft—I believe she has a freehold estate at Wilberforce, and did not lose much by the flood.
878. Is her husband in good circumstances? Yes, pretty good.
879. All these people you say are in good circumstances? Yes, they could get credit for the common necessaries of life.
880. Has Becraft horses and cattle? Yes.
881. Does he keep a cart? Yes, and drays; in fact he had two or three teams on the road to Bathurst, carrying. Mrs. Bowers (Bowd it should be)—her husband is a tenant farmer, renting ground of my uncle, and is well to do.
882. He pays his rent pretty well? Yes, and has some to spare.
883. Do you think he has his farm at a reasonable rate, and can make a good profit? I am sure he can.
884. Are you sure he was not a great sufferer by the flood? No great sufferer; he may have lost a little.
885. Was he a man, or were any of the people you have mentioned, persons whom you would have considered objects of charity if the Government relief had not been given? Not one. William Bragg, a tenant farmer at Wilberforce.
886. Were his circumstances good? Pretty good; he has stock much the same as these other people, horses, cattle, farming implements, and so on. Henry Asprey, a tenant farmer of Mrs. Burdakin; he is a shoemaker by trade, and works at his trade.
887. Are you sure he was not a subject for relief? No.* William Charlie, Freeman's Reach; a little shopkeeper there.
888. Was he a loser by the flood? He had only one acre of ground, and I suppose he cropped that with cabbages.
889. Is his place near the water? A long way from it.
890. Were his circumstances pretty good? Pretty good.
891. His business thriving? He has dealt with me and paid his accounts, and is doing pretty well.
892. Is he a man you would trust for a fair sum? Yes. George Bushell, a freehold farmer—he resides at Windsor and works his farm at Wilberforce. That man went to my father and several others to be recommended for relief; my father said he did not require it, as he had property of his own, and was not a sufferer. John Brown, a publican and farmer—I do not think his circumstances are very good; at the same time he was not in such a state of want as to need this relief.
893. Do you think the floods prevented people attending his public house? No doubt it stopped some from spending freely. David Beynon, a stonemason.
894. A good workman? Yes, very good; he built a large kirk in Pitt Town.
895. Can he get employment? He is not in the district.
896. Is he a drunkard? He is a man who is fond of his glass; I cannot say he is totally a drunkard.
897. He might have been in bad circumstances in consequence of the flood? I do not think so; soon after the flood he drew £250, and then bolted to Sydney.
898. From whom did he draw it? It was for the building.
899. Then he is a defaulter to some extent—did he get more than was his due? No, he had finished the stonework, and then he drew this sum and left.
900. What was the object of his going? I believe he owed some small accounts; £20 would have paid them all.
901. Is he now in hiding—is it known where he is? It was said he was working near Campbell's Wharf. Bridget Crummy—I do not know what to say of this woman at all; she is a person of no account.
902. A bad character? A bad character.
903. She might have been destitute? I do not see that; she goes about washing.
904. She was not likely then to be in distress? No. Mrs. Symons is the wife of a fencer and splitter, and Joseph Stubbs is a farmer.
905. *By Mr. Walker:* You mention William King—are there not two persons of that name, one in Windsor? Yes; the name of King; this is of Wilberforce, not of Windsor.
906. How do you know? I am aware of it myself; he is the man who had the load on his dray, and started up the country with the relief bag and baggage.
907. The man you refer to was a Wilberforce man? He was at the time.
908. You do not know a man of the name of William King who was at work on the roads at the time? No; I only know this one William King who did get relief.
909. You do not know William King, of Windsor? I have told you so.

910.

* Revised:—Yes, I am sure.

910. You refer to Peerie Lyons, or to Pierce Lyons? It is Peerie, not Pierce.
911. Who was he recommended by? It is on the list here—Pierce Lyons recommended by William Dunston.
912. Is he a respectable man? Yes,* a brother-in-law of my own.
913. You have referred to Mary Rose—who is she recommended by? James Geehan.
914. Is he a respectable freeholder? Yes; I call any man respectable who gets an honest living.†
915. Paul Bushell—is he recommended by James Winton? Yes.
916. Is he a respectable man, a freeholder, or was he at the time? Yes.
917. George Wood—who is he recommended by? William Walker, I believe.
918. That is myself? I believe so.
919. John Daly, recommended by Mr. Edward Robinson—is he a respectable freeholder? He is.
920. William Henry Rose—is he recommended by George Buttsworth, a respectable man? Yes; a relative of Rose.
921. A freeholder is he? Yes.
922. William Scarf—is he also recommended by Mr. Edward Robinson? Yes.
923. If Robert Smith is recommended by Richard Edwards, is he a respectable man? Yes.
924. Is Mrs. Beeraft recommended by James Winton? Yes.
925. Mrs. Bowd—by the same? Yes.
926. Bragg, recommended by Richard Edwards? Yes.
927. If Henry Asprey has been recommended by James Dunston, is he a respectable man? Yes; he resides in Pitt Town.
928. William Clarke is recommended by Edward Robinson, is he not? Yes.
929. Is George Bushell recommended by Charles Barker? Yes.
930. Is he a respectable man? He keeps an hotel in Windsor; I do not know whether you call him a respectable man.
931. Do you know anything to the contrary? I will not express an opinion.
932. He is an innkeeper? Yes.
933. And a butcher, is he not? Not that I am aware of.
934. Do you know two persons of the name of John Brown? I do.
935. Does the return say that the John Brown named in it resides at Wilberforce? No, nor anywhere else.
936. Will you undertake to say that this list refers to John Brown, a publican, and no other? I believe it does; I will not say positively it does.
937. You cannot gather from the Return that it is John Brown, the publican, of Wilberforce? No, not from the Return; but I can very easily prove it if you require it.
938. David Beynon is recommended by John Ryan, is he not? Yes.
939. A respectable farmer at Wilberforce? I said before I suppose if any one pays his way he is respectable: if he conducts himself properly and so forth.
940. Bridget Crummy, she is recommended by Mr. James Geehan—is he a respectable man? Yes, I have said so.
941. Where does she reside? It is impossible for me to say where she resides. She goes to and fro; for a time she was living at Windsor, then at Wilberforce, then at Parramatta.
942. Do you know whether she was living at Wilberforce at the time of the distribution of this relief? No, I think she was living at Windsor.
943. Geehan resides at Wilberforce, does he not? Yes; I am not certain whether she was living at Windsor or at Wilberforce; she was there only a few weeks.
944. Mrs. Symons is recommended by Mr. Edward Robinson? Yes.
945. Most of these tenant farmers had their farms flooded, or parts of them? Yes, but they were not in a state of starvation or want.
946. That is your opinion? That is my opinion.
947. Other persons might have a different opinion? Yes, but I know the contrary; when persons have plenty of cattle and property I know they are not in want.
948. David Beynon, you say, drew £250; did he draw that in a lump? Yes.
949. How do you know that? Because I was told so by Mr. Johnson of Pitt Town.
950. Beynon never told you that? No, because I never saw Beynon afterwards; he owed me £2, and hooked it.
951. He bolted and left you in debt? Yes.
952. You are not on good terms with Dr. Day, I presume? I have a good feeling towards him, but I do not think he has to me.
953. *By the Chairman:* Do you know the date of this flood? No; it was just before the last election at Windsor.
954. About Christmas time, was it not? I cannot say exactly.
955. Do you desire to make any further explanation to this Committee? No, I have said all I have to say respecting it.

Mr. David
Cobcroft.

15 Oct., 1861.

WEDNESDAY,

* NOTE (on revision) :—A freehold farmer.

† NOTE (on revision) :—And conducts himself properly.

WEDNESDAY, 16 OCTOBER, 1861.

Present:—

MR. FORSTER,

MR. WALKER.

R. DRIVER, ESQ., IN THE CHAIR.

Henry Day, Esquire, J. P., again called in and further examined:—

- Henry Day, Esq. 956. *By Mr. Walker:* You have already given evidence in the matter of this enquiry? I have.
- 16 Oct., 1861. 957. Have you any further information to give to the Committee? Yes, with reference to an individual named Docking, who was objected to by Mr. Cope, to justify my having given him relief I produce two recommendations from respectable persons.
958. From whom are those recommendations? From Mr. Henry Moses and Mr. John Cunningham. This was not with reference to the last flood but to the flood before, and indicates the circumstances of the man; he was poor then, and he became poorer in consequence of the last flood.
959. *By the Chairman:* Then in point of fact he was relieved without any recommendation after the last flood? No, he was then recommended by Mr. Francis McDonnall.
960. *By Mr. Walker:* Have you any other recommendations to hand in than those produced here before? Yes, there was some doubt expressed relative to Turner and Flood having received relief. After my return home I applied to the trustee of the estate, and he addressed this letter to me, which I beg to hand in. (*The witness handed in the same.*)
961. Does the document you have handed in explain the impoverished circumstances of those men? It does, and is signed by their own trustee.
962. Who is it signed by? James Ingram, Executor to the estate of the late John Allan.
963. Have you any further recommendations to hand in? Yes, on the last occasion parties objected strongly to the relief given to David Bushell, Alfred Bushell, and Paul Bushell.
964. The Bushell family? The Bushell family. (*The witness handed in a paper.*)
965. What is that you hand in? A statement of their circumstances, signed by James Salter, a respectable farmer of Wilberforce, and Richard William Cobercroft, the old gentleman.
966. What Cobercroft is that? The old gentleman of Wilberforce.
967. Is he the father of David Cobercroft? Yes, the reputed father. I believe him to be his father. He is a moral and correct man, but in this case I do not think it is "like father like son."
968. The father of the David Cobercroft who gave evidence here? Yes; I heard that David Cobercroft had given evidence.
969. Do you hand in any more recommendations? Yes. (*The witness handed in a paper.*) George Graham was objected to as being employed by Mr. John Ridge.
970. You hand in a statement from his employer, Mr. John Ridge, certifying that he was receiving no wages at the time? —
971. You hold in your hand, I think, a list of the Committee that was formed at Windsor, for the distribution of seed wheat to the sufferers by the previous flood at Windsor? Yes.
972. And you also hand in a list of the sufferers who were relieved by that Committee? Yes. (*The witness handed in the same. Vide Appendix A*)
973. Are many of the persons who were relieved by you at the last flood, the same persons as were relieved by this Committee at the previous flood? A great many.
974. Can you name some of the persons in particular, who were relieved by that Committee, and who have been objected on account of having been relieved by you? Yes;—Lucy Upton, Hackett, R. Smith, W. Turner, Thomas Cupitt, Edward Davis, Richard Arnold, Willoughby, Priestly, Scarf, Breeze, Mrs. Munday, Patrick Flood, John Docking, William Cupitt, Mrs. Connor, John Brown, John Turner, Mrs. Cavanaugh, the two Gronos', R. White, Christopher Norris, Frank Norris, Alfred Norris, John Guillam, Richard Norris, John Teale, Mrs. McGauly—all of whom have been objected to.
975. How many were there on that Committee? Forty-five.
976. Have you any farther explanation to make with reference to any of the other cases? It would be rather disjointed, and would come in best perhaps in answer to questions.
977. It has been stated by one of the witnesses that George Cupitt, senior, a freeholder, was relieved; is that the fact? It is not; he told me so himself. This is one of the cases in which I am willing to admit an imposition was practised. The mother of this man* had relief twice. A young man of the name of Dogherty, but going by the name of Cupitt, married her daughter,† and she put him up to the way of getting it the second time. He came to me first, and afterwards went to Mr. Ascough. Mr. Ascough said your name is not Cupitt, but Dogherty; and he said, I go by the name of Cupitt sometimes.
978. Then it was this William Cupitt who received relief twice by mistake, and George Cupitt never received it at all? Yes; I thought Mr. Ascough might be deceived, and I asked Cupitt, who said he had never received relief.
979. Do you know anything about relief being afforded to one William King? There are three Kings. There is a King in Windsor, who works on the roads, and two Kings in Wilberforce. I cannot tell you their Christian names; there is one who left Wilberforce, and another who is still there.
980. Was the William King who received relief the man who had teams, or was he not the man who was working on the roads? Neither of those at Wilberforce were working on the

* NOTE (On revision):—i. e., William Cupitt alias Dogherty, not George Cupitt.

† NOTE (On revision):—i. e., the daughter of Mrs. Mary Connor.

the roads; a King of Windsor, who was working on the road, received relief. Both of those persons were very poor. Henry Day, Esq.

981. Was the William King who received relief, the man at Wilberforce, a carrier, who had teams? If it is the one I mean. There is a man who left Wilberforce; he had a team; the other is a poor man. 16 Oct., 1861.

982. Was it the poor man who got the relief, or the other? The poor man; the other is living at Mudgee.

983. Do you know anything about Peerie Lyons? Yes; he is a man I would not give relief again. I think that is one of the cases, although he is very poor, where I should not give relief, however well recommended he might come.

984. You consider that you were imposed upon in that case? Yes, although he came recommended by Dunston, a respectable name.

985. Do you remember Mary Rose? I did not relieve her, nor should I relieve her.

986. I think you have explained the case of the Bushells? I should relieve them again under similar circumstances.

987. It has been stated by some witnesses that George Bushell is a freeholder? That is utterly false; he told me so himself.

988. Was Patrick Daly recommended? I relieved him, and would do so again. He was recommended by James Bligh Ridge. I know his circumstances; he is very poor; he has a boat; his farm was flooded, and he has nine or ten children.

989. Can you explain how John Daly got relief? John Daly was recommended by Edward Robinson, and I thought his general circumstances were not bad; but he told me that he had only eighteen acres, that three were washed away, and that he was very poor; he said that he had saved money a few years ago, but that he had nothing left, as he had lost all by the floods. Mr. Robinson recommended him, and I thought he was very poor. Mr. Moses has stated that he has money. I asked Mrs. Moses, and she said, No, she believed he had not. I also asked Mrs. Wood, and she said that he had money six or seven years ago, but that the floods have swept it all away. I spoke to him upon the subject, and said I was afraid he had imposed upon the Magistrates; he said he had not, and if Mr. Moses minds his own business instead of mine it will be better for him.

990. It has been stated by Mr. Cobcroft that John Brown, who was relieved, was a publican at Wilberforce? Not at all; it is all nonsense. John Brown, of Cattai Creek, was recommended by J. Pendergast.

991. That is on the opposite side of the river to Brown the publican? Yes.

992. Then Brown the publican never received the relief? Never, to my knowledge.

993. That is the only John Brown on the list? Yes.

994. Have you anything to state with reference to relief being refused to a man named Langton? I refused him.

995. On what grounds? He came to me and said he came for relief. I said, "Langton, your circumstances are such that I cannot relieve you." He said, "McKellar had got relief." I asked him if he could raise £50; he said, "Yes;" and I then said I could not relieve him.

996. It has been stated by one witness, David Cobcroft, that relief was given to any person who applied for it? It is not true.

997. You know Alfred Bushell well, I suppose? Yes, and have for many years; he is a very poor man.

998. From your knowledge of him do you believe that he was ever in receipt of an income of £200 or £300 a year? Nonsense—ridiculous! He came * in for a share of old Bushell's land of about forty acres.† He never had an income of four hundred farthings; he is as poor as a rook.

999. *By Mr. Forster:* Has he any cattle and horses? No. He may have to work the farm; but no cattle, no sheep, no stock, no money.

1000. *By Mr. Walker:* Then in your opinion it is not true that he had an income of £200 or £300 a year? Nonsense. Who stated it?

1001. Do you know David Beynon, a stonemason? I recollect him.

1002. It has been stated that he drew £250 for stonework—do you know the circumstances of that man? He had something to do with the contract for the Presbyterian Church at Pitt Town. As to building it, it did not, altogether, come to much more than that. He did some stonework there, but I believe he was in destitute circumstances at the time I relieved him. He was on the opposite side of the river to me, and was flooded out of the few acres of ground he had.

1003. Was he in distress by the flood? He was; and he had a large family of young children. He was recommended by John Ryan.

1004. You refused to give relief in many cases? Yes; in many cases where I could not trust to the parties who signed the recommendations—where I had not confidence in them. I had some thirty or forty applications which I ignored. I shewed them to Mr. Sydney Scarvell, and asked his opinion of them, and I think a few of them were afterwards relieved.

1005. Is there any good feeling existing between Mr. Cobcroft and you? He has done all he could to ruin me—not to ruin me, I defy him to do that—but he has, as far as his limited means and capacity would enable him, endeavoured to injure me.

1006. He was a chemist in Windsor? Yes.

1007. And you are a practising medical man? Yes.

1008. Did he complain of your not patronising him? Never to me; I sent him prescriptions,

* *Revised:*—Will come.

† *NOTE (On revision):*—At his mother's death.

Henry Day, Esq. tions, and he was fishing or shooting and neglecting his business; he injured himself more than me.

16 Oct., 1860. 1009. You have contradicted Mr. Coberoft in several particulars; you have said that his statements were not true—have you any other reasons to adduce why credence should not be given to his evidence? Can I give more conclusive than that his own father certifies to the falsity of his statements; and Judge Cary, when upon the Bench, stated that he would not believe him on his oath.

1010. Have you anything farther to state in explanation? I have; I will point out the names of some parties you have not noticed, whom I should not relieve again. Bridget Crummy, although she was recommended by James Gechan, I should not relieve again. There is also the imposition of two persons having been relieved twice; that would not be practised again.

1011. How was that done; by going to two Magistrates? Yes. There is another case, the case of Buckridge—if that is old Daniel Buckridge, as I think it is—that was an imposition; he would not be relieved again; his son might have deserved relief. He was recommended by J. Pendergast. There is one person here, recommended by Mr. Laverack, I should not relieve him again. I do not remember the name, but I had confidence that he would not recommend wrongly.

1012. Mrs. Horan; was that the name? Yes. There are two or three of the persons recommended by Mr. M'Quade, whom I should not relieve again. Carney had a freehold, and I trusted Mr. M'Quade would not have misled me; he was a tenant of Mr. M'Quade.

1013. Was John Forster recommended by Mr. M'Quade? He says he did not recommend him, because he did not certify to his distress, though he certified that he had lost all by the floods. He says that did not throw blame upon himself, but upon me.

1014. That misled you? It did. When he came to me I refused to relieve him; he said he was poor. I replied, "I will not relieve you upon my own responsibility; I must have proof of your necessity;" and he then went to Mr. M'Quade and got a recommendation.

1015. Did Mr. M'Quade recommend two brickmakers in the town—two electors? He did. I perhaps may not be allowed to say it, but they were political supporters of his, and voted with him. I think there were about seven or eight who ought not to have been relieved; but you will, on the other hand, allow me to say that I believe if four hundred people were to be relieved again, I very much question whether so little imposition would be practised.

APPENDIX A.

Members forming the Committee to afford relief to the Sufferers by issuing Seed Wheat.

Henry Day, Esq.
16 Oct., 1861.

Mr. Thomas Wright Marsden called in and examined:—

- 1016. *By Mr. Forster*: You are a resident near Windsor? In Windsor.
- 1017. Are you aware of the circumstances under which the relief was distributed at the last flood? I am.
- 1018. Have you any general opinion on the subject as to whether it was properly or improperly distributed? I never heard it spoken of, except by one or two, and most of the noise was about one man, named Woolley, who never got it at all. There are one or two men in Windsor who have got nothing to do of their own, and they go about, saying what a shame it was that the Bench should have given relief to a man named John Woolley.
- 1019. Was it the general opinion that the relief was fairly distributed? Yes.
- 1020. Have you looked through the list? Yes. I was on a committee for the distribution of seed wheat to the sufferers by a previous flood. That committee was composed of forty or fifty gentlemen from all parts of the district; we had parties recommended by their neighbours, and still we were taken in. Some people who had £200 or £300 in the bank were believed to be poor people, and received thirty or forty bushels of wheat.
- 1021. You would not take upon you to say that the Magistrates might not have been taken in in this matter? No, I think they might have been taken in, but the general opinion was, that it was fairly distributed.
- 1022. Is political feeling in Windsor very strong? That is what it is that is giving you gentlemen this pleasure.
- 1023. Do you belong to any party? Not particularly.
- 1024. Are you able to discover any political principle that divides the parties? I do not think there is much principle in the matter.
- 1025. You think it is mere personal feeling? Personal feeling.
- 1026. One set of men fighting against another? Yes.
- 1027. *By Mr. Walker*: It has been stated by one witness, Mr. McQuade, that complaints have been made of the manner in which the relief has been distributed, from one end of the district to the other; is that true? No; I believe he was the first man that started it, and now he is picking up the evidence he has made himself. I believe it is just spite, and that if Mr. Byrnes had been returned at the last election there would never have been a word about this.
- 1028. You are a native of the Hawkesbury? Yes, I was born within twenty yards of where I am living now.
- 1029. You know pretty well every person in the district? Yes, I ought to do; I am always among them.
- 1030. Do you consider Mr. John McQuade a good judge of public opinion up there? I do not know.
- 1031. Is he a man who is very unpopular? Very unpopular; I believe he is the most unpopular man in the district.
- 1032. Have you anything further to state with reference to this matter? No, I do not know that I have. I was in business, and I heard all that was going on in the town. I kept an hotel, "The Fitz Roy," and I suppose there was more traffic in my place than in any other three or four houses, and I never heard it spoken of, except by one or two of these parties, until lately. The people were all well satisfied, I believe.
- 1033. *By the Chairman*: Can you give the date of the last flood? I cannot just now, but I book every flood that happens.
- 1034. I believe you took a very active interest in the last election, did you not? I did not take a very active part—I had the credit of it.
- 1035. You proposed or seconded the successful candidate? Yes, but I never asked a man which way he was going to vote, although perhaps I did a little.
- 1036. Do you know Mr. Henry Moses? Yes.
- 1037. He is a very respectable person, is he not? Yes.
- 1038. One whose word you would take on any subject? Yes, I would take his word as well as any man in the Colony in business.
- 1039. *By Mr. Walker*: Mr. Moses is a man who takes a strong part in politics; does he not? Yes, he is very bitter in politics; but as a business man I would take his word.
- 1040. *By the Chairman*: Would you not in any way? Not in politics. He would go a good way to get his man in; when he gets himself up he cannot see things then.
- 1041. You are not particularly cool yourself at such times, I suppose? No, but I take a good deal of getting up.

Mr. T. W. Marsden.
16 Oct., 1861.

James

James Ascough, Esq., J.P., called in and examined:—

- J. Ascough,
Esq.
16 Oct., 1861.
1042. *By Mr. Walker*: You are a Magistrate of the Territory? I am.
1043. You were one of the Magistrates who afforded relief to the sufferers by the last flood at Windsor? Yes.
1044. Did you afford relief in many cases? In a considerable number, but much less than Dr. Day; I should think, without professing to speak very accurately, in the proportion of four to seven.
1045. Were you guided by any principle in affording relief? I was guided by the principle of affording relief to those who needed it—to those who were really in destitute circumstances, and by no other.
1046. Did you act on any recommendations? Yes, invariably.
1047. You invariably acted upon recommendations? Invariably; I never made an exception in favour of any person.
1048. You mean to say that you never afforded relief in any case without a recommendation? I never made an exception in favour of any one.
1049. Did you take the recommendation of any one, or only of those persons upon whom you could place reliance? I refused when persons came to me with recommendations from parties of whom I had very little knowledge, or no knowledge at all, to give relief.
1050. Why? Because I had no confidence in them.
1051. You have been present at the previous examinations? I have.
1052. Can you explain any of the cases that have been objected to? I would make a remark with reference to the case of Langton; Langton was asked to sign your requisition, which he did, but it was afterwards discovered that his name was not on the Electoral Roll, and his name was struck off the requisition.
1053. Then he had no vote? No.
1054. If it has been stated that he was an elector of Windsor that is not the fact? No; I knew him perfectly well. His wife had lived next door to me, and I knew his private circumstances long before the flood relief was contemplated. His wife came to me while the relief was being distributed, and asked for relief. I said, "I do not think, knowing what I do of your circumstances, that you have the slightest claim, and I could not justify it to my own conscience if I were to give you any relief at the expense of Government. It is of no use to bring any recommendation, for I shall not pay any attention to it. I know sufficient of your circumstances to feel it to be my duty to refuse you." She then acknowledged that she came very unwillingly, but that her husband had insisted upon it. She did not think they ought to have it.
1055. Do you know anything of his circumstances? I believe, for a labouring man, he is very well off.
1056. Do you know whether he was building? Yes, I know that of my own knowledge, from what I saw and from what he told me.
1057. What sort of house? A brick cottage, good enough for any working-man to live in.
1058. Can you refer to any other case that has been objected to? Yes, Michael Flood. I believe he was a sufferer by the flood; to the best of my belief he was flooded out and had to shift.
1059. He was living in the Town of Windsor? Yes.
1060. Then it is a fact that portions of the Town of Windsor were flooded? Some few.
1061. The flood comes into the town in some parts? In some parts to a small extent.
1062. Do you know whether Flood lost anything? To the best of my belief he did—he had to shift.
1063. Was he well off? I believe even before the flood he was very badly off—perhaps it was owing to his improper conduct; he was in a state of starvation; at least that was the common report; I do not vouch for its accuracy. The statement made by Mr. M'Quade is quite incorrect. He said, "Dr. Day and Mr. Ascough were always in communication with him." It is perfectly untrue; I never spoke more than a dozen words to the man in my life. He further said, "I saw them often speaking to Flood on that occasion." That is perfectly untrue; I never spoke more than a dozen words to Flood in my life, all put together.
1064. Can you explain any other cases? With regard to Johnston—I know Johnston very well as a man working in the town; they are drunken people, and have a large family, and when the flood came, and their supplies were stopped, they were likely to be destitute; their general character is not such as would be likely to enable them to get much credit. He told me he was getting billets from Mr. Moses, but that he had lost them all; that the flood had taken them all away, and that they were starving. He might have been receiving wages from Mr. Moses, but it was not within my knowledge. With regard to Ryall it has been stated that he received an annuity from Mr. Fitzgerald. That was unknown to me; I never heard of it before this affair happened, but it may be true.
1065. Was he apparently in needy circumstances? He appeared to me to be as needy as a man could be.
1066. Did he make any statement at the time, that the flood had injured any of his property? The impression left upon my mind was, that his crop had been swept away with the flood. In fact I did not know that he lived with Mr. Fitzgerald; and, before this flood, I was not conscious of his existence.
1067. Did you act upon any recommendation in his case? I never acted without a recommendation in any case. With regard to the "Bearers" some of the recommendations did not contain any name. As to Patrick Byrnes I believe they lost everything—bedding and everything. Many of these people who have received relief I have no knowledge of at all. With regard to persons who were contractors recommending parties for relief,—in every case where a contractor recommended a person for relief, I sent the applicant to some other contractor

- contractor to be supplied, except in the case of Hopkins, when I had no option, as for some days he was the only contractor who had any flour; but, whenever it was possible, I sent the applicant to some other contractor than the one recommending.
1068. Have you anything to say to the case of Mrs. Daley, where you gave a larger supply than Dr. Day had ordered? The woman came to me, and from what I could gather, she had said something to Dr. Day she should not; my impression was, that she had been rather rude, and I thought he had acted without a knowledge of the woman's real position. I knew where she lived, that she must have been flooded, and that she had a large family.
1069. You knew that of your own knowledge, did you? I did.
1070. Did you know that they were distressed for want of necessaries? From the facts within my knowledge I was quite justified in drawing such a conclusion.
1071. Can you notice any other cases that came within your own knowledge? There are none that occur to me particularly.
1072. The Windsor election was going on near about this time, was it not? It was.
1073. Did you take a part in that election? I did.
1074. Did Dr. Day take any active part in that election? I think not.
1075. Were you influenced in affording relief to any of the parties in any way, by the election? Never; I affirm most positively, not in the smallest degree. No person could possibly have been less influenced.
1076. In the cases of some electors of Windsor who were relieved, did they, in your opinion, merit relief? Most decidedly. With regard to Flood I may make this remark, if I am not irregular, that if it had been allowable to distribute relief with a view to the election, I should not have given any to Flood upon that principle.
1077. Do you know, from your knowledge of the election, what party Flood favoured most? No, I do not. He is a man upon whose promises I should not place the slightest reliance. I do not know which way he voted.
1078. Do you not know he was employed by Mr. Byrnes' Committee? I have heard so and believe it; he is one of those men likely to be employed by the Committee of one party, and to vote on the other side.
1079. It has been stated that you went with Mr. John Walker getting signatures for the requisition to me? I did ask some persons to sign it.
1080. Was that before or after the distribution of the relief? I am not very clear upon that point now.
1081. Was not the requisition signed long before the flood relief was administered? I could not positively say.
1082. It has been stated by one of the previous witnesses, that some of the persons you relieved you must have known were not sufferers by the flood—is that the fact? It is perfectly untrue.
1083. Flood's is one of those cases—you know that he suffered by the flood? To the best of my belief he did; he was obliged to go out of his house in consequence of the flood, and I think his wife came to me about it. A person named Woolley came to me, about whom so much has been said, and I gave him substantially the answer I gave to Langton's wife.
1084. You refused? Yes.
1085. If you had been actuated by political motives that was a case where this relief might have been used? Decidedly; I understood from himself that he voted for you, and I believed at the time he would vote for you.
1086. There is a good deal of personal and political feeling at Windsor sometimes? Decidedly so.
1087. Mr. M'Quade, who has given evidence before this Committee, has he any good feeling towards you? I do not know any person breathing with a worse feeling and more disposed to injure me.
1088. He has brought charges against you before this? He has.
1089. Was he ever obliged to apologize to you in writing? He was.
1090. Do you hold a written apology from Mr. M'Quade for bringing an accusation against you? Yes; this (*producing paper*) was written long after the letter he spoke of came into his possession.
1091. *By the Chairman*: It may have been upon another matter? He says in this apology—"I beg farther to state I am not aware of any improper conduct on your part."
1092. When was the letter written? There is no date.
1093. How long have you had the letter in your possession? I can go this far—that it was written long after the other letter came into his possession.
1094. What other letter? The letter to which he refers in his evidence. This is not a copy but the original, and is in Mr. M'Quade's handwriting, which I have no doubt can be proved by Dr. Day and Mr. Walker.
1095. How long have you held that apology? About four or five years.
1096. From whom did you receive it? I received it through Dr. Day.
1097. From whom? From John M'Quade—it is in his handwriting.
1098. Can you give us the date of the last flood? Some time in December; I could not give nearer than that.
1099. I believe you have stated that you canvassed for signatures to the requisition to Mr. Walker? I will say in a general way that I supported Mr. Walker.
1100. Did you not take a very active part in the election of Mr. Walker? Yes.
1101. Do you know who was the largest contractor for the supply of goods? No, I do not.
1102. Was not Mr. Hopkins of Windsor a contractor for a very large amount? I do not know whether their account was larger than any others; but there is this fact to be looked to, that he had flour when no one else had.

J. Ascough,
Esq.

16 Oct., 1861.

1135. No persons applied to you at the time of the relief being distributed for a certificate? No. Mr. R. W. Cobcroft.
1136. Do you know this George Bushell? Yes.
1137. Have you known him for some years? Yes, he has been a neighbour of mine from a child. 30 Oct., 1861.
1138. Had you any idea at the time you signed this certificate that he required it for the Magistrates in connection with this relief fund? No, I did not; it was only to save him from going to Sydney he said.
1139. Would you have signed this certificate to have enabled him to obtain relief from the Bench of Magistrates? No, I would not.
1140. Will you state why you would not? The man has freehold land, and has stock, horses, and cattle.
1141. Then, in your opinion, was he a fit person to receive relief? I should say not. *
1142. *By Mr. Walker (handing witness the certificate produced by Mr. Day):* Is that the certificate? Yes.
1143. Is that your signature? Yes, it has been dated since.
1144. It has been dated the 21st September? Yes.
1145. Is that about the date? On or about that time.
1146. Is this certificate that you have signed, true? It is true so far as that they lost their grain.
1147. Is this a false certificate that you have signed? I do not know that it is false.
1148. Then it is true? It is true respecting their losing their grain.
1149. Do you put your name to anything that is false? I should say not.
1150. This certificate says, "We, the undersigned inhabitants of Wilberforce testify that David, Alfred, and Paul Bushell, were great sufferers by the floods of last year, and that they lost all their crops; that they have to pay rent for the farms they occupy, and that they were in great distress, although at the death of old Mrs. Bushell they will have some land, at the present time they cannot dispose of the land, nor raise any money thereon. William Brown, *alias* William Bushell, also was in great distress; after selling his farm, ten pounds were all he had to receive after paying Mr. Rochester's mortgage. All have large families." There is nothing in that certificate about George Bushell is there? I do not know that there is,—there is about Alfred Bushell.
1151. Your evidence is about George Bushell? It was George Bushell brought it, and I saw his name on the list.
1152. This certificate has no reference to George Bushell? I did not say that it had; it is Alfred, David, and Paul Bushell.
1153. This is not in fact a recommendation for relief? No, and I never gave any; I certified that they had lost their crops.
1154. Did any person tell you that you had signed a recommendation for relief? I have been told so by many.
1155. Then it is not true? No, I am sure I never did sign one, and I would not have done it.
1156. That is merely a certificate to the effect that these persons were great sufferers by the flood, were in great distress, and had to pay rent? I do not say much about that.
1157. You say that when George Bushell brought you that, you think he said a lawyer sent it? Yes.
1158. You are not sure of that? Yes, he said that when I named that it was not dated, he said "I suppose the lawyer will do that."
1159. It is about the correct date? Yes, about that; I did not take particular notice of it, on account of its not being dated.
1160. Do you know Tristram Dunstan? Yes.
1161. Edward Robinson and William Dunstan? Yes.
1162. Dunstan is your own son-in-law? Yes.
1163. They are all respectable men? No doubt.
1164. Would you think recommendations for relief coming from such parties as these were entitled to consideration? I do not think any persons they recommended were entitled to relief.
1165. I ask you whether you think recommendations coming from such persons were entitled to consideration? They might be considered in which way people think proper, but I do not think there was a person entitled in the district.
1166. You think they recommended improper persons? I think the whole were wrongfully recommended; I believe there was only one person in the neighbourhood who deserved to get anything.
1167. That is your opinion? Yes. There is a man named Benjamin Gershon; he and his wife lost everything, and I believe they are the only two who could not have done well without it.
1168. You say George Bushell had a freehold? Yes, part of that farm belonged to him.
1169. When? I do not know when; I know his father willed it to him.
1170. That is a long time ago? No matter about that; he is there yet.
1171. Do you mean to say that he is a freeholder? Yes, and the whole of them are.
1173. He states that he is not a freeholder, and was not at that time? He was, because he had grain on the land at the time.
1174. Cannot a man have grain on land occupied by him, without being a freeholder? It was on this very land. Here is a party by the name of Sylvester Sillis; he has bought a piece of land since the flood, for £330; he has also built a house, and paid £120 for it. That man did not want relief.

- Mr. R. W. Cobcroft. 1175. You cannot state that the Magistrates knew his circumstances—that he was able to buy a farm? I should say they ought to know; Dr. Day knows everyone in that neighbourhood.
- 30 Oct., 1861. 1176. Do you know that Dr. Day gave him relief? I do not know who gave him relief.
1177. *By the Chairman*: Have you anything farther to add? There is another party, but he is dead since, Isaac Cook; he goes and gets a party to sign for him by the name of John Ryan; then his wife goes afterwards and gets Charles Gardner to sign for her; so that they draw relief, twice it appears. I see it on the list. There is another party here, but I did not see the man get it; that is a man by the name of William King; he lived in our neighbourhood; he left the district; he had a good team of horses, and used to go the road; he went away, and took everything away, as he went through Windsor; I am informed that he got this relief; he took it on his dray, and took it up the country for good.
1178. *By Mr. Walker*: You do not know that for a fact? I did not see him get it, but it is there on the list.
1179. That is, if he is the man? I know he is the man.
1180. *By the Chairman*: Is that all you have to state? Yes, I have plenty of other names, but it is hardly worth while.
1181. Now that this certificate has been introduced I see it does not contain the name of George Bushell? No.
1182. Do you consider that either David, Alfred, Paul, or William Bushell, were entitled to relief? No, they have all got land, and plenty of stock, horses, cattle, pigs, and everything else about them.
1183. *By Mr. Walker*: Is that not true which is certified by you, that they rent the land? I say they were not entitled to receive relief.
1184. Do they rent the land? I think some of them pay their mother rent, but it is very little she gets.
1185. They are very poor? Not very poor; one man has as fine an entire horse travelling about as there is in the country, and plenty of freehold land besides.

Mr. David Cobcroft again called in, and further examined:—

- Mr. David Cobcroft. 1186. *By the Chairman*: You have already been examined before this Committee? Yes.
- 30 Oct., 1861. 1187. A statement was made by Dr. Day to this Committee, that Justice Cary had said, in a case brought before him at the Windsor District Court, that you were not to be believed upon your oath—are you desirous of offering an explanation upon that statement? Yes, I am. It was in the case of the Queen v. Allen, for horse stealing. I stated that I met the Allens driving the horses upon the Windsor Road, at the bottom of McGrath's Hill, and I said, "Halloa, Allen, have you been docking those horses?" or something to that effect, and he said "No," and passed on. Because I swore to the horses—described the horses—(two of them each had a white face and two white feet, and were dock-tailed within six inches of the stump, and were then bleeding)—because I described these horses, and stated that when I said to the elder Allen, "Halloa, Allen, have you been docking those horses?" and * I said "No," instead of "Woh!"—Judge Cary said he would not believe me on my oath. There were two other gentlemen who were not subpoenaed, Mr. James Arnold and Mr. James Hall, on Cattai Creek, near the Hawkesbury River, who met these same parties driving the horses immediately after me—they were on the top of the hill as I was on the bottom—these were not called into Court, if they had been they would have corroborated my evidence. Mr. John B. Laverack also saw them, but he was not called.
1188. How would they have corroborated your evidence? They would have recognized the horses, and they were within (I think) hearing of my words. Mr. Roberts, the counsel for the defence, wanted to turn the word "No" into "Woh!" and because I swore to the best of my belief it was "No," Judge Cary said he would not believe my evidence. I could have got the whole of the district, with the exception of the Allens' friends, to have signed a memorial as to my character being unblemished in any way, and I intended to have had the matter brought before the Assembly, only Mr. Cunneen, Mr. Walker, Mr. Thomas Chaseling, and Mr. James Ascough, who was one of the committing Magistrates at the time, when we were assembled together in the Fitzroy Hotel, advised me not to interfere with the matter then, as Judge Cary had left the district. I took their advice, as the inhabitants believed what I said to be true.
1189. Is the Mr. Ascough you refer to, the Magistrate of Windsor? Yes.
1190. Has not Judge Cary said the same thing of other people? He said the same thing to Dr. Day, in the case of the Queen v. Fallon. I was in Court at the same time. After he had stated that, there was a petition to be got up, praying the Government to remove Dr. Day from the Bench, as they did not think it would be safe for any man who had a case to bring it before the Bench.
1191. Nothing was done with that petition? Nothing was done; it was not got up; it was about to be got up.
1192. *By Mr. Walker*: Did not Judge Cary make the remark you have stated, because you swore positively to the man saying "No"? To the best of my belief. I believe you were counsel for the defence likewise.
1193. Was it not because you swore positively, and did not swear to the best of your belief? No, I believe it was to the best of my belief that he said "No" instead of "Woh!"
- 1194.

Revised:—Because I swore to the best of my belief that he said "No," instead of "Woh!"

1194. When you gave evidence did you not swear positively to the fact that he said "No"? I do not remember that; but, if it is necessary,* I may have said I was positive; I was within two yards of Allen when he made the reply. Mr. David Cobcroft.
1195. When the Judge made this remark, was it when you were giving evidence? Just as I had finished—after I had given it. 30 Oct., 1861.
1196. When you were in the box? Yes.
1197. The time when he referred to Dr. Day was when he was summing up? Yes, when he was summing up.
1198. Can you remember what he said—his exact words—about Dr. Day? I think they were "Gentlemen of the Jury, as regards Dr. Day's evidence, you must totally disregard that altogether."
1199. Did he say why? Yes; merely for this reason—because Dr. Day swore† to a horse he had seen only once, some fourteen months before. He swore that was the horse offered for sale to him by Farlow, fourteen months ago.

William Walker, Esq., M.P. (a Member of the Committee), examined in his place:—

1200. *By the Chairman:* I believe you reside in Windsor? Yes. I wish to state a few facts, particularly with reference to the late Windsor election, as that has been referred to by some of the previous witnesses. I have gone carefully through the list of persons who were relieved at the last distribution of relief by the Bench of Magistrates at Windsor, and I find, that out of the 360 or 370 persons relieved there were 21 electors of Windsor. I, of course, took a very active part in the election, as I was one of the candidates, and knew pretty well how these persons were going to vote, and I think I saw most of them vote in the Court-house (the polling-place), and can speak particularly with reference to those who could not read and write. I find, that out of these 21, 11 supported me, and 10 Mr. Byrnes, the other candidate. Of the eleven who voted for me, four, namely, Stephen Donelly, Henry Featherstone, Thomas Kearnes, and John Forster, were recommended by strong political opponents of myself. Donelly was recommended by Edward Robinson; Featherstone, by Thomas Primrose; Thomas Kearnes, by J. F. Jones, a party who gave evidence here; and John Forster, by John M'Quade. I believe that all those parties among the electors who obtained relief were entitled to it, upon the principle that they suffered either directly or indirectly by the floods, and that they were in great distress at the time—temporary distress.
1201. *By Mr. Forster:* You state that of your own knowledge? Of my own knowledge of their circumstances—I know them all. The only one that I would have considered an improper person to receive relief was John Forster, and he was recommended by Mr. John M'Quade. That man is a freeholder, and well to do. Two others of this eleven were George Izzard and Dugald M'Kellar, and they were recommended by the Rev. Mr. Stiles, who supported neither candidate, and took no part in the election. Of the remaining five, George Bushell, who has been referred to, I believe to be a very poor man. Notwithstanding what has been stated by Mr. R. Cobcroft, he told me that he was no freeholder. I asked him lately if it was the fact that he was a freeholder, and he said it was entirely false, that he has no freehold, and did not have a freehold at the time of the flood. He may have some remote interest to come to him by-and-by, as stated in the certificate. His farm was flooded at Wilberforce, and he suffered severely by the flood ‡ Thomas Burgess, another of the persons objected to, is a very poor, old, feeble man, who had his whole garden flooded and destroyed, at the foot of M'Grath's Hill, near Windsor. Although some of these parties, at this time, were electors of Windsor—had their names on the electoral roll—they did not reside in the town. John Holden was a labourer, employed by the Road Trust. The roads were flooded, he was thrown out of employment, and in temporary distress. Joseph Jasper, another labourer employed by the Road Trust, in the same way, was thrown out of employment by the floods, and in temporary distress. Thomas Reedy, another very poor man, with a wife and large family; he was also thrown out of employment on the roads. These are the whole of them. John Horan, Robert Smith, and William White, stated by Mr. M'Quade and Mr. Cope to be electors, were not electors of Windsor at all; they were persons residing in the country parts, and had their lands all flooded. The man Michael Flood, who was referred to, certainly signed a requisition to me at the starting, but that was all he ever did for me: he opposed me all through the election, and was employed by Mr. Byrnes' Committee in various ways. Mr. Cope referred to the Rev. Mr. Adam and Mr. Fitzgerald having spoken disparagingly of the way in which the relief was distributed; I may state that since that assertion was made by Mr. Cope, I have spoken to both of those gentlemen, and they told me they considered this a most uncalled-for inquiry. I believe I am a pretty good judge of public opinion in the district, and I believe the general opinion is, that the Magistrates acted as well under the circumstances as they could have done; and that, with the exception of only a fraction of the community, the public are quite satisfied at Windsor with the mode in which the relief was distributed. Several parties spoke to me upon the subject of calling a public meeting to express indignation at this inquiry, but I used my influence to prevent it, as I thought it not right to interfere while the inquiry

* NOTE (on revision):—Take out "but if it is necessary."

† NOTE (on revision):—Positively.

‡ NOTE (on revision):—I have since seen the mother of these Bushells, and she informed me that her sons are all wretchedly poor; so much so, from losses by the floods, that they had been unable to pay their rents, and that they will have no land of their own until her death.—W. W.

W. Walker, Esq., M. P. inquiry was going on. I know that Mr. McQuade has a very strong animus against the Windsor Magistrates and myself; and Mr. Cope has also a strong animus against Dr. Day and myself; although he voted for me (as he said), it was, I believe, merely on account of my vote on the Land Bill. Mr. Laverack also has a strong animus against Mr. Ascough. Mr. Laverack is an auctioneer and commission agent in Windsor, and therefore has many opportunities of knowing the circumstances of the people, which the Magistrates cannot have. I believe Mr. David Cobercroft and Dr. Day have had a falling-out in professional matters. When this relief was being distributed I was repeatedly applied to by persons to recommend them, and I refrained from doing so, with the exception of two cases. In those cases the parties were living in the country, and were in no way connected with Windsor. One of these was a man named William Cupitt, who, I believe, got relief by mistake twice; partly, I believe, through my mistake in recommending him, not knowing that he had been previously relieved, and the Magistrate who granted the second relief not knowing that he or his wife had got it from another Magistrate previously. That is the man whose name appears as George Cupitt (the elder) on the list. George Cupitt (the elder) never received relief at all.

30 Oct. 1861

1202. *By the Chairman*: Do you know of your own knowledge that George Cupitt (the elder) never received relief? Yes; I have spoken to the parties on the subject; both Cupitts. William Cupitt admits that he got it twice over, and his name appears only once on the list. The other case is that of George Woods,—I was imposed upon in that case. If the thing were to be done over again, I would refuse to give the recommendations I did, but I was imposed upon, and I have no doubt the Magistrates were also imposed upon by the importunities of the parties. Wood's wife came to me crying, and saying she had a great number of children; I knew they were all flooded out, and she said she had no money, and could not get credit, as they had lost everything, having been flooded out by three successive floods. It escaped my recollection at the time, that the farm they lived upon was their own; if that had occurred to me I would not have given her a recommendation for relief.

1203. *By Mr. Leary*: Even if she had been in distress? I say if I had recollected that the farm had belonged to them—that it was their own freehold—I question if I would have given a recommendation for relief; for I take it *prima facie*, if a person has a freehold he is not in such bad circumstances as to need relief. It has been stated that Dr. Day took an active part in the election; he did not. Mr. Ascough did, but not Dr. Day.

1204. You stated that Mr. Cope and one or two other gentlemen, had an animus against Dr. Day and Mr. Ascough, or against one or both of them—do you mean by that remark to insinuate that these individuals you have referred to would tell an untruth under the influence of that feeling? I believe it would give a bias to their evidence.

1205. From your knowledge of Mr. Cope, for instance, do you believe because he was not on friendly terms with one of the Magistrates he would slander him? No, but I know Mr. Cope to be a bad-tempered man, and I believe he is a man of strong prejudices, and that in giving his evidence he would give it with an animus.

1206. He appeared to be very honest in giving a vote for you, though he did not like you? I do not think he would do it again.

1207. Perhaps that is the reason why you think him a man of strong prejudices? No, he voted for me, I believe, simply because of the vote I had given on the Land Bill.

1208. You believe he voted honestly? As far as that goes he may.

1209. Though he was not on friendly terms with you? We never had a word; we never quarrelled.

1210. He had a feeling against you, you think? Yes, I can ascertain that; because I have been employed professionally against him in some matter, he has been heard to express himself unfavorably towards me.

SEPARATE APPENDIX.

*Colonial Secretary's Office,
Sydney, 25 May, 1860.*

Gentlemen,

I am directed to acknowledge the receipt of your letter of the 5th instant, in which, referring to my communication of the 2nd of this month, on the subject of the recent calamitous floods in the District of Windsor, you suggest that relief should be afforded by the issue of seed wheat to such of these sufferers as are unable to procure it, to enable them to crop their ground again, and apply for authority to purchase a quantity not exceeding one thousand bushels for this purpose,—and to inform you, that your communication has been laid before the Governor General and the Executive Council.

2. On former occasions, when calamities of this nature have visited the agricultural districts, the Benches of Magistrates in the various localities have been authorized to afford temporary relief in the shape of food, clothing, or shelter, to such of the sufferers as have been destitute or in distress; a similar authority, which is still in force, has been given in the present case, and the Legislature has sanctioned the course adopted by the Government, by voting a sum of £3,000 to cover the expense of affording, as on previous occasions, temporary relief of this character.

3. The Government are painfully alive to the wide spread distress which has resulted from the late floods, and deeply sympathize with the sufferers; but they feel that under the circumstances they would scarcely be justified in departing from the course pursued hitherto in the like emergencies, and the expressed intention of the Legislature; and they regret, therefore, that they cannot comply with the application which has been made, that seed wheat may be provided for distribution, in the manner proposed, at the public expense.

I have, &c.,
W. ELYARD.

The Bench of Magistrates,
Windsor.

*Colonial Secretary's Office,
Sydney, 26 July, 1860.*

Gentlemen,

With reference to a letter of the 24th instant, received this morning from Mr. Day, stating that the District of Windsor has been again visited by another flood, I am directed to authorize you to afford such immediate temporary relief as may be absolutely necessary, to such persons as may be destitute or in distress from this cause, reporting as early as possible the steps taken by you in consequence of this letter, and any expenses incurred.

I have, &c.,
W. ELYARD.

The Bench of Magistrates,
Windsor.

*Colonial Secretary's Office,
Sydney, 27 November, 1860.*

Gentlemen,

In acknowledging the receipt of your letter of the 24th instant, stating that the District of Windsor has been again visited by another flood; I am directed by the Colonial Secretary to authorize you to afford such immediate temporary relief as may be absolutely necessary, to such persons as may be destitute or in distress from this cause, reporting as early as possible the steps taken by you in consequence of this letter, and any expense incurred.

I have, &c.,
W. ELYARD.

The Bench of Magistrates,
Windsor.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 35. FRIDAY, 1 NOVEMBER, 1861.

9. Presbyterian Church Temporalities Act of 1837 :—Dr. Lang moved, pursuant to notice,—
- (1.) That a Select Committee be “appointed to” ascertain the circumstances in which the Presbyterian Church Temporalities Act of this Colony was originally passed by the late Legislative Council, in the year 1837, and to suggest such measures as may be deemed expedient and necessary, in the way of legislation, to heal the divisions to which that Act has given rise among the Presbyterians of the Colony for upwards of twenty years past.
- (2.) That such Committee consist of the following Members, viz. :—Mr. Dickson, Mr. Hay, Mr. Holt, Mr. Sadleir, Mr. Smart, Mr. Wilson and the Mover.
- Debate ensued.
- Mr. Dalgleish moved, That the Question be amended in Section (1.) by the omission of all the words after the words “appointed to,” with a view to the insertion in their place of the words “investigate and report upon the origin and working of the “Presbyterian Church Temporalities Act of 1837.”
- Debate continued.
- Proposed Amendment by leave withdrawn.
- Mr. Redman then moved, That the Question be amended in Section (1.) by the omission of all the words after the words “appointed to,” with a view to the insertion in their place of the words “consider and report upon the expediency of amending or repealing the Act 8 William IV., No. 7.”
- Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.
- Question,—That the words proposed to be inserted in the place of the words omitted be there inserted,—put and passed.
- Whereupon, Question,—
- (1.) That a Select Committee be appointed to consider and report upon the expediency of amending or repealing the Act 8 William IV., No. 7.
- (2.) That such Committee consist of the following Members, viz. :—Mr. Dickson, Mr. Hay, Mr. Holt, Mr. Sadleir, Mr. Smart, Mr. Wilson, and the Mover,—put and passed.

VOTES No. 39. FRIDAY, 8 NOVEMBER, 1861.

2. Presbyterian Church Temporalities Act of 1837 :—Dr. Lang moved, without notice, that the Select Committee, appointed to consider and report upon the expediency of amending or repealing the Act 8 William IV., No. 7, have leave to send for persons and papers.
- Question put and passed.

VOTES No. 42. THURSDAY, 14 NOVEMBER, 1861.

1. * * * * *

Member of Legislative Council as Witness :—Mr. Wilson moved, That the following Message be carried to the Legislative Council :—

MR. PRESIDENT,

The Legislative Assembly having appointed a Select Committee “to consider “and report upon the expediency of amending or repealing the Act, 8 William IV., “No. 7,” and that Committee being desirous to examine the Honorable Samuel Deane Gordon, Esquire, Member of the Legislative Council, in reference thereto, requests that the Legislative Council will give leave to its said Member to attend accordingly, on such day and days as shall be arranged between him and the said Committee.

Legislative Assembly Chamber,
Sydney, 14 November, 1861.

Speaker.

Question put and passed.

* * * * *

9. Member of Legislative Council as Witness:—The Speaker reported that the following Message had been received from the Legislative Council:—

MR. SPEAKER,

In answer to the Message from the Legislative Assembly, dated the 14th instant, requesting leave for the Honorable Samuel Deane Gordon, a Member of the Legislative Council, to attend and be examined before a Select Committee of the Legislative Assembly appointed "to consider and report upon the expediency of amending or repealing the Act, 8 William IV., No. 7," the Council acquaints the Assembly that leave has been granted to its said Member to attend and be examined by the said Committee, if he think fit.

Legislative Council Chamber,
Sydney, 14 November, 1861.

W. C. WENTWORTH,
President.

VOTES No. 44. TUESDAY, 19 NOVEMBER, 1861.

9. Presbyterian Church Temporalities Act of 1837 :—Mr. Wilson moved, without notice, That the Select Committee appointed on 1st November, to consider and report upon the expediency of amending or repealing the Act 8 Will. 4, No. 7, be instructed also to consider and report upon the expediency of amending or repealing the Act 4 Vic., No. 18; and also that the Report of the Select Committee on the latter Act be referred to this Committee.
Question put and passed.

VOTES No. 73. WEDNESDAY, 8 JANUARY, 1862.

3. Presbyterian Church Temporalities Act of 1837 :—Mr. Wilson, as Chairman, brought up the Report from, and laid upon the Table the Proceedings of, and Minutes of Evidence taken before, the Select Committee to whom this subject was referred on the 1st November last.
Ordered to be printed.
-

1861-2.

PRESBYTERIAN CHURCH TEMPORALITIES ACT OF 1837.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 1st November last, “to consider and report upon the expediency of amending or repealing the Act 8 William IV, No. 7,” and instructed on the 19th of same month “also to consider and report upon the expediency of amending or repealing the Act 4 Vic., No. 18,” and to whom was referred “the Report of the Select Committee on the latter Act,”—“with power to send for persons and papers,”—have agreed to the following Report:—

Your Committee have examined, first the Rev. Dr. Lang, a Member of this Committee, to ascertain the circumstances in which the Presbyterian Church Temporalities Act of 1837—of which the Act of 1840 was merely an amendment—was originally passed by the Legislative Council of the period; and they have also examined, on behalf of the unendowed portions of the Presbyterian Communion of this Colony, the following witnesses, viz.:—The Rev. A. M'Ewen Sherriff, the Rev. Adam Thomson, and the Rev. T. A. Gordon, as also the Hon. S. D. Gordon, John Richardson, Esq., Rowan Ronald, Esq., and Mr. G. Brown; and on behalf of the Synod of Australia (the endowed portion of the Presbyterian Communion), they have examined the Rev. John Dougall, the Rev. William Purves, and the Rev. Dr. Fullerton, and John Alexander, Esq.

Your Committee would direct attention, in the outset, to the circumstances in which the Presbyterian Church Temporalities Act was originally passed, as disclosed in the evidence of the first of these witnesses. In the early part of the year 1836 there were only five Presbyterian Ministers in the Colony receiving support from the State—two of these Ministers were under charges of moral delinquency; and as the Presbyterian Church was, in these circumstances, incapable of efficient action, the Senior Minister asked and obtained leave of absence to proceed to England, to procure additional Ministers, to place the Church in future on a proper basis. The Secretary of State for the Colonies, and the Ecclesiastical Authorities of the Mother Country, approved of the course which the Senior Minister had thus taken, and not fewer than sixteen additional Ministers were sent out at his instance. During the absence, however, of the Senior Minister, one of the other Ministers, along with the two under charge of moral delinquency,

delinquency, applied to the Government of the day for an Act of the Legislative Council, professing to regulate the appointment of Trustees to Presbyterian Churches receiving support from the State, and binding the whole body hand and foot under a Parliamentary constitution. This measure was urged through the Legislature of the period with such haste, that although it was only introduced into the Council on the 30th of August, it was finally passed on the 9th of September, 1837; four of the additional Ministers who had been sent out from Home having actually reached the Colony, before the passing of the Act that was to bind their whole body for all future time; and the other twelve, not one of whom was permitted to have a voice in the matter, being close at hand.

The effect of this Act was to transform the Presbyterian Church into a totally different body from what it was before, to deprive it of its freedom of action, and to originate and perpetuate divisions which might otherwise have either never existed, or would have been easily and speedily healed. Three disruptions in this Colony, and three in Victoria, which, at the passing of the Act of 1837, was part and parcel of New South Wales, have been the result of the passing of this Act.

The Free Church of Scotland, which has upwards of 700 Ministers and a vast amount of property, has no such Act of Parliament as the Presbyterian Church Temporalities Acts of this Colony; neither has the United Presbyterian Church—a body of upwards of 500 Ministers; and the General Assembly of the Irish Presbyterian Church, although enjoying a *Regium Donum*, or *quasi* establishment from the State, exactly similar to that of the Synod of Australia, has no such enactment.

The whole of the witnesses on behalf of the unendowed portions of the Presbyterian Communion give it as their decided opinion, that no general union of the Presbyterians of this Colony can ever be effected, till the Presbyterian Church Temporalities Acts of 1837 and 1840 are repealed, as any amendment of these Acts would be unsatisfactory; and the whole of the witnesses on behalf of the Synod of Australia are equally decided in expressing their opinion, that no such repeal as is thus deemed indispensable can on their part be permitted.

Your Committee are therefore of opinion, that no general union of the Presbyterians of the Colony, so as to incorporate the Synod of Australia with the unendowed portion of the body, is at present practicable; but they have failed to discover any valid reason why the unendowed portions of the Presbyterian Communion should not unite forthwith and form one body.

J. BOWIE WILSON,
Chairman.

*Legislative Assembly Chamber,
Sydney, 8 January, 1862.*

MINUTES OF PROCEEDINGS.

FRIDAY, 8 NOVEMBER, 1861.

MEMBERS PRESENT:—

Dr. Lang, | Mr. Dickson.

In the absence of a Quorum of the Committee, the meeting, called this day, lapsed.

TUESDAY, 12 NOVEMBER, 1861.

MEMBERS PRESENT:—

Dr. Lang, | Mr. Smart,
Mr. Wilson.

J. B. Wilson, Esq., called to the Chair.

Resolution of the House, appointing the Committee, on the Table.

Copies of Act 8 William IV., No. 7, before the Committee.

Committee deliberated as to their course of procedure.

Ordered, That the Votes and Proceedings of the Legislative Council for 1837, be laid before the Committee at the next Meeting.

[Adjourned to Thursday next, at Eleven o'clock.]

THURSDAY, 14 NOVEMBER, 1861.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Dr. Lang, | Mr. Sadloir,
Mr. Holt, | Mr. Smart.

Votes and Proceedings of the Legislative Council for the year 1837 before the Committee.

The Rev. John Dunmore Lang, D.D., M.P., (a Member of the Committee,) examined in his place.

Resolved:—

1. That the Chairman move, in the House, that a Message be transmitted to the Legislative Council, requesting the attendance of Samuel Deane Gordon, Esquire.

2. That the Chairman also move, in the House, that the Committee be further instructed to consider and report upon the expediency of amending or repealing the Act 4 Vic., No. 18; and also, that the Report of the Select Committee on that Act be referred to this Committee.

[Adjourned to Wednesday next, at Eleven o'clock.]

WEDNESDAY, 20 NOVEMBER, 1861.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Dr. Lang, | Mr. Dickson,
Mr. Smart.

Committee deliberated upon the expediency of printing certain portions of the evidence given by Dr. Lang.

To be further considered.

Rev. Arthur McEwen Sherriff called in and examined.

Rev. Adam Thomson called in and examined.

Rev. Thomas Acheson Gordon called in and examined.

[Adjourned to Tuesday next, at Eleven o'clock.]

TUESDAY, 26 NOVEMBER, 1861.

MEMBER PRESENT:—

Mr. Wilson.

In the absence of a Quorum, the Meeting, convened for this day, lapsed.

WEDNESDAY,

WEDNESDAY, 4 DECEMBER, 1861.

MEMBERS PRESENT:—

Dr. Lang,		Mr. Smart,
Mr. Dickson,		Mr. Holt,
Mr. Hay,		Mr. Sadleir.

Committee met, pursuant to summons.

In the absence of the Chairman, Dr. Lang called to the Chair.

John Alexander, Esq., John Richardson, Esq., Rowan Ronald, Esq., J.P., and Mr. George Brown, severally examined.

The Honorable S. D. Gordon, Esq., M.L.C., attending by permission of the Legislative Council, examined.

Room cleared.

Committee deliberated, upon the expediency of printing certain extracts appearing in the Evidence given by Dr. Lang,—and

It was Resolved,—That the extract matter be expunged from the Evidence.

[Adjourned to Wednesday next, at *Eleven* o'clock.]

WEDNESDAY, 11 DECEMBER, 1861.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Mr. Dickson,		Mr. Holt,
Mr. Smart,		Mr. Sadleir,

Dr. Lang.

By direction of the Chairman, letter from Rev. T. A. Gordon (accompanying *M.S.* Evidence, returned after revision), requesting that certain portions of his Evidence be either struck out, or that he be re-examined before the Committee, thus suppressing the former examination altogether—read by the Clerk.

Ordered, That the Evidence, as taken, be printed, and a copy sent to Witness for further remarks, to be considered by the Committee.

The following Witnesses severally examined:—

Rev. James Fullerton, L.L.D.; Rev. Wm. Purves; and Rev. John Dougall.

Committee deliberated.

Ordered, That printed copies of Evidence be circulated prior to next meeting.

[Adjourned.]

• WEDNESDAY, 8 JANUARY, 1862.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Dr. Lang,		Mr. Sadleir.
-----------	--	--------------

Committee met pursuant to summons.

In accordance with the order of the Committee at last meeting, printed copy of his evidence, previously sent to Rev. T. A. Gordon, for revision; and the same returned in due form.

Chairman laid before the Committee Draft Report.

The same read.

Committee deliberated.

It was Resolved unanimously,—That the Report, as read, be the Report of the Committee.

Chairman requested to report to the House.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PRESBYTERIAN CHURCH TEMPORALITIES
ACT OF 1837.

THURSDAY, 14 NOVEMBER, 1861.

Present:—

MR. HOLT,		MR. SMART,
MR. SADLEIR,		MR. WILSON.

JOHN BOWIE WILSON, ESQ., IN THE CHAIR.

The Reverend John Dunmore Lang, D.D., a Member of the Committee, examined in his place:—

1. *By the Chairman:* I understand you are desirous of making to the Committee a statement of the circumstances under which the Presbyterian Church Temporalities Act of 1837 was passed? I am. Rev. J. D. Lang, D.D.
2. Do you object to that Act? Perhaps you might reserve these questions till after my statement. 14 Nov., 1861.
3. Will you be kind enough to proceed with it? I arrived in the Colony as a regularly ordained Minister of the Church of Scotland, to plant the Presbyterian Church in connection with that National Church in this Colony, in the month of May, 1823. Certain difficulties in the way obliged me to proceed to England in the year 1824, for the settlement of the Church. I returned early in 1826, having made arrangements for bringing out another minister—the late Reverend John McGarvie—who was settled first at Portland Head, and afterwards in Sydney. As the field was very extensive, and quite unoccupied beyond the two localities that were thus supplied, I found it necessary, for the promotion of religion and education in the Colony, in connection with the Presbyterian Church, to make several voyages to England, after the one I had originally made for the settlement of the Church, in 1824. These voyages were made—the first in 1830, the second in 1833, and the third in 1836. The reason for these repeated voyages Home was that the Church of Scotland was at that time entirely destitute of everything like a missionary spirit, and took no interest whatever in the Colonies of the Empire. This was unfortunately the fact; and I could not at this distance excite so much interest in my native land as to do the work that I had thus to go Home to accomplish, three times successively, making four times altogether in the course of the first fifteen years of my ministry. Unfortunately also, as the religious feeling was very low in the Mother Church at the time, that feeling extended itself to the licentiates who were likely to go forth to the Colonies; the greater number of those who did respond to my appeals being either persons of inferior standing in the Mother Country, or, as was the case in several instances, men of damaged reputation at Home. However, I took the best I could obtain, and found successively that those who were the least deserving had the best certificates. I brought out, in the year 1831, two additional ministers and three licentiates of the Church of Scotland, to be engaged in the business of education in connection with an institution then about to be formed, for which the Secretary of State at Home had given the promise of assistance from the Colonial funds. One of these ministers was appointed to the district of the Hunter, from which he was shortly thereafter removed to Bathurst, the other being stationed at Pitt Town and afterwards at Windsor. In 1834 I brought out other two

Rev. J. D.
Lang, D.D.

14 Nov., 1861.

ministers, one of whom was stationed at Maitland, and the other at Bathurst; as also two additional licentiates, who engaged in the business of education in the institution of which I have already spoken. From the circumstances, however, to which I have adverted, a whole series of cases of clerical delinquency occurred in rapid succession in the Colonial Presbyterian Church, in consequence of which the Church sank into a state of complete paralysis, and was utterly incapable either of purifying or of reviving itself, without the addition of a large quantity of fresh blood from the Mother Country. In these circumstances, I determined, at all hazards, with the advice of those friends on whom I could rely, to undertake another voyage to England, to obtain a supply of additional ministers, to occupy the extensive field which the Colony then presented. As a proof that, in taking this step, I enjoyed the countenance and support of a large portion of the Presbyterians of the Colony at the time, I beg to submit the following copy of an Address which was presented to me, in the prospect of my leaving the Colony for England, and which was signed by 167 heads of families, including the three elders of the Scots' Church, two Masters of Arts, Licentiates of the Church of Scotland, and a Captain in the Army:—

" COPY of a Testimonial addressed to the Rev. John Dunmore Lang, D.D., of date, Sydney,
" 14 April, 1836.

" We, the undersigned elders, members of the committee of management, and seat holders of the Scots' Church, Sydney, do hereby, in the warmest and most affectionate manner, beg to express our unqualified approbation of the anxious and unremitting exertions of our pastor, the Rev. John Dunmore Lang, D.D., as a Presbyterian minister, in preaching to us the Gospel of Our Lord and Saviour, Jesus Christ, and we earnestly entreat that he will accept these our sincere acknowledgments for his exertions, and our earnest desire for his continuance in well-doing.

" Here follow 167 signatures, chiefly heads of families, including two licentiates of the Church of Scotland, the Rev. Robert Wylde, A.M., and the Rev. David Mackenzie, A.M., and three elders (being the whole number) of the Scots' Church, Sydney."

My letter to Sir Richard Bourke, who was then Governor of the Colony, with the reply of the Colonial Secretary, I subjoin.

" Sydney, 29 April, 1836.

" Sir,

" It is with sentiments of the deepest regret that I feel myself called on to represent to your Excellency that the Presbyterian Church in these Colonies is at present in a state of unprejudiced and extreme depression, and that it is my deliberate opinion and conviction that if some vigorous effort is not immediately made for its revival, its speedy and entire extinction, in various important stations in both Colonies in which there is at present a fair prospect of its establishment and efficiency, will be the inevitable result.

" Your Excellency is well aware that, on my return to this Colony from England, in the year 1834, it was found necessary to take immediate steps for removing from the pastoral charge of a Presbyterian Church in the interior one of the ministers of the Church of Scotland in this Territory, who had unfortunately rendered his continuance in that capacity altogether impracticable, through his own moral delinquency; and your Excellency is also aware that, during my late visit to Van Diemen's Land, I was called on to take a prominent part in discharging the same melancholy duty towards the ablest and the most influential of the Presbyterian ministers in that island.

" Fondly imagining that these unhappy instances of the rigour of Presbyterian discipline towards clerical offenders would suffice, as well for maintaining the high character of the Church of Scotland, as for maintaining a high standard of clerical decorum among the members of that communion in these Colonies, your Excellency may conceive with what poignant regret I have felt myself called on during the last few weeks to prefer charges of moral delinquency, arising from the intemperate use of ardent spirits, against no fewer than two of the five Presbyterian ministers who are now stationed in this Territory; such, however, I regret to inform your Excellency, is the fact; and oppressed with the feeling of moral desolation which it necessarily occasions, and the prospect which it presents of absolute ruin to those important interests for which I have sacrificed all my property and repeatedly risked my life, and foregone everything in the shape of personal comfort for many years past, I beg to add that I see no other remedy for a state of things apparently so utterly hopeless, than my undertaking a fourth voyage to England, to procure an additional supply of Presbyterian ministers for both Colonies.

" That such a measure is absolutely necessary at the present moment for the preservation and revival of the Presbyterian Church in Van Diemen's Land, as well as in this Colony, I beg most respectfully to express my decided opinion, as I am confident from much experience of the past, that the requisite supply of ministers cannot otherwise be procured for a series of years; and that a service of such peculiar hardship should devolve upon myself individually, arises partly from the circumstance of my being the senior minister of the Church of Scotland in the Australian Colonies, and from the experience I have already acquired in services of a similar kind.

" Trusting, therefore, that your Excellency will consider this as a case of imperious necessity, I do myself the honor to solicit leave of absence for fifteen months or thereby, to proceed to England to procure Presbyterian ministers for the various stations in connection with the Church of Scotland that are now unoccupied in both Colonies, and thereby to secure such an accession of moral power and influence to the religious body to which I have the honor to belong, as will at least enable it to keep itself uncontaminated from the foul contagion of clerical delinquency—a task to which, I regret to inform your Excellency, it is at present unequal.

" At the same time, as I cannot but regard the case I have done myself the honor to submit to your Excellency as one of dire necessity, and especially as I had no salary from the Government when I first came to this Colony to promote the best interests of my Scottish countrymen throughout its Territory, I shall hold it my bounden duty as a minister of the Presbyterian Church, in the event of your Excellency's not feeling authorized to grant me leave of absence a second time, to make an unconditional surrender to your Excellency of my salary as minister of the Scots' Church, leaving your Excellency to allow me to resume it or not, as your Excellency may deem expedient, on my return to the Colony.

" I have, &c.,

" JOHN DUNMORE LANG.

" To His Excellency Sir Richard Bourke, K.C.B., &c."

" Colonial Secretary's Office,
" Sydney, 23 June, 1836.

" Reverend Sir,

" I am directed by the Governor to inform you, in reply to the letter which you addressed to His Excellency on the 29th of April, that in granting you leave of absence for fifteen months, for which you apply so urgently, Sir Richard Bourke thinks it right to repeat to you what has already been

"been made known to you through His Excellency's Private Secretary, that the Secretary of State for the Colonies has disapproved of such frequent absences from your clerical charge; and that the Governor cannot answer for your being allowed any part of your salary whilst you remain away. Upon this point you will have to take the commands of the Secretary of State in London.

"His Excellency will issue one half of your salary to the Presbyterian clergyman approved by the Kirk Session and confirmed by the Presbytery, who will be left to discharge your duty here.

"With respect to the object of your journey, I am directed to inform you that, as there is now a Presbytery established in the Colony, His Excellency conceives it will be for that body to recommend to the local Government for salary those Presbyterian ministers of whom the several congregations approve; and you are therefore to understand that, in giving you the leave of absence you solicit, this Government does not in any way authorize or sanction the introduction into the Colony of Presbyterian ministers of your selection, nor will that introduction give them any claim on the Government for employment of any kind.

"The Rev. J. D. Lang, D.D.

"I have, &c.,
"ALEX M'LEAY."

I accordingly proceeded to England in the month of July, 1836. During my stay there I was summoned, at the instance of the late Sir William Molesworth, to give evidence before the Transportation Committee of the House of Commons, of which Sir William was Chairman; and was examined at great length by that Committee for three days successively. In consequence of the evidence I gave before this Committee on the subject of transportation, which was then one of great interest in Parliament, I found my way very much cleared at Downing-street, and Sir George Grey, who was then Under Secretary of State for the Colonies and a Member of the Committee, took a great interest in the subjects I afterwards submitted to him, so that I obtained, with facility, the allowance that was then granted from the Land Fund of the Colony for all the Presbyterian ministers, as many as sixteen, that had been recommended at my instance for emigration to this Colony. Sir Richard Bourke's General Church Act having just been passed about the time I left the Colony, rendered the settlement of such ministers much more easy than it would have been before. Four of the ministers who were sent out in consequence of my voyage Home in 1836 arrived before myself in the following year, and twelve more accompanied me on my return. We arrived in Sydney on the 3rd of December, 1837; and it was in these circumstances—during my own absence, as the senior minister of the Church, and while other sixteen ministers were at the very door—four of them actually in the Colony—that the Presbyterian Church Temporalities Act of 1837 was passed, at the instance of only four ministers, of whom two were at the very time under charges for intemperance. As will be seen from the Votes and Proceedings of the Legislative Council of the period, the Bill for this Act was presented by the Governor to the Legislative Council on the 30th August, 1837, when it was read a first time; it was read a second time on the 5th September, and appointed to be considered in Committee on the 6th; and it was read a third time and passed on the 9th September, 1837. The Act professed to be merely intended to regulate the appointment of trustees to Presbyterian Churches, but that, I am confident, was a mere pretext. It was, in fact, an Act of Parliament giving a constitution to the Presbyterian Church for all time coming, passed at a time when four of the additional ministers had landed in the Colony, for they were here some time before myself, and when the other twelve were almost at the door. These then were the circumstances in which this Act was passed;—it was passed when the Presbyterian Church in the Colony had fallen into a complete state of abeyance, and when the Government were quite aware of the fact from my letter to Sir Richard Bourke. The authorities in Downing-street received my representations, and acted upon them to the fullest extent; but when I arrived in the Colony I found this Act of Council, which had been passed in post haste only a few weeks before, and in the extraordinary circumstances I have stated, for the government of our body in all time coming.

4. *By the Chairman:* Have you any objections to the provisions of the Act itself? I have very strong objections to the Act of 1837.

5. Will you be kind enough to state them to the Committee? In the first place the Act was passed when the Church was in a state of complete paralysis, through clerical delinquency; when it was unable to purify or to manage itself. In the second place it was passed when sixteen ministers, who had been appointed at Home, were close at hand; four of them having actually landed in the Colony before the Act was passed. All of these ministers had each an undoubted right to be consulted before any legislative enactment, binding their body for all future time, had been passed by the Legislature. The Legislature were not ignorant of the state of things in the Presbyterian Church when I left the Colony, or of my reason for doing so, and their concurring in such an Act was a monstrous proceeding, unprecedented in any country that I have ever heard of; besides, all I had done in the matter had been cordially approved of by the authorities at Home, as was evident from their sending out so many additional ministers at my instance. But I object to this Act, not so much from anything positively evil in it; for it is not necessary to make an Act of the Legislature unadvisable or bad that there should be something positively objectionable in it; if it is simply not necessary for the benefit of those for whom it is passed, it is an evil, as a restriction of the natural liberty of those concerned, and may be a great grievance, as the Act in question was in this case. I may state, for the information of the Committee, how the matter stands in other ecclesiastical bodies of the Presbyterian communion. The Free Church of Scotland has now seven hundred ministers, with a vast amount of property created within the last fifteen years; but it has no Act of Parliament, nor ever will have. It would not have anything of the sort. Such an Act would hamper its movements, and obstruct its progress to a certainty, although there was nothing positively objectionable on the face of it. The United Presbyterian Church of Scotland—a very large body of Presbyterians, having upwards of five hundred ministers—has no Act of Parliament; it is therefore free and unfettered, as the Presbyterian Church in this Colony was before I went Home in 1836. The English Presbyterian Church—scattered over the whole extent of England, for the benefit of the numerous Scotchmen residing in that country—has no Act of Parliament either,

and

Rev. J. D.
Lang. D.D.

14 Nov., 1861.

and is equally free and unfettered in its action. All these three ecclesiastical bodies, holding the standards of the Church of Scotland, but unconnected with the State, have no Acts of Parliament, and get no assistance from the State. But the Irish Presbyterian Church, having its principal stations in the province of Ulster, has, equally with the Synod of Australia in this Colony, a *quasi* establishment; it has what is called a *regium donum*, and has had it since the era of King William III, for about 170 years now. It has, exactly like the portion of the Presbyterian Church in connection with the Synod of Australia in this Colony, a *quasi* establishment, receiving support or endowment from the State; but it has no Act of Parliament—it is free and unfettered; and the consequence of such a state of things is that it has made frequent, extraordinary, and successful efforts for its self-purification and for its self-rectification, which would otherwise have been impracticable. For instance, about thirty years ago it was found that the Arian or Unitarian heresy had embedded itself among the Presbyterian Ministers of Ireland to a very considerable extent, and a great effort was accordingly made to purify the Church, and to maintain its adherence to the Westminster Confession of Faith and the other standards of the Presbyterian Church in England and Scotland. Those efforts, as I have stated, proved successful, although the body divided itself into two, and the Arian and Unitarian portion formed a separate communion. The majority remained true to the old standards; but the Arian portion continued to get their endowment from the State, as they had done for a long period before. The majority only wanted entire separation from them, that they might effect their own self-purification; and they did so effectually; for the state of that Church at the present moment, as compared with what it was thirty years ago, is wonderfully improved. The Arian or Unitarian portion receives endowment from the State just as they did before; but the separation was effected easily and peacefully, just because there is no Presbyterian Church Temporalities Act for Ireland as there is for Australia. There is nothing, at least there is very little, positively objectionable on the face of that Act itself; but its existence is a prodigious grievance. It has fettered and paralysed the Church from that day until this. It has caused three separate disruptions in this Colony and three in Port Phillip, which was an appendage of New South Wales at the time when that Act was passed.

6. Will you be kind enough to state to the Committee what would have been the result of your own movement, provided this Act had not been passed? On my return to the Colony in 1837, when I found that this Act had been passed, rendering the Church totally different from what it was before, I, in common with the majority of ministers who had come out with me, refused to enter the Presbytery at all, and formed an ecclesiastical body distinct from it, called the Synod of New South Wales; and there is no question that, if the Government had allowed the Presbyterian Church at that period the same freedom that has been allowed all along in Ireland, there would have been no permanent disruption—that the Church would very soon have purified itself. I ascribe all the evils of our condition for the last twenty-four years, both in New South Wales and Port Phillip, to the existence of that Act; and yet there is nothing, at least there is very little, on the face of it, positively objectionable.

7. Then, provided this Act had not been passed, all the Presbyterian Churches in this Colony would have been on the same footing as this Synod of New South Wales? As to Government support, do you mean?

8. No, as to their internal government? Yes. The majority would have followed the same course as the majority of the Presbyterian Church in Ireland, when it was broken asunder by the prevalence of the Arian or Unitarian heresy. The existence of that heresy in its midst led to the disruption of the body; but, as the Arian ministers had previously been in the receipt of salaries from the State, the other ministers who adhered to the old standards, did not interfere with them; they allowed the Government to do just as they pleased with them; only they were thenceforth separated from them entirely. And the result has been that the portion of the body retaining the old standards has progressed and prospered wonderfully during the last thirty years, while the other has been going down. And so it would have been here. The majority of the ministers who came out with me in 1837 would have pursued just such a course as the Irish Presbyterian Church has done, and would have left the mass of pollution that had got into the ministry—the drunken ministers and those who supported them—to do the best they could for themselves, and the Government could have given them such aid as it chose. But this Act interposed and rendered such an arrangement impracticable.

9. *By Mr. Sadleir*: Then I suppose you object principally to the seventh clause of this Act, providing for the vesting of the property of the Church in trustees? There was no necessity for the Act whatever. The numerous ministers that were sent out with the concurrence of the Secretary of State, and whose passage was paid from the Land Fund, had, every one of them, a right beforehand to give his opinion, first, on the question whether the Act was required at all—and on this point I am confident they never would have allowed any Act to be passed; and then whether this Act was a proper one, supposing it had been decided that there should be an Act.

10. *By Mr. Smart*: Do you think the Government, who have granted the land for churches and parsonages, and the salaries of the ministers, would have made those grants if this Act had not been passed. Might not this Act have been looked upon as supplementary to the General Church Act, so far as the Presbyterians were concerned? No, there was no necessity for the Act, because the Government could have continued, under the General Church Act, to grant salaries to Presbyterian ministers, as they do to Episcopalian clergymen or to Roman Catholic priests, wherever there was a congregation. The Government does not inquire what is the discipline of the body receiving support from the State. There is not a syllable in the General Church Act about any particular mode of Church Government. The object of the Government in that Act was to provide for the religious instruction

of

of the people generally; and if the Government had acted towards us as the Imperial Government does in Ireland, where there is no Act of Parliament to fetter the movements of the body, the result would have been the same.

11. In granting land for building churches, could the Government have recognized a body not provided for by Act of Parliament. The Act provides who the trustees shall be, and how they shall be elected? The General Church Act provides for that. The Roman Catholics have no Temporalities Act to this day. They were wiser in their generation.

12. *By Mr. Holt*: The Church of England has? The Church of England has; but the Church of England is under a very different system of government. The Bishop of the Church of England is like a Major-General in the army; he has all the rest of the clergy subject to his control; but in the Presbyterian Church it is quite different; our Ecclesiastical constitution may be called republican; and there is, therefore, a greater likelihood that an Act of Parliament will derange the free movement of the system.

13. *By Mr. Sadleir*: Have any other clergymen of your Church objected to this Act? Oh, yes. At present, as the Committee are, perhaps, aware, there is a movement for the union of all Presbyterian denominations in the Colony. The divisions that have arisen among our body have originated, as I have stated, in this Act; but the great cause of division at Home has been the connection with the State. That has given rise successively to disruptions and separations, from the State interfering with the freedom of action of the Church. That was the cause of the great disruption which originated the Free Church.

14. *By the Chairman*: And to previous disruptions also? Every one of them. I was present at the General Assembly of the Church of Scotland in May last, and there was a unanimous expression of desire that the Presbyterians of the Colonies should merge their differences, and unite in forming one general Presbyterian Church, unconnected ostensibly with any body at Home, but in friendly relation with all. I was also present in the General Assembly of the Free Church, held about the same time, and the same expressions were given utterance to there. And that is the desire of all the lay members of our communion, I believe, without exception; but the existence of such an Act as this prevents anything of the kind; there cannot be a union until this, and another Act that was based upon it, are repealed.

15. *By Mr. Sadleir*: Can you state in what way these differences arise from this Act? Yes; this Act gives a monopoly to certain ministers, on account of their connection with the Established Church of Scotland, to which connection the other portions of the Presbyterian body are strongly opposed; it gives them salaries also from the State, on the ground of that connection exclusively, which salaries are refused to others.

16. To those who do not hold, in fact, under this Act? Yes. Then there is a portion of our body who object to State support altogether; and I have, as a matter of expediency, done so myself for the last eighteen years.

17. *By Mr. Holt*: Do you think it is possible to amend this Act? I do not think it capable of any amendment. The only measure that would prove of a healing character, at present, is the repeal of all legislation relative to the Presbyterian Church, leaving it under the General Church Act, so long as any ministers of the body receive salaries from the Government at all, or so long as Parliament chooses to maintain them.

18. *By Mr. Sadleir*: You consider this Act to stand in the way of a general union of the Presbyterian Church? Decidedly.

19. It gives a monopoly to one section of the Church? Yes; and it binds that section to a body with which the others refuse to be connected.

20. *By the Chairman*: Have you anything farther to state to-day? Nothing farther.

WEDNESDAY, 20 NOVEMBER, 1861.

Present:—

MR. DICKSON, | DR. LANG,
MR. SMART.

JOHN BOWIE WILSON, ESQ., IN THE CHAIR.

The Reverend Arthur McEwen Sherriff called in and examined:—

21. *By the Chairman*: You are a Presbyterian Minister? Yes.

22. To what section of the Presbyterian Church in this Colony do you belong? To the Presbyterian Church of Eastern Australia.

23. That is the body which is generally called the Free Church? It is popularly called the Free Church, but that is not the right name.

24. Is there anything in the doctrine, discipline, or worship of the section of the Presbyterian Church to which you belong, different to that of any other section of the Presbyterian Church in the Colony? I do not think there is.

25. Is there anything in the state or circumstances of this Colony to prevent the different sections of the Presbyterian communion—agreeing as they do in doctrine, discipline, and worship—uniting together and forming one body? I think not.

26. Are you aware that there is an Act in force in this Colony commonly called the Presbyterian Church Temporalities Act? I am.

27. In your opinion does that Act form any barrier to the union of the various Presbyterian bodies in this Colony? I think it does.

Rev. J. D.
Lang, D.D.

14 Nov., 1861.

Rev. Arthur
McEwen
Sherriff.

20 Nov., 1861.

- Rev. Arthur
McLewen
Sheriff.
20 Nov., 1861.
28. Do you think that it acts as a complete barrier to their union? So long as it continues.
29. Then would you advise the repealing of that Act? I think it is absolutely necessary, if there is to be union among the various Presbyterian bodies here.
30. And you think union is very desirable? I think it is.
31. What effect do you think union would be likely to have upon the Presbyterian Churches—would it tend to increase their general usefulness? I think it would very much, especially in the country districts.
32. You say especially in the country—I suppose you mean that there being comparatively so few Presbyterians in the Colony—their being divided into so many different branches—tends, in a great measure, to curtail the usefulness of the clergymen of each in particular localities? Yes; sometimes there may be three Presbyterian ministers in a district where perhaps only one can be supported.
33. Supposing the obstacle presented by this Temporalities Act to be removed, do you think there is any probability of union taking place among the Presbyterians of the Colony? It would be more probable, at any rate.
34. There has been, among a large body of Presbyterians, a disposition evinced towards union? There has.
35. Are you aware of any other obstacle with the exception of this Act? Although the Temporalities Act were abolished, the Synod of Australia might still remain in connection with the Established Church of Scotland, and, of course, that would still be a barrier; but I think the Temporalities Act the greatest barrier, because it is very natural that the Synod should be afraid that if they leave the Established Church they may lose their temporalities, whereas if that Act were abolished they would not be under that fear.
36. Do you think that if the Presbyterians were united into one independent body there would be any probability of other denominations uniting with them, such as the Congregationalists? I scarcely think so.
37. Are you aware that an Act was passed in 1840 to amend the Temporalities Act? Yes, that is the Act making over the temporalities of the Presbytery of New South Wales to the Synod of Australia.
38. That Act does not alter the features of the case? No.
39. Consequently the remarks you have made with regard to the Act itself will equally well apply to the amended Act? I think so.
40. *By Mr. Dickson:* Did I understand you to say that the Act is a complete barrier to union? I think it is, so long as it continues.
41. If the Act were repealed do you think that all obstacles to union would be removed? Not all, because the Synod of Australia might remain in connection with the Established Church of Scotland, and that of course would be a barrier still. It is their connection with the Established Church of Scotland that is the great barrier.
42. *By the Chairman:* You state that the connection of the Synod of Australia with the Established Church of Scotland would form a barrier—is there any advantage further than temporal advantages derived by the Presbyterians in the Colony who are in connection with that Church from such connection? Of course, when they are connected with the Established Church of Scotland, they might go Home and get parochial charges, whereas if the connection came to an end the Established Church might disown them. There is the possibility at least of this.
43. Supposing the Presbyterians here to unite in one body, an ordained clergyman of the Church of Scotland who came out here and became a minister of this united body, need not absolutely sever all connection with the Church that licensed or ordained him? When he joins our Church he becomes amenable to our jurisdiction.
44. While here? While here, of course.
45. Do you not think the General Assembly of the Church of Scotland would very willingly give up their jurisdiction temporarily over a minister in such circumstances? I am not quite sure that they would. I do not think they are very favourable to union.
46. I have been informed that a decided opinion was expressed at the meeting of the General Assembly of the Church of Scotland, in favour of the desirability of union among the Presbyterians in the Colonies? I am aware that a decided opinion in its favour was expressed at the meeting of the General Assembly of the Free Church, but I am not aware that it was so at the General Assembly of the Established Church of Scotland.
47. You are not aware that it was not the case? I believe they did say something to this effect,—that the Church in connection with them in Victoria, had done nothing worthy of censure in uniting with the other Presbyterian bodies in that Colony, but I am not sure whether that was the decision of the General Assembly, or merely part of the report of the Colonial Committee, through its Convener.

The Reverend Adam Thomson called in and examined:—

- Rev. Adam
Thomson.
20 Nov., 1861.
48. *By the Chairman:* You are a Presbyterian Minister? I am.
49. To what section of the Australian Church do you belong? To the United Presbyterian Church.
50. You are aware that the Presbyterian body in this Colony is divided into various sections? I am.
51. Are you aware whether there is any difference among them in doctrine, discipline, or worship? There is no difference that I am aware of which should, in my opinion, keep them separate.
52. Is there anything in the state of circumstances in this Colony, seeing that these various bodies of Presbyterians agree in doctrine, discipline, and worship, to prevent their union?
The

The circumstance of the Synod of Australia being connected with the Established Church of Scotland is, of course, a hindrance in the way of its union with other bodies. So long as that connection continues, a union could not take place; the other Scotch Presbyterian bodies in the Colony having seceded, in their parent Churches, from the Established Church of Scotland.

Rev. Adam Thomson.

20 Nov., 1861.

53. You are aware of the Presbyterian Church Temporalities Act, passed in the year 1837? I have read that Act.

54. Does that form a barrier to union? I do not know that it creates a barrier, but it proceeds upon the fact which constitutes, in my view, the barrier, namely, the fact of the Synod of Australia being connected with the Church of Scotland, and subject to its jurisdiction.

55. Provided the Synod of Australia resigned its connection with the Established Church of Scotland, but this Church Temporalities Act still remained in force—do you think it would then form a barrier to the union of the different Presbyterian Churches here? I should think it would be necessary, in the event of the Synod of Australia disconnecting itself with the Church of Scotland, that legislation should follow, in order to secure to the congregations of the Synod their enjoyment in continuance of the property which they hold under that Act, as being in connection with the Church of Scotland, or which at least, they are recognized by the Act as holding in that connection. Their holding the property, I suppose, would be endangered while the Act continued in force, if their connection with the Established Church of Scotland should cease; and just as in that Act their present connection with the Church of Scotland is assumed and proceeded upon, so I think it would be necessary, if the tie were severed, that there should be some fresh legislation to recognize and proceed upon the severance of the tie, and to secure them in all their former rights.

56. Do you not think it would be an advantageous step in the first instance, to take away this Colonial obstacle, by repealing this Act? I do not feel quite competent to give an opinion on that matter. I am not aware whether it might not be better for the Synod of Australia, in the first place to give forth its own judgment as to the desirableness of the existing connection betwixt it and the Church of Scotland ceasing, before the Legislature should proceed to take action in that direction.

57. Do you think it is advisable for Parliament to legislate on these matters in general? I think it is very inadvisable.

58. Do you not think this Church Temporalities Act is an Act, if I may use the expression, of class legislation—legislating for one section of the Presbyterian Church, and not for another? Decidedly so, if it confers any peculiar privileges; and, so far as my own convictions go—and I may add the convictions of the great body of the United Presbyterian Church in Scotland, with which I am connected—legislation in any case for the endowment of any portion of the Christian Church is unscriptural and wrong.

59. Then, under those circumstances, you could not advise legislation even in this Colony on these subjects? Excepting for the purpose of doing away the legislation that already exists.

60. You would recommend an Act to repeal the Act which already exists? Quite so.*

61. Do you think any very great and beneficial results would arise from the union of the various Presbyterian bodies in this Colony? I think such results might be very confidently hoped for.

62. Do you think a union would increase the usefulness of individual clergymen throughout the Colony? I think so.

63. And thereby supply a great want that at present exists, in the interior, especially? Yes. In point of fact it is very undesirable that there should be separation where there are all the materials for union. Union, instead of the existing separation, might be expected to give strength to the Presbyterian cause; at present the strength of the Presbyterian body is very much frittered away and lost by division. In many districts two or three ministers are stationed where the labours of one minister might accomplish the same result. In the event of a union the funds of the Church would thus be very materially saved, and might be turned to account in the way of providing religious ordinances for districts where they are not provided at present. In addition to that, union would tend to promote what of course it would bespeak—greater charity and brotherly kindness on the part of Christian ministers and people of the different sections of the Church towards one another. In that way, by exhibiting one of the most important graces of Christianity; it might be expected to advance the cause of Christianity itself. Besides, when Christian love is called forth in any one direction, it is always more likely to be energetic in every other direction; and if once you had the different sections of the Presbyterian Church united in this Colony, you might expect them, under the influence of the same love which brought them together, to shew greater zeal, and put forth greater efforts for the advancement of the spiritual interests of the Colony.

64. Would not many of the advantages you have now stated be gained by the different sections of the Presbyterian Church to whom this Temporalities Act does not apply, if they were to unite, even though the Synod of Australia should keep aloof? To a certain extent, most undoubtedly, those advantages would be secured; but it is desirable, of course, that they should be secured on as wide a scale as possible. I may state that there might be a difficulty in the way of union between the Synod of Australia and other Presbyterian bodies, which does not exist in the way of the union of those other bodies with one another. The fact of the Synod of Australia receiving, and solely of Presbyterian bodies in New South Wales receiving State aid, might create a difficulty in the way of union betwixt it and the other

sections.

* On revision:—If, as I have said, it confers any peculiar privileges. I have been assuming, however, that this individual Act simply regulates, on principles common to all classes, the way in which a particular body shall hold the property belonging to it.

- Rev. Adam Thomson.
20 Nov., 1861.
- sections of the Presbyterian Church, although it seems to me that, under the influence of becoming Christian forbearance and Christian charity, even that difficulty might be got over, and a union be brought about to comprehend all the sections of the Presbyterian body.
65. *By Mr. Dickson*: How many sections is the Presbyterian body divided into in New South Wales? There is, first of all, the Synod of Australia; there is the Synod of Eastern Australia; there is the Synod of New South Wales; there is my own body, the United Presbyterian Church, which, I am sorry to say, is only represented at present by one congregation and one minister—although it is a very large and influential body in Scotland, and one of the three bodies there that may be said to divide the land amongst them; and there is a Church at Balmain, of which Mr. Gordon is minister, and which is not connected with any Presbytery or Synod in the Colony or at Home, but holding Presbyterian principles and likely to enter into a general union, could such be brought about.
66. Were any or all of those sections in existence when this Temporalities Act was passed? I believe there was only one Presbyterian body in existence at that time.
67. This Temporalities Act affects, of course, the property of the Presbyterian body which existed at that time? It attaches the property of the Synod of Australia to that body, as connected with the Church of Scotland, and in that way attaches it, in point of fact, to the Church of Scotland.
68. This body, in connection with the Church of Scotland, was the only body that then existed? The only one which existed at that time.
69. And there is still a body of Presbyterians here in connection with the Church of Scotland? Yes.
70. Do you think this Act ought to be repealed, without legislation for the disposal and protection of the temporalities of the Church? I think it would be quite necessary, if the Act were repealed, that there should be some provision made for securing to the Churches the property that at present belongs to them.
71. You think it would be necessary that some legislation should take place? That some legislation should take place for recognizing the new state of things, and continuing the property to the Churches to which it at present belongs.
72. I think I understood you to say there were other obstacles to the union of the Presbyterian bodies apart from this Act—State aid? State aid is another very serious hindrance; but one, in all the circumstances, which I think a little Christian charity and mutual forbearance might get over; for, first of all, matters might be so arranged as not to involve the compromise of individual convictions; and next, I think that if the different Presbyterian bodies in this Colony held a little more kindly intercourse, that individual section of Presbyterians which alone receives State aid, would come to find that it might dispense with it; and the issue would be a united Church, unconnected with the State, and doing much more energetically and effectively, by the Divine blessing, the great work of the Church, than can be expected in present circumstances.
73. *By Dr. Tang*: You have stated that, in the event of the Presbyterian Church Temporalities Act, and the amended Act of 1840, being repealed, you think it would be requisite to have further legislation, to preserve or regulate the property of the body holding under this Act? So it appears to me.
74. Are you aware that there is a previous Act to either of these, called the General Church Act of Sir Richard Bourke, passed in 1836, that regulates the property of the religious denominations receiving State aid, independently altogether of the particular communions to which the different Churches belong? I merely know that there is such an Act, but I am not acquainted with its details. It is quite possible it may be of such a nature as to make fresh legislation unnecessary, were the Acts of 1837 and 1840 repealed; but judging simply from these two latter Acts, which alone I have read, I should suppose that the property of one of the sections of the Presbyterian Church in this Colony might be endangered, were the connection to be severed betwixt that Church and the Established Church of Scotland, without some additional legislation to preserve the tenure of the property.
75. But supposing that the General Church Act of 1836 secures the property of any religious society or Church in the Colony, independently of the denomination to which it belongs, do you think that any special legislation would be requisite in such circumstances? In that case certainly not.

The Reverend Thomas Acheson Gordon called in and examined:—

- Rev. T. A. Gordon.
20 Nov., 1861.
76. *By the Chairman*: You are a Presbyterian Minister? Yes.
77. To what section of the Presbyterian Church in the Colony do you belong? My congregation is unconnected with any existing Presbyterian body.
78. Is there anything in your doctrine, discipline, or worship, different from that of other Presbyterian bodies? No, not in the least.
79. Are you aware whether any of the Presbyterian Churches in the Colony differs from the rest in doctrine, discipline, or worship? There is none that I am aware of.
80. Is there anything in the peculiar state of circumstances in this Colony which would prevent the different sections of Presbyterians uniting into one body? There is not, except it arises out of the Act now under consideration—the Church Temporalities Act.
81. There is nothing in their doctrine, discipline, or mode of worship, that would prevent them? Nothing, as far as I can see.
82. Do you think the Act passed in 1837, binding the Synod of Australia to the established Church of Scotland, is an obstacle to union? I should think it would be. At the same time

time, I must say that I have not had an opportunity of reading the Act, and therefore I can speak only from hearsay with respect to it; but if the Act be of such a nature as I have heard, I think it would operate to prevent a union.

83. Do you think that any Act that would have for its object the regulation of the temporal affairs of Presbyterian Churches and Chapels connected with the Church of Scotland in the Colony of New South Wales—which is the purport of this Act of 1837—would be an obstacle to the union of Presbyterians in the Colony generally? Yes, I think it would. For instance, my own congregation, I think, would be unwilling to unite on terms on which the property belonging to themselves would be vested in the Synod of Australia under this Act. I know that is the opinion of my own congregation on the matter, for we have within the last few weeks been getting our trust deed prepared; and it was affirmed that we must not at any time form a union with any body that would endanger our property and take it out of our own control.

84. Is there any other obstacle that stands in the way of the union of Presbyterian bodies in this Colony? I cannot see anything that should be an obstacle. The matter of State Aid I think could be arranged on the same principle as in Victoria and Canada; or the objection taken out of the way by the repeal of Sir Richard Bourke's Act, or that portion which relates to endowments.

85. Are you of opinion that the union of the various Presbyterian bodies in the Colony would be a very great advantage not only to Presbyterians but to the Colony generally? I think so. As far as the Presbyterian body are concerned, I do not see how they can do their portion of the Church's work without union.

86. You are of opinion that it would make the labour of individual clergymen much more efficient for good than at present, if such a union existed? Decidedly.

87. It would extend their sphere of action? Yes, it would act beneficially, as far as I can see, in every direction. A different spirit would be manifested towards one another from that which is evinced now that we are separated and splintered up into so many small sections, regarding one another with but a small measure of confidence, from not knowing one another; in fact we are not brought together.

88. There is not that brotherly love existing among you that ought to exist? No.

89. In short, I gather from your evidence that you are of opinion that it would be for the advantage of Presbyterianism in the Colony, if the Temporalities Act of 1837 and the Act of 1840 amending it were repealed? Yes, if that Act would endanger, in any measure, the property of the bodies who might unite with the Synod of Australia to form one Presbyterian Church, and I am led to believe it would.

90. *By Mr. Dickson:* You have not read these Acts? No; I have not had an opportunity since I received the summons to attend here. I have been so busily engaged that I could not get possession of a copy of the Act, and I expected to have been here in time to peruse it this morning before being examined.

91. Then of your own knowledge you know no reason why the Act should be repealed? It is my impression, from what I have heard on the subject, that it should be repealed, if its repeal would be no loss to the Synod of Australia, and that in such a case it would be generally beneficial.

92. Is it under this Act of 1837 and the Act of 1840 that the Synod of Australia hold their properties? I believe so.

93. Would you recommend the repeal of this Act without further legislation with reference to those properties? If the various Church properties are secured to the congregations holding them under the standards of the Presbyterian Church—secured by any previous legislation, then any legislation in the future would be unnecessary. That, however, is a legal question. I answer only on the supposition that it (that is, security) is provided for otherwise.

94. You are not aware that it is provided for? Only in so far as I was led to that inference by the questions put by Dr. Lang to Mr. Thomson.

95. *By Dr. Lang:* You are aware of the General Church Act, as it is called, passed under Sir Richard Bourke's administration, in 1836, distinct from the special Acts? I have heard of it, but never read it.

96. Supposing that Act to secure the property of any particular Church or Society to the body holding that property, do you think any other special legislation would be requisite? No; if it secures it to that body as a body holding the standards which the Presbyterian Churches have adopted, that is, the Confession of Faith, &c.; but without that security I think there should be some provision, as I have seen Church property slipping away to other bodies that have held doctrines the very opposite. If it be secured by Sir Richard Bourke's Act to congregations holding the Westminster Standards, I do not see that any further legislation would be necessary.

97. Is there no other way of securing Church property to the body originally in possession of it, but by an Act of Parliament? I think it might be done by individual trust deeds.

98. Are you aware whether the Presbyterian Church in Ireland has any Act of Parliament securing its property? No, it has not.

99. How is the property of that body secured? I have known two or three cases where there have been trust deeds securing the property to the congregation holding the Westminster standards, and that I think has been found effectual. I have known some instances where Church property was saved from lapsing into the hands of the remonstrant Synod, under those deeds.

100. Do you think, then, that the Law of the land provides a mode of securing Church property to the parties originally in possession of it, without any special Act of Parliament? Yes, if they had proper trust deeds I think it would.

- Rev. T. A. Gordon.
20 Nov., 1861.
101. Is there any Act of Parliament, do you know, securing the property of the Free Church in Scotland? I have never heard of it.
102. Is there any Act of Parliament securing the property of the Presbyterian Churches in England? No special Act that I have heard of.
103. It is merely done through the operation of the Law of the land? Yes.
104. Model trust deeds, securing the property to the proper parties? Yes, that is my impression. At least we feel perfectly secure that our own property, which is held under a deed of trust, is as safe from alienation as if it were protected by a special Act of Parliament.
105. You do not consider, then, that any other special legislation is necessary, to remove the existing obstacle to union, but the repeal of the existing Act? No, I do not know of any. I do not know whether all the congregations connected with the Synod of Australia hold under that Act—if all their property is vested under the Church Act or not; but if there be any case where the repeal of the Temporalities Act would leave the congregation's property unprotected, there should be some provision made for securing it. It might be done by a new trust in connection with a model trust deed for the whole body. I do not think there would be any danger to Church property by simply repealing the Act.

WEDNESDAY, 4 DECEMBER, 1861.

Present:—

MR. DICKSON,		MR. HOLT,
MR. HAY,		MR. SADDLEIR,
	MR. SMART.	

THE REVEREND JOHN DUNMORE LANG, D.D., IN THE CHAIR.

John Alexander, Esq., called in and examined:—

- J. Alexander, Esq.
4 Dec., 1861.
106. *By the Chairman:* Are you aware that there are two Acts commonly called the Presbyterian Church Temporalities Acts, affecting that Communion in this Colony? Yes; I am aware that there is an Act for the Presbytery and an Act for the Synod.
107. Has your attention been particularly directed to these Acts? Yes, I have read them both.
108. You are aware that the principle of them is, to connect the body they refer to with the Established Church of Scotland? Yes, I am aware of that.
109. It has been stated in evidence before the Committee that no union of the different sections of the Presbyterian Communion in this Colony is practicable unless these Acts are previously repealed? I am not of that opinion.
110. You think these Acts ought to be retained? I think they ought to be retained.
111. Not that any amendment should be made upon them? I cannot see how any amendment could be made upon them in the meantime.
112. *By Mr. Dickson:* Do you consider these Acts necessary to any section of the Presbyterian Church in this Colony? I think they are necessary. They were given to that portion of the Presbyterian Church in connection with the Church of Scotland, and I do not see how they can be taken from them without their consent. In answer to the question asked by Dr. Lang, I may say that I would have no objection, when a union took place, to bring all the Presbyterian bodies under the same management, but if you repeal the Act before union takes place it would be upsetting the Church property altogether.
113. Do you think these Acts stand in the way of union in any respect? I think not.
114. If these Acts were repealed, would it in any way affect the temporalities of any portion of the Presbyterian Church? If these Acts are repealed, to whom would the trustees be responsible? They would be responsible to nobody; they might do as they think proper. You cannot repeal these Acts until you are enabled to pass an Act to suit the circumstances of a united body, if that should take place, as I hope it will do.
115. You consider that some Act is absolutely necessary? Not until the union takes place; then perhaps it will be necessary to have an Act.
116. You think these Acts should not be repealed unless another Act is passed? No; because if they are repealed without another Act being passed, that would take away all responsibility from the trustees; they, or their descendants, might keep the property to their own families.
117. Do these Acts in any way stand as a hindrance to a union between any of the sections of the Presbyterian Church? I think not, so far as I am able to judge.
118. Could you state what has been the cause of disunion in the Church? Disunion has arisen from various causes. The last great disruption in Scotland occurred in 1843, when the body now called the Free Church separated from the Established Church, because the Crown exercised discipline over them in spiritual matters.
119. How could that relate to this Colony? It did not relate to this Colony at all. There should have been no disruption here at all. They ought to have formed themselves here into a distinct and independent Presbyterian Church, to act for themselves.
120. You say the trustees could still hold the property? They hold the property in trust for the body just now; but if you should do away with these Acts they would not be responsible to any person, which I think should be a great bar to their repeal in the present state

state of affairs. The arrangements to be made in the event of union should be the subject of J. Alexander, Esq. agreement between the bodies themselves; and the repeal of these Acts, if that should prove necessary, should be subsequent to that agreement.

121. *By Mr. Smart*: In the event of the House determining to repeal these Acts, do you think it likely that the different sections of the Scotch Church here would become united? I think not; the mere repealing of the Acts would not.

122. The repeal of these Acts would not facilitate the union at all? It would not facilitate union; it would do an injustice to one body of Presbyterians.

123. *By Mr. Holt*: Do you think these Acts have been the cause of any disunion in the Presbyterian body? No; I am not aware of their being the cause of any disunion.

124. In your opinion, has the Act of 1837 had anything to do with the disruption that has taken place? Not at all. The Presbyterian body here, after the disruption in Scotland in 1843, wished to retain fellowship with both sections of the Church at Home, both the Established and the Free Church, but they would not have that at Home, and the Church here had to choose to which of the two bodies it would belong, and then the separation took place.

125. In your opinion, has the passing of this Act caused any evil, of any nature or kind whatsoever, to the Presbyterian body? Not that I am aware of.

126. *By Mr. Sadleir*: I think the whole property of the Church of Scotland was vested in the Established Church by this Act? What was Church property then belonged to the Synod of Australia, in connection with the Established Church of Scotland.

127. The Free Church has no share of that property at all? No.

128. *By the Chairman*: Are you not aware that there is a General Church Act, regulating the appointment of trustees for all communions receiving aid from the State, independently of the particular Acts we have been referring to? I am not aware; I have not read the Act. At the time the Church of England Synods Bill was brought before the Council I read the Church of Scotland Temporalities Acts very carefully.

129. Was your attention not directed to a previous Act, passed in 1836, commonly called the General Church Act, or Sir Richard Bourke's Act? I am aware such an Act was passed, but I have paid no attention to it lately. The notice I got to attend here spoke of the Presbyterian Church Temporalities Act only.

130. You are not aware, then, of the effect that Act would have on the Church property? No; I could not say. I am ignorant of the wording of the Act, my attention not having been drawn to it.

John Richardson, Esq., called in and examined:

131. *By the Chairman*: You are aware of there being certain Acts called the Presbyterian Church Temporalities Acts of 1837 and 1840, passed by a former Legislative Council? I am.

132. Has your attention been directed to those Acts? I have paid some little attention to them, particularly to that of 1837.

133. Do you think that a union of the different sections of the Presbyterian body is practicable while these Acts remain unrepealed? I think not.

134. What is the reason? So long as the Synod of Australia is in connection with the Established Church at Home, a union, in my opinion, could not take place. I, as one, would object to being under the control of the Established Church of Scotland at Home; and I think so long as these Acts are in existence a union could not take place.

135. Do you see any other obstacle towards a union—any insurmountable obstacle? I think it is necessary to repeal the Act of 1837. I think the greatest obstacle is the fact of the Synod of Australia being in connection with the Church of Scotland. I do not see how it is possible that either the Free Church, or the United Presbyterian Church, to which I belong, could unite to be subject to the control of the Established Church at Home.

136. You are of opinion, then, that no union can take place till these Acts are repealed? That is my opinion.

137. *By Mr. Dickson*: Would you recommend the repeal of those Acts? I should recommend their repeal.

138. Do you think no other Act necessary, in the event of their being repealed, to enable that section of the Presbyterian Church which holds its property under that Act, to secure that property to its intended uses? I rather think it would. I am aware there are some who think it not necessary to pass any other Act, but I am inclined to think it would be necessary. I think it only right that those in connection with the Established Church should be secured in possession of the property they now possess; unless the Act to which Dr. Lang just now referred—the General Church Act—makes sufficient provision. If that Act would protect them, then I think it would not be necessary; but unless it did I think it only right an Act should be passed for the purpose. Unforeseen difficulties might arise if that were not done. With regard to the Church of Scotland, as I said before, I, as one, although I make these remarks, could not unite, so long as they are in connection with the Church of Scotland. I am one of those who say the State is not to define what is the right religion; I do not think the State is supposed to know much about it.

139. Are you of opinion that the repeal of this Act would facilitate the union of the various Presbyterian bodies? I think so.

140. *By Mr. Sadleir*: You seem to say the State should not define what religion consists in? I think it should not.

141. Does this Temporalities Act define what religion consists in? They take that for granted, I think.

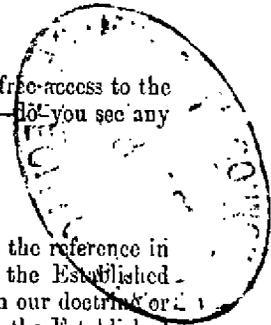

John Richardson, Esq.
4 Dec., 1861.

John
Richardson,
Esq.
4 Dec., 1861.

142. They take it for granted that there is religious union, but they do not care what it is? They take it for granted that they are right.
143. As far as I understand these Acts, they appear to be Temporalities Acts only? Just so.
144. You seem to say also that there can be no union here as long as the Synod of Australia is under the control of the Established Church at Home? I think not.
145. How do these Acts place them under the control of the Church at Home? The fact of their being in connection with the Church of Scotland was the cause of these Acts, if I understand aright.
146. I do not see that these Acts have much connection with the Established Church at Home, in point of religious matters; they merely relate to temporal matters? The established Church at Home of course recognizes them. There was no Free Church in existence when these Acts were passed—the disruption had not then taken place; nor was there any United Presbyterian Church then in this Colony.
147. You are clearly of opinion that these Acts stand in the way of union here? I think so.
148. In the estimation of a large portion of the Presbyterian body? I think so, inasmuch as they recognize the Established Church of Scotland, and I, as one, could not well submit to be under the control of that body. At the same time, I think if this Act of 1837 were done away with, it would be necessary to pass another Act to secure the property.
149. To what extent does the Church of Scotland exercise control over the Church here,—in point of discipline? In point of discipline.
150. Only? Yes.
151. Does the Church of Scotland exercise any control over the Temporalities? They have not declared themselves independent of them. If the Synod of Australia here were to disconnect themselves with the Established Church at Home, then I think I could conscientiously unite with them, but not till then. As I have said, I could not conscientiously, without making a considerable sacrifice, be subject to the control of the Established Church; I think these Acts stand in the way of union.
152. If I understood you, the control of the Church of Scotland at Home extends only to matters of discipline? I think they ought to be independent. In Victoria the majority of the Presbyterian Church have disconnected themselves with the Established Church at Home, and by that means they united.
153. Does a Temporalities Act similar to this extend to Melbourne? I am not aware.
154. *By the Chairman:* They were both passed before the separation? In that case of course it extended to them also.
155. *By Mr. Saddleir:* The Act did not prevent the union in Melbourne? No, but as I understood, the people in Melbourne ceased to be connected with the Church at Home; and had they not ceased to be connected with it, I do not suppose a union would ever have taken place.
156. *By Mr. Smart:* Have you any reason for believing that those who are in connection with the Established Church of Scotland would unite with the other Presbyterian bodies, in the event of these Acts being repealed? I think the same difficulties would not stand in the way, but that if they were repealed it would facilitate union.
157. Has there been any conference held between the different religious bodies, as to the repealing of these Acts? I am not aware that there has been any; but it has been mooted out of doors, both by laymen and ministers. A public meeting was held some time ago, at which Dr. Cairns, of Melbourne, was one of the speakers, in order to bring about a union.
158. Nothing was decided? Nothing was decided.
159. Have you any reason to believe that the lay members are anxious to unite, and would unite in the event of these Acts being repealed? I think they are; I think the laymen are a-head of the ministers in the matter—that the laymen are in general more anxious to unite than the ministers; and I think further, that unless the laymen agitate in the matter, we shall be as far from uniting as ever.
160. Do you think the repeal of these two Acts would facilitate union? I think so; to some extent it would.
161. *By Mr. Holt:* You say you have read this Act of 1837 carefully over? Yes, I have read it some short time since.
162. Are you prepared to point out what its chief defects are—the chief causes of evil under it? The chief evil is, as I have stated, in fact, the Synod of Australia being connected with the Church of Scotland by this Act.
163. But that could be amended by leaving out in two or three places the words “in connection with the Established Church of Scotland,” or “according to the usage of the Church of Scotland.” If those words were omitted there would then be no connection with the Church of Scotland;—would that be sufficient? I do not know whether it would. You see if they were amended, the question would arise whether they as a body would object to it. I expect they would not be favourable to the amendment.
164. You were speaking of repealing these Acts, and you said some Act would be necessary; what I wish to ask is, have you any other fault to find than the reference to the Established Church of Scotland? The chief fault I find is the body here being subject to the Established Church of Scotland.
165. I do not find a single clause which places them under its control—it is merely that the celebration of public worship shall be according to the usage of the Established Church of Scotland? The preamble of the Bill, I think, takes it for granted.
166. I wish to ascertain what your objections are in detail. Before the Committee can recommend the repeal of the Act, it is necessary that they should assign some reasons; and, as you appear to have such strong objections to this Act, I wish you to point out to the Committee what those objections are? As I said before, the fact of the Synod of Australia being

- being connected with the Church of Scotland at Home would prevent me from joining under it.
167. Nothing in this Act places it under the Church of Scotland; it merely states that the celebration of public worship shall be according to the usage of the Established Church of Scotland. If those words were left out, the Presbytery would cease to be connected with the Church of Scotland? If they were not connected, then of course the barrier would be removed.
168. Do you think the omission of these words would be quite sufficient to amend this Act? I object to name the Established Church of Scotland at all.
169. That is the purport of my question. There would be nothing to connect it with the Established Church of Scotland, if these words were omitted in three or four places? If there were nothing to connect it, then of course my objection would be removed. I do not know that that affects the question very much. No doubt the preamble assumes that the Church of Scotland here is in connection with the Church of Scotland at Home.
170. It is merely that the form of worship shall be according to the use of the Established Church of Scotland. Were those words omitted you see no other objection to the temporalities part of the Act? I do not see any other objection. I have already stated that, in the event of these Bills being repealed, it would be necessary to pass another Act, unless that passed in 1836 would suffice to place them in possession of the same privileges.
171. It is very desirable that the Committee should be in a position to recommend something definite to the House, and therefore I will just go through the Act, and ask your objections on each clause. Do you object to the clause with respect to the mode of appointment of trustees? No; I do not know that there is any objection to that.
172. Do you object to the second clause, empowering ministers *ex officio* to attend meetings of trustees? No.
173. The third clause, that every trustee shall be a member of the congregation—do you object to that? No.
174. The fourth clause—any trustee being absent from the Colony for six months to be disqualified—do you see any objection to that? I think six months too short a period—perhaps two years would be better.
175. Do you object to the fifth clause? No.
176. Do you object to the sixth clause, providing that, in case of any trustee dying, the surviving trustees shall, in two months, give public notice of a meeting for filling the vacancy, the Presbytery to nominate and send the name for approval to the Governor and Executive Council? That goes on the assumption of their having property and land from the State; the body to which I belong object to taking money from the State on any conditions.
177. You object to the Governor and Executive Council being consulted? I object to State interference at all.
178. Do you see any objection to the seventh clause? No.
179. Or the eighth clause? No.
180. The ninth clause, providing that the recognized minister may have free access to the church or chapel and burying-ground, without hindrance from the trustees—do you see any objection to that? No.
181. The tenth clause—do you see any objection to that? No.
182. The eleventh? No.
183. Do you see any objection to the twelfth? No.
184. Then your only objection to this Act, if I understand you rightly, is the reference in the first clause to the celebration of public worship according to the use of the Established Church of Scotland? You must understand me—there is no difference in our doctrine or form of worship; but so long as the Synod of Australia is in connection with the Established Church of Scotland, which I think it is to some extent, I could not conscientiously join with them to be subject to the control of the Church of Scotland.
185. The Act does not make you subject to it? The Act, all through, assumes the connection. I cannot give you any other reasons than I have done.
186. *By Mr. Sadleir*: You think the Act might be amended without being repealed? It might be amended so as to remove my objections, and, at the same time, to protect the property of the Synod of Australia, and maintain them in the possession of the privileges they now possess.
187. *By Mr. Holt*: Do you think any Act should be adopted which would leave the Presbyterian Churches in this Colony at full liberty to adopt any other form of doctrine they might think proper? Decidedly not.
188. Do you think some form of doctrine should be stated that Presbyterians recognize? So long as they adhere to the Westminster Confession of Faith I should be satisfied.
189. You would substitute, in any new Act, the words, "according to the Westminster Confession of Faith" instead of "according to the use of the Established Church of Scotland"? I think the Westminster standards would be better. Those are the words, I think, they made use of in Melbourne when they united.
190. If I understand you rightly, having gone through the whole of the clauses, you see nothing else that is very objectionable in the Act? I do not see anything particularly objectionable. As I have stated, I would be willing enough to unite so long as we were not subject to the control of the Church of Scotland at Home; I would allow the ministers of that body, for example, to take State Aid; I believe they take it as conscientiously as I would refuse to take it. The only barrier that I can see is, their being subject, as I fancy they are, to the control of the Church of Scotland.
191. But the Act does not subject them to the Church of Scotland, and therefore, repealing it will not affect the matter? If it can be proved satisfactorily that the Act does not do it, then the objection would be removed.

John
Richardson,
Esq.
4 Dec., 1861.

Rowand Ronald, Esq., called in and examined :—

R. Ronald,
Esq.

4 Dec., 1861.

192. *By the Chairman* : Has your attention been directed to the Presbyterian Church Temporalities Act ? It has.

193. It has been stated in evidence to this Committee, that this Act would form an obstacle to a union of the different portions of the Presbyterian Church in this Colony—is that your opinion ? It is.

194. On what grounds ? From my reading and interpretation of the Acts alluded to, I apprehend that they refer to one body and no other, that body the Established Church of Scotland, or rather that portion of it in this Colony connected with the State.

195. Do you think the existence of these Acts would be a bar to any union of the different sections of the Presbyterian Church in the Colony ? I do.

196. Do you know of any other obstacle to a union ? Well, with reference to this Act, one of my principal reasons is, that I hold that this Act merely provides for the Church of the minority of Presbyterians in the Colony—that by this Act the majority has to give way to the minority. I do not believe that the adherents of the Established Church of Scotland in the Colony are by any means in the majority.

197. Do you think, then, that a repeal of these Acts is absolutely necessary before any union can take place ? I think either a repeal or such an amendment as would adopt the Act to the body of Presbyterians generally ; and in such repeal or amendment, I certainly think that a provision should be made for securing the property of the various Presbyterian bodies who may wish to unite in one grand body, for the purposes for which it was originally intended.

198. Has your attention been directed to what is commonly called the General Church Act, or Sir Richard Bourke's Act of 1836 ? Not particularly.

199. You cannot state, then, whether that Act would provide for the security of Church property or not ? I could not.

200. *By Mr. Sadleir* : You do not think a repeal of the Act essential ; but that it might be amended ? Had I anything to do with it, I would have such an amendment of it as would be tantamount to a repeal.

201. You do not think striking out certain passages or words would be sufficient, such as "the Presbyterian Church connected with the Church of Scotland" ? That is the first thing I should strike out, certainly.

202. Then you think the amendments would be so numerous in this Act, that it would be almost better repealed ? I think we should not know the Act again.

203. You think a new Act essentially necessary to secure the property of the whole body ? I think it essentially necessary to a union of the various Presbyterian bodies.

204. *By Mr. Holt* : Will you be good enough to point out what alterations you would suggest—you have read the Act carefully, I presume ? I have read it. I would strike out, for example, "in connection with the Church of Scotland," throughout. That is the main thing ; I take it, it is the thing itself.

205. What else—would you leave the Church any established form of worship or state any standard of faith ? I would state a standard of faith.

206. What would you state ? I would take the Westminster Standards, at the same time without the interference of the Civil Magistrate in matters ecclesiastical.

207. But the Civil Magistrate is not mentioned in this Act ? There is something mentioned in the Confession of Faith about him. I am alluding to the Confession of Faith. The interference of the Civil Magistrate was the cause of all the disturbance in Scotland.

208. That was merely with regard to the temporalities ? A great deal more than that. It was the interference principally of the Civil Magistrate in matters with which he had nothing to do, in my opinion—the Church Courts. I would adopt as a standard the Westminster Standards, excluding the Civil Magistrate.

209. No power whatever is given to the Civil Magistrate in this Act ? Yes, there is ; "in connection with the Church of Scotland"—that implies it. This Act has been passed for one body at a time when the other bodies were not in existence.

210. Will you be kind enough to refer to the Act—begin at the beginning ? The title ?

211. There is nothing binding in that ? Well, in the body. "Before any sum or sums of money shall be issued from the Colonial Treasury"—that is objectionable ; and also the words "connected with the Church of Scotland." At that time, no doubt, this was put in referring to other Presbyterian bodies who were in existence in Scotland, but not in the Colony—Presbyterian Dissenters, Seceders, Relief, Burghers, and so forth. These were the various bodies in Scotland at the time.

212. Would it not meet your objection if the words "connected with" were omitted, and "of" the Church of Scotland substituted ? No.

213. You would leave out the Church of Scotland entirely ? Yes.

214. You would say merely the Presbyterian Church ? Holding the Westminster Standards.

215. What is the next objection—I suppose you would omit the celebration of public worship "according to the use of the Church of Scotland," and substitute the words "according to the Westminster Confession of Faith" ? No ; the form of worship is a different thing altogether. I think it is right enough there.

216. Do you object to the mode of appointing trustees ? No.

217. Do you object to the second clause ? Before I go any further I beg you to distinctly understand that I object to this Act altogether ; I could not entertain this Act, not one portion of it, as it is. The election of trustees is by a very fair method, and might do as well for a Temperance Hall or a School of Arts ; but I do not think there ought to be any Act in the matter.

218. I wish to know what amendments you would suggest—take the second clause ? I think that is only fair.

219. The third clause—do you see any objections to that? There are too many “ors” in it for my taste. Instead of “a member of the congregation or a communicant” I should say “Church member or communicant.” R. Ronald,
Esq.
220. I think it is scarcely necessary for the Committee to go into such minor details? A 4 Dec., 1861.
221. The fourth clause—do you see any objection to that? I think the time ought to be extended, say to two years.
222. What is your opinion respecting the fifth clause? I do not see any objection to that; I think the whole body should elect.
223. The sixth clause—do you object to the Governor and Executive Council having anything to do with it? Yes.
224. The seventh clause? No objection to that.
225. The eighth clause? I do not hold with that at all. The pew rents, and everything of that sort, should be in the hands of the Deacons Court, or the Church Committee.
226. The ninth clause—have you any objection to that? None.
227. The tenth clause, respecting the leasing of glebe lands? That also should be in the hands of the Deacons Court. All temporal affairs of the Church, according to our mode of procedure, should be vested in the Deacons Court, or in a Committee of management.
228. The eleventh clause? The whole thing should be in the hands of the Deacons Court, that Court elected by the Church members.
229. The twelfth clause—do you approve of that? Yes, certainly they should furnish annual accounts to the proper parties, that is, the Deacons Court.
230. Then, in all these clauses, you would substitute the Deacons Court for the trustees? Yes.
231. What power would you leave to the trustees? They are responsible to the main body, by whom the Deacons Court are elected.
232. By the alterations you suggest, the whole power would be surrendered to the Deacons Court? Not the whole power. You may have trustees, as here stated; but of course the Government has nothing to do with it. I take it we cannot do better than follow the ecclesiastical rules of Presbyterians, and there you have the whole matter—ministers, elders, and deacons—all the temporalities men in their proper places.
233. We have gone through this Act, and it seems you approve a great deal of it? I take the foundation from it.
234. In repealing this Act would you substitute any other? You take me by surprise, because I did not come here to offer an opinion as to any other Act.
235. I merely wish to ascertain what further legislation is necessary if you repeal this Act? I do not see that I can say what is necessary, because I repudiate State Aid altogether.
236. If this Act were repealed would any inconvenience arise? I think not; I think it would be a boon to the country—to our portion of the community, Presbyterians generally. I object to it in every shape and way.

Mr. George Brown called in and examined:—

237. *By the Chairman:* Has your attention been directed to the Presbyterian Church Temporalities Acts of this Colony—the Acts passed in 1837 and 1840? Yes. Mr. G. Brown.
238. It has been stated in evidence before this Committee that the existence of these Acts would be a bar to the union of the different portions of the Presbyterian Communion in the Colony; is that your opinion? It is decidedly. A 4 Dec., 1861.
239. On what grounds do you think so? I do not think that any legislation at all is wanted in the matter. I believe that the Church is able to govern itself, without the interference of the civil power at all; and I think these Acts will be a bar to any union until they are entirely expunged from the Statute book.
240. You would not recommend any amendment of these Acts? None whatever.
241. You object to civil legislation in the matter altogether? Altogether, in ecclesiastical matters, whether spiritual or temporal.
242. You conceive, then, that the existence of these Acts is an obstacle to any union in this Colony? Decidedly.
243. Is there any other obstacle to union, do you conceive? I am of opinion that the Church, or that portion of it which is connected with the State, would be an obstacle in the way of union with those who are opposed to the principle of State connection.
244. *By Mr. Sadler:* Pray to what Presbyterian body are you attached? At present I am attached to the Presbyterian body on Church Hill, of which the Reverend Dr. Lang is senior pastor; but previous to coming to this country I belonged to what was called the Relief Church in Scotland.
245. You think that so long as any portion of the Presbyterian body is attached to the State there cannot well be union? No, I think there can be no cordial, satisfactory, or permanent union, so long as that exists.
246. *By Mr. Holt:* Do you think it a greater evil to legislate for a Church than to appeal to the judicial tribunals of the country? I think it is.
247. Do you not think it is possible for the Legislature to prevent litigation? No.
248. Take the election of trustees; here is a clause to the effect that there shall not be less than three nor more than five—Supposing a majority of the members took it into their heads only to have one trustee, and another portion were determined that there should be three, what would be the result if there were no Act? The majority would rule, unless there was some deed by which the property was held, which might be done without any Act—

Mr. G. Brown. Act—a model deed, or deed of trust. If the property were granted from the State, or purchased in the ordinary way, of course it would be necessary that some model deed or deed of trust should be in existence, and then if that was drawn in accordance with certain principles, if the majority deviated from these principles they could not hold the property.

4 Dec., 1861.

249. Do you not think that, in the absence of such a deed, the Legislature should try to prevent litigation? I think not. It might possibly stop litigation, but it could not stop dissatisfaction in the Church.

250. But legislation binds the minority to submit to the majority? No, it does not bind them to submit; they can withdraw. I believe any body of men who meet for any specific purpose whatever, no matter whether religious or otherwise, are certainly able to fix upon some general rules by which they should be guided.

251. Do you not think it would be first desirable to establish the rules by which they shall be bound, before altering or repealing those rules already in existence by legislation? I have already given my opinion that no union can take place while this Act stands.

252. Would you be kind enough to state some reasons in detail—is your objection, or is it not, to the mode of election of trustees? I think in carrying out the details there are some things in this Act which might very well be carried out under any system whatever.

253. Under a model deed? Under a model deed.

254. Before this Act is repealed do you think it desirable that a model deed should be adopted by each Church, to prevent confusion? If the property now held by that portion of the Presbyterian Church in connection with the Church of Scotland were to be made over by the Government to that body, or to Presbyterians generally, then it would be necessary that some model deed or deed of trust should be drawn out; but if the property were to be taken by the Government from the Church that now holds it, and from Presbyterians generally, it would be for them to draw up such a model deed or deed of trust themselves.

255. I have never heard the idea suggested that the Government should deprive the Presbyterian body of their property—nothing further than State Aid? I am not saying they will; I do not anticipate that they will; at the same time it is possible that they might do so.

256. What would be the state of the Churches if this Act were repealed? It would be necessary that some model deed or deed of trust should be fixed upon.

257. Do you think it necessary that such a model deed should be framed, signed, and sealed, in the first instance, before this Act is repealed? Yes.

258. You think it undesirable to repeal this Act until some preparation has been made? For securing the present property.

259. And also regulating the affairs of the Church? No, not regulating the affairs of the Church.

260. I merely mean the temporalities? I mean just for securing the present goods and chattels of the Church.

261. This Act goes no further than that? That is my great difficulty. You see, I, as a Presbyterian, cannot recognize any interference of the State with the Church at all, and therefore I see a difficulty in respect of the conveyance of the property which is now held by the State Church, or by the Presbyterian Church in connection with the Church of Scotland; I see a difficulty which would not exist had they no property already. Were there no property already in possession of the Church, over which the Government had any control, then it would not be necessary that any model deed or deed of trust should be drawn up.

262. To prevent litigation amongst yourselves, I wish to know how you would manage the affairs of the Church among yourselves if there was no law to regulate you? We would draw up a model deed, or deed of trust, subject to the laws of the country, without getting any specific Act passed for ourselves.

263. Do you think that is the opinion of Presbyterians generally, that it would be preferable to have a model deed for the whole of the Churches rather than have any legislation? Yes.

264. What is the ground of objection to the State legislating? Because I think it is not in accordance with the Scriptures; I object to the interference of the State in religious matters.

265. What I wish to ascertain is, in what way it would be to the advantage of the Presbyterian Church if this Act was repealed? It would leave us to do as we thought proper, without the interference of the State at all.

266. I wish to know what you have to object to? The great evil in the Church of Scotland has been because the State has had to do with the property.

267. That is, with reference to advowsons or gifts of livings? Yes.

268. Here you elect your own trustees and administer your own affairs? Yes, but then they are in connection with the Church at Home that does so, and in course of time the same state of things might creep in here.

269. You would not recommend the repeal of this Act until the model deeds have been agreed to? I would recommend that some model deed or deed of trust should be drawn for the existing property of the Church.

270. This Act goes no further? I most certainly object to any legislation in religious matters.

The Honorable Samuel Deane Gordon, M.L.C., examined :—

271. *By the Chairman*: Has your attention been directed to the Presbyterian Church Temporalities Acts of this Colony? It has.
272. It has been stated in evidence before this Committee that the existence of these Acts forms a bar to any general union of the Presbyterian body in the Colony—is that your opinion? I think it is not necessarily so. I do not think these Acts would prevent union, provided all the different sections of the Presbyterian Church at present in the Colony choose to unite even with these Acts remaining as they are.
273. Do you think they would be likely to unite, with these Acts remaining as they are? I do not think these Acts being in existence as they are need prevent a union, but if the union took place I think then it would be necessary that these Acts should be repealed.
274. You think the repeal of the Acts would be necessary eventually? I think so, if a union takes place; because, if there were a united body, the property belonging to the different sections of the Presbyterian Church, as they are at present, would then become the property of the united body, and it would be necessary then that a model deed, which has been spoken of so often, should be prepared, by which the whole of this property should be held for the united body.
275. Do you consider Parliamentary legislation for ecclesiastical bodies—for Presbyterians—either necessary or advisable? I think not; I object to it altogether; I think it is quite unnecessary.
276. Do you see any difficulty in Presbyterians, or any other religious body, securing their property without such legislation? There is not the slightest difficulty, I think, in the matter. There are different denominations at present existing in the Colony which have no legislative enactments at all connected with their different religious institutions, and who govern their own internal affairs by their own regulations.
277. Do you consider their property as safe under its present management as that of the bodies that are connected with the State? Quite as safe.
278. Are you aware whether the Irish Presbyterian Church, which has existed for two centuries in the North of Ireland, has any Parliamentary enactment? I believe they have no Parliamentary legislation connected with them in any way whatever.
279. Is there any uncertainty in the holding of their property? I believe not; I never heard that there was. No doubt at one time, when a dispute arose between what were called the Arians and the Evangelical Presbyterians of the North of Ireland, there was a question raised about some of the property, but it was settled by referring to the terms of the model deed under which the property was held, and in that way the property remained with whichever party it was found to belong to, or for whom it was originally intended.
280. That was decided by the ordinary Courts of Law? Yes.
281. Are you aware of any other obstacle to a union of the Presbyterians of this Colony, besides the existence of these Acts? In my own opinion there need be no obstacles in the way of union; but I am aware that there are obstacles in the way of a union between the different sections of the Presbyterian Church on ecclesiastical points.
282. *By Mr. Sadleir*: Until union is effected on ecclesiastical points do you think this Act stands in the way? I think if this Act was repealed perhaps union would be brought about more speedily than it otherwise will be; but I do not think these Acts remaining as they are necessarily stand in the way of union.
283. Have you any idea of the mode of appointing trustees in the North of Ireland? All parties who have any authority in the Church in the North of Ireland are appointed by the congregations, subject to the approval of the Presbyteries to which the different congregations belong.
284. In the model deed do they provide against any dishonesty on the part of a trustee? Yes, just as effectually as this Act does. No law will prevent dishonest men from being dishonest, but the Courts of Law will punish them just as well under a model deed as under this Act.
285. *By Mr. Holt*: Do you think it desirable to repeal this Act before a union has been effected or a model deed adopted? I do not think it is a matter of any consequence whether it is repealed or not.
286. You think it is not a matter of consequence, its being repealed before the model deed's being executed? I think not.
287. Do you attach no importance to the model deed? Yes, I do.
288. If you have neither a model deed nor an Act to guide you, how would you regulate, for instance, the appointment of trustees? Each congregation would appoint its own trustees to hold the property for the benefit of the congregation, under the authority of the Presbytery to which it belonged.
289. If the congregation had nothing to guide them—no law amongst themselves, no model deed, no legislation—what would guide them? There is a general law to guide them, which is thoroughly understood amongst Presbyterians.
290. This Act is binding on all congregations? This Act is not binding; it enables the trustees appointed under it to hold the property for the purposes for which it was intended, and trustees appointed in any other recognized way would be just as fully entitled to hold property, either under a model deed or regulations among congregations themselves, as under this Act.
291. Do you think it would be possible for a member of the congregation to dispute the right of a trustee—to move the Supreme Court to call upon a trustee or trustees to shew by what right he or they held the property of the Church—unless he or they were legally appointed? They are just as legally appointed for the purposes intended, if they were

The Hon.
S. D. Gordon,
M.L.C.

4 Dec., 1861.

The Hon. S. D. Gordon, M.L.C. appointed by the congregation, as they are under this Act. You cannot prevent any member of a congregation, or any person dissatisfied, from disputing or objecting, even under this Act.

4 Dec., 1861.

292. Have you read the Act carefully? Yes.

293. Does it rest with the congregation to appoint? It rests with the congregation to nominate the trustees, and their nomination is confirmed by the Presbytery.

294. Does it not say pew-holders? They are the congregation.

295. Are there not many who attend who are not pew-holders? Many.

296. Are they not considered part and parcel of the congregation? For the time being, when they are there, but they have no voice in the management of the affairs of the Church.

297. Would they not have a voice if there was no Act and no model deed? None whatever, unless they were pew-holders as under this Act, or communicants—that is, members of the Church, which would be the term used in a model deed. A person entering the church, as you spoke of just now, would have no voice whatever in the management of its affairs. Power is inherent in every congregation to manage its own affairs.

298. They must have some fundamental law to enable them to do that? No fundamental law is necessary for you or I to agree upon any question; we would come to a mutual understanding.

299. If we have a dispute afterwards, who is to settle it? A Court of Law.

300. Would there not be many appeals to the Courts of Law, if there was no Act, no model deed? Not necessarily more so than under this Act; for instance, the Free Church have no Act whatever.

301. No model deed? Yes, they have a model deed.

302. A model deed is in substitution of an Act; where they neither have an Act nor a model deed, what is there to guide them? If these Acts were repealed, and a union of the Presbyterians of the different sections took place, then they would either agree upon having a new Act, or agree on having a model deed, under which the property would be held.

303. Do you not think it desirable that, in the first instance, they should come to an agreement and know what they do require? I think it very desirable they should come to a union as speedily as possible; but I have already stated that, in my opinion, these Acts neither are a bar to union nor will they forward it. I believe, as they exist, they may be a hindrance, but not necessarily so.

304. Do you not anticipate that the repeal of these Acts might be the cause of some inconvenience to some of the Churches? Not the slightest inconvenience.

305. Do you think that is the opinion of the majority of the members of all the Presbyterian Churches? I am sure it is the opinion of a large majority of the Presbyterians in the Colony. It is very likely not the opinion of some of the members of the Established Church of Scotland; but the General Church Act provides for holding the property just as securely as this Act does, so that the property would be fully as secure, if this Act were repealed, as it is at the present moment.

WEDNESDAY, 11 DECEMBER, 1861.

Present:—

DR. LANG,
MR. SADLEIR,

MR. SMART.

MR. HOLT,
MR. DICKSON,

JOHN BOWIE WILSON, ESQ., IN THE CHAIR.

The Rev. James Fullerton, L.L.D., called in and examined:—

Rev. James Fullerton, L.L.D.

11 Dec., 1861.

306. *By the Chairman:* You are a Presbyterian Minister, Dr. Fullerton? Yes, Minister of the Scotch Church, Pitt-street South, Sydney.

307. There are several sections of Presbyterians in this Colony—they are divided into several sections? Yes.

308. Would you be kind enough to state to which of those sections you belong? I am in connection with the Church of Scotland—the Synod of Australia, in connection with the Church of Scotland.

309. How many of those Presbyterian sections or divisions are there in the Colony? Really I do not know. There are three bodies that we know to be distinct, because they are openly connected with bodies at Home—the Synod of Australia, in connection with the Church of Scotland; the Eastern Synod of Australia, in connection with the Free Church; and Mr. Thompson, in connection with the United Secession. Then there are two who have no connection with any person but themselves—the Synod of New South Wales, and Mr. Gordon of Balmain—he is distinct; he is not connected with the Synod of New South Wales.

310. Are you aware of the object of this Committee? I cannot say that I am. I saw what appeared to me to be contradictory statements in the paper—that a motion was made for the appointment of a Committee; and then it was stated that the Committee was appointed, not for what the motion stated, but for something else.

311. I may be allowed to mention to you that this Committee has been appointed with the view of considering and reporting upon the expediency of amending or repealing the Act 8 William IV, No. 7 —? I would be strongly opposed —

312. The title of which Act is “An Act to regulate the temporal affairs of Presbyterian Churches and Chapels connected with the Church of Scotland in the Colony of New South Wales”; and another Act to amend this Act, passed in the year 1840, has also been referred

referred to this Committee;—the Committee, therefore, is to take into consideration the expediency of amending or repealing the said Acts? I think it would be highly inexpedient, at the present time, to amend or repeal either of these Acts.

313. You have stated to us that the Presbyterians of the Colony are divided into several sections or divisions? Yes.

314. Do you think such a state of things is desirable? I think it is not at all desirable.

315. And you also think that it would be an advantage to the Presbyterians themselves, as well as to the Colony generally, if a union could be effected between the various bodies of Presbyterians? I am very anxious that a union should be effected, if it could be effected on proper principles.

316. And you think that the interests of the Colony generally would be benefited by such a union, do you? Well, I would not like to give an opinion upon that point. I do not think I am called upon to give an opinion as to the effect of any change in the Presbyterian body on the community at large. I think the Presbyterians themselves would be more comfortable and efficient as a Church if they were united, than they possibly can be while divided.

317. Do you not think, looking at it in a general point of view, that discord and disunion amongst any body of Christians in a Colony, is a great national calamity? There are evils that arise from divisions, but there are some advantages, and some people consider that the advantages of division more than counteract the evils that arise; and although the Presbyterians were united, that would not unite the Christian Church in the Colony; there are, I believe, four sects of Wesleyans.

318. I was not alluding to them. I think you misunderstood me. I asked the question whether discord amongst any particular Christian sect or denomination was not to be lamented and deplored, looking at the matter in a national point of view? In one sense it is to be lamented, but not in another. In another sense, it may arise as a necessary consequence of freedom of discussion and freedom of opinion.

319. Among these various sects and denominations, is there any difference in their mode of worship? I do not believe there is any material difference in the mode of worship adopted by the three bodies that are united with the old Churches at Home, but I do not know what the practice of the other two is, and I cannot therefore speak.

320. Are you aware whether there have been any differences in the religious tenets of the Church—in their creed? I believe that the United Secession object to one of the chapters of the Confession of Faith. The Confession of Faith is received as a whole by the Free Church of Scotland, without objection.

321. Then between the Free Church of Scotland and the Established Church of Scotland there is no difference? There is no difference; they both receive the same standards, and without qualification.

322. Is there any difference in the Church government of those various bodies? The one is connected with the State, and the other is not. Patronage exists in the Church of Scotland to a certain extent, and under certain regulations, but there can be no patronage in a voluntary Church, which the Free Church practically is.

323. But the interference of the State does not go any further than patronage? Oh! no; the form of government is the same.

324. And that does not interfere in the slightest degree with the spiritual government of the Church, or with its form of government? I think not.

325. Therefore there is no difference? There is therefore no difference.

326. Now, sir, you have said that these different bodies of Presbyterians remaining separate encouraged freedom of discussion. I am at a loss to understand what you mean by the term, when we find in their Church government a form of worship so very similar. I cannot see any great advantage which can arise. Perhaps you would be kind enough to explain? When I stated that some people think the advantages arising from division do more than compensate for the evils arising from it, I did not state that as my own opinion, but only as an opinion which I have heard expressed by many men.

327. Well, then, you do not personally consider that these disunions are of any advantage? I would not like to say that. They may make both parties more vigilant and active. The one may watch the other, and in this way stimulate zeal to a greater extent perhaps than would be otherwise manifested.

328. Do you not think the same end might be obtained in a very different spirit—by brotherly love? No doubt. I am only stating the views of those who take an active part generally in forming divisions.

329. Will you be kind enough to state to the Committee what, in your opinion, are the great barriers to a union of the various sections of the Presbyterians in the Colony? The first great cause, in my opinion, is the prejudices arising from early associations.

330. Are there any other reasons? I think that is the great cause which prevents the three bodies—the limited Secession, the Free Church, and the Synod of Australia, from uniting.

331. Do those prejudices exist among the clergymen or amongst the congregations? Amongst both. Men who have been brought up exclusively in connection with the Church of Scotland, the Free Church, or the United Secession, when they come here, are led, by the very habits to which they have been trained, to associate themselves with those of their own peculiar denomination, and to keep aloof from those of other denominations.

332. Well, as far as I can gather from your remarks, those prejudices can only be as to the name? I think so.

333. Perhaps then, that might be overcome by generalizing them under some common head or name? That is my view only. There are some who state other reasons, which they say are of vital importance.

334. Were you in the Colony in the year 1837, when this Church Temporalities Act was passed?

Rev. James Fullerton,
L.L.D.

11 Dec., 1861.

Rev. James
Fullerton,
L.L.D.
11 Dec., 1861.

passed? I arrived in the last month of 1837. The first Temporalities Act had passed before we arrived.

335. Then you are perhaps not in a position to give any information as to the causes which led to the passing of this Act? I know nothing of the origin of them.

336. And you have already stated to the Committee that, in your opinion, this Act ought neither to be repealed nor amended? In the present circumstances of the Church.

337. Will you be kind enough to explain to us what are the circumstances to which you allude? I think that the alteration or the repeal of these Acts would prevent union.

338. Perhaps you would be kind enough to explain how, in your opinion, they would prevent union. I may be allowed to state to you, that we have got it in evidence before this Committee that this Act is a great barrier to union, consequently you will understand the reason of my asking the question? The Presbyterian Church Temporalities Acts preserve the property that has been acquired in connection with the Church of Scotland, for the use of those Presbyterians in this Colony who wish to remain in that connection. It is also stated that at all times the minister for the time being is to have free access to the church. It renders it impossible for the whole body of the trustees or any part of them to exclude him from the church and manse.

339. Are those the grounds? Those are the first part of my statement. These provisions preserve the whole of the property for the Synod of Australia, to be retained by them for any purposes that they as a Church Court think consistent with the object for which it was given.

340. Are you aware how the Church property belonging to the Synod of Ulster is held? It is held in connection with the Synod of Ulster.

341. Is it vested in the Synod of Ulster? Yes.

342. All the property? Yes, and all the property of the United Secession is vested in the United Secession.

343. Is it vested by the Crown? No; by original grants.

344. Do you not think the same course might be beneficially adopted in this Colony? I am not prepared for that; I want to state my reasons, if you will allow me.

345. We should like to hear your reasons? If these Acts were modified—if they were repealed, so as to alienate the property in any way from the Synod of Australia as at present constituted, then the surviving trustee, or the whole body of trustees, could turn out the minister, and, I believe, make any use they pleased of the property for their own purposes. I will take my own case;—All the trustees who are named in the original grant of the Scotch Church, Pitt-street South are dead, with the exception of my brother, and he is now out of the Colony. If this Temporalities Act were repealed, my brother might turn the minister out and let the property for any purpose he pleased. I do not see how anybody could at all interfere with him. No doubt it would be quite evident that the property was originally granted for Church purposes, but then the Act recognizing that purpose would have been repealed, and consequently the property would be by the repeal of that Act alienated from the Synod of Australia. Who then would have a right to claim it? I cannot see how it could be claimed; I have turned the subject over in my mind frequently. We will take another view:—Supposing the Synod of Australia had agreed to unite—we have at present sent Home for advice as to terms of union, because we are convinced that no terms of union could be beneficial in this Colony that did not meet the approval of the United Secession Church in Scotland, the Free Church in Scotland, the Established Church in Scotland, and the General Assembly in Ireland. It is from these four that we have got all our ministers, and it is from these four bodies that our ministers for many years must come. If we were to effect a union here that was not approved of by any one of those four bodies, they would continue to send ministers here, but they would instruct them to have no connection with the united body; consequently as soon as the union had been effected here, a new division would be created by new arrivals. Therefore it has always appeared to me that, in order to have a union which will be effective, we must have the terms such as would meet with the approval of the Churches at Home. The Free Church has approved already, in the most formal manner, of the terms of union adopted by the Church in Victoria. We have sent Home those terms and suggestions to the Church in Scotland, asking them to suggest to us in what way they could be modified, so as to meet their entire concurrence; or if the Church of Scotland could approve of these and send out ministers, if we united with the other bodies on these terms, and any alteration of the Acts, in the meantime, would I think increase the difficulty. I will shew you how:—In some instances where the grant has been issued for five or six years, there are only one, or two, or three, of the original trustees surviving; and supposing that the survivors did not happen to approve of the terms of union adopted by the united body, they could hold the property, and say—we will not go into the union at all; we will have nothing to do with the united body; we will send Home and get a minister to ourselves. In this way any alteration at the present time would, in my opinion, completely be a bar to union.

346. But have not those properties been given over in trust for particular purposes? Yes.

347. Then, as a matter of course, I should think those trustees would be bound to act in accordance with the trust imposed; that is to say, they must devote the property to the purposes of the trust? The trust, as they might choose to interpret it.

348. You have stated that you thought the trustees could dispose of the property for their own use and purposes? Yes, and I will shew you how:—The Trustees hold the property for the church or manse in connection with the Church of Scotland. If you repeal the Acts that require all the Presbyterian Church property that is recognized by Law to be held for ministers and people in connection with the Church of Scotland, then the trustees hold the property; the body to whom the land was granted have united, and now have no connection with the Church of Scotland. Therefore any trustee wishing to retain his connection with the

the

the Church of Scotland would of course say—I hold the property for the original purpose for which it was granted; I have nothing to do with your union.

349. But supposing that the Church of Scotland express a desire for this union of the various Churches in the Colony. If the trustees acknowledge our clergymen as being Presbyterian clergymen in connection with the Church of Scotland, the objection would be got over entirely? I think the precedent of the Presbyterian Church in Victoria is the only thing we have to guide us. In Victoria, first, the three Synods passed a solemn resolution adopting certain terms of union, and binding themselves on those terms to unite so soon as a Temporalities Act could be obtained transferring the property of the different sections to the united body. And then the preamble of the Victorian Act states, that whereas Acts were passed for Church grants in connection with the Presbytery of Victoria, and whereas there were three or four bodies in Victoria, and whereas these had agreed to unite, it is hereby enacted that all the property held in trust for the use of each and all these respectively shall be vested in a united body so soon as that union has been effected. And then it states, that that union when effected is to be gazetted in the *Government Gazette*, and that after that date all the property of the whole of the bodies is to be vested in the united body. Any attempt to pass an Act affecting the property of any one party before the union had been effected and the terms of union agreed to by all the parties, would, in my opinion, decidedly increase the difficulty of union, and run the risk of alienating or losing the property already acquired.

350. Do you see any objection to such an Act being passed in this Colony as that which has been passed in Victoria? Not the least, if at once the various Synods bound themselves by certain resolutions to approve certain terms of union, but the terms must first be agreed to by mutual consent.

351. The general circumstances of the Presbyterian Church in the Colony are very much altered since 1837? Oh! very much.

352. But, then, at that date there was only the one section in the Colony in connection with the Established Church of Scotland? A number of us who, in my opinion foolishly, refused to join the Presbytery of New South Wales when we arrived, refused to receive State support, because it would not be given to us unless we disclaimed connection with the Church of Scotland, so that the feeling universal then among Presbyterians was, so far as I knew, to have exclusive connection with the Church of Scotland, and with no other Church.

353. And you do not think that the different circumstances in which we are now placed—so many different sects of Presbyterians being in the Colony—at all alters the case as to the propriety of the Government legislating for one particular section of that Church? I think that, unless they were to act on the request of a majority of that sect, it would be an unprecedented case of tyranny.

354. *By Mr. Dickson:* Of course you are aware that the Presbyterian Church is divided into a great many different sections? Oh! yes.

355. How many sections is it divided into? There are five, I believe.

356. Is there anything in the doctrine, or discipline, or mode of worship of these different sections, that would prevent a union? I think there is nothing that ought to prevent a union.

357. Do you think it desirable that a union should be effected? Certainly. I think it is very desirable, if all the parties could agree on the terms, and if those terms were such as to admit of the approval of the Churches at Home. No permanent union would be effected here, unless the terms are such that they would be approved by the four Churches at Home. If the terms are approved by the Free Church I have no hesitation in saying that they would meet the approval of the Irish Assembly, and I know that the Irish Assembly approve generally of the terms adopted in Victoria.

358. You are acquainted with the Acts 8 Wm. IV, No. 7, and the subsequent Act which was passed to amend that Act? Yes.

359. Do these Acts stand in any way as a barrier to union? I think not. I think they assist us very much in preserving the property, and keeping the body united, and preventing further division. I cannot imagine that either the Free Church or the United Secession Church, or, in fact, any section of the Presbyterian Church, would be more willing to unite with us if we were denuded of all our property by legislation than they would so long as we retained it.

360. If this Act were repealed what would follow adverse to the interests of any section of the Presbyterian Church? It would, in my opinion, leave the whole of the property held for the use of the Presbyterians in connection with the Synod of Australia, at the arbitrary disposal of the present trustees.

361. If these Acts were repealed, would you consider it necessary that some further legislation should be passed? I cannot imagine that any Legislature would think of repealing them without at the same time transferring the property to some known body that would be accountable for its proper administration. There must be some known person. If it be thought that the members of the present Synod of Australia have abused the property, or are incapable of managing it for the public good, then the enactment of the penal laws of Ireland would give a precedent to shew that the Legislature might step in and transfer the property, as they transferred the property of the Roman Catholic Church to the Church of England. Something of that kind might take place, but I cannot imagine that any Legislature would think of repealing these Temporalities Acts unless with that intention.

362. Are you aware if there is any legislative enactment to regulate the affairs of the Irish Presbytery? No; for it was impossible, when the Irish Presbytery was formed, to get an enactment.

363. What are the differences between the state of the Irish Presbytery, which exists without legislative enactment, and the state of the Presbytery in this Colony, where legislative enactment

Rev. James
Fullerton,
L.L.D.

11 Dec., 1861.

Rev. James
Fullerton,
LL.D.

11 Dec., 1861.

enactment is deemed necessary? The only difference is this—the grants are issued differently. The grants here are issued by the Government for the church and manse in connection with the Church of Scotland. Then an Act is passed recognizing those grants, and shewing how the trustees of those grants are to be chosen—how the land is to be held, and for what purpose. In Ireland, the lands were purchased by the Presbyterians themselves, or were presents. The Church therefore had a particular form of grant, and every trustee is bound to that, subject to the approval and direction of the Synod within whose bounds the property is placed; so that by a resolution of the Synod any trustee could be removed.

364. Have any grants been issued to the Synod of Ulster or to the Irish Presbytery, similar to those that have been here granted by the Government? No; they have no Government grants; they have State aid. They have salary by vote every year from the Imperial Parliament.

365. Is the Irish Church in any way endowed by the Government? As to the salaries of ministers—nothing else.

366. No property? They neither get property nor any assistance for building.

367. But these Acts ensure the application of the grants made by the Government here to the purposes intended when such grants were made? They give us the means of prosecuting in a Court of Equity any trustee that misappropriates the property. They give us a legal position and a legal standing, and enable us to prosecute any trustee we consider a defaulter; and I think their repeal, or even modification, would deprive us of that power.

368. There have been divisions in the Church always, from the earliest ages? Always.

369. Minor or greater, according to circumstances? Yes; even in the days of the Apostles.

370. So that there is nothing new in it. The divisions here, are they doctrinal divisions—arising from doctrinal matters? I do not like to answer that question. Some people may regard them as doctrinal, but I do not.

371. I mean religious doctrine? So far as I understand it, what prevented those who went out from us remaining with us was, that we would not condemn the Church of Scotland—that we would not give a tacit condemnation, by declaring that we would no longer have any connection with it. That I understood to be the only difference between us and the Free Church. The United Secession Church, again, have always made it a point to condemn all connection between the Church and the State, and consequently had received no salary. They would not unite.

372. You would not call the Church and State division a doctrinal division? They might; I would not.

373. Are the divisions in the Church here owing to the possession of temporalities? I think not, and I will give you an instance:—When the members of the Free Church left us, Mr. Hamilton and Mr. Nowbray would not unite with the others. When they left us they remained aloof, and the Free Church were as much opposed to them as to us. They said that they considered there should be only one Church here, and they would not recognize us or the other branch, because we recognized the Church of Scotland, and the other the Free Church. They said there should be none but an Independent Church, and therefore when the two left us, they divided amongst themselves, and increased the division.

374. Then I understood that this division arose from your being connected with the Church of Scotland on the one hand, and—? When six ministers left us, who were formerly connected with the Church of Scotland, they divided into two parties themselves, shewing that the mere Temporalities Act could not affect them.

375. As the Crown grants these sites for churches and so on, it is necessary that the Government should make some provision, in order to see that they are properly applied to the purposes for which they were given? Yes, of course.

376. And these Temporalities Acts were passed for that purpose? For that purpose.

377. Can you describe any other mode of securing that object without the Temporalities Act? I do not see how any other mode could be devised that would at all accomplish the object.

378. Then on the whole, you do not think the Temporalities Act is the cause of the division between the Churches? I think not.

379. Or that it prevents your union? Not in the least.

380. *By Mr. Holt*: Can you suggest any amendment to this Act which was passed in the year 1837? I never have felt the want of any alteration but one, and that arises from the difficulty of the 7th clause; but that, in my opinion, is an alteration which we should never ask for alone.

381. The 7th clause is:—“And be it enacted that the new trustee to be nominated or selected as aforesaid pursuant to this Act shall become jointly with the continuing or surviving trustees or trustee a trustee of the site of the church or chapel minister’s dwelling burial ground or glebe land in respect whereof he shall be appointed and all such deeds and assurances shall be made and executed as shall be necessary legally to effectuate and complete his appointment as such new trustee as aforesaid.” What alteration do you suggest in that clause? Mr. George Bowman and the late Mr. Thomas Cadell were appointed regularly trustees, under this Act, of the Scotch Church, Jamieson-street; and Mr. Justice Milford decided—and I think, correctly—that they were not trustees, because they had received no conveyance, and it is impossible under the circumstances that they could get a conveyance. New trustees, when appointed, are appointed to fill up vacancies created by departures—by death. If a man dies he cannot convey, and the remaining trustees cannot convey.

382. But has not the Supreme Court a general power to convey in cases of death? I merely speak of that decision. The amendment I have all along desired would be simple; it might be effected by a small declaratory Act, such as they have in Van Diemen’s Land, which

which declares that all the different denominations of Christians who have property shall, on the first week of January, transmit to the Colonial Secretary a list of trustees that they recommend to hold the various properties, and that on this being approved by the Executive, and their names published in the *Government Gazette*, they are thereby vested with the property for which they are chosen as trustees, just the same as if they had a formal conveyance. Practically there is no great inconvenience in reference to the old trustees, so long as the Acts remain unrepealed, for the heirs of the surviving trustees are always accountable for the property, in Equity; and this Act gives the minister the privilege of going into a church and doing his duty, whether the trustees wish to stop him or not. That is the only amendment. I spoke to the present Government two years since, in reference to the subject, but I found a similar provision was contained in the Synods Bill of the Church of England, which would have made the Bishop virtually the trustee of the whole of the property; and until that was decided, some persons connected with the Government said it would be unwise to introduce this. They did not think they could carry a General Act of that kind unless the Church of England approved of it; it would depend upon what course they took in reference to the Synods Bill. I never heard any person complain of the operation of that General Act in Tasmania: it was at one time published in the *Herald* here. It is a very short Act, not much larger than one of those clauses. Just as the members of a Corporation are in a position of trust so soon as they are appointed aldermen, so this would invest trustees chosen by the various denominations with their property. So soon as they had been approved by the Executive Government, and their names published in the *Government Gazette*, they would be vested with the property for twelve months, or until others are appointed to succeed them. I do not think it would be desirable to ask an amendment of that kind unless it was to affect all Churches of all denominations.

Rev. James Fullerton, L.L.D.

11 Dec., 1861.

383. Not for Presbyterians only? No, I would rather remain as we are, than ask that for any one sect.

384. That is the only amendment you were suggesting? That is the only amendment.

385. From your own personal experience, have you found these Acts work prejudicially to the Presbyterian Church, in any way whatsoever? Not so far I know.

386. Do you think there would have been the same dissension—the same number of sects as there are at the present time, if no such Act had been passed? I have no doubt of that. There is no Temporalities Act, I believe, in South Australia, and yet there is just the same amount of division there as here.

387. Just the same? They have neither State Aid nor Temporalities Act, and yet there is a party in connection with the Established Church, a party connected with the Free Church, and a party connected with the United Secession.

388. Then if this Act were repealed, you think the temporalities of the Presbyterian Church would suffer greatly from the property having no recognized owner? I think so.

389. And you are quite sure in your own mind that there is no barrier to the union of all the Churches? I am fully convinced of that.

390. I think you state that you arrived in this Colony in 1837? In the year 1837.

391. How many ministers were there here at the time of your arrival? There were ten came in the ship with us.

392. I mean old ministers? There was one at Maitland, one; one at Bathurst, two; one at Pitt Town, three; and Dr. M'Garvie, four.

393. There were four ministers? Yes; and—

394. What was the moral standing of the ministers then in the Colony? There was Mr. Hetherington, at Singleton, five; and Mr. Tait, at Wollongong, that is six; and Mr. Allen, at Parramatta, seven.

395. How long had these seven ministers been here? Some of them had not been here more than a year. I do not know the exact time.

396. Who are the four you alluded to in the first instance? Those four had been a long time here.

397. Do you remember the names of the four? There was Mr. Garvin.

398. Where did he reside? At Maitland; Dr. M'Garvie and Mr. Smith, at Bathurst; and Mr. Cleland, at Pitt Town.

399. These are the only four ministers that had been here some time; all the others had arrived just previously—within the twelve months? I could not state how long.

400. What was the moral standing of those four ministers when you arrived—were they men of good character? Well, that is a question I really am not in a position to answer.

401. Were any of them under charges of intemperance? Dr. Lang told me that two of them were, but I never heard any other person say so. I met Mr. Cleland frequently in some of the first families in Windsor, and they spoke favorably of him to me; I knew nothing of him personally, except what I saw when I met him at their table.

402. Did he continue a minister of the Presbyterian Church some time after you arrived? He continued a minister until he died.

403. And the other gentlemen? Mr. Garvin resigned at that time. There was some kind of trial with both. In the Windsor case, the trial broke down—there was no decision. I do not remember the particulars, but the Presbytery did not censure in any way; they pronounced no censure, so far as I remember.

404. *By the Chairman*: Do you know what they were tried for? Reputed intemperance.

405. *By Mr. Holt*: Then of these four ministers, two you have heard accused of intemperance? Yes; I was not in the Colony when the Act was passed, and I have no knowledge of any charge which may have affected the character of any of the ministers before I arrived.

406. I merely wish you to give evidence of what you know. Does the Act of Parliament, in your opinion, go any further than giving the power to the Presbyterian Church? It goes

no

- Rev. James Fullerton, L.L.D.
11 Dec., 1861.
- no further than to regulate the appointment of trustees and preserve the property for the body.
407. It had no other object in view? I think not.
408. And the working of it has not been productive of any other effect, in your opinion? I never found any difficulty from the working of it.
409. Did you consider that the Presbyterian Church in the Colony had fallen into a complete state of abeyance at the time this Act was passed? I was not in the Colony at the time.
410. But you arrived almost immediately afterwards. Only three ministers had just arrived previously. Did you find the Church in a state of abeyance at the time you arrived in the Colony? When I went to Windsor, where I was recommended by my brother to officiate, I found that there existed only twelve *bona fide* Presbyterians in the district, and ten of these had been prisoners of the Crown. There were only three free families.
411. It appears to me that you give a strong reason for supposing that the Church was in abeyance? It never had existed there.
412. To the provisions of the Act itself I think you stated you had no objection? I have not the slightest objection to its provisions.
413. The Free Church of Scotland, has it not a vast amount of property? It has.
414. How is that settled—has it any Act of Parliament? No, they have no Act of Parliament, but they have a model trust deed.
415. Do not you think a model trust deed would have answered all the purposes of an Act of Parliament in this Colony? No, the Wesleyans have a model trust deed and an Act of Parliament.
416. Have the Roman Catholics an Act of Parliament? No, but that arises from their policy. In America the Roman Catholics have made repeated attempts to have their whole property in the United States vested in the Bishops, but they had what no other Protestant Church can have—
417. But, speaking of this Colony, the Church of Rome has no Act of Parliament to regulate its temporalities? No.
418. Do not you think they are wiser in their generation than the Presbyterians and Wesleyans? I think the Church of Rome are very wise as to the best mode of carrying out their peculiar system, which is a system of despotism and monarchy. They wish all the property to be vested in the Bishop, but I think they had better not be fettered by Act of Parliament. If they went to Parliament I have no doubt Parliament would not give the Bishop such unlimited power as he at present possesses.
419. The United Presbyterian Church of Scotland has also a considerable amount of property, has it not? Yes, it has; I do not know how they hold their property in Scotland.
420. And the English Presbyterian Church, it has also a large amount of property, has it not? They have lost a good deal owing to the want of an Act of Parliament.
421. Owing to the want of an Act of Parliament? Yes; half the rich grants made for orthodox Presbyterians have been seized and used by Unitarians.
422. From the want of an Act? From the want of a Temporalities Act to preserve the property
423. The Irish Presbyterian Church has also a large amount of property? Yes.
424. And that has no Act? That has no Act, but even the Irish Church has lost a good deal of property through the thoughtlessness of trustees. They have had many suits in Equity regarding it.
425. The State gives no grants of land to the Irish Church—merely salaries? No.
426. Do you think the Arians, or Unitarians, would not have been able to maintain the right to these properties in Ireland and England, if there had been an Act? I am quite satisfied that they would not. At the time the grants were made Unitarianism was not known in the country.
427. Had they received any endowment from the State—the Arians or Unitarians? In Ireland they receive the same as the orthodox Presbyterians, and the form of Church government is just the same; they all call themselves Presbyterians.
428. You are not aware of anything in which this Act of 1837 has fettered and paralysed the Church, from the time of its being enacted to the present? I think it has never, in any way, fettered or paralysed it.
429. It has never been the cause of disruption in this Colony or Port Phillip? Certainly not. The simple ground on which the members of the Free Church left us was, that we would not agree to the resolution to recognize the Free Church alone, and renounce all connection with the State.
430. Without reference to this Act at all? Yes, if there had been no Temporalities Act we would not have done that.
431. Has the Government in any way interfered with the freedom of the Presbyterian Church since you have been in the Colony? No.
432. Is there as much freedom in the Church in this Colony as in Ireland? Quite as much, and somewhat more.
433. Somewhat more? Yes.
434. And you are quite clear that it would not have prevented any permanent disruption if this Act had not passed—that this Act has not been the cause of any disruption? I am quite clear on that point. A similar division would have taken place if the Temporalities Act had never existed.
435. You think that, if there had been a temporary secession, the non-existence of this Act would not have caused the Church to purify itself sooner? No, I think not, from this very fact:—Lately the United Secession people have brought a minister from Scotland to minister to

to them, not in connection with the Free Church, which receives no State aid and has no Temporalities Act. That shews clearly that the Temporalities Act is no barrier to union. Here are two bodies holding the same standards, and both having no support from the State, both declining Government aid, and yet they will not unite. If the Temporalities Act prevented them uniting with us, I ask why they do not unite with the Free Church?

Rev. James Fullerton,
L.L.D.
11 Dec., 1861.

436. Do you think the large number of ministers you alluded to as having come out here in 1837, would have left the mass of pollution that had got into the ministry—would they have left these drunken ministers to do the best they could for themselves, if there had been no such Act as this? My opinion is, that the Act did not in any way screen any minister, and could not possibly do so. If there had been no Act in existence we should have followed the same course as we did.

437. You think this Act did not interpose to render such an arrangement by which the Church could have been purged of these drunken ministers, impracticable? This Act does not in any way interfere with the free action of the Church Court, so that ministers could be tried for any offence and removed.

438. This Act does not render the operation of the Church Court impracticable? It assists the Church Court. If the Church Court had to remove an unfaithful minister, this Act enables them to retain the property he was in possession of.

439. Has this Act the effect of giving a monopoly to one section of the Church? I think the state of the Presbyterian Church in this Colony shews that it does no such thing. There is no monopoly. Other bodies do not receive State aid. We have a monopoly of State aid, but it is not because the others might not have got it if they had applied for it in time.

440. But does not this Act apply to temporalities provided by gifts from private individuals, as well as to grants from the State? I think not. I think it provides for the management of all grants made by the Crown before the passing of it, but I do not think it relates to gifts.

441. "Wherever any person or persons shall at his or her own cost and expense erect or provide a church or chapel" in connection with the Presbytery of the said Colony? Whenever they do—in any case of that kind —

442. *By the Chairman:* In a previous part of the preamble it says "by the persons contributing towards the building of the same?" Oh! yes; but that was because the Government contributed towards the building of the church.

443. *By Mr. Holt:* But do not you think that this Act has the effect of securing voluntary gifts as well as gifts originally made by the State? Whenever they had any voluntary gifts.

444. You have had gifts towards the erection of buildings? Subscriptions.

445. These are voluntary gifts? The subscription lists shew what sums have been received.

446. And this Act is for protecting gifts? If they are given for that purpose. By the by, I forgot; there is a gift given for a church and a school by a member of my own congregation. It is worth about two thousand pounds. It is part of the Ultimo Estate—a gift to the Synod of Australia, in connection with the Church of Scotland, by the will of the late Mr. Harris.

447. *By the Chairman:* As one reason why you did not think this Act had any effect in causing or keeping up disunion in the Presbyterian body, you have instanced the case of the United Presbyterians sending for a clergyman of their own from Scotland, while the Free Church was established here. Do you not think the very circumstance of all other sections of the Presbytery at Home being represented here would have the effect of causing the United Presbyterians to wish for one of their own denomination here also? That is a matter of opinion. I think that the feeling must have arisen. The United Secession would not send a minister unless he was applied for; at least they did not; the call went from this.

448. Exactly so? The people here must have had no wish to unite with the Free Church, otherwise they would not have gone to the expense of building a church and sending for a minister. The feeling existed here and not at Home.

449. It was here I alluded to—that the circumstance of all the other denominations of Presbyterians being represented here, would cause the United Presbyterians in this Colony to wish that their particular Church should also be represented? That would be accounted for by the influence of early education. They had been accustomed from their youth to be associated with that particular denomination, and they wished to continue so.

450. You have previously stated, I think, that owing to the want of such an Act as this, the Presbyterian Church in Ireland have lost a good deal of their property, and that the Unitarians have got it? Yes.

451. Now, is it not a fact that a great body of the clergymen and members of the Presbyterian Church in Ireland became Unitarians? Not a great body. The whole of the Presbytery at present—excluding the Covenanters, who are a very respectable but a very small body, and who hold that the Solemn League and Covenant is binding—all the rest amount to nearly five hundred clergymen. On one occasion, when the first Unitarian Church Presbytery was formed, it consisted of seventeen members. When the test was brought forward in the Synod of Ulster (when it was considered that Unitarianism and Arianism were spreading) seventeen refused to take the test. The Moderator put the question contained in the Shorter Catechism: "Do you believe there are three persons in one Godhead; the Father, the Son, and the Holy Ghost, and that these three are one God, the same in substance—equal in power and glory?" Seventeen walked out and refused to answer the question. These, and those licensed by them, are all the Unitarians in Ireland.

452. It was principally to those seventeen and their followers that this property lost by the Presbyterian Church is gone? Oh! no; some of the grants had been made a century before,

Rev. James
Fullerton,
LL.D.

11 Dec., 1861.

but the trustees being an hereditary trust their property descended. The minister comes in and preaches Unitarianism, and persuades the family in whom the trust resides. Then they appropriated the property to the use of the Unitarians.

453. My question was this:—The Presbyterian Church in Ireland have lost this property because persons who were previously Presbyterians had become Unitarians? Whose fathers had been Presbyterians.

454. Of course, the probability is that they were Presbyterians themselves in their younger days? Yes, whose fathers had been evangelical.

455. With regard to the circumstances of the trustees in this Colony, I think you have stated that in your Church there is now only one trustee—your brother? We have new trustees appointed, but the decision of the Court declares them to be no trustees.

456. I understood you to state that he was the only trustee? My brother is the only surviving one of the original trustees.

457. Can they not be appointed under the 7th section of this Act? You can appoint them, but when you go into a Court of Equity the Judge will tell you that, because they have not got a conveyance, they are not legally in possession.

458. Has the case been tried? Yes; I mentioned a case in which Judge Milford gave his decision.

The Rev. William Purves called in and examined:—

Rev. Wm.
Purves.

11 Dec., 1861.

459. *By the Chairman:* Where do you reside, Mr. Purves? At Maitland.

460. I may inform you that this Committee has been appointed by the Legislative Assembly, to consider and report upon the expediency of amending or repealing the Act 8 Wm. 4th, No. 7, and that the Act 4 Vic., No. 18, which is an Act to amend this said Act, has also been referred to this Committee. We have requested your attendance here to-day, in order that you may give us your opinion in reference to the matter. You are a Presbyterian clergyman? Yes.

461. Officiating in Maitland? Officiating in Maitland.

462. How many years have you been in the Colony officiating as a Presbyterian clergyman? I came out to the Colony in the year 1839, so that I have been here 22 years.

463. The Presbyterians in this Colony are divided into certain sections and divisions, are they not? Yes.

464. How many divisions are there of them? I think four; but if you add the congregation at Balmain, of which I have just heard, ministered to by Mr. Gordon, there will be five.

465. And to which of these sections do you belong? To the Synod of Australia, in connection with the Established Church of Scotland.

466. Do you not think it is to be regretted that the Presbyterian body is divided into so many sections? Yes, I do.

467. Do you not think that it impairs the efficiency of the clergymen in the Colony in connection with that Church? To a great extent it does.

468. And of course, under these circumstances, you would think it desirable that they should, if possible, be reconciled and united? Most decidedly, if possible.

469. Would you be kind enough to tell us what, in your opinion, prevents this union amongst the Presbyterians? The first thing to be considered is, what are the causes of the disunion. The fact is, those causes are to be found in the state of the Church in the Mother Country. There are certain divisions in the Presbyterian Church in Scotland, and I think it is quite natural that the same divisions should prevail here, because the materials out of which the congregations here are formed are in fact the same as in Scotland. I mean that the members here are actuated by the same feelings as those which actuate their brethren in Scotland.

470. But the same causes do not exist here for disruption as in Scotland—for instance, I may be allowed to allude particularly to the disruption of the Free Church; they have not the same grounds for disruption in this Colony as at Home? They have the same grounds in point of principle, although the circumstances are different. The principles held are the same. The difference in the mere geographical position does not affect principles.

471. But it does not affect the particular tenets of the denomination? Principles are affected to which they attach great importance.

472. In the form of Church Government? In the principles of Church Government. They consider them principles of sufficient importance to prevent them uniting. These principles have the same force here; at least they are held here with the same tenacity as they are at Home.

473. But they are not in operation in this country—they are not given effect to here? That is nothing. Were you to put that to a Free-Churchman he would say, "We do not know what circumstances may arise. It may become necessary at some future time to put into practical operation these principles, and therefore we adhere to them. We do not know what may happen in the course of time." The fact is, the course of things seems to be very much of this nature: in a new Colony like this, in the infancy of it, the members of the different sections of Presbyterians are probably very few, so few that they cannot all expect to have a minister of their own denomination—I mean the denomination to which they belonged before they came from Home; they will therefore all unite and form only one body, in the first instance. When the numbers increase so as to admit of their having, each one, a minister of his own denomination (the denomination to which he belonged at Home), the members of the different sections withdraw from what was first only the one body, and seek ministrations in accordance with their peculiar and distinctive forms. It is in accordance with their education, their habits, their feelings, their prejudices—if you like.

Well,

Well, then, the same habits, education, and feelings, which cause the Church to exist in a state of separation at Home, of course operate here to keep the Church in a state of separation. This is likely to continue until the Colony has made progress, population increases, and the immigrants are in the minority—when the members of the Presbyterian Church will consist mainly of persons born and brought up here, and not of course sharing in the prejudices which exist at Home. When that state of things shall have arisen I think we may look forward to the union of all sections. But I think that until the population increases, and until the great body of Presbyterians consist of members that have been born and brought up in the Colony, no union is likely to be formed that would be either permanent or advantageous.

Rev. Wm.
Purves.

11 Dec., 1861.

474. Admitting the force of the educational prejudices you have alluded to, do you not think there is a probability of those educational prejudices being fostered in our Australian youth, by the conduct of the leaders and clergymen of the Presbyterian Churches in the Colony? I have no doubt of that. Ministers have these prejudices, and they generally, in practice, I believe, keep them up rather than pursue an opposite course. But I think that the force of circumstances will be more than a match for the influence of the ministers of the different denominations. The circumstances that mould character and lead to the formation of feelings will, I think, be too strong for that influence which may be exerted by the ministers.

475. But still I think you will admit, that if there was a little more brotherly love among clergymen it would have a most beneficial effect? It is a very great desideratum indeed.

476. It has been stated to us in evidence before this Committee, that there is a desire on the part of many of the Presbyterians in the Colony, to have a union, but that that union is to a great extent prevented by the action of this Act which we are called upon to consider, and I would be obliged to you if you would, just in your own way, give us your opinion in reference to the matter? The fact is, I feel a difficulty—amounting almost to an impossibility—in replying to the question, for this reason—that I cannot understand by what process of reasoning this conclusion has been come to (the conclusion to which you refer), that this Act is a barrier to union. If you would furnish me with the connecting link between the two things; if you can shew me any connection between the alleged cause and the effect, I shall be able to reply to the question. At present I do not see any connection between the two things.

477. For instance, there is one objection—that in reference to property—which, whether granted by the Government to the Presbyterian Church, or whether it is subscribed by individuals, must be vested in the Church of Scotland? But these moneys—perhaps I do not understand the question.

478. I think it has been stated here that all the property belonging to the Presbyterian Church—? You mean the Synod of Australia?

479. The Synod of Australia. It has been stated, I think, that property which this Act affects in any way, is vested in the Church of Scotland alone? Yes; but I do not see how that could be a bar to union, because nothing would be easier to obtain than what has been already obtained in Victoria—that is to say, *if there were first a union of Presbyterian bodies* a legislative Act could be obtained to transfer property belonging to the Synod of Australia, as well as property belonging to other distinctive bodies, to the united body. But in order to that, there must be a previous union of the different denominations of Presbyterians.

480. Then another objection has been stated, and that is with reference to the Government interfering? But at the same time I do not see how that which you stated just now as a fact, namely, that all the property granted to the Synod of Australia is attached to it by this Act, at all prevents a union. I do not see that what you have stated now as a fact does supply this link which I spoke of as connecting the existence of the Act with the divisions of the Presbyterians of the Colony; perhaps you could explain further.

481. But it has been stated as being a barrier to the union of the different sections? I should like to know the *grounds* on which that statement rests. I do not doubt the fact that the statement has been made.

482. Then you do not see that it is a barrier to that union? I cannot see any connection between the two. I do not see the relevancy of the question. If I saw the process by which the existence of this Act, or its operation, caused the divisions, I should be able to reply to the question, but not seeing that the operation of it is followed by that result, or those results, I cannot.

483. You misunderstand me if you think that I said this Act had caused the disunion—I only meant to imply that it had been said that it was a barrier to union? Then it is not held that that caused the divisions?

484. I cannot charge my memory, but it has been distinctly stated to this Committee that it was a barrier to union? If I could see the grounds on which the statement is made I should be glad to answer the question.

485. It has been stated by other witnesses that the circumstance of the State interfering at all (as it does by this Act) with the Church matters, is another barrier to union? But the State does not interfere with the Church in any way whatever.

486. It interferes by the Act, does it not? No; the State in this Act, merely provides for the continued application of property which the State itself has granted, to the purposes for which that property was granted. That is all it does. It does not interfere at all with our operations as a Church.

487. Is it not possible for that to be done in a different way? I do not think so. I do not see how the State can do it in another way* without denuding itself of its functions. What right

* Revised:—And I do not see how the State can grant property, and not take security for its being applied to the purpose for which it is granted.

Rev. Wm.
Parvos.
11 Dec., 1851.

right has the State to alienate land for sites for buildings, or to grant money to aid in their erection, and to say henceforth you may do what you like with them? The State is bound to follow up the act of grant with a legislative Act to secure that the public property granted shall continue to be applied to that purpose for all time coming. If circumstances should arise in which it is not necessary, and in which the purposes no longer exist, the State ought to resume the property.

488. But you are aware that the State, when it makes a grant of land, can specify in the grant the purposes for which that land is granted, without an Act of Parliament? It can do that certainly; but an Act of Parliament alone enables the State to discharge its function of guardian of that portion of the public property which it has alienated for a particular purpose.

489. But you are well aware that strong prejudices exist in the minds of Presbyterians, as to the State exercising that guardianship? I never heard of that at all. The State must do it. The State cannot help itself. The grant is of the nature of property, and must necessarily be under the guardianship of the State, and that guardianship can only be exercised by a legislative enactment.

490. So long as you use the word "guardianship" in that broad and liberal sense which you have explained I agree with you, but I thought you were alluding to it more in a particular way—as trustee? No.

491. That guardianship I think the State exercises sufficiently by the ordinary laws of the land, and the deed by which the land is granted? I do not think it. In dissenting bodies we find innumerable evils arise from the difficulty of maintaining the rights of property.

492. Do you think it would be prudent to amend this Act in any way? I am far from saying that this or any other Act is perfection, but until I see what alterations are proposed, I could not say whether those alterations would be an *amendment* or not. I do not see myself any amendment which it is desirable to make. I have seen no evils resulting from the operation of the Act, but if it be repealed, I see many evils that will arise. I do not see what good effect amendments would have.

493. You have no amendments yourself to suggest to the Committee on the subject? No, I cannot say that I have.

494. *By Mr. Dickson*: Are you of opinion that these Acts do not in any way stand as a barrier to the union of the Presbyterian Churches? I believe they are no barrier. But I have the same difficulty in answering your question as I had before.

495. I merely put the simple question? I do not see it.

496. How would it affect any section of the Presbyterian Church if this Act were repealed? It would affect the Synod of Australia in this way, that it would prevent them from enjoying the continued use of, their property probably. Circumstances might arise in which trustees might alienate the property. There is a clause of the Act to which reference has not been made, viz., that respecting glebes. This Act regulates the appropriation of funds that arise from the letting of glebes. You are aware of the case at Maitland in reference to the glebe there. This Act limits the right of a minister, in regard to the rents of a glebe, to £150 a year. If you repeal this Act, ministers would be entitled to receive the whole of the rents of their glebes. In Scotland, whenever a glebe is built on, as in Maitland, the minister receives the whole amount, though it may amount to thousands. This Bill has a good effect in that way, (although it militates against my interest), in limiting the receipts of the minister, and providing for the appropriation of the surplus to general purposes for the good of the body—educational or religious.

497. If this Act and the Act amending it were repealed, would you consider some other legislative enactment necessary? I think so.

498. Are you aware whether the affairs of the Presbyterian Church in Ireland are controlled by legislative enactment? I am not aware of my own personal knowledge, but I understand that they have no legislative enactment such as this. The circumstances are so different; there is no property belonging to the Presbyterian Church in Ireland created in the way of public grants; that is, grants from the public estate. The only thing they receive from the Government is a *regium donum*, a sum of money which is spent, and there is an end of it. If they had, as in this Colony, grants from the public estate, then, I imagine, they would have had an Act to secure those portions of the public estate granted being continued in their appropriation to the purposes for which they were granted.

499. Are you aware whether the Government have made grants to the Roman Catholic Church, or to the Church of England, in this Colony? Yes, I believe so.

500. Have they followed up those grants by similar Acts, to regulate the appropriation of the property? In the case of the Church of England I believe they have. I am pretty certain they have. In fact, I know they have an Act of a similar character.

501. And the Roman Catholic Church? I am not so well acquainted with the case of the Roman Catholic Church as to be able to reply with anything like certainty; but I know it is the case with the Church of England, and I believe it to be the case with other bodies also.

502. Then does this Act ensure the application of the grants made by the Government to the purposes intended when such grants were made? I think so, as well as most Acts can do.

503. *By Dr. Lang*: I understand that you are opposed to the repeal of the two Acts, or to any amendments amounting to a repeal? Yes, for the reason I have mentioned. If you could point out any evils that now exist, or any advantages that would arise from the step being taken, I might alter my opinion; but, in the present state of my views on the subject, I am opposed to the repeal of these Acts.

504. I merely asked to ascertain the fact, which is as you have stated? Yes.

505. *By Mr. Sadleir*: By this Act your section of the Church only can possess these temporalities from the Crown? Yes.

506. Other sections cannot? The other sections cannot possess these, but they could obtain grants for themselves if they chose.

507. But they are excluded by the peculiar wording of this Act from these possessions? No; by no means. They are not excluded from their rights as religious bodies.

508. The Act states "in connection with the Church of Scotland"? A particular grant is applied exclusively; but any other body may get a similar grant.

509. Then other sections of the Presbyterian Church in this Colony can obtain grants from the Crown? Yes.

510. Under this Act? Not under this Act. This Act does not authorize grants being given. It merely secures the property being vested in trustees, provides for the appointment of those trustees, and defines their duties. In fact, there is no connection with the rights of other bodies there.

511. This Act confines the property entirely to those connected with the Church of Scotland? Yes, in the very same way that the site of a Church purchased for the Congregationalists, for instance, would belong only to that body, having been purchased expressly for them, or obtained as a gift.

512. *By Mr. Holt*: At the time this Act was passed there was only one Church of Scotland? Only one Church.

513. Only one Church? I believe so; but I was not in the Colony at the time.

514. I allude to Scotland? There was the Established Church. The only difference between the present state of things and the state of things which then existed was, that there was then no Free Church of Scotland. The Established Church had not then separated into two Churches. There is however some other difference, because two bodies that existed at that time in a state of separation at Home have since united.

515. What I wish to obtain is the meaning of the words "Church of Scotland." I have never been in Scotland, and know very little about the Presbyterian form of worship. These words are made use of, "connected with the Church of Scotland"—was there at that time more than one Church of Scotland? Only one Church of Scotland—only one body that could be called the Church of Scotland.

516. Were there any other bodies of Presbyterians? Yes.

517. They had dissented previously to the year 1837? Yes.

518. If any ministers of those other Presbyterian bodies had come out to this Colony, they would not have been entitled to any of the advantages under this Act? Not if they came out to labour here not in connection with us—not if they came out here for the purpose of forming a separate Church.

519. Take for instance the Irish Church, or rather the Presbyterian Church of Ireland; is that a Church of Scotland within the meaning of the Act? No; but the ministers became Church of Scotland ministers when they came here, to that extent.

520. Do you mean to say that they changed the denomination to which they originally belonged, to unite with another, when they came to this Colony? Yes; the change was merely a verbal one, because the doctrines, discipline, and government were the same as those of the Church of Scotland, or at least very nearly so; but when they came to unite themselves to the Presbyterian Church here, as it then existed, they to all intents and purposes became Church of Scotland ministers. They would not have been entitled to hold livings at Home under the Established Church, but they are recognized by the Established Church at Home as ministers of the Church which represents the Established Church in this Colony.

521. The Irish Church? The Irish Church.

522. You spoke of other dissenters—Presbyterians—in Scotland itself; the United Presbyterians, if they had come out to this Colony, would they have been identified as ministers connected with the Church of Scotland? If they had chosen to —

523. Yes, but I mean if they had maintained their peculiar dogmas or whatever they may be, could they have identified themselves with the Church of Scotland without making some concession? Well, I do not know that there is any concession necessary; the fact is, the differences are so slight —

524. The differences are slight? I believe we have ministers in our Church now who before they left Scotland belonged to the United Presbyterian body.

525. What I wish to ascertain is this: if they became ministers of the Church of Scotland—that is, to come within the pale of this Act—would they not have to make some concessions? They would have simply to unite themselves with us.

526. The Wesleyans might do the same and unite with the Church of England, but then they would cease to be Wesleyans. They could not be both. And so in this case, without making some concession, other ministers could not become ministers of the Church of Scotland? They could not be admitted to the Church in Scotland,* but they could be admitted into the Church here. The Church of Scotland is much more strict. The Church of Scotland has no power to admit them; it is an established Church; † but here it is different; the Church of Scotland allows persons to be admitted here that the Synod think proper to receive.

527. Mark the wording of these Acts. The one is to regulate the affairs of Presbyterian churches and chapels "connected with the Church of Scotland in the Colony;" the other refers

* NOTE (on revision):—I mean they cannot be admitted as a matter of course, and in the ordinary way.

† NOTE (on revision):—I would not have meant to say that the Church of Scotland has not this power. It undoubtedly has it, though it seldom exercises it, and that only by a special Act of the Supreme Court of the Church.

Rev. Wm.
Purves.

11 Dec., 1861.

Rev. Wm. Purves. refers to the celebration of public worship, according to the forms used in the Church of Scotland. If they deviated in any respect from the form of public worship used in the Church of Scotland, they could not be ministers I should think, could they, of the Church of Scotland, unless they conformed? They must conform, of course, to the standards of the Church of Scotland.

11 Dec., 1861.

528. They must conform; but do they do that in Scotland; in the United Church, for instance, do they conform? In all essential matters their principles are the same.

529. And so are all Protestants, in essentials? No doubt there is a difference of opinion as to what are essentials.

530. What I want to know is, what class of Presbyterians would come under the wording of this Act? Any class of Presbyterians that chooses to unite itself with the Synod of Australia.

531. But the question is, can they do so without giving up some of their principles—some liberty of thought or form of worship? I think so—giving up nothing at all.

532. Then do you not think that this Act does stand in the way of union,—if ministers of the United Presbyterian Church came out to this Colony, and were desirous of enjoying the privileges of this Act, they could not do so without making some concession, in order to become members of the Established Church of Scotland? I really must say that I do not quite understand the question.

533. *By the Chairman:* Perhaps you will allow me to put the question. With regard to United Presbyterians, they have a particular principle on which they separated from the Church of Scotland originally—which was the principle of the non-interference of the State in religious matters. I think, in general terms, that was the cause of the disunion? Of course, we who belong to the Established Church deny that the State does so interfere.

534. But still they assert it? I believe they do.

535. And they asserted it on that occasion. Now if they joined with this particular Church in connection with the Church of Scotland in this Colony, they would have to give up that particular principle upon which they originally insisted at Home?—

536. *By Mr. Holt:* That is what I wanted to ascertain? In point of fact and practice, no questions would be asked on the subject. The circumstances are so different, that the principle would never come into operation—so that any minister or any member of any Presbyterian Church in Scotland, if he chose to unite himself to us when he came here, would be received without any questions being asked. All that would be asked would be simply this,—whether they desired to become members of our Synod. The minister would enter as a member of the Church Court, and would have to submit to the discipline.

537. But Dr. Fullerton, in his evidence, stated how tenaciously the principles are adhered to. In talking of the disruption, he gave as his reason why the Free Church and the Established Church did not unite in this Colony, the tenacity with which principles were adhered to, even although those principles were not brought into action in this Colony, as between the Free Church and the Established Church. But with regard to the United Presbyterian that principle is brought into operation by this very Act, because it is an interference by the State with the government of the Church? I do not see that it is.

538. But do not they look upon it in that light? It appears to me that if persons are so much attached to their particular forms they would never seek to be united to us, but rather endeavour to have religious ordinances according to their own peculiar form, in order that they might enjoy their privileges.

539. *By the Chairman:* But this Committee is trying to look upon it in a different light: we are looking upon the matter in reference to the benefit of the Colony generally. I think you have agreed with me that it would be advantageous if all sections were united in one bond of brotherly love, and could be got to sink their minor differences. The United Presbyterians assert that this Act is and has been a barrier? That brings us back to the same thing again. If I could see the process of reasoning—if I could be furnished with it—by which they arrive at the conclusion, of course I could answer.

540. It is very difficult for us to give the reason, because you do not admit the assertion they make—that this Act is a direct interference by the State with the Church—an interference which they, on principle, disapprove of? If they would state how it is an interference on the part of the State, with the Church, I should be able to reply, but I cannot see it. Since I have been asked to come here, and previously, my attention has been drawn to the matter. I thought there must be something in it that I had not been able to see—some view that had quite escaped me—some peculiar train of reasoning—with which, however, I might be furnished by intercourse with the Committee; but unless that be given I am quite at sea in reference to the whole matter.

541. You would be conversant, I should think, with the train of reasoning which influenced the Free Church in their disruption from the Established Church—they being opposed to all interference on the part of the State in purely temporal matters? The cause of the disruption was simply this:—The Free Church considered that they had a right to interpret an Act of Parliament—the Act by which the Church was established. The State considered that they had no such right, but that the interpretation of an Act of Parliament must be by the Judges alone, and that all must submit to that interpretation, and that they could not take the interpretation put upon it by the Church Courts.

542. That was with regard to pure temporalities? It was with regard to —

543. Temporal matters—not spiritual matters? It was with regard to the appointment of ministers to vacant churches, and the formation of the pastoral tie.

544. The salary? With regard to the pastoral tie, and who should be minister of a particular church—

545. *By Mr. Holt:* Who should have the gift of the living? Yes.

546.

546. *By the Chairman*: There is a difference here. The Church of Scotland said by their acts that they had a direct control as to who should be the clergyman, but the State said they had no control as to who the stipend should be paid to? I think the Free Church said the State had that control, and allowed it, *i. e.* the State, to do what it liked with the salary; but maintained that the State had no right to say such and such a man should be minister of a particular parish. If you remember the controversy, the Free Church always said that they never laid claim to the stipend, but that the State had no right to put any particular minister in as the minister of any parish.
547. *By Mr. Dickson*: I think the cause of the disruption was this—whether the Church or the Government should be supreme—whether the Church should have supremacy within its own Courts, or admit the interference of the Government? That is one way of putting it. Of course I am supposed to take the view the Established Church took, and I put it thus—that the Free Church insisted upon their interpretation of the Act by which the Church was established, in fact, being taken as the true interpretation. The State said we cannot admit the Church Court to be the interpreter of an Act of the Legislature, and we take the interpretation put upon it by the Judges of the land—the constituted interpreters of the law.
548. *By the Chairman*: And the Church of Scotland said it was an illegal or unnecessary interference with the functions of the Church? They, *i. e.* the Free Church party, said so then, and say so now.
549. I now come back to the point, as far as the United Presbyterians are concerned—I think the cause of separation was patronage? The Free Church never objected to patronage as a principle, but patronage was the sole cause of the secession—of the original secession.
550. That is to say, because it was an interference by the Government—the civil Law of the land—with what they considered purely religious subjects? I believe that was the interpretation they put upon patronage.
551. *By Mr. Holt*: I think you have said that you do not think the repeal of any Bill of this kind would cause a reunion? I do not think it. You will observe, it appears to me that a union should first take place, and then that application should be made to the Legislature.
552. To remove this barrier? It is not a barrier to union; it does not prevent the various bodies from meeting together and considering the conditions of union. After these conditions of union are settled and agreed upon, then the next course would be to come to the Legislature and say—
553. Will you remove this barrier? No, not looking upon it as a barrier—but simply, will you give us, instead of this Act, which refers only to one section, an Act referring to the whole body?

Rev. Wm. Purves.

11 Dec., 1861.

The Rev. John Dougall called in and examined:—

554. *By the Chairman*: You are a Presbyterian minister? I am a Presbyterian minister.
555. Officiating and living where? Officiating in St. Andrews' Scotch Church, Sydney, and living in Kent-street, Sydney.
556. What section or Synod are you connected with? The Synod of Australia, in connection with the Established Church of Scotland.
557. This Committee has been appointed to consider and report upon the expediency of amending or repealing the Act 8 William the 4th, No. 7, commonly called the Presbyterian Church Temporalities Act, and also an Act which was afterwards passed to amend that Act; you are aware that the Presbyterian Church is divided into several sections in this Colony? I am.
558. It has been pretty generally stated, by the witnesses who have appeared before this Committee, that it is desirable, if possible, that a union should take place; do you think it desirable that this should be accomplished? I think it very desirable, if it can be consistently accomplished.
559. We should like to hear your opinion, given in your own way, and as concisely as possible, whether you consider that the Act we are now inquiring into forms any barrier to the union of the various Presbyterian Churches in the Colony? I do not think it has been instrumental in causing disunion, in the first place, and I do not think it can at all be considered a barrier to such legitimate and rational steps as we could take towards the matter of union. The Temporalities Act simply enables us to administer the property Government has given to us. It is absolutely necessary to enable us to administer that property in such a way as will enable us faithfully to carry out the object the Government had in view in giving it to us. At the same time there is a difficulty, which my brethren have perceived, in the question whether it is a barrier to union. It is one of those things like our sentiments, our predilections, and peculiar sympathies, which we must modify ultimately, but only when we have carried on the preliminaries so far that the prospect of union is clear. Having carried on the matter to the last point of consummation, then it would be time to make arrangements to enable the new body that should be constituted to administer the property in conformity with the objects of the new Synod; we having found the same thing to be necessary, to enable us to administer the property given to us in conformity with the object for which it was given by the Government.
560. Do you think there is any necessity for amending this Act, or these Acts, in any way? Not at all, in the present circumstances of the case; it seems to have answered admirably the purpose for which it was given by the Government.
561. And you do not think they ought to be repealed? I do not.

Rev. John Dougall.

11 Dec., 1861.

- Rev. John
Dougall.
- 11 Dec., 1861.
562. *By Mr. Sadleir*: Could the Crown grant lands to other sections of Presbyterians by this Act as well as to the Church of Scotland, for churches or for glebes? Oh! quite so.
563. It seems to me to confine it very much to the Church of Scotland? It appears to me to be merely an Act for the proper regulation of such property as has been granted to the Synod of Australia; the designation of which was formerly, I think, the Presbytery of New South Wales.
564. It is an Act to regulate the temporal affairs of Presbyterian churches and chapels connected with the Church of Scotland only? Just so—such temporalities as they have. If other bodies had temporalities (which the Government would have granted them, had their views enabled them conscientiously to take them) there might have been also a Temporalities Act for them.
565. There must be another Temporalities Act for them—they could not come under this Act? They would have required to have an Act for the administration of their own. If a union were on the eve of being consummated, of course it would be necessary to obtain some measure to vest the whole of the property in the new body.
566. You acknowledge the necessity for another Act for other sections of the Presbyterian Church? Yes; so soon as the preliminaries to union are carried to their last stage.
567. I mean as the Church stands at present divided—I understand that only one body can regulate their property under this Act? This Act is not for obtaining grants of land, but for the administration of grants of land after they have been obtained; it simply states the way in which such properties as have been definitely made over to the Synod of Australia shall be administered.
568. If I understand you rightly, it is necessary to have another Act passed, to enable other Presbyterian bodies to obtain grants and to administer them. In fact, this Act shuts out all other sections of the Church from obtaining those grants; it is simply an Act to regulate the temporal affairs of the Presbyterian churches and chapels connected with the Church of Scotland in this Colony? I do not see that it prevents other bodies from acquiring property. It simply regulates our property in the same way that an Act might regulate the administration of the property of a bank. This, however, would not prevent any other bank that acquired property from obtaining an Act to regulate it.
569. Suppose, now, that I belong to Dr. Lang's section of the Church, I could not obtain land or become a trustee under this Act? You could not become a trustee of our property unless you were proved to be qualified.
570. Nor of any grant, unless made under a distinct Act? This Act does not affect the granting of land at all; it is merely to take care that land granted to the Synod of Australia, by the Government, shall be administered in accordance with the views of the Government when they gave the land.
571. *By Mr. Holt*: This Act is only to regulate the temporal affairs of one section of the Presbyterian Church? The affairs of one section.
572. The others do not come under this Act at all? They do not.
573. Do you think that they suffer any deprivation by not coming under this Act? I do not think so. I cannot perceive that they do.
574. Do you think this Act in itself is a barrier to other sections of the Presbyterian Church becoming united with you? I cannot see that it is.
575. Do you think that this Act gives you any undue privileges over other Presbyterian bodies? I cannot see that it does.
576. How do the other Presbyterian bodies regulate their grants of land—do they not conceive that they come under this Act—you do not know much about that, probably? No.
577. You have no amendments to suggest? No amendment.
578. You think it is a sufficiently good Act as it is? I think it answers all the purposes for which it was intended.

1861.

Legislative Assembly.

NEW SOUTH WALES.

**SURVEY OF LAND FOR SALE IN THE
SOUTHERN DISTRICTS.**

(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 6 September, 1861.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 19 February, 1861, That there be laid upon the Table of this House, a List shewing,—

“ (1.) The number of Surveyors employed in the Southern
“ Districts, in the measurement of Crown Lands for sale by
“ auction.

“ (2.) The name of each Surveyor, and the extent of District
“ entrusted to him; the number of acres applied for in each
“ District; and the number surveyed and reported to the
“ Surveyor General.

“ (3.) The number of acres yet unmeasured, and, if any, the
“ reason why they have not been measured and offered for
“ sale.”

(*Mr. O'Brien.*)

SURVEY OF LAND FOR SALE IN THE SOUTHERN DISTRICTS.

RETURN relating to the Survey of Land in the Southern District, prepared in pursuance of an Order of the Legislative Assembly, made on the Motion of Mr. H. O'Brien.

Number of Surveyors employed in the Southern District in the measurement of Crown Lands.	Name of each Surveyor employed.	Extent of District.	Number of acres applied for in each District, from 1 January, 1860.	Number of acres surveyed and reported on to Surveyor Genl. from 1 Jan., 1860.	Number of acres yet unmeasured, and, if any, the reason why they have not been measured and offered for sale.	
		Square Miles.	acres.	acres.	acres.	
1	Saml. Parkinson	2,430	12,310	11,326	984	Mr. Parkinson has for some time past been incapacitated by illness for the performance of field duties.
2	W. E. Larmer	1,270	1,275	1,397	700	
3	E. P. Mann	640	Mr. Mann has been wholly engaged in the survey of roads.
4	Thos. Evans	4,860	22,834	3,731	19,103	Mr. Evans was transferred to his present district in January last, and the Return has reference only to the work performed by him since that date.
5	R. J. Campbell	1,650	2,447	2,247	200	The above remark will apply to Mr. Campbell.
6	J. B. Thompson... ..	2,000	6,219	11,627	790	
7	E. H. Arnheim	1,950	11,325	8,125	3,200	The greater portion of the 3,200 acres has been surveyed, and the plans are in course of preparation.
8	Jno. Armstrong... ..	2,800	11,700	13,000	2,587	
9	S. L. Bransby	300	890	5,015	490	

Surveyor General's Office,
Sydney, 1 July, 1861.

1861.

Legislative Assembly.

NEW SOUTH WALES.

MR. C. G. T. CHAUVEL, AND OTHERS.

(EXERCISE OF THE PRE-EMPTIVE RIGHTS.)

Ordered by the Legislative Assembly to be Printed, 6 September, 1861.

RETURN, in part, to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 1 June, 1860, praying that His Excellency the Governor would be pleased to cause to be laid on the Table of this House :—

- “(1.) Copies of all Correspondence between the Government
 “and Mr. C. G. T. Chauvel, and any other person or persons,
 “relative to the pre-emptive purchase by Mr. Chauvel of any
 “portion of his Run known as Tabulam West, in the District
 “of the Clarence River, including any Report or communication
 “from any Government Surveyor, having reference thereto.
- “(2.) Any Minute of the Executive Council, also, having
 “reference thereto.
- “(3.) A Return of the different Reserves within the same
 “District, specifying by whom recommended, and the dates
 “when they were respectively made and proclaimed.
- “(4.) A Tabular Return of all applications for the exercise of
 “Pre-emptive Rights by any person or persons in the same
 “District, since the passing of the Orders in Council, specifying
 “in each case the applicant or applicants; the date of each
 “application; the number of lots; the quantity, quality, and
 “situation of the land applied for; whether or not application
 “granted, the price per acre, when application granted,
 “and the total quantity alienated, in consequence of such
 “application.”

(Mr. Hart.)

[Parts 1, 2, and 3 of this Address already laid before the Assembly. Ordered to be printed on the 23rd April, 1861.]

MR. C. G. T. CHAUVEL, AND OTHERS.

A TABULAR RETURN of all applications for the exercise of Pre-emptive Rights by any person or persons in the District of Clarence, since the passing of the Orders in Council, specifying in each case the applicant or applicants; the date of each application; the number of lots; the quantity, quality, and situation of the land applied for; whether or not application granted, the price per acre, when application granted, and the total quantity alienated, in consequence of such applications.

1861.

Legislative Assembly.

NEW SOUTH WALES.

MESSRS. W. DEAN & CO.

(APPOINTMENT OF, AS LAND AGENTS.)

Ordered by the Legislative Assembly to be Printed, 17 October, 1861.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 1 October, 1861, That there be laid upon the Table of this House,—

“ (1.) A Copy of any Agreement, Letter, or Memorandum, by
 “ virtue of which Messrs. W. Dean and Co. have been appointed
 “ Agents to the Government for the Sale of Public Lands.

“ (2.) A Return, shewing the Terms upon which Messrs. W.
 “ Dean and Co. have undertaken the Agency in question.”

(Mr. Forster.)

SCHEDULE.

NO.	PAGE:
1. Minute of the Colonial Treasurer, respecting the holding of Land Sales within the Sydney District. 2 September, 1861	2
2. Minute of the Secretary for Lands. 3 September, 1861	2
3. Ditto ditto. 3 September, 1861	2
4. Ditto ditto. 7 September, 1861	2
5. Ditto ditto, for the Executive Council. 9 September, 1861	2
6. Minute of the Executive Council. 9 September, 1861	3
7. Under Secretary for Lands to Mr. W. Dean. 7 September, 1861	3

MESSRS. W. DEAN & CO.

No. 1.

MINUTE of Colonial Treasurer.

I WISH to point out to the Secretary for Lands, that it will be necessary to select some other place at which the Land Sales for the District of Sydney shall in future be held, as the room hitherto appropriated for that purpose has been converted into an Armoury for the Volunteers.

This would perhaps be a convenient opportunity to consider whether the public interests would not be promoted by the Land Sales for the Sydney District being placed in the hands of a professional auctioneer, for sale at his rooms.

The next sale to be held in Sydney is fixed for the 11th instant.

E. C. WEEKES,
2 September, /61.

No. 2.

MINUTE of Secretary for Lands.

I HAVE conferred with my colleagues, and it has been determined to offer the appointment of Land Sales Agent for the Government to Mr. Dean, auctioneer, of O'Connell-street.

The rate of commission to be the same as that allowed Mr. Thomson, of East Maitland.

Mr. Dean will be expected to give sureties to the amount of £2,000.

JOHN R.
3 Sept.

No. 3.

MINUTE of Secretary for Lands.

SINCE writing the above I have seen Mr. Dean, who accepts the duty and the terms. As the date of the first sale alluded to by Mr. Weekes is the 11th instant, no time should be lost in giving notice to the public, through the *Government Gazette*, and through all the Sydney papers, of the intended change. Mr. Dean should also be requested to issue a notice.

JOHN R.
3 Sept.

No. 4.

MINUTE of Secretary for Lands.

FINDING, from the Attorney General, that it would be unsafe to sell at Mr. Dean's rooms lands proclaimed for sale at the Treasury, and it being undesirable to re-proclaim them, Mr. Dean should be instructed to sell them at the Treasury; all future proclamations to be at Mr. Dean's rooms. Mr. Dean to be informed, and receive instructions, to be first submitted to me. Selections will continue to be made at the Treasury. It will be desirable to have a Minute of the Executive Council approving of the arrangement.

JOHN R.
7 Sept.

No. 5.

MINUTE of Secretary for Lands, for the Executive Council.

*Department of Lands,
Sydney, 9 September, 1861.*

It has become desirable that the sales of land in Sydney should be conducted by a professional auctioneer, to be remunerated by a scale of fees similar to those allowed at Goulburn, Maitland, and Bathurst, namely £5 per cent. on sales up to £2,000; 2½ per cent. on sales over £2,000, and up to £10,000; and 1 per cent. on all sales effected on and over that amount, in each case, in any one year; and it is proposed that Mr. Dean, auctioneer, of O'Connell-street, be employed in that capacity.

Mr. Dean will be called upon to furnish two sureties for the performance of this duty, in the sum of £500 each, and himself in £1,000.

Sales now under proclamation to be carried out at the Treasury; all future sales to be proclaimed for Mr. Dean's Auction Rooms.

This arrangement is submitted for the approval of His Excellency the Governor and the Executive Council.

JOHN ROBERTSON.

No. 6.

No. 6.

PROCEEDINGS of the Executive Council, relative to the appointment of a professional Auctioneer to conduct Sydney Sales of Crown Lands.

Minute No. 61-41, 9th September, 1861.

PRESENT :—

His Excellency the Governor.
The Honorable the Vice President.
The Honorable the Secretary for Lands.
The Honorable the Colonial Treasurer.
The Honorable the Secretary for Works.
The Honorable the Attorney General.

His Excellency the Governor lays before the Council a Minute Paper by the Honorable the Secretary for Lands, recommending that in future all Sales of Government Land at Sydney should be conducted by a professional auctioneer, who shall be remunerated by a scale of fees similar to those allowed at Maitland and Bathurst, namely, £5 per cent. on sales up to £200; 2½ per cent. on sales over £200, and up to £10,000; and 1 per cent. on all sales effected on and over that amount, in each case, in any one year. The Honorable the Secretary further recommends that Messrs. W. Dean & Co., auctioneers, of O'Connell-street, be employed in that capacity; that they be called upon to furnish two sureties for the due performance of this duty, in the sum of £500 each, and be bound themselves in £1,000.

That sales now under Proclamation be carried out at the Treasury, but that all future sales be proclaimed for sale at Messrs. W. Dean & Co's. Auction Rooms.

2. The Council having discussed the matter at some length, advise the adoption of the proposed arrangement.

CHARLES COWPER, JUNR.,
Clerk of the Council.

No. 7.

UNDER SECRETARY FOR LANDS to MR. W. DEAN.

*Department of Lands,
Sydney, 7 September, 1861.*

SIR,

I am directed by the Secretary for Lands to inform you that you have been appointed to conduct, on behalf of the Government, future Sales of all Crown Lands and Town Allotments, and all Sales of Leases of Crown Lands, which may be offered to competition in Sydney. The rate of remuneration to be given you for this duty will be as follows:—5 per cent. on sales up to £2,000; 2½ per cent. on sales over £2,000, up to £10,000; and 1 per cent. on all sales effected on and over that amount, in each case, in any one year.

The next Sale of Crown Lands in Sydney is advertised to be held on the 11th instant, at the Colonial Treasury; and as it is not considered strictly legal to hold the sale anywhere other than at the place named in the Governor's Proclamation, that sale will have to be conducted at the Treasury; but all future sales will be proclaimed to be held at your Sale Rooms.

3. You will be required to enter into a bond to Her Majesty, yourself in the sum of £1,000, with two sureties of £500 each.

4. I am to invite you to suggest what (if any) special advertisement of the forthcoming sale you would desire to have published.

I have, &c.,

MICHL. FITZPATRICK.

1861.

NEW SOUTH WALES.

CROWN LANDS ALIENATION BILL.

(CIRCULAR FROM ACTING SURVEYOR GENERAL TO SURVEYORS, RELATIVE TO
RESERVATIONS OF CROWN LANDS.)

Ordered by the Legislative Assembly to be Printed, 7 November, 1861.

(Circular to Surveyors, 61-8.)

(No. 2.)

*Surveyor General's Office,
Sydney, 29 July, 1861.*

SIR,

I have the honor to enclose printed copies of clauses 4, 5, 13, and 14, of the Land Alienation Bill, recently before Parliament, being those clauses which more especially bear on the Reservation of Lands for Public purposes, sites of Towns, &c.; and I have to request that you will give your best consideration to the selection and recommendation of any Reservations which it would appear to you, having these clauses in view, to be desirable to make, previously to the passing into Law of the Bill referred to, or one similar in its provisions.

2. In the Old Settled Districts of the Colony, where many Towns have already been laid out, both by Government and by private individuals, and where all the Lands save those reserved for Town sites, have for so long a period been open to auction sale, it is not probable that many additional sites can now be selected; but your local knowledge may enable you to suggest one or more.

3. In the New Settled (formerly Intermediate) Districts—the whole of which will be open to selection before survey, with the exception of what may be set apart for Town sites and their Suburban Lands, and Lands reserved from such sale until after survey, with a view to the preservation of water supply—the selection of such sites and Reservation will necessarily involve the exercise of much forethought and consideration. The positions of existing Reserves, and the present and probable future lines of traffic, with their crossings over rivers will, however, to a great extent, indicate the Lands which should be reserved for Town sites.

4. In the Unsettled Districts, it is mainly necessary that your attention should be directed to the proclaimed Reserves; the lands under lease, or promise of lease, previously to the 22nd February, 1858, not being open to sale during the currency of the present leases, unless specifically withdrawn, by proclamation, from lease, for that purpose; and the lands under lease, or promise of lease, subsequently to that date, being generally so distant from centres of population that they are not likely to be purchased shortly. The last mentioned class of lands may, however, contain some desirable Town sites, and are therefore deserving of some attention.

5. The extent of Suburban Land to be attached to each Town or Town site, will of course depend on its present or probable future importance; and the exceptions in the commencement of the 13th clause of the Bill will form a good guide to you in this respect.

6. The subject of Reservation from sale until after survey, for the preservation of water supply, is, in the large proportion of the Colony in which that supply is limited, one deserving of the most earnest consideration, in which light I trust that it may be treated.

7. Other Reservations for Public purposes, such as ferries, bridges, canals, quays, &c., will no doubt, in very many instances, be embraced by Town sites, but may not be so in all cases, and therefore require independent consideration.

8. It is necessary that your report should be forwarded to * not
later than the end of September, in order that it may reach me by the end of October, and be fully and fairly considered before the end of the present year.

9. In conclusion, I would impress upon you that, as the satisfactory working of the new Land Bill will depend, in no inconsiderable degree, upon the efficient discharge of the duty with which you are thus entrusted in regard to a portion of the Territory, your most earnest consideration should be given to the subject.

I have, &c.,
A. G. McLEAN.

* In some cases this space was filled in with names of District Surveyors; in others, the words in italic were omitted.

1861.

Legislative Assembly.

NEW SOUTH WALES.

CROWN LANDS ALIENATION ACT OF 1861.

(REGULATIONS UNDER.)

Ordered by the Legislative Assembly to be Printed, 7 November, 1861.

*Department of Lands,
Sydney, 1st November, 1861.*

THE following Regulations, which have been made by His Excellency the Governor, with the advice of the Executive Council, for carrying into effect the Crown Lands Alienation Act of 1861, are hereby published for general information.

2. The Conditional Purchase Regulations, sections Nos. 21 to 43, will not come into operation until the 1st day of January, 1862, as provided in the Act.

JOHN ROBERTSON.

CHAPTER I.

PURCHASES WITHOUT COMPETITION.

PRE-EMPTIVE PURCHASE OF LANDS.

1. Applications to purchase by pre-emptive right lands held under lease or promise of lease made previously to the 22nd February, 1858, shall be addressed to the Minister for Lands, and shall state the name of the run in right of which it is proposed to purchase, and the pastoral district in which it may be situated; and shall define, as clearly as may be practicable, the portion of land which it is desired to purchase. Applications.
2. The purchase must be limited to one portion of not less than 160 acres, nor more than 640 acres, out of each block of 25 square miles of the leasehold, or a proportionate quantity out of each leasehold or portion of leasehold of less than that area; but any land previously purchased by pre-emptive right under the Orders in Council shall be estimated in the area which may be purchased. Limitation of area.
3. The land to be purchased shall be measured with its boundaries, other than rivers, creeks, or roads, directed to the cardinal points, by compass, and with an average depth from any river or creek frontage of one mile. Form of measurement.
4. The right to purchase shall in every case pass with the transfer of the lease or promise of lease at any period previously to the completion of the purchase by the authorized payment of the price into the Treasury. Transfer of right.
5. The value of the land, exclusively of improvements, as determined by appraisal, but not being less than £1 per acre, shall be paid into the Treasury within three months after the publication in the *Gazette* of a notice calling upon the applicant to do so, under the penalty of an addition to the price of 10 per centum; and should that increased price not be paid within six months of the aforesaid notice, the claim to purchase shall lapse, and the land may be sold at auction. Payment of price.

PURCHASE OF IMPROVED LANDS.

6. Applications to purchase without competition lands on which improvements may exist, shall be addressed to the Surveyor General, in the form marked A hereto appended. Application for lands improved prior to the passing of the Act, must be made before the 18th October, 1862; for lands withdrawn from lease or promise of lease, within twelve months of the withdrawal; for lands under lease or promise of lease, by the holder of the lease, and within its currency; and for lands in Gold Fields, at any period. Applications.
7. The improvements, in consideration of which it is sought to purchase without competition, must in the case of town and suburban allotments, be of a value of not less than twice the upset price of the allotment or portion on which they stand; and, in the case of other lands, of not less than the appraised value of the land, irrespective of improvements; not being less in any case than £1 per acre; and the *bonâ fide* ownership of the improvements must be satisfactorily shewn. Value and ownership of improvements.

- Area of portions.** 8. No such purchase shall embrace on town lands more than half-an-acre, on suburban lands more than two acres, or on other lands more than 320 acres, for each improvement; and every such purchase shall be made in accordance with the general subdivision of the lands, if there be any, or if already measured, by the authority of the Government, as so measured; or if not so measured, in the case of country lands having frontage to any river or creek, with a depth, if in the First Class Settled Districts, of not less than 20 chains, and in other Districts of not less than 60 chains.
- Payment of price.** 9. The value of the land, exclusively of improvements, as determined by appraisalment, but not being less than £8 per acre for town lands, £2 per acre for suburban lands, and £1 per acre for other lands, shall be paid into the Treasury, subject to the conditions prescribed by section 5 of these Regulations.

RECLAMATION OF LANDS.

- Applications.** 10. Applications for permission to reclaim lands beyond or below high-water-mark, and in front of the applicant's property, or to erect wharfs or jetties thereon, shall be addressed to the Minister for Lands, and shall be accompanied by plans shewing with accuracy the position and extent of the proposed reclamation or erection, and all adjoining erections, and also the mode in which similar and proportionate extensions in front of the adjoining properties might, if not then existing, be carried out.
- Exceptions.** 11. No such reclamation will be authorized which may be calculated to interrupt or injuriously interfere with the navigation of any harbour or river.
- Payment of value.** 12. The value of the land sought to be reclaimed, in its unimproved state, as determined by appraisalment, shall be paid into the Treasury before the reclamation will be permitted, and in the event of such payment not being made within six months after the publication in the *Gazette* of a notice calling upon the applicant to do so, the right to reclaim shall lapse.

PURCHASE OF LANDS ALREADY RECLAIMED.

- Applications.** 13. Applications for the purchase of lands reclaimed prior to the passing of the Act shall be addressed to the Minister for Lands, and shall be accompanied by plans conveying the information required by section 10 of these Regulations.
- Payment of price.** 14. The value of the land so reclaimed, exclusively of improvements, as determined by appraisalment, shall be paid into the Treasury, subject to the conditions prescribed by section 5 of these Regulations.

CLOSING AND PURCHASE OF UNNECESSARY ROADS.

- Applications.** 15. Applications for the closing of roads which may have been reserved to afford access to lands the property of the applicant, or roads which may have been rendered unnecessary by the proclamation of new roads, or otherwise, shall be addressed to the Minister for Lands, and shall be accompanied by sketches shewing the property of the applicant, the road sought to be closed, any road newly proclaimed, or other roads passing through the property, and the portions of the road proposed to be closed which the applicant, and other adjoining proprietors, if any, desire to purchase.
- Payment of price.** 16. The value of the land, as determined by appraisalment, shall be paid into the Treasury within three months after the publication in the *Gazette* of a notice calling upon the applicant to do so, under a penalty of the addition to the price of 10 per centum; and if the price be not paid within six months from the date at which the applicant may be called on to pay, the claim to purchase shall lapse, and the road sought to be closed shall remain as a thoroughfare.

PURCHASE WITHOUT COMPETITION.

- Applications.** 17. Applications to purchase, without competition, lands to which no way of access may exist, or which may be of insufficient area for conditional or auction sale, or which may lie between lands already granted and a street or road which forms or should form the way of access to such granted land, or Crown lands over which buildings partly erected on granted lands may have been extended, shall be addressed to the Minister for Lands, and shall be accompanied by sketches shewing the property of the applicant and the portion of land sought to be purchased.
- Payment of price.** 18. The value of the land, as determined by appraisalment, shall be paid into the Treasury, subject to the conditions prescribed by section 5 of these Regulations.

RESCISSION OF RESERVATION OF WATER FRONTAGE.

- Applications.** 19. Applications for the rescission of reservation of water frontage shall be addressed to the Minister for Lands, and shall state the area and locality of the land, the date of the grant, and the name of the original grantee; and in cases in which the rescission may be sought for a portion only of an original grant, shall be accompanied by a sketch shewing the division of such grant and the portion for which rescission may be sought.
- Payment of price.** 20. The value of the land, exclusively of improvements, as determined by appraisalment, shall be paid into the Treasury within three months after the publication in the *Gazette* of a notice calling upon the applicant to do so, under a penalty of the addition to the price of 10 per centum; and if the price be not paid within six months from the date at which the applicant may be called on to pay, the claim for rescission shall lapse, and the reservation of the land shall continue in force.

CHAPTER II.

CONDITIONAL PURCHASES WITHOUT COMPETITION.

CONDITIONAL PURCHASE OF UNIMPROVED LAND.

21. Applications for conditional purchase of unimproved land shall be addressed to the Land Agent of the District, in the form marked B hereto appended. Applications.

22. The following classes of lands are excluded by the Act from such conditional purchase :—Town lands; suburban lands; lands within proclaimed Gold Fields; lands under lease for mining purposes to any person other than the applicant; lands within areas bounded by lines bearing north, east, south, and west, and distant ten miles from the outside boundary of any city or town containing according to the then last Census ten thousand inhabitants, or five miles from the outside boundary of any town containing according to the then last Census five thousand inhabitants, or three miles from the outside boundary of any town containing according to the then last Census one thousand inhabitants, or two miles from the outside boundary of any town or village containing according to the then last Census one hundred inhabitants; lands reserved for the site of any town or village, or for the supply of water; or reserved from sale for any public purpose; lands containing improvements; and lands held under lease or promise of lease issued or made previously to the 22nd day of February, 1858. Exclusion of certain lands.

23. Applications shall be for not less than 40, nor more than 320 acres, and shall be tendered to the Land Agent for the District, on such days and between such hours as may be prescribed, by notice in the *Gazette*, for the attendance of such Land Agent at his office, together with a deposit of five shillings per acre. Area of selections and tender of applications.

24. Should more than one application and deposit for the same land, or any part thereof, be tendered at the same time, or should it be impossible to determine the priority, the Land Agent shall, unless all applications save one be withdrawn, forthwith determine, in the manner following, which application shall be accepted :—The Land Agent shall write on tickets of equal size the names of the several applicants, which tickets shall be placed (by the parties, should they desire to do so,) in a box to be supplied to the Land Agent for the purpose, and the Land Agent shall, without looking, and in the presence of the parties, draw one ticket from the box, and the application to be accepted shall be that of the applicant whose name may be on the ticket so drawn, and the deposits paid by the remaining applicants shall forthwith be returned. Conflicting applications.

25. Conditional purchasers must, within one month after the time of purchase, occupy the land so purchased as his *bona fide* residence. Occupation of selections.

26. Should it appear, subsequently to the selection, that the same land has been selected by different persons, though by different descriptions, the applicant whose claim was first received shall be considered the purchaser, and on the identity of the land selected being proved to the satisfaction of the Minister for Lands, the deposit paid by the latter applicant shall be returned. Interference by selections with each other.

27. If, at the time of such conditional purchase, the land shall not have been surveyed by the Government, temporary boundaries thereof shall be determined by the conditional purchaser, and any dispute respecting such boundaries, between such purchaser and any other person, other than affecting the boundaries of land held in fee, shall be settled by arbitration. If such land shall not be surveyed by the Government within twelve months from the date of application, the conditional purchaser may, by notice in writing to the Land Agent for the district, withdraw his application, and thereupon he shall be entitled to the return of any deposit paid by him, or the purchaser shall have the option of having the land surveyed by a duly qualified licensed surveyor, and the expense of such survey shall be allowed to such purchaser as part payment of his purchase money, such expense to be allowed in accordance with the scale of charges fixed or to be fixed by the Surveyor General. Boundaries.

28. Crown lands conditionally purchased shall, if measured by the authority of the Government previously to such purchase, be taken in portions as measured, if not exceeding three hundred and twenty acres; and if unmeasured, and having frontage to any river, creek, road, or intended road, shall, if within the First Class Settled Districts, have a depth of not less than twenty chains, and otherwise shall have a depth of not less than sixty chains, and shall have their boundaries, other than the frontages, directed to the cardinal points by compass, and if having no frontages as aforesaid shall be measured in square blocks, and with boundaries directed to such cardinal points. But should it seem to the Minister for Lands to be expedient, the boundaries of portions having frontages may be made approximately at right angles with the frontage, and otherwise modified, and the boundaries of portions having no frontages may be modified, and necessary roadways and water reserves excluded from such measurement. Form of measurement.

29. At the expiration of three years from the date of such conditional purchase, or within three months thereafter, fifteen shillings, being the balance of the purchase money, may be tendered at the office of the Colonial Treasurer, together with a declaration, in the form marked E, hereto appended, and countersigned by the Minister for Lands, by the conditional purchaser, or his alienee, or some other person in the opinion of the Minister for Lands competent in that behalf, or other authorized officer, and the Colonial Treasurer will thereupon receive and acknowledge the remaining purchase money; and a grant of the fee simple, but with the reservation of any minerals which the land may contain, will be made to the then rightful owner. Payment of balance.

30. Should such lands have been occupied and improved as specified in form E, and should interest at the rate of five per centum per annum on the balance of the purchase money be paid within the said three months to the Colonial Treasurer, the payment of such balance may be deferred to a period within three months after the first day of January then next Deferred payment of balance.

next ensuing, and may be so deferred from year to year by payment of such interest during the first quarter of each year. On default of a compliance with the requirements of this section, or section 29, the land shall revert to Her Majesty, and be liable to be sold at auction, and the deposit and all interest paid, shall be forfeited.

Limitation of purchase.

31. Excepting under sections 38 to 40 of these Regulations, no holder of an uncompleted conditional purchase will be permitted to make a second conditional purchase until he shall have alienated the first purchase in accordance with the Act, and shall have notified the same to the Land Agent for the District.

CONDITIONAL PURCHASE IN GOLD FIELDS.

Applications.

32. Applications for conditional purchase of unimproved lands within proclaimed Gold Fields, and neither within areas excepted by special proclamation nor occupied for gold mining purposes, shall be addressed to the Land Agent of the District in the form marked B, hereto appended.

Conditions.

33. The purchase shall be subject to the conditions set forth in sections 22 to 31 inclusively of these Regulations.

Special condition.

34. Persons specially authorized by the Minister for Lands shall be at liberty, at any period, to dig and search for gold within the land selected, and should it be found to contain auriferous deposits the sale may be annulled by the Governor and Executive Council, and thereafter compensation, to be determined by appraisalment, for the value of other than auriferous of the lands and improvements, shall be paid by the Colonial Treasurer.

CONDITIONAL PURCHASES FOR MINING PURPOSES.

Applications.

35. Applications for conditional purchase of unimproved lands, or of lands improved by the applicant as lessee for mining purposes under the Act 25 Vict., No. 2, for the purposes of mining other than gold mining, shall be addressed to the Land Agent of the District, in the form marked C, hereto appended.

Conditions.

36. The purchase shall be subject to all the conditions set forth in sections 22, 23, 24, 26, 27, and 28, of these Regulations, but the deposit to accompany the application shall be ten shillings per acre, the full price of the land being £2 per acre.

Special conditions.

37. The balance of the purchase money may be tendered at the office of the Colonial Treasurer, together with a declaration in the form marked F, hereto appended, and countersigned by the Minister for Lands or other authorized officer, by the conditional purchaser or his alienee, or some other person in the opinion of the Minister for Lands competent in that behalf. And upon such conditions being satisfied, and on payment of the balance of purchase money, a grant in fee simple will be made without reservation of minerals other than gold, and the same may be made on satisfaction of such conditions and payment of such balance, notwithstanding the period of three years required in other cases shall not have expired. A grant may also be made in like manner of any portion, not being less than forty acres, of a larger portion originally selected for purchase, upon a declaration shewing an expenditure in such mining operations as aforesaid of an average sum of not less than five pounds per acre on the land so to be granted. And in that case the purchase of the remainder of the land selected shall be rescinded, and any deposit paid thereon applied towards satisfying the balance of purchase money of the land granted. But if the Minister for Lands shall be dissatisfied with any such declaration of expenditure, he will cause the fact of the expenditure required to authorize a grant to be referred to arbitration under the Act, and the issue of a grant shall in that case be dependent on the award thereon.

ADDITIONAL CONDITIONAL PURCHASES.

Applications.

38. Applications for additional conditional purchases of lands shall be addressed to the Land Agent of the District, in the form marked B, hereto appended, but describing the proposed additional purchase by reference to that previously made, of which the area should be stated.

Position of purchase.

39. Additional purchases must adjoin the conditional purchase, or each other, and shall be in portions of not less than 40 acres, and not more than may make the total area of conditional purchase 320 acres.

Conditions.

40. Each such purchase shall be subject to all the conditions, save those for occupation and residence, provided for by sections 22 to 31 inclusively of these Regulations.

CONDITIONAL PURCHASES WITHOUT RESIDENCE.

Applications.

41. Applications for conditional purchases of lands adjacent to lands held in fee simple granted by the Crown, in areas not exceeding 280 acres, and resided on by the applicant, shall be addressed to the Land Agent of the District, in the form marked B, hereto appended, but describing the proposed conditional purchase by reference to the land in possession of the applicant.

Position of purchase.

42. The conditional purchase shall adjoin the land in possession of the applicant, and shall contain not more than may amount with that land to 320 acres.

Conditions.

43. The purchase shall be subject to all the conditions, save those for occupation and residence, provided by sections 22 to 31 inclusively of these Regulations.

CHAPTER III.

AUCTION SALES.

SALE BY AUCTION AND SELECTION.

Auction sale only of certain lands.

44. Excepting under the provisions of sections 17 and 18 of these Regulations, unimproved town and suburban lands will be sold by auction only.

45. Lands will be brought to auction sale by Government in the Police Districts ^{Area of lots.} in which they are situated, after advertisement of not less than one, nor more than three months in the *Gazette*, in lots not exceeding in any case 320 acres, and under such conditions as Government may appoint, to meet either general demand or special application.

46. The upset prices of lands brought to auction sale, shall be determined by the ^{Upset prices.} Minister for Lands, but shall not be less than—for town lands, £8; for suburban lands, £2; and for other lands, £1 per acre.

47. Applications for the auction sale of lands shall be addressed to the Surveyor ^{Applications.} General, and shall define as clearly as may be practicable, the position and extent of the lands applied for.

48. A deposit of 25 per centum of the purchase money of all lands sold by auction, ^{Deposit at sale.} shall be paid by the purchaser at the time of sale, and should such deposit not be paid the Land Agent shall again forthwith put up the land, and shall not accept any bid by the person who may have so failed to pay.

49. The balance of the purchase money, together with the deed fee, shall be paid ^{Payment of balance of price.} to the Treasurer, or to the Land Agent of the District, within three months of the day of sale; and should the purchaser fail so to pay, the sale shall be void, and the deposit paid shall be forfeited.

50. Lands other than town or suburban lands put up for sale by public auction, ^{Selection of lands not bid for.} and not sold, may, if not withdrawn from selection by the Minister or authorized officer, be purchased at the upset price; or in case of a higher price having been offered for the same, then at such higher price, less in either case by the amount of any deposit paid thereon, and applications for such selection must be tendered, with the price of the land, to the Land Agent of the District, in the form hereto appended, marked D.

CHAPTER IV.

COMMONAGES.

DEFINITION OF COMMONERS.

51. Where Commons may be granted under the Act, all freeholders and householders within boundaries which may be defined by notice in the *Gazette*, shall be entitled to use the Common; and such boundaries, in the cases of Town Commons, will ordinarily be those within which Crown lands are not open to lease under the Crown Lands Occupation Act of 1861.

52. Grants of Commons will reserve the right of pasturage of horses and cattle in ^{Reservation in grants.} use by travellers, teamsters, and carriers, for three days at any one time, or for such longer period as floods or other unforeseen natural causes may render unavoidable.

53. Where, at the time a grant of a Common is made, a Municipality includes the ^{Trustees.} lands notified as above, the Municipal Council shall be the Trustees of the Common.

54. Where no Municipality may exist the Trustees shall be five in number, and ^{Trustees.} shall in the first instance be elected in manner provided for the election of Trustees for Commons, under the Act 11 Victoria, No. 31, save that the meeting shall be convened and presided over, and the election reported, by the Police Magistrate of the town for which the Common may be granted, or of the nearest place of Petty Sessions, and should there be no Police Magistrate of such place, then by the Clerk of the Bench. But should a Municipality, including the land notified, come into existence, the Trusteeship shall be transferred to the Municipal Council.

55. All other regulations, matters, and things in connection with Commons shall be ^{Regulations.} done under and in accordance with the Act 11th Victoria, No. 31.

CHAPTER V.

MISCELLANEOUS.

APPRAISEMENT.

56. Whenever it may be necessary to determine any price or value by appraisement under the Act, or under these Regulations, the necessary steps will be taken by the Government, and duly notified to the party interested.

AUTHORITY TO SURVEYOR GENERAL.

57. The Surveyor General is authorized to perform all matters and things not otherwise specially provided for, and which, by the Act or by these Regulations are required or permitted to be performed by an authorized Officer or Agent of the Crown.

INITIATION BY GOVERNMENT, OF SALE WITHOUT COMPETITION.

58. In all cases in which persons who may be competent, under sections 6 to 9, 13, 14, 17, and 18 of these Regulations, to apply to purchase Crown lands without competition may fail so to apply, the Government may cause the land to be appraised, and take measures to carry out the sale in accordance with the above quoted sections.

DEED

CROWN LANDS ALIENATION ACT OF 1861.—REGULATIONS.

DEED FEES AND DELIVERY.

59. A fee of £1 shall be payable on each deed of grant from the Crown, and no deed shall be delivered until the stated fee shall have been paid. Deeds will be delivered at the Surveyor General's Office, Sydney, to the grantee, or to any person holding his written order duly attested by a Notary Public, Commissioner of the Supreme Court, or Justice of the Peace, or, on the application of the grantee, will be transmitted to the Land Agent for delivery.

Maps. 60. Maps, affording information as to the position of Crown lands open for sale, will be furnished to the Land Agents, in duplicate, and one copy will be periodically returned to the Surveyor General, in order that new sales may be entered thereon.

Land Agents. 61. Land Agents will, on Land Office days, afford information and assistance in filling up forms of application, and otherwise, to persons desiring to purchase.

Returns. 62. Quarterly Returns of the conditional purchases in each Police District will be published in the *Gazette*.

Forms. 63. The various forms prescribed by these Regulations will be supplied to the public at a charge of two-pence for each form, at the Government Printing Office, Sydney, and at the various Land Offices throughout the Colony.

A.

Application for the purchase of improved Crown Lands.

Sir, 186 .

Having erected [or become the proprietor of] the improvements detailed below, and which I estimate to be worth £ , I have the honor to apply that I may be permitted to purchase without competition, under the provisions of the Crown Lands Alienation Act of 1861, the Crown Lands on which they stand, and which are described hereunder.

The improvements referred to are now in my possession.

I have, &c., A. B.

The Honorable
The Minister for Lands.

Nature of Improvements.

[State here whether cottage, huts, yards, garden, or other improvements.]

DESCRIPTION OF LAND.

County of	Parish of †	Town of	Allotment
	Section		

* State address and nearest Post Town.
 † Or where not in a town, state after Parish of number of acres, River, Creek, or Road on which the land is situated, and distance and direction from nearest private property, of which state area and original purchaser or grantee—or distance and direction from nearest Crossing-place of Creek or Confluence of Creek or River, or other determinate point.
 If on land withdrawn from lease, state here name and date of proclamation of withdrawal, or if in Gold Field, state name of Field.

Legislative Assembly.

NEW SOUTH WALES.

CROWN LANDS OCCUPATION ACT OF 1861. (REGULATIONS UNDER.)

Ordered by the Legislative Assembly to be Printed, 7 November, 1861.

Department of Lands, Sydney, 1st November, 1861.

THE following Regulations, which have been made by His Excellency the Governor, with the advice of the Executive Council, for carrying into effect the Crown Lands Occupation Act of 1861, are hereby published for general information.

JOHN ROBERTSON.

CHAPTER I.

ANNUAL LEASES.

(FIRST CLASS SETTLED DISTRICTS.)

- 1. Lands will be let in portions not less than six hundred and forty acres or one square mile, except in special cases hereinafter provided. Size of portions to be let.
- 2. Every such lease shall be for the then current year, and shall expire on the thirty-first day of December. Period of leases.
- 3. Leases may be renewed annually by payment, between the first and thirtieth day of September, to the Land Agent of the District or to the Colonial Treasurer, of rent for the ensuing year, at the rate of two pounds per square mile, or such higher rate as the lessee may pay for the current year; unless the lands be required for sale or for any public purpose, or for the satisfaction of any pre-emptive lease, claims in right of new purchases and leases not so renewed may be brought to sale by public auction. Renewal of leases.
- 4. Leases under the Regulations of twenty-ninth March, one thousand eight hundred and forty-eight, shall not be renewed under those Regulations, but may be converted into leases under the Act, by payment to the Colonial Treasurer in Sydney or to the Land Agent of the District, not later than two months from the publication in the Gazette of a notice to that effect, of rent for the ensuing year, at the rate of two pounds per square mile or such higher rate as the lessee may now pay, unless the land be required for sale or for any public purpose, or for the satisfaction of any pre-emptive lease claims which may arise under the Act. Conversion of existing leases into leases under the Act.
- 5. The holders in fee simple of any lands may be allowed leases of Crown Lands adjoining to their respective properties without competition, at the rate of two pounds per section of six hundred and forty acres, and to the extent of three times their own purchased or granted lands, if there be so much vacant land available; provided that such lands shall be taken in a block of rectangular form, in which the external lines shall be directed to the cardinal points by compass; and if the country has been divided into sections of square miles, then according to the general sub-divisions of the land as delineated upon the public maps in the Surveyor General's Office, and subject also to the exclusion of water necessary to the beneficial occupation of adjoining lands; provided further that the rent to be charged for land so leased to parties not having the right to take six hundred and forty acres shall in no case be less than one pound. Pre-emptive leases to holders of land in fee simple.
- 6. If there be two or more claimants under the last preceding section of the same land, the division of the land amongst them may be settled by arbitration; provided that if such land be of less extent than six hundred and forty acres it may, on an award being made, be forthwith occupied in accordance therewith, and without further formal apportionment; provided also that if at the expiration of three months from the date of a notice Determination of conflicting claims by arbitration.

	in the <i>Gazette</i> announcing to the several claimants of portions not less than six hundred and forty acres, the names of their competitors, an award shall not have been arrived at and duly communicated to the proper officer, the leases of the lands so circumstanced may be offered for sale by auction.
Notification of pre-emptive leases.	7. All leases granted under pre-emptive right shall be notified in the <i>Gazette</i> , and if within two months from the date of such notification the rent for the same shall not have been paid to the Colonial Treasurer or to the Land Agent of the District, leases of the land shall be submitted for sale by auction.
Leases at auction.	8. Lands not previously under lease over which no pre-emptive right of lease shall have been exercised within one year from the passing of this Act may be put up for lease at auction, at the Land Office of the District, either on application or otherwise, but no such sale of leases shall take place without one month's notice thereof having been given in the <i>Gazette</i> .
Upset price of lots.	9. The upset price of each lot shall be at the rate of one pound per section of six hundred and forty acres, or of ten shillings if half of the current year shall have expired before the day of sale, and the full price bid for each lot shall be paid at the time of sale.
Leases bid for but not paid for.	10. Any lease bid for, but the price of which may not be forthwith paid, shall thereupon be again offered for sale at auction.
Selection of leases not bid for.	11. The lease of any land which may have been offered for sale at auction, and not bid for, may be obtained on payment of the upset price to the Land Agent of the District.
Cancellation of leases.	12. The sale conditionally or otherwise of any portion of land under lease shall cancel so much of the lease as relates to the land so sold and to three times the area thereof adjoining thereto, unless such land shall be sold to the lessee thereof. Leases may also be cancelled by the Minister for other sufficient reason, and the balance of rent from the date of such cancellation shall in either case be returned to the lessee; provided that the lessee of the lands from which such cancellation may be made shall be at liberty either to retain the remaining portion thereof, paying however the same amount of rent as for the whole section, or surrender the same.
Conditional purchasers entitled to leases.	13. Holders of land conditionally sold will be entitled to the same right of leasing adjoining lands by pre-emption as other holders of land in fee simple.
Forms of application.	14. Applications for leases under the pre-emptive right pursuant to the foregoing sections, or for leases to be brought to sale by auction under section 8, must be made in the forms hereto appended, marked A and B respectively.

CHAPTER II.

LEASES OF RUNS.

(SECOND CLASS SETTLED AND UNSETTLED DISTRICTS.)

Terms of leases of old runs.	15. Unexpired leases granted or promised under Her Majesty's Orders in Council, previously to the 22nd day of February, 1858, will, unless where the lands have been or may hereafter be legally withdrawn from lease, remain in force for the full terms, and subject to the conditions prescribed by former Regulations, and by the Act, viz. :— (1.) Leases of runs of the Unsettled Class held under license, or granted by tender prior to the 1st January, 1852, for fourteen years from that date. (2.) Leases of runs in the Unsettled Districts, or in the Second Class Settled Districts, (formerly Intermediate), taken up by tender between the 1st January, 1852, and 22nd February, 1858, for fourteen or eight years respectively, from the date of the first payment of rent under the accepted tender.
Leases under the Act.	On the expiration of such leases new leases will be granted for the term of five years, under the provisions of the Crown Lands Occupation Act of 1861. 16. Leases promised subsequently to the 22nd February, 1858, will have effect for the period of five years from their conversion into leases under the Act, as hereinafter provided; and in such special cases as are provided for by the 15th clause of the Act, with respect to the improvement of water supply, will be renewed for a like period.
Issue of formal leases.	17. Formal leases will be prepared in favour of those claimants who have furnished the Government with such descriptions of the boundaries of their runs as may, although not necessarily prepared for actual survey, be found upon examination sufficiently complete to indicate the lands with certainty, and consistently with the rights of the claimants of adjoining lands. Claimants of leases must afford any explanations or assistance that may be required in defining their boundaries, to such officers as may be employed to estimate the extent and grazing capabilities or appraise the rent of the runs; and if it should appear to the satisfaction of the Government, in any case, that the claimant has refused or failed to afford such explanations, the officer will be instructed to define, and, where necessary, mark the boundaries, availing himself of such information as may be within his reach.
Definition of boundaries.	18. Any claimant who may desire to have his run surveyed, will be at liberty to employ, at his private cost, a licensed surveyor for that purpose, who must conduct the survey under the direction and control of the Surveyor General. In every such case, before issuing a lease, the Government will require to be satisfied that the boundaries are described with due regard to the rights of the Crown and of claimants of adjoining lands.
Survey of runs.	19. Any disputed or overlapping claims to leases that may be found to exist, not already arranged or decided by competent authority, and not involving other interests than those of the respective claimants, will, unless where the Minister for Lands may be satisfied that either claimant has a clear right to the land in dispute, be referred to arbitration, pursuant to the 23rd clause of the Act.
Disputed claims.	

CROWN LANDS OCCUPATION ACT OF 1861.—REGULATIONS.

ANNUAL RENT.

20. The rent of runs of which leases have actually been granted must be paid annually in advance, as prescribed by the terms of the respective leases. Runs under lease.

21. The rent of runs in the Unsettled Districts held under license, and of which leases have not yet been granted, will be computed as hereinafter mentioned:— Old licensed runs.

(1.) Whenever the grazing capabilities of such runs have been regularly assessed, under Her Majesty's Orders in Council, the rental will be that appropriate to such capabilities, computed as therein provided, viz.:—For 4,000 sheep (or the prescribed equivalent of 640 cattle), £10, and for each additional 1,000 sheep, or 160 cattle, £2 10s.

(2.) When the grazing capabilities have not been assessed, the rent will be regulated by the recorded extent of the runs, in the following manner, viz.:—Runs of not greater extent than 25 square miles will be charged £10, and for every additional 5 square miles over 25, an additional charge of £2 will be made.

22. Runs held by accepted tender, prior to the 22nd February, 1858, will, where assessed, be charged rent upon the assessed capabilities as aforementioned, with the addition of the annual premium (if any) offered in the original tender. Where the grazing capabilities have not been valued, immediate steps will be taken for the appraisalment of such capabilities under the Act, and pending such steps the rent of such runs, in addition to the premium (if any) will be computed according to the estimates of capabilities given in the original tenders; but in the event of the rent so commuted and paid in any case proving to have been less than that determined by valuation, the occupant will be required to make up the difference previously to the execution of the lease. Old runs demised by tender.

23. The rent referred to in the three preceding sections (20, 21, and 22) is exclusive of the annual assessment payable under the Increased Assessment and Rent Act of 1858. Rent exclusive of assessment.

24. Runs in the Second Class Settled Districts, of which the original term of lease has expired, will, pending the conversion of the present holdings into leases under the Crown Lands Occupation Act of 1861, to which end the necessary steps will be forthwith taken, be held subject to the like conditions as to the annual rent, as those referred to in section 21; and all runs leased by tender since the 22nd February, 1858, will, in like manner, pending such conversion, be rented upon the same terms as those referred to in section 22; but on the fair annual value for pastoral purposes of these holdings being determined by appraisalment, the lessees will be required to take up the new leases by the payment of the rent thereunder into the Colonial Treasury within two months from the date of a notice in the *Gazette* calling upon them to do so, and they will thereafter cease to be liable to assessment under the Increased Assessment and Rent Act of 1858. Runs coming under the Act.

25. The appraisalment will be made in manner provided by the 23rd clause of the Crown Lands Occupation Act of 1861, and the necessary steps for that purpose will be taken by the officer authorized in that behalf. Mode of appraisalment.

26. The rent of all runs will be payable annually, in advance, at the Colonial Treasury, in Sydney. After the year 1862 the annual payment will be for the period from 1st January to 31st December; and to admit of the adjustment of the periods, one half-year's rent, from 1st July to 31st December, must in all cases, except where the runs may be *actually under lease*, or may have been previously converted into leases under the Act, be paid on or before the 30th September, 1862. For each ensuing year the rent must be paid on or before the 31st December of the year preceding. In the case of runs held under the provisions of the Orders in Council, the failure to pay the rent will entail the forfeiture of the lease, (which may, however, be defeated by the payment within 60 days of the original rent day inclusive, of the overdue rent, with one-fourth added by way of penalty); and in the case of runs held under the Act, the like failure will subject the lessee to the addition of a fine of 8 per cent. on the overdue rent, during the first 3 months that the payment may be in arrear, and of 10 per cent. if more than 3 months, and to the forfeiture of the lease if the rent should remain unpaid for 6 months after the rent day. Periods of payment.

27. Sums of money will be received at the Treasury from holders of runs who may be desirous of lodging funds to meet payments falling due. Moneys will be received on account.

TRANSFERS.

28. Holders of runs of which the leases have not issued may have their rights of lease transferred, by an application addressed to the Chief Commissioner of Crown Lands, and bearing the signature of the person entitled to the lease, attested by a Magistrate, a Notary Public, or a Commissioner of the Supreme Court. On such application being recorded, the applicant will be debarred from all further claim to the lease, the right to which will thenceforth become vested in the transferee. Mode of application.

29. In the event of the person entitled to the lease dying, or being declared insolvent, or being absent from the Colony, the application for transfer may be made by his legal representative or the representative of his estate, but must be accompanied by a certificate from the Crown Solicitor of the applicant's power to effect the desired transfer. Runs of insolvents, or of parties absent or deceased.

30. After the issue of the leases it will be competent for the holders thereof to assign and transfer the same to such persons, and in such manner and form as they may respectively think proper; provided, however, that the operative words "Transfer and Assign" be used, and that no transfer shall be recognized by the Government until the same shall have been recorded in the General Office for the Registration of Deeds in Sydney, and duly notified to the Chief Commissioner of Crown Lands. Runs under lease.

31. Every transfer of a run will carry with it all rights of the transferer in connection therewith, except with respect to any land actually purchased and paid for, the ownership of which will of course remain in the purchaser notwithstanding any subsequent transfer of the run. Transfers to carry all rights of the transferer.

Separate appli- cations.	32. A separate application must be made for the transfer of each run.
Fees.	33. A fee of Two Pounds sterling must, in every case, be paid into the Office of the Chief Commissioner of Crown Lands, prior to the transfer being completed.
Dues in arrears.	34. No run will be transferred in respect to which any dues of the Crown are in arrear.

*
SUBDIVISION OF RUNS.

Runs may be subdivided.	35. Holders of runs under promise of lease under the Orders in Council may be allowed, previously to the issue of the leases, to subdivide their runs into portions of not less extent than will be sufficient for the maintenance of 4,000 sheep or their equivalent in cattle, and to obtain separate leases for the same, subject to the following conditions:—
Measurement.	36. The measurement (where necessary) of the boundary lines shall be made at the cost of the applicant, under the direction of the Surveyor General.
Boundaries may be modified.	37. The Government will reserve to itself the right in every case of modifying the boundaries proposed for the sub-division, so far as may be necessary to render them conformable to these Regulations.
Form of sub- division.	38. Every subdivision must be in a compact block of rectangular form, of which the external lines shall run east and west and north and south, subject to such deviations as the general features of the country, the adoption of natural boundaries, and the shape of the run to be divided, may require.
Water supply.	39. The subdivision must be made so as to secure to each of the reduced runs a fair and adequate share of the water necessary for the beneficial use of the pasturage.

CHAPTER III.

FORFEITED OR VACATED RUNS.

Leases by auc- tion.	40. Leases of such runs as may have been forfeited or vacated by the previous holders, will from time to time be offered for sale by auction.
Payment of rent.	41. The full rent offered will be required to be paid down at the time of sale, to be computed from the commencement of the current quarter to the 31st December ensuing.
Leases not bid for.	42. Any runs, of which the leases may remain unsold after having been twice offered for sale by auction, may be obtained on lease, by application to the Chief Commissioner of Crown Lands, at a rent of not less than £10 per annum, unless in any case in which it may appear to the Minister for Lands to be expedient that the run should again be offered to lease by auction.
Notification.	43. All runs which may be offered at auction will be notified in the <i>Gazette</i> , at the least one month before the time appointed for sale of the leases.

CHAPTER IV.

NEW RUNS.

Tenders for runs.	44. Sealed tenders for runs may be deposited by the tenderers or their agents in a box to be kept for that purpose at the Office of the Minister for Lands, and any tenders which may be transmitted by post will, immediately on their receipt, be placed therein unopened. The tender box shall be opened by the Land Tender Board, at noon, on the first Tuesday of every month, and no tender shall be deposited on that day after that hour. All tenders found in the box shall be recorded by the Board.
Disposal of ten- ders.	45. If there be only one tender for any run, the tenderer shall be entitled to the lease. If there be two or more tenders for the same run opened at the same time, the lease shall be granted to the person whose tender shall contain the offer of the highest premium; but if no one tender be higher than all the others, a fresh day shall be named, on which the persons making the highest tenders shall be at liberty to send in fresh tenders, which shall be dealt with as hereinbefore provided. Should two or more tenders embrace a portion of the same land, the common boundary may be determined by mutual consent or by arbitration under the Act; but should such boundary not be determined within three months of the date of notice in the <i>Gazette</i> informing the parties of the conflict of their tenders, the whole of the lands tendered for may be leased by auction sale.
Forms of tender.	46. Tenders shall be made in the form hereto appended (C); but, up to the first Tuesday in the month of January, 1862, inclusive, tenders in the forms hitherto in use will be received. Such latter tenders will not however be entertained, unless the deposit hereinafter mentioned is lodged in the Treasury not later than the 31st December next. Tenders must be sealed and endorsed "TENDER FOR RUN."
Descriptions in tenders.	47. Every tender shall contain a clear description of the boundaries of the run applied for, and the marks or natural features by which such boundaries are indicated, and also an estimate of its area and pastoral capabilities.
Deposit on ten- ders.	48. Every tender must be accompanied, under the same envelope, by a receipt, shewing that the sum of two pounds ten shillings has been deposited in the Colonial Treasury, and in the event of the ultimate acceptance of the tender, the tenderer shall receive credit for the amount of such deposit in the first year's rent; and in the event of the tender being rejected, the amount shall be returned to the tenderer.
Separate ten- ders.	49. A separate tender must be made for each run.
Deposit on ten- ders already received but not disposed of.	50. All persons whose tenders have already been received under the Orders in Council, but not disposed of, must pay into the Colonial Treasury, on or before the 31st December, 1861, a deposit of two pounds ten shillings for each tender. Any sum so paid shall, in the event of the tender being ultimately accepted, be considered as part of the first year's rent due by the tenderer, and in the event of the tender being rejected, shall be repaid. All tenders upon which no such deposit shall have been paid by the date above-mentioned, shall be forthwith rejected.

51. A run shall in ordinary cases consist of not more than twenty-five square miles; but should that area, in the opinion of the proper officer of the Government, be insufficient in average seasons for the pasturage of four thousand sheep or eight hundred cattle, the run may be enlarged to whatever area not exceeding one hundred square miles may be necessary for that purpose.

Area and capabilities of runs.

52. The Minister for Lands may cause the boundaries proposed in any tender to be modified so as to make the run a compact block of rectangular form, on which the external lines shall run east and west and north and south, subject however to such deviations as the general features of the country and the adoption of natural boundaries may require, and subject also to the exclusion of water necessary to the beneficial occupation of adjoining lands.

Direction of boundaries in tenders.

53. Tenderers for runs must be prepared to point out, on being called upon to do so by the officer employed to report on their tenders, the runs for which they have applied, and the boundaries thereof; and any tenderer who may fail therein will render his tender liable to be summarily rejected.

Tenderers must point out their boundaries.

54. Any tender which may be accepted will be notified in the *Gazette*, and the tenderer will be required to pay his rent and premium (if any), computed for the period from the commencement of the current quarter to the 31st December ensuing, together with the assessment for the year, within 60 days from the date of such notification, under a penalty of the forfeiture of his deposit and of any interest in the lease, and such lease will thereupon be offered to sale by auction.

Notification of acceptance.

55. Until the first year's rent shall have been paid, the applicant will acquire no right whatever to the occupation of the land tendered for.

No right of occupation until rent is paid.

56. New runs, the tenders for which may hereafter be accepted, must be occupied and stocked with not less than 200 cattle or 1,000 sheep, within 6 months, or, in the event of its being necessary to provide water by artificial means, within 18 months of the notification of the acceptance of the tender, otherwise the run will be forfeited and may be leased by auction.

Runs to be occupied and stocked.

57. The runs may be held from year to year, subject to a rent of ten pounds per annum, payable in accordance with section 26 of these Regulations, and to assessment under the Increased Assessment and Rent Act of 1853, until an appraisalment shall be made of the fair annual value thereof for pastoral purposes, whereupon the holdings shall be converted into leases under the Crown Lands Acts of 1861, and the runs shall cease to be liable to such assessment as aforesaid.

Tenure of runs at fixed rent and assessment pending appraisalment.

CHAPTER V.

LEASES OF MINERAL LANDS.

58. Leases of portions of land not exceeding 320 nor less than 40 acres for coal mining lots, and not exceeding 80 nor less than 20 acres for other mineral lots, will be granted for purposes of mining for any metal or mineral excepting gold, for periods not exceeding 14 years, and with a right of renewal for a further period of 14 years, upon the following conditions, upon the breach of any of which in any case the lease will be liable to forfeiture:—

Areas and terms.

59. Persons may on application to the Minister for Lands obtain an authority—to which will be appended a form to be used in making the selection—to select, within twelve months from the date thereof, coal or other mineral lots, and may take possession of such lots and hold them for the period therein mentioned, but the right shall be reserved to determine the boundaries of any such lots and to make provision for reservation of water supply.

Authority to select mineral lots.

60. The rent shall be five shillings per acre, payable annually in advance at the Colonial Treasury; the first payment to be made on application for authority to select, and thereafter within the month of September for each ensuing year. Leases shall in all cases end on the thirty-first day of December.

Payment of rent.

61. Lessees shall expend at the rate of five pounds sterling per acre on their lots, within the first three years of their leases.

Necessary annual expenditure.

62. Lessees may determine their leases, by giving to the Minister for Lands three months' notice, in writing, of their desire to do so, but no rent shall in any case be refunded.

Determination of leases.

63. Lessees may, on application in writing to the Minister for Lands, during the thirteenth year of their leases, obtain a renewal of the same for a further period not exceeding fourteen years; and a fine shall be paid on such renewal, not being less than two pounds ten shillings per acre to be determined by appraisalment of the value thereof. Full information of the working and returns of the mine must be afforded to the appraisers by the lessees, on pain of forfeiting their claim to renewal.

Renewal of leases.

64. If any lease be forfeited or not renewed, the lessee shall be at liberty, within six months from the termination of his lease, to remove or otherwise dispose of all machinery and improvements and the minerals brought to the surface during the term of his lease.

Removal of machinery and minerals.

65. Applications for authority to select mineral lots must be addressed to the Minister for Lands, stating the area proposed to be selected, and accompanied by a receipt shewing that the rent thereupon has been lodged in the Treasury.

Mode of application.

66. Such applications for leases of mineral lands as may have been made before the passing of the Act, shall be dealt with before authority to select is granted to any new applicant.

Applications already made.

67. The authority to select, when granted, will be in force for twelve months from its date; and after making his selection, the holder will be required immediately to report the

Mode of selection.

the

the same to the Minister for Lands, by transmitting the form appended to such authority, filled in with full particulars as to the situation and proposed limits of the lot selected, and the minerals for the working of which a lease is desired.

Reservation of right of inspection.

68. The Government will in all cases reserve to itself the right of inspecting by its officers the land leased, and any buildings, machinery, or other improvements thereupon, with a view of ensuring the due observance of the conditions of lease.

Certain lands excepted.

69. Mineral lands under proclamation or measurement for sale by auction before the promulgation of these Regulations will not be open to lease thereunder.

CHAPTER VI.

TIMBER CUTTING.

Licenses to be issued by Land Agents.

70. Licenses to cut timber may be obtained on application to the various Land Agents.

Separate license for each person.

71. A separate license must be taken out by every person actually employed in felling, cutting, sawing, splitting, or removing timber from Crown lands, except fuel not cut for sale. The license will be personal to the holder, and will not be transferable.

Licenses.

72. The licenses shall be of two kinds—one empowering the holder to cut any kind of timber, as well cedar and pine as hardwood, for which a fee of £6 will be payable; the other will be restricted to hardwood only, and the fee thereupon will be £2.

Fees.

Payment of fees.

73. The fee must in every case previously to the issue of the license, be paid to the Land Agent, by whom all such collections are to be accounted for, and paid over in the same way as other public moneys passing through his hands.

Operation of license.

74. Licenses will empower the holders of them to cut timber on any Crown lands whether held under lease or otherwise, except timber within half-a-mile of any head station, or which may have been specially reserved with the consent of the Commissioner of the District for shade or ornament.

Licenses not to extend to certain lands.

75. Licenses granted under these Regulations will not extend to Crown lands under advertisement for sale, or to any localities in which the cutting of timber may be, by notice in the *Gazette*, specially prohibited.

Duration of license.

76. The licenses will be in force from the date of issue until the 31st December then next ensuing, but licenses taken out on or after the 1st July will be charged only half the regulated fee.

Timber to be removed.

77. The timber must be removed from off the Crown lands within 12 months from the time at which it was cut, otherwise it will be liable to be seized, forfeited, and sold, on behalf of the Crown.

Cutting trees without authority; proceedings against offenders.

78. Persons illegally cutting timber on Crown lands will be proceeded against under the 33rd clause of the Act, or otherwise as may in any case be by law directed.

Seizure of timber.

79. All timber cut by unauthorized persons, and all cut timber lying on Crown lands which there may be reason to believe has not been cut by a duly authorized person will be seized; but in case a right to such timber shall be asserted within 14 days after the notice to be presently mentioned, and shall be established to the satisfaction of the Police Magistrate or Bench, its restoration to the claimant may be ordered.

To be sold after due notice.

80. Such timber, when seized, is to be marked with the broad arrow; and after due notice of the seizure thereof, by a writing to be posted up at the principal place of Petty Sessions of the District, shall, unless a claim thereto shall be made within 14 days thereafter, and duly established, be sold.

Proceeds.

81. The proceeds of the sale of timber so seized are to be accounted for and paid over like other public moneys.

Crown lessees may cut timber.

82. Lessees of Crown land are at liberty to cut any timber required by them as tenants of their several lands, but not for sale.

Return of licenses to be transmitted half-yearly.

83. A return of all licenses issued is to be forwarded half-yearly by the respective Land Agents to the Chief Commissioner of Crown Lands, by whom they will be published collectively in the *Gazette*.

CHAPTER VII.

LEASES FOR SPECIAL OBJECTS.

Mode of application.

84. Persons who may be desirous of leasing portions of land for any of the special purposes contemplated by the 30th clause of the Act, may make their applications to the Minister for Lands,—setting forth respectively the position and extent of the portions they are desirous of leasing, the objects for which a lease is desired, the rent offered, and such other information as may tend to facilitate the disposal of their applications.

Disposal of applications.

85. All such applications will be duly inquired into, and dealt with upon their merits, as may be deemed expedient by the Government; and in the event of any application being complied with, the applicant will be duly apprised of the conditions on which a lease will be granted, and of the rent which he will be required to pay.

Payment of rent.

86. Such rent must, for the first year, be lodged in the Treasury within three months from the publication in the *Gazette* of a notice to that effect; and for any subsequent year, on or before 31st December of the year preceding, otherwise the lease will be forfeited and may be brought to sale by auction.

CHAPTER VIII.

TEMPORARY COMMONAGE.

87. Crown lands not reserved for or dedicated to any other purpose, within the limits within which lands adjacent to any town are not open to pastoral lease under the Act, will ordinarily be devoted to temporary commonage, and placed, with any lands already set apart for that purpose, in the charge of the Trustees (if any) of the permanent Common

in

CROWN LANDS OCCUPATION ACT OF 1861.—REGULATIONS.

in the same locality. Temporary commonage may, wholly or in part, at any time be exempted by the Government for sale, lease, or other purposes; and shall be open to the pasturage of horses and cattle in use by travellers, teamsters, and carriers, for three days at any one time, or for such longer period as floods or other unforeseen natural causes may render unavoidable.

CHAPTER IX.

TRESPASSES ON CROWN LANDS.

88. Any person who may be found in the unauthorized occupation of any Crown land may, under the 32nd and 33rd clauses of the Act, be summarily removed therefrom, or fined, on conviction before two Justices of the Peace, on the information of any Commissioner of Crown Lands, or other person authorized by the Minister for Lands. Removal and penalties on conviction summarily.

89. Whenever the land intruded upon is not under lease, or promise of lease, it will be the duty of the proper officer to prosecute the trespasser; but on its being made to appear by the lessee, or lawful holder of any land, that any portion of his holding has been intruded upon by an unauthorized person, such lessee will be empowered to prefer an information against the intruder. Manner of prosecution.

90. In cases of disputed possession between the authorized holders of adjoining lands, the Government will not under ordinary circumstances interfere, unless the claims to leases should be found to conflict, in which case the dispute will be referred to arbitration, as hereinbefore provided. Disputed boundaries.

CHAPTER X.

MISCELLANEOUS.

91. The Chief Commissioner of Crown Lands is empowered and authorized to perform all matters and things not otherwise specially provided for, which, by the Crown Lands Occupation Act of 1861, or by these Regulations, are required or permitted to be performed by an authorized Officer or Agent of the Crown. Authority to Chief Commissioner of Crown Lands.

92. The various forms prescribed by these Regulations will be supplied to the public at a charge of two-pence for each form, at the Government Printing Office, Sydney, and at the various Land Offices throughout the Colony. Forms.

FORM A.

To be used in claiming to lease adjoining lands under the pre-emptive right, within the First Class Settled Districts.

Place
Date

Sir,

In pursuance of the conditions annexed to the 12th clause of the Crown Lands Occupation Act of 1861, I do hereby apply to be allowed to lease the sections or portion of Crown Lands hereunder described, at the fixed rent of £2 per section.

The land in virtue of which I claim to exercise a right of pre-emption is situated as follows, and is now in my possession, viz. :-

County of _____ Parish of _____ situated *
containing _____ acres being the land † to ‡

I am, &c.,

To the Honorable
The Minister for Lands, Sydney.

Description of the sections or portion applied for. †

* State general situation of the land.
† "Sold," "conditionally sold," or "granted," as the case may be.
‡ State name of purchaser or grantee.
§ State the boundaries as accurately as possible, with reference to natural features, section lines, and purchased lands in the vicinity.

FORM B.

Form of Application for a Lease of Crown Lands within the First Class Settled Districts to be brought to sale by auction.

Place *
Date

Sir,

In pursuance of the conditions annexed to the 12th clause of the Crown Lands Occupation Act of 1861, I have the honor to request that the leases of the portions of Crown Lands hereunder described may be put up to public auction.

I am, &c.,

To the Honorable
The Minister for Lands, Sydney.

DESCRIPTION OF LANDS REFERRED TO.

County of _____ Parish of _____ situated †
and bounded, &c. ‡

* State nearest Post Town.
† State general locality.
‡ State the boundaries as accurately as possible, with reference to natural features, section lines, and purchased lands in the vicinity.

1861.

Legislative Assembly.

NEW SOUTH WALES.

TENDERS FOR RUNS.

(RETURNS RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 20 November, 1861.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 20 September, 1861, That there be laid upon the Table of this House,—

“ (1.) Return of all New Runs tendered for from 1st of January, 1861, to 30th September, 1861, shewing the Date of Tender, Name of Tenderer, Name of Run, where Situated, and in what District.

“ (2.) Return shewing all Runs reported upon by Mr. Commissioner Huthwaite, in the Warrego District; the Date when referred to him for Report, Date of Report, and nature of such, during the time he has held office.”

(*Mr. Rusden.*)

TENDERS FOR RUNS.

No. 1.

A RETURN of all NEW RUNS tendered for from 1st January, 1861, to 30th September, 1861, shewing the Date of Tender, Name of Tenderer, Name of Run, and District in which situated.

A. ORPEN MORIARTY,
Chief Commissioner of Crown Lands.

No. 2.—APPENDIX.

The Commissioner of Crown Lands, Warrego District, to the Chief Commissioner of Crown Lands, with reference to Memo. on unreported Tenders.

(61-143 a.)

Crown Lands Office,
Warrego, 22 October, 1861.

Sir,

Memo. 61-412.

With reference to your letter of 24th April, 1861, complaining of the number of tenders remaining for report in my district, I do myself the honor to forward you a precis of the work performed by me since my appointment.

2. I have visited the Bairungha or Warrego three times; on one occasion I ran it up one side and down the other to the supposed boundary line separating this Colony from Queensland. I have frequently been over the Barwan frontage, from the Bogeira junction to my southern boundary. I have ridden up one side, and down the other of the Culgon (twice, and in some parts three times); the

the Brie, (twice); Narran, (twice); and Bogaira. I have run the Burban down, and visited the Springs between the Culgon and Warrego, having been camped from the 1st October, 1860, to 10th January, 1861, on those creeks, and continually employed during that time in inspecting the country; and then met on the ground such tenderers as chose to be present.

3. I have had for report about 1,200 tenders, of which I have reported on 352, besides sending back 167 as situated in Queensland or other districts.

4. I may remark that the tenders have been accumulating since 1855; in fact some few are in the years from 1850 to 1854, and clash and overlap in all directions; every possible attempt has been made, by many of the parties tendering, to mislead me with regard to the position of their tenders, and I believe no Commissioner has had greater difficulties to contend with than myself.

I have, &c.,

A. G. D. HUTHWAITE,
C. C. Lands.

 MR. F. W. BIRMINGHAM.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 1st of October, 1861, "to consider and report upon the claims of Mr. F. W. Birmingham, Surveyor, for compensation for breach of Contract by the Government, with power to send for persons and papers,"—have agreed to the following Report:—

From the evidence taken by the Committee, it appears that in February, 1860, Mr. Birmingham, who had been a Licensed Surveyor but had resigned, applied to A. G. McLean, Esquire, then Acting Surveyor General, for employment, and was informed that there was then no vacancy, but he could have a contract to survey and subdivide into farms the north area of the Richmond River, from a place called Yabsley's Junction to Lismore, with a depth of from two to three miles on either bank, at the rate of two pounds per mile for feature surveying, and the usual scale of charges for farm portions. Mr. Birmingham hesitated to take two pounds per mile, from the difficulty of surveying the brush and scrub land, which formed a great part of his contract; but after consideration accepted these terms, calculating on the facility with which he could survey the plainest portion of his contract to compensate for the delay in the other. Mr. Birmingham was to send in his designs to the Acting Surveyor General for approval, before proceeding to mark them out on the ground; and to enable Mr. Birmingham to procure the necessary equipment and outfit for such an undertaking, an advance of a hundred and fifty pounds was made to him by the Secretary for Lands, which was to have been repaid from the receipts for work performed in accordance with the contract.

Mr. Birmingham, after engaging the necessary staff of men and procuring outfit, proceeded to the Richmond, and commenced survey on the 17th March, 1860; he sent in designs of farms as shewn on tracing No. 1, which were approved of by the Acting Surveyor General, and proceeded satisfactorily with the survey until he wrote letter No. 8, proposing a town for the consideration of the Acting Surveyor General. This letter, containing tracings of town designs and several farm designs, was never answered, although Mr. Birmingham states in evidence that he considered it within his province to make such recommendations, according to instructions received by circular from the Survey Department, and from this time it appears from the evidence of Mr. Birmingham, that he received no decisive instructions to enable him to proceed with his survey.

Mr.

Mr. Birmingham appears then to have written to the Acting Surveyor General, complaining that his letters containing farm designs were not answered, and that if he did not receive a reply containing the necessary approval, he would be compelled to break up his party and leave the River; and no information arriving respecting the survey, or communication explaining delay, Mr. Birmingham broke up his party and left the River.

Your Committee find that Mr. McLean states in evidence, that no delay longer than three weeks or a month could have occurred in receipt of his reply to letters Nos. 21 and 22 of December; this reply, however, Mr. Birmingham never received, having left the River previously to its arrival, and that letter laid before the Committee cannot be said to contain any instructions relative to the seventy-two farms design, being rather a reply to Mr. Birmingham's letter (No. 23) complaining of want of instructions.

Your Committee are of opinion that much of the correspondence of Mr. Birmingham was indiscreet in its character, and cannot but express their disapproval of the style adopted by him in his communications; notwithstanding which it appears to the Committee, that the delay in answering Mr. Birmingham's letters, containing designs which could not be executed until approved of, and in the isolated position in which he was, with a party of men to ration and pay, in some measure palliate the course taken by him.

Your Committee find that Mr. Birmingham failed to obtain redress on his return to Sydney, from the Minister of Lands to whom he referred; Mr. Robertson having concurred in a report from the Acting Surveyor General, the tenor of which was that Mr. Birmingham's correspondence was of such an intemperate character, that unless he made the fullest apology for them, he would be precluded from any employment in the Survey Department, further than would compensate for the £150 due by him; and the evidence of Mr. Birmingham shews that he has been idle the greater part of the time, since awaiting an adjustment of the difference between himself and this department.

Your Committee, after fully considering the merits of this case, recommend Mr. Birmingham to the favorable consideration of the House, and are of opinion that justice would be best met by the Government re-establishing him in his contract, and that the question of compensation for the time he has lost in seeking redress might be met by foregoing what is due by Mr. Birmingham to the Government, the evidence of the Acting Surveyor General going to shew that Mr. Birmingham is a qualified, painstaking, and conscientious surveyor. By this means justice would be done to Mr. Birmingham; the amount now owing by him to the Government would be repaid; and the survey of the North arm of the Richmond, which was required in the first instance, would be completed.

JNO. LACKEY,
Chairman.

*Legislative Assembly Chamber,
Sydney, 17 December, 1861.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 9 OCTOBER, 1861.

MEMBERS PRESENT :—

Mr. Cunneen,		Mr. Lackey,
Mr. Hoskins,		Mr. Shepherd.

On motion of Mr. Shepherd, J. Lackey, Esq., called to the Chair.
 Order of the House, appointing the Committee, upon the Table.
 The Chairman stated, generally, the alleged grievance of Mr. Birmingham.
 Committee deliberated.
 Mr. F. W. Birmingham to be summoned to give evidence at the next sitting.
 [Adjourned till Friday, 11th instant, at *Eleven* o'clock.]

FRIDAY, 11 OCTOBER, 1861.

MEMBERS PRESENT :—

J. Lackey, Esq., in the Chair.

Mr. Bell,		Mr. Hay,
Mr. Forster,		Mr. Hoskins,
Mr. Shepherd.		

Mr. F. W. Birmingham called in and examined.
 Several documents handed in, and ordered to be appended to the Evidence. (*Vide List of Appendix.*)
 Ordered, That the Acting Surveyor General be called as a witness at the next meeting, and that he be required to produce all Papers relating to the contract of Mr. Birmingham.
 [Adjourned till Wednesday, 16th instant, at *Eleven* o'clock.]

WEDNESDAY, 16 OCTOBER 1861.

MEMBERS PRESENT :—

J. Lackey, Esq., in the Chair.

Mr. Bell,		Mr. Hoskins,
Mr. Forster,		Mr. Shepherd.

Letter from Mr. Birmingham, referring to a portion of the evidence given by him upon the 11th instant,—received and read.
 On motion of Mr. Shepherd, same ordered to form a further appendix to his evidence.
 Mr. Alexander Grant McLean, Acting Surveyor General, called in and examined.
 Witness produced the papers relating to the contract and claim of Mr. Birmingham ; copies of certain whereof ordered to be appended to the evidence. (*Vide List of Appendix.*)
 [Adjourned till Thursday, 24th instant, at *Eleven* o'clock.]

THURSDAY, 24 OCTOBER, 1861.

MEMBERS PRESENT :—

J. Lackey, Esq., in the Chair.

Mr. Cunneen,		Mr. Shepherd,
Mr. Forster,		Mr. Walker.

Mr. A. G. McLean, and Mr. F. W. Birmingham, called in.
 The evidence given by Mr. McLean, on the 16th instant, read by direction of the Chairman.
 Mr. Alexander Grant McLean, Acting Surveyor General, further examined.
 Certain questions to witness put by Mr. Birmingham, through the Chairman.
 Further examination concluded.
 Mr. F. W. Birmingham further examined.
 Committee deliberated.

[Adjourned.]

Legislative Assembly.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE CASE OF

MR. F. W. BIRMINGHAM.

FRIDAY, 11 OCTOBER, 1861.

Present:—

MR. BELL,
MR. FORSTER,
MR. HAY,

MR. HOSKINS,
MR. LACKEY,
MR. SHEPHERD.

J. LACKEY, ESQ., IN THE CHAIR.

Mr. Frederick William Birmingham called in and examined:—

1. *By the Chairman:* You took a contract, I understand, from the Surveyor General's Office, to survey the northern arm of the Richmond River? Mr. F. W. Birmingham. Yes.
2. Will you state about the time this was entered into? On the 13th February, 1860, I went to the Surveyor General's Office, and was offered a contract for¹ the survey of the northern arm of the Richmond River. 11 Oct., 1861.
3. Was there any written contract made? The terms were stated and I refused the contract. After studying two maps in the Surveyor General's Office, made by Mr. Darke, I said I would not accept of it. I was asked if I would go upon a salary and I refused to do so².
4. You mean that you hesitated —? I refused it; the Acting Surveyor General, Mr. McLean said, "What is your reason for refusing it; could you not make a considerable profit from the plains?"—putting his fingers over the plains of my contract.
5. You applied, in the first instance, to the Surveyor General's Office? Yes; I may mention in the first place I had resigned my license as surveyor for the district of Parramatta, and Colonel Barney had accepted of the same in his letter of the 18th October, 1858, to me, in which he says he had received my letter, "which I apprehend to be a virtual resignation of your license. I beg to inform you I accept the same, and I have intimated such acceptance to the Honorable the Secretary for Lands and Works." I then went for about a year to Melbourne, California, Vancouver's Island, and other places, and returned to Melbourne, after having spent all my money. I telegraphed from Melbourne on the 30th December, asking for employment from the Minister for Lands and Works, thinking both offices were combined, and not knowing what changes had taken place during my absence. I received a reply on the 3rd January, 1860,—“You must write, stating particulars in full.” I wrote the next day, 4th January, 1860, and posted the letter. On the 14th January I telegraphed stating that I was moving up to Sydney, and that after the 15th my address would be Sydney. Arrived in Sydney 19th January, 1860. A few days afterwards I³ refused the licensed surveyorship of Parramatta.

6.

¹NOTE (on revision):—Take out *for*.

²Revised:—I asked to be allowed to do it upon salary, and the Acting Surveyor General refused, saying there was nothing but a contract to offer me, which I was at liberty to accept of if I thought proper.

³Revised:—A few days afterwards I was refused.

- Mr. F. W. Birmingham. 6. This was offered to you? No; after I came up from Melbourne I went to the Survey Office and there was nothing for me—there was no vacancy.
- 11 Oct., 1861. 7. Was it at this time you were offered the 'surveyorship'? No, I suppose some friends of mine exerted some influence, though I never asked them, and I do not know even to the present day who it was, but at all events, a few days after I received this short note. (*The witness handed in the same. Vide Appendix A.*) On the 13th February, 1860,—the following Monday,—I went to the Surveyor General's Office, when the survey of the north arm of the Richmond River was offered to me by Mr. McLean, the Acting Surveyor General, and he stated the prices that would be paid, as will appear by letter No. 60-299, (*Vide Appendix B.*) He then said, "You can take these maps into the next room and study the matter." I went into the room where I found Mr. Brindley, Mr. Lewis, Mr. Mann, and some others, and we talked over the matter. The work on the Richmond River, among the scrubs, was represented as being very heavy, and I had my doubts whether I could hold my ground for six months. I am ashamed to produce these maps, as they have been used in the field; but the Committee will see the nature of the survey by reference to them. (*The witness produced two maps, and pointed out the portion he was required to survey.*) When I returned to the Acting Surveyor General I refused to accept the contract,³ but did not tell my reason;⁴ and then he asked me, "How is it; could you not make a considerable profit from these plains?" and he put his hands over the map of which this is a copy, to point them out. It was all open work, comparatively speaking, from seven and a half miles up to twenty-one. I said, "Certainly; I could make a profit from these plains, but I am afraid the profit would be more than counterbalanced by the loss of time in⁵ cutting my way through dense scrubs;" and I knew also that there had been a great deal of rain during the winter⁶ "but," I said, "I think by long hours and hard work, I could make a fair profit upon the whole." Then he said, "What is your reason for not accepting it?" I said, "The work is too large, for I was never poorer than I am at the present time." "Is that the only reason?" I said, "Yes, the only reason; the extent to be surveyed does not frighten me; I only wish it was ten times as large, and that I had the means to undertake it." He said, "If that is the only reason I will apply for authority for an advance for you; go into the next room, and⁸ see what money you will require—recollect you cannot do without a boat."⁹ Of course I knew that from Mr. Peppercorne and others. I went into the next room, and had a chat with Mr. Mann, the licensed surveyor of Goulburn, Mr. Lewis, Mr. Brindley, and some others who were passing in and out. The whole matter was freely talked over, the maps lying before us. I went into the Acting Surveyor General's room about twenty minutes afterwards, and Mr. McLean said, "Have you made an estimate of what money you will require?" I replied, "Yes sir." He said, "I suppose nothing short of £150 will do you?" I do not know whether he had heard that sum named, as there was only the door between us when I was in the other room; but that was the sum we had fixed upon,¹⁰ and I had written it upon a piece of coarse paper I held in my hand. I said, "That is exactly the sum," turning the piece of paper in the palm of my hand, upon which the figures were written. He said, "I will apply for the advance, but still I consider you the same as a licensed surveyor." I said, "I am not a licensed surveyor; I gave up my license for Parramatta, and advertised three times in the papers, thanking¹¹ them for their support. "When I left the Colony I never intended to see it again; and I was induced to try California as a surveyor." "Well," said he, "You must be a licensed surveyor,¹² I consider that you only gave up your license for the Parramatta district."
8. Would the fact of your being, or of your not being, a licensed surveyor, affect your claim? ³He said, "You cannot carry on this contract without being connected officially with the department, and you must be a licensed surveyor, or sign as licensed surveyor." I cannot repeat his exact words, but that is the sense of it. I replied, "It does not matter to me, I can head my letters 'Licensed Surveyor.'" I got an advance of £150. Before leaving the office I mentioned to the Acting Surveyor General that I thought for some time.¹⁴ I should not be able to repay any part of the £150 for, as I shewed him, the first part of the work would be very heavy, and I said as the winter was coming on, I thought for the first six months I should not be able to do more than hold my ground. He said, "Well write in and state how you intend to pay it; the Government do not give with one hand and take away with the other." I went to the river and broke ground as I term it.
9. That is, you commenced your survey? Yes, on the 17th March.¹⁵
10. Of course before going you were provided with the necessary equipment? Yes.
11. How many were there in your party? Eight of us altogether; it was a strong party.
- 12.

¹Revised:—The survey. ²NOTE (on revision):—Mounted tracings from the originals.

³NOTE (on revision):—Take out "but did not tell my reason."

⁴Revised:—And then he replied, "Why, you don't mean to say that you could not make a considerable profit from these plains?" (*Putting his fingers over the map.*)

⁵Revised:—In working the scrubs, and from delays during the rainy seasons.

⁶NOTE (on revision):—Take out, "And I knew also that there had been a great deal of rain during the winter."

⁷Revised:—"That can prevent your undertaking it?" I said, "Yes sir, &c."

⁸Revised:—And make an estimate of what money, &c.

⁹Revised:—Boat—of course the Acting Surveyor General knew from Mr. Peppercorne and others that a boat was requisite.

¹⁰Revised:—But that was the sum I had calculated I should want.

¹¹Revised:—The public for their past support.

¹²NOTE (on revision):—Take out "you must be a licensed surveyor," and insert "I consider you as still a licensed surveyor."

¹³NOTE (on revision):—I think I said "I do not know;" and Mr. McLean said, "I consider you as a licensed surveyor, and you must head your letters so."

¹⁴Revised:—"For the first six months" I could not repay any part, &c.

¹⁵NOTE (on revision):—17th of March I took my men out for bush work.

12. Had you to provide the usual equipment? Everything.
13. Surveyor's instruments, those you had I suppose? No, I had not; I bought surveying instruments, tents, food, camp-kettles,—everything.
14. Had you to defray the expenses of your men up to the Richmond, where you commenced the survey? Yes;¹ matters went on very well between the Acting Surveyor General and myself for some months,² and I thought he had behaved very kindly towards me.
15. I understand that you had to send in designs which had to be approved by the Acting Surveyor General previously to your executing them? Yes, and as he then said "it was a form pertaining to the department, I therefore had better send in designs for approval, and he had very little doubt that whatever I recommended would be adopted." There were several other matters spoken of, and I may here say that my instructions consisted of three sorts, verbal, written, and printed. I have here a map which will enable the Committee to understand the correspondence which passed between the Acting Surveyor General and myself, and the Honorable the Minister for Lands and myself. (*The witness handed in the same.*) Matters went on pretty well for six months, when I wrote a letter relative to the plain at my camp, No. 2, marked B I on the maps, and I proposed, as I thought I had a right to do, a town and canal upon one of my tracings. I considered, seeing that other places that were not suited for towns, had been proposed, I would not be doing my duty to the Survey Department if I did not mention that I believed those places were not suited for towns, and that the place where my camp was situated was the best on the Richmond River for the chief town of the County of Rouse; I thought I was fully justified in doing this when Mr. McLean had said "We have every confidence in your work, and no doubt what you recommend will be adopted." I received written instructions from Z to Z, the east side of the north arm, to the measured lands at Gundurimba; these instructions were, that I was to cut up the lands into farms.
16. *By Mr. Hay*: Can you hand in those written instructions? The Surveyor General has all my letters.
17. Have you a copy of the written instructions? I have the written instructions, but the circulars are all in the books of the Surveyor General's Office, and my answers are all there, but I have not my answers here.
18. It is the written instructions I am asking about? (*The witness handed in the same, vide Appendix B.*)
19. *By the Chairman*: Then you proceeded in accordance with those instructions? Yes, with a slight deviation from those written instructions on a portion of one of my tracings, that is, the extent of land represented on the map handed in as B I. That represents the size of the tracing; but, of course, I have kept no copy of these tracings; they are in the Surveyor General's Office. Upon that tracing I shewed a small part as a town design, and my reason for deviating from these written instructions was, that I considered I had also to pay attention to the printed circulars of the department, as well as to the verbal assurance that whatever I recommended would, in all probability, be adopted, so that I felt it to be my duty to communicate my ideas to the Acting Surveyor General. My reason for making this proposal was supported by the circular from the Surveyor General's Office, dated 25th January, 1859. (*The Witness handed in the same. Vide Appendix C.*) I thought this particular land was worth more than £1 an acre, and I considered it the best site in the County of Rouse for the chief town. I was also acting as a licensed surveyor, although I was not actually gazetted, for, as I have explained before, Colonel Barney had accepted my resignation before I left the Colony. I considered that that circular, amongst several others placed in my hand, should warp my mind from written instructions that were written by a person not knowing the ground to which they referred; for I have learned, from parties upon the river, that the district surveyor has never surveyed that country, and Mr. Darke, who is the only party who has reported upon the town.⁴ I thought, therefore, there would be no harm to shew that a site⁵ where people would be flooded out, as they would be at Yabsley's Junction.
20. Is that the site where the town was proposed to be? Yes; it was not a proper site for a town,⁶ and to point out a better one. I therefore sent my letter No. 8; this has never been answered, and has caused all the disturbance. The Acting Surveyor General has, however, made use of that letter; for, in a portion of that letter you will find that I proposed two native names, as the names of parishes Corakii and Tucki Tucki, and since I returned from the river the fifteen farms shewn on that map at the Junction have been advertised as being in the parish of Corakii. So that it is evident the Acting Surveyor General made use of that letter, although he never thought it worth while to give me an answer to it. That letter, which was the stumbling block in the contract, I beg to hand in. (*The witness handed in the same. Vide Appendix D.*) To shew that I acted in conformity with the printed instructions from the Surveyor General's Office, I beg to refer the Committee to the first paragraph of the circular, dated May, 1859, which I now beg to hand in. (*The witness handed in the same. Vide Appendix E.*)
21. It was in accordance, as you conceived, with this instruction, that you went into such voluminous detail in describing these parishes? Yes; I consider these circulars as standing orders. It will appear by the correspondence that Mr. McLean has said I did not send in the necessary designs. Now the three tracings I sent in shewed farms upon each
- of

¹NOTE (on revision):—I had to pay for everything excepting wood and water.

²NOTE (on revision):—And he behaved kindly to me. ³Revised:—Examined.

⁴Revised:—In so far as I can learn.

⁵NOTE (on revision):—Take out "that a site," and write "to shew a better site for a town than that one at Yabsley's Junction, which is full of salt swamps or lagoons, and subject to floods."

⁶NOTE (on revision):—Therefore I pointed out a better one.

Mr. F. W.
Birmingham.

11 Oct., 1861.

Mr. F. W.
Birmingham.

11 Oct., 1861.

of them; but there was a little piece of this second tracing which shewed where I proposed to have a town. That slight deviation was, as I believed, justified by the circular I have put in. Wherever I thought the land was worth more than £1 an acre I considered myself bound to mention the matter. ¹Of course if the Acting Surveyor General had given me instructions to the contrary I would have attended to them, but I received no answer to my letter, and heard nothing about it until nearly three months after.² In the month of October I wrote to Mr. Mansfield asking him to be good enough to see whoever was chief draftsman, and ask him what was being done in reference to my tracing³ in letter No. 8, in which I proposed a town and canal. He took my letter, which I have not a copy of, to Mr. Adams, who was acting chief draftsman, and Mr. Adams took it to Mr. McLean, Acting Surveyor General. Mr. Mansfield, who is now in the Crown Lands Office, in his letter to me, dated 23rd October, 1860, says, "I took your letter to the chief draftsman, Mr. Adams, and he took it to the Surveyor General for information relative to it; and it appears that tracing No. 2, containing the proposed design for a town and canal, is abandoned, but it was hinted that you could—or it was proposed—have a kernel by extra pay for your thick brush."⁴

22. *By Mr. Hay:* What does that mean? In my letter to Mr. Mansfield I compared my contract to a handful of nuts, and that I had broken some of the shells, which were the dense jungles, and that I now wanted the plains which were the kernels of my contract. I wrote to say that I did not want a kernel, but I wanted only what my contract justified me in looking for. Mr. Mansfield, I believe, did not deliver that message; the Acting Surveyor General took upon himself to offer me a kernel⁵ In the list of prices the licensed surveyors' scale of fees, £2 per mile linear measurement, was allowed, deducting from farm surveys any portion of the feature survey that formed the boundary of the farms, [and I pointed out to Mr. McLean that it took me two days sometimes to cut a mile;] and he said before I got my instructions, that that was to⁶ counterbalance my profits from the plains—the plains I never got an inch of. Some of my men went off to Kiandra Diggings, and I had no instructions about this letter No. 8.

23. *By the Chairman:* Are the Committee to understand that you were idle for want of proper instructions? No, up to this time I was not idle; but seeing that the instructions did not come out to me I was afraid of engaging a full party, and merely kept sufficient to enable me to go at a sort of quarter speed with the feature survey of No. 3 tracing, while tracing No. 2 was under consideration. This letter led me to believe that they were not going to give me the plains, for William Wilson, junior, son of William Wilson, squatter and Magistrate, of Lismore, said they might as well give up their station as lose the plain I was camped on. Some six weeks after that he called at my camp, and said he knew for a fact the Government would not sell the plain I was camped on. Mr. Peppercorne, the assistant surveyor, also came to my camp, and said I would have a good deal of trouble with the contract, and why did I not apply to the Department of Works, which was giving even young men £600 or £700 a-year? All this occurring about the same period of time I concluded it was not intended to give me the plains. This letter is dated the 21st November, 1860, and offers me fifty per cent. increase upon the price previously paid¹⁰ for scrub work; so that they would give me, as I remarked, with one hand, and take away with the other.¹¹

24. This you conceived to be an alteration of the original agreement between you and the Survey Department? Yes. (*The witness handed in the letter. Vide Appendix F.*)

25. *By Mr. Hay:* Between the 7th August and the 23rd of October, had you written no letter to the Acting Surveyor General? Not on this subject.

26. Not on the subject of the designs of your lands at all? Really I cannot say.

27. Cannot you say whether you had written any letters at all in that interval? The 2nd October appears, as far as I can see, to be the date of the next letter. I received letters from the Acting Surveyor General, but cannot, at the present moment, recollect their dates. I recollect I wrote on the 2nd October.

28. *By the Chairman:* Have you copies of all the letters you wrote? I kept rough copies of them, with the exception of No. 5, which I made a memorandum of, but I have not produced them here.

29. What was the subject of your letter No. 5? I made a proposition that after the 3rd¹² of August I would begin to pay back the £150, in accordance with the original understanding, which was that I should pay twenty-five per cent. upon all farm surveys—not feature surveys. In proof that this was the understanding, I may state that a feature bill has since been paid, and nothing was then said about the deduction. In order then to pay back this £150, it would have been necessary that I should have had £600 worth of farm survey, and I have not had a farthing of that yet.

30. *By Mr. Hay:* Then you say you wrote only one letter in the interval between the 7th August and the 23rd October? Yes. I have not all my letters here, but the next letter I have is that just handed in. (*Appendix F.*)

31.

¹Revised:—Of course, if the Acting Surveyor General said he did not want a town, I would have attended to his wishes.

²NOTE (on revision):—"Three months after"—add "in this way."

³NOTE (on revision):—Insert "forwarded with letter No. 6."

⁴NOTE (on revision):—Should not Mr. Mansfield's letter be appended?

⁵NOTE (on revision):—Insert "did not want Mr. McLean's kernel."

⁶Revised:—Which I did not ask for.

⁷NOTE (on revision):—The words between brackets should be placed after the words "inch of."

⁸Revised:—That the dense scrubs would.

⁹Revised:—The Acting Surveyor General did not intend giving me the plains, &c.

¹⁰NOTE (on revision):—Insert "accepted of by me," in place of the word paid.

¹¹Revised:—Or in other words give 50 per cent. on the feature survey bills, and take 50 per cent. off the farm surveys.

¹²NOTE (on revision):—I said after the last day of August, &c.

31. That appears to be in accordance with a general scheme for the payment of all surveyors? Yes, it may have been. Mr. F. W. Birmingham.
32. It appears so? I suppose it is a circular;¹ I never asked them that.
33. Do you not gather from the way it is worded that it is a general allowance made to all surveyors, and not applicable to your case in particular? I did not at the time. 11 Oct., 1861.
34. Hear me read it: "Taking into consideration the large amount of labour involved, and the necessarily slow rate of progress in surveys in the tropical forests, usually termed brushes, on the banks of the northern rivers of this Colony, the Secretary for Lands has been pleased, on my recommendation, to approve of an increase on the licensed surveyors' scale of fifty per cent. being made on payments for surveys within such forests." Is not that general? I considered it as a different matter altogether from what I agreed to.
35. Does it not appear to be a general alteration in the scale of the licensed surveyors' remuneration altogether, and not in reference to your case in particular? Yes.
36. It is a change in the scale according to which you, as a licensed surveyor, were paid? I was an honorary licensed surveyor. I was not paid according to the licensed surveyors' scale; there was a deduction to counterbalance the profits of the plains. After the farm surveys were made the £2 per mile for the feature survey was to be deducted.
37. That would apply to all surveys; the surveyor is not paid both for the feature and for the farm survey? I mapped it twice.
38. This is in accordance with the general remuneration; it appears to me that this is simply an announcement to you that you will receive the same as other surveyors? It was announced before that that I would get a kernel of fifty per cent.
39. That does not appear in your official correspondence; that is referred to merely in a private letter? I could bring forward witnesses to prove it.²
40. You have no letter to that effect from Mr. McLean? No, I have no answer to the present moment from Mr. McLean.
41. In no communication you have had with Mr. McLean has anything been said of a kernel? In no official communication; that letter, letter No. 8 of mine, has never been answered.
42. *By the Chairman:* Were there many surveys progressing on the northern rivers at the time you were surveying the Richmond? Mr. Peppercorne, a salaried surveyor, was on the Casino arm of the river. I looked upon myself as a contractor, and simply as a contractor, and the moment my contract was finished I would have returned from the river. When I went to the office they had nothing to offer me but a contract. If they had appointed me as licensed surveyor to the district then I would have had to come under the district surveyor, but I went up for no other purpose than to perform this contract.
43. Did you object to receive this fifty per cent. advance for your services? I did, and sent in my bill at £2 a mile.
44. You never drew this fifty per cent.? No; I would not take it because I believed it was not according to my contract. This is the reply thereto, which I beg to hand in. (*The witness handed in the same. Vide Appendix G.*) I received no answer to that, or to my letter No. 8, in any shape or form; and so I broke up my party, after waiting some six weeks upon the ground, and returned to Sydney. On my arrival in Sydney I opened a correspondence with the Minister for Lands, which I wish to produce. (*The witness produced a number of letters and other documents.*)
45. *By the Chairman:* This is the correspondence which took place subsequently to your coming from Richmond River? Yes; I did think when I found they would not answer my letter, of taking legal proceedings in the matter; but upon studying the matter over, I came to the conclusion that it was best to see the Minister for Lands about it, as there was no Surveyor General. Accordingly I saw him, and he wanted to have the matter in writing, and this correspondence is the result. There is one letter which I have not yet produced, which was written by me to the Acting Surveyor General. I am sorry that it was ever written, but I was vexed at not receiving any instructions or correspondence; I thought I had been deceived and left in a wilderness, and all my means were exhausted. (*The witness handed in a letter. Vide Appendix H.*)
46. *By Mr. Hay:* Had you not any letters from the Acting Surveyor General from the time you went up there? I had, during the first fifteen³ months I was there, and the Acting Surveyor General said he saw nothing to alter in any part of my surveys.
47. Had you any further letters after that? Yes; I had letters with reference to the work that appears in green (the whole of the Gundurimba Reserve) on my map; that was taken from Mr. Peppercorne, as you will find in some of my correspondence with the Minister for Lands. Mr. McLean, (at the time I took the contract), did not know what Mr. Peppercorne had done in the town of Gundurimba, and as soon as he got his work he sent it to me; that was after the contract was made with me.
48. Were you ever stopped in your work? Yes; that letter, No. 8, was never answered.
49. Were you ever stopped in your work? I was; for if you will allow me to explain on the map, A was approved of, and I had marked out the fifteen farms; I would have gone further back, but it was too wet. I had sent in my feature survey, B 1, and was waiting for an answer; in the meanwhile going on at a very slow rate with C, as I did not want to break up my camp until I got my instructions about B 1. Well, when C was done, I sent

¹NOTE (on revision):—I never asked for the fifty per cent.

²Revised:—It was a message from the Acting Surveyor General, who said TELL Mr. Birmingham he can have a kernel, but his town and canal scheme is abandoned; the kernel of "50 per cent." came officially a month or so afterwards, and for want of official information the town and canal was rubbed off the paper.

³Revised:—The first six.

Mr. F. W. Birmingham. sent it in, said I was stopped, and asked about Gundurimba Reserve. I also pointed out that Mr. Peppercorne was wrong, as he seemingly had run his line of road through permanent water, and asked, "Am I to make a fresh design of it?" There was no answer to that, so 11 Oct., 1861. I was stopped for so far up as the eighteen and a-half mile line of the river, and could do no more work.

50. *By the Chairman:* Because you had no information whether your designs were approved? Yes; from No. 8 not being answered. When I found the town and canal was abandoned I sent in another tracing, numbered three, of nearly the whole of the ground which formed the previous tracing, No. 2, represented by the brown colour on both sides of the river, of seventy-two farms, and said that if I did not get an answer within a certain time I should consider the contract broken.

51. *By Mr. Hay:* Have you that letter? It has been read; it is dated December 10th. (*Appendix G.*)

52. Have you the letter transmitting the designs B and C? Yes. (*The witness handed in the same. Vide Appendix I.*)

53. That letter was written two days before the letter you previously read? Yes.

54. Then two days after this letter was written, you wrote that which you conclude with "sticking up for your rights;" when you wrote this letter you could not have expected an answer to that you had written only two days before? At a future time.

55. Two days after you wrote —? Telling the Acting Surveyor General that if he did not give me instructions by a certain date, I would have to break up my party. In my last letter I wanted some instructions about the Gundurimba Reserve.

56. That was no part of your original contract? Yes, it was for two miles on both sides of the river, with liberty to go back three if I thought proper.¹

57. Does that appear in your written instructions? No—

58. In your written instructions you are directed to proceed to survey "the river and "features near it from the northern end of the first survey to the surveyed lands at Gundurimba, measured by Mr. Peppercorne?" Yes; those are the written instructions I took out with me up to the seventeen miles.

59. Do you mean to say that you were ever instructed to re-measure the lands that were² measured by Mr. Peppercorne? Yes; the land was taken from Mr. Peppercorne and given to me. I will produce the letters. (*The witness handed in the same. Vide Appendices J. and K.*) This is the decisive one, including the whole of the Gundurimba reserve, and this is the tracing. (*The witness handed in Appendix L, and produced a tracing.*)

60. That is Mr. Peppercorne's design? Yes; there is water through it, and I should have had to alter the design in different parts; I therefore asked the Acting Surveyor General whether I should make a fresh design, because I considered it part of my work to do so, and I should have been able to make the farms of a more perfect shape.

61. Would it not be rather expensive to go over the work twice? I only asked permission; if he had said No, I should have been satisfied.³ My only wish was that he would correspond with me. I was willing at all times to act in accordance with my instructions. At the time I entered into the contract, he said, "I do not know what Mr. Peppercorne has done, but I will write to him to tell him you have taken the contract." He did so, and he then sent the letter to me I have handed in. As I received no answers to my communications my work was stopped, for I had nothing above the eighteen and a half miles that I could go on with.

62. Where is Mr. Peppercorne now? I do not know, but I believe at Casino.

63. You seem to have been unfortunate in coming after bad surveyors; both Mr. Darke's and Mr. Peppercorne's surveys appear to have been erroneous? Yes, they were both wrong.

64. Can you tell me where the northern boundary of the reserve is, that is referred to in the written instructions? (*The witness pointed out the boundary on the map.*)

65. I see by these written instructions you have first to send in designs of all the lands up to the northern boundary of the reserve? Yes; I sent in A, and the farms were approved of.

66. No, I do not think the points correspond—I do not think the farms at A go up to the northern boundary of the reserve—I think the northern boundary lies near the top of B 2? Yes, and on my tracing I said that part was too wet for farms.

67. Your designs did not include all that land? Not the first design, but the second did, and the three tracings are in the Surveyor General's Office.

68. At the time you wrote the letter of December 10th, had you sent in a feature survey of the whole of the land up to the Gundurimba reserve? Yes, that was a second time of sending it in in a different form; B 1 was sent in first; the scheme of the town and canal being in B 2, that was altogether abandoned. The scheme of the town and canal was sent in as part of the tracing of B 2. I sent B 2 and C in together,⁴ and at the same time stated to the Acting Surveyor General that if I did not receive definite instructions by a certain time I should consider the contract broken.

69. Would it not have been better if you had conformed to your instructions and sent in a feature survey up to the northern boundary of the reserve to be sanctioned, and after that to have sent in your design for the whole up to Gundurimba? I did so.

70.

¹Revised:—All along both sides of the north arm of the Richmond River.

²Revised:—That were sent to Mr. Peppercorne.

³NOTE (on revision):—The design of Mr. Peppercorne being faulty on the western half of the reserve, and the Acting Surveyor General's instructions disagreeing, causing an overlap and a contradiction in relation to the eastern half of the reserve, I thought the easier way for me was to ask "Was I to make a fresh design?"

⁴Revised:—And afterwards as tracing No. 3.

70. Not in the way indicated in the instructions? This dotted line of mine may not have been high enough, but I sent it up there (*pointing to the map.*) In fact, the Acting Surveyor General said I could send the work in in any size I chose. Mr. F. W.
Birmingham.
71. With regard to the circular you have handed in, did you receive it from the Acting Surveyor General? Not from the Acting Surveyor General, but from Mr. Armytage, one of the chief clerks of the Survey Office. He said, "You had better take out the circulars, Mr. Birmingham," and he handed me the letter of instruction, and these were given me for my guidance. 11 Oct., 1861.
72. And you studied them accordingly? I did.
73. Were you instructed to measure any pre-emptive right? No, I was not.
74. What did that circular you handed in at first refer to? I consider it referred in a measure to my work, because it refers to circulars I had at other times in my possession as to valuing land.
75. You say your work was not to measure pre-emptive rights. This circular says, "With reference to the instructions which have from time to time been addressed to you for the measurement of portions of land applied for in virtue of the pre-emptive right possessed by the applicants—"? Yes.
76. "And to the reference made in my instructions to the necessity for your taking steps for assessing the value of the land in every case in which it appears to you worth more than £1 an acre." That is the course in cases of application for pre-emptive rights. Do you mean to say that this applies to anything except the measurement of lands for pre-emptive rights? I do not mean to say that it does; but I say it has in some measure reference to this, that persons going out should study the interests of the revenue. I may have been wrong, but it had that influence upon my mind.
77. Had you ever been employed in the Survey Department in this Colony before? Yes.
78. In what capacity? As licensed surveyor for Parramatta.
79. For how long? From 1855 to 1859.
80. Have you measured pre-emptive rights? No.
81. I suppose you have studied all the business usually allotted to a surveyor? I have received circulars from time to time, but I cannot lay my hand upon them. Before I left I know there were circulars that we were to value the land.
82. You considered that, although you were not instructed to measure pre-emptive rights, these were of such authority in your case that they would allow you to modify, in some measure, your written instructions? Not to modify them, but to propose a modification on my part. I did not want to modify them. If the Surveyor General had said "We do not want so and so" I would have been perfectly satisfied; but I had no intimation until three months after that the town and canal was abandoned.
83. It is quite clear that this circular has nothing to do with the matter at all? There are circulars in existence in which the surveyors are directed to value the land, and if they find it worth more than £1 an acre —
84. This is not one of them? It is not one, but I thought it a shade in my favour, and therefore I produced it.
85. Who is the district surveyor in that portion of the country? Mr. Henderson; and Mr. McLean, the Acting Surveyor General, said he would write to him, stating that mine was a contract, and that he had nothing to do with me.
86. You were not under the district surveyor? No, I was not. I believe I may say he never was in that part of the district, and for that reason I thought there was every confidence in my work.
87. Mr. Peppercorne had no oversight over your work? None whatever.
88. *By the Chairman:* After you came back you had some correspondence with the Minister for Lands? Yes.
89. You complain principally that your designs were not approved of after you had sent in B and C, which prevented you going on farther with your work? Not that my designs were not approved of; I was willing to obey any orders. What I complain of is the want of instructions. In contradiction to Mr. McLean, who says in his correspondence with the Minister for Lands, "Mr. Birmingham has had no specific contract." If, as I remarked in my correspondence, it is the adjective ending in *k*,¹ that which shews a thing to be of the species of which it is. I reason upon the matter, and shew that I think I have the contract. I have written instructions for seventeen miles of the river up the east side. I have now shewn to the Committee that Mr. McLean has also sent me the Gundurimba Reserve—that I think is pretty clear.
90. *By Mr. Hay:* Do you allude to these written instructions when you say you have instructions to go seventeen miles up the river? Yes.
91. There are no miles mentioned here? (*Referring to Appendix B.*) No; but there are the measured lands here. (*Pointing to the map.*)
92. Are these the "surveyed lands at Gundurimba, measured by Mr. Peppercorne?" At all events I will waive that, because I shew by these instructions that I have the east side of the river, then I have shewn that I have Gundurimba.
93. That you conceive to be the measured lands at Gundurimba,² not the Gundurimba reserve? No; because Mr. Peppercorne had not designed it. At all events I go some way up to Gundurimba reserve. Then I sent in my account for twenty-six and a half miles of feature survey, and asked for the money. I gave my authority as being the contract made in Sydney, and received the money. I said I would not take £3 a mile and put down

¹Note (*on revision*):—*i. e. specific.*

²Note (*on revision*):—Mr. Peppercorne measured all the lands upon the north arm of the Richmond River prior to my going to the River.

Mr. F. W.
Birmingham.
11 Oct., 1861.

down in my bill £2 a mile. That bill was paid; and I think that is really an acknowledgment of this part of my contract. The Acting Surveyor General cannot say a single syllable against that portion, C.

94. Have you made any specific claim upon the Minister of Lands, or the Acting Surveyor General? Yes, I asked for compensation, and to be allowed to go on with my contract.

95. And you could not agree as to what your contract was? Mr. McLean said, "Mr. Birmingham had no specific contract, and I only regret that by the employment of such a person the country should be subject to some loss."

96. In fact the Minister of Lands would not agree to your proposal? No.

97. Did he make any proposal to you? No; the Minister of Lands concurred with the Acting Surveyor General. Then I wrote a long letter to the Minister of Lands, and he offered to let me have the portion coloured brown in consideration of the £150 that had been advanced to me, when I was in the wilderness, as it were. I clearly spoke of the advance, and how unreasonable it was to keep me without instructions, but the Acting Surveyor General shut his eyes against my ideas. But to understand this matter fully it will be necessary to read over my correspondence with the Minister for Lands; and also, to understand the effort made, to leave me in debt to the Department, and shut me out for ever from the public work; in fact, to disgrace me, and get rid of me.

98. Then the last offer, to let you survey the two portions marked C and B2, you declined? Yes.

99. Do you still owe the £150? Yes, with the exception of a balance due to me of between four and five pounds.

APPENDIX.

(No. 2.)

A.

Mr. Birmingham is requested to call at this Office when it may be convenient for him to do so.
Surveyor General's Office,
Sydney, 11 February, 1860.

B.

(No. 60-299.)—(3.)

Surveyor General's Office,
Sydney, 27 February, 1860.

Sir,

In reference to your letter of the 23rd instant, No. 1, I have to request that on your arrival at the Richmond, you will commence a traverse survey of the north bank of the river at the south boundary of the reserve at the junction of the north arm and main river, and carry it up to that junction, thence along the east side of the north arm to the northern boundary of the reserve (B), determining, wherever practicable, by angles and bearings, the relative position of the opposite side of the river; and that you will then traverse all creeks, lagoons, swamps, or other obstructions to the adoption of a regular design for farm portions within two miles of the portion of the river surveyed; and, having plotted your surveys, that you will then make a design for the subdivision of the land, giving your special attention to the selection of the best lines of road for future traffic, both along the river and from back lands to it, as also to the necessity of reserving spaces for wharfs at the extremities of roads terminating on the river.

2. The portions to be designed should be of areas varying from 40 to 80 or 100 acres. They should be so designed as to embrace in each a fair proportion of available land to divide the river frontage amongst the largest number of conveniently shaped portions; and, subject to these conditions and to the direction of roads, they should be, as far as possible, rectangular, and have their boundaries, where no reason exists for their being otherwise, directed to the cardinal points.

3. Having completed this design and transmitted it to me for approval, you will proceed to survey in a similar manner the river and features near it, from the northern end of the first survey to the surveyed lands at Gundurimba, measured by Mr. Peppercorne, and to design it exclusively, of course, of the pre-emptive purchase measurements within it for subdivision.

4. You will be at liberty to make the usual charge for linear measurements for the surveys referred to, but in payment for the future measurements which you may make of the land for sale, a deduction will be made for all river trace and other linear measurement which may form boundaries of portions to be measured.

I am, &c.,

A. G. McLEAN,

A. S. G. L.

Mr. Licensed Surveyor Birmingham.

C.

(Circular.)—(No. 33.)

Surveyor General's Office,
Sydney, 25 January, 1859.

Sir,

With reference to the instructions which have from time to time been addressed to you for the measurement of portions of land applied for in virtue of the pre-emptive right possessed by the applicants, and to the reference made in my instructions to the necessity for your taking steps for assessing the value of the land in every case in which it appears to you worth more than £1 per acre, I have now to inform you that more specific instructions are deemed necessary.

The 2nd Chapter of the Queen's Orders in Council, dated 9 March, 1847, Sections No. 8, determines:—"That if there be reason to suppose that any of the lands applied for under the regulations hereby expressed, possess peculiar advantages, whether of water frontage or otherwise, which would render it fit that a higher price should be paid for such lands, the Governor, or the Officer for the time being Administering the Government of the said Colony, or any Officer authorized by him for the purpose, may require the said lands to be assessed."

It is therefore obvious that any advantages of water frontage or otherwise, would render it incumbent on you, as representing the Government in this particular, to initiate a valuation, and to represent and guard the interests of the Revenue therein;* and it will, of course, readily occur to you that

* How could the interests of the Revenue be better guarded than by the way I adopted of proposing a higher price for the land, and the way in which that price could be obtained, and the true interests of the County of Rouss set forth by proposing (as I still believe) the best site for the future chief town thereof? (See my unanswered letter, No. 8, of August 7, 1860.)—F. W. B.

SELECT COMMITTEE ON THE CASE OF MR. F. W. BIRMINGHAM.

that as £1 per acre is the legal minimum price of the worst land included in any measurement, any portion of land also contained therein, obviously worth more than £1 per acre, will make the *average*, of necessity, *above* £1 per acre throughout the whole portion. It must also be borne in mind that selecting from such a vast extent as the generality of runs include, the limited areas generally applied for, the applicant would without doubt select what appeared to him the best and most valuable portion of the whole run; and you should from that fact hesitate to assume that the legal minimum of £1 per acre represents the true value of the portion selected.† The Secretary for Lands and Public Works has desired that the importance of the duty committed to you should be fully impressed upon your mind, and the responsibility incurred by allowing the public interests to suffer in these valuations. When there was a reference from the Surveyor to the Commissioner, there was a divided responsibility and a double safeguard: the whole now devolves upon you, and hence the peculiar necessity for caution and firmness.

Mr. F. W. Birmingham.
11 Oct., 1861.

I have, &c.,

D.

(No. 60-S.)

Camp No. 2,
(Fifteen miles south of Lismore),
7 August, 1860.

Sir,

In accordance with your letter of Instruction, No. 60-299, of the 27th of February, 1860, I beg respectfully to forward a design for subdivision of part of the land referred to in said letter. I may here mention that, although my written instructions, as contained therein, confine me to farms, (thinking, no doubt, that town accommodation was judiciously selected by Mr. Darke, assistant surveyor, as shown by pink lines on his survey map of the river), I consider I should be unworthy of your confidence, as expressed by your circulars, &c., were I to propose for consideration farms upon the spot that may, (in my humble opinion) become the principal place or city of the Richmond District, without first writing you my ideas on this subject. Every populous district has got its store, *i.e.*, town or city; that such a place must be established in this district admits of no doubt; and believing from my own observations that the junction at or near Yabsley's house is not suitable, I have resolved to write a few lines on the subject.

Instructions were,—
1. Verbal, { Acting
2. Written, { Surveyor
3. Printed Circulars. { General.

When I arrived here, about the middle of last March, I camped within a short distance of the junction, and during my surveying operations I found that the flood, which occurred a short time previous to my arrival, had covered *the whole of that point or neck of land* lying south-easterly from Hollingworth's house as on my survey, or the Huts, as shown on Mr. Darke's. I also saw clearly that on Hollingworth's side of the main river there was not room for a town or any considerable part of a town; also, that the rich alluvial marshes were, or the marsh was, considerably depressed in the centre, and like a *lake* in very wet weather; and on the west side of the main river—that place or circle (*Vide* Mr. Darke's map) with racecourse written upon it,—was a hole or basin, several feet lower than the narrow bank of river at Yabsley's, and so continuing south thereof. Some floods overflow this bank, and for weeks people may do again what they or others have done (as I have been told and can well believe), go "a-boating" over the racecourse and all the lagoons south of it. Now there is one part of this proposed town or village reserve (R., No. 26) which I have not seen properly; this is the northern part, shown as a pine ridge. There may be room here, and perhaps suitable room, for a village, and if the land north of it is unsold perhaps a town could be formed here if desirable. I will now suppose that the land is equally suitable at the pine ridge on or near the main river as at the gently sloping hills of the north arm and the plain, as shown for subdivision. My proposed town site is free from floods; the small quantity of water that lodges for six or eight inches in depth *sometimes* along the base of the hill, is caused by the plain having a sloping depression of (as per observation by Theodolite's level) seven or eight inches below the bank of the river; the rain falling on this plain goes toward the hills, and of course what rain falls on the west side of the hills descends, and co-mingling slowly, makes its way to the lagoon, in proposed water reserve (the lagoon is the lowest part of the plain), and all this the storage, probably of several days rain, could be remedied by seven days labor with a drain-plough, judiciously worked. Evaporation and percolation dry the plains about this river; as to drainage improvements I have not seen any.

It has been one series of showers from Friday morning, the 27th ultimo, to the present, Monday, noon, 7th of August, equal to twelve days; and no water is visible on the plain from where I write. 'Tis true of this, as of any plain, that in places I have been to my ankles in crossing it, but these little depressions of four or five inches are, of course, full of water.

Now at Yabsley's occurs what may be truly termed "the meeting of the waters," and these three forces, resembling in shape the legs on a Manx coin, tend to a centre, and at this point the waters come to a dead lock, heaping and flooding the circumjacent land; this place must, therefore, remain unsuitable to build a town upon, as lives might be lost; but for a certainty property would from time to time be destroyed. Again, suppose the country to be thickly populated north of the Pelican Creek, and east and west of it for many a mile, would it then be for the people's interest to go or trade from say Casino to Lismore by water, round by Yabsley's, as they do at present, if a nearer water-way could be obtained at a reasonable cost? I should say not; and to illustrate this matter I must now write as I before intimated, (in letter No. 7, of June 25th, 1860), that is to say, if the site for a town, as shown upon the accompanying tracing, should be approved of, that to suit the requirements of commerce fully, a cut or canal will be required westerly (south-westerly) from the Pelican Creek to the Casino arm (main arm) of the Richmond River. The shape of the land, as I submit it, is shown upon the accompanying tracing; the distance to cut through seems to be about fifty-four chains=(1,188 yards); this would be from the termination of the navigable part of Pelican Creek to the main river. The proposed strip of land provides for a straight cut from river to river, should such be undertaken at any time in preference, or even as a continuation of the cut. I will now give some distances to show how useful this, as an undertaking, would prove to be.

The distance from the Pelican Creek mouth by way of the north arm of the Richmond River to Yabsley's Junction, is about seven miles, sixty-four chains; and from Yabsley's Junction to proposed mouth of canal, at main river, about three miles, fifty chains; or say, collectively, eleven and one-half miles nearly.

Now, by creek and canal, the distance would be nearly one and one-half miles; or, by a direct cut from river to river, one mile. The first canal, deducted from the longer way, gives a clear saving in length of *ten miles*; that is to say, people now go eleven and one-half miles. This is not all the advantage to be gained; these are *tidal* rivers, and a journey could be so regulated as to get from Lismore or Gundurimba, to the mouth of the Pelican Creek, with the tide in your favour; and, arriving at low-water, cross to the other river by means of the canal, and enjoy the advantages of the returning tide, which, without using this cut, would be against you by the present route; therefore, in many cases, it would prove to be equal to shortening a single journey by twenty or more miles.

Another

† This (as I view it) applies as forcibly to the "free selection" principle about being initiated (in the reserves of the County of Rouss of course, as elsewhere) within this Colony.—F. W. B.

Mr. F. W.
Birmingham.
11 Oct., 1861.

Another view of the matter is thus :—The sailing vessels trading to Lismore and the Pelican Tree, &c., would shorten their journeys very much by not using the lower seven and one-half miles of the north arm in going to Lismore and coming down through the cut to the Pelican Tree on the main river. There is no interest at present, so far as I can see, that this scheme would injure, not even to the value of one farthing ; it is, indeed, all the other way,—*pro bono publico*.

There should be, of course, a swing bridge over the cut near the main river, to give a roadway to farms south thereof, as may be, in course of time. Mr. Peppercorne has, I am informed, surveyed the land into farms about this proposed site for a canal, which caused me to mention in my letter of the 25th of June, the probability of a required reservation of land ; and, in which case, intending purchasers south of the cut, would know of said reserve.

Before commencing to describe the accompanying design for subdivision of land, I am compelled to inform you that Mr. Darke's surveying is, without doubt, very erroneous ; he has greatly erred (if the tracing of his work, which I made, be correct), for the reach at my camp, and which I am every day looking at, is very incorrect ; in fact his surveying is the worst I have come in contact with for now two and twenty years. Though much I respect Mr. Darke I cannot pass unnoticed a bad survey, caused, probably, by defective eyesight.

Mr. Peppercorne's line of seventy chains (part of the north boundary of the accompanying tracing) is short, as will appear from my field book, No. 3, pages 1 and 2 ; this may be caused by his men chaining over the spur and taking its sides for measurement. Surveyors use horizontal distances.

In describing the accompanying tracing I must respectfully inform you that, although this place will become, if properly laid out, a town of great importance, I am not unmindful of the fact that at present, for seventeen miles on either bank of this river, there is not a white person located, or a dwelling to be seen, excepting my camp ; this fact has led me to propose respectfully for your consideration, a number of small portions of land, each sufficient to supply food for one family of the class of persons who are likely to first occupy this place, viz., such as persons occupied in the cedar trade and the like, and at the same time to provide roads in such quantity, and of such a width, as to secure the object proposed, namely, the foundation for a splendid city, and to avoid, if possible, a higher upset price than two pounds per acre for portions under ten acres, and one pound for all above that size. The proposed roads are one and one-half chains wide, with but a few exceptions, as will appear from the tracing. The waters of the Richmond River are (I have been told by many persons), brackish in the middle of summer for about two months, if a dry season ; therefore, I have proposed that the portion marked A, (on tracing), should be reserved for water storage, being about sixty acres in extent, which of course would be curtailed hereafter.

The portion marked B, a reserve for botanic garden, in size about sixty-four acres, with free roads through it. The portions marked C and D, for town extension when required, and a diversion of the rivulet through C and D, would be a great improvement—(Vide line C¹ to D¹.) The portions E, F, G, H, and I, for public purposes, thus :—E and H, markets ; F, town hall ; G, court-house ; I, constabulary. The portions, J, K, L, for town extension. The portion M, for road metal, (which can be found anywhere within these hills, and of good quality.)

The portion N—an elevation easy of access and roadable, it may be considered an upper land, ranging from 180 to 220 feet higher than the plain. This I propose to reserve for ever as a public park ; the sides are wooded, slightly upon the western slopes, and with great effect ; thickly upon the eastern. The point N¹ is (I think from angles of altitude I have taken, and measuring the horizontal distances from my map as an easy approximation), the highest on the ridge. (Vide field book 3, page 43) ; and from this point the view of the country is truly grand ; in fact, as one walks round the top or the sides, the view for, say three hundred and forty-five degrees of the horizon, is pleasing in the extreme ; alluvial valley after valley, till as it were they become lost in the distance ; then the eye discovers bold inland ranges, distant probably one hundred and fifty miles, these receding valleys and mountain lines forming a vast and gorgeous amphitheatre as it were, with the ascent or park you stand upon in the midst ; it requires but slight study to divine what is here in store for future generations.

The proposed roads,—to the north rising as per tracing with a grade of 1 in 15, and 1 in 14,—upon the hill 1 in 88, and down the south end 1 in 22 ; others can be made westerly 1 in 13, and 1 in 9. The practicability of making this a park, and one of the healthiest in the Colony, cannot be doubted. And what is the distance to the top ?—Half a mile through town. If any infringement should be thought necessary, I respectfully submit it ought to be only for an Observatory or Churches, without graveyards ; for the latter of course it is not suitable, as the hills shew to be of stone, with from six or seven to two feet or so of brownish mould, well grassed, excepting here and there where stones protrude.

The portion marked O, I propose as a collecting reservoir, in size about one hundred acres ; some seven or eight acres at the south-east corner could not be made easily available, but this is counterbalanced by a rain fall from the park. A slight low embankment, from O¹ to O², would store the water, which could be carried in a pipe to the reserve marked A ; this will be sufficient to do away with the use of brackish water in summer. If required hereafter a town supply for summer might be obtained by cut and embankment along the line O³, O³, which could be made to supply, by gravitation, the inhabitants of the plain.

The portion marked P, I propose to reserve for various purposes, viz., roads, and road-metal, firewood, (of gum, oak, turpentine, &c.), and probably for water works extension and the like.

Q.—A drain line fifty links wide, which, if needed, would become very useful in connection with other smaller drains.

R.—I propose as a road one and one-half chains wide, to admit of drainage being carried along it ; but this road could be, I think, dispensed with, if the drainage line, Q, should be established.

S¹ is a fine open landing place, and from here, southerly, along the bank of river to S², I propose capacious street and wharf accommodation, equal to three and one quarter miles, (from S¹ to S² there is a gradual fall of about four feet.) At T, about mid-way, along wharf line, I propose a reserve for markets, and such purposes as may be desirable at a future time.

U to V is about that line which represents what would be occupied by the proposed cut, if to the Pelican Creek only. U to W, that line which, I think, would be used if a straight cut from river to river was decided upon at any future time.

X, X,—A reserved road along bank of river.

Y, Y,—Land that may be easily drained by drains along the roads, as shewn by pencil dotting ; but this land is not perhaps immediately suitable for farm occupation, because it would no doubt be complained of thus :—The Survey Department gave us nice roads, such as we cannot get at ; if this land, marked yellow upon the tracing, is to be surveyed, summer is the time to do it.

Z and Z¹.—Here I would propose the centre of road to form the boundary between the now proposed parishes of Tucki Tucki and Corakii, two native names ; their boundaries I do not precisely know. (Permit me here to state, I am not aware of what rules may be in force relative to such matter, as this is the first time I have had to submit native names) ; there may be some rule guiding the introduction of native names for parishes. I perceive from a map of the Settled District of Melbourne, now before me, that native names have been extensively used for parishes ; but the boundaries, as it appears straightened for convenience—Derrimut, Yan Yean, Mickleham, Bulla Bulla, Wil-Wil-Rook, Out-Paw-Paw, Keelbundora,—and the like parishes arranged so.

It

It has struck me that there is much more in the language or dialects of the various black tribes of this island than is at present thought to be worth knowing; some of their words are similar to those of the Celtic or other languages or dialects. In and upon the survey of Ireland the Government appointed an *antiquarian*, as an officer of the Department, to search the old Celtic records. If it was there (among so many eminent Celtic scholars, such as bishops, and others,) found requisite to establish such an office, would it be as useful here, where hundreds of names are being adopted over the eastern, southern, and western portions of this island, to be repeated by future generations? If each Colony had its antiquarian probably something useful could be obtained from such a source.

Mr. F. W. Birmingham.
11 Oct., 1861.

I mean no disrespect whatever in anything this letter contains; it is all done with a sincere desire to perform my duty faithfully to my superiors.

The Surveyor General,
&c., &c., &c.

I have, &c.,
FRED. WM. BIRMINGHAM,
Licensed Surveyor, Contractor.

E.

(Circular.)

Surveyor General's Office,
May, 1859.

Sir,

I have to draw your attention to the practice which has hitherto been to a considerable extent followed, in the sub-division of lands by officers of this department, of establishing parishes,* and numbering in a consecutive series, according either to position or to the dates of measurement, portions which may be measured for sale within them.

2. This practice is frequently or generally inapplicable to the isolated portions of lands which are now usually measured in the old Settled Districts, but it is very desirable that, wherever the quality of land being measured for sale is such that a considerable extent in one locality may with advantage be so measured, and particularly in portions of the Colony where the subdivision for sale is in its commencement, the practice should be followed.

3. The size of parishes should be approximately 25 square miles, but may be allowed to vary from 16 to 35 square miles.

4. The boundaries should, wherever practicable, consist of creeks, ranges, or other natural features, but failing the existence of these in suitable positions, arbitrary lines may be adopted as boundaries, and which should, unless a strong reason to the contrary exist, be directed to the cardinal points.

5. It is not, however, essential that the permanent boundaries should, at the time of the early surveys in a parish, be determined; and, indeed, their determination at that period might involve an amount of survey and labour, with which the advantage gained would be by no means commensurate.

6. These parishes are never proclaimed, neither are their boundaries determined beyond the possibility of alteration, save by the proclamation for sale of lands within them, or the publication of plans shewing such boundaries as finally adopted.

7. The boundaries are therefore subject to modification, as surveys and knowledge of the features progress; and in this manner creeks or permanent lines of road may be made to replace proposed right line boundaries, even after the latter have existed for years on paper.

8. The numbering of portions within a parish, exclusively of course of town sections and allotments within them, should be one continuous series, and it is of course most convenient that the numbers should follow each other through adjacent portions throughout the parish. Where, however, as is usually the case, portions in different parts of a parish may be measured, while the intervening lands are left unmeasured and not even designed, it is obvious that the series must refer rather to the chronological relation of the measurements than to the positions of the portions.

9. In cases where portions have been measured and sold, without numbers, in a locality in which it may be desirable to establish a parish, it is best to count the number of such portions, and to commence the new numbering with the next higher number; and this practice may also be applied, with advantage, when two series of numbers have inadvertently been previously adopted in a parish.

10. Where euphonious aboriginal names can be ascertained, it is desirable that such should be suggested by the surveyor for new parishes.

11. It has been usual to call parishes within which towns are laid out, by the name of the town, but this practice may be departed from in cases where localities are known by names which would prove suitable for parishes, while the towns have been called by some name foreign from the locality.

12. I trust that the full explanation which has been given above, will enable you to decide in what cases, in measurements which you may make, it is desirable to establish parishes, and to select boundaries, and carry out complete series of numbers within them; and that you will give to the subject your best consideration in all cases where the practice may be applied, and by so doing, prevent the confusion and inconvenience which necessarily result from inconsiderate numbering of portions.

13. In recommending temporary or permanent boundaries for parishes, it will be sufficient to transmit, with your surveys of lands, sketches shewing the proposed boundaries, such sketches being of course alluded to in the letter.

I have, &c.,

F.

(No. 60-1757.)

Surveyor General's Office,
Sydney, 21 November, 1860.

Sir,

Taking into consideration the large amount of labour involved, and the necessarily slow rate of progress in surveys in the tropical forests, usually termed brushes on the banks of the Northern rivers of this Colony, the Secretary for Lands has been pleased, on my recommendation, to approve of an increase on the licensed surveyor's scale of fifty per cent., being made in payment for surveys within such forests.

2. On such of your accounts as may have become payable after the date of this decision, the increased payments will be made, and this will render necessary extreme carefulness in the representation on your plans of the margins of such forests, which may exist on lands which you may measure.

3. In estimating the amount to be paid on each account, the extent of linear measurement through and beyond the brush will give a proportionate increase on the account.

I have, &c.,

A. G. McLEAN.

Mr. Licensed Surveyor Birmingham.

* For proposition of two parish names, see my letter, No. 8, of August 7th, 1860; and one of these proposed parish names has been adopted, although my said letter has not been answered, not even to the present day.—F. W. B. Oct. 9, 1861.

Mr. F. W.
Birmingham.

11 Oct., 1861.

G.

[Requesting this letter may be immediately placed before the Honorable the Minister for Lands.]

Camp No. 2, "Steve King's Plain," North Arm Richmond River,
(About 15 miles from Lismore Post Office.)

December 10th, 1860.

(No. 60-23.)

Sir,

In replying to letter No. 1,757, of 21st November, 1860, and signed A. G. McLean, I beg respectfully to inform you that, upon my calling at the Surveyor General's Office, Sydney, on Monday, 13th of February of the present year, the Acting Surveyor General informed me the Government had a contract to offer me; I asked to be allowed to go upon salary, but was answered thus:—"The Government have nothing but a contract to offer you, which you are at liberty to accept of, if you think proper;" and described it thus:—"The Government are anxious to open up the north arm of the Richmond River, by cutting it up into farms for a distance of two miles, extending back from the river on each bank, from the junction of the north and main arms to Lismore, exclusive of the "measured lands;" to be paid for after the present rate of licensed surveyors (scale of) fees for farm portions, and £2 per mile for the linear measurements of the preliminary or feature surveys, deducting for all such linear measurements as may form a part of boundaries of portions measured for sale, and and previously paid for.

The Acting Surveyor General stated, "You see there will be very little travelling; you can send the work in by portions as you do it, forwarding a tracing shewing a design for farms for approval, and proceed so through the contract. You can take these maps into the next room and study the matter." Some twenty minutes after this I returned to the Acting Surveyor General's room, stating:—"I am sorry I cannot accept of the contract; it is a large survey, and the jungles moreover, may be more difficult to cut through than I anticipate." The Acting Surveyor General replied,—"Why? You don't mean to say that you cannot make a considerable profit from these plains, (putting his finger over the larger map)?" "Certainly, I could make a profit from these plains, but the profit might be more than counteracted by the loss of time working the jungles, but upon the whole, I think that by hard work and long hours, I might make a fair profit upon it." "Then what is your reason for not accepting it?" "Well, Sir, to speak plainly, it is completely beyond my means, in fact, I never was poorer than I am at the present moment." "Is that the only reason that can prevent your undertaking it?" "Yes, Sir, the only reason,—the extent to be surveyed does not frighten me—I wish it was ten times as large, and that I had the means to undertake it." The Acting Surveyor General replied,—"If that be the only reason to prevent your undertaking it, I will apply for authority for an advance for you; make an estimate of what money you think you may require, and let me know; recollect you cannot do without a boat."

I returned to the Acting Surveyor General's room,—"Well, have you made out an estimate of the amount you may require?" "Yes, Sir." "I suppose anything short of £150 will be useless?" "That is, Sir, exactly what I should require" (turning a paper in the palm of my left hand to shew the Acting Surveyor General the figures). Speaking about the contract the Acting Surveyor General remarked,—"I suppose you will have between one and two years work in it?" I replied,—"I think two years work, Sir, at least."

The enormous difficulty of cutting through these jungles or brushes being explained to me, by Mr. Mann, licensed surveyor and others, I thought it but prudent, before leaving the office, to mention to the Acting Surveyor General, that I was much afraid for the first six months I could do no more than hold my ground, and even that I might not be able to do; and, probably, could not pay back any portion of the £150 advanced. The Acting Surveyor General replied,—"Well, write in and state how you intend to pay it. The Government don't give with one hand and take away with the other."

Having now explained the circumstances under which I took my present contract, I beg respectfully to say that I do not clearly understand the intent and meaning of the letter I am now replying to (No. 1,757), and signed A. G. McLean, in regard to extra payment for jungles or scrubs.

If meant as a boon I do not think I have asked for it directly or indirectly, and if meant to supplant any of the advantages that I may be supposed to possess by my contract, I certainly will not take it. Therefore, it must be evident, I look for nothing more nor less than my contract justifies me in having. I labour hard to earn my bread, and think myself worthy of the hire. Should it be unfortunately the case that the Surveyor General or the Honorable the Minister for Lands thinks to the contrary, I have now only, respectfully, to say that if my holding this contract is considered undesirable, I will, upon the payment into the Bank for my services, after the rate of three guineas per diem, as payment for myself and party, dating from the day I took the contract, till such time as a letter to the above effect can reach my camp, relinquish it, the Government paying cost of party up, (£23), the department deducting all moneys paid to my account, &c., and my delivering all papers and documents relative thereto.

I cannot but think something relative to this contract is not right.

Four months ago I sent you my letter No. 8, and have had no official reply to it yet; even the receipt of it has not been acknowledged officially, although all others of mine, to No. 7, inclusive, and all others after No. 8 have.

Now, I respectfully subject that beyond the walls of the department I am that person most interested in this contract, and if my letter was, say upon the whole, superogatory, still I submit that (laying aside much that could be inferred,) some of its contents was in conformity with the general meaning of circulars that I have from time to time received, as sent from the Surveyor General's Office, and to which I was desirous to conform.

Early in October I wrote to a Mr. Mansfield, stating I had heard nothing from the Survey Department, relative to my letter No. 8 (about town and canal scheme), and comparing my contract to a man receiving some nuts to crack, saying, I had cracked some of the shells, and wanted the kernels; requesting him to see whoever may be chief draughtsman about it? Mr. Mansfield's letter (in reply) states thus:—"23rd October, 1860. I took your letter to the chief draughtsman (Mr. Adams), and he took it to the Surveyor General for information relative to it; and it appears that tracing No. 2, containing the proposed design for a town and canal is abandoned, but it was hinted that you could—or it was proposed—have a kernel, by extra pay for your thick brush."

I sent Mr. Mansfield word, to inform the Acting Surveyor General I would take nothing but my contract, and requesting the department to make a design for farms upon the plain, or, if I was to do it, to say so, and that I would immediately send one in. I also stated that if my contract was any stumbling-block in the way of the Survey Department I would relinquish it on payment of three guineas per diem, from commencement to end of contract, (and I think the £23 it cost me to pay passages here); to this I have received no answer, except the letter I am replying to may be considered the answer.

As to scrub work and compensation for labour thereon, Mr. Peppercorne, licensed surveyor, stated what he could do in these jungle surveys, thus:—"He could not pay his men's wages, and his position was altered to that of assistant surveyor. It is not my business to fathom the reasons that may have led A. G. McLean, Esq., Acting Surveyor General, to recommend to the Honorable the Minister for Lands, that the sum of £3 per mile should be paid for brush work or jungle work in "tropical forests;" but it may be to my interest to inform the Surveyor General, that I have carefully studied the cost of jungle work for the last nine months, and my calculation is that it has cost me three and one half days time, and £3 10s. per mile for labour and food only! (I speak as a contractor, having to put up with the rainy seasons, and other drawbacks which must as certainly occur

to

to others as they or their like have occurred to me.) Thus much to shew that if Mr. McLean's kernel he sent me word about was accepted by me, I could get for *future* jungle work (some 16 or 17 miles in extent, as he could discern from Mr. Darke's map) so many pounds—less, of course, 50 per cent. from farms bordering upon the river, and being part of the feature surveying; and for this *shadow* (a shadow which might be made to elongate to distant creeks) I am in effect told I must give up my contract right, to survey the two largest plains!

Mr. F. W.
Birmingham.
11 Oct., 1861.

And what do these plains amount to after all—seventy-two farms, or say about £270 or £280 worth of work? I will suppose they are for survey and completed, say on the last day of March, then time on contract over one year.

Moneys drawn to the present under.....	£ 280
The two plains into farms, say.....	280
	560
£280, less 25 per cent., to pay part of £150 advanced	70

£490 Total, say earned

within the year. Deduct food and men's wages, and how much will I get for my whole year's labour here? (and I think my surveys may compare favourably with the salaried officers of your department, *vide* my letters, Nos. 7, 8, and 21, of the present year; and Surveyor General's letter 952, of the 2nd of July, 1858) why? Only £120 per annum!

Now, sir, I respectfully ask, what would be my position relative to this contract; was I to give up my right to the very body and soul of the work in so far as I have gone, and which is now upon tracing No. 3?

Am I to wear this (£150) "collar of gold," and be told, "Yes, you can take it off," and "No, you cannot take it off?"

Be this as it may I cannot engage a party permanently; my business is disarranged—cannot guess the future—therefore, if I cannot receive from the Survey Department definite and decisive instructions to proceed with the survey of the farm portions on tracing No. 3, forwarded by this mail, in registered letter No. 60-21, of December 8th, prior to the mail leaving Sydney on the 26th day of the present month, I will consider the contract as broken on your part; and as to holding any correspondence with you upon the subject, placed as I am in a *wilderness*, with men to feed and pay, I cannot do it.

The debts I owe upon the river can be paid, and the labourers I have around me need not suffer (can be paid) if you will be kind enough to place to my account in the Bank, the money for the feature survey, as represented upon the western part of tracing No. 3, sent you herewith. 'Tis true there is my food upon the ground for them, but as they are no parties to the contract, but have simply drawn around me (owing to *my* faith and *their* faith in the Surveyor General's Department) I think it but proper to inform you how they may be circumstanced if you will break the contract; this matter of course lies to your discretion; and I must proceed to Sydney.

I am sorry I have to write in the strain I have adopted, (and indeed sorry that I have the trouble of writing at all); but I am now doing no more than every British subject should do—"sticking up" for my rights.

I have, &c.,
FREDK. WM. BIRMINGHAM, C.E.,
Licensed Surveyor and Contractor.

The Surveyor General,
&c., &c., &c.

H.

*Camp No. 2, Steve King's Plains,
Richmond River, January 23, 1861.
(15 Miles by River from Lismore Post Office.)*

Sir,

I have waited in idleness from the time I wrote you my letter numbered 23, up to the present (excepting time making stakes for the farm survey you have virtually taken from me, and five times to Lismore Post Office awaiting a reply.) Silent contempt is not, as I view it, the way to do business. My letter, No. 8, deserved a better fate.

You have not accepted of my offer of a compromise, by payment of three guineas per diem, &c., therefore I now withdraw that offer. I am now paying off my men in so far as my means permit.

In letter No. 23 I stated, "If you will break the contract I *must* proceed to Sydney;" this meant what I now intend, *viz.*, to have legal advice and sue for damages for loss of contract, &c.

I have, &c.,
(Respectfully to the office of Surveyor
General, but certainly not so to the *non-*
professional gentlemen, who, in his
actingship, tries to supplant my rights.)
FREDK. W. BIRMINGHAM.

P.S.—In Letter 23 I may have omitted the letter *e* in the word *int(e)rest*, and lower down the verb "*have*."

The Surveyor General,
&c., &c., &c.

I.

(No. 60-21.)

*Steve King's Plain, Camp No. 2,
North arm of the Richmond River,
December 8, 1860.*

Sir,

In accordance with my contract, (entered into at Sydney, in February, 1860, with the then Acting Surveyor General,) I beg respectfully to forward the accompanying tracing, No. 3, (and field-book, No. 5, separate,) being a design shewing proposed subdivision of land into farm portions.

The land is of the richest description—alluvial, lying about 18 feet higher than the ordinary winter level of the river, and admirably adapted for agricultural pursuits. The river is tidal, and the water fresh.

The lagoon—portion 29—on "Steve King's Plain," I propose as a water reserve; the portion marked D, for use of roads, windmill sites, and the general benefit of the inhabitants who may hereafter locate here.

The little hill, at B, within a proposed reserve, has at its base an excellent sheet of water of very good quality, deep and permanent, and of which the cattle on the plain drink freely; it appears to me to be spring water. Mr. Feppercorne, assistant surveyor, in his Gundurimba reserve farm design,

Mr. F. W. Birmingham. design, runs his road, seemingly, through this water, without knowing of its existence; and at the point somewhere about letter A, on the south bank of the river, reserves about thirty-three acres of agricultural land for a "water reserve." Therefore, I respectfully submit that the Gundurimba reserve subdivision design about here is very faulty, and I scarcely think he can have made an examination, of primary feature survey of it. (Am I to make a feature survey of the Gundurimba reserve, when I get so far up in my contract?) Again, Mr. Peppercorne's survey of the 408 acres portion for Wm. Wilson, Esq., is decidedly wrong. I have so many traverse lines, or rather series of traverses closing entirely to my satisfaction, along the river and scrubs, across the plain, &c., that I feel confidence in saying his work is decidedly wrong.

11 Oct., 1861.

Mr. Surveyor Darke's survey of the Pelican Creek is not, for accuracy, what it ought to be, by any means. It appears to me, that at some few points he has touched the creek, but most of his detail work is nothing more than "sketching whilst chaining," as he himself describes it to be.

The proposed farm portions (marked in pencil, 33, 34, 35, and 36) are not suitable for families to immediately settle upon, on account of want of artificial drainage in winter. The water during winter sluggishly lowers at this place, as the grass impedes its passage; but the land is good and farmers would find it to be well worth £1 per acre now, and need not live upon it in winter. Farmers in England don't confine themselves to live upon such land as is subject to surface water; they work it, and have their houses upon some other part of their lands. All the allotments (proposed allotments) shewn upon this tracing (No. 3) are valuable, and, as I previously writ, well adapted for agricultural purposes. I have selected the best ground, I think, for roads, to admit of effectually draining or carrying off the winter's water from the western part of the plain, and so as to save, in future, cost of construction.

The Surveyor General,
&c., &c., &c.

I have, &c.,
FREDK. WM. BIRMINGHAM.

J.

(No. 60-1276.)

Surveyor General's Office,
Sydney, 16 August, 1860.

Sir,

I beg to inform you that Mr. Surveyor Peppercorne has been requested to transfer to you certain instructions, inadvertently addressed to him, for the measurement of Suburban allotments at Gundurimba.

I have, &c.,
A. G. McLEAN,
A. S. G1.

Mr. Licensed Surveyor Birmingham.

K.

(No. 60-1188.)

Surveyor General's Office,
Sydney, 1 August, 1860.

Sir,

Mr. Wm. Drynan having made application for the purchase of sections 20, 21, 26, and 27 in the suburbs of Gundurimba, I have the honor to request that you will measure the sections applied for, together with such others as may be in demand.

F. S. Peppercorne, Esq.,
Surveyor.

I have, &c.,
A. G. McLEAN,
A. S. G1.

Transmitted to Mr. Licensed Surveyor Birmingham, with reference to my letter of the 16th August last, No. 1,276.

B.C., 29th Oct., 1860.
60/1609.

A. G. McLEAN.

L.

(No. 60-1277.)

Surveyor General's Office,
Sydney, 16 August, 1860.

Sir,

I beg to enclose a tracing, shewing a design for the sub-division of the Reserve at Gundurimba, and I request that you will lay out the portions in accordance therewith, unless you think it desirable to modify it in some respects.

I have, &c.,
A. G. McLEAN,
A. S. G1.

Mr. Licensed Surveyor Birmingham.

M.

To the Honorable the Chairman of Legislative Assembly Committee on F. W. Birmingham.

Parramatta, Saturday, 12 October, 1861.

Honorable Sir,

I beg respectfully to write a few lines in answer to the question put yesterday by the Honorable Member Mr. Hay, and as my memory was then rather uncollected, I now respectfully write in reply to the question—"Which are the measured lands at Gundurimba, surveyed by Mr. Peppercorne?" That all the portions of land measured upon the north arm of the Richmond River have been measured by Mr. Peppercorne, and all the town allotments of Gundurimba, that were offered for sale, have been measured by Mr. Peppercorne previous to my arrival on the river, therefore, I believe I am correct in thinking "the measured lands at Gundurimba" are those north and north-east thereof, and so far I was to make a feature survey; but, instructions for the whole of the Gundurimba Reserve, accompanied by a farm design, was sent me, thereby overlapping for some seven or eight miles along east side of river, and contrary to the instructions for this part, as appears by Acting Surveyor General's letter '60/952.

From this cause, and knowing the design for Gundurimba Reserve to be faulty on the west side of river, I thought the easier way to come to a certainty upon the matter was to write, as I did, to the Acting Surveyor General in my letter '60/21, of December 8th, asking was I to make a fresh design? and of course I would have gladly conformed to his wishes if he thought proper to send me a reply during my stay upon the river.

I remain, &c.,
FREDERICK WILLIAM BIRMINGHAM.

WEDNESDAY,

WEDNESDAY, 16 OCTOBER, 1861.

Present:—

Mr. BELL,
Mr. FORSTER,Mr. HOSKINS,
Mr. SHEPHERD.

JOHN LACKEY, Esq., IN THE CHAIR.

Alexander Grant McLean, Esq., Acting Surveyor General, called in and examined:—

100. *By the Chairman*: The Committee are proceeding with an investigation of the case of Mr. F. W. Birmingham—I suppose you are acquainted with the circumstances? I have not seen his petition.

A. G. McLean,
Esq.

101. There is no petition—merely an application on the part of Mr. Birmingham to have his case investigated by a Committee of the House, as far as relates to his connection with the Survey Office, with respect to a contract for surveying on the Richmond River. You know Mr. Birmingham? Yes.

16 Oct., 1861.

102. I think, some time in 1860, Mr. Birmingham took a contract from the Survey Office to measure the north arm of the Richmond River? It must have been early in 1860 I think. I see, by reference to the papers, that it was in February, 1860.

103. Perhaps you will be good enough to state to the Committee the conditions on which Mr. Birmingham took this contract? Though the term "contract" is what Mr. Birmingham specially wishes to apply to it, it was not a specific contract, but an arrangement certainly having the nature of a contract to some extent, that Mr. Birmingham was to make a survey of the north arm of the Richmond River, from the main river about as far as the town of Lismore,* with all creeks, swamps, and other features that would affect the subdivision of the land for sale, within about one to two miles of the river on either side; that he was to be paid for this general survey at the ordinary linear rate paid to licensed surveyors, £2 per mile; that he was to send in his plans of survey piecemeal, with designs for the subdivisions of farms; that after approval of such designs he was to measure and mark out those farms; and that the price paid for those portions of his general survey, which formed also the boundaries of farms—that is, where a creek or river, part of which had been surveyed in the general survey, formed also a farm boundary—should be deducted from the scale price per acre for the measurement of farms, so that the public should not be paying twice over for the survey of the same ground. It was possible that Mr. Birmingham might have been employed over three times the extent that was stated in that arrangement; but at the time he went down that was what he might fairly have looked forward to as the survey which he was to carry out—that is, the survey of the north arm, from the main river up to Lismore,† with the features I have stated. There was a possible exception of part of the Gundurimba reserve, on which the town of Gundurimba had itself been surveyed, and some surveys might have been made on the reserve by Mr. Peppercorne, and in case Mr. Peppercorne had made them before Mr. Birmingham got there, of course Mr. Birmingham was not to go over the same ground again; but when this arrangement was made with Mr. Birmingham Mr. Peppercorne was instructed not to make any further measurements there, with the view of leaving the whole to Mr. Birmingham.

104. I think the Survey Office or the Secretary for Lands made Mr. Birmingham some advance? Yes; during the time of Mr. Forster's Government some one had pointed out to Mr. Forster or Mr. Black the desirability of laying out this agricultural land, and the Government determined on having it laid out, and instructed me to take measures for that object. At that time unemployed surveyors were not very numerous; most of the best were employed in making surveys for railways; and Mr. Birmingham, who had just then returned from California or British Columbia, without any means whatever, I believe, applied for employment. As he had been previously employed in the department, and his services had given satisfaction, in the dearth of surveyors I recommended him, even though the Government were obliged to advance him £150 to pay his men and provide equipment, until he had earned some money. That, of course, was authorized by Mr. Black.

105. Mr. Birmingham then proceeded with his survey on the Richmond? Yes.

106. Did he effect this linear survey at first? He commenced with some feature survey which enabled him to design fifteen farms, the design for which he sent down according to arrangement, and then proceeded with his feature survey; his design for the farms was approved and returned to him, and he marked them off.

107. I think Mr. Birmingham said that the understanding with him was, that while his early designs were being considered he proceeded with further designs? Precisely; the feature survey first and then the designs. A good deal of our arrangement was verbal, and I cautioned him before he went that the postal arrangements from the Richmond were rather uncertain, and that, therefore, he had better send in his designs for a few farms only at a time, as he might have them ready, in order that he might not leave himself without work in consequence of any delay in communication from that cause.

108. This (*a plan before the Committee*) is a tracing that Mr. Birmingham sent in of the country he had to survey, shewing the different blocks where he effected this linear survey. At the commencement there is some subdivision of farms, which will be the fifteen farms he surveyed in the first instance? Yes.

109.

*NOTE (*on revision*):—I find on reference to the Instructions to Mr. Birmingham, dated 27 February, 1860, of which I enclose a copy, that Mr. Birmingham's survey was to extend to Gundurimba, which is some miles short of Lismore.

†NOTE (*on revision*):—Or, as it now appears, to Gundurimba.

A. G. McLean, Esq. 109. B 1 and B 2 will be the next? Yes. He did not design B 1 and B 2 as farms, but, I believe, as a very extensive township, which he extended, as it seems to me, from this place, over something like four miles in length, rather unnecessarily extensive, apparently, if the whole is designed as a town.

16 Oct., 1861.

110. This will be the spot here (*pointing to map*) on which he wrote a long letter to the Survey Office, suggesting the desirability of leaving a reserve for the purpose of making a canal from one branch of the river to another, which would be about a mile and three quarters across, and would save going round eight or nine miles? Yes. However I am aware that this design for a town was a very extensive design, more extensive than I considered was necessary, and not a suitable design. It was subsequently referred to the district surveyor, Mr. Henderson, and therefore I have not got it with me.

111. It came within the province of a surveyor in Mr. Birmingham's position to make suggestions as to the site of the town, if in his opinion the reserve made in the first instance was objectionable, on account of being subject to floods for instance? Yes, undoubtedly, it would be almost his duty in such a case. On the north arm we have no townships in that vicinity, excepting Lismore and Gundurimba; and on the main arm only a township called Codrington, which is shewn on that plan.

112. I think it was to supplant that that Mr. Birmingham recommended the other site? I am rather under the impression that it was to supplant a proposed town at the junction. The reason that letter was not replied to was—first, that there was no existing necessity for a town there, although there might be for farms; though from the result of the attempted sale of those farms that were measured by Mr. Birmingham, which are, I suppose, as good as any on the river, it does not appear that there was much demand for farms in that neighbourhood, but some have been sold since, I believe. However there was no present necessity for a town, and the design did not, in my opinion, shew much sound judgment on Mr. Birmingham's part, and it was necessary to take the advice of the district surveyor, when he might be on the river, before acting on it. I may explain that the district surveyors are a sort of inspecting surveyors, and their districts are sometimes very extensive. Mr. Henderson's district extends from Brisbane Water up to the boundary of Queensland, so that there would be a long delay between two visits to the same part of his district.

113. That comprises a very wide area of country? Yes. There are not a great many officers employed in that part of the Colony, and, in fact, the district surveyors must be appointed rather in proportion to the number of surveyors than the extent of country.

114. Had the Government any application during the time Mr. Birmingham was proceeding with his survey, to withdraw any portions of his survey on the north arm from sale? I am not aware of any application.

115. You are not aware of any application to withdraw any part of a run comprising some plains which came within Mr. Birmingham's contract—part of Mr. Wilson's run at Lismore? No, I am not aware of it. The fact is, that before Mr. Birmingham went to the river, Mr. Wilson had applied to purchase, under pre-emptive right, all the unreserved portions of his run having frontage on the north arm of the Richmond, but there was very little of the north arm that was not actually reserved.

116. I suppose you are aware, from the information you have of that country, that some parts are much more impracticable and less remunerative to a surveyor than others? Yes, undoubtedly; a great deal of the country on the Richmond River is very unremunerative to a surveyor.

117. And there is some plain country which would be very profitable? Yes.

118. Do you know on which part of the river this plain country would be—towards Lismore, or towards where Mr. Birmingham commenced his survey? I know there are many swamps where he commenced, and brushes; and above Lismore again it is entirely brush; but I believe in the vicinity of Lismore and Gundurimba there is more open country than between Gundurimba and the main river.

119. Do you recollect how many designs of Mr. Birmingham's you approved of—the feature survey? Two in all.

120. Would you recollect from this tracing which they are? One was the design of these fifteen farms; the other was the country embracing B2 and C. I might be able to refresh my memory from the papers. (*Witness referred to papers.*) Yes, the first design was for fifteen farms; the second design was for seventy-two farms; and I believe that is about the explanation of the whole difficulty with Mr. Birmingham—I mean his withholding his designs for farms until he had designed so large a number as seventy-two. If he had sent in designs for fifteen or twenty at a time, or even for ten or twelve, as I had recommended him to do, he would have had the approval of them conveyed to him, one after another, as he proceeded with his feature survey, and he would have been constantly employed; but having exhausted his feature survey by sending in a design for seventy-two farms, he was without work until that design could be returned to him, which he knew could not be done without some delay, on account of the defective postal arrangements before alluded to, independently of the usual time occupied by such matters in the office, with which he was also acquainted.

121. Was it not competent for him to proceed with a fresh design while the first design was here for your approval? Yes, while the first design was with me for approval and for some time probably after it was returned to him, he was engaged on the feature survey on which he designed the seventy-two farms; but after having designed the seventy-two farms he had to come to Gundurimba, where there was no feature survey to go on with, and therefore he was at a stand-still, waiting the return of this design for the seventy-two farms.

122. Was it discretionary with Mr. Birmingham to go back any particular depth from the river in his feature survey, according to the contract? There were certain reserves made on the river, and the subdivision of these reserves was the object of his going there. The boundaries of these reserves formed the limit of his survey; but as the Government were not bound

bound not to make further reserves he was not tied to these boundaries. He went on the average about two miles back from the river—a little more or a little less, at his discretion.*

123. Are you aware whether Mr. Peppercorne was on the river at the time Mr. Birmingham was there? I think not.

A. G. McLean,
Esq.
16 Oct., 1861.

124. Was there any other Government surveyor there? No other surveyor at the time he was there.

125. What do you conceive to be the nature of the difference between Mr. Birmingham and the Survey Department in the first instance. I may as well say that Mr. Birmingham bases his complaint principally on the fact of his communications not receiving the attention he considered necessary, and that in fact he was idle on the river for some time from his designs not being approved of, and information given him? My explanation of his idleness is this: that instead of continuing the practice he commenced with, of sending in a design for a few farms, he sent in a design for a town, the laying out of which was not within the arrangement or contract under which Mr. Birmingham went to the Richmond, although it was quite within his province to send in suggestions as to any favourable site that might present itself, or to remedy any error in previous designs, and he then proceeded with his feature survey to such an extent as to send in all at once a design for seventy-two farms, or five times the number he had previously sent in one design; in this way he exhausted his feature survey, having kept back his farm designs till he had done so, and there being then some delay in consequence of the state of the postal communications, and also a little more delay than usual in the office at that time, in consequence of the chief clerk, who acted as clerk of records, being laid up, the approval of his design was not sent from the office for some considerable time after he had despatched it from the Richmond; his letter conveying this design was not answered for a month after its receipt, and probably he would not receive the answer for a fortnight more, and therefore he was kept idle; but had he sent in a design for fifteen or twenty farms at a time, and then gone on with his feature survey while that design was under consideration, he need not have been delayed at all.

126. Even after sending in a design for seventy-two farms would that prevent his going on with the feature survey? He had completed the feature survey up to the Gundurimba reserve, where the feature survey had already been done; he was told that Mr. Peppercorne had been employed, and that probably on the Gundurimba reserve he might not have any feature survey to do. If Mr. Peppercorne had not subdivided the farms he should have the subdivision of the farms, but not the feature survey. Above that again, the land had been measured under pre-emptive right for Mr. Wilson, and therefore he had no further feature survey to go on with.

127. Did you receive any communication from him with respect to the feature survey of the Gundurimba reserve by Mr. Peppercorne? Yes.

128. Complaining of his inaccuracy? There was a complaint of incompleteness in one place where a lagoon which existed on the reserve had not been shewn. Mr. Peppercorne's survey did not extend to it. Mr. Peppercorne had designed a road to pass through it. That was the principal complaint. He did complain of an inaccuracy which has been under reference to the district surveyor, and is the subject of correspondence now in the office. Mr. Birmingham explains his own case at great length in this letter. I do not know that the Committee would care to read the letter through now; it is a very lengthy one—but I think in it he states his whole case very fully.

129. Is that the letter Mr. Birmingham writes, asking your permission to proceed with the measurement of the Gundurimba reserve on the ground of the inaccuracy of the previous survey? No, this is his letter of complaint; a sort of appeal to the Secretary for Lands.

130. We have it already in evidence? Mr. Birmingham seems to be labouring under a misconception with reference to a letter which was sent to him about an allowance it was proposed to make for surveys of brush lands. In consequence of the unremunerative character of these surveys of brush lands, I recommended, in October, 1860, that surveyors employed in such surveys should be paid 50 per cent. additional on the scale, and Mr. Birmingham and one or two others employed in such country, where there was this tropical forest or brush to survey through, were informed of this in a circular letter which appears to me to be pretty plain, and which I will read to the Committee.

131. We have that already in evidence. There is evidently a misconception on Mr. Birmingham's part, because Mr. Hay, who is a member of the Committee, explained that during his term of office the arrangement was contemplated to give the surveyors an increase of 50 per cent. for measuring these brush lands, and Mr. Birmingham gave in the letter he received conveying that information to him, and evidently misconstrued its meaning; he is under the impression, and no doubt that in great measure has had to do with the misunderstanding, that it was intended to supplant his contract? So he says here. He appeared almost to refuse the 50 per cent. The letter clearly implies that he is still to go on with his plain survey.

132. It seems that there were a variety of circumstances that threw a shadow of doubt over his mind. It is given in evidence, I may tell you, that he had received information from members of Mr. Wilson's family, that some of the land within his contract was to be withdrawn from survey—the most remunerative part of the country that came within the pale of his contract? That was quite an error.

133. And I think you say yourself that there was some delay in answering his letters? There was a delay of a month in answering his letter with the design of the seventy-two farms.

134. You think about six weeks altogether? A delay of a month in the office. His letter was received on the 27th December, a time when there is not much done anywhere, and it

WAS

* NOTE (on revision):—I perceive by reference to the instructions that two miles was the distance specifically stated which Mr. B's survey was to extend from the river.

A. G. McLean, Esq.
 16 Oct., 1861.

was answered on the 30th January. I may mention that at this time there was an arrangement in the Survey Department and Commissioner of Crown Lands Department, of which I was acting head at the time, that all correspondence with the public should be conducted entirely through the Minister's Office, and that the correspondence of the head of the department should be only with the officers of the department; in fact, that the Surveyor General and Chief Commissioner should report to the Secretary for Lands, and the Secretary for Lands should communicate entirely with the public. In carrying out this arrangement some three-fourths of the clerks of the Survey Department were transferred to the Secretary for Lands, leaving some three or four to the Survey Department, of whom one was practically the chief clerk and record clerk, being the only one left that was competent for either of the offices. Having these two duties, chief clerk and record clerk, he was very much overworked, so much so that he was knocked up, and at this particular juncture he was ill. There was, therefore, some delay in dealing with the papers. The delay was not in writing the letter, because that was simply a copy of what I had directed to be written; but in the recording of it, and preparing the case for consideration, which, under ordinary circumstances, very often takes three or four days. When a letter comes in any subject that has been before treated of in the office, the practice is to find all former papers bearing on the subject, and place them with the new paper; and at this time, when the record clerk was absent, as I have explained, there was no one competent to do this duty efficiently, and letters were therefore delayed for a considerable period; I have no doubt this one was delayed for ten days or a fortnight before it ever came to me.

135. *By Mr. Shepherd*: You have no complaint to make of Mr. Birmingham? None, of his work; he is a very accurate surveyor, and I believe quite a conscientious man. I believe he would not send in an incorrect survey, or fudge his work for the sake of saving himself trouble. He is a very conscientious man, but very eccentric.

136. Did you approve of his design? Yes; his design for these seventy-two farms was a very judicious one.

137. The letter approving of it did not reach him before he had left? No; he had left the river. When the papers came to me I marked it very urgent; and my memorandum was written on the 29th January, and the letter to him on the 30th, so that there was no great delay between the time I acted on it and the time the letter was despatched.

138. What time is generally required to convey letters to and fro? They go by the Clarence River, overland from the Clarence River; and it seems this letter of Mr. Birmingham's is dated 8th December, and did not come in till the 27th December—nearly three weeks. I think that is an unusually long time, and it may have been written some days before it got to the Post Office at Casino. It was a matter of some consequence to Mr. Birmingham; and as he was personally cautioned that the postal arrangements were uncertain, it was his business to have seen that there was no greater delay than could be avoided resulting from the course of post.

139. Was it long after you had written, confirming his plan, that you heard he had left the river? I can scarcely say, from memory; but I think the letter written to him was returned through the post a long time afterwards.

140. Did Mr. Birmingham make any immediate application to you after his having left? After his coming to Parramatta?

141. Yes? Well, I cannot be certain of that; I will just look at the papers a moment. (*Witness did so.*) This is the letter to him, on the outside of which I find the following endorsement, "Left the river with instructions to return all Government letters. W. P." This came back on the 3rd May.

142. *By the Chairman*: It was written in January? Despatched on the 30th January; this note I suppose is by the Postmaster at Casino,* but he does not put any date unfortunately.

143. *By Mr. Shepherd*: After having approved of Mr. Birmingham's designs, and ascertained that he had left the river, would you have taken him on again? I proposed not very long since to take him on again, with the view of saving to the Government the money which had been advanced to him, allowing him to work it out.

144. *By Mr. Hoskins*: Is he in debt to the Government? He is; the amount advanced little more than provided his equipment, and it was not expected he would repay it for some time.

145. *By Mr. Shepherd*: He would have worked it out? Yes, of course the object of the Government was to employ him sufficiently to enable him to support himself in the meantime, but to work it out eventually, which I have no doubt he would have done if he had completed his survey. I see he writes from Parramatta in April, 1861.

146. Notifying his having left the Richmond? No; that is not the earliest letter from Parramatta. He had been to see the Secretary for Lands when he came to Sydney in the first place, and Mr. Robertson was under the impression that he was intoxicated, but he got a medical certificate to shew that he was not. I believe he was only excited; he is a very eccentric man. With reference to his being further employed I may say that in July last I proposed to Mr. Robertson that he should be allowed to finish his contract, with a view of giving him an opportunity of working out his debt to the Government. (*Witness read the letter.*) The regulation here referred to about copying plans in the department was one made by the Secretary for Lands in opposition I may say to my advice, but Mr. Birmingham having taken it into his head that I am a special enemy of his, seemed to imagine that it had been made by me and personally to affect him. I allude to the regulation charging a fee of £5 a year to each surveyor seeking the privilege of access to original maps and field books, to make tracings.

147.

* NOTE (on revision):—It reached Casino on the 15th February, as per post mark.

147. *By the Chairman*: In the event of a surveyor requiring to make a tracing only on one occasion, he would have to pay £5? Yes. I opposed it, partly thinking it might give a monopoly to a few, and partly, because it might be inconvenient to the office that certain individuals should have the power it would seem to give them, to come to the office and demand to see certain plans, and room to make tracings. Mr. Robertson approved of the proposal I made for the re-employment of Mr. Birmingham, and he was informed that he might complete the subdivision he had designed, and of course that would have led to his completing the whole of the surveys, and possibly to his being continued in the employment of the department; but he declined it, because he said it was a partial offer, and he required compensation for his loss of time.

A. G. McLean,
Esq.

16 Oct., 1861.

148. *By the Chairman*: It was not clearly understood that he was to be resumed in his former position to effect the original survey he was sent to execute? No, but these seventy-two farms formed a very considerable portion of it, and the principle being admitted that on his retracting some of his improper letters he would have been again employed.

149. It was quite reasonable for Mr. Birmingham to suppose, that his being reinstated to do this work might have had the sole effect of giving him occupation until his debt was worked out?

150. *By Mr. Shepherd*: That was the object I understood? Yes, that was the reason; there was no other object in the Government employing Mr. Birmingham again but that he should work out that debt. However, if he had said, give me the whole original contract or so much more as will afford me some compensation for my loss of time, the matter, I think, would have been arranged.

151. Did not Mr. Birmingham make such an offer? In his last letter.

152. I think we have it in his evidence that he would resume his work on certain conditions—some compensation for his loss of time? Not that I admit that he deserved any remuneration for his loss of time, because, as I have explained, it was his own fault.

153. *By Mr. Hoskins*: What is there particularly offensive in Mr. Birmingham's communications—is it the style, or the language used? This (*referring to a letter*) is his first letter, a sort of appeal to the Secretary for Lands, in which he recounts, almost *verbatim*, a good deal of a conversation that he had with me on the subject of the contract.

154. Did he shew a want of respect? I certainly think he did. (*The witness read passages from the letter, which he considered offensive.*)

155. Is that letter to you? It is addressed to me, but with a request at the top that it may be immediately laid before the Minister for Lands.

156. Was it his duty to address all communications to you? Yes, but of course he had a right to appeal to the Secretary for Lands.

157. I suppose you consider it an unusual proceeding to write to a subordinate clerk on official business, as it appears from that letter he had done? Merely to make enquiries he might do it; but he had no right to mention it afterwards in an official communication, or to say that I had sent him such a message as that to which he alludes. However, this is not so objectionable as it is irrelevant and unofficial. Some of his other letters are more offensive. The letter he published in the papers about the fees charged to surveyors for making tracings was much more offensive in its tone than any of the official letters.

158. Do you really think Mr. Birmingham an efficient officer? Yes; he is certainly a qualified, pains-taking, and conscientious surveyor.

159. Do you believe him to have been a pecuniary loser? He had nothing when he commenced, and nothing when he left off; his labour would be thrown away no doubt.

160. *By the Chairman*: The same means that prevented Mr. Birmingham from knowing whether his design was approved of or not would also prevent him from knowing the cause of the delay in communicating with him from your office? Yes; but he must have expected some delay in the office. At that time I was acting as Chief Commissioner of Crown Lands, and I had a great many things of quite as much importance as Mr. Birmingham's to attend to. It is impossible in any large department to be up to the day, unless you have a staff so large that a great many of them will often be sitting idle, and ready to be at once applied when a mass of business comes in. Therefore a delay of a fortnight or three weeks would not be an unreasonable delay in dealing with his letter. He should have expected at least a fortnight's delay in the office, besides the postal delay, which it was his interest and his duty to make himself acquainted with. As it was, there was a fortnight more delay than usual, owing to the illness of the chief clerk, as I have explained.

161. Are you aware that Mr. Birmingham received communications from your office, on matters not relating to this particular survey, in the mean time—one or two; I think one had reference to birds being procured for the aviary in Sydney? Yes, that was a circular letter directed to be sent to all the surveyors, requesting them to take any opportunity they might have of securing birds for the aviary, it being thought that, from their position, they would be able to lend some assistance in that object.

162. You say you had no occasion to find fault with Mr. Birmingham's work as a surveyor? Not with his work.

163. And you admit that he had a right to expect, from the understanding between you, that he had the survey of the river from the junction to Lismore? *Yes, so long as his surveys were satisfactory and his conduct becoming. Of course there were circumstances which might have justified the Government in breaking the contract or arrangement. I attribute the whole difficulty to his want of judgment in not sending in a small portion of the design at a time, and keeping some work in advance, and to his assuming at that distance
from

*NOTE (*on revision*):—This answer must be qualified, the work beyond Gundurimba not being within Mr. B's instructions.

A. G. McLean, from Sydney, and with uncertain postal communication, that he would have a reply almost immediately, to his letter. He had surveyed up to the Gundurimba reserve and had no more feature survey to do, and I think he must have been idle from the day that he despatched this design until the reply would reach him.

A. G. McLean,
Esq.
16 Oct., 1861.

164. With reference to the charge in your office for inspecting maps, what was the original charge? There was no charge before. The arrangement was that any respectable surveyor had access to the originals, and the Surveyor General exercised a discretion as to whom he would allow to see them. Any one was allowed to make tracings, but old originals and field books were only accessible to a few old surveyors. In fact, excepting to a few of the very old surveyors, it would cost more trouble to find out anything from the old field books and old originals than the information gained would repay. I think perhaps it may be desirable to append to my evidence the two reports on the subject of Mr. Birmingham's case, that I have made; perhaps they will shew more clearly than I have done verbally the whole case. One is a report to the Secretary for Lands on Mr. Birmingham's first appeal to him, and the other is my letter to the Secretary for Lands, dated 5th July, 1861, with marginal memorandum on his letter. Possibly also it may be well to append, although it never reached him, my letter in reply to that long letter of his, his first appeal to the Minister, which was enclosed in the same cover with a formal approval of his design for the seventy-two farms.

165. You can supply copies, I suppose? Yes. I should desire to do so that the Committee may see the spirit in which I met his appeal.*

A.

Surveyor General's Office,
27 February, 1860.

Sir,

In reference to your letter of the 23rd instant, No. 1, I have to request that on your arrival at the Richmond, you will commence a traverse survey of the north bank of the river, at the south boundary of the "Reserve," at the junction of the north arm and main river, and carry it up to that junction; thence along the east side of the north arm to the northern boundary of the Reserve, determining, wherever practicable, by angles and bearings, the relative position of the opposite side of the river; and that you will then traverse all creeks, lagoons, swamps, or other obstructions to the adoption of a regular design for farm portions, within two miles of the portion of the river surveyed; and having plotted your surveys you will then make a design for the subdivision of the land, giving your special attention to the selection of the best lines of road for future traffic, both along the river and from back lands to it; as also to the necessity of reserving spaces for wharfs at the extremities of roads terminating on the river.

2. The portion to be designed should be of areas varying from 40 to 80 or 100 acres. They should be so designed as to embrace in each a fair proportion of available land to divide the river frontage amongst the largest number of conveniently shaped portions, and, subject to these conditions, and to the direction of roads, they should be, as far as possible, rectangular, and have their boundaries, where no reason exists for their being otherwise, directed to the cardinal points.

3. Having completed this design, and transmitted it to me for approval, you will proceed to survey, in a similar manner, the river and features near it, from the northern end of the first survey to the surveyed lands at "Gundurimba," measured by Mr. Peppercorn, and to design it—exclusively, of course, of the pre-emptive purchase measurements within it—for subdivision.

4. You will be at liberty to make the usual charge for linear measurements for the surveys referred to, but in payment for the future measurements which you may make of the land for sale, a deduction will be made for all river trace, and other linear measurements which may form boundaries of portions to be measured.

I have, &c.,
A. G. McLEAN,
A. S. G.

Mr. Licensed Surveyor Birmingham.

B.

Surveyor General's Office,
Sydney, 30 January, 1861.

Sir,

I have to acknowledge the receipt of your letter of the 10th ultimo, No. 23, and in doing so I must express my great surprise at the tone and character of that communication.

The letter is principally or wholly founded on the circumstance communicated to you by circular, that you would for the future receive an additional remuneration for any portion of your surveys which might lie within the dense river brushes of the locality in which you are surveying, and as an assumption for which there are no grounds in the circular, that in conceding to you the advantages resulting from this arrangement without application on your part, it was intended to deprive you of a large and remunerative portion of the survey, for the performance of which you proceeded to the Richmond.

Your letter addressed to myself, but with a request in its heading that it "may be immediately placed before the Minister for Lands," contains an unnecessarily detailed statement of the circumstances in which you rejoined the department, with allusions to messages through members of this department, which of course cannot be recognized as official, and to which you are not warranted in referring in official correspondence.

The whole letter is obviously an appeal to the Minister against an injustice to which you suppose yourself to have been subjected at my hands, but which you might at once have learned by a letter of inquiry from me, had no existence. While every individual in a public department has an undoubted right to appeal to the Minister to whom the department belongs, against any decision or action of the head of that department, it is necessary to the well-being of the public service that when such an appeal may

*MEMORANDUM (after revision):—I enclose, as Appendices, copies (1) of the original instructions to Mr. Birmingham, dated 27 February, 1860, A; (2) of my letter in reply to Mr. Birmingham's letter of appeal to the Secretary for Lands, dated December 10th, 1860, B; (3) of my report, dated 5th July, 1861, to the Secretary for Lands, on the subject in question, C; (4) of my letter to the Secretary for Lands, dated 5th July, 1861, D; and (5) copies of my marginal memorandum on Mr. Birmingham's letter of 21st May, 1861, E, which was returned to the Secretary for Lands in letter No. 4.

A. G. McLEAN, 22 Oct., 1861.

may be made on insufficient grounds, the appellant should suffer the penalty of having made a ground-
less accusation against the officer under whom he may serve, even should that penalty amount to a
removal from the service; and this principle applies with greater force to an officer temporarily
employed as is a licensed surveyor.

It is not, however, my desire to remove you from your position, or to make any change other
than that provided by the circular relating to Waste Lands, in the arrangement under which you have
been employed; and I have, therefore, not forwarded your letter, as you requested, to the Secretary for
Lands, but I must caution you that I cannot, with due regard to the position which I occupy, or to the
conduct of the department, permit such communications to be addressed to me, and I would express a
hope that you will yourself now perceive its impropriety.

A. G. McLean
Esq.
24 Oct., 1861.

Mr. Licensed Surveyor Birmingham.

I have, &c.,
A. G. McLEAN.

C.

Blank Cover Report in Mr. Birmingham's letter of 10th December, 1860.
61,925.

MR. BIRMINGHAM had no specific contract, but he was informed that he should be employed in the
survey of the north arm of the Richmond River, from the main river upwards, and in the division into
farms of the available lands on its banks; and he was supplied with an advance of £150 to enable him
to undertake the work, with which he proceeded until the receipt by him of a circular letter, of which a
copy is enclosed (marked A) informing him that for all surveys which might be made through the
tropical forests on the river he would be allowed an additional 50 per cent., thus so far improving his
position.

Mr. Birmingham, labouring under a strange misconception that it was intended to deprive him
of all the surveys with which he was to have been entrusted, save that through such forests, addressed
to me the enclosed intemperate and scarcely rational letter, marked B, to which I, as early as the
pressure of other business admitted, returned the reply, marked C, prior, apparently, to the receipt of
which by Mr. Birmingham, he addressed to me the enclosed letter, marked D.

Mr. Birmingham has thus thrown up the surveys on which he was employed, partly under a
misconception for which there were no grounds whatever, and partly through delay in the receipt of
instructions, as hereinafter explained, and in doing so has seen fit to commit himself to statements and
remarks so improper and incompatible with his position, as to preclude his further employment in the
department.

The office not being in possession of any correct representation of the course of the north arm
of the Richmond River, Mr. Birmingham's directions were to make a survey of the north arm of the
Richmond, and of the features of the country adjacent, and to lay out into portions of from 40 to 100
acres, the available land which might be included within the survey. It was considered desirable that
Mr. Birmingham should submit for approval the designs which he might propose for the subdivision of
the available lands; and as on account of the uncertainty of the post to the Richmond, it was thought
that this would entail some little delay, he was instructed, with a view of economizing his time, to
proceed with portions of the feature survey, and to submit for approval the designs he would propose
for the available lands within such portions, and during the time which might be occupied in obtaining
the approval of the designs, to continue the feature survey.

Mr. Birmingham acted on these instructions in the first portion of the work, but latterly by
completing a great proportion of the feature survey without submitting the necessary designs for farms,
left himself unprovided with work. The only shadow of complaint which I can perceive that Mr.
Birmingham can urge in the matter, is, that his letter of the 8th December (marked E), which was
received on the 27th of that month, was not replied to before the 30th January. This delay occurred
partly from the absence, from illness, of the then chief clerk, and partly on account of the considera-
tion whether the writer of such a letter as the very improper one above referred to (marked B) should
be further employed at all in the Department.

Mr. Birmingham's claim to compensation is, I consider, wholly untenable; and I can only
express my regret, that by employing such a person, the public should be subjected to some loss in the
advance which has already been made to him.

A. G. McLEAN.

B.C., 5th April, 1861.

D.

(No. 61-618.)

Surveyor General's Office,
Sydney, 5 July, 1861.

Sir,

In returning Mr. Birmingham's letter, forwarded by your blank cover of the 23rd May
last, I beg to draw attention to the marginal memoranda which I have inserted, and which may serve
as replies to, or comments on, the only portions of his letter which appear to me to be relevant to the
question, or deserving of reply.

2. I beg to enclose a letter to me by Mr. Birmingham, and dated 10th May, 1861, expressing a
desire to have an interview, with my memorandum for a reply, (and which I trust the Secretary for
Lands may consider a proper one under the circumstances,) but which was not forwarded after being
prepared for signature, for the reason set forth in my memorandum on the unsigned letter also enclosed.

3. Although there is no present demand for land on the Richmond River, as I infer from the
circumstance that of the fifteen farms measured by Mr. Birmingham at the junction of the Mai River
and North Arm, not one was bid for when put up to sale. I think it desirable with the view of
obtaining value for the advance of the £150 made to Mr. Birmingham, that he should be allowed to
complete the surveys of the lands which he has designed; and had he acted, as requested by the letter
above mentioned, which I withheld, I should have seen him, and probably have proposed the completion
of the work.

4. Although, however personally perfectly regardless of what Mr. Birmingham may say or write
about myself, it does not appear to me that, consistently with the well-being of the public service, any
terms can be offered to Mr. Birmingham until he shall have made the fullest apology for the gross
improprieties contained in the official letters herewith, and in a letter published by him in one of the
daily papers, and which I enclose.

5. I think that I may fairly now ask a decision at the hands of the Secretary for Lands as to
the propriety of my conduct in this matter; and request that I should not be called upon to expend
any more public time in reporting on, or in replying to, further communications which Mr. Birmingham
may make.

I have, &c.,
A. G. McLEAN.

Under Secretary for Lands.

Marginal

E.

Marginal Memo. thereon by the Acting Surveyor General.

There is no desire to ignore or deny the agreement which Mr. Birmingham is so anxious should be called a contract, but rather to carry it out, that the £150 advance may be repaid or worked out. (See admission scored in my B.C. of 5 April.)

There was to be no compensating or counterbalancing reduction; but, as will be seen from the enclosed extract of the letter referred to, Mr. Birmingham was not to be paid for surveys of farm boundaries, for which he had already been paid as linear measurement in feature survey.

This telling "in effect" that Mr. B. is to give up his right to survey the two largest plains, &c., consists in the circular letter enclosed in my B.C. of 5th April, and marked A, which not only says nothing of the plains not being measured, but clearly itself implies (*see portions scored*) that the subdivision is to extend *beyond* the brush or forest, and therefore over the plains.

The delay in dealing with the town design was not material. I could not approve of it as a whole, but required the opinion of the district surveyor, after inspection of the locality, before arriving to a conclusion in regard to it. The delay of a month and three days in dealing with the farm design, I have already explained. The postal delays Mr. Birmingham should have been acquainted with, and made allowance for, in sending in his designs.

I have no desire to deny this, but it has, of course, no bearing on the fact alleged, that the office was not in possession of any correct representation of the course of the north arm of the Richmond River.

Although this survey has less traverse, &c., than others, it embraces a design for 72 farms, while the first had a design for 15 only. Had Mr. B. made feature survey, and sent in design for 20 or 30 farms instead of 72, it is probable that he would have been subjected to no delay.

A. G. McL.

5 July, 1861.

Extracts from Mr. Birmingham's letter of 21st May, 1861.

In reference to the Acting Surveyor General's Report, 61/925, I will, in justice to myself, make a few remarks—"Mr. Birmingham had no *specific* contract." From this it would appear (believing the adjective *specific* to be meant) that there is an evident desire to ignore the contract, and that I cannot by any means prove that which makes a thing of the species of which it is.

The Acting Surveyor General cannot recollect my asking to go upon salary to do the survey, and his reply—"The Government have nothing but a contract to offer you, &c."—and stating the terms £2 per mile for linear measurement, the licensed surveyors' scale of fees for farms, less some portion of the profit to be made by that scale (as the Acting Surveyor General there stated) "to counterbalance the large profit that would otherwise be derived by one from the plains;" but, lest I should forget these terms, he took the trouble of afterwards attaching them to a detail letter 60/299, of February 27th, 1860, bearing or rather relating to my contract.

"Mr. Birmingham, labouring under a strange misconception, &c." Now the fact is, that there is no ground for this part of the Report, which is incorrect. What I wrote was thus, (first)—"I am *in effect* told I must give up my right to survey the two largest plains." Again, in the same letter, I wrote thus—"I respectfully ask, what would be my position, relative to this contract, was I to give up my right to the very body and soul of the work, *in so far as I have gone*, and which is now upon tracing No. 3?"

Tracing No. 3 did not represent *all* the plains, &c., of my contract, therefore the Acting Surveyor General invents "a strange misconception."

There appears to me nothing irrational in any contractor pushing or trying so as to get into his hands an approval—a working order—to proceed with the survey of plains that would be very profitable to him, especially after emerging from a dense and unprofitable jungle, or scrub, and a quarter of a year or so of time having then elapsed since the representation of his design was sent to his employer's Minister, and there would not be anything irrational in such a Minister taking upon himself the trouble of giving an answer bearing practically upon the subject he was spoken to about; it would be, as I think, a culpable thing to allow the business to stagnate for three or four months, as appears, by not informing the contractor that a certain *part* of a certain tracing should be altered; or he might, without impropriety, put his shoulder to a good work, *i.e.*, Mr. Forster's, "the Government are anxious to open up the north arm, &c.;" but to blame a contractor for the delay is irrational, when a previously received Acting Surveyor General's letter 60/1098, of July 16th, 1860, states—"As I see no reason to alter the design shewn, &c.," thereby leading to the rational conclusion that alterations would be made so soon as found necessary.

In the Report I am replying to I find these words: "As to preclude his further employment in the department"—was mine not employment *by* the department? Again, "the office not being in possession, &c." Does the Acting Surveyor General mean to deny his opening words to me about this matter?—"The Government (Mr. Forster's) are anxious to open up the north arm of the Richmond River by a farm survey, for the purpose of settlement, &c."

The third and last feature survey made by me has actually the smallest quantity of linear miles, only twenty-six and one-half miles (26½ miles.) Mr. McLean says, I was instructed to "continue the feature surveying during the time which might be occupied in obtaining the approval of the designs"—well I did so, to wit, west side of tracing No. 3, at a sort of quarter speed; in his Report he seems to blame me for this continuation of the feature survey, and tries to exculpate himself by saying I had not transmitted, or rather "submitted the necessary designs for farms." Now the fact of the matter is this, that I defy the Acting Surveyor General to produce any one of my three tracings without a design for farms appearing upon each and every one of them. Also, by taking the three tracings collectively, to shew to the contrary of this, that the three tracings embraced in farm design all the acreage did upon the feature surveying, and that an answer could be given by him and received by me during the time I remained upon the Camps 1 and 2.

THURSDAY,

THURSDAY, 24 OCTOBER, 1861.

Present:—

MR. BELL,		MR. FORSTER,
MR. CUNNEEN,		MR. SHEPHERD,
	MR. WALKER.	

JOHN LACKEY, ESQ., IN THE CHAIR.

A. G. McLean, Esq., called in and further examined:—

166. *By the Chairman:* You have been already examined in reference to the contract, or the supposed contract between the Government and Mr. Birmingham, but there are some questions that Mr. Birmingham wishes to put to you, through the Chair, by which he hopes to elucidate the misunderstanding between himself and the Survey Department. The questions I shall put, will, therefore, be those made at the instance of Mr. Birmingham. In your evidence you have already stated that Mr. Birmingham performed his work in a satisfactory manner until he left the river? I have.

A. G. McLean,
Esq.
24 Oct., 1861.

167. Did you say to Mr. Birmingham, previous to his going to the Richmond River, that there would be no stoppage of his work, in these words, "There will be no stoppage; while you are going on with your second part I will send you your first, and so on through your contract?" I cannot say whether those are the exact words I used, but such was, no doubt, my intention. I desired that he should experience no unnecessary delay. My evidence shews that.

168. You told him that there should be no stoppage of his work? I did I believe—no delay on my part.

169. Did you tell him that the Government had sufficient confidence in his surveys, and that you had no doubt whatever, but that whatever he recommended would be adopted? You allude to his designs?

170. Yes? Then I could not have told him this. I could not have said that all his designs would be adopted, as, for instance, the design for a township. That was not adopted.

171. Did you say, previous to Mr. Birmingham going to the river, that the Government had so much confidence in him that you were sure that anything he recommended would be approved of? I cannot recollect whether I said anything of the kind; but I can hardly think I could do so, because if I thought there would be no doubt whatever about the adoption of his designs, there would be no necessity for me to call upon him to send them in, since he might as well go on with his work at once, and so lose no time.

172. Did you acknowledge the receipt of Mr. Birmingham's letter, No. 7, from the Richmond—do you recollect his letter, stating his intention to propose the formation of a township? I do not recollect it, but probably he did so. If the receipt was acknowledged it will be in evidence, I presume.

173. Are you aware, as a matter of fact, that many of the town sites on the Richmond have been selected with bad judgment? That is a matter of opinion rather than of fact.

174. Has it been represented to you officially that the town sites have been badly selected, so much so as to be liable to inundation in time of flood? There are, I think, only four towns on the Richmond River. There is one (Casino) at the head of the navigation of the main arm at the first crossing-place; there is one (Lismore) at the head of the navigation of the north arm; one (Ballina) at the entrance from the sea; and there is the village of Gundurimba, also on the north arm. I am not aware that it has been officially represented to the department that any of these sites have been badly selected. There is also the township of Codrington—that, possibly, may not have been a very judicious selection with regard to site.

175. Are you aware that some of the town reserves on the river are subject to inundation? I do not think that there are any town reserves on the river.

176. Were you in communication with Mr. Gerard, Mr. McKellar, and Mr. Wilson, relative to a survey of the north arm of the river with regard to the withdrawal of any portion of the land, then in course of survey, being withdrawn from sale, or with regard to any question of that kind? I am not aware of any such correspondence. Mr. Wilson had several purchases of land under his pre-emptive right, and there were frequent communications on the subject between him and the department. Mr. McKellar had also some purchases of improved allotments at Gundurimba, and he may have also corresponded with the office. I am not acquainted with Mr. Gerard, nor do I know whether he has any property on the river.

177. Have you written to any one saying that the plan upon which the Gundurimba reserve was plotted would not be acted upon, and that the allotments, as then set forth, would not be put up for sale; or have you stated anything of the kind in conversation with any person? I have no recollection of having done either the one or the other.

178. Did the present Minister for Lands give you any particular instructions relative to the survey of the north arm of the river? I am not aware of any particular instructions having been given in relation to it. There were communications received at various times in reference to land claimed under the pre-emptive right, in virtue of licenses held, and which land was withheld from sale, on the principle laid down by Mr. Robertson, of not allowing any claim where more than * 25 miles of area was demanded. But besides this, the principle had no application in the present case, since it referred to lands between Gundurimba and Lismore.

179. *By Mr. Walker:* How much did the Government give altogether to Mr. Birmingham? By way of advance?

180.

* Revised:—640 acres were applied for out of 25 square miles of leasehold.

- A. G. McLean, Esq.,
24 Oct., 1861.
180. No, altogether? He has been paid for some of his work, but I cannot say how much. No part of the advance made has been stopped from him, but he was paid in full for all work done in order that he might have funds to carry on with.
181. The advance made him in the first instance was £150? Yes.
182. And you cannot say how much more he has received? I cannot say positively, but I can ascertain.
183. All we want is just a rough idea of the amount? Well, at a rough guess, to which I do not at all bind myself, he may have received £300 for work done, beyond the £150 advance. But I do not say that the amount I have named is correct, even within £100.
184. When did he first commence work? Probably about March or February, 1860.
185. And when did his work terminate? The letter, dated 30th January, from the Survey Office, and directed to him, reached the Richmond River after he had left there.
186. Then you consider him in debt to the Government now for the advance made to him? There is no doubt but that he received an advance which was to be repaid, and that such advance ought to be repaid. It is then almost the whole question at issue between Mr. Birmingham and the Government, whether he is in debt to them or not. We say that he is, whilst he considers that the Government is in debt to him.
187. Did you consider that he would work out the advance made to him? He has been paid for the work he has done at the scale of prices agreed upon, the Government having stopped nothing, in order to give him the means of carrying on.
188. Were the plans that he furnished used in any way? Yes. They were approved of, and are available in our office now.
189. I think you have stated that the Government were even now willing to take Mr. Birmingham into their service to work out the sum in which they consider him to be indebted to them? Yes.
190. Was it intended to employ him only until such time as the amount due should be worked out or was he to be employed regularly? It was certainly proposed that the sum should be worked out, but it was never intended by me, at all events, that he should merely work out, the money and then cease to be employed. It was hardly likely that I should entertain such an idea.
191. Were the Government willing to give him a permanent engagement? No; that was not intended; but it was my intention, when proposing to re-employ him, to give him such work in the service as would enable him to work out the money, and that would give him a gain equal to what he would have made under his original contract. It was never contemplated, however, to compensate him for the delay of which he complains, and for which he claims remuneration.
192. *By Mr. Forster*: Were these lands upon which Mr. Birmingham was employed ever surveyed before under a contract? No. There was a species of boat survey made by a salaried surveyor, but the lands on the banks were never surveyed.
193. It was not then a portion of the land surveyed a long time ago? No; what you allude to is some land that was surveyed some years ago on the Clarence. That survey has become unavailable because none of the portions were marked out in blocks of less than 640 acres. The greater part of the available land was in larger areas.
194. *By Mr. Walker*: Can you state whether or not the Government are now willing to take Mr. Birmingham into the public service? I can only say that the Secretary for Lands approved of my recommendation made about two months ago, that Mr. Birmingham should be so employed, and I have no reason to believe that he has changed his mind since then.
195. *By Mr. Bell*: Would not Mr. Birmingham have gained a very considerable sum by the part of the land that was still left him to survey? Yes; there was a part of his plan upon which he would have made a very good profit. I am aware that the first part of his work was not remunerative, and it was on that account that no stoppage was made in his payments, as we wished him to have the means of carrying out his work.
196. And you were willing to take him back into the Government service, in order that he might work out his debt? Yes.
197. You say that he is indebted to the Government and not the Government to him? I say so, but I am aware that that is the question now in dispute between us.
198. But, by reason of his contract with the Government not having been carried out, he has been a very large loser? No doubt; but then the question will depend entirely upon whose fault it was that the contract was not carried out. It is that, I presume, that the Committee has been appointed to inquire into. If it was by his fault that the work was put a stop to, why then, I presume, that he deserved to lose as he had done; but, if it was by the fault of the Government, then he is entitled to compensation for his loss.
199. But in surveying the land, out of which he made nothing, he had been given to understand that he would have to survey also the piece of land out of which he could have made a profit—that would have repaid him for the other? Yes, no doubt; and it was so understood in the office, that being the reason, as I have said, why no part of his debt was deducted from the payments made to him. We knew that that was not a productive part of his work, and we waited until he got to the more remunerative part, before asking repayment of the advance.
200. He has been paid up in full for all the work he has actually done? He has.
201. And if it is shewn that the contract has been broken by him he will be still in debt to the Government? Exactly.
202. *By the Chairman*: Do I understand you to say that Mr. Birmingham understood that he was to have the survey of the whole country of the north branch, up to Gundurimba? Yes; but I did not know at that time whether Gundurimba had been subdivided, and I most likely told him that if it were not, he should have the work to do. His official instructions, however, were, that he should survey up to Gundurimba.

203. And how much did he survey? He made a general survey to Gundurimba Reserve, A.G. McLean, Esq. and sent in also a detailed survey of fifteen farms, which he marked out.

204. And how did he come to cease working; what were the reasons for his terminating the contract? As far as I can understand his reasons, from his communications with our department, they were, that the instructions to him to proceed with the survey of the seventy-two farms did not reach him for a very long period; that he was thus left idle; that he could not remain there longer under such circumstances; and that he consequently left. 24 Oct., 1861.

205. *By Mr. Bell:* Do you think that, under the circumstances detailed, he broke the contract? The question is, by whose fault it was that he was left so long without instructions.

206. *By the Chairman:* Was he left longer without an answer to his communications than is usual in such cases? My evidence previously given explains this very fully. There was certainly a great delay in the postal communication. The letter took three weeks to come down to Sydney; and there may have been another three weeks consumed in the reply going back. Beyond that, there had been a month's delay in Sydney. A letter of this kind, which has to be referred to so many persons, may ordinarily take three weeks before it can be replied to, but as I endorsed it "Urgent" I presume it was hastened through, and might have been replied to in perhaps a fortnight; then a fortnight additional was caused by the illness of the chief clerk of the department, or perhaps by some extraordinary pressure of business upon the office.

207. *By Mr. Walker:* Do you think it fair that Mr. Birmingham should be made to suffer for either of these causes? A licensed surveyor who understands his business well, ought so to lay out his work as to provide that he shall always have something to do, and that, whilst he is waiting for instructions upon one part of his work, he shall have other work to go on with. He was warned both as to the uncertainty of the post, and as to the delay that sometimes occurred in the office. Persons who have communications with our office know that in consequence of the many references that have to be made of them, from one branch of the Lands Department to another, replies are sometimes delayed for more than a month.

208. *By the Chairman:* Was the reply in this instance kept back from a postal or from a departmental delay? There was an actual delay of, say a fortnight, in the department, over and over what is ordinarily required; but that has been fully explained in my evidence of the other day.

209. And do you think that had Mr. Birmingham gone on with the survey, the latter part of the work would have been far more profitable than the former? It would have been far more so than the earlier part of the work.

210. He did the most difficult part of the work? Yes, I think so.

211. And that which remained for him to do has still to be done now? It has.

212. Are you aware of the whole time which elapsed from the period of his sending in his last feature survey, to that of his leaving the river? I am not, nor can I give any idea of it, not knowing the date when he left the river.

213. In his evidence he says that five months elapsed from the time he wrote to the Survey Department, enclosing his feature survey, until the time he left the river, and that then he had received no answer to his communication? I cannot see how that can be, since the 8th December is the date of his last letter to the department, and that was answered in January.

214. He says that the letter he alludes to as not having been replied to was dated in August? Then that was the letter enclosing the town design. That was not approved of, and it was not thought worth while to communicate with him on the point, as it was not intended to act upon the design.

215. *By Mr. Shepherd:* But the design of the seventy-two farms was approved of, and he would have been able to carry out that work if he had remained? Certainly. The reply is dated in January, and reached Casino some time in February, though the exact date is illegible on the post-mark.

216. *By the Chairman:* That letter arrived at Casino after Mr. Birmingham had left the river? Yes.

217. With regard to the letter No. 7, did you answer that at all? That is the letter enclosing the town plan?

218. Yes? Unless to simply acknowledge the receipt of it, I am not aware that I did.

219. *By Mr. Cunneen:* Do you consider that the Government really only kept him waiting a fortnight longer than usual? Yes, that is all, as far as regards the authorizing him to proceed with the measurement of the seventy-two farms.

220. But in any communication with him was there ever a delay of more than a fortnight in replying to him? No, I think not. At the same time I would not fix the term arbitrarily at a fortnight. I would not say that there has not been a delay of three weeks or a month; because in a public office, where so many references have to be made, it is impossible to fix a precise time for replying. I can say, however, that there has been no such delay as that which he complains of.

221. There has not been a delay of more than three weeks or a month in answering his communications? No, not those with reference to the farms.

222. But the letter in respect to the township? That was not answered at all, as the subdivision of a township formed no part of his instructions.

223. *By Mr. Bell:* Could he, in accordance with his instructions, go on with any new work after sending in his plan for the seventy-two farms, and whilst waiting its approval? He could not. He had then done all that he had instructions for.

224. *By Mr. Cunneen:* Then there was no delay beyond a fortnight on account of this particular work? No, not on account of conveying him the authorization to continue the survey of the seventy-two farms. 225.

- A.G. McLean, Esq.
24 Oct., 1861.
225. *By the Chairman*: Was that the letter of August 7? No; the letter I refer to was written some three weeks before the 22nd December, when it was received at the Survey Office. It was answered on the 30th January.
226. Mr. Birmingham says that he sent in a recommendation for a town six months previous to leaving the river? I cannot say anything as to that, but I can get the date of that recommendation by a reference to our books.
227. Up to the time of his leaving the river he received no reply to that recommendation? No; not unless it was an official acknowledgment of its receipt.
228. If you thought him mistaken as to the meaning of the words which he says you used to him, that "whatever he recommended would be adopted," why did you not tell him so, in order to save him the trouble of writing his letter No. 8, and of making the tracings enclosed in it? I should like to know where he got those words, that "everything he recommended would be adopted." It is certainly not from any written statement of mine; neither did I ever say to him that everything he sent in would be adopted; though if I had done so in a private conversation with him, it should have been regarded as strictly in confidence, and ought not to have been used¹. But if all his recommendations were to be adopted, where would be the necessity for his sending in designs at all.
229. Did you ever state to Mr. Birmingham that the district surveyor had nothing at all to do with him? I could not have said so, because most indubitably the district surveyor would have had to do with him if he had chanced to visit that part of the country during the time Mr. Birmingham was employed there. At the same time as the district is a very large one, Mr. Birmingham might very probably have completed his work before the district surveyor reached there.
230. Did you approve of the two designs for farms that he sent in? I did.
231. Did you state to Mr. Birmingham that you would write to the district surveyor to say that Mr. Birmingham's work being a contract, the district surveyor was to have no control over him, and that all his correspondence was to be conducted direct with Sydney? Who was the district surveyor alluded to?
232. Mr. Henderson? I think it highly probable that I may have told him that I would write to Mr. Peppercorn, instructing him not to interfere with Mr. Birmingham's work; but it is highly improbable that I should say I would write to the district surveyor to inform him that he had nothing to do with Mr. Birmingham, because, from his position, the contrary must be the case. At all events, I certainly have no recollection of having said anything of the kind.
233. You attribute his being delayed to sending in too large a plan at once? Yes; by doing this he worked up all his land, and had nothing to go on with pending the consideration of his plans. If he had sent in plans for fifteen or twenty farms at a time he could have gone on planning others whilst the first were under approval.

Mr. F. W. Birmingham called in and further examined:—

- Mr. F. W. Birmingham.
24 Oct., 1861.
234. *By the Chairman*: Do you recollect the date of your last letter to the Surveyor General, enclosing a design of part of the river which you had surveyed, and in regard to the completion of which you had to wait for instructions? Speaking from memory, I think the date of the letter was December 8th, 1860; but it already appears in evidence.
235. Was this the letter which led to the stoppage of your contract? It was.⁴
236. And how long was that letter without being answered? I cannot say that it has been answered, not even to the present day (Oct. 24th, 1861,) as there was no answer came to me during my stay upon the river. The letter that I complain of chiefly, as not being answered, was one written by me five months prior to my leaving the river.
237. You wrote one letter five months prior to leaving the river? Yes;⁵ and one month before writing that letter I sent in what I call a feeler, being a brief suggestion in regard to the town site, in order to see if the proposition was one likely to be acted upon by the Acting Surveyor General.
238. To that letter you never received an answer? No.⁶
239. That letter was written previous to your letter of December 8th? Yes; months before.⁷
240. Can you say exactly how long before? ⁸My first letter respecting the township, the feeler as I have called it, was written half a year before I broke up my camp; and to that letter I received no answer, excepting the acknowledgment thereof. I thought then, that as the Acting Surveyor General had not replied to my proposal, he would not oppose it, but that he was inclined to listen to it and await farther particulars before deciding; consequently some four or five weeks after I wrote my letter No. 8, sending it in with the town proposition (as shewn on the tracing accompanying the said letter) and the tracings. From the evidence of Mr. McLean, it seems that he appears to think that the proposition was solely for a town, but there is a design for some farms included in the tracing as well as for the town. In fact the town plan forms only a very small portion of the tracing.

241.

¹OMITTED (*on revision*):—A private.²Revised:—Conversational merely.³INSERTED (*on revision*):—In correspondence without my written admission.⁴Revised:—It was the first stoppage, because I looked for—as I think, with cause—at least the common courtesy that one man should expect from another, namely, an answer or official recognition of the letter.⁵Revised:—And about a month before writing the letter No. 6, I sent in No. 7 as "a feeler."⁶INSERTED (*on revision*):—Not to letter No. 8. Letter No. 7 was merely acknowledged:—"I beg to acknowledge the receipt of your letter, No. 7."⁷Revised:—Yes, about one month before.⁸INSERTED (*on revision*):—Not from memory; it is in evidence,—this my first letter, &c.

241. Then a plan for a number of farms formed also a portion of the subdivision of the land sent in by you? Yes.
242. Did your letter ask for instructions in reference to the town proposition, or in reference to the whole plan? It asked for instructions regarding the town, and the land round about it divided into farms. Receiving no answer to this I went on working with my third portion of land, until I had finished it, and so had no more to do; then of course I came to a dead lock. I then asked if I should go on with the Gundurimba Reserve design, which would form the fourth "small portion" of my contract. My reason for asking this was, that my instructions directed me to make a feature survey of the country up to Gundurimba, on the east side. Mr. Peppercorn was at work on the west side of the reserve, but as his work was wrong, I thought it would be better to make a fresh design of the reserve; therefore I wrote and explained this matter to the Acting Surveyor General, but he never replied to it.
243. How long were you on the river after writing your last letter to the Survey Department? Six or eight weeks. I waited until I knew that my letters had been received in the office, and that they had had full opportunity and time to answer them. I knew this from learning the date when the mails conveying my letters arrived in Sydney; and from my receiving from the Survey Office letters and circulars of a later date to that.
244. Between the time of the arrival of your letters in Sydney, and the despatch of those you received on the river, there was sufficient time to reply to your communications? Yes. I know that twelve or thirteen days elapsed.
245. Did the letters you received come from the Surveyor General? Yes; they had his signature attached.
246. They were not bearing upon the business then in hand? No; they were not upon the business that I wished to have decided. Such being the case, the way I argued the matter was this:—I must tie down the Acting Surveyor General to some time within which he must answer my letters, because I have not the means of holding out during all these long delays. If my letter No. 7 cannot be answered in five months, and my letter No. 8 in four months, I cannot afford to wait for answers that take so long a time.² If then I cannot tie him down to a stated time in which to answer my letters, I must come to a dead lock. I reasoned that if two letters were not answered in five months, any subsequent letters would take at least so long to answer; as I could not afford to wait so long, it was of no use for me to continue sending in letters unless the department were tied down to answer them within a stated time.
247. That is, I suppose, allowing the Surveyor General so long a time to answer as you could afford to pay and keep your men, and no longer? Yes, that was what I decided upon. I determined upon leaving the ground if I did not get an answer to my last letter within a reasonable time. The Committee will see that my letter No. 7 was merely formally acknowledged, whilst my letter No. 8 has never been so from that day to this. The Surveyor General endeavours to throw the whole weight of the difficulty upon the few last letters, because he has an opportunity of accounting for it;³ but I can shew that the actual stoppage occurred, in the first instance, with the letters 7 and 8, six months previous to my leaving the river. Mr. McLean thinks that I wrote to the department very shortly and sharply, without having any cause for doing so; but I think I had plenty of cause for so doing, because when I was away on the river, waiting anxiously for answers that never came, I considered, and certainly not without reason, that I was being deluded, mocked, and snared; and it was under that impression that I wrote to him in such strong terms previous to leaving the river.
248. Do you recollect the date when you broke up your party? It was on Saturday, the 26th January, 1861, that I broke up and left my camp.
249. And what was the date of the last letter you sent to the department? December 10,⁴ 1860.
250. Having no further work to go on with, you found yourself, on the 26th January last, without the means of carrying on your contract further? Yes. Having a large party to pay and feed, the expenses were very heavy, and my means were soon exhausted. Having given the Acting Surveyor General sufficient time to answer my letters, and no answers coming, I had to break up my party.
251. *By Mr. Cunneen*: How long was it, from the time you ceased working owing to the want of instructions, until the time you left the river? About six weeks.

252.

¹INSERTED (on revision):—In fact the Acting Surveyor General complied with my ideas of £2 per mile, it being the contract price, and sent me word that it was placed in bank to my account; although I said in my letter No. 60-23, of Dec. 10th, 1860, "If you will break the contract this matter" (the payment of £53 for feature surveying, at £2 per mile,) "of course lies to your discredit, and I must proceed to Sydney," but this sum would have paid the labourers up to that time; and is it not very strange that the letter of mine, No. 21, of December 8th, 1860, received at the same time, by the same mail, could not be attended to? My letters 21 to 23, if answered then by the Acting Surveyor General, or either of them, would have enabled myself and my men to continue working; my letter No. 21 had its enclosure, *i.e.*, "the necessary design for farms," covering the former design for a town.

²NOTE (on revision):—An indefinite time.

³NOTE (on revision):—Take out "he has an opportunity of accounting for it," and insert "because it suits him."

⁴INSERTED (on revision):—No. 60-23, of December 10th, 1860, was the last numbered letter upon the work, but you will find among my letters one of date January 23rd, 1861, upbraiding the Acting Surveyor General for leaving me in idleness; this is positively the last, but I did not number it, as I looked upon the contract as then at an end, because "there was to be no stoppage to my work;" and I respectfully submit that the Acting Surveyor General answered my question, No. 1, when before your Honorable Committee on the 24th instant, in the affirmative. My question was this:—"Did you not say (previous to my going to the Richmond River) that there would be no stoppage—while you are going on with your second part I will send you your first (design), and so on through the contract?" (Meaning of course, whilst you are going on with the third I will send you your second, &c., &c.)

Mr. F. W. Birmingham. 252. Have you the date upon which you first left off surveying? The 14th December was my first lost day.

253. And up to what time did you remain idle? Up to the 26th January, 1861, when I finally broke up my camp.

24 Oct., 1861. 254. *By Mr. Bell*: During that time had you not a right to go on with your work, had you chosen to do so? I had none to go on with.

255. According to your shewing, the Government gave you power to carry on your work as you thought proper—might you not have gone on with some other work besides that upon which you were awaiting orders? No, I had nothing to go on with. I had designed the whole portion allotted to me, and I could do nothing until my designs were approved. Notwithstanding what the Acting Surveyor General told me about all that I recommended would probably be approved of, previously to my going up to the river, he sent me up¹ written instructions that I had to comply with, and one of these was that I should send in designs for approval prior to actually proceeding to the measurement of the lots.

256. But it appears from Mr. McLean's evidence that you did not get your instructions as you would have done, because you did not send in your surveys as you were directed to do? I did; and the proof is that my whole work was designed.²

257. Yes; but you sent in too many farms together, instead of sending in a few at a time, as you were recommended to do? The reason that so many tracings were sent in was, that no answer was received in regard to my second tracing, and I thought it useless to send in a third until I had received an answer to the second.³

258. The second tracing you allude to was the one with the township? Yes; a portion of it was a town.

259. *By Mr. Cunneen*: The Surveyor General's objection is, that if you had sent in small designs, there would have been more probability of their being soon answered, as, for instance, the design for the fifteen farms,—you were not delayed over that. Did he not warn you before you left Sydney, to take into consideration the delay you would have to experience, both in the official routine, and in the postal communication, and to send in plans of only a few farms at a time? He suggested something⁴ of the kind, but told me I could send in any sized portions I liked.⁵ He never warned me about the postal delays, although it may suit his purpose to say so now, but I deny most positively that he ever did so.

260. Did he not suggest to you the advisability of sending in plans of some twenty or so farms, so that whilst they were under consideration you could be going on with twenty more? He did.⁶ We talked the matter over together, and he said there would be no stoppage in the work, because I could measure⁷ it out in what portions I liked. He recommended small portions, and said that by that means I could go on with my second part, was⁸ the first was under approval.⁹ I would never have gone to the river if I had anticipated that there would have been anything like a stoppage. It was upon the faith of this arrangement that I was induced to take the contract.

261. *By Mr. Bell*: You have said in your evidence that the Surveyor General told you the Government had every confidence in you, and that everything you recommended would be adopted; why then could you not have gone on with the work you had planned? Because the Government had sent me¹⁰ a feature design for my guidance, in which I found the work done so badly that it would be necessary to do it all again to do it properly. Upon this part I had to wait for instructions from the office. Besides, the instructions I got from the office clashed with each other, and left me in a difficulty as to how I should act until I received further instructions.

262. *By Mr. Cunneen*: Then what is the nature of the compensation you ask from the Government? I look for compensation¹¹ in several ways.

263. Do you seek to be compensated for the six weeks that you and your party were kept idle on the river? That is part of my claim, but not the whole of it.

264.

¹NOTE (on revision):—Take out "he sent me up," and write "I received written instructions."

²Revised:—According to instructions, verbal, written, or printed.

³INSERTED (on revision):—If it now suits the Acting Surveyor General to say that he recommended me to send in "a few at a time," why did he take upon himself to write the letter of instructions which I took to the river, relative to the land on the east side thereof, and extending up to the measured lands at Gundurimba, a distance of eighteen or nineteen miles along river, wherein I was commanded to divide this distance into only two designs, and I did so, as my instructions required? (*Vide letter of instruction already handed in*). This sort of finessing on the part of the Acting Surveyor General, cannot, I presume, mislead the Committee. If Mr. McLean can now invent this idea, and point to the fifteen farms of my first tracing, let him, in honesty, state the reason I gave in my letter accompanying them (No. 4, of May 30th, 1860) for not covering the whole of the first half with feature surveying and with farm designing, so as to agree with my written instructions. And if the whole of the first half (my tracing No. 1 is part thereof) of the said instructions was covered with farms, the number "recommended" would be something like one hundred! And be it remembered, the letter of instructions was written by the Acting Surveyor General after our conversations had ceased.

⁴NOTE (on revision):—He suggested nothing of the kind.

⁵INSERTED (on revision):—This, of course, would refer chiefly to the parts of my contract for which I took up no written instructions.

⁶NOTE (on revision):—He did suggest that the contract would be done by portions.

⁷NOTE (on revision):—Take out "measure" and insert, because "I could design it," &c.

⁸INSERTED (on revision):—Whilst the first was, &c., waiting for approval and so on, through the contract.

⁹INSERTED (on revision):—And in accordance with these ideas he wrote me out the letter of instructions, in accordance with which my tracings or designs Nos. 1 and 2 were sent in to the Surveyor General's Office.

¹⁰Revised:—Because the Acting Surveyor General had sent me no approval of my design; and also a feature design of Gundurimba Reserve, sent for my guidance, was found to be so incorrect, &c.

¹¹Revised:—Compensation in either of two ways; first, for loss of time and liberty to finish my contract; or secondly, compensation for loss of time, and also for the profits I could have made upon the whole of my contract.

264. Then what other claim do you imagine you have? I look to be compensated for the time I have lost altogether relative to this matter. Mr. F. W.
Birmingham.
265. How long a time is that? I reckon it altogether as being worth £251.
266. There is the actual loss of time from the 14th December, 1860, to the 26th January, 1861? Yes. 24 Oct., 1861.
267. And what else? As I went in by the river I had to go out by the river. In fact the only exit for me was by the Richmond River, as I could not go overland to the Clarence, with all my instruments, trunks, &c., &c. Therefore I was detained waiting some six weeks for the vessel; and afterwards, in trying to get out, the vessel went ashore and became a wreck. I had then to take my things out of her and put them into another schooner,¹ and I walked round myself to the Clarence, where I took the steamer. It was not till about six² months after I left the river that I got my things in Sydney. I claim,³ therefore, for the time lost in trying to get out of the river, and also for the three months after arrival in Sydney, during which I could earn nothing, because of the detention of my instruments.
268. And you lost also what you consider to be the best part of your contract? Yes, that is over and above the loss of time. Since the time when I was first idle on the river I have done nothing, and that will be a year in about seven weeks' time.
269. If you had finished your survey in accordance with your contract you would have had to have come out from the river at your own risk? I should.⁴
270. The Government only paid you at a certain rate for the work you actually did, all else was at your own risk? I consider that if I had not been stopped in my contract, that I should have made a fair profit out of it, and then of course I should have been satisfied, and would have accepted the risk of coming out. But as the work was stopped, all my arrangements have been upset, and I have been thrown into debt; debts too, contracted over this work. I owe now upwards⁵ of £100 on account of this contract.
271. Will you, in as brief a manner as possible, state to the Committee the length of time you claim for, and the other circumstances under which you demand compensation; that is, what you claim for being detained the forty days on the river, for the loss by your removal, and for the loss by your not being allowed to survey the most profitable part of the country? I put my claim in two ways:—First, I ask compensation for my loss of time only, and authority to go on with my contract; and second, if the Minister for Lands will not allow me to go on with the contract, I look for compensation also, for the loss of the best part of that contract, according to the scale of what the work would be worth to a surveyor.⁷ The matter however is fully explained in the memorandum I now hand in. I have only one thing more to say, and that is, that my letters Nos. 7 and 8 not having been answered during my stay upon the river—six months in the one case, and five in the other—that fact very much altered the idea I had of the confidence the Government placed in me.
272. *By Mr. Shepherd:* Had those letters reference to the town proposition? To the town, and to some farms also.
273. They were not specially on the subject of the town? No, only partly; if the tracing were produced, it would be seen that the town was only a small portion of the plan.
274. *By the Chairman:* I think I understood you to say that you disapproved of the site on which the reserve was originally made, and that the plan which you submitted was to supplant the one previously made? Probably it would, if adopted, have supplanted the other; but it was not proposed with that intention, but was merely a professional idea thrown out for the use of the department, if they chose to avail themselves of it.⁸
275. And from the conversations you had had with the Acting Surveyor General, you thought it quite within your province to make this recommendation? Undoubtedly;⁹ he said, "There is scarcely anything you recommend but will be adopted." I do not blame him

¹ Revised:—In a vessel—the schooner "Henry."

² Revised:—Schooner the "Storm King," and finding that from her draught she was not likely to get out, excepting at spring tides, I left my things in her to be taken to Sydney, and walked some 50 or 60 miles along the beach to the Clarence River, and took a passage in the "Urara" steamer for Sydney.

³ Revised:—Three months.

⁴ Revised:—I do claim for the time detained upon the river idle, and up to the time I arrived in Sydney, 2:30 p.m., Friday, March 15th, 1861, making in all some £251; but I do not know that I can claim for some three months after arrival in Sydney, during which I could earn nothing because of the detention or non-arrival of my instruments, clothes, &c., &c., which I received on Tuesday, 4th of June, 1861, and did actually refuse work during this time.

⁵ INSERTED (on revision):—And would, as the Government could have no further claim upon my services.

⁶ NOTE (on revision):—Take out "upwards," and insert "about." (*Vide one of my papers for the amount.*)

⁷ INSERTED (on revision):—The contract is of so many square miles, half the square miles, calculated as forty acre farms, and half as eighty acre farms, then allowing one-third of the total sum as my clear profits, deducting therefrom the money paid to me for the survey of the fifteen farms, and the one hundred and fifty pounds advanced to me.

⁸ INSERTED (on revision):—Some three months after I sent in the town design, the Acting Surveyor General said, "Tell Mr. Birmingham the scheme for a town and canal is abandoned"—therefore I rubbed it off the map, and sent in a design for farms upon tracing No. 3, which, as I before remarked, was not answered. It now appears from the Acting Surveyor General's evidence, on 24th October, 1861, that what was then abandoned is now sent to "the District Surveyor, for his report upon it."

⁹ NOTE (on revision):—He said, "I have no doubt but whatever you recommend will be adopted," and again he said, "I have scarcely a doubt," &c.; this was prior to my starting for the Richmond River.

Mr. F. W. Birmingham. him however for not agreeing with my view, but I do for not answering my letter. In not having done so I say that he was the first to shew a want of courtesy¹ to an officer of his department.² This he ought not to have done, for he knew that at the time I was taking a great deal of trouble over the work in hand; and he should, at all events, have been decent enough to acknowledge it by replying to my letters.

24 Oct., 1861. 276. Then the two letters that you complain as not having been answered were those forwarded previous to the one you sent in just before you left the river? Yes. That is where I wish *firstly* to fix the blame, as they were the first cause of all the mischief.³

¹INSERTED (*on revision*):—And a want of that etiquette which civilization demands, even not considering the predicament I was afterwards placed in through his silence.

²NOTE (*on revision*):—I have no recollection of saying “to an officer of his department,” for I did not look upon myself as one, and I protest against the Acting Surveyor General using to me the term “subordinate clerk”, as he did in his evidence on 24th of October, 1861. A contractor is not “a subordinate clerk” as I think.—F. W. BIRMINGHAM.

³ADDED (*on revision*):—Or trouble that followed afterwards, in so far as I can prove or discern *the cause* of the stoppage that has occurred in my contract.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

CROWN LANDS.

(UNDER LEASE OR LICENSE, BEYOND THE SETTLED DISTRICTS.)

Ordered by the Legislative Assembly to be Printed, 9 January, 1862.

RETURN (in part) to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 11 October, 1861, That there be laid upon the Table of this House,—

“ A Return of all Waste Lands of the Crown, held under lease
 “ or license, beyond the Settled Districts of the Colony, from the
 “ date of the motion of Mr. W. R. Piddington, of the 2nd
 “ December, 1857, and ordered by this House to be printed,
 “ 21st September, 1859, to the present time; shewing, in
 “ alphabetical order, the names of all the Applicants for leases or
 “ licenses in each year, and the names of the parties to whom
 “ leases or licenses have been issued; the names of all the Runs;
 “ the District in which the Run is situated; the supposed
 “ extent of the Run; the total number respectively of Sheep
 “ and Cattle assessed thereon by the Commissioner; the amount
 “ of Assessment Money received from each Run since the
 “ enactment 20 Vict., cap. 39; the amount of Annual Rent
 “ payable on each Run at the present time.”

(*Mr. Daniel.*)

CROWN LANDS.

A. ORPEN MORIARTY,

Chief Commissioner of Crown Lands.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

TALA AND MOOLPA RUNS.

(CORRESPONDENCE RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 10 January, 1862.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 3 April, 1860, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ (1.) All Correspondence between the Government and the
“ occupants of Tala Run, and the Local Commissioner, on the
“ subject of an amended claim to lease made for that Run
“ since the year 1850.

“ (2.) All Correspondence on the subject of any tenders said to
“ clash with the amended boundaries of Tala, with the Local
“ Commissioner, or the occupants of Tala or Moolpa Run.

“ (3.) The Minutes of any proceedings held for investigating
“ these matters on behalf of the Government.

“ (4.) A Tracing, shewing the original claim to lease of Tala,
“ with its area, and shewing the amended claim with its area.”

(*Mr. Parkes.*) .

SCHEDULE.

NO.	PAGE.
1. Mr. W. C. Wentworth to the Honorable the Colonial Secretary, applying for a lease of Tala. 31 March, 1848	4
2. The Crown Commissioner, Murrumbidgee District, to the Chief Commissioner of Crown Lands, reporting on the application for a lease of the Tala Run. 14 August, 1849 ..	5
3. Mr. Thomas Barker to the Chief Commissioner of Crown Lands, entering Caveat against the issue of a lease of the Tala Run to Mr. W. C. Wentworth. 22 June, 1849.. ..	5
4. The Chief Commissioner of Crown Lands to Mr. W. C. Wentworth, intimating that a Caveat had been lodged by Mr. Thomas Barker against the issue of a lease of the Tala Run, and that if the same be not withdrawn within two months, it will be forwarded to the Commissioner for the investigation of disputed boundaries. 9 July, 1849	6
5. The Chief Commissioner of Crown Lands to Mr. Thomas Barker, acknowledging the receipt of the above Caveat, and intimating that if the same be not withdrawn within two months, it will be forwarded to the Commissioner for the investigation of disputed boundaries. 9 July, 1849	6
6. Mr. Thomas Barker to the Chief Commissioner of Crown Lands, withdrawing Caveat against Mr. W. C. Wentworth. 29 January, 1850	6
7. The Chief Commissioner of Crown Lands to Mr. Thomas Barker, acknowledging the receipt of his letter withdrawing Caveat against the issue of a lease to Mr. W. C. Wentworth. 2 March, 1850	6
8. The Chief Commissioner of Crown Lands to Mr. W. C. Wentworth, intimating withdrawal of Caveat. 2 March, 1850	6
9. Mr. John Black to the Chief Commissioner of Crown Lands, transmitting an amended description of the Tala Run. 10 April, 1850	7
10. The Chief Commissioner of Crown Lands to Commissioner of Crown Lands, Murrumbidgee, transmitting Mr. Black's amended description of Tala, and requesting that the same may be notified to all parties in his District, whose interests will be affected by its adoption, and reminding him that it will be necessary to report whether the party has included in his description any vacant Crown Lands to which he is not entitled. 18 April, 1850	7
11. The Chief Commissioner of Crown Lands to Mr. John Black, intimating that his amended description of Tala has been referred to Mr. Commissioner Bingham. 18 April, 1850.	7
12. Commissioner of Crown Lands, Murrumbidgee, to the Chief Commissioner of Crown Lands, respecting amended description of the Tala Run, by Mr. John Black. 21 November, 1850	8
13. Mr. G. S. Lang to the Honorable the Colonial Secretary, transmitting a copy of his letter to Chief Commissioner, and intimating the course which he had taken. 14 January, 1850	8
14. The Honorable the Colonial Secretary to the Chief Commissioner of Crown Lands, requesting a report on Mr. Lang's letter. 29 January, 1850	9
15. The Chief Commissioner of Crown Lands to the Honorable the Colonial Secretary, reporting on Mr. Lang's letter of the 14 January, 1850. 8 February, 1850	10

57. The Acting Chief Commissioner of Crown Lands to Mr. G. A. Mein, informing him that the Tala boundaries are still under the consideration of the Government. 19 January, 1860	36
58. The Acting Surveyor General to the Under Secretary for Lands, forwarding a letter from Mr. G. A. Mein, respecting the boundaries of Tala, and the Tenders for Mostyn's Hut and Harvey's Hut Runs. 18 February, 1860	36
59. The Acting Chief Commissioner of Crown Lands to the Under Secretary for Lands, in reply. 28 April, 1860	36
60. Mr. G. A. Mein to the Honorable the Secretary for Lands, respecting Tala boundaries. 11 August, 1860	37
61. The Chief Commissioner of Crown Lands to the Under Secretary for Lands, reporting on Tala boundaries. 15 October, 1860	37

TALA AND MOOLPA RUNS.

No. 1.

Application for a Lease of Waste Lands of the Crown, beyond the Settled Districts, in the Colony of New South Wales.

I, WILLIAM CHARLES WENTWORTH, of Vaucluse, do hereby claim to have issued to me, under and in pursuance of Her Majesty's Order in Council, published in the *Government Gazette* of New South Wales, of the 7th day of October, 1847, a Lease of the Waste Lands of the Crown, described in the Schedule hereunder written.

The said lands are now in my licensed occupation, and at the date of the publication of the above Royal Order, and for twelve months previously thereto, the same were held under license by me.

Given under my hand, this thirty-first day of March, A.D., 1848.

W. C. WENTWORTH.

To the Honorable
The Colonial Secretary,
Sydney.

Transferred to John Black,
48/7230.

SCHEDULE.

COMMISSIONER'S DISTRICT AND GENERAL LOCALITY.	NAME OF RUN.	ESTIMATED NUMBER OF ACRES.	ESTIMATED CAPABILITY FOR GRAZING.		Description of the Lands by reference to leading Geographical features, and marked or determined boundary lines.
			CATTLE.	SHEEP.	
Murrumbidgee district. Situated on the south side of the river Mur- rumbidgee, near the junctions of the rivers Lachlan and Murrum- bidgee, and Murray and Murrumbidgee.	Tala....	Two hundred thousand acres.	Fifteen hundred, and	Thirty thousand.	Bounded upon the east by a line running south from the river Murrumbidgee, and commencing from a lagoon called Coondoora, about 5 miles above the junc- tion of the Lachlan with the Murrumbidgee, and adjoining a run held by Mr. George Hobler; bounded on the west by a line running south, and commencing at the river Murrumbidgee, from a marked tree, about 13 miles from the junction of the Murrum- bidgee and Murray, and forming a boundary with Mr. John Scott's run; the river frontage is about 40 miles in length, its general direction being north-east and south-west; and the side lines extend back about 8 miles.

(Signature of Applicant.)

W. C. WENTWORTH.

Colonial Secretary's Office,
Sydney, 7 October, 1847.

LEASES OF CROWN LANDS BEYOND THE SETTLED DISTRICTS.

1. His Excellency the Governor, in reference to his Proclamation of this date, publishing Her Majesty's Order in Council, regulating the occupation of Waste Lands of the Crown within the Colony, deems it proper to caution the licensed occupants of Waste Lands of the Crown beyond the Settled Districts, that the rights conferred on them by the 11th section of chap. 11 of the Regulations, must be exercised within the periods in that section prescribed, by relation to the date of the Proclamation above referred to publishing the said Order in Council.

2. The applications must be lodged in the Office of the Colonial Secretary, in Sydney, if the lands for which the lease is applied for be situated within the Sydney or Middle District; or of His Honor the Superintendent at Melbourne, if within the Southern or Port Phillip District; and in order to preserve uniformity, the applicants will be required to use the printed forms, copies of which may be obtained from the Commissioners of Crown Lands beyond the Settled Districts, as well as at the Office of the Superintendent at Melbourne, and at this Office.

3. All such applications must set forth the names and clear descriptions of the runs applied for, and of the boundaries of the same, as prescribed with respect to new runs, by the 13th section of chap. 11 of the Order in Council. In such descriptions it will be necessary to refer to leading geographical features, and marked or determined boundary lines, as well as to the names of the occupants of adjacent lands, and to give the length and general direction of the several boundary lines with reasonable certainty; and also to state the supposed extent of the runs, and the number of sheep, or equivalent number of cattle, which each run may be estimated as capable of carrying.

4.

4. An abstract of all applications received will, from time to time, be published in the *New South Wales Government Gazette* or *Port Phillip Government Gazette*, for the information of all parties concerned.

5. Persons who object to the claims of others, either wholly or in part, as comprising lands to the lease of which they may conceive themselves entitled, are recommended to lodge in the Office of the Colonial Secretary, or Superintendent of Port Phillip, caveats referring to such claims, and specifying the lands to which their objections extend, and the grounds on which they prefer their claims to the same.

6. It will be impossible that the issue of leases should take place immediately on demands being made for them. In many cases the Government may not be able, until the end of the year 1848, to determine whether the particular runs applied for will be included in the Intermediate or Unsettled Districts, and in all cases it will be necessary to consider and decide on the claims of applicants, to verify the descriptions of the runs, and to estimate the number of sheep or cattle which each run will carry, and the rent accordingly to be paid. His Excellency, however, desires, at the same time, to intimate, that all practicable despatch will be used, for the purpose of putting the occupants of Crown Lands in possession of the leases to which they may be entitled under Her Majesty's Regulations.

By His Excellency's Command,

E. DEAS THOMSON.

No. 2.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF CROWN LANDS.

Head Quarters,

Tumut, 14 August, 1849.

SIR,

I have the honor to state, for your information, that with reference to the application of Mr. W. C. Wentworth for a lease of the run of Tala,—

1. It is held for pastoral purposes.
2. Is not within the Settled Districts.
3. I recommend a reserve of twenty-five square miles in this locality, for the Aboriginal Natives, *vide* my Report 15th December, 1848, and 21st February, 1849.
4. Nothing included in this application that has not been hitherto previously held under license.
5. The demand is for one lease for three distinct runs adjoining each other, forming one block of land previously held under licenses.
6. Name and description correct.

I have, &c.,

HENRY BINGHAM.

No. 3.

MR. THOMAS BARKER to CHIEF COMMISSIONER OF CROWN LANDS.

Sydney, 22 June, 1849.

SIR,

I have the honor to enter my caveat against the demand made by Wm. C. Wentworth, Esq., as published in the *Government Gazette* of 30th September last, for a lease of a place called Tarlo, situated on the left bank of the Lower Murrumbidgee; his description of the boundary line dividing Tarlo from Nap Nap (recently the run of Mr. Geo. Hobler, now transferred to me), takes away about 12 miles of the river frontage of Nap Nap, and which forms the very best portion of the run.

My reasons for entering the caveat are as under:—

First—Mr. Hobler's application to the Commissioner for the run, was prior to that of Mr. Wentworth's agent.

Secondly—Mr. Wentworth's license, dated 27th August, 1845, describes his boundary as commencing on the bank of the Murrumbidgee, and running down to an oval lake called Landola, or Candola; whereas his application in the *Gazette* describes his boundary as commencing on the bank of the Murrumbidgee, at this said lake, instead of terminating thereat; this lake is about 12 miles within my boundary.

Thirdly—That Mr. Hobler accidentally hearing of Mr. Wentworth's agent going to the Commissioner, to endeavour to obtain authority to encroach on the run Nap Nap, hastened to meet him, and did so at the office of the Commissioner, when after much argument the present boundary line of Nap Nap was fixed, an agreement drawn up between Mr. Hobler and this agent of Mr. Wentworth's, witnessed by the Commissioner, and filed in his office on this occasion. Mr. Hobler stated he gave up several miles of river frontage to which he was justly entitled, because he did not like to contend with such a powerful enemy as Mr. Wentworth.

Fourthly—That Mr. Hobler and my agents have been in possession above four years; the establishment and all improvements are on the part claimed by Mr. Wentworth.

I have, &c.,

THOS. BARKER.

No. 4.

CHIEF COMMISSIONER OF CROWN LANDS to MR. W. C. WENTWORTH.

*Crown Lands Office,
Sydney, 9 July, 1849.*

SIR,

I do myself the honor to inform you, that a protest has been lodged at this office by Mr. Thomas Barker, against your claim to a lease of the Tala Run; and if the same be not withdrawn within two months from the present date, it will be duly forwarded to the Commissioner appointed under the Act of Council, 11 Victoria, No. 61, for the investigation of cases of disputed boundaries.

I have, &c.,
GEO. BARNEY.

No. 5.

CHIEF COMMISSIONER OF CROWN LANDS to MR. THOMAS BARKER.

*Crown Lands Office,
Sydney, 9 July, 1849.*

SIR,

I beg to inform you, that your protest against the claim of Mr. W. C. Wentworth, for a lease of a run called Tarlo, in the District of Murrumbidgee, has been received; and that if the same be not withdrawn within two months from the present date, it will be duly forwarded to the Commissioner appointed under the Act of Council, 11 Victoria, No. 61, for the investigation of cases of disputed boundaries.

I have, &c.,
GEO. BARNEY.

No. 6.

MR. THOMAS BARKER to CHIEF COMMISSIONER OF CROWN LANDS.

Sydney, 29 January, 1850.

SIR,

I have the honor to inform you, that having made an arrangement with W. C. Wentworth, Esq., relative to the boundary in dispute between us, I now beg to withdraw my caveat in this case.

I have, &c.,
THOS. BARKER.

No. 7.

CHIEF COMMISSIONER OF CROWN LANDS to MR. THOMAS BARKER.

*Crown Lands Office,
Sydney, 2 March, 1850.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 29th January last, intimating your wish to withdraw your caveat entered against the issue of a lease to Mr. W. C. Wentworth, for the Tala Station, in the District of Murrumbidgee.

I have, &c.,
GEO. BARNEY.

No. 8.

CHIEF COMMISSIONER OF CROWN LANDS to MR. W. C. WENTWORTH.

*Crown Lands Office,
Sydney, 2 March, 1850.*

SIR,

I have the honor to inform you, that Mr. Thomas Barker has withdrawn his caveat against the issue of a lease to you of the Tala Station, in the District of Murrumbidgee.

I have, &c.,
GEO. BARNEY.

No. 9.

TALA AND MOOLPA RUNS.

7

No. 9.

MR. JOHN BLACK to CHIEF COMMISSIONER OF CROWN LANDS.

Sydney, 10 April, 1850.

SIR,

I have the honor to send you an amended description of the run at Tala, which now stands in my name. I find the original description does not comprise much more than that portion of the run which is yearly flooded by the river Murrumbidgee, and has omitted the greater part of the run which the flocks now depasturing on it necessarily occupy during the winter months, and without which the remainder of the run for about half the year, that is during the periodical floods, is not available.

The supplemental country, indeed, which this amended description embraces, has always been occupied, and the license paid for it; and without it the grazing capabilities of the runs would not be equal to more than half the estimate of them which has been given in, as I have no doubt the Commissioner of the district will be able to testify.

Amended description of Tala.

Commencing at the Condura Lagoon, bounded on the east by a line running from that lagoon fifteen (15) miles south; on the west by a line running south ten (10) miles, and commencing at the River Murrumbidgee, from a marked tree about thirteen (13) miles from the junction of the Murrumbidgee and the Murray, and forming a boundary with Mr. John Scott's run; on the south by a line commencing at the south end of the western boundary, as described above, running east until it intersects a prolongation of the eastern or dividing boundary between Nap Nap Toogemba, which prolongation together with the western boundary of Nap Nap forms the eastern boundary of Tala. The river frontage is about forty (40) miles in length, and its general direction N.E. and S.W. The whole of the back run consists of thinly grassed plains, totally devoid of water during the greater part of the year.

Estimated area	500,000 acres.
Name of Run	Tala.
Grazing capabilities.....	1,500 cattle.
Ditto	30,000 sheep.

I have, &c.,

JOHN BLACK.

No. 10.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER OF CROWN LANDS,
MURRUMBIDGEE.*Crown Lands Office,*

Sydney, 18 April, 1850.

SIR,

I do myself the honor to transmit herewith the enclosed amended description of the Tala Run, in your district, lodged by Mr. John Black, and to request that you will be good enough to notify the same to all parties in your district whose interests may be affected by its adoption. For description, see No. 9.

I beg also to remind you that it will be necessary for you to report, in this case, whether the party has included in his description any vacant Crown lands to which he is not entitled.

I have, &c.,

GEO. BARNEY.

No. 11.

CHIEF COMMISSIONER OF CROWN LANDS to MR. JOHN BLACK.

Crown Lands Office,

Sydney, 18 April, 1850.

SIR,

I beg to inform you that your amended description of the Tala Run has been referred to Mr. Commissioner Bingham, for the purpose of being notified to all parties whose interests may be affected by its adoption.

I have at the same time to acquaint you, that the amendment referred to will not give any title whatever to land beyond the hitherto recognized limits of the above run.

I have, &c.,

GEO. BARNEY.

No. 12.

No. 12.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF
CROWN LANDS.

*Camp, 350 miles from Head Quarters, near the
junction of the two main Rivers,
21 November, 1850.*

SIR,

No. 672, 18 April,
1850.
One enclosure,
No. 50-1854,
11 April, 1850.
Re-transmitted.

Adverting to your letter, as noted, transmitting one enclosure, being an amended description of the Tala Run, forwarded by Mr. John Black, and requesting my report on the points noted,—I do myself the honor to state, for your information,—

1. The run is held for pastoral purposes.
2. In the Unsettled Districts.
3. I considered the situation very eligible for a Reserve to be made by the Crown, (as previously noted), and a Town Reserve has been ordered.
4. I do not consider the applicant has made any demand to which he is not entitled.
5. The demand is for one lease for three distinct runs, forming one block, previously held under licenses.
6. The three runs are now held under the license for Tala.
7. The necessary communications have been made to the parties interested.
8. No protests lodged.

I have, &c.,

HENRY BINGHAM,
C. C. L.

No. 13.

MR. G. S. LANG to COLONIAL SECRETARY.

Gundagai, 14 January, 1850.

SIR,

I take the liberty of sending a copy of a letter which I have this day sent to the Chief Commissioner, regarding the leasing of the back country between the Moulmain and Murrumbidgee, and I hope you will approve of the view there taken of it.

I remain, &c.,

GIDEON S. LANG.

I am not aware of any intention to lease the runs in question, except tenders may be received for them under H. M. Order in Council. As this matter has been submitted, it appears, to the Chief Commissioner, request his report upon the subject.—26 January.

Chief Commissioner, 29 January, 1858.

[Enclosure in No. 13.]

Gundagai, 14 January, 1850.

Sir,

I understand that it is the intention of Government to advertise for tender as runs all the country between the Murrumbidgee and Moulmain, laying more than ten miles from water. As a settler in the district I beg most earnestly to call your attention to the following remarks upon the subject, as such a proceeding will cause the ruin of every settler upon both waters, without any corresponding advantage to Government or the community.

To make myself clearly understood, it will be necessary for me to explain the nature of the country and the system pursued in depasturing it.

The whole is one dead level plain without one drop of water, except during winter, which is from May or June to August or September, and sometimes the middle of October—that is, from four to six months. Not a drop falls during summer; clouds are seldom seen, and when they are (even though accompanied with thunder and lightning) they pass without rain; and if there is a thunder shower, let it be ever so heavy, it is completely dried up in two or three days. In fact it is a tropical climate, so hot and dry that the sheep require water at least once and sometimes twice a day. The country consists of salt bush plains, of which there are immense tracks without a tree or a bush, where you go out of sight of timber as of land upon the ocean; there is not a bunch of scrub to boil a pot of tea; when there is timber it is in broken strips running parallel to the river, at distance of from six to twelve miles from each other. Annexed are plans of my own runs, Mungadingaol and Pavensy, which are considered well timbered. The salt bush, which is very much like heather covered with hoar frost, is interspersed with grass at intervals, the whole, both grass and salt bush so thinly scattered, that infinitely more land is required to support a sheep there than in any other part of the Colony. Add to this that there are miles upon miles of the big salt bush, too old to be eaten, and among which there is no grass, where the stock never lay mouth to ground; and immense stretches of "oaten grass" which, after a few days heat, runs down like tinder, and is blown away in dust. On Pavensy there are twelve square miles of it in one block, perfectly useless except for about one month in the year, and not always for that.

To

To meet the circumstances of the case there are two or three sets of huts. (*See Plan.*) The first set are on the river, and are used only in the height of summer, when the sheep cannot feed out above two miles, and must return at mid-day to cool and drink. The second are on the first timber, and are used in spring and autumn; the sheep first feed into the river and out the same day, and then as the weather cools and a drink in two days suffices, they feed back one day and into the river the next; when the rainy season comes they shift again further back, if there is timber, and remain during the winter, shifting occasionally along the ridge. The cattle with which the country was first occupied adopted this system for themselves, and regularly leave the frontage as soon as rain falls; or even the calves, they have adopted their habits to the nature of the country. The whole of our cattle and M'Guise's feed from twenty to twenty-five miles back (*see Plan*), and so much depend upon that feed that no fat cattle are procured unless there is a wet winter; if there is not that, the cattle are not only deprived of the back feed, but never allow the frontage to spring, and in summer are absolutely starved. The same argument applies to sheep runs, and that so forcible, that last autumn when the rains were unusually late, the people, both of the Murrumbidgee and Moulmain, had to move as far back as ten miles—many of them—though the sheep had to come in that distance to water every day, and they had to carry water to the people; the pasture is so thin that, even with only one flock at a station, sheep require to be constantly shifted, and instead of gunyas in all directions, as at present, huts upon sledges or wheels are coming into general use as the stock increases. The extent of the back plains does no more than make up for the thinness and dispersion of the pasture.

From the above it must be evident that the leasing of these back plains must be ruinous to the frontage holders, without any corresponding advantage to the community.

As there is not a drop of water for six or eight months, they can only be occupied as winter runs, to which sheep must come from other parts of the Colony, and travel along the frontages in spring and autumn. In autumn they will consume the little grass that is left, and starve the sheep as well as scatter the cattle. In spring they will travel when the grass is tender and young, and will cut up thrice as much as they consume, besides scattering the cattle at the only season when they will then have a chance of fattening in a bad, that is then a dry season; they will add to the misfortune of the frontage holder by hanging on the river till the rains falls; they will always come as soon as and go as late as possible, and may make the possession of a winter run an excuse for travelling during the whole summer at the rate of four miles a day, as was done last year by the Billibong settlers when their water was dried up.

The area of the back country is about 2,000 square miles, which, allowing for the winter runs the same as is proposed for the frontage runs, 100 square miles, a miserable allowance indeed in that country, will give twenty runs of the whole as available; but that is far from being the case, as wood and folding ground are as necessary as water for a winter run, and these are only supplied by the timber ridges, which are of sand, and rise from one to two and a half feet above the plains, which are generally hard clay; there are so many immense plains without so much as a bush, that I believe the number of 100 mile blocks available will not exceed twelve or fifteen at the very utmost. Anything less than 100 miles is a perfect mockery, for at the best they will have but one strip of timber through them, it being only on the Lower Murrumbidgee, where these bare plains prevail, that there is any land beyond ten miles from water.

To counterbalance the increase of sheep from the occupation of these back plains for four or five months by the settlers of Argyle, Murray, Port Phillip, &c., instead of by the holders of the frontages, there are:—

- 1st. The inevitable spread of catarrh, from the travelling and mixing of so many stocks.
- 2nd. The reduction of the present stock of sheep, and the stop put to further increase.
- 3rd. The decrease of the present stock of cattle, which will be at least one-half, and in many cases three-quarters of their present numbers. Our neighbour, Mr. Guise, has 2,000 head of fattening (not breeding) cattle upon nine miles, an enormous stock for such a frontage, which is only supported by the back plains. Other runs are equally stocked and must be reduced to one-quarter their present number, and then will never fatten, as they will be driven off the feeding and bedding grounds to which they have been accustomed for years.
- 4th. The destruction of the frontage runs, by the travelling of the winter stocks twice a year.
- 5th. The utter expulsion from such runs as are inundated by the floods, which extend from three to fifteen miles back; among these are Nap Nap, Toogimbil, and Pavensy, opposite and above the junction of the Lachlan.

The back plains are an integral part of the frontage runs, and can be advantageously depastured by the holders of them only; for by so many sheep as the back runs will carry for five months, will the stock of the frontages be reduced for the whole twelve months, and I firmly believe that though a few more licenses may be paid Government, the Colony will lose by it.

I would humbly suggest that if Government are not satisfied that they receive the full value of the back plains, they should have them surveyed, or at least examined, so as to estimate to what extent the timber will make the back run of each available, and let each settler pay for his whole run its full value as winter and summer run combined, or allow it to be leased, as proposed.

For the correctness of the above description of the country, I can with confidence appeal to the surveyors and others who have been in the district, and particularly to Mr. Bingham, who from his experience and local knowledge is every way qualified to give a correct estimate of its grazing capabilities. Any further information that may be required on the subject I will be happy to furnish.

I remain, &c.,
GIDEON S. LANG.

Chief Commissioner
of Crown Lands.

No. 14.

COLONIAL SECRETARY to CHIEF COMMISSIONER OF CROWN LANDS.

Colonial Secretary's Office,
Sydney, 29 January, 1850.

SIR,

With reference to a letter which has been addressed to you by Mr. G. S. Lang, respecting the leasing of certain portions of the country lying between the Murrumbidgee and Moulamein, I do myself the honor to request the favour of your report thereon, for the information of His Excellency the Governor.

I have, &c.,
W. ELYARD, JUNR.

No. 15.

CHIEF COMMISSIONER OF CROWN LANDS to COLONIAL SECRETARY.

*Crown Lands Office,
Sydney, 8 February, 1850.*

SIR,

Adverting to your letter of the 29th ultimo, No. 50/22, requesting my report on Mr. G. S. Lang's communication respecting the leasing of certain portions of country lying between the Murrumbidgee River and Moulamein, I do myself the honor to inform you that Mr. Lang's letter has been referred to Mr. Commissioner Bingham, on receipt of whose report I will do myself the honor of bringing the subject under notice.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

This may lie over accordingly.
Colonel Barney should perhaps call on Mr. Bingham, to expedite his report.
5 April.

No. 16.

COLONIAL SECRETARY to CHIEF COMMISSIONER OF CROWN LANDS.

*Colonial Secretary's Office,
Sydney, 12 April, 1850.*

SIR,

Referring to your letter of the 8th February last, respecting Mr. G. Lang's communication relative to the leasing of certain portions of country lying between the Murrumbidgee River and Moulamein, I do myself the honor to request that you will instruct Mr. Commissioner Bingham to expedite the report which you have called upon him to make on the subject.

I have, &c.,
W. ELYARD, JUNR.

No. 17.

CHIEF COMMISSIONER OF CROWN LANDS to COLONIAL SECRETARY.

*Crown Lands Office,
Sydney, 8 June, 1850.*

SIR,

In reference to your letters of the 29th January last and 12th April, I have now the honor to submit, for the information of His Excellency the Governor, a communication from Mr. Commissioner Bingham, proposing an adjustment of a tract of country known as the Murrumbidgee Plains, lying between the Murrumbidgee River and the Billybong and Yanco Creeks, in his District, proposed to be offered to public competition. I beg also to forward that officer's report upon the representations made by Mr. Gideon S. Lang and others, holders of runs having frontage to the above river and creeks, as to the inexpediency of the proposed arrangement.

2. From the accompanying correspondence it will be seen that the tract referred to, which is estimated to contain upwards of eighteen hundred square miles, was tendered for in one block by a Mr. W. L. Morton, in July, 1848; but Mr. Morton's tender comprising also portions of land already licensed, or previously tendered for, was declined, and the Commissioner was directed to propose a sub-division of the land into separate runs, that they might be offered to competition as adjusted ones.

3. The country is stated to consist of vast open plains, which, owing to the absence of permanent water, can only be made available for a portion of the year, namely, during the winter months, and it is represented that the holders of the frontage runs have been in the habit of occupying it with their stock during that season.

4. Those parties have objected to the country being offered to competition, on the ground that such a measure will deteriorate the value of their runs, by subjecting them to be deprived of country which they have been accustomed to occupy; and moreover, that in the event of its being obtained by other parties, their frontages will be liable to intrusion during the period that the back country becomes unavailable for stock; and they therefore request that they may be permitted to extend their boundaries for ten miles backwards, so as to take in the back runs, stating their willingness to pay any extra charge that may be demanded of them, in respect of the additional area that will thereby be included in their holdings. It will be observed that this application is supported by the recommendation of the Commissioner of the District; but I am disposed to think that as it is evident that the back country has not been included in the areas returned by the Commissioner for the stations on the frontages, the holders of those stations cannot legally claim to have it included in their leases, and I apprehend that having been tendered for as a new run, and adjusted, it must be offered to public competition, in conformity with sec. 13 of chap. II of Her Majesty's Order in Council, and as directed by His Excellency's Minute upon the original tender.

5. I beg, however, to suggest that, in carrying out this view, the Commissioner be instructed to prepare a subdivision of the back country into blocks corresponding with the runs having frontage, by which arrangement the holders of those runs will have an opportunity of obtaining authorized possession of back runs; and, as the Commissioner states, that when connected with the frontages the back country will become much more valuable than it otherwise would be, it is to be presumed that it will be the interest of the applicants to tender such rates of premium as will secure them from competition, which they will be enabled to do from the increased value that the possession of back runs will give to their frontages.

6. It is of course probable that, in some instances, the tenders of the present licensed occupants will be out-bid by other parties, but I have no hesitation in stating my conviction that no individual inconvenience that would thereby be occasioned, should be weighed against the manifest impropriety of handing over to a few stockholders, without competition, a tract of country covering so vast an area as the Murrumbidgee Plains. Sketch enclosed.

I have the honor, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

I also am of opinion that the wishes of the applicant, as seconded by Mr. Bingham, cannot legally be assented to. See 13 section of chap. 11 of the Order in Council.

The suggestion, however, contained in the 6th paragraph of this letter appears to be a very good one, and if acted upon will afford the present licensees in the locality referred to an opportunity of securing the so-called back run in the only way in which it is now competent to the Government to offer.

17 June.

[Enclosure in No. 17.]

Head Quarters, Tumut,
18 April, 1850.

Sir,

I do myself the honor to acknowledge the receipt of your letter as noted, transmitting a letter of application from Mr. Gideon S. Lang, soliciting, for the reasons he sets forth, that the apparent Waste Crown Lands situated between the southern boundaries (as acknowledged) of the runs on the Lower Murrumbidgee River and the runs on the Billibong Creek may not be submitted to public competition, and requesting my opinion on the same.—I have to state, for your information, that on a very careful consideration of the grounds set forth by Mr. Lang in his statements, I am induced to recommend (under certain restrictions) that the licensees holding stations on the lower portion of the Murrumbidgee River may be permitted to amend their applications for leases to the extent of ten (10) miles back (but no more) from their present back boundaries, which are equi-distant (10) ten miles from the Murrumbidgee River, thus giving them double the extent of area they at present have, which of course would be estimated then as one entire block of country; and I may here remark that I certainly should be disposed to estimate the value of these back waste lands, isolated as they are, and without water, annexed to the present river runs, at a much higher estimate than of standing on their own present value or capabilities, and which induces me to recommend this measure. The restrictions I allude to are, that in the event of their obtaining leases for these runs, and further permitted to amend their application for lease, that a clause should be inserted that the lessees should not be permitted to subdivide these back lands without a command of river frontage; as if not so prevented by proper instructions they would be doing themselves, from speculation or other motives, when once they had the power, the very thing they so earnestly request the Government will not do now. Should they be permitted by the Executive to amend their applications, I would suggest that circulars be sent to the parties concerned, intimating to them that if they are prepared to pay the proper fees for the back country, as may be estimated, that they will be permitted to amend their applications to the extent I have specified.

Letter No. 177,
6 Feb., 1850,
with enclosure.
Enclosure
returned.

I have, &c.,
HENRY BINGHAM,
Commissioner of Crown Lands.

George Barney, Esq.,
Chief Commissioner of Crown Lands,
Sydney.

I entirely concur in the propriety of adopting the course here suggested; but as the matter has now been lying over for a considerable time, it is very desirable that the Commissioner should give his early attention to the subdivision of the runs in the manner proposed, adhering of course, as far as practicable, to the general regulations regarding the shape, size, &c. of runs.

COLONIAL SECRETARY to CHIEF COMMISSIONER OF CROWN LANDS.

Colonial Secretary's Office,
Sydney, 12 July, 1850.

SIR,

I beg to acknowledge the receipt of your letter of the 8th ultimo, No. 149, forwarding a communication from Mr. Commissioner Bingham, proposing an adjustment of a tract of country known as the Murrumbidgee Plains, lying between the River Murrumbidgee and the Billibong and Yanko Creeks, in his District, proposed to be offered to public competition, together with that officer's report upon the representations made by Mr. Gideon S. Lang and others, holders of runs having frontage to the above river and creeks, as to the inexpediency of the proposed arrangements.

2.

2. In reply, I am instructed to inform you that His Excellency the Governor concurs with you in opinion that the wishes of the applicants, as seconded by the Commissioner, cannot legally be consented to.

3. With reference, however, to the 5th paragraph of your letter, in which you suggest that, in order that the country in question may be offered to public competition in conformity with section 13 of chapter II of the Order in Council of 9th March, 1847, the Commissioner may be instructed to prepare a subdivision of it into blocks corresponding with the runs having frontage, by which arrangement the holders of those runs will have an opportunity of obtaining authorized possession of back runs—I have the honor to acquaint you that His Excellency approves of your suggestion being carried into effect.

4. As this matter has now been lying over for a considerable time, it is very desirable that Mr. Commissioner Bingham should give his early attention to the subdivision of the tract of country before alluded to, in the manner proposed, adhering, of course, as far as practicable, to the general regulations regarding the shape, size, &c., of Runs.

I have, &c.,

E. DEAS THOMSON.

ADJUSTMENT OF MURRUMBIDGEE PLAINS.—DESCRIPTION.

Nap Nap, block A; commencing at a point 10 miles south of the junction of the Lachlan River with the Murrumbidgee River, and extending 10 miles south from that point, thence 7½ miles east, A, 48,000 acres. thence 10 miles north, and thence 7½ miles west; forming a block of 75 square miles or 48,000 acres.

Nap Nap, block B; commencing at the north-east terminus of Nap Nap, block A, and extending south for 10 miles, thence east for 7½ miles, thence north 10 miles, and thence west 7½ miles;—75 square miles or 48,000 acres.

Nap Nap, block C; commencing at the north-east terminus of Nap Nap, block B, and extending south for 10 miles, thence east for 7½ miles, thence north 10 miles, and thence west 7½ miles;—75 square miles or 48,000 acres.

Nap Nap, block D; commencing at the north-east terminus of Nap Nap, block C, and extending south for 10 miles, thence east for 7½ miles, thence north 10 miles, and thence west 7½ miles;—75 square miles or 48,000 acres.

Toogoombie, block A; commencing at the north-east terminus of Nap Nap, block D, and extending south for 10 miles, thence east for 7½ miles, thence north 10 miles, and thence west 7½ miles;—75 square miles or 48,000 acres.

Toogoombie, block B; commencing at the north-east terminus of Toogoombie, block A, and extending south for 10 miles, thence east for 5½ miles, thence north 10 miles, and thence west 5½ miles;—55 square miles or 35,200 acres.

Pevensy, block A; commencing at the north-east terminus of Toogoombie, block B, and extending south for 10 miles, thence east by north 10 miles, thence north for 10 miles, and thence west by south 7½ miles;—75 square miles or 48,000 acres.

Munilgingergell, block A; commencing at the north-east terminus of Pevensy, block A, and extending south for 10 miles, thence east by north 10 miles, thence north 10 miles, and thence west by south 10 miles—very inferior country;—100 square miles or 64,000 acres.

Eli Elwah, block A; commencing at the north-east terminus of Munilgingergell, block A, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Eli Elwah, block B; commencing at the north-east terminus of Eli Elwah, block A, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Burrabogie, block A; commencing at the north-east terminus of Eli Elwah, block B, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Burrabogie, block B; commencing at the north-east terminus of Burrabogie, block A, and extending south for ten miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Mulberrygang, block A; commencing at the north-east terminus of Burrabogie, block B, and extending south for 10 miles, thence east for 5 miles, thence north for 10 miles, and thence west for 5 miles;—50 square miles or 32,000 acres.

Mulberrygang, block B; commencing at the north-east terminus of Mulberrygang, block A, and extending south 10 miles, thence east 5 miles, thence north 10 miles, and thence west 5 miles;—50 square miles or 32,000 acres.

Singorambah, block A; commencing at a point 15 miles south from the old yard on the Murrumbidgee River (the boundary point between the runs of Mulberrygang and Singorambah), and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Singorambah, block B; commencing at the north-east terminus of Singorambah, block A, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Singorambah, block C; commencing at the north-east terminus of Singorambah, block B, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Singorambah, block D; commencing at the north-east terminus of Singorambah, block C, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

Moulamein, block A; commencing at the south-west terminus of Nap Nap, block A, and extending south for 10 miles, thence east for 7½ miles, thence north for 10 miles, and thence west 7½ miles;—75 square miles or 48,000 acres.

Moulamein,

Moulamein, block B, 48,000 acres.	Moulamein, block B; commencing at the north-east terminus of Moulamein, block A, and extending south for 10 miles, thence east $7\frac{1}{2}$ miles, thence north 10 miles, and thence west $7\frac{1}{2}$ miles;—75 square miles or 48,000 acres.
Windouran, block A, 48,000 acres.	Windouran, block A; commencing at the north-east terminus of Moulamein, block B, and extending south for 10 miles, thence east for $7\frac{1}{2}$ miles, thence north 10 miles, and thence west $7\frac{1}{2}$ miles;—75 square miles or 48,000 acres.
Windouran, block B, 48,000 acres.	Windouran, block B; commencing at the north-east terminus of Windouran, block A, and extending south for 10 miles, thence east $7\frac{1}{2}$ miles, thence north 10 miles, and thence west $7\frac{1}{2}$ miles;—75 square miles or 48,000 acres.
Coonargo, block A, 48,000 acres.	Coonargo, block A; commencing at the north-east terminus of the Waarkinbragil run, licensed to Walter Ogilvie, and extending south for 10 miles, thence east by north $7\frac{1}{2}$ miles, thence north 10 miles, and thence west by south $7\frac{1}{2}$ miles;—75 square miles or 48,000 acres.
Coonargo, block B, 32,000 acres.	Coonargo, block B; commencing at the north-east terminus of Coonargo, block A, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Coonargo, block C, 32,000 acres.	Coonargo, block C; commencing at the north-east terminus of Coonargo, block B, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Yanco, block A, 32,000 acres.	Yanco, block A; commencing at the north-east terminus of Coonargo, block C, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Yanco, block B, 32,000 acres.	Yanco, block B; commencing at the north-east terminus of Yanco, block A, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Yanco, block C, 32,000 acres.	Yanco, block C; commencing at the north-east terminus of Yanco, block B, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Yanco, block D, 32,000 acres.	Yanco, block D; commencing at the north-east terminus of Yanco, block C, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Yanco, block E, 32,000 acres.	Yanco, block E; commencing at the north-east terminus of Yanco, block D, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.
Yanco, block F, 32,000 acres.	Yanco, block F; commencing at the north-east terminus of Yanco, block E, and extending south for 10 miles, thence east by north 5 miles, thence north 10 miles, and thence west by south 5 miles;—50 square miles or 32,000 acres.

COLONIAL SECRETARY to CHIEF COMMISSIONER OF CROWN LANDS.

*Colonial Secretary's Office,
Sydney, 19 February, 1851.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 12th instant, No. 38, respecting the subdivision of the Murrumbidgee Plains, and submitting the report of the local Commissioner, accompanied by a plan and description of the several runs into which the country has been divided.

2. In reply, I do myself the honor to inform you that His Excellency the Governor General has been pleased to approve of the same, and of the country as proposed by you being included in a notice of adjusted runs for public competition now in course of preparation.

3. The documents belonging to your office are returned herewith.

I have, &c.,
W. ELYARD.

No. 24.

DESCRIPTION of the Boundaries of Tala.

Murrumbidgee District, No. 187, of 30th September, 1848. Wentworth W. C. (now J. Black.)

TALA.

Estimated area, 268,800 acres. Grazing capabilities, 28,000 sheep or 7,000 cattle.

Bounded on the north by the Murrumbidgee River, for 30 miles; on the east by a line due south for 15 miles from the marked tree above the Wogorah Hut, being a prolongation of the boundary line between this run and Nap Nap (T. Reeve's); on the west by a line due south for 10 miles from a marked tree on the river 14 miles above its junction with the Murray, being the boundary between this run and Bonongle (C. Nicholson's); and on the south by a line connecting the eastern and western boundaries.

This run is subject to a Crown Reserve.

HENRY BINGHAM,
C. C. L.

Memorandum:—The within letter was inadvertently omitted to be transmitted with the Report of the Crown Commissioner, Murrumbidgee District, No. 50-108.

HENRY BINGHAM.

*Head Quarters, Tumut,
6 May, 1850.*

No. 25.

No. 25.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER OF CROWN LANDS,
MURRUMBIDGEE.

*Crown Lands Office,
Sydney, 24 March, 1854.*

SIR,

With reference to your report dated 1st ultimo, upon Mr. H. Burchett's tender for the run called Yanco, block G, I do myself the honor to draw your attention to the amended description of the Tala Run sent in by Mr. Black, and referred to the late Commissioner Bingham, on the 18th April, 1850, and reported upon by his letter dated 21st November, 1850, which may interfere with the boundaries described in the tender of Mr. Burchett.

No. 50, June,
1854.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 26.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF
CROWN LANDS.

*District of Murrumbidgee,
Crown Lands Office,
29 March, 1854.*

SIR,

As I gather from your letter of the 24th instant, No. 54-516, that the amended description of Tala, forwarded by Mr. Black on the 10th April, 1850, and reported on by Mr. Bingham on 21st November, 1850, had been favourably entertained, I do myself the honor to draw your particular attention to the circumstances of the case.

There is no copy of any letter retained in this office prior to the appointment of Mr. Mackenzie, so that I am quite at a loss to discover what Mr. Bingham's report on this proposed amendment was; nor is there any file of letters from your office by which I might discover the substance of his report.

You will, under these circumstances, excuse my forwarding a tracing* of the claim made by Mr. Black in his amended description, which shews that, if anything more than a line parallel with the river at 10 miles from it was recommended by Mr. Bingham, Mr. Black has been unusually favoured; also shewing that the amended claim forwarded by Mr. Black would take up land now leased to others. * Appendix A.

As I observed a note, in Mr. Bingham's hand, that the river runs nearly east and west, whereas it runs more nearly north and south, I am afraid that he may have sanctioned the southern boundary claimed, viz., a line east.

The land to which Mr. Black may be considered as fairly entitled I have marked on the map forwarded.

May I beg to be informed of the substance of Mr. Bingham's report on this subject?

I have, &c.,

CHARLES G. N. LOCKHART,
Commissioner of Crown Lands.

No. 27.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER OF CROWN LANDS,
MURRUMBIDGEE.

*Crown Lands Office,
Sydney, 11 April, 1854.*

SIR,

In reply to your letter of the 29th ultimo, No. 54-201, relative to the amended description of the Tala Run in your District, forwarded by Mr. Black, I do myself the honor to annex, for your information, a copy of the report of the late Mr. Commissioner Bingham on the subject in question.

For report, see
No. 12.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 28.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF
CROWN LANDS.

District of Murrumbidgee,
Crown Lands Office,
24 May, 1854.

SIR,

I do myself the honor to acknowledge the receipt of your letter of 11th April, 1854, No. 757, in which, in reply to my letter of 29th March, No. 54-201, you forwarded to me the report (dated 21st November, 1850) of Mr. Commissioner Bingham, on the amended description of Tala forwarded by Mr. John Black.

In reply to your letter, I do myself the honor to state, that I am at a loss to know whether, by forwarding the report by Mr. Commissioner Bingham, you mean to shew to me that it is now too late for me to refer to the matter, or whether you mean to invite me to make any remark which I may consider necessary on the subject.

Believing the latter course to be the proper one for me to pursue, I do myself the honor to point out to you that the report by Mr. Bingham is unprecedently partial to Mr. Black, unjust in the extreme to other squatters in the District, and therefore derogatory to the honor of the Crown, if acted upon.

In my letter of the 29th March, No. 54-201, I forwarded a tracing shewing Mr. Black's amended description; but as I hesitated to believe that Mr. Bingham had recommended this amendment in full, I did not dwell upon its evident impropriety. Finding however, from Mr. Bingham's report, that this amended claim has been favorably reported on by that gentleman, I do myself the honor to point out, that if this amended claim be entertained, the run of Tala will extend back thirty miles from the Murrumbidgee, and that with a frontage to that river of thirty miles, it will include an area of 695 square miles, as nearly as I can measure on an eighth mile to the inch map.

I beg leave further to refer to a lengthened correspondence between your office and Messrs. William Macleay, John Peter Strachan, and Gabbet, and other squatters on the Murrumbidgee, in which these gentlemen were distinctly informed that the runs of settlers on the river were to be considered as only extending to ten miles back from the river, and that therefore the blocks behind the ten mile line were to be considered as open to tender. These back blocks were therefore submitted to tender, and in many instances passed into the hands of others than those persons holding the frontage; or if obtained by them, were obtained at a high premium. If other persons were so restricted, under the rule laid down by the Commissioner of the District, I do not see why Mr. Black, or Mr. Wentworth rather, should not be so restricted likewise.

I would also beg leave to point out, that the land included in Mr. Black's amended description has not been in his actual possession; Messrs. Smith and Sylvester have had sheep stations on a portion of it for the last five years; and I would also point out that Moulamein, blocks A and B, Windouran, block A, Nap Nap, blocks A, B, and C, tendered for by and leased to others, are all included in Mr. Black's amended claim; and that there are tenders under consideration for other portions of it, which have never been in Mr. Wentworth's actual possession.

Rents having been actually received for the blocks named above, I cannot see how this amended claim can be entertained.

In support of the statements made by me, I do myself the honor to refer you to the map which I forwarded in my letter of 29th March, No. 54-201.

I may also state, that I feel confident that Mr. Commissioner Bingham recommended this claim, labouring under some misapprehension. The fact of the blocks actually included in that claim being afterwards accepted by him, shews that he did not know to what the claim actually extended; and from the memorandum attached to the assessment of the grazing capabilities of Tala, it appears clear that he imagined the claim actually included only a block ten miles from the river.

Should it appear to you that this amended claim should be set aside, I do myself the honor to append a description of the Tala Run, which will meet the justice of the case.

I have, &c.,

C. G. N. LOCKHART,
Commissioner of Crown Lands.

Is there any amended description recorded on the Yanko run?
None.

[No. 1.]

EXTRACT from Mr. Bingham's Book of Records, 11th April, 1850.—John Black.—Amended Description of Tala.

Sir,

I have the honor to send you an amended description of the run of Tala, which now stands in my name. I find the original description does not comprise much more than that portion of the run which is yearly flooded by the Murrumbidgee, and has omitted the greater part of the run which the flocks now depasturing on it necessarily occupy during the winter months, and without which the remainder of the run for about half the year, that is, during the periodical floods, is not available.

The supplemental country indeed, which this amended description embraces, has already been occupied and the license paid for it, and without it the grazing capabilities of the runs would not be equal to more than half the estimate of them which has been given in, as I have no doubt the Commissioner of the District will be able to testify.

Amended

Copy of amended claim
as on files of this office
forwarded, marked 1.

Tracing forwarded,
29 March.

Copy of memorandum in
Mr. Bingham's large
book, marked D.

Amended description as
recommended, marked V.

Amended Description.

Commencing at the Conduru Lagoon, bounded on the east by a line running from that lagoon fifteen miles south; on the west by a line running south ten miles, and commencing at the River Murrumbidgee from a marked tree about thirteen miles from the junction of the Murrumbidgee and the Murray, and forming a boundary with Mr. Scott's run; on the south by a line commencing at the south end of the western boundary as described above, and running east until it intersects a prolongation of the eastern or dividing boundary between Nap Nap and Toogoombic, which prolongation, together with the western boundary of Nap Nap, forms the eastern boundary of Tala. The river frontage is about forty miles in length, and its general direction north-east and south-west; the whole of the back run consists of thinly grassed plains, totally devoid of water during the greater portion of the year.

Tala.

Grazing capabilities, 1,500 cattle.
Ditto ditto, 30,000 sheep.

Chief Commissioner of
Crown Lands.

I have, &c.,
JOHN BLACK.

Amended description, refer to Commissioner as usual.—G. B.
Referred to Commissioner, Mr. Black informed, 18 April, 1850.

[No. 2.]

EXTRACT from Mr. Bingham's large book, labelled Official Book of all matters connected with the Murrumbidgee District. Page, 107. Assessment of Capabilities.

No. 8, No. 187, W. C. Wentworth from John Black.

Name of Run—Tala.
Estimated area, 268,000 acres.
28,000 sheep, or
7,000 cattle.

Bounded on the north by the Murrumbidgee River for thirty miles; on the east by a line due south for fifteen miles from a marked tree above Wogine hut, being a prolongation of the boundary between this run and Nap Nap (Reeves); on the west by a line due south for ten miles from a marked tree fourteen miles above the junction of the Murrumbidgee and Murray, being the boundary between this run and Bonongle (Nicholson); and on the south by a line connecting the eastern and western boundaries.

I agree in this estimate and arrangement of boundaries.

Kista, 23 November, 1850.
HENRY BINGHAM.

JOHN CHRISTIE, Agent for
W. C. WENTWORTH and
JOHN BLACK, Esq.

[No. 3.]

District of Murrumbidgee,
Crown Lands Office,
24 May, 1854.

Sir,

In reference to the amended description of Tala forwarded by Mr. John Black on 11th April, 1850, and reported on favourably by Mr. Commissioner Bingham on the 21st November, 1850, I do myself the honor to point out that, by granting the description as amended by Mr. Black, a much greater area of Crown Lands will be included in the Tala Run than the rule laid down in this District and acted upon in other cases will allow of.

It appears that the late Commissioner, Mr. Bingham, in reporting favourably on the claim set up by Mr. Black must have labored under some misapprehension, as two days after the date of his approval of this claim, he, in conjunction with Mr. Black's agent, had made an estimate of the grazing capabilities of the run of Tala, and signed a description of the boundaries which reduces the area of the run to less than one-half of that claimed in the amended description. The appended document, No. 2, and a careful examination of the claim set forth by Mr. Black on the accompanying tracing (copied from the official map) shews this to be the case.

I do myself the honor to append a description of Tala Run which will meet the justice of the case, being an increase in the area as originally claimed, and throwing the usual and fair amount of back country into the run.

I have, &c.,
CHARLES G. N. LOCKHART,
Commissioner of Crown Lands.

Chief Commissioner
of Crown Lands.

Amended Description.

TALA { Estimated area, 360 square miles.
Grazing capabilities, 28,000 sheep.

Commencing at a marked tree on the River Murrumbidgee above Wagera hut; bounded on the east by a line thence south fifteen miles; bounded on the north by the River Murrumbidgee; bounded on the west by a line from a marked tree, about fourteen miles from the junction of the Murrumbidgee with the Murray and running south eight miles (or half way to the River Edward), being the eastern boundary of Bonongle Run; bounded on the south by a line east seven miles, and thence by a straight line about north-east to the southern extremity of eastern boundary.

CHARLES G. N. LOCKHART,
Commissioner of Crown Lands.

No. 29.

MR. A. MORRIS to CHIEF COMMISSIONER OF CROWN LANDS.

*Tala, Balranald,
30 October, 1857.*

SIR,

As I anticipated, when I first had the honor of addressing you upon this subject, the injury done to my interests by the alteration of the old established eastern boundary of Nap Nap, is not to be confined to the one case, but is to be extended to all my runs, by reducing their extent in accordance with the diminished frontage already effected in favor of the neighbouring station, Toogoombie.

I have before me a map, belonging to Mr. Edward Flood, M.P., furnished, I imagine, from your office, by which it appears that the position of the back blocks behind Nap Nap and Toogoombie has been materially changed. My back blocks, Nap Nap A, B, and C, have not only been pushed west about $1\frac{1}{2}$ miles to correspond with my reduced frontage, but they have been increased in size and made to encroach on my Tala station, fully three miles west. Nap Nap D of the old maps, which has been repeatedly offered for public tender, has been wholly extinguished, and Toogoombie A takes its place, occupying also that portion of Nap Nap C of which it is attempted to deprive me.

Now, as far as the disposal of my runs within themselves is concerned, I shall be willing at all times to consult the convenience of the Survey Department, if any alterations in their respective boundaries will facilitate its operations; and whenever any supposed rights of mine shall be found injurious to the interests of the public, I hope I shall always be ready to surrender those advantages; but I do protest against being deprived of any portion of my runs for the benefit of private persons. I can easily perceive that the next encroachment, if indeed it has not been already determined upon, will be attempted by pushing the blocks which lie south of the Nap Nap blocks a corresponding distance west into my Tala station, and thereby include all my main cattle camps in Moulamein A. I regret to appear so importunate, but when it is remembered that by the error of the Government my interests are being most seriously damaged, not to public but private advantage—that the boundaries of my runs, which have been well established since 1845, are being unsettled—and that differences, which were never before dreamed of, are being created amongst neighbours—I am sure I shall be sufficiently excused for pressing upon your attention the necessity and justice of at once finally adjusting these questions.

I need scarcely point out to you that should any portion of my runs be included in a lease granted to another person, I shall be wholly precluded from protecting myself by an action for trespass, as I otherwise could. Accompanying this letter is a map,* obtained by me from the Survey Office, which will, I trust, make perfectly clear the statement I have made.

I have, &c.,

A. MORRIS.

* Map not procurable—returned to writer.

No. 30.

CHIEF COMMISSIONER OF CROWN LANDS to MR. A. MORRIS.

*Crown Lands Office,
Sydney, 25 November, 1857.*

SIR,

With reference to your letter of the 30th ultimo, I beg to inform you that you are in error as to the position of the boundary between Tala and Nap Nap; it is not in the position shewn in pencil and by a red line in the map forwarded by you, and herewith returned; the boundary is described as:—"By the Wangera Creek from its junction with the river to a marked tree half a mile above Mr. Wentworth's sheep station up the creek." Another description, that of Tala, is:—"On the east by a line due south for 15 miles from the marked tree above the Wangera hut, being a prolongation of the boundary line between this run and Nap Nap"; consequently, although the back blocks of Nap Nap and Moulamein have been enlarged, they do not, as you suppose, encroach upon the Tala Run, unless you contend that the east boundary of Tala does not start from the tree a little above the Wangera hut, but from some point three miles to the east of it.

As mentioned to you by my letter of the 4th November last, Mr. Commissioner Lockhart's report is still looked for on the subject of the illegal overlapping of Toogoombie lease upon Nap Nap Run.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 31.

MR. A. MORRIS to CHIEF COMMISSIONER OF CROWN LANDS.

*Tala, Balranald,
12 December, 1857.*

SIR,

I beg to acknowledge the receipt of your letter of the 25th ultimo, and beg in reply to say, that I, in behalf of Mr. Wentworth, made application for the Tala Run on the 4th April, 1845, to the then Commissioner of the District, and I described the run as commencing at a point on the River called Cundoona, which is three miles east of the Wargoora hut, and as I was the first white person who ever saw this part of the country I received the usual permission to occupy. I am aware that my description of the run is in the Commissioner's Office at the Tumut. A difference as to boundaries afterwards arose with Mr. Hobler, who subsequently took up Nap Nap; but although, out of consideration to his family, Mr. Wentworth, on my recommendation, was willing to waive his claim to any land inside of the Wargoora Creek, he did not do so to the country outside, but always claimed three miles up the creek to another hut above what is called Wargoona hut; as, however, I find that the Moulamein blocks have not, as I supposed, and as you appear to think, been enlarged, I do not care to press the matter referred to above, but I do most earnestly protest against any enlargement of the Moulamein blocks, which would have the effect of destroying the Tala Run, inasmuch as without the back country the rest would be useless, as every year a vast portion of the frontage is totally submerged for months, the cattle and other stock retiring to the plains. No doubt the Tala Run was most imperfectly described in the application for a lease, it being generally held that the back country of right belonged to the run. Mr. Wentworth amended his description, which was not however wholly allowed, but it was always thought that the red line which appears in the map in the Survey Office shewed the east boundary of Tala. We have occupied the country for twelve years, and our claim has been undisputed. I do beg and entreat that no encroachment may be lightly made on the Tala Back Run, which will only have the effect of injuring the whole of Tala, and certainly not improve the Moulamein blocks if they lose to the east what they would gain to the west; the value of the country in itself, being poor salt bush plains without water, is very small. I hope to hear that my fears on this head are groundless.

I am anxiously awaiting the decision in the matter of the boundary between Nap Nap and Toogoombie.

My address for some three months will be "To the care of Messrs. Dal. Campbell and Co., Melbourne."

I have, &c.,
A. MORRIS.

No. 32.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER OF CROWN LANDS,
MURRUMBIDGEE.*Crown Lands Office,
Sydney, 5 January, 1858.*

SIR,

From a correspondence with Mr. Morris about his Nap Nap and Tala Runs, I find that he is claiming the country which you have marked as open to tender, between the proper south-east boundary of the Tala and the west boundary of Moulamein, block A, as part of Tala Run. You will remember that on the 24th May, 1854, you communicated to me very fully on the subject of an amended description of Tala, then put forth by Mr. Black, the then holder of Tala. By some oversight—some supposed clashing with a remote run, "Yanko," of which you are aware—nothing whatever was done on your reports about Tala; at least it appeared so, and I am anxious to know if anything has been done, and as to what country you have allowed Mr. Morris to occupy up to this time. Of course it would be impossible from your shewing to admit Mr. Black's amended description, nor do I see why Mr. Bingham's amended description which makes the south, or rather south-east boundary a straight line, should not be adhered to. You propose, as shewn by a sketch and amended description, to give much more land than Mr. Bingham allowed and the parties interested asserted to. I wished to be informed of your reasons for this, for I do not find any in the correspondence, unless I am to conclude that you have done so, as you state—to meet the justice of the case, by throwing the usual and fair amount of back country into the run of Tala. If nothing has transpired to shake your views, and if I am satisfied with your reason for the amendment you propose, I shall, on hearing from you, send a copy of your description to Mr. Morris, and tell him that those are the boundaries of Tala, very favourably adjusted, and that if he requires the country between Moulamein, block A, and the south-east boundary of Tala, he should tender for it.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 33.

COMMISSIONER OF CROWN LANDS, MURRUMBIGEE, to CHIEF COMMISSIONER OF
CROWN LANDS.

*Murrumbidgee District,
Crown Lands Office,
18 January, 1858.*

SIR,

57-13651.

I do myself the honor to acknowledge the receipt of your letter of the 5th instant, numbered as on margin, requesting me to inform you if anything has been done on the matter of the boundaries of Mr. Morris' Tala Run since my lengthy report on the subject on 24th May, 1854, as also to furnish my reasons for having adopted as a basis of settlement, a description including much more than Tala Run was at first apparently entitled to under the description given by the applicant for lease.

In reply, I do myself the honor to state that nothing has been done in the matter by me since the report furnished, further than by my explaining to Messrs. Lydiard and Mackinnon, of Mooka Run, and others, that the whole matter was under the consideration of the Government.

I do myself the honor further to state that the first application made was previous to any survey of the river frontage having been made, and that when such took place the frontage was so different in reality to the assumed course of the river that an amended description was forwarded by the holder of the Tala Run, which erred as much in an increased claim as the original application did in making one which did not include a fair proportion of back country. The tracing forwarded in my letter of the 24th May, 1854, shows the case very clearly.

I pointed out that Mr. Bingham had done two things quite incompatible with one another. He had recommended the acceptance of Mr. Black's *amended* description, and at the same time had assessed the run under the old description, binding the parties to the original lines.

I did myself the honor to propose a description which I then thought, and still think, fairly meets the merits of the case.

The eastern boundary is made fifteen miles back from the river, so as to bring the south-eastern corner and southern boundary out of the bend of the river. The western is eight miles back, dividing the back country with the Edward River settlers. The southern boundary runs east for seven miles, so as to include land always considered as the Tala Station, and to arrive at a point whence line to the south-eastern corner should throw into the run as much land, clear of floods, as would feed the stock fed on the flats during the summer, but which in the winter must be shifted out to unflooded land.

The question of the Tala boundaries is a subject of great anxiety to many runs, and I do myself the honor to state my hope that my description, given in the best faith, may be adopted.

I have, &c.,

CHARLES G. N. LOCKHART,
Commissioner of Crown Lands.

No. 34.

CHIEF COMMISSIONER OF CROWN LANDS to UNDER SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Crown Lands Office,
Sydney, 29 January, 1858.*

SIR,

Referring to my letter, No. 57-481, of 26th November, relative to the application of Messrs. Mackinnon and Lydiard, for the descriptions of certain runs on the Edward River, and on which I furnished some of the descriptions, and informed you that I had written for information to Mackinnon and Lydiard about the others, and that on receiving their reply I would furnish a further report,—I have now the honor to state, for the information of the Honorable the Secretary for Lands and Public Works, that I have received a communication from Messrs. Mackinnon and Lydiard, and have furnished them with the further description they require.

I may add, in explanation of the little difficulties that have surrounded this reference, that none of these runs on the tender have been officially transferred to Mackinnon and Lydiard, and that they are in consequence not known as the holders of runs by the Government.

I have intimated to them that it is necessary they should obtain official transfers.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

[Enclosure 1 in No. 34.]

*Crown Lands Office, —
Sydney, 25 November, 1857.*

Gentlemen,

In reference to your letter of the 11th August last, addressed to the Under Secretary for Lands and Public Works, as to the boundaries of your Runs in the District of Murrumbidgee, I have the honor to request that you will be good enough to furnish me with the name of your Run adjoining Mr. Morris's, to enable me to furnish a description of the same.

I have, &c.,

Messrs. Mackinnon and Lydiard,
Moolpa,
Lower Edwards River, Deniliquin.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

[Enclosure

[Enclosure 2 in No. 34.]

*Moulpa,
Lower Edward River, Deniliquin,
20 December, 1857.*

Sir,

We beg to acknowledge receipt of your letter, bearing date November 25, 1857, requesting us to furnish you with the name of our Run adjoining Mr. Morris', to enable you to forward a description of the same, and in reply we have to inform you that we have purchased Messrs. Sylvester and Smith's interest in this Run, known as the "Moulpa" Run, the frontage of which commences eight (8) miles below the township of the Moulamein, and runs down the river as far as the junction of the Edwards and Wakool Rivers at the back; on the east side we have an addition called, we think, on the Government chart, the Winter Run; again at the back of that two blocks respectively Moulamein block A and B; but the exact position of these blocks we are unable to determine, as, in the description, the starting point commences at the corner of one of Mr. Morris' Nap Nap blocks. We have no chart of this part of the country, and are unable to procure one. We have also a block called the Moulpa Back Run, purchased from Mr. Carne, which we believe lies to the east of our Winter Run.

These runs we have been paying rent for for years; from a communication and a rough sketch we received from the Commissioner for this District, it appears that Mr. Morris claims the whole of the blocks called Moulambu A and B, and part of our Winter Run, also the whole of the Moulpa Back Run, which has caused us to apply for a description of these runs, and also the boundary between Mr. Morris and ourselves; there are also two blocks called Mustyn Hut Run and Harney's Hut Run, tendered in March, 1854. We wrote in May, 1854, to Mr. Lockhart about these blocks, and in reply he informed us that doubtless the tenders would be accepted, but at that time they were in abeyance, pending some necessary reference to Mr. Morris' back boundary, since which time we have heard nothing further about it. We believe Mr. Morris runs with us along the back boundary, and claiming the country we have mentioned, and this is what we wish settled. We trust you will be able to furnish us with it from this letter, and from the country as marked, no doubt, in the Government charts; not having a chart we are unable to give any further description.

We have, &c.,

MACKINNON & LYDIARD.

Chief Commissioner of Crown Lands.

No. 35.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF
CROWN LANDS.

*Murrumbidgee District,
Crown Lands Office,
16 March, 1858.*

SIR,

As the fate of several tenders depends upon the decision come to by the Crown on the subject of the boundaries of Tala Run, I do myself the honor to request that I may be informed whether the boundaries which have been suggested by me for that run will be those adopted. My last letter upon the subject was on 18th January, No. 58-13, in answer to your letter of 5th January, No. 58-282, marginal number 57-13661.

I have, &c.,

CHARLES G. N. LOCKHART.

No. 36.

REPORT respecting Tala boundaries.

THERE is no question as to the extent of river frontage, and the case may therefore be disembarrassed of reference to that, and consideration confined to the real matter—the extent of back run.

As regards this, the facts are these:—The Tala Run was originally taken up for Mr. Wentworth by Mr. Morris (the present holder.) Mr. Wentworth, in March, 1848, when applying under the Orders in Council for a lease, described the run as extending back from the river eight miles.

Mr. Morris pointed out to Mr. Wentworth, as indeed did Mr. Commissioner Bingham also, that in describing the run as extending back only eight miles he had not taken into account the periodically flooded state of the land for some miles back from the river, and had omitted from his description land which he (Mr. Morris) in taking it up had contemplated including, and had in fact included, and which was indispensable to the run.

Consequent on this Mr. Black, the then legal holder, but really acting for Mr. Wentworth, distinctly and at length explaining the grounds for doing so, sent in an amended description, correctly setting forth the direction of the boundaries, but including considerably more than an extent of back run intended by Mr. Morris when taking up the country for Mr. Wentworth.

This amended description, with the explanation of the grounds for sending it in, was referred for report to the then Commissioner of the District, Mr. Bingham, and on it, under date the 21st November, 1850, he, notwithstanding the excess, reported that "the applicant had not made any demand to which he is not entitled."

Two days later, however, on the 23rd November, 1850, the Commissioner at Kyeta (the head station of the Tala Run), when actually on the spot and when formally estimating the grazing capabilities of the run, admitted and signed a description of boundaries which were intended to correct the excess included in Mr. Black's description, and estimated the grazing capabilities accordingly.

The

The object sought by amending the original description was, it will be admitted, to include, for the reason assigned, a greater extent of back run than that which Mr. Wentworth, inadvertently and from non-acquaintance with the local peculiarity and subsequent necessity, had set forth in his description; and this same object, it will be conceded, must have been that still sought by Mr. Wentworth's agent, Mr. Christie, in the modification of the amended description agreed to by him at Kyeta on the 23rd of November, 1850, and admitted by the Commissioner.

Into that modification, however, of Mr. Black's amended description, there crept an error, the effect of which would be to neutralize the clearly expressed object and intention of the amendment of the original description; the obtaining the extent of back run necessary in consequence of the periodically flooded state of the land for some miles back from the river, would be, in fact, to impair, not to amend, the original description. This, it will be admitted, could not have been intended by the Commissioner or by Mr. Wentworth's agent.

The error consists in the omission from the description of the line east from the southern extremity of the western boundary to form the south boundary, and is referable to the misconception as to the true course of the river, which was erroneously treated as running from east to west; this is obvious from the whole tenor of the modified description agreed to at Kyeta.

That such a line is indispensable is evident. Mr. Lockhart himself, in attempting to adjust the boundary, introduces such a line, but limits its length so as largely to reduce the extent of back run always claimed and occupied as part of Tala, and necessary to it from the distance to which the land is flooded.

In such circumstances surely a mere error and omission of this kind will never be insisted on to the detriment of a long occupied run, but the reasonable and equitable course will be adopted of reading descriptions of boundaries according to their true intent and real meaning, and securing the holder of the run in the possession of what he has always held and is necessary to him.

Mr. Lockhart urges against Mr. Morris' claim, that other runs on the Murrumbidgee have been restricted to an extent of ten miles back from the river, and the land behind these beyond that distance held to be open to tender. But the runs to which Mr. Lockhart refers are not as Tala is during a part of each year, flooded for miles back from the river, and the precedent therefore, the circumstances being different, does not apply.

Mr. Morris claims nothing beyond what he originally took up for Mr. Wentworth; nothing beyond what Mr. Wentworth, as long as he held the run, always occupied; nothing beyond what he (Mr. Morris) himself has, from the date of his purchase of the run from Mr. Wentworth, up to the present time, constantly occupied; he claims nothing beyond what the plain intention and object of the amended description sought, or beyond what the then Commissioner distinctly considered the holder of Tala entitled to.

On the contrary, Mr. Morris is content to forego some of this, states himself indisposed to press remonstrance against the diminution of his run by the west boundary lines given to Nap Nap, Block A, and even by Moulamein, Block A, as it stands at present described, and now claims for Tala only the land included between the river frontage of the run, the western boundaries of Nap Nap A, and of Moulamein A as at present described, and having as a southern boundary a line east from the southern extremity of the west boundary of Tala until it meets the west boundary as originally set out of Moulamein A; in this claiming only land which has always been held and occupied as part of Tala, which is necessary to it, and for which Mr. Morris never has, and does not now seek to avoid paying the full rent paid by the Order in Council.

23 April, 1858.

No. 37.

to MR. MAYNE.

Kyeta, 8 May, 1858.

MY DEAR MAYNE,

Your last letter relative to the state of my back boundaries has certainly filled me with astonishment, if not alarm. I can scarcely conceive how old Christie signed such a document as the one a copy of which you have sent me. I am indeed very thankful to you for the trouble and pains you have taken to elucidate this matter. I am glad to say, that now I feel, notwithstanding Christie's stupidity, that I have a strong, if not a perfect claim to the maintenance of the original boundaries of the Tala run. You must remember that originally I took up this country—which, as described in the original application for the run, dated 4 April, 1845, commenced on the river, at a place called Cundoora, some miles above the old Nap Nap head station—to oblige Hobler; however, I promised to use my influence with Mr. Wentworth to be content with Wargoora Creek as the commencing point, taking the line three miles from the east of our hut and running south, as it is shewn on the map with the red lines. This, although not regularly settled, was tacitly allowed; Mr. Wentworth always maintained his claim to commence at Cundoora. The east boundary of Tala was always known by certain clumps of timber (well known here); and the prolongation of the line from three miles above Wargoora pretty well keeps through those clumps, although rather more west than the old boundary. *The south boundary I marked on trees before*

before we had a neighbour; however, a line east from the south end of the ten miles west line meets the eastern boundary, upward of a mile within my original line, but I don't object to that loss. These boundaries can be proven, not only by myself, but also by Mr. Goodfellow, Mr. Walker, Wm. Clarke—our first stockman, now a cabman in Sydney, who can describe to you the eastern boundary by clumps of trees, known as Tea-tree Hill, Woody Island; besides by many others in this neighbourhood. So far I think our legal and equitable right by first possession is secure.

When Mr. Wentworth (in his block,) put in the amended tender, he was influenced by the fact that the Tala people were occupying a greater extent of land than what we first claimed. I was not aware until you told me that Bingham had recommended the adoption of the extended boundaries. I now come to the document of which I have for the first time heard.

That Christie did a stupid thing is evident, but that he did not understand the document he signed, in the light that others do, I knew. Burne, the other day, received a letter from Christie, in answer to some queries he wrote him about our boundaries, and Christie elaborately describes the very lines I contend for. The fact is, Christie thought, as you suppose, that the lines were rectangular, and he meant that the eastern boundary was to be prolonged from where the west boundary of Nap Nap and Nap Nap, block A, ends, fifteen miles; and you will find, by measuring on the map with the red lines, that fifteen miles is the exact distance from the south-western corner of Nap Nap A to the point where the southern boundary would meet a south line from it; but more than this, the area of 268,000 is enormously deficient if the quadrangular line was to be maintained, but, by the lines being rectangular it is nearly correct; this, you see, is a most important point. Further, the line connecting the east and west boundary is called the south boundary, which it is not; if the literal reading of the eastern boundary were to hold, it is south-eastern. I will write to Christie, and obtain his distinct confirmation of my views. I cannot imagine for a moment that the Government can have any desire to take away any part of the Tala Run because a slip has been made by people not surveyors in describing the run, especially as the area is deficient in the erroneous description. I trust that you will be able to have the matter satisfactorily settled without meeting much opposition, particularly as no neighbour is interfered with. As I have said, I don't mind much the moving (three miles west) the Nap Nap back blocks, except perhaps, as they give Gubbitt a part of my block C, but the east boundary of Tala must otherwise stand according to the red lines in the old map.

I may mention that I am certain that Christie had no authority to alter the boundaries of the run, either from Mr. Wentworth or Mr. Black. I know Wentworth would never have consented to the curtailment. In law, my right of possession is, I am certain, secure. Of course, if the Government grants an actual lease to some one else, that would alter the case. I forgot to say that I have spoken to Mr. Mackinnon about the attempt to push the Moulamein blocks three miles west; he says he will not consent thus to lose three miles of the very best of his block, Moulamein B, for three miles of very inferior country, and besides that he wants none of my run. Mr. Lockhart is at the bottom of all this, I suspect; he never saw this country, and cannot conceive the mischief he is doing to the Tala Run.

By the way, the quadrangular line of Christie and Bingham passes within less than 100 yards of Lake Yangar, and thus cuts off all the cattle run from the hut and stockyard, which were formerly on the south-eastern side.

Since I wrote the above I have gone more carefully into the areas; I find that if the quadrangular line was maintained, that Tala would only consist of 200,000 acres, or 68,000 short of the estimate; if the old lines were maintained, there would be 330,000 acres, or 62,000 more than Bingham's last estimate; if however, the Nap Nap block A is increased three miles west, that will take 20,000 acres off; and if I were to give up that portion of the south-east corner of my description of the run, which has been included in a block granted to J. W. Carne originally, and now held by Mackinnon & Lydiard, my area would be brought down to about 270,000 acres. Indeed, taking the lakes out, it would be much less. I consider I am entitled to my original boundaries in their integrity, and do not desire to recede from them if possible, but I leave that wholly to you.

I should be indeed sorry to yield to Gobbett an inch, either of the original run or of the block C. I have no fear of the result in your hands, as I believe my claim to be equitable.

I have again gone over the areas, and I find my quantities are correct; but that if the east line is run from only just above Walgoorah hut south until it meets a line east from the south end of the ten miles western boundary, that then Tala contains exactly 268,000 acres, which shews clearly that both Bingham and Christie understood that the lines were rectangular. Indeed, this must be considered as demonstrative,—I shall be very seriously inconvenienced by the loss of the three miles back run. Christie fell into this mistake by yielding to Nap Nap a portion above Wagoura hut, which he never would have done if Nap Nap had not come into the hands of the owners of Tala, and thus, unwillingly, he jeopardized the Tala back run. I cannot see the use or advantage to the Government by the removal of the Moulamein blocks further west. Of course, when these blocks were first put up for tender, the Tala people would at all hazards have renewed them, if their new or proposed position had been understood. I cannot indeed afford to lose this back run; all our cattle camps

* * * * *

No. 38.

Mr. J. CHRISTIE to Mr. MORRIS.

Narramine, 24 May, 1858.

MY DEAR MORRIS,

I am this day in receipt of the 8th instant, when an amended description of the Runs was applied for. It included both Tala and Nap Nap, a description of which I gave to your brother James, signed by the late Mr. Bingham; if I recollect it was as follows: The upper boundary was to commence at a tree now marked, about half a mile above Rolfe's old stock-yard, and run out on the plains fifteen miles; the direction I have forgot. The lower boundary, between Mr. Phelps and you, was to commence at a marked tree (which tree you know), and run south ten miles, hence by a line RUNNING EAST, connecting the upper and lower line. I engaged a licensed surveyor to run the lines, but the river rising prevented him at the time to get along by the river, so that he did not finish the survey; but he ran the back and side lines, and I gave him my authority to occupy the country, signed by Mr. Bingham, as his guide. The back line skirted the far side of Condolpe, passed over Smith and Sylvester's Sand Hills, within a mile of the sheep station hut. I was on the hill at the time, and so near did they seem to be coming that one time I thought they should take in the hut. It passed beyond Wood Island—I should say five miles, so that I think where Mr. Linton had sheep latterly must have been within the boundary of the Tala and Nap Nap Run. I don't think this line would intersect the upper line, but the description given was that the line was to run due EAST. Before Mr. Bingham reported on the amended application of Tala and Nap Nap Runs, a description of which was sent to the proprietors of the neighbouring runs, I saw Mr. Scott's, and read it, and I am sure one was either sent to Mr. Church or Gabbott, whichever was at that time proprietor, for I remember Mr. Bingham telling me that there was no objections to it by the neighbours, so that all the run was got that was applied for. In reference to the description of the Tala Run signed by me, Mr. Bingham came to Kyrelowe about eighteen months after the run had been granted, as above described, and he wished to have the runs assessed separately. He drew the description of the Tala Run, as signed by me, for I thought it was only to show the runs had been assessed properly; any new description at that time must be useless, for it had been granted and occupied for at least eighteen months previous to this, and I know well Mr. Bingham had no intention at the time to alter the former boundary, but solely to assess the run. I had no authority either from Mr. Wentworth, Mr. Reeves, nor Mr. Black, to sign the description of Tala Run, as described by Mr. Bingham. Hoping you will find the whole I have stated correct,—

Believe me, &c.,

JOHN CHRISTIE.

No. 39.

Mr. W. C. MAYNE to CHIEF COMMISSIONER OF CROWN LANDS.

MY DEAR BARNEY,

I enclose a letter which I have this morning received from Morris, respecting the Tala case. You will oblige me by reading it carefully when going into that case. You will find that it exactly and fully bears out and greatly strengthens the position, as I have put it before you in my memorandum with the papers.

Morris' argument, as to the area given by Bingham and Christie (268,000 acres), appears to me clear and irresistible as to the real intention to give to Tala all that I have claimed for it in my memo., and which, though less than his original claim, Morris, you will see by his letter, will be satisfied with. I have underlined, and marked in margin with red ink, the important passages in Morris' letter; but, in fact, it is all of importance as elucidating and confirming every word I have placed before you in my memo. You will really oblige both Morris and myself by expediting this matter.

Return me his letter when you have gone into the case.

Truly yours,

W. C. MAYNE.

No. 40.

CHIEF COMMISSIONER OF CROWN LANDS to UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

Crown Lands Office,
Sydney, 10 March, 1859.

SIR,

I have the honor to submit, for the consideration of the Honorable the Secretary for Lands and Public Works, several documents relating to the occupation of Tala Run in the District of Murrumbidgee.

2. The question at issue is the extent of run to be authorized.

3. On reference to the documents herewith, it will be observed that in the original application for a lease, dated 31st March, 1848, by Mr. Wentworth, under the Order in Council of 9th March, 1847, Tala was stated to embrace an area of 200,000 acres, capable of depasturing 1,500 head of cattle and 30,000 sheep.

4.

4. The application was referred to the Commissioner of the District, Mr. Bingham, who, under date 30th September, 1848, estimated the area at 268,000 acres, grazing capabilities, 28,000 sheep or 7,000 cattle, and afforded a definite description.

5. A letter from the Commissioner, dated 14th August, 1849, in reference to the same application, states that "nothing is included in this application that has not been hitherto held under license."

6. The demand is for one lease for three distinct runs, adjoining each other, and forming one block of land, previously held under license. A caveat was entered by Mr. Black, dated 22nd June, 1849, but withdrawn 29th January, 1850.

7. By letter, dated 10th April, 1850, the representative of Tala (Mr. Black) supplied an amended description, stating, "I find that the original description does not comprise much more than that portion of the land which is yearly flooded by the Murrumbidgee, and has omitted the greater portion of the run, which the flocks now depasturing on it necessarily occupy during the winter months, and without which the remainder of the run for about half the year, that is during the periodical floods, is not available. The supplementary country which the amended description embraces has always been occupied and the license paid for it, and without it the grazing capabilities of the runs would not be equal to more than half the estimate of them which has been given in, as I have no doubt the Commissioner will be able to testify." The area of the run under this description is estimated at 500,000 acres, grazing capabilities 1,500 head of cattle and 30,000 sheep; and the Commissioner reported on the 21st November, 1850, that he did not consider the applicant had made any demand to which he was not entitled.

8. At this stage of the proceeding Mr. Commissioner Lockhart was supplied, agreeably to his request, with a copy of the report of the previous Commissioner of the District (Mr. Bingham), which was favourable to the applicant as already alluded to; and I beg to refer to Mr. Lockhart's letter, dated 24th May, 1854, which is as unfavourable as the report of Mr. Bingham was favourable, and to draw attention to the following extract from Mr. Lockhart's letter:—"It appears that the late Commissioner, Mr. Bingham, in reporting favourably on the claim set up by Mr. Black (500,000 acres) must have laboured under some misapprehension, as two days after the date of his approval of this claim, he in conjunction with Mr. Black's agent, made an estimate of the grazing capabilities of the run of Tala, and signed a description of the boundaries which reduces the area of the run to less than one-half of that claimed in the amended description, which Mr. Lockhart estimates at 695 square miles."

9. Mr. Lockhart now submits an amended description reducing the area to 360 square miles, and he has, on the accompanying tracing, marked in *red ink* the boundaries he considers it advisable to adopt.

10. Here I may observe, that Mr. Bingham could not have been aware of the extent of country he had recommended for the Tala Run, which embraced both Nap Nap A and B, and Moulamein A and B, and which were subsequently recommended by him for acceptance under distinct tenders. It is clear, however, that the present occupier of Tala Run does not contemplate the occupation of either the Nap Nap or Moulamein country, but considers himself entitled to all the land embraced within the 40 miles of river frontage and the western boundary of Nap Nap A and Moulamein A, the southern boundary commencing at 14 miles above the junction of the Murrumbidgee and Murray, running east until it meets the western boundary of Moulamein A. This area is claimed under the plea that during the winter months a large portion of the land is flooded, necessitating the removal of stock to the back land, which is stated to have been occupied twelve years without dispute.

11. I may now observe that, by an instruction dated 12th July, 1850, it was decided that the runs having frontage to the Murrumbidgee should be confined to depths of 10 miles, and that the land between that river and the Edward and Billabong should be divided and put up to competition. (See Nap Nap A and B, and Moulamein A and B, and others.) The survey of these squattages was made by Mr. Surveyor Townsend, (who generally was extremely correct in his work), and as back country was not marked out for Tala, it may be presumed that the lessee was considered to occupy the country from the river on the west to the eastern boundary of Nap Nap, Nap Nap A, and Moulamein A, and that it may have been so considered may be assumed from the occupier of the runs above alluded to never having interfered with or objected to the occupation of Tala.

12. I may observe that Nap Nap and Nap Nap A and B, as well as Tala, are now in the occupation of one person, Mr. Morris; and I may further observe that tenders have been received for portions of the country claimed by Mr. Morris, which tenders are now awaiting the settlement of the claim now submitted.

13. Mr. Commissioner Bingham evidently was not positive as to the extent of Tala's boundary, having *first* reported it to embrace 200,000 acres, affording pasturage for 1,500 head of cattle and 30,000 sheep; *secondly*, having increased the area to 268,800 acres, capable of depasturing 28,000 sheep or 7,000 cattle; and *thirdly*, in his reporting favourably on the amended description by Mr. Black (the then occupier of the run); and to this description and report I beg particularly to refer, as appearing to me to be decisive of the question.

The estimated area in this amended description is 500,000 acres, capable of grazing 1,500 head of cattle and 30,000 sheep, (the capability being precisely the same as that embraced in Mr. Wentworth's tender under an area of 200,000 acres only); and from this circumstance it appears evident that the area stated was a mere guess, but in Mr. Black's amended description, clearly made upon a better knowledge of the country.

14. The important point in this description is on the *south*, by a line commencing at the south end of the western boundary, as described above, *running east until it intersects a prolongation or eastern boundary between Nap Nap and Toogoombie, which prolongation together with the western boundary Nap Nap forms the eastern boundary of Tala, and this is the matter of dispute.*

15. A reference to the accompanying sketch will show that the land alluded to embraced the entire area, as marked by red lines, including Nap Nap A and B, and Moulamein A and B, already under licenses, in obedience to the instructions before quoted, dated 12th July, 1850. Now, it is understood that the holder of Tala is desirous that the run should embrace the land within the blue line on sketch, with the exception of a portion on the south boundary, some time in possession of Mr. Carne, which, as near as can be measured, embraces 294,400 acres, from which should be deducted 16,000 acres for a reserve, leaving 278,400 acres, being for three runs, originally held under three licenses.

Allowance should likewise be made for the land stated to be flooded during the winter, rendering necessary a back run sufficient to sustain 1,500 head of cattle and 30,000 sheep; and it should be borne in mind that there is no water on the back lands.

16. Having now afforded a statement as to the tenders for Tala, and the reports of the late Commissioner, Mr. Bingham, in their favour, I must advert to the report of the present Commissioner, Mr. Lockhart, and again I beg to refer to the sketch before alluded to. This sketch shews, by a *dotted* line, the original east boundary line of Tala, that is confining it to ten miles in depth; but the Commissioner does not consider this boundary a correct one, and proposes a *curved line*, embracing an area of 360 square miles, being an increase on the area originally claimed, and throwing the usual and fair amount of back country into the run. Now, I would observe that the dotted line, supposed to show the original boundary, must have been made in error; in fact, Mr. Lockhart admits that the greater portion of it is flooded during the winter, requiring the removal of the stock to the back country.

17. I trust that I have now afforded as *clear* a statement of the question as the reports by the late, as well as present Commissioner, in addition to the claim of the holder of Tala, as shewn by the correspondence, admit of. The question for decision is one of extreme importance, not only to the holder of this run, but as forming a precedent in future similar cases, which possibly may be numerous.

18. Before concluding this report, I may be permitted to state that Mr. Lockhart's amended description, which accompanied his report on Mr. Black's amended description, recommends for adoption an area of 360 square miles, or 230,400 acres, and submits a rough sketch shewing the land; the sketch, however, does not embrace the area recommended; a rough measurement of the area considered by the holder of Tala to be necessary to depasture their stock—1,500 cattle and 30,000 sheep—and which embraces all the vacant land within the boundaries shaded blue on sketch, deducting the reserve, gives 272,400 acres.

19. In conclusion, I confess *myself unwilling to offer any recommendation* as to the course to be pursued; but as I may probably be expected to do so, I submit that Tala should embrace all the vacant land, as stated in the foregoing paragraph; and I am strengthened in this opinion by the knowledge that other original runs in the same District contain, comparatively, with respect to number of stock, as large an area as that herein proposed.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

No. 41.

CHIEF COMMISSIONER OF CROWN LANDS to UNDER SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Crown Lands Office,
Sydney, 5 August, 1859.*

SIR,

I do myself the honor to invite your attention to my communication of the 10th March last, No. 110, and to request that I may be favoured with the decision of the Honorable the Secretary for Lands and Public Works, as early as may suit his convenience, as several other questions are depending thereupon.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

This case has now been referred back to the Surveyor General.—Acting Surveyor General, B. C., 24 Aug.

No. 42.

(No. 15, of March, 1859.)

TENDER for a Lease of a New Run of Crown Lands—Intermediate or Unsettled Districts.

In accordance with the provisions contained in Her Majesty's Order in Council published in the New South Wales *Government Gazette*, of the 7th October, 1847, and of the Regulations of the Local Government published in pursuance thereof, I, Robert Lynch, of Tumut, do hereby propose to take a lease for seven years, of the Crown Lands known as East Yangar, in the District of Murrumbidgee; which lands are particularly described in the Schedule annexed to this Tender.

2. And in consideration of such lease, I am willing, and hereby offer to pay in advance, the minimum rent, below which it is provided by the said Order in Council that no run shall be let, namely, ten pounds per annum, with two pounds ten shillings per annum added thereto for every thousand sheep or their equivalent in cattle beyond four thousand sheep or their equivalent, which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also, in consideration of such lease, and by way of premium for the same, I do offer to pay yearly in advance, the further sum of two pounds ten shillings in addition to the amount of the said minimum rent.

3. And I do agree that in the event of this Tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the New South Wales *Government Gazette*, I will within sixty days after such notification pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of twelve pounds ten shillings being the amount according to my computation of the grazing capabilities of the run, of the payments which I have above offered to make, viz. :—

Minimum yearly rent below which no run can be let	£10	0	0
Further payment at the rate of £2 10s. per thousand for the number of stock above four thousand sheep or their equivalent which the run applied for is esti- mated to be capable of carrying	}		
Additional yearly payment offered by way of premium			
Total	£12	10	0

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And in consideration of this Tender being accepted, and in the event of such payment not being made within the before mentioned period of sixty days, I further agree to forfeit to Her Majesty the sum of twenty pounds by way of liquidated damages, and to forfeit any right acquired by virtue of this Tender, and such acceptance thereof as aforesaid.

Given under my hand, this 27th day of February, A.D. 1859.

ROBERT LYNCH.

To the Chief Commissioner
of Crown Lands, Sydney.

Schedule referred to in the foregoing Tender.

Commissioner's District and General Locality.	Name of Run.	Estimated number of Acres.	Estimated Capability.		Description of the Lands by reference to leading Geographical Features, and marked or determined Boundary Lines.
			Cattle.	Sheep.	
East of Lake Yangar, District of Murrumbidgee.....	East Yangar.	20,000.	4,000	Bounded on the east by a line south, being western bound- ary of the run tendered for under name of "East Tala;" bounded on the north, north- west and west by the eastern boundary of Tala station; bounded on the south by the northern boundary of the accepted tender of Sylvester Smith.

ROBERT LYNCH.

No. 43.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF CROWN LANDS.

Murrumbidgee District,
Crown Lands Office,
11 August, 1859.

SIR,

I do myself the honor to report, that the tender No. 15, of March 1859, being by Mr. Robert Lynch, for a block of country named by him "East Yangar," should be accepted, it being for land not held under lease or promise of lease by any one.

The same remarks as to the locality of East Yangar obtain, as in the case of East Tala. The run now recommended with four others, held under license, and with three others recommended, form a block of land, to which the occupant of Tala attempted to obtain a title by including it in a so called amended application.

I have, &c.,

CHARLES G. L. LOCKHART,
Commissioner of Crown Lands.

No. 44.

(No. 16, of March, 1859.)

TENDER for a Lease of a New Run of Crown Lands—Intermediate or Unsettled Districts.

In accordance with the provisions contained in Her Majesty's Order in Council, published in the New South Wales *Government Gazette* of the 7th October, 1847, and of the Regulations of the Local Government published in pursuance thereof, I, Robert Lynch, of Tumut, do hereby propose to take a lease for seven years of the Crown Lands known as East Tala, in the District of Murrumbidgee, which lands are particularly described in the Schedule annexed to this Tender.

2. And in consideration of such lease I am willing and hereby offer to pay, in advance, the minimum rent below which it is provided by the said Order in Council that no Run shall be let, namely—ten pounds per annum with two pounds ten shillings per annum added thereto for every thousand sheep or their equivalent in cattle beyond four thousand sheep or their equivalent, which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying, and also in consideration of such lease, and by way of premium for the same, I do offer to pay yearly, in advance, the further sum of five pounds (£5) in addition to the amount of the said minimum rent.

3. And I do agree that in the event of this Tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the New South Wales *Government Gazette*, I will, within sixty days after such notification, pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of fifteen pounds, being the amount according to my computation of the grazing capabilities of the run, of the payments which I have above offered to make, viz. :—

Minimum yearly rent below which no run can be let	£10	0	0
Further payment at the rate of £2 10s. per thousand for the number of stock above four thousand sheep or their equivalent which the run applied for is estimated to be capable of carrying			
Additional yearly payment offered by way of premium	5	0	0
Total.....	£15	0	0

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And in consideration of this Tender being accepted, and in the event of such payment not being made within the before-mentioned period of sixty days, I further agree to forfeit to Her Majesty the sum of twenty pounds by way of liquidated damages, and to forfeit any right acquired by virtue of this Tender, and such acceptance thereof as aforesaid.

Given under my hand, this 27th day of February, A.D., 1859.

ROBERT LYNCH.

To the Chief Commissioner
of Crown Lands, Sydney.

TALA AND MOOLPA RUNS.

29

Schedule referred to in the foregoing Tender.

Commissioner's District and General Locality.	Name of Run.	Estimated number of Acres.	Estimated Capability.		Description of the Lands by reference to leading Geographical Features, and marked or determined Boundary Lines.
			Cattle.	Sheep.	
Open plains between Moulamein and Tala, Murrumbidgee	East Tala..	32,000	4,000	Bounded on the east by the western boundary of Moulamein, block A; bounded on the west by a line south of Tala Station; bounded on the north by a line west to back boundary of Station; bounded on the south by the northern boundary of Moolpa Back Run.

ROBERT LYNCH.

No. 45.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF CROWN LANDS.

Murrumbidgee District,
Crown Lands Office,
11 August, 1859.

SIR,

I do myself the honor to report that the tender of Mr. Robert Lynch, being No. 16 of March, 1859, for a block of land named "East Tala," should be accepted, it being for land not held under lease or promise of lease by any one.

The land now tendered for, is a portion of that land which I have done myself the honor more than once to point out, had been attempted in an unprecedented manner to be included within the claim to lease of Tala, by putting in an amended description, which increased the side lines from 8 miles to 30 miles in length, and the original claim from 200,000 acres to about 512,000 acres.

The runs named in the margin, having been formed out of this extra claim, have been licensed or recommended for license.

Moulamein, A., 67,000 ac.
Moulamein, B., 54,000 ac.
Windouran, A., 44,000 ac.
In part do. B., 12,000 ac.
Mostyn's Hut Run, 30,000 acres.
Hervey's Hut Run, 30,000 acres.
East Tala, 320,000 acres.
East Yangar, 20,000 acs.
Eight Runs, 289,000 acs.

I have, &c.,

CHARLES G. L. LOCKHART,
Commissioner of Crown Lands.

No. 46.

MR. ROBERT LYNCH to CHIEF COMMISSIONER OF CROWN LANDS.

Tumut, 25 April, 1860.

SIR,

I have the honor to draw your attention to two tenders of mine of March, 1859, being for East Tala, and East Yangar, relative to which I have, up to this time, received no communication from you.

I beg further to inform you that I have written to Mr. Commissioner Lockhart on this subject, and the reply of that gentleman states "that it lays in your office, he having reported favourably on the same in August last past." May I therefore venture to solicit your reply as to what impedes the acceptance of those tenders, and my occupation of the land?

I have, &c.,

R. LYNCH.

This awaits the final adjustment of the Tala claim. Applicant may be so informed. 5 May.
Inform Mr. Lynch.

No. 47.

CHIEF COMMISSIONER OF CROWN LANDS to MR. ROBERT LYNCH.

Crown Lands Office,
Sydney, 4 October, 1860.

SIR,

In reply to your letter of the 25th ultimo, I have to inform you that you will receive a reply to your tenders therein alluded to, when the Government shall have arrived at a decision upon them, and that, as a servant of the Government yourself, you are not justified either in assuming that any unnecessary delay is likely to take place, or in urging a decision upon a matter in which your personal interests are opposed to those of other claimants.

My

My attention being thus directed to the circumstance that you, an Assistant Gold Commissioner and Commissioner of Crown Lands, are an applicant by tender for land in the same pastoral district as that within which your own duties are discharged, and in charge of an officer with whom you have been in close official relationship, I cannot but express my disapproval of a state of things so likely to suggest inferences unfavourable to the Department and prejudicial to the public service.

I have, &c.,
A. O. MORIARTY,
C. C. C. L.

No. 48.

MR. ROBERT LYNCH to CHIEF COMMISSIONER OF CROWN LANDS.

Tunut, 25 September, 1860.

SIR,

East Yangar.
East Tala.

I have the honor to again draw your attention to the subject of my letter, of the 25th April last past, in reference to two tenders of mine, made in *March, 1859*, to your reply thereto of the 15th May, and to the fact that such tenders have now been *eighteen months under consideration*.

I have, &c.,
R. LYNCH.

No. 49.

ACTING CHIEF COMMISSIONER OF CROWN LANDS to MR. ROBERT LYNCH.

*Crown Lands Office,
Sydney, 15 May, 1860.*

SIR,

I have the honor to inform you that your tenders for the runs mentioned in your letter of the 25th ultimo are still undisposed of, and are withheld pending the final adjustment of Tala Run boundaries, now under the consideration of the Government.

I have, &c.,
A. G. McLEAN,
Acting Chief Commissioner of Crown Lands.

No. 50.

MR. G. A. MEIN to SECRETARY FOR LANDS.

*Moolpa, Deniliquin,
8 August, 1859.*

SIR,

I do myself the honor of addressing you on the subject of the boundaries of the Tala Run, in the Lower Murrumbidgee District.

I was informed very lately, by Mr. Morris (the owner of the Tala Run), that these boundaries were under investigation by you, and you had decided that the original Tala line was to be adhered to, with the exception, perhaps, of part of a portion of country known as Moolpa Back Run. I can scarcely believe, however, you would arrive at any such conclusion on an *ex parte* statement. I take the liberty, therefore, of informing you that the original boundary line claimed for Tala embraced, not only a portion of Moolpa Back Run, but also very nearly the whole of Moolpa Winter Run, and considerable portions of Moulamein, blocks A and B, on all of which assessment has been paid by the licensees of Moolpa for many years. I hold letters from the Chief Commissioner of Crown Lands (Colonel Barney) and the District Commissioner (Mr. Lockhart), stating that Mr. Morris has no claim on the blocks above mentioned, nor even on the country contiguous to them; but I may state that, in consequence of your supposed having decided the matter, he is making a claim to portions of all the above blocks; and I would therefore beg most respectfully, if these boundaries have been, or are now under investigation by you, that you will not give a decision without hearing both sides of the case.

If you have already come to a decision, you will do me the honor to inform me whether the Tala boundary line, as laid down by you, interferes with the lines of the Moulamein blocks A and B, Moolpa Winter Run, and Moolpa Back Run.

I may also inform you that I am acting as agent on the station for Charles F. Mackinnon, the licensee of Moolpa, Moolpa Winter Run, Moolpa Back Run, and Moulamein, blocks A and B.

I have, &c.,
G. A. MEIN, M.D.

The Acting Surveyor General is requested to report. M. F. B. C., 22 August.
Informed, 23 August, 1859.

Mr. Morris does not in the papers lay claim to any of the runs herein mentioned as part of Tala; although it appears from Mr. Lockhart's letter of the 22nd Aug. last that he has threatened to impound sheep feeding over Moulamein, block A. A. G. McLEAN, A.C.C.C.L.

B. C., 3 October, 1859.

No. 51.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER OF CROWN LANDS,
MURRUMBIDGER.

*Crown Lands Office,
Sydney, 10 August, 1859.*

Sir,

In acknowledging the receipt of your duplicate report of the 18th December, 1858, No. 341, upon the tender of Messrs. Sylvester and Smith, noted in the margin, of which you advise the acceptance, under the assumption that the adjustment of the boundaries of Tala Run suggested by you will be acted upon,—I have the honor to inform you that the boundaries recommended by you of that run have not been adopted, the question being still under reference to the Minister for Lands and Public Works, whose decision will be communicated to you immediately on its receipt.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 52.

ACTING CHIEF COMMISSIONER OF CROWN LANDS to UNDER SECRETARY FOR LANDS.

*Crown Lands Office,
Sydney, 16 January, 1860.*

Tala Run, respecting boundaries of.

Forwarded in reference to my B.C. communication of the 5th October, respecting the boundaries of the Tala Run.

A. G. McLEAN,
Acting Chief Commissioner of Crown Lands.

*Murrumbidgee District,
Crown Lands Office,
14 August, 1859.*

Sir,

I do myself the honor to acknowledge the receipt of your letter of the 10th instant, in which you inform me that in recommending tender 184, of March, 1854, for acceptance, I assume that Tala boundaries would be marked as recommended by me, whereas the matter was still under the consideration of the Honorable the Secretary for Land and Public Works.

As the matter appears to be still under consideration, I do myself the honor to recapitulate the leading features of the case, and to forward a copy of the assessment of the capabilities of Tala Run, extracted from the records of this office, and which I think shews that my recommendation meets the just merits of the case, as also that from the first, the occupants of Tala have received a consideration, in entertaining the question of their boundaries, which has not been accorded to others in this district who have been similarly situated.

In the original application by Mr. Wentworth, the side lines of Tala were claimed only as extending 8 miles back, thus including, according to the calculation of 40 miles frontage, about 320 square miles. The claim of frontage was found to interfere with the run of Nap Nap, and Mr. Wentworth, or his agents, finally gave way to the claim of Nap Nap. In doing this, however, the starting point of the eastern boundary was fixed in a bend of the river Murrumbidgee, out of which an 8 mile line would not have cleared Mr. Wentworth, in the manner originally anticipated. I therefore never wished that this line should be held to the original application.

Mr. Wentworth had a confidential manager at Tala, a Mr. John Christie. The run was transferred to the Bank of New South Wales, in the name of its manager, Mr. John Black, on the 24th November, 1850. Mr. Commissioner Bingham, at Tala, called upon Mr. Christie to proceed to the assessment of the grazing capabilities of Tala Run. Mr. Christie, who had formed the station I think, but at all events, who was quite conversant with its boundaries, acted as valuator for Mr. John Black. Mr. Commissioner Bingham, in coming at these grazing capabilities, always caused to be inserted a description of the runs so assessed. The value of this precaution recently adopted throughout the department is in this case made evident, inasmuch as we have a pretty clear definition of what Mr. Christie considered to be Tala Run, and on which definition the rent was fixed, and has continued to be paid ever since. The description thus drawn out I do myself the honor to append. Certainly, in some particular, there is an increase in the original claim, but not in any great degree to be cavilled at. At all events rent has been paid upon it for 9 years, and in all essentials it should be adhered to in a final description for lease.

It will be observed, therefore, that in my recommendation of the boundaries of Tala for lease, I have only departed from this description in one particular, that is, I recommend the original claim of 8 miles to be adhered to on the western boundary. This gives the claim exactly over half way to the river Edward. This principle has been constantly acted upon in dividing country between two water-courses, in this district at least; to make up for this, however, I propose the line to run thence east, and not straight to the extremity of the eastern boundary. Thus I bring Mr. Wentworth's claim out as nearly as possible parallel with the general course of the river, and prevent Tala being lessened by the great re-entering curve of the river.

This assessment and description of boundaries by Mr. Bingham was made on the 23rd day of November. The date has originally been written 23rd, but altered to the 24th subsequently, and again re-entered 23rd, as I have shewn in the copy. On this date, or about this date, Mr. Bingham, evidently considering it to be the same amendment as he had concluded with Mr. Christie, is stated to have recommended an amendment proposed by Mr. John Black, which increases the original run to double its area, runs the side lines back 30 miles, and which, if granted, would incorporate in the run a great area to which Mr. Wentworth originally laid no claim, and part of which had already been submitted to public competition as adjusted runs, and continues so to be held to this day.

When the Government consented to allow claimants of leases to amend their descriptions, it was certainly not contemplated that the favour would be so abused as it has been attempted to be in this instance. This principle has been again and again laid down. Had it not been enforced there would have been no end to confusion.

Notwithstanding

Notwithstanding that their stock has increased and occupied land beyond their applications, persons holding under promise of lease have been always held to their original applications, or a liberal interpretation thereof at all events. I may mention the case of Mr. Howell, at Yanco Creek, who was held to his applications of 2½ miles back, and the country behind leased by tender, though actually occupied by him; that of Moulamein, where Oak Forest has been lately leased by tender; the case of Mr. Forlonge's run, or Yanko Creek, where the application was for 5 miles, and the back country leased by tender, although occupied by Mr. Forlonge. The Honorable John Hay was obliged to tender lately for country at the back of Berengar, which he had purchased, which land was always meant to be included in Berengar. Mr. Broadribb, at Wanganella, has been obliged to obtain his back country, beyond the application, by tender.

I may also mention that many of the runs on the Murrumbidgee were actually shortened of their claims, although they had always occupied the land so claimed. In every case except one the leases were restricted to a depth of 10 miles back from the river bank; the one exception was 15 miles back.

I can see no reason why Tala should form any exception to these general rules, nor why its occupant, although they always have been and continue to be persons of influence and high standing, should be more favoured in their efforts to secure for themselves vacant Crown lands than have been others above referred to, who have been kept to the very letter of their original demands for leases; nor why lands should be thrown into Tala, for which, for the last nine years, on the face of the documents, no rents have been paid, but on the contrary, for which other persons have been paying rent.

It may indeed be said that the area estimated by Mr. Bingham, viz., 268,800 acres, is not within the boundaries proposed by me. How Mr. Bingham came to estimate the area is very clear; he imagined the river to run east and west; one side-line 10 miles, the other about 20, would give a mean depth of 15 miles, at 30 miles frontage would give 450 square miles, from which a reserve has to be taken, bringing the estimate down to 420 square miles. The points are fixed, but the river does not run as supposed.

I have, &c.,

CHARLES G. N. LOCKHART.

W. C. WENTWORTH (now JOHN BLACK). TALA. 268,800 acres.

Estimated area, 268,800 acres. 28,000 sheep, or 7,000 cattle.

Bounded on the north by the Murrumbidgee River for 30 miles; on the east by a line due south for 15 miles from a marked tree above the Wogara hut, being a prolongation of the boundary between this run and Nap Nap (Reeves); on the west by a line due south for 10 miles to a marked tree on the river 14 miles above its junction with the Murray, being the boundary between this run and Bonongle (Nicholson's); and on the south by a line connecting the eastern and western boundaries.

I agree to this estimate and arrangement of boundaries.

Kiata,
23 November, 1850.

JOHN CHRISTIE,
Agent for W. C. Wentworth, Esq. and John Black, Esq.
HENRY BINGHAM, J.P., C.C.L.

Witness—H. J. A. TAYLOR.

This run is subject to a Crown Reserve The general directions of the river being east and west.

MEMO.—Estimated from Mr. Bingham's travelling book. I certify the above to be a true copy. The erasures are marked by me in red ink. The original is faint. The erasures dark ink, evidently the same as that with which Mr. Christie signs. The pencil line is an original.

CHARLES G. N. LOCKHART,
C. C. L.

No. 53.

COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to CHIEF COMMISSIONER OF
CROWN LANDS.

Murrumbidgee District,
Crown Lands Office,
22 August, 1859.

SIR,

Since I did myself the honor to address you on the subject of Tala boundaries on the 14th instant, letter 59-201, I do myself the honor to state that I have received a letter from the occupant of Moulamein, block A, in which he informs me that Mr. Morris, the licensed occupant of Tala, has given him notice that he will impound the sheep feeding over what Mr. Morris acknowledges to be Moulamein A.

The writer (who has not been long in New South Wales) wishes me to explain to him the anomaly of the Government receiving rent on one hand, and yet allowing on the other no means by which the interests so arising may be protected.

This letter has caused me to go through the former correspondence on the subject of Tala, commencing in March, 1854. I find that I have made one leading mistake in my letter of the 14th instant; I have placed the matter in much too favourable a light for Mr. Morris of Tala.

The report furnished by Mr. Bingham on Mr. Black's amended description (the only shadow of a claim by Mr. Morris) was dated the 21st November, 1850. The assessment of run and description of boundaries was on the 23rd or 24th of the same month. From this I conceive that any idea of any claim arising from approval of Mr. Black's amended description must be given up. If there were any inherent value in the Commissioner's acquiescence in Mr. Black's preposterous claim, which, however, I totally deny such value, must be held to be removed by the immediately subsequent adjustment of boundaries between the Commissioner and Mr. Christie, acting as agent for Mr. Black. That Mr. Bingham also held this opinion is proven by his preparing for tender adjusted runs within the boundary of that amended description. I have for years also recommended the acceptance of tenders within these limits, and my recommendations have been acted upon.

Since

Since my letter of the 14th instant, I have constructed a map shewing all the runs in the locality indicated, and the various proposed lines for Tala. I find that Mr. Black's amended description extends to 720,000 acres, or nearly $\frac{2}{3}$ of a million. I do not object to any person occupying millions of acres. The objectionable feature in this case is, the manner in which the possession was sought to be obtained, unjust in the extreme towards all other squatters, and contrary to all regulations, which should not be one thing to one man and another thing to a second. Of these 720,000 acres, 350,000 are held by accepted tender by various parties, amongst others by Mr. Wentworth or his representatives. 150,000 more are recommended by me for acceptance. Tala retains its full frontage and area of 275 square miles.

Messrs. Mackinnon hold a letter from the Chief Commissioner, stating that the land west of and adjacent to their block, Moulamein A, is open to tender, and ignoring any amended claim of Tala.

In now closing the correspondence about Tala, I feel that I am in the most degree to blame. It must be my deficiency in composition which prevents me from stating fully and clearly the particulars of this case, otherwise the Government would long ago have defined Mr. Morris' limits as those for which he has been paying rent for nine years, and those only.

I have, &c.,

CHARLES G. N. LOCKHART.

The area of 720,000 is probably calculated from an erroneous conception of Mr. Black's boundary, which is somewhat vague at the north-eastern portions of the run. The area which I believe to be embraced is 433,000 acres only.

A. G. McLEAN.
Oct. 5

No. 54.

MR. G. A. MEIN to SECRETARY FOR LANDS.

*Moolpar Station,
Lower Edward River,
Deniliquin, 3 October, 1859.*

SIR,

I do myself the honor to call your attention to my letter of the 8th August, and to request you will do me the honor of a reply at your earliest convenience. In order to facilitate this, I may take the liberty of stating that Col. Barney, Chief Commissioner for Crown Lands, addressed a letter to Messrs. Mackinnon and Lydiard, bearing date the 29th January, 1858, in which he described the boundaries of the Tala Run.

I am most urgent to know the exact boundaries of Tala, in order to avoid very serious disputes with Mr. Morris, the licensee thereof, believing as I do that there is a very considerable quantity of country untaken up between Moolpar and Tala.

I have, &c.,

G. A. MEIN, M.D.

No. 55.

UNDER SECRETARY FOR LANDS to ACTING SURVEYOR GENERAL.

TALA RUN.

Retransmit this case to the Acting Surveyor General, with reference to the further memo. of the Premier enclosed. Request that he will regard the reference as urgent, as copies of the correspondence have been ordered by Parliament.

M. F.

B. C. 24 April.

This case is so important, that I cannot determine it without a fuller examination. I understand that Mr. Morris alleges—

- 1st. That the land, the grazing capabilities of which were assessed by Messrs. Bingham and Christie, under the name of "Tala," contained 268,000 as per assessment paper, and that this quantity was determined by measurement. While the area embraced by the description of boundaries of the land, as stated in the assessment papers, and admitted by the Survey Department to belong to Tala, is only some 160,000 acres land, he maintains, as he has done all along, that the description on the assessment papers is erroneous.
- 2nd. That the assessment of grazing capabilities of the run of Tala is 7,000 head of cattle, and that notwithstanding the grazing capabilities of that run, have been largely increased by considerable expenditure of money in making water dams. The maximum grazing capabilities of the run now, even including the 128,000 acres disputed, is only 8,000 head of cattle, and hence that the 128,000 acres was evidently intended to be included in the Tala Run. These and other matters that may occur to the A. S. General, should have the careful consideration of that officer, who will please furnish his report thereon, for my information.

It will be well also to say what improvements (if any) have been made by Mr. Morris, or his predecessors, in the run, and the cost thereof, of course only if they can be obtained.

JOHN R.

12 April.

Surveyor General's Office,
Sydney, 5 October, 1859.

Sir,

I have given to this case the long and careful consideration which the magnitude of the interests at stake seemed to demand; and I now beg to submit, in reference to your blank cover minutes of 22nd and 24th August last, a report for the information of the Honorable the Secretary for Lands, with illustrative sketch.*

* Appendix B.

2. As Mr. Lockhart's report and sketch contain a misapprehension of the extent of Mr. Wentworth's original demand, and as the letter dated 10th March last, of the late Chief Commissioner of Crown Lands, also contains some errors, I have thought it best to embrace in my report a history of the case from its commencement, by Mr. Wentworth's demand, dated 31st March, 1848, for a lease.

3. This demand embraced a frontage of 40 miles of the Murrumbidgee River, at either extremity of which side lines, bearing south, and 8 miles in length, formed the ends of the run, and a line joining their extremities, the back boundary. The area estimated by Mr. Wentworth was 200,000 acres; and the area really embraced by the boundaries, about 186,000 acres. The western side line commenced at a point 13 or 14 miles above the confluence of the Murrumbidgee and Murray Rivers, (and about which there is no question or dispute); and the eastern boundary at a lagoon known as Condoora Lagoon, about 4 or 5 miles above the confluence of the Lachlan with the Murrumbidgee.

4. Mr. Thomas Barker, the holder of the adjacent Run of Nap Nap, having entered a caveat against Mr. Wentworth's claim, an amicable adjustment of the difference was arrived at; Mr. Wentworth giving up about 10 to 12 miles frontage, and about 57,000 acres at the upper or eastern end of the run claimed by him, and adopting Wangorah Creek as a boundary, in lieu of the line from Condoora Lagoon. Mr. Barker withdrew his caveat in consequence of this arrangement, by letter dated 29th January, 1850.

5. At this stage of the report it should be mentioned that the Government, in the years 1850-1, and after a lengthy correspondence with the Commissioner of the District and persons interested in runs on the Lower Murrumbidgee and Edward Rivers, determined that these runs should be made of a uniform average depth of ten miles (with one exception), and that a series of Murrumbidgee back blocks and a series of Edward River back blocks should be thrown open to tender. The correspondence treats of this country to be thrown open as the Murrumbidgee Plains, and does not very clearly define its extent easterly and westerly, but the existence of the blocks as tendered for, and laid down on paper by Mr. Surveyor Townsend, shews that it did extend westerly to include the land at the back of Nap Nap, and that the back blocks Nap Nap and Moulamein are the western blocks of the two series.

6. Reverting to the Tala case, Mr. Wentworth, by Mr. Black, in whose name the run at that time stood, sent in an amended description of the Tala Run, embracing an area nominally of 500,000 but really of 443,000 acres, the run having, as above stated, been reduced, by the cession to Mr. Barker, to 129,000 acres. This amended description was dated 10th April, 1850, and on the 21st of November following Mr. Commissioner Bingham made the very extraordinary report, that the description "did not embrace any land to which the applicant was not entitled," notwithstanding that it did embrace nearly six of the runs subsequently thrown open to tender as the Murrumbidgee Plains.

7. Two days, however, subsequently to the date of this report, Mr. Bingham proceeded to assess the capabilities of Tala, in concert with Mr. Christie, acting and signing as agent for Mr. Black and Mr. Wentworth, and as is usual in such cases, drew up and signed a description of the run under assessment, which description is very clear and perfect, and by which a depth of about two miles, and an area of 30,000 acres, were added to the portion of Tala remaining after cession to Mr. Barker. The area was stated in this description to be 268,000 acres, but the boundaries embraced only about 160,000 acres.

8. Mr. Morris, representing Tala, now contends that Mr. Christie was not authorized to act for Mr. Wentworth in relation to the run boundaries; that in the description signed by Bingham and Christie, a line east from the south-west corner of the run must have been omitted by accident, and that this is proved by the great discrepancy between the area contained by the boundaries (160,000 acres) and that estimated, 218,000 acres.

9. Mr. Morris waives his claim to the Nap Nap and Moulamein blocks, which although forming a recognized portion of the Murrumbidgee Plains, were embraced by Mr. Black in the amended description, and also to a small portion of Moolpar back run, which falls within Mr. Black's description; and his claim now under consideration is for an addition of 123,000 acres to the 160,000 acres above mentioned by Messrs. Bingham and Christie.

10. The grounds on which Mr. Morris bases his claim appear to be,—

1. Commissioner Bingham's report on Mr. Black's description.
2. The alleged or supposed error in Bingham and Christie's description.
3. The deficiency of area within the boundaries described in Bingham and Christie's description.
4. The want of authority to Christie from Mr. Wentworth.
5. The actual occupation of the land claimed.

And in regard to these grounds of claim—

11. I would observe:—

1st. That Mr. Bingham's report on Mr. Black's claim must have been made under a misapprehension of the case, for the claim embraced a large extent of the Murrumbidgee Plains, respecting the leasing of which by tender a correspondence was then in progress. That while Commissioners are permitted to make adjustments of and otherwise modify boundaries of runs claimed, within reasonable limits, the proposed addition of 314,000 acres to an original run of 129,000 acres is an amendment of an extent never contemplated, which no Commissioner could have been justified in recommending, and which would doubtless have been at once questioned by the Chief Commissioner of Crown Lands, had it not been so immediately set aside by the description signed by Messrs. Bingham and Christie.

2nd. The description of Messrs. Bingham and Christie is very clear and perfect, and I can see no grounds for supposing that it contains any error, or that there is any omission in it as is suggested by Mr. Morris.

3rd. Were Mr. Christie not authorized by Mr. Wentworth to act on his behalf, the arrangement of the boundary being entirely beyond that originally claimed would be adopted on the recommendation of the Commissioner, and the authority under which Mr. Christie acted is immaterial.

4th. The actual occupation of the land is denied by Mr. Lockhart, is certainly not authorized by Government, and can therefore confer no claim.

12. This leaves the deficiency of the area stated as 268,000 acres as the only ground on which Mr. Morris can claim anything beyond Bingham and Christie's boundary; and although the nominal deficiency is great—when it is considered that these estimates are made without the guidance of survey, and are almost always very erroneous, it seems to me that this statement of area must simply be considered as an error having no material bearing on the question, where the boundaries are clear and definite.

13. The conclusion at which, therefore, I arrive, is, that Mr. Morris has no claim, as the owner of Tala Run, beyond the boundary described by Commissioner Bingham and Mr. Christie; and I think it

it is much to be regretted that the case should have been allowed to remain so long unsettled, and an apparent admission thus made by Government, that there were grounds for question as to the boundaries of Tala Run.

14. I have purposely abstained from burdening this report with any reference to tenders which have been made for the country which I propose should not be conceded to Tala Run, leaving these to be determined on their merits, after the final decision in this case; but I think it worthy of consideration, whether, as this land has not been known to be vacant, or even generally supposed to be so, it should not, if not conceded to the Tala Run, be advertised for tender in the form of adjusted runs.

The Under Secretary for Lands.

I have, &c.
A. G. M'LEAN,
A. C. C. L.

P.S.—I also enclose a letter of comparatively recent date from Mr. Commissioner Lockhart, in which he reiterates his opinions as regards the boundaries of the Tala Run, and from this letter it appears that Mr. Morris has recently laid some claim to Moulamein, block A. See No. 20.

I entirely concur with the Surveyor General, in his report upon this case.—M. F. 29 Oct.

No. 56.

MR. G. A. MEIN to SECRETARY FOR LANDS.

Moolpa Station, Edward River,
Deniliquin, 2 January, 1860.

SIR,

I have the honor to address you regarding two tenders for runs in the Murrumbidgee District, known as Mostyn's Hut and Harvey's Hut Runs, sent in by Messrs. Sylvester and Smith, in January, 1854. They were recommended for acceptance in December, 1858, by Mr. Commissioner Lockhart, but as yet they have not been gazetted. The reason given for this delay by the late Secretary for Lands being, that an investigation was going on concerning the boundaries of the Tala Run. Messrs. Sylvester and Smith, who originally took up Moolpa Station, erected these huts, and occupied the country round them with sheep. As the investigation into the boundaries of the Tala Run will now in all probability be conducted by you, I would most respectfully beg to call your attention to a letter addressed by Mr. Commissioner Lockhart to the Chief Crown Lands Commissioner, bearing date the 29th March, 1854; also two other letters from the same to the same, dated 24th May, 1854, and to these I would most particularly request earnest attention, which state the case so fully and clearly as to require no further comment from me. I would also beg your careful perusal of a letter addressed by the Chief Commissioner of Crown Lands (Col. Barney) to Messrs. Mackinnon and Lydiard (who purchased Messrs. Sylvester and Smith's interest in their right to a lease of Moolpa Back Run, Moolpa Winter Run, and Moulamein blocks A and B,) dated the 29th January, 1858, in which, after describing the boundaries of Tala Run as follows:—"A line south for 15 miles from a marked tree half a mile above the Wagora Hut on the Wagora Creek;" this is the western boundary of Nap Nap and of Nap Nap back block A, and divides the Nap Nap Run from Tala Run. At the end of 15 miles the south-east boundary of Tala is a line running parallel to the river, and meeting the west boundary of Tala, which is a line 8 or 10 miles south from a point on the river 14 miles above its junction with the Murray. He says: "Thus having a considerable vacant space between Moulamein block A and the Tala Run, now in part included in the tenders for Mostyn's Hut and Harvey's Hut Runs, about reporting upon which I have urged Mr. Lockhart." So the boundaries at that time appear to have been settled. I am well aware that considerable influence was used to get Messrs. Sylvester and Smith's tenders rejected, and not only these tenders, but also to set aside the license for country upon which assessment and license has been paid for years, as well as occupation. I refer to Moolpa Back Run and Moolpa Winter Run, which are in great part included in Black's amended boundary claim, as well as Moulamein blocks A and B. I look to you for a speedy settlement of this boundary question, for otherwise it cannot be long before Mr. Morris and I must try the case in a Court of law. He lately put forward a claim upon Moolpa Back Run and Moolpa Winter Run as being included in Black's amended claim. I will call your attention to the peculiar hardship and injustice it would be to me, who purchased from Mr. Mackinnon his interest in Moolpa, to be deprived of any of those lands, relying on the integrity of the Government of New South Wales, and that licenses issued would be considered sacred and binding for the terms of 14 years as specified.

I would also beg to be informed if the subject for investigation by you extends to any part of Moolpa Back Run, Moolpa Winter Run, or Moulamein block A. Mr. Morris, of Tala, informed me that the investigation was finished some months ago, and gave the name of a gentleman who occupies a high Government appointment, Capt. Mayne, and that he was to get all the so-called "vacant space" mentioned in Col. Barney's letter. If this is so, he has been shown a degree of partiality gross in the extreme, and dishonorable to the late Government, and most unjust to other settlers. I hope this, however, is not the case, and I look forward with hope and confidence that you will settle this matter according to the justice and merits of the case. All I want in this case is that the Government will not attempt to break the promise of a lease for the countries known as Moulamein blocks A and B, Moolpa Back Run, and Moolpa Winter Run, and a speedy settlement of the boundaries of Mostyn's Hut and Harvey's Hut Runs.

I have, &c.,
G. A. MEIN, J.P.

No. 57.

ACTING CHIEF COMMISSIONER OF CROWN LANDS to MR. G. A. MEIN.

*Crown Lands Office,
Sydney, 19 January, 1860.*

SIR,

In reference to my communication of the 25th November last, respecting the boundaries of the Tala Run, I do myself the honor to inform you that the matter is still under the consideration of the Government.

I have, &c.,

A. G. McLEAN,
Acting Chief Commissioner of Crown Lands.

No. 58.

ACTING SURVEYOR GENERAL to UNDER SECRETARY FOR LANDS.

THE enclosed letter from Dr. Mein is forwarded, for the consideration of the Secretary for Lands, with reference to my communication of the 3rd of October last, on the subject of the boundaries of the Tala Run.

The papers will, I believe, shew that the lessees of the Tala Run make no claim to any land for which tenders have already been accepted, or which are, in fact, licensed to others.

A. G. McLEAN.

B. C.—18 Feb., 1860.—60/73.

[Enclosure in No. 58.]

*Moolpa Station, Edward River,
29 January, 1860.*

Sir,

I do myself the honor to acknowledge the receipt of your communication of the 19th instant, and to request you will inform me if it is meant as an answer to a letter I sent to the Secretary for Lands in the beginning of this month. If you will take the trouble to look over the correspondence relating to the tenders for Mostyn's Hut and Harvey's Hut Runs, you will find the boundaries of the Tala Run have now been under the consideration of Government upwards of six years. It is now a point of most serious annoyance and trouble, the unsettled state of these boundaries—I most respectfully pray for a settlement of them at an early date. If I may judge from your letter of the 25th November last, it seems in contemplation of the Government to add some portion of the Moolpa back run or alter its boundaries to suit the enlarged Tala claim; I cannot see how this can be done in justice to others; Mr. Mackinnon, the licensee of Moolpa, is now in Melbourne, and is prepared to prove his possession with sheep of that country and uninterrupted in it. I would particularly request to be informed if Government has the right to alter the boundaries of any back block, and more particularly Moolpa Back Run, after having granted certain definite lines as its boundaries, and received license fees from it for upwards of six years.

The subject is of vital importance to myself, and cannot be allowed to rest much longer in the present unsatisfactory state.

Mr. Christie was examined relative to the Tala boundaries, why not examine Mr. Mackinnon and conduct the investigation fairly to both parties? I am not afraid of an investigation, if conducted publicly, and if any encroachment on Moolpa Back Run is contemplated, nothing short of a public investigation will satisfy me.

I have, &c.,
G. A. MEIN, M.D.

The Acting Surveyor General.

No. 59.

ACTING CHIEF COMMISSIONER OF CROWN LANDS to UNDER SECRETARY FOR LANDS.

*Crown Lands Office,
Sydney, 28 April, 1860.*

SIR,

With reference to your blank cover letter of the 24th instant, transmitting a memorandum of the Honorable the Secretary for Lands, requiring a further report in the case of the Tala Run, I have the honor to inform you, in reply thereto, that the assessment paper of Tala Run, signed by Messrs. Bingham and Christie, does state the area at 268,000 acres, while the description embraces 160,000 acres only. This discrepancy is noticed by my report of the 5th October, 1859, but it is therein assumed that the statement of area must be erroneous. The description, however, as I have already mentioned, is very clear and complete, and I do not perceive how any addition could be made to it to embrace, without alteration of the existing boundary, the land now claimed by Mr. Morris.

No doubt the fact alleged, and Mr. Christie states in his letter of the 24th May, 1858, to Mr. Morris, that he did employ a licensed surveyor, that the area is not merely the estimate of Messrs. Bingham and Christie, but the result of actual survey gives to it much more weight than my report concedes, and leads to the suggestion that Mr. Christie may have misunderstood the tenor of the description which he was signing, and may have believed the interests of his employers to be safe in the statement of the area.

The

TALA AND MOOLPA RUNS.

37

The Tala Run was assessed by Messrs. Bingham and Christie as capable of carrying 7,000 head of cattle, or 28,000 sheep; and if it can be shewn that the whole area occupied, including that in question, notwithstanding the improvement of its capabilities by expenditure in dams, &c., will now carry only 8,000 cattle, this would appear to be a strong ground of assumption that the description does not embrace the area the grazing capabilities of which were intended to be assessed.

The estimate for the sheep, on the other hand, is, however, only 28,000—a number which the run, as defined by the description, would, I presume, fully support; and therefore, although Mr. Morris might be invited to shew the nature and extent of the improvements which may be supposed to increase the capabilities of the run, and also the average number of cattle depastured on it during some three years past, as having some bearing on the case, this estimate for sheep would appear to me to render valueless any argument which may be based on the insufficiency of the whole area claimed to support more than 8,000 cattle.

The only matter not hitherto touched on, and which appears to me to be worthy of notice is, the original estimate of grazing capabilities in Mr. Wentworth's claim to lease, which is 1,500 head of cattle and 30,000 sheep, or by the accepted proportions of cattle and sheep, nearly 60,000 head of cattle.

This estimate was, however, inclusive of the 91 square miles, nearly one-third of the whole claimed, which was given up by Mr. Wentworth to Mr. Barker, and, reducing the capabilities in proportion, the run held after the cession to Mr. Barker would only have carried about 4,000 head of cattle. This consideration, then, for whatever it may be worth, is opposed to the recognition of Mr. Morris' claim.

I have, &c.,
A. G. McLEAN,
Acting Chief Commissioner of Crown Lands.

Submitted, 2 June.

No. 60.

MR. G. A. MEIN to SECRETARY FOR LANDS.

Moolpa Station, Deniliquin,
11 August, 1860.

SIR,

I have the honor of addressing you on the subject of the Tala boundaries, and would most respectfully beg an early settlement of them. I am at present suffering very much from the non-adjustment of these boundaries, and labouring under great disadvantage in the management of Moolpa in consequence. If it be the intention of Government to include in the area of Tala all the vacant country alluded to in the Surveyor General's (Col. Barney's) letter, dated 28th January, 1858, I have not the slightest objection, excepting however the Mostyn's Hut and Harvey's Hut Runs, tendered for by Messrs. Sylvester and Smith. If Government find a difficulty in settling these boundaries in Sydney, I am clearly of opinion that that would disappear entirely if a duly authorized and disinterested person were appointed to do so on the ground. The line of Moolpa huts and sheep-yards would be some guide. I suffer great loss, insult, and annoyance, in consequence of the unsettled state of Tala boundaries; and I would once more earnestly beg a speedy settlement. It is now a considerable time since you pledged the Government should do this, and I most respectfully hope that it will be speedily fulfilled.

I have, &c.,
G. A. MEIN, M.D.

Submitted.

Refer to Chief Commissioner of Crown Lands, for report and recommendation.

JOHN R.,
20 Sept.

No. 61.

CHIEF COMMISSIONER OF CROWN LANDS to UNDER SECRETARY FOR LANDS.

Minute, Tala case.

I HAVE bestowed upon the examination of this case the best attention of which I am capable, and I really find some hesitation in stating my views with respect to it, lest I should render it less clear than the reports of the Acting Chief Commissioner have made it. I cannot do otherwise than adopt the statement and recommendations submitted in those reports, and anything that it is left for me to submit must be in entire unison with their purport. Avoiding, therefore, a needless recapitulation, I would observe, first, with respect to the amended description (referred to in the correspondence) forwarded by Mr. Black, in 1850, and the late Mr. Commissioner Bingham's report thereupon, that neither can now be admitted as a reliable ground for the claim now asserted by Mr. Morris, inasmuch as the description is shewn to have embraced, in addition to the land now in dispute, six other runs which have been occupied under lease for the last nine years, having been granted under Mr. Bingham's own recommendation, contained in a letter dated 14th January, 1851, or about six weeks subsequently to the date of his report above mentioned. It follows, that

Mr. Bingham's statement that the amended description did not embrace any land to which the applicant was not entitled must have resulted from a misapprehension as to the effect of the amended claim. Deprived of the support of the Commissioner's statement, with respect to its bearing upon adjacent Crown lands, Mr. Black's description is resolved into an intimation of the extent of his claims, not by any means involving the extent of his rights.

The time for determining the latter was when the Commissioner, acting under instructions from the Government, which were most pointed in requiring the curtailment of any claims encroaching upon Crown lands, went upon the run, to define its limits and assess its capabilities. At *this time*, the Commissioner prepared the description adopted by the Acting Chief Commissioner as the basis of his recommendation; it has already been stated that the "arrangement of boundaries" then made was agreed to by the agent of the licensed occupant; but it is my duty to state, that it would have been quite as effectual without any such consent, having been one of those acts of authority generally enforced by orders from the Government, which were called for by many attempted encroachments made in the demands for leases over lands not previously licensed to the claimants.

The Acting Chief Commissioner has also pointed out that Mr. Bingham's description was very clear and perfect, although the extent of land comprised within the boundaries described was very much over estimated. I cannot do better than invite attention to the following explanation of the cause of the error, extracted from a recent report of Mr. Commissioner Lockhart, and supported by evidence:—

"It may indeed be said that the area estimated by Mr. Bingham, viz., 268,800 acres is not within the boundaries proposed by me. How Mr. Bingham came to estimate the area is very clear,—he *imagined* the river to run *east and west*; one side line 10 miles, the other about 20, would give a mean depth of 15 miles, at 30 miles frontage would give 450 square miles, from which a reserve has to be taken, bringing the estimate down to 420 square miles; the points are fixed, but the river does not run as supposed."

I will add that, for my own part, I should have been very much surprised if the number of acres estimated to be comprised in a tract of country, having 30 miles frontage to a river whose course had not been laid down, had not proved very wide, whether on one side or the other, of the reality. I am nevertheless quite willing to admit that the error may have induced the valuer, on the part of the occupant, to assent to a larger estimate of capability than under other circumstances he might have done, and shall return to this part of the question.

For the reasons which I have stated I must recommend, as already recommended by the Acting Chief Commissioner of Crown Lands, that the Tala Run should be confined to the limits set forth in the description prepared by the Commissioner, when the run was assessed as indicated in the accompanying tracing. With respect to the disposal of the vacant land claimed by the present holders of that run, I submit that, as it certainly cannot be regarded as coming within the meaning of the definition of a "new run of land which has never been occupied before," and as the whole of the adjoining lands similarly situated and circumstanced have been offered to competition as adjusted runs, it cannot now with any justice, or indeed legality, be granted in new runs to any of the applicants who, during the progress of the inquiry, have, upon information howsoever derived, sent in tenders for it. I have therefore to recommend that this land be now offered to public competition in adjusted runs, a course which, if adopted, will have this advantage amongst others—that it will give to the present occupants of Tala an opportunity of competing for it.

I have now only to revert to the valuation of the capabilities of Tala, which, it is alleged by Mr. Morris will be excessive if the estimated area be not allowed. As before stated, I am willing to admit that the valuer on the part of the licensee may have been misled by the Commissioner's error, and the fact of so great an error having occurred is, I think, quite sufficient to justify me in recommending the Government to consent to a re-assessment of the run (should such be desired by Mr. Morris), without reference to any improvements which may have been made upon it, and in order that the rent during the remainder of the lease may without question be proportioned to the quantity of land to the occupation of which the lessees will in future be confined.

A. O. M.

B.C. 15 October, 1860.

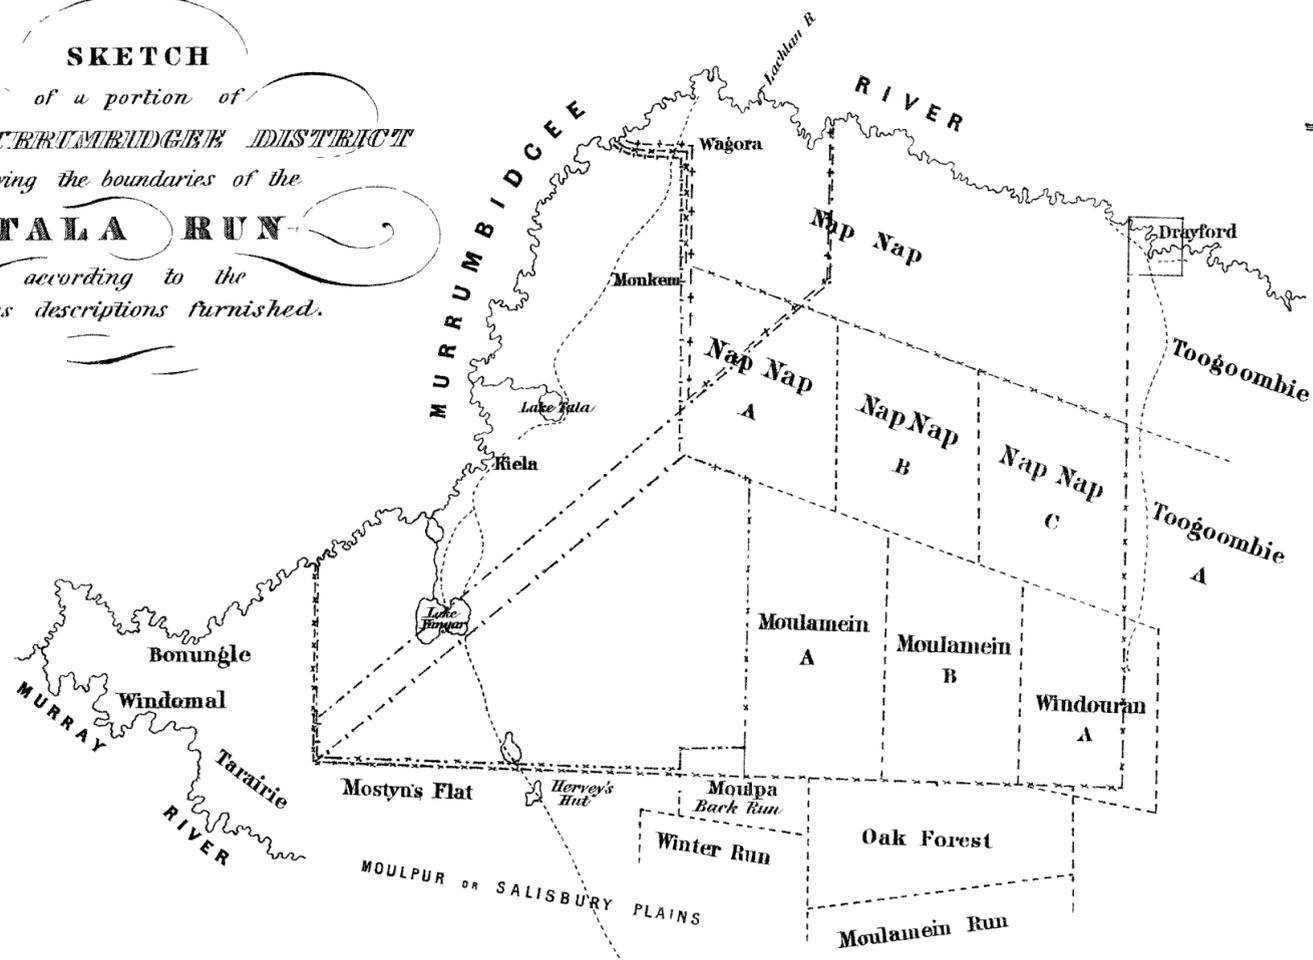

This report is entirely in one with the report of the Acting Chief Commissioner (Mr. McLean), and with that report I have already expressed my entire concurrence.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

FIELD OF MARS COMMON.

(CERTAIN CITIZENS OF SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 20 January, 1862.

To the Honorable the Members of the Legislative Assembly.

The humble Petition of certain Citizens of the City of Sydney,—

RESPECTFULLY SHEWETH AS FOLLOWS :—

That your Petitioners have learnt, with great satisfaction, that the Government is of opinion that it is very desirable that more direct communication between the lands on the north side of the Parramatta River and the City of Sydney should be obtained, and that it is the intention of the Government to submit to your Honorable House, during the ensuing Session of Parliament, a Bill to empower the Government to sell the Field of Mars Common, and out of the proceeds of such sale to apply a sufficient sum in the formation of Roads and the construction of Bridges, so as to connect the land on the north side of the Parramatta River with the Metropolis.

That your Petitioners feel assured that very great advantages must of necessity accrue, not only to them, but to the Colony at large, by the connection of the Northern Districts with the City of Sydney.

Your Petitioners therefore humbly pray that your Honorable House will take the premises into your consideration, and pass an Act authorizing and enjoining the sale of the said Field of Mars Common, and appropriation of the proceeds to the construction of Roads and Bridges, so as to connect the lands on the north side of the Parramatta River, by the shortest route, with the Metropolis.

And your Petitioners will ever pray.

[Here follow 13 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

FIELD OF MARS COMMON.

(PETITION FROM THE TRUSTEES OF.)

Ordered by the Legislative Assembly to be Printed, 25 October, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Trustees of the Field of Mars and Hunter's Hill Common,—

RESPECTFULLY SHEWETH:—

That your Petitioners are Trustees of the said Common, appointed under the Act of Council, passed in the eleventh year of the reign of Her present Majesty, Queen Victoria, No. 31.

2. That your Petitioners have been informed and believe that a petition, emanating from certain persons residing in Sydney and its Suburbs, praying that the said Common may be resumed and sold, and the proceeds applied towards the erection of certain Bridges, has been presented to your Honorable House.

3. That your Petitioners have been further informed, and believe it is the intention of the Government to lay before your Honorable House a Bill, having reference to the resumption by the Crown of the said Common.

4. That your Petitioners, as Trustees of the said Common, and also on their own behalf as Commoners, respectfully object to and protest against, any measure having for its object, the resumption by the Crown of the said Common.

5. That your Petitioners hold the said Common under a Deed of Grant from the Crown upon certain Trusts, for the benefit of persons residing within the districts therein named.

6. That those persons, or the greater part of them, are not willing to surrender their rights under the said grant, and that they object to the sale of the said Common for the purpose detailed in the said Petition, or for any other purpose.

7. That your Petitioners can shew that the Common Lands are of great advantage to those who wish to claim a right of Common, and to deprive such persons of their rights and privileges would inflict a grievous injury.

8. That the persons who signed the said Petition, or the greater part of them, are not Commoners, nor possessed of any right or interest in the said Common.

Your Petitioners humbly pray, that your Honorable House will not sanction any measures, having for its object the resumption of the said Common, and thereby deprive them individually, and the rest of the Commoners, of their rights, under the said grant.

And your Petitioners will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

FIELD OF MARS COMMON.

(TRUSTEES.)

Ordered by the Legislative Assembly to be Printed, 31 December, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Trustees of the Field of Mars and Eastern Farms Common,—

RESPECTFULLY SHEWETH :—

That your Petitioners have heard and believe that a Petition has been presented to your Honorable House, which purports to emanate from persons who allege that they are Commoners of the Field of Mars Common, for whose benefit the said Common was originally granted. The said Petition further states that parts of the Common are the haunts of vagrants, runaway sailors, and the most abandoned prostitutes of Sydney.

That the Common is useless for pasturage—cattle, as it is generally believed, being slaughtered, or re-branded, and taken away by the vagrants aforesaid.

That it prevents the establishment of Municipalities, makes Churches and Schools few, and obstructs the formation of Schools of Arts, &c., and prays that your Honorable House will pass an Act authorizing the sale of the said Common.

That your Petitioners, feeling assured that only a few of those persons who signed the said Petition are entitled to the use of the Common, and that many of the allegations made therein are false, and others grossly exaggerated, and intended, as your Petitioners verily believe, to mislead,—pray that your Honorable House will cause due inquiry to be made before any action is taken, and—

Your Petitioners will ever pray,—

ISAAC SHEPHERD.
E. DRINKWATER.
JAS. BELLEMY.

FIELD OF MARS COMMON.

No. 1.

To His Excellency SIR WILLIAM THOMAS DENISON, Knight Commander of the most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies, and Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice Admiral of the same, &c., &c.

The Petition of the undersigned persons having a right of Commonage to the Field of Mars Common.

That your Petitioners believe that the Field of Mars Common has not in any way answered the end for which it was intended, and your Petitioners believe that it could be made available for better and more important purposes than that of a Common; and for it to continue as such would be subversive of the prosperity and general interests of the district. That those persons who have a legitimate Common right are the least benefited, and we think it more desirable that the said Common should be alienated to an industrious class of freeholders. Therefore, your Petitioners earnestly recommend that your Excellency's Government will initiate such measures as may be necessary to empower the Crown to resume the said Common, and to sell and dispose of the same, the proceeds of which to be applied for the purposes of forming a road, and the construction of bridges, so as to connect the north side of the Parramatta River more directly with the City of Sydney. And lastly, your Petitioners urgently recommend a compliance with their prayer at as early a period as possible, as your Petitioners are suffering great inconvenience from the present impracticable mode of transit.

And your Petitioners will ever pray.

No. 2.

D. N. JOUBERT, Esq., to SECRETARY FOR LANDS.

Sydney, 20 February, 1861.

SIR,

At the request of a large number of influential residents of the Parish of Hunter's Hill, and of Five Dock, I beg leave to submit for your consideration, a few observations in support of a Petition which has been this day addressed to the Government, on behalf of the Commoners of Field of Mars.

The inhabitants of the north side of the Parramatta River have petitioned the Government for the construction of two bridges, one over the Parramatta River at Five Dock, the other at some convenient place across Iron Cove, so as to establish a direct line of communication with Sydney, *via* Glebe Island and Pyrmont.

The cost of these two bridges, and of the roads leading thereto, has been estimated at £35,000 sterling, and would certainly not exceed £40,000.

To meet this expenditure it is proposed that the Government should issue a sufficient amount of Debentures, payable in ten, fifteen, and twenty years; and as a security for the payment of these Debentures, the inhabitants of the north side of the Parramatta River offer to surrender to the Crown the Field of Mars Common, which contains upwards of six thousand acres, and could be cut up into farms and sold, in order to meet the payment of the Debentures, as they fall due. Unimproved land adjoining the Common has been sold lately, in several localities, at the rate of £30 per acre; it is therefore natural to think that the Common would sell, even now, at an average price of £10 per acre, and realize a sum of at least £60,000. If, however, instead of selling it at the present depressed state of the market, it was held by the Government for a few years, it appears very probable that the value of this land would be considerably enhanced by the establishment of this new line of communication, which would bring it within six miles of Sydney, and that it might realize upwards of £120,000.

The cost of constructing these roads and bridges would thus be borne entirely by the inhabitants of the north side of the Parramatta River, who would be the first benefited by them; while, on the other hand, it cannot be denied that the Colony would derive certain advantages from the establishment of a direct line of communication with that important district.

The farmers of the fertile lands of Ryde, Pennant Hills, Field of Mars, Dural, &c., would turn their attention to the cultivation, on a larger scale, of vegetables, fruit, hay, and other produce, which could easily be brought to the Sydney market in a few hours.

The immense tract of country situated between the Parramatta River and the Hunter, containing about 1,500 square miles, or 960,000 acres of Crown lands, now totally useless and unavailable, because they are inaccessible either by land or by water, would then be brought within reach of Sydney by a few hours drive. A large proportion of it, which is fit for cultivation, might be surveyed, and put up to sale from time to time.

A shorter and more direct line of road would be established for the fat cattle and sheep coming from the northern districts to the Sydney market; and the bridges might be constructed so as to be made available, at some future period, for the use of a railway connecting Sydney with the northern districts.

The growing importance of the Lunatic Asylum at Tarban Creek demands also that something should be done to render it of easier access; and the construction of this line of road would place the establishment within four miles from Sydney, instead of eleven, as it is at present, and would do away with the inconvenient and dangerous practice of crossing the Parramatta River in the punt at Bedlam Ferry.

I have, &c.,
D. N. JOUBERT.

No. 3.

UNDER SECRETARY FOR LANDS to MESSRS. LYONS, BLAXLAND, AND OTHERS.

*Department of Lands,
Sydney, 26 February, 1861.*

GENTLEMEN,

Referring to the Memorial presented by you from certain persons holding a right of commonage to the Field of Mars Common, I am directed to inform you that the same has been referred to the Acting Surveyor General for his report as to the value of the Common.

2. When the necessary information shall have been obtained, a further communication will be made to you on the subject.

I have, &c.,
MICHL. FITZPATRICK.

No. 4.

No. 4.

REPORT of Acting Surveyor General.

THE Field of Mars Common contains 6,235 acres, inclusively of the various encroachments which have been made upon it, and which may be sold for at least the unimproved value of the land.

A careful survey of the boundaries of the Common was made in 1847, and the general character of the land noted; and from this plan it would appear that probably five-sixths of the land is poor sandstone rocky land, and that the remainder is good well-timbered soil. The survey being, however, merely of the boundaries, there is no reliable information as to the proportions of good and bad land.

Considering the importance of the question practically at issue, whether the money which would probably be realized by the sale of the Common would pay for the erection of bridges across the Parramatta River and Long Cove, and the construction of a road to Sydney, I would suggest the desirability of the Government employing, as valuers, one or more of the auctioneers who have the largest business in disposal of land, and the most experience and knowledge of its value, such as Mr. Gorman, of Mort & Co., and Mr. Richardson, of Richardson and Wrench; these gentlemen to be accompanied by a surveyor, who would make such surveys of the boundaries of the good land as would enable him to determine appropriately its extent.

I have reason to believe that Mr. Richardson would at once undertake the valuation, and Mr. Gorman would probably do so too.

A. G. McLEAN.

*Surveyor General's Office,
Sydney, 23 March, 1861.*

No. 5.

ACTING SURVEYOR GENERAL to UNDER SECRETARY FOR LANDS.

*Surveyor General's Office,
Sydney, 23 March, 1861.*

SIR,

With reference to the petition received from the persons having a right of commonage to the Field of Mars Common, praying that the land included in the Common may be disposed of, and the proceeds applied to the construction of bridges across the Parramatta River and Long Cove, and the formation of a road from Sydney to those bridges; and with reference also to my B.C. of this date, suggesting the employment of two auctioneers in the valuation of the land within the Common, I have now the honor further to suggest, on the other side of the question, that the probable cost of the bridges and road should be estimated perhaps by the Engineer for Docks and Harbours, and I therefore enclose tracings* from Mr. Licensed Surveyor Langley's plans and sections of the proposed crossing-places of the Parramatta River and Long Cove, with such information as Mr. Langley has already afforded in regard to the sites.

* Appendix.

2. Any additional information which may be required may be at once obtained.

I have, &c.,

A. G. McLEAN.

No. 6.

E. DRINKWATER, ESQ., to UNDER SECRETARY FOR LANDS.

Kissing Point, 9 April, 1861.

SIR,

I have the honor to inform you that I called a meeting of Commoners, in accordance with the Act of Council for regulating Commons, &c. (to take place at Cowell's Inn, Ryde, on Monday, the 8th instant), for the purpose of electing two Trustees in the room of Isaac Shepherd and James Bellamy, who had resigned as Trustees of the Field of Mars and Hunter's Hill Common; when Isaac Shepherd, Esq., and James Bellamy, Esq., were unanimously re-elected Trustees for the Field of Mars and Hunter's Hill Common.

I have, &c.,

EDWARD DRINKWATER,
Sole Trustee.

FIELD OF MARS COMMON.

5

No. 7.

UNDER SECRETARY FOR LANDS to E. DRINKWATER, ESQ.

*Department of Lands,
Sydney, 15 April, 1861.*

SIR,

I am directed to acknowledge the receipt of your letter of the 9th instant, notifying the re-election of Messrs. Isaac Shepherd and James Bellamy as Trustees for the Field of Mars and Hunter's Hill Common.

I have, &c.,
MICHL. FITZPATRICK.

No. 8.

ACTING SURVEYOR GENERAL to MR. LANGLEY.

*Surveyor General's Office,
Sydney, 5 April, 1861.*

SIR,

Referring to* your letter of the 20th December last, I have now to request that, adopting Mr. Galloway's plan of the Field of Mars Common as the representation of its boundaries, you will make such surveys as may be necessary to determine the relative extents generally of the three qualities,—1st class, 2nd class, and inferior lands; the 1st class to be land equal in character to the best in the neighbourhood of Ryde; the inferior, poor rocky sandstone land, wholly unsuitable for agricultural purposes; and the 2nd class, of course, a medium.

2. The results of your survey you will first plot on a copy of Mr. Galloway's map, which will be prepared in the office for that purpose; and you will supply a valuation of each of the three qualities, at the present market rates of lands similar in character and situation, making due allowance for the value of timber still remaining on the Common—the extent and quality of which should be noticed in your Report—and valuing encroachments on the Common as if unimproved.

3. For the performance of this duty you will be paid at the daily rate regulated, without special charge for valuation, viz., £3 3s. while engaged in the field, and £2 2s. for office work.

I have, &c.,
A. G. McLEAN,
A. S. G1.

No. 9.

ACTING SURVEYOR GENERAL to UNDER SECRETARY FOR LANDS.

THE enclosed valuation of the Field of Mars Common by Mr. Langley is forwarded for the information of the Secretary for Lands.

Mr. Langley's estimate is £5 per acre (average), or a little over £30,000.

Mr. Langley has spent some days in the examination of the Common, and considers that about five-eighths of it is good land; and if this be the case, if the bridges referred to be constructed, and the Common were brought into the market gradually, I am of opinion that a higher average than that estimated by Mr. Langley would be realized, perhaps £6.

A. G. M.,
B. C., 22nd May, 1861.

[Enclosure in No. 9.]

Sydney, 14 May, 1861.

SIR,

I have the honor to transmit herewith a valuation of the Field of Mars Common, in accordance with your instructions, contained in your letter of the 5th ultimo. It would have been sent in before this, but it was impossible to get over the Common, it being so much flooded by the late heavy rain.

A. G. McLean, Esq.,
Acting Surveyor General.

I have, &c.,
CHAS. LANGLEY.

[Sub-Enclosure in No. 9.]

Sydney, May, 1861.

SIR,

I have the honor to inform you that, in pursuance of instructions conveyed in your letter of 5th April, 1861, No. 61-486, relative to the valuation of the Field of Mars Common, requesting me to mark off, upon a copy of Mr. Galloway's plan, furnished from your office, the different classes of land, as mentioned in your letter,—

I beg leave to state that it is utterly impossible to define the boundaries of the classes of land which you desire, without an actual survey of the entire Common, as after examination I find that no actual internal survey has been made of the several creeks, watercourses, ranges, and other important features connected with it.

I am of opinion that about five-eighths of it consists of good land, which, for agricultural purposes, will prove equal, and in some instances superior to the adjoining lands of Kissing Point, &c. The remaining portion consists of stony ridges and rocky gullies, not available for agriculture, but in many instances suitable for building sites, vineyards, &c.

Should

Should the Common be judiciously laid out with roads, giving means of access to various points on the Kissing Point and North Roads, and the property sub-divided so as to combine good and bad land together, it would realize a very considerable sum. Portions of the good land would, at the present time, sell for £25 to £30 per acre; other portions are nearly valueless, except for building sites, as before mentioned.

The timber on the eastern end of the Common is of little value, except for firewood; but on the western side there is some excellent timber, well suited for building purposes, fencing, shingling, &c.

Should the new line of road, proposed to be opened from Gladesville through the Asylum Reserves, across the Parramatta River, through the Five Dock Estate, over Long Cove, and the Balmain Estate, in connection with the Pyrmont Bridges, be carried out, it will enhance the value of this property to a very great extent.

I have no hesitation in giving it as my opinion that, taking the property altogether, "if judiciously laid out in connection with the line of road above mentioned," it will sell, on an average, from £4 to £5 per acre; the great desideratum being the opening of lines of communication, so as to render the whole property available.

This Report is based upon the supposition that an approximate, and not an actual, delineation of the different classes of land, requested by you to be reported on, was what you required.

Should you require an actual internal survey made, I shall feel honored in carrying out your further instructions.

Hoping this Report will prove satisfactory,—

I have, &c.,

CHAS. E. LANGLEY,

L. S.

A. G. McLean, Esq.,
Acting Surveyor General.

No. 10.

UNDER SECRETARY FOR LANDS to MESSRS. LYONS, BLAXLAND, AND OTHERS.

Department of Lands,

Sydney, 10 July, 1861.

GENTLEMEN,

Referring to my letter of the 26th February last, respecting the Petition presented by you from certain persons holding a right of commonage over the Field of Mars Common, I am now directed to inform you, that a Report having been received from the Acting Surveyor General, as to the value of the land, Mr. Secretary Robertson consulted his colleagues on the matter, and they concur in the desirability of obtaining legislative powers to enable the Government to sell the land as prayed for in the Petition under reference, and to apply the money derivable therefrom to the formation of a road and the construction of bridges, so as to connect the north side of the Parramatta River more directly with Sydney, as proposed by the petitioners; any surplus funds to be expended in other public works of general advantage to the people having a right to enjoy the Commonage Reserve in question.

2. I am to add, that the necessary communication has been made to the Crown Law Officers for the preparation of the requisite Bill for this purpose.

I have, &c.,

MICHL. FITZPATRICK.

No. 11.

UNDER SECRETARY FOR LANDS to D. N. JOUBERT, ESQ.

Department of Lands,

Sydney, 10 July, 1861.

SIR,

Referring to your letter of the 20th February last, submitting, on behalf of some residents at Hunter's Hill and Five Dock, observations in support of the Petition presented by Messrs. Lyons, Blaxland, and others, from certain persons holding a right of commonage over the Field of Mars Common,—I am directed to inform you, that a Report having been received from the Acting Surveyor General, as to the value of the land, Mr. Secretary Robertson consulted his colleagues on the matter, and they concur in the desirability of obtaining legislative powers to enable the Government to sell the Common as prayed for in the Petition under reference, and to apply the money derivable therefrom to the formation of a road and the construction of bridges, so as to connect the north side of the Parramatta River more directly with Sydney, as proposed by the petitioners; any surplus funds to be expended in other public works of general advantage to the people having a right to enjoy the Commonage Reserve in question.

2. I am to add, that the necessary communication has been made to the Crown Law Officers for the preparation of the requisite Bill for the purpose.

UNDER SECRETARY FOR LANDS to SECRETARY TO CROWN LAW OFFICERS.

*Department of Lands,
Sydney, 10 July, 1861.*

SIR,

I am directed to forward to you the enclosed papers, respecting the proposed sale of the Field of Mars Common, and the application of the money derivable therefrom to the formation of a road and the construction of bridges, so as to connect the north side of the Parramatta River more directly with Sydney; any surplus funds to be expended in other public works of general advantage to the people having a right to enjoy the Commonage Reserve.

2. And I am to request that you will have the goodness to move the Crown Law Officers to cause a Bill to be prepared for submission to Parliament, to enable this Government to carry out the objects proposed.

I have, &c.,
MICHL. FITZPATRICK.

No. 13.

PETITION from Trustees.

To His Excellency the Governor-in-Chief, and His Executive Council, &c., &c.

The respectful Petition of Edward Drinkwater, Isaac Shepherd, and James Bellamy, Trustees of the Field of Mars and Hunter's Hill Common,—

SHEWETH:—

That during the administration of His late Excellency Sir Charles Augustus Fitz Roy, certain lands, situated within the parishes of Field of Mars and Hunter's Hill, were granted to certain persons therein named Trustees, as Common Land, subject to conditions and reservations therein named; and that the said land should be held by the said Trustees and their successors as a body corporate, for the use and benefit of persons therein described.

That your Petitioners were severally elected Trustees, in accordance with the stipulations contained in the Act of Council 11 Vic., No. 31, 1847, intituled, "*An Act to enable Trustees of Commons in New South Wales to have perpetual Succession,*" &c., &c.

That your Petitioners have, and continue to exercise the functions of Trustees of the said Commons.

That it has been represented to your Petitioners, that certain persons, some of whom have no right of commonage, have applied to the Honorable the Secretary for Lands, urging upon him the desirability of the said Common Lands being resumed by the Government, and appropriated to other uses than that stipulated in the grant thereof, which, if carried out, would deprive the Commoners, and those interested therein, of the enjoyment of the said land and the advantages accruing therefrom.

Your Petitioners respectfully submit, that the majority of those persons having a right of Common are opposed to any surrender of their commonage right; and that those persons who are anxious to give up the Common Lands advocate its surrender with a view to benefit themselves individually, without regard to the Commoners generally, and that it would be unjust to deprive those entitled to the Common Lands of the advantages to be derived therefrom, contrary to their will and against their interest.

Your Petitioners feel called upon to state, that they will by every constitutional means maintain the rights of the Commoners under the grant thereof.

Your Petitioners pray, that your Excellency and Honorable Council will not sanction any measure that would tend to inflict so great a wrong as the alienation of the Common Lands would to the residents of this district.

And your Petitioners will ever pray.

*Kissing Point,
28 June, 1861.*

EDWARD DRINKWATER.
ISAAC SHEPHERD.
JAMES BELLAMY.

No. 14.

ISAAC SHEPHERD, ESQ., to CLERK OF EXECUTIVE COUNCIL.

SIR,

I beg to forward the accompanying Petition, and request that you will have the goodness to lay the same before His Excellency the Governor and His Executive Council.

*Helenie,
21st August, 1861.*

I am, &c.,
ISAAC SHEPHERD.

This should have been addressed to the Honorable the Secretary for Lands, and is now forwarded accordingly.

B.C.—August 24th, 1861.

EDWARD C. MEREWETHER,
Clerk of Executive Council.

[Enclosure]

[Enclosure in No. 14.]

To His Excellency the Right Honorable Sir JOHN YOUNG, Bart., Knight Commander of the Most Honorable Order of the Bath, Knight of the Grand Cross of the Most Distinguished Order of St. Michael and St. George, Captain General and Governor-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same; and the Executive Council in Council assembled, &c., &c., &c.

The humble Petition of the undersigned Landholders and other resident Inhabitants, having an interest in the Field of Mars and Hunter's Hill Common,—

Respectfully Sheweth:—

That your Petitioners have heard with much concern, that certain persons have represented to the Government that the lands granted as a Common, for the landholders and other inhabitants of the districts of the Field of Mars and Hunter's Hill, do not afford the advantages which were originally contemplated; and such individuals suggest that the lands should be resumed by the Government and disposed of, with a view of devoting the proceeds towards constructing a bridge across the Parramatta River and making roads in certain places.

That your Petitioners would observe, that the formation of roads and bridges tend to enhance the value of property contiguous to such improvements, and therefore your Petitioners are of opinion that the individuals who take a prominent part in suggesting the resumption of the said Common, are influenced rather by private interests than any consideration for the public good.

That your Petitioners consider that the resumption of the Common Lands would be prejudicial to their interests, inasmuch as such a measure would deprive them of their commonage right, as well as the advantages arising from depasturing cows, and procuring firewood and timber for building and fencing; whilst at the same time, a number of those tenants to whom the Trustees have leased portions of the Common, in accordance with the Act of Council, would be deprived of their subsistence by the proposed resumption.

That the commonage right extends to a great number of persons who convey their produce to market through Parramatta by railway, as they consider that means of transit the best; and therefore such persons are altogether opposed to the sale of the said Common, and the appropriation of the proceeds to purposes inconsistent with the objects for which the Common was granted.

That your Petitioners trust your Excellency and Honorable Council will take into their consideration the facts to which your Petitioners have alluded, and not sanction any measure that will deprive a large number of persons of their rights.

And your Petitioners, as in duty bound, will ever pray.

No. 15.

SECRETARY TO CROWN LAW OFFICERS to UNDER SECRETARY FOR LANDS.

Crown Law Offices,
Sydney, 13 September, 1861.

SIR,

In returning the accompanying papers received with your letter of the 10th of July last, No. 61/1629, I am directed by the Attorney General to forward also herewith two copies of "A Bill for improving the Districts of which the Field of Mars Common forms part."

I am also desired to observe, that it will be necessary that the Surveyor General be invited to supply the requisite Schedules.

I have, &c.,
W. E. PLUNKETT.

[Enclosure in No. 15.]

25th VICTORIA, 1861.

A BILL

For improving the Districts of which the Field of Mars Common forms part.

WHEREAS it is expedient and for the public advantage that the lands now composing the Field of Mars Preamble Common should be sold and the proceeds applied to the general improvement of the districts of which the same form part Be it therefore enacted by the Queen's Most Excellent Majesty by and with the advice and consent of the Legislative Council and the Legislative Assembly of New South Wales in Parliament assembled and by the authority of the same as follows:—

1. It shall be lawful for the Governor with the advice of the Executive Council by Proclamation to declare the resumption by the Crown for the purposes of this Act of all the lands in the County of Cumberland called and known by the name of the "Field of Mars Common" as described in the first Schedule hereto And upon publication of such Proclamation in the *Gazette* such lands shall without other assurance in the Law become absolutely vested in the Crown for such purposes.

- Survey and plan to be made.** 2. The Governor with the advice aforesaid shall cause a survey and plan of the said lands to be made on which shall be marked out for reservation such roads and public ways as shall be deemed best for the settlement and occupation of the said lands and for the districts of which they form part and on the said plan shall also be marked the division of such lands into convenient allotments for sale as hereinafter enacted. And such plan shall when completed be open for inspection by the public without fee at the office of the Surveyor General in Sydney. Provided that it shall be lawful for the Governor with the like advice to reserve and dedicate any portions of such lands not exceeding in the whole acres for any public purposes as defined by the Crown Lands Alienation Act of this Session.
- Lands to be sold.** 3. The said lands shall at such times not less than one month after the completion of such plan as may be fixed by the Minister for Lands be sold by public auction either at the Government Sale Room in Sydney or upon the said lands *fourteen days* notice at the least of every such sale being published in the *Gazette* designating the allotments to be sold in accordance with the said plan. And the Crown shall have all powers of sale and grant in respect of such lands as are incident by law to the sale of Crown Lands.
- Proceeds of sale to form separate fund in Treasury.** 4. The proceeds of every such sale after deducting therefrom all costs charges and expenses of and incident thereto shall be paid to the Colonial Treasurer and shall be by him carried to a separate fund at the Treasury to be called the "Field of Mars Fund" and such fund shall be only applicable and be from time to time applied to the purposes hereinafter mentioned by warrants under the hand of the Governor.
- Bridges and roads to be made.** 5. The Minister for Public Works shall cause a bridge suitable for general public traffic to be constructed across the Parramatta River at the points specified for that purpose in the second Schedule hereto and shall also cause to be constructed any other bridge which may be deemed advisable together with all other necessary works incidental to any such bridge and also cause to be laid down such roads to and from each such bridge as shall be recommended by the Surveyor General and approved by the Governor with the advice aforesaid.
- Costs out of fund and Debentures may be issued.** 6. All costs charges and expenses of and attending the works aforesaid and such other or incidental works as may be found necessary and otherwise incurred by the Government under this Act shall be defrayed and paid out of the said separate fund when certified by the said Minister for Public Works and approved by the Auditor General. And the Colonial Treasurer may at any time by order of the Governor with the advice aforesaid issue Debentures for raising the necessary amount which shall be paid off from time to time as they become due out of the said fund and until so paid off shall be and continue a charge thereon.
- Compensation to Lessees and Commoners.** 7. Any person at the passing of this Act holding a lease of any part of the said lands or entitled to any right of commonage in or over the said Common may at any time not later than *three months* after the passing of this Act transmit a petition under his hand to the Governor with a copy of his lease or describing his claim to commonage and the grounds thereof as the case may be and praying such compensation for the relinquishment of his lease or for the loss of such right of commonage as he may think just. And it shall be lawful for the Governor with the advice aforesaid after due inquiry into each such case to comply with or wholly decline to grant such prayer or to offer such other compensation as may be deemed fair and reasonable. And the compensation in any such case agreed to be granted and accepted shall be paid out of the separate fund aforesaid by warrant under the hand of the Governor.
- Difference may be decided by arbitration.** 8. In the case of any such petitioner dissenting from any decision or offer as aforesaid the question may if so wished by such dissenting party be decided by the arbitration of two arbitrators one being appointed by him and the other by the said Minister for Public Works or an umpire appointed by such arbitrators before commencing such arbitration. And such arbitrators and umpire shall have all powers incident to arbitrations and their decision respectively shall be final and binding on all parties.
- Application of surplus of fund.** 9. When and so soon as the sales of the said lands and all the works contemplated by this Act shall be completed the surplus of the "Field of Mars Fund" if any shall be paid over by way of endowment to or among the Municipality or Municipalities then in existence within the Districts aforesaid.
- Short Title.** 10. This Act shall be styled and may be cited as the "Field of Mars Improvement Act of 1861."

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES, No. 68. TUESDAY, 31 DECEMBER, 1861.

12. Field of Mars Common:—Dr. Lang moved, pursuant to notice, "That" leave be granted to bring in a Bill for improving the Districts of which the Field of Mars Common forms part.
- Mr. Shepherd moved, That the Question be amended by the omission of all the words after the word "That", with a view to the insertion in their place of the words, "a Select Committee, with power to send for persons and papers, be appointed, to inquire into the subject matter of various Petitions, and other matters relating to the Field of Mars and Eastern Farms Common, and to recommend as to the desirability or otherwise of its being resumed and disposed of by the Crown.
- "(2.) That such Committee consist of the following members:—Dr. Lang, Mr. Cowper, Mr. Forster, Mr. Smart, Mr. Laycock, Mr. Lackey, Mr. Sutherland, Mr. Stewart, Mr. Lucas, and Mr. Shepherd."
- Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.
- Question,—That the words proposed to be inserted in the place of the words omitted be so inserted,—put and passed.
- Whereupon Question,—
- (1.) That a Select Committee, with power to send for persons and papers, be appointed to inquire into the subject matter of various Petitions and other matters relating to the Field of Mars and Eastern Farms Common, and to recommend as to the desirability or otherwise of its being resumed and disposed of by the Crown.
- (2.) That such Committee consist of the following Members:—Dr. Lang, Mr. Cowper, Mr. Forster, Mr. Smart, Mr. Laycock, Mr. Lackey, Mr. Sutherland, Mr. Stewart, Mr. Lucas, and Mr. Shepherd,—put and passed.

VOTES, No. 74. THURSDAY, 9 JANUARY, 1862.

6. Field of Mars Common:—Mr. Dick presented a Petition from J. Blaxland, as Chairman of a Committee appointed "to further the project of Bridging the Parramatta River in connexion with the North Shore," praying that the Select Committee of the said House, now sitting on the subject of the said Common, may be instructed to receive, in the capacity of Agent for the Promoters of the said project, some authorized person, who shall be allowed to question and cross-examine witnesses, and otherwise to represent the said Promoters.
- Petition received.
- Whereupon, Mr. Dick, *with the concurrence of the House*, moved, *without notice*, That it be an instruction to the Select Committee appointed to inquire into certain matters relating to the Field of Mars Common, and to report thereon, to hear Mr. J. Blaxland, or such Agent as he may appoint, in opposition, with power to examine witnesses.
- Question put and passed.

VOTES, No. 77. TUESDAY, 14 JANUARY, 1862.

2. Field of Mars Common:—Mr. Shepherd, as Chairman, brought up a Progress Report from, and laid upon the Table the Proceedings of, and Minutes of Evidence taken before, the Select Committee appointed on the 31st December last, on the Field of Mars Common.
- Ordered to be printed.

FIELD OF MARS COMMON.

PROGRESS REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 31st December last, “*to inquire into the subject matter of various Petitions and other matters relating to the Field of Mars and Eastern Farms Common, and to recommend as to the desirability, or otherwise, of its being resumed and disposed of by the Crown,—with power to send for persons and papers*”; and instructed on the 9th January instant, “*to hear Mr. J. Blaxland, or such Agent as he may appoint, in opposition, with power to examine witnesses,*”—have agreed to the following Progress Report,—

In the consideration of the matter referred to them, your Committee have taken the evidence of the Surveyor General, Mr. Jules Joubert, and Mr. J. S. Farnell; but as the advanced period of the Session will render impossible the completion of the inquiry, they deem it expedient at once to submit this Progress Report, with a view to an early resumption of the inquiry during the next Session.

ISAAC SHEPHERD,
Chairman.

Legislative Assembly,
Sydney, 14 January, 1862.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 3 JANUARY, 1862.

MEMBERS PRESENT:—

Dr. Lang,		Mr. Shepherd,
Mr. Lackey,		Mr. Stewart,
Mr. Sutherland.		

Mr. Shepherd (on motion of Mr. Stewart) called to the Chair.

Resolution of the House appointing the Committee, read by the Clerk.

The Chairman stated to the Committee the course he desired to adopt in carrying out this inquiry.

The following Petitions read by the Clerk:—

1. Petition from certain Inhabitants of Sydney, Pyrmont, Glebe, Balmain, and Five Dock, praying that a Bill may be passed authorizing the sale of the Field of Mars Common, and appropriating the proceeds to the construction of Roads and Bridges, so as to connect the lands on the north side of the Parramatta River, by the shortest route, with the Metropolis.
2. Petition from Trustees of the Field of Mars and Hunter's Hill Common, against the resumption and sale of the said Common for the purpose of erecting certain Bridges.

Committee deliberated.

By direction of the Chairman, the Commons Trustees Act, 11 Vic., No. 31, together with Copy of Deed of Grant to Trustees of Field of Mars Common, and By-laws,—read by the Clerk.

Committee further deliberated, and—

[Adjourned to Tuesday next, at *half-past Ten* o'clock.]

TUESDAY, 7 JANUARY, 1862.

MEMBERS PRESENT:—

I. Shepherd, Esq., in the Chair.

Mr. Piddington,		Mr. Lackey,
Dr. Lang,		Mr. Stewart.

Return to address, in reference to the Field of Mars Common, laid upon the Table of the House, on 29 October, 1861,—before the Committee.

Portions of the same read.

The following documents also before the Committee:—

Original Grant given under the hand and seal of Governor King to David Brown, Francis Oaks, and James Squires, and their successors, as Resident Trustees of the Field of Mars and Eastern Farms Districts.

Commons Trustees Act, 11 Vic., No. 31. Copy of Deed of Grant under the same Act, with By-laws.

Copy of plan of the Boundaries of the Field of Mars Common.

Committee examined the same.

Ordered,—That a letter be written to the Surveyor General, requesting him to forward plans of the Districts originally designated as "Field of Mars," and "Eastern Farms"; also,—maps and charts of the country intervening between Ryde and the Hawkesbury River, shewing what portions are available for agricultural purposes.

Mr. Jules Joubert to be summoned to attend at the next meeting.

[Adjourned to Friday next, at *Eleven* o'clock.]

FRIDAY, 10 JANUARY, 1862.

MEMBERS PRESENT:—

I. Shepherd, Esq., in the Chair.

Mr. Piddington,		Mr. Lackey,
Mr. Smart,		Mr. Stewart,
Dr. Lang.		

Petition from J. Blaxland, as Chairman of a Committee appointed "to further the project of Bridging the Parramatta River in connection with the North Shore," presented to the House on the 9th instant, and praying that the Select Committee of this House, now sitting on the subject of the Field of Mars Common, may be instructed to receive, in the capacity of Agent for the Promoters of the said project, some authorized person, who shall be allowed to question and cross-examine witnesses, and otherwise to represent the said Promoters—*read*.

The

Mr. Smart again objecting to a question put to witness by Mr. Heydon,—

Strangers were ordered to withdraw.

Committee deliberated.

Motion made (*Mr. Smart*) and Question—That the Question be not put—*agreed to*.

The witness and agent were again called in, and the Chairman informed Mr. Heydon of the resolution of the Committee, and

Mr. Smart objecting to another question put to witness by Mr. Heydon,—

Strangers ordered to withdraw.

Motion made (*Dr. Lang*) and Question—“That the examination of witnesses be not proceeded with any farther”—*agreed to*.

The witness and agent were again called in and informed of the resolution of the Committee, and withdrew.

The Committee then proceeded to consider Draft Progress Report submitted by the Chairman.

The same read and agreed to.

Motion made (*Dr. Lang*) and Question—“That the draft, as read, be the Progress Report of the Committee,—*agreed to*.”

The Chairman, on motion of Mr. Stewart, requested to bring up the same.

LIST OF WITNESSES.

	PAGE.
Farnell, James Squire, Esq.	19, 24
Joubert, Jules, Esq.	8, 12
M'Lean, Alexander Grant, Esq., <i>Surveyor General</i>	1

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

THE FIELD OF MARS COMMON.

FRIDAY, 10 JANUARY, 1862.

Present:—

MR. LACKEY,	MR. SHEPHERD,
DR. LANG,	MR. SMART,
MR. PIDDINGTON,	MR. STEWART.

ISAAC SHEPHERD, Esq., IN THE CHAIR.

Mr. G. K. Heydon appeared, by permission of the House, as Agent for Petitioner, J. Blaxland, Esq.

A. G. McLean, Esq., Surveyor General, called in and examined:—

1. *By the Chairman:* Have you any charts in reference to the Field of Mars and the Eastern Farms, as originally laid out? I have here two maps—(producing the same)—one being an engraved map, published 22nd November, 1814, purporting to be a plan of allotments of land granted by the Crown in New South Wales. I have also the MS. original of this engraved plan, with which it accords. A. G. McLean, Esq.
2. What is its date? The date I have not got; the date of the publication was 22nd November, 1814. In these plans New South Wales extends only to the Nepean and Hawkesbury River—in fact only the County of Cumberland, and not even the whole of that—and it is divided into several districts indicated by letters from A to Z, Æ, AB, C, D, E, and O C; within these divisions the farms or lands granted are indicated by a series of numbers, and the boundaries of the district are also indicated by colour, very faintly on the original map, and the colouring on the engraved map, evidently done by hand, is somewhat carelessly done; but the series of numbers shew very clearly the divisions of the districts. The districts of the Eastern Farms and Field of Mars are represented by the letters L and M, and by reference to the numbers and colouring in the plans, the whole of the lands in this district can be accurately traced, and I have shewn them, for convenience, by rough pencilling on the existing plans, the general maps of the parishes of Hunter's Hill and Field of Mars. I find that the whole parish of Hunter's Hill falls within the united districts of Eastern Farms and the Field of Mars; part of the parish of the Field of Mars falls within the district of the Field of Mars. The districts, as will be seen by the engraved map, are very irregular in shape; the district of the Field of Mars extending up the Parramatta River, to within a short distance of Parramatta, while it excludes land very much nearer to the common. I shall have no difficulty in preparing a map on the scale of the present parishes.
3. Perhaps you will have the goodness to do so? I shall be happy to do so. In the meantime, if the Committee wish to see the boundaries, they will have no difficulty in tracing them here. (The Committee referred to the map.) I may mention that there was a book published at the time this engraved map was published, entitled "An accurate list of the Names of the Landholders in the Colony of New South Wales, pointing out the number of acres in each District, as granted from the Crown—Corrected to 1813." In this book the names of the grantees are alphabetically arranged

A. G. M'Lean, Esq. arranged by the districts in accordance with the engraved map. The districts are shewn opposite to every name by the letter which appears upon the map—thus, "Augustus Alt, 100 acres, Liberty Plains, letter B, No. 2;" "Archer Isaac, 80 acres, Field of Mars, M, 14." Therefore, I think no doubt can exist as to what was meant by the district of the Field of Mars. Copies of this book are very scarce. This is the only one perfect that I know of in existence. I have another, part of which has been completed in MS.

10 Jan., 1862.

4. Independently of the number of grants mentioned in that book, a considerable quantity of land has been granted subsequently? Subsequently to the publication of this plan a large amount of Crown land has been alienated.

5. *By Mr. Piddington*: Have you any map of the land between the village of Ryde and the Hawkesbury? The engraved map shews it, but vaguely; the whole of the ranges have been traversed, and the other features have been sketched in, but I find very little descriptive writing as to the quality of the land. The original plans shew, however, that it is a hilly, broken country; and although I have no personal knowledge of the country from actual observation, I am pretty well acquainted with it from the information I have derived from others of the character of the country.

6. Have you those charts here? No; they will convey no information as to the quality of the land.

7. With regard to the acreage, my object was to ascertain the acreage of the land that has not been sold yet? The acreage is very extensive.

8. The quantity of unsold Government land between the village of Ryde and the Hawkesbury is very considerable? Very considerable.

9. Have you any idea of the number of acres? I should think twenty miles square.

10. Twenty miles square of unsold Government land between the village of Ryde and the Hawkesbury? Yes.

11. Do you think if the proposed bridge were constructed over the Parramatta River at Five Dock, the probability of selling this land would be increased? I think it would be somewhat increased.

12. Would not that district be brought into much easier communication with Sydney than it is at present? I do not think the facility of communication would be very much increased, because there is a road now on the northern side of Lane Cove, called the Lane Cove Road, which is a tolerably good road, and leads to a ferry to Sydney direct, and which affords access to the eastern portion.

13. I am now speaking of the increased facility of communication between these Crown lands and Sydney that would be afforded by a bridge over Parramatta River—say at Tarban Creek, or that neighbourhood? I do not think land at that distance would be benefited to a like extent that alienated lands would be by the construction of this bridge, because, as I say, the eastern portion of the twenty miles square has more direct communication by Lane Cove Road than they would by bridges.

14. My question is not directed to the comparative advantage of lands in the immediate neighbourhood and lands at a distance, but I ask whether, if a bridge were erected, the land would not be more likely to be sold than it would be without the bridge? Unquestionably they would be more likely to be sold.

15. There is no bridge across the Parramatta River at present? There is none below Parramatta.

16. Do you not think a bridge over the Parramatta River would facilitate communication between the northern shores of Parramatta River and Sydney? Very materially; but the facility would be very much increased by the erection of the other contemplated bridge at Lane Cove.

17. I speak of the two bridges as one? Yes.

18. *By the Chairman*: In giving your opinion in reference to the quantity of unalienated land, do you speak to the quantity shewn upon the plan or the actual quantity now? The quantity remaining; I have a very fair general impression of what has been alienated since, but it does not bear a large proportion.

19. Have you any knowledge of your own, or derived from plans, as to the quantity of that land which is adapted for agricultural purposes? I have, perhaps, no definite knowledge upon the subject; but I have of course, in my position, a very general knowledge of the character of the land throughout the Colony, and of the desire of the public to possess itself of land belonging to the Crown; and I know in this district I allude to, the only tract some years since in the possession of the Crown which is available is at a place called Dural. I know from the surveyors who had instructions to measure the whole of the available land, that there was no more in that vicinity; and I know from my experience, which extends over a good many years, that there has been very little application for the land alluded to between the Field of Mars parish and the Hawkesbury.

20. What is your conclusion in reference to the quality of the land, from the small number of applications made for purchase? I believe that there is no considerable extent of land adapted for cultivation.

21. Between the northern portion of the Field of Mars Common and the Hawkesbury River? Exactly, in a northerly direction.

22. If it were to come round Pittwater and the coast, there are portions of good land there? Yes, tolerably good.

23. Consequently, supposing there were additional facilities of transit across this river, you would not increase the quantity of Crown land open for selection? It would not increase the quantity, but it might increase the demand; it would to some extent—to what extent it is difficult to say.

24. Suppose the land were not adapted for agricultural purposes, is it a situation desirable for building purposes? It is rather remote for mere building purposes.

SELECT COMMITTEE ON THE FIELD OF MARS COMMON.

25. Is there any access by water to it? By creeks of the Hawkesbury, Berowra Creek, A. G. McLean, Esq. and Cowan Creek.
26. Then in fact there is access to that portion of the country by the Hawkesbury River? The access by the Hawkesbury is not very convenient, as the banks are generally very precipitous; but by these creeks joining the Hawkesbury there is access. The access by the Hawkesbury is not very convenient. 10 Jan., 1862.
27. These creeks would be more desirable than the Hawkesbury itself? Yes.
28. *By Dr. Lang:* What is your opinion as to the desirableness of having large portions of Crown lands existing in a state of common in the midst of an agricultural and advancing population? I think the lands are not put to such beneficial uses as if they were in private hands. I think if they were sold they would be more beneficially employed.
29. If the commoners received compensation for their individual interests? Yes.
30. Supposing there were such access provided by the construction of the contemplated bridges to the large portion of land still in the Crown, is it your opinion that facility of access would give increased value to that inferior land of twenty square miles? Undoubtedly it would give an increased value, but not a very materially increased value, in my opinion.
31. *By Mr. Stewart:* In the correspondence published I see a letter from Mr. D. N. Joubert to the Secretary for Lands, in which he states, "The immenso tract of country situated between the Parramatta River and the Hunter, containing about 1,500 square miles, or 960,000 acres of Crown Lands, now totally useless and unavailable, because they are inaccessible either by land or water." Is there that quantity? I think that quantity must be over-estimated. It is probable that he has estimated all the way to the sea on the one hand, and to the Hawkesbury River westward on the other. I must mention, as one ground for my opinion, that there is not much demand for land, and that the land is not of a very available nature; that some time ago a road was opened by Captain Perry, by Peat's Ferry, over the Hawkesbury to Brisbane Water, and with a branch to Wollombi, and a considerable sum of money was spent by Government upon that road. This road is accessible from roads coming into Ryde, and also from the Lane Cove Road, but I do not think a single portion of land, certainly not above one or two portions of land, have been sold on that road, although a ferry has been established on the Hawkesbury. No settlement has taken place, and no quantity of land has been sold, and from what I have heard from Captain Perry himself and others, of the character of the country through which this road passes, there is no available land in the vicinity. I am now speaking of the road crossing at Peat's Ferry, leading to Gosford; there was a branch opened from that to the Wollombi.*
32. From your knowledge of this part of the country you do not think this could be realized, that a large proportion might be surveyed and put up for sale? I do not think a large proportion would be disposed of.
33. *By Mr. Lackey:* Could you form any estimate of the price this land would be likely to average, supposing it were sold to-morrow—I see in the letter to which reference has been made, it is stated that it (I allude to the common land) would sell "even now, at an average price of £10 an acre, and realize a sum of at least £60,000?" I think Mr. Langley made an estimate; he spent several days in inspecting the land of the common; he considers that about five-eighths of it is good land.
34. Do you know the common? I have been on it, but I know very little from my personal knowledge. In forwarding the letter of Mr. Langley, I stated—"Mr. Langley has spent some days in the examination of the common, and considers that five-eighths of it is good land." I had previously said, from an examination of the surveys of the department, "that probably five-sixths of the land is poor, sandstone, rocky land"—but Mr. Langley, who was specially engaged to go over it, and who had had great experience in the City of Sydney and its suburbs, says five-eighths consists of good land. I say—"if this be the case, if the bridges referred to, be constructed, and the common were brought into the market gradually, I am of opinion that a higher average than that estimated by Mr. Langley would be realized, perhaps £6."
35. You are of that opinion? Yes; if he is right in his estimate that five-eighths are good land.
36. You say that differs materially from the information you had in the office? The information I had was derived from surveys of the boundaries only of the common—as the surveyor, in marking the boundaries of the common, became acquainted to some extent with its character, he recorded it on the plan, and it appears from this record that something like five-sixths was poor land; but Mr. Langley's business was to traverse the common, and to ascertain to what extent approximately there was good land.
37. *By the Chairman:* Did he make an actual survey in order to ascertain the contents? No, he did not make an actual survey, but he had this plan and he traversed it.
38. Who estimated the quantity of good land at one-sixth? The estimate is made from Mr. Galloway's plan.
39. He estimated it at one-sixth? No, I estimated it from his plan that five-sixths was bad; but I could not form a correct estimate from that, as it was merely a plan of the boundaries.
40. You do not speak from your own knowledge, but gain your information from Mr. Langley and from Mr. Galloway? Yes, I speak from my own knowledge, as far as regards the value of the land, for I see what Crown Lands sell for in the County of Cumberland.
41. *By Mr. Stewart:* As far as I understand you, you are now speaking upon the supposition of a bridge being formed—What would it be worth in its present state? That can be

* NOTE (on revision):—In making this reply I did not understand that Mr. Joubert's estimate extended to the river Hunter, and to that river the quantity is not over-estimated. I do not, however, consider that the opening of the road and bridges would have any effect on the sale of land north of the Hawkesbury River.

A. G. M'Lean, Esq. be only matter of opinion; but I think the value of the land would be doubled by the erection of the bridges.

10 Jan., 1862. 42. If the land would be worth £6 then it would be worth £3 now? Yes, I know that land on the other side of Lane Cove, of the most indifferent character, which I have some personal knowledge of, and which I know from the reports of various surveyors, is of the most indifferent character, has gradually been sold by the Government at £10 an acre.*

43. On this side of Lane Cove? Yes, within the last seven or eight years, several portions have been frequently put up, and only one or two have been sold at a time; but from time to time a great deal has been sold in that vicinity.

44. That would be probably close to Parramatta River? No, it is close to Lane Cove, and it is accessible by the steamer from the North Shore to Sydney; but I know it is the refuse of the land, all the best having been sold or granted years ago.

45. How long is it since it has been sold? Some within the last two or three years. I suppose it has been under sale from ten years ago until about two or three years since.

46. Have you had any of this description of land for sale within the last twelve months or two years? I do not think any of that has been put up within the last twelve months or two years. I think almost the last must have been put up about two years ago.

47. *By the Chairman*: The object of my question was to ascertain, from your knowledge of the general features of the country, your impression of what the land would realize now? I think the value, if the bridges—

48. I am not speaking of the bridges? I should say then about £3. I do not think if it were all put up to-morrow £3 would be realized, or that it would be all sold.

49. *By Mr. Piddington*: Do you think if bridges were erected, and some period of time were to intervene between the sale, this land would produce £6? Yes. I should not say that all could be sold within two years; but for some distance from the river a large extent might be thrown into the market and would sell easily.

50. If the Government had authority to sell the land, and exercised discretion, do you think it would produce £6 an acre, if bridges were erected? Yes, assuming Mr. Langley's estimate to be correct.

51. *By the Chairman*: You base your opinion upon Mr. Langley's estimate, and not upon your own knowledge? Yes.

52. *By Mr. Heydon*: Have you any confidence in Mr. Langley's report to you—do you know enough of Mr. Langley to enable you to place confidence in the returns he makes? I do not say that I entirely want confidence in Mr. Langley's estimate, but I have the impression that he has over-estimated the extent of good land. He does not himself profess it to be an accurate estimate.

53. It is of course all surmise on his part, and as you do not know anything about it, you cannot attempt to correct his estimate from your own knowledge? No.

54. You were speaking just now of land sold on the north side of Lane Cove River, on the opposite bank to the common—was that frontage to the Lane Cove River? Not entirely.

55. How large a district did you speak of when you referred to the land put up within the last ten years? I should think it extended back from Lane Cove River some two miles or two miles and a-half.

56. And up this river from its mouth at the Parramatta River, how far? It goes up to the creek called Blue Gum Creek. The land I particularly allude to is possibly four miles up from the mouth of Lane Cove River.

57. On the opposite bank of where the common extends? Yes, the common extends far beyond.

58. This land is precisely similar to the land of the common, so far as its distance from Sydney is concerned? No, it possesses the advantage that it has access to what is called the Lane Cove Road, and therefore the people residing there can come to Sydney with a vehicle across the Ferry at Billy Blue's Point.

59. There is no bridge for them any more than for the Ryde people? No, but they can come right into Sydney, while the other ferry leaves the people of Ryde above eight miles from it.

60. But the ferry at the North Shore, at Billy Blue's, is a steam ferry? Yes.

61. Along the Parramatta River there are wharves where the people can stop, who go in the steamer, so that the facilities are the same—as regards vehicles there is a punt established at the Parramatta River? There is a punt at Parramatta River, and a steamer at Billy Blue's Point. The advantage on this side of Lane Cove is that people can come into Sydney with their carts and vehicles, and bring in their produce.

62. You were asked as to the time within which sales of this land at Lane Cove had been effected—will you be kind enough, when you correct your evidence, to state whether some land was not sold there last year? I will. Land has been sold higher up Lane Cove, but not I think at that place, more recently than I have stated.

63. Do you remember the highest price realized for that land? I am speaking of land put up at £10 an acre, and sold at that.

64. Do you know of your own knowledge the quality of that land? It was very indifferent.

65. You know something of the Ryde district? Yes.

66. Was it worse or better than land in the district of Ryde? Very inferior to the land at Ryde generally.

67. We have been speaking about ferries, and the bringing of produce to Sydney—do you not think it makes a great difference to these settlers—their being able to come with their own vehicles,

* NOTE (on revision):—I find by reference to records that the land referred to in this statement extends back from Lane Cove scarcely one mile, and that it has been sold from March, 1855, to March, 1859; and that, although some of it has realized upwards of £16 per acre, it has not averaged above £5. My statement that it realized £10 is therefore erroneous, my memory having misled me.

vehicles, and to return without using the steamer? That is the advantage of these people who come by Billy Blue's Point, over those on the other side. A. G. McLean, Esq.

68. Do you not think if there were a punt, even at that particular spot, even with the present road, the people would be greatly benefited as far as Dural, Wiseman's Ferry—do you not think they would prefer coming by that road to going round by Parramatta? I do not think the people at Wiseman's Ferry would benefit much. 10 Jan., 1862.

69. Would it not be shorter and more convenient for them to come to Sydney by the present north road across in the punt, than to go round by way of Parramatta? It would be shorter to do so; whether they could do it in less than they could by Parramatta, coming by railway, is a question.

70. I am not speaking of the railroad? If the railroad did not come to Parramatta, that would make all the difference in the world.

71. You are aware that this scheme of bridges across Parramatta River and Long Cove has been thought of for some time by the authorities? Yes.

72. Have any steps been taken by the Government in reference to that end? The road has been surveyed by the Government from the Glebe to what used to be called the Great North Road, in the vicinity of Tarban Creek, and the first notice has appeared—the preliminary notice under the Road Act. Certain claims for compensation, or, more properly speaking, objections to the road unless compensation were made, have been under the consideration of the Government, and the result is, that pending the determination of Parliament on the sale of the common and the erection of bridges, the road should not be proceeded with; but should Parliament determine that the common should be sold, and the bridges should be constructed, the objections to the road are not such as to raise any difficulty to its opening.

73. Supposing these bridges to be built and the roads to be made, will you be kind enough to tell the Committee what will be the shortening of the distance—say from Tarban Creek Asylum to Sydney—as compared with the present north road by the punt? I do not remember the precise difference of distance. I think something like five or six miles.

74. Do you know of any Government land having been sold on the south side of Lane Cove River within the period we have been speaking of—the last ten years—between the common and Parramatta River? I think there has been no land sold there.*

75. Then there is no means of ascertaining what such land would fetch under Government regulations, of course? No land similarly situated.

76. You began your evidence by giving us some idea about the boundaries of the district; have you seen the grant for the common? I have seen the grant for the common. The boundaries I gave to the Committee were the boundaries of the district of Field of Mars and the Eastern Farms.

77. Do you know whether any mention was made of the district of Hunter's Hill, or of the parish of Hunter's Hill, in that grant? I am not aware; I think it is highly improbable, for the district of Hunter's Hill was then in what is now the parish of Willoughby.

78. Is that between North Head and Middle Harbour? Yes.

79. The name of Hunter's Hill was never applied to the neck of country west or south of Lane Cove? In my experience, it has always been applied as a parish to that country west and —

80. I am aware of the difference between the district and parish; I am speaking now of the district of Hunter's Hill. (*The witness referred to the original grant which was handed to him by the Chairman*)? I do not see in this old grant any mention of Hunter's Hill.

81. It is confined to the district of the Field of Mars and the Eastern Farms? Yes.

82. Does your map shew the common as it existed under that grant? I am not prepared to say that there is no change whatever in the boundaries of the common, as held under the present grant.

83. Are you aware whether, when the second grant was issued, consequent upon the lapsing of that one, there was any alteration in the boundaries of the common? I do not believe there is any material alteration, but I cannot say positively there was no alteration.†

84. Will you give us that information when you are correcting your evidence? The common is described in this grant at 5,060 acres; it is now estimated at 6,200.

85. I suppose you are aware that these descriptions were often contrary to facts? Yes.

86. Are you able to give the Committee any information of the fact that that grant did lapse? No, I cannot say positively.

87. The land we were talking of as having been sold on the north of Lane Cove River, within the last ten years, at £10 an acre—this inferior land is not all sold, I presume? I think the land to which I refer is nearly all sold.

88. Then, if I understand you, the land for two miles back is sold? Yes, and the land at the back of that was sold or granted long since.

89. If the proposed bridges should be built, and the proposed roads in connection with them used, the land you speak of now, although on the other side of the Lane Cove River, and on the other side of the common, would not be much benefited by these bridges and roads? The land on the other side of the river?

90. That you say has been sold within the last ten years—would not these bridges benefit these

*NOTE (on revision):—In reference to this reply, I may add that land near the north-west end of the common, and which was noted by Mr. Galloway, in his survey of the common, as "soil and timber very good," was sold in 1856 at about £5 per acre, some having realized as little as 25/-; some land which had been cultivated and built on sold at the same time, of course at higher rates.

†NOTE (on revision): I find that the only change in the new common grant from the old common is the exclusion of 30 acres of the latter, which was sold, by mistake, by Government.

A. G. McLean, Esq. these people? I do not think they would materially benefit the proprietors of land to which you allude, though it would benefit the people higher up the Lane Cove River, as they would have to cross by a punt.

10 Jan., 1862.

91. Would not these new bridges be an advantage even to these people? I do not consider it would be a benefit to the proprietors of land to which I have alluded, except in so far as they would partake of the general benefit that would result from the settlement of population in their vicinity which might take place.

92. You think the reason why it would not benefit these people is that they would have the river to cross, and must needs have a ferry? That is one reason; the other is that Lane Cove River flows through what is almost a gorge. The land on its banks, except in patches, is almost of a valueless character; that which is of any value is more on the summit, on the table land, and the access to Sydney by the ferry at Billy Blue's Point would be far easier than by the Parramatta River.

93. Because of the precipitous banks? Yes.

94. Then precipitous banks are of those things which make a ferry almost useless? If there were only one outlet, precipitous banks would not be a bar to a ferry; but if there were another outlet, they would be a strong argument against the establishment of a ferry.

95. What is the nature of the approach to the river at the present punt—is it such as, in your opinion, prevents people bringing down large loads of hay—would it be difficult to get a large load of hay into the punt and to draw it up on the other side? I think a load of hay that might be taken by a team along a good road could not, with safety, be taken down to the punt on the Parramatta River.

96. I think you have stated that the common land which lies along the southern bank of the Lane Cove River, as far as you know, is better than the land on the other side which has been selling for the last ten years? No, I do not think I have stated that; but I do believe, from the knowledge I have derived from the maps which have been so long under my observation, and other sources, that a large proportion of the common is very superior to this land I have spoken of.

97. Land on the other side has been realizing £10 an acre, and yet the occupants have not had the facility of coming to Sydney except by a road by Billy Blue's Point? Yes.

98. Do you not think the common land, if sold even with the present convenience we have, would be likely to bring as much as land on the other side two miles back from Lane Cove? I do not think it likely to fetch so much as that land did fetch, for landed property has not increased in value of late years; and I am aware, from my observation, that the sale of this land has been by a very slow process. People have merely bought it on speculation, because there was so little Crown land still existing near Sydney. I am not aware that the land has been improved, and I am quite certain if the holders were now to sell, the land would not realize the same price.

99. You know the district of Ryde? Yes.

100. Supposing it were as near to Sydney as any other place where gentlemen select sites for country residences, what do you think of it as a picturesque locality—is it as good or better than other localities round Sydney? I think it is almost as pretty a country as any in the vicinity of Sydney; and with this advantage, that it has better soil.

101. Do you not think it the most picturesque locality in the neighbourhood of Sydney? Well, I think it is.

102. Of any at the same distance from Sydney? Yes.

103. I suppose I may naturally infer from that, that if facilities for getting to and fro were offered, many of the rich inhabitants of Sydney would prefer it to any other for their country residences? I think very likely it would become a favourite locality, but at the same time I think, for the greater part of the community it is at too great a distance for persons who have to come to town daily.

104. Are you not aware that a good part of the common is within the municipality of Hunter's Hill? I think very little, if any.

105. Does not the common extend down the Lane Cove River to a point eastward, westward of the municipality? I am under the impression that the boundaries of the common and of the municipality are almost identical.

106. *By the Chairman:* In speaking of this picturesque situation you refer, I presume, to the vicinity of Ryde? Yes.

107. You are not speaking of the situation of the common? I think when it becomes cleared and occupied, portions of the common may be perhaps as picturesque as the country about Ryde.

108. Have you been over the common? No.

109. In point of fact, you do not know the situation? No.

110. You were speaking with reference to the ferry crossing Parramatta River? Yes.

111. In what state was the road to and from the ferry, on both sides, when you last saw it? I think the road on the south side of the river was in a very indifferent state, but on the north side it was tolerably good.

112. Do you consider that the fact of having a tract of land set apart as a common, for the use of residents, tends to enhance the value of their property? I think undoubtedly it tends to enhance the value of the property.

113. Does it materially enhance the value of the property? I have already expressed my opinion that if the common land were divided —

114. I am not speaking of that, but speaking as a proprietor; do you imagine that the fact of land being set apart as a common tends to enhance the value of property in its neighbourhood? I say it would enhance its value.

115. *By Dr. Lang:* I presume the degree in which it would enhance the value of the land would depend upon the use the commoners could make of it? No doubt.

116. *By the Chairman*: With reference to the opinion you have held of Mr. Langley, did you at any time recommend to the Government that they should appoint any parties, independent of Mr. Langley, to value the common? I made the recommendation that Mr. Gorman, of Messrs. Mort & Co., and Mr. Richardson, should make a valuation, and I have no doubt that a much more reliable opinion of the value of the common would have been made by this means. I promised to assist them, by having the boundaries of available land surveyed, to enable them to determine its extent.
117. *By Mr. Langley*? I did not mention Mr. Langley, but probably he might have been employed.
118. You did not recommend Mr. Langley as a desirable person to value this common, except in connection with these persons? I think I did afterwards. Speaking from memory, I think Mr. Robertson said the Government did not desire to have such a precise valuation as would be arrived at by the process I suggested; that it would be quite sufficient for some surveyor, who knew something of the value of property, to ride over it and make a valuation, and as Mr. Langley was a person who had had some employment from Government, and some experience of the value of land, he being at that time, as well as at present, a land agent, I employed him, to obtain from him information of the approximate value, as Mr. Robertson desired.
119. From the first onset you recommended that Mr. Gorman and Mr. Richardson should value the land, and that they should be accompanied by Mr. Langley as surveyor? I do not think I said Mr. Langley.
120. In point of fact, these are the parties you recommended as valuers? Yes, and no one can deny that their valuation would be more reliable than Mr. Langley's, or that of any other person in the Colony.
121. In reference to the construction of these bridges that have been contemplated, have you had Parramatta River surveyed? There has been no recent survey of the river itself; some soundings have been taken at the suggested crossing-place.
122. By direction of the Government? Yes.
123. Out of your office? Yes. You will see that in the printed correspondence, at page 4, letter No. 5.
124. That is with reference to the cost, not as to the most desirable situation—what I want to know is, whether the Government have had any actual survey, to decide which is the most desirable place? They have made no new surveys, but it was proposed to send the tracings to Mr. Moriarty, and his estimate as to the probable cost would have had an influence as to the determination of the site, but on other grounds the eastern site would be the most suitable.
125. *By Mr. Heydon*: Do I understand you to say that is actually the shortest road? The shorter road of the two crossing-places.
126. Where is the other? At Bedlam Ferry.
127. *By the Chairman*: Then I understand you that there has been no new survey of the Parramatta River, to ascertain the depth, the width, and the cost of constructing a bridge? No, the depth has been taken only at these two places.
128. And this site has been expressly recommended by Mr. Langley? Yes, and I have no reason to doubt that it would be the most convenient.
129. *By Mr. Lackey*: There are several commons set apart in various parts of the Colony, for the use of the settlers and inhabitants in the vicinity? Yes.
130. Has any instance come under your knowledge of any of these having been alienated for particular purposes? No; I think a new grant was issued for Ham Common, and some alterations of the boundaries may have been made, to make them accord the better with the town of Richmond. Some few acres I think have been taken out of the common.
131. But not as a principle? No.
132. Do you think the majority of the occupants of the northern portions of the Field of Mars and the Eastern Farms would use this new road or the old road by Parramatta? I think the majority of the occupants of the Field of Mars and Eastern Farms would use it; but the majority of the northern and western district of the Field of Mars might be a portion embracing 50 acres, or might be a portion embracing 200 or 300.
133. I presume you are of opinion that the population of Hunter's Hill would be considerably increased by the construction of these bridges? Yes.
134. Do you think it possible any surveyor, who might be employed to survey the Field of Mars Common, might be induced to put a favourable estimate upon it, in the hope of getting the subdivision of it in the event of its sale? That is so very remote a contingency that I scarcely think it would be a sufficient inducement to put a favourable estimate upon it.
135. *By Dr. Lang*: Supposing there are no instances in this Colony of commons having been divided by Act of Parliament, are there not many instances within the last fifty or one hundred years, of the discommoning of old commons in the Mother Country? So far as my information goes from reading, I believe to a very great extent commons have been done away with and divided.
136. So that, if we have no precedent in this Colony, there is an abundance of precedents at Home? Unquestionably.
137. Are these Acts of Parliament for discommoning the commons in England not based upon the general principle that land is much more valuable to the State, when held by individuals, than when held in common by the community? I presume they are based upon those principles, but I scarcely think it is a point upon which my opinion is of much value, being so remote from the scene of action, and having no time to read upon the subject.
138. *By the Chairman*: In the event of the resumption of this common, how would you propose

A. G. M'Lean,
Esq.
10 Jan., 1862.

A. G. McLean, Esq. propose to compensate the persons entitled to commonage? No doubt they would derive compensation from the increased value that would be given to their properties.

139. Where would be the increased value—that would be a matter of opinion.—In case any of the proprietors objected, in what way would you propose to compensate them? It is a subject to which I have given very little consideration, but it did occur to me that a sort of division of the common might be made, and that those persons who have a right to the use of the northern and western end, near Parramatta, who think their property would not be improved by the alienation, might retain a portion, while that portion nearest Sydney, which is the most valuable, might be sold.

140. You consider that portion nearest Sydney the most valuable? I consider it to be so, from its situation.

ADDENDUM.

I THINK it right to add to this evidence an explanation of the reason why no survey of the Parramatta River was made, with a view to the selection of the bridge site, and in reference to which the Chairman addressed to me some questions.

The present road by Bedlam Ferry to Ryde, &c., follows the Parramatta or Main Western Road for upwards of six miles, and in doing so runs south (by George-street) from the centre of Sydney, and heads Darling Harbour, Blackwattle Swamp, Johnstone's Bay, Long Cove, and Iron Cove.

The object sought by the proposed erection of bridges is to lessen this distance, and the existing Pyrmont and Glebe Island Bridges obviate the necessity of heading the three first-named arms of the harbour. By following a nearly direct line to Ryde, Long Cove is crossed at the narrowest and most favourable point, and the most direct line thence to the centre of the district of Field of Mars and Eastern Farms, would cross the Parramatta River at the proposed site of the bridge, viz., Five Dock Point.

It is only then necessary to consider whether any other spot possesses advantages over this site, which should induce a deviation from the proposed and direct line. It is obvious to any person having the slightest acquaintance with the river, that there is no point lower down than Five Dock which possesses such advantages; and it is equally obvious that were the crossing above Hen and Chicken Bay the road would be materially lengthened, and would be useless, or nearly so, to all the eastern part of the districts referred to.

The question is thus narrowed to that of crossing at Bedlam Point, at or near Blackwall, and at Five Dock Point, and although the road to the two former would have to head Five Dock Bay, and would therefore be considerably longer, I had an examination of it made, and a section of the river at Bedlam Point taken.

From this examination, it appears that the land at the head of Five Dock Bay is low and unsuitable for a road; that a road there would interfere with many enclosures, through which it could not, under the Act, be carried contrary to the wishes of the owners, and that the water is considerably deeper than at Five Dock Point, which, subject of course to the Report of the Officer of the Works Department, as to relative cost of bridges, is, in my opinion, unquestionably the best site, and to which the road may be opened without objection on the part of the parties owning the land.

A. G. McLEAN.

21 January.

Jules Joubert, Esq., called in and examined:—

- J. Joubert, Esq. 141. *By the Chairman:* You are Secretary to the Committee having for its object the building of bridges across Long Cove and Parramatta River, the selling the Field of Mars Common, and expending the proceeds in the above object? Yes.
- 10 Jan., 1862. 142. Where do you reside? At Hunter's Hill.
143. Are you a landholder? Yes.
144. To what extent? Ten or fifteen acres.
145. What means of transit have you from Sydney to Hunter's Hill? By boats, and also by a punt across Bedlam Ferry.
146. In speaking of boats do you mean ordinary boats or steamboats? Steamboats when you can get them, and other boats when you cannot.
147. Are steamboats plying regularly on the river? Very irregularly.
148. Do they ply daily? Yes.
149. How many times a-day? Three times up and three times down.
150. When you speak of irregularly, do you mean to say that they do not ply daily, or do you refer to the hours at which they ply? I mean to say that we are at present entirely at the mercy of the owners of the steamers.
151. I am speaking of the irregularity—I wish to know what you mean by regularly or irregularly—whether you mean daily or during the day? I mean that the hour at which the boat starts from Sydney is constantly changed; sometimes it is six o'clock, at another four, at another five, and at another a quarter past five, and so on.
152. Do the proprietors of the steamboat give notice of the changes? Sometimes.
153. How far is it from Sydney to Hunter's Hill? Which way?
154. You say generally your mode of transit is by boats? Four miles and a half.
155. Your general means of transit is by steamboat? By steamboat. I am speaking personally.
156. How long does it take a steamer to pass from Sydney to Hunter's Hill? About half an hour—under half an hour.
157. How much under? Two or three minutes.
158. What is the fare from Sydney to Hunter's Hill? Eighteen-pence.
159. What is the contract fare? £1 a month.
160. What particular privilege have you by contracting—are you at liberty to go up and down six times, or only once a day? As often as the steamer plies.
161. Six times a day for £1 a month? You could not do it six times, because sometimes one boat leaves before the other arrives; however you can go as often as you like.
162. Being the secretary for the construction of these bridges, do you consider that if these bridges were erected over Iron Cove and the Parramatta River, they would materially increase the value of property at Hunter's Hill? Most materially.

163. To what extent do you consider? I can hardly form an idea to what extent; it would increase it to any extent; it would render the property at Hunter's Hill, which would then be within four miles of Sydney, equal in value to that of Point Piper, which is now at a distance of five miles and a half.

J. Joubert,
Esq.

10 Jan., 1862.

164. That is your opinion—I suppose you have got no proof—it is merely a casual opinion of your own? It is my opinion; and I have dealt in land in the suburbs of Sydney to a large extent within the last ten years.

165. I believe you act as a builder—that in fact you buy land, erect cottages, and then sell them with the land? Yes.

166. Do you know from your own knowledge the boundaries of the Field of Mars Common? Yes.

167. Do you know how far north the boundaries of the Field of Mars Common extend? Yes, the boundaries have been shewn to me at the northern end by residents in the neighbourhood.

168. How do you know they know? Faith is everything.

169. You believe they were pointed out to you? I believe they were pointed out to me.

170. You do not know of your own knowledge? I do not believe anyone in the Colony could say exactly where the boundary is, without the common were properly surveyed, but I know where the boundary is, I dare say, within a quarter of a mile.

171. You have been round the boundaries? I have been round most of them. I believe I know the common as well as most people.

172. *By Dr. Lang:* Is it your opinion that the commoners derive very important advantages from their right of commonage? I believe with very, very, very, few exceptions, they do not derive any whatever.

173. Do the advantages they do derive consist of the right of depasturing stock upon it? No, I think that has entirely fallen away, from the want of grass; a few may derive advantage by cutting a few saplings for firewood, and getting Christmas-bushes to bring to Sydney once a-year.

174. Do you not suppose that the loss of their present privilege would be a great calamity to the commoners generally? I think it would be quite the reverse.

175. Do you think the construction of the proposed bridges would greatly enhance the value of the property of all the commoners? I believe so.

176. Have you been over the common generally? Very often.

177. What is the character of the land so far as you have seen it? That portion of the common which is bounded by Lane Cove River is, to about varying from a quarter of a mile to half a mile, rocky table land fit for building purposes; the rest of it goes on improving as you go southerly to the settled districts of Ryde and Pennant Hills, and when it arrives at that boundary it is equal in quality to the lands forming those districts.

178. Do you think if it were subdivided into small farms it would constitute eligible properties for small settlers? I think so.

179. Or for the erection of villas? I think, taking it as a whole, the common is a very saleable property for small farms, dairies, and building sites.

180. Would the construction of these bridges generally enhance the value of the land now forming the common itself? Decidedly.

181. Do you know generally the persons who have, under the grant, rights of commonage? I know many of them.

182. Would it be difficult to ascertain the number of persons having rights of commonage under the grant? It might be ascertained; I can only speak of those who come under my own jurisdiction, as having to do with the municipality.

183. Are you aware whether those of them you know are generally in favour of the proposed improvements? I think nearly all are in favour of them.

184. Supposing that a majority of those at the other extremity of the common were opposed to the proposed improvement, do you think it would be practicable to divide the common, so as to reserve a portion of it for their use? The impracticability of the division of the common, in my opinion, lies in this, that the portion of the common that would be reserved as a common, by the people at the other end, would not be just, inasmuch as they would derive as much benefit from the bridge and road as the others, and would not sacrifice a jot of their right in the common.

185. Do you think the principle of compensation would be acted upon, in regard to those of the commoners who conceived that the improvements would subject them to considerable loss? I think they would be amply compensated by the fact not only of having a more easy and direct route to Sydney, but by having a large population brought to their doors, which must enhance the value of their property.

186. You do not think they would be entitled to any direct pecuniary compensation? No.

187. *By Mr. Stewart:* Have you any knowledge of any extent of country beyond that which is likely to be opened up? I have ridden over it, but not enough to give an opinion.

188. The district you are acquainted with is likely to gain considerable advantage? Yes; the advantage of the road, and of there being six or seven thousand acres built upon and improved.

189. *By Dr. Lang:* What is your opinion of Mr. Langley's valuation of the common—do you think he has over-estimated its value? I think he has undervalued it. I speak from my own experience as having dabbled a good deal in land speculations in that district, on both sides of the river.

190. *By the Chairman:* In speaking of having dabbled in land speculations on both sides of the river, do you refer to the immediate district of Hunter's Hill? I speak of the district of Hunter's Hill, and of the north side of the Lane Cove River.

191. Supposing these parties who are entitled to the use of the common were to surrender their

- J. Joubert,
Esq.
10 Jan., 1862.
- their right, and the Government were to sell the common, and the proceeds were to be expended in the erection of these bridges, do you imagine that these parties, having given up the right of the common, should pay toll for crossing these bridges? No, I do not think they ought to pay toll.
192. In point of fact you think they ought to be free? Yes.
193. How would you distinguish between parties originally entitled to commonage and others? I would make the bridge open to everybody. We are all commoners in this world.
194. *By Dr. Lang*: Do you think the construction of these bridges would be an important benefit to the City of Sydney, as well as to the inhabitants of the country beyond the river? I think so. It would benefit not only the district to which the Field of Mars belongs, but also Sydney, and in fact as far north as you like to go in Australia, for if this saves four or five miles distance, it is a benefit to all who travel.
195. *By the Chairman*: Would you allow those parties who have no right of commonage similar privileges to those who have? What privilege do you mean—the privilege of going over the bridge without paying for it? Certainly.
196. *By Mr. Stewart*: How do you propose to meet the expense of wear and tear—out of the general revenue? Yes. I do not think I am a judge of such an important question.
197. Perhaps the surplus of the amount derived from the sale of these lands would form a fund to meet that? Yes.
198. *By the Chairman*: Would you sell the common previous to building the bridges? No.
199. You would build the bridges before the sale of the common took place? I would sell the common from the time of passing the Bill.
200. I ask you whether you would build the bridges previous to the sale of the common? I would begin the building of the bridges.
201. How do you propose the necessary funds should be raised for the purpose of building bridges? By means of debentures made payable in a certain number of years; and during the time that would elapse between this and the debentures becoming due, the Field of Mars should be placed in the market, so as to meet the debentures when they became due. I believe if that plan were followed there would be ample funds.
202. You propose that the Government should raise the necessary money to build the bridges, and that in the course of twelve, fifteen, or twenty years, the common should be sold? Yes.
203. You think that if the common were sold before the bridges were built it would not fulfil the intention? It would, but not so well; if the bridges were built the land must improve and fetch much larger prices.
204. *By Mr. Heydon*: You have been one of the promoters of this project from almost the commencement? Yes.
205. You and your brother have been residents at Hunter's Hill for some time? Yes, for many years.
206. For how many? Since 1846.
207. Was it then populated to anything like the extent it is now? No; there were one or two small huts in the neighbourhood. We took Mrs. Reiby's place.
208. Do you know whether Parramatta River was anything like a fashionable suburb at that time? No.
209. Did any of our gentry live up the river then? Yes, a few.
210. Did Mr. Darvall? Yes.
211. Where did he live? Either where Mr. Shepherd lives or higher up; there were a few near Parramatta, but none whatever from Kissing Point downwards.
212. Were the steamers running to Hunter's Hill at that time? They were running past, but did not stop.
213. Where did they stop? At Kissing Point only.
214. Speaking of Hunter's Hill, how lately have you had steamers calling there? Five years and a half or six years.
215. Do you know how many inhabitants there are in Hunter's Hill Municipality? 420.
216. Is that considerably more than there were when the steamer began to run? Yes.
217. How many? If there are 420 now, 415 more than there were then.
218. Then do you attribute the increase in the population of Hunter's Hill to the stopping of the steamer there? I believe it has sprung up within the last seven years.
219. Before the steamer was plying regularly of course you had to come to Sydney in sailing boats? Or in pulling boats.
220. What is now the Municipality of Hunter's Hill has come into being within the last 5 years? It has, principally, within the last 5 or 6 years.
221. You attribute the increase of population to the circumstance that there is now the means of getting to Sydney quickly? Yes.
222. Before the steamer stopped there, what means had persons who removed there from Sydney of getting their goods taken there? By the Parramatta Road, and then across the punt, or by open boats.
223. Do you reside on the Parramatta River, or on Lane Cove? I reside on the Lane Cove side.
224. Within the municipality of course? Yes.
225. Are you within the boundaries of the common? My brother's fence is on the limits of the common, and he is between me and the common.
226. His property is on the Lane Cove River? Yes.
227. You have sold property in your immediate neighbourhood since you began to build there,—what price has improved property brought? The last sale I had was at auction in Sydney, and it fetched £130 an acre.

228. Do you know of any sales on the other side? Yes; I have been acting as agent in the sale of land on the other side—within the last eight months it has sold for £100.
229. When I say the other side I mean Parramatta River? Yes.
230. Was that land belonging to Mr. Foss? Yes.
231. Was there any quantity of it? It was sold in pieces of one acre at a time.
232. Is the property that is close to your brother's fence—the land of the common—as good as what you have sold, for saleable purposes? Looking at it as land it is better; but not so good for sale, on account of its being farther from the steam wharf.
233. The municipality lies between the common and the steam wharf at present? Yes.
234. Does the municipality go down to Onion's Wharf? It begins at the Great North Road; is bounded on one side by the Parramatta River, on the other by Lane Cove, and a small portion of it by the Field of Mars Common.
235. At present the ground situated within the municipality is of more or less value according as it is distant from the steam wharf—if these bridges were built would that portion which abuts upon the municipality, and which would be nearer to the bridge than the municipality itself, be increased in value in the same ratio that the ground in the municipality is increased by the steam wharf? I think it will benefit that land more than it will the municipality itself.
236. Is there some Government land in the neighbourhood there? There is a large portion of land known as the Asylum Reserve, upon which the proposed bridge abuts, or the road passes.
237. There has been some talk about the advantages of the common, and the sacrifice which would be made by the commoners if they gave up this land for the building of bridges—I believe you are Chairman of the Municipality? I am.
238. Do you know the opinion of the people who live in this place upon this matter? I think I do.
239. Can you tell me whether these four hundred and twenty people in the municipality derive any advantage from the common? I think, with two or three exceptions, there are none derive any advantage whatever. I could name the exceptions.
240. Do they not derive advantage from firewood? A very few—one or two.
241. Are there people in that neighbourhood whose cows run on the common? No; I keep cows, but I should be sorry to put them on the common.
242. Why? First, because they would starve; and secondly, because they might be lost, as I know to my own cost.
243. Did you ever lose any? One, the only one I ever put on it.
244. Was that lately? About three years ago.
245. You say there is no grass? No.
246. And no cows to eat it down? I believe there are a few cows doing penance on it, but there is no grass for them to eat.
247. Is there any portion of the land of the common leased at your end? Yes, I believe my brother is the only person who has leased it at our end.
248. Do you know what he uses it for? I believe he encroached on the common whilst fencing his property, and would rather lease that portion than remove his fence at present.
249. Are there not a number of persons who are cutting timber there—have they not leases? I do not know whether they have leases; I know a number were cutting timber there.
250. What timber do they cut? Firewood and saplings.
251. Do they cut it for the people of the municipality? No, they take it by boat into Sydney.
252. And they have no leases? I do not know whether they have or not; I believe not.
253. Is there much of this wood brought to Sydney, do you know? I should think there is; in fact, some time ago, my brother and myself undertook the task of numbering the boats that went daily up and down Lane Cove, and we found there were about five boats of from three to five tons each went up with one tide and back with another.
254. Perhaps these people came from other parts of Lane Cove—from land on the other side? From my knowledge of the river I should say no, for there are large stacks of wood to be seen always on the southern side of the river.
255. Then they must carry on this cutting of timber openly, if there are large stacks of wood on the side of the river? Yes, quite openly.
256. It has been said to-day—not here but out of doors—that the common is the resort of a great many vagrants; an old resident like you ought to be able to tell us a great deal on that subject? Up to within the last few days it was the most grievous nuisance that was attached to the Field of Mars Common being left as a common. My house facing the Lane Cove River, I am compelled constantly to witness scenes of depravity, and to hear blasphemy and obscenity from those who pass down the river, especially on Saturdays and holidays.
257. Do you know whether these people live on the common? I can see from my own window that they reside on the common. I can point out the spot where they live.
258. When you say up to within a small space of time, do you mean that the state of things has altered lately? I have been informed by very good authority that, at the request of the trustees, within the last few weeks they have been caused to be removed, and have been removed, but I think they will soon be back again at their old haunts.
259. Do you know whether that was at or before the time when it was asserted in the Legislative Assembly that it was false? Some of them were residing there at Christmas, within a fortnight back.
260. I ask you whether you are aware of its having been denied in the Legislative Assembly that the assertion of the promoters of the Bill was untrue? (*The Chairman objected to the question.*)

J. Joubert,
Esq.
10 Jan., 1862.

- J. Joubert, Esq.
10 Jan., 1862.
261. You have had a great deal to do with the buying and selling of land in and about Sydney, and the neighbourhood on which you reside? Yes.
262. You have seen what Mr. Langley has reported about the value of the common—do you believe it will fetch more than he has valued it at? I think the common, taking it as it stands now, on the whole, is certainly worth more than £5 an acre.
263. Have you heard of any offer having been made on the part of any gentlemen to speculate in buying the common, and to undertake the building of the bridges? I have been authorized to make, and I have made, an offer, verbally, to the Government, of the sum of £30,000 for the whole of the Field of Mars Common as it stands now, and the offer now stands good.
264. You have made a *bona fide* offer? I have.
265. Without any conditions at all? Without any conditions whatever.
266. Without a stipulation that bridges be built? Yes; the second offer was, that if the Government liked it better, the Company would take the Field of Mars, and in consideration of the grant would cause the two bridges to be erected, and the road in connection therewith to be formed.
267. That is, private individuals offered to build these bridges in return for the land? Yes.
268. I do not want to ask who these individuals are, but, from what you know of them, are you prepared to say they are persons who can fairly be depended upon, that their offer would be carried out? They offered cash, and were prepared to give cash for it.
269. You say that Hunter's Hill owes its great increase in population to the stopping of the steamer there regularly—what then makes the people of Hunter's Hill wish so much for the bridges? I do not think the people of Hunter's Hill are particularly anxious for the bridges; they are more anxious to get rid of the common.
270. Why? Because they would derive more benefit from the common being sold and occupied than they would from a bridge communication.
271. How would that benefit them? It would enlarge the municipality, it would of course increase the amount of rates collected, and therefore enable them to make further improvements, and unite them to other villages in the neighbourhood, from which they are now separated by the common lying between them.
272. You think that even without these bridges the sale of the common would be an advantage, because it would bring a greater number of people to live in the neighbourhood? Yes.
273. Do you know anything of the Parramatta River up above Tarban Creek, and of the people living there? Yes, I know a few of the people.
274. Do you think they would participate in advantages similar to those which you have said would be gained by the people of Hunter's Hill, by the sale of land? I think they would.
275. Do you know so much of the district as to say whether the existence of that land as waste land prevents population increasing on the banks of the Parramatta River, and the establishment of Schools of Art, schools for children, and other means of social and moral improvement? Yes, because the lands in the neighbourhood are in the hands of a few.

MONDAY, 13 JANUARY, 1862.

Present:—

Dr. LANG,

Mr. PIDDINGTON,

Mr. STEWART.

ISAAC SHEPHERD, ESQ., IN THE CHAIR.

Mr. J. K. Heydon appeared as agent of Petitioner, J. Blaxland, Esq.

Jules Joubert, Esq., further examined:—

- J. Joubert, Esq.
13 Jan., 1862.
276. *By Mr. Heydon:* On Friday last you told us that the common was valueless for grazing purposes, but afterwards you said what appeared somewhat inconsistent with that statement, namely, that some of the land you thought was valuable for dairy purposes—can you explain that seeming inconsistency? In its present state, owing to the timber having been cut and cut over again, the roots have thrown up numberless saplings and low scrub, which has destroyed the grass that might have been on the ground when it was open forest; but evidently, if it were cut up and portions were sold in small farms, it is natural to suppose the holders would cause the ground to be stumped and cultivated, and artificial grasses could be grown on it, as it is on the Continent, and in a great many other parts of the world. In fact, at Hunter's Hill, where we reside now, which was certainly one of the most barren spots in New South Wales, we have managed by a little industry, to grow green stuff enough to keep cows and horses.
277. If these bridges should be built, will the municipality of Hunter's Hill benefit by this project more than any other portion of the country between Parramatta and Hunter's Hill? My opinion is that it will benefit less than any other, because from its geographical position, it is further from the bridge than most of the other districts concerned; and secondly, because we have no produce to take to market; whereas the other districts connected with the Field of Mars are known to be some of the richest in fruit, hay, and any other produce the ground can yield to the farmer.
278. Will people residing at Hunter's Hill, having occasion to go to Sydney by land, derive so much benefit from the proposed road, in the way of shortening the distance, as persons situated

situated further up the river? I do not think it will shorten the road to them so much as to those of Ryde and Gladsville, but it will shorten the present distance four or five miles.

279. The benefit to the districts further up will be greater? Yes.

280. Because they will be nearer to the bridges? Yes; and they have more need of communication than we have.

281. You have been residing in the district of Hunter's Hill a good many years, you have told us, and you have seen the number of inhabitants rise from four or five to four or five hundred—during that time have you felt, or have the inhabitants in that neighbourhood felt, the want of those institutions which people have in Sydney, or in better populated districts, such as Schools of Arts, schools for children, places for hearing concerts, or those other civilising institutions? Yes, we have not only felt the want of them, but made several strong attempts to establish them; but our population is so small that it is impossible to have them in our own circle, and of course we cannot enjoy them because there are not the means of going to town after dark. The present communication answers all purposes as far as business is concerned, but after business hours we must be locked up at home without any possible means of attending these things.

282. Before the Committee on Friday, respecting the boundary of the municipality, I asked Mr. McLean, the Surveyor General, if the eastern boundary of the common did not go further east than the western boundary of the municipality, and he said, looking at the old map, it did not—are you in a position, with that map before you (*referring to a map on the table*) to tell us whether it does or not? Yes; I have brought it for the purpose of shewing the Committee the exact position of the municipality in connection with the common. (*Map exhibited and explained*)

283. *By the Chairman*: Does any portion of the Field of Mars Common come within the municipality of Hunter's Hill? It bounds the municipality.

284. Is there any portion of the Field of Mars Common within the boundary of the municipality of Hunter's Hill? It bounds the municipality of Hunter's Hill.

285. It is not within it? No.

286. *By Mr. Heydon*: Is not the eastern boundary of the common further east than the western boundary of the municipality? Decidedly; and this plan shews it better than any answer of mine can explain. This is a plan made by order of the municipality, for the work of that corporate body; it takes in the whole municipality.

287. *By Dr. Lang*: Will you describe the line that forms the actual boundary between the common and the municipality? (*The witness pointed out the line on the map.*)

288. *By Mr. Heydon*: Then, in point of fact, the common does overlap the municipality in respect to east and west—the eastern boundary is more east than the western boundary of the municipality? Yes.

289. Is the common land between the Lane Cove River and the northern boundary of the municipality as valuable as the land in the municipality? That portion of the common is, in my opinion, of better quality than the land of the municipality adjoining it, and close to the water side of Lane Cove River it is equal.

290. You have already told us the value of the land within the municipality—what it has absolutely been sold for? The land I alluded to in my former evidence was land in the heart of the municipality, nearer to the Hunter's Hill Ferry Wharf; but the land which has been sold adjoining the Field of Mars Common has been sold at an average of £25 an acre latterly.

291. Pardon me, I do not wish to contradict you in your evidence, but I think you told us before that your brother had land adjoining the common, and that you had land adjoining him, which you had sold at a certain figure, and that you considered his land adjoining yours, and also the land of the common that adjoined him, to be equal in value to what you sold yours for—will you shew us the land on the map which you spoke of as adjoining your brothers? This is the land (*pointing to the map.*)

292. That is not common land? No.

293. You led us to believe that the land your brother had was adjoining the Common, that he had a lease of some portion of it, in fact, in consequence of having put his fence too far out—where is that land? This is the land (*pointing to the map.*)

294. Then it is not, in fact, the land you spoke of before—it is not the same land which is adjoining your land? There is a quarter of a mile between the two.

295. Can you tell us what other land bounds the municipality? There is a large block of Government land, called the Lunatic Asylum Reserve, to the south of the municipality.

296. Do you think that is of equal value to the general run of land in the municipality? Decidedly.

297. Under present circumstances? It is equal in value, if not superior, by its position facing the Parramatta River.

298. Do you know how many acres are contained in that reserve? No.

299. Will you be kind enough to show where the proposed bridge is to be erected? Here (*pointing to the map.*)

300. On the Asylum Reserve? Yes.

301. Is it not likely that the land immediately close to the bridge will be most benefited by the proposed bridge? I should think so.

302. Therefore, the Government would be the immediate gainers in this case, and not the municipality of Hunter's Hill? Yes. This shews you forcibly what I stated a moment ago, that Hunter's Hill proper was geographically a long way from the proposed road.

303. You mean that portion which is the township at present, as distinguished from that which is as yet unimproved? Yes.

304. *By Dr. Lang*: How would the approach from Hunter's Hill be carried to the proposed bridge?

J. Joubert,
Esq.

13 Jan., 1862.

J. Joubert,
Esq.
13 Jan., 1862.

bridge? Either by forming a bridge, at the expense of the municipality, across Tarban Creek, or by making an application to the Government to carry this main road, which is now called the road leading from the Parramatta Road to Onion's Point, past the Asylum.

305. *By Mr. Heydon*: What land bounds the municipality on the western side beside the common? The township of Gladesville.

306. Is that a Government township? No.

307. It is not a municipality? No.

308. The western boundary of your municipality of Hunter's Hill is Gladesville and the common? Gladesville and a portion of the common.

309. I asked you just now about the means for intellectual improvement in your district, and you said something, but I thought you were going to say more, in reference to schools, and Schools of Arts, and such like? I told you of the impracticability of our having these of our own, owing to the small size of our municipality, and of the impossibility of our attending any lectures, or any Schools of Arts that may take place in the adjoining villages, on account of the great waste of land that lies between us.

310. Across the common? Across the common.

311. There are no roads across the common, of course? Only mere cart tracks; I believe there are schools, and sometimes lectures are given in the neighbouring villages, but it is impossible at night for one to find one's way across the common.

312. Are you aware whether the management of the common by Trustees is satisfactory to the commoners. I believe not.

313. Do you know whether it is or not? I think it is quite the reverse.

314. In the event of the commoners being dissatisfied with the trustees, have the commoners any means of taking the matter into their own hands so as to manage it as they should wish?

[*The Chairman objected to the question. Witness ordered to withdraw. Committee deliberated. Witness recalled.*]

315. Are you aware that the commoners, under the Commonage Act, have no power to remove incompetent or obnoxious trustees, or of calling them to account in any way? May I be allowed to look at the Act referred to? (*Act 11 Victoria, No. 31, handed to witness*). Under this Act, as Secretary to the Committee on Roads and Bridges, I have inquired into the matter, and we have no redress whatever against the trustees; they are appointed for life.

316. Does the Commonage Act allow a power to the trustees of levying taxes on the commoners? I believe so.

317. Are you not sure about it? According to my reading of the Act it does, but I am not a lawyer.

318. Then, in point of fact, the trustees are in office for life, and yet they have the power of taxing the commoners? Yes.

319. And cannot be called to account in any way for their doings? No.

320. And the commoners generally, so far as you know them, are dissatisfied with the present management? Quite so.

321. Are you aware that they are so dissatisfied that they would rather sell the common than go on in the present state of affairs? I am positive that is the case.

322. Have you heard any recent expression of public opinion to that effect? I have.

323. Where and when? At every meeting that has been held in the neighbourhood on anything connected with the Field of Mars Common affairs, and almost every day everywhere.

324. Do you know there was a meeting of the commoners so recently as last Saturday? I do.

325. Was it numerously attended? It was.

326. Regularly called by the trustees? Yes.

327. Was there a resolution with reference to this matter passed at that meeting? What matter do you mean?

328. Selling the common and building bridges? There was.

329. To what purport was it? That the Field of Mars Common should be alienated, and with the proceeds roads and bridges should be made, to connect the north side of the Parramatta River by a more direct route to Sydney.

330. Was the meeting unanimous on the point? Quite unanimous.

331. Can you form an opinion of the number of persons who attended it? I should think between 100 and 150.

332. *By the Chairman*: You say the commoners entitled to the Field of Mars Common are unanimous in their wish to surrender it? I said that those that were within my district were unanimous, and I have heard an expression of opinion from a great many others in the immediate neighbourhood of my district, as well as in my district, and they are quite unanimous.

333. I believe petitions have been got up in favour of the surrender of the common? Yes.

334. Have there been any counter-petitions? I believe there have been counter-petitions; I have seen them.

335. Have you seen the signatures? —

336. Do you suppose they were commoners? Not all of them.

337. Do you know who are commoners and who are not? In reading through the names I detected a great many names that in my opinion were not commoners.

338. Here is a petition representing to emanate from "landholders and other resident inhabitants having an interest in the Field of Mars and Hunter's Hill Common." It states, "That your Petitioners consider that the resumption of the common lands would be prejudicial to their interests, inasmuch as such a measure would deprive them of commonage
"right,

“right, as well as the advantages arising from depasturing cows, and procuring firewood and timber for building and fencing, whilst at the same time a number of those tenants, to whom the Trustees have leased portions of the common, in accordance with the Act of Council, would be deprived of their subsistence by the proposed resumption”—You are aware of that? Yes. J. Joubert,
Esq.
13 Jan., 1862.

339. Then in point of fact, the statement that the commoners are unanimous, or nearly unanimous, in reference to the resumption of the common, is not strictly the fact? I only speak of the facts that have come within my own notice. What I have seen myself I judge from. This petition is signed by a great many who are not commoners.

340. That is not the question. Am I to understand you that, as far as you have given your evidence, you have merely given it as your opinion? Of course I can only speak as far as my opinion goes.

341. You state that the proposed bridge would be of more importance to the other portions of the district than it would be to Hunter's Hill, inasmuch as it is nearer to the other districts? Yes.

342. Now will you be kind enough to point out on the map where the proposed bridge is to be, and which is the municipality of Hunter's Hill? (*The witness did as requested.*)

343. It does not extend over this Tarban Reserve? This Asylum Reserve is Government land.

344. Does it embrace these allotments of land as far as Bedlam Ferry? It does.

345. In point of fact, therefore, the municipality comes as far as Bedlam Ferry? Yes.

346. Where do you say the bridge will be? (*The witness pointed it out.*)

347. Then, in point of fact, the bridge proposes to come immediately into the municipality of Hunter's Hill? Yes.

348. Then how do you make out that this bridge will be of more advantage to the other districts than to Hunter's Hill, when, in point of fact, it comes within the municipality? The qualification of my answer explained that, inasmuch as I stated that it comes at one end of the municipality, which is at present a waste and unimproved. The municipality proper is round about the Hunter's Hill Steam Ferry Wharf; and the bridge would be of more use to the localities that have produce to take to market than to Hunter's Hill, between which and Sydney the communication by steamer is sufficient for business purposes, and which has no produce to take to market. It is these producing districts that keep up the punt now; the people of Hunter's Hill do not use it; no person from there goes across the punt once in six months, whereas it is working day and night for the benefit of the agriculturists and horticulturists of the other districts. This portion of the municipality is now unimproved. If you take the municipality from the boundary of the Asylum Reserve, adjoining Mr. Huntley's land, and go as far as the Field of Mars Common, you will not find three habitations, whereas if you take it from Tarban Creek to Onion's Point you will find three or four hundred people.

349. What is the general character of the land immediately abutting on the road adjoining the municipality? I believe it is pretty good; it is under cultivation as orchards and vineyards.

350. How far up the Parramatta River? Past Kissing Point and Pennant Hills; in fact, as far as Parramatta.

351. Then the whole country intervening between the road connecting the punt and Pennant Hills is under cultivation? Most of it.

352. And studded with orchards and vineyards? Yes.

353. Closely studded with orchards? Yes.

354. Are you aware whether the produce of these districts that you are referring to, producing fruit and so on, comes to Sydney by water or by land? I should think one-half comes by water and the other half by land at present.

355. Are you aware whether a great deal goes by steamer? Yes.

356. Are you aware that a great deal goes by private boats? Yes.

357. And you are aware that a great deal goes by the ferry? Yes.

358. Do you know what the ferry is leased for—what the annual income arising from the ferry is? I do not.

359. Am I to understand, from your answer this morning, in reference to the land immediately abutting on the common, that that is not the land that sold at the high price you named the other day, £100 an acre and so on? You mean the land I have sold myself.

360. No, what you referred to the other day—this land abutting on the common is not the land you referred to? No, it is not.

361. Are you aware whether Government reserves, and that particular reserve for the benefit of the Asylum, is open for sale? I believe not.

362. Do you consider that facilities for attending Schools of Arts and various other institutions, should be given at the cost of the public? Certainly; it is *pro bono publico* that those establishments are open.

363. You consider that facilities should be made for attending these places at the expense of the public—paid for out of the general revenue? No, at the expense of those who are going to derive benefit from them.

364. Then they should be paid for by the parties themselves? What parties?

365. I asked whether you consider that the expense of giving facilities for attending Schools of Arts and other institutions should be paid for out of the general revenue? No, I answered they should be borne by those who are going to derive the benefit of those institutions.

366. You say the trustees are appointed for life? Yes.

367. Are they appointed for life? I believe so.

- J. Joubert,
Esq.
13 Jan., 1862.
368. Is there no way of removing them? Except by annihilating the common.
369. Is there no possibility of removing them by appealing to a Court of Equity? Really it is a question I could not answer. They might; but I suppose the process would be a very long and expensive one.
370. Is it open to them to resign? Yes.
371. And do you think that it is possible, by harassing trustees, that you could induce them to abandon their trust? I doubt that very much.
372. You think they would not give up? I do not think they would. I think it has been tried.
373. They have been harassed then? I do not know what you mean by the word harassed.
374. I asked the question whether you thought it possible by harassing trustees that you could induce them to resign, and you say you think that has been tried? Yes.
375. I think you stated at the last meeting, when you were examined, that within the last 10 years, the population of what is now the Municipality of Hunter's Hill had increased from 10 to 450 persons? Yes.
376. Are all these landholders? Landholders or leaseholders.
377. How many houses are there within the Municipality? I think between 100 and 170 or 180; I could not tell exactly, for they are springing up every day.
378. How many adults are there? Really I could not answer these questions correctly enough to satisfy you.
379. How many would you suppose? Close upon 180 or 200, I think.
380. That is merely your opinion? Yes; I have not seen the Census.
381. Then are we to understand that the children in the Municipality of Hunter's Hill are landholders? I suppose not; they will be.
382. How do you come to the conclusion that there are about 450 landholders, and so few adults? Perhaps, before going any further in answering questions, either from the Committee or Mr. Heydon, I may be allowed to beg that in the answers that I may give to any questions put to me, I may be allowed to qualify, if necessary, inasmuch as I am not English born, though I have been many years in this Colony, and therefore a great many questions may be put to me the true sense of which may escape me at the moment; for instance, when I answered that 450 were landholders, it is evident I never intended to convey that infants in arms were landholders. If there are only 180 or 200 adults, of course only those can be virtually landholders. I desire to answer every question to the best of my ability, and I should be sorry that any answer should be taken as prevarication, when it was not intended to be so.
383. Then we are to understand that in consequence of your not being English, the evidence you are giving here is not to be considered strictly correct? I beg your pardon, I did not say so. In order that my evidence may be true and correct, I wish to have the questions put to me so that I can thoroughly understand their meaning.
384. Do you attribute the large increase of population referred to within the municipality, within the short period of time, to the facilities of steamers plying direct to Hunter's Hill? Yes.
385. Does the fact of the steamers calling at Hunter's Hill Wharf give an additional value to the properties in the immediate neighbourhood? Certainly.
386. Are you considered rather a gay people in that locality? I shall ask you the meaning of gay people; I have heard several applications of the term.
387. In order that you may understand what I mean—do you hold concerts, balls, and evening parties there? Yes, occasionally.
388. Have you any Church there? Yes.
389. Is there more than one place of worship in the neighbourhood? There are two—Roman Catholic and Church of England.
390. The other day you made a statement that you saw some disorderly characters passing in a boat; where were you when you saw them? In my parlour; in fact in every room in my house I could hear them. The noise attracted me on to the verandah, and to the water's edge, to try and make them pass as quickly as possible.
391. Where were you when you took account of the number of boats passing down the river laden with wood? At my house.
392. Did you see them loading? I have seen them loading very often up the river.
393. In these cases you mention? When I saw them pass I could not see them loading. When they were passing they were not loading.
394. Then, in point of fact, you do not know where they brought the wood from? I can form a very shrewd guess.
395. Is it the Lane Cove River you refer to? Yes.
396. Do you know, or have you any reason to believe, that boats pass up the river to bring wood from the district of Lane Cove? Sawn timber they do, not firewood.
397. Do you know whether any firewood comes from the district of Lane Cove? Very little.
398. You know there is very little? I know there is very little; only one man on the river brings firewood that comes from the district of Lane Cove.
399. Do you know all the boats that ply up the river? I do.
400. Perhaps you will have the goodness to enumerate their names? I know the boats and I know the owners, from having seen them repeatedly; but I do not know whether the boats have names.
401. Perhaps you know the names of the owners? Some of them.
402. You say there is only one that brings wood? I can name that one.
403. Will you name the others? I could not name the others. I know them perfectly well,

well, but I could not name them now; I could supply the Committee with the names within twenty-four hours.

J. Joubert,
Esq.

404. Then there is no distinguishing mark on boats going to Lane Cove? There is that distinguishing mark that when you see the boats passing repeatedly for years under your eye, you know this boat belongs to this man and that to that other; but these distinctions it would be impossible to convey on paper.

13 Jan., 1862.

405. You can see from your residence the usual place for boats landing on the Lane Cove River? I can see a great many of the landing-places on the Lane Cove River from my house.

406. Can you see from your house all those landing-places on the common that you mentioned? No; I can see one or two from my window, but the others, from the circuitous course of the river, it is impossible to see them all from any one point.

407. Was it from this one or two that you saw boats laden with wood? Yes.

408. You saw them start? Yes; from my window I have seen these boats load with wood.

409. You say you lost one cow about three years ago—do you know what became of her? No.

410. You do not know whether she died or was stolen or killed? I do not think she died, for I rode all over the common and employed persons to do so, and I think if she had died we would have found her carcass.

411. She may have died? She may have been killed, or may have been starved perhaps.

412. Not stolen? She might. Either starved or stolen I should certainly say.

413. Did you give any information to the police about your loss? I advertised it.

414. You gave no information to the police? No; I advertised it in the papers.

415. Was a reward offered for the cow? Yes.

416. I believe you are a Magistrate? *Ex officio*—a Magistrate without a Bench.

417. Are there no other Magistrates in the neighbourhood? Yes, in the neighbourhood, not within the municipality.

418. In point of fact you cannot form a Bench? No.

419. Have you, either in your official capacity or otherwise, had reliable information of cattle having been stolen or slaughtered while depasturing on the common of the Field of Mars? In my official capacity I never have; in my private capacity I have heard it often.

420. Did you ever give information that such was the case? No.

421. To your knowledge has any one been brought up on such a charge? No.

422. Then in point of fact there has been no information given in reference to cattle being stolen? There might have been.

423. Not to your knowledge? Not to my knowledge.

424. From your own knowledge are you aware whether any disorderly characters have been taken up for residing on the common? No, I do not know that they have been taken up for residing on the common; I believe they have been expelled lately, or rather an attempt has been made at expelling them; they are not gone.

425. Did you ever send any formal intimation to the trustees that such was the case? I never sent any formal intimation, but I believe I and a great many others have stated it publicly to the trustees. In fact it has been printed and handed over to them—400 or 500 copies have been printed in the shape of a petition or pamphlet. They have been perfectly aware that such was the case.

426. Did you ever send the trustees one of those pamphlets? I did not.

427. Are you aware that any has been sent? I do not know, but I know they are aware of the fact, because I have heard them talk of it.

428. That information was not derived from you? No.

429. Are you aware that the trustees have made by-laws as regards the common? I have seen a copy of by-laws purporting to emanate from the trustees.

430. Are you aware that persons claiming right of commonage should send notice to the trustees? I have seen in these by-laws, that before a man can enjoy the right of commonage for any purpose, it is necessary he should send in a statement to the trustees, specifying how he is a commoner, where his land is situated, and what it consists of.

431. Have you ever sent in your notice? Never.

432. Then in point of fact you never claimed a right to run cattle over the common? I have not.

433. Consequently you have not sought to take any advantage of it? I sought it once in putting a cow on.

434. In no other case? No, I never cut a stick of firewood.

435. *By Mr. Heydon:* About the means of harassing trustees, and getting rid of them, you stated that had been tried—what did you mean? I mean that meetings of the commoners were called in several instances, to try and get the trustees either to give up their trust or carry it out more to the benefit of the commoners.

436. When you spoke of some proceeding being an expensive matter, what did you allude to? The Chairman led me to believe it could be done by a suit in Equity, and I said I thought a suit in Equity must be very expensive.

437. You said it had been tried? No; I said the harassing system had been tried, to make them give an account of their trust.

438. Are you not aware that an action was brought against the trustees of the common—not the present ones—some years ago, with a view to making them resign their trust? I am not aware whether it was with a view to making them resign their trust, but I am aware that an action was brought against the former trustees, and they did resign.

439. Then on that occasion the trustees were harassed effectually? Yes.

440. Can you tell us how it happened that they were driven from the trusteeship—was it by an expensive process? I believe it was by a law suit which led them to large expense.

- J. Joubert, Esq.
13 Jan., 1862.
441. Who brought the suit against them, do you know? I believe Mr. Shepherd was one of the parties who brought the suit; I do not know who the others were.
442. The present Chairman? Yes.
443. Who paid the law costs on that occasion—are you aware? I have been apprised within the last few days that they have never been paid yet. I mean that they have never been reimbursed to those who paid them.
444. Who were not reimbursed? The former trustees of the common.
445. Do you know them by name? The Rev. Mr. Turner, Mr. Devlin, and Mr. Bennett.
446. Are you aware, of your own knowledge, that it was Mr. Shepherd who brought an action against those trustees, that resulted in their resigning? I was informed so.
447. The trustees had to pay their own expenses? Yes.
448. Are you aware that they had to pay their own expenses because there were no funds belonging to the common? Yes.
449. And if there had been funds belonging to the common, would they have paid the costs out of those funds? I suppose so; I should think so.
450. Do you know it—was it not the Judge's order? Yes.
451. So that in point of fact, if the commoners should adopt the suggestion of the Chairman here to-day, and take this means of removing the trustees, it would be at the risk of having to "pay the piper" out of their own funds? Yes.
452. *By the Chairman:* Did I suggest to you that there should be any proceedings in reference to ousting the present trustees? When you put the question to me, you asked me whether I did not think there was any other means, such as a suit in Equity, that would oust the present trustees from their position.
453. I did not suggest to you the desirability of adopting that course? Had you not named it I would not have thought of it; therefore it was a suggestion.
454. You seemed to speak very positively in reference to those expenses, that it was an order of the Court—have you seen the order of the Court? No; I saw a document from Mr. Billyard's office, in the shape of a lawyer's bill, and one of the items was said to have been ordered to be paid by order of the Court out of the funds coming from the general funds of the common.
455. You saw that in Mr. Billyard's bill? I did.
456. You did not hear the order of the Court given, nor did you see it, excepting this memorandum in Mr. Billyard's bill? It was the bill itself.
457. Now you say that Mr. Shepherd was the plaintiff in that case? Yes.
458. Who were the others? I do not know.
459. How do you know Mr. Shepherd was? I was told so by the defendants.
460. You do not know it of your own knowledge? No, I was not present; I believe I was in Victoria or South Australia at the time.
461. Were the costs of Mr. Shepherd and these other gentlemen included in the amount? I could not tell you.
462. *By Mr. Piddington:* What, in your opinion, constitutes the right of a commoner under the Commonage Act of 1847, and under the deed conveying the Field of Mars Common to the trustees? To be a commoner and to enjoy the right of commonage, a man must be a settler, cultivator, or inhabitant of the parishes of Field of Mars or Eastern Farms. I believe those are the words of the Act.
463. Holding lands within the said districts? Yes.
464. Supposing a freeholder in those districts does not claim to use and enjoy the common, are you of opinion that such a freeholder is a commoner, although he may not claim to enjoy or use the common? I think so.
465. What part of the municipality of Hunter's Hill does the proposed bridge across the Parramatta River strike? It is on a point on the Asylum Reserve, being the southern boundary of the municipality, at a point equidistant between Bland's thirty acres and Bayley's two acres.
466. What distance is the English church at Ryde from the site of the proposed bridge at the spot you speak of? I should think two miles.
467. Will not the erection of a bridge at the spot you speak of, in conjunction with another bridge, as intended by the Government in a Bill they have framed, materially benefit the inhabitants in the neighbourhood of the Field of Mars? Decidedly.
468. If a bridge is built or bridges are built, what proportion of the produce produced by settlers in the neighbourhood of the Field of Mars and Hunter's Hill would pass over the proposed new bridge, and what proportion would be conveyed to Sydney by any other mode? I think that if it were possible for the cultivator to go to Sydney with his own cart or dray, as he could do if these bridges were built, everyone would avail himself of the advantage.
469. Do you mean to convey by that answer, that you are of opinion that the whole of the produce of the neighbourhood of the Field of Mars would be brought to Sydney over these bridges? I do, with the exception perhaps of a few orchards on the very bank of the river. The bulk of them would certainly avail themselves of the short route afforded them.
470. What proportion of the produce do you think is carried to Sydney by land now? I should think half.
471. By what route does that reach Sydney? By the punt.
472. Then it has to cross the river? Yes.
473. Does any proportion of the produce of the Field of Mars or the neighbourhood reach Sydney by way of Parramatta? I do not know; there may be some at the very extreme end nearest to Parramatta.
474. If any is brought to Sydney by way of Parramatta, are you of opinion that it bears a very small proportion to the whole? Yes.

475. How much land is there in the Asylum Reserve? I should think from two to three hundred acres; but I can scarcely give an opinion. J. Joubert, Esq.
476. Have you any idea of the extent of acreage covered by the buildings, or otherwise occupied for the purposes of the Tarban Creek Asylum? I should think from 25 to 30 acres. 13 Jan., 1862.
477. From your knowledge of the character of the Asylum Reserve, do you think the Asylum is benefited by the retention of the whole of that reserve in its present condition? No; I think the Asylum would be benefited if most of the land were sold and built upon.
478. For the comfort of the inmates of the Asylum, or for any other benefit you can imagine, are you of opinion that the whole should be retained? I derive my opinion from the people of the Asylum, who say it is not requisite that a large amount of land should be left round the Asylum.
479. Then I presume a considerable portion of that reserve land might be sold without injury to the Asylum? Decidedly.
480. Have you any idea of the probable value of that land—what it might be sold for per acre, if the bridges were erected? The best answer I can give is that I have offered £50 an acre for these 30 acres adjoining it, as a block.
481. Then, if the Government were to sell a portion of the existing Asylum Reserve in villa allotments of two or three acres each, do you think they would receive a higher sum than £50 per acre? I think they would fetch £50 an acre if the bridge were erected.
482. I am speaking on the assumption that the bridges are erected? If the bridges are erected I think the land would fetch more.
483. Have you ever read the second section of the Commonage Act? I have read all the Act through.
484. I ask you particularly to read the second section (*Act handed to witness*)? Yes, I have read this before.
485. Do you perceive that that section provides for the election of a trustee, in the event of the death of any trustee, or his absence from the Colony for a certain period? Yes.
486. Who has authority to convene such meeting under that clause? The surviving or continuing trustees, or one of them.
487. By whom is the vacancy to be filled up—by what authority; in what mode does the clause provide for the vacancy being filled up? By calling a meeting of the commoners and electing another, at which meeting the senior trustee shall preside. I should surmise he is the person who convenes the meeting.
488. Does that clause provide that at such meeting the trustee shall decide who are to have votes and who are not? Yes.
489. Have you any idea how a trustee can decide at a public meeting who present are qualified to vote and who are not? I should think it would be a very difficult matter.
490. Have you ever heard of any such mode of deciding the qualifications of electors as that pointed out in that section? No.
491. *By Mr. Heydon*: With respect to the offer you state you made for that block of land adjoining the Asylum Reserve, I presume it was intended as a speculation on your part, for re-sale? Yes.
492. You would expect to get an increased price then? I suppose so.
493. *By the Chairman*: May I beg to ask who is the proprietor of that land? It is in the estate of William Bland.
494. How many acres are there? Thirty acres. I may state that it was Dr. Bland himself that refused it.
495. Was that offer made recently or at some previous date? About two years ago.
496. Would you give the same now? I would give more now; there is more chance of our having a bridge now.
497. What would you give for it now? Are you instructed to sell it, Mr. Chairman?
498. That is not the question. If you will have the goodness to answer the question; what would you give for it now? I will think over it.
499. I presume you have been requested to come here to give information to the Committee. You say it is worth £50 an acre? I believe it is worth that now.
500. You would give that now? I daresay I would. It might depend on questions as to terms, which I cannot discuss now.

James Squire Farnell, Esq., examined:—

501. *By the Chairman*: Have you received any notice from this Committee requesting J. S. Farnell, your attendance? I have received a summons to attend this morning. Esq.
502. Had it been intimated to you previously that your attendance would be required? There was some kind of private conversation between yourself and me. 13 Jan., 1862.
503. I believe you have been present during nearly the whole of the examination of the previous witnesses? I have been present during part of Mr. M'Lean's and part of Mr. Joubert's.
504. Consequently you have heard what they have had to say on the subject? Yes, I have heard a good deal.
505. Where do you reside? At Kissing Point.
506. How far from the Municipality of Hunter's Hill? From what part of it?
507. From any portion of it? From the nearest point I live about half a mile; that is, from the western boundary of the Municipality of Hunter's Hill.
508. How long have you permanently resided within the district? I have lived there, off and on, ever since I have been two years of age.

- J. S. Farnell, Esq.
13 Jan., 1862.
509. What are we to understand by off and on? I have been away at school, fortunately for myself, and I have been away about the country, but since I became a man, and married, I have been residing there.
510. Did you serve an apprenticeship during any part of your lifetime to any one? Yes.
511. Where did you serve your apprenticeship? (*Mr. Piddington objected to the question, as being irrelevant, and it was not persisted in.*)
512. You are a landholder within the district? I am.
513. How much land do you hold? Upwards of 400 acres.
514. How did you become possessed of it? (*Mr. Piddington again objected to the question.*)
515. Did you obtain the land you now hold, through your grandfather? (*Mr. Piddington again objected.*) I got it through my mother.
516. Do you occasionally sell land in the neighbourhood? I have sold some.
517. How much have you sold? Perhaps 50 acres or so.
518. Not more? I do not suppose I have.
519. Do you sell wood, firewood, also? No.
520. Do you know the Municipality of Hunter's Hill? I do.
521. Has the population increased considerably since you came to the neighbourhood? Very considerably.
522. How long have you been permanently residing in the neighbourhood? This last time since 1850.
523. To what extent do you suppose the population has increased since 1853? Well, I have no idea of that; I could tell the increase from a given date further back.
524. It has increased very considerably? Very considerably.
525. Have you offered your property for sale? No.
526. You did not offer it to me? No.
527. Do you consider that if a bridge was built across the Parramatta River, the value of your property would be considerably increased? I do, very materially.
528. How would you raise the necessary funds to build a bridge? Out of the proceeds of the sale of the common.
529. Would you sell the common previous to building the bridge? I would not. I might sell some small portion of it.
530. How would you raise the necessary funds to carry on? Borrow the money on security of this land.
531. Supposing you could not get the money? Then of course I should have to go without it.
532. You could not build the bridge? I could not without money. If I could not get anything to eat or drink, I should starve for the want of it.
533. Have you at any time told me, or anyone, that if the common was to be put up for sale now, it would not realize? What do you mean by realize?
534. I mean whether the common would sell? In conversation with you, and in conversation with hundreds of people besides, in giving explanations, I have said that if the common were forced into the market, or compelled to be sold within three months, there would not be buyers sufficient for the whole, but that if it were sold from time to time it would bring a large amount of money; and I told you, as you have asked about conversations between yourself and me, that I would be one of a party that would give £5 an acre for it.
535. How many acres are there? 6,225.
536. You consider the common would realize £30,000? I consider it would realize nearly four times that amount, if judiciously sold. I think I could make that amount out of it.
537. *By Mr. Piddington:* Are you acquainted with the neighbourhood of the Field of Mars? I believe there is no one better.
538. Is not the Field of Mars Common a place which, if sold gradually, would realize considerable sums, for the purpose of building villas? Yes, if sold judiciously from time to time, in allotments of a few acres, it would bring considerable amounts of money for villas, and for occupation by persons of smaller means.
539. Have you looked at the Bill among the printed papers? No.
540. You will see it there, entitled 25 Victoria, without a number, "for improving the districts of which the Field of Mars Common forms part"? Yes.
541. Have you looked at the fifth clause—do you not find that by that clause the Government proposes that "the Minister for Public Works shall cause a bridge, suitable for general public traffic, to be constructed across the Parramatta River, at the points specified for that purpose in the second schedule hereto"? Yes, I see that.
542. And you find, on looking at the next section, that the costs of defraying the charges of the bridges, and such works as may be necessary, shall be defrayed by the issue of debentures? Yes.
543. If the Government undertook to erect the bridges could they not easily accomplish that by the issue of debentures, in the same manner as other bridges are erected in other parts of the Colony? Very easily, and with this difference, that it is intended here that this common should pay for the building of the bridge, and nothing should fall on the public.
544. Are you of opinion that under the provisions of such a Bill as that I have referred you to, the cost of building the two bridges would be repaid out of the gradual sale of the Field of Mars Common? Yes, I am quite certain it would more than repay it.
545. And you are well acquainted with the district yourself? I am—none better.
546. Then under this Bill, according to your opinion of the value of the common, all the Government would do would be to advance a sum upon the credit of the country, to be repaid to the country by the proceeds of the sale of the Field of Mars Common? Precisely so.
547. And if your anticipation of the value of the common is correct, there would be no charge whatever on the public? None whatever.

548. Supposing that you have over-estimated the value of the common, do you not think the inhabitants of the northern side of the Parramatta River have as fair a claim to a bridge at the public expense as the inhabitants of Glebe Island and the neighbourhood? I believe they have a greater claim. I believe they have a greater claim for a bridge than Morpeth for a branch railway, or the people of Singleton for a bridge. The population is much greater; in Ryde it is 2,000, whereas at Morpeth there are only 1,000, and at Singleton some few hundreds.

J. S. Farnell,
Esq.
13 Jan., 1862.

549. Have you any idea of the cost of the bridge uniting Pyrmont with Glebe Island? I believe £20,000.

550. Making every allowance for any exaggerated estimate you may have made of the value of the Field of Mars Common, if sold from time to time, do you believe there is the slightest possibility that the balance to be paid out of the public revenue would be anything like equal to £20,000? Nothing like it; in fact there is no chance of a deficiency after the sale of this land.

551. Do you find that the 7th clause of the proposed Bill provides that any person having a right of commonage shall be entitled to compensation? Yes.

552. If he proves his claim to the satisfaction of the Government? Yes.

553. Are you of opinion that the circumstance of the steamers stopping at Ryde and Hunter's Hill has tended to increase the number of residents in those districts? To a very small degree. No doubt the steamers stopping there keep what inhabitants are now residing there. Hunter's Hill derives a greater advantage than Ryde, because it is much nearer to Sydney and the expenses are much less.

554. Has not the fact of the steamers stopping at Hunter's Hill and Ryde tended to increase the population? It has at Hunter's Hill; but I do not believe it has to the same extent at Ryde, because many persons have resided at Ryde who held situations in Sydney, and from a change in the hours of the steamers, and the amount of passage money, they have had to leave the neighbourhood and go elsewhere.

555. If there were no steamers at all on the Parramatta River, do you think the population would be equal to what they are now? Nothing like it.

556. Then the present state of the population is affected by the facilities of intercourse with Sydney afforded by the steamers? Yes; I think that is the only way in which we have held together at all.

557. If bridges were erected across the Parramatta River, do you not think that the increased facilities of communication with Sydney would add very much to the population? I am positive of it. In three years' time there would be ten or twenty per cent. increase of population. In fact I know many persons who contemplate coming to reside in this neighbourhood if this project is carried out.

558. The country around Hunter's Hill and Ryde is reputed to be of a very salubrious character? It is.

559. And well adapted for residences of inhabitants of Sydney who wish to live out of town? Yes.

560. What would be the distance in miles, if these bridges were erected between, say, the Market in George-street and the English Church at Ryde? About six miles.

561. And what distance is it now by way of the ferry at Tarban Creek and the Parramatta Road? About eleven miles.

562. With the disadvantage now of crossing the river by a punt? Yes.

563. If these bridges were erected, do you think it would be a great advantage to the producing settlers of the Field of Mars and its neighbourhood? Yes, more so to the district of the Field of Mars and Ryde than to any other class of persons.

564. Have you any idea of the grounds on which residents of that district make objection to this proposed improvement? That is, residents who live at the north-western end, or Pennant Hills end, of the district of the Field of Mars?

565. I allude to any residents who have an objection? I am aware there are some few people at Pennant Hills that object to this scheme, and they are principally persons interested in property in the town of Parramatta.

566. What proportion do you think those who dissent from the proposed improvement bear to those who think it advisable? I think those in favour of it are about five to one.

567. The dissentients, I think you explain, live at the extreme north-western end? Yes, the majority of them. Some few live in the parish of Hunter's Hill, but very few.

568. You are a native of the Colony? I am.

569. From your experience of this Colony, are you not of opinion that a bridge over a river is considered to be a great advantage to the districts it unites? Most decidedly, not only to the persons who live there, but to the public generally.

570. Will this particular bridge not only be an advantage on general grounds, but also from its close neighbourhood to Sydney? It will be an advantage to the public generally; for instance, people from Mudgee will no doubt come that way to Sydney.

571. Is there not a considerable quantity of unsold Government land between Ryde and the Hawkesbury River? A large quantity.

572. Will not these bridges bring that land into closer communication with Sydney? Yes.

573. And to the extent of the increase of facilities of communication, will it not tend to make these lands more valuable? Most undoubtedly; they are valueless now for want of communication.

574. Whatever may be the natural character of the soil of the land to which I allude, the erection of these bridges would make their market value more likely to be realized by the Government? Yes, it would increase it at any rate.

575. *By Dr. Lang:* Are you aware whether the present commoners derive much real advantage from their privileges in that capacity? I am aware they derive no real advantages.

576.

- J. S. Farnell, Esq.
13 Jan., 1862.
576. You do not think the common is of any considerable benefit to the commoners? No, I think it is of no benefit to the commoners; I think it is rather an injury.
577. Is it the resort to any extent of improper characters, for improper purposes? At the present moment it is not, but it has been for years the resort of such persons. It has been the resort of runaway sailors and persons of questionable character, who have gone up there with the woodmen, who are the lowest class of persons, and have resided there till their ship had left, and then returned to Sydney or went elsewhere.
578. What is the nature of the advantage the present commoners derive from their privilege—what does it consist in? The right or assumed right that persons have is, to turn cattle on the common and to get firewood and timber for building purposes.
579. Is the right of pasturage valuable to any considerable extent to the commoners, from the way in which the land is occupied at present? Of no value whatever.
580. Is the privilege of obtaining timber or firewood of any considerable value? No; I consider it to be of no value at all, unless, perhaps, to one or two, who reside on the borders of the common, and who would rather go and cut firewood off the common than off their own private property.
581. It has been alleged that the common, instead of being a benefit, is a nuisance—do you conceive that that allegation is well founded? Yes; I conceive it is a nuisance in this way, that it is a huge block of land, producing nothing, and of no advantage to the inhabitants.
582. Do you think the erection of the proposed bridges would raise the value of all property within a considerable distance—say ten miles? Yes, I believe it will make property at that distance from Sydney, of equal value with property at the same distance from Sydney on the southern side of the river, or even of more value, because of the advantage that neighbourhood has on account of superiority of the soil and climate.
583. The Government having given certain rights and privileges to the parties forming the list of commoners—do you think it would be right in the public to appropriate the common in any other way—do you think it would be right for the Government or Parliament to interfere, if they think it can be done with advantage to the public, by taking the common away? Yes, I do; I believe it is the duty of the Government to interfere.
584. Are you aware whether this has been done in any other instance in this Colony? I am not aware that it has been done in this Colony, but I am aware it has been done in England; and I know that the first Enclosure Act was passed in the reign of Charles II., and there has been scarcely a session since that there has not been an Enclosure Act passed. In fact, in 170 years 420 Enclosure Acts have passed the British Parliament.
585. At all events, you are aware that the practice of discommoning the commons in England has been in operation for 150 years past? Yes.
586. And what have been the results of that change of system in the Mother Country, have you ever heard? It has caused a large amount of capital to be expended on these common lands that has been reproductive, and I think in that period some sixty millions of money have been expended in agricultural pursuits, with profit to the nation generally.
587. Do you think it is possible for land held in common to be of the same value to the State as when distributed among private freeholders? No.
588. Will the parties holding the common rights make the necessary expenditure to make the waste land of value to the country so long as they hold in common? No, it rather deteriorates.
589. You do not suppose the present commoners would have a right to pecuniary compensation if the general benefit to the public, which you anticipate from the erection of the bridges, were shared by them individually? If anybody can shew me what they are to be compensated for I would willingly give them compensation, but I do not admit that they will lose anything, they will rather be gainers.
590. Supposing they could shew a positive loss, do you think it would be difficult to assess the amount of compensation to which they were individually entitled? I think not.
591. Do you know anything of the land still held by the Crown towards the Hawkesbury River? Yes; I know a good deal about it.
592. Does it contain any considerable portion of land capable of improvement? It does.
593. And the value of that land you think would be greatly improved by the easy access that would be given to it by the proposed bridges? Yes; I believe that it would be improved, but of course not to the same extent as land nearer Sydney. It will take a longer time to become valuable; that is, this land would never be thought of at all if these bridges were not constructed, but if they are constructed the people will push out.
594. The persons who will derive the greatest benefit from the proposed construction of bridges are, I presume, the residents on the north bank of the Parramatta River along its course? Yes.
595. Do you not conceive that the inhabitants of Sydney also will have a direct benefit that will accrue to them from such an improvement, in the easier access it will give to an available part of the country? Yes, in many ways; for instance, in receiving fruit they will receive it in much better order and much cheaper; and there are many things that might be produced in the neighbourhood, which are not produced now, because they must be brought to town in a cart, and must be brought in early; and that cannot be done in the present state of the communication.
596. Do you not think it is of importance also to the Crown, as the proprietor of much unsold land, to have it made more accessible, so as to increase its value? Yes; and I think it also of importance to the Government, inasmuch as the common is a place well suited for the erection of benevolent institutions, juvenile reformatories, and other institutions of the same kind.
597. Would it afford for such purposes any considerable extent of land available for agriculture? Yes, there is a large quantity of land fit for agriculture. The land of the common is

is not of course like that of the valleys of the Hunter or Hawkesbury; it is forest land, but as forest land it is equal to any in the Colony. J. S. Farnell, Esq.

598. *By Mr. Stewart:* Is any large portion of the common equal to the surrounding lands that are under cultivation? Yes, and some of it is much superior.

13 Jan., 1862.

599. Has there been any land sold in the immediate neighbourhood recently, that would give an idea of the value of the common land? Yes, I have sold land myself at £25, £20, and £15 an acre; and I know Mr. Small, at the other end of the common, sold land for £10 and £12 an acre. The Government themselves have sold land for £8 an acre; and though I cannot speak from personal knowledge, I believe persons at the Pennant Hills have paid as much as £27 an acre for land adjoining the common.

600. Is there any Government land on that side of the river, excepting that reserved for the Lunatic Asylum? No; except away to the north-west. Some of the land, of course, is only fit for building upon; but it would sell for building villas upon, on account of its position and proximity to Sydney.

601. Is there any Government land, or land in the hands of private parties, beyond the immediate neighbourhood of the Field of Mars, with which the proposed road would open up a better communication than there is at the present time? Yes; there is the district of Dural as well as Pennant Hills, and the road continuing on to Wiseman's Ferry.

602. Have you travelled over the country between the common and the Hawkesbury? Yes; but not lately.

603. Is there any agricultural land in that tract of country that would be brought within easy communication of Sydney by the proposed road? Not to any large extent. The agricultural land is pretty much taken up; but there are gullies and valleys, some of which are cultivated now, that would no doubt be taken up. At any rate I believe it would be better for this Crown land to be sold for some value than to lay waste.

604. Do you think the construction of the proposed road and bridges would encourage the sale of it to a great extent? Yes, I am positive it would encourage the sale of it.

605. *By the Chairman:* You do not think there is a great deal of this Crown land fit for cultivation between the common and the Hawkesbury River? No, not a very large quantity; but I think artificial means might be adopted to make it pay.

606. You say you pretend to know the common —? I do not pretend; I do know it.

607. Better than the trustees know it? Yes.

608. You do know what the trustees know? I am very sure I do in relation to the common.

609. What proportion of it do you think fitted for agricultural purposes? About two-thirds of it is fit for agricultural or horticultural purposes. There is a distinction. You can grow a tree where you cannot grow a crop of wheat.

610. As you know the whole country round so well, perhaps you will give us your opinion as to the quantity of located land within the district of the Field of Mars that is unoccupied and unimproved? You mean in the hands of private individuals?

611. Yes; what proportion is of no use for agriculture or horticulture? Very little. There is a good quantity under horticulture, but none, or very little, under agriculture.

612. It is not an agricultural district? No, it has ceased to be that, from want of facilities for getting crops to market. If we grow hay we cannot get it to Sydney without going round by Parramatta. The result is that persons produce what they can take to market by the most easy means, namely, fruit. The climate suits the growth of fruit.

613. Is there not a large consumption of hay in the neighbourhood? Nearly everybody that has got a place there consumes some.

614. Do they produce what they consume? No.

615. Where do they get it from? From Sydney and other places. It does not pay for each individual to grow the small quantity of hay that he consumes; and there is no market to induce any one to grow it for sale in the neighbourhood. If your neighbour grows it for sale you must not, because the supply will be greater than the demand.

616. Do you not know that an immense quantity of hay is taken from Sydney to that neighbourhood, for consumption? I know more goes than ought to go. I cannot say it is a large quantity.

617. Do they grow their own maize there? Very little.

618. Are you aware that they import maize also from Sydney? Not from Sydney particularly; some comes down from the Hawkesbury.

619. I suppose as there is a large population there must be a considerable consumption of hay and maize? Now that the grass is bad they consume more. It would be hard to come to any calculation. I could get the Committee the information if they thought it of any importance.

620. They may be able to get it without your assistance. How do you account for the necessity of getting these supplies from Sydney, when, as you say, there is such a superabundance of land that would yield that supply? I account for it in this way—that it will not pay a man to cultivate these things for himself. It is as expensive to cultivate five acres as thirty; you require the same horses, the same machinery, the same barn, and so on. It does not pay to cultivate on a small scale that way; and if we do it on a large scale the want of easy means of communication deprives us of a market.

621. What is the size, generally speaking, of the present holdings in that neighbourhood? Some hold two acres, some four, some ten, some twenty, and so on, in proportion, up to four or five hundred acres.

622. So that, in point of fact, these parties do not generally hold sufficient land to make it worth their while to cultivate? I do not know; I think small holdings are the most productive.

623. Do they produce more grain? I am not talking of grain—of fruit.

624. Hay and maize? They grow none to speak of.

- J. S. Farnell, Esq.
13 Jan., 1862.
625. They get their supply from Sydney? Or from the Hawkesbury.
626. Then they have facilities of conveying supplies from Sydney? I do not admit it is a facility. We have the means that they had seventy year's ago—a boat.
627. Are boats generally the means of transit? Yes, very little produce goes up in the steamers. Hay and corn generally go up in boats.
628. You say there is a population of 2,000? That is the parish of Hunter's Hill, not the municipality.
629. Can you say what the population was five years ago? No, I have not yet prepared any statistics on that head. I will furnish the Committee with an estimate of what the population ought to be according to the natural increase, and of what it is. Within the last fifty years it has decreased from what it ought to be according to the natural increase.
630. Do you know what the population was fifty years ago? I do not know exactly now.
631. On what do you ground your opinion that the population has decreased within the last fifty years? Because there are not the number of persons in the neighbourhood that were born there. I can tell you for a fact that fifty-three persons were baptised fifteen or sixteen years ago, and when the reverend gentleman who is minister of the parish wanted to hold a confirmation he could not get a sufficient number, and when the Bishop inquired the reason why, he said the people had left the neighbourhood. I know for a fact, that persons after they are reared there have to go to other places to seek a livelihood. No less than five young men left within the last few weeks.
632. Are you aware that a confirmation is about to take place immediately—to-day? I do not know whether it is to-day or not; but I believe even this time the minister had great difficulty in getting a sufficient number.
633. When was the time you refer to when he could not get a sufficient number? The last confirmation.
634. When was that? Some years ago.
635. *By Mr. Piddington*: Will you explain what you mean by saying that the population at the present time in the Ryde district is not so great as it was fifty years ago? I did not say that. What I say is this: that though the population is greater than it was fifty years ago, it is not what it ought to be according to the number of persons who have been born in the neighbourhood during that period.
636. Taking into consideration the natural increase by births, the existing population has not increased in the same proportion as it has in other parts of the Colony? No.
637. *By the Chairman*: I should like to learn from you what quantity of land there is in that neighbourhood, in the hands of private owners, which is unimproved? I cannot tell you that at present; but I shall be able to give the Committee the information at some future day.

TUESDAY, 14 JANUARY, 1862

Present:—

DR. LANG,	MR. SMART,
MR. LAYCOCK,	MR. STEWART,
MR. SUTHERLAND.	

ISAAC SHEPHERD, Esq., IN THE CHAIR.

Mr. J. K. Heydon appeared as Agent for Petitioner, J. Blaxland, Esq.

James Squire Farnell, Esq., again called in and further examined:—

- J. S. Farnell, Esq.
14 Jan., 1862.
638. *By the Chairman*: Have you any statistics of the Parish of Hunter's Hill, shewing the increase or decrease within the last twenty years? I have not.
639. You say you know the common lands in that neighbourhood better than the trustees? I believe I do much better than the trustees; perhaps much better than the majority of persons there—in fact I do not know any person who knows it better.
640. They may know it as well? They may, but very few know it as well.
641. What proof can you give? The only proof is that I have made it my business to examine it; I have been round the boundaries of it, and all through it; in fact, I have made it my business to examine it, to see whether it could be put to any better purpose than the present.
642. *By Mr. Smart*: That is, whether it would be better to sell the land for the purpose of building the bridges? No, I have looked at it in this way—whether it could not be put to better use, by being occupied by private individuals, than by lying a large waste as at present.
643. What do you mean by a better purpose? Whether it would not be better that the land should be employed for agricultural or horticultural purposes, and that which was not suited for these purposes, might not be set apart for buildings, manufactories, and so forth. I have, in this matter, looked a long way into futurity, for many years in advance.
644. *By the Chairman*: You say there is not sufficient hay grown there to supply the wants of the place? That is the case.
645. Is the greater portion of the located land under tillage in that neighbourhood? Will you explain what you mean by located lands; I do not understand the question?
646. *By Mr. Smart*: The question is a very simple one—"located land"—you surely know the meaning of that? I do not, in the way it is here used.
647. *By Mr. Heydon*: I did not exactly understand what you meant yesterday when you spoke about the quantity of common land that was good—you were asked some question about

about five-sixths or five-eighths, as mentioned in Mr. Langley's report, and you answered you thought two-thirds was good? Yes. J. S. Farnell, Esq.

648. Will you explain what quantity of common land is good land? Two-thirds. What I mean by good land is land fit for agriculture or horticulture.

14 Jan., 1862.

649. Are you aware of bad characters having settled on the common? I know there have been.

650. Have there been many? Yes, from time to time there have; it has extended as far back as I can recollect; that is, perhaps four or five and twenty years ago.

651. Have these bad characters been a nuisance to the neighbours? They have been a nuisance to the neighbourhood.

652. Have you seen the grant of this land to the commoners? Not the original; I have seen a copy.

653. An attested copy? I believe it was a correct copy.

654. Are you aware that under this grant there is a power of resumption reserved by the Government over these lands? I am.

655. For what purposes? The building of bridges or any other public purpose whatever.

[Mr. Heydon requested of the Chairman that the grant might be put in evidence. The Chairman replied that the grant was not in the possession of the Committee.]

656. Are you aware whether any of the land of the common is leased by the trustees to other persons? It is leased, portions of it.

657. Are you aware whether the trustees have granted licenses to cut wood? They have done so.

658. Do you consider that the leasing of land, or the granting of licenses to cut wood, is in accordance with the objects of a common? I believe it is not.

659. The district of the Field of Mars and Eastern Farms was settled very early in the history of the Colony? Yes; some of the first grants were issued for the Field of Mars and Eastern Farms.

660. What was the state of the common originally as to timber? As far back as my recollection there was plenty of good timber on the common; it was a forest of as good timber as is to be found in any part of the Colony; in fact it was noted for being productive of good timber, as Lane Cove is now, or as it was within the last few years.

661. What has become of the timber? It has all been cut away by different individuals, and sold in the Sydney market and elsewhere.

662. Sold away from the common? Sold away from the common.

663. In what state is the common now with respect to timber? There is very little timber on the common fit for building purposes, for sawing or splitting; in fact the only timber is at the north-west end, near Pennant Hills.

664. Is that being used by the commoners? A large quantity is being carted away at the present time, into Parramatta, where I know it is being used in fencing allotments recently sold in the Domain.

665. Would you consider that as being used for the purpose of the commoners? It is not; and I do not believe it is the intention of the Act. It is for the use of the commoners, for building on their farms and fencing in their own district.

666. Are you aware of the comparative acreage of the district of the Field of Mars and the Eastern Farms with the common? The common is not so large as the two districts; that is to say, the district of the Field of Mars and the parish of Hunter's Hill are perhaps about half as large again as the common. I speak now only roughly.

667. On a rough estimate, the comparative acreage is as one and a half to one? I dare say about that.

668. If the commoners use of their rights be apportioned in proportion to their holdings, a person having an acre and a half of land would be entitled to an acre of common?

[The Chairman objected to the question. Strangers were ordered to withdraw. The Committee deliberated. The parties were again called in.]

669. Are you aware for whose benefit commons have been granted in England?

[Mr. Smart objected to the question. Strangers were ordered to withdraw. The Committee deliberated. The parties were again called in.]

670. Is there a revenue derived from the common? There is a small one.

671. Is that any good to the commoners? None whatever.

672. Have the trustees of the common the power to assess rates on the commoners?

[Mr. Smart objected to the question. Strangers were ordered to withdraw.]

1861.

Legislative Assembly.
NEW SOUTH WALES.

PLEURO-PNEUMONIA.
(PROCLAMATIONS RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 19 November, 1861.

PROCLAMATION.

By His Excellency the Right Honorable SIR JOHN YOUNG, Baronet, Knight Commander of the Most Honorable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Administrator of the Government of New South Wales and its Dependencies.

WHEREAS by an Act passed in the present Session of Parliament, intituled, "*An Act to regulate the importation of Cattle, for the purpose of preventing the introduction of contagious or infectious disorders, and to prevent the propagation thereof in the Colony,*" it is amongst other things enacted, that it shall be lawful for the Governor, with the advice of the Executive Council, by Proclamation, to prohibit the importation or introduction into the Colony, or into any Port thereof, from any specified place, and for any specified time, of any horned cattle, and to authorize the destruction of any such cattle as may be introduced contrary to such prohibition: And whereas the disease known or described as Pleuro-pneumonia has appeared amongst horned cattle in certain parts of the neighbouring Colony of Victoria, and it is necessary to take measures to prevent the introduction into this Colony of the said disease: Now, therefore, I, SIR JOHN YOUNG, Baronet, the Governor aforesaid, with the advice of the Executive Council, do, by this my Proclamation, prohibit the importation or introduction into this Colony, or into any Port thereof, of any horned cattle whatsoever from the Colony of Victoria, or from any part thereof, for and during the full term of three calendar months, to be computed from the date of this Proclamation: And I do further notify and proclaim that, in pursuance of the provisions of the said Act, all horned cattle imported into the Colony contrary to this Proclamation, may be seized, and shall be forfeited in like manner as any contraband goods liable to be seized and forfeited under any law relating to the Customs; and every person concerned in importing or introducing, or in attempting to import or introduce any cattle, in violation of this Proclamation, will, for every such offence, upon conviction thereof, be liable to a fine not exceeding Fifty Pounds, and not less than Ten Pounds, to be recovered as in the said Act is provided.

Given under my Hand and Seal, at Government House, Sydney, this thirtieth day of April, in the year of Our Lord one thousand eight hundred and sixty-one, and in the twenty-fourth year of Her Majesty's Reign.

(L.S.) JOHN YOUNG.

By His Excellency's Command,
JOHN ROBERTSON.

GOD SAVE THE QUEEN!

PROCLAMATION.

By His Excellency the Right Honorable SIR JOHN YOUNG, Baronet, Knight Commander of the Most Honorable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Captain General and Governor-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.*

WHEREAS by an Act passed in the last Session of Parliament, intituled, "*An Act to regulate the importation of Cattle, for the purpose of preventing the introduction of contagious or infectious disorders, and to prevent the propagation thereof in the Colony,*" it is amongst other things enacted, that it shall be lawful for the Governor, with the advice of the Executive Council, by Proclamation, to prohibit the importation or introduction into the Colony, or into any Port thereof, from any specified place, and for any specified time, of any horned cattle, and to authorize the destruction of any such cattle as may be introduced

contrary to such prohibition: And whereas the disease known or described as Pleuro-pneumonia has appeared amongst horned cattle in certain parts of the neighbouring Colony of Victoria, and it is necessary to take measures to prevent the introduction into this Colony of the said disease: Now, therefore, I, SIR JOHN YOUNG, Baronet, the Governor aforesaid, with the advice of the Executive Council, do, by this my Proclamation, prohibit the importation or introduction into this Colony, or into any Port thereof, of any horned cattle whatsoever, from the Colony of Victoria, or from any part thereof, for and during the full term of three calendar months, to be computed from the date of this Proclamation: And I do further notify and proclaim that, in pursuance of the provisions of the said Act, all horned cattle imported into the Colony, contrary to this Proclamation, may be seized, and shall be forfeited in like manner as any contraband goods liable to be seized and forfeited under any law relating to the Customs; and every person concerned in importing or introducing, or in attempting to import or introduce any cattle, in violation of this Proclamation, will for every such offence, upon conviction thereof, be liable to a fine not exceeding Fifty Pounds, and not less than Ten Pounds, to be recovered as in the said Act is provided.

Given under my Hand and Seal, at Government House, Sydney, this second day of August, in the year of Our Lord one thousand eight hundred and sixty-one, and in the twenty-fifth year of Her Majesty's Reign.

(L.S.) JOHN YOUNG.

By His Excellency's Command,
JOHN ROBERTSON.

GOD SAVE THE QUEEN!

PROCLAMATION.

By His Excellency the Right Honorable SIR JOHN YOUNG, Baronet, Knight Commander of the Most Honorable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Captain General and Governor-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

WHEREAS by an Act passed in the last Session of Parliament, intituled, "*An Act to regulate the importation of Cattle, for the purpose of preventing the introduction of contagious or infectious disorders, and to prevent the propagation thereof in the Colony,*" it is amongst other things enacted, that it shall be lawful for the Governor, with the advice of the Executive Council, by Proclamation, to prohibit the importation or introduction into the Colony, or into any Port thereof, from any specified place, and for any specified time, of any horned cattle, and to authorize the destruction of any such cattle as may be introduced contrary to such prohibition: And whereas the disease known or described as Pleuro-pneumonia has appeared amongst horned cattle in certain parts of the neighbouring Colony of Victoria, and it is necessary to take measures to prevent the introduction into this Colony of the said disease: Now, therefore, I, SIR JOHN YOUNG, Baronet, the Governor aforesaid, with the advice of the Executive Council, do, by this my Proclamation, prohibit the importation or introduction into this Colony, or into any Port thereof, of any horned cattle whatsoever, from the Colony of Victoria, or from any part thereof, for and during the full term of six calendar months, to be computed from the date of this Proclamation: And I do further notify and proclaim that, in pursuance of the provisions of the said Act, all horned cattle imported into the Colony, contrary to this Proclamation, may be seized, and shall be forfeited in like manner as any contraband goods liable to be seized and forfeited under any law relating to the Customs; and every person concerned in importing or introducing, or in attempting to import or introduce any cattle, in violation of this Proclamation, will, for every such offence, upon conviction thereof, be liable to a fine not exceeding Fifty Pounds, and not less than Ten Pounds, to be recovered as in the said Act is provided.

Given under my Hand and Seal, at Government House, Sydney, this first day of November, in the year of Our Lord one thousand eight hundred and sixty-one, and in the twenty-fifth year of Her Majesty's Reign.

(L.S.) JOHN YOUNG.

By His Excellency's Command,
JOHN ROBERTSON.

GOD SAVE THE QUEEN!

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

PLEURO-PNEUMONIA.

(FURTHER PROCLAMATIONS RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 7 January, 1862.

PROCLAMATION.

By His Excellency the Right Honorable SIR JOHN YOUNG, Baronet, Knight Commander of the Most Honorable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Captain General and Governor-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

WHEREAS by an Act passed in the twenty-fourth year of Her Majesty's Reign, intituled, "*An Act to regulate the Importation of Cattle, for the purpose of preventing the introduction of contagious or infectious disorders, and to prevent the propagation thereof in the Colony,*" it is amongst other things enacted, that it shall be lawful for the Governor, with the advice of the Executive Council, by Proclamation, to make such Regulations respecting any horned cattle, as may be deemed necessary for preventing the introduction or propagation of any contagious or infectious disorders, whether by submitting such cattle to any specified system of Quarantine, or by the destruction of any such cattle found or suspected to be infected: Now, therefore, I, the Right Honorable SIR JOHN YOUNG, Baronet, the Governor aforesaid, with the advice of the Executive Council, do, by this Proclamation, make the following Regulations, viz. :—

1. The Minister for Lands shall have authority to appoint such and so many proper persons as to him shall seem fit, to be Cattle Inspectors, or Assistants to such Inspectors; and all Inspectors so appointed, and their Assistants, shall have power to enter upon any land or any run for the purpose of examining the horned cattle thereon, and, subject to the instruction of the Minister for Lands, to slaughter and destroy any horned cattle found to be, or suspected to be infected with the disease known as Pleuro-pneumonia.

2. The owner of any land or the licensee of any runs shall be at liberty, by himself or his servants, or assistants, to slay and destroy any horned cattle found, or suspected to be, infected with Pleuro-pneumonia, which may stray or be driven on to his land or run, from any land or run placed under Quarantine by the Governor and Executive Council, during the continuance of such Quarantine.

Given under my Hand and Seal, at Government House, Sydney, this twenty-fourth day of December, in the year of Our Lord one thousand eight hundred and sixty-one, and in the twenty-fifth year of Her Majesty's Reign.

(L.S.) JOHN YOUNG.

By His Excellency's Command,
JOHN ROBERTSON.

GOD SAVE THE QUEEN!

PROCLAMATION.

By His Excellency the Right Honorable SIR JOHN YOUNG, Baronet, Knight Commander of the Most Honorable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Captain General and Governor-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

IN pursuance of the power vested in the Governor, with the advice of the Executive Council, by the "*Cattle Disease Prevention Act of 1861*," and in furtherance of the Regulations issued under the said Act, and bearing even date herewith, I, the Right Honorable SIR JOHN YOUNG, Baronet, the Governor aforesaid, with the advice of the Executive Council, do, by this my Proclamation, declare the following Lands or Runs to be in Quarantine, within the meaning and for the purposes of the said Act, viz. :—

Albury Reserve,	Copabella,
Mungabarino,	Jinjellick,
Bowna Reserve,	Mungoplar,
Mullengandra Reserve, &c.,	Ten Mile Creek (Bardwell's),
Woomargania Reserve,	Mullengandra,
Germantown or Ten Mile Creek Reserve,	Mountain Creek,
Merrybundinyah (White's),	Ten Mile Creek (Purtell and Dalton's),
Yarra Yarra,	Carobost,
Ten Mile Creek (Bowler's),	Billy Bong,
Dora Dora,	Cookendina,
Wagra,	Jerry Jerry,
Carabobola,	Pulitop,
Clarendon or Billy Bong Reserve,	Little Billy Bong,
Yarrara,	Sandy Creek,
Little Billy Bong Reserve,	Cumberoona,
Mungoplar Reserve,	Tabletop,
Wagga Wagga,	North Gunningbill,
Wagga Wagga Township and Reserve,	Kyamba,
Four Mile Creek,	Woomargania.

Given under my Hand and Seal, at Government House, Sydney, this twenty-fourth day of December, in the year of Our Lord one thousand eight hundred and sixty-one, and in the twenty-fifth year of Her Majesty's Reign.

(L.S.) JOHN YOUNG.

By His Excellency's Command,
JOHN ROBERTSON.

GOD SAVE THE QUEEN !

1861.

Legislative Assembly.
NEW SOUTH WALES.

PLEURO-PNEUMONIA.

(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be Printed, 5 December, 1861.

No. 1.

PLEURO-PNEUMONIA COMMISSIONERS to SECRETARY FOR LANDS.

*Ten Mile Creek,
30 November, 1861.*

SIR,

In obedience to your instructions, we have the honor to inform you that Mr. Garland and Mr. Pottic arrived here last night, and, accompanied by Mr. Bruce, visited the Yarra Yarra Station this morning.

We regret to state that Pleuro-pneumonia has existed here in a virulent form, and that the Messrs. M'Laurin have already slaughtered five thousand head (5,000) of cattle. Mr. Pottic made a minute inspection of a number of lungs in various states of disease, and his report is herewith enclosed. In the course of the afternoon Messrs. Day and Meyer arrived, and we proceeded at once to consider the various questions connected with the very important duties we had to discharge.

The decisions at which we arrived on the several subjects to which your instructions directed our attention, will be gathered from the three resolutions which we have the honor to enclose, and which were passed and entered on the minutes of our proceedings. We have not had time fully to discuss and decide upon the mode of compensation; but will take the earliest opportunity of coming to a conclusion upon this subject, which we will immediately transmit.

With reference to our recommendation to prevent horned cattle being removed from the Murrumbidgee Pastoral District to any other portion of the Colony of New South Wales, we beg to state that we have been induced to offer this suggestion, in consequence of having reason to believe that the infected district, now under quarantine, does not include anything approaching to the extent of diseased country; and until, by further inspection, we can ascertain its limits, we think it prudent to take every precaution. At the same time, we do not consider that such a restriction will be productive of much hardship to the district, inasmuch as it will apply to a country almost wholly in connection with the Victorian markets, and will in no way interfere with taking fat stock there; while, on the other hand, it will not operate against the introduction of sound stock from the Northern Districts. The only injury that can be sustained will arise from the inability to send fat stock from the district to the Lachlan Gold Fields.

The other two resolutions will of course be subject to modifications, as our information becomes more complete.

We have forwarded a telegram to-day, embodying the substance of this letter.

So far as we are at present advised, we do not know that the disease has extended further.

To-morrow we are about to proceed on a tour of inspection, and will lose no opportunity of communicating the result to you.

We have, &c.,

JAS. GARLAND.

GEORGE DAY.

S. A. MEYER.

ALEXR. BRUCE.

[Enclosure 1 in No. 1.]

Ten Mile Creek,
30 November, 1861.

Sir,

In obedience to your instructions, I furnish, as an Appendix to the Board of Commissioners' Report for inquiring into the history, nature, and causes of that disease said to exist among the cattle of this district, termed Pleuro-pneumonia, I have the honor to transmit a brief notice of such facts as came under my observation.

The history of the introduction of the disease remains as yet a mystery; various and vague reports are current in this district, and the Messrs. M'Laurin are not prepared to say how it was introduced into their herd.

With regard to the nature of Pleuro-pneumonia here prevalent, it much resembles the same disease which for the last twenty years has ravaged the stock of Great Britain. The symptoms are generally of a typhoid character, and thus the disease escapes notice until it has advanced beyond the reach of cure. Evidently the contagious or spreading nature of the disease is just as virulent here as elsewhere; for, on examination, I found nearly all of Mr. M'Laurin's herd exhibiting the external symptoms of Pleuro-pneumonia.

I at once commenced post mortem examinations, and had twenty cattle killed for that purpose. The following is an outline of what appeared:—

A cow six years old:—Abdominal parietics and peritoncum good, but symptoms of diarrhœa present within the intestinal canal, with derangement of fourth stomach; chest appearances very bad; left lung studded with congestive spots, and the bronchial tubes within much inflamed; right lung firmly adhering through its pleura to the diaphragm and pleura costales, with effusion of lymph matter and blood. The lung, after being taken from the chest, felt tremendously heavy, and upon cutting into its substance, found it perfectly hepatized, and exhibiting the marble appearance so conclusive in this disease. The inflammation had also extended up the trachea, involving the larynx and pharynx.

The others exhibited similar symptoms in a minor degree.

I have, &c.,
JOHN POTTIE,
Vet. Surgeon.The Honorable the Secretary for Lands,
Sydney.

[Enclosure 2 in No. 1.]

RESOLUTIONS passed by Board of Commissioners on Pleuro-pneumonia, at Ten Mile Creek, on
30th November, 1861.

RESOLVED:—

That the country comprehended in that portion of the Colony of New South Wales known as the Pastoral District of Murrumbidgee, exclusive of that portion of the said District lying east of the watershed of the Tumut River, be temporarily proclaimed as a district from which no horned cattle of any description shall pass into any other portion of New South Wales.

That the runs already proclaimed by the Inspector as infected shall remain under quarantine, and be subject to all the restrictions and disabilities now in force, or hereafter to be imposed, respecting such runs.

That in the meantime six stockmen be appointed as boundary keepers, to guard the runs immediately beyond the land under quarantine, or such greater number as an extended boundary may require, with power to prevent all cattle from passing such boundary from infected runs, and to destroy such cattle so passing over as the Inspector shall indicate, with the approbation of the Board.

No. 2.

Copy of Telegram from Pleuro-pneumonia Commissioners, relative to compensation to be granted for destruction of Cattle.

We find difficulty with present data in arriving at conclusion on mode of compensation. Is it urgent, or can we defer till inspection is more complete?

4th December, 1861.

No. 3.

Copy of Telegram to Pleuro-pneumonia Commissioners, in reply to Letter of 30th November, 1861, and Telegram of 4th December, 1861.

The Secretary for Lands has approved of the Resolutions of the Board, enclosed with your letter of the 30th ultimo.

With regard to the question of compensation, the Government desire a careful and well-considered recommendation on this point, and Mr. Secretary Robertson does not think it will be proper to press the matter at the expense of these considerations. In the meantime the question will be considered an open one.

5th December, 1861.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

MRS. ANNE GREENE.

(PLEURO-PNEUMONIA.)

Ordered by the Legislative Assembly to be Printed, 20 January, 1862.

To the Honorable the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The humble Petition of Anne Greene, of Billabong, in the Colony of New South Wales, widow,—

SHEWETH :—

- 1st. That your Memorialist is the proprietor of the Billabong Station.
- 2nd. That your Memorialist had, in the month of September, 1861, made arrangements for the sale of five hundred fat cattle, to have been delivered within the months of October and November then following, at the rate of £5 for bullocks and £4 for cows.
- 3rd. That Mr. A. Bruce, the Cattle Inspector of the said Colony, did, on the 21st day of October, prevent your Memorialist delivering the first draft of one hundred fat cattle, on the ground that one steer was affected with Pleuro-pneumonia; said steer not being the property of your Memorialist, and not having been found on your Memorialist's run. (The steer in question was the property of Mr. Purtell, and was found on Mr. Bardwell's run, one mile from the boundary of your Memorialist's run.)
- 4th. That your Memorialist's cattle having without proper cause been placed under quarantine, your Memorialist, in the hope of such quarantine being removed, has caused inquiries to be made with the view of disposing of the fat cattle before mentioned, and she finds that an inevitable loss of £3 and £2 respectively (for bullocks and cows) per head must result from the prohibition before mentioned.
- 5th. That your Memorialist had made an agreement with a dairyman to supply him with 250 dairy cows, at a rent of £50 for the year 1861, and £100 per annum for the two following years; and that said tenant expended in consequence of said agreement £250, in the erection of suitable premises for carrying on his business, said premises having been erected on Government land.
- 6th. That on the 23rd day of October, the Inspector, Mr. A. Bruce, did interfere with the arrangement between your Memorialist and her tenant, by ordering the dairying of the cattle to be discontinued.
- 7th. That in consequence of what has already been stated, your Memorialist's tenant cannot exercise his occupation of a dairyman, and therefore will be free from his engagement to pay the said rent; and also has given notice of action against your Memorialist for the amount he has unprofitably expended, together with amount of profit which he expected to make from the exercise of his occupation aforesaid.
- 8th. That your Memorialist therefore suffers real inconvenience, having engagements to meet, and loss on the sale of fat cattle to the extent of £1,250; also loss of rent from the tenant, £250; and loss on the improved value of the cattle from being dairied; and that also she will have to pay her tenant compensation for his loss of money expended, £250, and his loss of time and profit, £250.
- 9th. That your Memorialist submits the foregoing case to your Honorable House, and respectfully prays that your Honorable House will cause full justice to be done in the matter; and your Petitioner, as in duty bound, will ever pray.

ANNE GREENE,
Per RANDON F. GREEN.

To loss on 250 bullocks sold at £5, and 250 cows at £4, for which only an average of £2 can now be obtained	£1,250
To loss of Rent from Dairy	250
To claim of Dairyman for money expended on premises	250
To claim of same for loss of time and profit	250
	<hr/>
	£2,000

NEW SOUTH WALES.

INVENTIONS AND IMPROVEMENTS IN RAILWAYS AND TRAMWAYS.

(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 17 October, 1861.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 1 October, 1861, That there be laid upon the Table of this House,—

“ (1.) A Copy of all the Correspondence which has taken place between the Secretary for Public Works and Mr. Edward Bell, Civil Engineer, relative to his Inventions and Improvements in Railways and Tramways.

“ (2.) Also, a Copy of the Reports (if any) of the Engineer-in-Chief for Railways, upon the same.”

(*Mr. Wilson.*)

SCHEDULE.

NO.	PAGE.
1. E. Bell, Esq., to the Secretary for Public Works, offering his inventions for improvements in Railways, &c., to the Government. 6 February, 1861	2
2. E. Bell, Esq., to the Secretary for Public Works, circular letter inviting attendance at exhibition of Models. 14 February, 1861	2
3. The Engineer-in-Chief for Railways, reporting on Mr. Bell's letter of 6 February, 1861. 19 February, 1861	2
4. The Under Secretary for Public Works to E. Bell, Esq., informing him that any proposals will receive the attention of Government. 2 March, 1861	3
5. E. Bell, Esq., to the Secretary for Public Works, submitting proposals for testing his Railway improvements. 8 March, 1861	3
6. The Engineer-in-Chief for Railways, reporting thereon. 10 May, 1861	4
7. The Under Secretary for Public Works to E. Bell, Esq., informing him that the Government cannot accede to his proposals. 12 June, 1861	4
8. E. Bell, Esq., to the Secretary for Public Works, applying for copy of Mr. Whitton's Report on his proposals, &c. 26 June, 1861	5
9. The Under Secretary for Public Works to E. Bell, Esq., in reply, informing him that it is not customary to furnish copies of such Reports. 5 July, 1861	5

INVENTIONS AND IMPROVEMENTS IN RAILWAYS AND TRAMWAYS.

No. 1.

E. BELL, ESQ., to SECRETARY FOR PUBLIC WORKS.

Sydney, 6 February, 1861.

SIR,

I have the honor to call the attention of the Government to my two Inventions for Improvements in Railways and Tramways, for which Letters of Registration for the Colony have recently been granted to me, for the respective terms of fourteen years.

I am desirous of placing these inventions at the service of the Government of this Colony, upon very advantageous terms to the public, looking more for my eventual remuneration to the adoption of them by other Colonies, after they shall have been successfully used here.

I feel confident that the adoption of my improvement will save them from £6,000 to £8,000 a mile upon the present estimated cost of Railways in this Colony; and shall be happy to be afforded an opportunity of opening a negotiation with the Government on the subject.

I have, &c.,

EDWARD BELL,
Civil Engineer.

Mr. Whitton, for report. W. M. A.
8/2/61.
Mr. Whitton accordingly. B. C., 16/2/61.
J. R.

No. 2.

E. BELL, ESQ., to SECRETARY FOR PUBLIC WORKS.

Sydney, 14 February, 1861

SIR,

I have been favored by the Committee of the Sydney School of Arts with the use of a large room in that building, to exhibit Models illustrative of my Inventions and Improvements in Railways to Members of both Houses of Parliament, prior to the opening of the forthcoming Industrial Exhibition.

They will be on view on Tuesday and Wednesday, the 19th and 20th instant, at 11 a.m., when I shall be present to explain their operation.

The honor of your attendance is respectfully requested.

I have, &c.,

EDWARD BELL,
Civil Engineer.

No. 3.

REPORT of Engineer-in-Chief for Railways.

MR. BELL'S patent is yet untried; the model which he has had made affords no evidence of what might be the power of a properly constructed machine, as it is mechanically most faulty. I presume there can be no objection to Mr. Bell "opening a negotiation" with the Government; but I cannot recommend that any expenditure of public money be incurred for the purpose of trying Mr. Bell's scheme, as I am thoroughly satisfied that it is very inferior to the ordinary railway, both with regard to the permanent way and the engine, and that an ordinary locomotive will accomplish everything that can be done by Mr. Bell's engine.

J. W.
19/2/61.

Seen. Acknowledge. Any proposals made by Mr. Bell will receive the attention of Government.

W. M. A.
28/2/61.

UNDER SECRETARY FOR PUBLIC WORKS to E. BELL, ESQ.

*Department of Public Works,
Sydney, 2 March, 1861.*

SIR,

In reference to your letter of the 6th ultimo, requesting to be afforded an opportunity of opening a negotiation with the Government on the subject of your invention for improvement in Railways and Tramways, I am directed by the Secretary for Public Works to inform you that any proposals made by you in this matter will receive the attention of the Government.

I have, &c.,

JOHN RAE.

No. 5.

E. BELL, ESQ., to SECRETARY FOR PUBLIC WORKS.

Sydney, 8 March, 1861.

SIR,

I have the honor to acknowledge the receipt, on the 4th instant, of your letter of the 2nd, in answer to mine of the 6th ultimo, and I now do myself the honor to submit to your notice the following proposals.

Before doing so, I would remark that there are two points upon which the Government may fairly require proof to satisfy themselves of the advantage of my plan of Railway, &c., before adopting it as a system throughout the Colony; first, the practicability of ascending and descending severe gradients by means of locomotive engines with safety; second, the effect produced upon the wooden ways and wheels by working upon my plan.

The first problem, in which the economy of construction is concerned, could be very readily solved; the second, in which the economy of working and the durability of the line is involved, would require constant traffic for (say) 12 months, to shew anything from which a proper deduction could be drawn. I would therefore respectfully propose to construct a line of 8 or 10 miles in length through a fair average country, reasonably contiguous to a supply of suitable timber, and between two places through which a line is likely to pass; the traffic between which would give a good working trial of the railway and engines, and at the same time defray the expense of running the trains. On such a line, it would be easy to provide the means of testing the first point I have mentioned. The Government may, by this method, test the system thoroughly, it could incur no risk of loss to the country, because in the event, after the trial, of my system not being approved, the line would be available for horse traction.

I would submit that such a line should form a branch, or be a continuation of some one of the existing lines, that the carriages running upon them might be used for through traffic upon both, and thereby subject my proposed line to a more severe test.

I consider that gradients of one in twelve may easily be overcome and worked to advantage under my system. I propose to introduce such gradients in the experimental line when necessary, and, if I shew their successful working, I shall demonstrate that cuttings and tunnels may be dispensed with in Railway works throughout the Colony. Should gradients of one in seven be found necessary to avoid these heavy and expensive works, I have no hesitation in saying they may be overcome and worked successfully under my system, so likewise curves of two or three chains radius.

I estimate that such a fair average line of Railway may be constructed, and two Engines made in this Colony and put to work upon it, within twelve months from the commencement, at a cost not exceeding twenty-five thousand pounds (£25,000). I mention the distance of 8 or 10 miles in reference to the trial line, but it would be practicable to construct ten times that length in the same period, at a similar cost *pro rata*; it being understood, that it exclude the crossing of large rivers, deep ravines or gullies, and precipitous country, from this estimate.

As the success of the trial must mainly depend on my own personal exertion, skill, and management, I would submit that the entire superintendence and direction of the works, and people employed on them (excepting money receivers), must necessarily be confided to me during the construction of the works and the term of the trial; in fact, from their commencement to the period of their approval or otherwise.

The experiment to extend over one year from the time the line and engines are declared by me to be in working order. Nothing to be paid for the use of the invention during that time, unless the system is successful. If it be successful, I am to be paid one shilling per train mile run for the last (6) six months of the trial year, for the use of the invention; and, for all future train miles run on my system upon any line, one shilling per train mile run—it being understood that, if the patent be used upon any part of a line, the
mileage

4 INVENTIONS AND IMPROVEMENTS IN RAILWAYS AND TRAMWAYS.

mileage is to be paid upon the whole length that the trains run, as if the patent were employed the whole distance (existing lines excepted, unless the patent be used upon them).

I respectfully submit these propositions as the basis of a negotiation, and I shall be quite willing to discuss any modification which may be suggested on the part of the Government.

I have, &c.,
EDWARD BELL,
Civil Engineer,
M. Inst. C. E.

Mr. Whitton is requested to report on this proposal. W. M. A.
14/3/61.
Mr. Whitton accordingly. B. C., 15/3/61.
J. R.

No. 6.

REPORT of Engineer-in-Chief for Railways.

MR. BELL proposes that the Government should furnish him with £25,000, to construct 8 or 10 miles of railway and build two engines; it being understood that "the crossing of large rivers, deep ravines or gullies, and precipitous country, is excluded from this estimate."

It requires no consideration to see that the above estimate is a mere guess; Mr. Bell having no objection to pledge himself to construct 10 miles for the same amount as 8 miles, carefully excluding all works which make railways in this country expensive. It is quite probable that one bridge on the 8 miles, or 10 miles, proposed to be constructed, would cost from £20,000 to £40,000, or even £60,000, yet no provision is made for such contingencies. In fact, Mr. Bell's estimate is simply for a way of a very temporary character (without works), and for a little more money a good permanent way might be constructed.

Mr. Bell states, that under his system gradients of 1 in 12 "may be easily overcome and worked to advantage." I know that such gradients never have been "easily overcome" or "worked to advantage," and they never will be by Mr. Bell's process. A locomotive engine with iron driving wheels, and working on iron rails, can be made to work gradients of 1 in 12; but the work done would be so costly, that it would be less expensive to increase the cost of construction and improve the gradient. Any gradient worse than 1 in 40 is a bad gradient, and should never be used if practicable to avoid it; almost any expense in works is preferable to such gradients. Circumstances will no doubt arise, where gradients of 1 in 30, or even worse, must be used, but these are difficulties which should not be made to avoid ordinary works.

I am not certain that I understand Mr. Bell's proposal with reference to the remuneration to be paid to him for his "personal exertion, skill, and management;" but if I read his offer correctly, Mr. Bell would have to be paid about £9,000 per annum for mileage on the Southern Line, assuming that his patent should be laid down between Campbelltown and Camden. I may here state that Mr. Bell proposes to increase the tractive power of an engine by using wooden rails and wooden driving-wheels, and by having engines of less weight than those now in use on the existing lines. This is really the sole merit Mr. Bell claims for his patent. Now, it must be self-evident that the tractive power of an engine depends not entirely upon increased adhesion, *but upon power combined with adhesion*; and assuming that more adhesion is attained by using wood against wood than by the use of iron against iron, this assumed advantage is thrown away by decreasing the weight holding the two bodies in contact. It is probably not necessary to say more on this subject than that, in my opinion, Mr. Bell's model is mechanically defective, and if ever his scheme be tried it will turn out a failure.

INVENTIONS AND IMPROVEMENTS IN RAILWAYS AND TRAMWAYS. 5

No. 8.

E. BELL, ESQ., to SECRETARY FOR PUBLIC WORKS.

Sydney, 26 June, 1861.

SIR,

In reference to your communication of the 12th instant, acknowledging mine of the 8th March last, and informing me that, under a Report received from the Engineer-in-Chief for Railways, you do not feel justified in "recommending to the Government any expenditure for testing the merits of my invention,"—may I respectfully ask the favor of a copy of the Report of the Engineer-in-Chief for Railways upon the subject, to which you allude in your communication to me.

I have, &c.,

EDWARD BELL,
Civil Engineer.

I regret that Mr. Bell's request cannot be complied with. It is not customary, and would lead to great inconvenience if reports of this kind were furnished to persons applying for them.

So inform.

W. M. A.

UNDER SECRETARY FOR PUBLIC WORKS to E. BELL, ESQ.

*Department of Public Works,
Sydney, 5 July, 1861.*

SIR,

In acknowledging the receipt of your letter of the 26th ultimo, applying for a copy of the Report of the Engineer-in-Chief for Railways, relative to your inventions for improvements in Railways and Tramways, I am directed by the Secretary for Public Works to inform you, that it is not customary to furnish copies of reports of this nature to persons applying for them, as a compliance with such requests would lead to much inconvenience.

I have, &c.,

JOHN RAE.

1861.

—
Legislative Assembly.
 NEW SOUTH WALES.

—————
MR. HENRY SCOPE.
 (PLANS FOR RAILWAYS.)

—————
Ordered by the Legislative Assembly to be Printed, 14 November, 1861.
 —————

The Honorable the Speaker and Gentlemen of the Legislative Assembly, in Parliament assembled,—

GENTLEMEN :—

Your Petitioner humbly prays to be allowed to avail himself of the present opportunity of bringing before your Honorable House a set of Plans for Railways, to be worked either by steam power or horse traction, suitable for the Colony, as embracing all the elements necessary to effect a cheap and permanent mode of transit.

As I have had considerable experience in connection with George Stephenson and other scientific engineers, in the testing of the relative merits of the two systems, namely, steam power and horse traction, as a locomotive agent,—and the present crisis, which calls for more than ordinary effort to determine what are the best and cheapest means to adopt, in securing to this country an effective system of internal transit, has induced your humble servant offering his mite of practical knowledge towards so desirable an object.

And your Petitioner humbly prays that your Honorable House will take the matter into your serious consideration, at your earliest opportunity, and your humble servant will feel in duty bound to ever pray.

HENRY SCOPE.

*Riley-street, Surry Hills,
 November 4th, 1861.*

1861.

NEW SOUTH WALES.

OBSERVATORY, SYDNEY.

(FOURTH REPORT.)

Presented to both Houses of Parliament, by Command.

MINUTE of the Proceedings of the Observatory Board, at a Meeting held at the Observatory, on the 12th December, 1861.

Present:—

HIS EXCELLENCY THE GOVERNOR, in the Chair.
THE HONORABLE THE COLONIAL SECRETARY.
THE SURVEYOR GENERAL.

THE Board having inspected the Building and Instruments, the Astronomer's Annual Report was read.

The Board express their satisfaction at the state of the Establishment, and are glad to find that the new Telescope answers the expectations that had been formed of it.

The Board approve the proposed arrangement of work for the year 1862; also of the proposed magnetic survey of the Colony, and recommend that application be made to the Government for an annual grant of £100, for the purpose of carrying out such survey.

The Board recommend that the Minutes of their Proceedings, and a copy of the Astronomer's Report, be submitted to the Government, with a view to their being printed, and adjourn *sine die*.

FOURTH ANNUAL REPORT ON THE SYDNEY OBSERVATORY.

THIS Report will probably be considered the most satisfactory that has yet been submitted to the Observatory Board.

The Establishment is now complete in every respect.

The instruments, though inferior in some respects to those in the large national Observatories, are yet as good as could be expected, and however much I might desire an increase in the number of assistants, I could not ask for such an increase consistently with a due regard for the resources of the Colony.

The Observations made during the year 1860 have been fully reduced, and their results published and distributed amongst the principal Observatories.

The total number of Meridian Observations made and reduced during that period was 2,820, of which 2,507 were published; the remainder, which were employed for the determination of local mean time only, were omitted.

The exact determination of the Longitude of the Observatory may still be considered incomplete, the corrections to be applied to the Moon's places as given in the Nautical Almanac not having yet been communicated to me from the Greenwich Observatory.

In conjunction with Mr. Ellery, the Astronomer at Melbourne, I have determined by telegraphic signals, the difference between the Longitudes of the Williamstown and Sydney Observatories, which is 25 minutes 11.4 seconds.

The number of Meridian Observations during the present year is 2,100; this number is less than the number made in the corresponding period of 1860, owing to the interruption occasioned by the arrival of the new Equatorial Telescope; the time occupied by its adjustments and preparatory determinations; and by the Observations, experimental and otherwise, that have been made with it.

The reduction of the Observations of the current year is in a forward state, and the whole will be ready for the press some time in February next.

The Time Ball has been dropped accurately every day at one o'clock; the same attention having been paid to accuracy on Sundays as on other days. The limit of error in dropping the ball may be considered as not more than half a second.

The great Comet of 1861, known as Tebbutt's Comet, was observed a great number of times, with all possible accuracy; and the results reduced and forwarded to the Royal Astronomical Society.

Numerous Occultations of Fixed Stars have been observed with the new Equatorial, and Observations have been made with the same instrument of a few of Sir J. Herschell's Double Stars.

Transits of the Moon, and Moon-culminating Stars have been observed at every opportunity.

Considerable changes have taken place in the arrangement of the Meteorological Observatories. The Instruments at six of the Stations have been removed to the neighbouring Telegraph Stations, and placed under the care of the Station Masters. The results obtained at Brisbane and Rockhampton have been sent to this Observatory, and collated with those of New South Wales; this arrangement however terminates with the current year.

PERSONAL ESTABLISHMENT.

This remains the same as last year, with the exception of the changes in the Meteorological Observers, above mentioned. There are now only three paid Observers, namely, at Cooma, Armidale, and Casino.

BUILDINGS.

In my last Report, I mentioned that preparations had been made for the erection of a Meridian mark on the North Shore, and that a temporary mark had already been erected. My experience with the temporary mark convinced me that the proposed plan could not be satisfactorily carried out; I have therefore adopted a different arrangement, namely, to erect a Pillar on the south side of the Observatory, bearing a delicate mark, which, when viewed through a lens of long focus built into the wall, gives nearly the same advantages as a distant mark, without any of its disadvantages and difficulties. This plan has been carried out to my entire satisfaction.

The Piers which formerly carried the old Transit Telescope have been removed, and a single Pier substituted in their place, for the reception of one of the Magnetic Instruments.

LIBRARY.

The collection of Books has been increased by donations from various public Observatories, also by the removal of a number of Astronomical works from the Library of the Museum. A considerable number of duplicates of Astronomical and other works, which were of no value to the Observatory, have been transferred, with the approval of the Government, to the Library of the University. The sum annually voted for the purchase of books has been raised from £20 to £30, which appears to be sufficient for the purpose.

INSTRUMENTS.

The list of Instruments has received a most important increase, by the arrival of an excellent Telescope, equatorially mounted, manufactured for this Observatory by Merz and Son, of Munich. This is, I believe, the most powerful Instrument of the description in the Southern Hemisphere. The Telescope was mounted in June last. Several minor additions and improvements have been made, and the Instrument may now be regarded as complete in every respect.

A very good set of portable Magnetic Instruments has also been received, manufactured under the direction of the Kew Committee of the British Association for the advancement of Science. The old Equatorial Telescope has been mounted in one of the rooms on the eastern side of the building, for the purpose of observing such phenomena as may occur in that portion of the sky which is hidden from the new Telescope by the Time Ball Tower.

The Transit Circle is in constant use. In the course of the year an attempt has been made, with partial success, to grind the pivots into a more truly cylindrical form. An addition has also been made to this Instrument, consisting of a Chronographic Apparatus, lent by the Government of Victoria, similar in principle to the instruments used in recording Telegraphic messages. By means of this arrangement the seconds of the Transit Clock, and the instants of a star's transits across the wires of the Telescope, are recorded on the same fillet of paper. This apparatus is also connected by wires with a contact-piece in the Equatorial Room, by means of which the clock in that room can be exactly compared with the Transit Clock.

PROPOSED WORK FOR THE COMING YEAR.

In laying down a plan for future operations, it is necessary to consider, not what course will be most in accordance with my own tastes, or lead to the most showy results, but what will conduce most to the promotion of Astronomical Science. Bearing this in mind, and observing that the Star Catalogues are very defective as regards the portion of the celestial sphere included between 13° and 33° of south declination, I have thought it desirable to commence a systematic survey of that portion, dividing it into zones of 3° in breadth; in this way I shall be enabled to note the position of every star, up to the eighth magnitude inclusive. At the same time, the observation of the stars of Lacaille's Catalogue, within 10° North and South of the Zenith, will be carried on as before.

Transits of the Moon and Moon-culminating Stars; Occultations of Stars and Planets by the Moon; Eclipses of the Sun and Moon, and of Jupiter's Satellites, will be observed as often as they occur.

The re-observation of Sir J. Herschell's Catalogue of Southern Double Stars will be continued as opportunity shall offer. With regard to these Observations, it must be noticed that the atmosphere of Sydney is but seldom in a good state for observing double stars; and as there is but one observer it is impossible to keep night watches, so as to select the most favorable opportunities for such a work.

With the Magnetic Instruments I propose to determine periodically the different Magnetic elements at the Observatory. I have applied to the Government for permission to make the same determinations at numerous points in the Colony, partly with a view to the promotion of the science of Terrestrial Magnetism, and partly with, what many will consider the more important object, of determining accurately the Magnetic variation at different places. This operation should be repeated at intervals of some years, in order to determine the changes of variation which, as is well known, are constantly going on. This change at Sydney amounts to more than one minute annually, so that the boundary lines of an estate, surveyed at intervals of fifty years, would be found to differ by about a degree in direction.

The above programme of work for the coming year would of course afford ample occupation for more than one Observer. Indeed, in a public Observatory in which all the Observations and a considerable portion of the Computations fall to the lot of one Astronomer, his life must be a continual conflict between the desire to produce more extensive results and the limits imposed by the necessity of preserving his mental and physical powers unimpaired. The consciousness of having somewhat transgressed those limits, without altogether satisfying that desire, renders me anxious to secure the assistance of some competent amateur, to whom might be entrusted the more interesting class of Observations; that is to say, all Observations with the new Telescope, leaving me to carry on uninterruptedly the very monotonous but useful task of completing the Catalogue of the Stars of the Southern Hemisphere.

W. SCOTT,
Astronomer.

1861.

Legislative Assembly.

NEW SOUTH WALES.

FELIX SWAINSTON.

(PETITION OF.)

Ordered by the Legislative Assembly to be Printed, 11 October, 1861.

To the Honorable the Legislative House of Assembly for New South Wales, in Parliament assembled.

The humble Petition of Felix Swainston, Carrier, of Sutton Forest, Camden,—

MOST RESPECTFULLY SHEWETH:—

That your Petitioner, in his occupation as a Carrier, was proceeding from Sydney to Goulburn, loaded with merchandize and cases of spirits.

That your Petitioner arrived at Picton on the fourteenth day of March last, and finding the new bridge not opened, took every precaution, by hiring assistance, to cross the old one in safety; but owing to its dangerous and out of repair condition, your Petitioner was precipitated, together with the whole of the team, from the top to the bottom, being a perpendicular fall of twenty feet.

That your Petitioner's loss by this accident consists in having two horses killed, and a third rendered useless, the dray and harness broken, a portion of the property destroyed, and your Petitioner severely injured; and owing to it he is unable to obtain a living for himself, or support for his wife and children.

That the new bridge was opened the morning after your Petitioner's accident, it requiring only a few loads of earth to be laid at either end.

Your Petitioner submits that notice had been given by the contractor nearly three weeks previous, that the bridge was ready to be thrown open to the public; and that it was owing to the neglect of the Government, in not causing the entrances of the bridge to be completed, that this accident befel your Petitioner.

Your Petitioner most humbly prays that your Honorable House will take his case into your favourable consideration, and grant your Petitioner such relief as your Honorable House may deem fit to award, according to the foregoing circumstances.

And your Petitioner, as in duty bound, will ever pray.

FELIX SWAINSTON.

1861.

Legislative Assembly.

NEW SOUTH WALES.

MR. FRANCIS FLANAGAN.

(PETITION OF.)

Ordered by the Legislative Assembly to be Printed, 14 November, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Francis Flanagan, of Prergoga Flat, in the County of Saint Vincent, in the Colony of New South Wales, Esquire,—

SHEWETH:—

That, on the twentieth of February, in the year one thousand eight hundred and twenty-six, your Petitioner (who was then residing in Ireland) addressed a letter to the Right Honorable Earl Bathurst, then Secretary of State for the Colonies, requesting information as to the terms on which persons, who intended settling in this Colony, could obtain grants of land, and your Petitioner received, in reply, a printed memorandum containing the same regulations as those set forth in the Government Order of fifth September, one thousand eight hundred and twenty-six, number thirty-five, enclosed in a letter, of which the following is a copy:—

*“ Colonial Office,
“ Downing-street, London.
“ 10th March, 1826.*

“ Sir, “ I am directed by Earl Bathurst to acquaint you, in reply to your letter of 20th ultimo, that “ the printed memorandum, which I enclose, will explain to you the conditions upon which persons are “ permitted to hold lands at New South Wales and Van Diemen’s Land; and if, under such circum- “ stances, you should think it advisable to proceed to either of those settlements with a view to “ agricultural objects, the Governor will, on your making the necessary application to him for that “ purpose, and provided he shall be satisfied of your possessing sufficient capital to enable you to fulfil “ those conditions, make to you a grant of land accordingly. I am directed further to acquaint you, “ that the general instructions with which the Governor has been furnished will render it unnecessary “ for you, on your proceeding to the Colony, to be provided with any other letter from the Colonial “ Department than this.

“ Mr. Francis Flanagan,
“ 20, Patrick-street, Cork.

“ I am, Sir,
“ Your most obedient servant,
“ R. H. HAY.”

That, on the faith of the above-mentioned letter, so received by him in reply to his said letter, and of the printed memorandum sent therewith, your Petitioner broke up his establishment in his native land, and, with his wife and family, emigrated to, and arrived in, this Colony in the year one thousand eight hundred and twenty-seven, bringing with him considerable capital.

That your Petitioner so emigrated to this Colony in the full expectation and belief that he would obtain all the benefits so as aforesaid held out to him with respect to grants from the Crown of lands in the Colony being made to him, and especially that he would be entitled, in the first instance, to a primary grant, and afterwards, on duly complying with all the Regulations in respect thereof, to a further or secondary grant.

That your Petitioner, having duly complied with the Regulations contained in the said Government Order of fifth September, one thousand eight hundred and twenty-six, obtained a primary grant from the Crown of two thousand five hundred and sixty acres of land in the County of Saint Vincent.

That your Petitioner, on receiving the necessary authority for that purpose, selected certain lands near Moogandoora Creek, but the authorities of the Colony objected to the water frontage comprised in such selection, and the same was subsequently altered (notwithstanding your Petitioner’s protests) so as to give your Petitioner much less water frontage, and to give him, in lieu thereof, land extending back four miles to, and including, a quantity of barren mountain ranges.

That your Petitioner, being so compelled to accept such last-mentioned land as his primary grant, took possession of the two thousand five hundred and sixty acres of land so allotted to him by the Government as aforesaid, and cleared, cultivated, and improved the same at an outlay of upwards of three thousand pounds, and he has resided thereon with his family ever since, being a period of upwards of thirty years; and he has, in every other respect, observed the conditions relative to such grants.

That, in one thousand eight hundred and thirty-seven, a Government Notice, dated the twenty-seventh day of June in that year, was issued to the effect that additional grants of land would be given to those persons who, having obtained primary grants under the Regulations hereinbefore referred to, should establish their claim to such additional grants; and that applications from persons, who, like your Petitioner, had then been seven years in possession of their primary grants, must be sent in on or before the thirty-first day of December then next.

That your Petitioner was, at that time, the south-easternmost settler in the Colony, and from the land on which he resided being at a distance from Sydney, and surrounded with almost impassable mountains and gullies, and all communication with Sydney, either by land or sea, being therefore limited, he did not receive any intimation of the notice last referred to, in time to comply literally therewith, within the period therein specified.

That your Petitioner was fully entitled, under the said last-mentioned Government Order, to have an additional grant of land from the Crown made to him, your Petitioner having, in all respects, performed the conditions so as to entitle himself to the said additional grant.

That your Petitioner, very shortly after the expiry of the said period specified in the said last-mentioned order, and in fact as soon as he was able, made application to the Government Authorities, in Sydney, for such additional grant, and offered the necessary proofs to establish his right thereto, but the said Authorities refused to entertain your Petitioner's said application, on the ground that he had not applied within the said period so prescribed as aforesaid.

That your Petitioner has subsequently made repeated appeals, both to the Authorities in the Colony and to the Colonial Office in England, but his said appeals have always been disregarded, on the alleged ground that his case had been decided by the Authorities in the Colony on his original application to those Authorities, although no such decision ever was made—except the refusal to entertain your Petitioner's application, on the ground that it had not been made within the period so prescribed as aforesaid.

That your Petitioner conceives he has been subjected to great injustice in being refused such additional grant on the mere technical objection of his not making his application within the time specified as aforesaid, especially under the circumstances herein set forth, which rendered it impracticable for him to make such application within that period; and your Petitioner trusts that your Honorable House will, in its wisdom, devise and adopt some means of affording redress to your Petitioner for the loss and injury he has sustained by the said additional grant not having been made to him.

Your Petitioner, therefore, humbly prays your Honorable House to take the case into consideration, and to adopt such measures, to afford your Petitioner relief in the premises, as to your Honorable House shall seem meet and just.

And your Petitioner will ever pray, &c.

FRANCIS FLANAGAN.

1861.

Legislative Assembly.
NEW SOUTH WALES.

MR. JOHN KIDD.

(PETITION OF.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Kidd, late Landing-waiter in Her Majesty's Customs, at the Port of Sydney,—

RESPECTFULLY SHEWETH :—

That your Petitioner was, until a late period, employed in the Customs Department since the year 1839, with the exception of some time spent in a visit to England for the benefit of his health.

That, on the 14th May last, your Petitioner was taken very seriously ill, and remained so for a considerable period; that your Petitioner was then under the impression that his health was permanently impaired, and he therefore felt desirous of retiring from the service, and wrote a letter to this effect to the Collector of Customs, asking if he might, under the circumstances, be allowed to retire on a pension, to which letter he was informed, in reply, that his claim for a retiring allowance would be submitted to the Legislative Assembly.

On your Petitioner returning from the country where he had gone for the benefit of his health, he was informed that his claim for pension could not be allowed, in consequence of his not having served the time required by the Superannuation Act, by a less period than two days.

Your Petitioner, therefore, respectfully begs to lay before your Honorable House a statement of his services since he entered the Department in 1839 :—

Tidewaiter, from 11th October, 1840, to 5th July, 1841;

Locker, from 6th July, 1841, to 15th April, 1842;

Tidewaiter, from 16th April, 1842, to 13th September, 1848;

Distillery Clerk, from 19th July, 1851, to 7th September, 1852;

Coast-waiter, from 8th September, 1852, to 21st September, 1854;

Landing-waiter, from 22nd September, 1854, to 15th July, 1861;

From which it will be seen that your Petitioner has served upwards of fourteen years, during which time he filled the offices of Locker, Established Tide-waiter, Distillery Clerk, Coast-waiter, and Landing-waiter, without reckoning his service of six years as an Extra Tide-waiter.

Your Petitioner further desires to bring under the notice of your Honorable House, that on learning that it was not the intention of the Government to grant him a pension, he wrote to the Collector of Customs to say that he was willing to resume his duties as his health was somewhat improved, although when he applied to be allowed to retire he was in a state of health which his medical attendant thought would disable him from performing his duties as Landing-waiter.

Your Petitioner therefore humbly prays that your Honorable House will take his case into your consideration, and grant him such relief as may, in the opinion of your Honorable House, be deemed fit.

And your Petitioner will for ever pray.

JOHN KIDD.

1861-2.

Legislative Assembly.

NEW SOUTH WALES.

ROBERT EDGAR ADAMS.

(OF THE BARQUE "SHAH JEHAN.")

Ordered by the Legislative Assembly to be Printed, 17 January, 1862.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Robert Edgar Adams, of the City of Sydney, Commander of the barque "Shah Jehan,"—

SHEWETH :—

That your Petitioner arrived in the Harbour of Port Jackson on the twenty-fourth day of October last, on a voyage from the Mauritius to Sydney aforesaid.

That, on leaving the Mauritius, your Petitioner shipped a crew of nineteen Lascars and five Europeans.

That, on the voyage from the Mauritius to Sydney aforesaid, five of the Lascar crew died from pre-existing disease, the exposure to the cold weather, and an accident to the fresh water tank, causing an admixture of salt water—the passage having been most boisterous.

That, a few days after your Petitioner's arrival, your Petitioner was maliciously charged, by four of his Lascar crew, with having feloniously caused the death of the five men who had died during the voyage.

That the preliminary investigation on the said charge occupied the attention of the Justices at the Water Police Office for several days.

That although your Petitioner's European crew and passengers, six in number, gave evidence disproving the whole of the evidence given by the four Lascars, the Justices committed your Petitioner for trial at the Central Criminal Court.

That your Petitioner was tried, on the second day of December last, before the Honorable Sir Alfred Stephen, Chief Justice, and a Jury of twelve persons, which trial resulted in a verdict of acquittal, the Jury not leaving the box, and His Honor expressing his entire concurrence with the verdict.

That your Petitioner's Lascar crew, on hearing the result of the verdict, became insubordinate, and deserted from your Petitioner's ship.

That your Petitioner preferred charges of desertion and insubordination against his said Lascar crew, and they were each sentenced to one month's imprisonment with hard labour.

That your Petitioner, although he could have been ready for sea sixteen days after his arrival here, was necessarily compelled to remain until the charge preferred against him was disposed of.

That, on the expiration of the sentences of his said Lascar crew, your Petitioner had them conveyed on board his said vessel, which was ready for sea.

That your Petitioner contemplated leaving the Port for Shanghai, with a cargo of coals, on the following morning.

That, on the first of January, the day on which the Lascar crew were placed on board, they became very insubordinate and mutinous, your Petitioner's serang being murdered by three of them, and your Petitioner attempted to be murdered by several others of the said Lascars.

That three of the Lascar crew are committed for trial for the murder of the serang, at the Central Criminal Court to be holden in February next.

That your Petitioner prosecuted the remainder of the crew, for assault with intent to murder him; four were committed for trial at the next Criminal Court.

That your Petitioner has suffered great pecuniary loss, and has been subjected to large sums of money for legal and other expenses, in defending himself on the said charges preferred against him as aforesaid.

301—

That

That although your Petitioner had ample means on his arrival to pay all necessary expenses attending his said vessel, he has, by reason of being compelled to keep his said ship in port, been reduced to complete want, his expenses on board his said vessel being about twelve pounds daily. That your Petitioner has a cargo of coal on board his said vessel for Shanghai, and had he been able to have sailed on the second instant, he would have saved the north-east monsoon, but in consequence of the delay of the ship he will have to experience a south-west monsoon, *id est*, a head wind to beat down the China Sea.

That your Petitioner is desirous of obtaining from the Government some pecuniary assistance, compensation, or allowance, by reason of his detention in Sydney to attend the Criminal Court and give evidence as a witness on behalf of the Crown, and with that view he hopes your Honorable House will take the premises into consideration.

Your Petitioner, therefore, most humbly and earnestly prays that your Honorable House will consider the foregoing facts, and that your Honorable House will grant your Petitioner such relief under the circumstances as he may be deemed entitled to.

And your Petitioner, as in duty bound, will ever pray, &c.

ROBT. E. ADAMS.

1861.

Legislative Assembly.

NEW SOUTH WALES.

FLOCK OF ALPACAS, AND CLAIMS OF MR. LEDGER.
(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 17th September, 1861.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 7 June, 1860, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“Copies of all Correspondence between Charles Ledger, Esquire, and the Government, on the subject of the management and final disposal of the Government Flock of Alpacas, and the Claims of Mr. Ledger for losses sustained by him in the introduction of those animals.”

(*Mr. Parkes.*)

FLOCK OF ALPACAS, AND CLAIMS OF MR. LEDGER.

(In continuation of the Correspondence laid on the Table on the 19th October, 1859,
and ordered to be printed.)

No. 1.

SUPERINTENDENT OF ALPACAS to SECRETARY FOR LANDS.

Liverpool,
27 September, 1859.

SIR,

I herewith respectfully enclose three notes of disbursements, made by me for account of the Alpacas, &c., under my charge, shewing a balance of one hundred and five pounds nineteen shillings and sixpence (£105 19s. 6d.) in my favour, which amount I beg to request you will order to be placed to my credit.

I have, &c.,
C. LEDGER.

[Enclosure 1 in No. 1.]

NOTE OF DISBURSEMENTS for Artificial Food for the Alpacas, &c., by the undersigned.

May	7.—Thomas Malloy, 36 bushels barley, at 4s.	£7 4 0
June	1.—Thomas Ashcroft, 54 ditto ditto, at 3s.	8 2 0
	17.—Patrick Kelleher, a patch of green barley	5 0 0
July	4.—Ditto, ditto ditto	8 0 0
	4.—William Lackey, ditto ditto	5 0 0
	4.—Ditto, for use of paddock one month	10 0 0
	19.—Thomas Ashcroft, 20 sacks of barley	1 0 0
Aug.	9.—Charleston, a patch of green barley	3 15 0
	14.—Ditto, ditto ditto	1 5 0
	9.—William Lackey, use of paddock one month	10 0 0
Sept.	16.—Thomas Ashcroft, 20 sacks barley	1 0 0
		£60 6 0

Liverpool, 24 September, 1859.

C. LEDGER.

[Enclosure 2 in No. 1.]

NOTE OF DISBURSEMENTS, account of Alpacas, &c.

Allowance for self and Mr. Ortiz, from 6th July to 17th August, time occupied in journey to Maneroo and back, at the rate of 30s. each per diem—43 days	£129 0 0
Maintenance, &c., of horses previous to starting	15 10 0
	£144 10 0
Less received in advance, May 23rd	100 0 0
Balance	£44 10 0

Liverpool, 24 September, 1859.

C. LEDGER.

[Enclosure 3 in No. 1.]

NOTE OF DISBURSEMENTS, account of Alpacas, &c.

May 18.—Expenses to and from Parramatta to see the Domain, by order of Honorable the Secretary for Lands and Public Works	£0 10 6
June 6.—Expenses to and from Sydney	0 13 0
	£1 3 6

Liverpool, 24 September, 1859.

C. LEDGER.

No. 2.

REPORT of Auditor General.

(Expense of Food for Alpacas, &c., &c.)

MR. LEDGER has a monthly credit of £70 established in his favour, for the payment of his own salary, and the wages of his men, &c.; besides this, however, he received an advance on the 23rd May, of £100 to meet his travelling expenses. On the 6th September a credit in his favour for £106 was authorized, to pay for artificial food for these animals, which was intended apparently to pay the accounts (£105 19s. 6d.) detailed by Mr. Ledger. If so, the acquittances of the parties ought to be furnished to this office for adjustment.

B.C. Audit Office,
5 October, 1859.

No. 3.

UNDER SECRETARY to SUPERINTENDENT.

*Department of Lands,
Sydney, 14 October, 1859.*

SIR,

In reference to your letter of the 27th ultimo, I am directed to inform you, that the Secretary to the Treasury has been requested to cause the sum of one hundred and five pounds nineteen shillings and sixpence, to be paid into your credit in the Joint Stock Bank; being the amount expended by you in the purchase of artificial food for those animals, and in travelling expenses in searching for pasturage for them.

I have, &c.,
MICHL. FITZPATRICK.

No. 4.

SUPERINTENDENT to SECRETARY FOR LANDS.

*Liverpool,
8 October, 1859.*

SIR,

You are aware that for more than seven years I am separated from my family, and also that during said period I lost my wife, under circumstances that compelled me, as a British subject, to apply to Her Majesty's Representatives in Peru, with the object of obtaining redress from the Government of that country. Said claim is, for the present, at a stand-still.

The animosity that exists against me in Peru is equivalent to banishment from that country, and I must find a home for myself and children (four girls), either in Chili or in this country; in Chili, I have friends and connections of twenty-four years standing; in this country, I have nothing more than the small and precarious salary attached to my appointment; neither have the means of having my children brought over from Peru,—all, all that I possessed, I have spent in carrying out the enterprise of introducing the Alpaca into this Colony.

I cannot, and do not expect the Government to remunerate me for my eight years of untiring labour, accompanied by hardships and dangers of no ordinary description; but I do expect the Government to reimburse me the money that I am actually out of pocket. You have seen the correspondence between Her Majesty's Consul and myself on the subject, and by that can be credited my version of the conversations held at different times in Lima, during 1851-52, with William Pitt Adams, Esq., Her Majesty's Chargé d'Affaires to the Government of Peru; and you will readily understand how his position as Minister would prevent his giving me, a British subject, any official invitation to break the laws of a country between which and Great Britain existed a Treaty of Peace, Amity, and Commerce. The sudden decease of Mr. Adams, in 1853, deprives me of his testimony in my behalf; had he lived, I little doubt, but that I should not only have been reimbursed, but amply remunerated for my exertions; as it is, I can only refer to the Honorable Deas Thomson, who can inform you of the importance attached then, by the Home and Colonial Governments, to every exertion being made towards the introduction of the Alpaca into this Colony. The death of the late Governor Sir Charles Fitz Roy, prevents my bearing out the tenor of interview that I had the honor of holding with him in 1853. I was then promised a grant of 10,000 acres public land, if I succeeded in landing 100 animals in New South Wales.

T. S. Mort, Esq., can also bear testimony in my behalf.

I am as enthusiastic as ever, in fully developing the value of the Alpaca, and its adaptability to this Country; yet I have other duties to perform, that are paramount to all others, and if the Government of the Colony cannot reimburse me my outlay, so as to enable me with that money to purchase a Station, and guarantee £1,000 yearly for five years, as Superintendent of Alpacas; and, moreover, after properly settling the flock, allow me nine months leave of absence, so as to go to Peru, wind up my affairs there, and return here with my children; I have no alternative but to resign my present appointment, and ruined, utterly ruined as I am, afford some protection to my poor motherless children, by my presence among them. Of course, I would conduct the animals to Maneroo before leaving them, as also impart full instructions as to their proper tending, to the party named to succeed me.

If it were possible for me to enter into minute explanations, and present such documentary and other evidence as I possess, before a Committee of the House, I feel convinced that their report would be favorable to me. You are aware that there are circumstances in connexion with this undertaking that I cannot, as a British subject, lay before the public.

I have &c.,
C. LEDGER.

FLOCK OF ALPACAS, AND CLAIMS OF MR. LEDGER.

5

No. 5.

SUPERINTENDENT to SECRETARY FOR LANDS.

Liverpool,

31 October, 1859.

SIR,

The flock of Alpacas, Llamas, &c., under my charge, being now in condition to undertake the journey to Maneroo, I beg to request that you will designate the Run or Station that I am to occupy them with, so that I may effect arrangements for the erection of huts, yards, &c., before the winter again comes round.

I have also to inform you that, on the 6th proximo, I shall commence shearing such of the animals as will admit of so doing; the females being in lamb I think it prudent not to clip until after parturition. I consider it a matter of importance that the animals be moved from this as quickly as possible, and without delay placed permanently on their future pasture. This very desirable object I should have endeavoured to carry out some forty days ago had their condition then warranted my recommending their removal.

I therefore have to request you will please place to my credit in the Joint Stock Bank the sum of one hundred and thirty pounds, that I estimate will be the cost of dray, horses, harness, &c., which I received authority to purchase by your communication of 3rd September last.

I have, &c.,
G. LEDGER.

UNDER SECRETARY to SUPERINTENDENT.

*Department of Lands,**Sydney, 3 November, 1859.*

SIR,

In reference to your letter of the 31st ultimo, I am directed to request that you will come at once to Sydney, for the purpose of settling definitively the place to which you propose to remove the flock of Alpacas.

I have, &c.
MICHL. FITZPATRICK.

No. 7.

UNDER SECRETARY to SUPERINTENDENT.

*Department of Lands,**Sydney, 9 November, 1859.*

SIR,

I am directed to inform you, with reference to the latter part of your communication of the 31st ultimo, that the Secretary to the Treasury has been requested to cause the sum of one hundred and thirty pounds to be paid to your credit in the Joint Stock Bank, to defray the cost of the dray, horses, &c., which you have been authorized to purchase for your journey to Maneroo.

I have, &c.
MICHL. FITZPATRICK.

No. 8.

SUPERINTENDENT to SECRETARY FOR LANDS.

Liverpool,

18 November, 1859.

SIR,

I take the liberty of addressing you upon a matter relating to my present appointment as Superintendent of Alpacas; and, in so doing, I may be allowed to trouble you with a brief reference to the circumstances which led to that appointment.

After having made several ineffectual attempts to obtain Alpacas in Peru, for the purpose of exporting them to Australia, Her Majesty's Representative in that country communicated with me on the subject; assuring me, that the production of Alpaca wool in these Colonies was considered of the greatest importance by Her Majesty's Government; and urged it as a matter of absolute certainty, that any person who would introduce a large flock of Alpacas into either of these Colonies would be amply repaid for all the labour and money expended in the enterprise. During a visit I paid to this Colony in 1853, chiefly with the object of ascertaining whether the country was suitable for the Alpacas, I was promised by His Excellency Sir Charles Fitz Roy, that if I succeeded in landing one hundred Alpacas only in New South Wales, I should be treated with the same liberality as had been shown to the Macarthurs and others, and should receive a grant of land as a reward for the service, and in consideration of the great advantages which the country would derive from the propagation of the Alpacas. The Honorable E. Deas Thomson, T. S. Mort, Esq., and Henry Moore, Esq., can bear testimony to the great importance which the Government at that time attached to my enterprise, and to the inducements which were held out to me to prosecute it.

It was on the strength of these representations that I undertook the task of introducing into New South Wales a flock of Alpacas. I need not here recount all the difficulties,

difficulties, hardships, and sacrifices, both physical and moral, which I underwent; or the danger and imminent perils to which I subjected myself from the arbitrary yet popular prohibition of the Peruvian and Bolivian Governments, in pursuit of the object to which I devoted all my energies, during seven of the best years of my life. With a perfect knowledge of all the trials that lay before me, in the roughness of the country I should have to traverse, in the severity of the climate, in the inhospitality of their people and their attachment to the monopolist policy of their Governments, and in the apprehension that even my own servants might betray me at the last moment, I determined, in the spirit of British enterprise, to risk all these in the furtherance of an object which I was confident would open up a new and most valuable resource, both for English commerce and Australian industry. In the carrying out the undertaking I exposed myself to imprisonment for ten years (this decree was promulgated when I had safely got the animals out of Bolivia however), as well as to a virtual banishment from Peru, in which country I had lived for eighteen years, and where I had gained a position of comparative wealth and influence.

But I do not ask from the Government of New South Wales any recompense whatever for the perils and hardships I have endured; all that I ask is, the reimbursement of the sum of nearly seven thousand pounds sterling that I have actually expended on the undertaking, over and above the sum of fifteen thousand pounds paid by the Government on purchasing the animals; and which amount, under composition only, exonerated me from debt to the parties who furnished me with the means of carrying on the enterprise when my own funds were exhausted.

I may take this opportunity of stating that, at the time the proposition of purchasing the Alpacas and entrusting me with their superintendence was entertained by the Government, the late Minister for Lands and Public Works encouraged me to believe that by this time, or during the present Session of Parliament, the flock would be offered to me for a sum considerably less than the cost, allowing a term of years for the payment of the money; in that way reimbursing me for my outlay. It was also admitted by mostly all the Honorable Members in the Legislature, when the proposal for purchasing the Alpacas was under discussion, that I was entitled to compensation for the losses I had sustained in the undertaking, and that they were disposed to grant a fair amount to repair those losses.

I am induced to believe that, when the above circumstances are taken into consideration, the Government will admit the justice of my claim for the amount I have named.

But there are special reasons which induce me to urge it at this time, and which will compel me, unless that claim is admitted and ratified, to resign the appointment I now hold in connexion with the Alpacas.

In the first place,—I embarked all the money I possessed in bringing the Alpacas to this country, and the expenses having increased so enormously in the course of the enterprise, I have been utterly ruined. I should be most unjustifiably neglecting my own interests and those of others if I were to forego the opportunities open to me in South America, by remaining in this country where I have no source of income except the very small one (of three hundred pounds a-year) attached to the superintendence of the Alpacas. The possession of the sum of seven thousand pounds would enable me to invest in a stocked run, and I would bind myself on its receipt to invest it in that manner and to maintain the animals for five years, without further charge than the sum of one thousand pounds annually, as at present voted for their management only.

Secondly,—In the prosecution of the object referred to, I have been for more than seven years separated from my family. Since starting from Tacua, in 1852, I have not once seen my four (for the last two years) motherless daughters; and as I have not the means of offering them a home in this country, I feel it my duty to return to them, as, although I am banished from Peru and Bolivia, I should be able to do more for them in Chile than I could here—at any rate afford them a father's protection.

As a third reason for the step I now take, I would urge the desirability, if not the strong necessity, of retaining the services of the native servants to look after the flock. It is very doubtful whether any of them would remain after I have left; there is one man, a Portuguese, who has been with me for more than a year; he has proved himself tolerably useful, is intelligent and willing, but cannot possibly be so well acquainted with the habits and requirements of the animals as the Bolivian shepherds—he, I have no doubt, would gladly remain. You may rest assured, however, that should my claim be disallowed I would use no efforts to induce my men to leave the flock; on the contrary, my deep interest in the permanent success of an enterprise in which I have risked and lost so much, would prompt me to exert all my influence to induce some of them to remain. The care required in the systematic cross-breeding so as to produce a race of pure Alpacas, renders it very necessary and advisable that they should be attended to by those who have been from childhood accustomed to their management. I would, however, most willingly instruct the person whom the Government may appoint to succeed me (that person I would be desirous of recommending,) in the management of the Alpacas, as also two or four shepherds (apprentices preferable); and to effect which purpose I would remain for five or six months after conducting the animals to and locating them on their future home. But in the event of the refusal of my claim by the Government I cannot undertake to remain in the Colony beyond that period. I should indeed most deeply deplore and regret being thus compelled to relinquish an enterprise hitherto so successfully achieved, and under circumstances of such unparalleled difficulties, but the refusal of my claim would leave me no alternative; my duty compels me to abandon the further prosecution of fame without adequate recompense.

I have, &c.,
C. LEDGER.

No. 9.

UNDER SECRETARY to SUPERINTENDENT.

*Department of Lands,
Sydney, 28 November, 1859.*

SIR,

I am directed to acknowledge the receipt of your letter of the 18th instant, in which, after detailing the circumstances attending your introduction into this Colony of a flock of Alpacas, you prefer a claim to be reimbursed by the Government the sum of nearly seven thousand pounds, which you allege you have expended in the undertaking, over and above the sum of fifteen thousand pounds paid by the Government in purchasing the animals.

2. In reply, I am directed to inform you, as stated in the Secretary for Lands' recent conversations with you on the subject, that the negotiation between you and the Government regarding the Alpacas having been definitely concluded some time ago, by the payment of the price and the delivery of the animals, Mr. Secretary Black regrets that your claim for the further sum of seven thousand pounds should be made at a stage of the business where it is not competent for the Government to grant it, however highly they may value your important services in the successful introduction of the Alpacas, and however great may be their appreciation of your energy and zeal in conducting the enterprise. The Secretary for Lands, I am to state, is therefore precluded from entering upon the consideration of any question regarding the price; and the only way Mr. Secretary Black presumes in which any point of the kind could now be effectually opened up, would be by your moving the Assembly on the subject. The adoption of this course the Secretary for Lands does not expressly recommend; but you having verbally intimated the probability of its being taken, I am to add that the Government will not in any way oppose such a movement, should you see fit to resort to it.

3. But I am to state that, while the Government are not in a position to grant the sum now claimed, they are quite disposed to regard with the most favourable consideration the peculiar circumstances in which, as appears from your letter, you are now placed; and the Government are therefore willing to increase your salary from three hundred to five hundred pounds per annum, as Superintendent of Alpacas; on the understanding, as stated in Mr. Secretary Black's conversation with you, that you conduct the flock to Maneroo, and continue the Superintendence for at least six months. Probably, during that time you may be able to make such arrangements regarding your family, as may enable you to continue longer, but the Government concurring in the judiciousness of your suggestion to the Secretary for Lands as to the appointment of an Overseer to take your place in the event of your finding it necessary to relinquish it, I am to inform you that Mr. Secretary Black will, with as little delay as possible, make the requisite arrangements with some person suitable for that purpose. It was satisfactory for the Secretary for Lands to understand, as he did from you, that such an Overseer, if well chosen, would, in your opinion, be fitted, after five or six months' care of the Alpacas under your directions, for assuming the efficient management of them in the event of your departure.

4. I am only further to express the satisfaction of the Government at the necessary preparations having at length been completed for the immediate removal of the animals; and not doubting that the same zeal and attention with which they have hitherto been superintended will be fully sustained by you, Mr. Secretary Black entertains a confident hope that, under your guidance, the flock may in due time be safely located on the ground which has been selected for the purpose. With your thorough acquaintance with the nature and habits of the animals, you will not, the Secretary for Lands believes, think it necessary for him to attempt to give you any minute instructions, either regarding the march to Maneroo or the treatment of the flock after its arrival there. On such points as these, I am to add, your own judgment and discretion must be assumed to be the best guide; but I am to state, in conclusion, that this being an undertaking in the success of which the Government feel the liveliest interest, you will be expected to communicate, both fully and frequently, on the subject, with this department.

I have, &c.,
MICHEL FITZPATRICK.

No. 10.

SUPERINTENDENT to SECRETARY FOR LANDS.

*Macquarie Fields,
6 December, 1859.*

SIR,

I have the honor to acknowledge receipt of your favour of the 28th November, ultimo, treating of my claim on the Government of the Colony of New South Wales, relative to the Alpacas, &c., imported by me into this country.

At the same time that I express my sense of the liberal manner in which my present wants have been met, I am compelled, although with reluctance, to reproduce my letter of the 18th November ultimo; as therein explained, I am forced to take the steps therein indicated, purely by a sense of duty towards my children, if, in the meanwhile, the claim advanced by me should not meet with the consideration which it is generally considered to merit.

Having had the honor of several personal interviews, on matters relating to the Alpacas, &c., I would suggest that immediately on my arrival at Maneroo with them, steps should

should be taken for sending the South American shepherds back to their own country, in conformity with a promise faithfully made to them when I induced them to leave their homes and accompany me on my perilous expedition; as no time should be lost in my teaching others how to properly tend, separate into distinct flocks, and, finally, all that is necessary to the preservation and propagation of this class of animals.

As very much would depend upon the party whom the Government may depute to succeed me in the management of the flock, I beg again to request that I may be allowed to recommend such a person for the appointment. Although no great requirements are essential to the proper management of the animals, still it took me many years to acquire the knowledge that I have attained, and I am convinced that I am the only European that ever bred a large flock of Alpacas. My request to be allowed to recommend my successor is mainly grounded on my conviction of the necessity of finding a person endowed with great patience, peculiar kindness towards animals; one who would be ready to receive my impressions; in short, the person whom I would recommend has already had much experience in the treatment of the Alpaca. I would, furthermore, point out that the animals should be located on a run sufficient for present and future requirements, as the continual moving of them from place to place I consider highly injudicious, and prejudicial to their increase; it is well known that this peculiar animal is extremely sensitive, attached to its location, and pines when removed from it.

You will also bear in mind that huts and yards have yet to be erected ere the approaching winter (very severe in Maneroo) sets in; and however ungrateful the task may be to me, by the further delay it occasions, and the unsettled state of my own prospects, I readily, in consideration of the large sum expended by the Government, and the great interest I take in the proper development of this important enterprise, engage to leave the animals properly settled, and with all probability of a successful result.

It would be assuming a false modesty, were I to refrain from expressing the great chagrin and disappointment which I feel at finding myself ruined and homeless, after years of toil, privation, and expense, at the conclusion of an enterprise that I was distinctly (as fully certified by the written testimony of most respectable parties in this Colony) instigated to carry out by the highest authority in the land, whose assurance of ample remuneration, leaving altogether on one side reimbursement (which is all that I at present claim), it would have been the height of presumption to question.

I have, &c.,
C. LEDGER.

No. 11.

SUPERINTENDENT to SECRETARY FOR LANDS.

Liverpool,
25 November, 1859.

SIR,

In making up my accounts to forward to the Office of Auditor General, previous to my departure, I find that I have made the following disbursements on account of the Alpacas, &c. (in conformity with orders to that effect), note of which I have not previously advised you:—

Solomon Dowling, for green barley	£1 10 0
Charleston, ditto	6 0 0
Ditto, ditto	1 5 0
Rose ditto	0 7 0
T. Molloy, for 4 acres green barley, 10 cwt. lucerne hay,	21 1 3
3 sickles, for cutting barley	0 5 3
J. H. Atkinson, for use of paddocks, &c., May, August, November—	
5 months, at £10	50 0 0
	£80 8 6

Eighty pounds eight shillings and sixpence, which amount please place to my credit at Joint Stock Bank.

I have, &c.,
C. LEDGER.

No. 12.

SUPERINTENDENT to SECRETARY FOR LANDS.

Liverpool,
29 November, 1859.

SIR,

I beg to inform you that, at half-past four this morning, I commenced the journey to Maneroo, with the flock of Alpacas, &c, under my charge. After leaving the animals in abundant pasturage paddocks, on the Macquarie Fields Estate, some five miles from this, I returned here so as to conclude all arrangements prior to my final departure.

The

FLOCK OF ALPACAS, AND CLAIMS OF MR. LEDGER.

9

The animals will have to travel very slowly, and by short stages, as there are several in very poor condition, owing to the scarcity of herbage this season in the paddocks where I have been obliged to depasture them; their remaining a few days at Macquarie Fields will be beneficial to them.

I have to request you will please authorize my paying, on account of the Government, such demands for pasturage of the animals, as the different owners of paddocks along my line of march may make.

I have further to request you will please to place at my disposal the sum of eighty pounds eight shillings and sixpence, advised, as disbursed by me, on account of the Alpacas, in my communication of the 25th instant.

I have, &c.,
C. LEDGER.

No. 13.

UNDER SECRETARY to SUPERINTENDENT.

*Department of Lands,
Sydney, 2 December, 1859.*

SIR,

In acknowledging the receipt of your letters, of date the 25th and 29th ultimo, I am directed to inform you, that the Secretary for Lands has authorized your receiving an advance of one hundred pounds, for the purpose of defraying the expenses incurred by you in the rental of paddocks, purchase of barley, &c., for the Alpacas, and enabling you to meet such demands as may be made on you for the pasturage of the animals during the journey to Maneroo.

The Secretary to the Treasury has accordingly been requested to cause the said amount to be placed to your credit in the Joint Stock Bank.

I have, &c.,
MICHL. FITZPATRICK.

No. 14.

SUPERINTENDENT to SECRETARY FOR LANDS.

*Liverpool,
30 November, 1859.*

SIR,

I beg to advise having this day forwarded to Messrs. Montefiore, Graham and Co., of Sydney, in conformity with verbal instructions to that effect, eleven ballots of wool, produce of the animals that up to this period I have considered it prudent to shear.

5 ballots Alpaca wool.
2 ditto cross-bred ditto, Alpaca Llama.
4 ditto Llama wool.

I had the honor of verbally explaining to you the desirability of sending this first small clip through Montefiore, Graham, and Co., as said firm having been for nearly two years connected with the enterprise, and they having also held communication with parties in England deeply concerned in the manufacture of Alpaca wool, offer facilities for obtaining or this first product of Australian grown Alpaca, cross, and Llama wool, a fair report thereon, and obviate the necessity that otherwise I should be under of entering into lengthy observations, were the agency exchanged to other parties totally unacquainted with the article.

If not intrusive with my observations I would suggest the wool being sent to London in preference to Liverpool.

I have, &c.,
C. LEDGER.

No. 15.

MESSRS. MONTEFIORE, GRAHAM, AND CO., to SECRETARY FOR LANDS.

*Sydney,
1 December, 1859.*

SIR,

You will have been informed by the Superintendent of Alpacas that he has forwarded to us eleven packages of Alpaca wool.

We shall feel obliged if you will forward us instructions as to what course the Government wish us to pursue with respect to same.

We are, &c.,
MONTEFIORE, GRAHAM, & CO.

FLOCK OF ALPACAS, AND CLAIMS OF MR. LEDGER.

No. 16.

UNDER SECRETARY to MESSRS. MONTEFIORE, GRAHAM, AND CO.

*Department of Lands,
Sydney, 6 December, 1859.*

GENTLEMEN,

Mr. Ledger having reported the transmission to you of the first clip of Alpaca wool in this Colony, I am directed by the Secretary for Lands to request that you will have the goodness to ship the same for the London markets, taking such steps as may appear to you best for bringing it into favourable public notice.

I am further to request that you will submit a Special Report of the result of the sale, so soon as you shall be advised of the same.

I have, &c.,
MICHL. FITZPATRICK.

No. 17.

SUPERINTENDENT to SECRETARY FOR LANDS.

*Macquarie Fields,
9 December, 1859.*

SIR,

I trust you will excuse my troubling you with a remark or so that I consider of the greatest importance in regard to the Alpacas.

I am given to understand that, in all probability, the leases of Crown Lands will be extended to another year on all leases that expire the end of this year. I personally mentioned that the runs of "Mayala" and the "Brothers" were the best adapted to the Alpacas of any that I saw in Maneroo; both are in the occupation of Mr. Bradley, they contain no purchased land, and the improvements on them are insignificant, and would not cost more than what would be the outlay in erecting huts and yards on the "Reserve" of Nimitibel, to serve for a short time only.

This "Reserve," no doubt, would answer for a time; but soon the increase of animals would demand extension, causing us to move, lose animals, and stop the breeding until again "at home" on the new run; besides, the purchasers of the "Reserve" would occupy their lands.

I can assure you that it is of the greatest importance that the animals be permanently located without loss of time; they will never increase to any extent whilst continually moving about; and, moreover, for the judicious cross-breeding, I require to form three flocks, and separate each from the other some distance.

I think the present time a propitious one for obtaining suitable "runs" for the animals for present and future requirements; and, whether I remain with them or not, I am most desirous to see them fully settled; and I unhesitatingly state, that until this be effected no benefit can accrue to the Colony from their possession. I ought to inform you that I am influenced in the determination to return to South America on this account; I shall never be able to develop this important enterprise until permanently settled down and enabled to dedicate all my energies to it. For that reason, and so as to settle down, had the Government acceded to my claim, I would have brought out a party, and not put them to the ungrateful task of resuming possession of runs in occupation.

I have, &c.,
C. LEDGER.

No. 18.

SUPERINTENDENT to SECRETARY FOR LANDS.

*Macquarie Grove, Camden,
19 December, 1859.*

SIR,

I have the honor to inform you that I arrived here with my charge on the 17th instant; and finding excellent feed for the animals, I have determined to remain a few days, so that they may avail themselves of it, and allow me to examine the new route that I consider it advisable to take them, viz.,—the road by Burragorang and the Wollondilly, which affords abundance of pasture and saves the annoyance of passing through the towns on the main road; moreover, the immense traffic has so consumed the grasses that, in the event of travelling it with the flock, I am convinced they would find little or nothing to graze on.

The ruggedness of the road that we shall now take will not allow of the cart following us; we shall therefore have to carry our beds and provisions.

You may rely on my doing everything possible for the benefit of the animals; and, if up to the present time we are getting along but slowly, I cannot but feel satisfied with the healthy, though low and thin state of the flock, and anticipate a considerable increase in number before arriving at our destination.

I have, &c.,
C. LEDGER.

No. 19.

No. 19.

SUPERINTENDENT to SECRETARY FOR LANDS.

Camden,
31 December, 1859.

SIR,

I have the honor to inform you that I have considered it necessary to remain here until now, owing to the weak and debilitated state of some fifteen animals. It was my intention to have proceeded on the journey on 26th, but the free use of a fine lucerne paddock, kindly placed at my disposal by Mr. Galvin, induced me to remain another week.

I am glad to inform you that the flock is extremely healthy; and, with the few exceptions above mentioned, I have not had the pleasure of seeing them so playful for the last two years.

I will forward you opportunely a detailed report as to past, present, and (exceptances) future of the flock under my charge, for the information of the Honorable the Legislative Assembly and the country in general.

I intend resuming the journey on Monday, the 2nd of January proximo.

I have, &c.,
C. LEDGER.

No. 20.

SUPERINTENDENT to SECRETARY FOR LANDS.

Myrtle Creek,
3 January, 1860.

SIR,

I have had my attention called to report of proceedings in the Legislative Assembly, on the 23rd ultimo:—"Mr. Black said that Mr. Ledger had started on his journey with a distinct expression on his part that he had not been illiberally dealt with."

I respectfully beg to state that, in expressing my "sense of the liberal manner in which my present wants have been met," as contained in my letter of 6th December, I merely referred to the unsolicited advance of my salary from three to five hundred pounds per annum, and the liberal manner in which my request for dray and horses was acceded to by the Government, although the said amounts were not then placed on the Estimates.

The concluding paragraph of the letter above referred to, clearly and respectfully expressed the bitter disappointment I felt on finding that the successful introduction of the Alpaca into this Colony had proved ruinous to me, although acting throughout upon the good faith of the Government of New South Wales, after the promises of remuneration they made me during my former visit to the Colony, and also relying on the official and authorized statements of Her Majesty's representatives in Peru. The substantial inducements held out to me to undertake the enterprise were, I considered, sufficient, without any demand on my part that they should be embodied in a written agreement.

I did not urge my claim for reimbursement of the money I had sunk in the undertaking, at time of disposing of the animals to the Government in April last, because my losses were fully admitted by the Legislature, and because I was induced to believe, by the Honorable the Secretary for Lands and Works, that they would be made up to me by my having the animals offered to me at half their cost, allowing the term of five years to pay that amount.

I have, &c.,
C. LEDGER.

No. 21.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
18 January, 1860.

SIR,

I hasten to inform you that yesterday I got the flock of Alpacas, Llamas, &c., under my charge, on to this estate; and, on taking into consideration the undermentioned remarks, I doubt not but that this deviation from intended direction will merit your approval.

Firstly.—The animals having passed the last two winters in a temperature so much milder than their native one, and partially become acclimatised thereto, more particularly so those born in the Colony, I am loath to expose them to the severity of a winter on Maneroo, conducting them there so late in the season, when the short intervening time would hardly permit, under most favourable circumstances, of their attaining a condition sufficient to stand the severity of climate and scarcity of pasture during that period.

Secondly.—Although at present moment the flock is in a much improved state to that in which it left Liverpool, I am convinced that were I to push them on further the greater part of the approaching lambing would be lost, also part of the mothers, and more-over all hopes of increase for the next year would be lost.

Thirdly.—I have here at my immediate disposal every convenience for separating the animals into different flocks so as to effectually carry out the proper and paramount cross-breeding

I therefore most strongly recommend the animals remaining here throughout the winter, and it is my intention, with as little delay as possible, to replace the South American shepherds with others of the country—the former are desirous of returning to their homes. I trust the Government will enable me to redeem the promise made them of giving some extra remuneration over and above their salaries, on their successful accomplishment of the enterprise. There is no necessity for my retaining so many men; two and the overseer will remain with me, quite sufficient to practically teach the new shepherds how to tend the flocks.

I have had unavoidable and heavy expenses since leaving Liverpool with the animals, amounting to £65 14s. 6d., as per note enclosed. However the present delay may interfere with my private concerns, I assure the Government that I will continue to do my utmost towards fully developing the importance of the introduction of the Alpaca into the Colony; and, as formerly stated, will attend them to their ultimate location before resigning my appointment, if, in the meanwhile, the justice and liberality of the Government do not enable me to retain their future superintendence.

I have, &c.,
C. LEDGER.

C. LEDGER.

Arthursleigh, 18 January, 1860.

No. 22.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 25 January, 1860.

SIR,

I am in receipt of your letter of the 18th instant, reporting the arrival, on the 17th instant, of the flock of Alpacas at the estate of "Arthursleigh," and recommending their detention there during the ensuing winter, for certain reasons alleged in your communication

2. In reply, I am directed to inquire upon what terms you have obtained the paddocks used by the flock—guarding you at the same time from entering into any final arrangements for the detention of the animals at Arthursleigh during the winter, a question upon which the Government will decide when they hear from you again.

3. I am also to take this opportunity of acknowledging the receipt of your several letters enumerated in the margin, and to remark, that in none of these is there to be found what

9 Dec., 1859.
19 " "
31 " "
3 Jan., 1860.

what

FLOCK OF ALPACAS, AND CLAIMS OF MR. LEDGER. 13

what the Secretary for Lands is so desirous of receiving—a statement of the number of animals of the different classes in the flock at the time of starting on your journey to the south.

4. I am, in conclusion, to request that you will continue to furnish, from time to time, full reports of the state of the flock, as any circumstance connected with them is deeply interesting to the Government.

I have, &c.,
MICHL. FITZPATRICK.

No. 23.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
28 January, 1860.

SIR,

I have the honor to acknowledge the receipt of your letter of 25th instant; in reply thereto I beg to enclose copy of letter to Mr. Alexander Reid, with his reply at foot, stating the terms under which I can depasture on this estate the flock of Alpacas Llamas, &c. I consider them moderate. Reproducing the reasons set forth in my last that forced me to determine on halting, and my recommending that the animals should pass the winter here; I now respectfully request the Honorable the Secretary for Lands to approve thereof, feeling convinced that the best interests of the flocks will be consulted thereby.

I will, with as little delay as possible, furnish a statement of the number of animals of the different classes; also continue to furnish, from time to time, full report as to state of the flocks, and every circumstance in connection with them I may consider of interest to the Government.

I have, &c.,
C. LEDGER.

[Enclosure in No. 23]

Alexander Reid, Esq.,

Sir,

Please certify at foot of this, that the agreement entered into between us, for depasturing the Alpacas, Llamas, &c., the property of the Government, on this estate, is as follows:—

You allow for the depasturing of the flocks all that part called "Ditley," charging therefor at the rate of forty pounds per annum, for such time as the Government may deem fit to keep them there.

You furthermore engage to complete the hut and yard, as at present understood between us, at an expense not exceeding ten pounds. You also will allow me the free use of the wool-shed and yards adjoining, any time that I may deem it expedient to make use of them.

The cottage, yard, and sheds, where the men now are, you will allow me the free use of during our stay here; any repairs that I may consider it necessary to make are to be undertaken at the expense of the Government.

I have, &c.,
C. LEDGER.

The above is in conformity with our agreement.
ALEX. REID.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 23 February, 1860.

SIR,

With reference to your letter of the 28th ultimo, I am now directed to inform you that, under the circumstances represented by you, the Government have determined that the flock of Alpacas may be depastured during the winter at Arthursleigh, on the terms mentioned in your communication.

I have, &c.,
MICHL. FITZPATRICK.

No. 26.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
11 February, 1860.

SIR,

Having effected arrangements for the return to South America of several of the shepherds that I brought with me, and as their services are no longer indispensable, they too pressing me to send them back in accordance with agreement to that effect, I beg to request you will give me permission to accompany them to Sydney, so that I may in person attend to their wants, none of them being able to converse in the English language.

I should not make this request, were I not positive that my absence for a few days from the flocks can in no manner be detrimental to them.

I have, &c.,
C. LEDGER.

No. 27.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
17 February, 1860.

SIR,

I have the honor to herewith enclose classification of flock on 1st instant also specification of losses, from 28th April, 1859, to 1st February, 1860.

Since that date I have to report the loss of one male Vicuna and one female Alpaca the former escaped from the flock, made its way back to near Berrima, and was then killed by some dogs; the latter, after giving birth to a fine lamb, died from internal inflammation, brought on by inversion of the womb; the lamb survives, is healthy, and is being brought up by hand.

I have to advise the birth of nine lambs since the 1st.

It was my intention to have forwarded the above statements at an earlier date; but as I had recently had castrated all the cross-bred males of last season (twenty-three), also seven Alpacas that shewed defects in breeding, I was anxious to see the result of this delicate operation, fearing at the time a loss that I do not now anticipate. The heavy rains have also prevented communication with Paddy's River, situate some nine miles from this, to where I forward letters for transmission for mail.

I am glad to have it in my power to inform you that the flock has vastly improved since its arrival here, and I cannot but consider the measures taken for recuperating the animals on this estate—a necessity at the time their poor condition demanded, previous to proceeding on to Maneroo—as most fortunate; because, had the late rains overtaken the flock on the road in the state in which they were, the loss could not but have been considerable without taking into consideration the risk from drowning, by the flooding of the country through which they must have been obliged to travel. The facilities I met with here, enabling me to house at night all the lambs, some of the full grown ones, and those recently castrated, during the continued and heavy rains of three days and nights, were opportune in the extreme, saving thereby the flock from loss, when all around was devastation and ruin.

When the Government purchased the Alpacas, Llamas, &c., on the 28th April, 1859, the number amounted to 291; and as on the 1st February, 1860, there were 246 remaining, it will be seen that there has been a loss of forty-five (45), accounted for in the return now forwarded.

It is public and notorious that the last summer was one of unusual abundance of natural grasses in the County of Cumberland, where the flock was depastured almost immediately after its landing, in December, 1858; and as up to April, 1859, the flock had increased from 256 to 291, being healthy and thriving, I could not but consider it safe to recommend their wintering there, although urged by the then Honorable Secretary for Lands and Public Works, John Robertson, Esq., to remove them to some other part of the country; that I did not consider it advisable at that season of the year to move the flock I must state I now regret; attaching due respectful importance to the suggestions of the Honorable the Secretary for Lands and Public Works, I was induced to recommend their not being moved for the following reasons:—

First.—I had sustained very heavy losses on two occasions in South America by moving the animals at end of autumn, on to much more abundant pasture than that on which they had passed the summer.

Secondly.—The experience of many years' study of the Alpaca had convinced me that worse results were to be anticipated from the pining and restlessness of all animals of this species on being moved from a spot to which they had become accustomed, than from a partial scarcity of fodder.

Thirdly.—Immediately on taking charge of the flock on account of the Government, I was ordered on a tour of inspection of the country in search of suitable "run" for the animals. I could rely during my absence on the supervision of the flock, and servants in charge, by J. H. Atkinson, Esq., who kindly offered his services to that effect; I had acquired local knowledge as to where I could obtain artificial fodder for the animals that, previous to starting on my journey, I found would be requisite. The overseer and shepherds, not one of whom understands anything of the English language, knew and respected Mr. Atkinson.

In

In August, on my return from Maneroo, I was grieved to find that several of the animals had perished during my absence; the overseer informed me that his application for permission to purchase artificial fodder for the animals did not meet with immediate attention. I was led to believe, at the time, that the delay thus originated was the cause of loss in its greater part. I must here state most distinctly, and in acknowledgment also of the immediate and ready acquiescence in every personal application that I have deemed it necessary from time to time to make, on account of the Alpacas, by the Honorable the Secretary for Lands, that, had the animals had a sufficiency of grass or pasture previous to that time, they would have passed, not only two or three, but eight days without any food whatever, and not have been injured thereby; the delay may have accelerated an inevitable occurrence, but it was not the cause of death.

The severity of the last winter dried up the natural grasses with astonishing rapidity; the inward fat that the animals had acquired during the abundance of summer was soon wasted by insufficiency and poorness of feed; the animals had also undergone previously many severe trials, from the natural effects of which they had not had time to recover. On return of spring and consequent re-appearance of pasture they soon began to pick up—were playful and healthy; the great heat, hot winds, and drought that quickly succeeded, again dried up the grass, the condition of the animals was reduced, and when at last I could get away from Liverpool I was afraid the loss would have been great ere getting the poor animals on to a sufficiency and suitableness of pasture. You will observe that the loss has principally been of animals of minor value, not the less however to be regretted on that account. Unforeseen accidents have also occurred; and after all, taking everything into consideration, I contend that it has been proved beyond a doubt that the Alpaca is possessed of great endurance; can subsist for a long time on little food; can endure both heat and cold, rain and drought.

Since March, 1858, they travelled 500 miles, 150 of which were among the all but inaccessible ranges of the Andes; from an elevation of 14 to 17,000 feet above the sea suddenly descended to 1,500, for days and days together without water, and with very scanty supply of dried grass during the journey, then placed in lucerne paddocks for hardly two months, again traversed the arid desert of Atacama, 75 miles to port of shipment, immediately confined on shipboard, scantily supplied with water, their food again changed, and after 88 days, landed, driven to Liverpool, and then subjected to a state of semi-starvation for several months; and after all this catalogue of suffering and privation, the number, on the 1st instant, was but *one* in *decrease* from those landed in the Colony—*increase* at present 7.

Really I cannot but say that I am more than surprised that so many still exist. As previously stated in former communications, I feel certain that no great increase can be expected until the flock be permanently settled, and steps be taken for the proper separation into three or four flocks, to carry out a fixed and systematic course of cross-breeding; the unavoidable promiscuous intercourse that I have been unable to prevent, is not at all desirable or beneficial, neither is it furthering the main object in view. I am at present able to effect more than hitherto; yet, as this is not the ultimate destiny of the flock, I am loth to recommend going into expenses that are not to be permanently available, and which would have to be again incurred on placing the animals on other grounds.

I am inclined to think that it would be advisable to give up all idea of reproduction in the animals for one year, by keeping the whole of the males at a distance from the females; by this respite from excitement they would have ample time for becoming thoroughly acclimatised, accustomed to their location, and in good condition; the same they would have no means of losing by driving or moving about.

I intend, without delay, sending back to South America the men that accompanied the animals from that country. I have already made arrangements with shepherds here to tend the flocks, and I will teach them all that is necessary. I trust the Government will allow me the means for making them some recompense over and above their salaries, as remuneration for faithful services of several years. In former communications I respectfully stated the motives that compelled me to resign my present appointment, after permanently locating the flock; if my claim for reimbursement, either by grant of money, or in the manner the late Honorable Secretary for Lands induced me to believe my losses would be made good, be not allowed, I would beg to suggest the adoption of measures for handing over the animals on "terms" for three years, to one or other of responsible parties that I could name, as willing to take charge of them under such arrangement. The maintenance of an establishment, solely for the management of the Alpacas, &c., is likely to entail unnecessary expense, as well as to be attended with other inconveniences; whilst in combination with sheep the engagement would be a lucrative one to a sheepholder, as well as advantageous to the country.

Were the Government to allow the claim I have advanced for reimbursement of moneys expended in the introduction of the Alpaca into this Colony, and, by way of remuneration, resell the flock to me at its cost price of fifteen thousand pounds, allowing a term of six years for payment of the amount, I should be glad to dedicate all my energies to the full development of this important accession to the wealth of the Colony, feeling assured that the result would not only be beneficial to myself, but to the country at large.

I have, &c.,

C. LEDGER.

No. 28.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
22 February, 1860.

SIR,

I have the honor to lay before you some explanations respecting the return to South America of the shepherds that I brought from that continent. To feed, water, clean, and tend 340 animals, during a passage of 88 days, required twelve men.

At time of shipping the Alpacas, &c, I selected from my staff of more than 30 men, the best, that were induced to remain in my employ by my offering them advantages, besides their salary, such as the permission to keep 2 to 300 sheep, free of pasturage, with each flock of Alpacas, and moreover to pay the passage and expenses of each man back to his country.

When the Government purchased the Alpacas, &c., I stipulated that I would undertake their management, and pay all expenses out of the £1,000 per annum granted by the Honorable the Legislative Assembly; the agreement to last for five years, the product of wool to be mine, and the Government to supply suitable "run" for the present and anticipated requirements of the flocks. I distinctly, in verbal communications that I had the honor of holding with the then Honorable Secretary for Lands, explained the very heavy losses that I sustained by accepting fifteen thousand pounds for the animals; yet, as that amount would enable me to repay what I had borrowed, when my own means were exhausted, and having no other resources at my disposal to save me from the Insolvent Court, I agreed to accept the sum. It was then stated, that without my engaging to remain in charge of the flock that the Government would not purchase them; I also explained the urgency of my private affairs, viz., the unprotected state of my children, and then the Honorable the Secretary for Lands induced me to believe that within a few months I should have the refusal of the animals at half the amount paid for them, a term of five years allowed to pay that amount, with free use of "run," sufficient for present and future requirements of the flock.

As this proposal appeared to me as offering the future recuperation of my heavy losses, and moreover authorize getting my children from South America, and settling in this country, I hesitated not in agreeing to the terms submitted to me; considering the arrangement then formed as merely temporary, I was indifferent to a further loss of two or three hundred pounds.

	£	s.	d.
The Government allowed me, per annum.....	300	0	0
One overseer do.	60	0	0
Eight shepherds, £50 each do.	400	0	0

By this it will be seen that out of the twelve men brought with me three remained for me to pay; furthermore, I was compelled to engage an Interpreter; none of my men understood the English language, and his services were a necessity to make known the requirements of the overseer during my frequent and unavoidable absence from the flock, as also to reply to the inquiries of the numerous visitors.

The overseer for some time previous received the same salary as then awarded—I, therefore, out of my salary of three hundred pounds per annum, had to pay,—

	£	s.	d.
Salary and keep of Interpreter.....	60	0	0
Do. do. 3 men.....	150	0	0
Maintenance of overseer	25	0	0
	<u>£235</u>	<u>0</u>	<u>0</u>

The overseer and men can gain more in their own country than what I can afford to pay them; had the beforementioned hopes and expectations been realized that the Government held out to me, I could have made it worth their while to remain, and carried out the promises made them previous to embarking. I do not require the services of so many men to look after the Alpacas only; four are quite enough now that they are more acclimatized, and are stationary for some months. Two of the most efficient will remain with me, so as to practically teach the shepherds of this country to properly tend the flocks. A kind feeling towards the animals that I have followed so many years, and the great desire of their thriving and becoming of that importance to the country I firmly believe they will in due time, are sufficient motives to ensure my dedicating my best endeavours until locating them permanently.

I have, &c.
C. LEDGER.

No. 29.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 6 March, 1860.

SIR,

In acknowledging the receipt of your letter of the 22nd ultimo, I am directed by the Secretary for Lands to state that, without now entering into the consideration of the various

various points of importance raised by you, in connexion with the flock of Alpacas, he must again request from you some distinct information on the question which was last put to you, as to whether the Government could rely upon retaining your services for any definite period—say for a year—so that the proper arrangements may be made in time for appointing your successor.

2. As, however, the Government are desirous of retaining, if possible, your services, the Secretary for Lands wishes it to be understood by you, that this inquiry does not proceed from any desire either to dispense with or to undervalue them, but simply from a wish to secure the proper superintendence of the flock.

I have, &c.,
MICHL. FITZPATRICK.

No. 30.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
8 February, 1860.

SIR,

I have the honor to inform you that I have in my possession, and which I retain, in conformity with verbal order from the late Honorable Secretary for Lands, the sum of three pounds seven shillings and sixpence, product of twenty-three bushels barley, surplus not required for the Alpacas, &c., previous to leaving Liverpool.

I have, &c.,
C. LEDGER.

No. 31.

UNDER SECRETARY TO SUPERINTENDENT.

Department of Lands,
Sydney, 22 February, 1860.

SIR,

With reference to your letter of the 8th instant, stating that you have in hand the sum of three pounds seven shillings and sixpence, the product of twenty-three bushels of barley, surplus food of the Alpacas while at Liverpool,—I am directed to inform you that the money should be at once paid into the Treasury.

I have, &c.,
MICHL. FITZPATRICK.

No. 32.

SUPERINTENDENT to SECRETARY FOR LANDS.

Sydney,
13 April, 1860

SIR,

I have the honor to inform you that I am about returning to Arthursleigh, and would suggest the expediency of my proceeding, after remaining there a short time, to Nimitybelle, and select a proper spot on which to erect the necessary huts, yards, &c.; and moreover, enter into contract with responsible party for the putting up of same.

The hut and yard erected at Arthursleigh, under your authorization, is now ready, and the payment is demanded.

To pay the above, pasturage of animals, expenses of journey to Nimitybelle, as also to meet the exigencies of the next five months (as by that time the flocks ought to be driven to their destination), I beg to request you will please to open a credit in my favor for £100.

The flocks are doing well, and on my arrival at Arthursleigh I will forward a full report.

I have, &c.,
C. LEDGER.

No. 33.

UNDER SECRETARY TO SUPERINTENDENT.

Department of Lands,
Sydney, 19 April, 1860.

SIR,

With reference to your letter of the 13th instant, applying for an advance of one hundred pounds, to pay for the erection of a hut and a yard for the Alpacas at Arthursleigh; as also to meet the expenses of your proposed journey to "Nimitybelle," and other exigencies for the next five months; I am directed to inform you that the Secretary for Lands has authorized a compliance with your request, provided your previous advances have been adjusted.

2. The Secretary to the Treasury has accordingly been requested to open a cash credit in your favour, in the Bank of New South Wales, on the condition above alluded to.

I have, &c.,
MICHL. FITZPATRICK.

No. 34.

SUPERINTENDENT to SECRETARY FOR LANDS.

Sydney,
13 April, 1860.

SIR,

I have the honor to inform you that, at the urgent request of the South American shepherds, I have sent seven of them back to their own country, paying their passage, &c., according to agreement made with them previous to their leaving.

The overseer and two of the most efficient shepherds remain with me, induced to do so by increase of salary, and by allowing them the rations customary in the country; the flocks are now managed by four shepherds and one overseer, as efficiently as formerly; with, however, not a corresponding saving in the expense, as to the number of men engaged. I beg to request you will authorize me to make the best arrangements possible, and the same I will duly inform you of, after a month's trial, and form a proper estimate.

I have, &c.,
C. LEDGER.

No. 35.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 19 April, 1860.

SIR,

With reference to your letter of the 13th instant, reporting the departure of seven of the South American shepherds, who have been assisting you in the care of the Alpacas, back to their own country, I am directed by the Secretary for Lands to inform you, that he does not understand from your communication whether you mean the passages of these men to be paid for by the Government, but that if so you should state upon what authority you made the expenditure, and the amount.

2. I am at the same time desired to request, with regard to the increase of salary and the allowance which you have made of rations to the remaining shepherds, that you will have the goodness to say what the increase of salary is, what the cost of the rations, and upon what authority these changes have been made.

3. I am to add with reference to the latter part of your letter, that Mr. Secretary Robertson sanctions your making any arrangements you may think best for the management of the animals, but that where expense is concerned they must be submitted to him for approval before the expense is entered upon.

I have, &c.,
MICHL. FITZPATRICK.

No. 36.

SUPERINTENDENT to SECRETARY FOR LANDS.

Liverpool,
26 April, 1860.

SIR,

I have the honor to state, in reply to your letter of 19th instant, that I hold no authority to disburse, on account of the Government, the sum necessary to defray the expenses of passage, &c., to South America, of the seven shepherds lately sent back to that country; on advising whose departure I merely expressed a hope that this outlay would be favourably considered by the Government, bearing in mind the peculiar circumstances attending their coming to the country, and my own incapacity to meet it.

So soon as I can furnish exact data as to the increase of expense for each shepherd I will do so; the sum total will not be in excess of the original one. The change has been forced upon me by having to substitute European for South American shepherds.

In reply to 3rd paragraph, I would respectfully suggest that I be authorized to incur such expense as immediate necessity may compel me to, without having to await direct and special authorization that might arrive too late to be available, situate, as the flocks now are, at a distance from Sydney, and from which city all communication is cut off at times for days and days together.

I have, &c.,
C. LEDGER.

No. 37.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
11 May, 1860.

SIR,

In conformity with promise contained in letter of 26th ultimo, I have the honor to forward statement of wages, including rations, that I have found myself compelled to allow the overseer and shepherds that, under my directions, tend the Alpacas:—

Overseer, at the rate of £80 per annum.	
1 shepherd, superior, do.	£70 do.
4 Do. do.	£60 each, £240 for all per annum; amounting to £390.
	The

The Government allowed me one overseer and eight shepherds, involving an expense of £160, and as the flocks are as efficiently tended now as ever they were, I hope the measures I have been forced to adopt will merit your approbation.

I could not have retained the services of the South American shepherds that still remain with me, had I not agreed to augment their wages.

If I have exceeded my authority, I beg to express regret, and beg, that necessity for immediate acquiescence in the increase, with the alternative of being left alone with the animals, will excuse a step that my zeal for the welfare of the animals under my charge forced upon me, and which at same time reduces the expenses in the sum total.

I have, &c.,
C. LEDGER.

*Arthursleigh,
11 May, 1860.*

SIR,

I have the honor to inform you that the Alpacas, &c., are in first-rate condition; and have little doubt but that they will pass the winter without the aid of artificial fodder.

Since

Since my last report I have to note the loss of—

Three cross-bred females, carried away by the river in the late flood. A land-slip, on which they were feeding, was the cause.

One male Vicuna; from wounds and contusions from the other males, whilst fighting.

One female Alpaca; torn and otherwise injured by the males. The above loss has been made up by births. The number in the three flocks is 266 this day.

I am loth to request authorization to incur any expense that does not result in permanent benefit. I allude to the necessity of erecting a hut for two of the shepherds; the winter is too cold here to expect them to pass it in a tent. The three horses I have will require one feed of hay and corn daily—their pasturage is free—as I have to make a journey to Nimitybelle during the winter, and on commencement of spring drive the animals there; also, have to ride to and around the stations, some ten miles daily; the horses, therefore, must be kept in some sort of condition.

By way of precaution I intend to give each of the animals a bath in tobacco water. This animal, when moved about from place to place, is subject to cutaneous eruptions, caused by the overheating of the blood by frotting and restlessness.

I therefore beg to request permission to make the abovementioned outlays.

I have, &c.,
C. LEDGER.

No. 49.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
29 May, 1860.

SIR,

I have the honor to inform you that I have never seen a flock of Alpacas, &c., on the average, in better health and condition than the one under my charge.

I beg to call your attention to my letter of 7th instant, and again request authorization to incur the expenses therein indicated. I respectfully beg to suggest the expediency of prevention in lieu of uncertain cure.

I have, &c.,
C. LEDGER.

No. 50 a.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 5 June, 1860.

SIR,

Adverting to your letter of the 29th ultimo, respecting the outlay incurred by you in sending to South America some of the shepherds you brought from that country, I am instructed to inform you that Mr. Secretary Robertson cannot see that the Government is called upon to provide this outlay.

I have, &c.,
MICHL. FITZPATRICK.

No. 50 b.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 11 June, 1860.

SIR,

I am directed to request that you will have the goodness to forward to this office, with the least possible delay, for transmission to the Treasury, an Estimate of the probable Revenue of your department for the ensuing year, to enable the Honorable the Finance Minister to prepare the statement of Ways and Means.

I have, &c.,
MICHL. FITZPATRICK.

No. 51.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 18 June, 1860.

SIR,

Alluding to your letter of the 29th ultimo, I am directed to inform you that since the date of your communication (7th ultimo), resigning your appointment as Superintendent of Alpacas, if arrangements are not made to enable you to bring your family from South

South America to this Colony, to which you drew attention in the letter under reply, Messrs. Mort and Montefiore have called upon the Secretary for Lands on your behalf, desiring that you may be permitted to purchase the flock of Alpacas, &c., on certain conditions; and they left on the understanding that they would communicate with you, with the view of their being able to make a definite offer of purchase.

2. I am further to apprise you that, should such an arrangement as was proposed by those gentlemen be carried out, the matter alluded to by you would be arranged; and in the meantime Mr. Secretary Robertson can take no action that would have the effect of pledging the Government to meet your views in respect of bringing your family to the Colony.

I have, &c.,

MICHL. FITZPATRICK.

No. 52.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,

23 June, 1860.

SIR,

I have the honor to acknowledge receipt of your communication, dated 18th instant, relating to proposal, on my behalf, made by Messrs. Montefiore and Mort to the Honorable the Premier, for the repurchase of the Alpacas, &c.

I have forwarded to said gentlemen copy of the letter, and requested them to have the kindness to inform me whether any other negotiation had taken place than that the terms of which were conveyed to me under date of 4th instant. They were as follows:—The animals be sold to me for £15,000, ten years credit, and one thousand pounds given to me by the Government.

On receipt of answer from the above-named gentlemen, and with the knowledge of what I do, I will reply categorically; requesting, with all deference, your indulgence for a few days.

I have, &c.,

C. LEDGER.

No. 54.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,

10 August, 1860.

SIR,
With reference to my letter of June 23rd, replying to your communication of the 18th June, on the subject of proposals for the purchase of the Alpacas, &c., I have the honor to state that I have authorized T. S. Mort, Esq., and J. L. Montefiore, Esq., to conclude arrangements on my behalf with the Government, in accordance with terms conveyed to me in communication from said gentlemen dated 3rd July ultimo.

I have, &c.,

C. LEDGER.

No. 55.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,

18 July, 1860.

SIR,
I have the honor to lay before you a Statement of Expenses I have found it necessary to incur in the Department under my charge:—

	£	s.	d.
Thos. Griffiths, employed 40 days, to assist until replacing shepherds	8	0	0
Thos. Smith, putting new props to dry	0	7	6
Thos. Rea, 1 pair blinkers	0	14	0
..... Carried forward.....	9	1	6
	Expenses		

	£	s.	d.
Brought forward.....	9	1	6
Expenses of sending the new shepherds to Arthursleigh	3	5	0
Keep of horses and shoeing at Liverpool	4	4	0
1 cwt. tobacco stalks, for wash, Penfold	4	0	0
Carriage of tobacco stalks from Sydney to Arthursleigh.....	0	13	0
Cedar wood bath, iron bound, for dipping animals	5	18	6
Expenses on bath to Arthursleigh	1	15	6
6 barrels for soaking tobacco, and bringing them from Paddy's River	2	5	0
Lard, for ointment for smearing animals	3	15	0
Mercurial ointment and sulphur, Jenkins	2	3	6
Shoeing horses, 18s. ; 3 halters, 6s.....	1	4	0
Brush, curry-comb, and Row's embrocation.....	0	5	6
Expenses of Jas. Alexander with dray to Campbelltown, and self to Sydney, to bring up tobacco and chaff-cutter.....	4	4	3
Thermometer for taking heat of water.....	1	2	6
Tobacco stalks, 314 lbs., J. M. Leigh	7	4	9
1 ton lucerne hay, and carriage from Lockyersleigh	6	0	0
Shoeing horses	0	18	0
12 bushels maize, Reid, at 6s.	3	12	0
Cotton stuff for making men's tents, twine, &c.	2	5	6
Strychnine, for poisoning dingoes	1	5	0
	£65	2	6

I do not think more artificial fodder will be required for Alpacas or horses. A few of the former with lambs recently dropped I give a small quantity of lucerne chaff to, every evening.

I found it necessary to obtain shelter for overseer and two of the shepherds; consequently I rented from Mr. Reid a small cottage with two paddocks adjoining, at the rate of twenty pounds per annum. One paddock serves for keeping the males in separate from females, and the other for large flock to sleep in.

On leaving this, the bath and barrels will sell at little loss on cost.

I beg to solicit your approbation to above detailed outlay, and respectfully request you will please to order the sum total to be placed to my credit in bank.

I have, &c.,
C. LEDGER.

No. 56.

UNDER SECRETARY to SUPERINTENDENT.

*Department of Lands,
Sydney, 8 August, 1860.*

SIR,

With reference to your letter of the 18th ultimo, submitting a statement of expenses incurred by you in connexion with the flock of Alpacas, amounting in all to the sum of sixty-five pounds two shillings and sixpence,—I am directed to inform you, that the Finance Minister has been requested to cause this amount to be paid in at the Bank of New South Wales to your credit.

I have, &c.,
MICHL. FITZPATRICK.

No. 57.

SUPERINTENDENT to SECRETARY FOR LANDS.

*Arthursleigh,
18 July, 1860.*

SIR,

I have the honor to acknowledge receipt of your letter of 30th ultimo (147), approving of the alteration in salaries to overseer and shepherds I was forced to make.

The shepherd the Government allows £70 to, I actually pay £80—£10 myself; in "superior" I do not allude to any superior duties in connection with the Alpacas, &c. Said man has the horses under his charge, and when the dray is in use, to fetch wood, water, carry rations, or other services, he attends it; moreover he has put up yards, made troughs, using his own tools, without extra expense. Paying him a higher salary for his usefulness I thus classed him. He speaks English and Spanish, was formerly interpreter, and I paid him his salary for more than a year, and on the other men leaving, he took shepherd's, and "generally useful" berth.

I have, &c.,
C. LEDGER.

No. 63.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
18 July, 1860.

SIR,

You are aware that three horses were allowed in department under my charge ; two for dray, one for saddle. I then thought that number sufficient. I found on leaving Liverpool that two saddle horses were necessary ; more so on arriving here. I bought another myself, and it died a short time back. I beg to request your permission to replace it ; not for my benefit, but as property of Government. The one I have cannot do all the work that is required, viz.,—daily rounds to flocks, twice a week to Paddy's River with and for letters, distance eighteen miles each time, obtaining provisions, &c.

I have, &c.,
C. LEDGER.

No. 64.

UNDER SECRETARY to SUPERINTENDENT.

Department of Lands,
Sydney, 8 August, 1860.

SIR,

With reference to your letter of the 18th ultimo, requesting permission to replace a horse which died a short time since, and which you represent as necessary for the performance of your duties as Superintendent of Alpacas,—I am directed to inform you, that the Secretary for Lands approves of your purchasing a horse to supply the place of the one you mention, but which is to be the property of the Government.

I have, &c.,
MICHL. FITZPATRICK.

No. 65.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
25 August, 1860.

SIR,

I have the honor to acknowledge receipt of your communication of 8th instant, in reference to salary I pay to superior shepherd. In my letter of 18th July ultimo, I endeavoured to explain why this man was paid a higher rate of wage than the other shepherds.

As Superintendent of Alpacas, I consider it my duty to select those under me for their efficiency, at rate of remuneration ruling in the country for similar service to theirs, without reference to merit acquired under previous service to me individually. It is this latter I endeavour to requite, not to one only but most all of them, out of my own resources.

I am most desirous to give satisfaction to all in authority over me. As my appointment will shortly be cancelled, I respectfully solicit your indulgence for my errors in judgment I may, most unintentionally, have committed.

I have, &c.,
C. LEDGER.

No. 66.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
1 September, 1860.

SIR,

I beg to congratulate you on your safe return to town in good health.

Dr. Mueller writes me from Melbourne, inviting me to visit their city and report on their Llama stock. I am very desirous of fully satisfying myself as to what the animals really are, as also of seeing that city. Will you be so kind as to allow me leave of absence for that purpose ; I would not apply for it were I not satisfied that nothing particular requires my presence here for a month or so.

By allowing the male Alpacas to go to Melbourne you open up a yearly demand for fresh pure males that only this country can supply. They must be got from this at any price, if in any way they wish (which they do in earnest) to carry on this breed to perfection.

In passing through Sydney I should be able to fill up the forms the Treasury and Auditor General require from me, and which I cannot satisfactorily do without being shewn how.

I am very confident the results will fully justify the with which you introduced the Bill for the purchase of the Alpacas, &c., by the Government.

I have, &c.,
C. LEDGER.

SIR,

Referring to your letter of the 10th instant, respecting your disbursements on account of the Alpacas, amounting to £78 1s. 6d., I am directed to instruct you to send the vouchers for these items to the Auditor General.

I have, &c.,
MICHEL FITZPATRICK.

No. 82.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
5 September, 1860.

SIR,

I have the honor to acknowledge receipt of circular, dated 30th ultimo, respecting the probable expenditure of my department for 1861.

I was under the impression that my acquiescence to the terms proposed to me by Messrs. Montefiore and Mort, on 3rd July last, would have obviated the necessity of my forming estimate of expenses for the coming year.

In my letter of 30th June, I stated that, on permanently locating the Alpacas Llamas, &c., it is my opinion the requirements will be,—

- Cottage for Superintendent;
- Four huts for shepherds, with yards adjoining;
- Four paddocks for separating males, weaners, &c.;
- One large yard, with six divisions;
- One stable, with three stalls;
- One shed for dray, &c.

The cost of the above will entirely depend on the value of labour at time and place of erecting them; according to present rate I estimate the cost at £800.

The number of shepherds now employed could be reduced by two on permanently settling the flocks.

I have, &c.,
C. LEDGER.

No. 83.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
5 September, 1860.

SIR,

I have the honor to state, in reply to circular of August 30th ultimo, that the probable yield of wool will be 3,000 lbs. in 1861, and worth about two hundred and fifty pounds.

I have, &c.,
C. LEDGER.

No. 84.

SUPERINTENDENT to SECRETARY FOR LANDS.

Sydney,
14 November, 1860.

SIR,

I have the honor to inform you, from letters received from Arthursleigh, that the Alpacas, Llamas, &c., are thriving extremely well.

It is necessary my return there to carry out the proper intermingling of the males with the females from the 1st of December next, and I beg to request your instructions thereto relating.

Having handed in all my accounts and vouchers in conformity with your orders* to the office of the Auditor General, I beg you will please to open a special credit for me wherewith to meet the payment of pasturage up to 31st December, and other expenses incurred, say for eighty or one hundred pounds. Respectfully awaiting your orders as to the arrangement initiated by Messrs. Montefiore and Mort, on my behalf, for the re-purchase, &c., of the animals, I beg to express the hope that such will be carried out, so as to allow of my permanently locating the animals previous to the proper season for moving them passes.

I have, &c.,
C. LEDGER.

Referring to your letter of the 12th instant, applying for leave of absence to proceed to Sydney for the purpose of obtaining superior medical advice, I am directed to inform you that your application has been approved.

I have, &c.,
MICHL. FITZPATRICK.

No. 91.

SUPERINTENDENT to SECRETARY FOR LANDS.

Arthursleigh,
28 February, 1861.

SIR,

I have the honor to inform you that under this date the remainder of the South American shepherds have been paid off; they are about returning to their own country. At this time last year when the others left, I experienced some difficulty in getting the three remaining to engage for another year. I then, in anticipation of their departure, commenced instructing Europeans how to tend the flocks; and consequently, at present they are as well tended as ever, by the following, viz. :—

Overseer, James Alexander, formerly classed as superior shepherd, 2½ years with the flocks.

Shepherd, John Nesbitt, 13 months.

Ditto, Henry Ledger, 12 months.

Ditto, Arthur Ledger, 3 months.

Ditto, John Rowe, 1 month.

The above-mentioned have been acquiring practical experience in the management of the Alpaca under my superintendence, most willingly aided by the late overseer and the two shepherds, during the time stated.

With the exception of John Rowe, who I had to allow one month's salary and rations to (five pounds), whilst learning how to tend the flock he now has in charge, no extra expense has been incurred.

The above disbursement of five pounds, and fifteen for three months payment to extra hands during the lambing and rutting season, I trust will meet with your approval.

I beg to call your attention to the saving of one hundred and forty pounds per annum, under the item of salaries, by reducing the number of shepherds from eight to four.

I consider it my duty to respectfully recommend the late overseer, Pedro Cabrera, and the two shepherds, to the consideration of the Government, as worthy of some pecuniary acknowledgment over and above their salaries. During the hazardous prosecution of my enterprise, these men (for eight years) have shewn great fidelity, under strong temptations from the Bolivian Authorities to abandon me; which had they been prevailed upon to do the undertaking must have signally failed. I am convinced also, that liberality by the Government on present occasion would be of great importance, and of beneficial results to all British subjects resident in those countries; it would stimulate the natives to assist them in their enterprises, and its moral effects would be to raise the English name still higher in their estimation.

Cabrera for the last year has been most painstaking, particularly so in teaching the present shepherds the proper management of the Alpaca in all its details; and, as the sum voted by the Honorable the Legislative Assembly for the management of Alpacas has not been expended, I trust the Government will permit my distributing among the three the sum of fifty pounds, in its name.

I have, &c.,
C. LEDGER.

*Department of Lands,
Sydney, 12 April, 1861.*

SIR.

With reference to your letter of the 28th February last, in which you recommend that, in addition to the salaries of the late overseer of Alpacas (Pedro Cabrera) and two shepherds, some pecuniary remuneration should be made to them for their long and faithful services during the time spent by you in obtaining these animals,—I am directed by the Secretary for Lands to inform you, that, in accordance with your suggestion, the Government have authorized the distribution, by you, among the three men in question, of the sum of fifty pounds, which amount the Colonial Treasurer has accordingly been requested to have placed to your credit in the Bank of New South Wales.

I have, &c.,
MICHL. FITZPATRICK.

SUPERINTENDENT to SECRETARY FOR LANDS.

SIR,

Sydney,
16 May, 1861.

I beg to request you will please to open a credit for me of one hundred pounds, wherewith to meet the payment of pasturage and rent, as also other expenses incurred in the management of the Alpacas, &c. I beg to inform you that all prior credits have been accounted for to office of Auditor General.

I have, &c.,
C. LEDGER.

No. 97.

UNDER SECRETARY to SUPERINTENDENT.

SIR,

Department of Lands,
Sydney, 29 May, 1861.

In accordance with the request contained in your letter of the 16th instant, I am directed to inform you that a cash credit has been opened in your favour in the Bank of New South Wales, for the sum of one hundred pounds, for the payment of rent, &c., on account of the flock under your charge.

I have, &c.,
MICHL. FITZPATRICK.

No. 98.

SUPERINTENDENT to SECRETARY FOR LANDS.

SIR,

Sydney,
25 June, 1861.

I have the honor to submit to you, for your approbation, the following:—

The acclimatisation of the Alpaca in Australia being fully established, and its value as a wool-producing animal undisputed, I am desirous that its meat also should receive the test of public approval or disapproval.

I think it due to the Colony, and to the Government, that every exertion on my part be offered to present this new germ of future wealth, under all its phases, before the World, at the approaching Exhibition of 1862 to be held in London.

I therefore respectfully request your permission to select such animals from out of those born in the Colony as I may think proper, from the flocks under my charge, say six or eight, and have them killed.

The skins to be stuffed, and forwarded to the Exhibition—thus shewing the different stages of breeding.

The meat to be forwarded to Sydney, distributed among the Clubs, private parties, and the public; its merits or demerits to be freely commented on.

The tallow to be put in glass vessels of large size; this, with certificate as to public opinion respecting the meat, to accompany the stuffed animals that produced them.

I beg to state that no female animals would be destroyed; and, with the exception of one pure male Alpaca, the rest would be cross-bred males, of no use whatever for breeding from.

I have, &c.,
C. LEDGER.

No. 99.

NEW SOUTH WALES.

TANNERS AND CURRIERS.

(PETITION OF MARY LOUISA WATT.)

Ordered by the Legislative Assembly to be Printed, 27 September, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of Mary Louisa Watt, of Phillip-street, in the said Colony, Widow,—

RESPECTFULLY SHEWETH:—

That your Petitioner is the widow of the late Hercules Watt, of Phillip-street, Sydney.

That the said Hercules Watt petitioned your Honorable House, during the last Session of Parliament, for relief, in consequence of severe injury and loss sustained by him through the operation of the Act 13 Vic., No. 42, as it relates to the closing of tan-yards within the City of Sydney.

That, by the death of the said Hercules Watt, your Petitioner has become personally involved in the affairs of her late husband, and is now suffering great distress from the circumstances as more fully set forth in the Petition of the said Hercules Watt above referred to.

Your Petitioner, therefore, humbly prays your Honorable House to take the premises into favourable consideration, and to grant to your Petitioner such relief as to your Honorable House may seem fit.

And your Petitioner, as in duty bound, will ever pray, &c., &c.

MARY LOUISA WATT.

 REVEREND W. B. CLARKE.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 20th September, "to consider and report upon the Evidence taken before a Select Committee of the Legislative Assembly, appointed on the 12th March last, having reference to the services of the Rev. W. B. Clarke, in developing the great mineral resources of this Colony," have agreed to the following Report:—

Your Committee are of opinion, that the Reverend W. B. Clarke has, during the last twenty-two years, by his scientific investigations and researches as a geologist and mineralogist, rendered great and important public services, as will be seen by the Evidence taken before the Select Committee of last Session.

For those services your Committee are of opinion that no sufficient acknowledgment has been made; and they learn with considerable regret that Mr. Clarke's advanced age and increasing infirmities, aggravated, it is only reasonable to suppose, by a long course of scientific labours, render it improbable that he should continue much longer capable of active service, whether in the exercise of scientific or professional functions.

Your Committee are also strongly of opinion that, considering how much his various labours have contributed both to the honour and material interests of the Colony, and the comparatively small remuneration he has received, it would be discreditable to New South Wales, if, from the want of any adequate reward for the labours which he has devoted to the Colony, he should be subjected to privation.

Your Committee therefore recommend that the services so rendered by Mr. Clarke should receive from the Government that just and liberal recognition which they undoubtedly merit.

ISAAC SHEPHERD,
Chairman.

*Legislative Assembly Chamber,
Sydney, 17 October, 1861.*

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 24 SEPTEMBER, 1861.

MEMBERS PRESENT :—

None.

The Committee having been convened by direction of the Mover (Mr. Shepherd),—
In the absence of a Quorum, at *half-past Eleven* o'clock, the meeting lapsed.

FRIDAY, 27 SEPTEMBER, 1861.

MEMBERS PRESENT :—

Mr. Forster,		Mr. Sadleir,
Mr. Hoskins,		Mr. Shepherd,
Mr. Mate,		Mr. Wilson.

I. Shepherd, Esq., called to the Chair.

Printed copies of the Evidence taken during the last Session, in reference to the
Claims of the Rev. W. B. Clarke,—upon the Table.
Committee deliberated.

[Adjourned till Wednesday, 9th October, at *Eleven* o'clock.]

WEDNESDAY, 9 OCTOBER, 1861.

MEMBERS PRESENT :—

I. Shepherd, Esq., in the Chair.

Mr. Forster,		Mr. Lackey,
Mr. Hoskins,		Mr. Mate,
		Mr. Sadleir.

Committee deliberated.

The Chairman laid before the Committee a Draft Report.

Chairman's Draft of Report read.

Committee deliberated, suggesting certain amendments.

[Adjourned till Friday, 11th instant, at a quarter to *Twelve* o'clock.]

FRIDAY, 11 OCTOBER, 1861.

MEMBERS PRESENT :—

I. Shepherd, Esq., in the Chair.

Mr. Forster,		Mr. Mate,
Mr. Holt,		Mr. Sadleir,
Mr. Hoskins,		Mr. Wilson.

The Chairman submitted to the Committee an amended Draft Report.

Same read and considered.

Motion made (*Mr. Mate*), and *Question* proposed,—That the Draft, as read, be the
Report of this Committee.

Amendment proposed (*Mr. Forster*), to omit all the words after "Draft" and insert
as follows :—(That the Draft) "be amended by the insertion of the following between the two
last paragraphs, viz. :—

"Your Committee, moreover, cannot avoid pointing out, what they learn with
"considerable regret, that Mr. Clarke's advanced age and increasing infirmi-
"ties, aggravated, it is only reasonable to suppose, by a long course of scien-
"tific labour, render it improbable that he should continue much longer
"capable of active service, whether in the exercise of scientific or professional
"functions. And your Committee are strongly of opinion, that, considering
"Mr. Clarke's high, and it may be said, universal reputation—all the
"Reverend gentleman has actually accomplished, and enabled others to
"accomplish, in one of the noblest and at the same time the most practical
"of sciences—how much his various labours have contributed, both to the
"honour and material interests of the Colony—and the comparatively small
"remuneration he has received—it would be in the highest degree discredit-
"able to New South Wales, if the remaining years of Mr. Clarke's life were
"subject to be in the least embittered by the prospects of pecuniary difficulty."

Committee deliberated.

Question,—

Question,—That the words proposed to be omitted, stand part of the *Question*,—*negatived*.

Question,—That the words proposed to be inserted, be so inserted,—*agreed to*.

Main Question agreed to, and Report amended.

Committee further deliberated.

Motion made (*Mr. Hoskins*) and *Question*,—That the Report, as now amended, be printed and circulated prior to the next sitting,—*agreed to*.

[Adjourned till Thursday, 17th instant, at *Twelve o'clock*.]

THURSDAY, 17 OCTOBER, 1861.

MEMBERS PRESENT :—

I. Shepherd, Esq., in the Chair.

Mr. Cowper,		Mr. Hoskins,
Mr. Forster,		Mr. Lackey,
Mr. Holt,		Mr. Mate.

Committee deliberated.

The Chairman produced a printed copy of the proposed Report, containing further amendments for consideration.

Report, as proposed to be revised, read and considered.

It was Resolved unanimously,—

That the Draft Report, as now read, be the Report of this Committee.

Chairman requested to bring up the same.

Legislative Assembly.

NEW SOUTH WALES.

MATRIMONIAL CAUSES BILL.

(ROMAN CATHOLIC ARCHBISHOP OF SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 14 November, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned, the Roman Catholic Archbishop of Sydney,—

HUMBLY SHEWETH:—

1. That your Petitioner has seen with regret and alarm the progress of the "Matrimonial Causes Bill" presently before your Honorable House.

2. That your Petitioner is most firmly convinced that increased facilities for obtaining divorce have resulted, and always will result, in deplorable injury to public morality, and to the permanency of those family relations which lie at the base of all Christian civilization.

3. That the Law already in existence, by which provision is made for separation "*a mensa et thoro*," gives all the relief that can be properly desired.

4. That, for the Roman Catholic population of this country, the measures of the proposed Bill would be useless and pernicious; useless because they do not believe the *vinculum* of Matrimony to be in any case dissoluble, and pernicious, because legal facilities for divorce *quoad vinculum* would practically offer to the unworthy members of their community an incentive to bad conduct, and a premium for the violation of their conscience.

5. That the indissolubility of the *vinculum* of Matrimony is amongst Roman Catholics not a matter of opinion, but a received dogma of the Christian faith, and a denial of it by anyone would be tantamount to a renunciation of his religion.

6. That in the case, therefore, of mixed marriages—*i. e.*, of Catholics with Protestants—the operation of the Bill in question would be especially oppressive to the conscientious Roman Catholic, who would remain bound, whilst the partner would be at liberty, by Law, to form a new connexion.

7. That the Roman Catholics of the Colony being, as is shewn by the last Census, one-third part of the entire population, your Petitioner feels himself justified in respectfully expressing his confident hope that, in the decisions of your Honorable House, their religious feelings and belief will, in this matter, be duly regarded.

Your Petitioner, therefore, for himself and on behalf of the whole Roman Catholic population, humbly prays that the Bill known as the Matrimonial Causes Bill may not pass.

+ J. B. POLDING,
Sydney.

1861.

NEW SOUTH WALES.

ACCLIMATISING AND PROPAGATING SALMON.

(REPORT ON THE SUITABILITY OF CERTAIN RIVERS OF THE COLONY FOR THE PURPOSE OF.)

Presented to both Houses of Parliament, by Command.

ALEXANDER BLACK, ESQ., to SECRETARY FOR LANDS.

Sydney, 22 September, 1861.

SIR,

In compliance with instructions received on the 27th May, I have the honor to submit the following *Report on the suitability of certain Rivers of this Colony for the purpose of acclimatising and propagating Salmon.*

The instructions given to me contemplated only a survey of the Rivers Snowy and Shoalhaven. But having obtained information, during my journey, that several of the rivers flowing to the eastward from the coast range were likely to afford greater facilities (on account of their shorter course, and proximity to seaports) for the formation of breeding-ponds, I thought that I should not be carrying out the spirit of my instructions, if I did not extend my examination to embrace all the rivers referred to. I was more especially induced to follow this course, as the sum voted was placed entirely at my disposal, for the purpose of permitting me to fulfil the design of the vote in the way in which I conceived to be most conducive to the interests of the Colony. This course has, however, somewhat increased the cost of the survey; but I trust that the complete nature of the examination will justify my expectations, that the plan which I have pursued will merit the approval of the Government.

As it appears to me to be the most convenient, I propose to submit the information which I have obtained, in the narrative style.

On the 27th May I received instructions to commence the survey of the rivers mentioned, and forthwith I prepared for the journey; but a circumstance over which I had no control delayed my departure from Sydney until the 17th June, when I sailed by steamer to Merimbula, where, by the kindness of Mr. Manning, of Kamaruka, I was furnished with information, and with letters of introduction to gentlemen residing on my line of route. I may here mention that all classes of people in the country through which I passed, when the nature of my employment was made known to them, evinced the most lively interest in its success; communicating freely the information which they possessed, and uniformly treating me with courteous hospitality.

On the 20th I left Kamaruka for Bibenluke, at the foot of the mountain range, which ascends to the height of nearly 3,000 feet above the level of the sea, and bounds the elevated land of Monaroo on the coast side; I crossed the Tantawangalo, whose temperature is 40 degrees—a fine clear pebbly rivulet, tributary to the Bega. Ascending the steep range the temperature very sensibly decreased, until entering on the table land beyond, late on a clear frosty afternoon, the change was barely endurable; especially as we had to walk slowly, on account of the difficulty which was experienced of conveying the canoe without damage on the pack-horse.

Late in the evening I arrived at Mr. Windeyer's Station, Bibenluke. The homestead stands on the right bank of the Bombala, a tributary of the Delegate.

Inasmuch as the principal streams of Monaroo flow through the same kind of country, have the same general aspect, and possess nearly the same temperature, the greater number being tributary to the Delegate, the following description will apply to the whole.

They rise in the mountain ranges which surround and intersect the table land, and running part of their course through a trap soil retain a tinge of its colour, as they continue to flow briskly on over a fine shingly bottom, pleasant pebbly fords, and through long deep quiet reaches, to join the Delegate before it enters the limestone country. Here it forms into deep rocky pools, and sprightly little falls, pursuing its way tortuously, but hitherto in comparative quietness, between pleasantly undulating banks, until it enters the granite fissure which forms its bed through the mountain bank of the Snowy. It runs here with foaming turbulence a short and rapid course to its confluence with that river, three miles below the junction of the MacLaughlan Rivulet.

This beautiful stream and its affluents, although bearing a close resemblance to the most productive Salmon and Trout streams of Scotland, afford now a home only for the eel and the platypus. Even aquatic birds are more rare here than in other countries; yet the temperature of the climate and water of this elevated region, from the Snowy Mountains on the south to the Shoalhaven on the north, differs little from that of the native habitat of the Salmon. From 22nd June until 2nd August, the average temperature of these waters was 41 degrees, whilst during the same period the mean shade temperature was 38 degrees. It was often as low as 22 degrees; and, on the night of June the 7th, the mercury fell at Bombala to 20 degrees, and ice formed an inch and half thick on the river.

I am informed by Messrs. Windeyer and Boucher (the latter gentleman having for many years bestowed great attention to the meteorological condition of Monaroo), that seven months of the year are subject to severe frosts and wintry storms of long duration; and even during the five months of summer, storms of hail and blighting frosts are of too frequent occurrence. No doubt these are baneful visitations to the farmer, destroying fruit and seriously injuring the maize and cereal crops; yet the same circumstance will greatly tend to maintain a low temperature of water during summer in the whole of the river system of this district, viz., in the Snowy, Shoalhaven, Murray, and their affluents, and also in the Bega, Tuross, Moruya, and in the Clyde, which have their source in the mountains forming its eastern boundary. Thence the latter streams descending more than two thousand feet in a course of only twenty or thirty miles, cannot be materially increased in temperature during that short rapid journey to the sea. The similarity of temperature referred to will be clearly shown hereafter by a comparative table of temperatures.

Accompanied by Mr. Windeyer, I proceeded on the 20th to the Snowy, in order to ascertain the possibility of conveying the canoe thither. The country being so rugged, and the rapids so dangerous, Mr. Windeyer deemed it impossible. However, although the appearance of the country and river was anything but promising, I determined to try it. This course also was in a measure forced upon me by an opinion prevalent throughout Monaroo, (founded, however, on the evidence of aboriginals alone, as no white man is said to have penetrated into that region), that a stupendous Fall existed somewhere in the locality, marked inaccessible on the Survey Map. Had this Fall existed, an insuperable barrier would have ever been presented to the introduction of Salmon into the Upper Snowy and its affluents.

Having returned to Bombala, and provided myself with the necessary outfit for accomplishing the projected voyage, I again reached the Snowy on the 28th, and forthwith commenced my task.

In six days I had succeeded in penetrating only twenty-five miles into this *terra incognita*, by means of the canoe; shooting some rapids after the manner of the American Indians, and passing those more difficult by carrying on our shoulders the canoe and baggage. This not only proved a most arduous, but a dangerous undertaking. Had our feet slipped on the glassy surface of the sloping water-worn granite, we should have been plunged into the boiling torrent below. The country was becoming more difficult of access, the rapids longer and more dangerous; my men also were becoming rather nervous, although I invariably shot the rapids alone; I was therefore constrained, much against my will, to abandon the idea of tracing the river further by means of the canoe. Accordingly, at the head of a long, impassable rapid, beyond which it would have been a work of extreme toil and danger to have conveyed the canoe, we camped. The following morning I proceeded alone, on foot, to examine the remaining portion of this unknown country, which I accomplished by tracing the river as far as Great Popong Creek.

Within this space there are no Falls, but a succession of dangerous rapids, tumbling with foaming violence down narrow water-worn fissures, cleft in the naked bed of granite, often not exceeding twenty feet in width; then rushing between, over, and under huge masses of granite, which have fallen from the decomposing sides of mountains rising nearly vertically three thousand feet above the bed of the river. This chasm no where exceeds half a mile in width—a sterile, gloomy, inconceivably rugged country. Occasionally the whirr of a disturbed quail would give token of the existence of animal life; but beyond this, and an occasional track of the black ant, no other sign of living thing drew my attention.

Having returned to the camp, and seeing the impossibility of conveying our baggage up these precipitous ranges, I reluctantly abandoned provisions, equipment, and canoe, to their fate.

Returning by way of Langhorn's Station to Bombala, I discharged my men, and started alone to Buckley's Crossing, in order to continue the examination of the Snowy. July 12th and 13th, I examined that portion lying below the point mentioned, and up to its tributary the Moamba. Perhaps the whole of this distance, nearly fifty miles by the meandering of the river, from the Moamba to the Maclaughlan Rivulet—whether considering its temperature, its fitness for the propagation of any of the genus *Salmo*, for angling, or for net fishing—it is not excelled in appearance by the most celebrated salmon-producing rivers of Britain, viz., the Spey, Tay, Tweed, Tyne, Severn, nor the Shannon; and in June, July, and August, it contains a greater volume of water than either of the above-named rivers. On the 12th and 13th July its temperature was 38.5 degrees, that of the Moamba 36 degrees; air in shade, 7 a.m., 26 degrees; noon, 39 degrees; 3 p.m., 36 degrees. Snow was lying on sheltered places on the plain; the weather was gloomy and threatening, snow falling heavily on the uplands.

Passing by way of Ingebyra, I descended the spur called Jacob's Point into the bed of the Snowy, and recommenced its examination at the spot to which I had already traced it. Keeping the right bank, I paused to examine the Jacob and Pinch Rivulets, which flow a short and rapid course from the Australian Alps, now snow-clad, into the Snowy, ten or fifteen miles north of the Victorian boundary.

The

The angle of junction formed by both these streams with the Snowy affords about five acres of level land, which appears, by the evidence of the drift of the river, to be above the highest point of inundation. Temperature of the rivulets, 40 degrees; Snowy, 39 degrees. At some future period, when an arrangement can be made with the Victorian Government for stocking this valuable river with Salmon, the spots indicated will be found the only eligible ground on the Snowy for the construction of breeding ponds.

The river here is altogether changed in appearance from what I have already described. The bed is wider, the mountains are not so precipitous, the rapids are of rarer occurrence, and descend more gradually; at short intervals there are long tranquil reaches, interspersed with grassy islets, succeeded by shingly fords; whilst here and there, where granite ledges dip into its bed, it assumes somewhat of its former turbulent aspect. These features it preserves to where it issues from the coast mountain range; from thence to the sea, about thirty miles, it pursues its way swiftly, yet tranquilly, between beautifully undulating and fertile banks, broad, deep, but not clear, the water being dull and opalescent, from holding in solution so much inorganic matter. Innumerable minute glittering scales are visible, which bear a very close resemblance to hydrated protoxide of lead when held in solution by rain water. Although it drinks agreeably, yet, on account of its opacity, it is not employed for the purpose of washing butter at Mr. Macleod's river station. It is here 200 yards wide, and flowing fully from bank to bank at a uniform rate of three and a half miles per hour. Its depth varies from five to eleven feet—at its lowest stage it is probably three feet less depth. While in floods there is abundant evidence of its having risen more than forty feet, overspreading the banks, and, as in the case of the Gundagai flood, overwhelming by a stratum of sand and pebbles four or five feet in depth many thousand acres of Macleod's grazing land, about six miles below the station it passes a lake-like river—the Broadrib. Here the tide is perceptible. Flowing onward, it passes the narrow entrance to a shallow brackish lake on either hand. These are the abode of numerous aquatic fowl; and finally, running on to a narrow range of sandhills which form the sea beach it abruptly turns to the left round an elevated level promontory, assuming a lagoon form of a mile wide and two to three miles long. It then turns suddenly to the right, and flows nearly south through the before-mentioned narrow sandy beach, in a channel broad, deep, and free from impediment; a cable's length wide, two fathoms deep, decreasing to six and half feet on the bar at low-water spring tides. All round the estuary and beach outside is admirably adapted for fishing purposes. The temperature of the water at the entrance was 47 degrees; on the beach outside, 51 degrees; at the station, 43 degrees. The increase of the temperature of the fresh water, I believe to be owing to the large quantity of rain water poured in from the flooded rivers east of the Black Mountain. It rained incessantly fourteen days; the ground was quite saturated; while during the same period not a drop of rain fell west of the said mountain, nor on the plains of Monaroo. By the zealous aid of Mr. J. Macleod, of Buchan, I was enabled to complete the examination of the Snowy in a satisfactory manner.

I returned by Buchan, by Galantaby, crossed the Snowy at Didic, and passed through Bombala on my way to Kamaruka, in order to examine the rivers which have their source in the mountain range lying south of the Shoalhaven, and bounding the table land of Monaroo. Inasmuch as I have already mentioned that the whole of this mountainous district possess nearly the same meteorological features, nothing further need be said on this point. I shall therefore confine myself to a short description of the physical aspect of each river in the order which they were examined.

The Bega, under the name of the Bembuka, with its affluent the Brogo (which pursues circuitously a north-easterly course), rises near the Nimitibel Mountain, and over a direct line of twenty-five miles to the sea, flows meandering through an elevated but open and undulating country, over rocky bed, gravelly shallows, and deep sandy sheltered pools; its water as lucid, but larger in volume, and similar in general appearance to the Avon—a tributary which empties itself into the Spey at Ballandallach, celebrated throughout Britain for the beauty and size of its Salmon and sea trout, and the superior transparency of its water. Increased by the Tantawangala, and other tributaries, it is joined by the Brogo in the township of Bega, whence its name is derived. A short distance below the junction it enters the tidal water of an expansive estuary, which communicates with the sea by a channel six miles from Bega, and thirteen north of Merimbula. It is bounded on the north by a high rocky point; on the south by the point of a low sandy beach, which affords on both sides good ground for pursuing Salmon fishing by all of its appliances. On the 4th of September, at Kamaruka, the shade temperature of the air was, at 7 a.m., 29 degrees; Bega, at noon, 52 degrees; 3 p.m., 46 degrees. The temperature of the water at the confluence of the Tantawangala 42 degrees. This is an eligible spot for the formation of breeding ponds. There is also another place fitted for this purpose about six miles further up the Bembuka on a level grassy meadow, at the termination of a rapid, which is well sheltered from the sun by impending rocks. This river is as large as the Don, Findhorn, Ness, in Scotland; the Dee, the Ribble, in England; the Bann, the Lee, the Laune, in Ireland; and larger than many other very productive and valuable Salmon streams in Britain.

The Tuross is the same size as the Bega, but not so transparent; its bed is more gravelly, and it flows through a country broken into steep, densely wooded ranges; thence it issues into a fine open alluvial country, and enters its estuary a little above Bodalla. The Gulph diggings are three miles from the banks of this river, on a flat, through which runs a small tributary, whose water is made quite thick by washing for gold. Unlike the other streams which I have observed where gold is washed, the mud subsides, or becomes partially filtered, imparting no perceptible tinge to the main stream. The mouth of the estuary affords excellent fishing ground. It also forms a safe and commodious harbour, entered by

a bar channel, which is neither intricate, nor difficult of access to small craft. At the first quarter flood I found six and half feet on the bar. On the 12th August, the temperature of the river was 44 degrees; estuary at Bodalla, 50 degrees; on the bar, 55 degrees.

The Moruya is not quite so large as the Tuross, but in character it is similar. At present, however, it is quite muddy from the effects of gold washing. Its temperature, September 15th, 48 degrees; Burra Rivulet, quite clear, a tributary, 46 degrees; estuary at the ferry, 55 degrees.

The Clyde, unlike the rivers already described, pursues a southerly course, parallel to and near the coast, until it enters its estuary, twenty miles above Nelligen. This is a beautiful stream, not so rapid as either of the others, but in August containing a larger volume of water. In fine, whilst the others possess all the characteristic features of the lively, rapid mountain rivers of Scotland, the Clyde is a true illustration of an English Salmon stream, such as the Severn; with lake-like pools in it of great depth, and well sheltered, where, in the lower stratum of water, a cool retreat will be afforded to the fish during the sultry summer weather. On the 18th of August the temperature of the water was 48 degrees; of the Currowan Rivulet, 46 degrees. This beautiful limpid gravelly brook is crossed by the road to Braidwood, fourteen miles from its entrance into the estuary of the Clyde, whose temperature at Nelligen was 54 degrees.

From the Clyde I went on to Braidwood, and journeying down thence, examining the river Shoalhaven and its affluents, I walked through some miles of the gullies. Thence, proceeding by way of Nowra to the highest point attained by the tide, at Mr. Thomson's station, Burrima, I traced the river upward. I find, by this examination, that with respect to acclimatizing Salmon, the Shoalhaven and its tributaries are similar in character to the Snowy and its affluents, inasmuch as the upper portion of both rivers possess all the physical requirements necessary for the purpose of naturalizing and propagating any member of the genus Salmon; but I am of opinion that the rapids of the gullies of this, as well as the rapids of the inaccessible portion of the Snowy, are too turbulent to risk entirely on their upper branches the success of this expensive and important experiment, especially as the lower portion of this and the other rivers reported upon are more suitable for experimental breeding purposes. Passing the gullies, the river assumes much the same aspect as the other streams described; it resembles, on a larger scale, many of the productive Salmon streams of Britain. It appears that all these rivers are subject to inundations and violent currents, which will prove destructive to the ova and fry. As an equivoque, however, to these destructive agencies—which point to the expediency of maintaining a system of artificial rearing—the rivers are singularly void of predaceous fishes, so what the floods spare are not likely to be devoured as prey. Thus far these rivers compare favourably with the Salmon producing streams of Britain; but the real question to be considered as affecting the experiment of acclimatizing Salmon, is the temperature of the climate and rivers into which it is proposed to put them. I may here observe, that the result of many experiments which I have made on the ova of Salmon prove that in water whose temperature exceeds 55 degrees a healthy condition of the ova will not be long maintained, and in a temperature of 60 degrees the ovum speedily expires. However, this condition of temperature is imperative only during the season of spawning and incubation, which in Britain extends over a period of six continuous months, beginning in September, and ending the following March; and inasmuch as the fact is well established, that Salmon have the power to suspend and modify their procreative functions, so as to suit the state of the waters in the rivers of their nativity, I infer that the fish in its ovum state, being deposited in suitable places in any of the rivers described (the temperature of the water not being dissimilar to that of its native habitat, as the subjoined table of temperature will show), it will in due season modify its habits so as to suit the seasons of its new country, precisely as have changed the season of domestic birds and animals imported hither.

It will be borne in mind that, in August, (when the Shoalhaven was examined, the mean temperature of the atmosphere had increased three or four degrees, which would have a tendency to increase the temperature of the water. In all cases I have given the mean temperature. I observed a singular circumstance in connection with this river and the Moruya:—I found the water to increase about two degrees in temperature, in proportion to its proximity to the gold-washing, and the consequent muddiness of the water.

The mean shade temperature of the atmosphere, observed on the plains of Monaroo, and on the banks of the Snowy, during part of the month of June, July, and part of August, noted at 7 a.m., noon, 3 p.m., and 9 p.m., was 38 degrees 5 minutes. In the month of August, when the temperature of the coast rivers was noted, the mean shade temperature was 44 degrees.

The New South Wales Observatory's temperature tables give the mean shade temperature of Cooma for the months—June, 39 degrees 4 minutes; July, 37 degrees 7 minutes; August, 41 degrees 2 minutes; and for January, the warmest month in the year, 65 degrees.

The "Kew" tables give the mean temperature for January, 39 degrees, and July 63 degrees—the warmest and the coldest month of the year.

I most respectfully submit that the above table of temperature justifies me in assuming that the Salmon and its varieties will readily become acclimated in the southern waters of the Colony, and will prove as prolific therein as in their native rivers.

With great deference I therefore recommend that, in addition to the introduction of Salmon ova for the purpose of acclimatising in the coast rivers, the ova of the most valuable non-migratory varieties of Salmonidæ should form part of the experiment. The ova of that invaluable species (for interior rivers), the Danubian Salmon also, by application to the Government of France, doubtless may be obtained, for the purpose of introducing with the other varieties into the upper branches of the Snowy, the Shoalhaven, and the Murray. The latter stream, no doubt, is as well fitted for their abode as either of the others.

After the most careful deliberation, I respectfully suggest that the following course be adopted, as being the most likely to ensure the ultimate success of the experiment of introducing and acclimatising Salmon in the Colony.

At the confluence of the Tantawangala and Bega is the best spot to erect the piscicultural establishment. This is the coolest and clearest stream; easy of access, easy to fish, and easy to watch, while there are greater facilities afforded for conveying the fish to market and transporting the ova to other rivers than is offered elsewhere. I have no hesitation in saying, that from this river, within ten years, all the streams adapted for this purpose in the Colony might be stocked with Salmon.

Breeding ponds, for the reception of various kinds of trout and Danubian Salmon, should be constructed at Kalkite, on the Snowy. From this point the Maneroo streams and the southern tributaries of the Murray could be stocked; whilst from ponds on the Shoalhaven, formed at Mount Ellington, fourteen miles from Braidwood, the streams of the plains and the northern affluents of the Murray would be supplied with ova.

A few tiles of salmon ova should be deposited in each of these ponds. My reason for recommending this is, that the chances of success would be thereby multiplied; and when they are developed into smolt, ready to pursue their migratory instincts, they can be marked and removed into any suitable river.

It may also be advisable to form a nursery for Salmon on the lower Shoalhaven, either at the junction of Yalwal or the Kangaroo.

With respect to the monetary value of either of the rivers which I have examined, I have to state that it is a well known fact, founded on ample experience of the peculiar instincts of Salmon, that a very small river indeed, managed by skilful artificial rearing, will produce any given quantity of fish, limited only by the capacity of the ponds.

It may be in place to remark here, that several writers on the acclimatisation question have spoken of the Australian rivers as being of a sluggish character, compared with Salmon streams in Britain. The above report will rectify this error, as far as regards the southern rivers.

Again it is mentioned, that the success of the experiment may be imperilled by the great abundance of predaceous fishes infesting these waters.

To this I reply, that the upper portions of the rivers examined by me are inhabited only by the eel, platypus, two small species of crustaceæ, and a minute number of the herring tribe; and, as I have elsewhere observed, aquatic birds are less numerous than in other countries; whilst in the lower portion of the same rivers, in addition to those already mentioned, only one or two varieties of the perch, mullet, and herring families, have their abode. I scarcely need remark, that not any of these fishes are in the slightest degree likely to affect the experiment.

The spacious firths, loughs, or estuaries, into which these rivers debouch, and which are in this country wrongly spoken of as "the river," have I suspect furnished the idea of sluggishness to the writers in question. These estuaries are visited annually, for the purpose of spawning, by immense shoals of a species of mullet, and other migratory fishes, which, no doubt, will be followed, as the herring, &c., are on the coast of Britain, by numerous fishes of prey; but these depart with the shoals which supply their natural food.

The

The objection urged, with respect to sharks, dog-fish, &c., is barely worthy of remark; inasmuch as practical fishermen well know that the shark and its congeners seldom or never attack a living vigorous fish (such as the Salmon), but prey upon dead animal matter, sick fishes, and fishes on the hook,—in fine, any garbage they can pick up. The only enemies to be feared are the porpoise and seal. Porpoises, apparently, are not so numerous on these coasts as they are on the shores of Europe; and, from the locality referred to, seals have been driven by the persecution of man.

For an estimate of the cost of the experiment of introducing Salmon ova, and of acclimatising the fish, as well as for further information in connection with this subject, I respectfully refer to the former Report which I had the honor of forwarding to the Government.

I may further remark, that the rivers which I have examined are very little known, even to the residents on their banks. But now, I trust that, for the object in view, this Report will be as gratifying to the inhabitants of the Colony, as a personal examination of the rivers in question was to me.

My impression was, when I left Sydney, that no other rivers but those which I had the honor of being instructed to examine were fitted for the reception of Salmon; but now I unhesitatingly affirm, that with respect to conformation, climate, and temperature of water, there is not an affluent of any of the rivers mentioned, that is not as well adapted to be the healthy abode of any fresh water species of Salmonidæ, as the fields and climate of the Colony have proved suitable to the procreation of imported quadrupeds.

In addition, I may observe that the result of the experiment with which I was entrusted, of introducing Salmon ova into Tasmania, proved incontestably the possibility of introducing ova into these Colonies, from the fact that, with a hurriedly fitted up and incomplete apparatus (which I had invented), the ova were conveyed in a perfectly healthy state into thirty degrees south latitude, and twenty-seven degrees west longitude, on the sixtieth day from Liverpool; and then their death ensued from an insufficiency of ice. It is just to state that the decision arrived at by the General Australian Association of London, to embark the ova that year, was protracted until the end of the spawning season, and the peculiar nature of the experiment leaving no choice of time or of a ship, together with the limited amount of funds at the disposal of the Society, sufficiently account for the incompleteness of the apparatus and the inadequate supply of ice.

In conclusion, I beg most respectfully to observe, that I trust the naturalization of this invaluable fish—invaluable both in a monetary and in a salutary point of view—will prove the preliminary step to the further development of the natural resources of the coast waters of this Colony, which, in their season, abound with most valuable, but hitherto entirely neglected shoals of migratory fishes.

To the nations inhabiting the northern shores of the Atlantic Ocean, migratory fishes have been from time immemorial a source of great and inexhaustible wealth; and the men engaged in the pursuit of these have proved in time of need their country's best defenders.

With great respect I beg leave to tender herewith my disbursements, and the additional cost of the survey.

I have, &c.,

ALEX. BLACK.

NEW SOUTH WALES.

COLONIAL MANUFACTURES.
(ENCOURAGEMENT OF.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Speaker and Members of the House of Assembly of the Colony of
New South Wales.

The Petition of the undersigned Manufacturers and other Colonists of New
South Wales,—

HUMBLY SHEWETH :—

That, in the opinion of your Petitioners, the course hitherto pursued by the Government, of sending to Great Britain for Machinery and other articles of Manufacture, which can be equally well made in this and the neighbouring Colonies, is highly detrimental to the interests of the Colonists generally, and to Manufacturers and their employes in particular.

That the large amount of unemployed skilled labour at present in this Colony, calls urgently for some action on the part of the Government to encourage Colonial Manufactures, and that, considering the varied and ample resources of this Colony, it is desirable, with a view both to justice and economy, that in future, articles required for the Government service should be obtained, if possible, in the Colony.

That in order to afford Colonial Manufacturers a fair opportunity for competition, it is advisable that Tenders should be invited here in all cases, for whatever supplies are required.

That the great difficulty which exists of procuring suitable employment for the numerous youth of the Colony, furnishes another cogent reason why the Government should, by every possible means, encourage the Colonial Manufactures.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to take the matter of their Petition into your most favourable consideration, and grant them such relief in the premises as may seem meet.

And your Petitioners will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

PROPOSED INCORPORATION OF PARRAMATTA.
(CERTAIN INHABITANTS.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Speaker and Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the Inhabitants and Householders of the Town of Parramatta,—

MOST HUMBLY AND RESPECTFULLY SHEWETH :—

That your Petitioners have viewed with surprise, through the papers, that the Honorable the Colonial Secretary had stated, in answer to a question from John Lackey, our respected Member, that he had advised the Executive Council to incorporate the Town of Parramatta as soon as the report had been received from the Surveyor General.

That your Petitioners would not have noticed the matter, had it not been stated by the Honorable Colonial Secretary, in an interview he had with Mr. Richard Webb and his son, that Petitions on both sides would not be taken any further notice of, and that they would have to begin again.

That your Petitioners, through Mr. Webb, pointed out to the Honorable Colonial Secretary thirty-nine (39) names in the Petition, dated 27th May last, who are not qualified to sign the said Petition under the Municipal Act of one thousand eight hundred and fifty-eight (1858); and again, in the supplementary Petition, dated 26th August last, thirty-seven (37) names more appeared under similar circumstances, besides ten (10) names which appeared without the authority or knowledge of the parties.

That your Petitioners humbly pray that your Honorable House will take the above premises into your serious consideration, and grant your Petitioners the power of supplementing, as the majority of householders are against the Town being Incorporated.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 126 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

METROPOLITAN CORPORATION BILL.

(CERTAIN CITIZENS OF SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Citizens and Ratepayers of the City of Sydney,—

RESPECTFULLY SHEWETH:—

That your Petitioners have learned, with feelings of alarm, that a Bill has recently been introduced into your Honorable House, entitled "A Bill to consolidate and amend the Laws relating to the City of Sydney," but which, in reality, is intended to grant to the Municipal Council of the City greatly increased and unreasonable powers of interference with the rights and property of the citizens and ratepayers, and to vest in the servants of the Corporation powers which will be highly dangerous to the best interests of the citizens.

That your Petitioners are advised and believe that many of the powers intended by the said Bill to be granted are unprecedented, and contrary to the principles of British legislation; and that if the Bill, as introduced, be passed into law, instead of providing for the good rule and government of the City, your Petitioners fear it will tend to destroy the peace, prosperity, and general interests of the citizens.

That, in the opinion of your Petitioners, the powers of the said Corporation should be greatly diminished rather than extended, and that the interests of the citizens require that the rights and duties of the said Municipal Council, and of their officers and servants, as well as the duties of the citizens, should be by law expressly limited and defined, so that the citizens may not be liable to oppression at the discretion of the said Council, or subject to the caprice of their servants, in any matter whatever.

That, in the opinion of your Petitioners, the Council should not have the power of levying rates to any greater extent than they have at present, and that, if the 76th clause of the said Bill should be passed, there is reason to fear that the citizens will be overburdened and oppressed to an extent not contemplated by the Legislature.

That the Bill assumes to vest in the City Surveyor the most arbitrary and tyrannical powers, without responsibility of any kind; and the citizens, who may be greatly injured or ruined by the exercise of such powers, are deprived of the protection to which, as British subjects, they are entitled, and left without remedy for the loss they may sustain by the wilful misconduct of such officer, who is made sole arbiter upon all questions between himself and the citizens, and, in respect of such matters, is also made independent of the Corporation.

That the Bill assumes to vest in the Corporation, powers which are at present vested in the Government and the Executive Council, and which by the present law are expressly withheld from the Corporation; and that if the said Bill should pass into law, it will authorize the Council to take private property without providing any security for compensation to the owners.

That, if the 104th and 109th clauses are passed into law, the City Surveyor will be authorized to demolish, without making compensation, many substantial and valuable houses which stand upon the private property of the owners, and which were either built in conformity with the existing law, or when there was no law to regulate the alignment of the streets, and such houses, in some instances, are now made to appear to have encroached upon the footpath, only because the kerbstones have been subsequently laid down too close to the houses, and not in accordance with the plans made and proclaimed under the Alignment Act.

That in some parts of the City, where the width of the streets has never yet been proclaimed, the kerbstones have been laid down within 12 feet of the houses which were already erected; and if the 104th and 109th clauses should be passed, whole rows of substantially built houses will be liable to be destroyed at the will of the City Surveyor, without any compensation to the proprietors, although in their erection no existing law was in the slightest degree violated.

That your Petitioners would respectfully point out to your Honorable House the following clauses, numbers 57, 69, 75, 76, 78, 85, 86, 88, 89, 90, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 107, 108, 109, 120, 134, and 135, which require the greatest consideration on the part of your Honorable House.

Your Petitioners therefore humbly pray that your Honorable House will either reject the said Bill, or make such amendments thereto as will protect your Petitioners and the citizens from the evils which would be inflicted upon them, if the Bill, as introduced, should become law.

And your Petitioners will ever pray, &c., &c., &c.

[Here follow 2,328 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

ENTRANCE TO LAKE MACQUARIE.

(INHABITANTS, &c.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Legislative Assembly of the Colony of New South Wales.

The Memorial of the undersigned inhabitants of Lake Macquarie and its vicinities, and of persons resident in the Hunter River District, or interested in the development of its resources,—

HUMBLY SHEWETH :—

That Lake Macquarie, situate between Newcastle and Brisbane Water, is an inlet of the sea, of considerable magnitude, being in length from north to south about thirty miles, and of an average width of about four miles.

That this so-called lake has a fair outlet to the sea, and for many years past small vessels have occasionally traded there for coal, &c., but it was found that no vessel capable of taking a remunerative cargo of coal could safely make the passage.

That the only obstruction to the passage is a sand bar, at a place where the water spreads over a considerable extent of surface, which obstruction your Petitioners believe would be removed by discharging ballast, so as to limit and contract the channel. Your Petitioners are strengthened in this belief because, in one spot where heretofore there was only about five feet of water, ballast has been so placed, and the water is now nearly twenty-five feet deep.

That the large expanse of water in the lake would be sufficient in its flow and flow to keep clear any channel once formed.

That the shores of the lake have upwards of three hundred miles water frontage, and present various sources of wealth, requiring only means of access to be made available, viz., vast and splendid seams of coal, rich agricultural land, and timber of the best quality, unlimited in quantity; added to these may be considered the large areas of Government land still unsold, and their eligibility as sites for manufactories or mining operations, for homesteads or country residences.

That the evidence of persons acquainted with the locality would prove to your Honorable House the facility with which this valuable tract of country, so valuable to the Government and to the people, could be opened up to use, and the great advantages to be derived therefrom.

Your Petitioners therefore humbly pray that your Honorable House will consider the matter of their Petition, and will take such action therein, by appointing a Committee of inquiry, or otherwise as to your Honorable House may seem meet.

And your Petitioners will for ever pray, &c., &c., &c.

[Here follow 275 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

DAM AT WALLIS CREEK.

(CERTAIN RESIDENTS, RAVENSFIELD, DAGWORTH, &c.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned Proprietors and Tenants of Land at Ravensfield, Dagworth, Farley, Bloomfield, Louth Park, Loehend, and neighbourhood, and of others interested therein,—

RESPECTFULLY SHEWETH :—

That, in the year 1858, the Government caused a portion of Wallis Creek, near its junction with the River Hunter, of which it is a tributary, to be dammed up for a railway crossing, and a channel to be cut from the Creek to the Hunter, in lieu of the part so dammed.

That, in consequence of the bed of the said artificial channel being higher, by about nine feet, than that of the natural one, a large part of the fertile and cultivated lands through which the Creek flows, comprising many thousands of acres, and which are drained by it, have repeatedly been inundated in wet seasons, to the destruction, more or less, of the crop and other property of the parties located thereon.

That the losses which have thus been occasioned, and are mainly traceable to the channel obstructing the proper discharge of the waters of the Creek into the Hunter, are estimated at £100,000.

That the channel has recently been deepened by the Government, and that the Creek and adjacent lands have since been drained to an extent unknown since the embankment was constructed and the channel made by the railway authorities.

That the lands which have been inundated are of a rich alluvial nature, and have in most instances been purchased by the present proprietors at £30 to £50 per acre; also that they were no more liable than other low lands of the District to inundations, before the alterations in question were made in the outlet of the Creek.

That your Proprietors have had no redress afforded them for the serious losses to which they have been subjected by the action of the Government, as herein stated.

Your Petitioners therefore humbly pray that your Honorable House will take the premises into its consideration, and adopt such measures in relation thereto as may seem to it just and expedient.

And your Petitioners will, as in duty bound, ever pray.

[Here follow 338 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

FLOOD GATES, WALLIS' CREEK.
(MAITLAND, MORPETH, AND THEIR VICINITIES.)

Ordered by the Legislative Assembly to be Printed, 13 November, 1861.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the Residents and Proprietors of Land in and about Maitland, Morpeth, &c.,—

SHewETH :—

That the undersigned residents of the towns and surrounding districts of Maitland and Morpeth, having heard with considerable regret that it is the intention of some of the proprietors of the low lands in the neighbourhood of Louth Park, Dagworth, and Farley, near Maitland, to petition your Honorable House to erect Flood Gates at the junction of Wallis' Creek with the River Hunter, and at the Railway Cutting, West Maitland, respectfully urge upon the consideration of your Honorable House the serious injury that would be caused to a considerable area of land in other localities if such Petition was granted, by flooding land and houses that at present have escaped, which, your Petitioners submit, will be the necessary consequence of stopping the natural egress of the large body of water created by a flood backing up the river, causing it to break over elsewhere, and inflicting calamitous injury upon a large number of people on land on the river bank, both above and below the junction of Wallis' Creek, by increasing the rush and height of water to a much greater extent.

Your Petitioners also urge that a considerable portion of the land in the locality known as Louth Park, Dagworth, and Farley, was, until the last few years, considered merely as lagoons or swamps, and only through the exertions of the proprietors reclaimed and rendered occasionally, in time of drought, capable of cultivation; therefore your Petitioners submit that the proprietors of those lands are not entitled to the same consideration, for having cultivated lands naturally liable to such contingencies, as the proprietors of land of ordinary security against such visitations..

Your Petitioners, therefore, humbly pray that your Honorable House will not take any steps to assist and improve a particular locality, to the injury and detriment of a much larger community.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 256 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

D R A I N A G E .

(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 26 November, 1861.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned Proprietors and Tenants of Land at or near West Maitland,—

RESPECTFULLY SHEWETH :—

That your Petitioners are impressed with the necessity of legislation on the question of Drainage.

That, in their opinion, no Bill which may be passed into law will meet the requirements of the country, unless it shall, among other things, empower the majority of Proprietors, in unions or associations, to drain all the land within their union, and to exact from each proprietor of the land drained his fair share of the cost thereof.

Your Petitioners, therefore, humbly pray your Honorable House will legislate accordingly.

And your Petitioners will, as in duty bound, ever pray, &c.

OSBORNE WALLSEND COAL COMPANY'S INCORPORATION
BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and Report was referred, on the 26th November last, the "*Osborne Wallsend Coal Company's Incorporation Bill*," beg leave to Report to your Honorable House,—

That they have examined one of the Proprietors of the Company* *W. Speer, Esq. (whose evidence will be found appended hereto), and that the Preamble having been satisfactorily proved by the evidence of that Gentleman, they proceeded to consider the several Clauses of the Bill, from which it was deemed expedient to expunge one Clause.*

* Clause 17. (*Vide*
Schedule of
Amendment.)

And your Committee now beg to lay before your Honorable House the Bill as amended by them.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

OSBORNE WALLSEND COAL COMPANY'S
INCORPORATION BILL.

FRIDAY, 6 DECEMBER, 1861.

Present:—

MR. T. GARRETT, | MR. MORRICE,
MR. RUSDEN.

T. GARRETT, ESQ., IN THE CHAIR.

G. W. Allen, Esq., appeared as Solicitor for the promoters of the Bill.

William Speer, Esq., examined:—

1. *By Mr. Allen*: Has the Company now seeking for incorporation been established? Yes.
2. How long? About three years.
3. What is the name of it? The Osborne Wallsend Coal Company.
4. Are you one of the proprietors? I am.
5. Do you produce the Deed of Settlement of the Company? I do. (*The witness produced the same.*)
6. What is the date of it? The 1st July, 1861.
7. Has it been executed by the proprietors? It has.
8. Will you tell the Committee the objects of the Company, as defined by the Deed of Settlement? "To work or contract for the working of the coal or other mines in or upon any land of which the said Company may from time to time be owners or lessees to purchase or lease coal or other mineral lands to follow up and act upon any trade or purpose mentioned in any regulations for the management or conduct of coal or other mines in the said Colony of New South Wales already promulgated or hereafter to be promulgated to purchase the necessary machinery for working the said mines or for testing the mining capabilities of any land purchased or intended to be purchased by the Company or for draining any mines or any other purpose in connexion therewith to export sell or otherwise dispose of all coal or other minerals to be raised from any land belonging to or leased by the said Company to dispose of the timber on any such land to lease or sell any such lands and to construct railways roads wharves and other matters necessary for the promotion of the objects of the said Company."
9. What is the capital of the Company? £50,000.
10. How contributed? In 10,000 shares of £5 each.
11. Is there any power to increase the capital? Yes.
12. By what means? "By the creation and sale of new shares of the like amount as herein provided."
13. Is there any provision in the Deed of Settlement for the management of the Company by Directors? Yes.
14. How? By the 30th clause it is provided, "That the parties hereto of the first and second parts shall be Directors of the Company until the first election by virtue of the Act of Incorporation and thereafter there shall be five Directors duly qualified as herein after provided and such Directors shall constitute the Board of Directors of the Company and shall possess and exercise all the powers herein conferred on the Board of Directors."
15. Is the Company desirous of being incorporated? Yes.
16. Do you consider it expedient that the Company should be incorporated? Yes.
17. Are the provisions of the Bill now before the Committee similar to the provisions of other Acts of Incorporation already passed by the Legislature? Yes.

PROCEEDINGS OF THE COMMITTEE.

MONDAY, 6 JANUARY, 1862.

MEMBERS PRESENT :—

Mr. T. Garrett, | Mr. Morrice,
 | Mr. Lewis.

T. Garrett, Esq., called to the Chair.

Printed copies of the "Bellambi and Bulli Coal Mining Company's Incorporation Bill," before the Committee.

Original Petition of Thomas Hale, of Bellambi, in the Colony of New South Wales, Gentleman, in opposition to the Bill, and praying to be heard by Agents or Counsel, against the passing thereof as introduced,—referred to the Committee, by direction of the Speaker, under the authority of the 68th Standing Order,—*produced*.

Parties called in.

Solicitor for the Bill—Mr. G. W. Allen.

Solicitor for Petitioner—Mr. W. Spain.

Petition against the Bill—*read*.

Whereupon, *Solicitor for Petitioner*, Mr. Spain, stated to the Committee that he withdrew his opposition to the Bill, as he had heard, whilst in the Committee Room, that the Promoters consented to amend the Title in accordance with the wishes of Petitioner.

Mr. William Speer, *one of the Promoters of the Bill*, examined.

Room cleared.

Committee deliberated.

Preamble of Bill considered, and certain Amendments therein agreed to.

Motion made (*Chairman*) and *Question*—That the Preamble, as amended, stand part of the Bill—*agreed to*.

Parties called in and informed.

Clause 1 read, and on motion of Mr. Morrice, amended. (*Vide Schedule of Amendments*.)

Clause, as amended, agreed to.

Clauses 2 to 13 inclusive read, and agreed to, without amendment.

Clause 14 read, and on motion of Mr. Morrice *blanks* supplied (*Vide Schedule of Amendments*.) Clause then agreed to.

Clause 15 read and agreed to, without amendment.

Clause 16 read, and on motion of Mr. Morrice amended. (*Vide Schedule of Amendments*.)

Clause, as amended, agreed to.

Clause 17 read and negatived.

Title then read, amended, and agreed to.

Chairman requested to report the Bill, as amended, to the House.

WITNESS.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

BELLAMBI AND BULLI COAL MINING COMPANY'S
INCORPORATION BILL.

MONDAY, 6 JANUARY, 1862.

Present:—

MR. GARRETT, | MR. LEWIS,
MR. MORRICE.

T. GARRETT, ESQ., IN THE CHAIR.

G. W. Allen, Esq., appeared as Solicitor for the Promoters of the Bill.
W. Spain, Esq., appeared as Solicitor for the Petitioner against the Bill.

William Speer, Esq., examined:—

1. *By Mr. Allen:* You are one of the proprietors of the Bellambi and Bulli Coal Mining Company? I am.
2. One of the original proprietors? Yes.
3. You are also one of the provisional Directors of the Company? I am.
4. Has a Company been formed in the Colony of New South Wales, under the style of the Bellambi and Bulli Coal Mining Company? Yes.
5. Is there a deed of settlement of that Company? There is.
6. Do you produce it? I do. (*The witness produced the same.*)
7. What is the date of it? The 1st October, 1861.
8. Is the Company established under and subject to the rules, regulations, and provisions contained in that deed? Yes.
9. Has that been executed by any of the proprietors? By several.
10. Is all the stock taken up? It is.
11. Is any portion of it paid? Yes.
12. How much? Ten per cent. upon the stock is paid.
13. And the remainder is called for in instalments? Yes.
14. What is the object of the Company? The shareholders have mutually covenanted and agreed that they, whilst holding shares in the capital of the said Company, shall be and continue until dissolved, a Joint Stock Company or partnership to work the coal or other mines in or upon any land of which the said Company may from time to time be owners or lessees, to purchase or lease coal or other mineral lands, to follow up and act upon any trade or purpose mentioned in any regulations for the management or conduct of coal or other mines in the Colony already promulgated or to be promulgated, to purchase the necessary machinery, to work the said mines, or to test the mining capabilities of any land purchased or intended to be purchased by the Company, or to drain any mines, or any other purpose in connection therewith, to export, sell, or otherwise dispose of all coal or other mineral to be raised from any land belonging to or leased by the Company, to dispose of the timber on any such land, to lease or sell any such land, and to construct railways, roads, wharves, and other matters necessary for the promotion of the objects of the said Company.

Wm. Speer,
Esq.

6 Jan., 1862.

BELLAMBI AND BULLI COAL MINING COMPANY'S INCORPORATION BILL.

- Wm. Speer, Esq.
6 Jan., 1862.
15. What is the capital of the Company? £70,000.
 16. In how many shares, of what value? 7,000 shares at £10 each.
 17. Is there power in the Deed of Settlement to increase the capital? Yes.
 18. How? By the creation and sale of new shares.
 19. Is there any provisions in the deed for the management of the affairs of the Company by directors? Yes.
 20. Are there any directors already appointed? Yes.
 21. Is there provision in the deed for the appointment of successors? Yes.
 22. By whom, and from amongst whom? The shareholders.
 23. Is the Company desirous of being incorporated? Yes.
 24. Since the preparation of this Bill, has it been agreed that the title of this Company shall be altered to the Bulli Coal Mining Company? Yes.
 25. Is the Company desirous of being incorporated under that title? Yes.
 26. And you consider it expedient that the Company should be so incorporated? Yes.

Legislative Assembly.

NEW SOUTH WALES.

SCIENTIFIC EXPLORATION FOR MINERALS.
(CAPTAIN MECHOSK.)

Ordered by the Legislative Assembly to be Printed, 31 December, 1861.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Merchants, Professional Men, Tradesmen, and other Residents of the Territory of New South Wales,—

RESPECTFULLY SHEWETH:—

That your Petitioners are deeply interested in the search for, investigation, and development generally, of the Mineral resources of New South Wales, comprising not only gold, but also silver, copper, lead, and other precious metals, believing that the prosperity of the country is largely dependent on the same.

That your Petitioners have been informed, and believe that a more minute exploration of the Colony, on a systematic basis, would, in all probability, prove that New South Wales is the most rich in mineral wealth of all the Australian Group.

That therefore, it is, as your Petitioners humbly suggest, of absolute necessity that some person or persons, specially qualified for the task, should be appointed to survey, examine, and report upon the comparatively unopened, and hitherto partially developed resources of this Colony.

That the arrival in Sydney of Captain J. G. Mechosk, distinguished as the most successful discoverer of gold and other precious metals in Victoria and Queensland (and who, from his scientific education, and specific experience in the matter now brought before your Honorable House, is particularly qualified for carrying out these views) presents such an opportunity as your Petitioners respectfully hope may not be lost. The Legislature of Victoria have by a special grant acknowledged the importance of Captain Mechosk's services there—particularly in the discovery of the Gold Fields at Tarrengower, Jones' Creek, Kingower, and Maryborough. This gentleman having now recovered from a long and severe illness, and being anxious to resume his labours, it is respectfully advanced may warrant your Petitioners' request that his services may be made available for the benefit of New South Wales.

Your Petitioners therefore humbly beg, that some action in the premises may be forthwith taken by your Honorable House, such as shall encourage a scientific Exploration for the various Minerals of New South Wales; and obtain, if to your House shall seem meet, the assistance and co-operation of Captain Mechosk, towards that object.

And your Petitioners will ever pray, &c.

[Here follow 1,209 Signatures.]

1861.

Legislative Assembly.

NEW SOUTH WALES.

LAND TITLES DECLARATION BILL, AND LAND
TRANSFER AND REGISTRY BILL.
(PETITION.)

Ordered by the Legislative Assembly to be Printed, 31 December, 1861.

To the Honorable the Legislative Assembly of New South Wales.

In the matter of the following Bills, now before this Honorable Assembly, namely:—

The Land Titles Declaration Bill;
The Land Transfer and Registry Bill;
The Deeds Simplifying Bill.

The humble Petition of the undersigned Certificated Conveyancers,—

RESPECTFULLY SHEWETH:—

That under the 14th Section of the Act of the Colonial Legislature of New South Wales, 11th Victoria, No. 33, entitled, "*An Act to regulate the taxation of Attorneys' Bills of Costs and the practice of Conveyancing,*" your Petitioners, amongst others, were admitted Conveyancers, and obtained Certificates authorizing them to practice as Conveyancers and to prepare Deeds.

That the proposed Acts will have the effect of almost entirely depriving your Petitioners of their only profession, by reason that certain duties are to be only done by Solicitors, which, by the Act under which your Petitioners were admitted, they were authorized to do.

And your Petitioners, therefore, humbly pray that your Honorable House will take your Petitioners' case into consideration, and will enact whatever shall be reasonable and just, and that your Petitioners, or some or one of them, may be heard, with or without Counsel, at the Bar of your Honorable House, or before the Committee to which these Bills may be referred, in respect of their grievances.

And your Petitioners will ever pray, &c.

[*Here follow 4 Signatures.*]

6.	Colonial Secretary to Edward Hamilton, Esq., requesting his co-operation in procuring a supply of Cotton Seed. 21 September, 1861	3
7.	Under Secretary to Edwin A. Hickey, Esq., and Thomas S. Mort, Esq., apprising them of the steps taken for procuring a supply of Cotton Seed. 10 October, 1861.. .. .	4
8.	Mr. Hamilton to the Colonial Secretary, stating the measures he has taken for procuring and forwarding a supply of Cotton Seed to the Colony. 26 November, 1861	4

PURCHASE OF COTTON SEED.

No. 1.

MESSRS. E. A. HICKEY AND T. S. MORT to HIS EXCELLENCY THE GOVERNOR.

Sydney, 22 August, 1861.

SIR,

In the interview your Excellency kindly granted to us last week, respecting the want of cotton seed in this country, your Excellency promised to bring the subject before your Executive Council, with the view of placing a sum on the Estimates for the purchase of seed in the United States.

We now take the liberty of bringing the question before your Excellency in writing, and to say that, on inquiry, we find the price of seed in *Charleston* is from six to seven dollars per barrel of two cwt., and the freight to Sydney about 50s. for eight barrels.

As it is of the greatest consequence to obtain seed of this year's growth, we beg to recommend that whatever sum may be granted by the Legislature for this object, should be forwarded to the Cotton Association of Manchester, to purchase the cotton seed through their agents in the Southern States of America, as that Association feels deeply interested in the cultivation of cotton in this country.

We have, &c.,

EDWIN A. HICKEY.
THOS. S. MORT.

No. 2.

MR. E. A. HICKEY to COLONIAL SECRETARY.

Osterley, 24 August, 1861.

DEAR SIR,

I find that a sum of two hundred pounds will introduce cotton seed to plant about 270 to 300 acres of land; that is, for the purchase of the seed and the freight. If there should be any expenses attending the purchase of this seed, such as commission, &c., the quantity would be to that extent reduced.

If the money is sent to the Cotton Association, I have no doubt they will materially assist this movement, and I propose to write very strongly on the subject to Mr. Bazley, who is one of the leading men of the Association, and with whom I have a personal acquaintance.

This note may be attached to the letter which Mr. Mort and myself addressed to the Governor during your absence, if you see no objection.

Believe me, &c.,

EDW. A. HICKEY.

P.S.—An acre of cotton requires from one and a half to two bushels of seed.

No. 3.

MESSRS. E. A. HICKEY AND T. S. MORT to COLONIAL SECRETARY.

Sydney, 4 September, 1861.

SIR,

With reference to a letter we had the honor of addressing to His Excellency the Governor during your absence at Melbourne, respecting a supply of cotton seed for this country, we now take the liberty of suggesting that whatever sum may be appropriated for this purpose should be sent either to the Cotton Association of Manchester, through their Chairman, or to Thos. Bazley, Esq., M.P., who is a leading member of the Association, and takes a deep interest in the growth of cotton in Australia.

With this money it is desirable to purchase cotton seed of *this year's growth*, in the proportion of one-third of the Sea Island and two-thirds of the New Orleans varieties, and to ship the same at New York for this country direct. The Cotton Association will most willingly do this through their agent at that place, and we feel persuaded will take every pains to secure us the latest and soundest seed.

We are, &c.,

EDWIN A. HICKEY.
THOS. S. MORT.

No. 4.

No. 4.

THE UNDER SECRETARY to UNDER SECRETARY FOR FINANCE AND TRADE.

*Colonial Secretary's Office,
Sydney, 19 September, 1861.*

SIR,

I am directed by the Colonial Secretary to request that you will state to the Colonial Treasurer that, in a communication addressed to His Excellency the Governor by Messrs. Mort and Hickey, the attention of the Government has been drawn to the scarcity of cotton seed in the Colony, and a request preferred that a sum of money may be granted for the purchase of a supply through the intervention of the Cotton Association in Manchester.

2. Impressed with the expediency of promoting the growth of cotton in those parts of the Colony adapted to its culture, the Executive Council have advised that a sum of £200 be appropriated for the purpose, from the vote for unforeseen expenses.

3. It is proposed to remit this sum to Edward Hamilton, Esq., of 5, Cannon-street, London, E. C., with a view to his taking the necessary steps for procuring the seed, which it has been suggested should be shipped at New York direct for Sydney, through the medium of the Cotton Association of Manchester, and I am therefore desired to request that you will move the Colonial Treasurer to cause a letter of credit in favour of Edward Hamilton to be forwarded to the Colonial Secretary, for transmission to him by the present mail.

I have, &c.,
W. ELYARD.

No. 5.

ACTING UNDER SECRETARY FOR FINANCE AND TRADE to THE UNDER SECRETARY.

*The Treasury, New South Wales,
21 September, 1861.*

SIR,

In accordance with the request contained in your letter above referred to, I am directed to enclose herewith letter of credit, No. N. S. W. G. 11-36, on the Oriental Bank Corporation, London, in favour of Edward Hamilton, Esq., for the sum of two hundred pounds.

I am at the same time to request the favour of an acknowledgment of the receipt of the said letter of credit.

I have, &c.,
JNO. WELLS,
Acting Under Secretary.

No. 6.

COLONIAL SECRETARY to MR. E. HAMILTON.

*Colonial Secretary's Office,
Sydney, New South Wales,
21 September, 1861.*

SIR,

I have the honor to transmit to you copies of two letters from Messrs. Mort and Hickey, urging this Government, with a view to encourage the growth of cotton, to grant a sum of money for obtaining a supply of seed for distribution in New South Wales, from America; and to inform you that, fully impressed with the importance of the object, the Government has appropriated two hundred pounds for this purpose. £200

2. You will observe that it is suggested in the letter from Messrs. Mort and Hickey, that the Cotton Association of Manchester, or Thomas Bazley, Esq., M.P., stated to be a leading member of the Association, would afford their assistance in obtaining the cotton seed, which they consider had better be shipped at New York for this country.

3. The Government will be glad if you will have the goodness to take the necessary steps, through the Association referred to, or otherwise, for having a supply of cotton seed of this year's growth forwarded to Sydney with as little delay as convenient; and I therefore transmit to you a letter of credit on the Oriental Bank Corporation in London, in your favour, for two hundred pounds, being the sum which, as before stated, has been granted for the purchase, and defraying the expenses of sending the seed to this place. From the willingness with which you have on all occasions complied with the wishes of the Government; to further objects of interest to the Colony, I feel assured of your cordial co-operation in this matter; and I beg to assure you that your efforts will be duly appreciated. £200

I have, &c.,
CHARLES COWPER.

No. 7.

THE UNDER SECRETARY to MESSRS. E. A. HICKEY AND T. S. MORT.

*Colonial Secretary's Office,
Sydney, 10 October, 1861.*

GENTLEMEN,

With reference to your letter of the 22nd and 24th August last, and 4th ultimo, respecting the want of cotton seed for this country, I am directed by the Colonial Secretary to inform you that a letter of credit for £200 was forwarded by the last overland mail, to Edward Hamilton, Esq., with a request that he would take the necessary steps, through the Cotton Association of Manchester, or otherwise, as suggested by you, for having a supply of seed forwarded to Sydney with as little delay as possible, direct from America.

I have, &c.,

W. ELYARD.

No. 8.

MR. E. HAMILTON to COLONIAL SECRETARY.

*5, Cannon-street,
London, 26 November, 1861.*

SIR,

I have the honor to acknowledge the receipt of your despatch, No. 61/73, dated 20th September, 1861, enclosing an order on the Oriental Bank for £200, and instructing me to apply it to the purchase and freight to the Colony, of American cotton seed, of this year's growth.

From the correspondence enclosed with your Despatch, I observe that it is suggested that the seed should be purchased in New York, by the agent of the Cotton Supply Association of Manchester, and forwarded direct from New York to Sydney, and that the proportion should be one-third of the Sea Island and two-thirds of the New Orleans varieties. In their letter to His Excellency Governor Sir John Young, Messrs. Hickey and Mort estimate the purchase price in New York at six to seven dollars per barrel of two cwt, and the freight at 50s. for eight barrels; whether this estimate of first cost is correct or not I can form no opinion, but I suspect that it is considerably below the mark in the English market.

From the enclosed correspondence on this subject between myself and Mr. Bazley and the Secretary of the Cotton Supply Association, you will see what steps I have taken to execute my commission, and you will not fail to observe that my consent to the appropriation of the £200, in the manner suggested by Mr. Bazley, is conditional on my receiving an assurance that the quantity freely given by the Association is not materially less than that which the balance of the £200, after providing for the expense of freight, would purchase. It appears that tin cases will be required to protect the seed from injury on the voyage.

I venture to suggest that Mr. Bazley's services on this occasion, and the liberality of the Cotton Supply Association, should receive a special official acknowledgment.

Hoping that you will be satisfied with the course I have pursued, and with an assurance of the pleasure it gives me to assist in furthering any scheme for the advancement of the prosperity of New South Wales,—

I have, &c.,

EDWD. HAMILTON.

[Enclosure 1 in No. 8.]

*5, Cannon-street, London,
15 November, 1861.*

My dear Sir,

By the Australian mail, which arrived yesterday, I have received from the Government of New South Wales instructions to send out, with as little delay as possible, a quantity of "cotton" seed of this year's growth, in the proportion of one-third of the Sea Island and two-thirds of the New Orleans varieties, the same to be shipped direct from New York for Sydney; and a sum of £200 has been remitted, to be applied to the cost of purchase and the expense of freight.

In my letter of instructions you are mentioned as certain to give me advice and assistance, and I shall feel truly obliged if you will kindly put me in the right way of executing my commission.

I wish I could see more disposition on the part of English manufacturers to take part in some *bona fide* attempt to introduce the cotton plant into Australia. The colonists are eager to turn the present crisis to account; but they distrust the venture, because English capitalists, who are so much interested in its success, hold back.

Hoping you will excuse this trespass upon your time,—

Thomas Bazley, Esq.

I am, &c.,

EDWD. HAMILTON.

[Enclosure

PURCHASE OF COTTON SEED.

[Enclosure 2 in No. 8.]

New Bridge Mills, Manchester,
18 November, 1861.

My dear Sir,

I have been duly favoured with your very welcome letter. To-morrow I shall attend a meeting of the Committee of our Cotton Supply Association, when I will endeavour to procure a free grant of cotton seeds and of cleaning gins for New South Wales, and I will write to you the result of my efforts. Cotton growing, judiciously entered upon, will yield to the planter in Australia fifty per cent. profit, and the direct advantage of this profit will be derived by the Colony, the general interests of which will be promoted by the introduction of a new industry; and I therefore infer that the solid benefit of entering upon the cultivation would more largely enrich the colonist than the manufacturer here. I shall be most happy in affording you every assistance in my power.

Believe me, &c.,
THOS. BAZLEY.

E. Hamilton, Esq.

[Enclosure 3 in No. 8.]

New Bridge Mills, Manchester,
21 November, 1861.

My dear Sir,

The members of the Committee of the Cotton Supply Association have granted, on your application,—

- 500 lbs. New Orleans cotton seed.
- 500 lbs. Egyptian ditto.
- 100 lbs. Sea Island ditto.

and two Macarthy cotton cleaning gins.

The cotton seed will in a week or two be sent to your care in bags, but before shipment the seeds must be enclosed in small tin boxes, the expense of which you must please defray, with cost of carriage to London. I will try to get the two gins packed for shipment.

May I recommend you to invest any portion of the £200 which you can spare in a further supply of gins and of light ploughs, unless you think the latter can be easily obtained in Sydney. Cotton seeds are now very difficult to obtain, and if possible I would have procured a larger supply of Sea Island, but I could not.

Believe me, &c.,
THOS. BAZLEY.

E. Hamilton, Esq.

P.S.—It is probable that Egyptian seed will best suit New South Wales.

[Enclosure 4 in No. 8.]

Manchester, 23 November, 1861.

Sir,

Your application on behalf of the Government of New South Wales was brought before the Executive Committee on Tuesday. I have the pleasure to inform you that it was acceded to, with one partial exception, namely, as regards the Sea Island seed. Of this we have only a small quantity, and find great difficulty in obtaining more. We will however endeavour to spare you 50 lbs. of it.

The grant will stand thus :—

- 500 lbs. New Orleans seed.
- 500 lbs. Egyptian do.
- 50 lbs. Sea Island do.
- 2 Macarthy gins.

These shall be forwarded to your address, as soon as our new stock of Egyptian seed arrives in Liverpool.

I expect in a few days at farthest to receive advice of its having reached that port.

I am, &c.,
S. O. SUTTON,
Interim Secretary.

E. Hamilton, Esq.

[Enclosure 5 in No. 8.]

5, Cannon-street, London,
25 November, 1861.

Sir,

I beg to acknowledge with many thanks your letter of the 23rd instant, informing me that the Cotton Supply Association have made a donation of a large quantity of cotton seed and two Macarthy gins to the Colony of New South Wales.

My instructions are to obtain seed of this year's growth, in the proportion of one-third of the Sea Island and two-thirds of New Orleans varieties. I shall be glad to be informed by you that the seed complies with the first condition, in being of this year's growth; as to the proportion between the two varieties, I apprehend that, under the circumstances, the Colony must take what is offered, but I should willingly pay for the required quantity of the Sea Island variety if it is to be had for money, as the colonists may attach importance to the possession of a considerable quantity of the finer sort. I have written to Mr. Bazley, who has so kindly introduced the Colony to the notice of your Association, to say that if there is no possibility of obtaining a larger quantity of the Sea Island seed by payment, and the quantity offered by the Association represents somewhere about £200 in value, he will oblige me by appropriating the £200 in any way that he may think most conducive to the success of this first experiment in New South Wales, and I have no doubt that he will advise with you on the subject.

In his letter of the 21st, he says that the seed will be sent to this office in bags, where it will have to be packed in tin cases for shipment. Could you oblige me by having this done in Manchester, at the cost of the Colonial fund. If you can, and can afford the same assistance in securely packing the gins and light ploughs, the packages might all be forwarded to the care of our shipping brokers, Messrs. Davitt and Moore, No. 9, Billiter-street, London, E. C.

I will trust to you to express to the members of the Association my acknowledgment for the very liberal manner in which they have promoted the wishes of the Colonial Government.

I am, &c.,
EDWD. HAMILTON.

To the Secretary of the
Cotton Supply Association,
Newall's Buildings, Manchester.

PURCHASE OF COTTON SEED.

[Enclosure 6 in No. 8.]

5, Cannon-street, London,
25 November, 1861.

My dear Sir,

You will think me a bad man of business when I tell you that I have no copy of my last letter to you, and that the contents of it have escaped my recollection; I therefore again address you in reply to your communication of the 21st instant. The Colonial Government will be very much gratified with the liberal manner in which, under your recommendation, the Cotton Association of Manchester has responded to their appeal, and I feel sure that a special recognition of your and their assistance will be made.

As to your suggestion that the £200 should be expended "in a further supply of gins, and of light ploughs," I should not hesitate for a moment, if the quantity of cotton so munificently presented to the Colony represents in value £200, minus the cost of freight from New York, for my instructions are so to apply the money; you will therefore oblige me by taking care that, either by donation or purchase, the Colony gets the full amount of cotton ordered, and if that condition is complied with, I think that I cannot better serve the Colony than by placing at your disposal the whole sum of £200 remitted to me, to be expended in such a way as may appear to you most conducive to the success of the experiment which the colonists are intent on trying.

In reply to a letter received this morning from the Cotton Supply Association, I must call their attention to one part of my instructions "that the seed should be of this year's growth." It is hardly fair to look into the mouth of a "gift horse," but I feel bound to endeavour to obtain the article that was ordered.

I have, &c.,
EDWD. HAMILTON.

Thomas Bazley, Esq., M.P.
